DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY TRANSFERRED FROM Y.KRIMGOLD TO KOLLEENY TO I. ISLAM. 6/6/05- Site's only GW contamination is being treated by injecting Permeox Plus and monitoring the GW sampling results for VOCs, Napthalene and DO by URS Corp. since 2003.The VOCs in GW has reduced substantially but still persits in two wells exceeding GW quality guidance values. Routine monitoring to continue. - II 8/29/05- Reviewed Apr.-June/05 monitoring report. Wells MW-04 and MW-10 still show exceedances of VOCs. Well MW-03 had a s history of minor exceedances of VOCs and couldn't be sampled in the sampling event(Apr/05) due to

30 PRECINCT NYPD -DDC (Continued) **S102239268**

inaccessibility. But MW-03 is excluded from the contamination plume as per Fig. 2D of this report. It is indicated in the report that some of the injection wells have plugged resulting in decrease in in-take of the injected Permeox Plus, and URS plans to install two new injection wells in the vicinity of wells MW-04 & MW-10 which exhibit elevated contaminant levels. The Dept. concurs with URS's plan but advises to include MW-03 for GW sampling and monitoring as well.- II 3/09/06: This spill transferred from I. Islam to Q. Abidi. 5/04/06: Contacted to Ms. Jane Staten (URS) on phone. For this site drillers are on board, they plan to over drill some of the ORC injection well to help delineate the dissolve phase. MW-4 and MW-10 had high concentration when last sampled in August 2005, but they decreased from previous round. The drilling work probably start in June 2006 by Envirotrac, when they get the lab contract approved. -QA 8/18/06 DEC lead transferred from Q. Abidi to J.A. Maisonave. - JAM 9/26/06 Received Request of Spill Closure dated Sept. 15, 2006. GW samples were taken on June 6 and July 31, 2006. Although the latest GW analytical data showed that three compounds exceeded criteria in wells MW-4 and MW-10, the contamination is very minor and will naturally attenuate over time. No exceedances of criteria were detected in the previous GW samples collected at these wells. GW is not a source of potable water, and there are no apparent exposure pathways since its an asphalt covered parking lot. This spill case will be closed and a NFA letter will be issued. - JAM"

Remarks: "caller is removing tanks from site and found contaminated soil. Also see spill # 9515344."

HW Code:	C231063
SWIS:	3101
Town:	New York City
Record Added Date:	08/07/2008
Record Updated Date:	02/20/2009
Update By:	MOBARRIE
Site Description:	The site is a 0.341 acre commercial property on the south-east corner of 145th Street and 7th Avenue (a.k.a. Adam Clayton Powell Jr. Blvd.) in a commercial / residential area in the north-west area of Harlem, NYC. The property was recently reclassified as residential. The original documented structure on the property was a movie theater that operated from 1939 to 1979. From circa 1979 until recently, a supermarket operated on the property in the same structure. Except for a loading dock driveway, the structure encompasses the entire lot. There is significant petroleum-related VOC and SVOC contamination in on-site groundwater from a gasoline spill originating at the adjacent ExxonMobil station (Spill # 0751061, PBS# 2-157929). A Phase I investigation found that no history of detrimental environmental impacts and no history of industrial or commercial activity that could have resulted in environmental impacts. A Phase II investigation found no evidence of an on-site source. Of ten soil samples from five on-site locations, six PAHs were found in three samples above Part 375 restricted residential soil cleanup objectives. The contamination found on-site is due to the off-site source at the adjacent gas station. The BCP Application was denied in a letter dated 2/18/09.
Env Problem:	Information submitted with the BCP application regarding the environmental conditions at the site are currently under review and will be revised as additional information becomes available.

PBS : 2-401935 A TTF letter will be sent momentarily. A failing TT Result has been uploaded on D2 for reference. 11/5/15: Mahat DEC Mahat received a call from retained Contractor [ABC - Donna] informing that she has proposed to remove the tank. Once the tank is removes from the place, end point sample will be taken if necessary. A complete tank closure report will be submitted to DEC DeMeo for closure of the spill. DEC is waiting for closure report. 12/18/15 TJD Closure report has been submitted by ABC Tank. 2500 gallon AST failed tightness test with a reported dry leak on 7/28/15 by another contractor (All Boro). Cause of leak as described on TTF report was a Pre-cut leak on tank top and leaking copper fitting at gauge. Tank was removed from service and (2)temp tanks were installed (Riteway) ABC removed concrete containment and discovered old clean coal with no petroleum impacts. The tank has been removed by ABC and a tank replacement is pending spill closure. Photos and statements made by ABC in closure report indicate no product discharge. All Boro

MULTI DWELLING (Continued) **S117853803**

was contacted for an explanation of pre-cut leak - Chris Quintana describes the reported condition as an old cut access (tank cleaning) that was not welded closed but sealed with epoxy that failed. Based upon the documentation provided no further action is required. All documentation has been uploaded to DECDOCS. Spill closed."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was MULQUEEN WORKING ON GAS LINE TOOK SAMPLE WILL REMOVE SOIL. 1/29/99 - LANGSAM PROPERTY TRYING TO SELL AND CONTACTED DAWN JOHNSON AT HESS REGARDING THE SPILL REPORT. TOLD DAWN THAT THEY HAD ABANDONED FILL THAT NEEDED INVESTIGATION. con ed e2mis notes 114551 Gas construction crew excavating for a leaking gas service on the sidewalk found soil contaminated with fuel oil. The oil is coming from an abandon fuel line on the sidewalk. The gas crew is in the process of removing the soil and placing it into 55 gallon drums. The soil will be removed to the district yard. The drums will be labled and samples will be taken for oil finger print, pcb's and tph. The fuel spill was not caued by Con Edison however we will have to clean up the spill so we can continue our work. L.FARO 34079 update,78189,paul lonseth, lab analysis indicates no pcb's present in sample. added resolved date and stop date changed opn field. Logger Kenneth Heyman #96534 11/04/02 13:30 Update: This is a very old spill and it is difficult to get additional information on this. Since this is a 3rd party spill and Paul Lonseth reported that the lab results report non-hazardous I will CLODE this spill and remove the resolve date.

445 WEST 153RD ST (Continued) **S104504193**

06/16/06: This spill is transferred from Mike Mulqueen to Mr. Koon Tang. 9/24/10 - Austin - Un substantiated report of contamination - spill closed - end"

(631) 271-9292 Fax (631) 271-9345 email: fgehrling@gallieng.com left message at A&C development. from area map, Mobil gas station (PBS #: 2-157929, station manager: 212-926-5643) is next to subject site along W 145th Street. found two old closed cases at gas station (spill #s: 9008914 & 0507314). Mobil station is on east of subject site, towards Harlem river. (in general, mobil station is on down gradient from site) alternate addresses for the subject site: 160-164 W 145th Street, 2495-2499 7 Ave, 2495-2499 Adam C Powell Blvd received email from Frank with sampling location plan. there were nine geotechnical borings (B-1 to B-9; no environmental data) and five soil borings (SB-1 to SB-5; for Phase II) done. soil borings went to 12 ft, except SB-3 which had refusal at 8 ft. groundwater sample was collected adjacent to geotechnical boring B-3, at the

EMPTY COMMERCIAL BLDG. (Continued) **S108764509**

northeastern corner of the building. The Mobil gas station is adjacent to the subject property. The USTs are about 30' from B-3. The groundwater sample had a very strong odor of gasoline and there was a layer of free product in the sample jar. 09/17/07-Hiralkumar Patel. received message from Sandra Acosta. left message for Sandra. received call from Ms. Acosta. she mentioned that currently site has two story vacant building, which was a super market. building was running on gas heating sustem. as per Ms. Acosta there are no tanks on-site. asked Ms. Acosta to submit copy of Phase I report and scaled site map with sampling locations. as part of redevelopment, they will demolish existing building and will construct residential complex with parking in basement. as per Ms. Acosta, basement floor will be 14 ft bg. told Ms. Acosta that RAP must be approved prior to any development at site. received Phase I from Ms. Acosta. abstract: - entire site is covered by a two-story building - property is approx. 30 ft above mean sea level - regional groundwater flows in east direction towards the Harlem river - as per site owner, supermarket was operational for more than 20 years - current building first appear on the 1939 Sanborn Map 09/26/07-Hiralkumar Patel. sent letter to Ms. Acosta requiring soil/groundwater delineation, site specific groundwater flow direction, interim remediation and vapor barrier installation. letter emailed to Ms. Acosta and Frank. re-sent letter with DEC Vought's name as project manager. 10/03/07-Hiralkumar Patel. received email from Ms. Acosta with sample analyticals and site map. found some SVOC contamination in soil samples, but heavy contamination in groundwater sample. few values of groundwater contamination: ----------GW-1
2-Methylnaphthalene----------51,000
Naphthalene----------55,000
1,2,4-Trimethylbenzene------540,000
1,3,5-Trimethylbenzene------550,000
Benzene----------28,000
Toulene----------290,000
Ethylbenzene----------360,000
Xylene----------1290,000
MTBE----------4,300 sent email to Ms. Acosta requiring further investigation, as mentioned in letter. 10/31/07-Vought-File review by Vought: Letter from DEC Patel to Sandra Acosta (A&C Development)-9/26/07. CSL sent to Acosta requiring delineation of soil and groundwater via installation of monitoring wells 2)delineation of soil contamination 3)implementation of interim remedial measures including weekly recovery and monitoring of free product 4)installationof vapor barrier and possibly SSDS(note possible reference to vapor phase contamination in Galli Final Phase II Report) 5)collection of endpoint soil samples if soil contamination is noted during excavation for foundation. Final Phase II Investigation Report (A&C Development Partners amd Galli Engineering)-10/4/07. Site is E designated. Galli recommends installation of three monitoring wells. No source of petroleum contamination was identified in soils at the site in ten soil samples and as such Galli feels that endpoint sampling is not necessary. Request to table IRM issues until groundwater delineation is complete as RP may be determined to be RP next door and they will be responsible. Pending additional groundwater delineation, we believe NYSDEC should help us get the monetary equivalent to pay for the membrane from the adjacent property owner . Vapor mitigation system not necessary due to basement parking garage in building. Phase II

EMPTY COMMERCIAL BLDG. (Continued) **S108764509**

ESA-Galli Engineering-10/4/07. Site will be developed as eleven (11) story mixed use apartment building with a one story open air ventilated garage . Five geoprobe borings to a depth of 12' and collection of ten soil samples and one groundwater sample. Depth of proposed excavation is twelve feet. South of property is retail, east is an active gas station. Groundwater at depth of 23' below grade. There was a very strong odor of petroleum, thought to be gasoline, during the groundwater sampling event . The minor VOC contamination found in the soil may be the result of spreading of vapor phase gasoline originating in groundwater since no evidence of a source area form a spill of gasoline was found on the site in the soil samples . Report recommends further investigation to determine if adjacent site is the source. Soil analyticals show minor PAH exceedences attributable to fill material and no VOC detections. Groundwater analytical shows: 28000ppb benzene (GW1), 290000ppb toluene(GW1), 490000ppb xylene(GW1), 360000ppb ethylbenzene(GW1), 11000ppb napthalene(GW1), 4300ppb MTBE(GW1). DEC requires: 1)cc to DEP as site is E designated 2)collection of endpoint samples from final excavation 3)IRM including product recovery if applicable 4)SSDS and vapor barrier 5)confirm that groundwater delineation is needed 6)spills, TTF on adjacent gasoline site 7)opening of spill on ExxonMobil property and cc to ExxonMobil 7)Depth of proposed foundation 8)cc to DEC Urda 11/2/07-Vought- See also spills #0751061 (open) and closed spill 0611117. Spoke with DEC Krimgold and as per PBS records, PBS inspection performed by DEC Falvey in 2/07 at 150-154 West 145th St and numerous violations including product in sump/catch basin. DEC Krimgold also confirmed that spill number should have been reported by ExxonMobil upon discovery of product in the sump. Vought called ExxonMobil (Kenneth Drake Cell 908-451-0956 Fax 609-698-8761 (kenneth.j.drake@exxonmobil.com). Left message with Drake to return call with contact info. Vought called Acosta (516-466-2122 fax:516-466-2855) for DEP contact and depth of foundation and to explain requirements and fact spill opened on adjacent site and left message to return call to DEC. Vought called Galli Engineering -Frank Gehrling(631-271-9292 fax:631-271-9345). As per Gerling, free product was noted in MW1 and proposed foundation depth is approximately 13' below grade. Vought also suggested fingerprint on product. As per Gherling, building was originally movie house with possible heating oil tank converted to grocery store. Old building still in place. Gehrling will return call to DEC Vought with DEP contact information for cc list. Vought received email from Acosta that DEP project manager is Maurice Winter. 01/11/08-Vought-Current File Review by Vought: Letter from DEP Wuthenow to Gehrling-12/4/07. DEP reviewed October 2007 Phase II. Site would be an 11-story residential building with ground floor retail use and underground parking garage. Site currently occupied by 2-story commercial building that will be demolished. Five soil borings performed by Gali in September 2007. Groundwater present at 23' below grade during drilling. NYCDEP requires: 1)submission of RAP and disposal as per NYSDEC regulations, site specific Construction Health and safety plan, an active SSD system, covering of soils with plastic sheeting, removal of impacted soil in accordance with DEC regulations, maintaining dust supression, closure of all tanks in accordance with DEC, DEP discharge permit if dewatering is to take place, and note that DEC may have further requirements with respect to groundwater. Email from Gehrling to DEC Vought-12/6/07. Monitoring wells have been installed and are being developed. Brandon Mooney of

EMPTY COMMERCIAL BLDG. (Continued) **S108764509**

Kleinfelder, consultant for ExxonMobil has been in contact with us and we have supplied him with a copy of the Phase II ESA . Remedial Action Plan (Galli Engineering)-1/5/08. Final Remedial Investigation Report included that shows no soil contamination found onsite in 5 soil borings. No historical or current use of gasoline onsite. No active groundwater remediation work planned as this site not source. Presence of high bedrock formation in the west side of the property. Three monitoring wells were installed into bedrock however one well remains dry. Galli agrees to soil excavation and installation of an SSDS system and vapor barrier. Bedrock rises quickly from east to west and When uncorrected depths of the depth to bedrock were plotted, the map shows a generally easterly dip to the slope of the bedrock surface . There is also a bedrock high to the south. All soils will be excavated to a depth of approximately 12'and removed from the Site... . Also installed will be watertight sheeting and waterproofing and a vapor proof membrane barrier. Galli is of opinion that a passive system would be sufficient since the subsurface garage level of this building would be ventilated. However the NYCDEP and NYSDEC have requested that the system be active . After review of letters sent by DEP and DEC, Vought noted that active SSDS was only required by NYCDEP, not DEC. Endpoint samples will also be collected. Soils will be direct loaded onto trucks to prevent odors in neighborhooed and a spill Closure Report will be submitted to the DEC and NYCDEP. Vought sent letter approving of RAP with cc to Exxon Mobil (Drake), NYCDEP Wuthenow, DEC Urda and Gehrling. 06/10/08-Vought-Received call from and spoke to Sandra who works for owner of property. Property will not be developed for at least one year due to delay in not receiving approval from DEP and due to poor economy. Exxon Mobil would like to enter in cleanup agreement with owners of adjacent site (AC Development). DEC expressed no concern of holding activity on site for year as responsible party is ExxonMobil. 09/05/08-Vought-Spill transferred to DEC Haggerty as RP for site is ExxonMobil at 150-154 145th St (Spill #0751061). 3/4/09 - Haggerty: Spill consolidated into ExxonMobil spill 0751061. The Mobil Station 17-QDM at 150-54 West 145th Street, Harlem NY is directly adjacent to this property and is the proven source of this contamination. The Mobil station is currently in active remediation removing tanks and contaminated soil as an IRM. ExxonMobil requested the consolidation of this spill into their spill. spill closed "

Remarks: "During a phase 2 site assesment found gasoline in the groundwater. There is a Mobil gas station next door @ 150 W. 145th st. ... unknown if there is a connection. Small amount of free product found in the water sample. Frank Gehrling 516-723-1785"

Spill Class:	C3
SWIS:	3101
Spill Date:	1995-06-22
Investigator:	KGHALE
Referred To:	DPES STARTUP 1/17/2008
Reported to Dept:	1995-06-22
CID:	Not reported
Water Affected:	Not reported
Spill Source:	Gasoline Station or other PBS Facility
Spill Notifier:	Responsible Party
Cleanup Ceased:	2004-06-02
Cleanup Meets Std:	False
Last Inspection:	Not reported
Recommended Penalty:	False
UST Trust:	True
Remediation Phase:	0
Date Entered In Computer:	1995-07-18
Spill Record Last Update:	2013-05-21
Spiller Name:	Not reported
Spiller Company:	GETTY
Spiller Address:	Not reported
Spiller Company:	999
Contact Name:	Not reported
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 3/13/03 REASSIGNED FROM ROMMEL TO VOUGHT. 4/30/04-Vought-Changed spill address from 87 St. Nicholas to 89 St. Nicholas due to correct address and address on all Tyree correspondence. Site may also be known as 89-91 St. Nicholas Ave due to use previously on Tyree reports. Also changed name of spiller to

LOT 20,TAXBLOCK 2069 (Continued) **S107657287**

Getty. File review by Vought: Closure Report (Tyree Org Dan Ruffini 631-249-3150)-January 1996. Tanks removed as part of station rebuild. Removal of twelve (550-gallon) gasoline USTs and one (4000-gallon) tank. Tanks removed in June 1995. Tank upgrade included the installation of four (4000-gallon) gasoline USTs. New tanks placed in existing tank excavation. Visual evidence and petroleum odors detected during excavation. Depth of excavation was ten feet and 1040 tons of soil removed. Soil analyticals show 1460ppb benzene (North), 12000ppb toluene(North), 6720ppb toluene(South), 3240ppb xylene(South), 5230ppb toluene(West), 3040ppb xylene(west), 4010ppb toluene(west), 3330ppb xylene(west), 11500ppb toluene(bottom), and 2560ppb xylene(bottom). Subsurface Investigation Report (Tyree Org Paul Hatcher)-Dec 2000. Investigation result of DEC requirements. Five Geoprobe borings performed resulting in collection of six soil samples and two groundwater samples. Groundwater at depth of 26-27'. Soil analyticals show up to 104000ppb 1,2,4-trimethylbenzene(SB3 10-15'), 18500ppb xylene(SB3 10-15'), 13200ppb napthalene(SB3 10-15'), 819ppb benzene(SB4 10-15'), 5260ppb toluene(SB4 10-15'), 10900ppb 1,2,4-trimethylbenzene(SB4 10-15'), 323ppb benzene(SB4 20-25'), 1960ppb toluene(SB4 10-15'). Groundwater analyticals show up to 184ppb benzene(SB4), 4470ppb MTBE(SB-4), 5ppb benzene(SB5) and 33ppb MTBE(SB5). Tank Removal Report (Tyree Org Phillip De Blasi)-December 2001. Reason for tank removal was tanks were identified while attempting to install monitoring wells in March 2001. Apartment building to the south, commercial buildings to the east and a garage to the west. Tanks removed were two (550-gallon) gasoline tanks. External corrosion and small hole in tank #2 . Five endpoint soil samples taken show no TAGM 4046 Required Soil Cleanup Objective exceedences. Quarterly Monitoring Reports (Tyree Org) August 2002 thru March 2003. Three monitoring wells onsite. Quarterly sampling and gauging. Free product in well W1 (.08'). Groundwater flow to the east at a depth of 14-16'. Soil analyticals show up to 9700ppb benzene(W1 10-15'), 122000ppb toluene(W1 10-15'), 41100ppb napthalene(W1 10-15') and 291pp benzene(W3 15-20'). Groundwater analyticals show up to 7490ppb benzene(W1), 3680ppb toluene(W1), 590ppb napthalene(W1), 92100ppb MTBE(W1), 200ppb benzene(W2), 318ppb MTBE(W2), 875ppb benzene(W3), 124ppb napthalene(W3) and 867ppb MTBE(W3). Letter from DEC(Vought)-4/29/03. Letter requesting expediting of sidewalk wells for wells in side walk on St. Nicholas Avenue. Well Proposal from Tyree-6/12/0. Letter proposing installation of two wells (in the northeast corner of the property and the other in the sidewalk along St. Nicholas Avenue). Letter from DEC(Vought)-6/25/03. Letter sent approving 6/12/03 proposal. Quarterly Monitoring Reports (Tyree Org) April 2003 thru Dec 2003. Three monitoring wells onsite. Quarterly sampling and weekly gauging. Free product in well W1 (.28'), W3 (.03'). Weekly bailing of wells recovering 1.25 gallons of free product. Groundwater flow to the east at a depth of 14-16'. Groundwater analyticals show up to 17400ppb benzene(W1), 14300ppb toluene(W1), 8580ppb MTBE(W1), 9ppb xylene(W2) and free product in W3. Subsurface Investigation Report (Tyree Org Gabriela Dory)-December 2003. Reason for investigation is DEC requirement. Two Geoprobe borings performed. Groundwater at 15'. Soil analyticals show 36700ppb benzene(TB-1 12-16'), 325000ppb toluene(TB1 12-16'), 66500ppb napthalene(TB1 12-16'), 60ppb benzene(TB2 12-16'), and 1752ppb xylene(TB2 12-16'). Groundwater analyticals show 14500ppb benzene(TB1), 1340ppb napthalene(TB1), 142ppb benzene(TB2), 1221ppb xylene(TB2) and 344ppb napthalene(TB2). 5/4/04-Vought-After file

LOT 20,TAXBLOCK 2069 (Continued) **S107657287**

review DEC requires STIPULATION AGREEMENT WITH: 1)delineation of soil and groundwater north of former tank pad, east of W1, east of W3 and at former boring location TB-2. Vought handed over Stipulation during 5/5/04 Getty meeting with DEC with a due date to DEC by 6/4/04. 6/2/04-Vought-Received signed Stipulation from Shea and submitted to DEC Kunkel for implementation. Stipulation implemented by DEC Kunkel on 6/2/04. 10/7/04-Vought-New file review by Vought: Email from Tyree (Lapeitra) to DEC Vought dated 6/23/04. on June 24 and 25 four (4) monitoring wells will be installed as per the Stipulation Agreement . A subsurface investigation will follow shortly afterward . Subsuface Investigation Report (Tyree) received on 7/20/04. Commercial properties to the east, south, and west, park to the north. Installation of two onsite wells and two offsite wells. Groundwater 14-22' below grade and flow to the north. Soil analyticals show 494ppb benzene(B6 15-17') and minor PAH exceedences(B4 10-12'). Groundwater analyticals show 1220ppb benzene(MW4), 1340ppb toluene(MW4), 1700ppb ethylbenzene(MW4), 4490ppb xylene(MW4), 11ppb MTBE(MW4), 1ppb benzene(MW5), 8ppb xylene(MW5), 14ppb benzene(MW6), 13ppb xylene(MW6) and 670ppb MTBE(MW6). Groundwater Monitoring Report (Tyree)- July thru Sept 2004. Seven monitoring wells onsite. Groundwater analyticals show 20600ppb benzene(W1), 42100ppb toluene(W1), 2820ppb ethylbenzene(W1), 15400ppb xylene(W1), 7190ppb MTBE(W1), 1ppb benzene(W2), 4720ppb benzene(W3), 41ppb toluene(W3), 429ppb ethylbenzene(W3), 403ppb xylene(W3), 5190ppb MTBE(W3), 633ppb benzene(W4), 16ppb toluene(W4), 4410ppb ethylbenzene(W4), 12700ppb xylene(W4), 982ppb benzene(W6), 21ppb toluene(W6), 78ppb ethylbenzene(W6), 84ppb xylene(W6) and 962ppb MTBE(W6). 10/7/04-Vought-Sent letter approving of Subsurface Investigation and requiring remedial Action Plan as per CAP. 5/12/05-Vought-New file review by Vought: Groundwater Monitoring Report (Tyree)-October 2004 thru March 2005. Seven monitoring wells onsite. Groundwater flow to the east and at depths of 13-24' below grade. Groundwater analyticals show 16700ppb benzene(W1), 13100ppb toluene(W1), 2710ppb ethylbenzene(W1), 14100ppb xylene(W1), 8070ppn MTBE(W1), 5ppb toluene(W2), 30ppb xylene(W2), 3450ppb benzene)W3), 22ppb toluene(W3), 128ppb ethylbenzene(W3), 176ppb xylene(W3), 4330ppb MTBE(W3), 217pppb benzene(W4), 93ppb toluene(W4), 2320ppb ethylbenzene(W4), 6600ppb xylene(W4), 28ppb xylene(W5), 224ppb benzene(W6), 9ppb ethylbenzene(W6), 32ppb xylene(W6), 1290ppb MTBE(W6), 8ppb xylene(W7). Site Status and Proposed Remedial Action Plan(Tyree Brothers)-February 2005. TBES is proposing the use of in-situ passive bailers to collect product from wells W-1 and W-3 . Bailers will be utilized until a permanent remedial alternative is in place . Proposal for a dual phase pilot extraction test. Extraction well will be located between wells with highest contamination(W1 and W3). Results of pilot test will be provided in a Pilot Test Report. Vought sent letter approving of Pilot Test. 08/31/2005 - Feng - Project transferred from Vought to Feng. 10/5/2005 - Feng - Quarterly Monitoring Report from Tyree (4/2005 - 6/2005). 7 monitoring wells onsite and offsite. NO LNAPL detected. Groundwater flow easterly (perched above bedrock) at a depth of 13.44' to 24.91' below grade. Analyticals for W-1: 46,280ppb BTEX, 6,130ppb MTBE. W-2: 3ppb BTEX, non-detected MTBE. W-3: 4,554ppb BTEX, 4,640ppb MTBE. W-4: 14,058ppb BTEX, non-detected MTBE. W-5: 11ppb BTEX, non-detected MTBE. W-6: 475ppb BTEX, 1,140ppb MTBE. W-7: non-detected for both BTEX and MTBE. Noted that the DPE Pilot Test will commence during the next quarter. 10/5/2005 - Feng - Subsurface Investigation Report, dated 6/27/2005.

LOT 20,TAXBLOCK 2069 (Continued) **S107657287**

On 6/8/2005 to 6/10/2005, two (2) saturated zone piezometer wells (P1 and P2), three (3) vadose zone piezometer wells (A1, A2, A3), and one (1) extration well were installed on the southeast side of the site. VOCs test shows that P1(9'-11') has 271ppb Acetone, P2 (7'-9') has 364ppb Acetone, EW1(11'-13') has 200ppb acetone. The other concentrations are blow Guidance value. 10/7/2005 - Feng - Sent letter of approving Dual Phase Extraction system design, dated July 2005 (letter reviewed by Sun) to Getty, Tyree and Delta. In the system design, four (4) extraction wells onsite will be installed to cover the area of concern. Namely, there are four (4) extraction wells for vadose zone with Radius of Influence (ROI) of 28 feet. Among these four (4) wells, there is one (1) extraction well (EW-2) serves for both vadose and saturated zone purposes with ROI of 50 feet. DEC approved with some notes below: 1) Adjust the Location of Saturated Zone Extraction Well (EW-2) to cover the W-3 area and further W-4 area. 2) Revise the Proposed DPE System Flow Diagram. 3) Submit the System Design Specification. 4) tabulate and describe OMMP. 5) measurement and analysis of groundwater. 11/2/2005 - Feng - Quarterly Monitoring Report from Tyree (4/2005 - 6/2005). 7 monitoring wells onsite and offsite. NO LNAPL detected. Groundwater flow easterly (perched above bedrock) at a depth of 15.30' to 24.53' below grade. Analyticals for W-1: 41,690ppb BTEX, 6,300ppb MTBE. W-2: low, dry this quarter. W-3: 2,053ppb BTEX, 1,990ppb MTBE. W-4: 7,938ppb BTEX, non-detected MTBE. W-5: 48ppb BTEX, non-detected MTBE. W-6: 74ppb BTEX, 1,360ppb MTBE. W-7: 38 BTEX and 1 MTBE. 1/17/2006 - Feng - Quarterly Monitoring Report, 10/2005 - 12/2005. That is an active gasoline /service station. Groundwater flows to east (perched above bedrock) at depth of 13.47' to 25.03' bg. 7 monitoring wells on and off site. W-1, 48,010 ppb BTEX, 3,860 ppb MTBE. W-2, 4 ppb BTEX, MTBE MDL. W-3, 2,956 ppb BTEX, 2,480 ppb MTBE. W-4, 13,485 ppb BTEX, MTBE MDL. W-5, 1 ppb BTEX, MTBE MDL. W-6, 415 ppb BTEX, 909 ppb MTBE. W-7, 10 ppb BTEX, MTBE MDL. (RJF) 1/18/2006 - Feng - Emailed Nick Marrone inquired the status of DPES installation. (RJF) 1/19/2006 - Feng - Reply from Nick Marrone Things were moving slowly in the beginning of the month because of the holidays, but we are scheduling field crew to start installing the system piping in the next few weeks. Our vendor who we purchase our systems from is reviewing our data and will be assembling it soon. 4/10/2006 - Feng - Emailed Nick Marrone and requesting the status of the system installation and asking for a approximate date of completing installation and start running the system. (RJF) 4/10/2006 - Feng - Reply from Paul Hatcher, The system is being designed right now. There are space considerations to be considered given the small site. Also, there was some problems connecting the wells (i.e. subsurface conditions) that delayed the trenching operations a bit, but that's all done now. We've started getting the electrician to make the connections and It's probably going to be a month or two until we get the system delivered and hooked up. (RJF) 5/3/2006 - Feng - Quarterly Monitoring Report, 1/2006 - 3/2006. Active gasoline/service station. Groundwater flows to east (perched above bedrock) at depth of 13.54' to 25.22' bg. There are 7 monitoring wells on and off site and 4 Dual Phase Extraction. Sampling as of 3/21/2006. W-1, decreased and 39,920 ppb BTEX (12,900 ppb Benzene, 10,900 ppb Toluene, 2,520 ppb Ethylbenzene, 13,600 ppb Total Xylenes), 3,710 ppb MTBE. W-2, MDL. W-3, 3,044 ppb BTEX (2,300 ppb Benzene, 29 ppb Toluene, 222 ppb Ethylbenzene, 493 ppb Total Xylenes), 3,760 ppb MTBE. W-4, 11,441 ppb BTEX (224 ppb B, 87 ppb T, 2,680 ppb E, 8,450 ppb X), MTBE MDL. W-5, MDL. W-6, 281 ppb

LOT 20,TAXBLOCK 2069 (Continued) **S107657287**

BTEX (225 ppb B), 1,120 ppb MTBE. W-7, MDL. Noted that 3 more dual phase extraction wells were installed during this last quarter. Also trenching and system piping were installed (map attached). The Dual Phase System is/will be assembled and sent this next quarter. Electrical service will be obtained shortly. (RJF) 11/9/2006 - Feng - Quarterly Monitoring Report, 7/2006 - 9/2006, 9/28/2006, by Tyree. The site is active gasoline/service station. Sampled and gauged on 9/28/2006. DTW 12.88 to 23.50' bg. Flows easterly (perched above bedrock). No LNAPL. BTEX range ND to 78,880 ppb. MTBE range ND to 2,430 ppb. Noted that the Dual Phase System was delivered in 9/2006. Electrical service will be obtained shortly. (RJF) 1/18/2007 - Feng - Getty Properties portfolio meeting with Tyree and Delta. Passive skimmer in W-1 and W-3. DPES installed onsite, all DPE wells trenched. System electric to be hooked up in 2/2007. DPES will start 4/1/2007. (RJF) 2/20/2007 - Feng - Quarterly Monitoring Report, 10/2006 - 12/2006, 1/8/2007, by Tyree. Active gasoline/service station. Groundwater sampled and gauged 12/27/2006. 7 monitoring and 4 Dual Phase Extraction wells. DTW 12.91' to 24.66' bg. Flows easterly (perched above bedrock). No LNAPL. W-1, 60,170 ppb BTEX, 2,080 ppb MTBE. W-2, NA. W-3, 2,272 ppb BTEX, 3,270 ppb MTBE. W-4, 69 ppb BTEX, MTBE MDL. W-5, MDL. W-5, 787 ppb BTEX, 720 ppb MTBE. W-7, MDL. (RJF) 3/30/2007 - Feng - Email updates from R.S. (Tyree). Con Ed is in the process of running the electric from the street to the sidewalk. (RJF) 6/27/2007 - Feng - Quarterly Monitoring Report, 1/2007 - 3/2007, 4/2007. Groundwater smapled 4/2/2007. 7 monitoring wells and 4 dual phase extraction wells. DTW 12.34' to 24.42' bg. No LNAPL. Flows to east. W-1, 60,260 ppb BTEX, 1,050 ppb MTBE. W-2, MDL. W-3, 274 ppb BTEX, 243 ppb MTBE. W-4, 148 ppb BTEX, MTBE MDL. W-5, MDL. W-6, 601 ppb BTEX, 786 ppb MTBE. W-7, MDL. Spoke to Rob S. (Tyree), the dual phase system has been delivered and all the piping are set last year. The problem now Tyree has is the eletrical power supply from Con Edison. Rob will follow with Con Edison for the electrical power and may need DEC's assistance. (RJF) 9/28/2007 - Feng - Quarterly Monitoring Report, 4/2007 - 7/2007, 8/2007. Groundwater sampled 7/9/2007. 7 monitoring wells were sampled. DTW 12.32' to 22.89' bg. No LNAPL. Flows to east. W-1, 65,800 ppb BTEX, 456 ppb MTBE. W-2, 1 ppb BTEX, 13 ppb MTBE. W-3, 1,613 ppb BTEX, 2,010 ppb MTBE. W-4, 93 ppb BTEX, MTBE MDL. W-5, MDL. W-6, 681 ppb BTEX, 538 ppb MTBE. W-7, MDL. (RJF) 11/8/2007 - Feng - Portfolio meeting with Delta and Tyree. The system has been installed, and finally got the approval from Con Ed. The system will be started by the end of 11/2007. (RJF) 11/26/2007 - Feng - Email Paul Lindell (Delta) and Paul Hatcher (Tyree) reminding the startup of DPES due by the end of 11/2007. (RJF) 12/20/2007 - Feng - Email from R. Szcespanski (Tyree). He spoke with Con Edison and Con Edison will install the meter next week. The system shall be started within next 2 weeks. (RJF) 1/8/2008 - Feng - Email from R. Szcespanski (Tyree). The meter will be installed tomorrow. The scheduled startup of the remedial system will be on Monday, 1/14/2008. (RJF) 1/14/2008 - Feng - Site Visit and met with R. Szcespanski (Tyree). Problems encountered in startup. Tyree will troubleshoot the problems and will re-startup by this week. (RJF) 1/17/2008 - Feng - Email from R. Szcespanski (Tyree). DPES is running and samples were collected. (RJF) 1/28/2008 - Feng - Quarterly Monitoring Report, 8/2007 - 10/2007, 10/2007. Active gasline/service station. Groundwater gauged and sampled 9/24/2007. 7 monitoring wells and 4 dual phase extraction wells. DTW 12.87' to 23.52' bg. Flows to east. No LNAPL. BTEX range

LOT 20,TAXBLOCK 2069 (Continued) **S107657287**

ND to 52,070 ppb (W-1). MTBE range ND to 543 ppb (W-6). (RJF) 3/19/2008 - Feng - eDoc Quarterly Monitoring Report 4Q2007. (RJF) 3/24/2008 - Feng - Quarterly Monitoring Report, 10/2007 - 12/2007, 1/2008. Active gasoline service station. Groundwater was gauged and sampled 12/18/2007. 7 monitoring wells. DTW 13.43' to 22.66' bg. Flows to east. No LNAPL. BTEX range ND to 37,450 ppb (W-1). MTBE range ND to 302 ppb (W-6). (RJF) 5/28/2008 - Email Tyree for dual phase system information. 7/7/2008 - 1Q2008, 1/2008 - 3/2008, 4/2008. Active gasoline service station. Groundwater was gauged and sampled 3/26/2008. 7 monitoring wells and 4 dual phase extraction wells. DTW 12.74' to 21.05' bg. Flows to east. No LNAPL. BTEX range ND to 22,300 ppb (W-1). MTBE range ND to 366 ppb (W-6). Dual phase system is on. Air phase, total BTEX before carbon 88.1 ppmv, MTBE before carbon 1.2 ppmv, total BTEX after carbon 6.31 ppmv, MTBE after carbon ND. Groundwater, total BTEX before carbon 1,010 ppb to 4,365 ppb, MTBE before carbon 93.7 ppb to 1,090 ppb, total BTEX and MTBE after carbon ND. (RJF) 9/4/2008 - Getty Proeprties portfolio meeting. 2 more wells upgradient of W-3 which has been has product will be installed. 12/2008 for work plan, installation will be in 1/2009. 10/6/2008 - Reviewed Investigation Work Plan dated 10/3/2008. Tyree proposed to install 2 addtional wells. DEC provided comments via email to Tyree: 1) soil sampling and screening past groundwwater interface; 2) increase screen interval due to the depth of water. Need revision of the work plan. (RJF) 10/7/2008 - Received the revision of Investigation Work Plan dated 10/7/2008. Approved the IWP. Letter to Getty Properties. Work will be implemented by 3/20009. (RJF) 1/6/2009 - Getty Properties portfolio meeting with Delta and Tyree. 2 wells will be installed next week. (RJF) 4/13/2009 - Reviewed Subsurface Investigation Report, dated March 2009, by Tyree. On January 22, 2009, Associated Environmental Service installed 2 new monitoring wells. PID show some low level reading in both locations 0-5 feet through 15-20 feet. 4 soil samples were collected. MW-8 (5-10 feet), MW-8 (13-16 feet), MW-9 (5-8 feet) and MW-9 (10-15 feet), all ND or low level VOCs. MW-8 was installed at depth of 20 feet, with 15 feet 0.02 inch screen and 5 feet riser. MW-9 was installed at depth of 23 feet with 15 feet 0.02 inch screen and 8 feet riser. Groundwater was encountered at 13-16 feet. 2 groundwater samples were collected. MW-8, 0.69 ug/L benzene, no else exceedances of VOCs. (RJF) 4/30/2009 - Quarterly Monitoring Report, 7/2008 - 9/2008, 11/2008, by Tyree. Active gasoline service station. Groundwater was gauged and sampled 9/4/2008. 7 monitoring wells, 4 dual phase extraction wells. DTW 14.05' to 25.51' bg. Flows to east. NO LNAPL. BTEX range ND to 18,070 ppb (W-1). MTBE range ND to 284 ppb (W-6). Dual phase extraction system is on line. Air phase, 56.50 ppmv to 115.20 ppmv BTEX before carbon, ND to 3.05 ppmv after carbon, MTBE ND. Liquid phase, 107.10 ppb to 1,193.20 ppb total BTEX before carbon, 8.90 ppb to 63.10 ppb MTBE before carbon, ND to 2.03 ppb BTEX after carbon, MTBE ND after carbon. Quarterly Monitoring Report, 10/2008 - 12/2008, 12/2008, by Tyree. Active gasoline service station. Groundwater was gauged and sampled 11/21/2008. 7 monitoring wells, 4 dual phase extraction wells. DTW 13.22' to 25.26' bg. Flows to east. NO LNAPL. BTEX range ND to 15,492 ppb (W-1). MTBE range ND to 177 ppb (W-6). Dual phase extraction system is offline. The system was shut down due to carbon break through on the liquid and water. Carbon will be changed in Jan 2008. Air phase, 1.41 ppmv BTEX before carbon, 45.90 ppmv BTEX after carbon? NO MTBE. Liquid phase, 1,176.20 ppb BTEX before carbon, 43.70 ppb MTBE before carbon, 1.41 ppb BTEX after carbon, MTBE ND after

LOT 20,TAXBLOCK 2069 (Continued) **S107657287**

carbon. email Jen Kotch (Tyree) for clarification on influent and effluent sampling data and the replacement of carbon. (RJF) 11/6/2009 - 2Q2009, 4/2009-6/2009, 9/2009, pdf, by Tyree. Active gasoline service station. 7 monitoring wells. Groundwater was gauged 4/24/2009, 5/27/2009, 6/29/2009 and 7/8/2009. NO LNAPL. DTW 13.84' to 25.06' bg. Flows to east (perched above bedrock). Groundwater was sampled 7/8/2009. BTEX range ND to 5,106 ppb (W-1). MTBE range ND to 66.3 ppb (W-1). The site was surveyed on May 28, 2009. (RJF) 2/2011 February 2011 Tyree submitted a request to the NYSDEC for approval to permanently shut down and decommission the DPHVES. Based on current concentrations it is anticipated that the current groundwater trends will continue to attenuate naturally until contaminant concentrations reach asymptotic levels. As such, Tyree, on behalf of Getty, respectfully requests closure of NYSDEC spill number 95-03535 and a status of No Further Action be granted. 2/1/2012 Getty portfolio transferred to KGH. 3/14/2013 KGH meets with Tyree/Getty to discuss remedial progress on various sites. Tyree PM Gerard Colling makes the case for closure on five of the Getty spill projects under his management. KGH agrees to review files and consider closure of select cases. 3/21/2013 KGH reviews case-file for Getty #340. 5/21/2013 - The Department has reviewed the remedial actions taken to remedy NYSDEC spill number 95-03535 and accepts Getty's Petition for Closure. No Further Action is Required by the Department. NFA. KGH "

Remarks: "CONTAMINATED SOIL ORIGINAL SPILL ASSIGNED TO O'DOWD."

DEC Memo:	"6/22/06 - Raphael Ketani. There is an active 5,000 gal. tank on site. It is listed as PBS case #2-610477 and contains #2 oil. I received a FAX of the water and soil analyticals for samples GW-1 to GW-5 and SB-1 through SB-6 taken from 6/19 to 6/20/06. The results show no hits or only a few hits under TAGM 4046 for GW-1 to GW-4. GW-5 had 7 VOC hits slightly above TAGM and 1,2,4-trimethylbenzene at 63.5 ppb and naphthalene at 66.4 ppb. SB-1 to SB-3 had either no hits or only a few hits below TAGM. SB-4 had 5 VOC hits - all well above TAGM. SB-5 had 7 VOC hits (from below to slightly above TAGM) and O-xylene at 3180 ppb and naphthalene at 27500 ppb. 7/14/06 - Raphael Ketani. I tried to call Mr. Myers of ATC (631) 451-0617, but could only leave a message. 7/18/06 - Raphael Ketani. I tried calling Mr. Myers, but could only leave a voice message. 8/2/06 - Raphael Ketani.

RETAIL/RES. BLDG (Continued) **S108057687**

I tried calling Mr. Myers, but could only leave a voice message. 8/4/06 - Raphael Ketani. Mr. Myers called me back. He said he knows he has to get moving on this site and he stated he will. 8/21/06 - Raphael Ketani. I contacted Mr. Myers. He said he hasn't forgotten about the site, but things have been getting in the way. He said he will get me documentation. 9/14/06 - Raphael Ketani. I received a message from Peter Kolodner of ATC Associates today (212) 353-8280, ext. 285. He said he wanted to talk about the contamination. I tried returning his call, but could only leave a voice mail. Mr. Kolodner called me back and I told him that sites GW-5, SB-4, and SB-5 needed water removal and soil removal, respectively. He said he will tell this to the client. Mr. Kolodner called me again. He said that it would be best if DEC would send an official letter to the present owners stating what needs to be done and to c-c ATC and the prospective new owners, Community Preservation Corporation. The addresses to send to are: Jeff Ewing, UHAB (owner), 120 Wall Street, NY, 10005 Peter J. Kolodner, ATC Associates, 104 E. 25 Street, NY, 10010 Naim Brown, Community Preservation Corporation (CPC; prospective new owners), 3154 Albany Crescent, Bronx, 10463 I sent the letter today. 9/18/06 - Raphael Ketani. Mr. Ewing called today. He said that UHAB is not the present owner. He said they are the sponsor and will close on the title and put together a low income housing development plan. He added that UHAB is the FUTURE owner. Mr. Ewing said that the lender is Community Preservation Corporation and the present owner is Neighborhood Restore. He said to send a letter to: Errol Cooper (212) 584-8981, ext. 19 at Neighborhood Restore, 150 Broadway, 21st Floor, NY, 10006. I sent the letter. 9/25/06 - Raphael Ketani. Mr. Cooper called me back. He said that my letter was the first that he heard there was contamination at the site. He said he didn't have a copy of the report or know what to do. I told him that the soil and water need to be cleaned up. He asked who he can contact so that he knows where to do the cleaning. I told him that he can contact the prospective buyer's environmental company. I gave him the phone number. He said he will have the site cleaned up. 9/29/06 - Raphael Ketani. I spoke to Anton Popovik of 14K Management (914) 237-1600 regarding the contamination at the site. I mentioned to him that the groundwater has to be collected, resampled for levels of analytes and the results sent to DEC. I also told him that the soil will have to be removed at SB-4 and SB-5, resampled and the results sent to DEC. He said he will have this done. 12/19/06 - Raphael Ketani. I tried contacting Mr. Popovik, Mr. Myers, and Mr. Kolodner, but could only leave voice mails. Mr. Popovik called to say that he is aware that the site needs to be cleaned up and will contact the remediation company. Mr. Kolodner called to say that ATC Associates submitted 3 proposals to Neighborhood Restore and is waiting for them to get back to him. Later, Pam Oelerich (212) 432-8545 of the NYC office of ATC tried to contact me. I left a voice mail for her. 12/21/06 - Raphael Ketani. Ms. Oelerich returned my call. She said that she is the lead person at ATC Associates and that her company is working for CPC. She said that ATC presently has a proposal with Neighborhood Restore (NR) to do excavation first in the vicinity of SB-4 and SB-5 and then take post excavation samples. I told her that plan would be acceptable to the DEC, but the sample results may indicate that more digging will be necessary. She said she understood this and she felt that NR would be agreeable to this, also. I told her to send me the plan that NR agrees to, I'll review it, and respond back with a Nay or Yay. She said she would do this. 3/7/07 -

RETAIL/RES. BLDG (Continued) **S108057687**

Raphael Ketani. I spoke to Ms. Oelerich and asked her why DEC hadn't received the plan for the remediation work. She said that she wasn't sure why as the plan was approved by Neighborhood Restore a while ago. I told her to send me the plan. I asked her when the remediation would take place. She said when the construction takes place. I asked her when that would be. She said she didn't know. I told her to send the DEC the manifests and the end-point results and to tell her client that the DEC is very concerned that the cleanup is not taking place in a timely manner. She said she would contact Neighborhood Restore. 3/14/07 - Raphael Ketani. I received the 1/9/07 soil removal and groundwater sampling plan from Ms. Oelerich by e-mail. 3/16/07 - Raphael Ketani. I spoke to Ms. Oelerich and asked her whether the soil and groundwater samples would be analyzed via methods 8260 and 8270. She said Yes. In that case, I told her the plan is acceptable to the Department. I asked her to get started as soon as possible. 5/9/07 - Raphael Ketani. I tried to reach Ms. Oelerich (o-le-rick) (212) 432-8545, but could only leave a message regarding the soil sampling. Ms. Olerich returned my call and left a message that the property is undergoing a transfer of ownership right now. She stated that once the transfer is completed in the end of June of 2007, then UHAB will take posession and do the remediation. 6/13/07 - Raphael Ketani. Ms. Olerich sent me the 6/5/07 Proposal for Soil Excavation Oversight and Groundwater Sample Collection plan by e-mail. I reviewed the plan and told her that the soil and groundwater sampling part of the plan were fine and to test via methods 8260 and 8270. 7/25/07 - Raphael Ketani. I spoke to Ms. Olerich. She said the closing/transfer of ownership just took place. She said that NR just gave her the O.K. to go ahead and do the remediation and sampling. 10/17/07 - Raphael Ketani. I tried to contact Ms. Oelerich, but could only leave a message. 10/18/07 - Raphael Ketani. Ms. Oelerich called to say that the soil at SB-4 and SB-5 was dug out and end point samples taken. She said that the water that is present on site is not groundwater, but is rain water that collects in a little depression. She said that I should be getting the investigation report soon. I told her the tank is still listed as active in PBS. She said she will take care of it. 10/31/07 - Raphael Ketani. Today, I received by e-mail the Soil Excavation Oversight report dated 10/31/07 from Ms. Oelerich. I reviewed the report which contained analytical results for three soil samples that were taken from the excavation hole sidewalls in the vicinity of SB-4 and SB-5. All three sample analyticals were almost entirely non-detect with only a few analytes having hits that were very far below the TAGM limits. I called up Ms. Oelerich and asked her about the tank. She said they had it looked at and it is in good shape. So they are using it. Based upon the 10/31/07 Soil Excavation Oversight report and my conversation with Ms. Oelerich regarding the tank, I am closing the spill case. 11/7/13 - Raphael Ketani. Mr. Chul Gugich (212) 479-3378/gugich@uhab.org called requesting the remediation report for the site. I sent it to him by e-mail. "

Remarks: "Soil testing and groundwater tests were taken on 6/12/2006. The results came in today 6/22/06 and showed contasmination in both groundwater and soil. Unknown who is doing the clean up."

DEC Memo:	"emis_258826 07/20/17 - Lakhani Dielectric Feeder Leak Committee Conference Call, July 20, 2017 at 1400 " The estimated leak rate is 6 gallons per hour and the estimated loss is 898 gallons of dielectric fluid. " The contractor installed 21 bar holes in the area of the Exit 23rd sign on the Harlem River Dr . ChemLab sampled Bar Holes and are running samples. " The Sprain Brook Substation has been marked out and will be surveyed with the PFT van. " EMIS 258826 has been created for this incident. 7/21/17-At 0050 hours, the Leak Declared was terminated when a clamp was installed in the excavation on the Harlem River Drive 500 feet north of the exit for 155th Street in Manhattan. The total estimated loss of dielectric fluid is 955 gallons with a leak rate of 7 gallons per hours. EMIS 258826 is associated with this incident. Spill transferred to T. Demeo (Secondary Off-Hours). 7/21/17 TJD A leak watch for feeder M52 was declared on 7/16/17 with a reported leak rate of 7 gallons per hour. Following a trackdown investigation, Con Edison field crews located the leak along the southbound lanes of the Harlem River Drive approximately 800 feet north of 155th exit. The feeder was exposed and a temporary clamp installed on the morning of 7/21/17. An

FEEDER LINE M52 (Continued) **S121100548**

inspection of the excavation was performed by Spills staff, crews were preparing the excavation and involved feeder for the installation of a permanent repair barrel. This section of the Feeder M52 has recently undergone a refurbishment of the line due to multiple historic leaks in the area. Excavation of remaining contaminated soils is pending issuance of a required DOT permit. Permanent repairs are complete. 9/7/17 TJD File review. Con Edison has submitted a closure report for the M52 feeder line leak. As per report: Summary of the cleanup efforts for DEC Spill # 1703674 (Con Edison EMIS # 258826) The Dielectric Fluid Leak Committee declared a Dielectric Fluid Leak Watch on Feeder M52 at 10:16 hours on July 16, 2017 due to an alarm on the USi Leak Detection System (LDS). Patrols of the feeder were completed. The Chemlab detected airborne Perfluorocarbon Tracer (PFT) on the Harlem River Drive north of the 155th Street exit ramp. Bar holes were installed and high subsurface PFT levels were detected in the bar holes. An excavation was started at the location. The Dielectric Fluid Watch was changed to a Declared Leak at 16:55 hours on July 20 when a leak was found on the ten inch feeder pipe. The Leak was clamped at 00:50 hours on July 21, terminating the Declared Leak. Permanent repairs were completed at 15:00 hours on July 21. A total of 965 gallons of dielectric fluid was lost to the environment due to this leak. Additional coating removal revealed several spots with what appeared to be electrolysis on the steel pipe. This appears to be the cause of the leak. The GPS coordinates for this location is N40:50:19.15 W73:56:01.00 Excavation 1 Impacted soils were removed from the area surrounding the leak location. Four (4) post - excavation soil samples (one floor and three sidewalls) were collected from the excavation (EX-1), and analyzed for total petroleum hydrocarbon (TPH) using EPA 8015 method. The west wall was not sampled due to excavation to bedrock. Date Sampling Location Results 07/23/2017 Ex - 1 North Wall 40.7 PPM 07/23/2017 Ex - 1 South Wall 28.9 PPM 08/23/2017 Ex - 1 Floor 1,210 PPM 08/23/2017 Ex - 1 East Wall 2,040 PPM All four post-excavation samples exhibited analytical results below the 13,000 PPM remediation guideline for dielectric fluid and no further remediation was required. Based upon the documentation provided no further action is required. Spill closed. All documentation has been uploaded to DECDOCS."

Remarks: "Caller advised there is a leak in the feeder line and unknown exact location and have lost aprx 410 gal. Line is Leaking at 5 gal per hour."

DEC Memo:	"6/17/2016: Rashad Leak has been clamped and is estimated to be 100

EXCAVATION SITE (Continued) **S118705665**

gallons. This was found while searching for larger leak occurring on M52 (spill#1602673, EMIS 246486). Initial observation from EMIS: During leak search efforts for the Leak Declared on M52 on 6/16/16, reported under EMIS 246486, crews discovered 100 gals of dielectric fluid in the excavation along the Harlem River Drive. The leak was clamped at 01:26. A large quantity of oil was later discovered in a tunnel beneath the West 49th Street Substation. During the 07:00 Dielectric Fluid Leak Committee Conference Call it was decided to generate a separate EMIS and report for the oil discovered along the Harlem River Drive. Spill assigned to DEC Patel for follow up. EMIS 246487. 06/29/16-Hiralkumar Patel. 12:10 PM:- spoke with Tom Enrigh at ERT inquiring updates. he mentioned that leak is found in area of Harlem River Drive near exit for 155th Street where ConEd is upgrading M52 line. a permanent barrel has been installed and soil remediation will occur as part of upgrade project. 3:01 PM:- spoke with Tom and asked to submit updated emis report. 06/30/16-Hiralkumar Patel. received email from ERT (at 5:20 PM on 06/29/16) including updated emis report. 09/01/16-Hiralkumar Patel. 12:45 PM:- received email from Masood Hasmi from ConEd including cleanup summary, site map and sample results. endpoint samples were collected from east and west sidewalls. no samples were collected from excavation bottom as bedrock encountered in bottom. no endpoint samples from north and south sidewalls as it constitute of open space as part of the pipe enhancement program. case closed based on available information."

Remarks: "Clamped the line. Spill to the soil. Clean up in progress."

DEC Memo:	"9/22/15 - Obligado - Desk Duty - I called ERT to follow up on this after hours spill and spoke to Tony Delgado. They were putting a permanent repair on the feeder from a previous spill. In the excavation, they saw signs of oil coming from further south, so they looked at their leak detection readings and they noticed that there was still an active leak. They continued excavating to locate the leak. They are estimating that it is 30 to 35 feet south of manhole 62580, which is on the Harlem River Drive near 155th street. Crew is on location looking for the leak. 80 gallons per hour, estimated total is 500 gallons. No impacts to surface water. Emis # 242720. Obligado - Update - Leak has been clamped at 1100 hrs. Total loss of 820 gallons. As per Demeo, spill has been assigned to Santosh Mahat, who responded. 9/22/15: Mahat Response: DEC Mahat responded to the reported 500 gallon (later corrected to be 820) of dialectical fluid due to a feeder line leak. Spill was on M52 Feeder line that runs between 14 Street Station and Spring Brook Station. Leak on the feeder line has been stopped. A clamped has been placed for the temporary repair of the line. A barrel will be placed for the permanent repair for the spill. 700+ gallons of dialectical fluid has been recovered from the excavation. Leaving approximately 120 gallon on the soil. All contaminated soil will be excavated from the site and end point samples will be collected. A complete spill closure report will be provided for the closure of the spill case. DEC is waiting for a result. 10/12/15: Mahat Spill # 1507324 : Duplicate Spill. It has been crossed referenced on DEC Spill Database. Spill # 1507324 is closed. DEC Mahat will be working on Spill # 1506599. 12/11/15: Mahat DEC Mahat received an email update on the spill case via email: Email: Hi Santosh Following up on our conversation, at spill 1506599 we removed all impacted soils but dielectric fluid kept pooling at the bottom of the excavation apparently trapped in sand seams around the excavation. As a result an 8 -diameter recovery well was installed at this location. We plan on gauging this well shortly and then will set up a schedule to recover fluids. Rolando Arco, P.G. Senior Specialist EH&S Operations (S&TO) 31-01 20th Avenue Astoria,

FEEDER LINE M52 (Continued) **S118261783**

NY 11105 718-204-4494 917-558-0077 DEC is waiting for a report. 8/10/16: Mahat e/c: DEC Mahat sent an email to ERT requesting an updated EMIS report on the spill case. 8/12/16: Mahat Spill case has been assigned to DEC Patel as discussed on Con Ed meeting on 7/28/16. 07/05/17-Hiralkumar Patel. received email from Camissa (at 2:58 PM on 06/30/17) from ConEd including closure report. leak was found on the bottom of the 10 inch feeder pipe due to disbanded coating. total of 1,082 gal of dielectric fluid were lost to the environment. endpoint samples were not collected as remediation was planned during pipe refurbishment project planned at a later date. impacted soils were removed from the excavation as part of the repair and refurbishment activities. due to the observation of LNAPL in excavation, a temporary 8-in dia. recovery well was installed. on 04/03/17, ConEd went to gauge and sample the recovery well. specific well construction information was not available so the screened interval could not be determined. the 8-inch well was gauged at 11.5 ft bg and water was found at approx. 5 ft bg, with 0.01 ft of product. the 8-in well was purged prior to groundwater sampling. 3.1 ppm of TPH noted in groundwater samples. based on limited information regarding construction of the 8-in well, the well was replaced with 4-in dia. recovery well, with 10 ft of screen. the 4-in well was installed to a depth of 11.55 ft bg. the 4-in dia well was gauged on 06/01/17 and 06/14/17 when no measurable LNAPL or sheen noted. groundwater was found at 7.52 ft bg on 06/01 and at 6.91 ft bg on 06/14. the LNAPL noted in 8-in well may have been stagnant LNAPL trapped in the well and had accumulated over a roughly two year period. endpoint samples collected from excavation on north and south side of the area show TPH below limit. case closed based on review of available information."

Remarks: "on going leak rate 80 gals. per hour UPDATE leak has been clamped at 1100 hrs...total loss at 820 gals"

DEC Memo:	"6/7/07-Matthew Klaas (Albany DER) -Attemted to speak with Alexander Kostic of Hill International at 212-292-3562, this number is no longer in service, and has no message on how to reach Hill International. -Attempted to contact NYC Hazmat Unit (Potential Spiller) at 212-422-4782 this number is incorrect for the Hazmat Unit and there was no way to obtain a current listing for the unit. -I was able to locate a current telephone number for Hill International, 212-244-3700, where I was put in contact with Sylvie Chan. After speaking with her at length on the telephone, she requested I forward her some basic information about the file so she would be able to check anything on file concerning this and get back to me. She told me she would find what she could and then return any findings. 6/11/07-Matthew Klaas (Albany DER) -Drafted a letter to Hill International requesting additional information regarding this spill form. 3/31/09 - Austin - Transferred from Needs Reassignment to Rahman for further work to remeidate and close - end 07/22/10 Site is a DEP facility. Letter was sent asking documentation regarding the spill to NYC DEP 886 St Nicholas Avenue New York, NY 10032 Attn: John Sloane(sr) 08/26/10 Spoke with Shay Mcatamny@(718)595-4618.She said the tank closure was performed by DDC and she is trying to retrieve the files.(sr) ** No old documentation available regarding the tank,but DEP personnel told me that there is no tank at the site at present.** "
Remarks:	"CALLER FOUND TANK ON ABANDONED LOT - ALEXANDER KOSTIC TANK COVERED W/SOIL - OWNER THINKS THEIR TANK IS THERE. PLAN TO EXCAVATE IN A FEW MONTHS - WILL CALL BACK PRIOR TO REMOVAL & TO REGISTER TANK."

DEC Memo: "11/2/07-Vought-See spill #0706608 at adjacent site located at 2495 Adam Clayton and also previous closed spill #0751601. DEC requires: 1)Tightness testing of fill line as per DEC Krimgold 2)collection of groundwater sample immediately west of tanks. Spoke with DEC Krimgold and as per PBS records, PBS inspection performed by DEC Falvey in 2/07 and numerous violations including product in sump/catch basin. DEC Krimgold also confirmed that spill number should have been reported by ExxonMobil upon discovery of product in the sump. Vought called ExxonMobil (Kenneth Drake Cell 908-451-0956 Fax 609-698-8761 (kenneth.j.drake@exxonmobil.com). Left message with Drake to return call with contact info. Vought sent out letter with above requirements and a one month deadline with cc to DEC Urda and Galli (Gehrling). Vought called station operator (Theodoros Zorbas 718-762-4632 and ask for Chris). Vought called Chris (fax:718-762-4711) and informed him of situation and faxed and mailed copy of letter. Vought received mail from Acosta that DEP project manager is Maurice Winter (718-595-4514). 11/05/07-Vought-Received call from and spoke to Lina Hitchcock (713-460-4006) from Exxon Mobil. Vought provided her with information of closed spill 0611117. Hitchcock will contact Galli and Kenneth Drake regarding splitting samples and coordinating activities with consultant from other site. Fill line was tested as per Lina but tanks were not on 4/13/07. Vought spoke to DEC Urda and he discussed pursuing consent order upon confirmation that ExxonMobil was source. 11/14/07-Vought-Received call from Brendan Mooney (ExxonMobil 631-218-0612). Mooney received letter and tank testing will be performed by 12/3. Workplan will be submitted to DEC by 12/17 for groundwater. Frank Messina will be ExxonMobil project manager (732-850-4009) and Kleinfelder contact is Brendan Mooney. 1/10/08-Vought-Current file review by Vought: Letter from Kleinfelder (Mooney) to DEC Vought-11/19/07. Crompco Corporation of Plymouth Meeting, Pennsylavania conducted tank and line testing at the Site on November 8, 2007. The results of the test indicate that all tanks and lines are tight. A copy of the tank test results are provided in Attachment A . Investigation workplan for groundwater sample will be submitted to DEC by 12/17/07. Letter from Kleinfelder (Mooney) to DEC Vought-12/14/97. Scope of work includes installation of five soil borings/monitoring wells. Two wells will be installed on both the eastern and western portions of the Site and one well will be installed on the northern portion of the site. Scope of work includes collection of two soil samples from each boring and installation of five monitoring wells. Subsurface investigation will proceed within 90 days of receiving approval and DEC will receive report within 90 days. 1/10/08-Vought-After review DEC requires: 1)faster turnaround than 180 days total for report. Vought called and spoke to Mooney and both parties agreed that work could be performed in 45 days with 60 days of report preparation. Vought sent letter approving of Plan pending inclusion of shorter timeframes for report submittal of 105 day total. 01/11/08-Vought-Received email from MobilExxon Drake that his correct mailing address is: Kenneth Drake ExxonMobil-US Retail Remediation Project Manager 297 Route 72W Suite 35, #285 Manahawkin, NJ 08050-2890 Cell: (809)451-0956 Fax; (609) 698-8761 06/11/08-Vought-Reviewed Subsurface Investigation Report dated 4/18/08 and received on 4/23 from Kleinfelder (Brendan Mooney Ph:631-218-0612 Fax:631-218-0787). Installation of five monitoring wells and proposal for investigation of subsuface geophysical

EXXONMOBIL (Continued) **S108957494**

anamolies found and submission of quarterly status reports. Site currrently has five (4000-gallon) gasoline USTs, one 1000-gallon waste oil UST, one 1000-gallon fuel oil UST, four dispenser islands and single story building. Depth to groundwater if 15-19'bg. Wells installed via air rotary to a maximum depth of 32'bg. ....four subsurface anamolies were detected beneath the Site . Highest PID reading was in MW2(16-18'bg) that was 1400ppm. Groundwater flow to the east-southeast. Report recommends: 1)further investigation of the subsurface anamolies via excavation 2)quarterly groundwater sampling. Soil analyticals show: 20800ppb toluene(MW2 18-20'bg), 74700ppb ethylbenzene(MW2 18-20'bg), 533,000ppb xylene(MW2 18-20'bg), 418,000ppb-1,2,4-trimethylbenzene(MW2 18-20'bg), 130,000ppb 1,3,5-trimethylbenzene(MW2 18-20'bg), 3570ppb MTBE(MW3 25-27'bg). Groundwater analyticals show:'74ppb benzene(MW1), 284ppb toluene(MW1), 71ppb ethylbenzene(MW1), 595ppb xylene(MW1), 15ppb MTBE(MW1), 452ppb benzene(MW2), 241ppb napthalene(MW2), 6580ppb toluene(MW2), 3290ppb ethylbenzene(MW2), 18100ppb xylene(MW2), 111ppb MTBE(MW2), 36ppb benzene(MW3), 7ppb toluene(MW3), 323ppb ethylbenzene(MW3), 86ppb xylene(MW3), 2400ppb MTBE(MW3), 108ppb napthalene(MW3), 2ppb benzene(MW4), 3ppb benzene(MW5). DEC approves report pending inclusion of requirements: 1)complete delineation of soil and groundwater contamination including well installation of wells northeast of MW2 and southeast of MW2 2)cc to AC Development 3)submission of RAP Vought sent letter with above requirements to above address. 07/14/08-Vought-Received call from Mike Meyerhoefer (Kleinfelder 631-218-0612). Meyerhoefer considering consolidation of spill number from adjacent property to that of Exxon Mobil. Requested review of RAP. Vought called and left message for DEC Haggerty to return call to DEC with possibility of transferring spill to him as Exxon portfolio manager. 07/15/08-Vought-Spoke with DEC Haggerty who requested that spill be transferred to him as Exxon Mobil portfolio manager. Spill transferred from DEC Vought to DEC Haggerty and spill file sent to Albany. 7/21/08 - Haggerty: Reviewed file including the Supplemental Remedial Investigation Workplan dated 7/8/08. The workplan included the installation of 3 MW's and digging 2 test pits in the area of metallic anomalies detected with GPR. I approved this workplan contingent on Kleinfelder installing 3 additional MW's to determine the extent of the LPH discovered at .72ft in MW-2. Kleinfelder states they will install absorbent LPH socks in MW-2 but without estimating how much LPH exists on the watertable, it could be insufficient. 7/23/08 - Haggerty: spoke with Michael Meyerhoefer from Kleinfelder concerning the work plan. We discussed installing only 2 of the additional MW's I requested and moving their proposed SB/MW-8 closer to the tank field where I wanted a well. PM approved. 8/25/08 - Haggerty: met with Ben Conlon and Bob Cozzy to discuss this site. The property adjacent to the ExxonMobil station is to be re-developed. This spill # was issued when the adjacent property performed a subsurface investigation and product was discovered in a MW along the ExxonMobil station side. Ownership of the product was identified as ExxonMobil's. The developer of the adjacent property applied for the Brownfield Program using ExxonMobil's contamination as their way into the program. Brownfields require an on-site source and they are claiming Exxon's product as their on-site source. The meeting with Ben and Bob was to clarify that if the developer refuses Exxon/Kleinfelder access, the DEC will clean up the contamination on the developers property. A consent order will be prepared by DEE for the investigation and remediation of the ExxonMobil station. Also

EXXONMOBIL (Continued) **S108957494**

issued a letter to Exxon requiring the following: 1. Conduct Enhanced Fluid Recovery (EFR) events on MW-2. EFR events must be performed on a monthly basis until directed otherwise. 2. Perform tightness testing on all tanks and lines. ExxonMobil must evaluate why .72ft of product was encountered in May 2008 but not 3 months earlier. What happened since the tanks and lines were tested in November 2007 to cause this release? 3. Sample groundwater in MW-2 to determine what Oxygenate concentrations are present. Analyze for 8260B and all oxygenates. 4. Prepare a Corrective Action Plan (CAP) for the investigation, Interim Remedial Measures (IRM), and future remediation of the site. 9/5/08 - Haggerty: Sent letter to Exxon requiring an SI be conducted on the neighboring (A&C) property to delineate the extent of LPH 9/8/08 - Haggerty: received call from Michael Meyerhoeffer from Kleinfelder. While excavating test pits in the area of a metallic anomaly, old tanks were discovered. Test pits were part of the approved SIWP dated 7/8/08. 9/9/08 - Haggerty: on-site for day 2 of test pit excavation. A total of 8 550gal UST's discovered, but more are likely to exist. Tanks are located 4ft below grade and are encased in concrete and appear to be filled with sand. All Kleinfelder was able to accomplish was excavating an ~10ft by 20ft area down to the concrete slab on top of the tanks removing some of the associated piping. Kleinfelder was not able to dig any further down or in any direction because the current fuel oil tank is to the south and the current gasoline UST's (5 4,000gal tanks) lie to the north and they were afraid of undermining any current tanks. New spill # called in because a layer of petroleum contaminated soil lie on top of the concrete slab over the tanks. 9/16/08 - Haggerty: Crompco tested tanks and lines. All tight 9/23/08 - 9/24/08 - Haggerty: on-site for 2 days of SI. Intent of this investigation was to delineate LPH on-site. 6 new wells installed. 2 adjacent to the recently discovered 550gal tank bed. Heavy soil and groundwater contamination, LPH encountered surrounding 550gal tanks (LPH black). PM believes these tanks to be the source. In all but 1 well, PM observed a sheen in the sample at water interface. 10/1/08 - Haggerty: Spoke with Exxon PM, Ken Drake, concerning the level of contamination I saw the the previous week. Followed up our conversation with an email to make DEC requirements clear. 1. ExxonMobil must move as fast as possible. Mr. Conlon wants the source removed ASAP. 2. If the old 550's aren't the source, then there was a large loss of inventory involving the current tank system which was never reported. 3. The IRM work plan for source/tanks removal must be submitted by the end of next week and the design for sheeting/shoring should be underway. 4. Off-site investigations across West 145th Street and on A&C property must be implemented in parallel with the IRM. 5. Since removal of all contamination is not feasible (product under station building and the limitations of excavating to 25ft in Manhattan) a remedial system will be required to deal with the remaining product as well as any remaining soil and groundwater impacts. 10/10/08 - Haggerty: approved Off-site Investigation Work Plan dated 10/2/08. Work plan submitted in response to my 9/5/08 letter requiring delineation/investigation of neighboring A&C property. A specialty rig will advance borings inside the old Supermarket building. Also on 10/10/08, an Underground Storage tank Removal work plan was submitted. Work plan does not address DEC requirement of removing tanks and contaminated soil (source). Since the current 4000gal tanks are pushing up against the old 550gal tanks, Exxon states that they will only be able to remove at the most

EXXONMOBIL (Continued) **S108957494**

10 of the 12 550gal tanks and none of the contaminated soil beneath it. They state that to remove the tanks/source, they would have to install sheeting and shoring and remove the current tank system as well. 10/27/08 - Haggerty: submitted letter to Exxon stating the UST removal work plan did not address DEC comments and again required tanks/source removal as an IRM. 10/29/08 - 10/30/08 - Haggerty: 8 EFR/vapor extraction events conducted. Removed ~273gal of product, ~814lbs of vapor, and ~20,000gal of petroleum contaminated groundwater. An ICE (Internal Combustion Engine) was hooked up to burn the vapors being collected. Vapors were being vented at concentration over 120,000ppm (12%) 10/31/08 - Haggerty: Spill Busters (temporary product recovery system) installed at MW-6, MW-10, and MW-11 11/6/08 - Haggerty: had conference call with Ben Conlon and Exxon's legal team. I told them that the tanks/source must be removed. Ben informed them that the faster the source is removed the less penalty he will pursue from Exxon 11/10/08 - Haggerty: Exxon submitted an IRM source removal work plan. Removal of 18 tanks and overexcavate to 22ft with the installation of sheeting and shoring. Groundwater ~18fbg 11/4/08 - Haggerty: Spill Buster (LPH only recovery system) initiated in 3 wells exhibiting product. 11/24/08 - Haggerty: approved IRM tanks/source removal work plan. 11/24/08 - 1/15/09: Began outreach to the community by contacting the Community Board 10 District Manager, Geneva Bain. Also, began preparing fact sheets in both English and Spanish. We identified 5 buildings directly behind the station on West 144th which are our target area for the distribution of fact sheets. Geneva Bain brought in Charles Callway from WeAct, an environmental justice group in Harlem, to assist her with these issues. Decision made to have a public meeting on January 15, 2009 to give the community a chance to discuss any concerns. Our environmental justice coordinator, Lisa Garcia, was also brought in. Document Repository at the National Action Network at 109 West 145th Street, Harlem 12/12/08: SVE/AS test conducted 12/18/08 - Haggerty: Exxon submits an IRM work plan addendum. Due to the contraints of the site (canopy, station building, poor condition of adjacent buildings) the sheeting/shoring plan was modified. The excavation will be to 18ft. 12/23/08 - Haggerty: IRM Addendum approved 12/29/08 - Haggerty: Supplemental Subsurface Investigation Report sumbitted. Exxon had previously been warned that if field observations such as odor, staining, sheen, or visible product were not included in the boring logs and the report, we would refer the matter to our legal department. I was present for the investigation and sheen and visible product were apparent especially in MW-6 (right next to the source, the tanks). The report did not include this information and the report was rejected. 1/14/09 - Haggerty: ExxonMobil and Kleinfelder came to Albany for a meeting to discuss the public meeting in Harlem the following day and the reporting of field observations. Don Englert, Ken Drake, Charles Kolb from ExxonMobil Dennis Shin, Michael Michael Meyerhoeffer from Kleinfelder We informed them that the situation in unexceptable and any future report submitted without field observations will be rejected. We do not trust them. 1/15/09: Public meeting held in Harlem. Bob Cozzy and myself, ExxonMobil, Kleinfelder, CB10, WeAct, DEC Department Environmental Justice Coordinator, and the regional EJ coordinator present. Meeting was well received by all in attendance. 1/21/09: CAMP approved 1/26/09: IRM begins, LPH recovery system shut down. Over 800gal of product removed thru Mobile Remediation Events and the recovery system. 2/12/09 Previously unknown 4000gal tank installed in

EXXONMOBIL (Continued) **S108957494**

1971 discovered. Filled with concrete and water. 2/18/09 - 2/19/09: PM on-site. Orphaned 4000gal tank removed previous day with soil contamination under the tank. All contaminated soil could not be removed due to the proximity of the station building. Tank located between the station building and the dispensers With met Engineers to discuss the retaining wall on the south side of the property which separates the Station of the adjacent apartment buildings and the Lenox Family shelter on West 144th St. Condition of the wall is very poor. Engineers state that the wall would have to be removed or braced before the sheeting/ shoring can be installed 2/24/09 - 2/26/09: PM on-site. PM witnessed all the 5 4000gal tanks removed. Double-walled steel buffide tanks in excellent condition. They were not the source or even a contributing factor. The 12 550gal tanks (in poured concrete vault) were visible from the 4000gal tanks excavation. Contamination noted around the 550's and underneath the tank mat for the 4000gal tanks. Appears that Exxon knew about the contamination back in 1988 when the 4000gal were installed. PM notifying legal (Scott Owens) and forwarded photographic evidence. 3/4/09 - Haggerty: approved off-site SI workplan to install 10 MWs in the sidewalks on both sides of West 145th, the east side of Adam Clayton Powell Jr. Blvd, and the north side of West 144th St 3/25/09 - Haggerty: approved off-site SIR for the A&C Property. Also approved a change in the UST/Source removal workplan. Due to the poor condition of the back retaining wall, PM made the decision to remove the installation of sheeting and shoring and use sloping to excavate the of the on-site contaminated soils. Approximately 300 tons of contaminated soil will be left in-place due to its close proximity to the station building. The upcoming SVE/AS system will be used to remediate the remaining soil contamination. 4/17/09 - Haggerty: RAP submitted which doesn't remediate the A&C property actively. PM planning a site visit to the A&C property with technical staff only to discuss how the contamination will be delineated and where to install SVE/AS system on their property. System must be operating on the A&C property before they re-open 4/29/09 - Haggerty: met with Ken Drake and Charles Kolb from ExxonMobil as well as Sandra Acosta from A&C and the current owners of the property. The owners are losing money becuase they're paying taxes and rent on a property that isn't bringing in any money because as it is vacant. Original plan was to redevelop but once the contamination was found and the recession hit, investors pulled out. We worked out a plan to delineate the groundwater contaminaiton and install SVE/AS points as needed. It will be difficult to install the points and piping inside the building, but ExxonMobil agreed. They will send an amendment to the RAP. 6/2/09 - Haggerty: SI workplan and RAP Addendum submitted. My comments were: 1. Section 4.2 (Site Geology and Hydrogeology) of the Remedial Action Plan Addendum must be revised to reflect the actual LPH thickness in the monitoring wells gauged on February 5, 2009. The infonnation is incorrect. 2. LPH recovery through the use of Spill Buster(s) must be re-initiated to accelerate the remedial process and prevent LPH from migrating off-site. 3. Install temporary sub-slab pressure monitoring points in the basement of the A&C property to ensure vapor control once the SVE system is operational on the A&C property (see attached map). 4. The decision to proceed with Phase IT and Phase mof the Remedial Action Plan Addendum will be made by the Department. 5. Remove items 1 and 2 from the March 2009 Corrective Action Plan and re-submit. 6/19/09 - Haggerty: had conference call with Ken Drake from ExxonMobil and Kleinfelder. The last issue

EXXONMOBIL (Continued) **S108957494**

holding up my RAP and RAP addendum approval was LPH recovery in addition to SVE/AS. Ken Drake agreed and sent an email stating LPH recovery will be incorporated into the remedial system and an additional RAP Addendum will be submitted. A figure showing the location of the proposed additional points will be provided for approval by the end of July 2009. A RAP Addendum presenting the revised SVE/AS and product recovery remediation system, as well as the supporting field observations, boring logs, etc., will be submitted within 60 days of completion of on-site drilling. RAP approved April 2010 - Currently, all system wells have been installed and the system, itself, is to be installed soon. Con Ed to install= electricity for the remedial (System requires 400amp service) in April. A&C property is still not open for business. Vapor Abatement System for the adjacent property is operating on the station s power. May 2010 - Con Ed informed Kleinfelder the system power won't be installed until Sept. 30. If he can't get it re-scheduled earlier, PM will make a call on their behalf July 2010 - Con Ed has installed power now waiting on delivery of the system. August 2010 - SVE/AS/Product Recovery system being constructed in Canada and is on schedule to be delivered in the first week of Sept. High concentrations of MTBE appear to be coming from the Hess Station immediately adjacent to the property to the east. EM requested FOIL of neighboring Hess Station records which PM provided. EM will be calling in a new Spill Oct.2010 - A SSUR was recieved. (SD) November 2010 - EM has handed the project over to Liberty Petroleum Realty LLC. See 11/18/10 letter from Liberty. (sd) February 2011 - SSUR due by the end of the month. PM and R2 Spills(Sharif) will discuss the recent on-site MTBE spike adjacent to the neighboring Hess station and determine whether Hess must proceed with an investigation. March 2011 - Sharif reviewed SSUR and asked Hess to perform SI to determine whether MTBE is coming from their station. System should be running in April April 2011: SVE/AS system start-up on April 20 July 2011 - System start-up report due in August August 2011: reviewed and approved the Start-up Report. Aracdis called to inform PM that the system shut itself down due to overheating of the CatOx unit when they turned on the AS legs. They should have consulted w/ PM before turning on the AS. Product remains on-site. November 2011: SVE/AS system running well. An ethanol detection in 3 wells beneath the adjacent building (no wells surrounding the current tanks or lines contained ethanol) prompted a discussion with ACradis PM. She re-sampled immediately and the results were negative for ethanol. Site needs Consnet Order with Liberty, currently have CO with EM February 2012 - site under global order between Liberty and ExxonMobil. System running well, Still can't turn on the whole system April 2012 - expanding the system with 1 additional AS well may be necessary. System running well June 2012 - expanding the system to cover an additional area on hold. SVE and product removal appears to be improving the area around MW-18 December 2012 - semi-monthly gauging of MW-18 was discontinued. System operating well. I approved the discontinuation of several wells. The were consistantly clean for years February 2013 - system good. some metals desorption around AS wells May 2013- system continues to operate well. Groundwater contamination is substantially reduced October 2013 - approved shutting down the system for the subsurface to reach static conditions to access whether additional mass can be removed May 22, 2014 - Haggerty: received call from Art Clark from First Environmental to discuss the possible closure of the Spill. Their

EXXONMOBIL (Continued) **S108957494**

client is the adjacent grocery store where product was first encountered during the property's Phase II investigation leading to the remediation of the former ExxonMobil gas station. He requested a conference call to talk about their client's concerns May 29, 2014 - had conference call with First Environmental, adjacent property owner (Jonathan Abed), Jim Moras, Scott Caruso and PM. They proposed Arcadis (RP's consultant) install 1-2 wells inside their client's grocery store where high dissolved BTEX concentrations (up to 80,000ppb) were encountered in 2009 because Arcadis is proposing Spill closure. Those monitoring wells were destroyed by the grocery store owner before the SVE/AS system came on-line because the concrete slab inside the grocery store was extended over the wells making them inaccessable. We inform them that a structural evaluation of that area would be required if a GeoProbe or drill rig was to install a monitoring well there. Based on our information, a large subsurface void remained below this area. June 5, 2014 - Haggerty: Jim Moras and PM had conference call with Arcadis (Sahithi Rondla, Andy Korik, and Neil Frasca) because they heard from the adjacent property's consultant, First Environmental. We informed them that we believe their request for additional data at the adjacent property is reasonable. October 20, 2015 - Haggerty: Issued NFA letter stating the Spill does not meet standards including the caveat that the Spill can be re-opened if contamination is encountered which requires additional remediation. The Spill was remediated to the extent feasible. Remedy consisted of on-site source removal and a SVE/AS system operated on and off-site until asymptotic levels of mass were recovered. Post-system shutdown, groundwater monitoring revealed no rebound in dissolved-phase contamination and the Spill would have been closed earlier if the adjacent property owners had not requested additional performance data. The Department determined the Spill needed to be closed to be consistent with the program. We entertained additional data being collected on the adjacent property but the logistical problems made it collection difficult and the various parties (ExxonMobil, Liberty Petroleum, the adjacent property owners and their consultant) involved created delay. The area in question in approximately 1500sq ft and the down-gradient groundwater is clean."

Remarks: "As per PBS inpsection on 2/9/07 by DEC Falvey, product found in sump and spill found but not reported. Note also heavy gasoline contamination at site immeidately adjacent to tank pad (Spill #0706608)"

him for his review.(sr) 5/30/14 - Austin - Spill transferred from Rahman to Mahat for followup with Hess - end 4/29/16: Mahat e/c: DEC Mahat sent an email to DEC Haggerty inquiring his involvement on the spill case. DEC Haggerty sent an email update on the case. Email: Santosh, I recently closed Spill #0751061, the long-term ExxonMobil remediation spill number, at this property. In 2010, I asked Kleinfelder (ExxonMobil s consultant) to call in the above-referenced spill number because elevated MTBE was encountered during quarterly monitoring which was up gradient of ExxonMobil distribution system and the immediately down gradient of the adjacent Hess station located next-door. At 12,000ppb, I thought it was worth investigating. I ve attached the last quarterly report from Kleinfelder which demonstrates the well in question (MW-5) has since cleaned up. Let me know if you need additional information. Thanks, Mike Spill case has been crossed referenced with old spill case #0751061. A quarterly report has been uploaded on D2 for reference. Based on the report, the spill case is closed. "

Remarks: "possibly from Hess Gas Station next store - lab results showed 12000 ppb of mpbe - Mike Haggerty aware of this situation"

DEC Memo:	"7/15/2008 TTF letter sent to: Robert Grace Robmill Realty Inc. 347 Convent Ave #A, NY, NY 10031 see eDocs 12/08/08 Atec Environmental sent a letter saying the following: Atec Environmental is a staten based Environmental Company dealing with all aspects of fuel oil storage tank maintenance. Dr. Robert Grace is the owner for the above referenced property. On june 26, 2008. Pro Test arrived at the above mentioned location and performed a System Test. of which failed. Dr. Grace called Atec Environmental for a second opinion. Upon

MULTI FAM DWG/COMM (Continued) **S109208807**

commencement of starting the test it was observed by the tank tester that the fill line looked a little corroded. The fill line which run aboveground but covered by small driveway stones was corroded, and Atec as well as the tester felt this was very strongly the reasons to why the tank had failed the initial test. Atec Environmental promptly replaced the existing fill line from the tank to the sidewall. During our removal of the driveway stone we did not uncovered any liquid oil, nor did we find any evidence that at anytime the oil impacted the ground. Due to this fact no soil samples were taken. Attached you will find copy of the passing tank test report as well as a verity of photo's of the work performed. Case Closed. "

DER Facility ID:	349644
DEC Memo:	"4/20/17-Zhune spoke to Victoria from Protest Environmental. Victoria said the tank was tested and it failed with a dry leak. They sent the proposal to isolate the tank and retest it. 4/25/17-Zhune spoke to Victoria. Victoria said they are going to do excavation, isolation and retest this week. 4/25/17-TTF letter sent to; Robmill Realty Dr. Robert Grace 416 west 151 Street Apt 1A New York, NY 10031 9/12/17 TJD File review. Closure report submitted to PBS Unit (Falvey) and forwarded to Spill PM (DeMeo). As per report submitted by ProTest: On April 19, 20 17 Pro Test Environmental performed a tightness test on the above subject tank system and it failed with a combination wet/dry leak. On April 27th, Pro Test returned to isolate the tank from its associated lines. Technicians dug to uncover connections at the top of the tank. The connection to the remote fill line at the top of the tank was plugged. After isolating the suction and return lines, the partially isolated tank failed with a dry leak only. Breaking the concrete mat over the tank revealed the true dimensions of the tank. It was initially reported that this was a standard 3,000 gallon cylindrical underground storage tank. This tank is actually a square tank measuring 100 inches by 154 inches with a depth of 60 inches. Based on these direct measurements, the tank has a capacity of 4,000 gallons. Uncovering the whole top of the tank revealed that the petrometer gauge was disconnected from the tank. The tank was fully isolated including remote fill , vent line, stick line, supply and return lines. The manhole cover was regasketed and rebolted. The tank only passed a tightness test on May 3rd. Technicians returned on May 17th to begin repairing the piping. Due to landmark building permitting restrictions, the bad remote fill line under the city

MIXED USE (Continued) **S120702922**

sidewalk was not able to be removed at this time. There was evidence of staining where the line crossed under the sidewalk but the extent of any contamination could not be assessed without removing a section of the sidewalk. A new remote fill line was installed to the fence line. Technicians installed a new vent line with vent alarm and vent cap. A new stick line with fill box was installed. New supply and return lines were installed. Work to replace the piping was completed on May 25th. A final system test was performed on June 5th and passed. Based upon the information provided by the contractor and the passing system test results following repairs, no further action is required at this time. All documentation has been uploaded to DECDOCS. Spill closed. "

DEC Memo:	"10/1/07 Sent ttf letter to: Danny hakakian Vintage Realty LLC 3154 Albany Crescent Bronx, NY 10463 Called Mr. Hakakian (718)796-9595. I left message to call me. bf 07/16/13 - Spill Case is transferred from Brian Falvey (PBS Unit) to V. Brevdo (Section B) as per DER Region 2 decision - Tank Test Failure Spill Case. VB 11/22/17: TC Steve

APARTMENT BLDG (Continued) **S108765594**

Becher, 917 747-7333, what needs to be done to close out spill, requested call back as soon as possible, has a tank test company on standby, has a closing scheduled for this Friday. His email address: bechershauli23@gmail.com, sent email to VB - JAA 11/22/17 - V. Brevdo Returned call to Mr. Becher 917 747-7333 and explained what needs to be done from standpoint of closing the spill case: Tank testing company or qualified remedial consultant must examine and test the tank. If tank and system pass test and contractor concludes that no product release occurred and no impact to the subsurface of the building, and no impact to the environment, than spill case closure request can be filed with the Department with appropriate explanations and rationale. If release occurred, then soil sampling may be needed. Also suggested that Mr. Becher contact Leszek Zielinski, PBS Unit to find out what the exact requirements for complying with PBS regulations as tank is overdue for retesting. I provided Leszek s contact information. Mr. Becher thanked and stated he understands spill closure requirements and will contact Mr. Zielinski for PBS matters. VB 11/29/17 - V. Brevdo Received e-mail from All Boro Tank Testing and managing agent for the property. Tank Test Report demonstrated that the tank passed 11-29-17 test. All Boro Tank Testing technicians did determine that the reason the tank originally failed the test back on 8/20/2007 was possibly due to a bad compression vent fitting on the tank, which was a dry leak. All Boro Tank concluded that No product/oil escaped the tank nor was released into the environment. When All Boro Tank performed first test on 11/27/17 - tank was leaking air. All Boro Tank replaced faulty fitting with a new one. Once that was done, All Boro re-tested the system and obtained a pass (All Boro submitted tank test pass report). Vintage Realty requested spill case closure. e-mail from All Boro Testing in support of spill case closure request: Vadim, Hi I would like to present the facts as they relate to the recent oil tank testing at the aforementioned location. All Boro Tank was contracted to perform a Certified Tank Test on the 5,000 Gallon AST on site. Apparently, at this location there had been a previous tank test conducted resulting in a failure and the opening up of spill # 0705794 dated 8/20/07. All Boro s technicians conducted a full system tank test on 11/27/17. The result of that initial test was failure due to a DRY leak being identified. This Air leak could be heard on both the in tank microphone, and it could also be heard if the technicians stood next to the vent line. Men identified the source of the leak to be coming from the compression fitting used on the vent line. When testing tanks in the past with this type of fitting has caused tests to fail as they never seem to seal quite right for this type of testing. It was concluded that this leaking fitting was probably the same reason for the initial tank test failure back in 2007. Technicians changed out the compression fitting with the standard black pipe type and re-tested the entire system. The result of the second round of testing was a Pass. All Boro has corrected the problem with the tank and can state that no oil had been released at any point. With that we respectfully request closure of spill # 0705794 at your earliest convenience. Thank You for your assistance in this matter. The Department closed spill case on 11-29-2017. VB "

Remarks: "caller did not have actual access to tank "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD Fuel oil coming up in the basement. Perimeter of the drain. Fumes and oil all over. 12/02/03. J.Krimgold @ site. Fresh (pink color) #2 oil smeared around two storm drains of the basement. Dye test of the storm drain revealed that it connected to a buildings sanitary sewer which is almost blocked. Raised water brought oil up the drain. About 2-3 gal of oil observed in the storm drain. Spoke to Joanne Boyd (212)690-1553 - building owner. Building converted to a natural gas heat about 2 years ago and currently does not have oil tank or pipes. Ms. Boyd suggested that oil is coming from adjacent building 468 W. 153rd Street which has oil heat system. J.Krimgold inspected adjacent building and found that it has 2x275 gal ASTs and underground fill line. Ordered to test the fill line for tightness. In any case, it is not clear how the oil gets into the storm drain. 12/03/03. J.Krimgold @ site. Pitro Oil is performing a hydrostatic line test. The fill line passed the test. Ms. Boyd hired a contractor to unclog sewer and clean up the storm drain system from oil remains. Advised Ms. Boyd to contact the Department immediately if oil or petrol. odor reoccurred in her basement. NFA"

DEC Memo:	"7/29/16 - obligado - Desk Duty - Duplicate spill report from earlier incident assigned to Mahat. 8/3/16: Mahat DEC Remark for spill 1604236: Response: On 7/28/16, DEC Spills staff responded to a reported 30 gallon sidewalk spill in the upper Manhattan at above referenced address. The spill was due to overfill of a 3,000 gallon AST (PBS 2-208396). The # 2 fuel oil was mostly contained within the sidewalk and paved roadways. The tank integrity was not compromised and there was no visible indication of spill in the tank room. A Consolidated Edison service box # 22554 was impacted by the over fill. Con Ed was notified and EMIS # 248976 was generated for the cleanup process. Later, NYC DEP was notified about the spill by the Con Ed field technician. There is no residual oil smell/odor in the building at this time. The road sidewalk and road way spill has be cleaned by the oil company. No other resources was impacted by the

SERVICE BOX (Continued) **S118707075**

spill. The Department does not warrant any further work/investigation on the spill case. EMIS : 248976 [Crossed Referenced] EMIS Remark: MANH Environmental Services Mechanic A Asinto B Muller (05384) reported 3rd Party spill of approx. 120 gallons of unknown oil (most likely fuel oil) entered SB #22554. Crew awaiting COC form, sample jars and env. tag and WR #. Samples to be taken for oil ID, PCB and flashpoint. NYSDEC rep called Desk to inform of spill. Will enter spill number from DEC already reported. Unknown at this time if DEP was notified. Will notify if spill was not reported. COC #HH23601; WR #3545717; Tag #122825 Based on the nature of the spill on the service box, the case is assigned to Con Ed Unassigned. PS. THE ROAD SPILL HAS BEEN CLEANED UP. 9/13/16 - Austin - Con Ed contained and cleaned up this spill - See document files for further information, as well as spill # 1604236 (the original spill, closed on 8/11/16 - Spill closed - end"

Remarks: "Caller advised aprx 120 gal of fuel oil spilled into a service box for con ed. Santosh is aware of the situation. CLean up is pending."

IMPORTANT PHONE NUMBERS: Lindos Lindsay (nephew of one of the pastors/owners) says he is the one who really handles the financial matters and legal aspects, not Kira: (347) 228-8039 Patrick Peters: lives across the street from the church, son of an Archbishop Carlyle Clark - (212) 690-0630 Carlyle Clark: second archbishop at the church - no phone Archbishop (a.k.a. Reverend) Maxton France: 3519 DeReimer Ave., Bronx, 10466; phone (718) 519-7344 Kira Leid-King: sort of a treasurer-secretary , home (914) 632-0665; cell (914) 879-8126; work FAX (212) 455-2502; work phone (212) 455-2501 Cistine Grit (a.k.a. Ingrid; associated in some way with the church): (212) 234-0484/0485 Marlene Martin (exec. dir. Childrens Art Carnival): (212) 234-4093; cell (917) Northeast Environmental (company that did the partial cleanup on 1/14): Dwayne Monaco (914) 777-1930; cell (914) 403-5525 Community Board 9: (212) 864-6200 Cristine Brooks (lawyer; also involved with Board 9 and neighborhood organztn.): (212) 883-7600 Martin Smith (rep. for Councilman Robert Jackson): (212) 928-1322 Robani Oil (Robert Pearson): (212) 687-8699 On 1/14/06, Northeast Environmental sucked up about 120 gals. of #2 oil from the church basement and did 2 borings 18 down to bedrock. The borings were clean. Further work needs to be done in the corner of the courtyard where the wrought iron fence turns next to the Childrens Art Carnival (spill #0511700). The Carnival has oil in their front sump. A second vent pipe and a remote fill port (inside the church fence) were discovered by a technician from Northeast. There is the possibility of a third tank under the courtyard. Northeast had sucked up some oil from the front sump at the Carnival, but refused to go back there for free as they said that they were hired by the church. When I tried to call Rev. France on 1/17, Ingrid picked up the phone. She said that the church has done the cleanup and that's all they are doing. On 1/17/06, Jeff Vought, spill case manager, called up the church and left a message that they have to cleanup the entire oil spill and do an investigation. The church didn't return the phone call. I visited the Carnival on this date and found 10.1ppm total vapors (via PID) in the basement and high vapor concentrations throughout the building. This is a day care center and is presently closed due to the high vapors. 1/18/06 - Raphael Ketani. I tried calling the Church of Nazareth at (212) 234-0485, but no one answered and there was no answering machine. So I called (917) 642-8913, the cell for Archbishop Maxton France, and left a message

CHURCH OF NAZARETH (Continued) **S107523027**

for him to call me. I will send a contaminated soil letter. Another number was found for Archbishop France and an address: (718) 519-7344; 3519 DeReimer Ave., Bronx, 10466. I called the number and a man got on. I asked for Archbishop France and he put me on hold. A woman answered the phone and I spoke to her. She said Archbishop France was out for a week and to call Cistine Grit for any information I needed. I mentioned the oil spill and I asked for the person who owns or manages the church, but she again referred me to Ms. Grit. I made contact with Cistine Grit from the church at the (212) 234-0485 number. I asked to speak to someone responsible. She said that there was no one present to talk to. I told her that the state was going to hire its own consultants and open up the church and do an investigation on the grounds. Later I got a call from Kira Leid-King. She told me that she had paid Northeast to come and do the oil removal at the church. I told her there was oil on the basement floor and that Northeast had pumped out 120 gals. on 1/14/06 from the 2 275 gal. tanks in the basement. She said that there wasn't any oil on the floor and that the tanks had been pumped dry after the fire by order of the Fire Dept. I told her that there was a second vent pipe, a remote fill port, and a gauge for a 550 gal. tank mounted on the wall inside the basement. She said that she knew nothing about this. I told her that there may be a third tank under the courtyard. She said that she had no idea if there was. I told her that oil was coming out of the front basement sump of the Childrens Art Carnival and getting onto their basement floor. She said that was the Carnival's own fault and that the church has no oil so it is not responsible. I told her that the state is hiring its own contractors and will do an investigation of the church. She had no comment. MILRO Assocs. Inc. ((516) 379-1500) has been called and I spoke to Paul. I asked him to come to the Carnival to do ventilation and water removal work. We will meet at 10:30AM tomorrow. 1/19/06 - Raphael Ketani. A site visit was made by Randall Austin, Chief Spills Engineer Region 2, and myself. We were there to see the Childrens Art Carnival, but Patrick Peters came by and gave us access to the church basement. We saw the 2 275 gals. tanks, the fill line connected to the first tank, a vent line connected to a second tank, the filter apparatus in the floor and a suction line that was partially buried in the floor. No drains were observed in the room, but we didn't spend much time looking at the floor with our flashlights. We also saw a gauge that was mounted on the basement wall above the first tank. There was a light smell of oil in the room, but no oil on the floor. From best that can be determined, there is probably a third tank under the courtyard. We went to the Carnival and saw red oil in the top of the front sump. There was water seeping through the wall opposite the Carnival's oil tank, but it didn't feel or smell of oil. 1/25/06 - Raphael Ketani. I spoke to Lindsay Lindoss, nephew of one of the pastors, regarding what needs to be done concerning a possible third tank. He said he was unaware of a third tank there. I told him that there is a second vent pipe and a second fill port present that are not connected to the tanks in the basement. So the DEC believes that a third tank is present. I told him that he has to hire an environmental company and have them do an investigation immediately. He said he will do this. 1/30/06 - Raphael Ketani. I tried to contact Mr. Lindoss, but could only leave a voice mail message. 2/6/06 - Raphael Ketani. I tried to contact Mr. Lindoss again, but could only leave a voice mail message. Ms. Leid-King tried to call me and I tried to return her call, but could only leave a voice mail message.

CHURCH OF NAZARETH (Continued) **S107523027**

2/8/06 - Raphael Ketani. I received a call from Ms. Leid-King. She said that she has hired Commonwealth Land Title Insurance Co. to do a records (and title) search for the number of tanks on the church property. She said that they will look at Fire Department tank registration records, among others. I told her I was waiting to hear from Lindsay Lindoss regarding the hiring of an environmental investigation company. She said she had never heard of him, but she will find out who he is and try to talk to him. I told her he claimed to be a pastor at the church. She said there was only one pastor. Our conversation changed and she said that the present owners bought the church in 1965 and didn't install a tank under the courtyard. She said the only oil spill on church grounds she knew of was the one that was cleaned up on 1/14 in the church basement. She said the church is using over $1,000,000 in grants to get ready to rebuild the building and doesn't have any money for doing an environmental investigation. She said she would send me the results of the document search. 2/9/06 - Raphael Ketani. Ms. Leid-King called to say that Commonwealth finished their document search and came up with information from the NYFD that states there are only 2 tanks. I asked her to send a copy of the document to me. She said she would. 2/10/06 - Raphael Ketani. On 2/9/06, I tried to contact officials at the Housing Preservation & Development office, and the Landmarks Preservation Commission in order to find out whether the DEC can have its own contractor, MILRO, go to the courtyard, dig it up, and remediate the situation (whatever they find). I had left a number of voice mails as none of the appropriate officials were reachable. Today, Amanda Sutphin, Director of Archeology ((212) 669-7823), called me back. I explained the oil spill situation, the church's potential involvement, and the impact of the oil on the Childrens Art Carnival. I described the courtyard conditions. She said it sounded fine to go ahead and have our contractor dig up the courtyard and do whatever remediation work is deemed necessary. She said that I didn't need any special permits or paperwork, only her word over the phone. She said she will inform the other people in her office and elsewhere who need to know about the impending work in the courtyard. A little while later, John Weiss, Deputy Council of LPC ((212) 669-7921), called and asked what the situation was. I told him what I told Ms. Sutphin. He said that, normally, a paper permit signed by the representative from the church would be necessary to do the work in the courtyard. I told him the church either refuses or has not been reachable. He said that in emergencies, verbal permission is all that is necessary. He said he would get back to me. Mr. Weiss called me back and said that I would have to send him an e-mail describing the history of the oil spill, the impacts to the Childrens Art Carnival, what needs to be done to fix the situation, and that the impact is a danger to life, health, or property. He said that once I do this, then he can give me an emergency authorization. I sent him the e-mail letter listed below: NYSDEC Spill #0551505 Dear Mr. Weiss: My name is Raphael Ketani. I am an oil spill case manager, engineering geologist 2, with the Spills Unit of the Division of Environmental Remediation within the NYS Dept. of Environmental Conservation. Presently, I am conducting an investigation to find the source of #2 fuel oil which is leaking into the Childrens Art Carnival at 62 Hamilton Terrace, Manhattan. This problem has been taking place since January 3, 2006. The CAC provides daycare to children ages 4 to 6. The oil is entering the CAC through a sump in the front of the basement of the building. When it rains heavily, the water flows out of the sump and carries

CHURCH OF NAZARETH (Continued) **S107523027**

the oil with it. The oil flows onto the basement floor, in the process. Once on the floor, the oil vaporizes and the vapors travel throughout the building. The vapor concentrations have been as high as 5,000 ppb in the basement and as high as 700 ppb where the children's activity areas are. The NYCDOH visited the site on January 12, 2006, declared the vapors unsafe, stated that children were not to enter the building, and ordered the building closed. An indoor air pollution closure order was written up by the NYCDOH and signed by staff from the CAC. After this date, the NYSDEC has been having our own contractor, MILRO Environmental, come and pump out the oil from the sump and clean the floor in order to control the vapors. This took place many times, but still the oil keeps coming and keeps pouring out of the sump when it rains heavily. The CAC has remained closed to children. The NYSDEC has noted that there is an extra fill port and an extra vent pipe behind the Church of Nazareth which is next door at 72 Hamilton Terrace, NY. This has led us to believe that there is an undiscovered old oil tank under the courtyard behind the church. It is this tank which may be releasing the oil. However, there are no records with the NYFD, or with title companies, or on Sanborn Maps, or with any agency city or state that indicates there is a tank or that there isn't a tank. Therefore, the NYSDEC, through its contractor, needs to break up the concrete surface of the courtyard and see whether a tank exists and conduct a remediation project. As the church is a historic structure (previously a large end of row townhouse), representatives of the church are unwilling or unreachable to obtain permission from the Landmarks Preservation Commission for work to take place, and the children's health is at risk, the NYSDEC is asking the Landmarks Preservation Commission for permission to conduct our oil spill investigation. If we receive permission from the LPC, we expect to start work shortly after February 18, 2006. Thank you for your help and attention to our letter and have a pleasant day. Sincerely, Raphael Ketani Engineering Geologist 2 At 4:00PM today, I sent a letter to Ms. Leid-King stating that the Department will have its contractor conduct an investigation for a third fuel tank under the church courtyard since the church hasn't notified DEC that they are going to hire an environmental company to do so. I told her that this will happen sometime after Feb. 18 (the one month deadline in the DEC January 19, 2006 letter). 2/14/06 - Raphael Ketani. I tried informing the church officials that the DEC's contractor will be on site next week to begin digging up the church courtyard to investigate the possiblity of a third tank. I tried calling Mr. Lindoss, but could only leave a voice mail. Next, I tried calling Mr. Peters, but he wasn't home and a woman answered the phone. She wouldn't identify herself, but she took my name and message. I called Ms. Leid-King to tell her that the DEC contractor would be starting work in the courtyard next week. Ms. Leid-King said that DEC can't do that without permission from the Landmarks Preservation Commission. I told her that I had spoken to their lawyer, explained the situation, and he gave me verbal permission as an emergency situation due to the impact to the day care center (CAC). She said that this was no good and that everyone knows you have to get written permission. She demanded a letter from the LPC lawyer. I told her we didn't need one. She said that if anyone tries to set foot on the property, she will call the police and have them arrested. I told her its her right to inform the police, but the DEC has been dealing with this situation for a month, has given the church also a month to fix the problem, that we have to act, and that

CHURCH OF NAZARETH (Continued) **S107523027**

we are just giving her a courtesy call. Ms. Leid-King flew into a rage over the phone and stated she would call together a mass of people from the community to block anyone setting foot on church grounds. I ended the conversation by reminding her that this was just a courtesy call. Later, the woman I spoke to when I tried to call Mr. Peters called me back and said that she had talked to Mr. Lindoss and he told her that he is going to contract with an environmental company very soon and that the work will start next week. I told her to have Mr. Lindoss give me a call when the work will start. She said she would. 2/15/06 - Raphael Ketani. I tried to find out who the church's lawyer is by calling Mr. Peters again, but the same woman answered the phone. She said she would call some people, try to find out who it is, and let me know. I still haven't heard back from Mr. Lindoss and the woman didn't tell me when the environmental investigation will take place at the church. Next, I tried calling Cristine Brooks (the lawyer involved with Community Board 9) and left a message asking whether she knew who the church's lawyer was and if she could give me her name and number. 2/16/06 - Raphael Ketani. I called Mr. Weiss, Deputy Council of LPC, and told him that the contractor may have to take down a portion of the wrought iron fence when it comes to removing the third tank. He said this may require a written permit. He said he has to contact his General Council and get back to me. Cristine Brooks-Lee called me back at about 12:25PM. She said she didn't know who the lawyer for the church was, but she will find out. I told her that once we know, then our legal staff will contact the church's and send a warrant. She said she will keep looking for their lawyer. She added that she can get affidavits if we need them. 2/21/06 - Raphael Ketani. I received a call from Cristin Ciaburri of USA Environmental (718) 981-5710. She said she met with Mr. Lindsay and she believes her company will do the work of investigating whether there is a third tank on the property. She just has to get together a few more cost estimates for Mr. Lindsay and submit them to him. The proposal will go out soon. 2/24/06 - Raphael Ketani. I sent an e-mail to Mr. Weiss of the Landmarks Preservation Commission informing him that USA Environmental may be getting ready to do work on the site without realizing that they need to contact the Commission. 2/28/06 - Raphael Ketani. I talked to Cristin Ciaburri of USA Environmental regarding the beginning of the investigation for the third tank. She said that the work should start either this week or next week. However, she is waiting for the owner of the property, Mr. Lindsay's boss (as she referred to him), to sign the proposal so they can get started. She said she has contacted the Landmarks Preservation Commission and they will send her a letter by e-mail approving the work. Kristin said she is sure there is a third tank for the church. I asked her who Mr. Lindsay's boss is. She said the name was garbled on her voice mail and so she didn't know, but that if there is an investigation, the DEC will get a copy of the report with the owner's name on it. I told her to inform me when the work is going to start so I can be there. She said she would. 3/6/06 - Raphael Ketani. I spoke with Ms. Ciaburri today. She said that Mr. Lindsay had told her that he would get back to her by 3/3/06, but he never did. She also hasn't heard from the LPC regarding the letter allowing USA Environmental to dig up the courtyard. I told her to call Mr. Lindsay and the LPC and try and get things going. She said she would. 3/9/06 - Raphael Ketani. I received a call today from Marlene Martin of the Childrens Art Carnival. She said that a bunch of people pulled up to the church in plain cars last teusday, 3/7,

CHURCH OF NAZARETH (Continued) **S107523027**

and went to work on the courtyard. She said that they uncovered and opened up a tank today. 3/10/06 - Raphael Ketani. I made a site visit to the church. I saw an uncovered and opened tank. Soil had been dug away from the top of the tank. I took pictures of the tank and the environment around the tank. The dug up soil didn't have any odors, but looked wet. There was a sheen on the water in the tank and a little bit of red color to one side of the sheen. I called up Ms. Ciaburri and asked her why she didn't notify me when the work was going to start. She said that Mr. Lindsay still hasn't signed the papers to contract USA Environmental to do any work. She added that she knew nothing about the digging and the tank opening that took place. I will write letters to Mr. Lindsay and Ms. Leid-King telling them what the next step should be, to close the tank so that no one or any rain enters the tank, and to let DEC know when more work will take place. 3/20/06 - Raphael Ketani. I asked Marvin Edwards, Program Manager at the Childrens Art Carninval next door, to take a look at the exposed tank in the courtyard and tell me if any work appears to have been done. He looked and said that nothing has changed. Therefore, I wrote a letter to Mr. Lindos and Ms. Leid-King telling them that the church has until April 5 to resume work, or else the DEC will bring in its own contractor and do the investigative work. I also left an update for Ms. Cristine Brooks-Lee of Community Board #9. 3/27/06 - Ms. Ciaburri ((718) 981-5710) called to say that she received a call from Cistine Grit (a.k.a. Ingrid) on 3/24, friday. Ms. Grit asked that Ms. Ciaburri put together an investigation plan, send it to her and she would pass it along to Archbishop Maxton France and then send it to USA Environmental. Ms. Ciaburri asked what the DEC wanted as a plan. I told her two wells, soil samples sent to the lab for analysis, an oil sample from the tank for analysis, and possible abandonment in place or removal of the 550 gal. oil tank and removal of soil. She said she would forward this plan to Ms. Grit and keep me informed. Later, Randall Austin, Program Manager for DEC Region 2 Spills, received a call from Kira Leid-King. Mr. Austin told her that the tank had been dug up and opened. She said she didn't know that this had happened. He asked her whether she knew Lindoss Lindsay or Cistine Grit. She said she didn't. When he asked her whether she was the lawyer for the church, she said she wasn't. Mr. Austin asked her where she worked and she said Ury Leid and Associates at (718) 547-7200 - her dad's firm. She said to ask for Sherrell at the law firm. I tried calling Sherrell, but could only leave a message. I tried reaching Cistine Grit at the numbers in the record, but no one picked up the phone. I later made contact with Sherrell Distant, a paralegal at the Ury Leid law firm, and she directed me to Mr. Leid. I spoke with Mr. Leid and he said he is the lawyer for the church, but only regarding the roof situation. He said that he doesn't know who the lawyer for the church is, but he is in contact with Archbishop France. He said he will call Archbishop France and tell him to call me. 3/28/06 - Raphael Ketani. I received a call from Kira Leid-King today at about 9:45AM. She was very angry that DEC had sent the letter stating that we would take action if the church did not investigate the tank by April 5. She made some threats and told me to be very careful regarding what I say. She said she was going to take people to court for saying the wrong things. She even threatened my job and the jobs of others. After this, she calmed down and asked why DEC sent a $10,000 environmental fine. I told her we hadn't issued any fines to date. I told her it must be the NYC Building Department (I had been told by someone at the Building

CHURCH OF NAZARETH (Continued) **S107523027**

Department or by Cristine Brooks-Lee that there was a $10,000 fine pending). She asked who told me about the tank. I told her someone from the community informed me that, several weeks ago on a teusday, a group of people in plain cars had dug up the tank. She asked who. I told her the party wanted to remain confidential. After this Ms. Leid-King said that Sister Ingrid (Cistine Grit) gave her the $10,000 bill. I told her that Ingrid had been in contact with USA Environmental and had asked about a plan for investigating the tank. I added that this plan was supposed to go to Lindos Lindsay and that this group was moving forward with addressing the tank issue. I said there appears to be that group of people in the congregation and her group. She said there is only one group. She asked why I didn't get in contact with Sister Ingrid to find out what is going on with the tank investigation by the congregation itself. I told her I had been trying many times, but Sister Ingrid doesn't answer the phone. She asked Did you try every day? I told her that I have many cases to deal with here at the DEC and I can't call her every day. [In fact, I tried calling her on several occasions, including 3/27/06 and 3/28/06] Ms. Leid-King said that she speaks to Lindos Lindsay. After this, she said that the people who opened up the tank already took soil and water samples. I asked who was the environmental contractor and Ms. Leid-King wouldn't say. Next, she asked me what type of work would be necessary for the investigation. I told her about soil sampling between the church and the tank and the tank and the CAC, about the installation of 2 groundwater wells, about the possibility of either abandoning the tank in place or removing it, about updating the PBS record, and about sediment removal. She ended the conversation after that. 4/4/06 - Raphael Ketani. I finally got ahold of someone who represents the church. This person was Lindos Lindsay, nephew of one of the pastors. He said that progress is being made as the church is in negotiations with an environmental company for the work. He said that they didn't use Northeast Environmental as they wanted $40,000 or so dollars and this was too expensive. He said that they need several more days to set the plan and the costs. I told him this would be alright. I asked whether the church has a lawyer. He said No and asked whether the church needs one. I told him that if oil is discovered in the soil around the tank, then the DEC will hold the church responsible for the contamination at the Childrens Art Carnival and may bring legal charges against the church. He said he will try to find someone. I contacted Cristine Brooks and gave her an update on the CAC and church situation. She told me that the owner of 60 Hamilton Terrace is Lisa Silversmith at lisasilversmith@yahoo.com. I will send Ms. Silversmith a reminder through e-mail that the DEC would like access to her basement. Ms. Silversmith has real estate offices at 38 Hamilton Terrace and West 145 Street, NY. 4/5/06 - Raphael Ketani. Mr. Lindoss called to say that the church contracted with Petroleum Tank Cleaners (PTC; (718) 624-4842) to do the tank investigation and possible remediation. He said they will be on site on thursday, 4/6. I told him I will meet PTC there. Mr. Lindoss added that PTC told him they could start work this friday. I spoke to Joe of PTC and he said that PTC has not been contracted yet by the church. He said the only thing that is going to happen is that one of his guys will show up at the church, look over what the situation is, talk to Mr. Lindos about the job, and give him a price. Joe said his guy has 4 or 5 other jobs to take care of first and so he doesn't know when he will be there. 4/6/06 - Raphael Ketani. Cristin Ciaburri of USA Environmental (fax 718-981-7537) called. She said that no one

CHURCH OF NAZARETH (Continued) **S107523027**

from the church has been in contact with her since the last time she spoke to them. She has mailed a proposal to Cistine Grit (Sister Ingrid). Later this morning, John Weiss of the Landmarks Preservation Commission called to say that there is an open oil tank at the property and an open basement door. He wanted to know who to call regarding the open tank. I gave him the phone number of the NYC Fire Department. 4/11/06 - Raphael Ketani. I received a call from Ms. Ciaburri of USA Environmental. She said that Bishop France signed the contract to have an investigation done. She said the first step will be to empty out the tank and tank 4 soil samples from borings around the tank. I told her I also wanted sampling of the oil floating on top of the water in the tank and fingerprinting of the oil. She said that her company is willing to do all the investigation steps that the DEC wants, but first she wants to do the tank and the soil borings. 4/17/06 - Raphael Ketani. I received a call today from Ms. Ciaburri. She said that she will be at the church on 4/19/06 between 9:30AM and 10:00AM to pump out the tank. I told her I will meet her there. 4/19/06 - Raphael Ketani. The tank investigation crew from USA Environmental arrived on site. Ms. Ciaburri wasn't there, but the foreman for the crew was, Keith Bartley. The crew made up to six attmepts at three different locations to do geoprobing around the east, north, and south sides of the tank. They even tried to punch the probe withing the tank pit, about 2 feet away from the tank. All attempts failed due to hitting hard rock. Mr. Bartley said that they will come back another day and punch two holes through the bottom of the empty tank. I spoke to Ms. Ciaburri later and told her what happened and what Mr. Bartley proposed. I told her that emptying the tank, taking an oil sample for fingerprinting, punching 2 holes through the bottom of the tank, and taking soil samples sounded fine. She agreed. 4/26/06 - Raphael Ketani. I spoke to Ms. Ciaburri regarding progress on the site investigation. She said the vac truck broke down so they didn't pump this week. She said they will pump next monday or teusday. I told her to call Mr. Vought if they do. She said she would. She added that Cistine Grit got a fine from the NYFD for not having abandoned the 550 gal. and 2 275 gal. tanks. She said James Kendal of the NYFD issued the fines and the church has 30 days to pay the fines. Also, Cristine Brooks-Lee called to find out the progress on the site investigation. I gave her a briefing regarding the attempted soil sampling and future plans. 5/16/06 - Raphael Ketani. I spoke to Ms. Ciaburri regarding the soil sampling. She said they emptied the tank and did 1 soil boring and sampling through the bottom of the tank. She said that they also took soil samples from under the end of the fill line where it still exists and under the return line where it still exists. A total of three (3) samples. She said that they will get the soil sample analytical results either at the end of this week or next week. Also, the case is being transfered to Jeff Vought today in order to consolidate all of the PINS cases (and associated cases) under one Spills case manager. 06/06/06-Vought-Complete File Review by Vought: See also spill numbers: 0209311(60 Hamilton Terrace-closed 12/22/05), 0511505(72 Hamilton Terrace). Sale of 72 Hamilton Terrace by City of New York to Nazareth Spiritual Church and resulting Deed transfer-4/20/72. Site visit on 1/11/05 by DEC Vought-DEC required: 1)tank testing results 2)notification to NYCDOH 3)installation of ventilation system in basement 4)sealing of sump and washing of basement floor. Vought left message with NYCDOH Nieves, spoke to Mike Hughes(NYSDOH) and decision to close is the call of Marlene Martin. Oil was first noted on 1/3/06

CHURCH OF NAZARETH (Continued) **S107523027**

and basement filled with water during times of heavy rains. Three sumps present in basement of Childrens Art Carnival(CAC). Sump closed to Hamilton Terrace contained fresh #2 fuel oil. As per Marlene Martin, she contacted 60 Hamilton Terrace to see if they had spill and no spill was found in the basement and she contacted the Church who noted an oil spill next door at 72 Hamilton Terrace. Email from NYSDOH Hughes to NYCDOH Peter Stallbohm with cc to NYCDOH Nieves- How did you inspectors make out at the 64 Hamilton Terrace spill? . Email from NYSDOH Hughes to NYCDOH Stallbohlm and DEC Vought-1/18/06. ...any updates about the Childrens Center in Manhattan? Have they re-opened, cleanup status? . Response from Stalbohlm At 64 Hamilton Terrace, readings of 4-5ppm of VOC was detected. A contractor was contracted to conduct a cleanup yesterday. The center voluntarily closed until so. After cleanup, another visit will be made to check effectiveness of cleanup (possibly today). Email from NYSDOH Hughes to DEC Vought-1/19/06. Peter Stallbohlm, NYCity Health, sent an inspector back to the Children's Center on Tuesday, 1/17. The inspector reported odors are still present... Fuel product still present in basement. The center is still closed and NYCity Health recommends staying closed until the additional clean-up is performed. Would you be able to also make a site visit and recommend some specific actions as well? . Letter from DEC Ketani to Kira-Leid King (Nazareth Deliverance Church NDC)-1/19/06. The New York State Department of Environmental Conservation (the Department) was notified on January 10, 2006 that a petroleum release took place at the above referenced site. Odors were noticed coming from the basement of the church during an inspection of the area on January 11, 2006. Staff from the Department were at the site on January 14, 2006 to observe the removal of No. 2 fuel oil by Northeast Environmental from Nazareth Deliverance Church . (6/6/06-Note that I, jeff Vought was onsite and liquid was recovered from basement when I arrived on-site, I did not observe oil in the basement as the liquid was already recovered). The Department has identified the Nazareth Deliverance Church as a potential responsible party for this release . Letter required submission of an investigative summary report including the investigation of a possible third tank under the church courtyard. The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness . If no reply regarding the investigation is received from the Nazareth Deliverance Church within (5) days of receipt of this letter the Department may proceed with the required work... . Letter from DEC Ketani to CAC Martin-1/19/06. The Department has identified the Childrens Art Carnival as a potentially responsible party for this release . Notification that the Departrment has contracted Milro and will invesigate the source of oil. Upon one of the inspections of the Childrens Art Carnival, staff from the Department noticed a three foot long piece of suction line at the foot of the stairs of the basement. The Department requires that the Childrens Art Carnival immediately conduct a site investigation to determine why the line was replaced, whether there was a release of product and how large the release was, when the suction line was replaced and which company did the replacement work. The Childrens Art Carnival must also hire a contractor to have the suction line and return line (the two 3/4 inch copper lines) pressure tested . Letter from DEC Ketani to CAC Martin-1/23/06. ...the Department was notified on January 20, 2006 that a tank system test was conducted by AL Eastmond & Son, Inc. on this date and that a leak was detected in the tank and vent line. At

CHURCH OF NAZARETH (Continued) **S107523027**

this time, the Department is ordering the Childrens Art Carnival to repair or replace the tank and the vent pipe, and to hire a contractor to investigate the oil spill and remove all contaminated concrete flooring, soil and rock and all product and contaminated water . Letter from Marlene Martin (CAC) to DEC Ketani-1/27/06. To date we have cooperated with the Department of Environmental Conservation on all requests, recommendations and mandates. Enclosed, please find the job tickets for work performed by Eastmond and Sons, Inc. as per your Department's madates and directives. It is our hope that a resolve can be reached as soon as possible and or that the Carnival can be eliminated as the potential source of this release... Enclosed as Eastmonds & Sons job tickets: 1)1/11/06- Removed 50 bags of contamianted soil washed floor, 1 bucket of oil wash, removed 102 gallons of water, pressure washed floor 2)1/18/06- pump out oil and water from floor also wash down used 1x5 gallon can oil wash 3)1/20/06- Test tank, tank failed, wet leak 4)1/23/06- transfer oil to 275. Remove jacket and remove 30 bags of contaminated soil. Job completed 5)1/24/06- Install 275-gallon temporary . Contractor Work Authorization Form for Milro-2/2/06. Email from Landmarks Preservation Comission(LPC 212-669-7921)-John Weiss to DEC Ketani-02/10/06. Under the circumstances you described to me, no permit from the Landmarks Preservation Comission is needed for the NYSDEC contractor to break up the concrete paving in the courtyard next to 72 Hamilton Terrace in order to undertake and emergency remediation project . Because this work is being undertaken to remedy a dangerous condition, pursuant to section 25-312 of the NYC Administrative Code, no LPC permit is needed. No work is to be performed on 72 Hamilton Terrace . Fax from Kira-Leid King(NDC) to DEC Ketani-2/11/06. As discussed, attaached please find a serach from the fire department indicating that there are only two tanks located at the above-referenced premises. Therefore, there isn't another tank located in the court yard . The Church had a fire four years ago causing the building to be inhabitable . Letter from DEC Ketani to Leid-King (NDC)-2/10/06. ...the Department has not been notified by Lindsay Loss or other representatives from the Nazareth Deliverance Spiritual Church, that the church will hire a company to conduct a site investigation to determine whether a fuel oil tank is present under the church courtyard. Deadline of 2/18/06 given to investigate the court yard. Email from LPC Weiss to DEC Ketani-2/22/06. I am writing in response to our recent telephone conversation regarding the possibility that the historic wrought iron fence in front of the side yard at 72 Hamilton Terrace may have to be removed in an oil tank has to be removed. Suggestion to take the tank out in pieces to save the fence. If fence has to be removed it also has to be replaced. Letter from DEC Ketani to Lindos Lindsay(NDC) and Kira Leid-King(NDC)-3/10/06. Site visit made by Department on 2/10/06. ...a third fuel tank was observed to be present beneath the courtyard behind the Nazareth Deliverance Church. Department required NDC to perform a soil boring between the foundation wall of the Childrens Art Carnival at 62 Hamilton Terrace and the tank, and taking soil and groundwater samples. Another boring must be installed between the tank and the church. Deadline given for nine days within date of letter (2/19/06) to respond to DEC and resume investigation of tank and soil. STL Analyticals-2/10/06. Sample from CAC sump pit ran for fuel id analysis and showed 920000ppb #2 fuel oil. Fuel oil sampled by Milro. STL Analyticals-2/17/06. Sample from CAC outside by fill #5 @1'. Sample analysis performed for TPH310.3 shows oil parameters

CHURCH OF NAZARETH (Continued) **S107523027**

below method detection limits. STL Analyticals-2/17/05. Four sample from CAC front basement area near sump. . Sample analysis performed for TPH310.3. Soil analyticals show all below method detection limit except for 7400ppm #2 fuel oil(SB#2 @ 1'), 110ppm #2 fuel oil(SB#3 @1'). Letter from DEC Ketani to NDC Lindsay and NDC Leid-King-3/20/06. On March 20, 2006 the New York State Department of Environmental Conservation (the Department) made a site visit to the above listed property. No work appeared to have taken place to investigate the tank or the surrounding soil since the last site visit that took place on March 10, 2006 . Letter requiring investigation. Due date of 4/5/06 for the work to resume. Letter from DEC Ketani to Lisa Silversmith-03/20/06. We would like to install two(2) wells in the groundwater beneath the basement of your home. These wells will be constructed and sampled by out contractor. Contractor Work Authorization for STL-3/21/06. Fax from Milro to DEC Ketani-3/24/06. Milro proposes the following scope of work to address the oil spill cleanup: 1)Saw cutting of concrete slab in the basement and excavation of contaminated soil 2)disposal at a licensed disposal facility 3)recover of product using a vaccum truck if contaminated groundwater is encountered 4)collection of endpoint samples from excavation 5)restoration of the concrete slab 6)pressure washing of basement and epoxy application. Letter from DEC Ketani to CAC Martin-3/28/06. ...(the Department) is presently looking into other methods of controlling and preventing the petroleum vapors from entering Childrens Art Carnival . Milo remediation plan has been enclosed for Martin's review. Cost Estimate (Milro-Moriano)-4/4/02. Cost estimate for basement excavation and replacement. Site visit by DEC Vought during endpoint sampling of tank in couryard-5/11/06. Sampling performed by USA Environmental (Cristin Ciaburri 718-981-5710). Onsite was Keith Bartley(USA). Pumped out water from 550-gallon UST in courtyard. No product in UST, just sheen and water. Three soil samples were collected (one through bottom of tank, one below fill line and one below supply/return line). No odors or staining observed in all of the soil samples. Site visit performed to CAC and no odors in basement and no free product in sump. Some oil staining showing up on floor from underlying groundwater. One sample also collected for analyiss from NDC basement floor. Vought spoke to USA Ciaburri and DEC will receive report by 6/12/06. DEC tentative requirements: 1)60 Hamilton Terrace-followup to see if any recent spills 2)72 Hamilton-results of basement borings by 275-gallon ASTs 2)72 Hamilton-submittal of documentation of 1/14/06 clean up by Northeast 3)72 Hamilton-notification to Bishop France of requirements 4)72 Hamilton-backfilling of UST excavation in courtyard 5)62 Hamilton-continued monitoring of sump 6)62 Hamilton-call back to Martin regarding possibility of use of Spill funds for AST replacement and likelihood of NYSOAG cost recovery against Art Carnival 7)cc to Northeast, Marlene Martin (Art Carnival), Cristine Brooks(Comm Bd 9), Martin Smith(Councilman Robert Jackson), LPC and USA, Eastmond 8)62 Hamilton Terrace-copy of tank testing results of old AST 9)72 Hamilton Terrace- The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness as per 1/19/06 letter 10)62 Hamilton-submission of tank test results from Eastmond and Sons of AST in CAC as per requirement on 1/19/06 letter 11)62 Hamilton-borings at tank location for 8260/8270 12)62 Hamilton-Milro boring logs and site plan from 2/17/06 analyticals 13)62 Hamilton-implemenation of Randy's workplan(installation of monitoring wells at CAC and basement excavation) from Milro 14)62

CHURCH OF NAZARETH (Continued) **S107523027**

Hamilton-sealing of basement floor 15)72 Hamilton-backfilling of NDC excavation to prevent continued groundwater infiltration into CAC 06/19/06-Vought-See spill #0511700 at 62 Hamilton Terrace for further information. 7/25/08 - Raphael Ketani. This spill case which is associated with the spill case #0511700/ pin #3832 has been transfered to me. 8/22/08 - Raphael Ketani. I tried to visit the site, but couldn't get in. The building is boarded up and the area of the 550 tank has been filled in. The door to the basement was closed, but not set well in the frame, thereby allowing air circulation. There was also an open basement vent. No odors were sensed coming from the basement. I put my meter as close as possible to the vent, but didn't detect anything. I put the nose of the meter inside the front doors to the church, but, again, didn't detect any vapors. I visited the basement of the Childrens Art Carnival and found the premises to be odor free, stain free, and without oil in the sumps. As: the oil that had spilled on the basement floor of the church had been cleaned up; the soil samples taken in the basement of the church didn't have contamination; the oil in the two 275 gallon tanks was sucked up; the 550 gal. tank didn't have oil; there are no apparent signs of the presence of oil inside the church or under the property; the Childrens Art Carnival is free of oil contamination; I am closing the spill case. I sent Jacob Krimgold, EE II of the PBS Unit, an e-mail stating that the church has 3 unregistered tanks. 8/25/08 - Raphael Ketani. Mr. Krimgold e-mailed me back that the tanks do not need to be registered. "

Remarks: "Spill is in the basement of the church that had a fire 2 years ago and now stands mostly gutted. Northeastern Environmental was called to the site on 1/14/06 by someone from the church and vacuumed 120 gals. There are 2 275 gal. tanks (ASTs) in the basement which are connected to a filter device in the floor. There may be a third tank (UST) under the courtyard. Two soil borings were done down to bedrock (18) in the basement. Oil is impacting the front sump in the basement of the Childrens Art Carnival (day care center) next door at 62 Hamilton Terrace - spill #0511700. Raphael Ketani spoke to Ingrid at the church telephone number on 1/17/06 and she said that they had cleaned up the spill and were not going to do anything more. Vapor concentrations in the basement of the Childrens Art Carnival were measured at 10.1ppm today by Mr. Ketani. No activities can take place due to the high vapor concentrations in the building. DEC will try to contact church officials tomorrow, 1/18, in order to have them proceed with investigating and further cleanup of the site."

DREW HAMILTON HOUSES -NYCHA (Continued) **S100177045**

11/19/07 - J.Kann - spill 9615011 closed and consolidated with this spill. 10/14/10: J.Kann - investigative work plan received on 10/5/10. 8/15/14: J.Kann- Based on review of the site file, the spill has been closed based on the following: -An ISRP from 1996 was reviewed. 5 borings and 3 wells were installed. Minor SVOCs were detetected in one soil sample. No elevated SVOCs or VOCs were detected in groundwater. At that time the Department agreed that no remedial action needed to be taken at the site (other than periodic visual fluid level monitoring and the removal of contaminated soils encountered during subsurface investigation) -One of the two on site tanks were subsequently removed in 2001. No spills were called in at that time of replacement activities. Endpoint samples collected during tank excavation yielded only minor exceedences of 6 SVOCs, and no exceedences of VOCs. All historic information is included as attachments to the Work Plan which is edoced. Based on the review of the file additional work is not necessary and the spill has been closed."

Spiller Company:	001
Contact Name:	DIONIS ORTIZ
DEC Memo:	"1/10/06 -Austin - Also received complaint from: Cristina Lee, Chairman of Health Committee of Community Board #9 212-883-7600; 212-864-6200 contact her for further background info, as well as Ortiz - end Carnival e-mails: mamudd1@aol.com or mamartin@childrensartcarnival.org FAX: (212) 234-4011 1/11/06 - Raphael Ketani. I tried contacting Mr. Ortiz ((212) 234-4093), but a man answering the phone said he would not be in until 10:30AM. The man said that the church had a fire 2 years ago and hasn't rebuilt or reopened. He passed the phone to a woman who said that they have been trying to find out more information about the oil leaking from the church and she gave me the phone number of Cistine Grit (212) 234-0484. I called the number, but no one picked up. I then called (212) 883-7600 - the law office of Cristina Brooks Lee - but could only leave a message. I called (212) 864-6200 - the Community Board #9 phone 10AM to 5PM - and got a man on the line. He said that I should call Martin Smith (not available until 11AM) at (212) 928-1322, who is the representative of Councilman Robert Jackson. I will make a site visit at 10:45AM today. I made a site visit at 11:15AM. I met Dionis Ortiz, Program Manager, Jose Ortiz, his assistant, and Marlene Martin, executive director of the Children's Art Carnival. I went to the basement and looked at the oil tank, the fill and vent lines, and the boiler. There were no signs of spillage. However, I did see many cracks in the basement floor that looked wet. Mr. Ortiz said that there is a spring below the building and that the water seeps into the floor. The basement has 3 sumps. The front one is next to the front basement wall, the middle one is 16 feet away, and the third one is about 25 feet behind the second one. The second and third sumps had only clear water at the level of the floor. The front one had red oil floating on top. There were signs of oil spillage on the basement floor next to the sump. Mr. Ortiz said that when it rained heavily a little while ago, the water level rose and pushed out the oil onto the floor. He said that an oil odor was noticed to be coming from the basement on 1/3/06. He said that Robani Oil was called and they put down some oil absorbent material. I spoke to Robert Pearson of Robani Oil (212) 687-8699, Colonial Park Station, P.O. Box 188, NY, 10039, and he said he didn't think the oil was coming from the property, but he didn't do any system tightness testing. He said that the customer would have to order it and pay for the testing. The PID readings were as follows: over the sump: 11.8ppm breathing area front basement: 4.4ppm breathing area at second sump: 1.4ppm first floor hallway: 1.3ppm children's work room first floor: 570ppb main floor (second floor): 600ppb (light odor) third floor art work room: 650ppb third floor copier room: 750ppb fourth floor front and back: 750ppb Mr. Ortiz told me that the church next door burned two years ago and has never been repaired. He said there is a man (David - later called Patrick) living across the street who is affiliated with the church. Mr. Ortiz knocked on the window, but no one seemed to be home. He said that David told him that the church uses gas and that Con Ed had shut off the gas. Mr. Ortiz said that,

CHILDRENS ART CARNIVAL (Continued) **S107521874**

after the fire, someone entered the church basement and saw an oil spill. I spoke to Ms. Martin and she said that she didn't have any other church contacts other than Cistine Grit (a.k.a. Ingrid). She called Ms. Grit's number, but didn't get an answer. I looked at the outside of the church. The schedule display panel has Nazareth Deliverance Spiritual Church, Inc., Archbishop C. Clark. The name over the 72 Hamilton Terrace entrance is Church of Nazareth. The church is boarded up and the roof looks to be in bad shape. There were oily odors emanating from a small basement window near the basement door of the church. It is unclear if there is an oil spill in the basement of the church. I called Randall Austin, Chief Spills Engineer Region 2, with the information. He sent Jeff Vought, E.G. 1, over to look at the situation. Mr. Vought arrived at 1:30PM and looked over the situation. He noted 3 suction lines at the foot of the basement stairs. One line was only 3 feet long as it had been cut. No one at the Carnival knew when this happened or if a previous oil spill took place. Though Mr. Ortiz told me that the Carnival has been in the building for 36 years. I saw a short stream of red oil between one of the fuel lines and the wall next to the stairs. A conference call took place between Ms. Martin, Mr. Vought, and Michael Hughes of NYS DOH. Mr. Hughes said that the building should be ventilated and the basement door sealed. Ms. Martin said that she told all the parents about the odors and that all of the parents decided to have their children stay in class. Later, at between 3PM and 4PM, Martin Smith of Councilman Robert Jackson's office and Claudius Wickham of NYCDOH showed up. We went with them and Bruce Tilley of the Neighborhood Organization to the home of Diana Laird and David Zapol at 418 W.144 Street. This is the home which shares a common wall with the church. PID readings in the kitchen were 940ppb. Readings in the corner of the basement where paint and wall finishing material were reached 1300 to 1600ppb. A dirt hole in the basement floor had 2500ppb readings. The front part of the home's basement had 500ppb. Next, Mr. Smith and Mr. Wickham went with us to the Carnival's basement. They both looked at the situation with the oil in the front sump and noted the odors. Then Mr. Wickham measured the air in the art work room on the first floor. He noted about 650ppb readings. He said that the odors weren't dangerous, but just a nusiance. He said to ventilate the building. 1/12/06 - Raphael Ketani. I made a followup visit at 3:10PM. Eastmond had finished their cleanup work. The front sump had been vacuumed and the floor had been cleaned. Fans were blowing the air around in the basement. Ms. Martin said that Eastmond didn't arrive until this morning as, otherwise, there would have been high overtime charges to do the work yesterday at night. Eastmond told her that the oil tank will be picked up off of the floor or else the dampness will corrode the bottom and the tank will leak. The odors were not as bad as yesterday. The tank room had about 3ppm, the director's office about 750ppb, and the children's work area on the main floor was about 300ppb - there were no odors on the main floor. However, the oil reappeared in the front sump. Ms. Martin told me that she had made contact with someone from the Church of Nazareth and that this person will let people in saturday morning (1/14). Ms. Martin said that she will let me know what time the church will be opened up. She also said that her company is not going to spend any more money on removing the oil in the sump until DEC finds out whether the oil is coming from somewhere else or from the Carnival. I informed Randall Austin, Chief Spills Engineer Region 2, and Jeff Vought, E.G. 1

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Spills, about this and about the return of the oil in the sump and about the levels of the odors today. 1/13/06 - Raphael Ketani. I spoke to Ms. Martin. She said that there are no odors on the main floor. I asked whether she made contact with anyone from the church. She said no one called her and she couldn't get ahold of anyone. I asked whether the front sump was covered. She said it wasn't. I told her to have someone cover it with plastic bags and then use tape to seal the bags to the sump clay pipe. She said she would have someone do it. 1/17/06 - Raphael Ketani. Ms. Martin called me today. She said that the basement had flooded over the weekend because the sump pump didn't work. She said she had water and oil all over the floor. Also, she said that the oil guage on the oil tank is in the red zone. I asked her when was the last time she had a delivery. She said that it was some time ago and no one really keeps track of the level of oil in the tank. She said she called Robani Oil to get a delivery. However, the odors are bad again in the building. I told her to set up the fans. She said there are problems with the electricity in the basement and the fans aren't running. I also told her that Northeast Environmental ((914) 777-1930) showed up at the church on saturday, 1/14/06, and found oil all over the basement. I told her to call them and get them to clean up the oil in her basement. I told her that if they wont do it, then to call Eastmond again and have them clean up the oil as the odors are bad. Jeff Vought, the off hours spill responder for the weekend, came in and gave me the following notes. He said that Northeast Environmental arrived on site at 11:30AM on saturday 1/14. Oil was all over the floor of the Childrens Art Carnival. Northeast collected the oil and water on the basement floor and pumped out the front sump. Northeast then went to the Church of Nazareth and recovered 120 gals. of #2 fuel from the two 275 gallon tanks in their basement. They did 2 borings, one next to the two 275 gal. tanks (ASTs) and one some feet to the west. They end at bedrock and are only 18 deep. Mr. Vought had them leave the borings open. There is a fuel filter in a concrete casing in the floor. From there, a line runs to the boiler. Mr. Vought suggested to me that they either do 2 wells in the corner of the wrought iron fence next to the Carnival or an oil recovery pit. The contact at Northeast is Dwayne Monaco (914) 777-1930 or (914) 403-5525 cell. I spoke to Mr. Monaco and he said that he was hired by the church and has no plans to pump out more oil from the Carnival. His techinician noticed a second vent line and a remote fill at the back of the church. He believes that there may be a third tank under the courtyard. I contacted Ingrid at (212) 234-0485, the Church of Nazareth - Archbishop Maxton France (cell (917) 642-8913). She said this was the Archbishop's number and that I can send a letter to 72 Hamilton Terrace, NY 10031. She said they didn't have plans to do anything more regarding the cleanup. I visited the site at 2:50PM. Oil vapors were still noticeable from the church. I entered the Carnival and sensed strong odors on the main floor. There were no activities or children at the day care center. I went to the basement and there was 3 of water there. However, I could not see a sheen. Ms. Martin said that Eastmond could not come and pump out the water as they didn't have a truck available. She said that they will come at 9AM on 1/18. The vapors in the buidling are as follows: basement=10.1ppm first floor art room=2250ppb executive director's office=3400ppb hallway at first floor=6600ppb main floor=2300ppb third floor art room=3000ppb third floor front room=4600 third floor landing=7100ppb fourth floor art room=5600ppb fourth floor front room=4600ppb fourth floor landing=7100ppb I met

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Mr. Pearson of Robani Oil at the site. He said he wasn't going to deliver oil until the oil spill at the church was cleaned up and not until it was determined that the Carnival's system wasn't leaking. Ms. Martin said that someone from the NYCDOH was supposed to show up to test the air, but I stayed until 3:35PM and he arrived. Ms. Martin said that they were out of oil and so the heat was off. 1/18/06 - Raphael Ketani. I tried to call the Carnival to find out how the water/oil removal in the basement went at 9AM (contractor was Eastmond), but no one answered the phone. Later, I got ahold of Ms. Martin via her cell phone (917) 805-3154. She told me that Eastmond had been at the Carnival at 9AM and had pumped out the basement. She said that the school is still closed. I called up MILRO (516) 379-1500 (FAX (516) 379-4596) and spoke to Paul Basso. I told him that we needed Milro to set up ventilation for the school and pump out the basement. We decided to meet at 10:30AM tomorrow. Kira Leid-King (home(914) 632-0665; cell (914) 879-8126; work FAX (212) 455-2502) called me to explain that the oil wasn't spilled on the floor of the church's basement. However, I told her that Northeast Environmental had been to the church on 1/14/06 and had pumped out 120 gals. from the two 275 gallon tanks. She said that the church hadn't had a delivery in 3 years and that the Fire Dept. had ordered the church to pump out the oil after the fire. She said the tanks never had oil in them. I told her that there was a second vent pipe and a second fill port. I added that there is a gauge for a 550 gal. tank on the wall of the church's basement. I told her that DEC suspects there is a third tank under the courtyard. She said that she had no idea. Finally, I told her that the state would be hiring a contractor to investigate the church's oil spill and tank situation. She said that it's the Carnival's fault, not the church. I asked her what her relationship was to the church. She said that she is sort of the secretary-treasurer and paid for Northeast to do the oil vacuuming. 1/19/06 - Raphael Ketani. A site visit was made by Randall Austin, Chief Spills Engineer Region 2, and myself to monitor the work of MILRO Assocs. Inc. We met Gordon Sandtorv, Operations Supervisor from MILRO, on site. MILRO was already cleaning the floor in the basement of the Carnival. Vapors in the basement were about 3000ppb. However, the floor looked very clean. Red oil was again on top of the water in the front sump. Water was seeping through the north wall (opposite the oil tank) of the basement. It didn't have any odor or feel oily. I found out that Robani Oil had delivered 100 gals. and the heat was back on. Patrick Peters (phone (212) 690-0630; son of Archbishop Carlyle Clark) showed up at the Carnival. We asked him to let us into the church basement and he did. We saw the two 275 gals. tanks and one vent line that extended from the second tank. A filter apparatus was in the floor for the oil. The suction line ran through the floor and came up 8 feet away at the furnace. There was a light smell of oil, but no oil was visible on the floor. A gauge was mounted onto the wall above the first tank. Gordon said that it was a petrometer for a third tank. vapor concentrations for 1/19: basement: about 3000ppb directors office: 425ppb first floor art room: initially 1000ppb, then 400ppb main floor: 350ppb third floor: 700ppb back room/ 600ppb front room fourth floor: 400ppb back room/ 1000ppb front room Mr. Austin talked to Mr. Sandtorv and told him that if the Carnival doesn't test the suction line and the return line, then MILRO will have to do it. He added that he wanted MILRO to construct some kind of low flow sump and collection system with an oil/water separator to collect the water and pump it to the city sewer. Then we

CHILDRENS ART CARNIVAL (Continued) **S107521874**

left. 1/20/06 - Raphael Ketani. I called up Paul Basso and asked him what MILRO was doing to install a sump and oil/water separator. He said that he thought this idea was tentative and that DEC wasn't so sure this is what they wanted. So he hadn't looked into investigating a possible system. I told him DEC DOES want a slow pump system to hold down the water level and collect the oil. I told him that it needs to be installed immediately. He said that such a system that will work with the sump that exists is tricky to find, but he will investigate a possible one now. Paul added that oil samples were sent to Severn Trent today. He said there is a 2 week turnaround. I also told him to put down lots of absorbent pads on the floor around the front sump because rain is expected over the weekend. He said he will have someone do this. I called up Ms. Martin and asked her how things were. She said that the odors were low due to the fans that were going all night and that the basement was free of oil. She said that she will get someone to the Carnival soon to do an entire tank system tightness test. Ms. Martin called me at about 3:15PM today and said that Eastmond had done a system test. They found that the tank leaked pressure and the vent pipe had a wet failure. Otherwise, Eastmond said, the suction, return and fill lines were alright. I told Ms. Martin that the next step was to have the tank cleaned out, removed, and a temporary tank installed. She said she would do that. I told her to have Eastmond put absorbent pads around the front sump to absorb oil when the water level rises again and to hire a company to either dig up the contaminated soil below the basement or to start with soil borings to find the extent of the oil pool. I gave her a list of digging and investigative companies with no recommendation. She said she would pick a company to start work. 1/23/06 - Raphael Ketani. I spoke to Paul of MILRO today and told him to hold off doing more work at the site. He said that his crew had been there this morning and pumped out more oil. I told him that was fine, but to stop work for now. He said he would. I then spoke to Ms. Martin. She said that Eastmond was on site and they were cutting up the tank. She said that MILRO had been on site and had pumped out more oil. Ms. Martin asked for a letter ordering the Carnival to do the tank removal and break up the floor of the basement to remove the contaminated soil and water. I told her I would send it. 1/25/06 - Raphael Ketani. I spoke with Marlene by cell phone. She said that this was the best way to reach her now because of the tank removal yesterday. She said that when Eastmond removed the oil, cut up the old tank, and welded the new tank, the vapors were so strong that they chased everyone out of the building. She said that everyone is now working from their respective homes. She said that she thinks the Carnival has found a temporary place to hold their saturday workshops. Ms. Martin said that a temporary tank has been set up in the backyard and Robani is supposed to get things running to provide heat. I told her to open all of the windows again to get more vapors out. She said she will do this and that she will call Eastmond to see what they plan to do and when. I called Eastmond and spoke to Isaac Mungra. He said that his crew removed the tank and saw holes on the opposite side which were 15 inches above the floor. He said that it did not appear that oil leaked onto the floor from the tank or anywhere (according to Rene from his crew who was there). Mr. Mungra said that he didn't feel it was necessary to break up the floor to see whether oil was underneath. I asked him whether Eastmond was going to wash the floor and pump the sump. He said no because he didn't want to take on the large cost. I asked whether Eastmond

CHILDRENS ART CARNIVAL (Continued) **S107521874**

tested the suction, return, and fill lines. He said no because it was his understanding that Robani was going to replace the lines anyway. He said he was only responsible for cutting up the tank. I called Robani and asked Mr. Pearson whether Robani Oil was going to test the 3 lines. He said no and that he had no plans to. He said that he was just going to supply 2 temporary 275 gal. tanks and get the furnace running again. I asked whether Robani Oil was going to clean the basement floor and suck out the sump. He said no because he didn't want to take on the large cost as the Carnival doesn't have a lot of money. He told me to have Eastmond do it. I called Ms. Martin back and told her the situation with Eastmond and Robani and told her that I would call MILRO, with her permission, and have them come and do the 3 line tests, clean the floor, suck the sump and ventilate the buidling. She said that was alright and to call them. I tried calling Paul Basso, but could only leave a message. Mr. Marvin Edwards (cell (404) 790-2592) called to ask what he should put in the response letter to DEC. I told him to give me a chronology of who performed what service, what events happened, and how the tank failure was discovered and what actions were taken to resolve the matter. He said he would. He added that he is taking over some of the cleanup coordination responsibility from Ms. Martin as she has other work to do. He asked that I coordinate with him. I told him that I was trying to get MILRO to take over the cleanup. He said that would be fine. I made contact with Mr. Basso and told him what the DEC wanted MILRO to do: 3 line tests, ventilate building, clean floor, pump sump daily. He said that MILRO can do all of the work. I asked him when his crew could come out. Mr. Basso said at 1 PM tomorrow. I said that would be alright. I called up Ms. Martin and asked her whether 1PM tomorrow would be alright. She said yes. I then called up Mr. Edwards to let him know when MILRO will be there. He said that 1PM would be good. 1/26/06 - Raphael Ketani. I visited the site today at 12:30PM and met Ms. Martin and Mr. Ortiz. They said that MILRO had already been here at 11:30PM and pumped out the sump. Ms. Martin said that MILRO told her they would be over tomorrow to clean the floor. I looked at the front sump and saw only clear water. There still were odors in the building as the floor in the front basement needed washing, though it didn't look oily and smelled only very slightly when I got very close to it. The floor where the tank used to be didn't have cracks or oil stains. There were fans in the basement blowing the vapors out the back entrance. Fans were present on all floors and were blowing the air out the windows. The building was cool inside due to the open windows. Vapor concentrations were as follows: basement front/back: 3500ppb/520ppb first floor director's office/art room: 89/210 main floor: 162 third floor front/back: 200/290 fourth floor front/back: 218/194 1/27/06 - Raphael Ketani. I received a call from Ms. Martin. She said that MILRO tested the 3 lines and the return line failed. She said that they cleaned the floor today, too. Ms. Martin added that the odors are light today. 1/30/06 - Raphael Ketani. I spoke to Paul Basso today. He said that the fill line wasn't tested. I asked him to test this line, also. He said they vacuumed out oil from the front and middle sumps on friday and cleaned the floor. He said that they will be over tomorrow, 1/31, and test the fill line, vacuum again and clean the floor, if necessary. I told him this would be fine. I made a site visit 10:45AM. I met Jose Ortiz who let me check on the odors at each floor and the presence of oil in the sump. The vapor concentrations were: 2,000ppb in the front basement; 750ppb in the back basement; about 250ppb at each floor above the basement.

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Odors were light on the main floor, but the building is still cool due to a problem with the furnace and the windows are partially open. I met Mr. Pearson on site. He told me that he will replace the suction line and that the return line was not in service even before Robani was the Carnival's oil supplier. I told Mr. Ortiz and Ms. Martin that MILRO will come tomorrow to suck out the sump and do 4 soil borings in the front basement. I told them that there will be 2 borings where the tank used to be, 1 between the tank position and the sump, and 1 on the other side of the sump. They said they understood. I will try to be at the site to watch the soil sampling. Mr. Lindos Lindsay called and left a message that he is scheduled to meet with an environmental company tomorrow at 11AM to discuss what needs to be done and how to go about it. 1/31/06 - Raphael Ketani. I met Gordon of MILRO at the site just as he finished doing the fourth boring - about 11AM. All four borings had been done where I wanted them. Gordon told me that he had soil at each location and that the soil at boring #1 (between the sump and the wall) was the most contaminated. He said that boring #4 at the west end of the former tank area was the cleanest. He said that he will submit the samples for analysis. Oil was still floating and accumulating in the sump. I asked Gordon to call Paul Basso and have a vacuum truck come over and suck out the sump. Gordon said that one will be here today and tomorrow. The crew from Robani Oil began their work right after Gordon was done. They will install 2 275 gal. tanks and replace all of the lines. The vapors in the building were slightly worse than yesterday. I talked to Jose Ortiz and Marvin regarding why the borings were taken and what will happen next. I told them to set up the fans again and to ventilate the building. At 3:30PM I spoke to Gordon of MILRO to find out the details of how the return line was tested. Gordon said that he capped off the line, pumped with a manual push-pull pump until he had 5 lbs. of vacuum and waited half an hour. He said he used soap solution to check all the valves and they were fine. He said the vacuum truck had been there about 1 hour after he left and pumped out a lot of oil. I told him to test the fill line. Gordon said that he believed the line was already removed. I told him that if this is true, then I wanted him to do a couple of borings outside the building next to the fill line tomorrow morning. He said he will do it. 2/1/06 - Raphael Ketani. I met Gordon at the Carnival. He did one boring (#5) next to the fill pipe. However, Robani had replaced the old fill pipe with a new one yesterday and had been sloppy by spilling a little oil onto the area when they pulled the pipe. The sample was sandy fill soil and had a slight odor. The PID reading was 500ppb, but Gordon had collected the sample in a plastic bag. This was sand that was used to backfill the upper end of the abandoned coal shute that is infront of the building. I went into the basement and checked the portion of the sand that had spilled into the coal shute. It didn't have an odor. Gordon said that they just sent off the oil samples that were collected. I told him to order the lab to do a fingerprint of the oil. In the basement, Robani had installed two 275 gal. tanks, a new fill line, a new vent pipe, and a plastic coated suction line. The suction line was cemented to the floor and covered with concrete where it met the landing of the stairs to the basement. All of the old lines were removed. The heat was back on and a hot water pipe almost over the back and another one against the opposite wall of the basement were leaking hot water. Part of the floor of the front basement was wet. Some of the wetness extended under the new tanks, but they are on feet above the floor.

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Red oil is in the front sump, but is transparent enough so that the bottom of the sump can easily be seen. I told Gordon to call Paul Basso and have him send a vac. truck over to pump out the sump. Vapors in the building were: basement: front 1000ppb/ middle 500ppb first floor: front 350ppb/ back 225ppb second (main) floor: 230ppb third floor: front 250ppb/ back 350ppb fourth floor: front and back 300ppb Paul from MILRO called at 3PM and said that he will send the samples to a DEC contract lab for fingerprinting and he will resample soil sample #5 and put it in a jar. 2/2/06 - Raphael Ketani. I received a call from Rick Bayer of Severn Trent Labs regarding the soil samples. He said he will send a copy of the report to MILRO and to DEC. 2/3/06 - Raphael Ketani. I FAXed a copy of the Standby Contractor Authorization Form to Paul Basso of MILRO. 2/6/06 - Raphael Ketani. I visited the site today. Vapors in the building were 3600ppb in the basement, 200ppb in the first floor art room, and 170 ppb in the main floor art work area. However, the heat was off as the plumbers were replacing a couple of hot water pipes. Oil was still in the front sump, but it had turned thinner and brownish in color. Aside from this, Marvin Edwards of the Carnival pointed out black spots from 2 to 14 that had suddenly started to appear on the basement floor. Mr. Edwards said that he first noticed them today. There were about 12 spots and all except for a couple were in the front basement area. I touched some and oil came off onto my hand. The PID detected 6200ppb of vapors. I called MILRO to come over tomorrow to suck out the front sump and try to reduce the amount of oil seeping through the floor. Paul of MILRO said they would do it. 2/7/06 - Raphael Ketani. I tried to find out whether MILRO had pumped out the front sump, but could only leave a voice mail for Marlene Martin. I called up Paul at MILRO and he said his worker was there with the vacuum truck and pumped out 120 gals. of water. 2/8/06 - Raphael Ketani. I called up Mr. Wickham of NYCDOH ((212) 442-3372), but he wasn't in. I reached the receptionist and she said that all inspectors get their work assignments a week in advance and that Mr. Wickham already had a full schedule and could not make it to the CAC. She connected me with Mr. Wickham's supervisor, Inspector Stallbohm. Mr. Stallbohm said that someone was out at the CAC on 1/17 and still found unacceptable vapors. He would see what he can do to get someone to the CAC quickly. Mr. Stallbohm called back to say that an inspector went out to the CAC on 2/3 and determined that the vapors had decreased to safe levels for children. He said that Marvin Edwards of the CAC had signed the DOH report to this effect. He added that Mr. Edwards was told the children could come back and that an inspector will make a followup visit on about 2/17. I called up Marvin, but got Jose Ortiz. I told him that the NYCDOH had told me that the children could come back to the CAC. He said that everyone was aware of this, but the boiler broke again and so the children will be staying off-site for a while longer. 2/9/06 - Raphael Ketani. I made a site visit today. The heat was off again as they had many hot water pipe leaks. They are in the process of replacing much of their hot water piping. Oil was still in the top of the front sump, but you could easily see to the bottom of the sump and the oil appeared to be just a sheen. Vapor concentrations were: basement: 1400 to 1500 ppb first floor art room: 200 ppb main floor: 325 ppb third floor: back/front, 325/290 fourth floor: back/front, 380/400 Kira Leid-King, lawyer for the Church of Nazareth, called me yesteday to say that she had hired a title company to do a records search for the third tank. No physical investigations were taking place at the

CHILDRENS ART CARNIVAL (Continued) **S107521874**

church. 2/14/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that the odors were very slight in the building. I told him I would like to send over a vacuum truck to suck out the oil in the front sump. He said that would be alright. He said that someone will be at the CAC today and tomorrow. I called MILRO and they said they will be over at the CAC on thursday morning. I let Mr. Edwards know and he said someone will be there. 2/16/06 - Raphael Ketani. I spoke to Ms. Martin. She said she knew that MILRO wasn't coming today, but would come tomorrow. I asked her about Robani Oil and how service has been over the years - whether they clean up whatever they release. She said they had no problem with them and that nothing has ever happened. I then asked her whether she had heat today. She said yes and that there was plenty of it since they repaired all of the water pipes. I asked her how the history of the boiler has been. She said that except for now and the pipes, she hasn't had a problem - though it's tempermental. I asked her whether in the past it ever leaked. She said not to her knowledge. I ended the conversation after this. At 3:45PM I received a call from Bill Hunter, insurance adjuster for Utica Insurance ((516) 479-5089). He represents the insurance company for Robani Oil. He said he was trying to go over the information that Robani had given him regarding the oil release to see who had liability. He said the insurance claim number was 1016566. He said that the CAC first called Robani to complain of a loss on 1/6/06. He said Robani came to investigate and found oil 5 feet from the tank, but he said he wasn't sure whether that meant in the sump or on the floor. He asked whether the church was the source. I told him we didn't know yet, but we intend to do an investigation. 2/23/06 - Raphael Ketani. I spoke to Jose Ortiz regarding the conditions at the CAC. He said he did notice a slight odor on the main floor. I asked him to look at the front sump. He called me a little while later and said there was lots of oil in the sump. Then I called MILRO and told Paul of MILRO to send the vacuum truck. He said he would send it tomorrow, friday. Paul told me that DEC should be receiving the first bill soon for the work they have done so far. I let Mr. Ortiz know that MILRO will be over tomorrow. 2/27/06 - Raphael Ketani. I visited the CAC today. I met Mr. Edwards. He showed me the front basement area. The door is being kept closed now to confine the odors as much as possible. The room had 1500 ppb of vapors. A thin film of oil was present on the surface of the water in the sump with widely scattered small orange droplets of oil. The floor had lots of Speedi-Dri on it to absorb oil seeping up through the floor as oval stains. Mr. Edwards said that MILRO had been over last friday and had pumped out the sump. The air about the second sump had about 560 ppb vapors. There was a sheen on top of the water, but it did not smell like oil. In the art room on the first floor the vapors were about 500 ppb. The main floor and the third floor both had vapor concentrations of about 450 ppb. Mr. Edwards said that they just had a cleaning crew mop the floors. The air smelled of some kind of vapors of a cleaner. I told Mr. Edwards that I will have MILRO come over sometime this week to pump out the sump again. He said anytime is alright. I received the analytical reports for the 5 soil samples taken at the CAC some weeks ago. Four (4) samples were collected on 1/31/06 in the front basement near the front sump. One (1) sample was taken on 2/2/06 at the fill pipe where it passes below ground. Three (3) of the front basement samples and the fill pipe sample indicate the presence of only #2 oil. One (1) basement sample indicated the presence of #1 oil. However, this oil was also in the

CHILDRENS ART CARNIVAL (Continued) **S107521874**

blank. 3/1/06 - Raphael Ketani. I spoke to Paul of MILRO today and asked him to vacuum out the front sump this week. He said his truck will be over tomorrow. 3/6/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that MILRO was over on friday and pumped out the sump. He said that odors were definitely noticeable in the front basement, but the door is kept closed. He added that the odors in the rest of the building are slight and that they had classes on saturday with no problems. 3/9/06 - Raphael Ketani. I received a call from Ms. Martin today. She said that some men in plain cars showed up at the church on teusday, 3/7, and began working in the courtyard. She said that they uncovered and opened a tank today. 3/10/06 - Raphael Ketani. I visited the CAC and the church courtyard today. I took pictures of the exposed tank and the sheen floating at the top of the water in the tank. The soil from above the tank didn't have an odor. Next, I visited the CAC. They had fans blowing in the basement. They were blowing from the front sump area to the open back door of the basement. Vapors in the front sump area were about 560 ppb, vapors in the basement sink room where new oil stains showed up were 1100 ppb, the first floor was about 190 ppb, the main floor was 140 ppb, and the third floor was about 200 ppb. I will call MILRO to have the front sump pumped out again. 3/15/06 - Raphael Ketani. I talked to Jose Ortiz of the CAC. He said that MILRO was there on monday to pump out the front sump, but they had to wait for 10 or 15 minutes before they could get into the basement. Mr. Ortiz said that everything was pumped out and the odors are slight throughout the CAC. However, where the oil has been seeping through the floor in the basement sink room, the odors and the staining are getting worse. He said that no work is taking place at the church courtyard next door to investigate the tank and the oil. Kristina Lee (212) 883-7600, Chairman of the Health Committee of Community Board #9, called for an update. She said that she saw the exposed open tank in the church courtyard. I told her that the church brought a bunch of people to the site and they dug up and exposed the tank and then opened the tank. I told her DEC sent a letter ordering the church to continue the remediation by friday, 3/17, or the DEC will send in its own contractors. I told her the DEC will send a letter stating that we are taking over the investigation and cleanup if DEC hears or sees nothing happening. I added that we will get a court order to enter the property and then start the work. Ms. Lee said that the congregation meets every sunday at St. James Presbyterian Church. She added that on March 2, the NYC Dept. of Buildings fined the church $10,000 for not repairing the landmark building. SHE ASKED THAT A WELL BE PUT IN BETWEEN THE TANK AND THE NEIGHBOR'S GARDEN WALL AND ASKED THAT SHE BE KEPT INFORMED BY NEXT WEEK. I told her I would. 03/17/06-Thomas-Contract Payment Package-(Severn)- took samples-02/01/06-02/28/06 took sample of sump pit 01/01/06-01/31/06 03/17/06-Thomas_ Contract Payment Package-(Milro)- washed basement floor, took samples, removed pads, washed tank room, took borings, purge sumps (01/19/06-02/24/06). 3/20/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that the odors in the rest of the building are slight. However, the odors in the basement sink room are increasing and more oil staining is showing up in the floor. He said that the fans are ventilating the basement. I told him that I will call MILRO to have them suck up the water and oil from the middle and front sumps. I contacted MIRLO and they said they will be over at 9:30AM to pump out both sumps. 3/22/06 - Raphael Ketani. I FAXed the Standby Contractor Authorization Form to Severn Trent Labs (phone:

CHILDRENS ART CARNIVAL (Continued) **S107521874**

(845) 562-0890; FAX: (845) 562-0841). 3/23/06 - Raphael Ketani. I received the bills from MILRO today for work done on 3/1 and 3/13/06. 03/24/06 Thomas- Contract Payment Package-(Milro)- vacuumed oil from sump pits, disposed of oil and water (03/03/06-03/13/06). 3/28/06 - Raphael Ketani. I sent a letter to Ms. Martin with the 3/24/06 remediation plan that MILRO had FAXed to me. I received a call from Bill Hunter of Utica Insurance, the insurance company for Robani Oil. This is the second time he called me for information. He wanted to know what the status was with the spill case. I explained to him what was going on at the church courtyard and what DEC wanted to do to eliminate the vapors and contaminated water under the CAC. 4/4/06 - Raphael Ketani. I received a call from Marlene Martin of the CAC on 4/3/06. She wanted to know what the total cost of the cleanup has been so far for the CAC. I told her a close estimate is $8710. She asked what the cost would be for the future/proposed work plan that I had sent her from MILRO. I told her I would find out. I called up Anthony at MILRO and he said he will try to get back to me with an approximate price. 2:30 Anthony Mariano of MILRO FAXed me the rough estimate of what it may cost for all of the construction work that would take place to: break open the concrete floor and suck out the contaminated soil, water and oil, repair the floor, install 2 access wells in the floor, power wash the floor, and paint with two part expoxy paint. The total came to $36,642.95. I informed Ms. Martin about the estimated amount. 3:50PM I sent an e-mailed letter to Lisa Silversmith, the owner of the property on the other side of the CAC. I hadn't heard anything from her in response to the Department's 3/20/06 letter. So I sent her an e-mail to lisasilversmith@yahoo.com. The letter appears below: CONFIDENTIAL New York State Department of Environmental Conservation Division of Environmental Remediation, Region 2 Bureau of Spill Prevention and Response 47-40 21ST Street, Long Island City, NY 11101-5407 Phone: (718) 482-4933 " FAX: (718) 482-4098 Website: www.dec.state.ny.us April 4, 2006 Lisa Silversmith 60 Hamilton Terrace New York, NY 10031 RE: Spill #0511700 Childrens Art Carnival 62 Hamilton Terrace New York, NY Dear Ms. Silversmith: As of April 4, 2006, the New York State Department of Environmental Conservation (the Department) has not received a response to its March 20, 2006 letter regarding the property at 60 Hamilton Terrace (see attached below). It is important that the Department make an inspection to the basement of your property. We are aware that a spill had previously taken place at 60 Hamilton Terrace and was subsequently cleaned up and the case closed. The Department would like to determine that there are no impacts from the oil that is presently seeping into the Childrens Art Carnival next door. Temporary groundwater monitoring wells installed in the floor of your basement would help to collect any oil under your property. Please call me at (718) 482-4634 to make arrangements for the site inspection. Sincerely, Raphael Ketani Enigneering Geologist II 4/10/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that due to the rain last thursday, the odors in the sink room have gotten worse. However, he said, the odors in the rest of the basement are fine due to the ventilation and the odors in the building are slight. I told him that I would send over the vacuum truck to suck out more oil and water tomorrow. I told him to have someone at the CAC at 9AM so that MILRO can get in. He said he would do so. I asked him whether Ms. Martin was in. He said no. I called up Paul at MILRO and told him we would need his vac. truck at the CAC tomorrow. He said he would be there. 4/17/06 - Raphael Ketani. I

CHILDRENS ART CARNIVAL (Continued) **S107521874**

spoke to Mr. Edwards. He said that the situation at the CAC is the same as last week with only slight odors in the occupied parts of the building and stronger odors in the basement. He said there was no flooding. I tried to contact Ms. Martin regarding MILRO's proposal, but could only leave a voice mail message. 4/24/06 - Raphael Ketani. I spoke to Mr. Edwards. He said that there are no changes at the CAC. He said the odors are the same - even in the basement. He said that there was no flooding from the 3 of rain over the weekend. However, the oil staining is slightly more in the basement. 5/15/06 - Raphael Ketani. I received the bills from MILRO for the work done on 3/21/06 and 4/11/06. I signed them and forewarded them for processing. 5/17/06 - Raphael Ketani. I spoke to Mr. Edwards today. He said the odors in the building were still only slight. He said the rains over the past weekend and week haven't caused any recurrence of oil seepage. He said the basement was fine. This case is being transfered today from myself to Jeff Vought in order to consolidate all of the PINS cases under one Spills case manager. 06/06/06-Vought-Received call from Marlene Martin requesting information on possibility of state funding for tank replacement. Marlene also said that basement flooded during past weekends with heavy rains and no free product was noted. 06/06/06-Vought-Complete File Review by Vought: See also spill numbers: 0209311(60 Hamilton Terrace-closed 12/22/05), 0551505(72 Hamilton Terrace-open). Sale of 72 Hamilton Terrace by City of New York to Nazareth Spiritual Church and resulting Deed transfer-4/20/72. Site visit on 1/11/05 by DEC Vought-DEC required: 1)tank testing results 2)notification to NYCDOH 3)installation of ventilation system in basement 4)sealing of sump and washing of basement floor. Vought left message with NYCDOH Nieves, spoke to Mike Hughes(NYSDOH) and decision to close is the call of Marlene Martin. Oil was first noted on 1/3/06 and basement filled with water during times of heavy rains. Three sumps present in basement of Childrens Art Carnival(CAC). Sump closed to Hamilton Terrace contained fresh #2 fuel oil. As per Marlene Martin, she contacted 60 Hamilton Terrace to see if they had spill and no spill was found in the basement and she contacted the Church who noted an oil spill next door at 72 Hamilton Terrace. Email from NYSDOH Hughes to NYCDOH Peter Stallbohm with cc to NYCDOH Nieves- How did you inspectors make out at the 64 Hamilton Terrace spill? . Email from NYSDOH Hughes to NYCDOH Stallbohlm and DEC Vought-1/18/06. ...any updates about the Childrens Center in Manhattan? Have they re-opened, cleanup status? . Response from Stalbohlm At 64 Hamilton Terrace, readings of 4-5ppm of VOC was detected. A contractor was contracted to conduct a cleanup yesterday. The center voluntarily closed until so. After cleanup, another visit will be made to check effectiveness of cleanup (possibly today). Email from NYSDOH Hughes to DEC Vought-1/19/06. Peter Stallbohlm, NYCity Health, sent an inspector back to the Children's Center on Tuesday, 1/17. The inspector reported odors are still present... Fuel product still present in basement. The center is still closed and NYCity Health recommends staying closed until the additional clean-up is performed. Would you be able to also make a site visit and recommend some specific actions as well? . Letter from DEC Ketani to Kira-Leid King (Nazareth Deliverance Church NDC)-1/19/06. The New York State Department of Environmental Conservation (the Department) was notified on January 10, 2006 that a petroleum release took place at the above referenced site. Odors were noticed coming from the basement of the church during an inspection of the area on January 11, 2006. Staff from the Department were at the site on January 14,

CHILDRENS ART CARNIVAL (Continued) **S107521874**

2006 to observe the removal of No. 2 fuel oil by Northeast Environmental from Nazareth Deliverance Church . (6/6/06-Note that I, jeff Vought was onsite and liquid was recovered from basement when I arrived on-site, I did not observe oil in the basement as the liquid was already recovered). The Department has identified the Nazareth Deliverance Church as a potential responsible party for this release . Letter required submission of an investigative summary report including the investigation of a possible third tank under the church courtyard. The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness . If no reply regarding the investigation is received from the Nazareth Deliverance Church within (5) days of receipt of this letter the Department may proceed with the required work... . Letter from DEC Ketani to CAC Martin-1/19/06. The Department has identified the Childrens Art Carnival as a potentially responsible party for this release . Notification that the Departrment has contracted Milro and will invesigate the source of oil. Upon one of the inspections of the Childrens Art Carnival, staff from the Department noticed a three foot long piece of suction line at the foot of the stairs of the basement. The Department requires that the Childrens Art Carnival immediately conduct a site investigation to determine why the line was replaced, whether there was a release of product and how large the release was, when the suction line was replaced and which company did the replacement work. The Childrens Art Carnival must also hire a contractor to have the suction line and return line (the two 3/4 inch copper lines) pressure tested . Letter from DEC Ketani to CAC Martin-1/23/06. ...the Department was notified on January 20, 2006 that a tank system test was conducted by AL Eastmond & Son, Inc. on this date and that a leak was detected in the tank and vent line. At this time, the Department is ordering the Childrens Art Carnival to repair or replace the tank and the vent pipe, and to hire a contractor to investigate the oil spill and remove all contaminated concrete flooring, soil and rock and all product and contaminated water . Letter from Marlene Martin (CAC) to DEC Ketani-1/27/06. To date we have cooperated with the Department of Environmental Conservation on all requests, recommendations and mandates. Enclosed, please find the job tickets for work performed by Eastmond and Sons, Inc. as per your Department’s madates and directives. It is our hope that a resolve can be reached as soon as possible and or that the Carnival can be eliminated as the potential source of this release... Enclosed as Eastmonds & Sons job tickets: 1)1/11/06- Removed 50 bags of contamianted soil washed floor, 1 bucket of oil wash, removed 102 gallons of water, pressure washed floor 2)1/18/06- pump out oil and water from floor also wash down used 1x5 gallon can oil wash 3)1/20/06- Test tank, tank failed, wet leak 4)1/23/06- transfer oil to 275. Remove jacket and remove 30 bags of contaminated soil. Job completed 5)1/24/06- Install 275-gallon temporary . Contractor Work Authorization Form for Milro-2/2/06. Email from Landmarks Preservation Comission(LPC 212-669-7921)-John Weiss to DEC Ketani-02/10/06. Under the circumstances you described to me, no permit from the Landmarks Preservation Comission is needed for the NYSDEC contractor to break up the concrete paving in the courtyard next to 72 Hamilton Terrace in order to undertake and emergency remediation project . Because this work is being undertaken to remedy a dangerous condition, pursuant to section 25-312 of the NYC Administrative Code, no LPC permit is needed. No work is to be performed on 72 Hamilton Terrace . Fax from Kira-Leid King(NDC) to

CHILDRENS ART CARNIVAL (Continued) **S107521874**

DEC Ketani-2/11/06. As discussed, attached please find a search from the fire department indicating that there are only two tanks located at the above-referenced premises. Therefore, there isn't another tank located in the court yard . The Church had a fire four years ago causing the building to be inhabitable . Letter from DEC Ketani to Leid-King (NDC)-2/10/06. ...the Department has not been notified by Lindsay Lindos or other representatives from the Nazareth Deliverance Spiritual Church, that the church will hire a company to conduct a site investigation to determine whether a fuel oil tank is present under the church courtyard. Deadline of 2/18/06 given to investigate the court yard. Email from LPC Weiss to DEC Ketani-2/22/06. I am writing in response to our recent telephone conversation regarding the possibility that the historic wrought iron fence in front of the side yard at 72 Hamilton Terrace may have to be removed in an oil tank has to be removed. Suggestion to take the tank out in pieces to save the fence. If fence has to be removed it also has to be replaced. Letter from DEC Ketani to Lindos Lindsay(NDC) and Kira Leid-King(NDC)-3/10/06. Site visit made by Department on 2/10/06. ...a third fuel tank was observed to be present beneath the courtyard behind the Nazareth Deliverance Church. Department required NDC to perform a soil boring between the foundation wall of the Childrens Art Carnival at 62 Hamilton Terrace and the tank, and taking soil and groundwater samples. Another boring must be installed between the tank and the church. Deadline given for nine days within date of letter (2/19/06) to respond to DEC and resume investigation of tank and soil. STL Analyticals-2/10/06. Sample from CAC sump pit ran for fuel id analysis and showed 920000ppb #2 fuel oil. Fuel oil sampled by Milro. STL Analyticals-2/17/06. Sample from CAC outside by fill #5 @1'. Sample analysis performed for TPH310.3 shows oil parameters below method detection limits. STL Analyticals-2/17/05. Four sample from CAC front basement area near sump. . Sample analysis performed for TPH310.3. Soil analyticals show all below method detection limit except for 7400ppm #2 fuel oil(SB#2 @ 1'), 110ppm #2 fuel oil(SB#3 @1'). Letter from DEC Ketani to NDC Lindsay and NDC Leid-King-3/20/06. On March 20, 2006 the New York State Department of Environmental Conservation (the Department) made a site visit to the above listed property. No work appeared to have taken place to investigate the tank or the surrounding soil since the last site visit that took place on March 10, 2006 . Letter requiring investigation. Due date of 4/5/06 for the work to resume. Letter from DEC Ketani to Lisa Silversmith-03/20/06. We would like to install two(2) wells in the groundwater beneath the basement of your home. These wells will be constructed and sampled by out contractor. Contractor Work Authorization for STL-3/21/06. Fax from Milro to DEC Ketani-3/24/06. Milro proposes the following scope of work to address the oil spill cleanup: 1)Saw cutting of concrete slab in the basement and excavation of contaminated soil 2)disposal at a licensed disposal facility 3)recover of product using a vaccum truck if contaminated groundwater is encountered 4)collection of endpoint samples from excavation 5)restoration of the concrete slab 6)pressure washing of basement and epoxy application. Letter from DEC Ketani to CAC Martin-3/28/06. ...(the Department) is presently looking into other methods of controlling and preventing the petroleum vapors from entering Childrens Art Carnival . Milo remediation plan has been enclosed for Martin's review. Cost Estimate (Milro-Moriano)-4/4/02. Cost estimate for basement excavation and replacement. Site visit by DEC Vought during endpoint sampling of tank in couryard-5/11/06.

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Sampling performed by USA Environmental (Cristin Ciaburri 718-981-5710). Onsite was Keith Bartley(USA). Pumped out wate from 550-gallon UST in courtyard. No product in UST, just sheen and water. Three soil samples were collected (one through bottom of tank, one below fill line and one below supply/return line). No odors or staining observed in all of the soil samples. Site visit performed to CAC and no odors in basement and no free product in sump. Some oil staining showing up on floor from underlying groundwater. One sample also collected for analyiss from NDC basement floor. Vought spoke to USA Ciaburri and DEC will receive report by 6/12/06. DEC tentative requirements: 60 HAMILTON TERRACE: 1)followup to see if any recent spills 72 HAMILTON TERRACE 1)results of basement borings by 275-gallon ASTs 2)submittal of documentation of 1/14/06 clean up by Northeast 3)notification to Bishop France of requirements 4)backfilling of UST excavation in courtyard 5) The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness as per 1/19/06 letter 6)backfilling of NDC excavation to prevent continued groundwater infiltration into CAC 62 HAMILTON TERRACE: 1)continued monitoring of sump 2)call back to Martin regarding possibility of use of Spill funds for AST replacement and likelihood of NYSOAG cost recovery against Art Carnival 2)submission of tank test results from Eastmond and Sons of AST in CAC as per requirement on 1/19/06 letter 4)borings at tank location for 8260/8270 5)Milro boring logs and site plan from 2/17/06 analyticals 6)implemenation of Randy's workplan(installation of monitoring wells at CAC and basement excavation) from Milro 7)sealing of basement floor 8)borings by UST, sump and and fill port 9)Summary of description of cleanup activities by AL Eastmond including source of 30 bags of soil removed during tank removal and description of removed tank. 06/15/06-Vought-Spoke with Marlene Martin who inquired about status of spill. Martin stated that there were no odors in the school to date. Vought drafted letter with above requirements to both parties and cc'd Northeast, Marlene Martin (Art Carnival), Cristine Brooks Lee(Comm Bd 9), Martin Smith(Councilman Robert Jackson), LPC and USA, Eastmond. DEC Vought to call Milro regarding: 1)boring logs and site plan for borings on 2/17/06 and installation of new borings in floor or school. DEC Vought to call Martin regaring: 1)non use of Spill Funds for AST replacement as per NYSOAG Buss 2)further soil and groundwater investigation by the DEC. 06/19/06-Vought-Called Martin(212-234-4093), faxed her copy of requirement letter and letter to NDC and left message informing her her that there was no way for Spill Fund to pay for CAC tank replacement and to dicuss letter sent on 6/15/06. Vought called Lindos Lindsay (347-228-8039) for fax number and to inform him of outstanding requirements. Vought faxed him copy of requirement letter to 72 and 62 Hamilton Terrace. Lindsay requested that letter be transmitted via mail only and be sent to: Lindos Lindsay 163 Myrtle Avenue Brooklyn, NY 11201 Vought sent letter to above address. Vought called Christine Lee (Comm. Bd. 9 212-883-7600) and she requested correspondence via mail only. Vought sent info to: Christina Lee 48 Hamilton Terrace New York, NY 10031. Vought called and spoke to Martin Smith (ph 212-234-0551 fax 212-234-0552) for fax number and to explain requirements. Vought faxed Smith copy of requirement letters for 60, 62 and 72 Hamilton Terrace. Vought called John Weiss (Landmarks Preservation 212-669-7921) for fax number and to explain requirements. Vought left message to return call. Vought called and left message with Christin Ciaburri (USA 718-951-5710) for fax number and to explain

CHILDRENS ART CARNIVAL (Continued) **S107521874**

requirements. Vought called Renee Lewis (AL Eastmond 718-378-3000 fax 718-378-4560) and he was not in office. Vought faxed him copy of letters to 62 and 72 Hamilton Terrace. Vought called Bob Rafferty(NYSDOH 518-402-7800 fax 518-402-7819) for fax number and to explain requirements. Vought faxed Rafferty copy of requirements. Vought faxed NYCDOH Nieves copy of requirements for 60, 62 and 72 Hamilton Terrace. Vought called Dwayne Monaco(Northeast 914-777-1930 fax 914-777-1928) for fax number and to explain requirements. Vought faxed Monaco copy of requirements. Vought received call from Monaco and returned call and spoke to Monaco and no analyticals were performed and Monaco will send in pictures. Monaco did say his men saw oil on the floor. Monaco will submit report and pictures to DEC. 06/27/06-Vought-Received call from Marvin Edwards (212-234-4093) requesting letter with amount spent to date on PIN (8713.53 as per UIS). Vought returned call and left messge explaining that DEC will not provide the letter as amount may increase and Vought willing to call insurance directly. 06/28/06-Vought-Received call from Marvin Edwards and they filed claim with general liability insurance. Their claim representative asked for further costs. Claim may file under third party liability portion of coverage. Marvin will contact insurance and arrange conference call with DEC. 07/12/06-Vought-Received message from Martin and returned call and spoke to Martin. Martin will be faxing in tightness test results and approved installation of additional borings. Martin will seal the basement floor upon no occurrence of product in the sump during monitoring period. 4/23/07-Vought-Reviewed above notes and both CAC and 72 Hamilton Ave are potential sources, CAC due to failed tank test and 72 Hamilton due to presence of oil spill during cleanup by Northeast Environmental. Both parties listed as potentially responsible and site visit scheduled with Martin for this week to confirm no further impact and close spill. Vought called Martin. Martin had not seen oil in recent months and site visit scheduled tomorrow at 10am. Vought also reviewed documentation and photos submitted by Northast dated 6/27/06. On January 14th, 2006 Northeast mobilized a crew and equipment to 72 Hamilton Terrace were technicians conducted a clean up of #2 fuel oil from the tank and boiler room of the building . Absorbent material was applied to the boiler room floor where puddles of standing fuel oil was observed... . No tank test results for 72 Hamilton included. Vought also received copy of failing test results for CAC which show Ullage (dry portion leak) from Eastmond and Sons dated 1/20/06. 4/24/07-Vought-Site visit by Vought and Marlene Martin not present at site due to emergency. Vought performed site visit with super and no product or olfactory odor of groundwater noted in sump, no staining noted in concrete at former tank location or fill location, product stains noted on floor towards 72 Hamilton but as per super they were present for long time. No product in other sumps of CAC. Vought discussed with DEC Austin including possible groundwater sample at 72 Hamilton Avenue and investigation whether a former spill occurred at Daycare center by mechanics. 72 Hamilton Avenue boarded with no signs of development. Tank in courtyard excavation was backfilled. 07/25/08-Vought-Spill reassigned from DEC Vought to DEC Ketani as per DEC Austin. 8/21/08 - Raphael Ketani. I called up Paul Basso of MILRO Associates (516) 379-1500. I asked him to send DEC a copy of the report from about 1/27/06 whereby the return line for the fuel system at the CAC was tested and it failed. He said he will look for it. I called up the CAC and asked for Ms. Martin (212) 234-4093, but the receptionist

CHILDRENS ART CARNIVAL (Continued) **S107521874**

told me that she wont be back until September. I asked for Marvin Edwards, but she told me that he didn't work here anymore. I was transfered to Fatima Faloye, the Operations Manager. I asked Ms. Faloye whether I could make an inspection at 11:30AM tomorrow. She said that would be alright. 8/22/08 - Raphael Ketani. I made the scheduled site visit. The church next door was completely boarded up. It appeared that no work had taken place, since early 2006 when I first visited the site, to restore the church. There were no petroleum odors coming from the basement vent. I put the PID meter as close as I could to a basement vent near the side entrance gate, but didn't detect anything. The area where the 550 gallon tank was buried had been filled in and was overgrown with weeds. I met Ms. Faloye and she took me to the basement. There were no signs of free product on the floor. There were no oil stains. There were no oil odors. The PID meter registered 0 ppb of vapors. The front sump had only water. I thanked Ms. Faloye for the opportunity to visit the site and left. 8/25/08 - Raphael Ketani. The Final ISR was written for the case and submitted to Randall Austin, Chief of the Spill Prevention and Response Unit, for his signature. I talked to Dwayne Monaco of Northeast Environmental (914) 777-1930 regarding the submission of an investigation report for the church. He said that they did only a cleanup of the basement and some oil collection. He said that no report was generated. 9/2/08 - Raphael Ketani. Today I received a FAX from Paul Basso of MILRO. The attached page was a simple form stating that the return line did not hold, but that the supply line was O.K. The date of the test was 1/27/06. Additionally, the last time that oil was collected from the CAC was on 4/11/06. This also appears to be the last time any cleanup took place. 9/4/08 - Raphael Ketani. The FSIR was signed by Randall Austin, Chief of the Spills Unit, and Lou Oliva, Chief Counsel Region 2, and sent to Dennis Farrar in DER, Albany. As there was no oil contamination, nor oil vapors at the site during my visit on 8/22/08, and as the DEC does not intend to do further investigatory work, nor sees the need for further remediation work at the site, I am closing the spill case. "

Remarks: "Material is coming into the basement of the Childrens Art Carnival and is originating from the church next door. The Art Carnival's oil company came and used a powder to control the odor but no clean up has been done. They need DEC's help. Groundwater was affected.... material is mixed with the water from the natural spring there. Unsure of what else they can do for a clean up."

Contact Name:	DIONIS ORTIZ
DEC Memo:	"1/10/06 -Austin - Also received complaint from: Cristina Lee, Chairman of Health Committee of Community Board #9 212-883-7600; 212-864-6200 contact her for further background info, as well as Ortiz - end Carnival e-mails: mamudd1@aol.com or mamartin@childrensartcarnival.org FAX: (212) 234-4011 1/11/06 - Raphael Ketani. I tried contacting Mr. Ortiz ((212) 234-4093), but a man answering the phone said he would not be in until 10:30AM. The man said that the church had a fire 2 years ago and hasn't rebuilt or reopened. He passed the phone to a woman who said that they have been

CHILDRENS ART CARNIVAL (Continued) **S107521874**

trying to find out more information about the oil leaking from the church and she gave me the phone number of Cistine Grit (212) 234-0484. I called the number, but no one picked up. I then called (212) 883-7600 - the law office of Cristina Brooks Lee - but could only leave a message. I called (212) 864-6200 - the Community Board #9 phone 10AM to 5PM - and got a man on the line. He said that I should call Martin Smith (not available until 11AM) at (212) 928-1322, who is the representative of Councilman Robert Jackson. I will make a site visit at 10:45AM today. I made a site visit at 11:15AM. I met Dionis Ortiz, Program Manager, Jose Ortiz, his assistant, and Marlene Martin, executive director of the Children's Art Carnival. I went to the basement and looked at the oil tank, the fill and vent lines, and the boiler. There were no signs of spillage. However, I did see many cracks in the basement floor that looked wet. Mr. Ortiz said that there is a spring below the building and that the water seeps into the floor. The basement has 3 sumps. The front one is next to the front basement wall, the middle one is 16 feet away, and the third one is about 25 feet behind the second one. The second and third sumps had only clear water at the level of the floor. The front one had red oil floating on top. There were signs of oil spillage on the basement floor next to the sump. Mr. Ortiz said that when it rained heavily a little while ago, the water level rose and pushed out the oil onto the floor. He said that an oil odor was noticed to be coming from the basement on 1/3/06. He said that Robani Oil was called and they put down some oil absorbent material. I spoke to Robert Pearson of Robani Oil (212) 687-8699, Colonial Park Station, P.O. Box 188, NY, 10039, and he said he didn't think the oil was coming from the property, but he didn't do any system tightness testing. He said that the customer would have to order it and pay for the testing. The PID readings were as follows: over the sump: 11.8ppm breathing area front basement: 4.4ppm breathing area at second sump: 1.4ppm first floor hallway: 1.3ppm children's work room first floor: 570ppb main floor (second floor): 600ppb (light odor) third floor art work room: 650ppb third floor copier room: 750ppb fourth floor front and back: 750ppb Mr. Ortiz told me that the church next door burned two years ago and has never been repaired. He said there is a man (David - later called Patrick) living across the street who is affiliated with the church. Mr. Ortiz knocked on the window, but no one seemed to be home. He said that David told him that the church uses gas and that Con Ed had shut off the gas. Mr. Ortiz said that, after the fire, someone entered the church basement and saw an oil spill. I spoke to Ms. Martin and she said that she didn't have any other church contacts other than Cistine Grit (a.k.a. Ingrid). She called Ms. Grit's number, but didn't get an answer. I looked at the outside of the church. The schedule display panel has Nazareth Deliverance Spiritual Church, Inc., Archbishop C. Clark. The name over the 72 Hamilton Terrace entrance is Church of Nazareth. The church is boarded up and the roof looks to be in bad shape. There were oily odors emanating from a small basement window near the basement door of the church. It is unclear if there is an oil spill in the basement of the church. I called Randall Austin, Chief Spills Engineer Region 2, with the information. He sent Jeff Vought, E.G. 1, over to look at the situation. Mr. Vought arrived at 1:30PM and looked over the situation. He noted 3 suction lines at the foot of the basement stairs. One line was only 3 feet long as it had been cut. No one at the Carnival knew when this happened or if a previous oil spill took place. Though Mr. Ortiz told me that the Carnival has

CHILDRENS ART CARNIVAL (Continued) **S107521874**

been in the building for 36 years. I saw a short stream of red oil between one of the fuel lines and the wall next to the stairs. A conference call took place between Ms. Martin, Mr. Vought, and Michael Hughes of NYS DOH. Mr. Hughes said that the building should be ventilated and the basement door sealed. Ms. Martin said that she told all the parents about the odors and that all of the parents decided to have their children stay in class. Later, at between 3PM and 4PM, Martin Smith of Councilman Robert Jackson's office and Claudius Wickham of NYCDOH showed up. We went with them and Bruce Tilley of the Neighborhood Organization to the home of Diana Laird and David Zapol at 418 W.144 Street. This is the home which shares a common wall with the church. PID readings in the kitchen were 940ppb. Readings in the corner of the basement where paint and wall finishing material were reached 1300 to 1600ppb. A dirt hole in the basement floor had 2500ppb readings. The front part of the home's basement had 500ppb. Next, Mr. Smith and Mr. Wickham went with us to the Carnival's basement. They both looked at the situation with the oil in the front sump and noted the odors. Then Mr. Wickham measured the air in the art work room on the first floor. He noted about 650ppb readings. He said that the odors weren't dangerous, but just a nusiance. He said to ventilate the building. 1/12/06 - Raphael Ketani. I made a followup visit at 3:10PM. Eastmond had finished their cleanup work. The front sump had been vacuumed and the floor had been cleaned. Fans were blowing the air around in the basement. Ms. Martin said that Eastmond didn't arrive until this morning as, otherwise, there would have been high overtime charges to do the work yesterday at night. Eastmond told her that the oil tank will be picked up off of the floor or else the dampness will corrode the bottom and the tank will leak. The odors were not as bad as yesterday. The tank room had about 3ppm, the director's office about 750ppb, and the children's work area on the main floor was about 300ppb - there were no odors on the main floor. However, the oil reappeared in the front sump. Ms. Martin told me that she had made contact with someone from the Church of Nazareth and that this person will let people in saturday morning (1/14). Ms. Martin said that she will let me know what time the church will be opened up. She also said that her company is not going to spend any more money on removing the oil in the sump until DEC finds out whether the oil is coming from somewhere else or from the Carnival. I informed Randall Austin, Chief Spills Engineer Region 2, and Jeff Vought, E.G. 1 Spills, about this and about the return of the oil in the sump and about the levels of the odors today. 1/13/06 - Raphael Ketani. I spoke to Ms. Martin. She said that there are no odors on the main floor. I asked whether she made contact with anyone from the church. She said no one called her and she couldn't get ahold of anyone. I asked whether the front sump was covered. She said it wasn't. I told her to have someone cover it with plastic bags and then use tape to seal the bags to the sump clay pipe. She said she would have someone do it. 1/17/06 - Raphael Ketani. Ms. Martin called me today. She said that the basement had flooded over the weekend because the sump pump didn't work. She said she had water and oil all over the floor. Also, she said that the oil guage on the oil tank is in the red zone. I asked her when was the last time she had a delivery. She said that it was some time ago and no one really keeps track of the level of oil in the tank. She said she called Robani Oil to get a delivery. However, the odors are bad again in the building. I told her to set up the fans. She said there are problems with the electricity in the

CHILDRENS ART CARNIVAL (Continued) **S107521874**

basement and the fans aren't running. I also told her that Northeast Environmental ((914) 777-1930) showed up at the church on saturday, 1/14/06, and found oil all over the basement. I told her to call them and get them to clean up the oil in her basement. I told her that if they wont do it, then to call Eastmond again and have them clean up the oil as the odors are bad. Jeff Vought, the off hours spill responder for the weekend, came in and gave me the following notes. He said that Northeast Environmental arrived on site at 11:30AM on saturday 1/14. Oil was all over the floor of the Childrens Art Carnival. Northeast collected the oil and water on the basement floor and pumped out the front sump. Northeast then went to the Church of Nazareth and recovered 120 gals. of #2 fuel from the two 275 gallon tanks in their basement. They did 2 borings, one next to the two 275 gal. tanks (ASTs) and one some feet to the west. They end at bedrock and are only 18 deep. Mr. Vought had them leave the borings open. There is a fuel filter in a concrete casing in the floor. From there, a line runs to the boiler. Mr. Vought suggested to me that they either do 2 wells in the corner of the wrought iron fence next to the Carnival or an oil recovery pit. The contact at Northeast is Dwayne Monaco (914) 777-1930 or (914) 403-5525 cell. I spoke to Mr. Monaco and he said that he was hired by the church and has no plans to pump out more oil from the Carnival. His techinician noticed a second vent line and a remote fill at the back of the church. He believes that there may be a third tank under the courtyard. I contacted Ingrid at (212) 234-0485, the Church of Nazareth - Archbishop Maxton France (cell (917) 642-8913). She said this was the Archbishop's number and that I can send a letter to 72 Hamilton Terrace, NY 10031. She said they didn't have plans to do anything more regarding the cleanup. I visited the site at 2:50PM. Oil vapors were still noticeable from the church. I entered the Carnival and sensed strong odors on the main floor. There were no activities or children at the day care center. I went to the basement and there was 3 of water there. However, I could not see a sheen. Ms. Martin said that Eastmond could not come and pump out the water as they didn't have a truck available. She said that they will come at 9AM on 1/18. The vapors in the buidling are as follows: basement=10.1ppm first floor art room=2250ppb executive director's office=3400ppb hallway at first floor=6600ppb main floor=2300ppb third floor art room=3000ppb third floor front room=4600 third floor landing=7100ppb fourth floor art room=5600ppb fourth floor front room=4600ppb fourth floor landing=7100ppb I met Mr. Pearson of Robani Oil at the site. He said he wasn't going to deliver oil until the oil spill at the church was cleaned up and not until it was determined that the Carnival's system wasn't leaking. Ms. Martin said that someone from the NYCDOH was supposed to show up to test the air, but I stayed until 3:35PM and he arrived. Ms. Martin said that they were out of oil and so the heat was off. 1/18/06 - Raphael Ketani. I tried to call the Carnival to find out how the water/oil removal in the basement went at 9AM (contractor was Eastmond), but no one answered the phone. Later, I got ahold of Ms. Martin via her cell phone (917) 805-3154. She told me that Eastmond had been at the Carnival at 9AM and had pumped out the basement. She said that the school is still closed. I called up MILRO (516) 379-1500 (FAX (516) 379-4596) and spoke to Paul Basso. I told him that we needed Milro to set up ventilation for the school and pump out the basement. We decided to meet at 10:30AM tomorrow. Kira Leid-King (home(914) 632-0665; cell (914) 879-8126; work FAX (212) 455-2502) called me to explain that the oil wasn't spilled on the

CHILDRENS ART CARNIVAL (Continued) **S107521874**

floor of the church's basement. However, I told her that Northeast Environmental had been to the church on 1/14/06 and had pumped out 120 gals. from the two 275 gallon tanks. She said that the church hadn't had a delivery in 3 years and that the Fire Dept. had ordered the church to pump out the oil after the fire. She said the tanks never had oil in them. I told her that there was a second vent pipe and a second fill port. I added that there is a gauge for a 550 gal. tank on the wall of the church's basement. I told her that DEC suspects there is a third tank under the courtyard. She said that she had no idea. Finally, I told her that the state would be hiring a contractor to investigate the church's oil spill and tank situation. She said that it's the Carnival's fault, not the church. I asked her what her relationship was to the church. She said that she is sort of the secretary-treasurer and paid for Northeast to do the oil vacuuming. 1/19/06 - Raphael Ketani. A site visit was made by Randall Austin, Chief Spills Engineer Region 2, and myself to monitor the work of MILRO Assocs. Inc. We met Gordon Sandtorv, Operations Supervisor from MILRO, on site. MILRO was already cleaning the floor in the basement of the Carnival. Vapors in the basement were about 3000ppb. However, the floor looked very clean. Red oil was again on top of the water in the front sump. Water was seeping through the north wall (opposite the oil tank) of the basement. It didn't have any odor or feel oily. I found out that Robani Oil had delivered 100 gals. and the heat was back on. Patrick Peters (phone (212) 690-0630; son of Archbishop Carlyle Clark) showed up at the Carnival. We asked him to let us into the church basement and he did. We saw the two 275 gals. tanks and one vent line that extended from the second tank. A filter apparatus was in the floor for the oil. The suction line ran through the floor and came up 8 feet away at the furnace. There was a light smell of oil, but no oil was visible on the floor. A gauge was mounted onto the wall above the first tank. Gordon said that it was a petrometer for a third tank. vapor concentrations for 1/19: basement: about 3000ppb directors office: 425ppb first floor art room: initially 1000ppb, then 400ppb main floor: 350ppb third floor: 700ppb back room/ 600ppb front room fourth floor: 400ppb back room/ 1000ppb front room Mr. Austin talked to Mr. Sandtorv and told him that if the Carnival doesn't test the suction line and the return line, then MILRO will have to do it. He added that he wanted MILRO to construct some kind of low flow sump and collection system with an oil/water separator to collect the water and pump it to the city sewer. Then we left. 1/20/06 - Raphael Ketani. I called up Paul Basso and asked him what MILRO was doing to install a sump and oil/water separator. He said that he thought this idea was tentative and that DEC wasn't so sure this is what they wanted. So he hadn't looked into investigating a possible system. I told him DEC DOES want a slow pump system to hold down the water level and collect the oil. I told him that it needs to be installed immediately. He said that such a system that will work with the sump that exists is tricky to find, but he will investigate a possible one now. Paul added that oil samples were sent to Severn Trent today. He said there is a 2 week turnaround. I also told him to put down lots of absorbent pads on the floor around the front sump because rain is expected over the weekend. He said he will have someone do this. I called up Ms. Martin and asked her how things were. She said that the odors were low due to the fans that were going all night and that the basement was free of oil. She said that she will get someone to the Carnival soon to do an entire tank system tightness test. Ms. Martin called me at about 3:15PM today and said

CHILDRENS ART CARNIVAL (Continued) **S107521874**

that Eastmond had done a system test. They found that the tank leaked pressure and the vent pipe had a wet failure. Otherwise, Eastmond said, the suction, return and fill lines were alright. I told Ms. Martin that the next step was to have the tank cleaned out, removed, and a temporary tank installed. She said she would do that. I told her to have Eastmond put absorbent pads around the front sump to absorb oil when the water level rises again and to hire a company to either dig up the contaminated soil below the basement or to start with soil borings to find the extent of the oil pool. I gave her a list of digging and investigative companies with no recommendation. She said she would pick a company to start work. 1/23/06 - Raphael Ketani. I spoke to Paul of MILRO today and told him to hold off doing more work at the site. He said that his crew had been there this morning and pumped out more oil. I told him that was fine, but to stop work for now. He said he would. I then spoke to Ms. Martin. She said that Eastmond was on site and they were cutting up the tank. She said that MILRO had been on site and had pumped out more oil. Ms. Martin asked for a letter ordering the Carnival to do the tank removal and break up the floor of the basement to remove the contaminated soil and water. I told her I would send it. 1/25/06 - Raphael Ketani. I spoke with Marlene by cell phone. She said that this was the best way to reach her now because of the tank removal yesterday. She said that when Eastmond removed the oil, cut up the old tank, and welded the new tank, the vapors were so strong that they chased everyone out of the building. She said that everyone is now working from their respective homes. She said that she thinks the Carnival has found a temporary place to hold their saturday workshops. Ms. Martin said that a temporary tank has been set up in the backyard and Robani is supposed to get things running to provide heat. I told her to open all of the windows again to get more vapors out. She said she will do this and that she will call Eastmond to see what they plan to do and when. I called Eastmond and spoke to Isaac Mungra. He said that his crew removed the tank and saw holes on the opposite side which were 15 inches above the floor. He said that it did not appear that oil leaked onto the floor from the tank or anywhere (according to Rene from his crew who was there). Mr. Mungra said that he didn't feel it was necessary to break up the floor to see whether oil was underneath. I asked him whether Eastmond was going to wash the floor and pump the sump. He said no because he didn't want to take on the large cost. I asked whether Eastmond tested the suction, return, and fill lines. He said no because it was his understanding that Robani was going to replace the lines anyway. He said he was only responsible for cutting up the tank. I called Robani and asked Mr. Pearson whether Robani Oil was going to test the 3 lines. He said no and that he had no plans to. He said that he was just going to supply 2 temporary 275 gal. tanks and get the furnace running again. I asked whether Robani Oil was going to clean the basement floor and suck out the sump. He said no because he didn't want to take on the large cost as the Carnival doesn't have a lot of money. He told me to have Eastmond do it. I called Ms. Martin back and told her the situation with Eastmond and Robani and told her that I would call MILRO, with her permission, and have them come and do the 3 line tests, clean the floor, suck the sump and ventilate the buidling. She said that was alright and to call them. I tried calling Paul Basso, but could only leave a message. Mr. Marvin Edwards (cell (404) 790-2592) called to ask what he should put in the response letter to DEC. I told him to give me a chronology of who performed

CHILDRENS ART CARNIVAL (Continued) **S107521874**

what service, what events happened, and how the tank failure was discovered and what actions were taken to resolve the matter. He said he would. He added that he is taking over some of the cleanup coordination responsibility from Ms. Martin as she has other work to do. He asked that I coordinate with him. I told him that I was trying to get MILRO to take over the cleanup. He said that would be fine. I made contact with Mr. Basso and told him what the DEC wanted MILRO to do: 3 line tests, ventilate building, clean floor, pump sump daily. He said that MILRO can do all of the work. I asked him when his crew could come out. Mr. Basso said at 1 PM tomorrow. I said that would be alright. I called up Ms. Martin and asked her whether 1PM tomorrow would be alright. She said yes. I then called up Mr. Edwards to let him know when MILRO will be there. He said that 1PM would be good. 1/26/06 - Raphael Ketani. I visited the site today at 12:30PM and met Ms. Martin and Mr. Ortiz. They said that MILRO had already been here at 11:30PM and pumped out the sump. Ms. Martin said that MILRO told her they would be over tomorrow to clean the floor. I looked at the front sump and saw only clear water. There still were odors in the building as the floor in the front basement needed washing, though it didn't look oily and smelled only very slightly when I got very close to it. The floor where the tank used to be didn't have cracks or oil stains. There were fans in the basement blowing the vapors out the back entrance. Fans were present on all floors and were blowing the air out the windows. The building was cool inside due to the open windows. Vapor concentrations were as follows: basement front/back: 3500ppb/520ppb first floor director's office/art room: 89/210 main floor: 162 third floor front/back: 200/290 fourth floor front/back: 218/194 1/27/06 - Raphael Ketani. I received a call from Ms. Martin. She said that MILRO tested the 3 lines and the return line failed. She said that they cleaned the floor today, too. Ms. Martin added that the odors are light today. 1/30/06 - Raphael Ketani. I spoke to Paul Basso today. He said that the fill line wasn't tested. I asked him to test this line, also. He said they vacuumed out oil from the front and middle sumps on friday and cleaned the floor. He said that they will be over tomorrow, 1/31, and test the fill line, vacuum again and clean the floor, if necessary. I told him this would be fine. I made a site visit 10:45AM. I met Jose Ortiz who let me check on the odors at each floor and the presence of oil in the sump. The vapor concentrations were: 2,000ppb in the front basement; 750ppb in the back basement; about 250ppb at each floor above the basement. Odors were light on the main floor, but the building is still cool due to a problem with the furnace and the windows are partially open. I met Mr. Pearson on site. He told me that he will replace the suction line and that the return line was not in service even before Robani was the Carnival's oil supplier. I told Mr. Ortiz and Ms. Martin that MILRO will come tomorrow to suck out the sump and do 4 soil borings in the front basement. I told them that there will be 2 borings where the tank used to be, 1 between the tank position and the sump, and 1 on the other side of the sump. They said they understood. I will try to be at the site to watch the soil sampling. Mr. Lindos Lindsay called and left a message that he is scheduled to meet with an environmental company tomorrow at 11AM to discuss what needs to be done and how to go about it. 1/31/06 - Raphael Ketani. I met Gordon of MILRO at the site just as he finished doing the fourth boring - about 11AM. All four borings had been done where I wanted them. Gordon told me that he had soil at each location and that the soil at boring #1 (between the sump and the wall) was the most

CHILDRENS ART CARNIVAL (Continued) **S107521874**

contaminated. He said that boring #4 at the west end of the former tank area was the cleanest. He said that he will submit the samples for analysis. Oil was still floating and accumulating in the sump. I asked Gordon to call Paul Basso and have a vacuum truck come over and suck out the sump. Gordon said that one will be here today and tomorrow. The crew from Robani Oil began their work right after Gordon was done. They will install 2 275 gal. tanks and replace all of the lines. The vapors in the building were slightly worse than yesterday. I talked to Jose Ortiz and Marvin regarding why the borings were taken and what will happen next. I told them to set up the fans again and to ventilate the building. At 3:30PM I spoke to Gordon of MILRO to find out the details of how the return line was tested. Gordon said that he capped off the line, pumped with a manual push-pull pump until he had 5 lbs. of vacuum and waited half an hour. He said he used soap solution to check all the valves and they were fine. He said the vacuum truck had been there about 1 hour after he left and pumped out a lot of oil. I told him to test the fill line. Gordon said that he believed the line was already removed. I told him that if this is true, then I wanted him to do a couple of borings outside the building next to the fill line tomorrow morning. He said he will do it. 2/1/06 - Raphael Ketani. I met Gordon at the Carnival. He did one boring (#5) next to the fill pipe. However, Robani had replaced the old fill pipe with a new one yesterday and had been sloppy by spilling a little oil onto the area when they pulled the pipe. The sample was sandy fill soil and had a slight odor. The PID reading was 500ppb, but Gordon had collected the sample in a plastic bag. This was sand that was used to backfill the upper end of the abandoned coal shute that is infront of the building. I went into the basement and checked the portion of the sand that had spilled into the coal shute. It didn't have an odor. Gordon said that they just sent off the oil samples that were collected. I told him to order the lab to do a fingerprint of the oil. In the basement, Robani had installed two 275 gal. tanks, a new fill line, a new vent pipe, and a plastic coated suction line. The suction line was cemented to the floor and covered with concrete where it met the landing of the stairs to the basement. All of the old lines were removed. The heat was back on and a hot water pipe almost over the back and another one against the opposite wall of the basement were leaking hot water. Part of the floor of the front basement was wet. Some of the wetness extended under the new tanks, but they are on feet above the floor. Red oil is in the front sump, but is transparent enough so that the bottom of the sump can easily be seen. I told Gordon to call Paul Basso and have him send a vac. truck over to pump out the sump. Vapors in the building were: basement: front 1000ppb/ middle 500ppb first floor: front 350ppb/ back 225ppb second (main) floor: 230ppb third floor: front 250ppb/ back 350ppb fourth floor: front and back 300ppb Paul from MILRO called at 3PM and said that he will send the samples to a DEC contract lab for fingerprinting and he will resample soil sample #5 and put it in a jar. 2/2/06 - Raphael Ketani. I received a call from Rick Bayer of Severn Trent Labs regarding the soil samples. He said he will send a copy of the report to MILRO and to DEC. 2/3/06 - Raphael Ketani. I FAXed a copy of the Standby Contractor Authorization Form to Paul Basso of MILRO. 2/6/06 - Raphael Ketani. I visited the site today. Vapors in the building were 3600ppb in the basement, 200ppb in the first floor art room, and 170 ppb in the main floor art work area. However, the heat was off as the plumbers were replacing a couple of hot water pipes. Oil was still in

CHILDRENS ART CARNIVAL (Continued) **S107521874**

the front sump, but it had turned thinner and brownish in color. Aside from this, Marvin Edwards of the Carnival pointed out black spots from 2 to 14 that had suddenly started to appear on the basement floor. Mr. Edwards said that he first noticed them today. There were about 12 spots and all except for a couple were in the front basement area. I touched some and oil came off onto my hand. The PID detected 6200ppb of vapors. I called MILRO to come over tomorrow to suck out the front sump and try to reduce the amount of oil seeping through the floor. Paul of MILRO said they would do it. 2/7/06 - Raphael Ketani. I tried to find out whether MILRO had pumped out the front sump, but could only leave a voice mail for Marlene Martin. I called up Paul at MILRO and he said his worker was there with the vacuum truck and pumped out 120 gals. of water. 2/8/06 - Raphael Ketani. I called up Mr. Wickham of NYCDOH ((212) 442-3372), but he wasn't in. I reached the receptionist and she said that all inspectors get their work assignments a week in advance and that Mr. Wickham already had a full schedule and could not make it to the CAC. She connected me with Mr. Wickham's supervisor, Inspector Stallbohm. Mr. Stallbohm said that someone was out at the CAC on 1/17 and still found unacceptable vapors. He would see what he can do to get someone to the CAC quickly. Mr. Stallbohm called back to say that an inspector went out to the CAC on 2/3 and determined that the vapors had decreased to safe levels for children. He said that Marvin Edwards of the CAC had signed the DOH report to this effect. He added that Mr. Edwards was told the children could come back and that an inspector will make a followup visit on about 2/17. I called up Marvin, but got Jose Ortiz. I told him that the NYCDOH had told me that the children could come back to the CAC. He said that everyone was aware of this, but the boiler broke again and so the children will be staying off-site for a while longer. 2/9/06 - Raphael Ketani. I made a site visit today. The heat was off again as they had many hot water pipe leaks. They are in the process of replacing much of their hot water piping. Oil was still in the top of the front sump, but you could easily see to the bottom of the sump and the oil appeared to be just a sheen. Vapor concentrations were: basement: 1400 to 1500 ppb first floor art room: 200 ppb main floor: 325 ppb third floor: back/front, 325/290 fourth floor: back/front, 380/400 Kira Leid-King, lawyer for the Church of Nazareth, called me yesteday to say that she had hired a title company to do a records search for the third tank. No physical investigations were taking place at the church. 2/14/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that the odors were very slight in the building. I told him I would like to send over a vacuum truck to suck out the oil in the front sump. He said that would be alright. He said that someone will be at the CAC today and tomorrow. I called MILRO and they said they will be over at the CAC on thursday morning. I let Mr. Edwards know and he said someone will be there. 2/16/06 - Raphael Ketani. I spoke to Ms. Martin. She said she knew that MILRO wasn't coming today, but would come tomorrow. I asked her about Robani Oil and how service has been over the years - whether they clean up whatever they release. She said they had no problem with them and that nothing has ever happened. I then asked her whether she had heat today. She said yes and that there was plenty of it since they repaired all of the water pipes. I asked her how the history of the boiler has been. She said that except for now and the pipes, she hasn't had a problem - though it's tempermental. I asked her whether in the past it ever leaked. She said not to her knowledge. I ended the conversation after

CHILDRENS ART CARNIVAL (Continued) **S107521874**

this. At 3:45PM I received a call from Bill Hunter, insurance adjuster for Utica Insurance ((516) 479-5089). He represents the insurance company for Robani Oil. He said he was trying to go over the information that Robani had given him regarding the oil release to see who had liability. He said the insurance claim number was 1016566. He said that the CAC first called Robani to complain of a loss on 1/6/06. He said Robani came to investigate and found oil 5 feet from the tank, but he said he wasn't sure whether that meant in the sump or on the floor. He asked whether the church was the source. I told him we didn't know yet, but we intend to do an investigation. 2/23/06 - Raphael Ketani. I spoke to Jose Ortiz regarding the conditions at the CAC. He said he did notice a slight odor on the main floor. I asked him to look at the front sump. He called me a little while later and said there was lots of oil in the sump. Then I called MILRO and told Paul of MILRO to send the vacuum truck. He said he would send it tomorrow, friday. Paul told me that DEC should be receiving the first bill soon for the work they have done so far. I let Mr. Ortiz know that MILRO will be over tomorrow. 2/27/06 - Raphael Ketani. I visited the CAC today. I met Mr. Edwards. He showed me the front basement area. The door is being kept closed now to confine the odors as much as possible. The room had 1500 ppb of vapors. A thin film of oil was present on the surface of the water in the sump with widely scattered small orange droplets of oil. The floor had lots of Speedi-Dri on it to absorb oil seeping up through the floor as oval stains. Mr. Edwards said that MILRO had been over last friday and had pumped out the sump. The air about the second sump had about 560 ppb vapors. There was a sheen on top of the water, but it did not smell like oil. In the art room on the first floor the vapors were about 500 ppb. The main floor and the third floor both had vapor concentrations of about 450 ppb. Mr. Edwards said that they just had a cleaning crew mop the floors. The air smelled of some kind of vapors of a cleaner. I told Mr. Edwards that I will have MILRO come over sometime this week to pump out the sump again. He said anytime is alright. I received the analytical reports for the 5 soil samples taken at the CAC some weeks ago. Four (4) samples were collected on 1/31/06 in the front basement near the front sump. One (1) sample was taken on 2/2/06 at the fill pipe where it passes below ground. Three (3) of the front basement samples and the fill pipe sample indicate the presence of only #2 oil. One (1) basement sample indicated the presence of #1 oil. However, this oil was also in the blank. 3/1/06 - Raphael Ketani. I spoke to Paul of MILRO today and asked him to vacuum out the front sump this week. He said his truck will be over tomorrow. 3/6/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that MILRO was over on friday and pumped out the sump. He said that odors were definitely noticeable in the front basement, but the door is kept closed. He added that the odors in the rest of the building are slight and that they had classes on saturday with no problems. 3/9/06 - Raphael Ketani. I received a call from Ms. Martin today. She said that some men in plain cars showed up at the church on teusday, 3/7, and began working in the courtyard. She said that they uncovered and opened a tank today. 3/10/06 - Raphael Ketani. I visited the CAC and the church courtyard today. I took pictures of the exposed tank and the sheen floating at the top of the water in the tank. The soil from above the tank didn't have an odor. Next, I visited the CAC. They had fans blowing in the basement. They were blowing from the front sump area to the open back door of the basement. Vapors in the front sump area were about 560 ppb,

CHILDRENS ART CARNIVAL (Continued) **S107521874**

vapors in the basement sink room where new oil stains showed up were 1100 ppb, the first floor was about 190 ppb, the main floor was 140 ppb, and the third floor was about 200 ppb. I will call MILRO to have the front sump pumped out again. 3/15/06 - Raphael Ketani. I talked to Jose Ortiz of the CAC. He said that MILRO was there on monday to pump out the front sump, but they had to wait for 10 or 15 minutes before they could get into the basement. Mr. Ortiz said that everything was pumped out and the odors are slight throughout the CAC. However, where the oil has been seeping through the floor in the basement sink room, the odors and the staining are getting worse. He said that no work is taking place at the church courtyard next door to investigate the tank and the oil. Kristina Lee (212) 883-7600, Chairman of the Health Committee of Community Board #9, called for an update. She said that she saw the exposed open tank in the church courtyard. I told her that the church brought a bunch of people to the site and they dug up and exposed the tank and then opened the tank. I told her DEC sent a letter ordering the church to continue the remediation by friday, 3/17, or the DEC will send in its own contractors. I told her the DEC will send a letter stating that we are taking over the investigation and cleanup if DEC hears or sees nothing happening. I added that we will get a court order to enter the property and then start the work. Ms. Lee said that the congregation meets every sunday at St. James Presbyterian Church. She added that on March 2, the NYC Dept. of Buildings fined the church $10,000 for not repairing the landmark building. SHE ASKED THAT A WELL BE PUT IN BETWEEN THE TANK AND THE NEIGHBOR'S GARDEN WALL AND ASKED THAT SHE BE KEPT INFORMED BY NEXT WEEK. I told her I would. 03/17/06-Thomas-Contract Payment Package-(Severn)- took samples-02/01/06-02/28/06 took sample of sump pit 01/01/06-01/31/06 03/17/06-Thomas_ Contract Payment Package-(Milro)- washed basement floor, took samples, removed pads, washed tank room, took borings, purge sumps (01/19/06-02/24/06). 3/20/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that the odors in the rest of the building are slight. However, the odors in the basement sink room are increasing and more oil staining is showing up in the floor. He said that the fans are ventilating the basement. I told him that I will call MILRO to have them suck up the water and oil from the middle and front sumps. I contacted MIRLO and they said they will be over at 9:30AM to pump out both sumps. 3/22/06 - Raphael Ketani. I FAXed the Standby Contractor Authorization Form to Severn Trent Labs (phone: (845) 562-0890; FAX: (845) 562-0841). 3/23/06 - Raphael Ketani. I received the bills from MILRO today for work done on 3/1 and 3/13/06. 03/24/06 Thomas- Contract Payment Package-(Milro)- vacuumed oil from sump pits, disposed of oil and water (03/03/06-03/13/06). 3/28/06 - Raphael Ketani. I sent a letter to Ms. Martin with the 3/24/06 remediation plan that MILRO had FAXed to me. I received a call from Bill Hunter of Utica Insurance, the insurance company for Robani Oil. This is the second time he called me for information. He wanted to know what the status was with the spill case. I explained to him what was going on at the church courtyard and what DEC wanted to do to eliminate the vapors and contaminated water under the CAC. 4/4/06 - Raphael Ketani. I received a call from Marlene Martin of the CAC on 4/3/06. She wanted to know what the total cost of the cleanup has been so far for the CAC. I told her a close estimate is $8710. She asked what the cost would be for the future/proposed work plan that I had sent her from MILRO. I told her I would find out. I called up Anthony at MILRO and he said he will try to get back to me with an

CHILDRENS ART CARNIVAL (Continued) **S107521874**

approximate price. 2:30 Anthony Mariano of MILRO FAXed me the rough estimate of what it may cost for all of the construction work that would take place to: break open the concrete floor and suck out the contaminated soil, water and oil, repair the floor, install 2 access wells in the floor, power wash the floor, and paint with two part expoxy paint. The total came to $36,642.95. I informed Ms. Martin about the estimated amount. 3:50PM I sent an e-mailed letter to Lisa Silversmith, the owner of the property on the other side of the CAC. I hadn't heard anything from her in response to the Department's 3/20/06 letter. So I sent her an e-mail to lisasilversmith@yahoo.com. The letter appears below: CONFIDENTIAL New York State Department of Environmental Conservation Division of Environmental Remediation, Region 2 Bureau of Spill Prevention and Response 47-40 21ST Street, Long Island City, NY 11101-5407 Phone: (718) 482-4933 " FAX: (718) 482-4098 Website: www.dec.state.ny.us April 4, 2006 Lisa Silversmith 60 Hamilton Terrace New York, NY 10031 RE: Spill #0511700 Childrens Art Carnival 62 Hamilton Terrace New York, NY Dear Ms. Silversmith: As of April 4, 2006, the New York State Department of Environmental Conservation (the Department) has not received a response to its March 20, 2006 letter regarding the property at 60 Hamilton Terrace (see attached below). It is important that the Department make an inspection to the basement of your property. We are aware that a spill had previously taken place at 60 Hamilton Terrace and was subsequently cleaned up and the case closed. The Department would like to determine that there are no impacts from the oil that is presently seeping into the Childrens Art Carnival next door. Temporary groundwater monitoring wells installed in the floor of your basement would help to collect any oil under your property. Please call me at (718) 482-4634 to make arrangements for the site inspection. Sincerely, Raphael Ketani Enigneering Geologist II 4/10/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that due to the rain last thursday, the odors in the sink room have gotten worse. However, he said, the odors in the rest of the basement are fine due to the ventilation and the odors in the building are slight. I told him that I would send over the vacuum truck to suck out more oil and water tomorrow. I told him to have someone at the CAC at 9AM so that MILRO can get in. He said he would do so. I asked him whether Ms. Martin was in. He said no. I called up Paul at MILRO and told him we would need his vac. truck at the CAC tomorrow. He said he would be there. 4/17/06 - Raphael Ketani. I spoke to Mr. Edwards. He said that the situation at the CAC is the same as last week with only slight odors in the occupied parts of the building and stronger odors in the basement. He said there was no flooding. I tried to contact Ms. Martin regarding MILRO's proposal, but could only leave a voice mail message. 4/24/06 - Raphael Ketani. I spoke to Mr. Edwards. He said that there are no changes at the CAC. He said the odors are the same - even in the basement. He said that there was no flooding from the 3 of rain over the weekend. However, the oil staining is slightly more in the basement. 5/15/06 - Raphael Ketani. I received the bills from MILRO for the work done on 3/21/06 and 4/11/06. I signed them and forewarded them for processing. 5/17/06 - Raphael Ketani. I spoke to Mr. Edwards today. He said the odors in the building were still only slight. He said the rains over the past weekend and week haven't caused any recurrence of oil seepage. He said the basement was fine. This case is being transfered today from myself to Jeff Vought in order to consolidate all of the PINS cases under one Spills case manager. 06/06/06-Vought-Received

CHILDRENS ART CARNIVAL (Continued) **S107521874**

call from Marlene Martin requesting information on possibility of state funding for tank replacement. Marlene also said that basement flooded during past weekends with heavy rains and no free product was noted. 06/06/06-Vought-Complete File Review by Vought: See also spill numbers: 0209311(60 Hamilton Terrace-closed 12/22/05), 0551505(72 Hamilton Terrace-open). Sale of 72 Hamilton Terrace by City of New York to Nazareth Spiritual Church and resulting Deed transfer-4/20/72. Site visit on 1/11/05 by DEC Vought-DEC required: 1)tank testing results 2)notification to NYCDOH 3)installation of ventilation system in basement 4)sealing of sump and washing of basement floor. Vought left message with NYCDOH Nieves, spoke to Mike Hughes(NYSDOH) and decision to close is the call of Marlene Martin. Oil was first noted on 1/3/06 and basement filled with water during times of heavy rains. Three sumps present in basement of Childrens Art Carnival(CAC). Sump closed to Hamilton Terrace contained fresh #2 fuel oil. As per Marlene Martin, she contacted 60 Hamilton Terrace to see if they had spill and no spill was found in the basement and she contacted the Church who noted an oil spill next door at 72 Hamilton Terrace. Email from NYSDOH Hughes to NYCDOH Peter Stallbohm with cc to NYCDOH Nieves- How did you inspectors make out at the 64 Hamilton Terrace spill? . Email from NYSDOH Hughes to NYCDOH Stallbohlm and DEC Vought-1/18/06. ...any updates about the Childrens Center in Manhattan? Have they re-opened, cleanup status? . Response from Stalbohlm At 64 Hamilton Terrace, readings of 4-5ppm of VOC was detected. A contractor was contracted to conduct a cleanup yesterday. The center voluntarily closed until so. After cleanup, another visit will be made to check effectiveness of cleanup (possibly today). Email from NYSDOH Hughes to DEC Vought-1/19/06. Peter Stallbohlm, NYCity Health, sent an inspector back to the Children's Center on Tuesday, 1/17. The inspector reported odors are still present... Fuel product still present in basement. The center is still closed and NYCity Health recommends staying closed until the additional clean-up is performed. Would you be able to also make a site visit and recommend some specific actions as well? . Letter from DEC Ketani to Kira-Leid King (Nazareth Deliverance Church NDC)-1/19/06. The New York State Department of Environmental Conservation (the Department) was notified on January 10, 2006 that a petroleum release took place at the above referenced site. Odors were noticed coming from the basement of the church during an inspection of the area on January 11, 2006. Staff from the Department were at the site on January 14, 2006 to observe the removal of No. 2 fuel oil by Northeast Environmental from Nazareth Deliverance Church . (6/6/06-Note that I, jeff Vought was onsite and liquid was recovered from basement when I arrived on-site, I did not observe oil in the basement as the liquid was already recovered). The Department has identified the Nazareth Deliverance Church as a potential responsible party for this release . Letter required submission of an investigative summary report including the investigation of a possible third tank under the church courtyard. The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness . If no reply regarding the investigation is received from the Nazareth Deliverance Church within (5) days of receipt of this letter the Department may proceed with the required work... . Letter from DEC Ketani to CAC Martin-1/19/06. The Department has identified the Childrens Art Carnival as a potentially responsible party for this release . Notification that the Departrment has contracted Milro and will invesigate the source of oil. Upon one of the inspections of the

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Childrens Art Carnival, staff from the Department noticed a three foot long piece of suction line at the foot of the stairs of the basement. The Department requires that the Childrens Art Carnival immediately conduct a site investigation to determine why the line was replaced, whether there was a release of product and how large the release was, when the suction line was replaced and which company did the replacement work. The Childrens Art Carnival must also hire a contractor to have the suction line and return line (the two 3/4 inch copper lines) pressure tested . Letter from DEC Ketani to CAC Martin-1/23/06. ...the Department was notified on January 20, 2006 that a tank system test was conducted by AL Eastmond & Son, Inc. on this date and that a leak was detected in the tank and vent line. At this time, the Department is ordering the Childrens Art Carnival to repair or replace the tank and the vent pipe, and to hire a contractor to investigate the oil spill and remove all contaminated concrete flooring, soil and rock and all product and contaminated water . Letter from Marlene Martin (CAC) to DEC Ketani-1/27/06. To date we have cooperated with the Department of Environmental Conservation on all requests, recommendations and mandates. Enclosed, please find the job tickets for work performed by Eastmond and Sons, Inc. as per your Department's madates and directives. It is our hope that a resolve can be reached as soon as possible and or that the Carnival can be eliminated as the potential source of this release... Enclosed as Eastmonds & Sons job tickets: 1)1/11/06- Removed 50 bags of contamianted soil washed floor, 1 bucket of oil wash, removed 102 gallons of water, pressure washed floor 2)1/18/06- pump out oil and water from floor also wash down used 1x5 gallon can oil wash 3)1/20/06- Test tank, tank failed, wet leak 4)1/23/06- transfer oil to 275. Remove jacket and remove 30 bags of contaminated soil. Job completed 5)1/24/06- Install 275-gallon temporary . Contractor Work Authorization Form for Milro-2/2/06. Email from Landmarks Preservation Comission(LPC 212-669-7921)-John Weiss to DEC Ketani-02/10/06. Under the circumstances you described to me, no permit from the Landmarks Preservation Comission is needed for the NYSDEC contractor to break up the concrete paving in the courtyard next to 72 Hamilton Terrace in order to undertake and emergency remediation project . Because this work is being undertaken to remedy a dangerous condition, pursuant to section 25-312 of the NYC Administrative Code, no LPC permit is needed. No work is to be performed on 72 Hamilton Terrace . Fax from Kira-Leid King(NDC) to DEC Ketani-2/11/06. As discussed, attached please find a search from the fire department indicating that there are only two tanks located at the above-referenced premises. Therefore, there isn't another tank located in the court yard . The Church had a fire four years ago causing the building to be inhabitable . Letter from DEC Ketani to Leid-King (NDC)-2/10/06. ...the Department has not been notified by Lindsay Lindos or other representatives from the Nazareth Deliverance Spiritual Church, that the church will hire a company to conduct a site investigation to determine whether a fuel oil tank is present under the church courtyard. Deadline of 2/18/06 given to investigate the court yard. Email from LPC Weiss to DEC Ketani-2/22/06. I am writing in response to our recent telephone conversation regarding the possibility that the historic wrought iron fence in front of the side yard at 72 Hamilton Terrace may have to be removed in an oil tank has to be removed. Suggestion to take the tank out in pieces to save the fence. If fence has to be removed it also has to be replaced. Letter from DEC Ketani to Lindos Lindsay(NDC) and Kira

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Leid-King(NDC)-3/10/06. Site visit made by Department on 2/10/06. ...a third fuel tank was observed to be present beneath the courtyard behind the Nazareth Deliverance Church. Department required NDC to perform a soil boring between the foundation wall of the Childrens Art Carnival at 62 Hamilton Terrace and the tank, and taking soil and groundwater samples. Another boring must be installed between the tank and the church. Deadline given for nine days within date of letter (2/19/06) to respond to DEC and resume investigation of tank and soil. STL Analyticals-2/10/06. Sample from CAC sump pit ran for fuel id analysis and showed 920000ppb #2 fuel oil. Fuel oil sampled by Milro. STL Analyticals-2/17/06. Sample from CAC outside by fill #5 @1'. Sample analysis performed for TPH310.3 shows oil parameters below method detection limits. STL Analyticals-2/17/05. Four sample from CAC front basement area near sump. . Sample analysis performed for TPH310.3. Soil analyticals show all below method detection limit except for 7400ppm #2 fuel oil(SB#2 @ 1'), 110ppm #2 fuel oil(SB#3 @1'). Letter from DEC Ketani to NDC Lindsay and NDC Leid-King-3/20/06. On March 20, 2006 the New York State Department of Environmental Conservation (the Department) made a site visit to the above listed property. No work appeared to have taken place to investigate the tank or the surrounding soil since the last site visit that took place on March 10, 2006 . Letter requiring investigation. Due date of 4/5/06 for the work to resume. Letter from DEC Ketani to Lisa Silversmith-03/20/06. We would like to install two(2) wells in the groundwater beneath the basement of your home. These wells will be constructed and sampled by out contractor. Contractor Work Authorization for STL-3/21/06. Fax from Milro to DEC Ketani-3/24/06. Milro proposes the following scope of work to address the oil spill cleanup: 1)Saw cutting of concrete slab in the basement and excavation of contaminated soil 2)disposal at a licensed disposal facility 3)recover of product using a vaccum truck if contaminated groundwater is encountered 4)collection of endpoint samples from excavation 5)restoration of the concrete slab 6)pressure washing of basement and epoxy application. Letter from DEC Ketani to CAC Martin-3/28/06. ...(the Department) is presently looking into other methods of controlling and preventing the petroleum vapors from entering Childrens Art Carnival . Milo remediation plan has been enclosed for Martin's review. Cost Estimate (Milro-Moriano)-4/4/02. Cost estimate for basement excavation and replacement. Site visit by DEC Vought during endpoint sampling of tank in couryard-5/11/06. Sampling performed by USA Environmental (Cristin Ciaburri 718-981-5710). Onsite was Keith Bartley(USA). Pumped out wate from 550-gallon UST in courtyard. No product in UST, just sheen and water. Three soil samples were collected (one through bottom of tank, one below fill line and one below supply/return line). No odors or staining observed in all of the soil samples. Site visit performed to CAC and no odors in basement and no free product in sump. Some oil staining showing up on floor from underlying groundwater. One sample also collected for analyiss from NDC basement floor. Vought spoke to USA Ciaburri and DEC will receive report by 6/12/06. DEC tentative requirements: 60 HAMILTON TERRACE: 1)followup to see if any recent spills 72 HAMILTON TERRACE 1)results of basement borings by 275-gallon ASTs 2)submittal of documentation of 1/14/06 clean up by Northeast 3)notification to Bishop France of requirements 4)backfilling of UST excavation in courtyard 5) The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness as per 1/19/06 letter 6)backfilling of NDC excavation

CHILDRENS ART CARNIVAL (Continued) **S107521874**

to prevent continued groundwater infiltration into CAC 62 HAMILTON TERRACE: 1)continued monitoring of sump 2)call back to Martin regarding possibility of use of Spill funds for AST replacement and likelihood of NYSOAG cost recovery against Art Carnival 2)submission of tank test results from Eastmond and Sons of AST in CAC as per requirement on 1/19/06 letter 4)borings at tank location for 8260/8270 5)Milro boring logs and site plan from 2/17/06 analyticals 6)implemenation of Randy's workplan(installation of monitoring wells at CAC and basement excavation) from Milro 7)sealing of basement floor 8)borings by UST, sump and and fill port 9)Summary of description of cleanup activities by AL Eastmond including source of 30 bags of soil removed during tank removal and description of removed tank. 06/15/06-Vought-Spoke with Marlene Martin who inquired about status of spill. Martin stated that there were no odors in the school to date. Vought drafted letter with above requirements to both parties and cc'd Northeast, Marlene Martin (Art Carnival), Cristine Brooks Lee(Comm Bd 9), Martin Smith(Councilman Robert Jackson), LPC and USA, Eastmond. DEC Vought to call Milro regarding: 1)boring logs and site plan for borings on 2/17/06 and installation of new borings in floor or school. DEC Vought to call Martin regaring: 1)non use of Spill Funds for AST replacement as per NYSOAG Buss 2)further soil and groundwater investigation by the DEC. 06/19/06-Vought-Called Martin(212-234-4093), faxed her copy of requirement letter and letter to NDC and left message informing her her that there was no way for Spill Fund to pay for CAC tank replacement and to dicuss letter sent on 6/15/06. Vought called Lindos Lindsay (347-228-8039) for fax number and to inform him of outstanding requirements. Vought faxed him copy of requirement letter to 72 and 62 Hamilton Terrace. Lindsay requested that letter be transmitted via mail only and be sent to: Lindos Lindsay 163 Myrtle Avenue Brooklyn, NY 11201 Vought sent letter to above address. Vought called Christine Lee (Comm. Bd. 9 212-883-7600) and she requested correspondence via mail only. Vought sent info to: Christina Lee 48 Hamilton Terrace New York, NY 10031. Vought called and spoke to Martin Smith (ph 212-234-0551 fax 212-234-0552) for fax number and to explain requirements. Vought faxed Smith copy of requirement letters for 60, 62 and 72 Hamilton Terrace. Vought called John Weiss (Landmarks Preservation 212-669-7921) for fax number and to explain requirements. Vought left message to return call. Vought called and left message with Christin Ciaburri (USA 718-951-5710) for fax number and to explain requirements. Vought called Renee Lewis (AL Eastmond 718-378-3000 fax 718-378-4560) and he was not in office. Vought faxed him copy of letters to 62 and 72 Hamilton Terrace. Vought called Bob Rafferty(NYSDOH 518-402-7800 fax 518-402-7819) for fax number and to explain requirements. Vought faxed Rafferty copy of requirements. Vought faxed NYCDOH Nieves copy of requirements for 60, 62 and 72 Hamilton Terrace. Vought called Dwayne Monaco(Northeast 914-777-1930 fax 914-777-1928) for fax number and to explain requirements. Vought faxed Monaco copy of requirements. Vought received call from Monaco and returned call and spoke to Monaco and no analyticals were performed and Monaco will send in pictures. Monaco did say his men saw oil on the floor. Monaco will submit report and pictures to DEC. 06/27/06-Vought-Received call from Marvin Edwards (212-234-4093) requesting letter with amount spent to date on PIN (8713.53 as per UIS). Vought returned call and left messge explaining that DEC will not provide the letter as amount may increase and Vought willing to call insurance directly. 06/28/06-Vought-Received call from Marvin

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Edwards and they filed claim with general liability insurance. Their claim representative asked for further costs. Claim may file under third party liability portion of coverage. Marvin will contact insurance and arrange conference call with DEC. 07/12/06-Vought-Received message from Martin and returned call and spoke to Martin. Martin will be faxing in tightness test results and approved installation of additional borings. Martin will seal the basement floor upon no occurrence of product in the sump during monitoring period. 4/23/07-Vought-Reviewed above notes and both CAC and 72 Hamilton Ave are potential sources, CAC due to failed tank test and 72 Hamilton due to presence of oil spill during cleanup by Northeast Environmental. Both parties listed as potentially responsible and site visit scheduled with Martin for this week to confirm no further impact and close spill. Vought called Martin. Martin had not seen oil in recent months and site visit scheduled tomorrow at 10am. Vought also reviewed documentation and photos submitted by Northast dated 6/27/06. On January 14th, 2006 Northeast mobilized a crew and equipment to 72 Hamilton Terrace were technicians conducted a clean up of #2 fuel oil from the tank and boiler room of the building . Absorbent material was applied to the boiler room floor where puddles of standing fuel oil was observed... . No tank test results for 72 Hamilton included. Vought also received copy of failing test results for CAC which show Ullage (dry portion leak) from Eastmond and Sons dated 1/20/06. 4/24/07-Vought-Site visit by Vought and Marlene Martin not present at site due to emergency. Vought performed site visit with super and no product or olfactory odor of groundwater noted in sump, no staining noted in concrete at former tank location or fill location, product stains noted on floor towards 72 Hamilton but as per super they were present for long time. No product in other sumps of CAC. Vought discussed with DEC Austin including possible groundwater sample at 72 Hamilton Avenue and investigation whether a former spill occurred at Daycare center by mechanics. 72 Hamilton Avenue boarded with no signs of development. Tank in courtyard excavation was backfilled. 07/25/08-Vought-Spill reassigned from DEC Vought to DEC Ketani as per DEC Austin. 8/21/08 - Raphael Ketani. I called up Paul Basso of MILRO Associates (516) 379-1500. I asked him to send DEC a copy of the report from about 1/27/06 whereby the return line for the fuel system at the CAC was tested and it failed. He said he will look for it. I called up the CAC and asked for Ms. Martin (212) 234-4093, but the receptionist told me that she wont be back until September. I asked for Marvin Edwards, but she told me that he didn't work here anymore. I was transfered to Fatima Faloye, the Operations Manager. I asked Ms. Faloye whether I could make an inspection at 11:30AM tomorrow. She said that would be alright. 8/22/08 - Raphael Ketani. I made the scheduled site visit. The church next door was completely boarded up. It appeared that no work had taken place, since early 2006 when I first visited the site, to restore the church. There were no petroleum odors coming from the basement vent. I put the PID meter as close as I could to a basement vent near the side entrance gate, but didn't detect anything. The area where the 550 gallon tank was buried had been filled in and was overgrown with weeds. I met Ms. Faloye and she took me to the basement. There were no signs of free product on the floor. There were no oil stains. There were no oil odors. The PID meter registered 0 ppb of vapors. The front sump had only water. I thanked Ms. Faloye for the opportunity to visit the site and left. 8/25/08 - Raphael Ketani. The Final ISR was written for the case and

CHILDRENS ART CARNIVAL (Continued) **S107521874**

submitted to Randall Austin, Chief of the Spill Prevention and Response Unit, for his signature. I talked to Dwayne Monaco of Northeast Environmental (914) 777-1930 regarding the submission of an investigation report for the church. He said that they did only a cleanup of the basement and some oil collection. He said that no report was generated. 9/2/08 - Raphael Ketani. Today I received a FAX from Paul Basso of MILRO. The attached page was a simple form stating that the return line did not hold, but that the supply line was O.K. The date of the test was 1/27/06. Additionally, the last time that oil was collected from the CAC was on 4/11/06. This also appears to be the last time any cleanup took place. 9/4/08 - Raphael Ketani. The FSIR was signed by Randall Austin, Chief of the Spills Unit, and Lou Oliva, Chief Counsel Region 2, and sent to Dennis Farrar in DER, Albany. As there was no oil contamination, nor oil vapors at the site during my visit on 8/22/08, and as the DEC does not intend to do further investigatory work, nor sees the need for further remediation work at the site, I am closing the spill case. "

Remarks: "Material is coming into the basement of the Childrens Art Carnival and is originating from the church next door. The Art Carnival's oil company came and used a powder to control the odor but no clean up has been done. They need DEC's help. Groundwater was affected.... material is mixed with the water from the natural spring there. Unsure of what else they can do for a clean up."

DEC Memo:	"1/10/06 -Austin - Also received complaint from: Cristina Lee, Chairman of Health Committee of Community Board #9 212-883-7600; 212-864-6200 contact her for further background info, as well as Ortiz - end Carnival e-mails: mamudd1@aol.com or mamartin@childrensartcarnival.org FAX: (212) 234-4011 1/11/06 - Raphael Ketani. I tried contacting Mr. Ortiz ((212) 234-4093), but a man answering the phone said he would not be in until 10:30AM. The man said that the church had a fire 2 years ago and hasn't rebuilt or reopened. He passed the phone to a woman who said that they have been trying to find out more information about the oil leaking from the church and she gave me the phone number of Cistine Grit (212) 234-0484. I called the number, but no one picked up. I then called (212) 883-7600 - the law office of Cristina Brooks Lee - but could only leave a message. I called (212) 864-6200 - the Community Board #9 phone 10AM to 5PM - and got a man on the line. He said that I should call Martin Smith (not available until 11AM) at (212) 928-1322, who is the representative of Councilman Robert Jackson. I will make a site visit at 10:45AM today. I made a site visit at 11:15AM. I met Dionis Ortiz, Program Manager, Jose Ortiz, his assistant, and Marlene Martin, executive director of the Children's Art Carnival. I went to the basement and looked at the oil tank, the fill and vent lines, and the boiler. There were no signs of spillage. However, I did see many cracks in the basement floor that looked wet. Mr. Ortiz said that there is a spring below the building and that the water seeps into the floor. The basement has 3 sumps. The front one is next to the front basement wall, the middle one is 16 feet away, and the third one is about 25 feet behind the second one. The second

CHILDRENS ART CARNIVAL (Continued) **S107521874**

and third sumps had only clear water at the level of the floor. The front one had red oil floating on top. There were signs of oil spillage on the basement floor next to the sump. Mr. Ortiz said that when it rained heavily a little while ago, the water level rose and pushed out the oil onto the floor. He said that an oil odor was noticed to be coming from the basement on 1/3/06. He said that Robani Oil was called and they put down some oil absorbent material. I spoke to Robert Pearson of Robani Oil (212) 687-8699, Colonial Park Station, P.O. Box 188, NY, 10039, and he said he didn't think the oil was coming from the property, but he didn't do any system tightness testing. He said that the customer would have to order it and pay for the testing. The PID readings were as follows: over the sump: 11.8ppm breathing area front basement: 4.4ppm breathing area at second sump: 1.4ppm first floor hallway: 1.3ppm children's work room first floor: 570ppb main floor (second floor): 600ppb (light odor) third floor art work room: 650ppb third floor copier room: 750ppb fourth floor front and back: 750ppb Mr. Ortiz told me that the church next door burned two years ago and has never been repaired. He said there is a man (David - later called Patrick) living across the street who is affiliated with the church. Mr. Ortiz knocked on the window, but no one seemed to be home. He said that David told him that the church uses gas and that Con Ed had shut off the gas. Mr. Ortiz said that, after the fire, someone entered the church basement and saw an oil spill. I spoke to Ms. Martin and she said that she didn't have any other church contacts other than Cistine Grit (a.k.a. Ingrid). She called Ms. Grit's number, but didn't get an answer. I looked at the outside of the church. The schedule display panel has Nazareth Deliverance Spiritual Church, Inc., Archbishop C. Clark. The name over the 72 Hamilton Terrace entrance is Church of Nazareth. The church is boarded up and the roof looks to be in bad shape. There were oily odors emanating from a small basement window near the basement door of the church. It is unclear if there is an oil spill in the basement of the church. I called Randall Austin, Chief Spills Engineer Region 2, with the information. He sent Jeff Vought, E.G. 1, over to look at the situation. Mr. Vought arrived at 1:30PM and looked over the situation. He noted 3 suction lines at the foot of the basement stairs. One line was only 3 feet long as it had been cut. No one at the Carnival knew when this happened or if a previous oil spill took place. Though Mr. Ortiz told me that the Carnival has been in the building for 36 years. I saw a short stream of red oil between one of the fuel lines and the wall next to the stairs. A conference call took place between Ms. Martin, Mr. Vought, and Michael Hughes of NYS DOH. Mr. Hughes said that the building should be ventilated and the basement door sealed. Ms. Martin said that she told all the parents about the odors and that all of the parents decided to have their children stay in class. Later, at between 3PM and 4PM, Martin Smith of Councilman Robert Jackson's office and Claudius Wickham of NYCDOH showed up. We went with them and Bruce Tilley of the Neighborhood Organization to the home of Diana Laird and David Zapol at 418 W.144 Street. This is the home which shares a common wall with the church. PID readings in the kitchen were 940ppb. Readings in the corner of the basement where paint and wall finishing material were reached 1300 to 1600ppb. A dirt hole in the basement floor had 2500ppb readings. The front part of the home's basement had 500ppb. Next, Mr. Smith and Mr. Wickham went with us to the Carnival's basement. They both looked at the situation with the oil in the front sump and noted the odors. Then Mr. Wickham measured the

CHILDRENS ART CARNIVAL (Continued) **S107521874**

air in the art work room on the first floor. He noted about 650ppb readings. He said that the odors weren't dangerous, but just a nusiance. He said to ventilate the building. 1/12/06 - Raphael Ketani. I made a followup visit at 3:10PM. Eastmond had finished their cleanup work. The front sump had been vacuumed and the floor had been cleaned. Fans were blowing the air around in the basement. Ms. Martin said that Eastmond didn't arrive until this morning as, otherwise, there would have been high overtime charges to do the work yesterday at night. Eastmond told her that the oil tank will be picked up off of the floor or else the dampness will corrode the bottom and the tank will leak. The odors were not as bad as yesterday. The tank room had about 3ppm, the director's office about 750ppb, and the children's work area on the main floor was about 300ppb - there were no odors on the main floor. However, the oil reappeared in the front sump. Ms. Martin told me that she had made contact with someone from the Church of Nazareth and that this person will let people in saturday morning (1/14). Ms. Martin said that she will let me know what time the church will be opened up. She also said that her company is not going to spend any more money on removing the oil in the sump until DEC finds out whether the oil is coming from somewhere else or from the Carnival. I informed Randall Austin, Chief Spills Engineer Region 2, and Jeff Vought, E.G. 1 Spills, about this and about the return of the oil in the sump and about the levels of the odors today. 1/13/06 - Raphael Ketani. I spoke to Ms. Martin. She said that there are no odors on the main floor. I asked whether she made contact with anyone from the church. She said no one called her and she couldn't get ahold of anyone. I asked whether the front sump was covered. She said it wasn't. I told her to have someone cover it with plastic bags and then use tape to seal the bags to the sump clay pipe. She said she would have someone do it. 1/17/06 - Raphael Ketani. Ms. Martin called me today. She said that the basement had flooded over the weekend because the sump pump didn't work. She said she had water and oil all over the floor. Also, she said that the oil guage on the oil tank is in the red zone. I asked her when was the last time she had a delivery. She said that it was some time ago and no one really keeps track of the level of oil in the tank. She said she called Robani Oil to get a delivery. However, the odors are bad again in the building. I told her to set up the fans. She said there are problems with the electricity in the basement and the fans aren't running. I also told her that Northeast Environmental ((914) 777-1930) showed up at the church on saturday, 1/14/06, and found oil all over the basement. I told her to call them and get them to clean up the oil in her basement. I told her that if they wont do it, then to call Eastmond again and have them clean up the oil as the odors are bad. Jeff Vought, the off hours spill responder for the weekend, came in and gave me the following notes. He said that Northeast Environmental arrived on site at 11:30AM on saturday 1/14. Oil was all over the floor of the Childrens Art Carnival. Northeast collected the oil and water on the basement floor and pumped out the front sump. Northeast then went to the Church of Nazareth and recovered 120 gals. of #2 fuel from the two 275 gallon tanks in their basement. They did 2 borings, one next to the two 275 gal. tanks (ASTs) and one some feet to the west. They end at bedrock and are only 18 deep. Mr. Vought had them leave the borings open. There is a fuel filter in a concrete casing in the floor. From there, a line runs to the boiler. Mr. Vought suggested to me that they either do 2 wells in the corner of the wrought iron fence next to the

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Carnival or an oil recovery pit. The contact at Northeast is Dwayne Monaco (914) 777-1930 or (914) 403-5525 cell. I spoke to Mr. Monaco and he said that he was hired by the church and has no plans to pump out more oil from the Carnival. His techinician noticed a second vent line and a remote fill at the back of the church. He believes that there may be a third tank under the courtyard. I contacted Ingrid at (212) 234-0485, the Church of Nazareth - Archbishop Maxton France (cell (917) 642-8913). She said this was the Archbishop's number and that I can send a letter to 72 Hamilton Terrace, NY 10031. She said they didn't have plans to do anything more regarding the cleanup. I visited the site at 2:50PM. Oil vapors were still noticeable from the church. I entered the Carnival and sensed strong odors on the main floor. There were no activities or children at the day care center. I went to the basement and there was 3 of water there. However, I could not see a sheen. Ms. Martin said that Eastmond could not come and pump out the water as they didn't have a truck available. She said that they will come at 9AM on 1/18. The vapors in the buidling are as follows: basement=10.1ppm first floor art room=2250ppb executive director's office=3400ppb hallway at first floor=6600ppb main floor=2300ppb third floor art room=3000ppb third floor front room=4600 third floor landing=7100ppb fourth floor art room=5600ppb fourth floor front room=4600ppb fourth floor landing=7100ppb I met Mr. Pearson of Robani Oil at the site. He said he wasn't going to deliver oil until the oil spill at the church was cleaned up and not until it was determined that the Carnival's system wasn't leaking. Ms. Martin said that someone from the NYCDOH was supposed to show up to test the air, but I stayed until 3:35PM and he arrived. Ms. Martin said that they were out of oil and so the heat was off. 1/18/06 - Raphael Ketani. I tried to call the Carnival to find out how the water/oil removal in the basement went at 9AM (contractor was Eastmond), but no one answered the phone. Later, I got ahold of Ms. Martin via her cell phone (917) 805-3154. She told me that Eastmond had been at the Carnival at 9AM and had pumped out the basement. She said that the school is still closed. I called up MILRO (516) 379-1500 (FAX (516) 379-4596) and spoke to Paul Basso. I told him that we needed Milro to set up ventilation for the school and pump out the basement. We decided to meet at 10:30AM tomorrow. Kira Leid-King (home(914) 632-0665; cell (914) 879-8126; work FAX (212) 455-2502) called me to explain that the oil wasn't spilled on the floor of the church's basement. However, I told her that Northeast Environmental had been to the church on 1/14/06 and had pumped out 120 gals. from the two 275 gallon tanks. She said that the church hadn't had a delivery in 3 years and that the Fire Dept. had ordered the church to pump out the oil after the fire. She said the tanks never had oil in them. I told her that there was a second vent pipe and a second fill port. I added that there is a gauge for a 550 gal. tank on the wall of the church's basement. I told her that DEC suspects there is a third tank under the courtyard. She said that she had no idea. Finally, I told her that the state would be hiring a contractor to investigate the church's oil spill and tank situation. She said that it's the Carnival's fault, not the church. I asked her what her relationship was to the church. She said that she is sort of the secretary-treasurer and paid for Northeast to do the oil vacuuming. 1/19/06 - Raphael Ketani. A site visit was made by Randall Austin, Chief Spills Engineer Region 2, and myself to monitor the work of MILRO Assocs. Inc. We met Gordon Sandtorv, Operations Supervisor from MILRO, on site. MILRO was already cleaning the floor

CHILDRENS ART CARNIVAL (Continued) **S107521874**

in the basement of the Carnival. Vapors in the basement were about 3000ppb. However, the floor looked very clean. Red oil was again on top of the water in the front sump. Water was seeping through the north wall (opposite the oil tank) of the basement. It didn't have any odor or feel oily. I found out that Robani Oil had delivered 100 gals. and the heat was back on. Patrick Peters (phone (212) 690-0630; son of Archbishop Carlyle Clark) showed up at the Carnival. We asked him to let us into the church basement and he did. We saw the two 275 gals. tanks and one vent line that extended from the second tank. A filter apparatus was in the floor for the oil. The suction line ran through the floor and came up 8 feet away at the furnace. There was a light smell of oil, but no oil was visible on the floor. A gauge was mounted onto the wall above the first tank. Gordon said that it was a petrometer for a third tank. vapor concentrations for 1/19: basement: about 3000ppb directors office: 425ppb first floor art room: initially 1000ppb, then 400ppb main floor: 350ppb third floor: 700ppb back room/ 600ppb front room fourth floor: 400ppb back room/ 1000ppb front room Mr. Austin talked to Mr. Sandtorv and told him that if the Carnival doesn't test the suction line and the return line, then MILRO will have to do it. He added that he wanted MILRO to construct some kind of low flow sump and collection system with an oil/water separator to collect the water and pump it to the city sewer. Then we left. 1/20/06 - Raphael Ketani. I called up Paul Basso and asked him what MILRO was doing to install a sump and oil/water separator. He said that he thought this idea was tentative and that DEC wasn't so sure this is what they wanted. So he hadn't looked into investigating a possible system. I told him DEC DOES want a slow pump system to hold down the water level and collect the oil. I told him that it needs to be installed immediately. He said that such a system that will work with the sump that exists is tricky to find, but he will investigate a possible one now. Paul added that oil samples were sent to Severn Trent today. He said there is a 2 week turnaround. I also told him to put down lots of absorbent pads on the floor around the front sump because rain is expected over the weekend. He said he will have someone do this. I called up Ms. Martin and asked her how things were. She said that the odors were low due to the fans that were going all night and that the basement was free of oil. She said that she will get someone to the Carnival soon to do an entire tank system tightness test. Ms. Martin called me at about 3:15PM today and said that Eastmond had done a system test. They found that the tank leaked pressure and the vent pipe had a wet failure. Otherwise, Eastmond said, the suction, return and fill lines were alright. I told Ms. Martin that the next step was to have the tank cleaned out, removed, and a temporary tank installed. She said she would do that. I told her to have Eastmond put absorbent pads around the front sump to absorb oil when the water level rises again and to hire a company to either dig up the contaminated soil below the basement or to start with soil borings to find the extent of the oil pool. I gave her a list of digging and investigative companies with no recommendation. She said she would pick a company to start work. 1/23/06 - Raphael Ketani. I spoke to Paul of MILRO today and told him to hold off doing more work at the site. He said that his crew had been there this morning and pumped out more oil. I told him that was fine, but to stop work for now. He said he would. I then spoke to Ms. Martin. She said that Eastmond was on site and they were cutting up the tank. She said that MILRO had been on site and had pumped out more oil. Ms. Martin asked for a letter ordering the Carnival to do the tank

CHILDRENS ART CARNIVAL (Continued) **S107521874**

removal and break up the floor of the basement to remove the contaminated soil and water. I told her I would send it. 1/25/06 - Raphael Ketani. I spoke with Marlene by cell phone. She said that this was the best way to reach her now because of the tank removal yesterday. She said that when Eastmond removed the oil, cut up the old tank, and welded the new tank, the vapors were so strong that they chased everyone out of the building. She said that everyone is now working from their respective homes. She said that she thinks the Carnival has found a temporary place to hold their saturday workshops. Ms. Martin said that a temporary tank has been set up in the backyard and Robani is supposed to get things running to provide heat. I told her to open all of the windows again to get more vapors out. She said she will do this and that she will call Eastmond to see what they plan to do and when. I called Eastmond and spoke to Isaac Mungra. He said that his crew removed the tank and saw holes on the opposite side which were 15 inches above the floor. He said that it did not appear that oil leaked onto the floor from the tank or anywhere (according to Rene from his crew who was there). Mr. Mungra said that he didn't feel it was necessary to break up the floor to see whether oil was underneath. I asked him whether Eastmond was going to wash the floor and pump the sump. He said no because he didn't want to take on the large cost. I asked whether Eastmond tested the suction, return, and fill lines. He said no because it was his understanding that Robani was going to replace the lines anyway. He said he was only responsible for cutting up the tank. I called Robani and asked Mr. Pearson whether Robani Oil was going to test the 3 lines. He said no and that he had no plans to. He said that he was just going to supply 2 temporary 275 gal. tanks and get the furnace running again. I asked whether Robani Oil was going to clean the basement floor and suck out the sump. He said no because he didn't want to take on the large cost as the Carnival doesn't have a lot of money. He told me to have Eastmond do it. I called Ms. Martin back and told her the situation with Eastmond and Robani and told her that I would call MILRO, with her permission, and have them come and do the 3 line tests, clean the floor, suck the sump and ventilate the buidling. She said that was alright and to call them. I tried calling Paul Basso, but could only leave a message. Mr. Marvin Edwards (cell (404) 790-2592) called to ask what he should put in the response letter to DEC. I told him to give me a chronology of who performed what service, what events happened, and how the tank failure was discovered and what actions were taken to resolve the matter. He said he would. He added that he is taking over some of the cleanup coordination responsibility from Ms. Martin as she has other work to do. He asked that I coordinate with him. I told him that I was trying to get MILRO to take over the cleanup. He said that would be fine. I made contact with Mr. Basso and told him what the DEC wanted MILRO to do: 3 line tests, ventilate building, clean floor, pump sump daily. He said that MILRO can do all of the work. I asked him when his crew could come out. Mr. Basso said at 1 PM tomorrow. I said that would be alright. I called up Ms. Martin and asked her whether 1PM tomorrow would be alright. She said yes. I then called up Mr. Edwards to let him know when MILRO will be there. He said that 1PM would be good. 1/26/06 - Raphael Ketani. I visited the site today at 12:30PM and met Ms. Martin and Mr. Ortiz. They said that MILRO had already been here at 11:30PM and pumped out the sump. Ms. Martin said that MILRO told her they would be over tomorrow to clean the floor. I looked at the front sump and saw only clear water. There still were odors in the

CHILDRENS ART CARNIVAL (Continued) **S107521874**

building as the floor in the front basement needed washing, though it didn't look oily and smelled only very slightly when I got very close to it. The floor where the tank used to be didn't have cracks or oil stains. There were fans in the basement blowing the vapors out the back entrance. Fans were present on all floors and were blowing the air out the windows. The building was cool inside due to the open windows. Vapor concentrations were as follows: basement front/back: 3500ppb/520ppb first floor director's office/art room: 89/210 main floor: 162 third floor front/back: 200/290 fourth floor front/back: 218/194 1/27/06 - Raphael Ketani. I received a call from Ms. Martin. She said that MILRO tested the 3 lines and the return line failed. She said that they cleaned the floor today, too. Ms. Martin added that the odors are light today. 1/30/06 - Raphael Ketani. I spoke to Paul Basso today. He said that the fill line wasn't tested. I asked him to test this line, also. He said they vacuumed out oil from the front and middle sumps on friday and cleaned the floor. He said that they will be over tomorrow, 1/31, and test the fill line, vacuum again and clean the floor, if necessary. I told him this would be fine. I made a site visit 10:45AM. I met Jose Ortiz who let me check on the odors at each floor and the presence of oil in the sump. The vapor concentrations were: 2,000ppb in the front basement; 750ppb in the back basement; about 250ppb at each floor above the basement. Odors were light on the main floor, but the building is still cool due to a problem with the furnace and the windows are partially open. I met Mr. Pearson on site. He told me that he will replace the suction line and that the return line was not in service even before Robani was the Carnival's oil supplier. I told Mr. Ortiz and Ms. Martin that MILRO will come tomorrow to suck out the sump and do 4 soil borings in the front basement. I told them that there will be 2 borings where the tank used to be, 1 between the tank position and the sump, and 1 on the other side of the sump. They said they understood. I will try to be at the site to watch the soil sampling. Mr. Lindos Lindsay called and left a message that he is scheduled to meet with an environmental company tomorrow at 11AM to discuss what needs to be done and how to go about it. 1/31/06 - Raphael Ketani. I met Gordon of MILRO at the site just as he finished doing the fourth boring - about 11AM. All four borings had been done where I wanted them. Gordon told me that he had soil at each location and that the soil at boring #1 (between the sump and the wall) was the most contaminated. He said that boring #4 at the west end of the former tank area was the cleanest. He said that he will submit the samples for analysis. Oil was still floating and accumulating in the sump. I asked Gordon to call Paul Basso and have a vacuum truck come over and suck out the sump. Gordon said that one will be here today and tomorrow. The crew from Robani Oil began their work right after Gordon was done. They will install 2 275 gal. tanks and replace all of the lines. The vapors in the building were slightly worse than yesterday. I talked to Jose Ortiz and Marvin regarding why the borings were taken and what will happen next. I told them to set up the fans again and to ventilate the building. At 3:30PM I spoke to Gordon of MILRO to find out the details of how the return line was tested. Gordon said that he capped off the line, pumped with a manual push-pull pump until he had 5 lbs. of vacuum and waited half an hour. He said he used soap solution to check all the valves and they were fine. He said the vacuum truck had been there about 1 hour after he left and pumped out a lot of oil. I told him to test the fill line. Gordon said that he believed the line was already removed. I told him

CHILDRENS ART CARNIVAL (Continued) **S107521874**

that if this is true, then I wanted him to do a couple of borings outside the building next to the fill line tomorrow morning. He said he will do it. 2/1/06 - Raphael Ketani. I met Gordon at the Carnival. He did one boring (#5) next to the fill pipe. However, Robani had replaced the old fill pipe with a new one yesterday and had been sloppy by spilling a little oil onto the area when they pulled the pipe. The sample was sandy fill soil and had a slight odor. The PID reading was 500ppb, but Gordon had collected the sample in a plastic bag. This was sand that was used to backfill the upper end of the abandoned coal shute that is infront of the building. I went into the basement and checked the portion of the sand that had spilled into the coal shute. It didn't have an odor. Gordon said that they just sent off the oil samples that were collected. I told him to order the lab to do a fingerprint of the oil. In the basement, Robani had installed two 275 gal. tanks, a new fill line, a new vent pipe, and a plastic coated suction line. The suction line was cemented to the floor and covered with concrete where it met the landing of the stairs to the basement. All of the old lines were removed. The heat was back on and a hot water pipe almost over the back and another one against the opposite wall of the basement were leaking hot water. Part of the floor of the front basement was wet. Some of the wetness extended under the new tanks, but they are on feet above the floor. Red oil is in the front sump, but is transparent enough so that the bottom of the sump can easily be seen. I told Gordon to call Paul Basso and have him send a vac. truck over to pump out the sump. Vapors in the building were: basement: front 1000ppb/ middle 500ppb first floor: front 350ppb/ back 225ppb second (main) floor: 230ppb third floor: front 250ppb/ back 350ppb fourth floor: front and back 300ppb Paul from MILRO called at 3PM and said that he will send the samples to a DEC contract lab for fingerprinting and he will resample soil sample #5 and put it in a jar. 2/2/06 - Raphael Ketani. I received a call from Rick Bayer of Severn Trent Labs regarding the soil samples. He said he will send a copy of the report to MILRO and to DEC. 2/3/06 - Raphael Ketani. I FAXed a copy of the Standby Contractor Authorization Form to Paul Basso of MILRO. 2/6/06 - Raphael Ketani. I visited the site today. Vapors in the building were 3600ppb in the basement, 200ppb in the first floor art room, and 170 ppb in the main floor art work area. However, the heat was off as the plumbers were replacing a couple of hot water pipes. Oil was still in the front sump, but it had turned thinner and brownish in color. Aside from this, Marvin Edwards of the Carnival pointed out black spots from 2 to 14 that had suddenly started to appear on the basement floor. Mr. Edwards said that he first noticed them today. There were about 12 spots and all except for a couple were in the front basement area. I touched some and oil came off onto my hand. The PID detected 6200ppb of vapors. I called MILRO to come over tomorrow to suck out the front sump and try to reduce the amount of oil seeping through the floor. Paul of MILRO said they would do it. 2/7/06 - Raphael Ketani. I tried to find out whether MILRO had pumped out the front sump, but could only leave a voice mail for Marlene Martin. I called up Paul at MILRO and he said his worker was there with the vacuum truck and pumped out 120 gals. of water. 2/8/06 - Raphael Ketani. I called up Mr. Wickham of NYCDOH ((212) 442-3372), but he wasn't in. I reached the receptionist and she said that all inspectors get their work assignments a week in advance and that Mr. Wickham already had a full schedule and could not make it to the CAC. She connected me with Mr. Wickham's supervisor, Inspector Stallbohm.

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Mr. Stallbohm said that someone was out at the CAC on 1/17 and still found unacceptable vapors. He would see what he can do to get someone to the CAC quickly. Mr. Stallbohm called back to say that an inspector went out to the CAC on 2/3 and determined that the vapors had decreased to safe levels for children. He said that Marvin Edwards of the CAC had signed the DOH report to this effect. He added that Mr. Edwards was told the children could come back and that an inspector will make a followup visit on about 2/17. I called up Marvin, but got Jose Ortiz. I told him that the NYCDOH had told me that the children could come back to the CAC. He said that everyone was aware of this, but the boiler broke again and so the children will be staying off-site for a while longer. 2/9/06 - Raphael Ketani. I made a site visit today. The heat was off again as they had many hot water pipe leaks. They are in the process of replacing much of their hot water piping. Oil was still in the top of the front sump, but you could easily see to the bottom of the sump and the oil appeared to be just a sheen. Vapor concentrations were: basement: 1400 to 1500 ppb first floor art room: 200 ppb main floor: 325 ppb third floor: back/front, 325/290 fourth floor: back/front, 380/400 Kira Leid-King, lawyer for the Church of Nazareth, called me yesteday to say that she had hired a title company to do a records search for the third tank. No physical investigations were taking place at the church. 2/14/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that the odors were very slight in the building. I told him I would like to send over a vacuum truck to suck out the oil in the front sump. He said that would be alright. He said that someone will be at the CAC today and tomorrow. I called MILRO and they said they will be over at the CAC on thursday morning. I let Mr. Edwards know and he said someone will be there. 2/16/06 - Raphael Ketani. I spoke to Ms. Martin. She said she knew that MILRO wasn't coming today, but would come tomorrow. I asked her about Robani Oil and how service has been over the years - whether they clean up whatever they release. She said they had no problem with them and that nothing has ever happened. I then asked her whether she had heat today. She said yes and that there was plenty of it since they repaired all of the water pipes. I asked her how the history of the boiler has been. She said that except for now and the pipes, she hasn't had a problem - though it's tempermental. I asked her whether in the past it ever leaked. She said not to her knowledge. I ended the conversation after this. At 3:45PM I received a call from Bill Hunter, insurance adjuster for Utica Insurance ((516) 479-5089). He represents the insurance company for Robani Oil. He said he was trying to go over the information that Robani had given him regarding the oil release to see who had liability. He said the insurance claim number was 1016566. He said that the CAC first called Robani to complain of a loss on 1/6/06. He said Robani came to investigate and found oil 5 feet from the tank, but he said he wasn't sure whether that meant in the sump or on the floor. He asked whether the church was the source. I told him we didn't know yet, but we intend to do an investigation. 2/23/06 - Raphael Ketani. I spoke to Jose Ortiz regarding the conditions at the CAC. He said he did notice a slight odor on the main floor. I asked him to look at the front sump. He called me a little while later and said there was lots of oil in the sump. Then I called MILRO and told Paul of MILRO to send the vacuum truck. He said he would send it tomorrow, friday. Paul told me that DEC should be receiving the first bill soon for the work they have done so far. I let Mr. Ortiz know that MILRO will be over tomorrow. 2/27/06 -

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Raphael Ketani. I visited the CAC today. I met Mr. Edwards. He showed me the front basement area. The door is being kept closed now to confine the odors as much as possible. The room had 1500 ppb of vapors. A thin film of oil was present on the surface of the water in the sump with widely scattered small orange droplets of oil. The floor had lots of Speedi-Dri on it to absorb oil seeping up through the floor as oval stains. Mr. Edwards said that MILRO had been over last friday and had pumped out the sump. The air about the second sump had about 560 ppb vapors. There was a sheen on top of the water, but it did not smell like oil. In the art room on the first floor the vapors were about 500 ppb. The main floor and the third floor both had vapor concentrations of about 450 ppb. Mr. Edwards said that they just had a cleaning crew mop the floors. The air smelled of some kind of vapors of a cleaner. I told Mr. Edwards that I will have MILRO come over sometime this week to pump out the sump again. He said anytime is alright. I received the analytical reports for the 5 soil samples taken at the CAC some weeks ago. Four (4) samples were collected on 1/31/06 in the front basement near the front sump. One (1) sample was taken on 2/2/06 at the fill pipe where it passes below ground. Three (3) of the front basement samples and the fill pipe sample indicate the presence of only #2 oil. One (1) basement sample indicated the presence of #1 oil. However, this oil was also in the blank. 3/1/06 - Raphael Ketani. I spoke to Paul of MILRO today and asked him to vacuum out the front sump this week. He said his truck will be over tomorrow. 3/6/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that MILRO was over on friday and pumped out the sump. He said that odors were definitely noticeable in the front basement, but the door is kept closed. He added that the odors in the rest of the building are slight and that they had classes on saturday with no problems. 3/9/06 - Raphael Ketani. I received a call from Ms. Martin today. She said that some men in plain cars showed up at the church on teusday, 3/7, and began working in the courtyard. She said that they uncovered and opened a tank today. 3/10/06 - Raphael Ketani. I visited the CAC and the church courtyard today. I took pictures of the exposed tank and the sheen floating at the top of the water in the tank. The soil from above the tank didn't have an odor. Next, I visited the CAC. They had fans blowing in the basement. They were blowing from the front sump area to the open back door of the basement. Vapors in the front sump area were about 560 ppb, vapors in the basement sink room where new oil stains showed up were 1100 ppb, the first floor was about 190 ppb, the main floor was 140 ppb, and the third floor was about 200 ppb. I will call MILRO to have the front sump pumped out again. 3/15/06 - Raphael Ketani. I talked to Jose Ortiz of the CAC. He said that MILRO was there on monday to pump out the front sump, but they had to wait for 10 or 15 minutes before they could get into the basement. Mr. Ortiz said that everything was pumped out and the odors are slight throughout the CAC. However, where the oil has been seeping through the floor in the basement sink room, the odors and the staining are getting worse. He said that no work is taking place at the church courtyard next door to investigate the tank and the oil. Kristina Lee (212) 883-7600, Chairman of the Health Committee of Community Board #9, called for an update. She said that she saw the exposed open tank in the church courtyard. I told her that the church brought a bunch of people to the site and they dug up and exposed the tank and then opened the tank. I told her DEC sent a letter ordering the church to continue the remediation by friday, 3/17, or the DEC will send in its own

CHILDRENS ART CARNIVAL (Continued) **S107521874**

contractors. I told her the DEC will send a letter stating that we are taking over the investigation and cleanup if DEC hears or sees nothing happening. I added that we will get a court order to enter the property and then start the work. Ms. Lee said that the congregation meets every sunday at St. James Presbyterian Church. She added that on March 2, the NYC Dept. of Buildings fined the church $10,000 for not repairing the landmark building. SHE ASKED THAT A WELL BE PUT IN BETWEEN THE TANK AND THE NEIGHBOR'S GARDEN WALL AND ASKED THAT SHE BE KEPT INFORMED BY NEXT WEEK. I told her I would. 03/17/06-Thomas-Contract Payment Package-(Severn)- took samples-02/01/06-02/28/06 took sample of sump pit 01/01/06-01/31/06 03/17/06-Thomas_ Contract Payment Package-(Milro)- washed basement floor, took samples, removed pads, washed tank room, took borings, purge sumps (01/19/06-02/24/06). 3/20/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that the odors in the rest of the building are slight. However, the odors in the basement sink room are increasing and more oil staining is showing up in the floor. He said that the fans are ventilating the basement. I told him that I will call MILRO to have them suck up the water and oil from the middle and front sumps. I contacted MIRLO and they said they will be over at 9:30AM to pump out both sumps. 3/22/06 - Raphael Ketani. I FAXed the Standby Contractor Authorization Form to Severn Trent Labs (phone: (845) 562-0890; FAX: (845) 562-0841). 3/23/06 - Raphael Ketani. I received the bills from MILRO today for work done on 3/1 and 3/13/06. 03/24/06 Thomas- Contract Payment Package-(Milro)- vacuumed oil from sump pits, disposed of oil and water (03/03/06-03/13/06). 3/28/06 - Raphael Ketani. I sent a letter to Ms. Martin with the 3/24/06 remediation plan that MILRO had FAXed to me. I received a call from Bill Hunter of Utica Insurance, the insurance company for Robani Oil. This is the second time he called me for information. He wanted to know what the status was with the spill case. I explained to him what was going on at the church courtyard and what DEC wanted to do to eliminate the vapors and contaminated water under the CAC. 4/4/06 - Raphael Ketani. I received a call from Marlene Martin of the CAC on 4/3/06. She wanted to know what the total cost of the cleanup has been so far for the CAC. I told her a close estimate is $8710. She asked what the cost would be for the future/proposed work plan that I had sent her from MILRO. I told her I would find out. I called up Anthony at MILRO and he said he will try to get back to me with an approximate price. 2:30 Anthony Mariano of MILRO FAXed me the rough estimate of what it may cost for all of the construction work that would take place to: break open the concrete floor and suck out the contaminated soil, water and oil, repair the floor, install 2 access wells in the floor, power wash the floor, and paint with two part expoxy paint. The total came to $36,642.95. I informed Ms. Martin about the estimated amount. 3:50PM I sent an e-mailed letter to Lisa Silversmith, the owner of the property on the other side of the CAC. I hadn't heard anything from her in response to the Department's 3/20/06 letter. So I sent her an e-mail to lisasilversmith@yahoo.com. The letter appears below: CONFIDENTIAL New York State Department of Environmental Conservation Division of Environmental Remediation, Region 2 Bureau of Spill Prevention and Response 47-40 21ST Street, Long Island City, NY 11101-5407 Phone: (718) 482-4933 " FAX: (718) 482-4098 Website: www.dec.state.ny.us April 4, 2006 Lisa Silversmith 60 Hamilton Terrace New York, NY 10031 RE: Spill #0511700 Childrens Art Carnival 62 Hamilton Terrace New York, NY Dear Ms. Silversmith: As of April 4, 2006, the New York State Department of Environmental

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Conservation (the Department) has not received a response to its March 20, 2006 letter regarding the property at 60 Hamilton Terrace (see attached below). It is important that the Department make an inspection to the basement of your property. We are aware that a spill had previously taken place at 60 Hamilton Terrace and was subsequently cleaned up and the case closed. The Department would like to determine that there are no impacts from the oil that is presently seeping into the Childrens Art Carnival next door. Temporary groundwater monitoring wells installed in the floor of your basement would help to collect any oil under your property. Please call me at (718) 482-4634 to make arrangements for the site inspection. Sincerely, Raphael Ketani Enigneering Geologist II 4/10/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that due to the rain last thursday, the odors in the sink room have gotten worse. However, he said, the odors in the rest of the basement are fine due to the ventilation and the odors in the building are slight. I told him that I would send over the vacuum truck to suck out more oil and water tomorrow. I told him to have someone at the CAC at 9AM so that MILRO can get in. He said he would do so. I asked him whether Ms. Martin was in. He said no. I called up Paul at MILRO and told him we would need his vac. truck at the CAC tomorrow. He said he would be there. 4/17/06 - Raphael Ketani. I spoke to Mr. Edwards. He said that the situation at the CAC is the same as last week with only slight odors in the occupied parts of the building and stronger odors in the basement. He said there was no flooding. I tried to contact Ms. Martin regarding MILRO's proposal, but could only leave a voice mail message. 4/24/06 - Raphael Ketani. I spoke to Mr. Edwards. He said that there are no changes at the CAC. He said the odors are the same - even in the basement. He said that there was no flooding from the 3 of rain over the weekend. However, the oil staining is slightly more in the basement. 5/15/06 - Raphael Ketani. I received the bills from MILRO for the work done on 3/21/06 and 4/11/06. I signed them and forewarded them for processing. 5/17/06 - Raphael Ketani. I spoke to Mr. Edwards today. He said the odors in the building were still only slight. He said the rains over the past weekend and week haven't caused any recurrence of oil seepage. He said the basement was fine. This case is being transfered today from myself to Jeff Vought in order to consolidate all of the PINS cases under one Spills case manager. 06/06/06-Vought-Received call from Marlene Martin requesting information on possibility of state funding for tank replacement. Marlene also said that basement flooded during past weekends with heavy rains and no free product was noted. 06/06/06-Vought-Complete File Review by Vought: See also spill numbers: 0209311(60 Hamilton Terrace-closed 12/22/05), 0551505(72 Hamilton Terrace-open). Sale of 72 Hamilton Terrace by City of New York to Nazareth Spiritual Church and resulting Deed transfer-4/20/72. Site visit on 1/11/05 by DEC Vought-DEC required: 1)tank testing results 2)notification to NYCDOH 3)installation of ventilation system in basement 4)sealing of sump and washing of basement floor. Vought left message with NYCDOH Nieves, spoke to Mike Hughes(NYSDOH) and decision to close is the call of Marlene Martin. Oil was first noted on 1/3/06 and basement filled with water during times of heavy rains. Three sumps present in basement of Childrens Art Carnival(CAC). Sump closed to Hamilton Terrace contained fresh #2 fuel oil. As per Marlene Martin, she contacted 60 Hamilton Terrace to see if they had spill and no spill was found in the basement and she contacted the Church who noted an oil spill next door at 72 Hamilton

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Terrace. Email from NYSDOH Hughes to NYCDOH Peter Stallbohm with cc to NYCDOH Nieves- How did you inspectors make out at the 64 Hamilton Terrace spill? . Email from NYSDOH Hughes to NYCDOH Stallbohlm and DEC Vought-1/18/06. ...any updates about the Childrens Center in Manhattan? Have they re-opened, cleanup status? . Response from Stalbohlm At 64 Hamilton Terrace, readings of 4-5ppm of VOC was detected. A contractor was contracted to conduct a cleanup yesterday. The center voluntarily closed until so. After cleanup, another visit will be made to check effectiveness of cleanup (possibly today). Email from NYSDOH Hughes to DEC Vought-1/19/06. Peter Stallbohlm, NYCity Health, sent an inspector back to the Children's Center on Tuesday, 1/17. The inspector reported odors are still present... Fuel product still present in basement. The center is still closed and NYCity Health recommends staying closed until the additional clean-up is performed. Would you be able to also make a site visit and recommend some specific actions as well? . Letter from DEC Ketani to Kira-Leid King (Nazareth Deliverance Church NDC)-1/19/06. The New York State Department of Environmental Conservation (the Department) was notified on January 10, 2006 that a petroleum release took place at the above referenced site. Odors were noticed coming from the basement of the church during an inspection of the area on January 11, 2006. Staff from the Department were at the site on January 14, 2006 to observe the removal of No. 2 fuel oil by Northeast Environmental from Nazareth Deliverance Church . (6/6/06-Note that I, jeff Vought was onsite and liquid was recovered from basement when I arrived on-site, I did not observe oil in the basement as the liquid was already recovered). The Department has identified the Nazareth Deliverance Church as a potential responsible party for this release . Letter required submission of an investigative summary report including the investigation of a possible third tank under the church courtyard. The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness . If no reply regarding the investigation is received from the Nazareth Deliverance Church within (5) days of receipt of this letter the Department may proceed with the required work... . Letter from DEC Ketani to CAC Martin-1/19/06. The Department has identified the Childrens Art Carnival as a potentially responsible party for this release . Notification that the Departrment has contracted Milro and will invesigate the source of oil. Upon one of the inspections of the Childrens Art Carnival, staff from the Department noticed a three foot long piece of suction line at the foot of the stairs of the basement. The Department requires that the Childrens Art Carnival immediately conduct a site investigation to determine why the line was replaced, whether there was a release of product and how large the release was, when the suction line was replaced and which company did the replacement work. The Childrens Art Carnival must also hire a contractor to have the suction line and return line (the two 3/4 inch copper lines) pressure tested . Letter from DEC Ketani to CAC Martin-1/23/06. ...the Department was notified on January 20, 2006 that a tank system test was conducted by AL Eastmond & Son, Inc. on this date and that a leak was detected in the tank and vent line. At this time, the Department is ordering the Childrens Art Carnival to repair or replace the tank and the vent pipe, and to hire a contractor to investigate the oil spill and remove all contaminated concrete flooring, soil and rock and all product and contaminated water . Letter from Marlene Martin (CAC) to DEC Ketani-1/27/06. To date we have cooperated with the Department of Environmental

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Conservation on all requests, recommendations and mandates. Enclosed, please find the job tickets for work performed by Eastmond and Sons, Inc. as per your Department's madates and directives. It is our hope that a resolve can be reached as soon as possible and or that the Carnival can be eliminated as the potential source of this release... Enclosed as Eastmonds & Sons job tickets: 1)1/11/06- Removed 50 bags of contamianted soil washed floor, 1 bucket of oil wash, removed 102 gallons of water, pressure washed floor 2)1/18/06- pump out oil and water from floor also wash down used 1x5 gallon can oil wash 3)1/20/06- Test tank, tank failed, wet leak 4)1/23/06- transfer oil to 275. Remove jacket and remove 30 bags of contaminated soil. Job completed 5)1/24/06- Install 275-gallon temporary . Contractor Work Authorization Form for Milro-2/2/06. Email from Landmarks Preservation Comission(LPC 212-669-7921)-John Weiss to DEC Ketani-02/10/06. Under the circumstances you described to me, no permit from the Landmarks Preservation Comission is needed for the NYSDEC contractor to break up the concrete paving in the courtyard next to 72 Hamilton Terrace in order to undertake and emergency remediation project . Because this work is being undertaken to remedy a dangerous condition, pursuant to section 25-312 of the NYC Administrative Code, no LPC permit is needed. No work is to be performed on 72 Hamilton Terrace . Fax from Kira-Leid King(NDC) to DEC Ketani-2/11/06. As discussed, attached please find a search from the fire department indicating that there are only two tanks located at the above-referenced premises. Therefore, there isn't another tank located in the court yard . The Church had a fire four years ago causing the building to be inhabitable . Letter from DEC Ketani to Leid-King (NDC)-2/10/06. ...the Department has not been notified by Lindsay Lindos or other representatives from the Nazareth Deliverance Spiritual Church, that the church will hire a company to conduct a site investigation to determine whether a fuel oil tank is present under the church courtyard. Deadline of 2/18/06 given to investigate the court yard. Email from LPC Weiss to DEC Ketani-2/22/06. I am writing in response to our recent telephone conversation regarding the possibility that the historic wrought iron fence in front of the side yard at 72 Hamilton Terrace may have to be removed in an oil tank has to be removed. Suggestion to take the tank out in pieces to save the fence. If fence has to be removed it also has to be replaced. Letter from DEC Ketani to Lindos Lindsay(NDC) and Kira Leid-King(NDC)-3/10/06. Site visit made by Department on 2/10/06. ...a third fuel tank was observed to be present beneath the courtyard behind the Nazareth Deliverance Church. Department required NDC to perform a soil boring between the foundation wall of the Childrens Art Carnival at 62 Hamilton Terrace and the tank, and taking soil and groundwater samples. Another boring must be installed between the tank and the church. Deadline given for nine days within date of letter (2/19/06) to respond to DEC and resume investigation of tank and soil. STL Analyticals-2/10/06. Sample from CAC sump pit ran for fuel id analysis and showed 920000ppb #2 fuel oil. Fuel oil sampled by Milro. STL Analyticals-2/17/06. Sample from CAC outside by fill #5 @1'. Sample analysis performed for TPH310.3 shows oil parameters below method detection limits. STL Analyticals-2/17/05. Four sample from CAC front basement area near sump. . Sample analysis performed for TPH310.3. Soil analyticals show all below method detection limit except for 7400ppm #2 fuel oil(SB#2 @ 1'), 110ppm #2 fuel oil(SB#3 @1'). Letter from DEC Ketani to NDC Lindsay and NDC Leid-King-3/20/06. On March 20, 2006 the New York State Department of

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Environmental Conservation (the Department) made a site visit to the above listed property. No work appeared to have taken place to investigate the tank or the surrounding soil since the last site visit that took place on March 10, 2006 . Letter requiring investigation. Due date of 4/5/06 for the work to resume. Letter from DEC Ketani to Lisa Silversmith-03/20/06. We would like to install two(2) wells in the groundwater beneath the basement of your home. These wells will be constructed and sampled by out contractor. Contractor Work Authorization for STL-3/21/06. Fax from Milro to DEC Ketani-3/24/06. Milro proposes the following scope of work to address the oil spill cleanup: 1)Saw cutting of concrete slab in the basement and excavation of contaminated soil 2)disposal at a licensed disposal facility 3)recover of product using a vaccum truck if contaminated groundwater is encountered 4)collection of endpoint samples from excavation 5)restoration of the concrete slab 6)pressure washing of basement and epoxy application. Letter from DEC Ketani to CAC Martin-3/28/06. ...(the Department) is presently looking into other methods of controlling and preventing the petroleum vapors from entering Childrens Art Carnival . Milo remediation plan has been enclosed for Martin's review. Cost Estimate (Milro-Moriano)-4/4/02. Cost estimate for basement excavation and replacement. Site visit by DEC Vought during endpoint sampling of tank in couryard-5/11/06. Sampling performed by USA Environmental (Cristin Ciaburri 718-981-5710). Onsite was Keith Bartley(USA). Pumped out wate from 550-gallon UST in courtyard. No product in UST, just sheen and water. Three soil samples were collected (one through bottom of tank, one below fill line and one below supply/return line). No odors or staining observed in all of the soil samples. Site visit performed to CAC and no odors in basement and no free product in sump. Some oil staining showing up on floor from underlying groundwater. One sample also collected for analyiss from NDC basement floor. Vought spoke to USA Ciaburri and DEC will receive report by 6/12/06. DEC tentative requirements: 60 HAMILTON TERRACE: 1)followup to see if any recent spills 72 HAMILTON TERRACE 1)results of basement borings by 275-gallon ASTs 2)submittal of documentation of 1/14/06 clean up by Northeast 3)notification to Bishop France of requirements 4)backfilling of UST excavation in courtyard 5) The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness as per 1/19/06 letter 6)backfilling of NDC excavation to prevent continued groundwater infiltration into CAC 62 HAMILTON TERRACE: 1)continued monitoring of sump 2)call back to Martin regarding possibility of use of Spill funds for AST replacement and likelihood of NYSOAG cost recovery against Art Carnival 2)submission of tank test results from Eastmond and Sons of AST in CAC as per requirement on 1/19/06 letter 4)borings at tank location for 8260/8270 5)Milro boring logs and site plan from 2/17/06 analyticals 6)implemenation of Randy's workplan(installation of monitoring wells at CAC and basement excavation) from Milro 7)sealing of basement floor 8)borings by UST, sump and and fill port 9)Summary of description of cleanup activities by AL Eastmond including source of 30 bags of soil removed during tank removal and description of removed tank. 06/15/06-Vought-Spoke with Marlene Martin who inquired about status of spill. Martin stated that there were no odors in the school to date. Vought drafted letter with above requirements to both parties and cc'd Northeast, Marlene Martin (Art Carnival), Cristine Brooks Lee(Comm Bd 9), Martin Smith(Councilman Robert Jackson), LPC and USA, Eastmond. DEC Vought to call Milro regarding: 1)boring logs

CHILDRENS ART CARNIVAL (Continued) **S107521874**

and site plan for borings on 2/17/06 and installation of new borings in floor or school. DEC Vought to call Martin regaring: 1)non use of Spill Funds for AST replacement as per NYSOAG Buss 2)further soil and groundwater investigation by the DEC. 06/19/06-Vought-Called Martin(212-234-4093), faxed her copy of requirement letter and letter to NDC and left message informing her her that there was no way for Spill Fund to pay for CAC tank replacement and to dicuss letter sent on 6/15/06. Vought called Lindos Lindsay (347-228-8039) for fax number and to inform him of outstanding requirements. Vought faxed him copy of requirement letter to 72 and 62 Hamilton Terrace. Lindsay requested that letter be transmitted via mail only and be sent to: Lindos Lindsay 163 Myrtle Avenue Brooklyn, NY 11201 Vought sent letter to above address. Vought called Christine Lee (Comm. Bd. 9 212-883-7600) and she requested correspondence via mail only. Vought sent info to: Christina Lee 48 Hamilton Terrace New York, NY 10031. Vought called and spoke to Martin Smith (ph 212-234-0551 fax 212-234-0552) for fax number and to explain requirements. Vought faxed Smith copy of requirement letters for 60, 62 and 72 Hamilton Terrace. Vought called John Weiss (Landmarks Preservation 212-669-7921) for fax number and to explain requirements. Vought left message to return call. Vought called and left message with Christin Ciaburri (USA 718-951-5710) for fax number and to explain requirements. Vought called Renee Lewis (AL Eastmond 718-378-3000 fax 718-378-4560) and he was not in office. Vought faxed him copy of letters to 62 and 72 Hamilton Terrace. Vought called Bob Rafferty(NYSDOH 518-402-7800 fax 518-402-7819) for fax number and to explain requirements. Vought faxed Rafferty copy of requirements. Vought faxed NYCDOH Nieves copy of requirements for 60, 62 and 72 Hamilton Terrace. Vought called Dwayne Monaco(Northeast 914-777-1930 fax 914-777-1928) for fax number and to explain requirements. Vought faxed Monaco copy of requirements. Vought received call from Monaco and returned call and spoke to Monaco and no analyticals were performed and Monaco will send in pictures. Monaco did say his men saw oil on the floor. Monaco will submit report and pictures to DEC. 06/27/06-Vought-Received call from Marvin Edwards (212-234-4093) requesting letter with amount spent to date on PIN (8713.53 as per UIS). Vought returned call and left messge explaining that DEC will not provide the letter as amount may increase and Vought willing to call insurance directly. 06/28/06-Vought-Received call from Marvin Edwards and they filed claim with general liability insurance. Their claim representative asked for further costs. Claim may file under third party liability portion of coverage. Marvin will contact insurance and arrange conference call with DEC. 07/12/06-Vought-Received message from Martin and returned call and spoke to Martin. Martin will be faxing in tightness test results and approved installation of additional borings. Martin will seal the basement floor upon no occurrence of product in the sump during monitoring period. 4/23/07-Vought-Reviewed above notes and both CAC and 72 Hamilton Ave are potential sources, CAC due to failed tank test and 72 Hamilton due to presence of oil spill during cleanup by Northeast Environmental. Both parties listed as potentially responsible and site visit scheduled with Martin for this week to confirm no further impact and close spill. Vought called Martin. Martin had not seen oil in recent months and site visit scheduled tomorrow at 10am. Vought also reviewed documentation and photos submitted by Northast dated 6/27/06. On January 14th, 2006 Northeast mobilized a crew and equipment to 72 Hamilton Terrace were

CHILDRENS ART CARNIVAL (Continued) **S107521874**

technicians conducted a clean up of #2 fuel oil from the tank and boiler room of the building . Absorbent material was applied to the boiler room floor where puddles of standing fuel oil was observed... . No tank test results for 72 Hamilton included. Vought also received copy of failing test results for CAC which show Ullage (dry portion leak) from Eastmond and Sons dated 1/20/06. 4/24/07-Vought-Site visit by Vought and Marlene Martin not present at site due to emergency. Vought performed site visit with super and no product or olfactory odor of groundwater noted in sump, no staining noted in concrete at former tank location or fill location, product stains noted on floor towards 72 Hamilton but as per super they were present for long time. No product in other sumps of CAC. Vought discussed with DEC Austin including possible groundwater sample at 72 Hamilton Avenue and investigation whether a former spill occurred at Daycare center by mechanics. 72 Hamilton Avenue boarded with no signs of development. Tank in courtyard excavation was backfilled. 07/25/08-Vought-Spill reassigned from DEC Vought to DEC Ketani as per DEC Austin. 8/21/08 - Raphael Ketani. I called up Paul Basso of MILRO Associates (516) 379-1500. I asked him to send DEC a copy of the report from about 1/27/06 whereby the return line for the fuel system at the CAC was tested and it failed. He said he will look for it. I called up the CAC and asked for Ms. Martin (212) 234-4093, but the receptionist told me that she wont be back until September. I asked for Marvin Edwards, but she told me that he didn't work here anymore. I was transfered to Fatima Faloye, the Operations Manager. I asked Ms. Faloye whether I could make an inspection at 11:30AM tomorrow. She said that would be alright. 8/22/08 - Raphael Ketani. I made the scheduled site visit. The church next door was completely boarded up. It appeared that no work had taken place, since early 2006 when I first visited the site, to restore the church. There were no petroleum odors coming from the basement vent. I put the PID meter as close as I could to a basement vent near the side entrance gate, but didn't detect anything. The area where the 550 gallon tank was buried had been filled in and was overgrown with weeds. I met Ms. Faloye and she took me to the basement. There were no signs of free product on the floor. There were no oil stains. There were no oil odors. The PID meter registered 0 ppb of vapors. The front sump had only water. I thanked Ms. Faloye for the opportunity to visit the site and left. 8/25/08 - Raphael Ketani. The Final ISR was written for the case and submitted to Randall Austin, Chief of the Spill Prevention and Response Unit, for his signature. I talked to Dwayne Monaco of Northeast Environmental (914) 777-1930 regarding the submission of an investigation report for the church. He said that they did only a cleanup of the basement and some oil collection. He said that no report was generated. 9/2/08 - Raphael Ketani. Today I received a FAX from Paul Basso of MILRO. The attached page was a simple form stating that the return line did not hold, but that the supply line was O.K. The date of the test was 1/27/06. Additionally, the last time that oil was collected from the CAC was on 4/11/06. This also appears to be the last time any cleanup took place. 9/4/08 - Raphael Ketani. The FSIR was signed by Randall Austin, Chief of the Spills Unit, and Lou Oliva, Chief Counsel Region 2, and sent to Dennis Farrar in DER, Albany. As there was no oil contamination, nor oil vapors at the site during my visit on 8/22/08, and as the DEC does not intend to do further investigatory work, nor sees the need for further remediation work at the site, I am closing the spill case. "

Remarks: "Material is coming into the basement of the Childrens Art Carnival

CHILDRENS ART CARNIVAL (Continued) **S107521874**

and is originating from the church next door. The Art Carnival's oil company came and used a powder to control the odor but no clean up has been done. They need DEC's help. Groundwater was affected.... material is mixed with the water from the natural spring there. Unsure of what else they can do for a clean up."

DEC Memo:	"10/28/13-Zhune called Mattew Carol from Pennnen Environmental 646-606-2332. could not get him. Left message to call back. 10/31/13- Mattew Carrol called. he said due to deligence they did soil borings and soil vapor. They terminated most of the borings at 2' due to shallow bedrock. They found no indication of groundwater or perched water. They found what they belive is perched water at 11' in borings located northeast (PID 1000 ppm, gasoline odor). They are waiting for the analytical results. They are working for potential purchaser. 11/20/2013-Pete Lakatos from TERMS Emvironmental Services Inc. sent the following email\\ I am representing Mr. Abe Caller the owner of the site.. I provided our contact information below (we have worked together in the past on another project) We are in the process of scheduling and performing an environmental remediation for Spill No. 1307746 at 655 Saint Nicholas Avenue NY Block 2050, Lot 149. Evidence of a petroleum release was observed in the northeast corner of the property. The impact has been delineated to the south, west and north; Benzene was detected at a concentration of 0.19 ppm, above the Unrestricted Use SCO of 0.06 ppm. Total xylenes were detected at a concentration of 2.22 ppm, above the Unrestricted Use SCO of 0.26 ppm. No groundwater was encountered Although several compounds were detected in the soil vapor samples collected at the Site. No compounds were detected above the NYSDOH AGVs. No compounds were detected that are also associated with an NYSDOH matrix. TERMS proposed services for addressing this localized impact include performing an at peril remediation. We assume that an excavation of approximately 15 x 15 x 4 in depth will be required and generate approximately 50 tons. All the contaminated soil encountered during these activities will require offsite disposal. End point post excavation samples will be collected and analyzed to verify the success of the remediation. A RAR report will be prepared and submitted to the NYDEC for NFA approval. Pete Lakatos TERMS Environmental Services, Inc Office 908-464-0028 Fax 800-459-8488 E mail plakatos@termsconsulting.com 2/10/14- The Remedial Action Report was received and reviewed. The RAR was sent by Terms Environmental dated 2/10/14. 3/7/14- In a DEC letter dated 3/7/14, the Department required the following requirements: 1. Submission of surounding areasite map and former/current location of any USTs, piping, remote fill ports and the dispensers islands 2. Installation of soil boring

FORMER GAS STATION (Continued) **S114561120**

at all remote fill port. 3. Submission of vapor and moisture mitigation techniques to be used in site development. 4. Collection of soil samples along piping run 5. Submission of development plan for the site. As per Jeff we will wait for submission of develpoment plan for the site, if excavation extent to bedrock or to a determine depth then we will require endpoint soil samples. Based on the endpoint results we may require the installation of a bedrock well for groundwater investigation. About confirmatory air samples we will wait untill they send the imformation for active or passive SSDS. 4/24/14-Vought-Zhune of out office on extended vacation. Received call and email from Pete Lakatos (Terms). Email contained followiing string: Email from Lakatos to DEC Zhune-4/1/14. Email that Hi Veronica, Mr. Caller (the owner of the property) forwarded the attached March 7 letter you had sent to (TERMS) and the prospective purchaser (Harlem School of Arts) and their environmental consultant (Tennen). Based on the location of the fill port and piping run located by GPR in the sidewalk and depicted in attached photo, the proposed 4 sample locations were agreed upon by all parties and based on the sampling requirements contained within your letter. These are well within the 20ft distance and biased toward pipe joints/elbows and at fill port. We are proposing 1 additional sample where the GPR could not locate any piping located on site and where piping may have existed. Previous samples S1, S2, SB,5 S3, S4, SB7 and S5 and analysis collected by both TERMS and Tenen did not detect any petroleum contamination in the area which may have contained former piping and would satisfy the 20ft pipe sample requirements contained within the March 7 letter. An attached figure has been proved for your review and approval. We have called in a mark out and should be onsite in about a week to perform the investigation based on your requirements, approval or suggestions. Therefore we are asking for an extension on the April 7 report submission. Upon receiving results (2weeks) we are requesting a May 7 2013 submittal report date. I addition, If the results reveal no impacts, Mr. Caller has asked me to inquire if letter could be issued stating no further action/ investigation for SPILL 1307746. The remaining requirements contained within the letter (Vapor mitigation plans and site plans) will be submitted at a later date. Please note that the development of a school is only a proposed plan at this time, and future use is subject to change. Again thank you for your time and assistance. Please feel free to contact me if you require any additional information before we proceed. Email from Lakatos to Vought-4/3/14. Email that Hi Jeff, Veronica's email stated that she would be out of the office And she let your email for a contact. If you remember we had discussed this case a couple of weeks ago and I am requesting an extension date for the report and a review/approval of the plan so that we are in compliance. Please let me know if there are any concerns. Thank you for your time and assistance. Pete Email from Lakatos to Vought-4/8/14. Email that Hi Jeff, Just to inform you that we are planning to be onsite later this week. To perform the investigation as previously described. 4/24/14-Vought-Sent email to Terms (Lakatos) that My apologies on the delay of response to your below emails. The Department has no objection to extending the due date of the report. When do you think we can expect it? With respect to your note below that In addition If the results reveal no impacts, Mr. Caller has asked me to inquire if letter could be issued stating no further action/ investigation for SPILL 1307746. The remaining requirements contained within the letter (Vapor mitigation plans and

FORMER GAS STATION (Continued) **S114561120**

site plans) will be submitted at a later date. Please note that the development of a school is only a proposed plan at this time, and future use is subject to change. The Department when notified of a possible development of a site with a potential sensitive receptor must err on the side of caution. As such if the development plans are known at the time when the Report is submitted, submission of documentation of vapor mitigation efforts will be required. If the development plans are not known at the time of submittal than closure may be granted and a clause included in the closure letter that vapor mitigation efforts must be installed, if the property is developed. Please stress to the owner, however, that if the site is going to be developed a school, then it is in their best interest to follow up on vapor mitigation. If vapors were to arise after the school is constructed, not only would it be a media issue but also possibly an evacuation issue as well as involving local politicians. DEC would then hold both the spiller (current property owner) AND the school responsible for the cleanup, which could be that much more costly after the site is occupied and developed. Unfortunately as you know just because the property owner sells the property with a closed case, their potential liability if an issue (including vapors) was to arise, remains. Thanks. Abe Caller 917-578-7434"

Remarks: "Gas odor in soil discovered in boring. No groundwater affected."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 12/11/2002-Vought-Called Ugene Martin and left message to call Demeo or Vought. Also called Dr. Eli N. Avila (917-848-4889) who is owner of property along with Banco Popular and according to Mr. Avila on 4/9/99 there was a large oil spill in basement by Robani Oil and Crystal Oil (subcontractor). According to Dr. Avila: Robani Oil's president (Mr. Robert Pearson-owner) came to site and told Avila that delivery could not be performed due to crack in whistle and that he would have to fix whistle. Mr. Avila told Mr. Pearson to fix whistle. Pearson came to site and replaced fill pipe instead of whistle. As a result basement was filled during delivery event. Robani was called and performed site visit. Free product was removed and sorbent was placed down. Odors still persist till this day. Mr. Avila called hotline in 4/99 and spoke to a Mr. Greene who referred him to DEP. DEP performed site vist and fined Mr. Robani for discharge to sewer. Mr. Avila is currently going to court for damages. Dr. Martin came and performed soil borings and sent soil samples for analysis. 12/17/2002-Vought-Site visit by Vought. Visual inspection of basement shows oil stains 2 above grade on drywall. Weathered fuel oil odors

MR. AVILA (Continued) **S106009941**

present in basement. One 1'x 1' excavation with water at depth of 6 . No odor or sheen to water. On-site were Dr. Avila and Eugene Martin (consultant). According to Dr. Avila: 1) his lawyer will send him a copy of affadavit regarding admission of liability against Crystal and Robani oil companies 2) Robani/Crystal performed four soil borings in 4/02 3) Eugene Martin (consultant hired by Dr. Avila) performed four soil borings in 5/02. 4) no one is currently living in residence due to odors. NYSDEC requested of Dr. Avila: 1) Boring site plan and analyticals 2) affadavit from judge and all other documents regarding court decisions 3) copy of delivery receipt. NYSDEC inspected neighboring properties at 58 Hamilton Terrace (Troy White 212-694-0445) and Childrens Art Carnival at 62 Hamilton Terrace (Marline Martin 212-234-4093) and found no detectable odors or petroleum impacts. 12/20/02-Vought-Received boring site plan from Martin Geochemistry. 12/23/2002-Vought-Received affadavit, delivery receipt and analyticals from Dr. Avila. 1/8/2003-Vought-Review of documents provided by Dr. Avila. Vought spoke with Randall Austin who directed Vought to 1) investigate the call made to Mr. Greene at spills hotline on 4/9/99 and 2) foward file to David Rubinton (NYSDEC legal for review). Vought called Avila and left him message of directive. 1/8/2003-Vought-Vought instructed by Rubinton to contact RP to give them opportunity to clean spill. Vought called Robani Oil 212-687-8699 and left message for Mr. Pearson to call NYSDEC. Vought called Crystal Transportation 718-828-3100 and spoke with Mr. Frank Rizzo who said that message would be passed on to company owners. Mr. Rizzo could not say whether NYSDEC would receive a call back from Crystal and that further inquiries should be fowarded to Robani. 1/8/2003-Vought-Spoke with Robert Pearson who will turn call over to Chris Foley (attorney). Mr. Pearson stated that Robani will not institute remedial acivities due to possiblity of previous spills at Site. Vought also spoke with Rubinton who said to fill out case initiation form and send it to Region 2 legal. 1/9/2003-Vought-Gave case intiation form to David Rubinton (Region 2-legal). Vought spoke with supervisor Rommel who instructed to send do work letters to both oil companies and respective lawyers. Vought called Dr. Avila and informed him of case intiation and sending of do work order to Crystal, Robani and respective lawyers. Do work letters sent by Vought on 1/9/2003. 1/10/2003-Vought-Received letter fom Foley stating they were interested in discussing and potentially resolving issues of 1/9/2003 do work letter. 1/13/2003-Vought-Received fax from Chirstopher Foley (representing Robani Energy) who stated that after he spoke with representation of Crystal Transportation a contractor would be called to perform remediation. Vought recevied call from Brian Campbell (Vertex Engineering 781-952-6047) stating that he was called by Foley and was requesting list of contractors. Campbell will supervise contractors. Vought faxed list on 1/13/2003 and also suggested to Campbell that he contact Eugene Martin. Campbell will call back NYSDEC with contractor decision. Vought also gave Campbell names and contacts at NY State Dept of Health to certify reoccupation. 1/13/2003-Vought-Received message from Matt Spears (Kressner 718-584-8484) representing Dr. Avila requesting FOIL information. Vought called and left Spears message. Vought also received message from Eric Slessinger (Caroll & Mcnulty-212-868-9090x405) reresenting Crystal Transportation. Vought called Slessinger and left message to call NYSDEC. 1/14/2003-Vought-Received message from Spears requesting foil information. Vought called Spears and suggested postponing FOIL

MR. AVILA (Continued) **S106009941**

request until decision arrives from Foley and Robani Energy. Vought told Spears to call 1/21 for updates (after due date on Do Work letter) sent 1/9/2003. 1/15/2003-Vought-Received message from Eric Slessinger. Vought called Slessinger who received letter and said that he will call Rubinton to discuss legal issues. Slessinger stated that it would be difficult to obtain contactor by due date on Due Work letter because they were looking to seek action against other oil companies which delivered to Site before spill event. Vought will contact Rubinton before PIN job is opened. 1/17/2003-Vought-Received message from Foley. Vought called Foley and left message. Foley returned call who was in court on 1/16. According to Judge Marcy Friedman Robani/Crystal will have time before trial to clean spill. Trial is scheduled for 3/24/2003. Foley has called Miller and Milro and scheduled a possible site visit for Wed 2/22/2003. Vought called Avila and notified him of possible site visit date. Vought will call Kressner to facilitate site visit. 1/21/2003-Vought-Spoke to Foley and contractors will be Milro and Brookside. Will attempt to arrange site for tommorrow (212-363-1300) despite lack of response from Kressner or Avila. Vought called Kressner to facilitate visit and left message to return call to NYSDEC. Vought spoke with Kressner and site visit is arranged for tomorrow. Kressner left message for Foley approving of site visit. 2/4/2003-Vought- Spoke with Dr. Martin performed test bore under 58 Hamilton on 1/29/03 and found PID reading of 5ppm. Sample will be sent for analysis and will fax me analyticals. Vought called Foley (212-363-1300) for update on contractors and left message to call Vought back. Vought called Kressner and he is skeptical of results and does not believe in state supervision. Vought called Dr. Avila. According to Dr. Avila three consulting companies performed a site visit and no proposals were submitted. Vought will attempt to arrange meeting between Kressner, Foley, RObani, Avila, DOH, Landmarks, Martin to prevent PIN project from being opened. Vought arranged meeting for 2/27/2003. 2/5/2003-Vought-Received letter from Foley asking if DEC was instructing them to refrain from proceeding with remediation until 2/27/2003 meeting. 2/7/2003-Vought-Letter sent by NYSDEC (Rubinton) to Kressner stating that failure of Avila to take actions to address petroleum discharges would subject Avila to liabilities as a responsible party. 2/11/2003-Vought-NYSDEC sent letter to Foley that pre-hearing conference for 2/19 is adjourned due to scheduled 2/27 meeting. 2/20/2003-Vought-Work proposals submitted by Brookside Environmental (environmental consultant) and H2M (structural engineer). 2/26/2003-Vought-Send work proposal review letter to Brookside and all involved parties requiring STARS 8260/8270 analyes, collection of endpoint samples, description of sampling methods, scaled Site plan and concrete encapsulation. 2/27/2003-Vought-Meeting at NYSDEC with Kressner,Foley , Stapleton, Landmarks, NYC Dept. of Heath, Martin, Robani. Meeting. All parties agreed that a structual engineer report will be produced by Vertex engineering (Scott Hamarich 631-758-1580). Vertex will be supervising Brookside. Engineer report will be sent to Landmarks and then to Dept. of Buildings for approval who will review report by 3/21. Copies of report will also be sent to DEC and Kressner. Brookside will also produce addendum to scope of work incorporating NYSDEC 2/26 proposal review letter comments. 3/7/2003-Vought-Received proposal from H2M (Michael McKeown-631-756-8000) who is structural engineer hired by Robani. Proposal approves basement excavation and aslo said that boring was performed by H2M and bedrock is at 2.5'. Vought sent

MR. AVILA (Continued) **S106009941**

letter to Dr. Martin requesting all previous boring logs, sample analyticals and sample depths. 3/18/2003-Vought-Spoke with Brian Stapleton submitted report to Kressner on 3/10. Stapleton has not yet received response from Kressner. Vought told Stapleton that Landmarks and DOB approval of structural report and final draft workplan to NYSDEC were needed as stated in meeting. 4/30/2003-Vought-Spoke with Dr. Avila who inquired about next step for remedial action despite private lawsuit between Avila and Oil companies. Vought told Avila to call Rubinton because Rubinton told Vought not to take any action until Rubinton gave approval. 12/10/03 - AUSTIN - PROJECT TRANSFERRED FROM VOUGHT TO SAWYER - END 12/2/04 - Sawyer - Received work proposal on 10/21 from Vinny at Island Environmental Tank. 1/6/05 - Sawyer - Talked to Melanie at Island Environmental Tank and answered her questions about offsite contamination. The subsurface investigation and delineation will encompass all areas associated with the spill. 5/31/05 - reassigned to Vought by Koon Tang since DEE needs technical support for enforcement action, and Chris Sawyer has just left the Department. - KST 9/12/05 - Obligado - Site transferred from Vought to Obligado. 12/22/05 - Obligado - Meeting with Jeff Vought and John Urda. Recommends closure based on no odors detected in last site wisit. NFA with Koon's approval. "

Remarks: "CALLER STATES THAT THE TANK WAS OVERFILLED CALLER ALSO STATES THAT THE PROPERTY OWNER HAD TRIED TO REPORT THIS BUT WAS UNABLE TO DO SO FOR SOME REASON ALL DETAILS IN A COURT ACTION THAT HAS BEEN UNDERWAY LAWYER FOR RESIDENT IS MARK KRESSNER 718-584-8484"

FORMER MERIT/FORMER HESS STATION (Continued) **S118952119**

historic details of closed Spill #9212043. As requested, attached are copies of the documents associated with the historic Spill that supported DEC closure, as well as a copy of the NFA letter. The documents provided include: 1995 UST Closure Report prepared by GES, 700 tons of soil was removed from the site during the project. 1996 Site Assessment Report prepared by GES summarizing installation of four monitoring wells (MW-1 through 4). 1998 Remedial Investigation Report prepared by GES summarizing a 1996 GeoProbe investigation and slug test. 2004 1st Quarter Update Report prepared by EnviroTrac. April 22, 2004 No Further Action Letter. The property is being sold to an adjacent property owner who has interest in the air rights. Based on recent conversations with the buyer there is no current plans for site development. However, if development occurs the future use of the property is restricted to allow industrial/commercial use, limit residential use to upper floors and require a vapor barrier/vapor mitigation system be installed for residential use. The specific language in the sale agreement restricting property use is provided below. The use of the Property shall be restricted solely to (i) industrial/commercial use within any portion of the improvements located at the Property, and (ii) to the extent permitted by applicable zoning, residential use on and above the second floor of any improvements located at the Property; provided that any residential use at the Property shall be further conditioned on the installation and maintenance of a vapor barrier and vapor mitigation system at the Property. The installation and/or existence of potable wells on the Property is prohibited. The groundwater underneath the Property shall not be used for any purpose whatsoever. This restriction, however, does not prohibit the installation or use of any compliance wells, or any groundwater monitoring, recovery or extraction wells or similar devices, used for or related to the performance of any Corrective Action. The recent tank removal and corresponding closure sampling do not indicate the presence of a new spill condition associated with this tank system. With the exception of a small area of petroleum impacted soil near the remote fill, which was fully removed through excavation, field observations made during the tank removal did not identify any petroleum impacted soil surrounding the tanks. The impacted soil within the area of the tank field was identified three feet below the tanks under a two foot thick concrete pad (tank anchor). The pea gravel and concrete below the tanks showed no evidence of petroleum impacts. As shown on Figure 2 of the attached 1998 RIR, the former tank system that was removed in 1994 was located immediately adjacent to the recently removed tanks. Based on this information, the conditions identified beneath the tank anchor do not represent a new Spill condition and appear to be associated with Spill #9212043. In addition, all soil VOC concentrations were detected below Part 375 Restricted Use Soil Cleanup Objectives (Commercial) and the future use will be restricted as detailed above. Speedway requests DEC closure for Spill #1606459, as this is a re-reporting of closed Spill #9212043. Again, we appreciate the DEC s timely review of the information provided as it will greatly assist us in finalizing the property transaction, as the sale is scheduled for the very near future. Feel free to contact Ed Russo at EnviroTrac or myself if you have any questions. 12/6/16-Vought-Reviewed email above with attachments including reports from closed spill 9121043. Reports for that spill document the following: Soil contamination up to 145,800ppb Total BTEX that was left in place after a tank upgrade around 1/95; Soil

FORMER MERIT/FORMER HESS STATION (Continued) **S118952119**

contamination left in place around the dispenser islands up to 21,870ppb Total BTEX; Soil contamination around the former waste oil UST left in place up to 139ppb Total BTEX; Removal of 701 tons of contaminated soil during this upgrade; Groundwater at depths of 12-15'bg; measured groundwater flow to the southeast; attenuation of groundwater samples (including those down-gradient of former tanks, dispensers, waste oil tanks) from 9/94 through 1/04; groundwater levels in 1/04 that were within natural attenuation ranges as per prior guidance from DEC Central office; no sensitive down-gradient receptors (commercial grocery store down-gradient with basement likely above water table). This spill closed as this spill was for discovery of contaminated soils around the former UST pad (already historically documented via closed spill 9212043) and contaminated soils around remote fill port (which were excavated fully to below Unrestricted SCOs) as per Speedway. Spill also closed as down-gradient impact of spills previously documented under spill 9212043 to be naturally attenuating and spill is not a threat to the wider community as per guidance from DEC Central Office. Spill also closed and soil contamination removal not feasible as per CP-51 Guidance and prior guidance from DEC Central Office. Furthermore site also has a sale agreement restriction to only commercial industrial use on ground floors and notes a vapor barrier/mitigation system will be installed if the property is ever developed as residential. Spill also closed as Spill Closure letter to include standard cautionary statement on possible necessity of vapor mitigation if site use ever changes. Spill also closed as all source USTs and piping are no longer being used and as such no petroleum source remains. Vought added summary site plans to D2. Vought sent email to Speedway (Butler) with cc to Envirotrac (Rennnie and Russo) that Matt, Thanks for your patience on the review. Unfortunately Veronica has not been feeling well and has been out of the office for the past week. Due to the impending property transaction, I have reviewed the files you sent as well as the current data, and the Department has closed the above referenced spill effective today. What is the address for the Spill Closure letter? Thanks . 12/6/16-Vought-Received reply from Butler that Jeff, Thanks for the review, I understand you guys have heavy case loads. Please send the NFA letter to our corporate office to my attention. Speedway LLC 500 Speedway Drive, Enon, OH 45323 Could you also please email me a copy of the NFA letter? Thanks Vought drafted Spill Closure letter, added to D2, sent via US Mail, and sent via email to Butler with cc to Rennie and Russo. 2/22/17-Vought-Received email from DEC Rivera on 2/22/17 that Good Morning,I received an inquiry from the Assemblyman s office where this site is. It seems to be a former Hess gas station that is now gated. They are asking if we have anything on file at this site or any info on what s going on here. Does the address pop up in anyone s program? RSE replied to Rivera with copy of these spill notes."

Remarks: "spill is contained and clean up is in progress"

DEC Memo:	"11/15/07 bf: Called Cromwell Barrington of Hospital (917)417-0257. Dry leak. Waiting for proposal for repair. I told him not to put any more fuel in tank until repairs aare made and tank passes retest. I also told him the registration is expired. he said that is why tanks are being tested. Sent ttf letter to: James Cullen Harlem Hospital Center 506 Lenox Avenue - 3rd floor New York, NY 10037 1/3/08 On 12/24/07, received letter from Neeraj Kumar of Environmental Engineering Solutions. Letter included tightness test results. Tank

HOSPITAL (Continued) **S108957729**

#1 (south) failed and Tank #2 (north) passed. Letter states that the facility has immediately begun the the process of clean up of any contamination. No leak was found and facility is waiting for quotes to repair or replace the failed tank. He requests 12 months for the required remedination. Called N. Kumar (914)788-4165. They still do not know why tank failed. As of now, no leaks found. Hospital is undecided as to replacement or repair. He is going to call me back on tank status (is is being used? is it empty?) bf 1/15/08 Spoke to Supnil of Environmental Engineering Solutions. tank is emptied and not being used. Next week, director's meeting will be held to determine whether to remove the tank or repair the tank. I told him the hospital is in violation since the registration expired in November. Also told him 12 months is unacceptable. bf 5/22/2008 Sangesland sent a TTF 2nd notice letter to: James Cullen Harlem Hospital Center 506 Lenox Avenue - 3rd floor New York, NY 10037 12/18/08 Yesterday, received message from Bryan Shaw of Warren Panzer Engineers (212)922-0077 x260. I called back today and he told me he wopuld email closure letter. I told him registration expired. Received letter and tank test results by email from B. Shaw. Tank failed because of manhole gasket. Tank was retested and passed. Test report is not acceptable because gw determination was not provided. Sent email to B. Shaw requesting gw determination. faxed registration renewal application to him. Sent tt return letter(see PBS 2-607214). bf 6/1/09 recieved letter from Empire on Friday. NFA. bf 5/22/09 Received call from Bryan Shaw regarding status. I explained that an acceptable tank test is required. Tank test returned because of gw determination. E-mailed him tt return letter dated 12/18/08. Received call from michael of Empire Environmental, the tank testing vendor for the site. He explained that Estabrrok's does not require water sensor test or gw determination if tank is empty and after test the tank is checked for tightness. I told him to send me a letter explaining this. bf "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was FOLEY Con Ed e2mis #144267: 7-31-02 @ 01:20 M Milano #68073 reports that while applying a ground in vs4088 @ n/s w 143 st 43' e/o 7 ave , he discovered 25 gallons of an unknown oil and 3 gallons of water had spilled onto the dirt and concrete floor of the structure, also some of the oil has migrated into the sump of the structure which according to the conduit plate # m-58-g-1 has no sewer connection , M Milano belives that this is only a catch basin. No sewer or waterway affected. No smoke or fire was or is involved. No injuries , weather had no affect. Account # f3242 is being used for this incident. No measuring device was used. Transformer is connected to feeder # 2m23. Source and cause of spill are unknown. No private property affected. Environmental Yellow tag #32207 was applied . Water is standing , no visual water movement. Sump is concrete. No substantial cracks. No dielectric filled feeder. Access anytime. 2 liquid samples were taken from the spill by M Milano #68073 , 1 for id and 1 for pcb. Chain of custody # bb05519 . Sample priority e. No initial cleanup action taken . I & A was dispatched to this location to investigate. Cleanup will be pending tranformer removal . Partial cleanup to start asap. CIG S McKeever and T Marcinek notified @ 01:54 Update 1/14/04 Sample results - 33 ppm PCBs. Cleanup completed on 8/1/02."
Remarks:	"25 GLS OF UNKNOWN OIL ON 3 GLS OF WATER. CLEAN UP WILL BEGIN AFTER TEST RESULTS. CON ED #144267"

DEC Memo:	"DEC Piper spoke with David whent. Due to a product discrepancy, system was invesitgated. Dispenser found to be leaking. Contractor to come on 11/11/13 to rmeove dipenser and investigated beneath pan. 9/10/15- DEC piper left message for Steven Charron at Clobal montell Group. 781 786- 6320 5/4/16- DEC Piper received and reviewed closure request. Based on work to date, no further action is granted with respect to remedial activities though the 1K UST found needs to be registered properly prior to closure. Once completed, the spill can be closed. There is an active remediation site under spill 9713385 which will handle divesting of the site. 07/28/2017 - In January 2017 during the removal of an underground storage tank (UST) system, MES

GETTY STATION 5442 (Continued) **S114560625**

Getty's contractor, excavated soil from the former tank field, former product piping runs and dispensers to remove petroleum impacted soil. During removal activities thirteen previously unknown ghost tanks in the southern area of the site were identified, and subsequently removed in May 2017. From January 9 to July 5, 2017, 43 excavation endpoint soil samples were collected from the sidewalls and bottom of the excavation extents. A review of the laboratory analytical data shows seven excavation soil sample locations at depth exhibiting VOC concentrations in excess of NYSDEC CP-51 soil cleanup guidance, and eight excavation soil sample locations exhibiting SVOC concentrations in excess of applicable NYSDEC CP-51 Soil Cleanup Guidance. All of the excavation soil samples were reported below NYSDEC Brownfield Cleanup Program Commercial Soil Cleanup Objectives, with the exception of SW-8A (7 -7.5), SW-8B (7 -7.5) and SW-8B (14). Approximately 2,268.84 tons of excavated soil was transported off-site for disposal at Soil Safe s facility located in Logan, New Jersey. Based on the above presented information in the July 26th UST Closure and Remedial Excavation Summary Report the spill has been closed."

Remarks: "dispenser leaking into soil, c/u and repair pending"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 3/14/03 REASSIGNED FROM ROMMEL TO VOUGHT. 6/27/2003-Vought-File review by Vought: Tank Upgrade Report-Dec 1998-Tyree Brothers Environmental Services (Paul Hatcher 631-249-3150)- Adjoining six-story building to the west, adjoining two story buiildings to the east and north. Merit service station across W145th Street. Four (4000-gallon) gasoline USTs upgraded. Soil excavated to approximate depth of 3' below grade. Six soil endpoint soil samples taken (analyticals provided). Soil analyticals show concentrations up to 47000ppb toluene (S5), 1603000ppb xylene, 88800 ppb napthalene and 19300ppb MTBE. 84.24 tons of soil excavated and removed (disposal manifest provided). Subsurface Investigation Report-Dec 2000-Tyree-Eleven soil borings performed using Geoprobe. Perched groundwater was encountered at approximate depths of 10-15bls . Soil analyticals show concentrations up to 8060ppb benzene (SB7), 288000ppb toluene, 16200ppb MTBE (SB8), 70300ppb napthalene. Groundwater analyticals show up to 6470ppb benzene, 29600ppb toluene, and 172000ppb MTBE. Quarterly Monitoring Reports-March 2001 thru Sept 2001. Four monitoring wells on-site. Remedial activities are EVR/Remediation Assessment. Two additional wells installed in 7/1. Groundwater concentrations up to 3820ppb benzene (W1), 1770ppb toluene(W1), 26940ppb xylene (W5) and 445000ppb MTBE (W4). Pilot Test Report and SVE and DPE-Nov 2002-Tyree-See RAP comments (June 2003) for pilot test results. Tyree proposes DPE due to higher radius of influence than SVE. 3/29/2003-Vought-Received email from Paul Hatcher that 2 of product was found in W5. Product was bailed. Monitoring and bailing began weekly. Quarterly Monitoring Reports-Oct 2002 thru Dec 2001. Six monitoring wells on-site. Remedial activities are EVR/Remediation Assessment. Free product (.02') in W2. Groundwater concentrations up to 2100ppb benzene (W1), 6180ppb xylene (W5) and 348000ppb MTBE (W4). Letter to NYSDEC-Feb 18, 2003-Letter sent to NYSDEC by Tyree requesting Stipulation Agreement so that Tyree could proceed with proposed system design and installation. In letter Tyree states that they previously submitted a Soil Vapor Extraction and Dual Phase Extraction Pilot Test in Nov 2002. 4/17/2003-Vought sent Stipulation, CAP, Guidance Document and cover letter to Kevin Shea (Getty Properties). 6/3/2003-Vought-Received signed stipulation agreement from Getty. Quarterly Monitoring Reports-Jan 2003 thru March 2003-Tyree-Six monitoring wells on-site. Groundwater

GETTY#58409 (Continued) **S108637243**

concentrations up to 3550ppb benzene(W1), 2330ppb toluene(W1), 12700ppb xylene(W4) and 59800ppb MTBE. No free product in wells. Four dual phase extraction wells (DPE) wells were installed for future remediation system. Borings logs and soil analyticals provided. Soil concentrations up to 2180ppb benzene(E4), 3740ppb toluene(E4) and 4140ppb MTBE(E4). Proposed Remedial Action Plan-June 2003-Tyree-Depth to perched groundwater is ten to twelve feet. Groundwater flows to the east. During installation of wells W5 and W6 two ghost tanks found and could not be removed due to their location underlying operational pump island (both tanks were filled with water with no measurable product). Review of historical maps by Tyree suggested that there are possibly eight additional tanks on-site. Free product found in wells W4 and W5. A radius of influence of 16 was estimated by pilot tests, therefore conventional SVE would not accomplish treatment goals. A following pilot test of DPE indicated groundwater pumping in the DPE created a zone of influence exceeding 25'. Soil heterogeneities cause vapor flow rates to be less than 40cfm. Tyree proposes installation of DPE system of five extraction wells with liquid ring vacuum pumps. Estimated fluid extraction rate is 10gpm. Extraction wells installed in Apr with radius of influence of 20'. Fluids will be processed through a oil/water separator, air stripper and liquid phase carbon unit. Treated groundwater will be discharged into storm sewer. Vapors will be scrubbed using activated carbon asdorbtion. Monthly air samples will be collected and analyzed for NIOSH 1501. Discharge of wastewater will be monitored weekly for 30 days then monthly thereafter. Tyree requests written approval of RAP. 6/27/2003-Vought-NYSDEC requires 1)off site delineation 2)surrounding area site plan, sensitive receptor monitoring schedule and data 3)Additional copies of Site status report and Remediation Report of Aug 2002 (Vought-never received these documents) 4)Investigation of eight additional tanks referred to in RAP. These requests must be satisfied before RAP approval. Vought sent email to Tyree (Hatcher) on 7/2/03 with above requirements. Quarterly Monitoring Reports (Tyree) July 2003 thru Dec 2003. Five monitoring wells onsite, one monitoring well/dual phase extraction well and four DPE wells for future remediation system. DPE wells were installed 4/10/03-4/11/03. Groundwater flow to the northeast. .15' of LNAPL in MW15. Trenching to connect all DPE wells completed in 7/03. Awaiting purchase of DPE system and permits for system . Groundwater concentrations up to 1020ppb benzene(W1), 865ppb benzene(W2), 1420ppb benzene(W3), 1560ppb benzene(W4), free product(W5), and 14ppb MTBE(W6). Monthly monitoring and bailing to recover free product. 2/19/04-Vought-Sent letter as per CAP rejecting RAP until the following requirements are met: 1)delineation to the west of W3, east of W-1, northwest of W2, downgradient from W4 2)inclusion of W5 in DPE system due to free product 3)surrounding area site plan. Vought sent letter with above requirements on 2/19/04. 5/1305-Vought-New file review by Vought: Quarterly Monitoring Reports (Tyree Org)-July 2004 thru Dec 2004. Wells onsite include: five monitoring wells, one monitoring well/dual phase extraction well, and four DPE wells for future remediation system. Groundwater flow to the east-northeast at depths of 10-12' below grade. Groundwater analyticals show: 2600ppb benzene(W1), 1370ppb toluene(W1), 1200ppb ethylbenzene(W1), 5640ppb xylene(W1), 3690ppb MTBE(W1), 1490ppb benzene(W3), 699ppb toluene(W3), 242ppb ethylbenzene(W3), 652ppb xylene(W3), 3750ppb MTBE(W3), no sample(W4), no sample(W5), 11ppb MTBE(W6). 5/13/05-Vought-DEC no longer requires delineation upgradient of source but however still requires:

GETTY#58409 (Continued) **S108637243**

1)addition of MW5 to DPE or affirmation of inclusion in ROI of DPHVE system. Vought sent email with requirements. Vought received email from J Rennie that MW 5 was tied into DPHVE. 08/31/2005 - Feng - Project transferred from Vought to Feng. 11/15/2005 - Feng - Dual Phase Extraction System is installed and ready to run. However, it is still awaiting electric approval from NYC Electrical Control Board/Cod Edison. 12/19/2005 - Feng - Quarterly Monitoring Report, 7/2005 - 9/2005. The site is currently an active gasoline station & convienience store with car wash. Groundwater flows to east at the depth of 10.81' to 11.99' bg. There are 5 monitoring well, 1 monitoring/extraction well and 5 extraction wells. W-1, rapid increased and 49,390 ppb BTEX, rapid decreased and 804 ppb MTBE. W-2, rapid increased and 12,163 ppb BTEX, decreased and 8,500 ppb MTBE. W-3, decreased and 7,187 ppb BTEX, decreased and 3,540 ppb MTBE. W-4, increased and 3,638 ppb BTEX, decreased and 2,180 ppb MTBE. W-5, increased and 6,135 ppb BTEX, increased and 120 ppb MTBE. W-6, increased and 32 ppb MTBE, 10 ppb MTBE. Absorbent sock in W-5. Still waiting for electrical approval. (RJF) 1/17/2006 - Feng - Quarterly Monitoring Report, 10/2006 - 12/2005. The site is an acitve gasoline station & convienience store with car wash. Groundwater flows to east at the depth of 10.14' to 11.43' bg. 5 monitoring wells, 1 monitoring/extraction well and 5 extraction wells onsite. W-1, 48,920 ppb BTEX, 1,470 ppb MTBE. W-3, decreased and 4,467 ppb BTEX, 3,150 ppb MTBE. W-4, increased and 6,912 ppb BTEX, 2,410 ppb MTBE. W-6, low and 1 ppb BTEX, 13 ppb MTBE. Absorbent socks in W-5. Still waiting for electrical approval for the system installed onsite. (RJF) 1/17/2006 - Feng - Emailed to Joe Rennie asked about the status of the site, and the reason why couldn't get the electrical approval. (RJF) 2/13/2006 - Feng - Emailed to Joe Rennie requested the status of the pending electrical approval from ConEd. (RJF) 2/13/2006 - Feng - Reply from Joe Rennie Please be advised that Tyree has tried making contact numerous times via phone and faxes with the electrical sub-contractor requesting the status in this matter. When Tyree was able to make contact with the sub-contractor, it was told to us that they did not hear back from the ECB and that they will make a follow-up phone call to check on the status. At this point, the only thing that Tyree can do is to keep contacting the sub-contractor. If NYSDEC has any suggestions, we are surely open to them. (RJF) 2/14/2006 - Feng - Emailed to ConEd requesting status of the project and reason why electric service hasn't granted yet. and asked for the contact information of the project manager. (RJF) 2/14/2006 - Feng - Joe Rennie emailed the contact information of ConEdison. (RJF) 2/15/2006 - Feng - Letter requesting assistance in gaining electrical approval from ConEdison to Kevin Gallagher via fax: 212-673-1729 and certified mail. (RJF) 2/15/2006 - Feng - Called from Antonio Alaimo (ConEdison) and follow up by email. He called Mr. Godsil (Tyree's sub-contractor) on 1/26/2006 and Godsil is still waiting for the certificate from the city before ConEd could install a new meter. He said once the certificate is on hand, ConEdison will take care of this case right away. (RJF) 2/15/2006 - Feng - Called Harry Godsil (516-827-5324). He said that they re-filed for certificate and done the re-wiring. He willl follow up with the Electric Board and ConEdison. It will be all set in a couples weeks. (RJF) 3/8/2006 - Feng - Called Harry Godsil and left message if he got the certificate from the city yet. (RJF) 3/17/2006 - Feng - Faxed Harry Godsil a message and inquired the status of the power supply for the remediation system for this site. Requested the contact information

GETTY#58409 (Continued) **S108637243**

if he haven't received the certificate from the city yet, such as contact name, address, phone# and fax#. (RJF) 3/29/2006 - Feng - 3/28/2006 Letter faxed to NYC Department of Buildings - Electrical Division and requested assistance in obtaining the electrical certificate. Called from Inspector Diamond (212)566-3812 saying that they never received any application for that. Emailed Joe Rennie and asked him to look into this problem. (RJF) 4/4/2006 - Feng - Email from DOB Bonnie Gerard. She stated that their inspector visited the site and found some violation. And DOB will be expedite Getty's sub-contractor's application. Feng Forward the violations list to Joe Rennie and strong recommend him to hire another electrican to remove the violation and then to run the system. (RJF) 4/6/2006 - Feng - Email Joe Rennie requested about the status of electrical work for the site. 4/7/2006 - Feng - Email from Joe Rennie I have another electrical contractor working on it. The contractor was in our office on Wednesday and Paul Hatcher and myself spoke to him. He assured us that he will follow up with the NYC DOB. As far as Con Ed goes the paperwork was filed and a case number has been assigned, it's the NYC DOB that doesn't have the necessary paperwork to proceed. (RJF) 5/4/2006 - Feng - Quarterly Monitoring Report, 1/2006 - 3/2006. Active gasoline station and convenience store with car wash. Groundwater at 10.59' to 11.56' bg and flows to east. Sampling and gauging as of 3/21/2006. There are 5 monitoring, 1 monitoring/extraction, 5 extraction wells. W-1, 0.04' FP. W-3, increased and 13,227 ppb BTEX (1,870 ppb B, 6,010 ppb T, 647 ppb E, 4,700 ppb X), 3,180 ppb MTBE. W-4, decreased and 4,651 ppb BTEX (1,750 ppb B, 31 ppb T, 1,050 ppb E, 1,820 ppb X), 1,230 ppb MTBE. W-6, 5 ppb BTEX, 16 ppb MTBE. Noted that absorbent sock in monitoring well (W-1). Electrical contractor waiting on Co Edison and NYC Electrical Control Board for installation approval and final inspection. (RJF) 6/27/2006 - Feng - Dual Phase Extraction System startup. DEC staff Sun, Feng, Andersen, and Krasweski were onsite to witness this event. (RJF) 11/9/2006 - Feng - Quarterly Monitoring Report, 7/2006 - 9/2006, 10/9/2006, by Tyree. Active gasoline station and convienience store with car wash. Sampled and gauged on 9/28/2006. 5 monitoring wells, 1 monitoring/extraction well, and 5 extraction wells. DTW 10.35' to 11.29' bg. Flows to easterly. LNAPL in MW-1, 0.30 feet. BTEX range ND to 17,637 ppb. MTBE range 1 ppb to 2,740 ppb. (RJF) 2/7/2007 - Feng - Quarterly Monitoring Report, 10/2006 - 12/2006, 1/2/2007, by Tyree. Groundwater sampled and gauged 12/27/2006. 5 monitoring, 1 monitoring/extraction and 5 extraction wells. DTW 9.92' to 11.98' bg. Flows east. LNAPL in W-1 (0.12'). W-3, 4,249 ppb BTEX, 700 ppb MTBE. W-4, Not accessible. W-6, BTEX ND, 4 ppb MTBE. (RJF) 5/17/2007 - Feng - New Spill 07-01951 called in. The caller stated that there is product in the monitoring well. Contacted Tyree to see what happened. (RJF) 5/17/2007 - Feng - Rob. S (Tyree) called back and he will send a field technician to the site and gauge those monitoring well. Product will be sampled if any were found in the wells. Will call back tomorrow with the gauging results. (RJF) 5/18/2007 - Feng - Email from Joe Gavin (C2G Environmental Consultants) to DEC Jacob Krimgold. During the Third Party Audit Inspection conducted 5/17/2007, some PBS violation were found and the station has been closed. (RJF) 5/23/2007 - Feng - Email updates from Rob. S (Tyree). A field tech was there yesterday and this morning. One monitoring well with 0.01' of product, the others including the dual phase ones has no product. (RJF) 6/26/2007 - Feng - Quarterly Monitoring Report, 1/2007 - 3/2007, 4/2007. Groundwater sampled

GETTY#58409 (Continued) **S108637243**

4/2/2007. 5 monitoring wells, 1 monitoring/extraction well, 5 extraction wells. DTW 10.40' to 11.69' bg. Flows to east. LNAPL in MW-1 (0.05'). W-3, 1,618 ppb BTEX, 949 ppb MTBE. W-4, not accessible. W-6, ND. Dual Phase Extraction system running. As of 4/18/2007, Influent 11.6 ppb BTEX and 13.90 ppb MTBE, effluent MDL. (RJF) 9/28/2007 - Feng - Quarterly Monitoring Report, 5/2007 - 7/2007, 8/2007. Groundwater sampled 7/9/2007. 5 monitoring wells, 1 monitoring/extraction well, 5 extraction wells. DTW 10.32' to 11.25' bg. Flows to east. No LNAPL. W-1, 40,412 ppb BTEX, 161 ppb MTBE. W-3, 6,555 ppb BTEX, 2,010 ppb MTBE. W-4, NA. W-6, BTEX ND, 4 ppb MTBE. (RJF) 3/21/2008 - Feng - Quarterly Monitoring Report, 8/2007 - 11/2007, 12/2007. Active gasoline station and convinience store iwth car wash. Groundwater was gauged and sampled 11/8/2007. 5 monitoring wells, 1 monitoring/extraction well and 5 extraction wells. DTW 10.78' to 11.97' bg. Flows to east. LNAPL in MW-1 (0.33'). BTEX range ND to 14,373 ppb (MW-3). MTBE range 3.3 ppb to 1,910 ppb (MW-3). Dual Phase Extraction system has been off line since November due to a pump failure and will be restarted in 12/2007. (RJF) 3/24/2008 - Feng - Email from R. Szcespanski (Tyree). The system is back to service in mid February 2008. (RJF) 7/11/2008 - 1Q2008, 12/2007 - 4/2008, 5/2008. Active gasoline station and convenience store with car wash. Groundwater was gauged and sampled 4/22/2008. 4 monitoring wells, 1 monitoring/extraction, 5 extraction wells. DTW 10.51' to 11.60' bg. Flows to east. LNAPL in W-1 (0.04'). BTEX range ND to 13,950 ppb (W-3). MTBE range ND to 1,760 ppb (W-3). The dual phase extraction system is on. Total BTEX influent ND to 0.93 ppb, MTBE ND to 7.8 ppb. Effluent ND. Email to Tyree for check/evaluate the remedial system and to optimize the recovery. (RJF) 9/4/2008 - Getty Properties portfolio meeting with Delta and Tyree. Some vapor points might be installed in the area where the extraction wels located. Historical data for W-5. Correct the W-2 which is connected to the system. Need well within the property line near the extraction well which is downgradient of W-1. Check why extraction wells were put this way. work plan by 12/2008. (RJF) 1/6/2009 - Getty Properties portfolio meeting with Delta and Tyree. In 2005, there were 5 vapor points along the apartment building and came out clean. DEC received the delineation work plan, and under review. (RJF) 1/23/2009 - Reviewed Investigation Work Plan, dated 12/29/2008, by Tyree. One well is proposed near the vacuum area. DEC provided comments and requires a well to be installed at the extraction wells area as we agreed upon the meeting of 9/2008. (RJF) 1/28/2009 - Received and reviewed the Investigation Work Plan, dated January 27, 2009, by Tyree, pdf copy, sent via email. Tyree proposed to have 2 wells installed. email from Tyree on 1/27/2008, they will measure the water depth and will have proper amount of screen installed, at least 5 feet above water table. Work plan is approved. Field work to be scheduled for 1Q2009. Investigation report due 3/2009. (RJF) 3/17/2009 - Quarterly Monitoring Report, 5/2008 - 7/2008, 8/2008, by Tyree. Active gasoline station and convenience store with car wash. Groundwater was gauged and sampled 7/17/2008. 4 monitoring wells. NO LNAPL. DTW 10.42' to 11.90' bg. Flows to east. BTEX range 1.7 ppb to 41,264 ppb (W-1). MTBE range ND to 1,890 ppb (W-3). Dual phase extraction system is on line. BTEX influent ND. MTBE influent range 1.1 to 3.2 ppb. BTEX and MTBE effleuent ND. Quarterly Monitoring Report, 8/2008 - 10/2008, 11/2008, by Tyree. Active gasoline station. Groundwater was gauged and sampled 10/29/2008. 4 monitoring wells. NO LNAPL. DTW 9.98' to 11.89' bg. Flows to east. BTEX range ND ppb to 24,172 ppb (W-1). MTBE

GETTY#58409 (Continued) **S108637243**

range ND to 1,220 ppb (W-3). Dual phase extraction system on line. No BTEX influent or effluent. MTBE influent 2 to 3 ppm, effleuent ND. ((RJF) 6/9/2009 - Reviewed Subsurface Investigation Report, dated 5/13/2009, pdf via email on 5/13/2009, by Tyree. On March 31, 2009, Tyree oversaw Associated Environmenal Services during the installation of 2 monitoring wells. MW-7 and MW-8 were installed to depth of 25 feet bg. PID reading, MW-7 at 10-15 feet, 35 ppm; MW-8 at 10-15 feet 105 ppm. 4 soil samples were collected, MW-7 at 5-10 feet, MW-7 at 10-15 feet, MW-8 at 5-10 feet, MW-8 at 10-15 feet, no exceedances. 2 groundwater samples were collected. MW-7, 36 ug/L benzene, 47 ug/L MTBE. MW-8, 46 ug/L benzene, 340 ug/L MTBE. (RJF) 1/11/2012 - 4Q2011, 1/11/2012, by Tyree. LNAPL in MW-1, 0.01'. High BTEX in one well. MW-3, 9,459 ug/L BTEX, 197 ug/L MTBE. STARS list sampling for E-1, MW-2, E-2, MW-5/E-5. E-1, 58.3 ug/L benzene, 34.7 ug/L MTBE. MW-2, 27.4 ug/L MTBE. E-2, 18.1 ug/L MTBE. 12/13/2011, Dual phase extraction system was on. Liquid phase Influent/effluent are MDL. No vapor phase samples were collected. 07/28/2017 - In January 2017 during the removal of an underground storage tank (UST) system, MES Getty's contractor, excavated soil from the former tank field, former product piping runs and dispensers to remove petroleum impacted soil. During removal activities thirteen previously unknown ghost tanks in the southern area of the site were identified, and subsequently removed in May 2017. From January 9 to July 5, 2017, 43 excavation endpoint soil samples were collected from the sidewalls and bottom of the excavation extents. A review of the laboratory analytical data shows seven excavation soil sample locations at depth exhibiting VOC concentrations in excess of NYSDEC CP-51 soil cleanup guidance, and eight excavation soil sample locations exhibiting SVOC concentrations in excess of applicable NYSDEC CP-51 Soil Cleanup Guidance. All of the excavation soil samples were reported below NYSDEC Brownfield Cleanup Program Commercial Soil Cleanup Objectives, with the exception of SW-8A (7 -7.5), SW-8B (7 -7.5) and SW-8B (14). Approximately 2,268.84 tons of excavated soil was transported off-site for disposal at Soil Safe s facility located in Logan, New Jersey. Based on the above presented information in the July 26th UST Closure and Remedial Excavation Summary Report the spill has been closed."

Remarks: "TANK UNGRADE, FOUND CONTAMINATION. ORIGINAL SPILL ASSIGNED TO O'DOWD."

DEC Memo:	"162040. At 1553 hours the Leak Committee declared an oil leak on 345kV transmission feeder M51. The leak rate is approx. 600 Gallons per hour, it is estimated that 1200 gallons has leaked from the feeder so far with approximately 25 gallons reported leaking into the environment. No oil has been reported in any sewers or waterways. An incident command post has been set up in an upgraded level at West 155th Street between St. Nicolas and Edgecombe Avenue's. The incident

FEEDER BREAK (Continued) **S107488664**

Commander is Larry Crilley, the communicator is Brian McGeever who can be reach at 347-386-4069. The spill is currently contained and a tanker, a vactor truck and New York City Sanitation are in route to the location. The OEM, DEP and Con Edison Environmental response team are on location. There were no injuries or media reported. 16:39 Allstate cleanup contractors on site. Logged by: D. Gaynair 20079 AT 14:25 CSD notified TO of feeder fault and large oil leak on M51. At 14:35 TO was notified by Manhattan #9 of a large oil leak at a manhole on 155th St and St.Nicholas Ave in Manhattan. NYFD on site pumping oil from manhole into 55 gallon drums. Sand was placed around manhole to prevent further loss to street. TO crews sent to location. Allstate power vac notified to respond. Additional crews sent to close valves in stop joint MH 63639. Additional crews sent to deliver oil from E16th St to W49th St. Chem lab notified to take samples. At 16:30 Allstate tanker on site and setting up to pump manholes. At 17:20 manhole was pumped down and TO crews attempting to install clamp. Leak reported as 8 long and 2 wide on top of 10 feeder pipe. At 17:30 the 10 stop joint valves were closed. At 18:10 5 valves in stop joint were closed. At 18:18 TO crews reported that temp clamp was installed. clamp continues to drip but is contained in half drum under pipe. As of 19:15 ERT PAul Walsh will be making notifications that 25 gallons of dielectric fluid was lost to the environment and 4650 gallons was contained and captured with a tanker. VS 78367 11/26/05 17:35. Nov. 26, 2005. 20:38. Lab Sequence Number: 05-12533-001 < 1.0 ppm E 608/8082 UPDATE: Leon C. Paretsky, Transmission Operations, NOV 27-2005 1230 hrs. (a) The following is the Incident Command System chronology prepared by Brian McGeever: Con Edison, Emergency Response Group, Substation Operations, Incident Briefing M51 Feeder Leak: Date / Time: 11/26/05 14:01 Incident Type: M51 OA with dielectric oil leak.. Location: F/O 404 W 155th St between Edgecombe Ave and ST Nicholas Ave in Manhattan Injuries / Evacuations: None Environmental Impact: ~ 25 gallons of dielectric oil on the sidewalk, Street, and private car from M62579, which is located on an incline. Property Damage: Private car White Mini Van, NYS Plate# CUV-8584 Customer Outage: None Media: NoOutside Agencies: FDNY Chief O'Kelly, FDNY HAZMAT 1, NYPD Capt Wishnia 33rd PCT, DEP Hazmat Mahendra Rawnarine, & Nick Loaknanth, DEP Sewers Andrew Kelly. Vendor All State Power Vac Equipment Overview: Hole in the 10 dielectric pipe on feeder M51 in M62579 Narrative: At 14:01 Transmission Feeder M51 opened auto with a loss of oil pressure. A CNS message was sent out for a conference call for the leak committee. Shortly after the FDNY reported to MECC that oil was coming from a Manhole in front of 404 W 155th st. MECC notified TO, and requested tankers from Astoria. ERT Paul Walsh responded. ERG McGeever was notified via text message, and Vern Shaffer notified Lawrence Crilley. ERG Natale called ahead to find out status and have FDNY request sand trucks. At TOA FDNY Hazmat laid sand down grade from M62579 to stop free flowing oil. In addition FDNY HAZMAT started pumping oil from M62579 to keep the oil level from over flowing onto the street. W 155th St was closed between ST Nicholas Ave & Edgecombe Ave. Building 404 (parking garage) had oil on the facade, along with a private vehicle mentioned above. 15:31 Command Post established. At this time ~25 gallons of oil are on the street, and 1 gallon in the catch basin on the S/W/C of Edgecombe Ave & W 155th St, but did not appear to enter the waterway. On site at this time are FDNY Chief Donnelly & Chief O'Kelly, NYPD Capt Wishnia from the 33rd Pct along with ME #9 OS T. Carey & ERT Paul Walsh. I (Brian McGeever) assumed

FEEDER BREAK (Continued) **S107488664**

the White Hat. 15:40 Conference call leak committee updated on status. FDNY is in progress on maintaining the oil level and preventing in from overflowing into the street by pumping out the oil in M62579 into 55-gallon drums. Tankers have been ordered, #9 OS Carey requested Vac Truck, McGeever called OEM for additional sanders. Natale will call for police escort for tanker. 15:42 TO OS L. Crilley on site being briefed. Chem Lab on site to take sample. 15:45 TO OS L. Crilley will be the IC, ERG McGeever will be the Communicator, and ERT Paul Walsh will be the EH&S Officer. 16:00 OEM requested Police escort for tanker from Astoria. ME will send a small dump truck, barricades, and drums. OEM reports DSNY is in the middle of a shift change and will provide sand spreaders as soon as they can. 16:14 DEP on site being briefed. OEM responder A. Timlin on site being briefed. FDNY is running out of drums and have removed 500 gallons at this time. TO has crews in route with drums. 16:18 TO Crew #1 Jason Hypolite, M. Cintron, and Morgan Donald are on site with additional drum FDNY continuing to pump and maintain oil level. ME Environmental OS Tracy Taylor is on site. TO OS A. Nardis on site and is the OC. 16:32 All State Power Vac Tanker (5000 gallon capacity) on site. 16:43 All State Power Vac Tanker in progress. 16:55 ME Vactor #1 Kevin Hyde & Mike Godfrey on site in staging area. CFS Manager Bob Anderson on site. FDNY is requesting the MSDS sheet be emailed to FH. 17:15 ERT P. Walsh reports the e2mis # is 162040. Safeway Contractor is on site. 17:19 CE tanker on site and is in staging area. IC request 2nd tanker to structure. Tanker being positioned. ERG Natale on site. Safeway Contractor Backhoe and Dump Truck full of sand on site and staged. DSNY Sand spreaders on site being staged. 17:31 IC requests sample to be taken from the source. The hole in the pipe is visible. OS Tracy reports additional Vactor and small dump truck are on site in staging area. Vactor #2 Mr. Raeford, and Small Dumper is Mr. Leverock. 17:56 Sample being taken from feeder M51. Fitting on pipe near break is being grinded off in order to make previsions for clamp. All State Tanker has 4,600 gallons and is pulling off site. IC requesting Vactor out of staging area to keep two trucks at the site. CE Tanker 80411 is in progress. Manager R. Foster called for update and reports he will have additional pressure reduction on the feeder. 18:13 BX/West Spill Van on site in staging area D. Walker and S. Spann. 18:10 Clamp in place leak slowed and is now at 30 gallons per hour. Bob Anderson reports CE Tanker is at TB Bridge toll plaza and in route. DEP Kelly issued a Commissioners order # E22715 to repair pipe, and clean all affected area. 18:30 Vac #1 off site. 18:45 Tanker on site Vac #2 moved out, and Tanker moved in place. 18:46 CP meeting with the following people: IC L. Crilley. EH&S P. Walsh & L. Paretsky. Environmental OS T. Taylor. Logistics Bob Anderson. ERG A. Natale. OC A. Nardes. Comm B. McGeever. OEM A. Timlin. DSNY J. Torres Temp clamp is in place, oil is at 30 gallons per hour, All State will clean building (404 W 155th St, sidewalk, street, private car, and driveway to Getty Gas Station. OEM will have PD keep street closed. Garage will re-open in the morning. A larger clamp is being sent from Astoria. FD wants replacement clamps for the ones the supplied (6 & 12) One light tower is on site, and the 2nd is in route. FDNY is off site. Police will maintain a secure area. ERG Natale gave MSDS to FDNY. ERT P. Walsh will provide all agencies with the sample results from Chem Lab. IC reports the break is at 75’ elevations according to diagram. OEM updated. All trucks from ME are being released at this time along with the Spill Van from BWE. DSNY Sanders are being released also. Safeway Dumper with Backhoe will remain in staging.

FEEDER BREAK (Continued) **S107488664**

19:05 Meeting ended. 20:30 Photo on site. 20:45 DEP HAZMAT is discussing sample return time with EH&S. Senior System Operator Brian Horton called for update. At this time two tankers one CE and the other All State Tanker have taken 4,600 gallons of oil each, FDNY pumped out 715 gallons of oil into 13 drums, and 25 gallons of oil were released onto the street with one gallon in the catch basin. 20:55 CE tanker reports they have taken 4,600 gallons. Total gallons captured at this time are 9,915. 21:45 2nd clamp is on the pipe is at a slow drip. The incident is being down graded to Routine. Clean up and oil recovery are still in progress. 22:10 Tanker driver reports from Astoria that the load on level ground read at 3,500 gallons, not 4,600. Total changed to 8,815 gallons. 23:36 Senior System Operator Brian Horton updated with site contact supervisor Robert Tremberger phone # (646) 235-2474. Command Post has been disassembled. (B) The following are the PCB sampling results. (1) Lab Sequence Number: 05-12533-001. < 1.0 ppm. (C) Cleanup activities. The folllowing cleanup plan was developed and implemented: Transmision Operatsions EH&S L. Paretsky on site till 0430 hrs, Sunday, Nov 27th,; M. Albani from 0400 hrs til 1200 hrs Sunday Nov 27th, at which time the cleanup activities described below were completed. * The affected areas of the garage building were cleaned by Allstate. The cleanup proceeding west to east (along the direction of the incline of the street). The concrete/brick facade was power washed; the roll-up door was hand washed. * The sidewalk and street was cleaned, again proceeding west to east. Speedy dry/aabosrbent was placed on the street/sidewalk, removed, and then the surfaces were cleaned with a detergent, scrubbing in, and then power washed. A bood was placed downstream of the cleaning area to contain and help collect any runoff. * The car in the area was cleand and then removed by the owner * There were tracks into the gas station at the southwest corner of 155th St & St Nicholas Place. The gas station area was cleaned. *The catchbasin on the southwest corner of W155th St &7 St Nicholas Place was cleaned. The debris in the basin was removed and the basin was then washed. * There was some staining inside the garage (404 W155th St). When the garage opened on Sunday, Nov 27th, it was cleaned. * A service box southwest of the feeder manhjole was opened and inspected for the presence of any oil from the incident. The service box was found to be dry. (D) Permanent Repairs A permanent repair barrel is being installed by Transmission Operations. Per Don Schaaf, project manager, Transmission Operations anticpate completing repairs at about 1300 hrs. (E) A NYCDEP Commisssioner’s order was issued. The following email summarizes the order: From: Duke, David Sent: Sunday, November 27, 2005 3:23 AM To: dl - Environmental Response Team Cc: Paretsky, Leon Subject: Commissioner’s Order for the cleanup of TO Manhole 62579... Commissioner’s order E22715 for W.155th Street & Saint Nicholas Avenue in Manhattan (e2MIS 162040) DEP Inspector Andrew T. Kelly (Badge #67) issued a Commissioner’s Order on November 26, 2005 for the 10,000 gallon spill of Transmission Feeder Dielectric fluid in ConEd Manhole # 62579, located at W.155th Street & Saint Nicholas Avenue, Manhattan, NY. The order states the following: Pursuant to the authority of Commissioner of the Department of Environmental Protection, as set forth in the New York City Chapter and Administrative Code, including, without limitation, Sections 24-523 and 24-524 of the Administrative Code and Rules of the City of New York relating to the Use of the Public Sewers, 15 RCNY, Chapter 19, the above named party is herby ORDERED to take the following actions at the premises located at W.155th Street & Saint

FEEDER BREAK (Continued) **S107488664**

Nicholas Avenue in Manhattan immediately after receiving this ORDER. Administrative Code Section 24-524(a): Specific details of corrective actions: 1) Must repair the damaged feeder line so that it does not leak oil. 2) Must remove via certified environmental agent, the oil that spilled. 3) Clean-up must include the catch basin at W.155 Street & St. Nicholas Place, the sidewalk, street, and the 55 gallon drums. Based upon the above cleanup activities, the Commissioners' order was satisfied. (F) Per the attached Email from Mike Daughtrey ERT, the start time of the incident was revised 1553 to 1449 hrs. Mike Based upon the above, the first reported time and the report to env services will also be changed to 1449 hrs. This is distinct from the feeder leak times, which were 17:05 and 18:03, respectively. Discussed latter revisions with Paul Walsh, ERt. L Paretsky, Transmission Operations. Closed. 12-28-05. see eDocs. GB "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT 10/20/98, 10:43 hrs - Gerry Matterazzo, UT: manhole cleaned, drainage into drum - no clamp. Will break out manhole wall to make repairs. Pumped down and washed by Clean Harbors. Sampled 3 ppm PCB. (CAE) On location at 12:28 hrs. John Molahan, Trans Ops, on scene. Leak from feeder near wall of manhole. Feeder still under full pressure. Excavating outside manhole to break out wall. Not exposed yet. No visible contaminated soil - excavation is about 4 - 5 feet deep. Feeders look as if they are just below this level judging by their position in manhole. Clean Harbors removed 3000 gallons oil/water last night (4 - 5 inches of oil in manhole). (CAE) ~~~~~~~~~~~~~~~~~~~~ E2MIS 120636 10/20/98 00:24 CARRILLO #03309 REPORTS: IN M-61738 W155 ST 120' W/O ST. NICHOLAS ST. FOUND APPROX. 50 GLS. OF DIELECTRIC FLUID ON APPROX. 1000 GLS OF WATER.. OIL WAS CONTAINED TO M/H. TOOK SAMPLE 3PPM PCB LAB SEQ. 98-11259 OIL & WATER HAVE BEEN REMOVED AND M/H CLEANED UP COMPLETE BY CLEAN HARBORS OIL NEVER ENTERED ANY WATERWAYS OR SEWER SYSTEMS. OIL WAS FROM 10 345KV PIPE TYPE CABLE. NYSDEC #98-09008. This leak was originally entered on 120616 as part of the leak search on Fdr M52 and was reported earlier. At the request of CIG this incident was entered to seperate this incident from the one at 79th St and West End Ave. At 17:00 fluid was found in manhole 61738 by Con Ed crews looking for leak on M52. Samples were delivered to Chem Lab Clean Harbors was called and manhole was pumped out. At 19:55 manhole was pumped down and slight weep seen between reducer and wall @ E wall. Temp EPA ID # NYP004019683 for CTW removal from manhole. ATC notified at 21:35 for air monitoring at manhole. Chem Lab reports 98-11259 3ppm PCB's. Manhole cleaning was completed at approx 12 midnite. ATC on location for CTW removal. CTW removal completed between reducer and wall. Leak found inside manhole sleeve. Packing removed and fluid allowed to run into manhole into containment vessel. Manhole wall to be broken out

SPILL NUMBER 9809008 (Continued) **S104648033**

for repairs. Excavation started on 10/20/98 at 08:00. Excavtion completed and temp clamp installed at 18:30 10/19/98. No fluid visible outside of manhole. Chem Lab reports 98-11260 70 ppb benzene. Clean Harbors removed 1 cubic yard of debris and 3000 gallons of oil/water from manhole. Permanent repairs started at 07:00 10/23/98. 48 long barrel through wall installed and tested. Repair completed 20:10 10/23/98. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 11/13/2001 - Sangesland received a report from Emteque Environmental Corporation detailing the failure of all 3 - 40,000 gal buried tanks. 2/27/2002 - Sangesland received another report from Emteque stating that the plan is to remove the three tanks, remove all associated piping & system equipment, Remove all visually contaminated soil, Install 2 new 40,000 gal tanks along with associated piping, Install a natural gas line, Install monitoring wells around the new fuel tanks. Sangesland left a message with Dave Keil (consultant) saying the proposal looks good. Requested a meeting for around April 2, 2002 to discuss the details. 4/2/2002 - Sangesland met Dave Keil of CDM on site to review the work plan. 3 - 40,000 gal. #6 fuel oil tanks will be dug out. Boring work done on site indicates the spill has not spread far. It is beleived that there is a clean zone between the tanks and the building. Sangesland said, since the excavation will be so large, the DEC will require 8 side wall samples (2 per side) and 4 bottom samples. PLUS groundwater sampling. Consultant will prepare a work plan and submit it to the property owner/ project developer, but he may not be associated with work in the future (depends if he's hired to continue the effort) 2/5/2003 - Sangesland visited site and spoke with John Raguso of Emteque (631-271-6622). Tank excavation work was done (3 - 40,000 gal tanks pulled). Excavation hole was open and held back on 4 sides by steel pilings. Standing water at approx 10' depth showed partial floating product (30% of water surface). Vac truck is expected later today. After vac out, photos will be taken of cement slab base to confirm no below slab contamination. Some residual contamination is expected, but after the source is removed and most of the standing contamination is removed, the spill can be closed out. 3/24/2003-Vought-Fowarded message from Sigona to Duty Desk: Sigona received call from Michelle Grant (212-491-7025) regarding spill and presence of oil/water in excavation. Vought called Grant back and explained remedial actions. 6/26/2003 Sangesland reviewed a report from Emteque dated 6/16/03 Report outlines the removal of 498.85 tons of contaminated soil from the area outside around the tanks. Some excavation was also done in the basement where a spill existed. Both the basement and the outside excavation came back with clean end points. Report in file. Spill Closed"
Remarks:	"CALLER STATES LAB RESULTS FROM ABOVE PROPERTY SHOW SOIL CONTAMINATION WITH # 6 FUEL-WILL CHECK GROUND WATER-REMOVE TANKS AND CONTAMINATED SOILS."

Spiller Company:	999
Contact Name:	GEORGE CUNNINGHAM
DEC Memo:	"They say the spill was cleaned, but this must be confirmed. Need to get contact phone number from Mark Tibbe 7/18/07 - Raphael Ketani. One hundred and fifty gallons of hydraulic oil spilled from a broken line at lift #9 at the bus depot. I tried to call Sherry Bulkley at (646) 252-5774 to find out whether the oil had been cleaned up, but could only leave a message. I talked to George Cunningham (646) 252-3607 at NYC Transit. He said that the oil was contained and the floor of the shaft is solid concrete. He said they will power wash the elevator shaft and collect the wash fluid. He will get back in touch with me. 7/19/07 - Raphael Ketani. Mr. Cunningham called me back. He said that 800 gals. of total liquids were removed from the shaft. Groundwater had been seeping in. After they pumped out the shaft, more water entered. The lift is not going to be used ever again and has been shut down for good. The walls of the lift will be powerwashed. The entire depot will be demolished in one year due to the other oil leaks/releases and tank problems at the site. It will be a giant cleanup of the grounds of the site. Mr. Cunningham added that he will send me a manifest for the removed liquids and a letter describing the events. 08-02-07: Reassigned to tibbe from Ketani. Spill is within the area of excavation of a larger remediation/construction project. Any residual contamination will be addressed at that time. 08/16/07: The investigation and remediation (if warranted) will be performed during a large remedial and construction project at this depot. The depot is slated to be demolished and rebuilt in 2008. An SSRP/RD is being prepared to address all of the known contamination and to investigate any areas where contamination is suspected, namely the lifts and associated pits. Refer to 98-13017. 06-17-08: Closed and consolidated under 8902374."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE transfered from Hale to Tibbe on 12/27/00. see also 89-02952,89-04241, 91-06264, 93-04003, 96-06076, 01-02743. tanks repaired/replaced/upgraded. remediation ongoing. See also 98-13017 for waste oil plume. 12/19/07: Since the depot is slated to be demolished, NYCT has decided to remove as much of the contaminated soil and LNAPL as physically possible. They submitted an SSRP/RD for excavation, which was approved. At the time of the remediation, Spill #s 05-13028, 07-03983 & 06-10604 will be investigated and if necessary remediated. 06-17-08: Spill #s 9813017, 0513028, 0610604 & 0703983 have been closed and consolidated under this number because

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

all of the spills will be remediated at the same time. 11/12/10 - spill re-assigned from Tibbe to Joe O'Connell 5/19/2011 The spill was reassigned from Joe O'Connell to Linda Ross 2/27/12 - Raphael Ketani. Site was transferred to me during February 2012. 4/26/12 - Raphael Ketani. The DEC was informed during the monthly meeting that depot construction is still taking place. 5/28/13 - Raphael Ketani. I reviewed the March 2013 Monthly Status Report for all of the subject NYCT bus depot sites. More wells were destroyed as a result of the ongoing construction. Only two wells are left. These are at the east end of the property. 5/29/13 - Raphael Ketani. Gregory Mathelier (212) 252-3470/cell (646) 765-0336, Construction Administrator for the NYCT bus depot sites, sent me the May 2013 Engineering Report for Site Remediation Through In-situ Solidification/Stabilization of the oil contaminated soil (prepared by URS). Mr. Mathelier stated in the text of his e-mail that: The subject Final Engineering Report (FER) prepared by our consultant (URS) for the In-situ Solidification/Stabilization (ISS) performed at the Mother Clara Hale Bus Depot is attached. This report presents a background of remedial investigations performed at the site, the bench scale study conducted prior to the ISS and documents the pilot tests and full scale open-pit mixing for ISS performed within the footprint of the site. The goal of the ISS Program was to solidify contaminated petroleum-impacted soil within the footprint of the site as a means of remediation; this method was approved by the NYSDEC. The ISS program was implemented by Hayward Baker, a subcontractor to NYCT s Remediation Contractor, Franklin, through a bench scale study, a pilot study and a full-scale treatment (ISS) that covered delineated areas of petroleum-impact within the footprint of the site. The results of the bench scale study confirmed the effectiveness of the ISS for the established criteria for unconfined compressive strength, permeability and reduced leaching potential. I reviewed the report. 5/31/13 - Raphael Ketani. I finished reviewing the ISS report. The Site Specific Remedial Plan was approved during July 2009. The remedial method specified is in-situ solidification/stabilization (ISS). Franklin Company Contractors substantially completed the work by October 4, 2010. The report was prepared in compliance with Subparagraph III.E.4.i of the Consent Order. From 1993 to 2010, numerous investigations were performed. Various product recycling methods were used with limited success. The old building was demolished, but long sections of the 9 foot high retaining walls were left in place. Subsurface structures were also present within the old footprint. DEC agreed to using solidification/stabilization if it could be demonstrated that unconfined compressive strength equal to or greater than 50 psi, permeability of equal to or less than 1 X 10-6 cm/sec and reduced leaching potential towards achieveing groundwater standards could be achieved. First, bench scale tests were done. Two design mixes were successful - one for diesel oil areas, and one for waste oil and hydraulic fluid areas. They used a 3:1 ratio dry mix of slag and Portland cement. A 6% mix with soil was used for the waste oil and hydraulic lift areas. An 8.5% mix with soil was used for the diesel oil areas. Hayward Baker Inc. performed the solidification/stabilization work. The work started on 2/3/10 and finished on 10/7/10. The work took place with maximum volume 100 cu. yd. cells and each cell had to be completed the same day. The treatments were in 6' x 20' cells aligned perpendicular to the walls. Interior cells were 10' x 25'. A minimum period of 7 days was required between treatment in a given cell and treatment of an

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

adjacent cell. The work was done by removing the surficial structures, removing the overburden and structures on a cell by cell basis, pre-clearing the treatment zone on a cell by cell basis via excavation and structure removal, and finally the application and mixing of the ISS mix. The soil was mixed in an open pit with a mixing head. The soil was mixed with grout consisting of type I/II Portland cement, granular blast furnace slag and water. The pit was mixed from bottom to top of each cell. There were 19 subareas of mixing. The DEC required sampling of the grout to insure that the results were unifiorm and compliant. Tests were done regarding permeability and 56 day breaks for data regarding the curing. Four wet samples were obtained from each cell - 2 from the bottom and 2 from the top. The samples were formed into 3 in. by 6 in. cylinders for strength testing via ASTM D2166. Cylinders were formed 3 in. by 3 in. for permeability testing via ASTM D5084. Other cylinders were formed 2 in. by 4 in. for leachability testing via method ANS/NSI 16.1. Slump tests were performed by Franklin staff for bottom samples only. Pilot tests were done by Hayward Baker on 11 cells in diesel oil area H on 3/18/10, but it rained heavily during the tests and the cells ended up with 2 feet of water at the top. New pilot tests were performed on 3/19/10 in waste oil area A and a second test and a third test were performed in diesel oil area D on 3/19/10 and 3/22/10, respectively. The fourth pilot test was performed in hydraulic lift area P. Full scale work started with a rich mix as a contingency against excessive water. The full scale mixing started on 3/22/10. A retaining wall was found in front of the west wall. This required a change from the open pit mixing method. The new method involved the installation of 2 rows of grout columns (secant piles). Each column was 36 inches in diameter and 16 feet deep. There were 33 columns per row. Also, holes were drilled through the toe of the retaining wall and grout was injected beneath the wall and between the columns and foundation wall. Seventy six 6 inch diameter holes were drilled. The grout columns were installed from 8/11/10 to 8/17/10. Later, from 8/19/10 to 9/7/10, another 66 columns were installed - most of which were 26 inches in diameter as the larger diameter cutting head had broken. The open pit mixing east of the columns was completed on 9/13/10 and grouting in the toe holes was completed on 9/28/10. Only 2 of the 1,000 grout samples did not meet the 50 psi compressive strength criteria. However, the 28 day break samples were satifactory. So no action was required. Thirteen of the 1,000 grout samples did not meet the permeability criteria. URS staff expected that they would meet the criteria as they would cure. So no action was warranted. The leachability results were given to the DEC, but not included in the report. All of the samples were deemed to have met the reduced leaching potential such that the goal of meeting the groundwater standards was achieved, if practicable. About 26,500 cu. yds. of soil was treated through ISS. An additional 100 cu. yds. was treated using low pressure grouting. Areas were backfilled with treated soil and 6,100 tons of recycled concrete aggregate to the level of the pre-remediation grades. Scope variance: due to the groundwater rise as a result of the heavy rain, clean soil layers nearer to the surface were contaminated. An agreement was reached between the DEC and the NYCT to raise the vertical limit for soil treatment. Due to staining along the southern wall of the excavation, a 21’ x 23’ x 12’ area south of areas O and P was treated. About 7,300 tons of unimpacted structures and debris were disposed of off site. Additionally, 6,100 tons of fill were imported to bring the

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

site up to grade. A larger than anticipated quantity of overburden soil was treated - 4,575 cu. yds. In order to address the variances, the contract was extended to 10/18/10. I found the report to be acceptable and approved it without comment. 1/28/15 - Raphael Ketani. I reviewed the January 5, 2015 Site Specific Investigation Work Plan for the Confirmatory Soil and Groundwater Investigation. The investigation is being implemented in order to verify current contamination conditions beneath the sidewalks on the north and east sides of the building and in order to gather information to develope alternative recommendations, if warranted, to address any residual contamination. Fifteen (15)borings will be installed using the direct push method. Up to 4 will be groundwater probes. These will be performed where there is no soil contamination in order to be able to sample just dissolved analytes in the groundwater. Up to 3 borings will become wells. Groundwater is 8 to 10 feet bgs. Soil and groundwater samples will be collected and will be processed via methods 8260 and 8270. The soil samples will be taken with 4 foot macrocores. The borings will end at 20 feet bgs. If contamination is found, then the borings will continue until clean material is encountered. The wells will be screened from 5 to 17 feet below grade. The wells will be sampled one week after development. Purging and sampling will use a low flow method. One composite soil sample from the waste material drums will be collected and sent off to the lab for waste characterization. I found the SSIWP to be acceptable with one comment. The waiting time between well development and sampling of one week was too short. By general environmental practice, well sampling should not take place any sooner than one month after development. Preferably, sampling should take place at least 3 months after development. I drafted a letter stating that the DEC was approving the SSIWP, but that well sampling must not take place any sooner than one month after well development. The letter was submitted to Hassan Hussein, EE III and head of Unit C, for his review and approval. 2/5/14 - Raphael Ketani. Mr. Hussein approved the letter and it was sent out today. 9/29/15 - Raphael Ketani. There have been repeated attempts by the NYCT to gain access to well MW-30R in order to conduct groundwater monitoring. However, these attempts had all failed as the superintendent of the building had continuously refused to grant access to the well which is behind a locked fence. Yesterday, Ms. Cadecia Josephs, assistant to Gregory Mathelier, sent me an email with the names of two people in the NYCHA who may be able to provide access to this locked location. These people were Brian Honan (brian.honan@nycha.nyc.gov) and Keith Mitchell (keith.mitchell@nycha.nyc.gov). Today, I sent an email to Mr. Honan and Mr. Mitchell requesting their help with the situation. 11/16/15 - Raphael Ketani. As I had not received an email from Mr. Honan or Mr. Mitchell regarding providing access to well MW-30R, I sent another email to them requesting their assistance. I included Mr. Mathelier [(212) 252-3470/cell (646) 765-0336, Construction Administrator] as a c-c. Soon afterwards, Mr. Honan sent me an email asking when the NYCT would need to gain access to MW-30R. I responded that he should coordinate access with Mr. Mathelier of the MTA-NYCT. Mr. Honan is the Director of the Office of Intergovernmental Relations (212) 306-8108. Mr. Honan added Luis Ponce and Brian Clarke to the email he had sent when responding to me. Later, Mr. Ponce sent me an email stating that he will contact Mr. Mathelier in order to resolve the matter. 4/20/16 - Raphael Ketani. Ms. Cadecia Josephs, assistant to Mr. Mathelier, sent me an email containing the following work

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

schedule: Below is our proposed initial schedule for the Mother Clara Hale Supplemental Investigation: Monday, May 2, 2016 Geophysical survey. Initiate sidewalk saw-cutting and guzzler pre-clearing activities. Tuesday, May 3, 2016 and Wednesday, May 4, 2016 Continue sidewalk saw-cutting and guzzler pre-clearing activities. Thursday, May 5, 2016 through Tuesday, May 10, 2016 Soil boring and groundwater probe installation activities. Wednesday, May 11, 2016 through Monday, May 16, 2016 Soil boring and groundwater monitoring well installation activities. Tuesday, May 17, 2016 through Tuesday, May 24, 2016 Sidewalk flag repair Tuesday, May 31, 2016 Well development and survey of sample locations. Thursday, June 30, 2016 Groundwater sampling of newly-installed monitoring wells. Please note that these dates may change based on the findings of the investigation and/or any input from the Depot AGM during our site meeting next week. AARCO is currently coordinating for NYCDOT permits, which will take some time and is driving the start date 2 weeks from now. 9/28/17 - Raphael Ketani. Today, at a general remedial progress meeting for NYCT bus depots and related properties, Mr. Mathelier gave me the NYCT September 2017 Confirmatory Soil and Groundwater Investigation/Petition for Spill Closure Report for the site that was written by staff from Dvirka & Bartilucci Engineers and Architects. I gave the report today's date as the date of publication as none was indicated. 10/2/17 - Raphael Ketani. I began my review of the Confirmatory Soil and Groundwater Investigation/Petition for Spill Closure Report. 10/3/17 - Raphael Ketani. I finished my review of the Confirmatory Soil and Groundwater Investigation/Petition for Spill Closure Report. The Mother Clara Hale depot had 3 known types of subsurface petroleum impacts: diesel fuel, waste oil and hydraulic oil. An estimated 44,354 gallons of total liquid was released from leaking USTs, their associated piping and the oil/water separator system. A total of 7016 gallons of product was recovered, but only during the early years of the remediation process. Only wells MW-13R and MW-30R remained after the new depot building had been constructed. Petroleum impacts were identified at 3 to 16 feet below grade. The majority of the impacts were within the zone of groundwater fluctuation which was at 8 to 10 feet below grade. Up to 3.6 feet of product had been measured in one well (MW-12) in the southeast corner of the site. No free product was found in the hydraulic lift areas. On site impacts were addressed through In Situ Soil Stabilization (ISS). The intent of ISS was to immobilize the residual soil contamination. Before ISS could be performed, all subsurface structures were removed (i.e. foundations) and clean soil. Contaminated soil was mixed with water, cement and ground furnace slag. ISS was initiated during February 2010. Off site impacts found at MW-10R, MW-11R and MW-12 were addressed as a separate remedial activity. URS (previous consulting company) did an off site delineation investigation during February 2010. It consisted of conducting 15 soil borings within the sidewalk and street to the north and east of the depot. Free product was found at borings B-84, B-85 and B-86. These locations were identified as the former area of the remote diesel fills. Samples from B-77, B-78, B-84 and M-86 had soil VOC exceedances above the clean up criteria. Samples from B-87 and B-90 exceeded the SVOC cleanup criteria. Though the draft Shallow Excavation and Surfactant Flushing SSRP/RD dated September 2010 was written by URS, it could not be implemented as the new depot construction was taking place. Dvirka & Bartilucci (D&B; the current consulting company) wrote an SSIWP for conducting confirmatory

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

borings and a groundwater investigation in order to verify the current conditions in these areas. The SSIWP was approved by the NYS DEC on 2/5/15. The program was implemented by D&B from May 9th to the 26th of 2016. A total of 24 borings, 4 groundwater probes (MCSB-04, 09, 13 and 18 and later renamed MWGP-01 to MWGP-04), 4 wells and soil and groundwater sampling were conducted along the northeast sidewalk and around the southeast corner. The total depths of the borings varied from 20 to 25 feet below grade. Both the soil samples and the groundwater samples were analyzed for VOCs and SVOCs. The screens for the groundwater probes and wells were installed from 5 to 20 feet below grade. The wells were sampled on 7/13/16. The free product program took place based on the results of this investigation. The enhanced petroleum monitoring and recovery program took place from May 2016 to June 2017 and consisted mostly of VEFRing from May 2016 to May 2017. It was implemented due to the appearance of free product at MCMW-02 and MCMW-03. Forty seven soil samples and 9 groundwater samples were collected from 5/6/16 to 7/13/16 as part of the confirmatory soil and groundwater investigation. The soil under the site was determined to be tan to brown with fine to medium subangular sand with varying amounts of fine to medium gravel, silt, cobbles. A thin layer of anthropogeneic fill covered the natural soil. Groundwater was encountered at 9 to 13.75 feet below grade. Oil staining and odors were found in 22 of the 24 soil samples at depths from 6 to 22 feet below grade. The borings with the most significant contamination were at MCSB-16 to 22 and 24 at depths of 10 to 15 feet bgs. Hydrocarbon odors were present in the purge water from MCMW-01 to MCMW-04. Nine groundwater samples were taken from groundwater probe locations MCGP-01 to 04, MCMW-01, 02 and 04 and MW-13R and MW-30R. MCMW-03 consistently had product from 0.13' to 2.29' (1/11/16 sample) thick and MCMW-02 had 0.01' of product on 9/9/17. Product was recovered using manual methods during the last month of monitoring. The product in MCMW-03 was reduced to 0.01 feet thick or less since the 4/20/17 monitoring event. No product was observed in any well on 5/26/17. An additional 15 gallons of product was recovered at MCMW-02 and MCMW-03, which brought the total amount of product recovered for the site to 7044 gallons. I reviewed Appendix B - Boring Logs and Appendix C - Monitoring Well Construction Logs and had no comments. Next, I reviewed Appendix D - Investigation Analytical Data Tables. Here were listed the soil and groundwater analytical results from sampling which had taken place during May 2016. Specifically, the soil sampling took place on 5/6/16, 5/9/16, 5/10/16, 5/13/16 and 5/23/16 to 5/25/16. The VOC concentrations for the soil samples from locations MCSB-01 to MCSB-25 were either entirely non-detect, mostly non-detect or had mostly very low results which did not exceed the CP-51 unrestricted residential standards. Exceptions to this were MCSB-01 (10-11.5 foot interval) with 4 exceedences to 20 ppm, MCSB-04 (10'-12') with 1 exceedence to 2.5 ppm and MCSB-09 (10'-12'), MCSB-10 (6'-8'), MCSB-11 (6.5'-8.5'), MCSB-12 (7'-9'), MCSB-16 (10'-12'), MCSB-17 (10.5'-12.5') and MCSB-18 (10.5'-12.5') each with 4 low to moderate (0.13 ppm to 76 ppm) VOC exceedences consisting of isopropylbenzene, n-butylbenzene, n-propylbenzene and sec-butylbenzene. MCSB-09 had 4 VOC exceedences which were in addition to those previously mentioned. The SVOC soil results for all of the samples were almost entirely non-detect, except for MCSB-07 (10'-12') and MCSB-15 (6'-7.5'). Groundwater was sampled from MCGP-01 to MCGP-04 on 5/13/16 and from MCMW-01 and MCMW-02 on 6/13/16. The VOC analytical results were mostly non-detect or below the TOGS 1.1.1

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

standards, except for the VOC results for benzene (2.8 ppb to 15 ppb), isopropylbenzene (12 ppb to 40 ppb), n-butylbenzene (7.2 ppb to 16 ppb), n-propylbenzene (8.5 ppb to 72 ppb) and sec-butylbenzene (6.5 ppb to 25 ppb). Also, MCGP-02 had 130 ppb of naphthalene and MCMW-02 had 24 ppb of naphthalene. The SVOC results were almost entirely non-detect for all of the samples mentioned above, except for 3 low exceedences in the sample from MW-13R. Samples were analyzed for soil DRO (diesel range organics) on 5/9/16 and 5/25/16. The results were 180 ppm to 20,000 ppm. [Reviewers note: the results indicate the presence of low to moderate contamination under the northeast and southeast sidewalks, but removing it would be difficult due to the utilities just under these areas]. Appendix E - Data Validation Checklist was reviewed. The Organic Analyses were determined to be mostly acceptable in performance with only a small number of unacceptable performances. The exceptions to the acceptable determination were internal standard areas below or above the QC limits for various analytes for a number of soil sample VOCs and SVOCs. Appendix F - Waste Disposal Documents. I found the documents to be fully signed and, thus, acceptable. In the Conclusions and Recommendations section, D&B found that the soil contamination had been either immobilized or stabilized. They recommended no further investigating or remediation of the soil and the groundwater. They also stated that the spill is not migrating from the site. As per the above information, staff from D&B asked that the spill case be closed. 10/4/17 - Raphael Ketani. Based upon my review of the case file and the information in the Confirmatory Soil and Groundwater Investigation/Petition for Spill Closure Report, I determined that as much free product had been collected as was feasible, that the great majority of the soil contamination was permanently contained by the solidification and stabilization process, the groundwater contamination was very low and that there was little or no risk of the residual contamination affecting the public or the environment. I wrote a Spill Closure Letter and sent it to Mr. Mathelier for closing spill #8902374, Mother Clara Hale bus depot. I closed the spill case effective 10/4/17. 12/20/17 - Raphael Ketani. Today Mr. DeVinney [MDeVinney@db-eng.com/(516) 364-9890 X 3054] sent me the following email: As you are aware, D&B is currently in the process of properly decommissioning the monitoring wells at Mother Clara Hale Depot following closure of the open spill number at the site. During the decommissioning process, we identified approximately 1.4 of free-phase petroleum in MCMW-03. All other monitoring wells did not contain any measureable free-phase petroleum. As a result, we halted decommissioning activities at MCMW-03 and would like to setup a conference call with NYSDEC to discuss this issue. Please let us know your availability for a call today and what time would be good for you, and I will distribute call-in information. I responded by email and asked what the reason could be for the sudden appearance of so much oil in the well. I suggested illegal dumping of waste oil or a spill from a neighboring building. Next, I suggested a conference call anytime up to 4 PM today and up to 2:30 PM tomorrow. I noted that I would be out all day Friday. Later, a conference call was held at 2 PM. In attendance were Gregory Mathelier, Construction Administrator at the NYCT, Cadecia Josephs, Geologist at the NYCT and assistant to Mr. Mathelier, Matt DeVinney and Stephen Tauss from Dvirka & Bartilucci, Vadim Brevdo and myself. Mr. DeVinney led the discussion. He proposed fingerprinting the oil. Mr. Mathelier asked whether the oil looked like the same product that had been seen

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

earlier in the year. Mr. DeVinney stated that they had opened up well MCMW-03 during the summer and had seen the same product. However, he wasn't sure whether this was hydraulic oil from the pocket on the other side of the depot. Mr. DeVinney added that large concrete structures were installed below the depot and that the oil may have traveled across the top of them. The oil sample was already sent to the lab for a 48 hour turnaround analysis. Mr. DeVinney also said that for a long time, the well didn't have product as the recharge was very slow. Mr. Mathelier stated that he wondered whether the spill would need to be opened up again. I responded that Dvirka & Bartilucci should go back to the well in several days and see whether the oil has returned. Mr. DeVinney stated that they could monitor the well every 2 weeks for a couple of months, see whether the oil has returned and collect it by hand pump if it appears. Both Mr. Brevdo and myself stated that this plan of action was acceptable to the Department. With that, the conversation ended."

Remarks: "FOUR 5K TANKS LEAKING INTO VAULT. GROUNDWATER DISCOVERED IN VAULT."

message to call back the NYSDEC. Richard Called me back. They are all underground tanks. According to Franklin, the testing company, there was no loss of product, No sign of leak. They will conduct further investigation. Richard said they will conduct more tests tomorrow and will update us upon completion of the tests if any additional tanks failed. Summary for PBS # 2-189995 3 tanks failed tightness test 1 antifreeze - failed hydrostatic test GEN1 - failed Hydrostatic test DSL-2A - Over fill prevention valve on diesel tank Assigned to Kumar Patel. 2-24-16 - Obligado - Update from Richard. One additional Motor Oil tank M/O-1A also failed the tightness test. No apparent spill or loss of product to the environment. 03/28/16-Hiralkumar Patel. 1:37 PM:- left message for Richard. 3:33 PM:- received message from Richard. 03/29/16-Hiralkumar Patel. 9:02 AM:- left message for Richard. 3:24 PM:- received message from Richard. 04/20/16-Hiralkumar Patel. 1:47 PM:- left message for Richard. 2:56 PM:- received call from Richard. he asked to contact Josephine Brown. 3:03 PM:- spoke with Ms. Brown and inquired her about tank test failures. she will review record and submit information/documents. Josephine Brown MTA Ph. (718) 566-3415 email: Josephine.brown@nyct.com 3:22 PM:- sent email to Ms. Brown and asked to submit information about tank size, tank location, cause of failure, repair activities and cleanup of any petroleum discharge. also asked to submit copy of result of subsequent tank system test confirming its integrity. 04/25/16-Hiralkumar Patel. received email from Ms. Brown (at 5:08 PM on 04/21/16) including document confirming cause of failure and actions taken. - 1,000 gal tank for waste anti-freeze (tank # WANTI-1) failed hydrostatic sump test due to sump seam walls and penetration fitting not being tight. containment sump seams repaired by using a fiberglass made adhesive and penetration boot repaired with by installing a new penetration boot. there was no release to the environment. containment sump passed the integrity test after repairs. - 2,500 gal tank for motor oil (tank # M/O-1A) failed hydrostatic sump test due to sump walls not being tight. repaired by using a fiberglass made adhesive. there was no release to the environment. containment sump passed the integrity test after repairs. - 10,000 gal tank for diesel (tank # DSL-2A) failed overfill prevention inspection due to piece of 2 inch pipe (drop tube) missing on bottom of overfill prevention valve. a section of 2 inch pipe was installed to the bottom of overfill prevention valve. there was no release to the environment. as per the submitted document, a fourth tank (5,000 gal diesel tank # GEN-1) also failed hydrostatic test due to penetration boots not being tight. there is no information about repairs made on tank # GEN-1. as per discussion between DEC Andrea and Richard, three underground tanks [1 antifreeze and two diesel tanks (GEN-1 and DSL-2A)] failed test. on 02/24/16, Richard called DEC Andrea and informed him about failure of one more tank (motor oil tank # M/O-1A). 11:51 AM:- sent email to Ms. Brown inquiring about status on 5,000 gal diesel tank (GEN-1). after discussing with DEC Leszek about 5,000 gal diesel tank system failing hydrostatic test due to penetration boot not being tight, no further investigation needed and case can be closed on available information. case closed based on available information."

Remarks: "there was 2 tank test failure."

Spiller Name:	JAIKISAN
Spiller Company:	MOTHER CLARA HILL BUS
Spiller Address:	721 LENOX AVE
Spiller Company:	001
Contact Name:	JAIKISAN
DEC Memo:	"02/10/06. Feroze. Talked with Mr. Jakisan Achaibar 646-252-5772. All fuel is in secondary containment. They will submit DEC all documents regarding cleaning the site. 02/10/06-Hiralkumar Patel. Left message for Jaikisan at 3:20 PM. Spoke with Jaikisan. as per him, whatever spill happened its contained in secondary container. both hydrolic lifts are lock out/tag out. on monday, private contractor will come and suck the mixture of water and oil. Jaikisan will call me once they clean site on monday 13th Feb. 02/14/06-Hiralkumar Patel. Left message for Jaikisan. 02/16/06-Hiralkumar Patel. Left message for Jaikisan. Spoke with Jay at System Safety. as they suck out oil and water mixture from pits, they did water level test. among the four pits (pit# 4, 5, 8 & 9) they found three pits (pit# 5, 8 & 9) were leaking. and pit # 8 & 9 had accumulated oil (inch or so). Jay told me that they had spill previously and had plume underground and the site is under remediation. now because two pits accumulate some oil, CPM Remediation group is handling site and investigating. URS consultants is the company who is doing remediation work on site. Jay call back with more information and results of remediation group's investigation. as per him, DEC Mark Tibbe is handling all the site under remediation for NYC transit. Discussed with Mark and Koon in remediation. Mark is working with two different plumes on the same site. as Mark talked with guy at site, the lifts are away from the site where the plume was previously. so it is probably not related to previous plumes.(Refer Spill# 8902374) Spoke with Jay. they have taken some samples for fingerprint and as they get results, Jay will call back. 02/23/06-Hiralkumar Patel. Left message for Jaikisan. 02/24/06-Hiralkumar Patel. Left message for Jaikisan. Spoke with Jay. they haven't got results yet. once he will get result, he will call back. and depends on results this project will go to remediation department in transit. 03/03/06-Hiralkumar Patel. Received call from Jay from Transit. he got sample results and all three samples came back with confirmation that it is lubricating oil. now remediation department at Transit is handling this case. he will update me on this case as he gets information. Received copy of lab results. if we need any information, call Jay at system Safety. 04/04/06-Hiralkumar Patel. Spoke with Jay and he still don't know whether this site will

NYC-TA MOTHER CLARA HALE BUS DEPOT (Continued) **S103559730**

be remediated under remediation section or not. he will call back. Received fax from Jay. abstract of letter: - Source of spill/leak identified: over a period of time, product (hydraulic fluid) and sludge accumulated in all four pits (# 4, 5, 8, 9) due to broken line, and poor seal in piston - Source of Spill/leak was stopped: brokken hydraulic fluid line, poor seal were replaced and lift load test was performed as part of MP2 preventive maintenance. - Spill cleaned: AB Oil removed 1029 gals of oily water and 1 cy of sludge and pressure washed all 4 pits. refer to AB Oil Work orders (3 18739, 18738) and manifests (# 18738, 18739) - Samples taken: samples were collected from two of the lift pits and hydraulic fluid reservoir, and analyzed by URS subcontractor laboratory. the finger print analysis identified the product as hydraulic fluid - Disposal of contaminated waste: AB Oil transported and disposed the oily water, and the sludge as non-hazardous industrial waste. - Investigation required/Refer to CPM: lost water in pit # 5 and gained water in pits # 8 & 9 during standing water test. CPM needs to investigate for any potential product plume in the bus lift area. 06/06/06-Hiralkumar Patel. Left message for Jay. Received call from Jay. he hasn't heard from CPM section and doesn't know whether this will be investigated under existing remediation or will be addressed separately. 07/10/06-Hiralkumar Patel. spoke with Jay. they are still working to determine who will handle this case. 08/31/06-Hiralkumar Patel. left message for Jay. 12/01/06-Hiralkumar Patel. left message for Jay. 12/11/06-Hiralkumar Patel. received message from Racheal from NYC transit. Jay is no longer handling spills. as per Racheal this spill has been transferred to their remedial investigation unit in NYC Transit. Racheal will be call back with more information. **Once MTA Remediation department takes over this case, ask Randy who will handle this case: me or Remediation section of DEC.** 08/16/07: The investigation and remediation (if warranted) will be performed during a large remedial and construction project at this depot. The depot is slated to be demolished and rebuilt in 2008. An SSRP/RD is being prepared to address all of the known contamination and to investigate any areas where contamination is suspected, namely the lifts and associated pits. Refer to 98-13017. 06-17-08: Closed and consolidated under 8902374."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE Sangesland DDO - spill cleaned 5 gallon of motor oil spilled to depot apron. Some sort of excavation was occuring at the time of the spill and some of the oil impacted bare soil. The soil was removed until visually clean, an endpoint sample was taken and the hole was closed. The endpoint showed residual soil contamination above TAGM. Unfortunately NYCT can not ascertain where the excavation was at the time of the spill so no further excavation can be performed. Since the spill was motor oil from a bus, it could not be more than 10 gallons. This facility is already being remediated for soil and groundwater contamination under spill #s 8904241 & 9813017. "
Remarks:	"spill from oil pan on a bus spilled on to ground they will make recovery "

DEC Memo:	"12/05/06-Hiralkumar Patel. visited site. spoke to Christina. she mentioned that water with other material is seeping into her building from neighbour's property. found stain on wall in basement with some yellow material. no petrochemical odor. went to neighbour's property at 511 W 149th Street. spoke with Lionel Mendez (212-690-7484) tenant living first floor. she showed leaking water from ceiling into her apartment. this is four story building and Ms. Mendez don't know where this water coming from. went to basement. found two 275 gal ASTs. but no oil leak. no odors inside basement. it looks like this leaking water at building # 511 is seeping into building # 513 with other building material. Ms. Mendez and Christina both reported this leak a week ago in DEP calling 311. explained Ms. Mendez and Christina that as this is not a petrochemical spill, DEC will close this case. DEP might visit site. Owner of building at 511 W 149th street: ECDO Community Partnership Center 413 W 125th Street New York, NY 10027 Ph. (212) 531-3211 FAX (212) 531-3229 Contact: Gasper Harnandez at Ext. 41"

Apparently the tank has been leaking for quite a while whenever it is more than half filled. 2000 gal tank wrapped in concrete. - No PBS registration Contacts for site: Andre Baker - Chairman of Board 914-525-3479 Richard - 718-469-5345 - home // 917-319-2519 - cell 9/1/2004 Sangesland spoke to Andre Baker about his tank. Discussed the various options (repair, reline, replace). Mr. Baker said they were getting bids on repairing the tank and said he would be working on this over the next couple of weeks. Mr. Baker was specifically told the tank MUST BE TAKEN OUT OF SERVICE TODAY and a temp tank installed. Sangesland told him that his oil company or any of the tank companies bidding on his repair job could probably set up a temp tank. Do Work letter was sent today. 10/07/04 - Sawyer - Received passed tank test for syatem at above address. Mr. Leon Gladman 718 590 0777 or 646 302 5940 the lodge treasurer was very positive that no spill had occurred there. No further action. Closed. "

DEC Memo:	"3/10/2016: Rashad 323 Convent Ave does not have an alternate address. No additional spills or PBS registrations found for site. Chris Kendrod is with NYC DEP not EPA as stated in spill report. She said she responded to site and that it seems that an overfill occurred, the daughter did not note any spill or odor in home. Chris said that the spill was on the sidewalk and she will be sending me a few photographs. Called Superfuel 12:35pm 929-376-5446 and spoke to Rosanne, she took message and said I will be receiving call in about an hour. Tim called from Superfuel 1:22pm and I let him know that there was a minor spill outside of 323 Convent Avenue in a flower box. I directed him to remove contaminated soil and confirm with homeowner that there are no issues in the home. I also told him to send me an email with post clean up photo and confirmation that homeowner noted no issues by the end of the day. Tim called back 3:27pm and said that they have removed affected soil and have cleared the fuel line pushing the remaining fuel into the tank. He will be uncovering fill line tomorrow to see if there is an issue with the check valve and he will be raising fill box so that oil does not back up and seep out if this problem occurs again. Tim confirmed no issues

SOIL (Continued) **S118636675**

were in home. 3/11/2016: Rashad Received email from Tim: Attached are before and after photos of minor oil leak at the fill box of 323 Convent Ave. We removed 4 deep of soil 24 around fill box until we found clean soil. We relocated fill box and made it 20 higher to avoid this leak from happening in the future. There is no oil spill at vent or in the basement. We trust this will meet with your approval. Tims email address is tim.superfuel@verizon.net. Two photos were attached, they have been uploaded to D2. As per photos and confirmation there are no issues in home, spill will be closed."

Remarks: "Caller advised aprx 2 gal of oil spilled onto soil. CLean up is pending."

DEC Memo:	"09-15-05: JK contacted by Drew Lent of NYC School Construction Authority, who said this is a school construction site. Lent said some free product was observed on the water table, he requested a meeting with DEC, SCA and their consultant, the Louis Berger Group, to discuss situation. JK set up meeting for 9/20/05 at 2 p.m. - J. Kolleeny 09/20/05: Met with NYCSCA and consultant, LBG. SCA plans to build a school on the site. During construction activities, an unusual ceramic container that may have held petroleum was discovered, in addition to petroleum-contaminated soil and indications of a minor groundwater impact. I requested additional soil and groundwater sampling, as well as soil gas sampling (if feasible) to characterize and delineate contamination. - J. Kolleeny 02/28/06: Spoke with Drew Lent and Lee Guterman of NYCSCA. Their consultant, Louis Berger Group, has performed additional investigation at the site and prepared a report. Lee is doing final review of report and should send it to me next week (week of 3/6/06). - J. Kolleeny 06/09/06: Received hard copy of Remedial Investigation Report from SCA, prepared by Louis Berger Group and dated February 9, 2006; will review. - JK 09/28/06: Completed my review of Remedial Investigation Report (electronic version in eDocs); report states that 2,700 cubic yards of petroleum-contaminated soil were excavated and removed from source areas (ceramic container and UST) on western portion of site, which was excavated to a depth of 11 feet bgs. Excavation didn't extend beneath former building on eastern portion of site, where soil did not exhibit impacts. 34 post-excavation samples were collected from bottom and sidewalls; results showed no VOC exceedances of TAGM, but some SVOC exceedances, which could be attributable to fill materials. Eastern portion of site was excavated to 6 feet bgs during investigation, and to 10 feet prior to construction of new school. GW samples were collected from 2 temporary wells on western portion of site; results showed

CONSTRUCTION SITE -NYCSCA (Continued) **S107408900**

exceedances for only MTBE, with 21 ppb in TW-1 and 390 ppb in TW-2. Two soil gas samples were collected from eastern portion of site, where school was later built, as I had requested. Results showed detections of toluene, ethylbenzene and xylene above NYSDOH background levels, with toluene at 2,400 ug/m3 in SG-02. Report recommended NFA for soil and groundwater, and recommended installing a gas vapor barrier beneath foundation of proposed school. An SCA cover letter dated June 8, 2006 which accompanied the report stated that the vapor barrier had been installed and the school has been built (it is not yet in use). I discussed report with Koon Tang, who was concerned about soil gas results and suggested forwarding report to Geoffrey Laccetti of NYSDOH for review. I forwarded electronic copy of report to Koon, who forwarded it to GL. - J. Kolleeny 11/14/06: Having received no response from NYSDOH, Koon Tang contacted Geoff Laccetti, who said he had never received the report. I tried to email it to him, but got message saying it exceeded maximum message size set by administrator. I created an abridged version of report, without lab data sheets, chain of custody forms, etc., and emailed it again to GL. - JK 11/17/06: Sent email to Geoff Laccetti of DOH asking him to confirm receipt of abridged report I sent on 11/14/06; he sent reply saying he had received it and forwarded it to Charlotte Bethoney, who will be project manager for the site. - J. Kolleeny 01/24/07: Received email from Drew Lent of SCA with attached e-copy of Indoor Air Sampling Work Plan report dated 1/24/07 prepared by Louis Berger & Assoc., P.C.(in eDocs), sent to me and Charlotte Bethoney, apparently at Charlotte's request. Drew's email requested review within 2 weeks. - J. Kolleeny 1/26/07: Received hard copy of Berger's Indoor Air Sampling Workplan, will review. - JK 2/12/07: Received letter from Charlotte Bethoney of NYSDOH reviewing Indoor Air Sampling Workplan (in eDocs), with 3 main comments: report erroneously states that CB of DOH requested air sampling to fulfill requirements for spill closure ; air samples should be analyzed for tetrachloroethene in addition to benzene, toluene, ethylbenzene and m- and p-xylenes, as report states; building heating system should be operated for minimum of 24 hours prior to sampling event, all petroleum-fueled space heaters should be removed. Forwarded letter as pdf to Drew Lent of SCA. - J. Kolleeny 02/15/07: Prepared letter approving Indoor Air Sampling Workplan prepared by Berger & Assoc., dated Jan. 24, 2007, incorporating comments by Charlotte Bethoney of NYSDOH. Had Vadim Brevdo and Amar Nagi of Region 2 DER review letter, and sent draft to Ms. Bethoney; all gave OK to issue letter. Sent letter (in eDocs) by email to Lee Guterman of NYCSCA, copying Drew Lent of SCA, Geoff Lacetti and Ms. Bethoney of DOH, and mailed letter to Ms. Guterman. - J. Kolleeny 05/25/07: Received Indoor Air Quality Survey report by Louis Berger Group, dated 5/8/07 (in eDocs); samples found no detections of tetrachloroethene, and low detections of petroleum-related VOCs within background levels listed in NYSDOH Soil Vapor Guidance Memo, except for marginal exceedances for m,p-xylene at two locations and ethylbenzene at background ambient air sampling location; xylene detections may be attributed to recent painting activities in area of samples. Report concludes that soil vapor intrusion is not a concern for site building, and recommends closure of petroleum spill case. Report was also sent to Charlotte Bethoney of NYSDOH. I will await her review. - JK 06/27/07: Received review letter dated 6/20/07 from Charlotte Bethoney of DOH on 6/25/07. Letter makes two comments: (1) Lab data sheets in report indicate data is preliminary, not final -

CONSTRUCTION SITE -NYCSCA (Continued) **S107408900**

please provide final validated data; (2) Lab analyzed samples for total xylenes, but report text refers to m,p-xylenes, so comparisons of data to m,p-xylene background levels is in error, comparisons and conclusions should be based on total xylene background levels. I forwarded letter by email to Drew Lent of NYCSCA on 6/27/07, he called and said report would be revised and re-issued. - J. Kolleeny 06/28/07: Received electronic version of revised Indoor Air Quality Survey Report dated 6/28/07 by Louis Berger Group, from Drew Lent of SCA (in eDocs). Report has finalized lab data, with no changes from preliminary data. Also, report references total xylene concentrations as requested by Charlotte Bethoney. Report concludes (again) that soil vapor intrusion into the school building is not a concern. Will await response from DOH. - JK 08/08/07: On 8/7/07, received letter from Charlotte Bethoney of NYSDOH commenting on Final Indoor Air Quality Survey Report (in eDocs). Letter states that, based on removal of contaminant source area, installation of vapor barrier beneath new school building, and results of indoor air quality investigation, exposures via soil vapor intrusion are not expected. Discussed with my supervisor, Vadim Brevdo, and agreed that based on remedial actions performed and indoor air survey results, spill closure is appropriate. On 8/8/07 I sent NFA letter (in eDocs) to Lee Guterman of NYCSCA, cc's to Drew Lent of SCA, Charlotte Bethoney of NYSDOH. - J. Kolleeny "

Remarks: "2200 yards of contaminated material have been removed since April. Old oil lines found in the ground during an excavation. Believe groundwater was affected. Clean up is still ongoing."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND Sangesland spoke with the homeowner - She says they have had a strong smell of oil in the house for several weeks. Today was a regular delivery, so she called the driver into the house to check. He said there was a leak near the boiler from an old oil filter canister. The filter was replaced last month by Petro and when the canister was put back, it apparently was cracked. Petro sent a service person to change the canister and he left speedie dry on the floor for a couple of days to soak up as much oil as possible (only 2 gallons?) Sangesland told the homeowner to leave the speedie dry for several days to absorb as much oil as possible. Then the material can be swept up, bagged in plastic and put out with her trash. Wash the floor with Dawn detergent. When the floor is as clean and dry as possible, the floor can be painted with epoxy paint to seal in any remaining oil vapor. 3/23/2004 Mrs. Prezzio called back to say the cleanup was complete and the oil problem has been taken care of. Spill Closed"

DEC Memo:	"10/08/04. J. Krimgold at site. Castle Oil made a delivery to a wrong address. The house doesn't have an oil tank, but the fill line was not properly abendoned. Tri-State was called to clean up. 10/15/04. Received a spill 0407868. Next door neighbor reporting oil in his sump pump in the basement and strong odor of oil in the house. Tri-State was directed to investigate and cleanup. JK. 11/16/04. J.Krimgold spoke to Stephany Woods (Response Env.) at 508-795-0110x203. She will submit the final report on 11/26/04. 01/18/05. J.Krimgold reviewed a report submitted by Response Environmental, Inc dated November 24, 2004. The cleanup and investigation have been completed. No contamination was found in soil boring on and off the site. NFA letter. "
Remarks:	"Abandoned fill line. Fill line was left, tank was removed. Castle Oil went to fill tank, and 28 gallons of fuel oil spilled into basement. Spill contained, p"

DEC Memo: "Old number at the site was Spill #9208762 Remediation did NOT want to reopen the old spill so a new spill number was created. 12/9/2005 Contaminated Soil Letter sent to: Chris Calhoun West Realty 611 West 148th St New York, NY 10031 12/12/05 - Raphael Ketani. I reviewed the November 2005 Site Investigation Workplan. They need to remove soil, and properly register the 2 275 gal. tanks and the 1 5,000 gal. tank. They have a PBS case#2-218235. I will send a letter regarding these issues to Ken Brooks of Galli Engineering (631) 271-9292 and to Chris Calhoun of West Realty. 12/19/05 - Raphael Ketani. I will send a letter to Chris Calhoun stating that they have to close out the 5,000 gal. tank and register the 2 275 gal. tanks. 12/20/05 - Raphael Ketani. I reviewed the 12/20 letter from Galli discussing the planned use of a soil injected oxygenate (ORC) to remediate the #2 fuel contamination. I will send a letter stating that they can try the ORC, but DEC wont approve this means of removing the contamination. If the contamination is still above TAGM 4046, then they may possibly have to remove more soil. They also have to try and remove free product and test the fill and vent lines, and check to see if the petrometer and return line are alright. 1/5/06 - Raphael Ketani. Mr. Brooks called me up to say that, at this time, he had no plans to remove soil. He said they will install wells first to check the groundwater. Then they will remove some of the contaminaed soil and take end point samples. He expects work to start 1/16/06, tentatively. Lastly, he said that the owners of the property intend to use the 5,000 gal. tank. 07/18/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. Contacted to Mr. Scott Davidale, Gallon Engineering at (631)271-9292 he said that work is still going on at the site. He will fax me the groundwater sampling report. -QA 07/28/06: Contacted to Mr. Scott Davidale he said they are still doing work at the site. Project Manager is coming on July 31st. As soon as everything will be done Mr. Scott said he will send report to me for closing the spill. -QA 08/18/06: Contacted to Mr. Ken Brook (Project Manager) he said that as soon as report will be ready he will send it to me. -QA 09/06/06: Called Mr. Ken Brook he said that he has not removed any soil and also he has not taken any soil sample. -QA 09/25/06: This spill will be reassigned. -QA 9/25/06: This spill case was transferred from Q. Abidi to J.A. Maisonave. - JAM 10/6/06: Bioremediation Work Plan was reviewed by the Department on 9/18/06. Kevin Carpenter in Albany provided me with some of his comments. I will write a letter to the Respondent requesting addition information. - JAM 10/19/06: Sent a letter to Mr. Nick DeAcetis MDG Design & Construction, Inc. 1328 New York Avenue Huntington Station, NY 11746 Letter requests additional information on proposed Bioremediation Work Plan. Letter states that the proposed Work Plan lacks adequate supporting data and the site investigation is incomplete. The letter will be in edocs. - JAM 11/1/06 Spoke to Ken Brooks at Galli Engineers (631-271-9292). Galli will perform bench tests to determine if non-native bacteria is needed, determine groundwater flow direction, and verify if the existing wells are properly installed and straddle the water table. - JAM 02/09/07 Reviewed Bioremediation Work Plan from Galli, dated January 4, 2007 and received January 23, 2007. I sent an email response only approving Galli’s proposals to: 1) perform a Bioremediation Pilot

COMMERCIAL BUILDING (Continued) **S103517643**

Test for the above referenced site to determine proper dosage amounts of the Biosolve NT and ORC products; 2) prepare the site by removing surface debris for the basement floor; 3) use a rototiller to break up surface soils and to level out the surface area; 4) evacuate the wells of floating product; 5) survey, gauge and sample the monitoring wells to determine groundwater flow direction and current groundwater quality. A comprehensive report should be submitted after the completion of the above tasks. The report should present a detailed remedial action plan, and should include groundwater gauging and sampling data (depth to water/ depth to product), a site location map showing surrounding properties, a site plan showing groundwater flow direction based on groundwater gauging data, and a site plan showing the contamination plume. The report should also include all chemical dosages. - JAM 03/14/07 Received a call from Ken Brooks from Galli. He said they went to the site to survey and sample the wells but found that all the wells in the basement were destroyed due to construction activities. There are three remaining wells outside the basement that are still intact but he wanted to hold off on surveying them until the wells in the basement are replaced. He said they will gather samples today for the bench/pilot tests and he should have results in about 2 weeks. The wells will be replaced at that time as well. - JAM 4/16/07 Spoke to Ken Brooks. The bioremediation bench test was completed by Regenesis and the results were good using a combination of two products. Ken said he will put together a package with the results and include a description about the injection process. - JAM 5/9/07 Reviewed the letter submitted by Galli dated April 16, 2007 which includes results from the pilot study performed by Micro-Bac (not Regenesis as stated above). The letter also includes remedial tasks for injecting a bacterica-nutrient mixture to address contamination. Tasks inlcude: - Attempt to locate remaining wells - Evacuate any remaining wells - Mix bacteria and nutrients as per the manufacturer's directions - inject the resulting solution using steel tubing and a positive dispplacement pump at 0.7gpm. Repeat throughout the affected area every 1 to 1.5 feet, and as deep as possible. I sent a letter today approving these tasks. Subsequent to the injections, monitoring wells must be installed in the basement to evaluate the remedial strategy effectiveness. During installation, soil should be screened with a PID and sampled at the deepest dry soil sample and at the interval with the highest PID reading. Samples should be analyzed for VOCs and SVOCs. After the wells installed, groundwater samples should be collected and continue on a quarterly schedule. The letter I sent and the letter from Galli are uploaded to edocs. - JAM 07/13/07 I visited the site today to witness the bacteria/nutrient injection for the enhanced bioremediation. Ken Brooks from Galli injected approximately 250 gallons of the mixture through a 6 foot length of stainless steel tubing. Only three wells were located, MW-02, MW-04 and MW-06. Mr. Brooks said that a second injection will occur in a few weeks. I requested that before the second injection, the remaining wells be gauged and sampled and if product is present it should be evacuated. The tank area and the tank itself have staining and show signs of petroleum contamination. I requested that they be cleaned. - JAM 7/23/07 Sent a Site Visit Follow-up Letter, based on observations from the July 13 site visit, to Mr. Nick DeAcetis at the address above. The letter states that the fuel oil tank and the surrounding area have visible petroleum impacts. The DEC requests the following: 1) The tank should undergo tightness testing; 2) The tank and surrounding area should be

COMMERCIAL BUILDING (Continued) **S103517643**

cleaned; 3) Contaminated soil should be excavated and end-point samples should be collected. The DEC also recommends that a concrete floor be poured around the tank; 4) Groundwater monitoring wells should be installed in the basement. A work plan with proposed well locations should be submitted for DEC approval. Also, corrections should be made to PBS registration. Tank location and product info are inaccurate. I sent PBS Application Form along with this letter, which in edocs. - JAM 4/28/08 Visited the site today to witness the second application of the bactreia/nutrient slurry injection. The concrete casing around the tank has been removed, however no soil was excavated from around the tank and alot of oil staining on the walls around the tank and on the tank remains. Pictures loaded to edocs. - JAM 8/5/08 Reviewed an Additional Site Investigation Work Plan letter dated July 28, 2008, submitted by Galli Engineering, P.C. The work plan proposes installing five (5) replacement monitoring wells in the basement of the above referenced site adjacent to the existing 5,000-gallon storage tank. Work plan uploaded to eDocs. I issued a letter today approving the work plan with the following adjustments: 1)Soil should be continuously screened using a PID meter and two soil samples should be collected, for laboratory analysis from each boring, one from the soil interval with the highest PID reading and another from the interval directly above the water table. If PID readings are non-detect then one sample from directly above the water should be collected and analyzed for the full TAGM 4046 list of petroleum related VOCs. 2)As stated in the NYSDEC letter dated July 23, 2007, The ceiling and walls of the tank area should be cleaned and contaminated soil around the tank should be excavated and end-point samples should be collected for laboratory analysis prior to backfilling. The NYSDEC recommends that a new concrete floor be poured around the tank when remediation is complete to prevent future releases of oil into the subsurface. A summary report should be submitted with recommendations. Letter uploaded to eDocs. - JAM 9/5/08 Visited the site to witness groundwater sampling. Scott Davidow from Galli sampled the five new wells. One well had free product, and another well was dry. Each well yield very little water so sampling for SVOCs may not be possible. A summary report including soil and groundwater samples and well installation logs will be submitted in 2 weeks. - JAM 11/19/08 Reviewed the Monitoring Well Installation and Groundwater and Soil Sampling Report submitted by Galli Engineering dated October 8, 2008. The report summarizes the installation of 5 new groundwater monitoring wells in the basement and results of soil samples collected during installation. Subsequent groundwater sampling results are also included. On August 22, 2008, five monitoring wells were intalled at the site. Groundwater was encountered at 8 feet below grade. Soil samples were collected from each boring and results showed no exceedences for VOCs, however some exceedences for SVOCs were reported and visibly stained soil and product was obersved in every boring. Groundwater monitoring samples were collected on September 10, 2008 from all wells and analyzed for VOCs except for well MW-1 because of the presence of free product. Free product was also observed in MW-8 initially but was gone after the well was purged. SVOCs were only analyzed from wells MW-2 and MW-8. The other wells did not yield enough water. Minor VOC contamination was detected in wells MW-2 MW-8 and MW-10. Minor SVOC contamination was deteced in MW-8. The report is uploaded to eDocs. Spoke with Scott Davidow from Galli and scheduled a meeting for tomrrow between DEC and Galli to discuss future remedial measures. -

COMMERCIAL BUILDING (Continued) **S103517643**

JAM 11/20/08 Meeting at DEC Region 2 office. Attendence: Joseph Maisonave, NYSDEC Jon Kolleeny, NYSDEC Ken Brooks, Galli Gary Blackler, Metro Environmental Gary Hughes, Metro Environmental Discussed alternative remedialy measures to address free product present in two monitoring wells and free product observed in the vadose zone of all of the other wells during installation. Galli will evaluate whether 2 inch wells could be installed in place of the 1 inch wells already installed and if the borings can go deeper. This would allow enhanced fluid recovery with a vac truck to remove the product. They will also look into cleaning the tank room with a solvent and painting the tank and the walls. A remedail proposal will be submitted by Galli for NYSDEC review and approval. - JAM 1/21/09 Reviewed the Site Remedial Action Workplan submitted by Galli dated January 16, 2009. The work plan proposes the following remedial activities: 1. Removal of part or all of the block wall forming the tank room. 2. Removal of soil from the basement floor. 3. Further cleaning of the exterior of the tank, and the tank room. 4. Removal of debris from around the tank. 5. One-time application of bacterial bioremediation nutrients. 6. Stockpiling soils and debris in a roll-off container. 7. Sample soils for disposal purposes. 8. Backfilling the excavation with clean fill. 9. Install three new 2-inch groudnwater recovery wells to a depth of 10 feet. 10. Vacuuming out floating product from the wells and dispose of waste water. There will aos be 4 new groundwater monitoring wells installed in the room adjacent to the tank (shown on Figure 1 of this workplan. Scott Davidow at Galli called me on Friday, Jaunary 16. He informed me that the wall has been removed and the basment floor is being excavated. I informed him that end-point soil samples should be collected and I should be notified prior to the collection of those samples and prior to backfilling the excavation. He will notify me when Galli goes to collect the samples. I aslo suggested that the excavation remain open until the results are returned. I also suggested that Galli contact the vendor providing the bonutrients and inquire about the effectiveness of their product based on the conditions at this site. The workplan is uploaded to eDocs.- JAM 1/26/09 Visited the site today to witness the excavation around the tank. Chris Calhoun from West Realty (property owner, email: westrealtygroup@hotmail.com) and Scott Davidow from Galli Engineering attended. Soil around the tank, and from the two adjacent rooms had been excavated to depths ranging from 1 to 3 feet. Soil directly under the tank could not be removed and was stained with oil. Galli collected 2 soil samples, one from directly under the tank and another from the adjacent room, approx. 7 to 10 feet from the tank. I advised Galli that the soil under the tank should be removed by any means possible. I suggested either supporting the tank so the soil could be removed or temporarily relocating the tank so the soil could be accessed. He will get back to me with Galli's proposal. - JAM 3/9/09 Received soil analytical results on March 5, 2009 via email. Two soil samples were collected from the basement floor on January 26, 2009. Some VOCs and SVOCs were detected however the concentrations were below TAGM. I sent an email today stating that the excavation could be backfilled and the tank stabilized. The Remedial Action Workplan should proceed as planned with the installation of 2-inch groundwater monitoring wells. I requested a report be submitted after the wells installed which summarizes all analytical results. - JAM 4/22/09 Received a call from Scott Davidow at Galli Engineering. He said that the tank was suspended and

COMMERCIAL BUILDING (Continued) **S103517643**

contaminated soil beneath it was removed. I met with Scott Davidow at the site today to witness the open excavation. Three rolloff containers have been filled with oil contaminated soil and the forth container is half full. The bottom of the excavation showed a little product floating on water which entered the excavation. I requested that the excavation extend in all directions as much as possible and end-point samples should be collected for VOC and SVOC analysis. I also requested the groundwater monitoring wells be gauged for product and sampled as well. I expect a report within a few weeks. - JAM 7/28/09 Received a Summary Report of Spill Closure Activities however, it did not include a table summarizing gauging data and product recovery. I called Ken Brooks and requested the report be revised to include that table. - JAM 9/2/09 Visited the site today. Met with Frank Gehrling from Galli and Allan Heussinger from West River Assciates, LLC (RP). Frank gauged the product in wells MW-1, RW-1, RW-2 and RW-3. Petroleum absorbent socks are installed in wells RW-1, RW-2 and RW-3. wells RW-1, RW-2 and MW-1 had the most measurable product. Well RW-3 only had some slight staining from a sheen. I suggested that vacuum enhanced fluid recovery be implemented to expedite free product recovery. Frank said he will look into it and get pricing and try to schedule it for next week. I also requested a table summarizing the product gauging and recovery data. Ken Brooks from Galli called. I explained to him that spill closure is not possible while free product continues to enter those three wells. Vacuum recovery is one way to move this spill towards closure sooner. - JAM 9/9/09 VEFR performed today. Vac-truck was on-site and recovering by 8:30am. I visited the site and met with Frank Gehrling and Allan Heussinger. A summary report will follow. - JAM 9/25/09 Received the Revised Summary Report dated September 17, 2009 (original Summary Report was dated July 28 but did not include product gauging and recovery data). The Summary Report includes all remedial work performed to date including excavation of contaminated soil, groundwater sampling results since February 2006 and soil sampling results from well installation and the excavation end-points. Approx. 45 tons of contaminated soil were excavated and disposed of. Minimal dissolved phase contamination has been detected in any GW samples. Soil samples also show minimal contamination. Section 5.1 shows Free Product Recovery data since February 2006. Well MW-1, which is a 1-inch well installed adjacent to the tank, has yielded the most free product (measuring approx. 0.76ft. on Sept 2, 2009. Five wells, MW-1, MW-8, Rw-1, RW-2, and RW-3, continue to show either measurable floating product or product sheens. Reviewed the Letter Report for Product Recovery dated 9/10/09. On 9/9/09, vacuum enhanced fluid recovery was performed on wells MW-1, MW-8, RW-1, RW-2, and RW-3. 200 gallons of oil/water mixture was removed from the site and an estimated 1 to 2 gallons of that was oil. MW-1 had the most measurable oil with a thickness of 0.49ft. After VEFR was performed, the thicknesses in all the wells were either trace product or a product sheen. Petroleum absorbent socks were installed in the wells. Reviewed the Letter Report for Product Recovery dated 9/17/09. On 9/16/09, wells MW-1, MW-8, RW-1, RW-2, and RW-3 were gauged for product and the product was removed with a hand bailer and petroleum absorbent socks. MW-1 had only a trace of oil and wells RW-1 and RW-3 had strong sewage odors. Well RW-2 was dry. Galli states that the sewage which appeares to be in the two wells is negatively affecting the hydrophobic properties of the petroleum absorbent socks. In the original Summary Report cover letter dated July 28, 2009, Galli says

COMMERCIAL BUILDING (Continued) **S103517643**

the walls and ceiling of the tank room will be grit blasted to clean the petroleum stains. This being a dry process will keep any liquid from recontaminating beneath the tank. Galli requests spill closure. I spoke with Ken Brooks from Galli on Sept. 22, 2009 and said that the spill cannot be closed at this time since there is still product in a number of wells. Monitoring should continue until the product is removed. All reports were uploaded to eDocs. - JAM 6/1/10 Spoke to Brandon Fuld from Galli Engineering today. He said that there are several wells on-site that have been used for product recovery and the product levels in those wells has decreased to a sheen. The product recovery was done with a vacuum truck and the last event was in April 2010. I asked for a summary report for all of the work that has been performed. Brandon will submit the report by the end of this week or early next week. - JAM 10/20/10 Email correspondence from Ken Brooks at Galli on October 4, 2010: Joe- When we spoke on 9/22, you mentioned a couple changes you wanted to see in the letter and report. I jotted a few of those down, but was expecting comments in writing. If you won t be sending a letter, please email me with the requested changes. I know you wanted cleaner copies of the well logs, with units; well designations; anything else? Ken Brooks, PE Senior Vice President Galli Engineering, PC 734 Walt Whitman Rd., Suite 402A Melville, NY 11747

Reply sent to K. Brooks on October 7, 2010 Ken, Please also submit a Site Figure with clear designations for the wells. Please do not submit a site figure that has hand-written items. Thanks, Joseph Maisonave Environmental Engineer 1 NYSDEC Region 2 Division of Environmental Remediation 12/02/10: This spill case transferred from J. Maisonave to J. Kolleeny. On 11/30/10, received hard copy of Rpt of Remedial Actions by Galli Engineering, P.C., dated 11/24/10. Rpt summarizes remedial actions performed at site, and provides data fof vac truck events from Oct. 2009 thru July 2010, showing generally decreasing product thicknesses. Rpt requests spill closure. On 12/2/10, I contacted Ken Brooks of Galli, requested pdf file of rpt for eDocs, and asked if well gauging measurements for vac truck events were taken before or after vacuuming wells. He was unsure about this, said he would send pdf file of rpt and get back to me about well gauging data. - J. Kolleeny 01/03/11: Received email from Ken Brooks of Galli Engrg: Do you have everything you need to review our closure request on spill? I sent email reply: Hi Ken, According to my notes, I spoke with you on Dec. 2, 2010 and asked that you send a pdf file of Galli's Nov. 24, 2010 Rpt of Remedial Actions for our database, and I also asked if you would find out if well gauging data in rpt represented measurements taken before or after vacuuming of wells. I have not yet received pdf file of rpt, or an answer to my question about well gauging data. Also, as I said when we spoke, it is contrary to DEC policy to close spills when there is measurable free product present in wells. Last monitoring data, from July 2010, showed 0.10 feet of product (more than an inch) in well MW-1 (1 diameter well), and 0.07 ft of product (little less than an inch) in recovery well RW-4 (4 diameter well). Tolerable levels Galli rpt cited from DEC's Spill Guidance Manual all refer to levels of dissolved-phase GW contamination; I see no reference there to tolerable levels of free product. On other hand, DEC's Guidelines for Petroleum Spill Inactivation state that free product should be removed to maximum extent feasible. Gauging data in rpt show more or less steady progress in reducing product thicknesses from Dec. 2009

COMMERCIAL BUILDING (Continued) **S103517643**

thru July 2010, as result of vacuum truck events; they do not, in my opinion, represent a dead-end situation. I recognize that a lot of work has been done at this site, and I too would like to see this spill case closed. If you could do following, it would help me greatly in achieving this end: 1. Please send pdf file of rpt. 2. Please confirm whether well gauging data was collected before or after vacuuming. 3. Please gauge wells again to determine current product thicknesses; if there is significant measurable product in any well (0.08 ft or more in 1 diameter well, or 0.05 ft or more in 4 diameter well), conduct another vacuum truck event and then re-gauge well(s) after allowing water and product to fully recharge into well(s) and reach equilibrium, and send me data. - J. Kolleeny 02/16/11: On 2/11/11, received email from Ken Brooks of Galli Engrg: Do you have everything you need to review our closure request on spill? I sent email reply stating that I had sent email regarding site on 1/3/11, and attached said email. On 2/14/11, received response from Ken: That s last email I have, and one that I expect should have been responded to by now. I m assuming you did not and will look into this. On 2/16/11, received email from Ken: I ve attached pdf of final rpt as you requested [in eDocs]. In answer to your question, wells were always gauged before vaccing them out. I will contact client about setting up another round of gauging and product removal and will contact you with updates. - J. Kolleeny 04/08/11: Reviewed letter rpt presenting results of gauging of 4 wells and liquid removal at site, prepared by Galli Engineering and dated 4/5/11 (in eDocs). Data show product in wells has decreased to trace or non-measurable levels; following gauging, approx. 63 gallons of liquid were removed from wells. Based on data, I closed spill and sent spill closure letter (in eDocs) to Allan Heussinger of West Realty Group, 875 St. Nicholas Ave., #1, NY, NY 10032, cc to Ken Brooks of Galli Engineering. - J. Kolleeny "

Remarks: "PHSE TESTS WERE TAKEN AND THEY FOUND PETROLEUM CONTAMINATION UNDERNEATH THE TANK, OUTSIDE FILL PIPE, AND THE GROUND IS STAINED. GROUNDWATER WAS ALSO TESTED AND PROVED THAT THE WATER IS CONTAMINATED."

Larry C Hughes 18341,Mechanic A, Maintenance Services Was at this location doing a inspection in SB40856, and found approx one half gallon of fuel oil on top of 5 gallons of water. There was no fire or smoke involved and no sewer or waterway was affected. There were no injuries related to the spill and no weather conditions contributed to the hazards of the spill. There was no private property affected. The source and cause of the

SERVICE BOX 40856 (Continued) **S107408961**

spill is unknown. Environmental tag #42712 was installed. There is standing water but no visual water movement. There is no sewer connection; no substantial cracks and a concrete sump could not be verified due to the amount of fluid in the hole. Chain of Custody # EE05020, Samples taken for PCB, ID & Flashpoint. Logger F.Curtis 38078. 9/13 @ 21:20. Lab Sequence Number: 05-09610-001. Oil Identification Analysis indicates the presence of a mixture similar to a light fuel oil and 9/13 @ 23:15. Lab Sequence Number: 05-09609-001. < 1.0 ppm. Lab Sequence Number: 05-09609-002 Flash Point Test. Flash Point, PMCC > 140 deg F Update: 9/15/05 @ 15:55 hrs. Manhattan Environmental Desk made arrangements to have this service box cleaned on 9/15/05 at 11:30 hrs. UG crews, Tanker and Vactor truck scheduled. Operating Supervisor, UG North reported that there was a car parked over the service box, which prevented access to the structure. The next available parking access is Monday, 9/19/05. The Manhattan Environmental Desk, therefore, made a decision at 15:50 hrs. to re-classify this incident as a reportable spill since the cleanup will not be completed in 72 hours. The Incident Type was, therefore, changed from Spill - DeMinimis (72 hr. underground) to Spill - Fuel Oil . R. Pellegrino #38620 "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 10/10/95: This is additional information about material spilled from the translation of the old spill file: POSSIBLY HEATING OIL. 5/10/04 - AUSTIN - TRANSFERRED FROM TOMASELLO TO DEMEO - END 8/23/05 - Raphael Ketani. Case transferred to Jeff Vought. 07/25/08-Vought-Spill reassigned from DEC Vought to DEC Ketani as per DEC Austin. 3/30/09 - Raphael Ketani. I restarted the case today. I made an unannounced site visit to get an idea of what the case involved. The site is a series of three townhouses. Each has been divided up into several apartments. The townhouses are across from a park and the City College of New York. The townhouses at 419 and 417 West 141 Street both use oil. A patch was visible in the sidewalk which corresponds to a picture in the case file of a concrete patch being constructed many years ago after the removal of the contaminated soil. I rang the door bells and intercom buzzers to the buildings, but no one was home. 5/29/09 - Raphael Ketani. I spoke to Bonnie Riggi of the Office of the Attorney General regarding the 8/1/2001 Demand Letter. She said that they collected on the entire amount. According to the documentation in the 11/2/95 Winston Contracting pay package, the broken fill pipe and the associated fill box were replaced in front of 419 W. 141 Street and the spill was remediated where it affected 415, 417, and 419 West 141 Street. There is a 9/9/95 letter from A.R. Fuels to Winston Contracting indicating that the fill line and box were replaced. The 8/11/95 and the 11/27/95 remediation reports from Winston Contracting contain pictures showing the line and box replacement, the contaminated soil removal, and the rest of the remediation work that was performed. I brought this case to the attention of Randall Austin, Chief of the Spills Unit, and told him that I wanted to write the Final ISR and close the spill case. He said to go ahead and do this. 6/2/09 - Raphael Ketani. The Final ISR was submitted to Mr. Austin and Lou Oliva, Regional Attorney, for their signatures. They signed the FISR and it was forwarded to Dennis Farrar in Albany DER. As A.R. Fuels had replaced the broken fill pipe at 419 W. 141 Street, and as Winston Contracting had removed the old fill pipe and had cleaned up the spilled oil in #419 and in #417 and #415, and as the OAG had

TOWNHOUSE (Continued) **S102150184**

recovered the money that was expended to do the remediation work, I am closing the spill case. 6/15/09 - Raphael Ketani. Today I received a copy of a letter dated 6/11/09 from Mike Johnson of Albany Spills to Mr. Hasso of the Comptrollers office indicating that they considered the spill cleanup project to be complete. The letter was E-doc'd. "

DEC Memo:	"e2mis no 157819 03/28/05 21:40 D.Floody#12527 reported approx. 1 gallon of unknown oil and approx. 100 gallons of water. There was no fire, but there was smoke and no sewers or waterways were affected. The weather conditions did contribute to this spill, due to the heavy rain fall. The source and the cause of the spill is unknown at this time. There is oil filled equipment in this structure. A yellow environmental tag numbered #38845 was hung in TM3330. The water is standing, with no visible movement. There are no substantial cracks in TM3330. There were two samples taken from TM3330, one for PCB'S and one for oil ID. The samples were marked priority E. The chain of custody form number is #CC13064. There was no intial cleanup action taken, the clean is pending feeder denergization, lab results, crews and a tanker. Update: 03/29/05 @ 09:20 hrs. Norman L Downes, 16687 Mechanic A, of I&A Dept. reports that at this time due to the location of this clean up, it will have to done on the off hours. He explains that TM 3330 is in center of street and his hampering the traffic flow in the area. Update 3-29-05 @ 11:30. R Biliski # 04919 reports that there is no visible oil in the structure and the transformer is holding pressure. Cleanup will be pending lab results. NOTE: From the onset of this incident the courier was not available until 11:20. J Moran # 01182 3/29 @ 20:41. Lab Sequence Number: 05-02850-001 Results of Analysis: The presence of oil was not detected in the sample. R. Bruns # 21106 3/31/05 19:09 F. Joseph # 05658 of the IA& called to report that the cleanup was completed at 18:30. The tanker removed 360 gallons of liquid, The structure was double washed with slix. He does not believe oil came from the structure although he states that he will turn in the transformer in for replacment due to not holding pressure & rust. His partner in the cleanup was T. orouke # 92460. The forman was R. Biliski # 04919. The spill tag # 38845 was removed. R. Bruns # 21106 Closed 6-28-05. George Breen "
Remarks:	"smoke and transformer involved. Unknown oil. 1 gallon on 100 gallons of water. 157819."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD Problem started in Jan 2000 with contamination found in the basement of a house 4/3/2000 Vinnie from Island Tank is going up to Mr. Pottinger's house to do more digging in the basement and take some more soil samples. Hopefully there will be clean end point samples and the spill can be closed out. 4/24/2000 Sangesland received a letter from Vincent Lovari of Island Environmental Tank Maintenance Corp. (718-967-9424) Letter states that in January 2000, Mr. Lovari found that the fill and vent lines were corroded causing the contamination problem. The lines were removed and replaced. In Feb 2000, Island Environmental excavated out an area approx 5' x 20' and 9' deep. In March 2000 Island continued excavating in the basement. On April 6, 2000 Island Environmental collected 4 soil samples. These results were submitted to the NYSDEC, but no analysis was made by the consultant. The letter dated 4/24/2000 ends with the statement Island Environmental Tank Maintenance Corp. is continuing to excavate until they feel area is totally free of contamination. No request for closure was made by the consultant. After NYSDEC review of the lab data, and discussions with the consultant on the size of

POTTINGER RESIDENCE (Continued) **S104509454**

the excavation, the NYSDEC is closing out this site. "
Remarks: "fill pipe is broken and the customer has a ditch in hte basement unk why - when tank was filled - the oil spilled into the foundation and into the ditch"

DEC Memo:	"5/20/16 - Ahmed - Spoke to Betty at Petro (718-628-3339). As per her, Petro service tech was there today and observed a line is

BOILER ROOM (Continued) **S118704825**

leaking on concrete in the basement and there is a sump pump. Called City Tabernacle Church (212-234-5630) and left a message requesting call back. 5/21/16- Ahmed - Called City Tabernacle Church again and left a message requesting call back. Called DEC Demeo and requested to respond there to get the clear picture as the church is not calling back. 5/21/16 TJD Recall - site inspection. Met onsite with custodian (Patrick Wallcott 347.678.5261) at City Tabernacle Church. Spill due to leaking union on aboveground 1/2 inch suction line in boiler pit of basement mechanical room. At time of inspection, an estimated less than 5 gallons of product was observed to be floating on standing water. Leak was stopped the previous evening by technician from Petro Oil. Cleanup pending the arrival of Milro Associates. Church representative informed DEC that the work was scheduled for Monday 5/23/16. As leak has been stopped with no significant odors interior to the structure, DEC advised building staff to contractor and schedule cleanup earlier if possible. All product contained in concrete boiler pit. Water bottom present - sump pump was unplugged pending completion of cleanup. Spoke with Dot Napoli at Milro Associates. Confirmed initial cleanup was performed by Milro on 5/21/16. Contractor is returning to site for final cleanup. 2/9/17 TJD File review - closure report submitted by Milro Associates. As per above notes the spill was caused by leaking suction line, associated with a 1,200 gallon AST. Leaking line was repaired by Petro Oil. As part of remedial efforts Milro removed 350 pounds of contaminated debris and recovered 80 gallons of oily water. Based upon the nature of reported event, a 5 gallon spill and the documented contractor activity to remediate the spill there is no further action required at this time. Spill file is administratively closed. All documentation has been uploaded to DECDOCS."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 141th St & 7th Ave (Morningside heights) 173 West 141 St (sump building) 2419 7th Ave (Tank building) 05/02/01 (M. Tipple) APPLIED TECHNOLOGY SERVICES (914-654-0080) NEIL VANDERWOUDE WILL BE THE CONTACT PERSON FOR THIS CLEANUP AN ELEVATOR PIT IN AN ADJACENT BUILDING IS CURRENTLY BEING THE UNPLANNED RECOVERY PIT. tHE LEAKING TANK IS AN 3000 GAL. ABOVE GROUND VAULTED TANK. IT WAS DRAINED SOON AFTER DISCOVERING THE LEAK. IT IS CURRENTLY BELIEVED BY THE CONSULTANT THAT VIBRATION FROM A NEARBY CON-ED EXPLOSION MAY HAVE BEEN A FACTOR IN THE TANK LEAKING. THE CONSULTANT WILL BE WORKING ON DELINEATING THE CONTAMINATION. 5/17/2001 - Notes above were entered while Sangesland was away. Contact: Steve Vanderwoude from Applied Technologies. Tank is out of service (temporarily for the season) Shortly after the Tank and oil(elevator) pit are 30 to 40 ft apart (in next door building) Same owner on both buildings. 8/15/2001 Sangesland called both RP - Jeffery Garfinkel 212-967-2200 and the consultant Neil Vanderwoude. Neither was in so messages were left. 6/20/2002 Sangesland called both RP - Jeffery Garfinkel and consultant Neil Vanderwoude again. Once again neither was available and messages were left. 3/26/2004 Sangesland called both RP - Jeffery Garfinkel and consultant Neil Vanderwoude again. Once again neither was available and messages were left. 6/15/2006 Sangesland called both contact numbers associated with this case. Voice messages were left again. 9/14/2010 Mr. Mike Guarino (fax 212-807-0534) contacted Sangesland and asked what work would be needed to close out this case. Requirements: Site plan, Photos, Soil borings of area between tank and elevator pit next door, lab results showing the area is clean. Consultant needs to call DEC Sangesland to discuss, before any testing work is done. Copy of this report was faxed to his office.

REPUBLIC INVESTMENT CO (Continued) **S104951161**

10/12/2011 Sangesland reviewed a report prepared by Merritt Environmental Consulting (see eDocs) Which showed that there was no petroleum present on the site. Various borings were drilled, elevator shaft was inspected and drains traced. Any oil which may have been on the site in 2001 is no longer there. Based on this report, the NYSDEC is closing this case."

Remarks: "contaminated soil found surrounding a partially exposed tank. tank was filled with approx 3000 gals - unknown how much still in tank."

Contact Name:	SUSAN WOLDENBURG
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 9/16/03, ROSSAN; DDO- Called Susan Woldenberg, who confirmed that oil is coming into her cellar from the adjacent building. The adjacent building is owned by the City HPD. The address is: 531 West 152 Street New York, NY The Building Manager is Brenda Washington # 212-694-2507 Chris, who was acting for Tim, decided to visit the site. Ed. 9/19/03 1558 Hrs - Sawyer went by the residence no one was home. Called Mrs. Woldenberg and left a message on her answering machine. She has called me and left a message and I will make an appointment to go see her basement. JUNE, 2005 As part of Spill Reduction Backlog Initiative, Spill #0306374 was assigned to Jason Pelton. JULY 22, 2005 Jason Pelton called current property owner Susan Woldenberg. Susan was the person who reported the spill. Susan indicated that when it rains, an oil or a gas-like substance comes through the basement walls. Jason asked Susan to take a few digital images and email them to the Division. Jason emailed Susan and she responded, but never sent digital images. AUGUST 10, 2005 Jason spoke with Brenda Washington at the NYC HPD Office of Property Management. Brenda indicated that she is not the project manager for the property. Instead, Dan Taveras is the property manager. Jason left a message with Dan Taveras and is currently waiting for return information. SEPTEMBER 20-21, 2005 Jason left a voicemail message with Dan Taveras. Dan Taveras returned a phone call and left a voicemail message with Jason Pelton. Jason returned phone call and left a voicemail message with Dan Taveras. OCTOBER 12, 2005 Jason left additional message with Dan Taveras and is currently waiting for return information. DECEMBER 21, 2005 Spoke with Dan Taveras. In response to a violation, they responded by having the tank inspected by their boilermakers. The inspection showed that nothing was wrong

APARTMENT BUILDING (Continued) **S106018159**

with their tank. Dan suggested that I contact James Edgeworth with his office at (212) 694-3977 . James keeps the administrative records on properties and any information on this tank should be in those files. Dan mentioned that the City sold property to George Barbee, Limited Partnership approximately 6 months ago. George Barbee's contact information is: 507 West 145 Street (212) 234-1660 Dan also mentioned that I can contact Carl Worrell at (212)863-7426. Carl is with the Housing Preservation and Development Agency. They sell the property under a contract and monitor the rehabilitation of the property. DECEMBER 21, 2005 Left message with James Edgeworth. Spoke with his secretary. She said property was sold, but they may still have some records on it. She will have James call me back. DECEMBER 30, 2005 I called and spoke with James Edgeworth. He indicated that he tried to get back in contact with me, but must have been given the wrong phone number. James confirmed that the boiler had a small oil leak. The NYC HPD issued Work Order Number K403437 to make the necessary repairs to the heating oil tank. James indicated that the repairs were completed in-house, using Housing Preservation Development staff. The tank repairs were completed on 9/16/03. James also mentioned that the property was sold 6/15/2005. James indicated that he will locate the tank repair documentation and forward that to me. DECEMBER 30, 2005 Left a voicemail message with Susan Woldenberg. She was the person who reported the spill in 2003. Based on documented repair work of the heating oil tank, no actual documented spillage of oil, overall age of the reported spill, and lack of a reponse from the spill reporter, Petroleum Spill 0306374 was closed by Jason Pelton on December 30, 2005. Jason will continue to communicate with James Edgeworth and will obtain the tank repair documentation."

Remarks: "caller states that for months oil has been coming through the walls of the building. She was originally told that the spill would stop naturally and it has continued causing a strong odor. caller states that she has been pumping the materials out of her basement"

DEC Memo:	"11/02/18-Hiralkumar Patel. alternate address: none no other spills found. PBS #: 2-238201. as per PBS record, the site has one (1) 1,500 gal AST in contact with soil, in-service, installed in Dec. 1913. the PBS registration expired on 06/30/2017. 1:10 PM:- spoke with Steven Tyree (631-300-6711) at Metro Env. he mentioned that the site has one (1) 1,500 gal AST wrapped in concrete. he stated that technician found oil stain on concrete floor outside the tank wrap. technician is currently inspecting tank area to locate problem. asked Steve to send site pics. 1:22 PM:- spoke with Caoline Land at the church. she mentioned that Sprague Energy delivered oil to the on-site tank system about week and half ago and there was no issue during the delivery. on 10/30/18, Father Gilberto observed oil on basement floor near the tank and reported to oil company. Ms. Land confirmed no odors in the building except near the tank location. Our Lady of Lourdes Church **property owner** 463 West 142nd Street New York, NY 10031 Attn.: Gilberto Angel-Neri email: revfatherg@gmail.com Caroline Land email: lourdes463@aol.com 2:02 PM:- sent letter, including PBS application, to Mr. Angel-Neri requiring tank test, spill cleanup and PBS renewal. asked him to submit report by the end of 12/21/18.

CHURCH (Continued) **S123160179**

letter emailed to Mr. Angel-Neri and Ms. Land. case assigned to DEC Zhune. 12/12/18-MES (Metr Environmental Services LLC) emailed the spill closure report. The report stated that MES crews arrived to discovered a spill of oil estimated to be 6 gallons of suel oil. MES called in to the DEC hotline and obtained Spill # 1808254. The oil was contained to the concrete on the basement floor and inside a small containment area. The spill was cleaned up with absorbents and absorbents booms were placed around the tank area to prevent any migration. Contaminated absorbents were drummed into 55-gallon drum. MES brought in a 275-gallon temporary tank and transferred some of the oil from the 1500-gallon tank into the 275 and piped the tank for temporary use. The remaining fuel oil was pumped out of the 1500-gallon tank and the tank was rinsed clean. Documentation of the excess oil disposal is found in the appendix. Photographic documentation of the tank and spill is found in the appendix. The drummed absorbents and debris are scheduled for disposal. MES will send along the disposal documentation when it is available. The oil tank was abandoned in place. Soil sampling was conducted under the tank area at Our Lady of Lourdes. A sample was taken from each end of the tank area. A summary and the analytical report are attached . There were a few minor exceedances for some semi-volatile compounds (Benzo anthracene 2 mg/kg, Benzo (a pyrene 1.4 mgr/kg, Benzo (b) fluoranthene 1.6 mgr/kgr, Benzo (k) fluoranthene 1.5 mgr/kgr, Chrysene 2 mg/kg, dibenzo (a,h)anthracene 0.4 mgr/kgr, indeno (1,2,3-cd)pyrene 1.1 mgr/kgr). Since minor in nature. As per your request via phone, attached are two phots showing that the piping on the former AST is aboveground. This is in the basement of the church. The old tank has been closed in place and a new tank installed I did check with the project manager and the crew that did the work, and they do not have a picture of the fill port. They did concur that all piping is above ground for the tank. Spill Closed. "

He stated that sewer/waterway may be affected because when he put a pad in the exit pipe he saw fluid on the pad, but at this time there is no definite indication that the environment was in fact affected. According to Conduit plate 57-G-1 there is a sewer connection. He disconnected the pump. The source of the spill was the Transformer and the cause is damaged equipment. No initial cleanup has been taken Lab Sequence Number: 03-02812-001 TOTAL PCB 35 ppm 4/4/03 The tanker removed 190 gallons of oil from the unit and 125 gallons from the floor the unit oil capacity is 315 gallons. The vault was double washed with slix and all debris was removed by the flush truck. Final cleanup pending removal of the transformer. 4/30/03 cleanup is complete as of 115. Double washed with slix and flushed. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was AUSTIN -4/21/00 Spoke to Tommy at BLT. A couple of gallons spilled outside on cement - contained and cleaned. When they went opened the tank vault in the basement, they encountered more oil. BLT is going to vac out the vault. BLT was trucking for Castle Oil - contact Jim Carey 579-3414. Tank Petroleum will do the repair on the tank system. The gauge read 1200, but when they tried to deliver 3000 gallons, the oil came spraying out of the fill. They think maybe there's something clogging the vent. It's a 5000 gallon tank in the basement in a cement vault. No odors in the apartments. Spoke to Felix at 212-234-4184 (name/number from prior spill 9611052 - also gauge malfunction that caused overfill.) He confirmed what Tommy said about both spill areas and that there are no vapors in the apartments. 9/15/03 - AUSTIN - THIS SPILL AND # 9611052 REVIEWED BY ME - CLOSED THIS ONE DUE TO CIRCUMSTANCES DESCRIBED BY WITNESSES - ORIG. ASSIGNED TO ROMMEL - END"

DEC Memo:	"11/6/2014 - Feng - Duty Desk. Spoke to Dot Napoli of Milro (516-379-1500). She had spoke with R. Piper, today's runner, and sent him some site pictures. Assigned the spill to R. Piper. DEC Piper spoke with Milro Tech Brandon. As per conversation, there was a water leak in the basement in which a puddle extended uunderneath the boiler. He said there wasa sheen on the water thouugh no visible oil droplets or leak from system. He did not feel there was a significigant oil leak and Milro will not be perfroming any work as they need a plumber. I spoke with Maria Armstead, she had the water

MARIA ARMISTEAD (Continued) **S110824005**

leaks stopped andthe kitty litter that she put down has dried up. Basedo n conversations with Milro and homeowner, this spill is closed. "

Remarks: "loss to unintact basement floor and sump, unk amount. C/u pending"

APARTMENT (Continued) **S108467522**

J&M Realty Services Corp.. Letter included invoices of work done by Petroleum Tank Cleaners (PTC). Fuel burner was running more frequently than usual using a large amount of oil. Faulty vent and fill lines prevented the tank from passing tightness test. No oil was lost. He will have PTC send me a letter within the next two weeks. No mention of petroleum contamination. bf 4/16/07 Received letter from J. Edelman on 3/14/07. Letter states tank was tested and is tight. Test results included in letter. Tank passed on 1/25/07. bf 6/14/07 Called Jerry Edelman and left message requesting letter regarding petroleum contamination. Also, called Mark Salamack of PTC and lerft message to call me back. bf 6/15/07 received fax from PTC stating that no contamination was found. NFA. bf "

Hess has hired ABC Tank Cleaners (718-272-2800) They were on their way to the site as of 3:15PM Building Super is Giovani 646-529-5757 Unknown if it is a simple clean up, or if there is a digout/repairs to be made. 03/01/06 Sharif Rahman-I spoke with the building super, Giovani(646-529-5757). He told me the gauge was not working properly and they cleaned it up. Need to know the cause of the spill. I left a messege for building manager, Mr. Abidin from PINNACLE Group,(212)222-7206. 03/27/06 Sharif Rahman- A violation letter was sent to Pinnacle Group 106 W. 105 Street New York, NY 10025 Attn: Abidin Radondic,Fax:(212)222-8459 05/02/06 Sharif Rahman- Department has not receive any correspondence regarding the spill clean up. I faxed the previous letter to Michelle Morales @(212)729-5495.Her office no is (212)564-2111 x 3021. 07/11/06 Rahman- I called Michelle Morales today again to follow up on the spill, DEC has not received any report about the clean up, she said she would send the paper works to DEC. 07/14/06 Rahman-Rec'd work invoice from ABC tank regarding the closure of the spill.ABC tank pumped out and washed the area affected by the oil spill.The

APARTMENT (Continued) **S107410697**

cause of the spill was overfill from a precut on top of the tank.Approx. 75 gallons spilled on the floor.ABC tank fixed the pre cut on the tank.Need to check the floor condition for cracks,leakage. 08/07/06 Rahman- Inspected the floor, found no drain, cracks, condition looked good.NFA required. "

Remarks: "IS EITHER A LINE PROBLEM OR OTHER: STILL CHECKING: SERVICE MAN ENROUTE: NO DRAINS ALL CONTAINED IN BUILDING:"

DEC Memo:	"09/21/13-Hiralkumar Patel. 5:05 PM:- spoke with Dee at DEP. she noticed spill onto sidewalk, near vent pipe. she confirmed cleanup completed by by FDNY. she could not inspect inside the building. 09/23/13-Hiralkumar Patel. 9:00 AM:- visited site. neighbour provided access, as super was not at site. front part of basement was flooded. very light petroleum sheen noted on flood water. no petroleum odors noted in basement. 9:23 spoke with Carlos, building super. he mentioned that there is sewer line leak in basement. plumber was working to fix the leaking sewer line. plumber pumped liquid onto sidewalk. Carlos mentioned that Casanova Oil (917-440-8460) delivered oil on 09/21/13. due to a loose plug on a 275 gal AST in basement, some oil spilled in basement and mixed with pooled water. without knowing proper cleanup method for oil spill, plumber started pumping oily water onto sidewalk. FDNY responded for initial cleanup. cleanup was resumed and completed by oil company over the weekend. during site visit, no signs of spill noted from vent pipe. Carlos. - super Ph. (646) 276-0252 based on available information and observations during the site visit, case closed."
Remarks:	"Furnace backed up into the street. FD took care of spill with absorbant"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 6/8/04 Tipple responded////cleanup not completed, informed cleanup person of the deficiencies, he unloaded his cleaning supplies and continued with the cleanup. 6/8/2004 Sangesland visited the site later in the day. Spill had been adequately cleaned up. DEC tried to look at the tank in the building basemnt. There was no door to the tank room. It was clear where the tank was, but there was no access. Sangesland spoke to the Super and the property manager and asked them to install a door so an inspection could be made. 6/22/2004 Sangesland followed up with a telephone call to the property manager to ask if the doorway was installed yet. Answer was NO, but they are working on it. Contact: Clara Mendoza 914-997-2435 x 117 8/2/2004 Sangesland left a message on Clara's voice mail asking if the door has been installed and if the tank is ready for an inspection. ********** *****HOLD THIS SPILL OPEN UNTIL THE TANK CAN BE INSPECTED**** ********** 8/3/2004 Sangesland called Clara again, after a pause the secretery said she couldn't make it to the phone right now. 1/13/06- DEC Piper

left message w/ clara requesting call back. 3/13/06- DEC Piper left message w/ clara requesting call back. Beach Lane Management 280 No. Central Park Avenue, Suite 210 Hartsdale, NY 10530 NEED to set up inspection w/ PBS and DLE. Piper left message for Clara requesting call back to set up environmental compliance inspection of facility. 9/19/07- DECP iper left message for CLara requesting callback and info. 9/20/07- DEC Piper mailed Notice of Violation to Beach Lane Mgmt. 9/24/07- DEC Piper recieved call from Jessica Castro of Beach Lane Mgmt. She will get work done and notify me of when work is scheduled. 914-517-8818 10/25/07- DEC Piper inspected site. In the boiler room there was an inactive 5K fuel tank located on saddles. This tank had piping and manways removed and contained no liquids. In an adjacent rooom, a larger tank, unkown size, was present. Oil was observed dripping down the wall where the fill line enterend the basement. and oily debris was observed on the floor. Violations exist. 3/31/08- DEC Piper mailed csl tank reg to Beach Lane Mgmt. 9/22/08- Piper- I recieved documetation of cleanup. replaced fill line, power washed and endpoints were non detect. Based on work finally completed, this spill is closed. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND DEC Sangesland responded to scene. 1/6/2003 - Sangesland responded to the scene. Contacts: Building Super: Rolando Larancunet 212-694-0083 Property Manager: Bob Cohen 212-463-9970 Metro Fuel Oil: Scott Alnwick 718-383-1400 Site is a 5 floor apartment house with approx 25 units and a semi finished basement setup with several small rooms with bunk beds occupied by about 10 single men. In the basement, the tank room had 4 - 275 gal tanks piped together. Apparently during or just after a fuel delivery, the piping on the bottom on one of these tanks broke free and the volume of the tank let go on the basement floor. NYFD arrived on site and plugged the tank with a wood cork and poured speedie dry around the floor to restrict the oil pool to the front 4 rooms of the basement. NYFD also left 2 overpack drums with oil/debris in it. Scott Alnwick of Metro Fuel recovered the piping elbow which broke off the bottom of the tank. The elbow had a large handful of plumbers putty wrapped around it. (Mr. Alnwick took a photo of the joint) This shows that the joint had a history of leaking and the filling of the fuel tank probably just pushed the pressure just over the top and caused the joint to

SPILL NUMBER 0210077 (Continued) **S106010504**

fail. Petroleum Tank Cleaners arrived on site with a vac truck to suck up the free liquid oil. The floors (linoleum sheets) were squeegie cleaned, soaked debris was bagged and removed to the outdoor courtyard area. Speedie dry was applied to the floor and the worst of the soaked speedie dry was picked up. Two of the four tanks were repiped together and set up as a temporary tank system for heating the building. Sangesland requested a meeting within 48 hours on the site with the property manager, and a rep from Metro Fuel to discuss rip out of sheetrock, wood frame walls, linoleum floor. After rip out, the floor will be inspected for cracks. Further work will be done based on what is found at that time. 1/8/2003 Sangesland made a site visit to inspect initial clean up and discuss longer term cleaning with property manager Bob Cohen. Inspection showed that the floor was in fact Peel & Stick tiles on top of a heavy stock tile floor. Oil was seen under several of the surface tile and between several of the under tiles. Sangesland presented Mr. Cohen with a Do Work letter with the following work due by Feb 8th, 2003: 1) Fuel oil tanks must be properly rebuilt & tested - Tank/boiler company is required to submit a written letter stating that the tanks and piping are all in proper order. 2) Lower 12' of sheet rock walls in area of spill (2 rooms and hallway) must be cut out and disposed of. (wood framing 2x4 will be inspected for impact) 3) Tile floor in 2 rooms & hallway will be scraped up to show cement floor. 4) Cement floor will be cleaned After all of this work is done, DEC will reinspect to determine if any more work (borings?) are needed, or if the site can be closed up and put back into service. - Due Feb 8th, 2003 1/8/2003 Sangesland received a fax from Metro Fuel Oil stating that 3 - 275 gal tanks had been reconnected and were in proper working order. 1/16/2003 - Sangesland met on site with Mr. Cohen. Lower 12 of all sheetrock /wood frame walls in the area of the spill were cut and removed. All tile (and subtile) layers were removed. Bare cement floor still had piles of speedie dry on it. Some areas showed oil soaked speedie dry. Tanks appeared to be appropriately piped (as per 1/8/03 fax) Approx 1 to 2 of contaminated soil/speedie dry was piled up under the oil tanks. Sangesland required that the entire floor in the basement area (including under the oil storage tanks) be cleaned and epoxy painted. When this work is done, Mr. Cohen was asked to submit photographs of this work along with a closure request letter. 4/14/2003 Sangesland received a letter and photos from Robert Cohen showing that the site has been properly cleaned, and the floor has been epoxy painted. Spill Closed"

Remarks: "75 GAL SPILLED - STILL SPILLING - POTENTIAL FOR 1100 GAL TO SPILL - WAS GOING TO SEWER BUT BELEIVED TO BE STOPPED FROM SEWER NOT "

DEC Memo:	"11/28/05: This spill transferred from J.Kolleeny to S.Kraszewski. 07/17/06: NYCHA Update summary states three 35K USTs that stored #4 and #6 oil and installed in 1968 were closed in 1968 (???) and replaced by a 25K UST in July 2000 and currently stores #2 oil. NYCHA will have a Site Assessment completed and forwarded to the Department. - SK 02/08/07 : DEC lead changed from S. Kraszewski to J. Kann. J.Kann 03/1/12: J.Kann - iwp received 2/28/12 and edoced today. 01/07/14: J.Kann - IWP reviewed and approved today. Site included in the Multi-Site stip sent to NYCHA today 7/30/14: J.Kann - visited site on 7/29 to observe field work. Groundwater is very shallow (approx 5 ft bgs). No visible contamination in borings. Two wells were installed and a groundwater sample taken from a temporary well point. 10/30/14: J.Kann - File indicates that an ISRP was conducted in 1996. Three wells were installed. Subsequent monitoring showed no product in wells or dissolved phase in samples. Tanks were removed/replaced in 1999/2000. The SAR and/or tank closure report for the site could not be located. SIR prepared by Ecosystems Strategies in 2014 was submitted on September 9, 2014. Report reviewed. 7 borings and 3 permanent wells installed. Groundwater was also collected at 2 temporary well points. Poor quality fill was encountered in all borings (containing brick, asphalt and concrete). SVOCs were detected in all borings with the exception of SB-1. Minor exceedences of CP-51 SVOCs were detected in some soil boring

POLO GROUNDS TOWERS (Continued) **U001840717**

locations. Given the quality of the urban fill present, the slightly elevated levels are believed attributable to the fill. Permanent groundwater monitoring wells did not have any TOGS 1.1.1. exceedences. Based on information presented, spill closed. NFA."

DEC Memo: "08/25/09 - See eDocs for Con Ed report detailing cleanup and closure. 04/16/08-Zhune spoke to Richard Slote from ConED project manger for transmission operation 718-204-4482. He said we are waiting for the DOT excavation permit to finish the remediation. 05/18/09- Rchard called and said we had closed the first excavation and went another 11 Ft. north we have cleaned it up. The results from North came high we have to go futher into the intersection so our construction people are going to have to apply for another permit to close the intersection. That is going to be a hold. We can not go South which we attended to do from south from the fist excavation that we already closed. "
Remarks: "Pending clean up after testing results."

Contact Name:	FDNY HAZ MAT
DEC Memo:	"4/14/2015 - Feng - Duty Desk. Talked to Joe Kearney of FDNY HAZMAT (347-203-6886). They received a report/complaint from the neighbor concerning a pipe was leaking. When they arrived, they found an old pipe was dripping. The pipe might be connected to some tanks. Only a small amount of ground soil was contaminated. No water or sewer has been impacted. The pipe was then cut even and cap with internal flush. The leak has been stopped. The property is for sale. Agent: Marcus & Millichap 212-430-5100. Called Marcus & Millichap and left a message for a call back. 3/30/2016 Feng This spill is transferred from J. Feng to V. Brevdo as per J. Vought. 03/31/2016: This spill case was transferred to A. Doronova. - AD 06/17/2016: Called and spoke with Marcus & Millichap company (212-430-5100). I was told that they no longer involved with this property. Looked on ACRIS database: The property has Block #02108 and LOT #0071. According to ACRIS this property was sold in 2005 to 467 West 157 Holdings LLC . The address of this company in Acris is: c/o OMNI Development 26 Journal Square, 16th Floor Jersey City, NJ 07306 According to Internet data search the company address is: 467 West 157 Holding, LlC 35 Journal Square Ste 1103 Jersey City, New Jersey, 07306 No phone numbers or name of the contact person listed. Will send a letter. AD 12/20/2016: Searched Internet for the contact info of the RP. Found the name of the attorney for this company on the deed papers. His name is Steven Rubel, phone: (516)678-1800. Wiil contact him. AD 02/07/2017: Contacted a law firm which represented 467 West 157 Holding, LLC during the deed signing. Spoke with a secretary. She referred me to Nandy Navarro. She was not available. Left a message for Ms. Navarro regarding the spill violations. Received a phone call from the law office. I was told that their office no longer represents the RP and they do not know how to contact RP. Issued and sent a certified letter to: 467 West 157 Holding, LlC 26 Journal Square 16th Floor Jersey City, New Jersey, 07306 Response is due March 7, 2017. AD 02/17/2017: Received signed receipt from the certified letter. It was delivered on 02/13/2017. AD 03/29/2017: Received a letter back as undeliverable. After I received the signed receipt. AD 04/04/2017: Discussed the site with J. Kolleeny. Will consult with J. Urda. Searched on the Internet. Found the following info on RealDirect: - Corporate Owner: 84 White Street Llc, 872 Madison Avenue #2A, New York, NY 10021 - Managing Agent: Rialto Management Corp, Scott Lerman, 872 Madison Avenue #2A, New York, NY 10021. Called and spoke with Mr. Lerman of Rialto management. He confirmed that his company is not managing the property. AD Later in the day called and spoke with John Urda of DEC Legal Department. He checked RP' address on the corporate directory and told me this address: 467 West 157 Holding, LlC 35 Journal Square Ste 1103 Jersey City, New Jersey, 07306 I saved

EMPTY LOT (Continued) **S117852137**

this address previously, so will try it for the new violation letter. AD 04/17/2017: issued and sent a new letter on the following address: 467 West 157 Holding, LlC 35 Journal Square Ste 1103 Jersey City, New Jersey, 07306 Response is due May 17, 2017. AD 04/28/2017: Received a message from Maritza Sweeny of 467 West 157 Holding, LlC, contact phone number: (201)216-9500 EXT.212. Called and spoke with Ms. Sweeny. Explained her why the spill was called in, and what should be done in order to close the spill case. She will sent someone to check on the lot and get the FDNY report on the call. Gave her my e-mail address to keep DEC updated on the progress. AD 05/02/2017: Received a phone call from Pete of RightWay Tank. He requested info on the spill and further actions. Explained that his company should visit the site to check for piping and tanks. If the tank will be found it should be checked and if needed properly abandoned or removed based on its conditions. Soil samples should be collected. AD 07/24/2017: Called and spoke with Ms. Sweeny. Requested to submit to DEC update info for the site status. She will send some summary shortly. AD 08/03/2017: Received the following e-mail from : Good Afternoon Ainura, I am emailing you in regards to NYSDEC Spill Case no 1500461. Please view attached the proposal in regards to the work that will be performed at the above referenced address. The company contracted RiteWay Tank Maintenance on May 16, 2017. RiteWay has been going through a transition and was not able to begin the requested work. The management company has reached out to us and has stressed the importance of resolving this matter. RiteWay will be onsite on Monday, August 7th, 2017. We request an extension is granted and thank you in advance for your gratitude. Feel free to contact us with any questions or concerns you may have. Best regards, Sylvia Colon 700 Hicks Street Brooklyn, New York 11231 718.855.7272 Fax: 718.855.7244 Email: sylvia@petroleumtek.com AD 09/27/2017: called and spoke with Ms. Colon of RiteWay Tank regarding the site status. I was informed that the site inspections was performed and that the report was submitted to the site owner. Called Ms. Sweeny but was unable to leave a message due to the full box. AD 11/21/2017: Received the following e-mail from ABC Tank: Ainura I am writing to you on behalf of the owner/management company of 467 West 157th Street, NYC. I understand they have an existing spill case assigned to this property and would like to assist them in getting it closed. We have proposed to excavate & remove the 1,080 gallon UST located on this property. Once the tank is removed, soil samples will be obtained and submitted to a certified laboratory for analysis. Upon completion of the job and receipt of payment, ABC Tank will submit a spill closure report for your review. Please let me know if there is any additional information you may need at this time. Thank you & Happy Thanksgiving!! Donna (Please confirm receipt of this email) ABC Tank Repair & Lining, Inc 280 East 88th Street Brooklyn NY 11236 (718) 272-2800 Fax# (718) 272-3147 Called and spoke with Donna of ABC Tank. Explained what actions should be done during the UST removal. Requested to remove all associated piping and collect confirmatory soil samples from UST excavations area and along the piping line and fill port. AD 01/25/2018: called and spoke with Donna of ABC Tank. She will check her files to see if their UST removal proposal was signed by the RP and call back. Called and spoke with Ms. Sweeny of 467 West 157 Holding, LlC and requested submission of the UST closure report. Response is due February 2, 2018. - Later in the day received a phone call from Donna of ABC Tank. She informed me that their company removed the UST and collected soil samples. The UST closure

EMPTY LOT (Continued) **S117852137**

report will be submitted in a few weeks. AD 05/25/2018: called and left a message. AD 09/05/2018: called and left a message for Ms. Sweeny. Called and spoke with Donna of ABC Tank. She informed me that they had removed the UST and piping in January 2018, but there is a payments issues from the RP which resulted in the postponement of the report submission to DEC. AD 09/11/2018: called and left a message for Ms. Sweeny. AD 09/19/2018: called and left a message for Ms. Sweeny. AD"

Remarks: "empty lot/marcus millichap 212-430-5100/hazmat has capped pipe"

Spiller Company:	001
Contact Name:	KELLY SOLON
DEC Memo:	"8/27/07 - Raphael Ketani. Steve Sangesland, Duty Officer, called Ms. Kelly Solon and spoke to her about the oil. She said that when they dug up the basement floor at 452 W. 141 Street, they discovered that oil was present. Mr. Sangesland made an appointment for me to visit the site the following day. 8/28/07 - Raphael Ketani. I visited the site today and met the parties involved. They were: Kelly X. Solon, AIA, Kelly Solon Architects (212) 929-3336 - she's the project contact & lead Agnes Maria Gould, Kelly Solon Architects (212) 929-3336 - assistant to Ms. Solon Nicholas (Nick) Canonico, NOVA Consulting (516) 352-3233 - geologist & consultant Camila Miranda, NOVA Consulting (516) 352-3233 - project engineer Andy Davis, Certified of NY, Inc. (212)397-1945, ext 16 - renovation project manager Ken Navarro, Atlantic Construction and Demolition - interior demoliton supervisor Ms. Solon told me that the owners of 452 and 454 W. 141 Street are: Talwildar, LLC, 130 Haven Street, Dedham, MA, 02026. The contact is Dorothea Endicott, Manager (781) 326-0715. First, we were shown the back courtyard that is between the large apartment building on Convent Avenue and 452 W. 141 Street. There, I saw 5 springs that were flowing through the field stone foundation wall of #452. The springs were flowing at the contact of the solid cement retaining wall and the base of the field stone wall. There were places in the bottom of the field stone wall where one could see that some large stones had fallen out. These were also the areas where the springs were flowing. There were other partially hollowed out areas in the wall above and to the sides of the springs where it looked as if groundwater had been flowing through at one time - possibly during times of a higher water table (though the site is about 40 feet below the crest of the hill). I stuck my finger in one of the springs and the water was cold to the touch with no odor and clear. The head of maintenance of the large apartment building told us that, during the winter, a large wall of ice builds up in the courtyard. He also told us that he has lots of groundwater coming up in the basement of his building. Next, he showed me locations where he said residual oil was located along the edge of the sidewalk. I smelled these dark areas, but they didn't have an oil odor. The PID meter showed about 2200 ppb, but the air was wet from the springs. The combined total flow of the springs was estimated to be about 15 gals./minute. Most of the spring water was re-entering the ground at the edge of the back courtyard sidewalk. Next, we entered #452. I was told that each townhouse was built in 1870. You could see light coming through the floor boards from the basement. The floor was in bad shape. The first floor had been gutted and there was a large pile of dark soil resting on the floor. We went to the basement. The basement floor had been broken up and this revealed a water table that was right at the level of the floor. An oil odor was obvious in the vicinity of the oil tanks, but not strong. Two oil tanks were standing in the northeast corner of the basement. The air was humid, and the PID meter registered 6927 ppb. This reading was partly the result of the high humidity. I asked Ms. Solon whether the tanks and their piping had ever been tested. She said no. I told her that the

RENOVATION PROJECT (Continued) **S108764051**

tank systems had to be tested and the DEC needed a copy of the test results. She said she will have this done. She said the tanks were presently empty. I looked further in the basement and saw 2 springs emanating from the base of the common wall between #452 and #454. Mr. Davis showed me the back floor of the basement which had not yet been broken up. The center of this area was buckled and heaved up (perhaps by ice?). Lastly, we went to #454. The same situation was present. The first floor had been internally demolished, but some of the original plaster was left. The floor was in bad shape. We went to the basement. The work crew was breaking up the basement floor in the back area. One oil tank was present. It looked much newer than the previous two I had seen. The piping looked to be in good shape, though there was a little staining below the guage as if it wasn't completely sealed on top of the tank. There were no oil odors. The air smelled very humid and felt wet as in a tropical greenhouse. The PID meter registered 4067 ppb. I wasn't sure how much of this reading was actually VOCs, but I suspected that the meter was being fouled by the humidity and that the readings weren't accurate. Ms. Solon told me that vandals had stollen the gas meter and the copper fuel lines to the tank system. She said that the oil tank stil had oil in it. I looked at the guage and saw that it showed the tank as being almost completely full. One spring was visibly flowing at the base of the common wall between #454 and #456. Ms. Solon asked who was responsible for any oil that was spilled because of the vandalism. I told her that the owners of the house also owned the fuel oil and all of the piping of the tank system and the tanks themselves. So, I told her that the owners had the responsibility of cleaning up the spill. I took 16 pictures consisting of the backyard, #452 and #454. I explained to her what had to be done as regards investigating the spill and cleaning it up. She asked that I put everything in a letrer. I told her I will. After this, I left the site. A CSL was sent out to Ms. Endicott and Ms. Solon with a list of specific items and actions that must be included in the work plan to be approved by DEC and which must be implemented as soon as possible. 8/29/07 - Raphael Ketani. Mr. Canonico called up and said that soil samples will be a problem to take as the water table is right at the surface and so everything is saturated. He said that removing soil will also be a problem as the wet, weak soil has little strength and subsidence of the houses is a real possibility. I told him that soil samples should be taken of the surface soil and sent off for 8260 and 8270 analysis. I told him to sample discrete areas near the tanks and mark them on a plan. I also told him to take a groundwater sample from each house. As regards removing soil and structural issues, I told him that the better method would probably be to inject treatment solutions, but one would have to make sure that the treatment solutions didn't run into the backyard of the neighboring building. He said he will think about this and come up with a plan to present to Ms. Solon and the owners. 9/17/07 - Raphael Ketani. On 9/5/07, I received the following e-mail from Camilla Miranda Israel of NOVA Consulting: Today, Nova Consultants, LLC performed the surface soil and groundwater investigation at the site located at 452, 454 West 141st Street, Harlem, NY. The activities performed as described in our proposal are: Task 1- Tightness Testing NOVA will arrange for the field examination and pressure testing of each of the three (3) on-site ASTs. This work will involve the contracting of a local licensed and certified tank testing company. The results of the testing will be used to support the closure of the open NYSDEC Spill

RENOVATION PROJECT (Continued) **S108764051**

number. The property owner is required to provide NOVA access to the piping associated with the three (3) on-site ASTs Task 2- Surface Soil Sampling Collection A total of six (6) surface soil samples will be collected using a decontaminated stainless steel hand auger and spatula. Samples will be collected from a depth of 0 to 6 inches. A portion of each sample will be placed in re-sealable plastic bag and let stand for a minimum of 5 minutes after collection. Each sample will then be screened in the field with a photo-ionization detector (PID) for the presence or absence of total volatile organic compounds (TVOCs) by piercing each plastic bag and retrieving a soil gas sample. In addition, a portion of each surface soil sample will be collected for laboratory analysis. All sampling equipment will be decontaminated between sampling locations. Sample locations will be determined in the field, based on accessibility and a representative spatial distribution. A proposed sample location map is provided as an attachment to this proposal (Figure 2). Task 3 - Ground Water Sampling Collection Three (3) ground water samples will be collected at the subject Site. The temporary well will be constructed using a 2.5 foot section of 1-inch inside diameter 10 slot, wire steel wrapped well screen will be placed in the borehole. The temporary well will be evacuated of standing water using a clean Teflon bailer to partially develop (remove soil and silts) the temporary well prior to collecting a sample. One ground water sample will be secured by NOVA from each temporary well. Task - 4 Laboratory Analyses The six (6) surface soil samples and three (3) ground water samples will be stored in Ice filled coolers and transported to a New York State Department of Health (NYSDOH) Environmental Laboratory Approval Program (ELAP) certified laboratory for analysis of VOCs and SVOC by USEPA Method 8021 and 8270 respectively (STARS List). The laboratory will report the results in accordance with NYSDEC Standard Protocols. NOVA is in the process to submit surface soil and ground water samples to the lab and prepare the spill closure report. If you have any question/comments please email/call me at 516-352-3233 Thanks, Camila 9/19/07 - Raphael Ketani. I spoke with Nick Canonico of NOVA Consulting regarding the site (516)352-3233. He said that he met the owner of the building next door and he told him that the oil has returned again. The neighbor said this was the second time in 7 years. Mr. Canonico added that there appears to be a perched water table in the bedrock and that he should receive the results of the sampling in a day or two. 10/2/07 - Raphael Ketani. I tried to reach Mr. Canonico regarding any progress at the site, but could only leave a message. 10/9/07 - Raphael Ketani. Mr. Canonico e-mailed me today that he is waiting for his client to approve the investigation document before sending it out. 10/16/07 - Raphael Ketani. I reviewed the October 2007 Spill Investigation Report produced by NOVA Consulting. In the report were the soil and groundwater analytical results. There were very low hits of VOCs for the soil and only hits just above TAGM for the benzo series of analytes and their associated combustion products. The groundwater was non-detect for VOCs and SVOCs. All 3 oil tanks passed their respective tests. Based upon the Report, I am closing the spill case."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 10/2/01: On this date K.Goertz inspected the site. Phoenix Environmental was on scene performing hand borings at 9 seperate locations. There was a large #6 oil stain on the basement wall and

SPILL NUMBER 0303476 (Continued) **S104951115**

some staining in the soils but the odor exhibited more than just a six oil smell. There could have been a chlorinated solvent odor. K.Goertz directed Carrol Karp of Phoenix Environmental to analyze the two soil samples with the highest PID readings for both petroleum and chlorinated solvents. (KG) 7/3/2003-Vought-Spill transferred from Tibbe to Vought. 7/3/2003-Vought-See spill #0303476 at same location reported when solvents found in soil disposal sample. 7/3/2003-Vought-Received fax of subsurface investigation report on 7/2. Report summary:A subsurface boring investigation was conducted in Oct 2001 in response to an AST overfill in the basement of 601 W.149th Street. Concrete floor was broken resulting in subsurface penetration of petroleum. Ten borings were hand dug to refusal (max boring depth was 4.5' due to construction debris under floor. Five soil samples analyzed for EPA Method 8260/8270 (analyticals provided). Fuel oil and solvent compounds detected in analyticals. 7/3/2003-Vought- Vought spoke with NYSDEC Rommel and oil delivery company will be repsonsible for cleanup until all fuel oil compounds are removed. The oil company can then bill the dry cleaners for the difference in disposal cost of the Haz waste versus non haz waste. If all petroleum compounds are removed and solvents remain then spill 0013456 will be closed and this spill referred to NYSDEC Brevdo. Vought called Carol Karp (Phoenix) and left message to return call to NYSDEC. 7/16/2003-Vought-Spoke with Karp and faxed her a copy of this spill report. 12/24/2003-Vought-Spill closed due to open spill #0303476 at same location."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 7/3/2003-Vought-Received fax of subsurface investigation report on 7/2. Report summary:A subsurface boring investigation was conducted in Oct 2001 in response to an AST overfill in the basement of 601 W.149th Street. Concrete floor was broken resulting in subsurface penetration of petroleum. Ten borings were hand dug to refusal (max boring depth was 4.5' due to construction debris under floor. Five soil samples analyzed for EPA Method 8260/8270 (analyticals provided). Fuel oil and solvent compounds detected in analyticals. 7/3/2003-Vought-NYSDEC requires the following before submittal to NYSDEC Haz Waste Unit (Vadiim Brevdo): 1)property owner information 2)clarification of address of both dry cleaners and fuel oil tank location(are they both on same property?) 3) site plan including streets and surrounding properties, scale, TCE tank and sump pit. Vought spoke with NYSDEC Rommel and oil delivery company will be repsonsible for cleanup until all fuel oil compounds are removed. The oil company can then bill the dry cleaners for the difference in disposal cost of the Haz waste versus non haz waste. If all petroleum compounds are removed and solvents remain then spill 0013456 will be closed and this spill referred to NYSDEC Brevdo. Vought called Carol Karp (Phoenix) and left message to return call to NYSDEC. 7/3/2003-Vought-Spoke with Carol Karp and management agency is Manhattan North Mananagment-David DiSilva 212-662-1100x204. Owner of dry cleaning is Edward Kim (212-283-9227). Dry cleaners is on first floor and tank is in basement of the same property. Site plan not necessary after discussion with carol because dry cleaning and oil spill at same site. Excavation will be continued until petroleum consituents are removed. Vought will fax Karp copy of spill report. Vought will contact Brevdo with regard to immediate response to ensure no continued source. 12/24/2003-Vought-See closed spill #0013476 at same location. 02/09/04 As per Austin's request, transferred from Vought to Sawyer (Rommel) 3/18/04 - Sawyer - Paul Sherwood of Phoenix Environmental called to notify the Department that his company has taken 17 borings for analysis. In addition to the hazardous problems, the new samples showed constituents that exceed RSCO in TAGM 4046 for Toluene, Ethyl Benzene, Isopropylbenzene, 1,3,5-Trimethylbenzene, 1,2,4-Trimethylbenzene, M&P

SPILL NUMBER 0303476 (Continued) **S104951115**

Xylenes, Benzos and Chrysene. 4/12/04 - Sawyer - Paul is going to fax over a work plan to review so the work can be started asap. 7/8/04 - Sawyer - Paul sent result and location of smples taken from the end points of the excavation. There were some minor hits for semi volatiles, like the Benzo's and Chrysene in the sw sidewall sample and due to the position of this contamination (near foundation) it is not able to be receovered. No further action needed. Closed."

NEW CROTON AQUADUCT (Continued) **S106969044**

paralell to a sewer line. During preping for grouting they found oil. No known source 10/21/2005 Followup report from NYC DEP (dated Oct 12, 2005) states the following: 1) Contractor drilled 11 packer borings into the sides of Shaft 29. The purpose of these drilled holes was to allow the contractor to pump grout around the tunnel liner to control water inflow into the tunnel. 2) The next morning (June 22nd) the Contractor, AFC, reportated that a petroleum like product was seeping out of one (out of 11) of the holes with groundwater and that the smell of petroleum product was noted. 3) The petroleum was fingerprinted & identified as #2 fuel/diesel. 4) Once the packers were sealed, the groundwater level around the aqueduct was allowed to rise above the elevation of the aqueduct thereby allowing the oil floating on the water to reach a higher elevation than the Aqueduct. 5) Several inspections of the area (and adjoining areas) have been made and no further petroleum has been noted."

Remarks: "CLEAN UP IN PROCESS."

Site Description: Location: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in the borough of Manhattan, City and State of New York. Site Features: The site is approximately 1.54 acres, and is entirely occupied by a building. The building is comprised of three connected sections: a two-story section along

2350 FIFTH AVENUE CORP (Continued) **1000108749**

Fifth Avenue, a three-story section in the center, and a one-story section to the west. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200 to 300 feet east of the site. Following completion of remediation, the site is currently occupied by a self-storage facility and a charter school. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or perc) as a cleaning solvent. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building. Currently the site is use for self storage facility and for art studio space. Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.

Env Problem: Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were tetrachloroethene (PCE) and its breakdown products [trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), vinyl chloride (VC)] in soil, groundwater and soil vapor and sub-slab insulation material. Remedial actions have

2350 FIFTH AVENUE CORP (Continued) **1000108749**

successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil, groundwater, soil vapor and sub-slab insulation material is being managed under the Site Management Plan.

Health Problem: People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement and the on-site building. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Site-related contaminants were historically found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air guidelines. To minimize the potential for the inhalation of site-related contaminants, a sub-slab depressurization system was installed beneath the building. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Updated By: YYWONG
Site Description: Location: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in the borough of Manhattan, City and State of New York. Site Features: The site is approximately 1.54 acres, and is entirely occupied by a building. The building is comprised of three connected sections: a two-story section along Fifth Avenue, a three-story section in the center, and a one-story section to the west. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200 to 300 feet east of the site. Following completion of remediation, the site is currently occupied by a self-storage facility and a charter school. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or perc) as a cleaning solvent. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building. Currently the site is use for self storage facility and for art studio space. Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer

2350 FIFTH AVENUE CORP (Continued) **1000108749**

	acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.
Env Problem:	Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were tetrachloroethene (PCE) and its breakdown products [trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), vinyl chloride (VC)] in soil, groundwater and soil vapor and sub-slab insulation material. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil, groundwater, soil vapor and sub-slab insulation material is being managed under the Site Management Plan.
Health Problem:	People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement and the on-site building. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Site-related contaminants were historically found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air guidelines. To minimize the potential for the inhalation of site-related contaminants, a sub-slab depressurization system was installed beneath the building. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Site Code: 57691
Site Description: Location: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in the borough of Manhattan, City and State of New York. Site Features: The site is approximately 1.54 acres, and is entirely occupied by a building. The building is comprised of three connected sections: a two-story section along Fifth Avenue, a three-story section in the center, and a one-story section to the west. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200 to 300 feet east of the site. Following completion of remediation, the site is currently occupied by a self-storage facility and a charter school. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or

2350 FIFTH AVENUE CORP (Continued) **1000108749**

perc) as a cleaning solvent. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building. Currently the site is use for self storage facility and for art studio space. Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.

Env Problem: Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were tetrachloroethene (PCE) and its breakdown products [trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), vinyl chloride (VC)] in soil, groundwater and soil vapor and sub-slab insulation material. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil, groundwater, soil vapor and sub-slab insulation material is being managed under the Site Management Plan.

Health Problem: People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement and the on-site building. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Site-related contaminants were historically found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air guidelines. To minimize the potential for the inhalation of site-related contaminants, a sub-slab depressurization system was installed beneath the building. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Site Code: 57691
Site Description: Location: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in the borough of Manhattan, City and State of New York. Site Features: The site is approximately 1.54 acres, and is entirely occupied by a building. The building is comprised of three connected sections: a two-story section along Fifth Avenue, a three-story section in the center, and a one-story section to the west. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200

2350 FIFTH AVENUE CORP (Continued) **1000108749**

to 300 feet east of the site. Following completion of remediation, the site is currently occupied by a self-storage facility and a charter school. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or perc) as a cleaning solvent. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building. Currently the site is use for self storage facility and for art studio space. Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.

Env Problem: Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were tetrachloroethene (PCE) and its breakdown products [trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), vinyl chloride (VC)] in soil, groundwater and soil vapor and sub-slab insulation material. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil, groundwater, soil vapor and sub-slab insulation material is being managed under the Site Management Plan.

Health Problem: People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is

2350 FIFTH AVENUE CORP (Continued) **1000108749**

located under pavement and the on-site building. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion.
Site-related contaminants were historically found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air guidelines. To minimize the potential for the inhalation of site-related contaminants, a sub-slab depressurization system was installed beneath the building. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2019

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State and tribal institutional control / engineering control registries

RES DECL: Restrictive Declarations Listing
A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements
New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing
In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

LIENS 2: CERCLA Lien Information
A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/14/2019

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

UTM Y (Meters):	4519730.0
Elevation:	20 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5940599 CENTRAL PARK, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

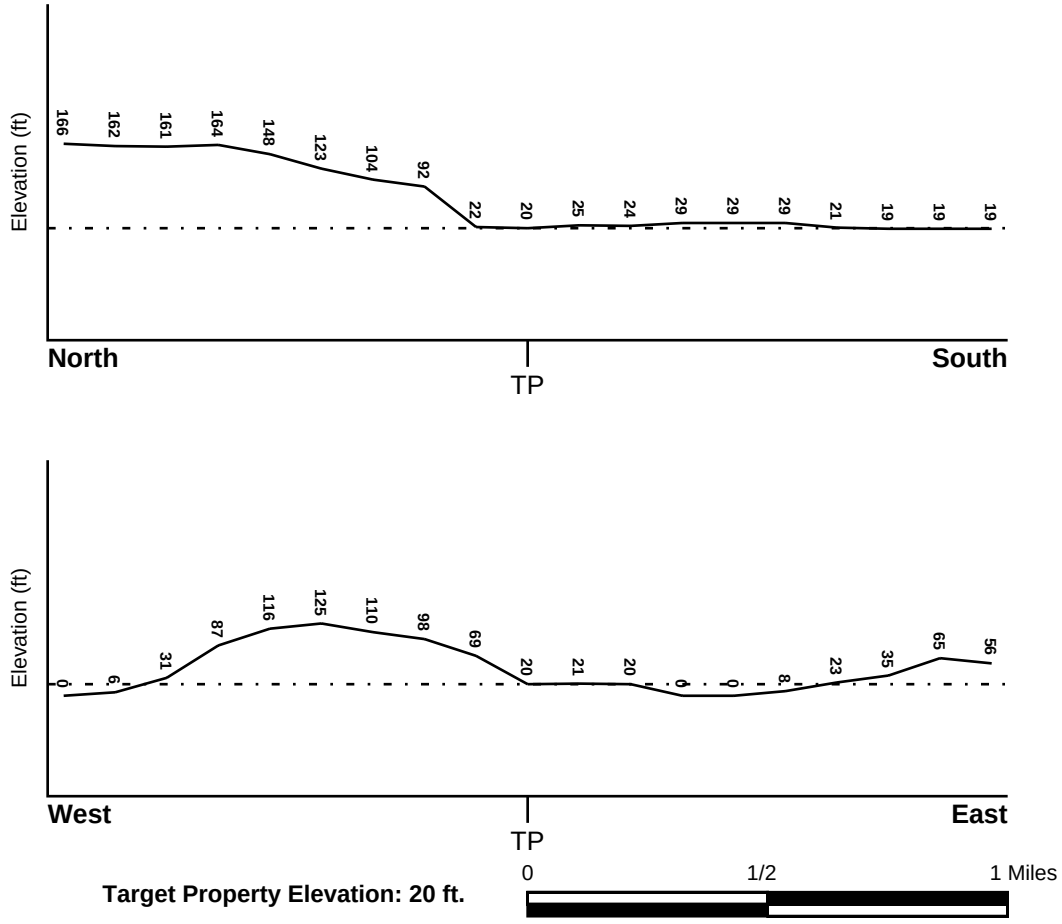
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3604970079F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

3604970091F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CENTRAL PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT **GEOLOGIC AGE IDENTIFICATION**

Era:	Paleozoic	Category:	Stratified Sequence
System:	Ordovicias		
Series:	Lower Ordovician and Cambrian carbonate rocks		
Code:	OC *(decoded above as Era, System & Series)*		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

RE: PUBLIC RECORDS REQUEST of 12/27/2019, Reference # W063029-122719

Date: 01/13/2020

Dear Administrator Emmanuelle Menos,

I write in response to your Freedom of Information Law (FOIL) request seeking:

> *Records pertaining to: underground storage tanks (USTs), spill records, remediation sites, dump sites, soil and groundwater remediation, storage of hazardous materials, and/or hazardous materials activities for 2803 and 2805 Frederick Douglass Boulevard (Block 2045, Lots 89 and 90) New York, NY*

Please be advised that a diligent search of the files maintained by DEC produced no responsive records.

If you believe you have been unlawfully denied access to responsive records, you have the right to appeal. Any such appeal must be submitted in writing and within thirty (30) days of the date of this email. Appeals must be directed to:

FOIL Appeals Officer
Office of General Counsel
New York State Department of Environmental Conservation
625 Broadway, 14th Floor
Albany, NY 12233-1500

Your FOIL request is now closed. If I can be of further assistance, please contact me at (718) 482-3103 and reference FOIL #W063029-122719, or simply reply to this email. Thank you.

Sincerely,

Region 2 FOIL Coordinator

Emmanuelle Menos <emenos@akrf.com>

Dear Emmanuelle :

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 12/27/2019 and given the reference number FOIL #W063029-122719 for tracking purposes. You may expect the Department's response to your request no later than **1/28/2020**.

Record Requested: **Records pertaining to: underground storage tanks (USTs), spill records, remediation sites, dump sites, soil and groundwater remediation, storage of hazardous materials, and/or hazardous materials activities for 2803 and 2805 Frederick Douglass Boulevard (Block 2045, Lots 89 and 90) New York, NY**

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

New York, NY 10039

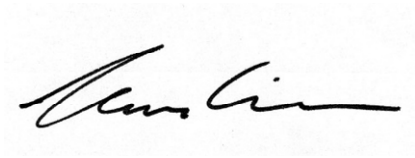
Re: Phase I Environmental Site Assessment
280 West 155th Street, New York, New York 10039
AKRF Project Number: 12310

Dear Mr. Punter,

AKRF, Inc. is pleased to submit this Phase I Environmental Site Assessment Report for the above-referenced Property. This report includes the findings of a reconnaissance of the Property, an evaluation of readily available historical information and selected environmental databases and electronic records. AKRF, Inc. met the requirements of American Society for Testing and Materials (ASTM) as established by ASTM Standard E1527-13 unless noted otherwise in Section 9.0: "Limitations and Data Gaps".

We appreciate the opportunity to provide you with our services. If you should have any questions, please do not hesitate to contact us.

Sincerely,
AKRF, Inc.



Marcus Simons
Senior Vice President

EXECUTIVE SUMMARY

AKRF, Inc. (AKRF) was retained by Harlem Congregations for Community Improvement (HCCI) to perform a Phase I Environmental Site Assessment (ESA) of 280 West 155th Street in New York, NY (Manhattan Tax Block 2040, Lots 40, 43, and 48) (the "Property"). At the time of the reconnaissance, the Property included an approximately 1.36 acre auto parking lot in the Bradhurst section of Manhattan as shown on Figure 2. The surrounding area was primarily residential, with some parkland, commercial/retail uses and medical facilities.

This Phase I Environmental Site Assessment was performed in conformance with ASTM Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice*. Any exceptions to, or deletions from, the Standard are described in Section 8.0. The term "Recognized Environmental Condition" (REC) means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The Standard also includes definitions of Historic REC, Controlled REC and *De Minimis* Condition.

A Tier 1 Vapor Encroachment Screen was also conducted in accordance with ASTM Standard E2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. The term "Vapor Encroachment Condition (VEC)" means the presence or likely presence of vapors from chemicals of concern (COC) in the subsurface of a property caused by the release of vapors on or near the property.

The assessment revealed evidence of the following RECs/VECs:

- The Property is listed as a New York State Department of Environmental Conservation (NYSDEC) Brownfield cleanup Program (BCP) and in the US Brownfields database. The US Brownfields database record is reportedly associated with former Lots 48 and 61 and notes that 0.57 acres of the site was historically operated for commercial purposes and 0.29 acres of the site was historically operated for industrial purposes. Additional research performed on USEPA's online MyProperty database revealed that the site is listed in the FRS Facility Detail Report Database under Facility ID No. 110044214490 for participation within the Assessment, Cleanup and Redevelopment Exchange System (ACRES) as a Brownfields Property as of October 2011 under Brownfield ID No. 135530. The Property is listed as "assessed" with a cleanup required. The Property is listed in the Enforcement and Compliance History Online (ECHO) database with no violations. A Phase II Subsurface Investigation was reportedly completed in 2019; however, the results of the investigation were not available for review. Additional records were requested on January 29, 2020, but NYSDEC has not yet issued a response.
- Historical Sanborn maps indicated that the Property was developed by 1909 with the uses that included a steam laundry with associated boiler building. Underground storage tanks (USTs) or buried aboveground storage tanks could remain.
- South adjacent uses included garages with gasoline tanks and repair facilities.

Other Environmental Concerns and De Minimis Conditions

- Buried foundation elements and demolition debris from the former Property building could include polychlorinated biphenyls (PCBs), asbestos containing materials (ACM), lead-based paint (LBP).

Recommendations

- All investigations and other studies performed for the BCP and US Brownfields program should be obtained and reviewed. Based upon their findings, prior to redevelopment of the Property, additional subsurface investigation and potentially remediation may be required.
- The drums on the Property and any other surplus materials should be properly disposed of.
- After properly removing any known USTs or buried ASTs, if any petroleum USTs or buried ASTs are encountered during the redevelopment, they should be closed and removed, along with any contaminated material, in accordance with applicable requirements. Any evidence of a petroleum spill should be reported to New York State Department of Conservation (NYSDEC) and addressed in accordance with applicable regulatory requirements, including those relating to tank registration.
- During soil disturbance, all excavated soil should be managed in accordance with applicable regulatory requirements. All soil and any other materials intended for off-site disposal should be tested in accordance with the requirements of the intended receiving facility. Transportation of material leaving the site for off-site disposal should be in accordance with federal, state and local requirements covering licensing of haulers and trucks, placarding, truck routes, manifesting, etc. If contaminated soil is discovered during soil excavation, it should be removed and disposed of in accordance with applicable regulatory requirements, including those relating to spill reporting, if necessary.
- Any suspect ACM, PCB-containing material, and/or LBP encountered in the subsurface should be properly characterized, managed, and disposed of in accordance with all applicable regulations prior to disturbance during future construction activities.
- If dewatering is required during construction, water must be discharged in accordance with New York City Department of Environmental Protection (NYCDEP) requirements.

1.0 INTRODUCTION

AKRF, Inc. (AKRF) was retained by Harlem Congregations for Community Improvement (HCCI) to perform a Phase I Environmental Site Assessment (ESA) of 2926 Frederick Douglas Boulevard in New York, NY (Manhattan Tax Block 2040, Lots 40, 43, and 48) (the "Property"), an approximately 1.36 acre Property in the Bradhurst section of Manhattan including primarily parking, as shown on Figure 2. The surrounding area was mixed use with residential, commercial/retail uses, parkland, and medical facilities.

The scope of services for this assessment was in conformance with ASTM Standard E1527-13 (*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice)*. Any exceptions to, or deletions from, this practice are described in Section 8.0. The scope included the following:

- Observations of the Property (reconnaissance) to identify potential sources or indications of hazardous substances, including: aboveground storage tanks (ASTs); underground storage tanks (USTs); tank vents and fill ports; transformers and other items that could contain polychlorinated biphenyls (PCBs), drums or areas where hazardous materials were used, stored, or disposed; stained surfaces and soils; stressed vegetation, leaks, odors. In addition, neighboring properties were viewed, but only from public rights-of-way, to identify similar concerns.
- Readily available geological and groundwater (hydrogeological) information was evaluated to assist in determining the potential for contamination migration (including in soil, soil vapor, and/or groundwater) within, from, and onto the Property.
- The reconnaissance of the Property included observation of any readily visible suspect asbestos-containing materials (ACMs) and potential lead-based paint. However, no samples were collected or analyzed, and this reconnaissance provides neither definitive nor exhaustive information.
- A state database of county-level radon concentrations was used to determine typical indoor radon levels and compare them to United States Environmental Protection Agency (USEPA) guidelines.
- Historical fire insurance maps, topographic maps, and aerial photographs for the Property and nearby properties were reviewed to evaluate historical land uses.
- The following federal regulatory databases were reviewed to determine the regulatory status of the Site and properties within the ASTM-specified radii: National Priority List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); Emergency Response Notification System (ERNS); Toxic Chemical Release Inventory System (TRIS); the Permit Compliance System of Toxic Wastewater Discharges (WWD); the Air Discharge Facilities Index (ADF) the USEPA Civil Enforcement Docket. The federal listing of facilities which are subject to corrective action under the Resource Conservation and Recovery Act (CORRACTS) is discussed with the State databases of RCRA listings.
- The following state regulatory databases were reviewed to determine the regulatory status of the Property, adjacent properties, and properties within a predetermined study area; the listings of hazardous material spills (SPILLS); Resource Conservation and Recovery Act Notifiers (RCRA); Chemical Bulk Storage (CBS); Solid Waste Facilities (SWF); Petroleum Bulk Storage (PBS); State Inactive Hazardous Waste Disposal Sites (SHWS); Major Oil Storage Facilities (MOSF); Brownfield Sites; and Historic Utility Sites.
- Local agency reviews including NYC Fire Department records (obtained as part of the database search), online Buildings and Finance Departments records, and Environmental Quality Review (CEQR) E Designation Sites were conducted for the Property only.

2.0 PHYSICAL SITE DESCRIPTION

Visual assessment of the Property (only from the perimeter – public access was not available) and adjacent areas was performed on January 28, 2020 by Mr. Evan Venice of AKRF. The weather was overcast and approximately 40° F, and the visibility generally good. The Property was inspected through the surrounding chain link fence and from the adjacent 155th Street "overpass" for the presence of stained surfaces, storage tanks, drums, leaking pipes, transformers, suspect asbestos-containing materials (ACMs), suspect lead-containing paint, distressed vegetation, and any other evidence of hazardous material usage and storage on-site. Photographs documenting the site inspection are included in Appendix A.

2.1 General Site Conditions

The Property is occupied by two tenants. Manhattan Parking Group (MPG) occupies the western portion of Tax Lot 48 as a daily and monthly asphalt-paved parking lot. There is an associated small security booth. Several potholes and cracked areas were observed throughout the lot. Some asphalt millings were observed along the eastern fence line. Additionally, it appeared that there were four groundwater monitoring wells. One 55-gallon steel drum of unknown content was observed on the southeastern portion of the lot.

The New York City Department of Transportation – Division of Bridges occupies the eastern portion of Tax Lots 40 and all of Lot 43 as a field office for the Macombs Bridge Rehabilitation project. It includes two field trailers on the northern portion, with unpaved parking and storage occupying the remainder. Two storage boxes were also present, as well as four 55-gallon steel drums of unknown contents. Miscellaneous tools and construction materials were scattered throughout the area. Debris including municipal garbage was also noted.

No staining or evidence of a spill/release was noted in exterior areas.

2.2 Topography and Hydrogeology

Topography at the Property slopes downwards gently towards the east. Based on the U.S. Geological Survey, Central Park, NY Quadrangle (2013) map, the Property is approximately 19 feet above the National Geodetic Vertical Datum of 1988 (an approximation of mean sea level).

Based on information obtained from the NYSDEC database, groundwater is expected to be at approximately six ten feet below ground surface. Bedrock was previously observed at depths ranging from 33 to 105 feet below grade. Groundwater is assumed to flow in an easterly direction toward the Harlem River. However, actual groundwater flow can be affected by many factors including bedrock geology, underground utilities, and other factors beyond the scope of this study. Groundwater in Manhattan is not used as a source of drinking water.

2.3 Storage Tanks

2.3.1 Underground Storage Tanks (USTs)

During the limited inspection, no evidence, such as manways, vent pipes, or dispenser equipment, was observed that would indicate past or present USTs at the Property. Regulatory records and NYC Buildings Department (NYCDOB) listings did not indicate any USTs on the Property. However, it is possible that the former Property building had UST(s) that may still be present in the Property subsurface.

Off-site USTs are discussed in Section 5.2.2.

2.3.2 Aboveground Storage Tanks (ASTs)

No evidence, such as tanks or vaults likely to contain tanks, vent pipes or fill caps was observed during the limited inspection reconnaissance to indicate that ASTs are or were present. No records pertaining to ASTs were identified in the regulatory database or computerized NYCDOB records. However, it is possible that the former Property building contained AST(s) that may still be present in the Property subsurface.

Off-site ASTs are discussed in Section 5.2.2.

2.4 Polychlorinated Biphenyls (PCBs) and Mercury

Until 1979, polychlorinated biphenyls (PCBs), which provided beneficial insulating properties, were used in a variety of products, in particular electrical equipment such as transformers, capacitors, fluorescent light fixtures, and voltage regulators, but also in hydraulic fluids and some other products such as caulking.

Based on the age of the former buildings, electrical equipment, caulk, hydraulic equipment, and lighting fixtures, switches and thermostats may have included PCB- or mercury-containing components.

2.5 Lead-Based Paint

Lead-based paint was generally not used inside buildings after 1977, but lead-based paint may still sometimes be used outdoors. Based on the age of the former building, lead-based paint may be present on and within the Property structure. Any activities with the potential to disturb lead-based paint must be performed in accordance with the applicable Occupational Safety and Health Administration regulation (OSHA 29 CFR 1926.62—Lead Exposure in Construction).

2.6 Utilities

Consolidated Edison (ConEd) provided electricity and natural gas to the Property and surrounding area. The Property was connected to the New York City municipal water and sanitary/storm sewer systems.

2.7 Waste Management and Chemical Handling

New York City Department of Sanitation and private haulers are responsible for refuse collection and disposal for the Property. No bulk chemical handling activities were observed at the Property and no evidence of current or former bulk chemical storage was noted.

2.8 Radon

Radon is a colorless, odorless radioactive gas that results from the natural breakdown of uranium minerals in soil, rock, and water, which subsequently enters the atmosphere. It can concentrate in buildings, entering through cracks and other penetrations of a building foundation. Some areas are more likely to have elevated concentrations of radon than others, reflecting subsurface lithologic conditions.

The New York State Department of Health (NYSDOH) maintains a database of radon test results on a local and county level. According to NYSDOH, 124 radon tests were conducted in Manhattan in October 2019. The average basement radon level was found to be 2.07 picoCuries per liter (pCi/L), below the USEPA recommended action level of 4.0 pCi/L.

3.0 ASBESTOS-CONTAINING MATERIALS (ACM)

Asbestos refers to a group of natural minerals that provide good fire resistance and insulation. Asbestos is also commonly found in vinyl flooring, plaster, sheetrock, joint compound, ceiling tiles, roofing materials, gaskets, mastics, caulks and other products. Materials containing more than one percent asbestos are considered asbestos-containing materials (ACM). ACM are classified as either friable (i.e., more readily release fibers, such as most spray-applied fireproofing) or non-friable (such as floor tiles).

ACM may be present in any subsurface debris associated with the former Property building.

4.0 ADJACENT LAND USE

The Property was abutted to the north by the elevated West 155th Street followed by Holocombe Rucker Park, to the south by Fordham Toyota – Harlem, Freddy's Detailing Center, United Cerebral Palsy of New York City, Ferguson Plumbing Supply, a residential building and a commercial use building that includes a laundromat, nail salon and office space; to the west by Frederick Douglass Boulevard; and to the east by Macombs Place followed by the Harlem River and Macombs Dam Bridge.

5.0 PROPERTY HISTORY AND RECORDS REVIEW

5.1 Prior Ownership and Usage

5.1.1 Historical Land Use maps

Historical insurance maps were reviewed for indications of uses (or other evidence) suggesting hazardous materials generation, usage, or disposal on or near the Property. Specifically, Sanborn Fire Insurance Maps from 1893, 1909, 1922, 1928, 1939, 1950, 1968-1969, 1976-1981, 1983-1989, 1991-1996, and 2001-2005 were reviewed.

1893

The Property contained dwellings on the northwestern portion of the Property and unidentified structures on the southeastern portion. The rest of the property was vacant.

The Property block contained a hotel southeast adjacent to the Property and a dwelling adjacent to the west. A wood products building was noted adjacent north, across West 155th Street. The Macombs Dam Bridge was identified east of the Property. Elevated railroad tracks and a train station were noted along Frederick Douglass Boulevard to the west. A dancing pavilion and casino were also noted further west. A potential racing track was observed further northwest of the Property. The surrounding blocks comprised sparse dwellings and vacant land.

1909

The Property contained a casino and dance hall, which were part of an amusement park identified on the Property block. Several sheds were also noted on the central and eastern portions of the Property.

The Property block contained an amusement park on the central and eastern portions of the block, a hotel adjacent southeast, and dwellings with storefronts on the western portion of the block. A foundry was noted where the wood products building was formerly located adjacent north, across West 155th Street. Asphalt paving was identified further north of the foundry. A coal yard was identified to the northeast of the Property. Elevated railroad tracks and a train station were noted along Frederick Douglass Boulevard to the west. A dancing pavilion and casino were also noted further west. A potential racing track was observed further northwest of the Property. The surrounding blocks comprised dwellings and vacant land.

1922

The Property, Property block, and surrounding area details are indiscernible due to lack of detail in this map.

A coal yard was identified to the northeast of the Property.

1928

The Property, Property block, and surrounding area details are mostly indiscernible due to lack of detail in this map.

The 8th Avenue Rail Yard was identified to the north of the Property, across West 155th Street.

1939

The Property contained a steam laundry with a noted boiler room on the eastern portion of the Property; and a dance hall on the western portion of the Property.

The Property block contained two auto repair shops and two garages south adjacent to the Property. The garages contained seven buried 550-gallon underground storage tanks. Several dwellings with storefronts were identified on the western portion of the block. The 8th Avenue Rail yard appeared to be vacated to the north, across West 155th Street. The asphalt paving to the north of the former foundry is no longer identified. A coal yard was identified to the northeast of the Property. Elevated railroad tracks were noted along Frederick Douglass Boulevard to the west. A lodging house, mission, and garage were identified further west of the Property. The garage to the west contained two 550-gallon gasoline USTs. A gas station was noted to the south of the Property, which contained ten 550- gallon gasoline USTs. Harlem Lane Park and several auto repair shops were also noted to the south of the Property. The surrounding blocks comprised dwellings and commercial storefronts.

1950

The Property remained similar to the 1939 map.

One of the former garages noted on the southwestern portion of the Property block on prior maps was relabeled as a plumbing supply company, while the other garage is now identified as a garage and repair facility. A metal workshop was identified west adjacent to the Property. The former vacant rail yard to the north across West 155th Street now contained auto parking with a garage and auto repair shops. No further significant changes were noted from the 1939 map.

1968

The Property remained similar to the 1950 map.

The former metal workshop identified west adjacent to the Property was identified as a dwelling. The former auto parking with a garage and auto repair shops to the north across West 155th Street contained a public park and public school. The elevated railroad tracks and station to the west along Frederick Douglass Boulevard are no longer shown. A post office and filling station was identified to the south of the Property. An unidentified building was noted northwest of the Property. No further significant changes were noted from the 1950 map.

1976-1977

The Property remained similar to the 1968 map.

An additional unidentified structure appeared adjacent south to the unidentified building noted northwest of the Property. No further significant changes were noted from the 1950 map.

1979-1980

The Property no longer contained the dance hall on the western portion. The steam laundry on the eastern portion remained.

No further significant changes were noted from the 1976-1977 maps.

1981

The Property is now identified as mainly vacant, with only one building identified as a steam laundry with a boiler room on the central portion of the Property.

No further significant changes were noted from the 1979-1980 maps.

1983-1988

The Property contained a commercial store in the location of the former steam laundry building by 1983. The boiler room is still identified with the building on the Property. The western portion of the Property is identified as parking by 1986.

Some residential buildings to the south have been demolished. Col. Charles Young Triangle is now identified southwest of the Property, the former Harlem Lane Park. No further significant changes were noted from the 1979-1980 maps.

1989

The Property, Property block, and surrounding area details are indiscernible due to lack of detail in this map.

1991-1995

The Property remained similar to the 1983-1988 maps.

The former garage and repair shop adjacent south of the Property (adjacent east of the plumbing supply company) is now identified as a warehouse by 1991. The former filling station previously identified to the south is now identified as parking by 1991. A community center and community garden are identified further south of the Property by 1994 and 1995, respectively.

No further significant changes were noted from the 1983-1988 maps.

1996

The Property is now identified entirely as parking.

No further significant changes were noted from the 1991-1995 maps.

2001-2005

The Property appeared similar to the 1996 map.

The auto brake services building southeast adjacent to the Property is now identified as a car wash. No further significant changes were noted from the 1996 map.

In summary, historical Sanborn maps indicated that the Property was developed by 1909 with a casino, dance hall, steam laundry, a boiler house and a commercial store. By 1996, all former buildings on the Property had been demolished and a parking lot has occupied the Property.

Adjacent properties included two garages with gasoline tanks with additional automotive facilities (repair and filling stations) in the surrounding area.

5.1.2 Aerial Photographs

Since historical fire insurance maps were available for the Property (and surrounding area) and these maps included information relating to land use, aerial photographs would, most likely, not provide additional useful information relevant to the potential for recognized environmental conditions or other environmental concerns. As such, aerial photographs were not reviewed.

5.1.3 Property Tax Files and Zoning Records

Based on NYC Department of City Planning's Zoning and Land Use Map (ZoLa), the Property is zoned as C8-3 (Commercial District).

5.1.4 Local Street Directories

A review of historical city directories was conducted. Table 1 presents descriptions and interpretations from the historical city directory review:

Table 1
Historical City Directories

Year	Comments
1920	**Property:** Not Listed **Surrounding Properties:** Residential, Commercial, United Mechanics Sheet Metal Works (2922 8th Avenue)
1923	**Property:** Not Listed **Surrounding Properties:** Residential, Commercial, United Mechanics Sheet Metal Works Inc. (2916 8th Avenue), Artistic Furniture Refinishing Works (2920 8th Avenue)
1927	**Property:** Commercial **Surrounding Properties:** Residential, Commercial, United Mechanics Sheet Metal Works Inc. (2916 8th Avenue), Eighth/Ninth Ave RR Co. (2930 8th Avenue), Coffey Jas Garage Inc. (2932 8th Avenue)
1931	**Property:** Residential **Surrounding Properties:** Residential, Commercial
1934	**Property:** Commercial, Residential **Surrounding Properties:** Residential, Commercial, United Mechanics Sheet Metal Works Inc. (2916 8th Avenue), Ever Ready Linen & Laundry Supply Co. (2921 8th Avenue), Eighth & Ninth Avs Railway Co. (2930 8th Avenue), Coffey Jas Garage Inc. (308 W 155th Street)
1938	**Property:** Commercial **Surrounding Properties:** Residential, Commercial, Coffey Jas Garage Inc. (304 W 155th Street)
1942	**Property:** Commercial **Surrounding Properties:** Residential, Commercial, Coffey Jas Garage Inc. (304 W 155th Street)
1947	**Property:** Commercial **Surrounding Properties:** Residential, Commercial, Will-Kall Auto Exp Co. (2921 8th Avenue), PABS Garage/Repair Services (304 W 155th Street)
1950	**Property:** Commercial **Surrounding Properties:** Residential, Commercial, Timmons & Sullrvan Upholstery (2917 8th Avenue), Will-Kall Auto Express Co. Inc. (2921 8th Avenue), Hattie S Beauty Salon (2930 8th Avenue), PABS Garage (304 W 155th Street)
1956	**Property:** Commercial

	Surrounding Properties: Residential, Commercial, Will-Kall Auto Express Co. Inc. (2921 8th Avenue), Polo Ground Furniture House (2922 8th Avenue), Oil Service Garage Inc. (304 W 155th Street), Clinton Taxi Corp (308 W 155th Street)
1958	**Property:** Commercial **Surrounding Properties:** Residential, Commercial, Will-Kall Auto Express Co. Inc. (2921 8th Avenue), Polo Ground Furniture House (2922 8th Avenue), Oil Service Garage Inc. (304 W 155th Street), Clinton Taxi Corp (308 W 155th Street)
1963	**Property:** Commercial **Surrounding Properties:** Residential, Commercial, Will-Kall Auto Express Co. Inc. (2921 8th Avenue), Polo Ground Furniture House (2922 8th Avenue), Oil Service Garage Inc. (304 W 155th Street), Clinton Taxi Corp (308 W 155th Street)
1968	**Property:** Residential/Commercial **Surrounding Properties:** Residential, Commercial, Religious, Will-Kall Auto Express Co. Inc. (2921 8th Avenue), Polo Ground Furniture House (2922 8th Avenue), Oil Service Garage Inc. (304 W 155th Street)
1973	**Property:** Not Listed **Surrounding Properties:** Residential, Commercial, Religious, Will-Kall Auto Express Co. Inc. (2921 8th Avenue), Oil Service Garage Inc. (304 W 155th Street)
1978	**Property:** Not Listed **Surrounding Properties:** Residential, Commercial, Religious, C&C Car Service Inc. (304 W 155th Street)
1983	**Property:** Not Listed **Surrounding Properties:** Residential, Commercial, C&C Car Service Inc. (304 W 155th Street)
1988	**Property:** Commercial **Surrounding Properties:** Residential, Commercial
1993	**Property:** Commercial **Surrounding Properties:** Residential, Commercial
1998	**Property:** Commercial **Surrounding Properties:** Residential, Commercial
2000	**Property:** Commercial **Surrounding Properties:** Residential, Commercial, Keita Auto Shop/Manhattan Best Collision (304 W 155th Street)
2006	**Property:** Commercial **Surrounding Properties:** Residential, Commercial, Emergency 7 Day Towing (2921 Frederick Douglass Blvd), Mande Complete Auto Repair/Brothers Auto Supply (304 W 155th Street)
2010	**Property:** Commercial **Surrounding Properties:** Residential, Commercial, J Unisex Barber & Beauty Salon (300 W 155th Street), Mande Complete Auto Repair (304 W 155th Street)
2014	**Property:** Commercial **Surrounding Properties:** Residential, Commercial, Whang Laundry Services Inc. (29156 Frederick Douglass Blvd)

The Property was listed with residential and commercial uses (casino, dancehall, and parking), including alternative addresses of 2928 Frederick Douglass Boulevard, 216 West 155th Street, 204 West 155th Street, 111 Macombs Place, and 109 Macombs Place.

The following historical city directory listings were notable:

- United Mechanics Sheet Metal Works and Polo Ground Furniture House (2922 8th Avenue) adjacent west of the Property, between 1920 and 1968.

- Artistic Furniture Refinishing Works (2920 8th Avenue), adjacent west of the Property, in 1923.
- Ever Ready Linen & Laundry Supply Co., Will-Kall Auto Exp Co., and Emergency 7 Day Towing (2921 8th Avenue), approximately 114 feet west of the Property, between 1934 and 2006.
- Eighth/Ninth Ave RR Co. approximately 102 feet north of the Property, between 1927 and 1950.
- Coffey Jas Garage Inc., PABS Garage/Repair Services, Oil Service Garage Inc, Clinton Taxi Corp, C&C Car Service Inc., Keita Auto Shop/Manhattan Best Collision, and Mande Complete Auto Repair (304-308 W 155th Street) approximately 205 feet west of the Property, between 1927 and 2010.
- Whang Laundry Services Inc. (2916 Frederick Douglass Blvd), approximately 30 feet southwest of the Property, in 2014.

Copies of the City Directory listings are provided in Appendix C.

5.1.5 Recorded Land Title Records

Copies of title records were not provided to AKRF for review. Copies of title records were not provided to AKRF for review. A review of computerized New York City Automated City Register Information System (ACRIS) records, which included records of financial transactions involving the Property, identified no environmental liens for the Property.

5.2 Regulatory Review

Regulatory database information, as shown in Appendix D, was obtained from EDR, Inc. of Shelton, CT. The Introduction of Appendix D includes summaries of the databases searched, their radii around the Property and limitations of the data. The databases searched and associated radii were consistent with ASTM E1527-13.

5.2.1 Federal

The federal databases searched included the National Priority List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); Emergency Response Notification System (ERNS); Toxic Chemical Release Inventory System (TRIS); the Permit Compliance System of Toxic Wastewater Discharges (WWD); the USEPA Civil Enforcement Docket; and the Air Discharge Facilities (ADF). The federal listing of facilities which are subject to corrective action under the Resource Conservation and Recovery Act (CORRACTS) is discussed with the State databases of RCRA listings.

The federal databases searched included the National Priority List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); Superfund Enterprise Management System Archive (SEMS-ARCHIVE), Emergency

Response Notification System (ERNS); Toxic Chemical Release Inventory System (TRIS); and Federal Institutional Control/Engineering Control Registries.

The federal listing of facilities which are subject to corrective action under the Resource Conservation and Recovery Act (CORRACTS) is discussed with the State databases of RCRA listings.

National Priority List (NPL)

The NPL is the USEPA's compilation of some sites that probably remedial action under the Superfund Program. NPL sites can pose a significant risk of stigmatizing surrounding properties and thus impacting property values.

The Property was not identified in the NPL database.

One NPL site was identified within a one-mile radius of the Property. The Hudson River PCBs site, located approximately 4,203 feet northwest of the Property. The site is also identified I the SEMS database. Based on the distance from the Property, the NPL site would not be expected to have significantly affected subsurface conditions at the Property.

Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)

CERCLIS is a compilation of sites which the USEPA has investigated, or plans to investigate, pursuant to the Superfund Act of 1980 (CERCLA). As such, some of these sites may ultimately present concerns and others may not (but could still pose a perceived threat, thus affecting property values).

No CERCLIS sites were identified within a ½-mile radius of the Property.

SEMS-ARCHIVE (Superfund Enterprise Management System Archive)

This database tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time.

No SEMS-Archive sites were identified within a ½-mile radius of the Property.

Emergency Response Notification System (ERNS)

This federal database, compiled by the Emergency Response Notification System, records and stores information on certain reported releases of petroleum and other potentially hazardous substances.

No ERNS listings were identified as potentially located on the Property in the database information.

Toxic Chemical Release Inventory System (TRIS)

The TRIS contains information reported by a variety of industries on their annual estimated releases of certain chemicals.

No TRIS sites were identified within a ⅛-mile radius of the Property.

Federal Institutional Control/Engineering Control Registries

These registries are listings of sites with engineering and institutional controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site.

The Property was not listed in the Federal Institutional Control/Engineering Control Registries database.

5.2.2 State

The state records reviewed included listings of hazardous material spills; Resource Conservation and Recovery Act (RCRA) Notifiers; Chemical Bulk Storage (CBS); Solid Waste Facilities (SWF); Petroleum Bulk Storage (PBS); State Inactive Hazardous Waste Disposal Sites (SHWS); State Hazardous Substance Waste Disposal Sites (SHSWDS); Major Oil Storage Facilities (MOSF); Brownfield Sites; Environmental Restoration Program (ERP) sites; Voluntary Cleanup Program (VCP) sites, and Brownfield Cleanup Program (BCP) sites.

New York SPILLS Database

This database includes releases reported to the NYSDEC, including tank test failures (for USTs only) and tank failures.

The Property was not listed on the Spills database. A total of 258 spills were reported within a ½-mile radius of the Property, including 70 LTANKS and 258 NY Spills sites.

Most listings were for small quantities of recovered material identified in manholes, vaults, and service boxes on the surrounding intersections or abandoned materials in vacant properties or along the road. Recovered materials include petroleum, dielectric fluid, and lead, and due to regulatory status are not anticipated to have affected the subsurface conditions at the Property. Nearby listings included:

- Spill No. 1110699 was reported in December 2011 at a commercial property/parking garage, located at 302-304 West 155th Street, approximately 229 feet west-northwest of the Property.

  According to the listing, an initial subsurface investigation around two presumed 1,000-gallon USTs beneath basement slab was performed in November 2011, in which product was discovered within soil borings. Soil contamination included ethylbenzene, xylenes, and naphthalene. Groundwater contamination included benzene, toluene, ethylbenzene, xylenes, and naphthalene. A Remedial Action Plan was submitted to NYSDEC in March 2012, which included the registration and removal of the USTs, endpoint sampling, groundwater sampling, removal of product via extraction fluid recovery, and treatment of remnant contamination with Regen-Ox. During remedial investigation and action activities, beneath the two-1,000 gallon steel USTs, three additional 500-gallon USTs were encased within concrete. The USTs were removed, as well as 40 tons of impacted soils. Endpoint sample results noted elevated VOCs; therefore, an additional 80 tons of impacted soils were removed, as well as 1,300-gallons of liquid from the excavation.

Additional delineation monitoring wells were installed (two on-site, three off-site). Based on the results of the endpoint sampling, remaining soil contamination related to historic fill. Groundwater results still detect VOCs; however, NYSDEC closed the in April 2013, with the contingency that should the Property be redeveloped, a vapor barrier/moisture barrier be incorporated.

- Spill No. 1502702 was reported in June 2015 at Madison Square Boys & Girls Club, located at 250 Bradhurst Avenue, approximately 384 feet west-northwest of the Property. According to the listing, the spill was reported based on the results of a subsurface investigation. Five-550-gallons USTs were previously closed and removed from the Property in 2003. The Phase II Investigation confirmed soil, groundwater and soil vapor contamination likely related to the former 550-gallon USTs and three former hydraulic lifts associated with historic hydraulic tanks. The Remedial Action Plan for the Property sent to NYSDEC in April 2016 included managing soils as regulated solid waste, disposing of petroleum-impacted soils to a permitted facility, dewatering treatment if necessary, and the installation of a continuous waterproofing/vapor barrier for the future building design. The NYSDOH reviewed the RAP and based on elevated soil vapor levels, recommended that a positive pressure sub-slab depressurization system (SSDS) be implemented. Upon completion of the SSDS, soil vapor investigation concluded that results did not indicate any additional concern at the site and that the SSDS could be passive. The case was closed in October 2019.

Based on listing details, including nature of the spills, distance from the Property, and/or inferred groundwater flow direction, these and the remaining spill listings would not be expected to have affected subsurface conditions at the Property. Details from all spills are included in Appendix D.

Resource Conservation and Recovery Act (RCRA) Notifiers Listings

This database lists sites that have filed notification forms regarding hazardous waste activity, including: treatment, storage and disposal facilities (TSDs); small-quantity (SQG) and large-quantity generators (LQG); and transporters regulated under RCRA. The discussion below includes any CORRACTS listings of facilities that are subject to corrective action under RCRA.

No CORRACTS sites were listed within a one-mile radius of the Property. No TSD facilities were listed within a one-half mile radius of the Property and 2 Generators/Transporters and 27 non-generators were reported within a ⅛-mile radius of the Property. The Property was not listed as a RCRA generator (or non-generator) of hazardous wastes.

Based on their locations or listing details (e.g., waste type), the listed RCRA facilities, including Con Ed listings associated with utility vaults near the Property, are not anticipated to affect the Property (releases within utility vaults tend to be contained within the vaulted structures).

Chemical Bulk Storage (CBS) Database

The New York CBS is a list of facilities that store regulated non-petroleum substances in aboveground tanks with capacities greater than 185 gallons and/or in underground tanks of any size.

No CBS facilities were listed within a ⅛-mile radius of the Property.

Solid Waste Facilities (SWF)

This database includes certain landfills, incinerators, transfer stations, recycling centers, and other sites which manage solid waste.

No Solid Waste Facilities were identified within a ½-mile radius of the Property.

Petroleum Bulk Storage (PBS) Database

This database lists facilities that registered having either aboveground or underground petroleum tanks with total storage exceeding 1,100 gallons. Facilities with more than 400,000 gallons appear on the Major Oil Storage Facilities (MOSF) database (see below).

A total of 19 PBS facilities were identified within a ⅛-mile radius of the Property.

Table 1
Area Petroleum Bulk Storage Facility Data

Location	Capacity (gallons)	Product Stored	Status	Distance/Direction from the Property
Fordham Toyota 235 W. 154th Street	9 x 550 USTs 1 x 550 UST 2 x 5,000 USTs 1 x 500 AST 1 x 500 AST	Gasoline Waste Oil No. Fuel Oil Waste Oil Motor Oil	Removed Removed Removed In-Use In-Use	54 feet south
2918 8th Avenue Association 2918 8th Avenue	1 x 1,500 AST	No. 2 Fuel Oil	Closed-Removed	76 feet west-northwest

Uphattan Corp. 303 West 154th Street	1 x 4,000 AST	No. 4 Fuel Oil	In Service	279 feet west-northwest
Power Test/Getty #00281 83 Macombs Avenue	1 x 2,000 UST 5 x 550 USTs 1 x 550 UST	Gasoline Gasoline Gasoline	Closed-Removed Closed-Removed In Service	302 feet south-southwest
270 West 153rd Street	1 x 3,000 AST	No. 2 Fuel Oil	In Service	434 feet west-southwest

Notes: AST - aboveground storage tank
UST - underground storage tank

Based on listing details, distance from the Property, and/or inferred groundwater flow direction, unreported spills from some of the closer facilities above, but not the remaining listed PBS facilities, might have affected the Property subsurface. Details of the additional PBS facilities located within ¼ mile of the Property are included in Appendix D.

State Inactive Hazardous Waste Disposal Site Registry (SHWS)

This program (also known as State Superfund) lists information regarding a variety of sites likely requiring cleanup.

Two State Inactive Hazardous Waste Disposal Sites were reported within a one-mile radius of the Property. Based on listing details and distance from the Property (over 2,000 feet away), these facilities are not anticipated to have affected environmental conditions at the Property.

State Hazardous Substance Waste Disposal Site Study (SHSWDS)

This database tracks certain sites that were not listed on SHWS, but may still require investigation and/or cleanup.

No SHSWDS facilities were identified within a ½-mile radius of the Property.

Major Oil Storage Facilities (MOSF) Database

These facilities have petroleum storage of 400,000 gallons or more.

No Major Oil Storage Facilities were reported within a ½-mile radius of the Property.

Environmental Restoration Program

These sites (which are generally municipally-owned) are receiving New York State funding for site investigation and remediation. Some sites in this program have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present.

No ERP sites were identified within a ½-mile radius of the Property.

Voluntary Cleanup Program/Brownfield Cleanup Program

The Voluntary Cleanup Program (VCP) is a NYSDEC program for investigation and remediation of (generally) privately-owned sites. Some sites in this program have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present. The Brownfield Cleanup Program (BCP) program is the successor to the Voluntary Cleanup Program. Again, some sites have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present.

Three BCP sites were listed within ½-mile of the Property. Two VCP sites were identified within ½-mile of the Property. The Property is listed as a BCP site:

- The Property is listed as West 155th Street, located at 216 West 155th Street. The US Brownfields database record is reportedly associated with former Lots 48 and 61 and notes that 0.57 acres of the site was historically operated for commercial purposes and 0.29 acres of the site was historically operated for industrial purposes. Additional research performed on USEPA's online MyProperty database revealed that the site is listed in the FRS Facility Detail Report Database under Facility ID No. 110044214490 for participation within

the Assessment, Cleanup and Redevelopment Exchange System (ACRES) as a Brownfields Property as of October 2011 under Brownfield ID No. 135530. The site is listed as "assessed" with a cleanup required and an EPA grant of $9,731.00. The site is also listed in the Enforcement and Compliance History Online (ECHO) database, although no violations were reported. A Phase II Subsurface Investigation was reportedly completed in 2019; however, the results of the investigation were not available for review. Databases were requested in a record search form dated January 29, 2020. As of the date of this report, the NYSDEC has not issued a response. If issues of potential concern are identified upon receipt of a response, an addendum to this report will be prepared to discuss relevant findings.

Based on listing details and distance from the Property, the remaining facilities are not anticipated to have affected environmental conditions at the Property.

New York City (E) Designation Site Listing

A New York City (E) designation for a property requires that the owner conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the New York City Office of Environmental Remediation (NYCOER) before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements).

The Property was not assigned an E-designation according to the database information.

Registered Dry Cleaners/EDR US Hist Cleaners

The registered dry cleaners database was researched to identify listings within one-quarter mile of the Site. As a supplement to the registered dry cleaners database, EDR's proprietary listing of potential drycleaner sites (listings based on the opinion of EDR) was also reviewed.

The Property was not listed in the EDR US Hist Cleaners database. Four Registered Dry Cleaners sites were listed within a one-half mile radius of the Site. Based on listing details and distance from the Property (over 500 feet away), these facilities are not anticipated to have affected environmental conditions at the Property.

5.2.3 Local Agency File Review

Records available online from the New York City Fire, Buildings, and Finance Departments were viewed for the Property. Since the records typically address a multitude of issues, the review focused on items likely to relate to the potential presence of hazardous materials, e.g., petroleum tank installation applications and permits, and records indicating prior uses. Copies of other pertinent local records and Freedom of Information Law (FOIL) requests are included in Appendix E.

Fire Department of New York City (FDNY)

The FDNY is responsible for the enforcement of local fire codes pertaining to the use and storage of flammable and hazardous materials. FDNY maintains public records with regard to tanks in six separate databases: (1) Total amount and size of existing fuel oil/heating oil; (2) Total amount and size of removed or sealed fuel oil/heating oil; (3) Total amount and size of existing buried motor vehicle tanks; (4) Total amount and size of removed or sealed motor vehicle tanks; (5) Most recent tank/piping test; and (6) History of buried tank leaks.

Searches of the "total amount and size of existing fuel oil/heating tanks" and "the total amount and size of removed or sealed fuel oil/heating tanks" databases were requested in a record search form dated December 27, 2019. As of the date of this report, the FDNY has not issued a response. If issues of potential concern are identified upon receipt of a response, an addendum to this report will be prepared to discuss relevant findings.

Buildings Department (DOB)

Electronic NYCDOB records for the Property were reviewed to determine whether there were any references to buildings, tanks or other structures, property usage or inspection reports that may have indicated the presence, past use, or release of hazardous substances, wastes or petroleum products within the Property.

Computerized Buildings Department records for the Property tax lot identified the following:

- A permit issued in 1937, 1966, and 1968 for an oil burner application

No additional pertinent environmental records were identified in the NYCDOB electronic files.

Department of City Planning (NYCDCP)

Online NYCDCP records identified no E-Designations or Restrictive Declarations (RDs) for the Property.

Department of Finance

Electronic property transaction records for the Property Block and Lot were reviewed from the New York City Department of Finance Office Automated City Register Information System (ACRIS). Deed information obtained from the ACRIS files is summarized as follows:

Police Plaza (Block 2040; Lot 40):

Year	Grantor/Grantee
1981	Grantor is: Commissioner of Finance of The City of New York; Grantee is: The City of New York

204 West 155th Street (Block 2040; Lot 43):

Year	Grantor/Grantee
1981	Grantor is: Commissioner of Finance of The City of New York; Grantee is: The City of New York

216 West 155th Street (Block 2040; Lot 48):

Year	Grantor/Grantee
1977	Grantor is: Commissioner of Finance of The City of New York; Grantee is: The City of New York
1981	Grantor is: Commissioner of Finance of The City of New York; Grantee is: Edward Hamm
1984	Grantor is: Edward Hamm; Grantee is: 218 West 155th Street Realty Corp.
1994	Grantor is: 218 West 155th Street Realty Corp.; Grantee is: Edward Stevenson
2002	Grantor is: Edward Stevenson; Grantee is: Cactus Properties 1, LLC

2005	Grantor is: Cactus Properties 1, LLC; Grantee is: Cactus of Harlem, LLC
2019	Grantor is: Cactus of Harlem, LLC; Grantee is: 280 W 155th St Owner LLC

2926 Frederick Douglas Boulevard (Block 2040; Lot 61):

Year	Grantor/Grantee
1975	Grantor is: Finance Administrator of The City of New York; Grantee is: The City of New York
1981	Grantor is: Commissioner of Finance of The City of New York; Grantee is: The City of New York
1999	Grantor is: The City of New York; Grantee is: Western Beef Properties, Inc.
2005	Grantor is: Western Beef Properties, Inc.; Grantee is: Cactus of Harlem, LLC
2019	Grantor is: Cactus of Harlem, LLC; Grantee is: 280 W 155th St Owner LLC

New York City Department of Environmental Protection (NYCDEP)

AKRF sent a FOIL request pertaining to environmental records to the NYCDEP on December 27, 2019. On December 27, 2019, NYSDEC issued a response e-mail acknowledging the request. In an email dated January 8, 2020, NYCDEP indicated that no records associated with the Property were identified.

New York City Department of Health and Mental Hygiene (NYCDOHMH)

AKRF sent a FOIL request pertaining to environmental records to the NYCDOHMH on December 27, 2019. To date, no response has been provided. If issues of potential concern are noted upon receipt of the information, an addendum to this report will be created to discuss relevant findings.

New York State Department of Health (NYSDOH)

AKRF sent a FOIL request pertaining to environmental records to the NYSDOH on December 27, 2019. To date, no response has been provided. If issues of potential concern are noted upon receipt of the information, an addendum to this report will be created to discuss relevant findings.

5.2.4 Additional Environmental Record Sources

To enhance the search, ASTM requires that additional local records be reviewed (i.e., beyond those included as part of the standard database search or checked online) when, in judgment of the environmental professional, such records for the Property or any adjoining property would be reasonably ascertainable; and useful, accurate and complete in light of the objective of the records review. These records include:

- Local brownfields lists
- Local lists of landfill/solid waste disposal sites
- Local lists of hazardous waste/contaminated Sites
- Local lists of registered tanks
- Local land records (for activity use limitations)
- Records of emergency release reports
- Records of contaminated public wells

Sources for these records include:

- Fire Department
- Local/Regional Water Quality Agency
- Local Electric Utility (for PCB records)

In addition to the Local Agency File Review, AKRF sent Freedom of Information Law (FOIL) requests on December 27, 2019 to the NYSDEC to determine whether pertinent environmental records for the Property could be obtained for further review. In an email dated January 13, 2020, NYSDEC indicated that no records associated with the Property were identified; however AKRF sent an additional request on January 29, 2020 pertaining specifically to Brownfield ID No. 135530. To date, no response has been provided. If issues of potential concern are noted upon receipt of the information, an addendum to this report will be created to discuss relevant findings.

Copies of the FOIL requests and responses are included in Appendix E.

If issues of potential concern are noted upon receipt of this information, an addendum to this report will be created to discuss relevant findings. In AKRF's judgment, no such additional local records meeting the ASTM criteria are pertinent for the Property.

6.0 USER-PROVIDED INFORMATION

In preparing this Phase I ESA, AKRF requested that the client provide any pertinent information regarding the Property, specifically:

- The reason for performing the Phase I ESA;
- Whether they were aware of any pertinent current or historic activities at or near the Property, including but not limited to: hazardous substances or petroleum, waste management practices, filling or disposal drains, septic/sewer systems, and potable and non-potable wells;
- Owner and occupant information and whether they were aware of any previous Phase I ESAs or other potentially pertinent reports, plans or information;
- Whether any *environmental liens* or *activity and land use limitations* are in place or filed or recorded against the Property or whether there was pending, threatened, ongoing or past violations, litigation or enforcement action relevant to hazardous substances or petroleum products;
- Whether they had any specialized knowledge or experience related to the Property or nearby properties (e.g., specialized knowledge of the chemicals used by this type of business);
- Whether the (anticipated) purchase price reflects that the Property is or could be contaminated; and
- Whether they were aware of commonly known or reasonably ascertainable information about environmental conditions of the Property including current/past uses of the Property and adjacent properties.

The Phase I ESA was conducted to provide preliminary environmental information as part of due diligence for the potential renovation/redevelopment of the Property. To the extent that pertinent additional information was provided, it has been summarized elsewhere in this report.

7.0 PREVIOUS STUDIES

No previous studies were provided.

8.0 VAPOR ENCROACHMENT SCREENING

A Tier 1 Vapor Encroachment Screening was conducted in accordance with ASTM Standard E2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. The term "Vapor Encroachment Condition" means the presence or likely presence of vapors from chemicals of concern (COC) in the subsurface of a Property caused by the release of vapors on or near the Property. The object of the Tier 1 screening is to conduct a screen for vapor encroachment based on findings from the Phase I ESA to determine if a possible VEC exists at the Property.

Based on AKRF's review of historical and regulatory database records, potential VECs were identified based on the Tier 1 Vapor Encroachment Screening, due to the Property's listing as "cleanup required" on the US Brownfields database, the former steam laundry boiler house, and adjacent garages with gasoline tanks and auto repair.

9.0 LIMITATIONS AND DATA GAPS

This assessment met the requirements of the American Society for Testing and Materials (ASTM) as established by ASTM Standard E1527-13 at the time it was performed, with the following limitations:

- Results of this investigation are valid as of the dates on which the investigation was performed.
- There was no Property access. The inspection of the Property was limited to viewing from outside of the chain link fence.
- Interviews and user provided information were limited to those discussed in Section 6.0. To the extent that interviews were not conducted with the list of interviewees cited in the ASTM Standard (past and present owners, operators, and occupants of the Property and local government officials), AKRF does not believe that this represents a significant data gap likely to result in additional or significantly changed recognized environmental conditions or conclusions.
- The Property area history was not conducted in five-year intervals. However, sufficient information about the history of the site and surrounding area could be obtained from the available historical Sanborn and topographic maps, Buildings Department records, and interviews, and this data gap is not likely to alter the conclusions of this report.
- Agency file reviews for the Property and adjacent properties consisted of a review of standard databases and electronic records maintained by pertinent departments and agencies (summarized in Section 5.2). AKRF believes that this file review was sufficient in determining the potential for recognized environmental conditions or other environmental concerns at the Property and additional reviews beyond this are not warranted and would not likely change the conclusions of this assessment.

10.0 CONCLUSIONS AND RECOMMENTAIONS

This Phase I Environmental Site Assessment was performed in conformance with ASTM Standard E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice. Any exceptions to, or deletions from, the Standard are described in Section 8.0. The term "Recognized Environmental Condition" (REC) means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The Standard also includes definitions of Historic REC, Controlled REC and De Minimis Condition.

A Tier 1 Vapor Encroachment Screen was also conducted in accordance with ASTM Standard E2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. The term "Vapor Encroachment Condition (VEC)" means the presence or likely presence of vapors from chemicals of concern (COC) in the subsurface of a property caused by the release of vapors on or near the property.

The assessment revealed evidence of the following RECs/VECs:

- The Property is listed as a New York State Department of Environmental Conservation (NYSDEC) Brownfield cleanup Program (BCP) and in the US Brownfields database. The US Brownfields database record is reportedly associated with former Lots 48 and 61 and notes that 0.57 acres of the site was historically operated for commercial purposes and 0.29 acres of the site was historically operated for industrial purposes. Additional research performed on USEPA's online MyProperty database revealed that the site is listed in the FRS Facility Detail Report Database under Facility ID No. 110044214490 for participation within the Assessment, Cleanup and Redevelopment Exchange System (ACRES) as a Brownfields Property as of October 2011 under Brownfield ID No. 135530. The site is listed as "assessed" with a cleanup required. The site is listed in the Enforcement and Compliance History Online (ECHO) database with no violations. A Phase II Subsurface Investigation was reportedly completed in 2019; however, the results of the investigation were not available for review. Additional records were requested on January 29, 2020, but NYSDEC has not yet issued a response.
- Historical Sanborn maps indicated that the Property was developed by 1909 with the uses that included a steam laundry with associated boiler building. Underground storage tanks (USTs) or buried Aboveground storage tanks could remain.
- South adjacent uses included garages with gasoline tanks and repair facilities.

Other Environmental Concerns and De Minimis Conditions

- Buried foundation elements and demolition debris from the former Property building could include polychlorinated biphenyls (PCBs), asbestos containing materials (ACM), lead-based paint (LBP).

Recommendations

- All investigations and other studies performed for the BCP and US Brownfields program should be obtained and reviewed. Based upon their findings, prior to redevelopment of the Property, additional subsurface investigation and potentially remediation may be required.
- The drums on the Property and any other surplus materials should be properly disposed of.
- After properly removing any known USTs or buried ASTs, if any petroleum USTs or buried ASTs are encountered during the redevelopment, they should be closed and removed, along with any contaminated material, in accordance with applicable requirements. Any evidence of a petroleum spill

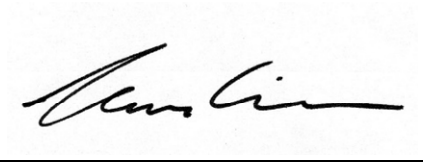
should be reported to New York State Department of Conservation (NYSDEC) and addressed in accordance with applicable regulatory requirements, including those relating to tank registration.

- During soil disturbance, all excavated soil should be managed in accordance with applicable regulatory requirements. All soil and any other materials intended for off-site disposal should be tested in accordance with the requirements of the intended receiving facility. Transportation of material leaving the site for off-site disposal should be in accordance with federal, state and local requirements covering licensing of haulers and trucks, placarding, truck routes, manifesting, etc. If contaminated soil is discovered during soil excavation, it should be removed and disposed of in accordance with applicable regulatory requirements, including those relating to spill reporting, if necessary.
- Any suspect ACM, PCB-containing material, and/or LBP encountered in the subsurface should be properly characterized, managed, and disposed of in accordance with all applicable regulations prior to disturbance during future construction activities.
- If dewatering is required during construction, water must be discharged in accordance with New York City Department of Environmental Protection (NYCDEP) requirements.

11.0 SIGNATURE PAGE

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property for which the assessment was performed. We have performed all the appropriate inquiries in conformance with standards and practices set forth in 40 CFR Part 312.



Marcus Simons
Senior Vice President

12.0 QUALIFICATIONS

The purpose of this assessment was to convey a professional opinion about the potential presence or absence of contamination, or possible sources of contamination on the property, and to identify existing and/or potential environmental problems associated with the property including *Recognized Environmental Conditions* as defined in ASTM Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice.*

The assessment was performed in accordance with customary principles and practices in the environmental consulting industry, and in accordance with the above-referenced ASTM Standard, except as noted otherwise in Section 8.0. It should only be used as a guide in determining the possible presence or absence of hazardous materials on the property at the time of the reconnaissance, as it is based upon the review of readily available records relating to both the property and the surrounding area, as well as a visual reconnaissance of current conditions.

This Phase I Assessment is not, and should not be construed as, a guarantee, warranty, or certification of the presence or absence of hazardous substances, which can be made only with testing, and contains no formal plans or recommendations to rectify or remediate the presence of any hazardous substances which may be subject to regulatory approval. This report is not a regulatory compliance audit.

This report is based on services performed by AKRF, Inc. professional staff and observation of the property and its surroundings. We represent that observations made in this assessment are accurate to the best of our knowledge, and that no findings or observations concerning the potential presence of hazardous substances have been withheld or amended. The research and reconnaissance have been carried to a level that meets accepted industry and professional standards. Nevertheless, AKRF and the undersigned shall have no liability or obligation to any party other than Harlem Congregations for Community Improvement and their successors or assignees, and AKRF's obligations and liabilities to the above, their successors or assignees is limited to fraudulent statements made, or grossly negligent or willful acts or omissions.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/25/2019 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
HUDSON RIVER PCBS Cerclis ID:: 202229 EPA Id: NYD980763841	***NO STREET APPLICABLE***	***NW 1/2 - 1 (0.796 mi.)***	***0***	***8***

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/24/2019 has revealed that there is 1 RCRA-LQG site within approximately 0.125 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/24/2019 has revealed that there is 1 RCRA-SQG site within approximately 0.125 miles of the target property.

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 08/12/2019 has revealed that there are 2 NY SHWS sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 11/11/2019 has revealed that there are 70 NY LTANKS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/24/2019 has revealed that there are 27 RCRA NonGen / NLR sites within approximately 0.125 miles of the target property.

NY VAPOR REOPENED: "Vapor intrusion" refers to the process by which volatile chemicals move from a subsurface source into the indoor air of overlying or adjacent buildings. The subsurface source can either be contaminated groundwater or contaminated soil which releases vapors into the pore spaces in the soil. Improvements in analytical techniques and knowledge gained from site investigations in New York and other states has led to an increased awareness of soil vapor as a medium of concern and of the potential for exposures from the soil vapor intrusion pathway. Based on this additional information, New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

A review of the NY VAPOR REOPENED list, as provided by EDR, and dated 12/01/2018 has revealed that there is 1 NY VAPOR REOPENED site within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
LOZANOS SERVICE STAT	83 MACOMBES PLACE	SSW 0 - 1/8 (0.057 mi.)	D50	134

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical

Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Hazardous Waste Summary:

. Waste code: B002
. Waste name: Petroleum oil or other liquid containing 50 ppm or greater of PCBs, but less than 500 ppm PCBs. This includes oil from electrical equipment whose PCB concentration is unknown, except for circuit breakers, reclosers and cable.

. Waste code: B007
. Waste name: Other PCB wastes, including contaminated soil, solids, sludges, clothing, rags and dredge material.

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

Violation Status: No violations found

Tank Info:

Tank Number:	001
Tank Id:	252256

Equipment Records:

G09 - Tank Secondary Containment - Modified Double-Walled (Aboveground)
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
K01 - Spill Prevention - Catch Basin
F00 - Pipe External Protection - None
E00 - Piping Secondary Containment - None
I02 - Overfill - High Level Alarm
C01 - Pipe Location - Aboveground

FORDHAM TOYOTA (Continued) **A100393051**

L00 - Piping Leak Detection - None
J02 - Dispenser - Suction Dispenser
H05 - Tank Leak Detection - In-Tank System (ATG)

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 01/01/2008
Capacity Gallons: 500
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

CON EDISON MANHOLE: 32916 (Continued) **1016677232**

corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number: 001
Tank Id: 37308
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

L09 - Piping Leak Detection - Exempt Suction Piping
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
F00 - Pipe External Protection - None
J02 - Dispenser - Suction Dispenser
C03 - Pipe Location - Aboveground/Underground Combination

262 WEST 154TH STREET (Continued) **U003394950**

	I05 - Overfill - Vent Whistle
Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	Not reported
Capacity Gallons:	2500
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	01/01/2003
Register:	True
Modified By:	CGFREEDM
Last Modified:	04/14/2017
Material Name:	#2 fuel oil (on-site consumption)

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110063779193

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Contact Name:	ERIC TELEMAQUE
DEC Memo:	"Probably 2-1,000 gal tanks - Found product in borings around tanks. Proposal to either pull the tanks now while the building is in place vs waiting for the building to be knocked down first. Building/Lot is being sold and purchaser is deciding which option would be best. Either way Emteque is planning to prepare/submit a Remedial Action Plan. They are planning on pulling the tanks, removing the impacted soil and installing monitoring wells in the area. Then a series of groundwater samples taken over time to prove the area is clean. 5/2/12-Vought-Received call from Eric Telemaque (Ph:212-631-900 email:eric@emteque.com) and you are working for owner. Suspected three tanks (three anomolies), one below ramp and two below basement slab. One or both tanks below slab possible leaked in northeast corner of property. RAP will be submitted. Another site immediately adjacent within same block and lot will be developed along with property. Groundwater at 17-18'bg. Property has not been sold yet and will not be developed for a few months away from foundation placement. RAP will sumbmit will include tank removal and endpoint samples. Basement excavation will be left open and product will be vacuumed and remnants treated with Regenox. Telemaque will submit RAP by 3/15 which will also include provisions for IRM if significant free product and surrounding area site plan. 6/18/12-Vought-Reviewed Hazardous Materials Remedial Action Plan dated May 2012 and prepared by Emteque. Plan prepared for: Mr. Michael Price Icon Parking 211 East 38th Street Ground Floor New York, NY 10016 Ph:(212)686-8663 email:mprice@iconparking.com Site is a commercial parking garage with one level on grade and one level below grade. Proposed use includes demolition of existing structures with redevelopment of the site . GPR survey performed as well as preparation of a Phase II report in November 2011. Vought called Telemaque and left message to send Phase II Report. One anomaly was discovered outside the lower level concrete driveway and two possible USTs were also noted on the north end of the parking garage. Fifteen Geoprobe borings installed with six converted to temporary monitoring wells. Select soil samples revealed the presence of VOCs and SVOCs but except boring B-3, all were below unrestricted SCO. MW2 also noted groundwater exceeences of VOCs. Lab data suggests that the contamination to groundwater and soils in the north east corner of the basement may have come from GPR anomolies which they believe to be USTs. Proposal for registration of tanks with PBS, removal of liquid and sludge for tanks, tank cutting and removal of steel and contaminated soil and free product and collection of endpoint samples. For lower level tanks, proposal for no bottom soil endpoint as bottom in groundwater. Proposal for collection of baseline groundwater sample and RegenOx application if no free product is noted. Proposal for monitoring groundwater in the excavation for dissolved oxygen, pH and redox every 30 days for a ninety day period. Construction Health and Safety Plan also included in RAP. Plan notes that a Remedial Closure Report will be submitted

COMMERCIAL PROPERTY/PARKING GARAGE (Continued) **S111456729**

following implementation of the RAP. Vought drafted DEC requirement letter and will finalize upon receiving and reviewing Phase II from Emteque. 6/19/12-Vought-Received email from Emteque (Lynelle Cardone) with soil analyticals and a site plan from November 2011 but no soil boring logs or sampling depths of the soil samples are provided and as such DEC cannot determine if RAP is sufficient to cover the entire area as per the investigation results. Vought called Emteque (Cardone) and asked her to send in boring logs and complete report or at a minimum depths of soil samples collected. Soil analyticals show: 5300ppb ethylbenzene(B3 unknown depth), 1300ppb xylene(B3 unknown depth), 19000ppb napthalene(B3 unknown depth). Groundwater analyticals show: 260ppb benzene(MW2), 100ppb toluene(MW2), 650ppb ethylbenzene(MW2), 222ppb xylene(MW2), 430ppb napthalene(MW2). 6/21/12-Vought-Received email from Telemaque on 6/20 that This is what I have in my files from the Driller. Please let me know if you need additional information and please let me know once you have had a chance to review the RAP so that we can implement. We are prepared to file dwgs with DOB on Monday to pull permits and get the work scheduled. The borings with the deeper depths came from the property to the west which is slab on grade. The shallow borings came from the basement of the property at 155th Street, where we noted contamination. Vought sent letter to Price for review of Phase II and RAP and letter did not approve of Summary of Remedial Actions #11, #12 and 15 (for Regenox application) but letter did approve all other Summary of Remedial Actions. Letter also required submission of development plans for site, collection of bottom endpoint groundwater sample, determination of flow direction and installation of a downgradient well, submission of a surrounding area site plan and quarterly groundwater sampling and no development of site until RAP is approved by DEC. Emteque cc'd on letter. 7/16/12-Vought-Received email from Telemaque on 7/2 that the site is not scheduled for development at this time , collection of one bottom sample will be incorporated into revised RAP, inquiry if attached receptor report from EDR will suffice, quarterly groundwater sampling will be incorporated into revised RAP and delineation via installation of downgradient wells and flow determination will also be incorporated into revised RAP. Received email on 7/11 from Telemaque that I sent you a couple of emails on 7/2 regarding the above referenced site. We would like to move forward with the work pending DOB permits which are in process. Can you please give me a call at your convenience to discuss? Ownership is anxious to remove the tanks and associated contaminated soils. Vought called Telemaque and left message to return call to Vought. Vought also sent email to Telemaque and cc to Price that Thanks for your patience and I have reviewed the below response to the Department's letter dated 6/21. A couple of questions: 1)Item 1- You noted on 5/12 during a phone conversation that the site will be sold. Will be it be redeveloped upon that time and to what use? Do we have a purchaser already? I 2)Item 3- I would like surrounding area site plan with labeled property uses and I am not sure EDR can do that. I am essentially looking for a block and lot map with uses such as school or residential building, stores etc to document the presence and/or absence of sensitive receptors. I just left a message on your cell phone as well and the Department looks forward to reception of the revised RAP .
7/17/12-Vought-Received email from Telemaque that no development or sale plan at this time. I will get you the sensitive receptor labelled map today . Vought replied that Department will consider ORC

COMMERCIAL PROPERTY/PARKING GARAGE (Continued) **S111456729**

application once the delineation results and receptor maps are in. 2/22/13-Vought-File review by Vought due to inquiry by Emteqe (Jim Blaney): Email from Blaney-11/12/12. Email that We are waiting on a response from NYS DEC with regard to our remedial investigation strategy at the 304-310 West 155th Street Site. I have copied our NYDEC Case Manager, Jeffrey Vought, to this email. In the interim we are applying for a sidewalk opening permit from the City so that we may begin the work once we receive Jeffrey s input. Email from Emteque-2/20/13. Email from Telemaque that With regards to the above referenced spill number, we have been trying to reach you to schedule a discussion or a meeting at your offices to discuss the above referenced spill and possible closure of the spill. This is a follow up email to voicemail messages I have left at your office and on cell, today, regarding this spill and prior message from Jim Blaney. Our client has a potential buyer for the property and we are anxious to move the spill closure along. Please feel free to contact either myself or Jim Blaney to discuss. Jim is more familiar with the technical details and can be reached on cell at 609.613.2004. My contact information is detailed below. In the event that you are no longer managing this spill can you forward this email to the new case manager. 2/22/13-Vought-Received call from and spoke to Emteque (Jim Blaney) and unknown development plans to date and they did collect groundwater samples and they installed well points inside basement of garage and additional soils excavated due to VOCs and lead till clean and well also installed outside of building and temporary water samples came back as non-detect. They submitted proposal to DEC and due to lack of response, work plan was initiated. No data has been submitted to date. Five temporary well points total installed. Additional excavation was performed to encompass soil and groundwater contamination at MW2 as such DEC will not require ORC injection. Closure report will be submitted and will include discusssion of vapor mitigation (eg vapor barrier). Data to be submitted to DEC within one month. 4/19/13-Vought-Received call from and spoke to Emteque (Lindemuth) who noted that site address was actually 302-304 West 155th Street and not 304-310 West 155th Street as previously reported. Vought changed spill address to same. 4/23/13-Vought-File review by Vought due to recent phone request by Emteque (Lindemuth) to review closure report. Email from Lindemuth to Vought-4/16/13. Email that am following up on a phone conversation we had last week (4/11) regarding the Remedial Action Report (RAR) submitted by Emteque for Spill Case No. 11-10699 assigned to the property located at 304-315 West 115th Street, NY, NY. During our conversation you indicated you would be able to review the report this week. The client has two potential purchasers and would like to be able to move the property transaction forward. Please contact Jim Blaney (cell 609-613-2004) or me for clarification during your review of the RAR. Thank you for your attention to this case. Email from Lindemuth to Vought-4/18/13. Email that Jeff,Per our conversation please use the link provided below to download a revised Spill Closure Report which corrects the address and Tax Map Block and Lot of the property. The correct address of the Site is 302-304 West 155th Street, New York, NY 10039, Tax Map Block 2047, Lot 37. Click here to view.Please contact Jim Blaney or me with any questions or comments.Thank you for you attention to this case. 4/23/13-Vought-Reviewed Remedial Action Report dated 3/25/13 received from Emteque and added report to E-docs. Future development plans of property are unknown . No UST was identified in GPR anomaly by driveway/ramp via test pit installation

COMMERCIAL PROPERTY/PARKING GARAGE (Continued) **S111456729**

to 4'bg. Five USTs found in anomaly in basement where two USTs previously thought (Two 100-gallon steel USTs (which were most likely the USTs noted in the GRP survey) underlain by three concrete encased steel 500 gallon USTs. Groundwater at 4'bg. Contaminated soils removed as well and six endpoint samples collected from sidewalls and approximately 40 tons of impacted soil were removed. Elevated VOCs noted in three of six endpoint samples and another excavation was performed in two subsequent events and a total of 80 tons of impacted soil was removed. One groundwater grab sample also collected for the excavation. A total of 1300 gallons of liquid also removed from excavation. Additoinal delineation performed via installation of two monitoring wells (GW7 and GW8) onsite and three wells off-site (B18 thru B20). Report recommends closure. Vought called and spoke to Emteque (Lindemuth) and he will send in site plan with endpoint sample locations and delineation wells and noted that a DEC RAP review letter was not needed for this requirement. Groundwater analyticals show: 23ppb toluene(GW11), 7.2ppb napthalene(GW11). Note elevated PAH's found in soils most likely associated with fill material. Report also notes that It is also noted that NYSDEC recommended the incorporation of a vapor / moisture barrier into any future development plans for the property as part of the pending real estate transaction. 4/25/13-Vought-Received email from Lindemuth that Per our conversation please find the attached figure which shows the locations of the delineation borings and end-point samples. This Figure is included in the Remedial Action Report as Attachment E.Please let me know if you need any thing else. Vought added figure to E-docs. Spill closed by Vought due to minor groundwater contamination at GW11 within natural attenuation parameters as well as excavation of contaminated soil at site at confirmation samples with VOCs below CP51 Unrestricted SCOs. Note also that as per 4/23/13 email from Emteque It is also noted that NYSDEC recommended the incorporation of a vapor / moisture barrier into any future development plans for the property as part of the pending real estate transaction. Vought sent Spill Closure Letter with residual soil contamination clause to: Mr. Michael Price Icon Parking 211 East 38th Street Ground Floor New York, NY 10016 Ph:(212)686-8663 email:mprice@iconparking.com Vought also added Closure Letter to e-docs as well. 4/25/13-Vought-Received email from CA Rich Cooper that Jeff, I am working on Phase I for a property at 302 West 155th Street in Manhattan. The property had an open spill number 11-10699 and it has since been closed out. I have a client who wants to buy the property, but I just want to make sure they do not need to do any follow up work such as sub slab soil vapor sampling. The person selling the property told me it was good, but he hasn t sent over the whole report. He mentioned that a vapor barrier may be needed if the building is redeveloped, but he has not provided it to me. Can you e-mail me or call me to discuss this project? Vought called and spoke to Jason Cooper and he noted that site will still be a parking garage with ventilation and Vought noted that if future use of the site was to change than sub slab vapor sampling may be warranted. Spill to remain closed. 8/11/17-Vought-Received message from Langan (Chris McMahon Ph:973-560-4861) that he was looking for information as he was going to file a FOIL request as part of a property transaction. Vought returned call and left message with summary of remedial action and closure based on fact that site was to remain a parking garage with ventilation."

Remarks: "lab results show contamination"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Contact Name:	ILKAY CAN-SPANOS
DEC Memo:	"6/11/15-Vought-Received call from and spoke to Ilkay Cam Spanos Langan (212-479-5410) who noted that Vought worked on adjacent spill 1110699 which was probable source to this spill. Spanos noted there were onsite tanks (UST) removed in 2003. Langan is working for owners rep and owner is Madison Square Boys and Girls club. Site redeveloped with a community center (Boys and Girls Club). Ilkay will send conceptual development plans. Geotechnical drilling is ongoing as they want to put a swimming pool in basement and there is shallow bedrock. They have done borings to 100' and they have not hit bedrock. Development may begin within a year and they will submit a plan for moisture/vapor mitigation prior to development. 9/14/15-Vought-Spill transferred from Vought to Omar. Vought sent email to DEC Omar with cc to Ilkay that Rashad, Please review the Phase II Environmental Site Investigation that I just received and placed in D2 under the above referenced spill number and discuss with me so we can prepare a response to Langan (copied above). As you have been seeking more complicated sites as part of your training here in the Spills Unit, I believe this one is quite appropriate. Thanks, 9/14/2015: Rashad As per NYC building records 250 Bradhurst Avenue has alternate addresses of 250-256 Bradhurst Avenue and 310-350 West 155 Street. According to PBS# 2-608783 there are 5, 550 gallon underground gasoline tanks, the status of all the tanks are closed-removed on 3/1/2003, no other spill cases were found for this site. 9/15/2015: Rashad According to the introduction of Langan's submitted phase 2 report there were three other reports on this property which are contained in the appendix. The three additional reports are a Phase 1 Environmental Site Assessment on 8/19/2004, Geophysical Survey to locate UST completed on 11/30/2011, and a Memorandum dated 12/9/2011. The phase 1 investigation will be summarized first (this report included 250 Bradhurst Ave and adjacent property 304-10 West 155th Street): The property is identified as two parking garages including one commercial unit located at 250 Bradhurst Avenue and 304-10 West 155th Street. During the investigation by LCS there was evidence observed that would indicate the presence or likely presence of a release or threatened release of hazardous, toxic, or other substances of concern which that constitute a recognized environmental condition. During inspection LCS noted the presence of five suspect vent pipes protruding from the roof of the parking garage addressed at 250 Bradhurst Avenue. One additional suspect vent pipe was noted on the north side of this structure and two inactive 275-gallon fuel oil aboveground storage tanks (ASTS) were noted within the basement portion of the structure. No staining and/or evidence of release was noted in the vicinity of these ASTs. Two suspect fill/vent ports were noted on the north side of the structure addressed at 303-10 West 155th Street. Cut/crimped copper line were observed within the basement of this structure. No tank closure documentation was provided for USTs on this portion of the subject property. According to historic Sanborn Maps, three 550-gallon underground gasoline tanks were identified as being buried

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

beneath the parking garage at 250 Bradhurst Avenue and two 550-gallon underground gasoline tanks are identified as being buried beneath the parking garage at 304-10 West 155th street from at least 1939 through at least 1996. The Harlem River is located approximately 0.3 miles east of the subject property. This assessment has revealed no evidence of historical recognized environmental conditions in connection with the subject property. Geophysical Survey Summary (prepared on 11/30/2011): 155th Street Sidewalk (above long term parking ramp), a 4ft by 8ft rectangular anomaly was located outside the lower level concrete driveway ramp. The located target is a possible underground storage tank. A UST fill port and vent pipe are located in the sidewalk near the ramp overhead door. Lower level (long term parking garage) the concrete garage was surveyed on the north end of the garage. Two (2) possible USTs were imaged under the floor. Memorandum Summary (prepared on 12/9/2011): Cody Ehlers Group performed an on site inspection and these are the potential areas on concern: Historical use of underground storage tanks (USTs) for the storage of petroleum products. Documentation of removal of certain USTs from 250 Bradhurst Avenue is available, but no record of environmental sampling from the time of removal was identified. In ground hydraulic lifts. Historical use and management of automotive fluids. Nine soil boring were installed in the 250 Bradhurst Avenue garage using push drill rig. Groundwater samples were collected for laboratory analysis from three of the borings. According to the findings and conclusions section The soil and groundwater sampling and GPR program at 250 Bradhurst Avenue garage did not identify any areas of siginificat environmental concern. These activities confirmed that the former USTs in the Bradhurst Avenue garage have been removed. No further soil or groundwater investigation is warranted and no remediation is necessary. According to soil analytics client ID B-3 (the depth and location of soil boring and samples is not clear) has 81,000ppb 1,2,4 Trimethylbenzene, 37,000ppb 1,3,5 Trimethylbenzene, 6,300ppb Ethylbenzene, 7,600ppb Isopropylbenzene, 1,300ppb Xylene, 19,000ppb Napthalene, 13,000ppb n-Butylbenzene, 19,000ppb n-Propylbenzene. Client ID MW-2 (Depth to groundwater is around 18ft, location is unclear) has 1,500ug/L 1,2,4-Trimethylbenzene, 540ug/L 1,3,5 Trimethylbenzene, 260ug/L Benzene, 650ug/L Ethylbenzene, 140ug/L Isopropylbenzene, 222ug/L Xylene, 430ug/L Napthalene, 32ug/L n-Butylbenzene, 240ug/L n-propylbenzene, 0.21ug/L Benz(a)anthracene, 0.2ug/L Benzo(a)pyrene, 0.38ug/L benzo(b)flouranthene, 0.23ug/L Chrysene. Client ID MW-5 has concentrations of 0.2ug/L benz(a)anthracene, 0.2ug/L benzo(a)pyrene, 0.26ug/L benzo(b)fluoranthene, 0.12ug/L benzo(k)fluoranthene, 0.18ug/L Chrysene. Phase 2 Environmental Site Investigation Summary (ES): Phase 2 ESI was conducted June 1-3, 2015 and included a geophysical survey; the advancement of six soil borings; the installation of three temporary groundwater monitoring wells and five soil vapor probes; and the collection of soil, groundwater and soil vapor samples for lab analysis. The proposed redevelopment project is still in the early planning stages and is subject to change, but is expected to include the demolition of the existing building and construction of a community center with a basement and a swimming pool. It is anticipated that an excavation depth of up to 15 feet may be required to accommodate the development. Based on Langans environmental and geotechnical investigation historic fill material typically consisting of silty, gravelly, medium to fine sand with trace to some clay and brick was encountered beneath the surface

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

cover. The fill layer extends to depths ranging from about 13.5-18.t ftbgs. Bedrock was not encountered during the environmental investigation; however, fractured rock was encountered at about 78 ftbgs during a geotechnical investigation near the southwest corner of the site. The depth to groundwater measured during this Phase 2 ranged from 15.5-17.1 ftbgs, groundwater is inferred to flow east towards the Harlem River. In total 13 grab soil samples, 4 groundwater samples, 6 subsurface soil vapor samples, and 1 indoor air sample were taken. Soil boring SB01 at 15-16 ft recorded 0.38ppm Mercury. SB02 14-15 ft recorded 340ppm Lead, 0.95ppm Mercury, at 19-20 ft 17ppm n-Propylbenzene. SB03 17-18 ft recorded 1.5ppm Mercury, at 21-22 ft recorded 74ppm Ethylbenzene, 21ppm n-butylbenzene, 42ppm n-propylbenzene, 59ppm Napthalene, 17ppm sec-butylbenzene, 14ppm total Xylenes. SB04 15-16ft recorded 220ppm Lead, 0.36ppm Mercury. SB06 14-15ft recorded 430ppm Lead, 1.6ppm Mercury. In TMW02 there were high levels of Manganese and Sodium. In TMW03 there were elevated levels found at 9.1ug/L 1,2,4,5 Tetramethylbenzene, 12ug/L 1,2,4 Trimethylbenzene, 9.2ug/L 1,3,5 Trimethylbenzene, 9.9ug/L Benzene, 74ug/L Ethylbenzene, 19ug/L Isopropylbenzene, 6.4ug/L n-butylbenzene, 23ug/L n-Propylbenzene, 37ug/L Napthalene, 9.8ug/L p0Isopropyltoulene, 30ug/L Benzene, 6ug/L sec-butylbenzene, 8.8ug/L Toluene. In TMW06 there were elevated levels of Iron, Magnesium, Manganese, and Sodium. Soil vapor reading were all ND, indoor air sample only recorded one elevated reading of 1.42ug/m3 of Tetrachloroethene. Langan conclusions include several potential sources of petroleum contamination including, but not limited to, previously removed 550gallon USTs, two suspect fill ports/vent pipes, two ASTs in the basements, the geophysical survey identified three hydraulic lifts associated with historical hydraulic tanks. Recommendations include excess soil generated during development of the site should be managed and disposed of as regulated solid waste in accordance with applicable local, state and federal regulations. Petroleum-impacted material cannot be reused on-site. The petroleum-impacted material should be transported and disposed of off site at a facility that is permitted to accept the material. Additional sampling may be necessary for material disposal based on the disposal facility selected. If dewatering is required during construction, groundwater should be sampled and analyzed for NYCDEP sewer discharge parameters, and a sewer discharge permit should be obtained prior to dewatering. Treatment of dewatered groundwater prior to discharge will likely be required. Depending on the extent of soil removed during the propsed development and whether or not residual petroleum-impacted soil and groundwater remain, incorporation of a continuous vapor barrier may be recommended into the proposed building design. As per Jeff: The Department approves plan depending on inclusion of; soil sidewall samples, bottom groundwater samples after excavation, and development plans. Prepared Report Receipt letter and sent it to Zubatkin Owner Representation with CC to Langan, document has been uploaded to D2. Email: I have reviewed the submitted Phase 2 Environmental Site Investigation with Jeff and have attached a letter approving the recommendations pending inclusion of additional requirements listed in the letter. We look forward to the submission of the Remedial Action Plan. The original letter was mailed to Zubatkin Owner Representation, LLC. 11/19/2015: Rashad Received email from Ilkay: We are preparing the RAP for the site and I would like to briefly discuss the RAP and the attached proposed development plan with you. I will be out of the office after

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

tomorrow for 10 days; are you available tomorrow morning around 9 or 10AM for few minutes to discuss? Two structural drawing documents were attached detailing floor plans and section plans, they have been uploaded to D2. The plan drawing which depicts the cellar floor plan has a slab as deep as 13 ftbgs. The section drawings which show the difference in design between having no pool, a 4 foot pool, and an 8 foot pool are also provided. In all cases the pool will not be on ground level it will be on the 4th floor. Jeff and I called Ilkay, she said they are looking to install a slab 3 foot thick throughout the site with a vapor barrier and that only a small portion of the site will be 13 ftbgs. Ilkay will be sending RAP and we discussed that DOH must first approve the RAP and Phase 2 documents before moving forward. 4/22/2016: Rashad Received email from Ilkay: Hope all is well. Please see the link below for the remedial action plan for your review and approval. If you have any questions ,please let me know. Report uploaded to D2. 4/25/2016: Rashad Review of submitted RAP is as follows: The current site is occupied by a vacant, two-story garage with a partial basement. According to historical records the site was operated as an auto repair shop and garage between 1939-1996. Fractured bedrock was encountered about 78 ftbsg. Groundwater ranged from 15.5 to 17.1 ftbsg. Groundwater flow is inferred to travel east towards the Harlem River. Proposed redevelopment includes demolition of the existing structure and construction of a four story community center with partial cellar. It is anticipated the excavation across the majority of the site will extend to about 5 ftbsg, with excavation of a partial cellar extending to about 15 ftbsg. The partial cellar will have utility rooms, a fire pump room, a stormwater detention tank, and an elevator machine room. The proposed structure will be supported by a 3 foot thick mat slab. Remedial Action Objectives are as follows: (1) Removal and closure of two out of service ASTs and any USTs encountered during construction; (2) Excavation and removal of historic fill material and native soil, as required for proposed foundation construction; (3) Collection and laboratory analysis of documentation soil samples; (4) Excavation dewatering during construction, if required; (5) Construction of an engineered composite cover and installation of a seamless waterproofing/vapor barrier system; (6) Preparation and submission of a Spill Closure Report. During excavation the out of service tanks and any other tanks found will be removed and post excavation samples will be taken. Six documentation soil samples will be collected from the bottom of the excavation prior to installation of the waterproofing/vapor barrier system. Sample locations will be biased towards any areas of residual petroleum contamination identified during prior sampling. The composite cover system will be comprised of an approximately 3-foot thick concrete building slab that will span the proposed buildings footprint. As a protective measure to mitigate potential soil vapor intrusion, a waterproofing/vapor barrier will be installed beneath the concrete slab and along the sub grade foundation walls. The waterproofing/vapor battier will have a minimum thickness of 20 mils. The only area without this cover system will be a 745 square foot area on the southeast corner of site which is a courtyard. Foundation construction will start in 2016 and take about 5 months to complete. As per building plans basketball court will be on third floor and pool will be on 4th floor. First floor will have offices/classrooms/general conference rooms. RAP sent to DOH for review. 5/6/2016: Rashad Ilkay send email asking if DOH has

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

reviewed the RAP, I let her know I would follow up with Nate and get back to her. 5/11/2016: Rashad Nate responded on 5/10 after reviewing RAP and Phase 2: I have reviewed the Remedial Action Plan and the Phase II Environmental Site Investigation Report for the above referenced Spill site. Based on review of the data, it appears that there is residual contamination that is present beneath the site in soil vapor at elevated concentrations that have the potential to impact indoor air within the proposed building. It is recommended that during the redevelopment process piping for an Sub-Slab Depressurization System (SSDS) be installed and either be the system be made active or conduct soil vapor intrusion sampling during the heating season (November March) to determine whether the SSDS will need be made active based on concentrations in soil vapor and/or indoor air. Prepared report receipt review letter with Jeff's assistance, letter was sent to Nate/Mike for review. Nate indicated letter looked good and that he has no changes. Email sent to Ilkay with review letter (with cc to DOH): Please see the attached Review Letter in response to the submitted Remedial Action Plan. Please let me know if you have any questions. Thank you. Letter uploaded to D2. 6/3/2016: Rashad Teleconference will be scheduled for next week by Langan with DEC and DOH to discuss review letter requiring SSDS. 6/6/2016: Rashad Conducted teleconference with Langan and NYSDOH to discuss SSDS addition to RAP. Langan will be discussing options with client and getting back to us. Nate sent email and has indicated that any mitigation technique selected needs to be proven effective. Nate also indicated that Langan's suggestion of 3 foot slab, vapor barrier and HVAC modifications may be adequate, if proven effective. 6/17/2016: Rashad Sent email to Ilkay: What is the status on the design of the positive pressure mitigation system, as it may be the most feasible option that we discussed? Thank you, have a nice weekend. Ilkay responded: We will be working on the design starting next week, and should be able to share the design with you by mid-July. 8/15/2016: Rashad Received email from Michele Rogers with link for SMD system design, it has been uploaded to D2. 8/18/2016: Rashad Design was approved by NYSDOH and SVI investigation is required as per DOH. Report review letter was prepared with requirement for air sampling. Letter will be reviewed by DOH prior to submission to Langan. DOH Nathan edited letter and it was emailed to all parties and uploaded to D2. Letter outlines Soil Vapor Investigation requirements. DEC Possibly Requires: 1. Site map with all boring and groundwater sampling locations - Memorandum Report. 2. Review of RAP including possible SSDS requirement by DOH? 3. Development Plan (details including depth of excavation) 1/17/2017 Austin This spill report is being transferred from Rashad Omar to Jeffrey Vought end. 1/24/17-Vought-Received email from Langan (Michelle Rogers-mroger@langan.com Ph:212-479-5429) on 1/23/17 that Hi Jeff, To keep you in the loop, the foundations contractor (Moore) is planning to mobilize to the site within the next two weeks. We anticipate that implementation of the RAP will begin shortly thereafter. Please let us know if you have any questions. Thanks Vought replied with cc to NYSDOH Walz that Michele, Thanks for the update and we look forward to the documentation of the installation of the positive pressure mitigation system as well as the SVI results as per the approved RAP. 4/26/17-Vought-Received call from and spoke to Langan (Ilkay Cam Spanos) and she noted that construction ongoing and while they were excavating in southwest corner they found groundwater with sheen and they will stockpile soil separately.

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

Groundwater samples were collected in same area during the Phase II. Vought noted that DEC looked forward to the installation of the positive pressure mitigation system as well as the SVI results as per the approved RAP. 5/1/17-Vought-Received email from Langan (Rogers) on 5/1/17 that Hi Jeff, To keep you in the loop, earlier today the contractor encountered what appears to be a 550-gallon tank while excavating in the southwest portion of the 250 Bradhurst Avenue construction site. Removal of the tank will be handled in accordance with the approved RAP and applicable state regulations. Please give us a call if you have any questions. Vought sent reply that Michelle, Thanks for the heads up and I recorded the tank discovery you noted below in my spill notes as well. We look forward to the report that will include the endpoint samples from this tank location, and installation of the positive pressure mitigation system and the SVI results as per the approved RAP. Note that I have copied NYSDOH above as well so that they may be informed. Thanks, 4/12/17-Vought-Received email from Langan(Rogers) on 5/10/17 that Hi Jeff, Attached for your review are the analytical results of the endpoint samples collected from yesterday s tank excavation. The tank was removed and found to be intact. Endpoint samples were collected from the base of excavation and the eastern, western, and northern sidewalls. The southern sidewall had been excavated as part of development when the tank was discovered and as such, a fourth sidewall sample could not be collected. The analytical results were below the CP-51 criteria with the exception of slight PAH exceedances identified in the sample collected from the eastern sidewall. No PID readings above background or odors were noted, and the contractor plans to backfill the excavation as soon as possible. This information will be included in our spill closure report. Please let us know if you have any objections. Thanks, Vought added endpoint samples to D2 and sent reply email to Rogers, with cc to NYSDOH Walz, that Michelle, Thanks for the endpoint samples and description below. The Department has no objections to including the information regarding this tank in the Spill Closure Report. As I noted below, we look forward to the report that will include the endpoint samples from this tank location, and installation of the positive pressure mitigation system and the SVI results as per the approved RAP. Thanks, Rogers replied, with cc to all, Thanks Jeff . DEC Requires: 1)Installation of SSDS and performance of SVI once development completed as per NYSDOH 2)cc to Langan (Rogers/Spanos) and NYSDOH Walz. 12/18/17 - Austin - Project reassigned from Vought to Patel - end 04/20/18-Hiralkumar Patel. 2:00 PM:- went to site for inspection. Site is being redeveloped. 2:23 PM:- left message for Ilkay. 05/01/18-Hiralkumar Patel. 1:25 PM:- received call from Ilkay. she mentioned that the building construction will be completed by Aug. 2018 and SVI study will be conducted in Dec. 2019, after actively running SSDS system for a year. suggested Ilkay to submit report including summary/result of activities completed to date. 01/24/19-Hiralkumar Patel. 2:09 PM:- received call from Ilkay inquiring about need for SVI study if site has an active SSDS. asked Ilkay to contact NYSDOH in this matter. 03/21/19-Hiralkumar Patel. received email from Albert Tashji (ATashji@Langan.com) from Langan including sir sampling results. 11:33 AM:- received email from DOH Nathan. he reviewed the results and mentioned that it does not appear that the indoor air is impacted and the soil vapor concentrations are not indicating a concern at this point in time. 03/22/19-Hiralkumar Patel. 1:00 PM:- spoke with DOH Nathan, Albert and Ilkay. Albert mentioned that the SSD system

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

was not in operation at the time of SVI sampling due to some adjustments being made to the system, and sub-slab vapor sample was collected by lowering a tube through SSDS riser pipe to perforated area. he also mentioned that the building's HVAC system was in operation at the time of SVI sampling. based on result of SVI sampling, NYSDOH agreed that no further investigation is required at the site and SSDS can be passive. informed Albert/Ilkay that the spill will be closed upon receipt of a SVI report (including summary of sampling methodology). 09/17/19-Hiralkumar Patel. 12:50 PM:- received email from Albert including copy of PBS registration form to include a 550 gal UST discovered during construction. 1:12 PM:- sent email to Albert and reminded him that SVI report is not submitted yet. email copied to Ilkay. 10/07/19-Hiralkumar Patel. 2:09 PM:- received email from Albert including link to spill closure report. 10/09/19-Hiralkumar Patel. case closed based on review of available information. MSBGC-NYC Support Corporation **property owner** c/o Jeffrey M. Dold Chief Financial Officer 250 Bradhurst Avenue New York, NY 10039 Ph. (212) 760-9600 Ext. 0366 email: jdold@madisonsquare.org 10:30 AM:- sent spill closure letter to Mr. Dold. letter emailed to Mr. Dold, Albert and DOH Nathan."

Remarks: "Caller advised received lab results back showing unk petroleum in ground water. CLean up is pending."
