and soil. STL Analyticals-2/10/06. Sample from CAC sump pit ran for fuel id analysis and showed 920000ppb #2 fuel oil. Fuel oil sampled by Milro. STL Analyticals-2/17/06. Sample from CAC outside by fill #5 @1'. Sample analysis performed for TPH310.3 shows oil parameters below method detection limits. STL Analyticals-2/17/05. Four sample from CAC front basement area near sump. . Sample analysis performed for TPH310.3. Soil analyticals show all below method detection limit except for 7400ppm #2 fuel oil(SB#2 @ 1'), 110ppm #2 fuel oil(SB#3 @1'). Letter from DEC Ketani to NDC Lindsay and NDC Leid-King-3/20/06. On March 20, 2006 the New York State Department of Environmental Conservation (the Department) made a site visit to the above listed property. No work appeared to have taken place to investigate the tank or the surrounding soil since the last site visit that took place on March 10, 2006 . Letter requiring investigation. Due date of 4/5/06 for the work to resume. Letter from DEC Ketani to Lisa Silversmith-03/20/06. We would like to install two(2) wells in the groundwater beneath the basement of your home. These wells will be constructed and sampled by out contractor. Contractor Work Authorization for STL-3/21/06. Fax from Milro to DEC Ketani-3/24/06. Milro proposes the following scope of work to address the oil spill cleanup: 1)Saw cutting of concrete slab in the basement and excavation of contaminated soil 2)disposal at a licensed disposal facility 3)recover of product using a vaccum truck if contaminated groundwater is encountered 4)collection of endpoint samples from excavation 5)restoration of the concrete slab 6)pressure washing of basement and epoxy application. Letter from DEC Ketani to CAC Martin-3/28/06. ...(the Department) is presently looking into other methods of controlling and preventing the petroleum vapors from entering Childrens Art Carnival . Milo remediation plan has been enclosed for Martin's review. Cost Estimate (Milro-Moriano)-4/4/02. Cost estimate for basement excavation and replacement. Site visit by DEC Vought during endpoint sampling of tank in couryard-5/11/06. Sampling performed by USA Environmental (Cristin Ciaburri 718-981-5710). Onsite was Keith Bartley(USA). Pumped out wate from 550-gallon UST in courtyard. No product in UST, just sheen and water. Three soil samples were collected (one through bottom of tank, one below fill line and one below supply/return line). No odors or staining observed in all of the soil samples. Site visit performed to CAC and no odors in basement and no free product in sump. Some oil staining showing up on floor from underlying groundwater. One sample also collected for analyiss from NDC basement floor. Vought spoke to USA Ciaburri and DEC will receive report by 6/12/06. DEC tentative requirements: 60 HAMILTON TERRACE: 1)followup to see if any recent spills 72 HAMILTON TERRACE 1)results of basement borings by 275-gallon ASTs 2)submittal of documentation of 1/14/06 clean up by Northeast 3)notification to Bishop France of requirements 4)backfilling of UST excavation in courtyard 5) The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness as per 1/19/06 letter 6)backfilling of NDC excavation to prevent continued groundwater infiltration into CAC 62 HAMILTON TERRACE: 1)continued monitoring of sump 2)call back to Martin regarding possibility of use of Spill funds for AST replacement and likelihood of NYSOAG cost recovery against Art Carnival 2)submission of tank test results from Eastmond and Sons of AST in CAC as per requirement on 1/19/06 letter 4)borings at tank location for 8260/8270 5)Milro boring logs and site plan from 2/17/06 analyticals 6)implemenation of Randy's workplan(installation of monitoring wells

CHILDRENS ART CARNIVAL (Continued) **S107521874**

at CAC and basement excavation) from Milro 7)sealing of basement floor 8)borings by UST, sump and and fill port 9)Summary of description of cleanup activities by AL Eastmond including source of 30 bags of soil removed during tank removal and description of removed tank. 06/15/06-Vought-Spoke with Marlene Martin who inquired about status of spill. Martin stated that there were no odors in the school to date. Vought drafted letter with above requirements to both parties and cc'd Northeast, Marlene Martin (Art Carnival), Cristine Brooks Lee(Comm Bd 9), Martin Smith(Councilman Robert Jackson), LPC and USA, Eastmond. DEC Vought to call Milro regarding: 1)boring logs and site plan for borings on 2/17/06 and installation of new borings in floor or school. DEC Vought to call Martin regaring: 1)non use of Spill Funds for AST replacement as per NYSOAG Buss 2)further soil and groundwater investigation by the DEC. 06/19/06-Vought-Called Martin(212-234-4093), faxed her copy of requirement letter and letter to NDC and left message informing her her that there was no way for Spill Fund to pay for CAC tank replacement and to dicuss letter sent on 6/15/06. Vought called Lindos Lindsay (347-228-8039) for fax number and to inform him of outstanding requirements. Vought faxed him copy of requirement letter to 72 and 62 Hamilton Terrace. Lindsay requested that letter be transmitted via mail only and be sent to: Lindos Lindsay 163 Myrtle Avenue Brooklyn, NY 11201 Vought sent letter to above address. Vought called Christine Lee (Comm. Bd. 9 212-883-7600) and she requested correspondence via mail only. Vought sent info to: Christina Lee 48 Hamilton Terrace New York, NY 10031. Vought called and spoke to Martin Smith (ph 212-234-0551 fax 212-234-0552) for fax number and to explain requirements. Vought faxed Smith copy of requirement letters for 60, 62 and 72 Hamilton Terrace. Vought called John Weiss (Landmarks Preservation 212-669-7921) for fax number and to explain requirements. Vought left message to return call. Vought called and left message with Christin Ciaburri (USA 718-951-5710) for fax number and to explain requirements. Vought called Renee Lewis (AL Eastmond 718-378-3000 fax 718-378-4560) and he was not in office. Vought faxed him copy of letters to 62 and 72 Hamilton Terrace. Vought called Bob Rafferty(NYSDOH 518-402-7800 fax 518-402-7819) for fax number and to explain requirements. Vought faxed Rafferty copy of requirements. Vought faxed NYCDOH Nieves copy of requirements for 60, 62 and 72 Hamilton Terrace. Vought called Dwayne Monaco(Northeast 914-777-1930 fax 914-777-1928) for fax number and to explain requirements. Vought faxed Monaco copy of requirements. Vought received call from Monaco and returned call and spoke to Monaco and no analyticals were performed and Monaco will send in pictures. Monaco did say his men saw oil on the floor. Monaco will submit report and pictures to DEC. 06/27/06-Vought-Received call from Marvin Edwards (212-234-4093) requesting letter with amount spent to date on PIN (8713.53 as per UIS). Vought returned call and left messge explaining that DEC will not provide the letter as amount may increase and Vought willing to call insurance directly. 06/28/06-Vought-Received call from Marvin Edwards and they filed claim with general liability insurance. Their claim representative asked for further costs. Claim may file under third party liability portion of coverage. Marvin will contact insurance and arrange conference call with DEC. 07/12/06-Vought-Received message from Martin and returned call and spoke to Martin. Martin will be faxing in tightness test results and approved installation of additional borings. Martin will seal the basement floor upon no occurrence of product in the sump during

CHILDRENS ART CARNIVAL (Continued) **S107521874**

monitoring period. 4/23/07-Vought-Reviewed above notes and both CAC and 72 Hamilton Ave are potential sources, CAC due to failed tank test and 72 Hamilton due to presence of oil spill during cleanup by Northeast Environmental. Both parties listed as potentially responsible and site visit scheduled with Martin for this week to confirm no further impact and close spill. Vought called Martin. Martin had not seen oil in recent months and site visit scheduled tomorrow at 10am. Vought also reviewed documentation and photos submitted by Northast dated 6/27/06. On January 14th, 2006 Northeast mobilized a crew and equipment to 72 Hamilton Terrace were technicians conducted a clean up of #2 fuel oil from the tank and boiler room of the building . Absorbent material was applied to the boiler room floor where puddles of standing fuel oil was observed... . No tank test results for 72 Hamilton included. Vought also received copy of failing test results for CAC which show Ullage (dry portion leak) from Eastmond and Sons dated 1/20/06. 4/24/07-Vought-Site visit by Vought and Marlene Martin not present at site due to emergency. Vought performed site visit with super and no product or olfactory odor of groundwater noted in sump, no staining noted in concrete at former tank location or fill location, product stains noted on floor towards 72 Hamilton but as per super they were present for long time. No product in other sumps of CAC. Vought discussed with DEC Austin including possible groundwater sample at 72 Hamilton Avenue and investigation whether a former spill occurred at Daycare center by mechanics. 72 Hamilton Avenue boarded with no signs of development. Tank in courtyard excavation was backfilled. 07/25/08-Vought-Spill reassigned from DEC Vought to DEC Ketani as per DEC Austin. 8/21/08 - Raphael Ketani. I called up Paul Basso of MILRO Associates (516) 379-1500. I asked him to send DEC a copy of the report from about 1/27/06 whereby the return line for the fuel system at the CAC was tested and it failed. He said he will look for it. I called up the CAC and asked for Ms. Martin (212) 234-4093, but the receptionist told me that she wont be back until September. I asked for Marvin Edwards, but she told me that he didn't work here anymore. I was transfered to Fatima Faloye, the Operations Manager. I asked Ms. Faloye whether I could make an inspection at 11:30AM tomorrow. She said that would be alright. 8/22/08 - Raphael Ketani. I made the scheduled site visit. The church next door was completely boarded up. It appeared that no work had taken place, since early 2006 when I first visited the site, to restore the church. There were no petroleum odors coming from the basement vent. I put the PID meter as close as I could to a basement vent near the side entrance gate, but didn't detect anything. The area where the 550 gallon tank was buried had been filled in and was overgrown with weeds. I met Ms. Faloye and she took me to the basement. There were no signs of free product on the floor. There were no oil stains. There were no oil odors. The PID meter registered 0 ppb of vapors. The front sump had only water. I thanked Ms. Faloye for the opportunity to visit the site and left. 8/25/08 - Raphael Ketani. The Final ISR was written for the case and submitted to Randall Austin, Chief of the Spill Prevention and Response Unit, for his signature. I talked to Dwayne Monaco of Northeast Environmental (914) 777-1930 regarding the submission of an investigation report for the church. He said that they did only a cleanup of the basement and some oil collection. He said that no report was generated. 9/2/08 - Raphael Ketani. Today I received a FAX from Paul Basso of MILRO. The attached page was a simple form stating that the return line did not hold, but that the supply line was O.K.

CHILDRENS ART CARNIVAL (Continued) **S107521874**

The date of the test was 1/27/06. Additionally, the last time that oil was collected from the CAC was on 4/11/06. This also appears to be the last time any cleanup took place. 9/4/08 - Raphael Ketani. The FSIR was signed by Randall Austin, Chief of the Spills Unit, and Lou Oliva, Chief Counsel Region 2, and sent to Dennis Farrar in DER, Albany. As there was no oil contamination, nor oil vapors at the site during my visit on 8/22/08, and as the DEC does not intend to do further investigatory work, nor sees the need for further remediation work at the site, I am closing the spill case. "

Remarks: "Material is coming into the basement of the Childrens Art Carnival and is originating from the church next door. The Art Carnival's oil company came and used a powder to control the odor but no clean up has been done. They need DEC's help. Groundwater was affected.... material is mixed with the water from the natural spring there. Unsure of what else they can do for a clean up."

Contact Name:	DIONIS ORTIZ
DEC Memo:	"1/10/06 -Austin - Also received complaint from: Cristina Lee, Chairman of Health Committee of Community Board #9 212-883-7600; 212-864-6200 contact her for further background info, as well as Ortiz - end Carnival e-mails: mamudd1@aol.com or mamartin@childrensartcarnival.org FAX: (212) 234-4011 1/11/06 - Raphael Ketani. I tried contacting Mr. Ortiz ((212) 234-4093), but a man answering the phone said he would not be in until 10:30AM. The man said that the church had a fire 2 years ago and hasn't rebuilt or reopened. He passed the phone to a woman who said that they have been trying to find out more information about the oil leaking from the church and she gave me the phone number of Cistine Grit (212) 234-0484. I called the number, but no one picked up. I then called (212) 883-7600 - the law office of Cristina Brooks Lee - but could only leave a message. I called (212) 864-6200 - the Community Board #9 phone 10AM to 5PM - and got a man on the line. He said that I should call Martin Smith (not available until 11AM) at (212) 928-1322, who is the representative of Councilman Robert Jackson. I will make a site visit at 10:45AM today. I made a site visit at 11:15AM. I met Dionis Ortiz, Program Manager, Jose Ortiz, his assistant, and Marlene Martin, executive director of the Children's Art Carnival. I went to the basement and looked at the oil tank, the fill and vent lines, and the boiler. There were no signs of spillage. However, I did see many cracks in the basement floor that looked wet. Mr. Ortiz said that there is a spring below the building and that the water seeps into the floor. The basement has 3 sumps. The front one is next to the front basement wall, the middle one is 16 feet away, and the third one is about 25 feet behind the second one. The second and third sumps had only clear water at the level of the floor. The front one had red oil floating on top. There were signs of oil spillage on the basement floor next to the sump. Mr. Ortiz said that when it rained heavily a little while ago, the water level rose and pushed out the oil onto the floor. He said that an oil odor was noticed to be coming from the basement on 1/3/06. He said that Robani Oil was called and they put down some oil absorbent material. I spoke to Robert Pearson of Robani Oil (212) 687-8699, Colonial Park

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Station, P.O. Box 188, NY, 10039, and he said he didn't think the oil was coming from the property, but he didn't do any system tightness testing. He said that the customer would have to order it and pay for the testing. The PID readings were as follows: over the sump: 11.8ppm breathing area front basement: 4.4ppm breathing area at second sump: 1.4ppm first floor hallway: 1.3ppm children's work room first floor: 570ppb main floor (second floor): 600ppb (light odor) third floor art work room: 650ppb third floor copier room: 750ppb fourth floor front and back: 750ppb Mr. Ortiz told me that the church next door burned two years ago and has never been repaired. He said there is a man (David - later called Patrick) living across the street who is affiliated with the church. Mr. Ortiz knocked on the window, but no one seemed to be home. He said that David told him that the church uses gas and that Con Ed had shut off the gas. Mr. Ortiz said that, after the fire, someone entered the church basement and saw an oil spill. I spoke to Ms. Martin and she said that she didn't have any other church contacts other than Cistine Grit (a.k.a. Ingrid). She called Ms. Grit's number, but didn't get an answer. I looked at the outside of the church. The schedule display panel has Nazareth Deliverance Spiritual Church, Inc., Archbishop C. Clark. The name over the 72 Hamilton Terrace entrance is Church of Nazareth. The church is boarded up and the roof looks to be in bad shape. There were oily odors emanating from a small basement window near the basement door of the church. It is unclear if there is an oil spill in the basement of the church. I called Randall Austin, Chief Spills Engineer Region 2, with the information. He sent Jeff Vought, E.G. 1, over to look at the situation. Mr. Vought arrived at 1:30PM and looked over the situation. He noted 3 suction lines at the foot of the basement stairs. One line was only 3 feet long as it had been cut. No one at the Carnival knew when this happened or if a previous oil spill took place. Though Mr. Ortiz told me that the Carnival has been in the building for 36 years. I saw a short stream of red oil between one of the fuel lines and the wall next to the stairs. A conference call took place between Ms. Martin, Mr. Vought, and Michael Hughes of NYS DOH. Mr. Hughes said that the building should be ventilated and the basement door sealed. Ms. Martin said that she told all the parents about the odors and that all of the parents decided to have their children stay in class. Later, at between 3PM and 4PM, Martin Smith of Councilman Robert Jackson's office and Claudius Wickham of NYCDOH showed up. We went with them and Bruce Tilley of the Neighborhood Organization to the home of Diana Laird and David Zapol at 418 W.144 Street. This is the home which shares a common wall with the church. PID readings in the kitchen were 940ppb. Readings in the corner of the basement where paint and wall finishing material were reached 1300 to 1600ppb. A dirt hole in the basement floor had 2500ppb readings. The front part of the home's basement had 500ppb. Next, Mr. Smith and Mr. Wickham went with us to the Carnival's basement. They both looked at the situation with the oil in the front sump and noted the odors. Then Mr. Wickham measured the air in the art work room on the first floor. He noted about 650ppb readings. He said that the odors weren't dangerous, but just a nusiance. He said to ventilate the building. 1/12/06 - Raphael Ketani. I made a followup visit at 3:10PM. Eastmond had finished their cleanup work. The front sump had been vacuumed and the floor had been cleaned. Fans were blowing the air around in the basement. Ms. Martin said that Eastmond didn't arrive until this morning as, otherwise, there would have been high overtime charges to do the work

CHILDRENS ART CARNIVAL (Continued) **S107521874**

yesterday at night. Eastmond told her that the oil tank will be picked up off of the floor or else the dampness will corrode the bottom and the tank will leak. The odors were not as bad as yesterday. The tank room had about 3ppm, the director's office about 750ppb, and the children's work area on the main floor was about 300ppb - there were no odors on the main floor. However, the oil reappeared in the front sump. Ms. Martin told me that she had made contact with someone from the Church of Nazareth and that this person will let people in saturday morning (1/14). Ms. Martin said that she will let me know what time the church will be opened up. She also said that her company is not going to spend any more money on removing the oil in the sump until DEC finds out whether the oil is coming from somewhere else or from the Carnival. I informed Randall Austin, Chief Spills Engineer Region 2, and Jeff Vought, E.G. 1 Spills, about this and about the return of the oil in the sump and about the levels of the odors today. 1/13/06 - Raphael Ketani. I spoke to Ms. Martin. She said that there are no odors on the main floor. I asked whether she made contact with anyone from the church. She said no one called her and she couldn't get ahold of anyone. I asked whether the front sump was covered. She said it wasn't. I told her to have someone cover it with plastic bags and then use tape to seal the bags to the sump clay pipe. She said she would have someone do it. 1/17/06 - Raphael Ketani. Ms. Martin called me today. She said that the basement had flooded over the weekend because the sump pump didn't work. She said she had water and oil all over the floor. Also, she said that the oil guage on the oil tank is in the red zone. I asked her when was the last time she had a delivery. She said that it was some time ago and no one really keeps track of the level of oil in the tank. She said she called Robani Oil to get a delivery. However, the odors are bad again in the building. I told her to set up the fans. She said there are problems with the electricity in the basement and the fans aren't running. I also told her that Northeast Environmental ((914) 777-1930) showed up at the church on saturday, 1/14/06, and found oil all over the basement. I told her to call them and get them to clean up the oil in her basement. I told her that if they wont do it, then to call Eastmond again and have them clean up the oil as the odors are bad. Jeff Vought, the off hours spill responder for the weekend, came in and gave me the following notes. He said that Northeast Environmental arrived on site at 11:30AM on saturday 1/14. Oil was all over the floor of the Childrens Art Carnival. Northeast collected the oil and water on the basement floor and pumped out the front sump. Northeast then went to the Church of Nazareth and recovered 120 gals. of #2 fuel from the two 275 gallon tanks in their basement. They did 2 borings, one next to the two 275 gal. tanks (ASTs) and one some feet to the west. They end at bedrock and are only 18 deep. Mr. Vought had them leave the borings open. There is a fuel filter in a concrete casing in the floor. From there, a line runs to the boiler. Mr. Vought suggested to me that they either do 2 wells in the corner of the wrought iron fence next to the Carnival or an oil recovery pit. The contact at Northeast is Dwayne Monaco (914) 777-1930 or (914) 403-5525 cell. I spoke to Mr. Monaco and he said that he was hired by the church and has no plans to pump out more oil from the Carnival. His techinician noticed a second vent line and a remote fill at the back of the church. He believes that there may be a third tank under the courtyard. I contacted Ingrid at (212) 234-0485, the Church of Nazareth - Archbishop Maxton France (cell (917) 642-8913). She said this was the Archbishop's number and

CHILDRENS ART CARNIVAL (Continued) **S107521874**

that I can send a letter to 72 Hamilton Terrace, NY 10031. She said they didn't have plans to do anything more regarding the cleanup. I visited the site at 2:50PM. Oil vapors were still noticeable from the church. I entered the Carnival and sensed strong odors on the main floor. There were no activities or children at the day care center. I went to the basement and there was 3 of water there. However, I could not see a sheen. Ms. Martin said that Eastmond could not come and pump out the water as they didn't have a truck available. She said that they will come at 9AM on 1/18. The vapors in the buidling are as follows: basement=10.1ppm first floor art room=2250ppb executive director's office=3400ppb hallway at first floor=6600ppb main floor=2300ppb third floor art room=3000ppb third floor front room=4600 third floor landing=7100ppb fourth floor art room=5600ppb fourth floor front room=4600ppb fourth floor landing=7100ppb I met Mr. Pearson of Robani Oil at the site. He said he wasn't going to deliver oil until the oil spill at the church was cleaned up and not until it was determined that the Carnival's system wasn't leaking. Ms. Martin said that someone from the NYCDOH was supposed to show up to test the air, but I stayed until 3:35PM and he arrived. Ms. Martin said that they were out of oil and so the heat was off. 1/18/06 - Raphael Ketani. I tried to call the Carnival to find out how the water/oil removal in the basement went at 9AM (contractor was Eastmond), but no one answered the phone. Later, I got ahold of Ms. Martin via her cell phone (917) 805-3154. She told me that Eastmond had been at the Carnival at 9AM and had pumped out the basement. She said that the school is still closed. I called up MILRO (516) 379-1500 (FAX (516) 379-4596) and spoke to Paul Basso. I told him that we needed Milro to set up ventilation for the school and pump out the basement. We decided to meet at 10:30AM tomorrow. Kira Leid-King (home(914) 632-0665; cell (914) 879-8126; work FAX (212) 455-2502) called me to explain that the oil wasn't spilled on the floor of the church's basement. However, I told her that Northeast Environmental had been to the church on 1/14/06 and had pumped out 120 gals. from the two 275 gallon tanks. She said that the church hadn't had a delivery in 3 years and that the Fire Dept. had ordered the church to pump out the oil after the fire. She said the tanks never had oil in them. I told her that there was a second vent pipe and a second fill port. I added that there is a gauge for a 550 gal. tank on the wall of the church's basement. I told her that DEC suspects there is a third tank under the courtyard. She said that she had no idea. Finally, I told her that the state would be hiring a contractor to investigate the church's oil spill and tank situation. She said that it's the Carnival's fault, not the church. I asked her what her relationship was to the church. She said that she is sort of the secretary-treasurer and paid for Northeast to do the oil vacuuming. 1/19/06 - Raphael Ketani. A site visit was made by Randall Austin, Chief Spills Engineer Region 2, and myself to monitor the work of MILRO Assocs. Inc. We met Gordon Sandtorv, Operations Supervisor from MILRO, on site. MILRO was already cleaning the floor in the basement of the Carnival. Vapors in the basement were about 3000ppb. However, the floor looked very clean. Red oil was again on top of the water in the front sump. Water was seeping through the north wall (opposite the oil tank) of the basement. It didn't have any odor or feel oily. I found out that Robani Oil had delivered 100 gals. and the heat was back on. Patrick Peters (phone (212) 690-0630; son of Archbishop Carlyle Clark) showed up at the Carnival. We asked him to let us into the church basement and he did. We saw the two 275

CHILDRENS ART CARNIVAL (Continued) **S107521874**

gals. tanks and one vent line that extended from the second tank. A filter apparatus was in the floor for the oil. The suction line ran through the floor and came up 8 feet away at the furnace. There was a light smell of oil, but no oil was visible on the floor. A gauge was mounted onto the wall above the first tank. Gordon said that it was a petrometer for a third tank. vapor concentrations for 1/19: basement: about 3000ppb directors office: 425ppb first floor art room: initially 1000ppb, then 400ppb main floor: 350ppb third floor: 700ppb back room/ 600ppb front room fourth floor: 400ppb back room/ 1000ppb front room Mr. Austin talked to Mr. Sandtorv and told him that if the Carnival doesn't test the suction line and the return line, then MILRO will have to do it. He added that he wanted MILRO to construct some kind of low flow sump and collection system with an oil/water separator to collect the water and pump it to the city sewer. Then we left. 1/20/06 - Raphael Ketani. I called up Paul Basso and asked him what MILRO was doing to install a sump and oil/water separator. He said that he thought this idea was tentative and that DEC wasn't so sure this is what they wanted. So he hadn't looked into investigating a possible system. I told him DEC DOES want a slow pump system to hold down the water level and collect the oil. I told him that it needs to be installed immediately. He said that such a system that will work with the sump that exists is tricky to find, but he will investigate a possible one now. Paul added that oil samples were sent to Severn Trent today. He said there is a 2 week turnaround. I also told him to put down lots of absorbent pads on the floor around the front sump because rain is expected over the weekend. He said he will have someone do this. I called up Ms. Martin and asked her how things were. She said that the odors were low due to the fans that were going all night and that the basement was free of oil. She said that she will get someone to the Carnival soon to do an entire tank system tightness test. Ms. Martin called me at about 3:15PM today and said that Eastmond had done a system test. They found that the tank leaked pressure and the vent pipe had a wet failure. Otherwise, Eastmond said, the suction, return and fill lines were alright. I told Ms. Martin that the next step was to have the tank cleaned out, removed, and a temporary tank installed. She said she would do that. I told her to have Eastmond put absorbent pads around the front sump to absorb oil when the water level rises again and to hire a company to either dig up the contaminated soil below the basement or to start with soil borings to find the extent of the oil pool. I gave her a list of digging and investigative companies with no recommendation. She said she would pick a company to start work. 1/23/06 - Raphael Ketani. I spoke to Paul of MILRO today and told him to hold off doing more work at the site. He said that his crew had been there this morning and pumped out more oil. I told him that was fine, but to stop work for now. He said he would. I then spoke to Ms. Martin. She said that Eastmond was on site and they were cutting up the tank. She said that MILRO had been on site and had pumped out more oil. Ms. Martin asked for a letter ordering the Carnival to do the tank removal and break up the floor of the basement to remove the contaminated soil and water. I told her I would send it. 1/25/06 - Raphael Ketani. I spoke with Marlene by cell phone. She said that this was the best way to reach her now because of the tank removal yesterday. She said that when Eastmond removed the oil, cut up the old tank, and welded the new tank, the vapors were so strong that they chased everyone out of the building. She said that everyone is now working from their respective homes. She said that she thinks the

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Carnival has found a temporary place to hold their saturday workshops. Ms. Martin said that a temporary tank has been set up in the backyard and Robani is supposed to get things running to provide heat. I told her to open all of the windows again to get more vapors out. She said she will do this and that she will call Eastmond to see what they plan to do and when. I called Eastmond and spoke to Isaac Mungra. He said that his crew removed the tank and saw holes on the opposite side which were 15 inches above the floor. He said that it did not appear that oil leaked onto the floor from the tank or anywhere (according to Rene from his crew who was there). Mr. Mungra said that he didn't feel it was necessary to break up the floor to see whether oil was underneath. I asked him whether Eastmond was going to wash the floor and pump the sump. He said no because he didn't want to take on the large cost. I asked whether Eastmond tested the suction, return, and fill lines. He said no because it was his understanding that Robani was going to replace the lines anyway. He said he was only responsible for cutting up the tank. I called Robani and asked Mr. Pearson whether Robani Oil was going to test the 3 lines. He said no and that he had no plans to. He said that he was just going to supply 2 temporary 275 gal. tanks and get the furnace running again. I asked whether Robani Oil was going to clean the basement floor and suck out the sump. He said no because he didn't want to take on the large cost as the Carnival doesn't have a lot of money. He told me to have Eastmond do it. I called Ms. Martin back and told her the situation with Eastmond and Robani and told her that I would call MILRO, with her permission, and have them come and do the 3 line tests, clean the floor, suck the sump and ventilate the buidling. She said that was alright and to call them. I tried calling Paul Basso, but could only leave a message. Mr. Marvin Edwards (cell (404) 790-2592) called to ask what he should put in the response letter to DEC. I told him to give me a chronology of who performed what service, what events happened, and how the tank failure was discovered and what actions were taken to resolve the matter. He said he would. He added that he is taking over some of the cleanup coordination responsibility from Ms. Martin as she has other work to do. He asked that I coordinate with him. I told him that I was trying to get MILRO to take over the cleanup. He said that would be fine. I made contact with Mr. Basso and told him what the DEC wanted MILRO to do: 3 line tests, ventilate building, clean floor, pump sump daily. He said that MILRO can do all of the work. I asked him when his crew could come out. Mr. Basso said at 1 PM tomorrow. I said that would be alright. I called up Ms. Martin and asked her whether 1PM tomorrow would be alright. She said yes. I then called up Mr. Edwards to let him know when MILRO will be there. He said that 1PM would be good. 1/26/06 - Raphael Ketani. I visited the site today at 12:30PM and met Ms. Martin and Mr. Ortiz. They said that MILRO had already been here at 11:30PM and pumped out the sump. Ms. Martin said that MILRO told her they would be over tomorrow to clean the floor. I looked at the front sump and saw only clear water. There still were odors in the building as the floor in the front basement needed washing, though it didn't look oily and smelled only very slightly when I got very close to it. The floor where the tank used to be didn't have cracks or oil stains. There were fans in the basement blowing the vapors out the back entrance. Fans were present on all floors and were blowing the air out the windows. The building was cool inside due to the open windows. Vapor concentrations were as follows: basement front/back: 3500ppb/520ppb first floor director's office/art room: 89/210 main

CHILDRENS ART CARNIVAL (Continued) **S107521874**

floor: 162 third floor front/back: 200/290 fourth floor front/back: 218/194 1/27/06 - Raphael Ketani. I received a call from Ms. Martin. She said that MILRO tested the 3 lines and the return line failed. She said that they cleaned the floor today, too. Ms. Martin added that the odors are light today. 1/30/06 - Raphael Ketani. I spoke to Paul Basso today. He said that the fill line wasn't tested. I asked him to test this line, also. He said they vacuumed out oil from the front and middle sumps on friday and cleaned the floor. He said that they will be over tomorrow, 1/31, and test the fill line, vacuum again and clean the floor, if necessary. I told him this would be fine. I made a site visit 10:45AM. I met Jose Ortiz who let me check on the odors at each floor and the presence of oil in the sump. The vapor concentrations were: 2,000ppb in the front basement; 750ppb in the back basement; about 250ppb at each floor above the basement. Odors were light on the main floor, but the building is still cool due to a problem with the furnace and the windows are partially open. I met Mr. Pearson on site. He told me that he will replace the suction line and that the return line was not in service even before Robani was the Carnival's oil supplier. I told Mr. Ortiz and Ms. Martin that MILRO will come tomorrow to suck out the sump and do 4 soil borings in the front basement. I told them that there will be 2 borings where the tank used to be, 1 between the tank position and the sump, and 1 on the other side of the sump. They said they understood. I will try to be at the site to watch the soil sampling. Mr. Lindos Lindsay called and left a message that he is scheduled to meet with an environmental company tomorrow at 11AM to discuss what needs to be done and how to go about it. 1/31/06 - Raphael Ketani. I met Gordon of MILRO at the site just as he finished doing the fourth boring - about 11AM. All four borings had been done where I wanted them. Gordon told me that he had soil at each location and that the soil at boring #1 (between the sump and the wall) was the most contaminated. He said that boring #4 at the west end of the former tank area was the cleanest. He said that he will submit the samples for analysis. Oil was still floating and accumulating in the sump. I asked Gordon to call Paul Basso and have a vacuum truck come over and suck out the sump. Gordon said that one will be here today and tomorrow. The crew from Robani Oil began their work right after Gordon was done. They will install 2 275 gal. tanks and replace all of the lines. The vapors in the building were slightly worse than yesterday. I talked to Jose Ortiz and Marvin regarding why the borings were taken and what will happen next. I told them to set up the fans again and to ventilate the building. At 3:30PM I spoke to Gordon of MILRO to find out the details of how the return line was tested. Gordon said that he capped off the line, pumped with a manual push-pull pump until he had 5 lbs. of vacuum and waited half an hour. He said he used soap solution to check all the valves and they were fine. He said the vacuum truck had been there about 1 hour after he left and pumped out a lot of oil. I told him to test the fill line. Gordon said that he believed the line was already removed. I told him that if this is true, then I wanted him to do a couple of borings outside the building next to the fill line tomorrow morning. He said he will do it. 2/1/06 - Raphael Ketani. I met Gordon at the Carnival. He did one boring (#5) next to the fill pipe. However, Robani had replaced the old fill pipe with a new one yesterday and had been sloppy by spilling a little oil onto the area when they pulled the pipe. The sample was sandy fill soil and had a slight odor. The PID reading was 500ppb, but Gordon had collected the sample in a plastic

CHILDRENS ART CARNIVAL (Continued) **S107521874**

bag. This was sand that was used to backfill the upper end of the abandoned coal shute that is infront of the building. I went into the basement and checked the portion of the sand that had spilled into the coal shute. It didn't have an odor. Gordon said that they just sent off the oil samples that were collected. I told him to order the lab to do a fingerprint of the oil. In the basement, Robani had installed two 275 gal. tanks, a new fill line, a new vent pipe, and a plastic coated suction line. The suction line was cemented to the floor and covered with concrete where it met the landing of the stairs to the basement. All of the old lines were removed. The heat was back on and a hot water pipe almost over the back and another one against the opposite wall of the basement were leaking hot water. Part of the floor of the front basement was wet. Some of the wetness extended under the new tanks, but they are on feet above the floor. Red oil is in the front sump, but is transparent enough so that the bottom of the sump can easily be seen. I told Gordon to call Paul Basso and have him send a vac. truck over to pump out the sump. Vapors in the building were: basement: front 1000ppb/ middle 500ppb first floor: front 350ppb/ back 225ppb second (main) floor: 230ppb third floor: front 250ppb/ back 350ppb fourth floor: front and back 300ppb Paul from MILRO called at 3PM and said that he will send the samples to a DEC contract lab for fingerprinting and he will resample soil sample #5 and put it in a jar. 2/2/06 - Raphael Ketani. I received a call from Rick Bayer of Severn Trent Labs regarding the soil samples. He said he will send a copy of the report to MILRO and to DEC. 2/3/06 - Raphael Ketani. I FAXed a copy of the Standby Contractor Authorization Form to Paul Basso of MILRO. 2/6/06 - Raphael Ketani. I visited the site today. Vapors in the building were 3600ppb in the basement, 200ppb in the first floor art room, and 170 ppb in the main floor art work area. However, the heat was off as the plumbers were replacing a couple of hot water pipes. Oil was still in the front sump, but it had turned thinner and brownish in color. Aside from this, Marvin Edwards of the Carnival pointed out black spots from 2 to 14 that had suddenly started to appear on the basement floor. Mr. Edwards said that he first noticed them today. There were about 12 spots and all except for a couple were in the front basement area. I touched some and oil came off onto my hand. The PID detected 6200ppb of vapors. I called MILRO to come over tomorrow to suck out the front sump and try to reduce the amount of oil seeping through the floor. Paul of MILRO said they would do it. 2/7/06 - Raphael Ketani. I tried to find out whether MILRO had pumped out the front sump, but could only leave a voice mail for Marlene Martin. I called up Paul at MILRO and he said his worker was there with the vacuum truck and pumped out 120 gals. of water. 2/8/06 - Raphael Ketani. I called up Mr. Wickham of NYCDOH ((212) 442-3372), but he wasn't in. I reached the receptionist and she said that all inspectors get their work assignments a week in advance and that Mr. Wickham already had a full schedule and could not make it to the CAC. She connected me with Mr. Wickham's supervisor, Inspector Stallbohm. Mr. Stallbohm said that someone was out at the CAC on 1/17 and still found unacceptable vapors. He would see what he can do to get someone to the CAC quickly. Mr. Stallbohm called back to say that an inspector went out to the CAC on 2/3 and determined that the vapors had decreased to safe levels for children. He said that Marvin Edwards of the CAC had signed the DOH report to this effect. He added that Mr. Edwards was told the children could come back and that an inspector will make a followup visit on about 2/17. I called up

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Marvin, but got Jose Ortiz. I told him that the NYCDOH had told me that the children could come back to the CAC. He said that everyone was aware of this, but the boiler broke again and so the children will be staying off-site for a while longer. 2/9/06 - Raphael Ketani. I made a site visit today. The heat was off again as they had many hot water pipe leaks. They are in the process of replacing much of their hot water piping. Oil was still in the top of the front sump, but you could easily see to the bottom of the sump and the oil appeared to be just a sheen. Vapor concentrations were: basement: 1400 to 1500 ppb first floor art room: 200 ppb main floor: 325 ppb third floor: back/front, 325/290 fourth floor: back/front, 380/400 Kira Leid-King, lawyer for the Church of Nazareth, called me yesteday to say that she had hired a title company to do a records search for the third tank. No physical investigations were taking place at the church. 2/14/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that the odors were very slight in the building. I told him I would like to send over a vacuum truck to suck out the oil in the front sump. He said that would be alright. He said that someone will be at the CAC today and tomorrow. I called MILRO and they said they will be over at the CAC on thursday morning. I let Mr. Edwards know and he said someone will be there. 2/16/06 - Raphael Ketani. I spoke to Ms. Martin. She said she knew that MILRO wasn't coming today, but would come tomorrow. I asked her about Robani Oil and how service has been over the years - whether they clean up whatever they release. She said they had no problem with them and that nothing has ever happened. I then asked her whether she had heat today. She said yes and that there was plenty of it since they repaired all of the water pipes. I asked her how the history of the boiler has been. She said that except for now and the pipes, she hasn't had a problem - though it's tempermental. I asked her whether in the past it ever leaked. She said not to her knowledge. I ended the conversation after this. At 3:45PM I received a call from Bill Hunter, insurance adjuster for Utica Insurance ((516) 479-5089). He represents the insurance company for Robani Oil. He said he was trying to go over the information that Robani had given him regarding the oil release to see who had liability. He said the insurance claim number was 1016566. He said that the CAC first called Robani to complain of a loss on 1/6/06. He said Robani came to investigate and found oil 5 feet from the tank, but he said he wasn't sure whether that meant in the sump or on the floor. He asked whether the church was the source. I told him we didn't know yet, but we intend to do an investigation. 2/23/06 - Raphael Ketani. I spoke to Jose Ortiz regarding the conditions at the CAC. He said he did notice a slight odor on the main floor. I asked him to look at the front sump. He called me a little while later and said there was lots of oil in the sump. Then I called MILRO and told Paul of MILRO to send the vacuum truck. He said he would send it tomorrow, friday. Paul told me that DEC should be receiving the first bill soon for the work they have done so far. I let Mr. Ortiz know that MILRO will be over tomorrow. 2/27/06 - Raphael Ketani. I visited the CAC today. I met Mr. Edwards. He showed me the front basement area. The door is being kept closed now to confine the odors as much as possible. The room had 1500 ppb of vapors. A thin film of oil was present on the surface of the water in the sump with widely scattered small orange droplets of oil. The floor had lots of Speedi-Dri on it to absorb oil seeping up through the floor as oval stains. Mr. Edwards said that MILRO had been over last friday and had pumped out the sump. The air about the second

CHILDRENS ART CARNIVAL (Continued) **S107521874**

sump had about 560 ppb vapors. There was a sheen on top of the water, but it did not smell like oil. In the art room on the first floor the vapors were about 500 ppb. The main floor and the third floor both had vapor concentrations of about 450 ppb. Mr. Edwards said that they just had a cleaning crew mop the floors. The air smelled of some kind of vapors of a cleaner. I told Mr. Edwards that I will have MILRO come over sometime this week to pump out the sump again. He said anytime is alright. I received the analytical reports for the 5 soil samples taken at the CAC some weeks ago. Four (4) samples were collected on 1/31/06 in the front basement near the front sump. One (1) sample was taken on 2/2/06 at the fill pipe where it passes below ground. Three (3) of the front basement samples and the fill pipe sample indicate the presence of only #2 oil. One (1) basement sample indicated the presence of #1 oil. However, this oil was also in the blank. 3/1/06 - Raphael Ketani. I spoke to Paul of MILRO today and asked him to vacuum out the front sump this week. He said his truck will be over tomorrow. 3/6/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that MILRO was over on friday and pumped out the sump. He said that odors were definitely noticeable in the front basement, but the door is kept closed. He added that the odors in the rest of the building are slight and that they had classes on saturday with no problems. 3/9/06 - Raphael Ketani. I received a call from Ms. Martin today. She said that some men in plain cars showed up at the church on teusday, 3/7, and began working in the courtyard. She said that they uncovered and opened a tank today. 3/10/06 - Raphael Ketani. I visited the CAC and the church courtyard today. I took pictures of the exposed tank and the sheen floating at the top of the water in the tank. The soil from above the tank didn't have an odor. Next, I visited the CAC. They had fans blowing in the basement. They were blowing from the front sump area to the open back door of the basement. Vapors in the front sump area were about 560 ppb, vapors in the basement sink room where new oil stains showed up were 1100 ppb, the first floor was about 190 ppb, the main floor was 140 ppb, and the third floor was about 200 ppb. I will call MILRO to have the front sump pumped out again. 3/15/06 - Raphael Ketani. I talked to Jose Ortiz of the CAC. He said that MILRO was there on monday to pump out the front sump, but they had to wait for 10 or 15 minutes before they could get into the basement. Mr. Ortiz said that everything was pumped out and the odors are slight throughout the CAC. However, where the oil has been seeping through the floor in the basement sink room, the odors and the staining are getting worse. He said that no work is taking place at the church courtyard next door to investigate the tank and the oil. Kristina Lee (212) 883-7600, Chairman of the Health Committee of Community Board #9, called for an update. She said that she saw the exposed open tank in the church courtyard. I told her that the church brought a bunch of people to the site and they dug up and exposed the tank and then opened the tank. I told her DEC sent a letter ordering the church to continue the remediation by friday, 3/17, or the DEC will send in its own contractors. I told her the DEC will send a letter stating that we are taking over the investigation and cleanup if DEC hears or sees nothing happening. I added that we will get a court order to enter the property and then start the work. Ms. Lee said that the congregation meets every sunday at St. James Presbyterian Church. She added that on March 2, the NYC Dept. of Buildings fined the church $10,000 for not repairing the landmark building. SHE ASKED THAT A WELL BE PUT IN BETWEEN THE TANK AND THE NEIGHBOR'S GARDEN WALL AND

CHILDRENS ART CARNIVAL (Continued) **S107521874**

ASKED THAT SHE BE KEPT INFORMED BY NEXT WEEK. I told her I would. 03/17/06-Thomas-Contract Payment Package-(Severn)- took samples-02/01/06-02/28/06 took sample of sump pit 01/01/06-01/31/06 03/17/06-Thomas_ Contract Payment Package-(Milro)- washed basement floor, took samples, removed pads, washed tank room, took borings, purge sumps (01/19/06-02/24/06). 3/20/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that the odors in the rest of the building are slight. However, the odors in the basement sink room are increasing and more oil staining is showing up in the floor. He said that the fans are ventilating the basement. I told him that I will call MILRO to have them suck up the water and oil from the middle and front sumps. I contacted MIRLO and they said they will be over at 9:30AM to pump out both sumps. 3/22/06 - Raphael Ketani. I FAXed the Standby Contractor Authorization Form to Severn Trent Labs (phone: (845) 562-0890; FAX: (845) 562-0841). 3/23/06 - Raphael Ketani. I received the bills from MILRO today for work done on 3/1 and 3/13/06. 03/24/06 Thomas- Contract Payment Package-(Milro)- vacuumed oil from sump pits, disposed of oil and water (03/03/06-03/13/06). 3/28/06 - Raphael Ketani. I sent a letter to Ms. Martin with the 3/24/06 remediation plan that MILRO had FAXed to me. I received a call from Bill Hunter of Utica Insurance, the insurance company for Robani Oil. This is the second time he called me for information. He wanted to know what the status was with the spill case. I explained to him what was going on at the church courtyard and what DEC wanted to do to eliminate the vapors and contaminated water under the CAC. 4/4/06 - Raphael Ketani. I received a call from Marlene Martin of the CAC on 4/3/06. She wanted to know what the total cost of the cleanup has been so far for the CAC. I told her a close estimate is $8710. She asked what the cost would be for the future/proposed work plan that I had sent her from MILRO. I told her I would find out. I called up Anthony at MILRO and he said he will try to get back to me with an approximate price. 2:30 Anthony Mariano of MILRO FAXed me the rough estimate of what it may cost for all of the construction work that would take place to: break open the concrete floor and suck out the contaminated soil, water and oil, repair the floor, install 2 access wells in the floor, power wash the floor, and paint with two part expoxy paint. The total came to $36,642.95. I informed Ms. Martin about the estimated amount. 3:50PM I sent an e-mailed letter to Lisa Silversmith, the owner of the property on the other side of the CAC. I hadn't heard anything from her in response to the Department's 3/20/06 letter. So I sent her an e-mail to lisasilversmith@yahoo.com. The letter appears below: CONFIDENTIAL New York State Department of Environmental Conservation Division of Environmental Remediation, Region 2 Bureau of Spill Prevention and Response 47-40 21ST Street, Long Island City, NY 11101-5407 Phone: (718) 482-4933 " FAX: (718) 482-4098 Website: www.dec.state.ny.us April 4, 2006 Lisa Silversmith 60 Hamilton Terrace New York, NY 10031 RE: Spill #0511700 Childrens Art Carnival 62 Hamilton Terrace New York, NY Dear Ms. Silversmith: As of April 4, 2006, the New York State Department of Environmental Conservation (the Department) has not received a response to its March 20, 2006 letter regarding the property at 60 Hamilton Terrace (see attached below). It is important that the Department make an inspection to the basement of your property. We are aware that a spill had previously taken place at 60 Hamilton Terrace and was subsequently cleaned up and the case closed. The Department would like to determine that there are no impacts from the oil that is presently seeping into the Childrens Art Carnival next door.

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Temporary groundwater monitoring wells installed in the floor of your basement would help to collect any oil under your property. Please call me at (718) 482-4634 to make arrangements for the site inspection. Sincerely, Raphael Ketani Enigneering Geologist II 4/10/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that due to the rain last thursday, the odors in the sink room have gotten worse. However, he said, the odors in the rest of the basement are fine due to the ventilation and the odors in the building are slight. I told him that I would send over the vacuum truck to suck out more oil and water tomorrow. I told him to have someone at the CAC at 9AM so that MILRO can get in. He said he would do so. I asked him whether Ms. Martin was in. He said no. I called up Paul at MILRO and told him we would need his vac. truck at the CAC tomorrow. He said he would be there. 4/17/06 - Raphael Ketani. I spoke to Mr. Edwards. He said that the situation at the CAC is the same as last week with only slight odors in the occupied parts of the building and stronger odors in the basement. He said there was no flooding. I tried to contact Ms. Martin regarding MILRO's proposal, but could only leave a voice mail message. 4/24/06 - Raphael Ketani. I spoke to Mr. Edwards. He said that there are no changes at the CAC. He said the odors are the same - even in the basement. He said that there was no flooding from the 3 of rain over the weekend. However, the oil staining is slightly more in the basement. 5/15/06 - Raphael Ketani. I received the bills from MILRO for the work done on 3/21/06 and 4/11/06. I signed them and forewarded them for processing. 5/17/06 - Raphael Ketani. I spoke to Mr. Edwards today. He said the odors in the building were still only slight. He said the rains over the past weekend and week haven't caused any recurrence of oil seepage. He said the basement was fine. This case is being transfered today from myself to Jeff Vought in order to consolidate all of the PINS cases under one Spills case manager. 06/06/06-Vought-Received call from Marlene Martin requesting information on possibility of state funding for tank replacement. Marlene also said that basement flooded during past weekends with heavy rains and no free product was noted. 06/06/06-Vought-Complete File Review by Vought: See also spill numbers: 0209311(60 Hamilton Terrace-closed 12/22/05), 0551505(72 Hamilton Terrace-open). Sale of 72 Hamilton Terrace by City of New York to Nazareth Spiritual Church and resulting Deed transfer-4/20/72. Site visit on 1/11/05 by DEC Vought-DEC required: 1)tank testing results 2)notification to NYCDOH 3)installation of ventilation system in basement 4)sealing of sump and washing of basement floor. Vought left message with NYCDOH Nieves, spoke to Mike Hughes(NYSDOH) and decision to close is the call of Marlene Martin. Oil was first noted on 1/3/06 and basement filled with water during times of heavy rains. Three sumps present in basement of Childrens Art Carnival(CAC). Sump closed to Hamilton Terrace contained fresh #2 fuel oil. As per Marlene Martin, she contacted 60 Hamilton Terrace to see if they had spill and no spill was found in the basement and she contacted the Church who noted an oil spill next door at 72 Hamilton Terrace. Email from NYSDOH Hughes to NYCDOH Peter Stallbohm with cc to NYCDOH Nieves- How did you inspectors make out at the 64 Hamilton Terrace spill? . Email from NYSDOH Hughes to NYCDOH Stallbohlm and DEC Vought-1/18/06. ...any updates about the Childrens Center in Manhattan? Have they re-opened, cleanup status? . Response from Stalbohlm At 64 Hamilton Terrace, readings of 4-5ppm of VOC was detected. A contractor was contracted to conduct a cleanup yesterday. The center voluntarily closed until so. After cleanup, another visit

CHILDRENS ART CARNIVAL (Continued) **S107521874**

will be made to check effectiveness of cleanup (possibly today). Email from NYSDOH Hughes to DEC Vought-1/19/06. Peter Stallbohlm, NYCity Health, sent an inspector back to the Children's Center on Tuesday, 1/17. The inspector reported odors are still present... Fuel product still present in basement. The center is still closed and NYCity Health recommends staying closed until the additional clean-up is performed. Would you be able to also make a site visit and recommend some specific actions as well? . Letter from DEC Ketani to Kira-Leid King (Nazareth Deliverance Church NDC)-1/19/06. The New York State Department of Environmental Conservation (the Department) was notified on January 10, 2006 that a petroleum release took place at the above referenced site. Odors were noticed coming from the basement of the church during an inspection of the area on January 11, 2006. Staff from the Department were at the site on January 14, 2006 to observe the removal of No. 2 fuel oil by Northeast Environmental from Nazareth Deliverance Church . (6/6/06-Note that I, jeff Vought was onsite and liquid was recovered from basement when I arrived on-site, I did not observe oil in the basement as the liquid was already recovered). The Department has identified the Nazareth Deliverance Church as a potential responsible party for this release . Letter required submission of an investigative summary report including the investigation of a possible third tank under the church courtyard. The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness . If no reply regarding the investigation is received from the Nazareth Deliverance Church within (5) days of receipt of this letter the Department may proceed with the required work... . Letter from DEC Ketani to CAC Martin-1/19/06. The Department has identified the Childrens Art Carnival as a potentially responsible party for this release . Notification that the Departrment has contracted Milro and will invesigate the source of oil. Upon one of the inspections of the Childrens Art Carnival, staff from the Department noticed a three foot long piece of suction line at the foot of the stairs of the basement. The Department requires that the Childrens Art Carnival immediately conduct a site investigation to determine why the line was replaced, whether there was a release of product and how large the release was, when the suction line was replaced and which company did the replacement work. The Childrens Art Carnival must also hire a contractor to have the suction line and return line (the two 3/4 inch copper lines) pressure tested . Letter from DEC Ketani to CAC Martin-1/23/06. ...the Department was notified on January 20, 2006 that a tank system test was conducted by AL Eastmond & Son, Inc. on this date and that a leak was detected in the tank and vent line. At this time, the Department is ordering the Childrens Art Carnival to repair or replace the tank and the vent pipe, and to hire a contractor to investigate the oil spill and remove all contaminated concrete flooring, soil and rock and all product and contaminated water . Letter from Marlene Martin (CAC) to DEC Ketani-1/27/06. To date we have cooperated with the Department of Environmental Conservation on all requests, recommendations and mandates. Enclosed, please find the job tickets for work performed by Eastmond and Sons, Inc. as per your Department's madates and directives. It is our hope that a resolve can be reached as soon as possible and or that the Carnival can be eliminated as the potential source of this release... Enclosed as Eastmonds & Sons job tickets: 1)1/11/06- Removed 50 bags of contamianted soil washed floor, 1 bucket of oil wash, removed 102 gallons of water, pressure washed floor 2)1/18/06- pump out oil and

CHILDRENS ART CARNIVAL (Continued) **S107521874**

water from floor also wash down used 1x5 gallon can oil wash 3)1/20/06- Test tank, tank failed, wet leak 4)1/23/06- transfer oil to 275. Remove jacket and remove 30 bags of contaminated soil. Job completed 5)1/24/06- Install 275-gallon temporary . Contractor Work Authorization Form for Milro-2/2/06. Email from Landmarks Preservation Comission(LPC 212-669-7921)-John Weiss to DEC Ketani-02/10/06. Under the circumstances you described to me, no permit from the Landmarks Preservation Comission is needed for the NYSDEC contractor to break up the concrete paving in the courtyard next to 72 Hamilton Terrace in order to undertake and emergency remediation project . Because this work is being undertaken to remedy a dangerous condition, pursuant to section 25-312 of the NYC Administrative Code, no LPC permit is needed. No work is to be performed on 72 Hamilton Terrace . Fax from Kira-Leid King(NDC) to DEC Ketani-2/11/06. As discussed, attached please find a search from the fire department indicating that there are only two tanks located at the above-referenced premises. Therefore, there isn't another tank located in the court yard . The Church had a fire four years ago causing the building to be inhabitable . Letter from DEC Ketani to Leid-King (NDC)-2/10/06. ...the Department has not been notified by Lindsay Lindos or other representatives from the Nazareth Deliverance Spiritual Church, that the church will hire a company to conduct a site investigation to determine whether a fuel oil tank is present under the church courtyard. Deadline of 2/18/06 given to investigate the court yard. Email from LPC Weiss to DEC Ketani-2/22/06. I am writing in response to our recent telephone conversation regarding the possibility that the historic wrought iron fence in front of the side yard at 72 Hamilton Terrace may have to be removed in an oil tank has to be removed. Suggestion to take the tank out in pieces to save the fence. If fence has to be removed it also has to be replaced. Letter from DEC Ketani to Lindos Lindsay(NDC) and Kira Leid-King(NDC)-3/10/06. Site visit made by Department on 2/10/06. ...a third fuel tank was observed to be present beneath the courtyard behind the Nazareth Deliverance Church. Department required NDC to perform a soil boring between the foundation wall of the Childrens Art Carnival at 62 Hamilton Terrace and the tank, and taking soil and groundwater samples. Another boring must be installed between the tank and the church. Deadline given for nine days within date of letter (2/19/06) to respond to DEC and resume investigation of tank and soil. STL Analyticals-2/10/06. Sample from CAC sump pit ran for fuel id analysis and showed 920000ppb #2 fuel oil. Fuel oil sampled by Milro. STL Analyticals-2/17/06. Sample from CAC outside by fill #5 @1'. Sample analysis performed for TPH310.3 shows oil parameters below method detection limits. STL Analyticals-2/17/05. Four sample from CAC front basement area near sump. . Sample analysis performed for TPH310.3. Soil analyticals show all below method detection limit except for 7400ppm #2 fuel oil(SB#2 @ 1'), 110ppm #2 fuel oil(SB#3 @1'). Letter from DEC Ketani to NDC Lindsay and NDC Leid-King-3/20/06. On March 20, 2006 the New York State Department of Environmental Conservation (the Department) made a site visit to the above listed property. No work appeared to have taken place to investigate the tank or the surrounding soil since the last site visit that took place on March 10, 2006 . Letter requiring investigation. Due date of 4/5/06 for the work to resume. Letter from DEC Ketani to Lisa Silversmith-03/20/06. We would like to install two(2) wells in the groundwater beneath the basement of your home. These wells will be constructed and sampled by out contractor.

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Contractor Work Authorization for STL-3/21/06. Fax from Milro to DEC Ketani-3/24/06. Milro proposes the following scope of work to address the oil spill cleanup: 1)Saw cutting of concrete slab in the basement and excavation of contaminated soil 2)disposal at a licensed disposal facility 3)recover of product using a vaccum truck if contaminated groundwater is encountered 4)collection of endpoint samples from excavation 5)restoration of the concrete slab 6)pressure washing of basement and epoxy application. Letter from DEC Ketani to CAC Martin-3/28/06. ...(the Department) is presently looking into other methods of controlling and preventing the petroleum vapors from entering Childrens Art Carnival . Milo remediation plan has been enclosed for Martin's review. Cost Estimate (Milro-Moriano)-4/4/02. Cost estimate for basement excavation and replacement. Site visit by DEC Vought during endpoint sampling of tank in couryard-5/11/06. Sampling performed by USA Environmental (Cristin Ciaburri 718-981-5710). Onsite was Keith Bartley(USA). Pumped out wate from 550-gallon UST in courtyard. No product in UST, just sheen and water. Three soil samples were collected (one through bottom of tank, one below fill line and one below supply/return line). No odors or staining observed in all of the soil samples. Site visit performed to CAC and no odors in basement and no free product in sump. Some oil staining showing up on floor from underlying groundwater. One sample also collected for analyiss from NDC basement floor. Vought spoke to USA Ciaburri and DEC will receive report by 6/12/06. DEC tentative requirements: 60 HAMILTON TERRACE: 1)followup to see if any recent spills 72 HAMILTON TERRACE 1)results of basement borings by 275-gallon ASTs 2)submittal of documentation of 1/14/06 clean up by Northeast 3)notification to Bishop France of requirements 4)backfilling of UST excavation in courtyard 5) The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness as per 1/19/06 letter 6)backfilling of NDC excavation to prevent continued groundwater infiltration into CAC 62 HAMILTON TERRACE: 1)continued monitoring of sump 2)call back to Martin regarding possibility of use of Spill funds for AST replacement and likelihood of NYSOAG cost recovery against Art Carnival 2)submission of tank test results from Eastmond and Sons of AST in CAC as per requirement on 1/19/06 letter 4)borings at tank location for 8260/8270 5)Milro boring logs and site plan from 2/17/06 analyticals 6)implemenation of Randy's workplan(installation of monitoring wells at CAC and basement excavation) from Milro 7)sealing of basement floor 8)borings by UST, sump and and fill port 9)Summary of description of cleanup activities by AL Eastmond including source of 30 bags of soil removed during tank removal and description of removed tank. 06/15/06-Vought-Spoke with Marlene Martin who inquired about status of spill. Martin stated that there were no odors in the school to date. Vought drafted letter with above requirements to both parties and cc'd Northeast, Marlene Martin (Art Carnival), Cristine Brooks Lee(Comm Bd 9), Martin Smith(Councilman Robert Jackson), LPC and USA, Eastmond. DEC Vought to call Milro regarding: 1)boring logs and site plan for borings on 2/17/06 and installation of new borings in floor or school. DEC Vought to call Martin regaring: 1)non use of Spill Funds for AST replacement as per NYSOAG Buss 2)further soil and groundwater investigation by the DEC. 06/19/06-Vought-Called Martin(212-234-4093), faxed her copy of requirement letter and letter to NDC and left message informing her her that there was no way for Spill Fund to pay for CAC tank replacement and to dicuss letter sent on 6/15/06. Vought called Lindos Lindsay (347-228-8039) for fax

CHILDRENS ART CARNIVAL (Continued) **S107521874**

number and to inform him of outstanding requirements. Vought faxed him copy of requirement letter to 72 and 62 Hamilton Terrace. Lindsay requested that letter be transmitted via mail only and be sent to: Lindos Lindsay 163 Myrtle Avenue Brooklyn, NY 11201 Vought sent letter to above address. Vought called Christine Lee (Comm. Bd. 9 212-883-7600) and she requested correspondence via mail only. Vought sent info to: Christina Lee 48 Hamilton Terrace New York, NY 10031. Vought called and spoke to Martin Smith (ph 212-234-0551 fax 212-234-0552) for fax number and to explain requirements. Vought faxed Smith copy of requirement letters for 60, 62 and 72 Hamilton Terrace. Vought called John Weiss (Landmarks Preservation 212-669-7921) for fax number and to explain requirements. Vought left message to return call. Vought called and left message with Christin Ciaburri (USA 718-951-5710) for fax number and to explain requirements. Vought called Renee Lewis (AL Eastmond 718-378-3000 fax 718-378-4560) and he was not in office. Vought faxed him copy of letters to 62 and 72 Hamilton Terrace. Vought called Bob Rafferty(NYSDOH 518-402-7800 fax 518-402-7819) for fax number and to explain requirements. Vought faxed Rafferty copy of requirements. Vought faxed NYCDOH Nieves copy of requirements for 60, 62 and 72 Hamilton Terrace. Vought called Dwayne Monaco(Northeast 914-777-1930 fax 914-777-1928) for fax number and to explain requirements. Vought faxed Monaco copy of requirements. Vought received call from Monaco and returned call and spoke to Monaco and no analyticals were performed and Monaco will send in pictures. Monaco did say his men saw oil on the floor. Monaco will submit report and pictures to DEC. 06/27/06-Vought-Received call from Marvin Edwards (212-234-4093) requesting letter with amount spent to date on PIN (8713.53 as per UIS). Vought returned call and left messge explaining that DEC will not provide the letter as amount may increase and Vought willing to call insurance directly. 06/28/06-Vought-Received call from Marvin Edwards and they filed claim with general liability insurance. Their claim representative asked for further costs. Claim may file under third party liability portion of coverage. Marvin will contact insurance and arrange conference call with DEC. 07/12/06-Vought-Received message from Martin and returned call and spoke to Martin. Martin will be faxing in tightness test results and approved installation of additional borings. Martin will seal the basement floor upon no occurrence of product in the sump during monitoring period. 4/23/07-Vought-Reviewed above notes and both CAC and 72 Hamilton Ave are potential sources, CAC due to failed tank test and 72 Hamilton due to presence of oil spill during cleanup by Northeast Environmental. Both parties listed as potentially responsible and site visit scheduled with Martin for this week to confirm no further impact and close spill. Vought called Martin. Martin had not seen oil in recent months and site visit scheduled tomorrow at 10am. Vought also reviewed documentation and photos submitted by Northast dated 6/27/06. On January 14th, 2006 Northeast mobilized a crew and equipment to 72 Hamilton Terrace were technicians conducted a clean up of #2 fuel oil from the tank and boiler room of the building . Absorbent material was applied to the boiler room floor where puddles of standing fuel oil was observed... . No tank test results for 72 Hamilton included. Vought also received copy of failing test results for CAC which show Ullage (dry portion leak) from Eastmond and Sons dated 1/20/06. 4/24/07-Vought-Site visit by Vought and Marlene Martin not present at site due to emergency. Vought performed site visit with super and no product or olfactory

CHILDRENS ART CARNIVAL (Continued) **S107521874**

odor of groundwater noted in sump, no staining noted in concrete at former tank location or fill location, product stains noted on floor towards 72 Hamilton but as per super they were present for long time. No product in other sumps of CAC. Vought discussed with DEC Austin including possible groundwater sample at 72 Hamilton Avenue and investigation whether a former spill occurred at Daycare center by mechanics. 72 Hamilton Avenue boarded with no signs of development. Tank in courtyard excavation was backfilled. 07/25/08-Vought-Spill reassigned from DEC Vought to DEC Ketani as per DEC Austin. 8/21/08 - Raphael Ketani. I called up Paul Basso of MILRO Associates (516) 379-1500. I asked him to send DEC a copy of the report from about 1/27/06 whereby the return line for the fuel system at the CAC was tested and it failed. He said he will look for it. I called up the CAC and asked for Ms. Martin (212) 234-4093, but the receptionist told me that she wont be back until September. I asked for Marvin Edwards, but she told me that he didn't work here anymore. I was transfered to Fatima Faloye, the Operations Manager. I asked Ms. Faloye whether I could make an inspection at 11:30AM tomorrow. She said that would be alright. 8/22/08 - Raphael Ketani. I made the scheduled site visit. The church next door was completely boarded up. It appeared that no work had taken place, since early 2006 when I first visited the site, to restore the church. There were no petroleum odors coming from the basement vent. I put the PID meter as close as I could to a basement vent near the side entrance gate, but didn't detect anything. The area where the 550 gallon tank was buried had been filled in and was overgrown with weeds. I met Ms. Faloye and she took me to the basement. There were no signs of free product on the floor. There were no oil stains. There were no oil odors. The PID meter registered 0 ppb of vapors. The front sump had only water. I thanked Ms. Faloye for the opportunity to visit the site and left. 8/25/08 - Raphael Ketani. The Final ISR was written for the case and submitted to Randall Austin, Chief of the Spill Prevention and Response Unit, for his signature. I talked to Dwayne Monaco of Northeast Environmental (914) 777-1930 regarding the submission of an investigation report for the church. He said that they did only a cleanup of the basement and some oil collection. He said that no report was generated. 9/2/08 - Raphael Ketani. Today I received a FAX from Paul Basso of MILRO. The attached page was a simple form stating that the return line did not hold, but that the supply line was O.K. The date of the test was 1/27/06. Additionally, the last time that oil was collected from the CAC was on 4/11/06. This also appears to be the last time any cleanup took place. 9/4/08 - Raphael Ketani. The FSIR was signed by Randall Austin, Chief of the Spills Unit, and Lou Oliva, Chief Counsel Region 2, and sent to Dennis Farrar in DER, Albany. As there was no oil contamination, nor oil vapors at the site during my visit on 8/22/08, and as the DEC does not intend to do further investigatory work, nor sees the need for further remediation work at the site, I am closing the spill case. "

Remarks: "Material is coming into the basement of the Childrens Art Carnival and is originating from the church next door. The Art Carnival's oil company came and used a powder to control the odor but no clean up has been done. They need DEC's help. Groundwater was affected.... material is mixed with the water from the natural spring there. Unsure of what else they can do for a clean up."

Spiller Company: ROBANI OIL CO.
Spiller Address: COLONIAL PARK STATION BOX 188
Spiller Company: 999
Contact Name: DIONIS ORTIZ
DEC Memo: "1/10/06 -Austin - Also received complaint from: Cristina Lee, Chairman of Health Committee of Community Board #9 212-883-7600; 212-864-6200 contact her for further background info, as well as Ortiz - end Carnival e-mails: mamudd1@aol.com or mamartin@childrensartcarnival.org FAX: (212) 234-4011 1/11/06 - Raphael Ketani. I tried contacting Mr. Ortiz ((212) 234-4093), but a man answering the phone said he would not be in until 10:30AM. The man said that the church had a fire 2 years ago and hasn't rebuilt or reopened. He passed the phone to a woman who said that they have been trying to find out more information about the oil leaking from the church and she gave me the phone number of Cistine Grit (212) 234-0484. I called the number, but no one picked up. I then called (212) 883-7600 - the law office of Cristina Brooks Lee - but could only leave a message. I called (212) 864-6200 - the Community Board #9 phone 10AM to 5PM - and got a man on the line. He said that I should call Martin Smith (not available until 11AM) at (212) 928-1322, who is the representative of Councilman Robert Jackson. I will make a site visit at 10:45AM today. I made a site visit at 11:15AM. I met Dionis Ortiz, Program Manager, Jose Ortiz, his assistant, and Marlene Martin, executive director of the Children's Art Carnival. I went to the basement and looked at the oil tank, the fill and vent lines, and the boiler. There were no signs of spillage. However, I did see many cracks in the basement floor that looked wet. Mr. Ortiz said that there is a spring below the building and that the water seeps into the floor. The basement has 3 sumps. The front one is next to the front basement wall, the middle one is 16 feet away, and the third one is about 25 feet behind the second one. The second and third sumps had only clear water at the level of the floor. The front one had red oil floating on top. There were signs of oil spillage on the basement floor next to the sump. Mr. Ortiz said that when it rained heavily a little while ago, the water level rose and pushed out the oil onto the floor. He said that an oil odor was noticed to be coming from the basement on 1/3/06. He said that Robani Oil was called and they put down some oil absorbent material. I spoke to Robert Pearson of Robani Oil (212) 687-8699, Colonial Park Station, P.O. Box 188, NY, 10039, and he said he didn't think the oil was coming from the property, but he didn't do any system tightness testing. He said that the customer would have to order it and pay for the testing. The PID readings were as follows: over the sump: 11.8ppm breathing area front basement: 4.4ppm breathing area at second sump: 1.4ppm first floor hallway: 1.3ppm children's work room first floor: 570ppb main floor (second floor): 600ppb (light odor) third floor art work room: 650ppb third floor copier room: 750ppb fourth floor front and back: 750ppb Mr. Ortiz told me that the church next door burned two years ago and has never been repaired. He said there is a man (David - later called Patrick) living across the street who is affiliated with the church. Mr. Ortiz knocked on the window, but no one seemed to be home. He said that David told him that the church uses gas and that Con Ed had shut off the gas. Mr. Ortiz said that, after the fire, someone entered the church basement and saw an oil spill. I spoke to Ms. Martin and she said that she didn't have any other church contacts other than Cistine Grit (a.k.a. Ingrid). She called Ms. Grit's number, but didn't get an answer. I looked at the

CHILDRENS ART CARNIVAL (Continued) **S107521874**

outside of the church. The schedule display panel has Nazareth Deliverance Spiritual Church, Inc., Archbishop C. Clark. The name over the 72 Hamilton Terrace entrance is Church of Nazareth. The church is boarded up and the roof looks to be in bad shape. There were oily odors emanating from a small basement window near the basement door of the church. It is unclear if there is an oil spill in the basement of the church. I called Randall Austin, Chief Spills Engineer Region 2, with the information. He sent Jeff Vought, E.G. 1, over to look at the situation. Mr. Vought arrived at 1:30PM and looked over the situation. He noted 3 suction lines at the foot of the basement stairs. One line was only 3 feet long as it had been cut. No one at the Carnival knew when this happened or if a previous oil spill took place. Though Mr. Ortiz told me that the Carnival has been in the building for 36 years. I saw a short stream of red oil between one of the fuel lines and the wall next to the stairs. A conference call took place between Ms. Martin, Mr. Vought, and Michael Hughes of NYS DOH. Mr. Hughes said that the building should be ventilated and the basement door sealed. Ms. Martin said that she told all the parents about the odors and that all of the parents decided to have their children stay in class. Later, at between 3PM and 4PM, Martin Smith of Councilman Robert Jackson's office and Claudius Wickham of NYCDOH showed up. We went with them and Bruce Tilley of the Neighborhood Organization to the home of Diana Laird and David Zapol at 418 W.144 Street. This is the home which shares a common wall with the church. PID readings in the kitchen were 940ppb. Readings in the corner of the basement where paint and wall finishing material were reached 1300 to 1600ppb. A dirt hole in the basement floor had 2500ppb readings. The front part of the home's basement had 500ppb. Next, Mr. Smith and Mr. Wickham went with us to the Carnival's basement. They both looked at the situation with the oil in the front sump and noted the odors. Then Mr. Wickham measured the air in the art work room on the first floor. He noted about 650ppb readings. He said that the odors weren't dangerous, but just a nusiance. He said to ventilate the building. 1/12/06 - Raphael Ketani. I made a followup visit at 3:10PM. Eastmond had finished their cleanup work. The front sump had been vacuumed and the floor had been cleaned. Fans were blowing the air around in the basement. Ms. Martin said that Eastmond didn't arrive until this morning as, otherwise, there would have been high overtime charges to do the work yesterday at night. Eastmond told her that the oil tank will be picked up off of the floor or else the dampness will corrode the bottom and the tank will leak. The odors were not as bad as yesterday. The tank room had about 3ppm, the director's office about 750ppb, and the children's work area on the main floor was about 300ppb - there were no odors on the main floor. However, the oil reappeared in the front sump. Ms. Martin told me that she had made contact with someone from the Church of Nazareth and that this person will let people in saturday morning (1/14). Ms. Martin said that she will let me know what time the church will be opened up. She also said that her company is not going to spend any more money on removing the oil in the sump until DEC finds out whether the oil is coming from somewhere else or from the Carnival. I informed Randall Austin, Chief Spills Engineer Region 2, and Jeff Vought, E.G. 1 Spills, about this and about the return of the oil in the sump and about the levels of the odors today. 1/13/06 - Raphael Ketani. I spoke to Ms. Martin. She said that there are no odors on the main floor. I asked whether she made contact with anyone from the church.

CHILDRENS ART CARNIVAL (Continued) **S107521874**

She said no one called her and she couldn't get ahold of anyone. I asked whether the front sump was covered. She said it wasn't. I told her to have someone cover it with plastic bags and then use tape to seal the bags to the sump clay pipe. She said she would have someone do it. 1/17/06 - Raphael Ketani. Ms. Martin called me today. She said that the basement had flooded over the weekend because the sump pump didn't work. She said she had water and oil all over the floor. Also, she said that the oil guage on the oil tank is in the red zone. I asked her when was the last time she had a delivery. She said that it was some time ago and no one really keeps track of the level of oil in the tank. She said she called Robani Oil to get a delivery. However, the odors are bad again in the building. I told her to set up the fans. She said there are problems with the electricity in the basement and the fans aren't running. I also told her that Northeast Environmental ((914) 777-1930) showed up at the church on saturday, 1/14/06, and found oil all over the basement. I told her to call them and get them to clean up the oil in her basement. I told her that if they wont do it, then to call Eastmond again and have them clean up the oil as the odors are bad. Jeff Vought, the off hours spill responder for the weekend, came in and gave me the following notes. He said that Northeast Environmental arrived on site at 11:30AM on saturday 1/14. Oil was all over the floor of the Childrens Art Carnival. Northeast collected the oil and water on the basement floor and pumped out the front sump. Northeast then went to the Church of Nazareth and recovered 120 gals. of #2 fuel from the two 275 gallon tanks in their basement. They did 2 borings, one next to the two 275 gal. tanks (ASTs) and one some feet to the west. They end at bedrock and are only 18 deep. Mr. Vought had them leave the borings open. There is a fuel filter in a concrete casing in the floor. From there, a line runs to the boiler. Mr. Vought suggested to me that they either do 2 wells in the corner of the wrought iron fence next to the Carnival or an oil recovery pit. The contact at Northeast is Dwayne Monaco (914) 777-1930 or (914) 403-5525 cell. I spoke to Mr. Monaco and he said that he was hired by the church and has no plans to pump out more oil from the Carnival. His techinician noticed a second vent line and a remote fill at the back of the church. He believes that there may be a third tank under the courtyard. I contacted Ingrid at (212) 234-0485, the Church of Nazareth - Archbishop Maxton France (cell (917) 642-8913). She said this was the Archbishop's number and that I can send a letter to 72 Hamilton Terrace, NY 10031. She said they didn't have plans to do anything more regarding the cleanup. I visited the site at 2:50PM. Oil vapors were still noticeable from the church. I entered the Carnival and sensed strong odors on the main floor. There were no activities or children at the day care center. I went to the basement and there was 3 of water there. However, I could not see a sheen. Ms. Martin said that Eastmond could not come and pump out the water as they didn't have a truck available. She said that they will come at 9AM on 1/18. The vapors in the buidling are as follows: basement=10.1ppm first floor art room=2250ppb executive director's office=3400ppb hallway at first floor=6600ppb main floor=2300ppb third floor art room=3000ppb third floor front room=4600 third floor landing=7100ppb fourth floor art room=5600ppb fourth floor front room=4600ppb fourth floor landing=7100ppb I met Mr. Pearson of Robani Oil at the site. He said he wasn't going to deliver oil until the oil spill at the church was cleaned up and not until it was determined that the Carnival's system wasn't leaking. Ms. Martin said that someone from the NYCDOH was supposed to show up

CHILDRENS ART CARNIVAL (Continued) **S107521874**

to test the air, but I stayed until 3:35PM and he arrived. Ms. Martin said that they were out of oil and so the heat was off. 1/18/06 - Raphael Ketani. I tried to call the Carnival to find out how the water/oil removal in the basement went at 9AM (contractor was Eastmond), but no one answered the phone. Later, I got ahold of Ms. Martin via her cell phone (917) 805-3154. She told me that Eastmond had been at the Carnival at 9AM and had pumped out the basement. She said that the school is still closed. I called up MILRO (516) 379-1500 (FAX (516) 379-4596) and spoke to Paul Basso. I told him that we needed Milro to set up ventilation for the school and pump out the basement. We decided to meet at 10:30AM tomorrow. Kira Leid-King (home(914) 632-0665; cell (914) 879-8126; work FAX (212) 455-2502) called me to explain that the oil wasn't spilled on the floor of the church's basement. However, I told her that Northeast Environmental had been to the church on 1/14/06 and had pumped out 120 gals. from the two 275 gallon tanks. She said that the church hadn't had a delivery in 3 years and that the Fire Dept. had ordered the church to pump out the oil after the fire. She said the tanks never had oil in them. I told her that there was a second vent pipe and a second fill port. I added that there is a gauge for a 550 gal. tank on the wall of the church's basement. I told her that DEC suspects there is a third tank under the courtyard. She said that she had no idea. Finally, I told her that the state would be hiring a contractor to investigate the church's oil spill and tank situation. She said that it's the Carnival's fault, not the church. I asked her what her relationship was to the church. She said that she is sort of the secretary-treasurer and paid for Northeast to do the oil vacuuming. 1/19/06 - Raphael Ketani. A site visit was made by Randall Austin, Chief Spills Engineer Region 2, and myself to monitor the work of MILRO Assocs. Inc. We met Gordon Sandtorv, Operations Supervisor from MILRO, on site. MILRO was already cleaning the floor in the basement of the Carnival. Vapors in the basement were about 3000ppb. However, the floor looked very clean. Red oil was again on top of the water in the front sump. Water was seeping through the north wall (opposite the oil tank) of the basement. It didn't have any odor or feel oily. I found out that Robani Oil had delivered 100 gals. and the heat was back on. Patrick Peters (phone (212) 690-0630; son of Archbishop Carlyle Clark) showed up at the Carnival. We asked him to let us into the church basement and he did. We saw the two 275 gals. tanks and one vent line that extended from the second tank. A filter apparatus was in the floor for the oil. The suction line ran through the floor and came up 8 feet away at the furnace. There was a light smell of oil, but no oil was visible on the floor. A gauge was mounted onto the wall above the first tank. Gordon said that it was a petrometer for a third tank. vapor concentrations for 1/19: basement: about 3000ppb directors office: 425ppb first floor art room: initially 1000ppb, then 400ppb main floor: 350ppb third floor: 700ppb back room/ 600ppb front room fourth floor: 400ppb back room/ 1000ppb front room Mr. Austin talked to Mr. Sandtorv and told him that if the Carnival doesn't test the suction line and the return line, then MILRO will have to do it. He added that he wanted MILRO to construct some kind of low flow sump and collection system with an oil/water separator to collect the water and pump it to the city sewer. Then we left. 1/20/06 - Raphael Ketani. I called up Paul Basso and asked him what MILRO was doing to install a sump and oil/water separator. He said that he thought this idea was tentative and that DEC wasn't so sure this is what they wanted. So he hadn't looked into investigating

CHILDRENS ART CARNIVAL (Continued) **S107521874**

a possible system. I told him DEC DOES want a slow pump system to hold down the water level and collect the oil. I told him that it needs to be installed immediately. He said that such a system that will work with the sump that exists is tricky to find, but he will investigate a possible one now. Paul added that oil samples were sent to Severn Trent today. He said there is a 2 week turnaround. I also told him to put down lots of absorbent pads on the floor around the front sump because rain is expected over the weekend. He said he will have someone do this. I called up Ms. Martin and asked her how things were. She said that the odors were low due to the fans that were going all night and that the basement was free of oil. She said that she will get someone to the Carnival soon to do an entire tank system tightness test. Ms. Martin called me at about 3:15PM today and said that Eastmond had done a system test. They found that the tank leaked pressure and the vent pipe had a wet failure. Otherwise, Eastmond said, the suction, return and fill lines were alright. I told Ms. Martin that the next step was to have the tank cleaned out, removed, and a temporary tank installed. She said she would do that. I told her to have Eastmond put absorbent pads around the front sump to absorb oil when the water level rises again and to hire a company to either dig up the contaminated soil below the basement or to start with soil borings to find the extent of the oil pool. I gave her a list of digging and investigative companies with no recommendation. She said she would pick a company to start work. 1/23/06 - Raphael Ketani. I spoke to Paul of MILRO today and told him to hold off doing more work at the site. He said that his crew had been there this morning and pumped out more oil. I told him that was fine, but to stop work for now. He said he would. I then spoke to Ms. Martin. She said that Eastmond was on site and they were cutting up the tank. She said that MILRO had been on site and had pumped out more oil. Ms. Martin asked for a letter ordering the Carnival to do the tank removal and break up the floor of the basement to remove the contaminated soil and water. I told her I would send it. 1/25/06 - Raphael Ketani. I spoke with Marlene by cell phone. She said that this was the best way to reach her now because of the tank removal yesterday. She said that when Eastmond removed the oil, cut up the old tank, and welded the new tank, the vapors were so strong that they chased everyone out of the building. She said that everyone is now working from their respective homes. She said that she thinks the Carnival has found a temporary place to hold their saturday workshops. Ms. Martin said that a temporary tank has been set up in the backyard and Robani is supposed to get things running to provide heat. I told her to open all of the windows again to get more vapors out. She said she will do this and that she will call Eastmond to see what they plan to do and when. I called Eastmond and spoke to Isaac Mungra. He said that his crew removed the tank and saw holes on the opposite side which were 15 inches above the floor. He said that it did not appear that oil leaked onto the floor from the tank or anywhere (according to Rene from his crew who was there). Mr. Mungra said that he didn't feel it was necessary to break up the floor to see whether oil was underneath. I asked him whether Eastmond was going to wash the floor and pump the sump. He said no because he didn't want to take on the large cost. I asked whether Eastmond tested the suction, return, and fill lines. He said no because it was his understanding that Robani was going to replace the lines anyway. He said he was only responsible for cutting up the tank. I called Robani and asked Mr. Pearson whether Robani Oil was going to test the

CHILDRENS ART CARNIVAL (Continued) **S107521874**

3 lines. He said no and that he had no plans to. He said that he was just going to supply 2 temporary 275 gal. tanks and get the furnace running again. I asked whether Robani Oil was going to clean the basement floor and suck out the sump. He said no because he didn't want to take on the large cost as the Carnival doesn't have a lot of money. He told me to have Eastmond do it. I called Ms. Martin back and told her the situation with Eastmond and Robani and told her that I would call MILRO, with her permission, and have them come and do the 3 line tests, clean the floor, suck the sump and ventilate the buidling. She said that was alright and to call them. I tried calling Paul Basso, but could only leave a message. Mr. Marvin Edwards (cell (404) 790-2592) called to ask what he should put in the response letter to DEC. I told him to give me a chronology of who performed what service, what events happened, and how the tank failure was discovered and what actions were taken to resolve the matter. He said he would. He added that he is taking over some of the cleanup coordination responsibility from Ms. Martin as she has other work to do. He asked that I coordinate with him. I told him that I was trying to get MILRO to take over the cleanup. He said that would be fine. I made contact with Mr. Basso and told him what the DEC wanted MILRO to do: 3 line tests, ventilate building, clean floor, pump sump daily. He said that MILRO can do all of the work. I asked him when his crew could come out. Mr. Basso said at 1 PM tomorrow. I said that would be alright. I called up Ms. Martin and asked her whether 1PM tomorrow would be alright. She said yes. I then called up Mr. Edwards to let him know when MILRO will be there. He said that 1PM would be good. 1/26/06 - Raphael Ketani. I visited the site today at 12:30PM and met Ms. Martin and Mr. Ortiz. They said that MILRO had already been here at 11:30PM and pumped out the sump. Ms. Martin said that MILRO told her they would be over tomorrow to clean the floor. I looked at the front sump and saw only clear water. There still were odors in the building as the floor in the front basement needed washing, though it didn't look oily and smelled only very slightly when I got very close to it. The floor where the tank used to be didn't have cracks or oil stains. There were fans in the basement blowing the vapors out the back entrance. Fans were present on all floors and were blowing the air out the windows. The building was cool inside due to the open windows. Vapor concentrations were as follows: basement front/back: 3500ppb/520ppb first floor director's office/art room: 89/210 main floor: 162 third floor front/back: 200/290 fourth floor front/back: 218/194 1/27/06 - Raphael Ketani. I received a call from Ms. Martin. She said that MILRO tested the 3 lines and the return line failed. She said that they cleaned the floor today, too. Ms. Martin added that the odors are light today. 1/30/06 - Raphael Ketani. I spoke to Paul Basso today. He said that the fill line wasn't tested. I asked him to test this line, also. He said they vacuumed out oil from the front and middle sumps on friday and cleaned the floor. He said that they will be over tomorrow, 1/31, and test the fill line, vacuum again and clean the floor, if necessary. I told him this would be fine. I made a site visit 10:45AM. I met Jose Ortiz who let me check on the odors at each floor and the presence of oil in the sump. The vapor concentrations were: 2,000ppb in the front basement; 750ppb in the back basement; about 250ppb at each floor above the basement. Odors were light on the main floor, but the building is still cool due to a problem with the furnace and the windows are partially open. I met Mr. Pearson on site. He told me that he will replace the suction line and that the return line was not in service even before

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Robani was the Carnival's oil supplier. I told Mr. Ortiz and Ms. Martin that MILRO will come tomorrow to suck out the sump and do 4 soil borings in the front basement. I told them that there will be 2 borings where the tank used to be, 1 between the tank position and the sump, and 1 on the other side of the sump. They said they understood. I will try to be at the site to watch the soil sampling. Mr. Lindos Lindsay called and left a message that he is scheduled to meet with an environmental company tomorrow at 11AM to discuss what needs to be done and how to go about it. 1/31/06 - Raphael Ketani. I met Gordon of MILRO at the site just as he finished doing the fourth boring - about 11AM. All four borings had been done where I wanted them. Gordon told me that he had soil at each location and that the soil at boring #1 (between the sump and the wall) was the most contaminated. He said that boring #4 at the west end of the former tank area was the cleanest. He said that he will submit the samples for analysis. Oil was still floating and accumulating in the sump. I asked Gordon to call Paul Basso and have a vacuum truck come over and suck out the sump. Gordon said that one will be here today and tomorrow. The crew from Robani Oil began their work right after Gordon was done. They will install 2 275 gal. tanks and replace all of the lines. The vapors in the building were slightly worse than yesterday. I talked to Jose Ortiz and Marvin regarding why the borings were taken and what will happen next. I told them to set up the fans again and to ventilate the building. At 3:30PM I spoke to Gordon of MILRO to find out the details of how the return line was tested. Gordon said that he capped off the line, pumped with a manual push-pull pump until he had 5 lbs. of vacuum and waited half an hour. He said he used soap solution to check all the valves and they were fine. He said the vacuum truck had been there about 1 hour after he left and pumped out a lot of oil. I told him to test the fill line. Gordon said that he believed the line was already removed. I told him that if this is true, then I wanted him to do a couple of borings outside the building next to the fill line tomorrow morning. He said he will do it. 2/1/06 - Raphael Ketani. I met Gordon at the Carnival. He did one boring (#5) next to the fill pipe. However, Robani had replaced the old fill pipe with a new one yesterday and had been sloppy by spilling a little oil onto the area when they pulled the pipe. The sample was sandy fill soil and had a slight odor. The PID reading was 500ppb, but Gordon had collected the sample in a plastic bag. This was sand that was used to backfill the upper end of the abandoned coal shute that is infront of the building. I went into the basement and checked the portion of the sand that had spilled into the coal shute. It didn't have an odor. Gordon said that they just sent off the oil samples that were collected. I told him to order the lab to do a fingerprint of the oil. In the basement, Robani had installed two 275 gal. tanks, a new fill line, a new vent pipe, and a plastic coated suction line. The suction line was cemented to the floor and covered with concrete where it met the landing of the stairs to the basement. All of the old lines were removed. The heat was back on and a hot water pipe almost over the back and another one against the opposite wall of the basement were leaking hot water. Part of the floor of the front basement was wet. Some of the wetness extended under the new tanks, but they are on feet above the floor. Red oil is in the front sump, but is transparent enough so that the bottom of the sump can easily be seen. I told Gordon to call Paul Basso and have him send a vac. truck over to pump out the sump. Vapors in the building were: basement: front 1000ppb/ middle 500ppb

CHILDRENS ART CARNIVAL (Continued) **S107521874**

first floor: front 350ppb/ back 225ppb second (main) floor: 230ppb third floor: front 250ppb/ back 350ppb fourth floor: front and back 300ppb Paul from MILRO called at 3PM and said that he will send the samples to a DEC contract lab for fingerprinting and he will resample soil sample #5 and put it in a jar. 2/2/06 - Raphael Ketani. I received a call from Rick Bayer of Severn Trent Labs regarding the soil samples. He said he will send a copy of the report to MILRO and to DEC. 2/3/06 - Raphael Ketani. I FAXed a copy of the Standby Contractor Authorization Form to Paul Basso of MILRO. 2/6/06 - Raphael Ketani. I visited the site today. Vapors in the building were 3600ppb in the basement, 200ppb in the first floor art room, and 170 ppb in the main floor art work area. However, the heat was off as the plumbers were replacing a couple of hot water pipes. Oil was still in the front sump, but it had turned thinner and brownish in color. Aside from this, Marvin Edwards of the Carnival pointed out black spots from 2 to 14 that had suddenly started to appear on the basement floor. Mr. Edwards said that he first noticed them today. There were about 12 spots and all except for a couple were in the front basement area. I touched some and oil came off onto my hand. The PID detected 6200ppb of vapors. I called MILRO to come over tomorrow to suck out the front sump and try to reduce the amount of oil seeping through the floor. Paul of MILRO said they would do it. 2/7/06 - Raphael Ketani. I tried to find out whether MILRO had pumped out the front sump, but could only leave a voice mail for Marlene Martin. I called up Paul at MILRO and he said his worker was there with the vacuum truck and pumped out 120 gals. of water. 2/8/06 - Raphael Ketani. I called up Mr. Wickham of NYCDOH ((212) 442-3372), but he wasn't in. I reached the receptionist and she said that all inspectors get their work assignments a week in advance and that Mr. Wickham already had a full schedule and could not make it to the CAC. She connected me with Mr. Wickham's supervisor, Inspector Stallbohm. Mr. Stallbohm said that someone was out at the CAC on 1/17 and still found unacceptable vapors. He would see what he can do to get someone to the CAC quickly. Mr. Stallbohm called back to say that an inspector went out to the CAC on 2/3 and determined that the vapors had decreased to safe levels for children. He said that Marvin Edwards of the CAC had signed the DOH report to this effect. He added that Mr. Edwards was told the children could come back and that an inspector will make a followup visit on about 2/17. I called up Marvin, but got Jose Ortiz. I told him that the NYCDOH had told me that the children could come back to the CAC. He said that everyone was aware of this, but the boiler broke again and so the children will be staying off-site for a while longer. 2/9/06 - Raphael Ketani. I made a site visit today. The heat was off again as they had many hot water pipe leaks. They are in the process of replacing much of their hot water piping. Oil was still in the top of the front sump, but you could easily see to the bottom of the sump and the oil appeared to be just a sheen. Vapor concentrations were: basement: 1400 to 1500 ppb first floor art room: 200 ppb main floor: 325 ppb third floor: back/front, 325/290 fourth floor: back/front, 380/400 Kira Leid-King, lawyer for the Church of Nazareth, called me yesteday to say that she had hired a title company to do a records search for the third tank. No physical investigations were taking place at the church. 2/14/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that the odors were very slight in the building. I told him I would like to send over a vacuum truck to suck out the oil in the front sump. He said that would be alright. He said that someone

CHILDRENS ART CARNIVAL (Continued) **S107521874**

will be at the CAC today and tomorrow. I called MILRO and they said they will be over at the CAC on thursday morning. I let Mr. Edwards know and he said someone will be there. 2/16/06 - Raphael Ketani. I spoke to Ms. Martin. She said she knew that MILRO wasn't coming today, but would come tomorrow. I asked her about Robani Oil and how service has been over the years - whether they clean up whatever they release. She said they had no problem with them and that nothing has ever happened. I then asked her whether she had heat today. She said yes and that there was plenty of it since they repaired all of the water pipes. I asked her how the history of the boiler has been. She said that except for now and the pipes, she hasn't had a problem - though it's tempermental. I asked her whether in the past it ever leaked. She said not to her knowledge. I ended the conversation after this. At 3:45PM I received a call from Bill Hunter, insurance adjuster for Utica Insurance ((516) 479-5089). He represents the insurance company for Robani Oil. He said he was trying to go over the information that Robani had given him regarding the oil release to see who had liability. He said the insurance claim number was 1016566. He said that the CAC first called Robani to complain of a loss on 1/6/06. He said Robani came to investigate and found oil 5 feet from the tank, but he said he wasn't sure whether that meant in the sump or on the floor. He asked whether the church was the source. I told him we didn't know yet, but we intend to do an investigation. 2/23/06 - Raphael Ketani. I spoke to Jose Ortiz regarding the conditions at the CAC. He said he did notice a slight odor on the main floor. I asked him to look at the front sump. He called me a little while later and said there was lots of oil in the sump. Then I called MILRO and told Paul of MILRO to send the vacuum truck. He said he would send it tomorrow, friday. Paul told me that DEC should be receiving the first bill soon for the work they have done so far. I let Mr. Ortiz know that MILRO will be over tomorrow. 2/27/06 - Raphael Ketani. I visited the CAC today. I met Mr. Edwards. He showed me the front basement area. The door is being kept closed now to confine the odors as much as possible. The room had 1500 ppb of vapors. A thin film of oil was present on the surface of the water in the sump with widely scattered small orange droplets of oil. The floor had lots of Speedi-Dri on it to absorb oil seeping up through the floor as oval stains. Mr. Edwards said that MILRO had been over last friday and had pumped out the sump. The air about the second sump had about 560 ppb vapors. There was a sheen on top of the water, but it did not smell like oil. In the art room on the first floor the vapors were about 500 ppb. The main floor and the third floor both had vapor concentrations of about 450 ppb. Mr. Edwards said that they just had a cleaning crew mop the floors. The air smelled of some kind of vapors of a cleaner. I told Mr. Edwards that I will have MILRO come over sometime this week to pump out the sump again. He said anytime is alright. I received the analytical reports for the 5 soil samples taken at the CAC some weeks ago. Four (4) samples were collected on 1/31/06 in the front basement near the front sump. One (1) sample was taken on 2/2/06 at the fill pipe where it passes below ground. Three (3) of the front basement samples and the fill pipe sample indicate the presence of only #2 oil. One (1) basement sample indicated the presence of #1 oil. However, this oil was also in the blank. 3/1/06 - Raphael Ketani. I spoke to Paul of MILRO today and asked him to vacuum out the front sump this week. He said his truck will be over tomorrow. 3/6/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that MILRO was over on friday and pumped

CHILDRENS ART CARNIVAL (Continued) **S107521874**

out the sump. He said that odors were definitely noticeable in the front basement, but the door is kept closed. He added that the odors in the rest of the building are slight and that they had classes on saturday with no problems. 3/9/06 - Raphael Ketani. I received a call from Ms. Martin today. She said that some men in plain cars showed up at the church on teusday, 3/7, and began working in the courtyard. She said that they uncovered and opened a tank today. 3/10/06 - Raphael Ketani. I visited the CAC and the church courtyard today. I took pictures of the exposed tank and the sheen floating at the top of the water in the tank. The soil from above the tank didn't have an odor. Next, I visited the CAC. They had fans blowing in the basement. They were blowing from the front sump area to the open back door of the basement. Vapors in the front sump area were about 560 ppb, vapors in the basement sink room where new oil stains showed up were 1100 ppb, the first floor was about 190 ppb, the main floor was 140 ppb, and the third floor was about 200 ppb. I will call MILRO to have the front sump pumped out again. 3/15/06 - Raphael Ketani. I talked to Jose Ortiz of the CAC. He said that MILRO was there on monday to pump out the front sump, but they had to wait for 10 or 15 minutes before they could get into the basement. Mr. Ortiz said that everything was pumped out and the odors are slight throughout the CAC. However, where the oil has been seeping through the floor in the basement sink room, the odors and the staining are getting worse. He said that no work is taking place at the church courtyard next door to investigate the tank and the oil. Kristina Lee (212) 883-7600, Chairman of the Health Committee of Community Board #9, called for an update. She said that she saw the exposed open tank in the church courtyard. I told her that the church brought a bunch of people to the site and they dug up and exposed the tank and then opened the tank. I told her DEC sent a letter ordering the church to continue the remediation by friday, 3/17, or the DEC will send in its own contractors. I told her the DEC will send a letter stating that we are taking over the investigation and cleanup if DEC hears or sees nothing happening. I added that we will get a court order to enter the property and then start the work. Ms. Lee said that the congregation meets every sunday at St. James Presbyterian Church. She added that on March 2, the NYC Dept. of Buildings fined the church $10,000 for not repairing the landmark building. SHE ASKED THAT A WELL BE PUT IN BETWEEN THE TANK AND THE NEIGHBOR'S GARDEN WALL AND ASKED THAT SHE BE KEPT INFORMED BY NEXT WEEK. I told her I would. 03/17/06-Thomas-Contract Payment Package-(Severn)- took samples-02/01/06-02/28/06 took sample of sump pit 01/01/06-01/31/06 03/17/06-Thomas_ Contract Payment Package-(Milro)- washed basement floor, took samples, removed pads, washed tank room, took borings, purge sumps (01/19/06-02/24/06). 3/20/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that the odors in the rest of the building are slight. However, the odors in the basement sink room are increasing and more oil staining is showing up in the floor. He said that the fans are ventilating the basement. I told him that I will call MILRO to have them suck up the water and oil from the middle and front sumps. I contacted MIRLO and they said they will be over at 9:30AM to pump out both sumps. 3/22/06 - Raphael Ketani. I FAXed the Standby Contractor Authorization Form to Severn Trent Labs (phone: (845) 562-0890; FAX: (845) 562-0841). 3/23/06 - Raphael Ketani. I received the bills from MILRO today for work done on 3/1 and 3/13/06. 03/24/06 Thomas- Contract Payment Package-(Milro)- vacuumed oil from sump pits, disposed of oil and water (03/03/06-03/13/06). 3/28/06 -

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Raphael Ketani. I sent a letter to Ms. Martin with the 3/24/06 remediation plan that MILRO had FAXed to me. I received a call from Bill Hunter of Utica Insurance, the insurance company for Robani Oil. This is the second time he called me for information. He wanted to know what the status was with the spill case. I explained to him what was going on at the church courtyard and what DEC wanted to do to eliminate the vapors and contaminated water under the CAC. 4/4/06 - Raphael Ketani. I received a call from Marlene Martin of the CAC on 4/3/06. She wanted to know what the total cost of the cleanup has been so far for the CAC. I told her a close estimate is $8710. She asked what the cost would be for the future/proposed work plan that I had sent her from MILRO. I told her I would find out. I called up Anthony at MILRO and he said he will try to get back to me with an approximate price. 2:30 Anthony Mariano of MILRO FAXed me the rough estimate of what it may cost for all of the construction work that would take place to: break open the concrete floor and suck out the contaminated soil, water and oil, repair the floor, install 2 access wells in the floor, power wash the floor, and paint with two part expoxy paint. The total came to $36,642.95. I informed Ms. Martin about the estimated amount. 3:50PM I sent an e-mailed letter to Lisa Silversmith, the owner of the property on the other side of the CAC. I hadn't heard anything from her in response to the Department's 3/20/06 letter. So I sent her an e-mail to lisasilversmith@yahoo.com. The letter appears below: CONFIDENTIAL New York State Department of Environmental Conservation Division of Environmental Remediation, Region 2 Bureau of Spill Prevention and Response 47-40 21ST Street, Long Island City, NY 11101-5407 Phone: (718) 482-4933 " FAX: (718) 482-4098 Website: www.dec.state.ny.us April 4, 2006 Lisa Silversmith 60 Hamilton Terrace New York, NY 10031 RE: Spill #0511700 Childrens Art Carnival 62 Hamilton Terrace New York, NY Dear Ms. Silversmith: As of April 4, 2006, the New York State Department of Environmental Conservation (the Department) has not received a response to its March 20, 2006 letter regarding the property at 60 Hamilton Terrace (see attached below). It is important that the Department make an inspection to the basement of your property. We are aware that a spill had previously taken place at 60 Hamilton Terrace and was subsequently cleaned up and the case closed. The Department would like to determine that there are no impacts from the oil that is presently seeping into the Childrens Art Carnival next door. Temporary groundwater monitoring wells installed in the floor of your basement would help to collect any oil under your property. Please call me at (718) 482-4634 to make arrangements for the site inspection. Sincerely, Raphael Ketani Enigneering Geologist II 4/10/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that due to the rain last thursday, the odors in the sink room have gotten worse. However, he said, the odors in the rest of the basement are fine due to the ventilation and the odors in the building are slight. I told him that I would send over the vacuum truck to suck out more oil and water tomorrow. I told him to have someone at the CAC at 9AM so that MILRO can get in. He said he would do so. I asked him whether Ms. Martin was in. He said no. I called up Paul at MILRO and told him we would need his vac. truck at the CAC tomorrow. He said he would be there. 4/17/06 - Raphael Ketani. I spoke to Mr. Edwards. He said that the situation at the CAC is the same as last week with only slight odors in the occupied parts of the building and stronger odors in the basement. He said there was no flooding. I tried to contact Ms. Martin regarding MILRO's proposal,

CHILDRENS ART CARNIVAL (Continued) **S107521874**

but could only leave a voice mail message. 4/24/06 - Raphael Ketani. I spoke to Mr. Edwards. He said that there are no changes at the CAC. He said the odors are the same - even in the basement. He said that there was no flooding from the 3 of rain over the weekend. However, the oil staining is slightly more in the basement. 5/15/06 - Raphael Ketani. I received the bills from MILRO for the work done on 3/21/06 and 4/11/06. I signed them and forewarded them for processing. 5/17/06 - Raphael Ketani. I spoke to Mr. Edwards today. He said the odors in the building were still only slight. He said the rains over the past weekend and week haven't caused any recurrence of oil seepage. He said the basement was fine. This case is being transfered today from myself to Jeff Vought in order to consolidate all of the PINS cases under one Spills case manager. 06/06/06-Vought-Received call from Marlene Martin requesting information on possibility of state funding for tank replacement. Marlene also said that basement flooded during past weekends with heavy rains and no free product was noted. 06/06/06-Vought-Complete File Review by Vought: See also spill numbers: 0209311(60 Hamilton Terrace-closed 12/22/05), 0551505(72 Hamilton Terrace-open). Sale of 72 Hamilton Terrace by City of New York to Nazareth Spiritual Church and resulting Deed transfer-4/20/72. Site visit on 1/11/05 by DEC Vought-DEC required: 1)tank testing results 2)notification to NYCDOH 3)installation of ventilation system in basement 4)sealing of sump and washing of basement floor. Vought left message with NYCDOH Nieves, spoke to Mike Hughes(NYSDOH) and decision to close is the call of Marlene Martin. Oil was first noted on 1/3/06 and basement filled with water during times of heavy rains. Three sumps present in basement of Childrens Art Carnival(CAC). Sump closed to Hamilton Terrace contained fresh #2 fuel oil. As per Marlene Martin, she contacted 60 Hamilton Terrace to see if they had spill and no spill was found in the basement and she contacted the Church who noted an oil spill next door at 72 Hamilton Terrace. Email from NYSDOH Hughes to NYCDOH Peter Stallbohm with cc to NYCDOH Nieves- How did you inspectors make out at the 64 Hamilton Terrace spill? . Email from NYSDOH Hughes to NYCDOH Stallbohlm and DEC Vought-1/18/06. ...any updates about the Childrens Center in Manhattan? Have they re-opened, cleanup status? . Response from Stalbohlm At 64 Hamilton Terrace, readings of 4-5ppm of VOC was detected. A contractor was contracted to conduct a cleanup yesterday. The center voluntarily closed until so. After cleanup, another visit will be made to check effectiveness of cleanup (possibly today). Email from NYSDOH Hughes to DEC Vought-1/19/06. Peter Stallbohlm, NYCity Health, sent an inspector back to the Children's Center on Tuesday, 1/17. The inspector reported odors are still present... Fuel product still present in basement. The center is still closed and NYCity Health recommends staying closed until the additional clean-up is performed. Would you be able to also make a site visit and recommend some specific actions as well? . Letter from DEC Ketani to Kira-Leid King (Nazareth Deliverance Church NDC)-1/19/06. The New York State Department of Environmental Conservation (the Department) was notified on January 10, 2006 that a petroleum release took place at the above referenced site. Odors were noticed coming from the basement of the church during an inspection of the area on January 11, 2006. Staff from the Department were at the site on January 14, 2006 to observe the removal of No. 2 fuel oil by Northeast Environmental from Nazareth Deliverance Church . (6/6/06-Note that I, jeff Vought was onsite and liquid was recovered from basement when I arrived on-site, I did not observe oil in the basement as the liquid

CHILDRENS ART CARNIVAL (Continued) **S107521874**

was already recovered). The Department has identified the Nazareth Deliverance Church as a potential responsible party for this release . Letter required submission of an investigative summary report including the investigation of a possible third tank under the church courtyard. The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness . If no reply regarding the investigation is received from the Nazareth Deliverance Church within (5) days of receipt of this letter the Department may proceed with the required work... . Letter from DEC Ketani to CAC Martin-1/19/06. The Department has identified the Childrens Art Carnival as a potentially responsible party for this release . Notification that the Departrment has contracted Milro and will invesigate the source of oil. Upon one of the inspections of the Childrens Art Carnival, staff from the Department noticed a three foot long piece of suction line at the foot of the stairs of the basement. The Department requires that the Childrens Art Carnival immediately conduct a site investigation to determine why the line was replaced, whether there was a release of product and how large the release was, when the suction line was replaced and which company did the replacement work. The Childrens Art Carnival must also hire a contractor to have the suction line and return line (the two 3/4 inch copper lines) pressure tested . Letter from DEC Ketani to CAC Martin-1/23/06. ...the Department was notified on January 20, 2006 that a tank system test was conducted by AL Eastmond & Son, Inc. on this date and that a leak was detected in the tank and vent line. At this time, the Department is ordering the Childrens Art Carnival to repair or replace the tank and the vent pipe, and to hire a contractor to investigate the oil spill and remove all contaminated concrete flooring, soil and rock and all product and contaminated water . Letter from Marlene Martin (CAC) to DEC Ketani-1/27/06. To date we have cooperated with the Department of Environmental Conservation on all requests, recommendations and mandates. Enclosed, please find the job tickets for work performed by Eastmond and Sons, Inc. as per your Department's madates and directives. It is our hope that a resolve can be reached as soon as possible and or that the Carnival can be eliminated as the potential source of this release... Enclosed as Eastmonds & Sons job tickets: 1)1/11/06- Removed 50 bags of contamianted soil washed floor, 1 bucket of oil wash, removed 102 gallons of water, pressure washed floor 2)1/18/06- pump out oil and water from floor also wash down used 1x5 gallon can oil wash 3)1/20/06- Test tank, tank failed, wet leak 4)1/23/06- transfer oil to 275. Remove jacket and remove 30 bags of contaminated soil. Job completed 5)1/24/06- Install 275-gallon temporary . Contractor Work Authorization Form for Milro-2/2/06. Email from Landmarks Preservation Comission(LPC 212-669-7921)-John Weiss to DEC Ketani-02/10/06. Under the circumstances you described to me, no permit from the Landmarks Preservation Comission is needed for the NYSDEC contractor to break up the concrete paving in the courtyard next to 72 Hamilton Terrace in order to undertake and emergency remediation project . Because this work is being undertaken to remedy a dangerous condition, pursuant to section 25-312 of the NYC Administrative Code, no LPC permit is needed. No work is to be performed on 72 Hamilton Terrace . Fax from Kira-Leid King(NDC) to DEC Ketani-2/11/06. As discussed, attached please find a search from the fire department indicating that there are only two tanks located at the above-referenced premises. Therefore, there isn't another tank located in the court yard . The Church had a fire four years ago

CHILDRENS ART CARNIVAL (Continued) **S107521874**

causing the building to be inhabitable . Letter from DEC Ketani to Leid-King (NDC)-2/10/06. ...the Department has not been notified by Lindsay Lindos or other representatives from the Nazareth Deliverance Spiritual Church, that the church will hire a company to conduct a site investigation to determine whether a fuel oil tank is present under the church courtyard. Deadline of 2/18/06 given to investigate the court yard. Email from LPC Weiss to DEC Ketani-2/22/06. I am writing in response to our recent telephone conversation regarding the possibility that the historic wrought iron fence in front of the side yard at 72 Hamilton Terrace may have to be removed in an oil tank has to be removed. Suggestion to take the tank out in pieces to save the fence. If fence has to be removed it also has to be replaced. Letter from DEC Ketani to Lindos Lindsay(NDC) and Kira Leid-King(NDC)-3/10/06. Site visit made by Department on 2/10/06. ...a third fuel tank was observed to be present beneath the courtyard behind the Nazareth Deliverance Church. Department required NDC to perform a soil boring between the foundation wall of the Childrens Art Carnival at 62 Hamilton Terrace and the tank, and taking soil and groundwater samples. Another boring must be installed between the tank and the church. Deadline given for nine days within date of letter (2/19/06) to respond to DEC and resume investigation of tank and soil. STL Analyticals-2/10/06. Sample from CAC sump pit ran for fuel id analysis and showed 920000ppb #2 fuel oil. Fuel oil sampled by Milro. STL Analyticals-2/17/06. Sample from CAC outside by fill #5 @1'. Sample analysis performed for TPH310.3 shows oil parameters below method detection limits. STL Analyticals-2/17/05. Four sample from CAC front basement area near sump. . Sample analysis performed for TPH310.3. Soil analyticals show all below method detection limit except for 7400ppm #2 fuel oil(SB#2 @ 1'), 110ppm #2 fuel oil(SB#3 @1'). Letter from DEC Ketani to NDC Lindsay and NDC Leid-King-3/20/06. On March 20, 2006 the New York State Department of Environmental Conservation (the Department) made a site visit to the above listed property. No work appeared to have taken place to investigate the tank or the surrounding soil since the last site visit that took place on March 10, 2006 . Letter requiring investigation. Due date of 4/5/06 for the work to resume. Letter from DEC Ketani to Lisa Silversmith-03/20/06. We would like to install two(2) wells in the groundwater beneath the basement of your home. These wells will be constructed and sampled by out contractor. Contractor Work Authorization for STL-3/21/06. Fax from Milro to DEC Ketani-3/24/06. Milro proposes the following scope of work to address the oil spill cleanup: 1)Saw cutting of concrete slab in the basement and excavation of contaminated soil 2)disposal at a licensed disposal facility 3)recover of product using a vaccum truck if contaminated groundwater is encountered 4)collection of endpoint samples from excavation 5)restoration of the concrete slab 6)pressure washing of basement and epoxy application. Letter from DEC Ketani to CAC Martin-3/28/06. ...(the Department) is presently looking into other methods of controlling and preventing the petroleum vapors from entering Childrens Art Carnival . Milo remediation plan has been enclosed for Martin's review. Cost Estimate (Milro-Moriano)-4/4/02. Cost estimate for basement excavation and replacement. Site visit by DEC Vought during endpoint sampling of tank in couryard-5/11/06. Sampling performed by USA Environmental (Cristin Ciaburri 718-981-5710). Onsite was Keith Bartley(USA). Pumped out wate from 550-gallon UST in courtyard. No product in UST, just sheen and water. Three soil samples were collected (one through bottom of tank, one

CHILDRENS ART CARNIVAL (Continued) **S107521874**

below fill line and one below supply/return line). No odors or staining observed in all of the soil samples. Site visit performed to CAC and no odors in basement and no free product in sump. Some oil staining showing up on floor from underlying groundwater. One sample also collected for analyiss from NDC basement floor. Vought spoke to USA Ciaburri and DEC will receive report by 6/12/06. DEC tentative requirements: 60 HAMILTON TERRACE: 1)followup to see if any recent spills 72 HAMILTON TERRACE 1)results of basement borings by 275-gallon ASTs 2)submittal of documentation of 1/14/06 clean up by Northeast 3)notification to Bishop France of requirements 4)backfilling of UST excavation in courtyard 5) The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness as per 1/19/06 letter 6)backfilling of NDC excavation to prevent continued groundwater infiltration into CAC 62 HAMILTON TERRACE: 1)continued monitoring of sump 2)call back to Martin regarding possibility of use of Spill funds for AST replacement and likelihood of NYSOAG cost recovery against Art Carnival 2)submission of tank test results from Eastmond and Sons of AST in CAC as per requirement on 1/19/06 letter 4)borings at tank location for 8260/8270 5)Milro boring logs and site plan from 2/17/06 analyticals 6)implemenation of Randy's workplan(installation of monitoring wells at CAC and basement excavation) from Milro 7)sealing of basement floor 8)borings by UST, sump and and fill port 9)Summary of description of cleanup activities by AL Eastmond including source of 30 bags of soil removed during tank removal and description of removed tank. 06/15/06-Vought-Spoke with Marlene Martin who inquired about status of spill. Martin stated that there were no odors in the school to date. Vought drafted letter with above requirements to both parties and cc'd Northeast, Marlene Martin (Art Carnival), Cristine Brooks Lee(Comm Bd 9), Martin Smith(Councilman Robert Jackson), LPC and USA, Eastmond. DEC Vought to call Milro regarding: 1)boring logs and site plan for borings on 2/17/06 and installation of new borings in floor or school. DEC Vought to call Martin regaring: 1)non use of Spill Funds for AST replacement as per NYSOAG Buss 2)further soil and groundwater investigation by the DEC. 06/19/06-Vought-Called Martin(212-234-4093), faxed her copy of requirement letter and letter to NDC and left message informing her her that there was no way for Spill Fund to pay for CAC tank replacement and to dicuss letter sent on 6/15/06. Vought called Lindos Lindsay (347-228-8039) for fax number and to inform him of outstanding requirements. Vought faxed him copy of requirement letter to 72 and 62 Hamilton Terrace. Lindsay requested that letter be transmitted via mail only and be sent to: Lindos Lindsay 163 Myrtle Avenue Brooklyn, NY 11201 Vought sent letter to above address. Vought called Christine Lee (Comm. Bd. 9 212-883-7600) and she requested correspondence via mail only. Vought sent info to: Christina Lee 48 Hamilton Terrace New York, NY 10031. Vought called and spoke to Martin Smith (ph 212-234-0551 fax 212-234-0552) for fax number and to explain requirements. Vought faxed Smith copy of requirement letters for 60, 62 and 72 Hamilton Terrace. Vought called John Weiss (Landmarks Preservation 212-669-7921) for fax number and to explain requirements. Vought left message to return call. Vought called and left message with Christin Ciaburri (USA 718-951-5710) for fax number and to explain requirements. Vought called Renee Lewis (AL Eastmond 718-378-3000 fax 718-378-4560) and he was not in office. Vought faxed him copy of letters to 62 and 72 Hamilton Terrace. Vought called Bob Rafferty(NYSDOH 518-402-7800 fax 518-402-7819) for fax number and to

CHILDRENS ART CARNIVAL (Continued) **S107521874**

explain requirements. Vought faxed Rafferty copy of requirements. Vought faxed NYCDOH Nieves copy of requirements for 60, 62 and 72 Hamilton Terrace. Vought called Dwayne Monaco(Northeast 914-777-1930 fax 914-777-1928) for fax number and to explain requirements. Vought faxed Monaco copy of requirements. Vought received call from Monaco and returned call and spoke to Monaco and no analyticals were performed and Monaco will send in pictures. Monaco did say his men saw oil on the floor. Monaco will submit report and pictures to DEC. 06/27/06-Vought-Received call from Marvin Edwards (212-234-4093) requesting letter with amount spent to date on PIN (8713.53 as per UIS). Vought returned call and left messge explaining that DEC will not provide the letter as amount may increase and Vought willing to call insurance directly. 06/28/06-Vought-Received call from Marvin Edwards and they filed claim with general liability insurance. Their claim representative asked for further costs. Claim may file under third party liability portion of coverage. Marvin will contact insurance and arrange conference call with DEC. 07/12/06-Vought-Received message from Martin and returned call and spoke to Martin. Martin will be faxing in tightness test results and approved installation of additional borings. Martin will seal the basement floor upon no occurrence of product in the sump during monitoring period. 4/23/07-Vought-Reviewed above notes and both CAC and 72 Hamilton Ave are potential sources, CAC due to failed tank test and 72 Hamilton due to presence of oil spill during cleanup by Northeast Environmental. Both parties listed as potentially responsible and site visit scheduled with Martin for this week to confirm no further impact and close spill. Vought called Martin. Martin had not seen oil in recent months and site visit scheduled tomorrow at 10am. Vought also reviewed documentation and photos submitted by Northast dated 6/27/06. On January 14th, 2006 Northeast mobilized a crew and equipment to 72 Hamilton Terrace were technicians conducted a clean up of #2 fuel oil from the tank and boiler room of the building . Absorbent material was applied to the boiler room floor where puddles of standing fuel oil was observed... . No tank test results for 72 Hamilton included. Vought also received copy of failing test results for CAC which show Ullage (dry portion leak) from Eastmond and Sons dated 1/20/06. 4/24/07-Vought-Site visit by Vought and Marlene Martin not present at site due to emergency. Vought performed site visit with super and no product or olfactory odor of groundwater noted in sump, no staining noted in concrete at former tank location or fill location, product stains noted on floor towards 72 Hamilton but as per super they were present for long time. No product in other sumps of CAC. Vought discussed with DEC Austin including possible groundwater sample at 72 Hamilton Avenue and investigation whether a former spill occurred at Daycare center by mechanics. 72 Hamilton Avenue boarded with no signs of development. Tank in courtyard excavation was backfilled. 07/25/08-Vought-Spill reassigned from DEC Vought to DEC Ketani as per DEC Austin. 8/21/08 - Raphael Ketani. I called up Paul Basso of MILRO Associates (516) 379-1500. I asked him to send DEC a copy of the report from about 1/27/06 whereby the return line for the fuel system at the CAC was tested and it failed. He said he will look for it. I called up the CAC and asked for Ms. Martin (212) 234-4093, but the receptionist told me that she wont be back until September. I asked for Marvin Edwards, but she told me that he didn't work here anymore. I was transfered to Fatima Faloye, the Operations Manager. I asked Ms. Faloye whether I could make an inspection at 11:30AM tomorrow. She

CHILDRENS ART CARNIVAL (Continued) **S107521874**

said that would be alright. 8/22/08 - Raphael Ketani. I made the scheduled site visit. The church next door was completely boarded up. It appeared that no work had taken place, since early 2006 when I first visited the site, to restore the church. There were no petroleum odors coming from the basement vent. I put the PID meter as close as I could to a basement vent near the side entrance gate, but didn't detect anything. The area where the 550 gallon tank was buried had been filled in and was overgrown with weeds. I met Ms. Faloye and she took me to the basement. There were no signs of free product on the floor. There were no oil stains. There were no oil odors. The PID meter registered 0 ppb of vapors. The front sump had only water. I thanked Ms. Faloye for the opportunity to visit the site and left. 8/25/08 - Raphael Ketani. The Final ISR was written for the case and submitted to Randall Austin, Chief of the Spill Prevention and Response Unit, for his signature. I talked to Dwayne Monaco of Northeast Environmental (914) 777-1930 regarding the submission of an investigation report for the church. He said that they did only a cleanup of the basement and some oil collection. He said that no report was generated. 9/2/08 - Raphael Ketani. Today I received a FAX from Paul Basso of MILRO. The attached page was a simple form stating that the return line did not hold, but that the supply line was O.K. The date of the test was 1/27/06. Additionally, the last time that oil was collected from the CAC was on 4/11/06. This also appears to be the last time any cleanup took place. 9/4/08 - Raphael Ketani. The FSIR was signed by Randall Austin, Chief of the Spills Unit, and Lou Oliva, Chief Counsel Region 2, and sent to Dennis Farrar in DER, Albany. As there was no oil contamination, nor oil vapors at the site during my visit on 8/22/08, and as the DEC does not intend to do further investigatory work, nor sees the need for further remediation work at the site, I am closing the spill case. "

Remarks: "Material is coming into the basement of the Childrens Art Carnival and is originating from the church next door. The Art Carnival's oil company came and used a powder to control the odor but no clean up has been done. They need DEC's help. Groundwater was affected.... material is mixed with the water from the natural spring there. Unsure of what else they can do for a clean up."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 12/11/2002-Vought-Called Ugene Martin and left message to call Demeo or Vought. Also called Dr. Eli N. Avila (917-848-4889) who is owner of property along with Banco Popular and according to Mr. Avila on 4/9/99 there was a large oil spill in basement by Robani Oil and Crystal Oil (subcontractor). According to Dr. Avila: Robani Oil's president (Mr. Robert Pearson-owner) came to site and told Avila that delivery could not be performed due to crack in whistle and that he would have to fix whistle. Mr. Avila told Mr. Pearson to fix whistle. Pearson came to site and replaced fill pipe instead of whistle. As a result basement was filled during delivery event. Robani was called and performed site visit. Free product was removed and sorbent was placed down. Odors still persist till this day. Mr. Avila called hotline in 4/99 and spoke to a Mr. Greene who referred him to DEP. DEP performed site vist and fined Mr. Robani for discharge to sewer. Mr. Avila is currently going to court for damages. Dr. Martin came and performed soil borings and sent soil samples for analysis. 12/17/2002-Vought-Site visit by Vought. Visual inspection of basement shows oil stains 2 above grade on drywall. Weathered fuel oil odors present in basement. One 1'x 1' excavation with water at depth of 6 . No odor or sheen to water. On-site were Dr. Avila and Eugene Martin (consultant). According to Dr. Avila: 1) his lawyer will send him a copy of affadavit regarding admission of liability against Crystal and Robani oil companies 2) Robani/Crystal performed four soil borings in 4/02 3) Eugene Martin (consultant hired by Dr. Avila) performed four soil borings in 5/02. 4) no one is currently living in residence due to odors. NYSDEC requested of Dr. Avila: 1) Boring site plan and analyticals 2) affadavit from judge and all other documents regarding court decisions 3) copy of delivery receipt. NYSDEC inspected neighboring properties at 58 Hamilton Terrace (Troy White 212-694-0445) and Childrens Art Carnival at 62 Hamilton Terrace (Marline Martin 212-234-4093) and found no detectable odors or petroleum impacts. 12/20/02-Vought-Received boring site plan from Martin Geochemistry. 12/23/2002-Vought-Received affadavit, delivery receipt and analyticals from Dr. Avila. 1/8/2003-Vought-Review of documents provided by Dr. Avila. Vought spoke with Randall Austin who directed Vought to 1) investigate the call made to Mr. Greene at spills hotline on 4/9/99 and 2) foward file to David Rubinton (NYSDEC legal for review). Vought called Avila and left him message of directive. 1/8/2003-Vought-Vought instructed by Rubinton to contact RP to give them opportunity to clean spill. Vought called Robani Oil

MR. AVILA (Continued) **S106009941**

212-687-8699 and left message for Mr. Pearson to call NYSDEC. Vought called Crystal Transportation 718-828-3100 and spoke with Mr. Frank Rizzo who said that message would be passed on to company owners. Mr. Rizzo could not say whether NYSDEC would receive a call back from Crystal and that further inquiries should be fowarded to Robani. 1/8/2003-Vought-Spoke with Robert Pearson who will turn call over to Chris Foley (attorney). Mr. Pearson stated that Robani will not institute remedial acivities due to possiblity of previous spills at Site. Vought also spoke with Rubinton who said to fill out case initiation form and send it to Region 2 legal. 1/9/2003-Vought-Gave case intiation form to David Rubinton (Region 2-legal). Vought spoke with supervisor Rommel who instructed to send do work letters to both oil companies and respective lawyers. Vought called Dr. Avila and informed him of case intiation and sending of do work order to Crystal, Robani and respective lawyers. Do work letters sent by Vought on 1/9/2003. 1/10/2003-Vought-Received letter fom Foley stating they were interested in discussing and potentially resolving issues of 1/9/2003 do work letter. 1/13/2003-Vought-Received fax from Chirstopher Foley (representing Robani Energy) who stated that after he spoke with representation of Crystal Transportation a contractor would be called to perform remediation. Vought recevied call from Brian Campbell (Vertex Engineering 781-952-6047) stating that he was called by Foley and was requesting list of contractors. Campbell will supervise contractors. Vought faxed list on 1/13/2003 and also suggested to Campbell that he contact Eugene Martin. Campbell will call back NYSDEC with contractor decision. Vought also gave Campbell names and contacts at NY State Dept of Health to certify reoccupation. 1/13/2003-Vought-Received message from Matt Spears (Kressner 718-584-8484) representing Dr. Avila requesting FOIL information. Vought called and left Spears message. Vought also received message from Eric Slessinger (Caroll & Mcnulty-212-868-9090x405) reresenting Crystal Transportation. Vought called Slessinger and left message to call NYSDEC. 1/14/2003-Vought-Received message from Spears requesting foil information. Vought called Spears and suggested postponing FOIL request until decision arrives from Foley and Robani Energy. Vought told Spears to call 1/21 for updates (after due date on Do Work letter) sent 1/9/2003. 1/15/2003-Vought-Received message from Eric Slessinger. Vought called Slessinger who received letter and said that he will call Rubinton to discuss legal issues. Slessinger stated that it would be difficult to obtain contactor by due date on Due Work letter because they were looking to seek action against other oil companies which delivered to Site before spill event. Vought will contact Rubinton before PIN job is opened. 1/17/2003-Vought-Received message from Foley. Vought called Foley and left message. Foley returned call who was in court on 1/16. According to Judge Marcy Friedman Robani/Crystal will have time before trial to clean spill. Trial is scheduled for 3/24/2003. Foley has called Miller and Milro and scheduled a possible site visit for Wed 2/22/2003. Vought called Avila and notified him of possible site visit date. Vought will call Kressner to facilitate site visit. 1/21/2003-Vought-Spoke to Foley and contractors will be Milro and Brookside. Will attempt to arrange site for tommorrow (212-363-1300) despite lack of response from Kressner or Avila. Vought called Kressner to facilitate visit and left message to return call to NYSDEC. Vought spoke with Kressner and site visit is arranged for tomorrow. Kressner left message for Foley approving of site visit. 2/4/2003-Vought- Spoke with Dr. Martin

MR. AVILA (Continued) **S106009941**

performed test bore under 58 Hamilton on 1/29/03 and found PID reading of 5ppm. Sample will be sent for analysis and will fax me analyticals. Vought called Foley (212-363-1300) for update on contractors and left message to call Vought back. Vought called Kressner and he is skeptical of results and does not believe in state supervision. Vought called Dr. Avila. According to Dr. Avila three consulting companies performed a site visit and no proposals were submitted. Vought will attempt to arrange meeting between Kressner, Foley, RObani, Avila, DOH, Landmarks, Martin to prevent PIN project from being opened. Vought arranged meeting for 2/27/2003. 2/5/2003-Vought-Received letter from Foley asking if DEC was instructing them to refrain from proceeding with remediation until 2/27/2003 meeting. 2/7/2003-Vought-Letter sent by NYSDEC (Rubinton) to Kressner stating that failure of Avila to take actions to address petroleum discharges would subject Avila to liabilities as a responsible party. 2/11/2003-Vought-NYSDEC sent letter to Foley that pre-hearing conference for 2/19 is adjourned due to scheduled 2/27 meeting. 2/20/2003-Vought-Work proposals submitted by Brookside Environmental (environmental consultant) and H2M (structural engineer). 2/26/2003-Vought-Send work proposal review letter to Brookside and all involved parties requiring STARS 8260/8270 analyes, collection of endpoint samples, description of sampling methods, scaled Site plan and concrete encapsulation. 2/27/2003-Vought-Meeting at NYSDEC with Kressner,Foley , Stapleton, Landmarks, NYC Dept. of Heath, Martin, Robani. Meeting. All parties agreed that a structual engineer report will be produced by Vertex engineering (Scott Hamarich 631-758-1580). Vertex will be supervising Brookside. Engineer report will be sent to Landmarks and then to Dept. of Buildings for approval who will review report by 3/21. Copies of report will also be sent to DEC and Kressner. Brookside will also produce addendum to scope of work incorporating NYSDEC 2/26 proposal review letter comments. 3/7/2003-Vought-Received proposal from H2M (Michael McKeown-631-756-8000) who is structural engineer hired by Robani. Proposal approves basement excavation and aslo said that boring was performed by H2M and bedrock is at 2.5'. Vought sent letter to Dr. Martin requesting all previous boring logs, sample analyticals and sample depths. 3/18/2003-Vought-Spoke with Brian Stapleton submitted report to Kressner on 3/10. Stapleton has not yet received response from Kressner. Vought told Stapleton that Landmarks and DOB approval of structural report and final draft workplan to NYSDEC were needed as stated in meeting. 4/30/2003-Vought-Spoke with Dr. Avila who inquired about next step for remedial action despite private lawsuit between Avila and Oil companies. Vought told Avila to call Rubinton because Rubinton told Vought not to take any action until Rubinton gave approval. 12/10/03 - AUSTIN - PROJECT TRANSFERRED FROM VOUGHT TO SAWYER - END 12/2/04 - Sawyer - Received work proposal on 10/21 from Vinny at Island Environmental Tank. 1/6/05 - Sawyer - Talked to Melanie at Island Environmental Tank and answered her questions about offsite contamination. The subsurface investigation and delineation will encompass all areas associated with the spill. 5/31/05 - reassigned to Vought by Koon Tang since DEE needs technical support for enforcement action, and Chris Sawyer has just left the Department. - KST 9/12/05 - Obligado - Site transferred from Vought to Obligado. 12/22/05 - Obligado - Meeting with Jeff Vought and John Urda. Recommends closure based on no odors detected in last site wisit. NFA with Koon’s approval. "

Remarks: "CALLER STATES THAT THE TANK WAS OVERFILLED CALLER ALSO STATES THAT

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 07/21/2005: Owner of property: Alice M. Dear 400 West 149th Street New York, NY 10031 212-283-5231 Spoke with Ms. Dear. Tank was closed in 2005. She will send documentation. - M. Brand NYSDEC DER Albany. 08/01/2005: Received fax from owner with certification and documentation of tank closure and abandonment. Documentation includes: Invoice/job ticket dated 07/12/2004 from Tanksalot (A.B.C. Tank Repair, Brooklyn) for the pump-out of 1,080-gallon tank. Notarized certification letter dated 05/27/2005 to NYC Fire Department from Henry Traktman of Metropolitan Heat & Power Co. (Oil Burning Equipment Installer License #2689A and Install/Test/Repair Buried Tanks License # 61830378)regarding the cleanup and abandonment of tank on April 1, 2005. Tank contents were pumped out and tank/lines purged. Tank was filled with sand and all connecting and fill lines plugged and/or disconnected. Letter certified that tank was legally abandoned in compliance with Administrative Code of NYC and section 21-02 of the NYC FD rules. Spill closed 08/09/2005 based on documentation. M. Brand NYSDEC DER Albany."

DEC Memo:	"4/20/17-Zhune spoke to Victoria from Protest Environmental. Victoria said the tank was tested and it failed with a dry leak. They sent the proposal to isolate the tank and retest it. 4/25/17-Zhune spoke to Victoria. Victoria said they are going to do excavation, isolation and retest this week. 4/25/17-TTF letter sent to; Robmill Realty Dr. Robert Grace 416 west 151 Street Apt 1A New York, NY 10031 9/12/17 TJD File review. Closure report submitted to PBS Unit (Falvey) and forwarded to Spill PM (DeMeo). As per report submitted by ProTest: On April 19, 20 17 Pro Test Environmental performed a tightness test on the above subject tank system and it failed with a combination wet/dry leak. On April 27th, Pro Test returned to isolate the tank from its associated lines. Technicians dug to uncover connections at the top of the tank. The connection to the remote fill line at the top of the tank was plugged. After isolating the suction and return lines, the partially isolated tank failed with a dry leak only. Breaking the concrete mat over the tank revealed the true dimensions of the tank. It was initially reported that this was a standard 3,000 gallon cylindrical underground storage tank. This tank is actually a square tank measuring 100 inches by 154 inches with a depth of 60 inches. Based on these direct measurements, the tank has a capacity of 4,000 gallons. Uncovering the whole top of the tank revealed that the petrometer gauge was disconnected from the tank. The tank was fully isolated including remote fill , vent line, stick line, supply and return lines. The manhole cover was regasketed and rebolted. The tank only passed a tightness test on May 3rd. Technicians returned on May 17th to begin repairing the piping. Due to landmark building permitting restrictions, the bad remote fill line under the city sidewalk was not able to be removed at this time. There was evidence of staining where the line crossed under the sidewalk but the extent

MIXED USE (Continued) **S120702922**

of any contamination could not be assessed without removing a section of the sidewalk. A new remote fill line was installed to the fence line. Technicians installed a new vent line with vent alarm and vent cap. A new stick line with fill box was installed. New supply and return lines were installed. Work to replace the piping was completed on May 25th. A final system test was performed on June 5th and passed. Based upon the information provided by the contractor and the passing system test results following repairs, no further action is required at this time. All documentation has been uploaded to DECDOCS. Spill closed. "

DEC Memo:	"7/15/2008 TTF letter sent to: Robert Grace Robmill Realty Inc. 347 Convent Ave #A, NY, NY 10031 see eDocs 12/08/08 Atec Environmental sent a letter saying the following: Atec Environmental is a staten based Environmental Company dealing with all aspects of fuel oil storage tank maintenance. Dr. Robert Grace is the owner for the above referenced property. On june 26, 2008. Pro Test arrived at the above mentioned location and performed a System Test. of which failed. Dr. Grace called Atec Environmental for a second opinion. Upon commencement of starting the test it was observed by the tank tester that the fill line looked a little corroded. The fill line which run aboveground but covered by small driveway stones was corroded, and Atec as well as the tester felt this was very strongly the reasons to why the tank had failed the initial test. Atec Environmental promptly replaced the existing fill line from the tank to the sidewall. During our removal of the driveway stone we did not uncovered any liquid oil, nor did we find any evidence that at anytime the oil impacted the ground. Due to this fact no soil samples were taken. Attached you will find copy of the passing tank test report as well as a verity of photo's of the work performed. Case Closed. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 153424: R. Mahoney # 97417 Field operator called to report that he found a spill of transformer oil. He states that in Vault 6090 He found 1 pt. of oil that is leaking from a bushing. The oil landed on the floor & is mixed with 8 of dirt & leaves. There is a sewer connection as per plate 59-G. The I&A will be sent down to the location to check the trap. Samples will also need to be taken. Update: 05-17-04 @ 19:00hrs Leardi #13625 inspected the unit and found less than 1 gallon of oil. Transformer is leaking out two spots. Sewer & waterways were not affected. Supv. took to samples, 1-oil id and 1-pcb. Lab Sequence Number: 04-03799-001: TOTAL PCB 12 ppm 07/09/04 17:04 E.Hulser#39723, cable supervisor, notified the control center on 07/09/04 at 16:05 hrs. that the cleanup was complete in V6090 on 07/09/04 at 5:45hrs. This was a final cleanup. V6090 was double washed with slix and a yellow environmental tag was removed. The source of the spill was a leaking transformer, which has been removed and replaced. The cleanup was completed on 07/09/04 at 11:00 hrs."
Remarks:	"about 1 pint of dielecric oil was spilled from the bushing on a faulty transformer. clean up is pending removal of the transformer"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Evaluation date: 1987-07-24 00:00:00.0
Evaluation: NON-FINANCIAL RECORD REVIEW
Area of violation: Generators - Manifest
Date achieved compliance: 1987-07-26 00:00:00.0
Evaluation lead agency: State

FINDS:

Registry ID: 110004402254

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"11/16/2016: Rashad Called Isabel and left message. 11/17/16 - Obligado - This spill has been assigned to me as per Vought as it is a NYCT subway facility. According to Francine, NYCT observed an intrusion at 148th Street Station/Lennox Yard in Manhattan. With the water there is a sheen, and it is suspected the school, which has a boiler room on the other side of this wall has had a release. OSS has been told, no one from the school has been able to be contacted. The intrusion is intermittent, but was first identified sometime on Tuesday 11/15/2016. We are seeking the assistance of NYSDEC, please advise if an investigation will be conducted to see if the school is the RP of this most recent Intrusion. I believe Omar also called Isabel to follow up, and may be assigned to the case. I called Francine Maebauer. The product is seeping into the under ground

FREDERICK DOUGLASS ACADEMY (Continued) **S119028056**

station. The seep is in a non public area. The hydraulics division believes that there is a tank adjacent to the station in the Frederick Douglas Academy. They will arrange for access for me to observe the seep. I called DOE Fuel Division and spoke to Munendra at 718-349-5752 regarding PBS #2-354007 Public School 10 at 2581 Adam Clayton Powell Jr Blvd, which is the adjacent school. He said they have 2 15,000 double wall ASTs. I will meet Tilac Ramautar 347 764 3949 at the site. 11/18/16 - Obligado - I met Tilac at the site and we inspected the basement. There was approximately 2 inches of water in the basement and floating oil on the water leaking from an oil transfer pump. We walked outside to the NYCT subway yard and there was oil on top of water in a small alcove area adjacen to the building. Tilac hired Riteway who arrived and began pumping oil and water from the basement. They then proceeded to remove oil stained debris and pump out oil and water from the NYCT yard alcove area. When I left the site at 1600 hrs Riteway was still working in the yard area. 11/19/16- Obligado - I inspected the site first thing in the AM and observed that the NYCT yard alcove area still had water with floating oil on top, about a 20 square foot area, slightly smaller then the day before. After returning to the office I called Riteway and Anthony Lara said his guys finished pumping oil from the alcove area yesterday and today they were working in the tank room to pump oil and water from the tank room. He said that the oil I saw in the alcove had come back in over night after he pumped the area dry. He said the remediation work in the NYCT will be more complicated as the oil appears to be coming from the subsurface. He said there is about 3 ft of soil in that area that is likely contaminated and he does not have authorization from NYCT to do excavation in that area. I called BOE Munandra and reiterated to him the situation in the NYCT yard and he agreed that additional work will need to be done but they will do what they have to do. He said they will do a full system test on the system to make sure there are no continuing leaks. 11/21/16 - Obligado - I spoke to Francine and told her the status of the clean up and that the remediation was more complicated due to subsurface impacts in the yard. We agreed to potentially have a site meeting to discuss further. I called Rob Hill of Riteway. They are cleaning tank 1 today and they will test the system after. Tomorrow they will empty and clean and test Tank 2. 11/23/16 - Obligado - Representatives from NYCT (Francine Ocampo and others), DOE, and DEC (Obligado) and Riteway (Anthony Lara) met at the site to discuss the spill and remedial options. The subway yard alcove was still impacted by petroleum. Floating oil was still present on top of standing water. The following is a summary: DOE will submit a Remedial Work Plan for to remediate the alcove. NYCT will provide subway yard as builts of the Area of Concern to DEC, to provide to DOE. The Area of Concern is the alcove north of the walkway. We discussed remediation via a guzzler to remove contaminated soils, water, and product. The RAWP will need to be approved by NYCTransit. The RAWP will need to be P.E. Stamped. 11/30/16 - Obligado - I sent an email summary to all parties with the following points: -According to the DOE, the tank system at the School passed a complete system test. -At the time of the meeting, the sump pump in the school basement was still inoperable. DOE needs to replace the pump which may address high water table conditions. -The DEC requires additional clean-up work in school tank vault which still had residual oil and contaminated material on the vault floor. -The Area of Concern (AOC) for remediation in the subway yard is limited to the square alcove area west (school side) of the

FREDERICK DOUGLASS ACADEMY (Continued) **S119028056**

elevated walkway. There may be has much as 3 feet of residual fuel oil contaminated soil on top of bedrock in the alcove from historic oil spill(s) from the school basement. The high water table appears to have brought residual oil to the surface. -The current conceptual remedial plan is to use a guzzler to remove oil and contaminated soil from the alcove. If feasible, the guzzler hose will snake through the gap between the school and subway station walls. Riteway may need to find an alternate type of hose which will fit through that gap. -NYCT will provide the DEC with as-built drawings of the AOC. DEC will provide drawings to DOE to develop a Remedial Action Work Plan (RAWP) -DOE will submit a RAWP for the remediation of the subway yard to the DEC. After DEC review, DEC will provide the RAWP to NYCT for approval. -NYCT requires the RAWP to be signed by a P.E. 1/6/17 - Obligado - I sent Francine an email inquiring if they had located design drawings of the area in question yet. 1/10/17 - Obligado - I emailed Munendra to inquire about the status of the clean up in the School. According to Mununendra the status is as follows: Thus far both oil pumps and sump pumps were replaced. All debris and contaminated materials were removed and properly disposed. The entire tank room including the tanks were power washed clean. Both tanks are getting painted. When this is done we will we will epoxy paint the tank room floor. 1/12/17 - Obligado - I spoke with Francine Ocampo at NYCT system safety. They have no additional design drawings of the area in question. She said based on her discussion with NYCT MOW generally speaking the conceptual guzzler plan for soil removal was ok. I sent an email to Munendra informing him there are no additional design drawings and that he should submit a Work Plan to the DEC which will be forwarded to NYCT for review. 2/2/17 - Obligado - I inspected the boiler pump room and tank room with Anthony of Riteway and Tilak from DOE. The clean up in the building is complete. The entire tank vault has been cleaned and apoxy painted. He still plans to paint the boiler pump room. The sump pump has been repaired and was operational. In the NYCT yard, the ponded water and floating product has subsided below the surface. A small 1 x 1 pit was evident in the alcove, it is unknown who dug the pit. Free product was observed in the pit at about 1 ft depth, which is the presumed new depth to water when the sump pump is operational. It appears that the water level in the alcove yard and the sump room are hydraulicly connected. Riteway will develop a remedial plan. 4/25/17 - Obligado - I sent a letter to the NYC Dept of Education Mr. Sharma notifying him that the RAWP is overdue. I required submission of the overdue RAWP within 30 days or this case will be referred to the office of General Counsel. 5/2/17 - Obligado - I received the work plan submitted by Riteway. I disapproved the work plan based on the below comments and required resubmission within 30 days. 1) results of Engineering Assessment included in the plan 2) Utility Markout prior to excavation 3) 8260//8270 analysis 4) Scaled site plan showing excavation area 5) submission of Remedial Action Completion Report after remediation 6) Remove cost and contract language from submission 7) Implementation Schedule 5/22/17 - Obligado - I received the revised Work Plan. 6/7/17 - Obligado - I completed review of the Work PLan. Items 2 and 4 were not addressed in this second submittal. Due to failure to submit an acceptable and approvable workplan I sent Munendra Sharma of DOE a Stipulation AGreement to clean up the spill in accordance with a corrective action plan. 6/13/17 - Obligado - I spoke to Munendra over the phone. He said that Riteway did not have the resources to provide the RAWP the DEC required. He will have the

FREDERICK DOUGLASS ACADEMY (Continued) **S119028056**

School Construction Authority take over the clean-up as they have an engineering firm who is capable of preparing an appropriate work plan. I told him that I agreed with the proposed course of action. 7/14/17 - Obligado - I received a phone call from Melisa Demmet at SCA. SCA is taking over the clean up. A tentative site meeting is scheduled for 7/14/17 with AKRF and SCA. 7/19/17 - Obligado - I met SCA, AKRF, and NYCT personnel at the site. We inspected the school pump room and tank vault. We observed oil seeping up through the tank vault floor with the groundwater. Photos in edocs. There was a slight sheen on the water in the sump. We discussed the remediation plan. In light of the product seepage into the tank vault room, AKRF is considering doing some remedial investigation to determine the extent of the product plume beneath the building. Preliminary discussions for some hand borings in the basement and in the alcove. They will submit a Remedial Investigiation Plan to the DEC for review. 8/9/17 - Obligado - I reviewed and approved an investigation workplan to do 5 soil borings in the school basement. The borings will be 3 ft deep or to bedrock, which ever is shallower. The purpose of the boring is to observe for the presence of LNAPL beneath the school basement floor. Prior to advancing soil borings they will perform a geophysical markout both in the school basement and in the alcove area in the NYCT transit property. I forwarded the workplan to Michael Mandac of NYCT for access approval. 11/1/17 - Obligado - I reviewed the Spill Delineation Report. 5 soil borings were advanced in the basement. The borings were advanced 3 ft until bedrock refusal. No Groundwater or LNAPL was detected in the borings. Elevated PID readings were detected between 47.8 ppm and 403 ppm in SB5. No LNAPL was detected in the soil borings. The report recommends excavation in accessible area, and to the amount practically feasible, collection of post excavation soil endpoint samples, and backfilling with clean backfill. I sent an email to Melissa Demerrit concurring with the recommendations and requesting submission of a Remedial Action Work Plan. 11/6/17 - Obligado - RAWP received. 11/9/17 - Obligado - I reviewed the RAWP. The plan proposes to excavate the contaminated soil in the alcove area to extent feasible and collection of endpoint samples. I provided comments on the RAWP. 11/15/17 - Obligado - I reviewed a response from Melissa Demmett on my comments. She adequately addressed my comments. I sent an approval letter to NYCSA with 2 modifications, 1) remediation work during off-school days, 2) stockpiled soil will be covered with plastic sheeting. RAWP implementation upon approval from NYCT Office of System Safety. 3/27/18 - Obligado - I received an email from Melisa Demmet at the NYCSCA. We would like to touch base with regard to the on-going coordination and delays of the project. In a February field meeting was set-up to discuss the scope of work between IEH, AKRF and Lyudmila Bord and Miron Kuchuk from the Capital Program Management (CPM) group of NYCTA. At that time SCA was still awaiting feedback regarding RAWP approval and/or comments. Last week AKRF received a call from Norman Lindo of the NYCTA, and he has requested the submission of a full-sized stamped drawing set with cross-section views showing the existing Transit structures and the extent of our excavation. He is particularly concerned about our proposed excavation shifting the footings for the control house. Since we currently do not have access to this information, AKRF will need to try to obtain this information from the NYCTA microfilm records. In addition to the stamped drawing set, Track Safety Training is required and will be arranged by NYCTA. 4/12/18 - Obligado - I

FREDERICK DOUGLASS ACADEMY (Continued) **S119028056**

received and approved a revised RAWP Figure 2. The figure adds a 3 foot buffer around NYCT transit structures due to concerns of undermining the footings for the control house. 9/26/18 - Obligado - Remediation Work was Completed the 1ast week of August.. Report to be submitted by the end of next week. 10/9/18 - Obligado - I reviewed a Remediation Completion Report. 25 yards of contaminated soil was removed from the alcove down to the bedrock at 3 ft below grade. Additionally the oily water mixture was vacuumed out of the vaults. Manifests were included. A three foot buffer around NYCT structures and building footings prevented removal of all contamination. Several endpoint samples were above soil clean up levels for petroleum. While residual petroleum impacts remain, the spill has been remediated to the extent feasible based on constraints in the NYCT yard. Additionally, significant tank system repairs and oil clean up activities was undertaken in public school 10. This spill no longer appears to be a threat to human health or the environment. Spill closed. "

Remarks: "School next to building is leaking clean up is pending School has not been notified at this time"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND Sangesland spoke with the homeowner - She says they have had a strong smell of oil in the house for several weeks. Today was a regular delivery, so she called the driver into the house to check. He said there was a leak near the boiler from an old oil filter canister. The filter was replaced last month by Petro and when the canister was put back, it apparently was cracked. Petro sent a service person to change the canister and he left speedie dry on the floor for a couple of days to soak up as much oil as possible (only 2 gallons?) Sangesland told the homeowner to leave the speedie dry for several days to absorb as much oil as possible. Then the material can be swept up, bagged in plastic and put out with her trash. Wash the floor with Dawn detergent. When the floor is as clean and dry as possible, the floor can be painted with epoxy paint to seal in any remaining oil vapor. 3/23/2004 Mrs. Prezzio called back to say the cleanup was complete and the oil problem has been taken care of. Spill Closed"
Remarks:	"REPLACED FILTER ON TANK, AND WAS NOT REPLACED PROPERLY AND CAUSED OIL SPILL"

FINDS:

Registry ID: 110010611427

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

NYNEX (Continued) **1004759936**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Registry ID: 110043189992

Environmental Interest/Information System
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL 12/7/99 Faxed spill report to DEP. Spoke to Jim Carey Due to a faulty gauge, they overfilled the 6500 gallon tank in a vault in a basement and through vent onto sidewalk. (Initial reading: 3900 gal, delivered 1800 gal should have still been room - total of 5700 gal) Castle taking care of spill on sidewalk. A couple of gallons got into the sewer. Bell Atantic contracted Milro to clean storm drain and basement. Spoke to John Quatrale Approx 5-10 gals spilled from top of tank into vault of Bell Atlantic Junction Bldg (only a handful of employees in bldg.) Tank in vented sub-basement, therefore no vapors are impacting people. Milro on the way. Follow up contact for Bell Atlantic: Claudia Taccetta. Their maintenance contractor will assess and make all necessary repairs to tank. JMR 08/16/06 - IABEILBY:

NYNEX BUILDING (Continued) **S104503739**

Spill closed based on PBS data, age of spill and small quantity of oil spilled."

Remarks: "CALLER REPORTS TANK OVERFILL DUE TO FAULTY GAUGE. WENT TO A STREET STORM DRAIN. CASTLE IN ADDITION MILROW ENVIRONMENTAL WILL BE CALLED TO CLEAN THE SEWER."

DEC Memo:	"7/29/16 - obligado - Desk Duty - Duplicate spill report from earlier incident assigned to Mahat. 8/3/16: Mahat DEC Remark for spill 1604236: Response: On 7/28/16, DEC Spills staff responded to a reported 30 gallon sidewalk spill in the upper Manhattan at above referenced address. The spill was due to overfill of a 3,000 gallon AST (PBS 2-208396). The # 2 fuel oil was mostly contained within the sidewalk and paved roadways. The tank integrity was not compromised and there was no visible indication of spill in the tank room. A Consolidated Edison service box # 22554 was impacted by the over fill. Con Ed was notified and EMIS # 248976 was generated for the cleanup process. Later, NYC DEP was notified about the spill by the Con Ed field technician. There is no residual oil smell/odor in the building at this time. The road sidewalk and road way spill has be cleaned by the oil company. No other resources was impacted by the spill. The Department does not warrant any further work/investigation on the spill case. EMIS : 248976 [Crossed Referenced] EMIS Remark: MANH Environmental Services Mechanic A Asinto B Muller (05384) reported 3rd Party spill of approx. 120 gallons of unknown oil (most likely fuel oil) entered SB #22554. Crew awaiting COC form, sample jars and env. tag and WR #. Samples to be taken for oil ID, PCB and flashpoint. NYSDEC rep called Desk to inform of spill. Will enter spill number from DEC already reported. Unknown at this time if DEP was notified. Will notify if spill was not reported. COC #HH23601; WR #3545717; Tag #122825 Based on the nature of the spill on the service box, the case is assigned to Con Ed Unassigned. PS. THE ROAD SPILL HAS BEEN CLEANED UP. 9/13/16 - Austin - Con Ed contained and cleaned up this spill - See document files for further information, as well as spill # 1604236 (the original spill, closed on 8/11/16 - Spill

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"6/22/06 - Raphael Ketani. There is an active 5,000 gal. tank on site. It is listed as PBS case #2-610477 and contains #2 oil. I received a FAX of the water and soil analyticals for samples GW-1 to GW-5 and SB-1 through SB-6 taken from 6/19 to 6/20/06. The results show no hits or only a few hits under TAGM 4046 for GW-1 to GW-4. GW-5 had 7 VOC hits slightly above TAGM and 1,2,4-trimethylbenzene at 63.5 ppb and naphthalene at 66.4 ppb. SB-1 to SB-3 had either no hits or only a few hits below TAGM. SB-4 had 5 VOC hits - all well above TAGM. SB-5 had 7 VOC hits (from below to slightly above TAGM) and O-xylene at 3180 ppb and naphthalene at 27500 ppb. 7/14/06 - Raphael Ketani. I tried to call Mr. Myers of ATC (631) 451-0617, but could only leave a message. 7/18/06 - Raphael Ketani. I tried calling Mr. Myers, but could only leave a voice message. 8/2/06 - Raphael Ketani. I tried calling Mr. Myers, but could only leave a voice message. 8/4/06 - Raphael Ketani. Mr. Myers called me back. He said he knows he has to get moving on this site and he stated he will. 8/21/06 - Raphael Ketani. I contacted Mr. Myers. He said he hasn't forgotten about the site, but things have been getting in the way. He said he will get me documentation. 9/14/06 - Raphael Ketani. I received a

RETAIL/RES. BLDG (Continued) **S108057687**

message from Peter Kolodner of ATC Associates today (212) 353-8280, ext. 285. He said he wanted to talk about the contamination. I tried returning his call, but could only leave a voice mail. Mr. Kolodner called me back and I told him that sites GW-5, SB-4, and SB-5 needed water removal and soil removal, respectively. He said he will tell this to the client. Mr. Kolodner called me again. He said that it would be best if DEC would send an official letter to the present owners stating what needs to be done and to c-c ATC and the prospective new owners, Community Preservation Corporation. The addresses to send to are: Jeff Ewing, UHAB (owner), 120 Wall Street, NY, 10005 Peter J. Kolodner, ATC Associates, 104 E. 25 Street, NY, 10010 Naim Brown, Community Preservation Corporation (CPC; prospective new owners), 3154 Albany Crescent, Bronx, 10463 I sent the letter today. 9/18/06 - Raphael Ketani. Mr. Ewing called today. He said that UHAB is not the present owner. He said they are the sponsor and will close on the title and put together a low income housing development plan. He added that UHAB is the FUTURE owner. Mr. Ewing said that the lender is Community Preservation Corporation and the present owner is Neighborhood Restore. He said to send a letter to: Errol Cooper (212) 584-8981, ext. 19 at Neighborhood Restore, 150 Broadway, 21st Floor, NY, 10006. I sent the letter. 9/25/06 - Raphael Ketani. Mr. Cooper called me back. He said that my letter was the first that he heard there was contamination at the site. He said he didn't have a copy of the report or know what to do. I told him that the soil and water need to be cleaned up. He asked who he can contact so that he knows where to do the cleaning. I told him that he can contact the prospective buyer's environmental company. I gave him the phone number. He said he will have the site cleaned up. 9/29/06 - Raphael Ketani. I spoke to Anton Popovik of 14K Management (914) 237-1600 regarding the contamination at the site. I mentioned to him that the groundwater has to be collected, resampled for levels of analytes and the results sent to DEC. I also told him that the soil will have to be removed at SB-4 and SB-5, resampled and the results sent to DEC. He said he will have this done. 12/19/06 - Raphael Ketani. I tried contacting Mr. Popovik, Mr. Myers, and Mr. Kolodner, but could only leave voice mails. Mr. Popovik called to say that he is aware that the site needs to be cleaned up and will contact the remediation company. Mr. Kolodner called to say that ATC Associates submitted 3 proposals to Neighborhood Restore and is waiting for them to get back to him. Later, Pam Oelerich (212) 432-8545 of the NYC office of ATC tried to contact me. I left a voice mail for her. 12/21/06 - Raphael Ketani. Ms. Oelerich returned my call. She said that she is the lead person at ATC Associates and that her company is working for CPC. She said that ATC presently has a proposal with Neighborhood Restore (NR) to do excavation first in the vicinity of SB-4 and SB-5 and then take post excavation samples. I told her that plan would be acceptable to the DEC, but the sample results may indicate that more digging will be necessary. She said she understood this and she felt that NR would be agreeable to this, also. I told her to send me the plan that NR agrees to, I'll review it, and respond back with a Nay or Yay. She said she would do this. 3/7/07 - Raphael Ketani. I spoke to Ms. Oelerich and asked her why DEC hadn't received the plan for the remediation work. She said that she wasn't sure why as the plan was approved by Neighborhood Restore a while ago. I told her to send me the plan. I asked her when the remediation would take place. She said when the construction takes place. I asked her when that would be. She said she didn't know. I told her to send

RETAIL/RES. BLDG (Continued) **S108057687**

the DEC the manifests and the end-point results and to tell her client that the DEC is very concerned that the cleanup is not taking place in a timely manner. She said she would contact Neighborhood Restore. 3/14/07 - Raphael Ketani. I received the 1/9/07 soil removal and groundwater sampling plan from Ms. Oelerich by e-mail. 3/16/07 - Raphael Ketani. I spoke to Ms. Oelerich and asked her whether the soil and groundwater samples would be analyzed via methods 8260 and 8270. She said Yes. In that case, I told her the plan is acceptable to the Department. I asked her to get started as soon as possible. 5/9/07 - Raphael Ketani. I tried to reach Ms. Oelerich (o-le-rick) (212) 432-8545, but could only leave a message regarding the soil sampling. Ms. Olerich returned my call and left a message that the property is undergoing a transfer of ownership right now. She stated that once the transfer is completed in the end of June of 2007, then UHAB will take posession and do the remediation. 6/13/07 - Raphael Ketani. Ms. Olerich sent me the 6/5/07 Proposal for Soil Excavation Oversight and Groundwater Sample Collection plan by e-mail. I reviewed the plan and told her that the soil and groundwater sampling part of the plan were fine and to test via methods 8260 and 8270. 7/25/07 - Raphael Ketani. I spoke to Ms. Olerich. She said the closing/transfer of ownership just took place. She said that NR just gave her the O.K. to go ahead and do the remediation and sampling. 10/17/07 - Raphael Ketani. I tried to contact Ms. Oelerich, but could only leave a message. 10/18/07 - Raphael Ketani. Ms. Oelerich called to say that the soil at SB-4 and SB-5 was dug out and end point samples taken. She said that the water that is present on site is not groundwater, but is rain water that collects in a little depression. She said that I should be getting the investigation report soon. I told her the tank is still listed as active in PBS. She said she will take care of it. 10/31/07 - Raphael Ketani. Today, I received by e-mail the Soil Excavation Oversight report dated 10/31/07 from Ms. Oelerich. I reviewed the report which contained analytical results for three soil samples that were taken from the excavation hole sidewalls in the vicinity of SB-4 and SB-5. All three sample analyticals were almost entirely non-detect with only a few analytes having hits that were very far below the TAGM limits. I called up Ms. Oelerich and asked her about the tank. She said they had it looked at and it is in good shape. So they are using it. Based upon the 10/31/07 Soil Excavation Oversight report and my conversation with Ms. Oelerich regarding the tank, I am closing the spill case. 11/7/13 - Raphael Ketani. Mr. Chul Gugich (212) 479-3378/gugich@uhab.org called requesting the remediation report for the site. I sent it to him by e-mail. "

Remarks: "Soil testing and groundwater tests were taken on 6/12/2006. The results came in today 6/22/06 and showed contasmination in both groundwater and soil. Unknown who is doing the clean up."

DEC Memo:	"Spoke with John Engdahl @ Hess.His number is (732)750-6934. As per his request, recent data from 150-54 West 145th Street was sent to him for his review.(sr) 5/30/14 - Austin - Spill transferred from Rahman to Mahat for followup with Hess - end 4/29/16: Mahat e/c: DEC

GAS STATION (Continued) **S110540095**

Mahat sent an email to DEC Haggerty inquiring his involvement on the spill case. DEC Haggerty sent an email update on the case. Email: Santosh, I recently closed Spill #0751061, the long-term ExxonMobil remediation spill number, at this property. In 2010, I asked Kleinfelder (ExxonMobil s consultant) to call in the above-referenced spill number because elevated MTBE was encountered during quarterly monitoring which was up gradient of ExxonMobil distribution system and the immediately down gradient of the adjacent Hess station located next-door. At 12,000ppb, I thought it was worth investigating. I ve attached the last quarterly report from Kleinfelder which demonstrates the well in question (MW-5) has since cleaned up. Let me know if you need additional information. Thanks, Mike Spill case has been crossed referenced with old spill case #0751061. A quarterly report has been uploaded on D2 for reference. Based on the report, the spill case is closed. "

Remarks: "possibly from Hess Gas Station next store - lab results showed 12000 ppb of mpbe - Mike Haggerty aware of this situation"

DEC Memo:	"11/2/07-Vought-See spill #0706608 at adjacent site located at 2495 Adam Clayton and also previous closed spill #0751601. DEC requires: 1)Tightness testing of fill line as per DEC Krimgold 2)collection of groundwater sample immediately west of tanks. Spoke with DEC Krimgold and as per PBS records, PBS inspection performed by DEC Falvey in 2/07 and numerous violations including product in sump/catch basin. DEC Krimgold also confirmed that spill number should have been reported by ExxonMobil upon discovery of product in the sump. Vought called ExxonMobil (Kenneth Drake Cell 908-451-0956 Fax 609-698-8761 (kenneth.j.drake@exxonmobil.com). Left message with Drake to return call with contact info. Vought sent out letter with above requirements and a one month deadline with cc to DEC Urda and Galli (Gehrling). Vought called station operator (Theodoros Zorbas 718-762-4632 and ask for Chris). Vought called Chris (fax:718-762-4711) and informed him of situation and faxed and mailed copy of letter. Vought received mail from Acosta that DEP project manager is Maurice Winter (718-595-4514). 11/05/07-Vought-Received call from and spoke to Lina Hitchcock (713-460-4006) from Exxon Mobil. Vought provided her with information of closed spill 0611117. Hitchcock will contact Galli and Kenneth Drake regarding splitting samples and coordinating activities with consultant from other site. Fill line was tested as per Lina but tanks were not on 4/13/07. Vought spoke to DEC Urda and he discussed pursuing consent order upon confirmation that ExxonMobil was source. 11/14/07-Vought-Received call from Brendan Mooney (ExxonMobil 631-218-0612). Mooney received letter and tank testing will be performed by 12/3. Workplan will be submitted to DEC by 12/17 for groundwater. Frank Messina will be ExxonMobil project manager (732-850-4009) and Kleinfelder contact is Brendan Mooney. 1/10/08-Vought-Current file review by Vought: Letter from Kleinfelder (Mooney) to DEC Vought-11/19/07. Crompco Corporation of Plymouth Meeting, Pennsylavania conducted tank and line testing at the Site on November 8, 2007. The results of the test indicate that all tanks and lines are tight. A copy of the tank test results are provided in Attachment A . Investigation workplan for groundwater sample will be submitted to DEC by 12/17/07. Letter from Kleinfelder (Mooney) to DEC Vought-12/14/97. Scope of work includes installation of five soil borings/monitoring wells. Two wells will be installed on both the eastern and western portions of the Site and one well will be installed on the northern portion of the site. Scope of work includes collection of two soil samples from each boring and installation of five monitoring wells. Subsurface investigation will proceed within 90 days of receiving approval and DEC will receive report within 90 days. 1/10/08-Vought-After review DEC requires:

EXXONMOBIL (Continued) **S108957494**

1)faster turnaround than 180 days total for report. Vought called and spoke to Mooney and both parties agreed that work could be performed in 45 days with 60 days of report preparation. Vought sent letter approving of Plan pending inclusion of shorter timeframes for report submittal of 105 day total. 01/11/08-Vought-Received email from MobilExxon Drake that his correct mailing address is: Kenneth Drake ExxonMobil-US Retail Remediation Project Manager 297 Route 72W Suite 35, #285 Manahawkin, NJ 08050-2890 Cell: (809)451-0956 Fax; (609) 698-8761 06/11/08-Vought-Reviewed Subsurface Investigation Report dated 4/18/08 and received on 4/23 from Kleinfelder (Brendan Mooney Ph:631-218-0612 Fax:631-218-0787). Installation of five monitoring wells and proposal for investigation of subsuface geophysical anamolies found and submission of quarterly status reports. Site currrently has five (4000-gallon) gasoline USTs, one 1000-gallon waste oil UST, one 1000-gallon fuel oil UST, four dispenser islands and single story building. Depth to groundwater if 15-19'bg. Wells installed via air rotary to a maximum depth of 32'bg. ....four subsurface anamolies were detected beneath the Site . Highest PID reading was in MW2(16-18'bg) that was 1400ppm. Groundwater flow to the east-southeast. Report recommends: 1)further investigation of the subsurface anamolies via excavation 2)quarterly groundwater sampling. Soil analyticals show: 20800ppb toluene(MW2 18-20'bg), 74700ppb ethylbenzene(MW2 18-20'bg), 533,000ppb xylene(MW2 18-20'bg), 418,000ppb-1,2,4-trimethylbenzene(MW2 18-20'bg), 130,000ppb 1,3,5-trimethylbenzene(MW2 18-20'bg), 3570ppb MTBE(MW3 25-27'bg). Groundwater analyticals show:'74ppb benzene(MW1), 284ppb toluene(MW1), 71ppb ethylbenzene(MW1), 595ppb xylene(MW1), 15ppb MTBE(MW1), 452ppb benzene(MW2), 241ppb napthalene(MW2), 6580ppb toluene(MW2), 3290ppb ethylbenzene(MW2), 18100ppb xylene(MW2), 111ppb MTBE(MW2), 36ppb benzene(MW3), 7ppb toluene(MW3), 323ppb ethylbenzene(MW3), 86ppb xylene(MW3), 2400ppb MTBE(MW3), 108ppb napthalene(MW3), 2ppb benzene(MW4), 3ppb benzene(MW5). DEC approves report pending inclusion of requirements: 1)complete delineation of soil and groundwater contamination including well installation of wells northeast of MW2 and southeast of MW2 2)cc to AC Development 3)submission of RAP Vought sent letter with above requirements to above address. 07/14/08-Vought-Received call from Mike Meyerhoefer (Kleinfelder 631-218-0612). Meyerhoefer considering consolidation of spill number from adjacent property to that of Exxon Mobil. Requested review of RAP. Vought called and left message for DEC Haggerty to return call to DEC with possibility of transferring spill to him as Exxon portfolio manager. 07/15/08-Vought-Spoke with DEC Haggerty who requested that spill be transferred to him as Exxon Mobil portfolio manager. Spill transferred from DEC Vought to DEC Haggerty and spill file sent to Albany. 7/21/08 - Haggerty: Reviewed file including the Supplemental Remedial Investigation Workplan dated 7/8/08. The workplan included the installation of 3 MW's and digging 2 test pits in the area of metallic anomalies detected with GPR. I approved this workplan contingent on Kleinfelder installing 3 additional MW's to determine the extent of the LPH discovered at .72ft in MW-2. Kleinfelder states they will install absorbent LPH socks in MW-2 but without estimating how much LPH exists on the watertable, it could be insufficient. 7/23/08 - Haggerty: spoke with Michael Meyerhoefer from Kleinfelder concerning the work plan. We discussed installing only 2 of the additional MW's I requested and moving their proposed SB/MW-8 closer to the tank field where I wanted a well. PM approved. 8/25/08 - Haggerty: met with Ben Conlon and Bob Cozzy to discuss this site.

EXXONMOBIL (Continued) **S108957494**

The property adjacent to the ExxonMobil station is to be re-developed. This spill # was issued when the adjacent property performed a subsurface investigation and product was discovered in a MW along the ExxonMobil station side. Ownership of the product was identified as ExxonMobil's. The developer of the adjacent property applied for the Brownfield Program using ExxonMobil's contamination as their way into the program. Brownfields require an on-site source and they are claiming Exxon's product as their on-site source. The meeting with Ben and Bob was to clarify that if the developer refuses Exxon/Kleinfelder access, the DEC will clean up the contamination on the developers property. A consent order will be prepared by DEE for the investigation and remediation of the ExxonMobil station. Also issued a letter to Exxon requiring the following: 1. Conduct Enhanced Fluid Recovery (EFR) events on MW-2. EFR events must be performed on a monthly basis until directed otherwise. 2. Perform tightness testing on all tanks and lines. ExxonMobil must evaluate why .72ft of product was encountered in May 2008 but not 3 months earlier. What happened since the tanks and lines were tested in November 2007 to cause this release? 3. Sample groundwater in MW-2 to determine what Oxygenate concentrations are present. Analyze for 8260B and all oxygenates. 4. Prepare a Corrective Action Plan (CAP) for the investigation, Interim Remedial Measures (IRM), and future remediation of the site. 9/5/08 - Haggerty: Sent letter to Exxon requiring an SI be conducted on the neighboring (A&C) property to delineate the extent of LPH 9/8/08 - Haggerty: received call from Michael Meyerhoeffer from Kleinfelder. While excavating test pits in the area of a metallic anomaly, old tanks were discovered. Test pits were part of the approved SIWP dated 7/8/08. 9/9/08 - Haggerty: on-site for day 2 of test pit excavation. A total of 8 550gal UST's discovered, but more are likely to exist. Tanks are located 4ft below grade and are encased in concrete and appear to be filled with sand. All Kleinfelder was able to accomplish was excavating an ~10ft by 20ft area down to the concrete slab on top of the tanks removing some of the associated piping. Kleinfelder was not able to dig any further down or in any direction because the current fuel oil tank is to the south and the current gasoline UST's (5 4,000gal tanks) lie to the north and they were afraid of undermining any current tanks. New spill # called in because a layer of petroleum contaminated soil lie on top of the concrete slab over the tanks. 9/16/08 - Haggerty: Crompco tested tanks and lines. All tight 9/23/08 - 9/24/08 - Haggerty: on-site for 2 days of SI. Intent of this investigation was to delineate LPH on-site. 6 new wells installed. 2 adjacent to the recently discovered 550gal tank bed. Heavy soil and groundwater contamination, LPH encountered surrounding 550gal tanks (LPH black). PM believes these tanks to be the source. In all but 1 well, PM observed a sheen in the sample at water interface. 10/1/08 - Haggerty: Spoke with Exxon PM, Ken Drake, concerning the level of contamination I saw the the previous week. Followed up our conversation with an email to make DEC requirements clear. 1. ExxonMobil must move as fast as possible. Mr. Conlon wants the source removed ASAP. 2. If the old 550's aren't the source, then there was a large loss of inventory involving the current tank system which was never reported. 3. The IRM work plan for source/tanks removal must be submitted by the end of next week and the design for sheeting/shoring should be underway. 4. Off-site investigations across West 145th Street and on A&C property must be implemented in parallel with the IRM. 5. Since removal of all contamination is not feasible (product

EXXONMOBIL (Continued) **S108957494**

under station building and the limitations of excavating to 25ft in Manhattan) a remedial system will be required to deal with the remaining product as well as any remaining soil and groundwater impacts. 10/10/08 - Haggerty: approved Off-site Investigation Work Plan dated 10/2/08. Work plan submitted in response to my 9/5/08 letter requiring delineation/investigation of neighboring A&C property. A specialty rig will advance borings inside the old Supermarket building. Also on 10/10/08, an Underground Storage tank Removal work plan was submitted. Work plan does not address DEC requirement of removing tanks and contaminated soil (source). Since the current 4000gal tanks are pushing up against the old 550gal tanks, Exxon states that they will only be able to remove at the most 10 of the 12 550gal tanks and none of the contaminated soil beneath it. They state that to remove the tanks/source, they would have to install sheeting and shoring and remove the current tank system as well. 10/27/08 - Haggerty: submitted letter to Exxon stating the UST removal work plan did not address DEC comments and again required tanks/source removal as an IRM. 10/29/08 - 10/30/08 - Haggerty: 8 EFR/vapor extraction events conducted. Removed ~273gal of product, ~814lbs of vapor, and ~20,000gal of petroleum contaminated groundwater. An ICE (Internal Combustion Engine) was hooked up to burn the vapors being collected. Vapors were being vented at concentration over 120,000ppm (12%) 10/31/08 - Haggerty: Spill Busters (temporary product recovery system) installed at MW-6, MW-10, and MW-11 11/6/08 - Haggerty: had conference call with Ben Conlon and Exxon's legal team. I told them that the tanks/source must be removed. Ben informed them that the faster the source is removed the less penalty he will pursue from Exxon 11/10/08 - Haggerty: Exxon submitted an IRM source removal work plan. Removal of 18 tanks and overexcavate to 22ft with the installation of sheeting and shoring. Groundwater ~18fbg 11/4/08 - Haggerty: Spill Buster (LPH only recovery system) initiated in 3 wells exhibiting product. 11/24/08 - Haggerty: approved IRM tanks/source removal work plan. 11/24/08 - 1/15/09: Began outreach to the community by contacting the Community Board 10 District Manager, Geneva Bain. Also, began preparing fact sheets in both English and Spanish. We identified 5 buildings directly behind the station on West 144th which are our target area for the distribution of fact sheets. Geneva Bain brought in Charles Callway from WeAct, an environmental justice group in Harlem, to assist her with these issues. Decision made to have a public meeting on January 15, 2009 to give the community a chance to discuss any concerns. Our environmental justice coordinator, Lisa Garcia, was also brought in. Document Repository at the National Action Network at 109 West 145th Street, Harlem 12/12/08: SVE/AS test conducted 12/18/08 - Haggerty: Exxon submits an IRM work plan addendum. Due to the contraints of the site (canopy, station building, poor condition of adjacent buildings) the sheeting/shoring plan was modified. The excavation will be to 18ft. 12/23/08 - Haggerty: IRM Addendum approved 12/29/08 - Haggerty: Supplemental Subsurface Investigation Report sumbitted. Exxon had previously been warned that if field observations such as odor, staining, sheen, or visible product were not included in the boring logs and the report, we would refer the matter to our legal department. I was present for the investigation and sheen and visible product were apparent especially in MW-6 (right next to the source, the tanks). The report did not include this information and the report was rejected. 1/14/09 - Haggerty: ExxonMobil and Kleinfelder came to Albany for a meeting to discuss

EXXONMOBIL (Continued) **S108957494**

the public meeting in Harlem the following day and the reporting of field observations. Don Englert, Ken Drake, Charles Kolb from ExxonMobil Dennis Shin, Michael Michael Meyerhoeffer from Kleinfelder We informed them that the situation in unexceptable and any future report submitted without field observations will be rejected. We do not trust them. 1/15/09: Public meeting held in Harlem. Bob Cozzy and myself, ExxonMobil, Kleinfelder, CB10, WeAct, DEC Department Environmental Justice Coordinator, and the regional EJ coordinator present. Meeting was well received by all in attendance. 1/21/09: CAMP approved 1/26/09: IRM begins, LPH recovery system shut down. Over 800gal of product removed thru Mobile Remediation Events and the recovery system. 2/12/09 Previously unknown 4000gal tank installed in 1971 discovered. Filled with concrete and water. 2/18/09 - 2/19/09: PM on-site. Orphaned 4000gal tank removed previous day with soil contamination under the tank. All contaminated soil could not be removed due to the proximity of the station building. Tank located between the station building and the dispensers With met Engineers to discuss the retaining wall on the south side of the property which separates the Station of the adjacent apartment buildings and the Lenox Family shelter on West 144th St. Condition of the wall is very poor. Engineers state that the wall would have to be removed or braced before the sheeting/ shoring can be installed 2/24/09 - 2/26/09: PM on-site. PM witnessed all the 5 4000gal tanks removed. Double-walled steel buffide tanks in excellent condition. They were not the source or even a contributing factor. The 12 550gal tanks (in poured concrete vault) were visible from the 4000gal tanks excavation. Contamination noted around the 550's and underneath the tank mat for the 4000gal tanks. Appears that Exxon knew about the contamination back in 1988 when the 4000gal were installed. PM notifying legal (Scott Owens) and forwarded photographic evidence. 3/4/09 - Haggerty: approved off-site SI workplan to install 10 MWs in the sidewalks on both sides of West 145th, the east side of Adam Clayton Powell Jr. Blvd, and the north side of West 144th St 3/25/09 - Haggerty: approved off-site SIR for the A&C Property. Also approved a change in the UST/Source removal workplan. Due to the poor condition of the back retaining wall, PM made the decision to remove the installation of sheeting and shoring and use sloping to excavate the of the on-site contaminated soils. Approximately 300 tons of contaminated soil will be left in-place due to its close proximity to the station building. The upcoming SVE/AS system will be used to remediate the remaining soil contamination. 4/17/09 - Haggerty: RAP submitted which doesn't remediate the A&C property actively. PM planning a site visit to the A&C property with technical staff only to discuss how the contamination will be delineated and where to install SVE/AS system on their property. System must be operating on the A&C property before they re-open 4/29/09 - Haggerty: met with Ken Drake and Charles Kolb from ExxonMobil as well as Sandra Acosta from A&C and the current owners of the property. The owners are losing money becuase they're paying taxes and rent on a property that isn't bringing in any money because as it is vacant. Original plan was to redevelop but once the contamination was found and the recession hit, investors pulled out. We worked out a plan to delineate the groundwater contaminaiton and install SVE/AS points as needed. It will be difficult to install the points and piping inside the building, but ExxonMobil agreed. They will send an amendment to the RAP. 6/2/09 - Haggerty: SI workplan and RAP Addendum submitted. My comments were: 1. Section 4.2 (Site Geology and Hydrogeology) of the

EXXONMOBIL (Continued) **S108957494**

Remedial Action Plan Addendum must be revised to reflect the actual LPH thickness in the monitoring wells gauged on February 5, 2009. The infonnation is incorrect. 2. LPH recovery through the use of Spill Buster(s) must be re-initiated to accelerate the remedial process and prevent LPH from migrating off-site. 3. Install temporary sub-slab pressure monitoring points in the basement of the A&C property to ensure vapor control once the SVE system is operational on the A&C property (see attached map). 4. The decision to proceed with Phase IT and Phase mof the Remedial Action Plan Addendum will be made by the Department. 5. Remove items 1 and 2 from the March 2009 Corrective Action Plan and re-submit. 6/19/09 - Haggerty: had conference call with Ken Drake from ExxonMobil and Kleinfelder. The last issue holding up my RAP and RAP addendum approval was LPH recovery in addition to SVE/AS. Ken Drake agreed and sent an email stating LPH recovery will be incorporated into the remedial system and an additional RAP Addendum will be submitted. A figure showing the location of the proposed additional points will be provided for approval by the end of July 2009. A RAP Addendum presenting the revised SVE/AS and product recovery remediation system, as well as the supporting field observations, boring logs, etc., will be submitted within 60 days of completion of on-site drilling. RAP approved April 2010 - Currently, all system wells have been installed and the system, itself, is to be installed soon. Con Ed to install= electricity for the remedial (System requires 400amp service) in April. A&C property is still not open for business. Vapor Abatement System for the adjacent property is operating on the station s power. May 2010 - Con Ed informed Kleinfelder the system power won't be installed until Sept. 30. If he can't get it re-scheduled earlier, PM will make a call on their behalf July 2010 - Con Ed has installed power now waiting on delivery of the system. August 2010 - SVE/AS/Product Recovery system being constructed in Canada and is on schedule to be delivered in the first week of Sept. High concentrations of MTBE appear to be coming from the Hess Station immediately adjacent to the property to the east. EM requested FOIL of neighboring Hess Station records which PM provided. EM will be calling in a new Spill Oct.2010 - A SSUR was recieved. (SD) November 2010 - EM has handed the project over to Liberty Petroleum Realty LLC. See 11/18/10 letter from Liberty. (sd) February 2011 - SSUR due by the end of the month. PM and R2 Spills(Sharif) will discuss the recent on-site MTBE spike adjacent to the neighboring Hess station and determine whether Hess must proceed with an investigation. March 2011 - Sharif reviewed SSUR and asked Hess to perform SI to determine whether MTBE is coming from their station. System should be running in April April 2011: SVE/AS system start-up on April 20 July 2011 - System start-up report due in August August 2011: reviewed and approved the Start-up Report. Aracdis called to inform PM that the system shut itself down due to overheating of the CatOx unit when they turned on the AS legs. They should have consulted w/ PM before turning on the AS. Product remains on-site. November 2011: SVE/AS system running well. An ethanol detection in 3 wells beneath the adjacent building (no wells surrounding the current tanks or lines contained ethanol) prompted a discussion with ACradis PM. She re-sampled immediately and the results were negative for ethanol. Site needs Consnet Order with Liberty, currently have CO with EM February 2012 - site under global order between Liberty and ExxonMobil. System running well, Still can't turn on the whole system April 2012 - expanding the system with 1 additional AS well may be

EXXONMOBIL (Continued) **S108957494**

necessary. System running well June 2012 - expanding the system to cover an additional area on hold. SVE and product removal appears to be improving the area around MW-18 December 2012 - semi-monthly gauging of MW-18 was discontinued. System operating well. I approved the discontinuation of several wells. The were consistantly clean for years February 2013 - system good. some metals desorption around AS wells May 2013- system continues to operate well. Groundwater contamination is substantially reduced October 2013 - approved shutting down the system for the subsurface to reach static conditions to access whether additional mass can be removed May 22, 2014 - Haggerty: received call from Art Clark from First Environmental to discuss the possible closure of the Spill. Their client is the adjacent grocery store where product was first encountered during the property's Phase II investigation leading to the remediation of the former ExxonMobil gas station. He requested a conference call to talk about their client's concerns May 29, 2014 - had conference call with First Environmental, adjacent property owner (Jonathan Abed), Jim Moras, Scott Caruso and PM. They proposed Arcadis (RP's consultant) install 1-2 wells inside their client's grocery store where high dissolved BTEX concentrations (up to 80,000ppb) were encountered in 2009 because Arcadis is proposing Spill closure. Those monitoring wells were destroyed by the grocery store owner before the SVE/AS system came on-line because the concrete slab inside the grocery store was extended over the wells making them inaccessable. We inform them that a structural evaluation of that area would be required if a GeoProbe or drill rig was to install a monitoring well there. Based on our information, a large subsurface void remained below this area. June 5, 2014 - Haggerty: Jim Moras and PM had conference call with Arcadis (Sahithi Rondla, Andy Korik, and Neil Frasca) because they heard from the adjacent property's consultant, First Environmental. We informed them that we believe their request for additional data at the adjacent property is reasonable. October 20, 2015 - Haggerty: Issued NFA letter stating the Spill does not meet standards including the caveat that the Spill can be re-opened if contamination is encountered which requires additional remediation. The Spill was remediated to the extent feasible. Remedy consisted of on-site source removal and a SVE/AS system operated on and off-site until asymptotic levels of mass were recovered. Post-system shutdown, groundwater monitoring revealed no rebound in dissolved-phase contamination and the Spill would have been closed earlier if the adjacent property owners had not requested additional performance data. The Department determined the Spill needed to be closed to be consistent with the program. We entertained additional data being collected on the adjacent property but the logistical problems made it collection difficult and the various parties (ExxonMobil, Liberty Petroleum, the adjacent property owners and their consultant) involved created delay. The area in question in approximately 1500sq ft and the down-gradient groundwater is clean."

Remarks: "As per PBS inpsection on 2/9/07 by DEC Falvey, product found in sump and spill found but not reported. Note also heavy gasoline contamination at site immeidately adjacent to tank pad (Spill #0706608)"

Contact Name:	CHRIS KENDROD
DEC Memo:	"3/10/2016: Rashad 323 Convent Ave does not have an alternate address. No additional spills or PBS registrations found for site. Chris Kendrod is with NYC DEP not EPA as stated in spill report. She said she responded to site and that it seems that an overfill occurred, the daughter did not note any spill or odor in home. Chris said that the spill was on the sidewalk and she will be sending me a few photographs. Called Superfuel 12:35pm 929-376-5446 and spoke to Rosanne, she took message and said I will be receiving call in about an hour. Tim called from Superfuel 1:22pm and I let him know that there was a minor spill outside of 323 Convent Avenue in a flower box. I directed him to remove contaminated soil and confirm with homeowner that there are no issues in the home. I also told him to send me an email with post clean up photo and confirmation that homeowner noted no issues by the end of the day. Tim called back 3:27pm and said that they have removed affected soil and have cleared the fuel line pushing the remaining fuel into the tank. He will be uncovering fill line tomorrow to see if there is an issue with the check valve and he will be raising fill box so that oil does not back up and seep out if this problem occurs again. Tim confirmed no issues were in home. 3/11/2016: Rashad Received email from Tim: Attached are before and after photos of minor oil leak at the fill box of 323 Convent Ave. We removed 4 deep of soil 24 around fill box until we found clean soil. We relocated fill box and made it 20 higher to avoid this leak from happening in the future. There is no oil spill at vent or in the basement. We trust this will meet with your approval. Tims email address is tim.superfuel@verizon.net. Two photos were attached, they have been uploaded to D2. As per photos and confirmation there are no issues in home, spill will be closed."
Remarks:	"Caller advised aprx 2 gal of oil spilled onto soil. CLean up is pending."

DEC Memo:	"8/15/18-Zhune spoke to Maya Shani homeowner of APT 3F 646-483-4075. Maya said that she lives across the street of the gas station. Her windows are closed and cover with plastic film and she got gasoline smell coming from the gas station across the street. the smell comes and goes and it depends on the weather and how busy the gas station is. Right now she have it in her apartment. 08/15/18 - Lakhani DEC Lakhani visited the site and met with Maya. No olfactory odor was observed. Maya informed that she often smells the gasoline odors for 20 mins to 2 hours at a time throughout the last year. DEC Lakhani inspected the BP gas station and found that work was being done on one of the fuel sump pumps. DEC Lakhani will speak to DEC Zielinski for the BP gas station to be PBS inspected. 08/20/18 - Lakhani DEC Lakhani spoke to DEC Zielinski regarding the BP gas station across from the site. DEC Ali will perform an inspection of the gas station. Spill is closed."
Remarks:	"homeowner lives across the street from the gas station and there is an ongoing gas smell for years! I advised her to report it the local fire department."

Larry C Hughes 18341,Mechanic A, Maintenance Services Was at this location doing a inspection in SB40856, and found approx one half gallon of fuel oil on top of 5 gallons of water. There was no fire or smoke involved and no sewer or waterway was affected. There were no injuries related to the spill and no weather conditions contributed to the hazards of the spill. There was no private property affected. The source and cause of the spill is unknown. Environmental tag #42712 was installed. There is standing water but no visual water movement. There is no sewer connection; no substantial cracks and a concrete sump could not be verified due to the amount of fluid in the hole. Chain of Custody # EE05020, Samples taken for PCB, ID & Flashpoint. Logger F.Curtis 38078. 9/13 @ 21:20. Lab Sequence Number: 05-09610-001. Oil Identification Analysis indicates the presence of a mixture similar to a light fuel oil and 9/13 @ 23:15. Lab Sequence Number: 05-09609-001. < 1.0 ppm. Lab Sequence Number: 05-09609-002 Flash Point Test. Flash Point, PMCC > 140 deg F Update: 9/15/05 @ 15:55 hrs. Manhattan Environmental Desk made arrangements to have this service box cleaned on 9/15/05 at 11:30 hrs. UG crews, Tanker and Vactor truck scheduled. Operating Supervisor, UG North reported that there was a car parked over the service box, which prevented access to the structure. The next available parking access is Monday, 9/19/05. The Manhattan Environmental Desk, therefore, made a decision at 15:50 hrs. to re-classify this incident as a reportable spill since the cleanup will not be completed in 72 hours. The Incident Type was, therefore, changed from Spill - DeMinimis (72 hr. underground) to Spill - Fuel Oil . R. Pellegrino #38620 "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 10/10/95: This is additional information about material spilled from the translation of the old spill file: POSSIBLY HEATING OIL. 5/10/04 - AUSTIN - TRANSFERRED FROM TOMASELLO TO DEMEO - END 8/23/05 - Raphael Ketani. Case transferred to Jeff Vought. 07/25/08-Vought-Spill reassigned from DEC Vought to DEC Ketani as per DEC Austin. 3/30/09 - Raphael Ketani. I restarted the case today. I made an unannounced site visit to get an idea of what the case involved. The site is a series of three townhouses. Each has been divided up into several apartments. The townhouses are across from a park and the City College of New York. The townhouses at 419 and 417 West 141 Street both use oil. A patch was visible in the sidewalk which corresponds to a picture in the case file of a concrete patch being constructed many years ago after the removal of the contaminated soil. I rang the door bells and intercom buzzers to the buildings, but no one was home. 5/29/09 - Raphael Ketani. I spoke to Bonnie Riggi of the Office of the Attorney General regarding the 8/1/2001 Demand Letter. She said that they collected on the entire amount. According to the documentation in the 11/2/95 Winston Contracting pay package, the broken fill pipe and the associated fill box were replaced in front of 419 W. 141 Street and the spill was remediated where it affected 415, 417, and 419 West 141 Street. There is a 9/9/95 letter from A.R. Fuels to Winston Contracting indicating that the fill line and box were replaced. The 8/11/95 and the 11/27/95 remediation reports from Winston Contracting contain pictures showing the line and box replacement, the contaminated soil removal, and the rest of the remediation work that was performed. I brought this case to the attention of Randall Austin, Chief of the Spills Unit, and told him that I wanted to write the Final ISR and close the spill case. He said to go ahead and do this. 6/2/09 -

TOWNHOUSE (Continued) **S102150184**

Raphael Ketani. The Final ISR was submitted to Mr. Austin and Lou Oliva, Regional Attorney, for their signatures. They signed the FISR and it was forwarded to Dennis Farrar in Albany DER. As A.R. Fuels had replaced the broken fill pipe at 419 W. 141 Street, and as Winston Contracting had removed the old fill pipe and had cleaned up the spilled oil in #419 and in #417 and #415, and as the OAG had recovered the money that was expended to do the remediation work, I am closing the spill case. 6/15/09 - Raphael Ketani. Today I received a copy of a letter dated 6/11/09 from Mike Johnson of Albany Spills to Mr. Hasso of the Comptrollers office indicating that they considered the spill cleanup project to be complete. The letter was E-doc'd. "

Contact Name:	FRANK
DEC Memo:	"11/15/16 - Lakhani No PBS and no spills were recorded for the addresses at: 2600 - 2614 Adam Clayton Powell Jr. Blvd, New York, NY and; 201 - 203 West 150th Street, New York, NY and; 200 - 204 West 151st Street, New York, NY. 3:50 PM - Vought and Lakhani called and spoke to Frank Galdun (Merritt Environmental - 6316176200), the location was excavated as it was an old gas station and now a vacant site that is being redeveloped for residential purposes. The location was not listed as an NYC OER site. Upon excavation, twelve (12) unregistered 550 gallon USTs encased in concrete were unearthed. They continued and demolished the concrete casings. Minor soil discoloration was discovered and there was a slight gasoline odor. No vapor complaints were received to date. Currently there is no observed groundwater on site. Soil samples are required and will be attempted to be taken from the bottom bedrock surface and will also be collected from the soil side walls. All soil was excavated to the bedrock. 2 USTs were removed to date and there was no sign of corrosion - there is no indication of a leak. The remaining USTs are yet to be removed. All soil was stock piled and covered in poly (plastic) at the end of the day of excavation. Proposed development includes a parking garage the is the size of the entire footprint of the building. Once the development plans are confirmed that the parking garage will occupy the entire basement, a sub slab depressurization system will not be needed as per prior guidance from NYSDOH, as per Vought. Each UST excavation site is 25’ x 10’. Upon excavation of the USTs, piping was taken out. Pipes were followed to the dispensers and removed. Soil samples along the pipe lines will be collected. The USTs were found filled with gas and water. Their contents were pumped out by Action Environmental. Fill ports were not found on the sidewalk, but were found in between the two excavations. Lakhani and Vought intend to send a letter to Galdun regarding the case. Galdun said that he will circle back with progress on the site and with samples. Lakhani gave Galdun his contact along with

VACANT COMMERCIAL (Continued) **S119027997**

Manilar's contact for more info for PBS registration. Vought gave Galdun his email. As per Vought, Lakhani is to be the lead for the spill. 11/16/15 - Lakhani On 11/15/16, Frank Galdun wrote: Jeff, As discussed below is the contact name of the property owner. Peter Chen Truss Development 43-73 Union Street, Suite 1A Flushing NY 11355 516-209-8404 peterchen33@yahoo.com Have all emails related to the job site emailed to: peterchen@trussdevelopmentgroup.com and; info@trussdevelopmentgroup.com. Address the property owner to 2600 7th Ave Realty LLC. 11/16/15 - Lakhani Spill temporarily assigned to Vought until Lakhani is put into UIS database. Letter sent including the following: 1) delineation of soil and groundwater (if applicable) contamination 2) submission of development plans for the site 3) collection of confirmation (endpoint samples 4) Collection of soil samples from along the piping line 5) approval of RAP prior to redevelopment 6) CC to Galdun, Vought, Peter Chen (Truss Development - 5162098404, peterchen@trussdevelopmentgroup.com) 7) PBS Registration. There is a one month (12/16/16) due date on the report. Letter added to D2 and sent to Chen via email and US Mail. 11/16/16 - 1:46 pm - Lakhani Frank emailed Vought regarding time for site visit. Site visit scheduled for 1 PM on 11/18/16. Frank claimed that all USTs will be removed by the morning of 11/18/16. 11/17/16 - Lakhani Galdun CCed Vought in email to Peter Chen stating that he has completed the NYSDEC storage tank registration documents. Peter has yet to send fees ($500) and registration documents to Central Office (Albany). 11/18/16 - Lakhani Vought and Lakhani visited the location and met with Frank Galdun, Peter Chen, and owner's representatives. There was a pile of piping that was removed but not characterized. Unearthed USTs and contaminated soils were covered by poly. Frank is awaiting results after sending waste classification on the contaminated soil. There were no olfactory odors present. There was an underground transformer on the southern sidewalk of 151st St. A gasoline remote fill for a UST exists on the northern sidewalk of 150th St. Possible down gradient of the site is a NYC park with no basement. Upon entering the location, there was a pit that was filled with some rainwater. Rainwater had no sheen. The sidewalls of the pit contained dark spots which indicated that the soil was contaminated with gasoline. Dark spots soils were confirmed to be contaminated after observing gasoline/diesel VOC odors. USTs were removed, but two (2) more 550 gallon USTs full of water with fill lines and encased in concrete were found after PBS registration for the prior twelve (12) was submitted. Frank must update the registration submittal for the total fourteen (14) USTs found at the location. Frank took soil samples from three (3) sidewalls. PID readings were low (highest reading recorded was 0.2). No complaints regarding odors have been received from the surrounding area. Endpoint samples will be collected. Frank will be returning to the location on Monday to evaluate, remove, and drain new found tanks. For the development of the site, developer only needs to go down 6'bg. Bedrock is at a maximum of 8'bg. If contamination is below 8'bg then soil samples will have to be collected to delineate. Since a parking garage is intended to be built below the footprint of the building, a vapor intrusion barrier will be required but piping will not be necessary because garage will be above the contaminated soils. Therefore garage will vent any vapors. As per Vought, the above described pit requires a soil boring and further sampling due to the found soil contamination. The said pit should have the rainwater pumped out and then a soil boring should be placed. Frank notified Vought and

VACANT COMMERCIAL (Continued) **S119027997**

Lakhani that prior due diligence sampling was done for the location but nothing was found. He said he would share those analyticals with Vought and Lakhani. Frank will share the UST closure report, sampling from holes, and scaled site plans with Vought and Lakhani. 11/21/16 - Lakhani Emailed Galdun and CCed Peter Chen regarding the gasoline remote fill port found on the northern sidewalk of 150th St. Notified him that as per PBS regulation, the fill port must be closed. Also since there was no tank tightness data to show that the fill had no leaks, a limited investigation must be performed with either installation of a soil boring or endpoint sample collection. Galdun responded that he will have the excavation contractor expose the line for excavation. 12/5/16 - Lakhani Emailed Galdun and CCed Peter Chen regard the due diligence reports and proposed investigation around the fill port on the northern sidewalk of 150th Street. Galdun responded informing DEC Lakhani of the discovery of one (1) 550 gallon waste oil UST and one (1) 550 gallon heating oil UST in a filled in basement. There was no evidence of a petroleum discharge discovered at that location and soil samples were collected. He also completed an investigation of the fill line by creating a 30' long trench to bedrock. From here, soil samples were collected along the excavation. No evidence of discharge was discovered. 3:54 AM: Called Frank about the site, but he was busy out in the field. Left name and number with Merritt Environmental and will follow up tomorrow. 12/6/16 - Lakhani 9:28 AM: Frank called back and notified DEC Lakhani of an old basement found in the northeast section of the property, fairly close to the gasoline area. They found it while scraping asphalt off the surface and uncovered a fill port. The basement was set into bedrock. The basement floor was 8'bg. The basement was filled in with soil and within the basement they had found one (1) 550 gallon waste oil UST and one (1) 550 gallon heating oil UST. The waste oil UST was full with waste motor oil and the heating oil UST was about 10% full with #2 heating oil. Both tanks were drained, cleaned, and removed from the site by Action Environmental. They took samples below each tank and sidewalls. Analyticals can be expected in 5-6 days. The fill port found on the northern sidewalk of 150th St has been concreted over. No vapor complaints have been made to date. 12/20/16 - Lakhani Called Frank Galdun. A draft of the closure report was sent to the client, Peter Chen. Frank said that analyticals from samples taken from the basement with the two (2) tanks showed indication of some contamination in the samples, but it was below CP-51 standards. Four (4) samples were taken: two (2) from the bottom and at least two (2) from the sidewalls because the sidewalls were mostly rock and stone. Some SVOCs were found in the basement samples as well, but nothing was above standards. The anaylticals from the 30' trench were returned with no evidence of discharge occurring. The could not find the pipe during digging. All tanks have been registered and forms included in closure report. Past Phase II reports have been included in the closure report. One of the past Phase II reports indicate a bedrock well drilled 20' down detected MTBE. Closure report should be received by early next week (12/27/16 - 12/30/16). They also did more digging along the east wall of the property where the gasoline stained soil was in the pit. They did not encounter further significant contamination. 12/27/16 - Lakhani Called Merritt to obtain the closure report. Maryann Wegh, project manager from Merritt Consulting, sent the Closure Report to DEC Lakhani. Uploaded to D2. 12/28/16 - Lakhani UST Closure Report (Merritt Environmental - Frank Galdun, 12/15/16) - Removal of twelve

VACANT COMMERCIAL (Continued) **S119027997**

(12) 550 gallon gasoline USTs and associated dispenser/fill piping formerly located beneath the east side of the 2600 to 2614 Adam Clayton Powell Jr. Boulevard property. In addition one (1) 550 gallon waste motor oil UST and one (1) 550 gallon waste motor oil UST and one (1) 550 gallon heating oil UST was removed from the site. The size of the site is 19,910 sq. ft. and is currently unimproved in preparation for redevelopment to contain a residential apt. building with a partial underground vehicle parking garage. Historically the site contained one (1) single-story 1800 sq. ft. permanent structure that was used as a car wash. The remainder of the site contained exterior paved surfacing used as a commercial parking lot. Site appears to have been connected to municipal potable water supply and combined sewer/stormwater systems. According to a Limited II Subsurface Investigation Report from 8/13/15 by AEI Consultants, three (3) soil borings were installed at the site. Soil samples were collected from two of the three borings show that no VOCs were detected at concentrations that exceed applicable regulatory limits in either sample. Refusal of the drilling equipment occurred on shallow bedrock at all three borings. Two additional borings were subsequently installed into bedrock to intersect the water table to collect groundwater samples. Groundwater sample collected from this boring indicates MTBE was detected at 55 ppb. No MTBE was detected in any of the post-UST removal soil samples collected by Merritt. Upon UST removal activities, gasoline USTs were found approx. 10' of the temp. bedrock having Merritt believe that only residual impact to the groundwater quality occurred. Merritt completed a Focused Subsurface Site Investigation Report on 2/18/16 and installed a total of 11 soil borings. The max. depth of the soil borings was 8.5'bgs and no evidence of petroleum contamination at actionable or reportable concentrations was discovered. First Excavation Group of NY, Inc. was retained to remove twelve (12) 550 gallon gasoline USTs and associated piping, one (1) 550 gallon waste motor oil UST and one (1) 550 gallon heating oil UST. Twelve (12) USTs were encased in concrete. Three (3) abandoned gasoline fill ports and on e (1) remote fill was observed at the site. A trench was excavated to bedrock where the fill line may have extended. Trench was approx. 35' to the gasoline UST excavation and 3' in depth. No piping or evidence of gasoline contamination was identified. Isolated zones of discolored soil exhibiting strong gasoline odors was uncovered near the base of the east gasoline UST excavation wall. The material was removed and stockpiled to the extent feasible since Adam Clayton Powell Jr. Boulevard was directly adjacent to the east excavation wall. No free-phase product or staining was observed on the bedrock surface. NO physical evidence of a petroleum release was encountered in fill material excavated from the waste motor oil and heating oil UST excavation. Grab soil samples collected from waste motor oil and heating oil UST excavation were taken for which the sidewall samples taken at 7'bgs contain several SVOCs the exceed SCLs. No SVOCs were detected at levels in the bottom samples. Elevated SVOC concentrations are caused by the composition of the fill material in the sidewalls rather than representing a petroleum release to the environment. A vapor barrier shall be installed under the basement of the site building as a precautionary measure against possible future sources of vapor intrusion into the structure. Closure report is not sufficient. Groundwater sidewalk sampling down gradient of EXC A SIDE 1 and EXC A SIDE 4 is required to delineate possible groundwater contamination. Or if Frank claims that EXC A SIDE 1 & 4 were clean,

VACANT COMMERCIAL (Continued) **S119027997**

then require a groundwater and soil samples at the bottom of the eastern pit. 12/29/16 - Lakhani 3:06 PM: Called Maryann Wegh, Project Manager, and explained to her the need for monitoring wells down-gradient of Exc A Side 1 and Side 4. She said she would relay the message to Frank Galdun. Will be speaking to Frank tomorrow (12/30/16). 3:56 PM: Called Frank to tell him that a sidewalk groundwater samples down-gradient of EXC A Side 1 is required since no vertical delineation was done. Sent a requirement letter to Peter Chen via U.S. Mail and sent the letter to Peter and Frank via email. 01/03/17 - Lakhani Frank called and informed that since there is a chance that installing a boring for a groundwater sample adjacent to EXC A Side 1 and Side 4 may not yield a sample, he asked whether two (2) borings can be done: one (1) adjacent to EXC A Side 1 and 4 and another adjacent to the southern portion of EXC B. 01/04/17 - Lakhani Frank has yet to receive a PBS number for the registration. Email Frank, as per DEC Vought, that two (2) sidewalk borings adjacent to EXC A and B will be sufficient. If the EXC A boring does not yield any water, a bedrock well is not necessary. 01/26/17 - Lakhani Contaminant Delineation Report (Merritt, 01/2017) - Installation of three (3) soil borings into the Adam Clayton Powell, Jr. Blvd sidewalk that abuts the east site perimeter. The two (2) southerly borings encountered bedrock at 4.5'bgs and the northerly boring extended to 12'bgs on bedrock refusal. A water bearing deposit was encountered at 9.2'bgs in the northerly boring (B2). Since a slight gasoline odor was detected in the water extracted from B2, a permanent well was installed as a precautionary measure designated (MW1). Soil samples were collected from the three (3) borings reported no VOCs at concentrations that exceed applicable regulatory limits. Some SVOCs were detected above limits. Lab analysis of the groundwater sample reported: benzene 0.83 ug/L(MW1, 9.2'bgs). As per Vought, spill is closed. DEC Requires: 1) delineation of soil and groundwater (if applicable) contamination 2) submission of development plans for the site 3) collection of confirmation (endpoint samples) 4) Collection of soil samples from along the piping line 5) approval of RAP prior to redevelopment 6) CC to Galdun, Vought, Peter Chen (Truss Development - 5162098404, peterchen@trussdevelopmentgroup.com) 7) PBS Registration 8) Submission of due diligence reports by Galdun as per meeting on 11/18/16"

Remarks: "found 12 usts during excavation"

DEC Memo:	"obligado - desk duty -3-23-16 - I called Mr. Tucker. He was at the site. He responded to a tenant Ms. Cerano - 646-675-4597, Apt 4a. complaint of boiler odors. White smoke was bellowing from the front of the building and the boiler room. The chief of FDNY said there was oil spilled in the boiler room. This is the 3rd time the FDNY is there. The boiler is shut down. Tucker reached the ground floor and reached 10 ppm of CO. There is one fire truck left. Fire Chief Kirwin, 16th Batallion. Obligado - I called the PBS site phone #. The fire department is there. Control combustion is on site cleaning up the oil in the boiler. Ms. Natalie Mills 646-319-8731. Residential building. There was a fire in the boiler. Obligado - I spoke to Jerry Williams 7183679800 ext 204. J.williams@heatingny.com. Less then a gallon was spilled on the floor. Controlled is doing the clean-up. No response needed."
Remarks:	"Caller is unsure about a lot of information. He is just calling it in. He got notes from the fire department."

DEC Memo:	"11/22/05: This spill transferred from J.Kolleeny to S.Kraszewski. 01/03/06: Site Assessment said to be complete by Sept. 2000, by Yellowstone Industries. No record of report on file. Need site assessment report. - SK 07/10/06: NYCHA update summary states that one 32K UST installed in 1977 and stored #4 and #6 oil was replaced by a 25K UST that currently stores #2 oil. Contaminated soil was encountered during the tank replacement, no product recovery system and no MWs. A site assessment is available and NYCHA recommends DEC review it. - SK 02/08/07 : DEC lead changed from S. Kraszewski to J. Kann. J.Kann 3/10/11: J.Kann - Investigative work plan submitted on 3/3/11. 2/11/15: J.Kann - IWP indicates the yellowstone report was incomplete and stated that 50 cy of soil were removed and that petroleum contamination was encountered. Given the limited site history, the work plan only includes soil sampling (with option to install wells only if visible contamination is encountered.). Will approve the IWP provided that at a minimum temp gw wells are installed an sampled. If visisble/olfactory contamination is encountered, permanent wells will be needed. 1/26/16: J.Kann - Four borings were advanced and 2 wells installed. Based on soil analyticals, minor SVOCs were detected in two locations CP-51 SB-2 (15-17 ft) SB-4 (15-17 ft) Benzo(k)fluoranthene 0.8 0.9 0.87 Chrysene 1.0 1.3 1.0 Groundwater was also sampled and benzo(a)anthracene and chrysene were estimated at 0.051ppb (TOGS 0.002ppb). All other constituents were below TOGS. Tank was removed in 2000. Given the staining and oil odor in MW-2, I emailed NYCHA to gauge the wells one more time before I close the spill. 3/22/16: J.Kann - wells were gauged on 1/28/16 as requested. No product or odor noted. Based on the site file and IWP, the spill has been closed. Spill closure email sent to NYCHA and file DecDoced."
Remarks:	"SOIL CONTAMINATION DISCOVERED AT ABOVE LOCATION DURING TANK REPLACEMENT. SOIL EXCAVATED FURTHER TESTING TO BE DONE. NO CALL BACK REQUESTED."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY DEC'S KOLLEENY VISITED SITE 12/19/01. SPILL OCCURRED IN BASEMENT OF 465 W. 147TH ST., OIL DELIVERY IN MORNING, OVERFILLED TANK, APPROX. 10-15 GALLONS OF OIL CAME OUT TOP OF TANK AT LOOSE GAUGE, SPILLED ON FLOOR AND WALLS, FLOWED INTO NEXT ROOM WHERE FURNACE IS LOCATED. FIRE DEPT. RESPONDED AND PUT DOWN SPEEDY DRY. KOLLEENY CONTACTED OIL COMPANY, SOUTH CAROLINA FUEL OIL (212-234-5900), GLORIA AND MARION CAME TO SITE, TOLD THEM THEY MUST COMPLETE CLEANUP BY COLLECTING/DISPOSING OF SPEEDY DRY, POWER WASH AFFECTED FLOOR AND WALLS, AND TOLD THEM THEY ARE RESPONSIBLE TO CHECK IF TANK CAN RECEIVE DELIVERY PRIOR TO FILLING TANK. KOLLEENY ALSO SPOKE TO BUILDING OWNER, ELTON BUTCH GILKES JR., TOLD HIM TO MAKE SURE OIL COMPANY DOES THOROUGH CLEANUP AND TO MAKE ANY NEEDED REPAIRS TO TANK (275-GAL AST) TO PREVENT REPEAT OCCURRENCE, SUCH AS REPAIRING OR REPLACING GAUGE, WHICH IS NOT WORKING, AND POSSIBLY VENT WHISTLE. OK to close. - J. Kolleeny 3/8/05"
Remarks:	"Caller states that there is a strong odor coming from location; previous leaks there before. Request a call back."

DEC Memo:	"04/22/13-Hiralkumar Patel. after discussing with DEC Austin and DEC Vought, case transferred from Vought to Patel. 12/29/15-Hiralkumar Patel. previous project manager's notes from 09/14/1993 to 04/22/2013 are on D2. alternate address: 800-808 St. Nicholas Ave, 11-19 St. Nicholas Place, 399 West 150th Street, 390-398 West 151st Street PBS #: 2-600647, 2-611145 as per PBS # 2-600647, the site has/had following tanks: - seven (7) 550 gal gasoline USTs, closed-in-place in Jun 2000 - three (3) 4,000 gal gasoline/ethanol USTs, in-service, installed in Feb. 1986 as per PBS # 2-611145, the site has one (1) 275 gal waste oil AST in contact with impervious barrier, in-service, installed in Feb. 1998. the PBS registration expired on 08/19/2014. other spills: 8803083, 9313461, 9702241 spill # 8803083 was reported on 07/08/1988 as 300 gal gasoline spilled due to line knocked out by a cab. case closed without any notes. spill # 9313461 was reported on 02/15/1994 due to suspected leak in subway area. case closed without any notes. spill # 9702241 was reported on 05/21/1997 as 4,000 gal gasoline tank system failed a tightness test. case closed. Steady Realty LLC. **property owner** c/o Benjamin Hadar P.O. Box 926 **address from DOB permit in 2000** New York, NY 10025 Ph. (212) 749-7851 49 W 94TH ST #1 10025-7129, NEW YORK (NY) **possible address for Mr. Hadar** Oz Levy **info from DOB permit in Jan. 2011** Sugar Hill Gas Station Inc. 2753 Broadway Ave, Suite 377 New York, NY 10025 Ph. (212) 942-5550 Fax (212) 942-0366 summary of available information: - the subject spill was reported due to gasoline seepage into subway tube located west of the subject site - monitoring wells were installed on southern portion of the site - proposed to install remediation system including free phase product recovery, dissolved hydrocarbon recover and soil/vapor hydrocarbon recovery - record indicates operation of recovery systems, but no records available indicating when these recovery systems were initiated and terminated - as per available reports/documents, total of fourteen (14)

STATION 800, LLC (Continued) **U000414037**

monitoring wells were installed at the site: MW-1 through MW-6, MW-8 through MW-15 - site maps are available showing location of MW-1 through MW-6 and MW-8 through MW-12; but no maps indicate location of wells MW-13, MW-14 or MW-15 - groundwater samples were analyzed from multiple monitoring wells at the site - last available groundwater sample result indicate collection of groundwater samples on 12/14/2001 - last available invoice from Winston Contracting dated 05/01/2002 includes wells gauging and purging 12/31/15-Hiralkumar Patel. 1:00 PM:- visited site to confirm location of previously installed monitoring wells. total of fourteen (14) well covers noted at the site. available records show installation of fourteen (14) monitoring wells (MW-1 through MW-6, MW-8 through MW-15) at the site. Jose Pimentel **on-site tenant** PH. (917) 893-2253 01/04/16-Hiralkumar Patel. 9:48 AM:- sent email to OAG Jennifer Dentinger inquiring updates. 01/06/16-Hiralkumar Patel. discussed with OAG Jennifer. 01/27/16-Hiralkumar Patel. 3:25 PM:- left message for OAG Jennifer. 02/04/16-Hiralkumar Patel. 9:39 AM:- left message for OAG Jennifer. 02/17/16-Hiralkumar Patel. 2:44 PM:- left message for OAG Jennifer. 04/26/16-Hiralkumar Patel. 9:01 AM:- sent email to OAG Jennifer inquiring about if formal report needed for possibly a last round of groundwater sampling. 9:38 AM:- received email from OAG Jennifer stating that a formal report is not needed. 05/23/16-Hiralkumar Patel. 1:48 PM:- sent email to Dave including copy of standby contractor authorization form. asked Dave to schedule well sampling asap. 05/26/16-Hiralkumar Patel. 10:40 AM:- spoke with Mayra Rojas, property manager and informed her about required groundwater sampling. Steady Realty LLC. **property owner** c/o New City Management LLC. 2753 Broadway, Suite 377 New York, NY, 10025 Attn.: Mayra Rojas PH. (646) 376-9952 (C) (212) 913-0823 email: mayra@newcity.nyc 10:56 AM:- sent email to Dave including contact number for Ms. Rojas. asked Dave to contact her to schedule sampling. email copied to Ms. Rojas. 06/20/16-Hiralkumar Patel. 11:41 AM:- received email from Melissa from TestAmerica requesting call-out for lab. 11:55 AM:- sent email to Melissa including copy of standby contractor authorization form. 12:02 PM:- received email from Dave. he has collected samples from three wells and composited into one sample for disposal classification. he mentioned that based on site condition and use, it may take two days to complete the sampling. 06/24/16-Hiralkumar Patel. approved EnviroTrac's invoice (# DC2069.00-1) for project coordinate, file review and calls to property owner/lab. 07/05/16-Hiralkumar Patel. 8:36 AM:- received email from Shalini Williams (shalini.williams@testamericainc.com) from Test America including results of waste classification sample. 07/22/16-Hiralkumar Patel. 9:21 AM:- received email from Dave requesting signature on waste characterization report as generator for disposal of purge water from site. 07/27/16-Hiralkumar Patel. 10:22 AM:- sent email to Dave including signed copy of waste characterization report. approved EnviroTrac's invoice (# DC2069.00-2) for project management, sample collection for disposal parameters and coordination with lab. 8/23/16-Vought-Received email from EnviroTrac (Lorthior) on 8/17 requesting a contract increase on this spill as Albany recently rejected an invoice as amount was over the callout. Vought sent email reply on 8/18 to Dave with cc to RSE and DEC Patel that Dave, If you can provide the spill number, brief scope of the ongoing and upcoming work (in three or four sentences), and an approximate estimate, we will have someone take care of it and get back to you, most likely me. On 8/22/16, Vought received email

STATION 800, LLC (Continued) **U000414037**

from Lorthior with cc to RSE and DEC Patel that Attached is the original call out. Job was for a few days of sampling at the site. Problem was we were handed the job, but knew nothing about it. We spent quite a bit of time gaining access to the site and making sure the wells were A) accessible (small site, lots of parked cars) and B) the wells were actually usable. Sampling was the easy part. We had a budget of $5,000.00. Between the initial site visits to figure out what we needed to do, the sampling and the waste disposal, we are up to $6,325.00. Vought increased Work Authorization and submitted to RSE for signature. 8/29/16 TJD Test America C008010 Petroleum CAP #56 was approved. Document already in DECDOCS. 08/31/16-Hiralkumar Patel. DEC Vought sent revised standby contractor authorization form to EnviroTract on 08/23/16. 9:57 AM:- sent email to Dave and asked him to submit sample results for review. 10:22 AM:- received email from Dave including sample results. groundwater analyticals:

---6-------53--------26 out of fourteen (14) wells installed
previously, only thirteen wells were sampled. well MW-4 was not
sampled. based on review of recent groundwater sampling, the
department requires further groundwater monitoring and possibly
remediation. 12:16 PM:- left message for OAG Jennifer. 1:28 PM:- sent
email to OAG Jennifer requesting copy of correspondences
sent/received by AG's office in this matter after Mar. 8, 1999. email
copied to OAG Riggie and DEC Austin. 12/14/16-Hiralkumar Patel.
approved Test America's invoice (# 46265898) for analysis of
groundwater samples collected in Oct. 2016. 01/12/17-Hiralkumar
Patel. approved EnviroTrac's invoice (# DC2069.00-5) for project
management, well gauging and groundwater sampling.
01/29/19-Hiralkumar Patel. reviewed initial documents from 1993/1994.
as per subsurface investigation report dated 04/06/1994, highest
level of free phase petroleum product (in MW-8) and dissolved VOC
contamination (in MW-9) were noted in middle of property near the
tank mat. also as per the report, the reduced levels of dissolved
BTEX in the perimeter wells indicate that the center of the plume is
defined on the subject property. as per PBS record, seven (7) 550 gal
gasoline USTs were closed-in-place in June 2000. DEC Vought and DEC
Krimgold reviewed PBS record on 05/14/09 and noted that closed USTs
were never tightness tested. as per ISR issued on 09/30/1996, the
subject site was listed as spiller and the Department took over the
spill investigation/remediation due to owner's lack of concern
(financial inability). as per NYC ACRIS records, Bejamin Hadar
purchased the subject site on 06/07/1985 and transferred deed to
Steady Realty LLC. as per the NYS Department of State Division of
Corporations, Bejamin Hadar is listed in mailing address for Steady
Realty LLC. 1:19 PM:- sent text message to Ms. Rojas requesting a
call back. 2:05 PM:- spoke with Mike Alvin at Alvin Petroleum who
provides tank system maintenance service to the site. Mike remembers
spill investigation in 1993, but doesn't know who paid (property
owner or Amoco) for initial investigation conducted at the site. Mike
stated that Jose Pimentel is dealer for the site and generally calls
for any required maintenance. 2:11 PM:- spoke with Mr. Pimentel. he
manages maintenance/inventory of existing tank systems since 2012.
Mr. Pimentel conducted a subsurface investigation in 2012 prior to
start managing tank systems. he stated that property owner owns tank
systems and BP provides fuel. asked Mr. Pimentel to submit copy of
Phase II report from 2012. Jose Pimentel **on-site tenant** Station
800 LLC. PH. (917) 893-2253 email: republic052@yahoo.com 2:42 PM:-
sent email to Mr. Pimentel and Ms. Rojas. asked Mr. Pimentel to
submit copy of subsurface investigation conducted in 2012. asked Mr.

STATION 800, LLC (Continued) **U000414037**

Rojas to call back to discuss requirements for further investigation/remediation at the site. 3:09 PM:- sent email to OAG Jennifer requesting information as per email dated 11/03/16. email copied to OAG Riggie. **need Phase I for historical tank system locations.** **two PBS #s for the site. one PBS registration (for waste oil tank) expired in 2014.** **site map with sample analyticals on H drive.**"

DEC Memo:	"09/29/16-Hiralkumar Patel. alternate address: 120-138 W 145th Street PBS #: 2-297607. as per PBS record, the site has/had following tanks: - five (5) 4,000 gal gasoline/ethanol USTs, in-service, installed in Jun. 1993 - one (1) 550 gal other product UST, in-service, installed in Jun. 1993 - two (2) 2,000 gal gasoline USTs, removed in May 1993 - four (4) 4,000 gal gasoline USTs, removed in May 1993 - one (1) 550 gal other product UST, removed in May 1993 other spills #: 8606425, 9210186, 9212043 spill #: 8606425 was reported on 01/15/1987 due to tightness test failure of gasoline tanks. case closed. spill #: 9210186 was reported on 12/02/1992 due to tightness test failure of two (2) 4,000 gal and one (1) 2,000 gal gasoline tanks. case closed. spill #: 9212043 was reported on 01/21/1993 due to petroleum vapor coming up from ground. case closed. 3:18 PM:- spoke with Mr. Butler at Speedway. he mentioned that the site is owned by Hess, which has now merged with Speedway. currently, Speedway is closing gas station on-site. they have removed on-site tanks. the tanks were found in good condition. during removal of remote fill line, they came across some historical contamination under the sidewalk. Speedway will continue soil remediation and will collect endpoint samples. they

FORMER MERIT/FORMER HESS STATION (Continued) **S118952119**

will remove dispensers and associated piping. Hess Retail Stores LLC. **property owner** c/o Speedway LLC. 500 Speedway Drive Enon, OH 45323 Attn.: Matthew Butler (105 Fieldcrest Ave., 5th Floor Suite 505 Edison, NJ 08837) Ph. (732) 738-2756/2924 email: mbutler1@speedway.com Edward Russo EnviroTrac **contractor working for Speedway** Ph. (631) 924-3001 email: edr@envirotrac.com 09/30/16-Hiralkumar Patel. 2:51 PM:- sent letter to Mr. Butler requiring endpoint samples. asked him to submit report by the end of 11/18/16. letter emailed to Mr. Butler, Ed and DEC Zhune. case assigned to DEC Zhune. 12/6/16-Vought-This spill reassigned from DEC Zhune to Vought as Vought assisted Zhune with review, Zhune out of office, and impending property transaction and request for expedited review. Vought received email on 11/21/16 from Speedway (Mathew Butler email:mbutler1@speedway.com Ph:732-738-2924) that Jeff, We appreciate the DEC s time today to discuss the UST closure and the historic details of closed Spill #9212043. As requested, attached are copies of the documents associated with the historic Spill that supported DEC closure, as well as a copy of the NFA letter. The documents provided include: 1995 UST Closure Report prepared by GES, 700 tons of soil was removed from the site during the project. 1996 Site Assessment Report prepared by GES summarizing installation of four monitoring wells (MW-1 through 4). 1998 Remedial Investigation Report prepared by GES summarizing a 1996 GeoProbe investigation and slug test. 2004 1st Quarter Update Report prepared by EnviroTrac. April 22, 2004 No Further Action Letter. The property is being sold to an adjacent property owner who has interest in the air rights. Based on recent conversations with the buyer there is no current plans for site development. However, if development occurs the future use of the property is restricted to allow industrial/commercial use, limit residential use to upper floors and require a vapor barrier/vapor mitigation system be installed for residential use. The specific language in the sale agreement restricting property use is provided below. The use of the Property shall be restricted solely to (i) industrial/commercial use within any portion of the improvements located at the Property, and (ii) to the extent permitted by applicable zoning, residential use on and above the second floor of any improvements located at the Property; provided that any residential use at the Property shall be further conditioned on the installation and maintenance of a vapor barrier and vapor mitigation system at the Property. The installation and/or existence of potable wells on the Property is prohibited. The groundwater underneath the Property shall not be used for any purpose whatsoever. This restriction, however, does not prohibit the installation or use of any compliance wells, or any groundwater monitoring, recovery or extraction wells or similar devices, used for or related to the performance of any Corrective Action. The recent tank removal and corresponding closure sampling do not indicate the presence of a new spill condition associated with this tank system. With the exception of a small area of petroleum impacted soil near the remote fill, which was fully removed through excavation, field observations made during the tank removal did not identify any petroleum impacted soil surrounding the tanks. The impacted soil within the area of the tank field was identified three feet below the tanks under a two foot thick concrete pad (tank anchor). The pea gravel and concrete below the tanks showed no evidence of petroleum impacts. As shown on Figure 2 of the attached 1998 RIR, the former tank system that was removed in 1994 was located immediately adjacent to the recently removed

FORMER MERIT/FORMER HESS STATION (Continued) **S118952119**

tanks. Based on this information, the conditions identified beneath the tank anchor do not represent a new Spill condition and appear to be associated with Spill #9212043. In addition, all soil VOC concentrations were detected below Part 375 Restricted Use Soil Cleanup Objectives (Commercial) and the future use will be restricted as detailed above. Speedway requests DEC closure for Spill #1606459, as this is a re-reporting of closed Spill #9212043. Again, we appreciate the DEC s timely review of the information provided as it will greatly assist us in finalizing the property transaction, as the sale is scheduled for the very near future. Feel free to contact Ed Russo at EnviroTrac or myself if you have any questions. 12/6/16-Vought-Reviewed email above with attachments including reports from closed spill 9121043. Reports for that spill document the following: Soil contamination up to 145,800ppb Total BTEX that was left in place after a tank upgrade around 1/95; Soil contamination left in place around the dispenser islands up to 21,870ppb Total BTEX; Soil contamination around the former waste oil UST left in place up to 139ppb Total BTEX; Removal of 701 tons of contaminated soil during this upgrade; Groundwater at depths of 12-15'bg; measured groundwater flow to the southeast; attenuation of groundwater samples (including those down-gradient of former tanks, dispensers, waste oil tanks) from 9/94 through 1/04; groundwater levels in 1/04 that were within natural attenuation ranges as per prior guidance from DEC Central office; no sensitive down-gradient receptors (commercial grocery store down-gradient with basement likely above water table). This spill closed as this spill was for discovery of contaminated soils around the former UST pad (already historically documented via closed spill 9212043) and contaminated soils around remote fill port (which were excavated fully to below Unrestricted SCOs) as per Speedway. Spill also closed as down-gradient impact of spills previously documented under spill 9212043 to be naturally attenuating and spill is not a threat to the wider community as per guidance from DEC Central Office. Spill also closed and soil contamination removal not feasible as per CP-51 Guidance and prior guidance from DEC Central Office. Furthermore site also has a sale agreement restriction to only commercial industrial use on ground floors and notes a vapor barrier/mitigation system will be installed if the property is ever developed as residential. Spill also closed as Spill Closure letter to include standard cautionary statement on possible necessity of vapor mitigation if site use ever changes. Spill also closed as all source USTs and piping are no longer being used and as such no petroleum source remains. Vought added summary site plans to D2. Vought sent email to Speedway (Butler) with cc to Envirotrac (Rennnie and Russo) that Matt, Thanks for your patience on the review. Unfortunately Veronica has not been feeling well and has been out of the office for the past week. Due to the impending property transaction, I have reviewed the files you sent as well as the current data, and the Department has closed the above referenced spill effective today. What is the address for the Spill Closure letter? Thanks . 12/6/16-Vought-Received reply from Butler that Jeff, Thanks for the review, I understand you guys have heavy case loads. Please send the NFA letter to our corporate office to my attention. Speedway LLC 500 Speedway Drive, Enon, OH 45323 Could you also please email me a copy of the NFA letter? Thanks Vought drafted Spill Closure letter, added to D2, sent via US Mail, and sent via email to Butler with cc to Rennie and Russo. 2/22/17-Vought-Received email from DEC Rivera on 2/22/17 that Good

FORMER MERIT/FORMER HESS STATION (Continued) **S118952119**

Morning,I received an inquiry from the Assemblyman s office where this site is. It seems to be a former Hess gas station that is now gated. They are asking if we have anything on file at this site or any info on what s going on here. Does the address pop up in anyone s program? RSE replied to Rivera with copy of these spill notes."

Remarks: "spill is contained and clean up is in progress"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SUN 04/22/2004-File Update by Sun: -Update Report (October 2003 through January 2004) by EnviroTrac: Four (4) monitoring wells were gauged and sampled on 1/30/2003. THe depths to groundwater ranged from 13.95 to 15.65 feet below grade. Groundwater flow direction was towards the southwest. No free product was detected in any of the monitoring wells. Based on the groundwater sampling data of this report and based on overall downward trend of chemical concentrations of compounds over the last three sampling events, and no sensitive receptor is located uo and down-gradient of MW-4, this spill is closed."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 141th St & 7th Ave (Morningside heights) 173 West 141 St (sump building) 2419 7th Ave (Tank building) 05/02/01 (M. Tipple) APPLIED TECHNOLOGY SERVICES (914-654-0080) NEIL VANDERWOUDE WILL BE THE CONTACT PERSON FOR THIS CLEANUP AN ELEVATOR PIT IN AN ADJACENT BUILDING IS CURRENTLY BEING THE UNPLANNED RECOVERY PIT. tHE LEAKING TANK IS AN 3000 GAL. ABOVE GROUND VAULTED TANK. IT WAS DRAINED SOON AFTER DISCOVERING THE LEAK. IT IS CURRENTLY BELIEVED BY THE CONSULTANT THAT VIBRATION FROM A NEARBY CON-ED EXPLOSION MAY HAVE BEEN A FACTOR IN THE TANK LEAKING. THE CONSULTANT WILL BE WORKING ON DELINEATING THE CONTAMINATION. 5/17/2001 - Notes above were entered while Sangesland was away. Contact: Steve Vanderwoude from Applied Technologies. Tank is out of service (temporarily for the season) Shortly after the Tank and oil(elevator) pit are 30 to 40 ft apart (in next door building) Same owner on both buildings. 8/15/2001 Sangesland called both RP - Jeffery Garfinkel 212-967-2200 and the consultant Neil Vanderwoude. Neither was in so messages were left. 6/20/2002 Sangesland called both RP - Jeffery Garfinkel and consultant Neil Vanderwoude again. Once again neither was available

REPUBLIC INVESTMENT CO (Continued) **S104951161**

and messages were left. 3/26/2004 Sangesland called both RP - Jeffery Garfinkel and consultant Neil Vanderwoude again. Once again neither was available and messages were left. 6/15/2006 Sangesland called both contact numbers associated with this case. Voice messages were left again. 9/14/2010 Mr. Mike Guarino (fax 212-807-0534) contacted Sangesland and asked what work would be needed to close out this case. Requirements: Site plan, Photos, Soil borings of area between tank and elevator pit next door, lab results showing the area is clean. Consultant needs to call DEC Sangesland to discuss, before any testing work is done. Copy of this report was faxed to his office. 10/12/2011 Sangesland reviewed a report prepared by Merritt Environmental Consulting (see eDocs) Which showed that there was no petroleum present on the site. Various borings were drilled, elevator shaft was inspected and drains traced. Any oil which may have been on the site in 2001 is no longer there. Based on this report, the NYSDEC is closing this case."

Remarks: "contaminated soil found surrounding a partially exposed tank. tank was filled with approx 3000 gals - unknown how much still in tank."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 2/28/2004 Sangesland spoke with property manager Mr. Helman. He said the spill was all cleaned up by Summit Transport. Sangesland spoke to super Leo (212-926-2021). He said the basement and outside looked very clean. He also said Summit hired AL Eastmond for the cleanup. Leo lives at 28 St Nicholas - Apt #1A Issac at AL Eastmond says the liquid in the basement was cleaned by Summit (973) 777-0404, but the long term oil problem in a pit outside the vent line was powerwashed by PTC (718) 624-4842. Issac does not know how the oil came into the basement, He will check it out and get back to the DEC with the information. 4/27/06 - Austin - Spill inadvertantly assigned to CO staff (Keating) - reassigned to Ketani 7/13/06 - Raphael Ketani. I spoke to Issac of Eastmond (718) 378-3000 regarding the site. He said that he didn't remember the site, but would look it up and get back to me. 8/7/06 - Raphael Ketani. I tried calling Summit to find out what involvement and documentation they have regarding the spill. However, I could only leave a voice mail for Mark Rosen. I tried getting ahold of Isaac of Eastmond, but he wasn't in. I will try tomorrow. 8/9/06 - Raphael Ketani. I called up Diana Parker at

APARTMNET BUILDING (Continued) **S106468509**

PTC and asked her for documentation for this site's cleanup. She said there was nothing in PTC's records for this site address and that PTC hasn't done a cleanup for Summit in a very long time. Next, I called up Isaac of Eastmond and he said that he found an invoice and paid bill for the site. He FAXed it to me. The documents show that a cleanup was done at the site. There was power washing of the sidewalk, walls, and a pit outside the vent line. Also, 2 bags of debris were removed and soap was used to clean up the site. Based upon these documents, I am closing the spill case. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was RODRIGUEZ E2MIS 147773 4/4/2003 @ 0210 On 4/4 @ 01:53, V Mannino # 56899 of I&A reported to me that while working on 2M23 in VS-8863 he discovered approx 8 gallons of Transformer fluid on the floor and in the concrete sump. He stated that sewer/waterway may be affected because when he put a pad in the exit pipe he saw fluid on the pad, but at this time there is no definite indication that the environment was in fact affected. According to Conduit plate 57-G-1 there is a sewer connection. He disconnected the pump. The source of the spill was the Transformer and the cause is damaged equipment. No initial cleanup has been taken Lab Sequence Number: 03-02812-001 TOTAL PCB 35 ppm 4/4/03 The tanker removed 190 gallons of oil from the unit and 125 gallons from the floor the unit oil capacity is 315 gallons. The vault was double washed with slix and all debris was removed by the flush truck. Final cleanup pending removal of the transformer. 4/30/03 cleanup is complete as of 115. Double washed with slix and flushed. "

DER Facility ID:	335557
DEC Memo:	"10/1/07 Sent ttf letter to: Danny hakakian Vintage Realty LLC 3154 Albany Crescent Bronx, NY 10463 Called Mr. Hakakian (718)796-9595. I left message to call me. bf 07/16/13 - Spill Case is transferred from Brian Falvey (PBS Unit) to V. Brevdo (Section B) as per DER Region 2 decision - Tank Test Failure Spill Case. VB 11/22/17: TC Steve Becher, 917 747-7333, what needs to be done to close out spill, requested call back as soon as possible, has a tank test company on standby, has a closing scheduled for this Friday. His email address: bechershauli23@gmail.com, sent email to VB - JAA 11/22/17 - V. Brevdo Returned call to Mr. Becher 917 747-7333 and explained what needs to be done from standpoint of closing the spill case: Tank testing company or qualified remedial consultant must examine and test the tank. If tank and system pass test and contractor concludes that no product release occurred and no impact to the subsurface of the building, and no impact to the environment, than spill case closure request can be filed with the Department with appropriate explanations and rationale. If release occurred, then soil sampling may be needed. Also suggested that Mr. Becher contact Leszek

APARTMENT BLDG (Continued) **S108765594**

Zielinski, PBS Unit to find out what the exact requirements for complying with PBS regulations as tank is overdue for retesting. I provided Leszek s contact information. Mr. Becher thanked and stated he understands spill closure requirements and will contact Mr. Zielinski for PBS matters. VB 11/29/17 - V. Brevdo Received e-mail from All Boro Tank Testing and managing agent for the property. Tank Test Report demonstrated that the tank passed 11-29-17 test. All Boro Tank Testing technicians did determine that the reason the tank originally failed the test back on 8/20/2007 was possibly due to a bad compression vent fitting on the tank, which was a dry leak. All Boro Tank concluded that No product/oil escaped the tank nor was released into the environment. When All Boro Tank performed first test on 11/27/17 - tank was leaking air. All Boro Tank replaced faulty fitting with a new one. Once that was done, All Boro re-tested the system and obtained a pass (All Boro submitted tank test pass report). Vintage Realty requested spill case closure. e-mail from All Boro Testing in support of spill case closure request: Vadim, Hi I would like to present the facts as they relate to the recent oil tank testing at the aforementioned location. All Boro Tank was contracted to perform a Certified Tank Test on the 5,000 Gallon AST on site. Apparently, at this location there had been a previous tank test conducted resulting in a failure and the opening up of spill # 0705794 dated 8/20/07. All Boro s technicians conducted a full system tank test on 11/27/17. The result of that initial test was failure due to a DRY leak being identified. This Air leak could be heard on both the in tank microphone, and it could also be heard if the technicians stood next to the vent line. Men identified the source of the leak to be coming from the compression fitting used on the vent line. When testing tanks in the past with this type of fitting has caused tests to fail as they never seem to seal quite right for this type of testing. It was concluded that this leaking fitting was probably the same reason for the initial tank test failure back in 2007. Technicians changed out the compression fitting with the standard black pipe type and re-tested the entire system. The result of the second round of testing was a Pass. All Boro has corrected the problem with the tank and can state that no oil had been released at any point. With that we respectfully request closure of spill # 0705794 at your earliest convenience. Thank You for your assistance in this matter. The Department closed spill case on 11-29-2017. VB "

Remarks: "caller did not have actual access to tank "

DER Facility ID: 339417
DEC Memo: "11/15/07 bf: Called Cromwell Barrington of Hospital (917)417-0257. Dry leak. Waiting for proposal for repair. I told him not to put any more fuel in tank until repairs aare made and tank passes retest. I also told him the registration is expired. he said that is why tanks are being tested. Sent ttf letter to: James Cullen Harlem Hospital Center 506 Lenox Avenue - 3rd floor New York, NY 10037 1/3/08 On 12/24/07, received letter from Neeraj Kumar of Environmental Engineering Solutions. Letter included tightness test results. Tank #1 (south) failed and Tank #2 (north) passed. Letter states that the facility has immediately begun the the process of clean up of any contamination. No leak was found and facility is waiting for quotes to repair or replace the failed tank. He requests 12 months for the required remedination. Called N. Kumar (914)788-4165. They still do not know why tank failed. As of now, no leaks found. Hospital is undecided as to replacement or repair. He is going to call me back on tank status (is is being used? is it empty?) bf 1/15/08 Spoke to Supnil of Environmental Engineering Solutions. tank is emptied and not being used. Next week, director's meeting will be held to determine whether to remove the tank or repair the tank. I told him the hospital is in violation since the registration expired in November. Also told him 12 months is unacceptable. bf 5/22/2008 Sangesland sent a TTF 2nd notice letter to: James Cullen Harlem Hospital Center 506 Lenox Avenue - 3rd floor New York, NY 10037 12/18/08 Yesterday, received message from Bryan Shaw of Warren Panzer Engineers (212)922-0077 x260. I called back today and he told me he wopuld email closure letter. I told him registration expired. Received letter and tank test results by email from B. Shaw. Tank failed because of manhole gasket. Tank was retested and passed. Test report is not acceptable because gw determination was not provided. Sent email to B. Shaw requesting gw determination. faxed registration renewal application to him. Sent tt return letter(see PBS 2-607214). bf 6/1/09 recieved letter from Empire on Friday. NFA. bf 5/22/09 Received call from Bryan Shaw regarding status. I explained that an acceptable tank test is required. Tank test returned because of gw determination. E-mailed him tt return letter dated 12/18/08. Received call from michael of Empire Environmental, the tank testing vendor for the site. He explained that Estabrrok's does not require water sensor test or gw determination if tank is empty and after test the tank is checked for tightness. I told him to send me a letter explaining this. bf "

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 3/14/03 REASSIGNED FROM ROMMEL TO VOUGHT. 6/27/2003-Vought-File review by Vought: Tank Upgrade Report-Dec 1998-Tyree Brothers Environmental Services (Paul Hatcher 631-249-3150)- Adjoining six-story building to the west, adjoining two story buiildings to the east and north. Merit service station across W145th Street. Four (4000-gallon) gasoline USTs upgraded. Soil excavated to approximate depth of 3' below grade. Six soil endpoint soil samples taken (analyticals provided). Soil analyticals show concentrations up to 47000ppb toluene (S5), 1603000ppb xylene, 88800 ppb napthalene and 19300ppb MTBE. 84.24 tons of soil excavated and removed (disposal manifest provided). Subsurface Investigation Report-Dec 2000-Tyree-Eleven soil borings performed using Geoprobe. Perched groundwater was encountered at approximate depths of 10-15bls . Soil analyticals show concentrations up to 8060ppb benzene (SB7), 288000ppb toluene, 16200ppb MTBE (SB8), 70300ppb napthalene. Groundwater analyticals show up to 6470ppb benzene, 29600ppb toluene, and 172000ppb MTBE. Quarterly Monitoring Reports-March 2001 thru Sept 2001. Four monitoring wells on-site. Remedial activities are EVR/Remediation Assessment. Two additional wells installed in 7/1. Groundwater concentrations up to 3820ppb benzene (W1), 1770ppb toluene(W1), 26940ppb xylene (W5) and 445000ppb MTBE (W4). Pilot Test Report and SVE and DPE-Nov 2002-Tyree-See RAP comments (June 2003) for pilot test results. Tyree proposes DPE due to higher radius of influence than SVE. 3/29/2003-Vought-Received email from Paul Hatcher that 2 of product was found in W5. Product was bailed. Monitoring and bailing began weekly. Quarterly Monitoring Reports-Oct 2002 thru Dec 2001. Six monitoring wells on-site. Remedial activities are EVR/Remediation Assessment. Free product (.02') in W2. Groundwater concentrations up to 2100ppb benzene (W1), 6180ppb xylene (W5) and 348000ppb MTBE (W4). Letter to NYSDEC-Feb 18, 2003-Letter sent to NYSDEC by Tyree requesting Stipulation Agreement so that Tyree could proceed with proposed system design and installation. In letter Tyree states that they previously submitted a Soil Vapor Extraction and Dual Phase Extraction Pilot Test in Nov 2002. 4/17/2003-Vought sent Stipulation, CAP, Guidance Document and cover letter to Kevin Shea (Getty Properties). 6/3/2003-Vought-Received signed stipulation agreement from Getty. Quarterly Monitoring Reports-Jan 2003 thru March 2003-Tyree-Six monitoring wells on-site. Groundwater concentrations up to 3550ppb benzene(W1), 2330ppb toluene(W1), 12700ppb xylene(W4) and 59800ppb MTBE. No free product in wells. Four dual phase extraction wells (DPE) wells were installed for future remediation system. Borings logs and soil analyticals provided. Soil concentrations up to 2180ppb benzene(E4), 3740ppb toluene(E4) and 4140ppb MTBE(E4). Proposed Remedial Action Plan-June 2003-Tyree-Depth to perched groundwater is ten to twelve feet. Groundwater flows to the east. During installation of wells W5 and W6 two ghost tanks found and could not be removed due to their location underlying operational pump island (both tanks were filled with water with no measurable product). Review of historical maps by Tyree suggested that there are possibly eight additional tanks on-site. Free product found in wells W4 and W5. A radius of influence of 16 was estimated by pilot tests, therefore conventional SVE would not accomplish treatment goals. A following pilot test of DPE indicated groundwater pumping in the DPE created a zone of influence exceeding 25'. Soil

GETTY#58409 (Continued) **S108637243**

heterogeneities cause vapor flow rates to be less than 40cfm. Tyree proposes installation of DPE system of five extraction wells with liquid ring vacuum pumps. Estimated fluid extraction rate is 10gpm. Extraction wells installed in Apr with radius of influence of 20'. Fluids will be processed through a oil/water separator, air stripper and liquid phase carbon unit. Treated groundwater will be discharged into storm sewer. Vapors will be scrubbed using activated carbon asdorbtion. Monthly air samples will be collected and analyzed for NIOSH 1501. Discharge of wastewater will be monitored weekly for 30 days then monthly thereafter. Tyree requests written approval of RAP. 6/27/2003-Vought-NYSDEC requires 1)off site delineation 2)surrounding area site plan, sensitive receptor monitoring schedule and data 3)Additional copies of Site status report and Remediation Report of Aug 2002 (Vought-never received these documents) 4)Investigation of eight additional tanks referred to in RAP. These requests must be satisfied before RAP approval. Vought sent email to Tyree (Hatcher) on 7/2/03 with above requirements. Quarterly Monitoring Reports (Tyree) July 2003 thru Dec 2003. Five monitoring wells onsite, one monitoring well/dual phase extraction well and four DPE wells for future remediation system. DPE wells were installed 4/10/03-4/11/03. Groundwater flow to the northeast. .15' of LNAPL in MW15. Trenching to connect all DPE wells completed in 7/03. Awaiting purchase of DPE system and permits for system . Groundwater concentrations up to 1020ppb benzene(W1), 865ppb benzene(W2), 1420ppb benzene(W3), 1560ppb benzene(W4), free product(W5), and 14ppb MTBE(W6). Monthly monitoring and bailing to recover free product. 2/19/04-Vought-Sent letter as per CAP rejecting RAP until the following requirements are met: 1)delineation to the west of W3, east of W-1, northwest of W2, downgradient from W4 2)inclusion of W5 in DPE system due to free product 3)surrounding area site plan. Vought sent letter with above requirements on 2/19/04. 5/1305-Vought-New file review by Vought: Quarterly Monitoring Reports (Tyree Org)-July 2004 thru Dec 2004. Wells onsite include: five monitoring wells, one monitoring well/dual phase extraction well, and four DPE wells for future remediation system. Groundwater flow to the east-northeast at depths of 10-12' below grade. Groundwater analyticals show: 2600ppb benzene(W1), 1370ppb toluene(W1), 1200ppb ethylbenzene(W1), 5640ppb xylene(W1), 3690ppb MTBE(W1), 1490ppb benzene(W3), 699ppb toluene(W3), 242ppb ethylbenzene(W3), 652ppb xylene(W3), 3750ppb MTBE(W3), no sample(W4), no sample(W5), 11ppb MTBE(W6). 5/13/05-Vought-DEC no longer requires delineation upgradient of source but however still requires: 1)addition of MW5 to DPE or affirmation of inclusion in ROI of DPHVE system. Vought sent email with requirements. Vought received email from J Rennie that MW 5 was tied into DPHVE. 08/31/2005 - Feng - Project transferred from Vought to Feng. 11/15/2005 - Feng - Dual Phase Extraction System is installed and ready to run. However, it is still awaiting electric approval from NYC Electrical Control Board/Cod Edison. 12/19/2005 - Feng - Quarterly Monitoring Report, 7/2005 - 9/2005. The site is currently an active gasoline station & convienience store with car wash. Groundwater flows to east at the depth of 10.81' to 11.99' bg. There are 5 monitoring well, 1 monitoring/extraction well and 5 extraction wells. W-1, rapid increased and 49,390 ppb BTEX, rapid decreased and 804 ppb MTBE. W-2, rapid increased and 12,163 ppb BTEX, decreased and 8,500 ppb MTBE. W-3, decreased and 7,187 ppb BTEX, decreased and 3,540 ppb MTBE. W-4, increased and 3,638 ppb BTEX, decreased and 2,180 ppb MTBE. W-5, increased and 6,135 ppb BTEX, increased and 120 ppb MTBE. W-6,

GETTY#58409 (Continued) **S108637243**

increased and 32 ppb MTBE, 10 ppb MTBE. Absorbent sock in W-5. Still waiting for electrical approval. (RJF) 1/17/2006 - Feng - Quarterly Monitoring Report, 10/2006 - 12/2005. The site is an acitve gasoline station & convienience store with car wash. Groundwater flows to east at the depth of 10.14' to 11.43' bg. 5 monitoring wells, 1 monitoring/extraction well and 5 extraction wells onsite. W-1, 48,920 ppb BTEX, 1,470 ppb MTBE. W-3, decreased and 4,467 ppb BTEX, 3,150 ppb MTBE. W-4, increased and 6,912 ppb BTEX, 2,410 ppb MTBE. W-6, low and 1 ppb BTEX, 13 ppb MTBE. Absorbent socks in W-5. Still waiting for electrical approval for the system installed onsite. (RJF) 1/17/2006 - Feng - Emailed to Joe Rennie asked about the status of the site, and the reason why couldn't get the electrical approval. (RJF) 2/13/2006 - Feng - Emailed to Joe Rennie requested the status of the pending electrical approval from ConEd. (RJF) 2/13/2006 - Feng - Reply from Joe Rennie Please be advised that Tyree has tried making contact numerous times via phone and faxes with the electrical sub-contractor requesting the status in this matter. When Tyree was able to make contact with the sub-contractor, it was told to us that they did not hear back from the ECB and that they will make a follow-up phone call to check on the status. At this point, the only thing that Tyree can do is to keep contacting the sub-contractor. If NYSDEC has any suggestions, we are surely open to them. (RJF) 2/14/2006 - Feng - Emailed to ConEd requesting status of the project and reason why electric service hasn't granted yet. and asked for the contact information of the project manager. (RJF) 2/14/2006 - Feng - Joe Rennie emailed the contact information of ConEdison. (RJF) 2/15/2006 - Feng - Letter requesting assistance in gaining electrical approval from ConEdison to Kevin Gallagher via fax: 212-673-1729 and certified mail. (RJF) 2/15/2006 - Feng - Called from Antonio Alaimo (ConEdison) and follow up by email. He called Mr. Godsil (Tyree's sub-contractor) on 1/26/2006 and Godsil is still waiting for the certificate from the city before ConEd could install a new meter. He said once the certificate is on hand, ConEdison will take care of this case right away. (RJF) 2/15/2006 - Feng - Called Harry Godsil (516-827-5324). He said that they re-filed for certificate and done the re-wiring. He willl follow up with the Electric Board and ConEdison. It will be all set in a couples weeks. (RJF) 3/8/2006 - Feng - Called Harry Godsil and left message if he got the certificate from the city yet. (RJF) 3/17/2006 - Feng - Faxed Harry Godsil a message and inquired the status of the power supply for the remediation system for this site. Requested the contact information if he haven't received the certificate from the city yet, such as contact name, address, phone# and fax#. (RJF) 3/29/2006 - Feng - 3/28/2006 Letter faxed to NYC Department of Buildings - Electrical Division and requested assistance in obtaining the electrical certificate. Called from Inspector Diamond (212)566-3812 saying that they never received any application for that. Emailed Joe Rennie and asked him to look into this problem. (RJF) 4/4/2006 - Feng - Email from DOB Bonnie Gerard. She stated that their inspector visited the site and found some violation. And DOB will be expedite Getty's sub-contractor's application. Feng Forward the violations list to Joe Rennie and strong recommend him to hire another electrican to remove the violation and then to run the system. (RJF) 4/6/2006 - Feng - Email Joe Rennie requested about the status of electrical work for the site. 4/7/2006 - Feng - Email from Joe Rennie I have another electrical contractor working on it. The contractor was in our office on Wednesday and Paul Hatcher and myself spoke to him. He assured us

GETTY#58409 (Continued) **S108637243**

that he will follow up with the NYC DOB. As far as Con Ed goes the paperwork was filed and a case number has been assigned, it's the NYC DOB that doesn't have the necessary paperwork to proceed. (RJF) 5/4/2006 - Feng - Quarterly Monitoring Report, 1/2006 - 3/2006. Active gasoline station and convenience store with car wash. Groundwater at 10.59' to 11.56' bg and flows to east. Sampling and gauging as of 3/21/2006. There are 5 monitoring, 1 monitoring/extraction, 5 extraction wells. W-1, 0.04' FP. W-3, increased and 13,227 ppb BTEX (1,870 ppb B, 6,010 ppb T, 647 ppb E, 4,700 ppb X), 3,180 ppb MTBE. W-4, decreased and 4,651 ppb BTEX (1,750 ppb B, 31 ppb T, 1,050 ppb E, 1,820 ppb X), 1,230 ppb MTBE. W-6, 5 ppb BTEX, 16 ppb MTBE. Noted that absorbent sock in monitoring well (W-1). Electrical contractor waiting on Co Edison and NYC Electrical Control Board for installation approval and final inspection. (RJF) 6/27/2006 - Feng - Dual Phase Extraction System startup. DEC staff Sun, Feng, Andersen, and Krasweski were onsite to witness this event. (RJF) 11/9/2006 - Feng - Quarterly Monitoring Report, 7/2006 - 9/2006, 10/9/2006, by Tyree. Active gasoline station and convienience store with car wash. Sampled and gauged on 9/28/2006. 5 monitoring wells, 1 monitoring/extraction well, and 5 extraction wells. DTW 10.35' to 11.29' bg. Flows to easterly. LNAPL in MW-1, 0.30 feet. BTEX range ND to 17,637 ppb. MTBE range 1 ppb to 2,740 ppb. (RJF) 2/7/2007 - Feng - Quarterly Monitoring Report, 10/2006 - 12/2006, 1/2/2007, by Tyree. Groundwater sampled and gauged 12/27/2006. 5 monitoring, 1 monitoring/extraction and 5 extraction wells. DTW 9.92' to 11.98' bg. Flows east. LNAPL in W-1 (0.12'). W-3, 4,249 ppb BTEX, 700 ppb MTBE. W-4, Not accessible. W-6, BTEX ND, 4 ppb MTBE. (RJF) 5/17/2007 - Feng - New Spill 07-01951 called in. The caller stated that there is product in the monitoring well. Contacted Tyree to see what happened. (RJF) 5/17/2007 - Feng - Rob. S (Tyree) called back and he will send a field technician to the site and gauge those monitoring well. Product will be sampled if any were found in the wells. Will call back tomorrow with the gauging results. (RJF) 5/18/2007 - Feng - Email from Joe Gavin (C2G Environmental Consultants) to DEC Jacob Krimgold. During the Third Party Audit Inspection conducted 5/17/2007, some PBS violation were found and the station has been closed. (RJF) 5/23/2007 - Feng - Email updates from Rob. S (Tyree). A field tech was there yesterday and this morning. One monitoring well with 0.01' of product, the others including the dual phase ones has no product. (RJF) 6/26/2007 - Feng - Quarterly Monitoring Report, 1/2007 - 3/2007, 4/2007. Groundwater sampled 4/2/2007. 5 monitoring wells, 1 monitoring/extraction well, 5 extraction wells. DTW 10.40' to 11.69' bg. Flows to east. LNAPL in MW-1 (0.05'). W-3, 1,618 ppb BTEX, 949 ppb MTBE. W-4, not accessible. W-6, ND. Dual Phase Extraction system running. As of 4/18/2007, Influent 11.6 ppb BTEX and 13.90 ppb MTBE, effluent MDL. (RJF) 9/28/2007 - Feng - Quarterly Monitoring Report, 5/2007 - 7/2007, 8/2007. Groundwater sampled 7/9/2007. 5 monitoring wells, 1 monitoring/extraction well, 5 extraction wells. DTW 10.32' to 11.25' bg. Flows to east. No LNAPL. W-1, 40,412 ppb BTEX, 161 ppb MTBE. W-3, 6,555 ppb BTEX, 2,010 ppb MTBE. W-4, NA. W-6, BTEX ND, 4 ppb MTBE. (RJF) 3/21/2008 - Feng - Quarterly Monitoring Report, 8/2007 - 11/2007, 12/2007. Active gasoline station and convinience store iwth car wash. Groundwater was gauged and sampled 11/8/2007. 5 monitoring wells, 1 monitoring/extraction well and 5 extraction wells. DTW 10.78' to 11.97' bg. Flows to east. LNAPL in MW-1 (0.33'). BTEX range ND to 14,373 ppb (MW-3). MTBE range 3.3 ppb to 1,910 ppb (MW-3). Dual

GETTY#58409 (Continued) **S108637243**

Phase Extraction system has been off line since November due to a pump failure and will be restarted in 12/2007. (RJF) 3/24/2008 - Feng - Email from R. Szcespanski (Tyree). The system is back to service in mid February 2008. (RJF) 7/11/2008 - 1Q2008, 12/2007 - 4/2008, 5/2008. Active gasoline station and convenience store with car wash. Groundwater was gauged and sampled 4/22/2008. 4 monitoring wells, 1 monitoring/extraction, 5 extraction wells. DTW 10.51' to 11.60' bg. Flows to east. LNAPL in W-1 (0.04'). BTEX range ND to 13,950 ppb (W-3). MTBE range ND to 1,760 ppb (W-3). The dual phase extraction system is on. Total BTEX influent ND to 0.93 ppb, MTBE ND to 7.8 ppb. Effluent ND. Email to Tyree for check/evaluate the remedial system and to optimize the recovery. (RJF) 9/4/2008 - Getty Properties portfolio meeting with Delta and Tyree. Some vapor points might be installed in the area where the extraction wels located. Historical data for W-5. Correct the W-2 which is connected to the system. Need well within the property line near the extraction well which is downgradient of W-1. Check why extraction wells were put this way. work plan by 12/2008. (RJF) 1/6/2009 - Getty Properties portfolio meeting with Delta and Tyree. In 2005, there were 5 vapor points along the apartment building and came out clean. DEC received the delineation work plan, and under review. (RJF) 1/23/2009 - Reviewed Investigation Work Plan, dated 12/29/2008, by Tyree. One well is proposed near the vacuum area. DEC provided comments and requires a well to be installed at the extraction wells area as we agreed upon the meeting of 9/2008. (RJF) 1/28/2009 - Received and reviewed the Investigation Work Plan, dated January 27, 2009, by Tyree, pdf copy, sent via email. Tyree proposed to have 2 wells installed. email from Tyree on 1/27/2008, they will measure the water depth and will have proper amount of screen installed, at least 5 feet above water table. Work plan is approved. Field work to be scheduled for 1Q2009. Investigation report due 3/2009. (RJF) 3/17/2009 - Quarterly Monitoring Report, 5/2008 - 7/2008, 8/2008, by Tyree. Active gasoline station and convenience store with car wash. Groundwater was gauged and sampled 7/17/2008. 4 monitoring wells. NO LNAPL. DTW 10.42' to 11.90' bg. Flows to east. BTEX range 1.7 ppb to 41,264 ppb (W-1). MTBE range ND to 1,890 ppb (W-3). Dual phase extraction system is on line. BTEX influent ND. MTBE influent range 1.1 to 3.2 ppb. BTEX and MTBE effleuent ND. Quarterly Monitoring Report, 8/2008 - 10/2008, 11/2008, by Tyree. Active gasoline station. Groundwater was gauged and sampled 10/29/2008. 4 monitoring wells. NO LNAPL. DTW 9.98' to 11.89' bg. Flows to east. BTEX range ND ppb to 24,172 ppb (W-1). MTBE range ND to 1,220 ppb (W-3). Dual phase extraction system on line. No BTEX influent or effluent. MTBE influent 2 to 3 ppm, effleuent ND. ((RJF) 6/9/2009 - Reviewed Subsurface Investigation Report, dated 5/13/2009, pdf via email on 5/13/2009, by Tyree. On March 31, 2009, Tyree oversaw Associated Environmenal Services during the installation of 2 monitoring wells. MW-7 and MW-8 were installed to depth of 25 feet bg. PID reading, MW-7 at 10-15 feet, 35 ppm; MW-8 at 10-15 feet 105 ppm. 4 soil samples were collected, MW-7 at 5-10 feet, MW-7 at 10-15 feet, MW-8 at 5-10 feet, MW-8 at 10-15 feet, no exceedances. 2 groundwater samples were collected. MW-7, 36 ug/L benzene, 47 ug/L MTBE. MW-8, 46 ug/L benzene, 340 ug/L MTBE. (RJF) 1/11/2012 - 4Q2011, 1/11/2012, by Tyree. LNAPL in MW-1, 0.01'. High BTEX in one well. MW-3, 9,459 ug/L BTEX, 197 ug/L MTBE. STARS list sampling for E-1, MW-2, E-2, MW-5/E-5. E-1, 58.3 ug/L benzene, 34.7 ug/L MTBE. MW-2, 27.4 ug/L MTBE. E-2, 18.1 ug/L MTBE. 12/13/2011, Dual phase extraction system was on. Liquid phase Influent/effluent

GETTY#58409 (Continued) **S108637243**

are MDL. No vapor phase samples were collected. 07/28/2017 - In January 2017 during the removal of an underground storage tank (UST) system, MES Getty's contractor, excavated soil from the former tank field, former product piping runs and dispensers to remove petroleum impacted soil. During removal activities thirteen previously unknown ghost tanks in the southern area of the site were identified, and subsequently removed in May 2017. From January 9 to July 5, 2017, 43 excavation endpoint soil samples were collected from the sidewalls and bottom of the excavation extents. A review of the laboratory analytical data shows seven excavation soil sample locations at depth exhibiting VOC concentrations in excess of NYSDEC CP-51 soil cleanup guidance, and eight excavation soil sample locations exhibiting SVOC concentrations in excess of applicable NYSDEC CP-51 Soil Cleanup Guidance. All of the excavation soil samples were reported below NYSDEC Brownfield Cleanup Program Commercial Soil Cleanup Objectives, with the exception of SW-8A (7 -7.5), SW-8B (7 -7.5) and SW-8B (14). Approximately 2,268.84 tons of excavated soil was transported off-site for disposal at Soil Safe s facility located in Logan, New Jersey. Based on the above presented information in the July 26th UST Closure and Remedial Excavation Summary Report the spill has been closed."

Remarks: "TANK UNGRADE, FOUND CONTAMINATION. ORIGINAL SPILL ASSIGNED TO O'DOWD."

DEC Memo:	"DEC Piper spoke with David whent. Due to a product discrepancy, system was invesitgated. Dispenser found to be leaking. Contractor to

GETTY STATION 5442 (Continued) **S114560625**

come on 11/11/13 to rmeove dipenser and investigated beneath pan. 9/10/15- DEC piper left message for Steven Charron at Clobal montell Group. 781 786- 6320 5/4/16- DEC Piper received and reviewed closure request. Based on work to date, no further action is granted with respect to remedial activities though the 1K UST found needs to be registered properly prior to closure. Once completed, the spill can be closed. There is an active remediation site under spill 9713385 which will handle divesting of the site. 07/28/2017 - In January 2017 during the removal of an underground storage tank (UST) system, MES Getty's contractor, excavated soil from the former tank field, former product piping runs and dispensers to remove petroleum impacted soil. During removal activities thirteen previously unknown ghost tanks in the southern area of the site were identified, and subsequently removed in May 2017. From January 9 to July 5, 2017, 43 excavation endpoint soil samples were collected from the sidewalls and bottom of the excavation extents. A review of the laboratory analytical data shows seven excavation soil sample locations at depth exhibiting VOC concentrations in excess of NYSDEC CP-51 soil cleanup guidance, and eight excavation soil sample locations exhibiting SVOC concentrations in excess of applicable NYSDEC CP-51 Soil Cleanup Guidance. All of the excavation soil samples were reported below NYSDEC Brownfield Cleanup Program Commercial Soil Cleanup Objectives, with the exception of SW-8A (7 -7.5), SW-8B (7 -7.5) and SW-8B (14). Approximately 2,268.84 tons of excavated soil was transported off-site for disposal at Soil Safe s facility located in Logan, New Jersey. Based on the above presented information in the July 26th UST Closure and Remedial Excavation Summary Report the spill has been closed."

Remarks: "dispenser leaking into soil, c/u and repair pending"

DEC Memo:	"158950. On 6/4 at 18:05 Grube # 11504 of FOD reported to me that while working on N/S W145ST 45' W/O Amsterdam Av in TM-2056 on Feeder 2M30 he discovered approx 2 gal unkown oil & 100 gal of water in the structure. No sewer/waterways affected,no fire/smoke involved, no private private affected, no injuries and weather did not contribute. The source is unknown and the cause is unknown. The spill is in the concrete structure. Environmental tag # 44765 was hung. Two samples for PCB and ID will be taken. Chain of custody #CC 00820 will be used for this incident. Account #F3237. No initial cleanup action will be taken at this time. A I&A crew will be needed to pressure test the unit to see if it holds pressure. Logger R Pagano # 48703 6/4@ 18:28. Notified CIG, spoke to parker at 18:26 HRS. Logger R Pagano # 48703. 6/5 @ 06:40. Lab Sequence Number: 05-05335-001. OIL/WATER FROM TM 2056. < 1.0 ppm 06/06/05 12:01. Lab Sequence Number: 05-05339-001. MATRIX: WATER&OIL GRAB. Analysis indicates the presence of a mixture similar to a cooking oil. 6/30 @ 17:50. Hulzer # 39723 rreported to me that the cleanup completed at 17:00. No solid waste was removed. All liquid waste was removed by the Vactor truck. The structure was double-washed with Simple Green. The Environmental tag # 44765 was removed. Crew....Guizman # 19490. Closed. 8-17-05. George Breen "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY TRANSFERRED FROM Y.KRIMGOLD TO KOLLEENY TO I. ISLAM. 6/20/06- The site's soil and GW are under remediation by LiRo Enginers by installing SVE system and implementing monitoring program to document natural attenuation of dissolved phase contaminats respectively since 2004. Reviewed the Jan-Mar/05 quarterly report. The system performance data show effectiveness of soil remediation. The GW monitoring data also show substantial improvement. Soil sampling will be scheduled when influent air sampling results suggest the SVE system no longer effectively recovering VOCs and routine system monitoring to continue.- II 8/30/05- Reviewed the Apr.-Jun/05 monitoring report. The SVE system collected approx. 12.1 pounds of VOCs during the monitoring period. April 2005 groundwater sampling results showed a northward shift in dissolved phase contamination from MW-3 to the area of MW-4. However, overall dissolved phase contaminant concentrations were observed to decrease substantially in compared to previous site-wide levels. Routine monitoring (monthly) of SVE system and GW sampling(quarterly) will continue. Copied the report in the eDoc folder.- II 12/2/05- Reviewed the Jul-Sept/05

CONVENT GARDENS DPR -DDC (Continued) **S102663768**

monitoring report dt. Oct. 18/05 submitted by LiRo Enginers. July 2005 GW sampling results indicate that dissolved phase contaminant concentrations continue to decrease at the site under natural attenuation. The only contamination identified at the site during the July 2005 GW sampling were minor exceedances of NYSDEC quality criteria for benzene (4 ppb) and ethylbenzene (14 ppb) in one well only out of the four wells sampled. The SVE system collected only 0.1 lbs of VOCs during the monitoring period and produced substantial induced vacuum levels at the site. LiRo recommends continued operation and monitoring of the SVE system. LiRo also recommends advancing four soil borings (location included in the report) in support of soil closeout once two consecutive rounds of influent system air sampling indicate a low volume of VOC capture. LiRo's recommendation is hereby approved. Filed the report in the eDoc folder.- II 04/05/06: This spill transferred from I. Islam to Q. Abidi. Reviewed the Quarterly Monitoring Report for Oct - Dec. 2005, dated January 20, 2006 submitted by LiRo Engineers. LiRo advanced four soil borings in Feb 2006 and they will send the report with sample results in a week. LiRo recommends discontinuation of groundwater monitoring at the site, as the latest groundwater results came out clean. Sent email to DDC on April 5, 2006 approving LiRo s request to discontinue groundwater monitoring. - QA 08/25/06: This spill transferred from Q. Abidi to J. Kolleeny. - JK 09/06/06: Reviewed LiRo's Quarterly Report for Jan.-March 2006. System monitoring data indicate SVE system has reached limit of effectiveness. Groundwater sampling in March '06 showed ND in all three on-site wells. Confirmation soil sampling in Feb. '06 showed no contamination in 3 of 4 boring locations; however, boring LBR-2, near south end of closed-in-place 4K motor fuel UST, showed highly contaminated soil from 10 to 13 feet below grade, with total VOCs of 1,404 ppm in 11-12 foot interval. Nevertheless, downgradient well MW-3, which in past has showed worst GW contamination of 3 on-site wells, has been ND for 2 consecutive sampling events, suggesting residual soil contamination is not impacting GW quality. Options for addressing residual soil contamination are limited; SVE system appears to have done as much good as it can, excavation would be difficult due to depth of contamination and presence of adjacent closed UST, and would likely damage nearby gazebo in the park. After discussion with Koon Tang, it was agreed that problems with attempting to excavate soil outweigh potential benefits, and that since contamination is localized and no longer impacting groundwater, no further remedial action is warranted. However, if usage of this property were to change, presence of residual soil contamination should be taken into consideration, especially if site is ever developed with a building, in which case there may be a vapor intrusion hazard. Closed spill and issued NFA letter (in eDocs folder). - J. Kolleeny "

DEC Memo:	"11/02/18-Hiralkumar Patel. alternate address: none no other spills found. PBS #: 2-238201. as per PBS record, the site has one (1) 1,500 gal AST in contact with soil, in-service, installed in Dec. 1913. the PBS registration expired on 06/30/2017. 1:10 PM:- spoke with Steven Tyree (631-300-6711) at Metro Env. he mentioned that the site has one (1) 1,500 gal AST wrapped in concrete. he stated that technician found oil stain on concrete floor outside the tank wrap. technician is currently inspecting tank area to locate problem. asked Steve to send site pics. 1:22 PM:- spoke with Caoline Land at the church. she mentioned that Sprague Energy delivered oil to the on-site tank system about week and half ago and there was no issue during the

CHURCH (Continued) **S123160179**

delivery. on 10/30/18, Father Gilberto observed oil on basement floor near the tank and reported to oil company. Ms. Land confirmed no odors in the building except near the tank location. Our Lady of Lourdes Church **property owner** 463 West 142nd Street New York, NY 10031 Attn.: Gilberto Angel-Neri email: revfatherg@gmail.com Caroline Land email: lourdes463@aol.com 2:02 PM:- sent letter, including PBS application, to Mr. Angel-Neri requiring tank test, spill cleanup and PBS renewal. asked him to submit report by the end of 12/21/18. letter emailed to Mr. Angel-Neri and Ms. Land. case assigned to DEC Zhune. 12/12/18-MES (Metr Environmental Services LLC) emailed the spill closure report. The report stated that MES crews arrived to discovered a spill of oil estimated to be 6 gallons of suel oil. MES called in to the DEC hotline and obtained Spill # 1808254. The oil was contained to the concrete on the basement floor and inside a small containment area. The spill was cleaned up with absorbents and absorbents booms were placed around the tank area to prevent any migration. Contaminated absorbents were drummed into 55-gallon drum. MES brought in a 275-gallon temporary tank and transferred some of the oil from the 1500-gallon tank into the 275 and piped the tank for temporary use. The remaining fuel oil was pumped out of the 1500-gallon tank and the tank was rinsed clean. Documentation of the excess oil disposal is found in the appendix. Photographic documentation of the tank and spill is found in the appendix. The drummed absorbents and debris are scheduled for disposal. MES will send along the disposal documentation when it is available. The oil tank was abandoned in place. Soil sampling was conducted under the tank area at Our Lady of Lourdes. A sample was taken from each end of the tank area. A summary and the analytical report are attached . There were a few minor exceedances for some semi-volatile compounds (Benzo anthracene 2 mg/kg, Benzo (a pyrene 1.4 mgr/kg, Benzo (b) fluoranthene 1.6 mgr/kgr, Benzo (k) fluoranthene 1.5 mgr/kgr, Chrysene 2 mg/kg, dibenzo (a,h)anthracene 0.4 mgr/kgr, indeno (1,2,3-cd)pyrene 1.1 mgr/kgr). Since minor in nature. As per your request via phone, attached are two phots showing that the piping on the former AST is aboveground. This is in the basement of the church. The old tank has been closed in place and a new tank installed I did check with the project manager and the crew that did the work, and they do not have a picture of the fill port. They did concur that all piping is above ground for the tank. Spill Closed. "

DEC Memo:	"11/6/2014 - Feng - Duty Desk. Spoke to Dot Napoli of Milro (516-379-1500). She had spoke with R. Piper, today's runner, and sent him some site pictures. Assigned the spill to R. Piper. DEC Piper spoke with Milro Tech Brandon. As per conversation, there was a water leak in the basement in which a puddle extended uunderneath the boiler. He said there wasa sheen on the water thouugh no visible oil droplets or leak from system. He did not feel there was a significigant oil leak and Milro will not be perfroming any work as they need a plumber. I spoke with Maria Armstead, she had the water leaks stopped andthe kitty litter that she put down has dried up. Basedo n conversations with Milro and homeowner, this spill is closed. "
Remarks:	"loss to unintact basement floor and sump, unk amount. C/u pending"

DEC Memo:	"10/5 - Sangesland spoke to Rep from Hess Oil. Hess has hired ABC Tank Cleaners (718-272-2800) They were on their way to the site as of 3:15PM Building Super is Giovani 646-529-5757 Unknown if it is a simple clean up, or if there is a digout/repairs to be made. 03/01/06 Sharif Rahman-I spoke with the building super, Giovani(646-529-5757). He told me the gauge was not working properly and they cleaned it up. Need to know the cause of the spill. I left a messege for building manager, Mr. Abidin from PINNACLE Group,(212)222-7206. 03/27/06 Sharif Rahman- A violation letter was sent to Pinnacle Group 106 W. 105 Street New York, NY 10025 Attn: Abidin Radondic,Fax:(212)222-8459 05/02/06 Sharif Rahman- Department has not receive any correspondence regarding the spill clean up. I faxed the previous letter to Michelle Morales @(212)729-5495.Her office no is (212)564-2111 x 3021. 07/11/06 Rahman- I called Michelle Morales today again to follow up on the spill, DEC has not received any report about the clean up, she said she would send the paper works to DEC. 07/14/06 Rahman-Rec'd work invoice from ABC tank regarding the closure of the spill.ABC tank pumped out and washed the area affected by the oil spill.The cause of the spill was overfill from a precut on top of the tank.Approx. 75 gallons spilled on the floor.ABC tank fixed the pre cut on the tank.Need to check the floor condition for cracks,leakage. 08/07/06 Rahman- Inspected the floor, found no drain, cracks, condition looked good.NFA required. "

DEC Memo: "Obligado - Desk Duty - 2-18-16 - I called Richard Isayere. Left a message to call back the NYSDEC. Richard Called me back. They are all underground tanks. According to Franklin, the testing company, there was no loss of product, No sign of leak. They will conduct further investigation. Richard said they will conduct more tests tomorrow and will update us upon completion of the tests if any additional tanks failed. Summary for PBS # 2-189995 3 tanks failed tightness test 1 antifreeze - failed hydrostatic test GEN1 - failed Hydrostatic test DSL-2A - Over fill prevention valve on diesel tank Assigned to Kumar Patel. 2-24-16 - Obligado - Update from Richard. One additional Motor Oil tank M/O-1A also failed the tightness test. No apparent spill or loss of product to the environment. 03/28/16-Hiralkumar Patel. 1:37 PM:- left message for Richard. 3:33 PM:- received message from Richard. 03/29/16-Hiralkumar Patel. 9:02 AM:- left message for Richard. 3:24 PM:- received message from Richard. 04/20/16-Hiralkumar Patel. 1:47 PM:- left message for Richard. 2:56 PM:- received call from Richard. he asked to contact Josephine Brown. 3:03 PM:- spoke with Ms. Brown and inquired her about tank test failures. she will review record and submit information/documents. Josephine Brown MTA Ph. (718) 566-3415 email: Josephine.brown@nyct.com 3:22 PM:- sent email to Ms. Brown and asked to submit information about tank size, tank location, cause of failure, repair activities and cleanup of any petroleum discharge. also asked to submit copy of result of subsequent tank system test confirming its integrity. 04/25/16-Hiralkumar Patel. received email from Ms. Brown (at 5:08 PM on 04/21/16) including document confirming cause of failure and actions taken. - 1,000 gal tank for waste anti-freeze (tank # WANTI-1) failed hydrostatic sump test due to sump seam walls and penetration fitting not being tight. containment sump seams repaired by using a fiberglass made adhesive and penetration boot repaired with by installing a new penetration boot. there was no release to the environment. containment sump passed the integrity test after repairs. - 2,500 gal tank for motor oil (tank # M/O-1A) failed hydrostatic sump test due to sump walls not being tight. repaired by using a fiberglass made adhesive. there was no release to the environment. containment sump passed the integrity test after repairs. - 10,000 gal tank for diesel (tank # DSL-2A) failed overfill prevention inspection due to piece of 2 inch pipe (drop tube) missing on bottom of overfill prevention valve. a section of 2 inch pipe was installed to the bottom of overfill prevention valve. there was no release to the environment. as per the submitted document, a fourth tank (5,000 gal diesel tank # GEN-1) also failed hydrostatic test due to penetration boots not being tight. there is no information about repairs made on tank # GEN-1. as per discussion between DEC Andrea and Richard, three underground tanks [1 antifreeze and two diesel tanks (GEN-1 and DSL-2A)] failed test. on 02/24/16, Richard called DEC Andrea and informed him about failure of one more tank (motor oil tank # M/O-1A). 11:51 AM:- sent email to Ms. Brown inquiring about status on 5,000 gal diesel tank (GEN-1). after discussing with DEC Leszek about 5,000 gal diesel tank system failing hydrostatic test due to penetration boot not being tight, no further investigation needed and case can be closed on available information. case closed based on available information."

Spiller Name:	JAIKISAN
Spiller Company:	MOTHER CLARA HILL BUS
Spiller Address:	721 LENOX AVE
Spiller Company:	001
Contact Name:	JAIKISAN
DEC Memo:	"02/10/06. Feroze. Talked with Mr. Jakisan Achaibar 646-252-5772. All fuel is in secondary cointainment. They will submit DEC all documents regarding cleaning the site. 02/10/06-Hiralkumar Patel. Left message for Jaikisan at 3:20 PM. Spoke with Jaikisan. as per him, whatever spill happened its contained in secondary container. both hydrolic lifts are lock out/tag out. on monday, private contractor will come and suck the mixture of water and oil. Jaikisan will call me once they clean site on monday 13th Feb. 02/14/06-Hiralkumar Patel. Left message for Jaikisan. 02/16/06-Hiralkumar Patel. Left message for Jaikisan. Spoke with Jay at System Safety. as they suck out oil and water mixture from pits, they did water level test. among the four pits (pit# 4, 5, 8 & 9) they found three pits (pit# 5, 8 & 9) were leaking. and pit # 8 & 9 had accumulated oil (inch or so). Jay told me that they had spill previously and had plume underground and the site is under remediation. now because two pits accumulate some oil, CPM Remediation group is handling site and investigating. URS consultants is the company who is doing remediation work on site. Jay call back with more information and results of remediation group's investigation. as per him, DEC Mark Tibbe is handling all the site under remediation for NYC transit. Discussed with Mark and Koon in remediation. Mark is working with two different plumes on the same site. as Mark talked with guy at site, the lifts are away from the site where the plume was previously. so it is probably not related to previous plumes.(Refer Spill# 8902374) Spoke with Jay. they have taken some samples for fingerprint and as they get results, Jay will call back. 02/23/06-Hiralkumar Patel. Left message for Jaikisan. 02/24/06-Hiralkumar Patel. Left message for Jaikisan. Spoke with Jay. they haven't got results yet. once he will get result, he will call back. and depends on results this project will go to remediation

NYC-TA MOTHER CLARA HALE BUS DEPOT (Continued) **S103559730**

department in transit. 03/03/06-Hiralkumar Patel. Received call from Jay from Transit. he got sample results and all three samples came back with confirmation that it is lubricating oil. now remediation department at Transit is handling this case. he will update me on this case as he gets information. Received copy of lab results. if we need any information, call Jay at system Safety. 04/04/06-Hiralkumar Patel. Spoke with Jay and he still don't know whether this site will be remediated under remediation section or not. he will call back. Received fax from Jay. abstract of letter: - Source of spill/leak identified: over a period of time, product (hydraulic fluid) and sludge accumulated in all four pits (# 4, 5, 8, 9) due to broken line, and poor seal in piston - Source of Spill/leak was stopped: brokken hydraulic fluid line, poor seal were replaced and lift load test was performed as part of MP2 preventive maintenance. - Spill cleaned: AB Oil removed 1029 gals of oily water and 1 cy of sludge and pressure washed all 4 pits. refer to AB Oil Work orders (3 18739, 18738) and manifests (# 18738, 18739) - Samples taken: samples were collected from two of the lift pits and hydraulic fluid reservoir, and analyzed by URS subcontractor laboratory. the finger print analysis identified the product as hydraulic fluid - Disposal of contaminated waste: AB Oil transported and disposed the oily water, and the sludge as non-hazardous industrial waste. - Investigation required/Refer to CPM: lost water in pit # 5 and gained water in pits # 8 & 9 during standing water test. CPM needs to investigate for any potential product plume in the bus lift area. 06/06/06-Hiralkumar Patel. Left message for Jay. Received call from Jay. he hasn't heard from CPM section and doesn't know whether this will be investigated under existing remediation or will be addressed separately. 07/10/06-Hiralkumar Patel. spoke with Jay. they are still working to determine who will handle this case. 08/31/06-Hiralkumar Patel. left message for Jay. 12/01/06-Hiralkumar Patel. left message for Jay. 12/11/06-Hiralkumar Patel. received message from Racheal from NYC transit. Jay is no longer handling spills. as per Racheal this spill has been transferred to their remedial investigation unit in NYC Transit. Racheal will be call back with more information. **Once MTA Remediation department takes over this case, ask Randy who will handle this case: me or Remediation section of DEC.** 08/16/07: The investigation and remediation (if warranted) will be performed during a large remedial and construction project at this depot. The depot is slated to be demolished and rebuilt in 2008. An SSRP/RD is being prepared to address all of the known contamination and to investigate any areas where contamination is suspected, namely the lifts and associated pits. Refer to 98-13017. 06-17-08: Closed and consolidated under 8902374."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE Sangesland DDO - spill cleaned 5 gallon of motor oil spilled to depot apron. Some sort of excavation was occuring at the time of the spill and some of the oil impacted bare soil. The soil was removed until visually clean, an endpoint sample was taken and the hole was closed. The endpoint showed residual soil contamination above TAGM. Unfortunately NYCT can not ascertain where the excavation was at the time of the spill so no further excavation can be performed. Since the spill was motor oil from a bus, it could not be more than 10 gallons. This facility is already being remediated for soil and groundwater contamination under spill #s 8904241 & 9813017. "
Remarks:	"spill from oil pan on a bus spilled on to ground they will make recovery "

His email is danielyu@nyct.com (send TTL to Francine and cc Daniel). 6/17/2016: Rashad Emailed TTF letter to Francine and uploaded it to D2. 721 Lenox Ave has alternate addresses of 721-735 Esplande Gardens Plaza, 101-165 West 46th Street, and 100-162 West 47th Street. Numerous previous spills exist for depot. 6/27/2016: Rashad Received email from Francine with closure letter. As per the report A petroleum release did not occur from the primary piping of the underground storage tank UST. The cause of the failure was a faulty diaphragm valve. The UST was temporarily taken out of service on June 16, 2016. The line leak detector and diaphragm were replaced on June 20, 2016 and retested on the same date. The test passed and the system was put back into service. Report uploaded to D2. Spill closed as no release occurred and repairs made. "

DEC Memo:	"They say the spill was cleaned, but this must be confirmed. Need to get contact phone number from Mark Tibbe 7/18/07 - Raphael Ketani. One hundred and fifty gallons of hydraulic oil spilled from a broken line at lift #9 at the bus depot. I tried to call Sherry Bulkley at (646) 252-5774 to find out whether the oil had been cleaned up, but could only leave a message. I talked to George Cunningham (646) 252-3607 at NYC Transit. He said that the oil was contained and the floor of the shaft is solid concrete. He said they will power wash the elevator shaft and collect the wash fluid. He will get back in touch with me. 7/19/07 - Raphael Ketani. Mr. Cunningham called me

MOTHER CLARA HALE DEPOT (Continued) **S108638801**

back. He said that 800 gals. of total liquids were removed from the shaft. Groundwater had been seeping in. After they pumped out the shaft, more water entered. The lift is not going to be used ever again and has been shut down for good. The walls of the lift will be powerwashed. The entire depot will be demolished in one year due to the other oil leaks/releases and tank problems at the site. It will be a giant cleanup of the grounds of the site. Mr. Cunningham added that he will send me a manifest for the removed liquids and a letter describing the events. 08-02-07: Reassigned to tibbe from Ketani. Spill is within the area of excavation of a larger remediation/construction project. Any residual contamination will be addressed at that time. 08/16/07: The investigation and remediation (if warranted) will be performed during a large remedial and construction project at this depot. The depot is slated to be demolished and rebuilt in 2008. An SSRP/RD is being prepared to address all of the known contamination and to investigate any areas where contamination is suspected, namely the lifts and associated pits. Refer to 98-13017. 06-17-08: Closed and consolidated under 8902374."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE transfered from Hale to Tibbe on 12/27/00. see also 89-02952,89-04241, 91-06264, 93-04003, 96-06076, 01-02743. tanks repaired/replaced/upgraded. remediation ongoing. See also 98-13017 for waste oil plume. 12/19/07: Since the depot is slated to be demolished, NYCT has decided to remove as much of the contaminated soil and LNAPL as physically possible. They submitted an SSRP/RD for excavation, which was approved. At the time of the remediation, Spill #s 05-13028, 07-03983 & 06-10604 will be investigated and if necessary remediated. 06-17-08: Spill #s 9813017, 0513028, 0610604 & 0703983 have been closed and consolidated under this number because all of the spills will be remediated at the same time. 11/12/10 - spill re-assigned from Tibbe to Joe O'Connell 5/19/2011 The spill was reassigned from Joe O'Connell to Linda Ross 2/27/12 - Raphael Ketani. Site was transferred to me during February 2012. 4/26/12 - Raphael Ketani. The DEC was informed during the monthly meeting that depot construction is still taking place. 5/28/13 - Raphael Ketani. I reviewed the March 2013 Monthly Status Report for all of the subject NYCT bus depot sites. More wells were destroyed as a result of the ongoing construction. Only two wells are left. These are at the east end of the property. 5/29/13 - Raphael Ketani. Gregory Mathelier (212) 252-3470/cell (646) 765-0336, Construction Administrator for the NYCT bus depot sites, sent me the May 2013 Engineering Report for Site Remediation Through In-situ Solidification/Stabilization of the oil contaminated soil (prepared by URS). Mr. Mathelier stated in the text of his e-mail that: The subject Final Engineering Report (FER) prepared by our consultant (URS) for the In-situ Solidification/Stabilization (ISS) performed at the Mother Clara Hale Bus Depot is attached. This report presents a background of remedial investigations performed at the site, the bench scale study conducted prior to the ISS and documents the pilot tests and full scale open-pit mixing for ISS performed within the footprint of the site. The goal of the ISS Program was to solidify contaminated petroleum-impacted soil within the footprint of the site as a means of remediation; this method was approved by the NYSDEC. The ISS program was implemented by Hayward Baker, a subcontractor to NYCT s Remediation Contractor, Franklin, through a bench scale study, a pilot study and a full-scale treatment (ISS) that covered delineated areas of petroleum-impact within the footprint of the site. The results of the bench scale study confirmed the effectiveness of the ISS for the established criteria for unconfined compressive strength, permeability and reduced leaching potential. I reviewed the report. 5/31/13 - Raphael Ketani. I finished reviewing the ISS report. The Site Specific Remedial Plan was approved during July 2009. The remedial method specified is in-situ solidification/stabilization (ISS). Franklin Company Contractors substantially completed the work

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

by October 4, 2010. The report was prepared in compliance with Subparagraph III.E.4.i of the Consent Order. From 1993 to 2010, numerous investigations were performed. Various product recycling methods were used with limited success. The old building was demolished, but long sections of the 9 foot high retaining walls were left in place. Subsurface structures were also present within the old footprint. DEC agreed to using solidification/stabilization if it could be demonstrated that unconfined compressive strength equal to or greater than 50 psi, permeability of equal to or less than 1 X 10-6 cm/sec and reduced leaching potential towards achieveing groundwater standards could be achieved. First, bench scale tests were done. Two design mixes were successful - one for diesel oil areas, and one for waste oil and hydraulic fluid areas. They used a 3:1 ratio dry mix of slag and Portland cement. A 6% mix with soil was used for the waste oil and hydraulic lift areas. An 8.5% mix with soil was used for the diesel oil areas. Hayward Baker Inc. performed the solidification/stabilization work. The work started on 2/3/10 and finished on 10/7/10. The work took place with maximum volume 100 cu. yd. cells and each cell had to be completed the same day. The treatments were in 6' x 20' cells aligned perpendicular to the walls. Interior cells were 10' x 25'. A minimum period of 7 days was required between treatment in a given cell and treatment of an adjacent cell. The work was done by removing the surficial structures, removing the overburden and structures on a cell by cell basis, pre-clearing the treatment zone on a cell by cell basis via excavation and structure removal, and finally the application and mixing of the ISS mix. The soil was mixed in an open pit with a mixing head. The soil was mixed with grout consisting of type I/II Portland cement, granular blast furnace slag and water. The pit was mixed from bottom to top of each cell. There were 19 subareas of mixing. The DEC required sampling of the grout to insure that the results were unifiorm and compliant. Tests were done regarding permeability and 56 day breaks for data regarding the curing. Four wet samples were obtained from each cell - 2 from the bottom and 2 from the top. The samples were formed into 3 in. by 6 in. cylinders for strength testing via ASTM D2166. Cylinders were formed 3 in. by 3 in. for permeability testing via ASTM D5084. Other cylinders were formed 2 in. by 4 in. for leachability testing via method ANS/NSI 16.1. Slump tests were performed by Franklin staff for bottom samples only. Pilot tests were done by Hayward Baker on 11 cells in diesel oil area H on 3/18/10, but it rained heavily during the tests and the cells ended up with 2 feet of water at the top. New pilot tests were performed on 3/19/10 in waste oil area A and a second test and a third test were performed in diesel oil area D on 3/19/10 and 3/22/10, respectively. The fourth pilot test was performed in hydraulic lift area P. Full scale work started with a rich mix as a contingency against excessive water. The full scale mixing started on 3/22/10. A retaining wall was found in front of the west wall. This required a change from the open pit mixing method. The new method involved the installation of 2 rows of grout columns (secant piles). Each column was 36 inches in diameter and 16 feet deep. There were 33 columns per row. Also, holes were drilled through the toe of the retaining wall and grout was injected beneath the wall and between the columns and foundation wall. Seventy six 6 inch diameter holes were drilled. The grout columns were installed from 8/11/10 to 8/17/10. Later, from 8/19/10 to 9/7/10, another 66 columns were installed - most of which were 26 inches in diameter as the larger

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

diameter cutting head had broken. The open pit mixing east of the columns was completed on 9/13/10 and grouting in the toe holes was completed on 9/28/10. Only 2 of the 1,000 grout samples did not meet the 50 psi compressive strength criteria. However, the 28 day break samples were satifactory. So no action was required. Thirteen of the 1,000 grout samples did not meet the permeability criteria. URS staff expected that they would meet the criteria as they would cure. So no action was warranted. The leachability results were given to the DEC, but not included in the report. All of the samples were deemed to have met the reduced leaching potential such that the goal of meeting the groundwater standards was achieved, if practicable. About 26,500 cu. yds. of soil was treated through ISS. An additional 100 cu. yds. was treated using low pressure grouting. Areas were backfilled with treated soil and 6,100 tons of recycled concrete aggregate to the level of the pre-remediation grades. Scope variance: due to the groundwater rise as a result of the heavy rain, clean soil layers nearer to the surface were contaminated. An agreement was reached between the DEC and the NYCT to raise the vertical limit for soil treatment. Due to staining along the southern wall of the excavation, a 21' x 23' x 12' area south of areas O and P was treated. About 7,300 tons of unimpacted structures and debris were disposed of off site. Additionally, 6,100 tons of fill were imported to bring the site up to grade. A larger than anticipated quantity of overburden soil was treated - 4,575 cu. yds. In order to address the variances, the contract was extended to 10/18/10. I found the report to be acceptable and approved it without comment. 1/28/15 - Raphael Ketani. I reviewed the January 5, 2015 Site Specific Investigation Work Plan for the Confirmatory Soil and Groundwater Investigation. The investigation is being implemented in order to verify current contamination conditions beneath the sidewalks on the north and east sides of the building and in order to gather information to develope alternative recommendations, if warranted, to address any residual contamination. Fifteen (15)borings will be installed using the direct push method. Up to 4 will be groundwater probes. These will be performed where there is no soil contamination in order to be able to sample just dissolved analytes in the groundwater. Up to 3 borings will become wells. Groundwater is 8 to 10 feet bgs. Soil and groundwater samples will be collected and will be processed via methods 8260 and 8270. The soil samples will be taken with 4 foot macrocores. The borings will end at 20 feet bgs. If contamination is found, then the borings will continue until clean material is encountered. The wells will be screened from 5 to 17 feet below grade. The wells will be sampled one week after development. Purging and sampling will use a low flow method. One composite soil sample from the waste material drums will be collected and sent off to the lab for waste characterization. I found the SSIWP to be acceptable with one comment. The waiting time between well development and sampling of one week was too short. By general environmental practice, well sampling should not take place any sooner than one month after development. Preferably, sampling should take place at least 3 months after development. I drafted a letter stating that the DEC was approving the SSIWP, but that well sampling must not take place any sooner than one month after well development. The letter was submitted to Hassan Hussein, EE III and head of Unit C, for his review and approval. 2/5/14 - Raphael Ketani. Mr. Hussein approved the letter and it was sent out today. 9/29/15 - Raphael Ketani. There have been repeated attempts by the NYCT to gain access to well MW-30R

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

in order to conduct groundwater monitoring. However, these attempts had all failed as the superintendent of the building had continuously refused to grant access to the well which is behind a locked fence. Yesterday, Ms. Cadecia Josephs, assistant to Gregory Mathelier, sent me an email with the names of two people in the NYCHA who may be able to provide access to this locked location. These people were Brian Honan (brian.honan@nycha.nyc.gov) and Keith Mitchell (keith.mitchell@nycha.nyc.gov). Today, I sent an email to Mr. Honan and Mr. Mitchell requesting their help with the situation. 11/16/15 - Raphael Ketani. As I had not received an email from Mr. Honan or Mr. Mitchell regarding providing access to well MW-30R, I sent another email to them requesting their assistance. I included Mr. Mathelier [(212) 252-3470/cell (646) 765-0336, Construction Administrator] as a c-c. Soon afterwards, Mr. Honan sent me an email asking when the NYCT would need to gain access to MW-30R. I responded that he should coordinate access with Mr. Mathelier of the MTA-NYCT. Mr. Honan is the Director of the Office of Intergovernmental Relations (212) 306-8108. Mr. Honan added Luis Ponce and Brian Clarke to the email he had sent when responding to me. Later, Mr. Ponce sent me an email stating that he will contact Mr. Mathelier in order to resolve the matter. 4/20/16 - Raphael Ketani. Ms. Cadecia Josephs, assistant to Mr. Mathelier, sent me an email containing the following work schedule: Below is our proposed initial schedule for the Mother Clara Hale Supplemental Investigation: Monday, May 2, 2016 Geophysical survey. Initiate sidewalk saw-cutting and guzzler pre-clearing activities. Tuesday, May 3, 2016 and Wednesday, May 4, 2016 Continue sidewalk saw-cutting and guzzler pre-clearing activities. Thursday, May 5, 2016 through Tuesday, May 10, 2016 Soil boring and groundwater probe installation activities. Wednesday, May 11, 2016 through Monday, May 16, 2016 Soil boring and groundwater monitoring well installation activities. Tuesday, May 17, 2016 through Tuesday, May 24, 2016 Sidewalk flag repair Tuesday, May 31, 2016 Well development and survey of sample locations. Thursday, June 30, 2016 Groundwater sampling of newly-installed monitoring wells. Please note that these dates may change based on the findings of the investigation and/or any input from the Depot AGM during our site meeting next week. AARCO is currently coordinating for NYCDOT permits, which will take some time and is driving the start date 2 weeks from now. 9/28/17 - Raphael Ketani. Today, at a general remedial progress meeting for NYCT bus depots and related properties, Mr. Mathelier gave me the NYCT September 2017 Confirmatory Soil and Groundwater Investigation/Petition for Spill Closure Report for the site that was written by staff from Dvirka & Bartilucci Engineers and Architects. I gave the report today’s date as the date of publication as none was indicated. 10/2/17 - Raphael Ketani. I began my review of the Confirmatory Soil and Groundwater Investigation/Petition for Spill Closure Report. 10/3/17 - Raphael Ketani. I finished my review of the Confirmatory Soil and Groundwater Investigation/Petition for Spill Closure Report. The Mother Clara Hale depot had 3 known types of subsurface petroleum impacts: diesel fuel, waste oil and hydraulic oil. An estimated 44,354 gallons of total liquid was released from leaking USTs, their associated piping and the oil/water separator system. A total of 7016 gallons of product was recovered, but only during the early years of the remediation process. Only wells MW-13R and MW-30R remained after the new depot building had been constructed. Petroleum impacts were identified at 3 to 16 feet below grade. The majority of the impacts were within the zone of

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

groundwater fluctuation which was at 8 to 10 feet below grade. Up to 3.6 feet of product had been measured in one well (MW-12) in the southeast corner of the site. No free product was found in the hydraulic lift areas. On site impacts were addressed through In Situ Soil Stabilization (ISS). The intent of ISS was to immobilize the residual soil contamination. Before ISS could be performed, all subsurface structures were removed (i.e. foundations) and clean soil. Contaminated soil was mixed with water, cement and ground furnace slag. ISS was initiated during February 2010. Off site impacts found at MW-10R, MW-11R and MW-12 were addressed as a separate remedial activity. URS (previous consulting company) did an off site delineation investigation during February 2010. It consisted of conducting 15 soil borings within the sidewalk and street to the north and east of the depot. Free product was found at borings B-84, B-85 and B-86. These locations were identified as the former area of the remote diesel fills. Samples from B-77, B-78, B-84 and M-86 had soil VOC exceedances above the clean up criteria. Samples from B-87 and B-90 exceeded the SVOC cleanup criteria. Though the draft Shallow Excavation and Surfactant Flushing SSRP/RD dated September 2010 was written by URS, it could not be implemented as the new depot construction was taking place. Dvirka & Bartilucci (D&B; the current consulting company) wrote an SSIWP for conducting confirmatory borings and a groundwater investigation in order to verify the current conditions in these areas. The SSIWP was approved by the NYS DEC on 2/5/15. The program was implemented by D&B from May 9th to the 26th of 2016. A total of 24 borings, 4 groundwater probes (MCSB-04, 09, 13 and 18 and later renamed MWGP-01 to MWGP-04), 4 wells and soil and groundwater sampling were conducted along the northeast sidewalk and around the southeast corner. The total depths of the borings varied from 20 to 25 feet below grade. Both the soil samples and the groundwater samples were analyzed for VOCs and SVOCs. The screens for the groundwater probes and wells were installed from 5 to 20 feet below grade. The wells were sampled on 7/13/16. The free product program took place based on the results of this investigation. The enhanced petroleum monitoring and recovery program took place from May 2016 to June 2017 and consisted mostly of VEFRing from May 2016 to May 2017. It was implemented due to the appearance of free product at MCMW-02 and MCMW-03. Forty seven soil samples and 9 groundwater samples were collected from 5/6/16 to 7/13/16 as part of the confirmatory soil and groundwater investigation. The soil under the site was determined to be tan to brown with fine to medium subangular sand with varying amounts of fine to medium gravel, silt, cobbles. A thin layer of anthropogeneic fill covered the natural soil. Groundwater was encountered at 9 to 13.75 feet below grade. Oil staining and odors were found in 22 of the 24 soil samples at depths from 6 to 22 feet below grade. The borings with the most significant contamination were at MCSB-16 to 22 and 24 at depths of 10 to 15 feet bgs. Hydrocarbon odors were present in the purge water from MCMW-01 to MCMW-04. Nine groundwater samples were taken from groundwater probe locations MCGP-01 to 04, MCMW-01, 02 and 04 and MW-13R and MW-30R. MCMW-03 consistently had product from 0.13' to 2.29' (1/11/16 sample) thick and MCMW-02 had 0.01' of product on 9/9/17. Product was recovered using manual methods during the last month of monitoring. The product in MCMW-03 was reduced to 0.01 feet thick or less since the 4/20/17 monitoring event. No product was observed in any well on 5/26/17. An additional 15 gallons of product was recovered at MCMW-02 and MCMW-03, which brought the total amount of product recovered for

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

the site to 7044 gallons. I reviewed Appendix B - Boring Logs and Appendix C - Monitoring Well Construction Logs and had no comments. Next, I reviewed Appendix D - Investigation Analytical Data Tables. Here were listed the soil and groundwater analytical results from sampling which had taken place during May 2016. Specifically, the soil sampling took place on 5/6/16, 5/9/16, 5/10/16, 5/13/16 and 5/23/16 to 5/25/16. The VOC concentrations for the soil samples from locations MCSB-01 to MCSB-25 were either entirely non-detect, mostly non-detect or had mostly very low results which did not exceed the CP-51 unrestricted residential standards. Exceptions to this were MCSB-01 (10-11.5 foot interval) with 4 exceedences to 20 ppm, MCSB-04 (10'-12') with 1 exceedence to 2.5 ppm and MCSB-09 (10'-12'), MCSB-10 (6'-8'), MCSB-11 (6.5'-8.5'), MCSB-12 (7'-9'), MCSB-16 (10'-12'), MCSB-17 (10.5'-12.5') and MCSB-18 (10.5'-12.5') each with 4 low to moderate (0.13 ppm to 76 ppm) VOC exceedences consisting of isopropylbenzene, n-butylbenzene, n-propylbenzene and sec-butylbenzene. MCSB-09 had 4 VOC exceedences which were in addition to those previously mentioned. The SVOC soil results for all of the samples were almost entirely non-detect, except for MCSB-07 (10'-12') and MCSB-15 (6'-7.5'). Groundwater was sampled from MCGP-01 to MCGP-04 on 5/13/16 and from MCMW-01 and MCMW-02 on 6/13/16. The VOC analytical results were mostly non-detect or below the TOGS 1.1.1 standards, except for the VOC results for benzene (2.8 ppb to 15 ppb), isopropylbenzene (12 ppb to 40 ppb), n-butylbenzene (7.2 ppb to 16 ppb), n-propylbenzene (8.5 ppb to 72 ppb) and sec-butylbenzene (6.5 ppb to 25 ppb). Also, MCGP-02 had 130 ppb of naphthalene and MCMW-02 had 24 ppb of naphthalene. The SVOC results were almost entirely non-detect for all of the samples mentioned above, except for 3 low exceedences in the sample from MW-13R. Samples were analyzed for soil DRO (diesel range organics) on 5/9/16 and 5/25/16. The results were 180 ppm to 20,000 ppm. [Reviewers note: the results indicate the presence of low to moderate contamination under the northeast and southeast sidewalks, but removing it would be difficult due to the utilities just under these areas]. Appendix E - Data Validation Checklist was reviewed. The Organic Analyses were determined to be mostly acceptable in performance with only a small number of unacceptable performances. The exceptions to the acceptable determination were internal standard areas below or above the QC limits for various analytes for a number of soil sample VOCs and SVOCs. Appendix F - Waste Disposal Documents. I found the documents to be fully signed and, thus, acceptable. In the Conclusions and Recommendations section, D&B found that the soil contamination had been either immobilized or stabilized. They recommended no further investigating or remediation of the soil and the groundwater. They also stated that the spill is not migrating from the site. As per the above information, staff from D&B asked that the spill case be closed. 10/4/17 - Raphael Ketani. Based upon my review of the case file and the information in the Confirmatory Soil and Groundwater Investigation/Petition for Spill Closure Report, I determined that as much free product had been collected as was feasible, that the great majority of the soil contamination was permanently contained by the solidification and stabilization process, the groundwater contamination was very low and that there was little or no risk of the residual contamination affecting the public or the environment. I wrote a Spill Closure Letter and sent it to Mr. Mathelier for closing spill #8902374, Mother Clara Hale bus depot. I closed the spill case effective 10/4/17. 12/20/17 - Raphael Ketani. Today Mr. DeVinney

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

[MDeVinney@db-eng.com/(516) 364-9890 X 3054] sent me the following email: As you are aware, D&B is currently in the process of properly decommissioning the monitoring wells at Mother Clara Hale Depot following closure of the open spill number at the site. During the decommissioning process, we identified approximately 1.4 of free-phase petroleum in MCMW-03. All other monitoring wells did not contain any measureable free-phase petroleum. As a result, we halted decommissioning activities at MCMW-03 and would like to setup a conference call with NYSDEC to discuss this issue. Please let us know your availability for a call today and what time would be good for you, and I will distribute call-in information. I responded by email and asked what the reason could be for the sudden appearance of so much oil in the well. I suggested illegal dumping of waste oil or a spill from a neighboring building. Next, I suggested a conference call anytime up to 4 PM today and up to 2:30 PM tomorrow. I noted that I would be out all day Friday. Later, a conference call was held at 2 PM. In attendance were Gregory Mathelier, Construction Administrator at the NYCT, Cadecia Josephs, Geologist at the NYCT and assistant to Mr. Mathelier, Matt DeVinney and Stephen Tauss from Dvirka & Bartilucci, Vadim Brevdo and myself. Mr. DeVinney led the discussion. He proposed fingerprinting the oil. Mr. Mathelier asked whether the oil looked like the same product that had been seen earlier in the year. Mr. DeVinney stated that they had opened up well MCMW-03 during the summer and had seen the same product. However, he wasn't sure whether this was hydraulic oil from the pocket on the other side of the depot. Mr. DeVinney added that large concrete structures were installed below the depot and that the oil may have traveled across the top of them. The oil sample was already sent to the lab for a 48 hour turnaround analysis. Mr. DeVinney also said that for a long time, the well didn't have product as the recharge was very slow. Mr. Mathelier stated that he wondered whether the spill would need to be opened up again. I responded that Dvirka & Bartilucci should go back to the well in several days and see whether the oil has returned. Mr. DeVinney stated that they could monitor the well every 2 weeks for a couple of months, see whether the oil has returned and collect it by hand pump if it appears. Both Mr. Brevdo and myself stated that this plan of action was acceptable to the Department. With that, the conversation ended."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE Product discovered in blind riser of secondary for discharge line #2. Product was entering secondary through the dispensor pan, which is connected to the secondary. Product was entering the dispensor pan because operators were leaving the dispensor nozzle leaning over the pan and some residual product was dripping from the nozzle to the pan and then to the secondary. NYCT cleaned spill and re-sealed the dispensor pan shroud to prevent product from accumulating in pan."
Remarks:	"1/2 GALLON OF GAS WAS FOUND IN A BLIND RISER FOR A DISCHARGE LINE #2. SOURCE IS CURRENTLY BENIG INVESTIGATED. BELIEVED TO BE JUST WASHED INTO RISER."

DEC Memo:	"03/14/07-Hiralkumar Patel. received during off hours duty. spoke with Erik, property manager. asked him to hire contractor for initial cleanup to prevent any vapors inside building. received call from Anthony from PTC. they did little cleanup. found oil seeping into basement through wall where fill line enters into building. fill line runs underground under sidewalk for about 8 ft. cleaned out oil on surface in basement. visited site. met Jose (646-228-6255), building super. site has 3000 gal # 4 oil tank enclosed in concrete box. found oil leak from wall where fill line enters into building. no odors

RESIDENCE (Continued) **S108466713**

inside building. Jose noticed little oil from same location about month ago after oil delivery and after last delivery, which was yesterday morning, he noticed more oil coming into building. 41 residential units in building. found fill box sealed with cement. fill line leaked. PBS #: 2-000442 Arik Lifshitz 341 E 10th Street New York, NY 10009 Ph. (212) 673-2300 Fax (212) 673-2999 spoke with Mr. Lifshitz. asked him to renew tank registration as it expires on 04/17/2007. sent letter to Mr. Lifshitz requiring tank test, soil/groundwater delineation and endpoint sample. letter faxed to Mr. Lifshitz. 04/05/07-Hiralkumar Patel. left message for Arik for updates. 04/12/07-Hiralkumar Patel. received message from Arik. spoke with Arik and Ralph. Ralph told that they hired PTC for required work. he will call PTC and ask them to submit report. asked Ralph to renew thier PBS registration. 06/04/07-Hiralkumar Patel. left message for Arik. 07/24/07-Hiralkumar Patel. spoke with Arik. he will check with property manager, Ralph for any reports. left message for Ralph. 08/27/07-Hiralkumar Patel. spoke with Ralph at management. asked him to submit report by Aug. 31st, 2007. 08/31/07-Hiralkumar Patel. received call from Mark from PTC. he will send report next week. 10/11/07-Hiralkumar Patel. left message for Mark at PTC. spoke with Ralph. he will talk to Mark and will send report. 10/31/07-Hiralkumar Patel. spoke with Ralph. asked him to submit report by Nov. 9, 2007. 11/02/07-Hiralkumar Patel. received report from Mark. they found fill line leaking. replaced fill line and found tank system tight. PTC took eight soil samples from borings and found no contamination. no indication of any excavation done at site. report missing following: - sampling depth - boring logs spoke with Jose, building super. as per him, they installed new fill box on foundation wall and never opened sidewalk. 11/26/07-Hiralkumar Patel. visited site. found patches on sidewalk and bore holes inside basement near tank location. borings on sidewalk are done about foot away from original loation of old fill line. left message for Ralph. 11/28/07-Hiralkumar Patel. received message from Ralph. spoke with Ralph. asked him to submit sampling depth. also asked him to open area where old fill line enters into building. asked Ralph to call once then open area. 11/30/07-Hiralkumar Patel. received call from Mark from PTC. he will open wall area where old fill line enters into building. he will also fax updated report with missing sampling depth. received fax from Mark with updates that samples inside building were taken at about 1 inch depth from bottom surface of concrete layer. spoke with Mark again. explained him that oil inside building was on surface but leak started from fill line and the department requires depth of samples taken on sidewalk alongwith depth of old fill line.
01/31/08-Hiralkumar Patel. spoke with Ralph. he doesn't know where new fill box is and whether any excavation done along old fill line. Ralph will ask Mark to call back. spoke with Mark. asked him to provide scaled site map with sampling location and depth. also asked to open area of wall from where old fill line enters into the building. 02/21/08-Hiralkumar Patel. spoke with Ralph about expired PBS registration. he mentioned that they already submitted form but due to missing information, it got delayed. spoke with Mark. they will open old fill line area probably on 02/26/08.
03/03/08-Hiralkumar Patel. visited site. PTC opened area where old fill line enters into building. no contamination found under sidewalk. old fill line located about 8 inches below grade. based on observations during site visit, case closed."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 11/13/2001 - Sangesland received a report from Emteque Environmental Corporation detailing the failure of all 3 - 40,000 gal buried tanks. 2/27/2002 - Sangesland received another report from Emteque stating that the plan is to remove the three tanks, remove all associated piping & system equipment, Remove all visually contaminated soil, Install 2 new 40,000 gal tanks along with associated piping, Install a natural gas line, Install monitoring wells around the new fuel tanks. Sangesland left a message with Dave Keil (consultant) saying the proposal looks good. Requested a meeting for around April 2, 2002 to discuss the details. 4/2/2002 - Sangesland met Dave Keil of CDM on site to review the work plan. 3 - 40,000 gal. #6 fuel oil tanks will be dug out. Boring work done on site indicates the spill has not spread far. It is beleived that there is a clean zone between the tanks and the building. Sangesland said, since the excavation will be so large, the DEC will require 8 side wall samples (2 per side) and 4 bottom samples. PLUS groundwater sampling. Consultant will prepare a work plan and submit it to the property owner/ project developer, but he may not be associated with work in the future (depends if he's hired to continue the effort) 2/5/2003 - Sangesland visited site and spoke with John Raguso of Emteque (631-271-6622). Tank excavation work was done (3 - 40,000 gal tanks pulled). Excavation hole was open and held back on 4 sides by steel pilings. Standing water at approx 10' depth showed partial floating product (30% of water surface). Vac truck is expected later today. After vac out, photos will be taken of cement slab base to confirm no below slab contamination. Some residual contamination is expected, but after the source is removed and most of the standing contamination is removed, the spill can be closed out. 3/24/2003-Vought-Fowarded message from Sigona to Duty Desk: Sigona received call from Michelle Grant (212-491-7025) regarding spill and presence of oil/water in excavation. Vought called Grant back and explained remedial actions. 6/26/2003 Sangesland reviewed a report from Emteque dated 6/16/03 Report outlines the removal of 498.85 tons of contaminated soil from the area outside around the tanks. Some excavation was also done in the basement where a spill existed. Both

ESPLANADE GARDENS (Continued) **1001752340**

the basement and the outside excavation came back with clean end points. Report in file. Spill Closed"

POTTINGER RESIDENCE (Continued) **S104509454**

KRIMGOLD Problem started in Jan 2000 with contamination found in the basement of a house 4/3/2000 Vinnie from Island Tank is going up to Mr. Pottinger's house to do more digging in the basement and take some more soil samples. Hopefully there will be clean end point samples and the spill can be closed out. 4/24/2000 Sangesland received a letter from Vincent Lovari of Island Environmental Tank Maintenance Corp. (718-967-9424) Letter states that in January 2000, Mr. Lovari found that the fill and vent lines were corroded causing the contamination problem. The lines were removed and replaced. In Feb 2000, Island Environmental excavated out an area approx 5' x 20' and 9' deep. In March 2000 Island continued excavating in the basement. On April 6, 2000 Island Environmental collected 4 soil samples. These results were submitted to the NYSDEC, but no analysis was made by the consultant. The letter dated 4/24/2000 ends with the statement Island Environmental Tank Maintenance Corp. is continuing to excavate until they feel area is totally free of contamination. No request for closure was made by the consultant. After NYSDEC review of the lab data, and discussions with the consultant on the size of the excavation, the NYSDEC is closing out this site. "

Remarks: "fill pipe is broken and the customer has a ditch in hte basement unk why - when tank was filled - the oil spilled into the foundation and into the ditch"

Contact Name:	KELLY SOLON
DEC Memo:	"8/27/07 - Raphael Ketani. Steve Sangesland, Duty Officer, called Ms. Kelly Solon and spoke to her about the oil. She said that when they dug up the basement floor at 452 W. 141 Street, they discovered that oil was present. Mr. Sangesland made an appointment for me to visit the site the following day. 8/28/07 - Raphael Ketani. I visited the site today and met the parties involved. They were: Kelly X. Solon, AIA, Kelly Solon Architects (212) 929-3336 - she's the project contact & lead Agnes Maria Gould, Kelly Solon Architects (212) 929-3336 - assistant to Ms. Solon Nicholas (Nick) Canonico, NOVA Consulting (516) 352-3233 - geologist & consultant Camila Miranda, NOVA Consulting (516) 352-3233 - project engineer Andy Davis, Certified of NY, Inc. (212)397-1945, ext 16 - renovation project manager Ken Navarro, Atlantic Construction and Demolition - interior demoliton supervisor Ms. Solon told me that the owners of 452 and 454 W. 141 Street are: Talwildar, LLC, 130 Haven Street, Dedham, MA, 02026. The contact is Dorothea Endicott, Manager (781) 326-0715. First, we were shown the back courtyard that is between the large apartment building on Convent Avenue and 452 W. 141 Street. There, I saw 5 springs that were flowing through the field stone foundation wall of #452. The springs were flowing at the contact of the solid cement retaining wall and the base of the field stone wall. There were places in the bottom of the field stone wall where one could see that some large stones had fallen out. These were also the areas where the springs were flowing. There were other partially hollowed out areas in the wall above and to the sides of the springs where it looked as if groundwater had been flowing through at one time - possibly during times of a higher water table (though the site is about 40 feet below the crest of the hill). I stuck my finger in one

RENOVATION PROJECT (Continued) **S108764051**

of the springs and the water was cold to the touch with no odor and clear. The head of maintenance of the large apartment building told us that, during the winter, a large wall of ice builds up in the courtyard. He also told us that he has lots of groundwater coming up in the basement of his building. Next, he showed me locations where he said residual oil was located along the edge of the sidewalk. I smelled these dark areas, but they didn't have an oil odor. The PID meter showed about 2200 ppb, but the air was wet from the springs. The combined total flow of the springs was estimated to be about 15 gals./minute. Most of the spring water was re-entering the ground at the edge of the back courtyard sidewalk. Next, we entered #452. I was told that each townhouse was built in 1870. You could see light coming through the floor boards from the basement. The floor was in bad shape. The first floor had been gutted and there was a large pile of dark soil resting on the floor. We went to the basement. The basement floor had been broken up and this revealed a water table that was right at the level of the floor. An oil odor was obvious in the vicinity of the oil tanks, but not strong. Two oil tanks were standing in the northeast corner of the basement. The air was humid, and the PID meter registered 6927 ppb. This reading was partly the result of the high humidity. I asked Ms. Solon whether the tanks and their piping had ever been tested. She said no. I told her that the tank systems had to be tested and the DEC needed a copy of the test results. She said she will have this done. She said the tanks were presently empty. I looked further in the basement and saw 2 springs emanating from the base of the common wall between #452 and #454. Mr. Davis showed me the back floor of the basement which had not yet been broken up. The center of this area was buckled and heaved up (perhaps by ice?). Lastly, we went to #454. The same situation was present. The first floor had been internally demolished, but some of the original plaster was left. The floor was in bad shape. We went to the basement. The work crew was breaking up the basement floor in the back area. One oil tank was present. It looked much newer than the previous two I had seen. The piping looked to be in good shape, though there was a little staining below the guage as if it wasn't completely sealed on top of the tank. There were no oil odors. The air smelled very humid and felt wet as in a tropical greenhouse. The PID meter registered 4067 ppb. I wasn't sure how much of this reading was actually VOCs, but I suspected that the meter was being fouled by the humidity and that the readings weren't accurate. Ms. Solon told me that vandals had stollen the gas meter and the copper fuel lines to the tank system. She said that the oil tank stil had oil in it. I looked at the guage and saw that it showed the tank as being almost completely full. One spring was visibly flowing at the base of the common wall between #454 and #456. Ms. Solon asked who was responsible for any oil that was spilled because of the vandalism. I told her that the owners of the house also owned the fuel oil and all of the piping of the tank system and the tanks themselves. So, I told her that the owners had the responsibility of cleaning up the spill. I took 16 pictures consisting of the backyard, #452 and #454. I explained to her what had to be done as regards investigating the spill and cleaning it up. She asked that I put everything in a letrer. I told her I will. After this, I left the site. A CSL was sent out to Ms. Endicott and Ms. Solon with a list of specific items and actions that must be included in the work plan to be approved by DEC and which must be implemented as soon as possible. 8/29/07 - Raphael Ketani. Mr. Canonico called up and said that soil samples

RENOVATION PROJECT (Continued) **S108764051**

will be a problem to take as the water table is right at the surface and so everything is saturated. He said that removing soil will also be a problem as the wet, weak soil has little strength and subsidence of the houses is a real possibility. I told him that soil samples should be taken of the surface soil and sent off for 8260 and 8270 analysis. I told him to sample discrete areas near the tanks and mark them on a plan. I also told him to take a groundwater sample from each house. As regards removing soil and structural issues, I told him that the better method would probably be to inject treatment solutions, but one would have to make sure that the treatment solutions didn't run into the backyard of the neighboring building. He said he will think about this and come up with a plan to present to Ms. Solon and the owners. 9/17/07 - Raphael Ketani. On 9/5/07, I received the following e-mail from Camilla Miranda Israel of NOVA Consulting: Today, Nova Consultants, LLC performed the surface soil and groundwater investigation at the site located at 452, 454 West 141st Street, Harlem, NY. The activities performed as described in our proposal are: Task 1- Tightness Testing NOVA will arrange for the field examination and pressure testing of each of the three (3) on-site ASTs. This work will involve the contracting of a local licensed and certified tank testing company. The results of the testing will be used to support the closure of the open NYSDEC Spill number. The property owner is required to provide NOVA access to the piping associated with the three (3) on-site ASTs Task 2- Surface Soil Sampling Collection A total of six (6) surface soil samples will be collected using a decontaminated stainless steel hand auger and spatula. Samples will be collected from a depth of 0 to 6 inches. A portion of each sample will be placed in re-sealable plastic bag and let stand for a minimum of 5 minutes after collection. Each sample will then be screened in the field with a photo-ionization detector (PID) for the presence or absence of total volatile organic compounds (TVOCs) by piercing each plastic bag and retrieving a soil gas sample. In addition, a portion of each surface soil sample will be collected for laboratory analysis. All sampling equipment will be decontaminated between sampling locations. Sample locations will be determined in the field, based on accessibility and a representative spatial distribution. A proposed sample location map is provided as an attachment to this proposal (Figure 2). Task 3 - Ground Water Sampling Collection Three (3) ground water samples will be collected at the subject Site. The temporary well will be constructed using a 2.5 foot section of 1-inch inside diameter 10 slot, wire steel wrapped well screen will be placed in the borehole. The temporary well will be evacuated of standing water using a clean Teflon bailer to partially develop (remove soil and silts) the temporary well prior to collecting a sample. One ground water sample will be secured by NOVA from each temporary well. Task - 4 Laboratory Analyses The six (6) surface soil samples and three (3) ground water samples will be stored in Ice filled coolers and transported to a New York State Department of Health (NYSDOH) Environmental Laboratory Approval Program (ELAP) certified laboratory for analysis of VOCs and SVOC by USEPA Method 8021 and 8270 respectively (STARS List). The laboratory will report the results in accordance with NYSDEC Standard Protocols. NOVA is in the process to submit surface soil and ground water samples to the lab and prepare the spill closure report. If you have any question/comments please email/call me at 516-352-3233 Thanks, Camila 9/19/07 - Raphael Ketani. I spoke with Nick Canonico of NOVA Consulting regarding the site (516)352-3233. He said that he met the

RENOVATION PROJECT (Continued) **S108764051**

owner of the building next door and he told him that the oil has returned again. The neighbor said this was the second time in 7 years. Mr. Canonico added that there appears to be a perched water table in the bedrock and that he should receive the results of the sampling in a day or two. 10/2/07 - Raphael Ketani. I tried to reach Mr. Canonico regarding any progress at the site, but could only leave a message. 10/9/07 - Raphael Ketani. Mr. Canonico e-mailed me today that he is waiting for his client to approve the investigation document before sending it out. 10/16/07 - Raphael Ketani. I reviewed the October 2007 Spill Investigation Report produced by NOVA Consulting. In the report were the soil and groundwater analytical results. There were very low hits of VOCs for the soil and only hits just above TAGM for the benzo series of analytes and their associated combustion products. The groundwater was non-detect for VOCs and SVOCs. All 3 oil tanks passed their respective tests. Based upon the Report, I am closing the spill case."

DEC Memo:	"Piper made a site visit to construction site. Met with project manager and project Geo. Site is an excavation in bedrock. A small amount of oil <10 gal was observed seeping out of bedrock fracture into utility trench. As there is not a lot of oil I instructed them to build a french drain along bottom of excavation that can be monitored via vertical well. Well will be monitored for a month and determination will be made to investigate further if warranted. There ar no active tanks on the property. Adjacent building had a 6 oil ust but was taken out 2 years ago. temp tank on site. This site is highest elevation of bedrock locally. Area has been dug out. utility box installed .No additional seepage observed. Based on work to date and amount of observed fuel, this spill is closed."
Remarks:	"City college of NY site has located a possible historical spill of some type of petroleum. They are sending samples to be tested."

DEC Memo:	"Duplicate spill number (0712836) was called in by building super/manager Jose Munoz 516-574-1415. Says 5 gal was in the sump pump and in sewer - spill has not been cleaned Property Manager Winton Knight cell 516-690-1815 Gillman Management (Nassau County) Manager says ABC Tank pulled the bad old tank 3 weeks ago. 03/07/08-Hiralkumar Patel. visited site with DEC Hasan. met Jose, a

APRT (Continued) **S109060276**

building super. Jose is working for last five years. site has 3000 gal #6 oil tank. tank is located in one corner of tank room so one side and one end of tank is covered by foundation walls and another side and end is covered by concrete wall. tank is currently empty. found oil in sump in boiler room. sump pump found disconnected. boiler room is located in sub-sub basement. boiler room floor is about 7 ft deeper than tank room floor. Jose first noticed oil spill at entrance of boiler room through wall between tank and boiler room. spoke with Donna at ABC tank. they responded after initial spill. they removed part of concrete around tank and found holes in tank. ABC tank removed oil from tank and cleaned inside tank. ABC tank cleaned tank room surface also and left site on 02/04/2008. they have submitted proposal for tank removal, but haven't heard back. site is currently using temporary tanks. found about 5-7 gal oil on tank room floor. this could be leftover oil around tank, between tank and concrete wall, which is now seeping out. no oil seepage found through any tank room wall, except one at boiler room entrance. no odors noticed in Jose's apartment, who is living in basement. no vapor complaints from tenants. Jose Munoz **building super** Ph. (516) 574-1415 PBS #: 2-609847 subway tunnel running in front of building. spoke with Mr. King, building manager. he claimed that there is no spill at site. explained him situation and asked him to clean oil spill from tank and boiler room surface by end of March 10, 2008. also asked him to provide company's name, who will remove tank and contamianted material, and work schedule by end of March 14, 2008. alternname addresses: 81-91 Edgecombe Ave, 336-340 W 139th STreet, 572-576 St. Nicholas Ave Winston King 574 St. Nicholas Avenue Assoc. c/o Gilman Management Corp. 51-55 Watermill Lane Great Neck, NY 11021 Ph. (516) 764-0226 (O) (516) 690-1815 (C) Fax (516) 536-4650 sent letter to Mr. King requiring immediate cleanup of surface spill inside tank and boiler room (documents must be submitted by 03/10/08), soil delineation inside tank/boiler room and endpoint samples. letter faxed to Mr. King. received call from Donna from ABC tank. they are going for surface cleanup on 03/10/08. letter faxed to Donna (Ph. 718-272-2800, Fax 718-272-3147) at ABC. 03/11/08-Hiralkumar Patel. left message for Mr. King. 03/18/08-Hiralkumar Patel. spoke with Mr. King. ABC tank working at site. left message for Donna at ABC Tank. 03/20/08-Hiralkumar Patel. received call from Donna. they removed vault around tank and found some saturated stuff behind and below tank. will meet to Mr. King for further work. 04/03/08-Hiralkumar Patel. received call from Donna from ABC tank. they disconnected tank and rolled over to another corner in tank room. found heavily contaminated debris under tank. they stopped work as owner hasn't paid anything yet. as per technician from ABC tank, another boiler company was cutting tank with oil on floor around it and owner is planning to install new tank. visited site. found crew from JD Boiler working at site. they were cutting tank out. walked inside tank room and found floor mostly in good condition. no odors noticed. found oil in sump and sump pump was connected. unplugged sump pump. also found bucket filled with oil under filter on supply line. JD Boiler Jose Dia Ph. (646) 773-1165 spoke with Mr. King. asked him to clean sump and area around it. also asked to repair/replace filter on supply line, as might be leaking. asked Mr. King to call for tank room inspection, once they remove everything. no tank should be installed prior to final inspection. spoke with Jose Dia at JD Boiler. asked him to contact once tank and other stuff removed from tank room. 04/25/08-Hiralkumar Patel.

APRT (Continued) **S109060276**

received message from Mr. King. they finished cleanup inside tank room. 04/28/08-Hiralkumar Patel. visited site. JD boiler removed tank and cleaned floor. found tank room floor in good condition (no cracks noticed). no odors inside tank room. minor stains left on wall. some oil stains found on wall where fill line enters into building. old fill line runs about 6 ft under sidewalk. asked Mr. King to check area under sidewalk. they will remove old fill line and will remove any contaminated soil. they cleaned sump and replaced leaking line that goes from filter to burner. spoke with Jose at JD boiler. asked him to check old fill line area while new tank installation. 08/18/08-Hiralkumar Patel. spoke with Jose at JD boiler. they installed new tank and replaced fill line. no contamiantion found along underground fill line. spoke with Mr. King. asked him to submit report. 08/26/08-Hiralkumar Patel. received letter from Allstate ORC. they removed contamianted material from tank room and powerwashed the room. doesn't include disposal manifests. spoke with Thomas Warden at Allstate ORC. asked him to submit disposal manifests. Thomas Warden AllState O.R.C. Ph. (973) 696-3122 09/08/08-Hiralkumar Patel. received disposal manifest. based on submitted documents, case closed."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER Sangesland spoke to Mr. Rice. He said the building next door at #232 west 139th St got an oil delivery today and there is a large spill all over the sidewalk and street infront of #232 and his building at #234 west 139th. Sangesland checked city tax records and found owner: William Mack 92 Crisfield St, Yonkers, NY 10710. No phone number was available for that name or reverse directory for that address. Reverse directory lookup for 232 west 139th st gave 2 names/numbers - neither worked. 4/01/04 - Sawyer - Responded to this spill because no one was reachable on 3/11/04. Arrived at 4:30 to find spill from fill pipe of about 10 gallons of #2 Fuel oil. The area affected was about a six foot diameter from fill pipe. The area had been semi covered with speedy-dri, but not worked in. I eventually found an older lady that was renting the apartment on the bottom floor. She was distraut and feeling the affects of the strong vapors. From this tenant I got the number for the land lady Miss Brown and called her for information. She did not return my call but showed up about 5:00 pm. I received the number and information that she was to get a delivery the day before. Her fuel company was SJ Fuel and I told them to send a clean up crew back down here to clean this mess up. The driver who put down the speedy-dri did not notify his company that he had made a mess, but I did. Around 6:30 two different cleanup vans from SJ came to the sight to finish the clean up. All of the spill was on the surface and after they finished you could not tell there had been a spill there. When I left at 7:30 all parties involved were happy and the spill was totally remediated."

DEC Memo:	"send contaminated soil letter 3/15/05 tipple recieved submittal revealing low level svoc's. e-mail sent requiring proper disposal and documentation when site excavation proceeds. There were only two addresses on record for the Fredrick Douglas Blvd betweeen 139 and 140, this vacant lot is located just north of the building on the corner of FDB and West 139th Street. 4/4/05 Tipple spoke with

VACANT AREA (Continued) **S106866839**

potential purchaser, site Block 02041, Lot 0052 correlate with 2601-2603 FDB. Database updated to reflect the updated address. Alexander Taylor BRP Development. 11/23/05 - Raphael Ketani. John Gerrity, Director Environmental Planning, NYC HPD ((212) 863-8052), called to find out whether I had any information on the site. I told him that this case hasn't been active for awhile. He said that a phase 2 was done by a consulting company because a bank wanted to know more about the property. The site is approximately 10,000 sq. ft. He told me that 4 soil borings were done, but the consulting company is telling him that more need to be done and some soil removal. He said that the only exceedences of the TAGM were chrysene, a couple of benzo SVOCs, and a dibenzo. He said that the results look like historical fill. I told him I agreed with his interpretation.
Mr. Gerrity said that as far as he knew there was nothing left in this open lot. I recommended that a geophysical survey be done just to make sure there are no hidden tanks, utilities, etc. He said he would have this done. 12/12/05 - I reveived a call from Kathy Devoe of Hydro Tech Environmental, Corp. ((631) 462-5866; FAX (631) 462-5877). She said Hydro Tech was waiting for a letter from DEC instructing them as to what needs to be done to finish the investigation of the site. I told her 2 soil borings were needed (center, and 25 feet left of center) and a geophysical investigation to make sure there are no buried tanks, pipes or structures. I told her I would send the letter tomorrow. 12/13/05 - Raphael Ketani. I sent the letter. 1/5/06 - Raphael Ketani. I called Ms. Devoe and she said that work was being held up because Hydro Tech had to submit a lot of paperwork in order to get permission to investigate the site as it is owned by the City. She said that there was just a little more paperwork to sign and then they can get ready to start the investigation. She believes the investigation will start next week. 1/25/06 - Raphael Ketani. I called Ms. Devoe. She said that the 2 soil borings were done on about 1/13/06. One boring was done in the center and one to the right of center. She said that there were SVOCs, but no VOCs. I told her to get me a copy of the analytical and the soil descriptions. She said she would. Ms. Devoe said that the geophysical testing was still to be done. She didn't know when this would take place. I told her to send me a report of the results. 2/17/06 - Raphael Ketani. I spoke to Ms. Devoe. She said the investigation was just completed wednesday, 2/15. She said one anomaly was found, but turned out to be a piece of metal and some pipes. She said I should get the report very soon. 3/6/06 - Raphael Ketani. I received the Phase II Environmental Site Assessment Report dated 2/16/06 from Hydro Tech. I will review it. 3/7/06 - Raphael Ketani. I reviewed the Phase II Report and determined that the documentation satisfied the requirements of the December 12, 2005 letter from the Department. Therefore, I am closing the case and sending the NFA letter that they requested."

DEC Memo:	"e2mis no. 155611: R.Biliski#04919, I&A supervisor notified the control center on 09/30/04 at 10:56hrs to report that J.Formel#47752, I&A splicer found approx. 2 gallons of transformer oil and 150 gallons of water in V2214. R.Biliski#04919 informed the control center that the drain in V2214 is clogged, so that there was no release from the vault. There were three samples taken from V2214, one for PCB's, one for oil ID, and one for Flashpoint. There was no intitial cleanup action taken. The cleanup is pending feeder deenergization and transformer removal. Lab Sequence Number: 04-07846-001 - Analysis indicates the presence of a transformer oil. Lab Sequence Number: 04-07844-001 - TOTAL PCB 6 ppm Lab Sequence Number: 04-07845-001 - Flash Point, PMCC > 140 deg F Update: 10/05/04 @ 14:45 hrs I&A Splicer R.Russell 10177 reports that a drain and disconnect has been done and that the tanker has pumped 290 gallons of oil from unit and tanker has removed 35 gallons of oil and water mix from floor and a partial clean up has been done. Tag 32248 remains,pending removal of defective unit and installation of new unit. Update; E.Hulser 39723 reports that as of 14:00 hrs on 12/10/04 clean up is complete and that transformer was removed and new one was

TRANSFORMER VAULT#2214 (Continued) **S106721024**

installed. Flush truck removed a mix of mud,water & some small stones. It was washed twice with slix,and tag #32248 was removed."

Remarks: "ON 150 GALLONS OF WATER: NEED TO DEENERGIZE THE FEEDER: WILL CLEAN UP AS SOON AS CAN: CONED # 155611"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY TRANSFERRED FROM Y.KRIMGOLD TO KOLLEENY TO I. ISLAM. 6/6/05- Site's only GW contamination is being treated by injecting Permeox Plus and monitoring the GW sampling results for VOCs, Napthalene and DO by URS Corp. since 2003.The VOCs in GW has reduced substantially but still persits in two wells exceeding GW quality guidance values. Routine monitoring to continue. - II 8/29/05- Reviewed Apr.-June/05 monitoring report. Wells MW-04 and MW-10 still show exceedances of VOCs. Well MW-03 had a s history of minor exceedances of VOCs and couldn't be sampled in the sampling event(Apr/05) due to inaccessibility. But MW-03 is excluded from the contamination plume as per Fig. 2D of this report. It is indicated in the report that some of the injection wells have plugged resulting in decrease in in-take of the injected Permeox Plus, and URS plans to install two new injection wells in the vicinity of wells MW-04 & MW-10 which exhibit elevated contaminant levels. The Dept. concurs with URS's plan but advises to include MW-03 for GW sampling and monitoring as well.- II 3/09/06: This spill transferred from I. Islam to Q. Abidi. 5/04/06: Contacted to Ms. Jane Staten (URS) on phone. For this site drillers are on board, they plan to over drill some of the ORC injection well to help delineate the dissolve phase. MW-4 and MW-10 had high concentration when last sampled in August 2005, but they decreased from previous round. The drilling work probably start in June 2006 by Envirotrac, when they get the lab contract approved. -QA 8/18/06 DEC lead transferred from Q. Abidi to J.A. Maisonave. - JAM 9/26/06 Received Request of Spill Closure dated Sept. 15, 2006. GW samples were taken on June 6 and July 31, 2006. Although the latest GW analytical data showed that three compounds exceeded criteria in wells MW-4 and MW-10, the contamination is very minor and will naturally attenuate over time. No exceedances of criteria were detected in the previous GW samples collected at these wells. GW is not a source of potable water, and there are no apparent exposure pathways since its an asphalt covered parking lot. This spill case will be closed and a NFA letter will be issued. - JAM"
Remarks: "caller is removing tanks from site and found contaminated soil. Also see spill # 9515344."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT 6/7/95, 1545: Mr. Smith, Con Ed CIG - fluid level is 350 gallons normally. OIl leaked into submerged vault and did go to sewer. OIl has 369 ppm PCB (historical) - will take sample for analysis. 6/9/95, 1219 hrs: Steve Cribbin, Con Ed CIG - 25 gallons oil pumped into sewer. Transformer pit and transformer have been drained. Will clean up when permits are obtained to shut down the transformer. 2/1/05: Con Ed submitted copy of notification letter to DEP which states: Transformer in Vault 6094 developed a leak. Oil from the transformer was pumped into the sewer by a sump pump located on the floor of the vault. PCB's = 373 ppm. The sump pump was immediately disconnected upon discovery of oil in the vault. The transformer and sump pit were drained of oil on the evening of June 8 following the feeder being taken out of service and the live ends capped. Clean up completed by L. Roman on 6/23/95. Close out. (JHO)"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD 5/6/2004 Sangesland spoke to Mark Salamack at PTC. He said there was a fuel delivery on 5/5 and today the super saw oil coming out onto the basement floor. The existing tank is wrapped in concrete and oil is coming out from under this wrap. PTC will set up temp tanks on 5/7. Then they will drain the existing tank, pull it out (along with all the lines) and reinstall a new tank/lines system. During this process PTC will determine if any spill occured below the basement floor. If there is a contamination problem, they will clean it up and submit manifests and endpoint samples as required. 04/13/06- Case was transferred from Jake Krimgold to Koon Tang. 11/03/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. Called Mr. Mark Salamack (PTC Company) at (718)624-4842 and talk to Ms. Dianna she said PTC Company only did Tank Cleaning for J & M Reality services (212)721-0424. -QA 11/17/06: Called J & M Realty at (212)721-0424 and left message to call me back regarding information of the spill. -QA Called Mr. Mark Salamack (Petroleum Tank Cleaner) at (718)624-4842 and talked about the spill. He said that he did only Tank Test. He said tank test was failure. He will try to send me Tank Test failure report. Rest other work who did that PTC do not know. -QA 11/30/06: Called J & M Realty at (212)721-0424 and talked to Mr. Jerry he said. This spill is cleaned up. He is going to fax me closing confirmation letter to close the spill. -QA 12/13/06: Mr. Jerry Edelman, Agent (J & M Realty Services Corp.) sent a closing confirmation letter in which he has mentioned that cause of the spill is a small amount of oil was released in to the concrete alley when the driver of the truck flushed out the delivery line with air. According to Mr. Jerry spill was promptly cleaned up using and oil absorbing compound. According to Mr. Jerry spill is cleaned. -QA 01/02/07: Called Mr. Mark Salamack and talk about the spill. According to Mr. Mark Salamack (PTC), when he went to see the spill oil was out of the tank in the basement. It could be the cause of overfilling, could be leaking of tank. Tank should be removed and soil should be checked soil underneath the tank. Called J & M Realty (212)721-0424 and talked to Mr. Jerry Edelman he said that he will send a letter mentioning the actual reason of the spill 02/05/07:

APARTMENT (Continued) **S106471583**

Called Mr. Jerry Edelman at (212)721-0424 extension 13 and left message to call me back to discuss the spill. -QA 06/21/07: Called Mr. Jerry Edelman at (212)721-0424 extension 13 to discuss regarding spill. He was not there talked to Mr. Victor he said he will talk to Mr. Jerry about it. He will find out about the Tank Test Report (tank must be tested every five years). After getting that he will call me back. -QA 09/13/07: Called Mr. Jerry Edelman to discuss regarding present status of the spill and to send the tank test report. He was not there, left message to call me back. -QA

---------- 6/25/08: Reassigned from Vadim Brevdo to Kartik Chanda. (Chanda) 8/5/08:Chanda has reviewed this spill related documents and sent a certified letter to RP (Jerry Edelman, J&M Reality Corp), requiring that a letter or report must be submitted to DEC by 9/20/08 for review and approval. (see eDocs) 02/06/2012 - Brevdo - Review of the project information available demonstrated that there is no documented subsurface contamination that resulted from the alleged spill. According to project records of 12/13/2006, the cause of the spill was a small amount of oil release into the concrete alley when the driver of the truck flushed out the delivery line with air. According to J&M Realty Services Corp. the spill was promptly cleanup up using an oil absorbing compound. With the lack of documented subsurface contamination I do not feel there is sufficient rationale to pursue further investigation of this spill event, let alone conduct enforcement action. Spill closure is appropriate. Spills is closed effective February 6, 2012. "

Remarks: "tank is wrapped in concrete,doesnt know if it has holes in it,it is leaking out onto the ground"

DEC Memo:	"12/05/06-Hiralkumar Patel. visited site. spoke to Christina. she mentioned that water with other material is seeping into her building from neighbour's property. found stain on wall in basement with some yellow material. no petrochemical odor. went to neighbour's property at 511 W 149th Street. spoke with Lionel Mendez (212-690-7484) tenant living first floor. she showed leaking water from ceiling into her apartment. this is four story building and Ms. Mendez don't know where this water coming from. went to basement. found two 275 gal ASTs. but no oil leak. no odors inside basement. it looks like this leaking water at building # 511 is seeping into building # 513 with other building material. Ms. Mendez and Christina both reported this leak a week ago in DEP calling 311. explained Ms. Mendez and Christina that as this is not a petrochemical spill, DEC will close this case. DEP might visit site. Owner of building at 511 W 149th street: ECDO Community Partnership Center 413 W 125th Street New York, NY 10027 Ph. (212) 531-3211 FAX (212) 531-3229 Contact: Gasper Harnandez at Ext. 41"

DEC Memo: "e2mis 156683 On 12/22/2004 @ 03:37, Calderon # 19847 of #9 reported that at 03:35 HRS while getting out of his Vehicle # 41186 he noticed a Transmission spill beneath his truck. (5) gallons spilled on the asphalt floor. He was at 215 w.138 St. responding to an Outage . No sewer/waterway was affected, no private property was affected, no fire/smoke was involved, no injuries and weather did not contribute. The source of the spill was the Vehicle and the cause is a leak from the transmission. The spill has been contained using balonies and the spill can only be cleaned up after Transportation arrives to move the vehicle from over the spill. Tansportation has been called and is on their way to the location. Notified CIG, spoke to Elliott # 81653 at 03:45. ERT was also alerted due to the fact that there is a possibility that this situation may not be cleaned up in (2) hours. 12/22 @ 05:10 Calderon reports that the cleanup has been completed as of 05:00 HRS. After the Vehicle was moved all fluid was soaked up. Also the car that was next to the disabled truck was jacked up and the affected area there was also cleaned. The waste was put in a plastic bag and was given to Transportation to dispose of in the proper manner. 12/22 @ 05:20 IMPORTANT UPDATE The correct amount of this spill is (5) quarts, not as I mistakenly reported in the initial write-up as (5) gallons"
Remarks: "5 quarts of transmission fluid leaking from company veh onto asphalt. clean-up pending movement of veh."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL / / : FIRE DEPT. ON THE SCENE. D.E.C. ON THE WAY. 2/18/04 -AUSTIN - REASSIGNED FROM TOMASELLO TO ROMMEL 7/2005 Spill transferred to Greco as part of Spills Closure Initiative. A quick review indicates this spill cannot be easily closed. JDG Owner appears to be: Gamma Precision Corp Address: 256 E 138th St, Bronx, New York 10451-6428 Telephone: 718-402-6333 Greco spoke with Mr. Imre Mersich, the former owner and current operator of Gamma Precision. Mr. Mersich claims that the NYSDEC was involved in a cleanup of the gas station next door and that cleanup was finished several years ago. He also states that he is in the basement often, and no-longer smells any problem. I will need to check with region 2 to see what cleanup efforts were taken. JDG 7/28/05 12/29/05 The property next door is the home of two open spills (No. 9101008 & No. 9101289) which are being addressed under PIN 91214. These spill(s) are apparently the cause of problems detected previously at 256 East 138th St. Since recent contact with the operator of the building at 256 East 138th Street indicated that the impacts to that property have been addressed satisfactorally, this spill is being closed. JDG "

Tank Info:

Tank Number:	001
Tank Id:	37321
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)

Equipment Records:

	A00 - Tank Internal Protection - None
	B01 - Tank External Protection - Painted/Asphalt Coating
	L09 - Piping Leak Detection - Exempt Suction Piping
	G03 - Tank Secondary Containment - Vault (w/o access)
	H00 - Tank Leak Detection - None
	F00 - Pipe External Protection - None
	D00 - Pipe Type - No Piping
	J02 - Dispenser - Suction Dispenser
	I04 - Overfill - Product Level Gauge (A/G)
	C01 - Pipe Location - Aboveground
Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	08/06/1996
Capacity Gallons:	7000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 11/20/02 - R. Austin, subbing as DDO - Spill referred to Jeff Vought, for removal - DEP (Diaz) contacted for further info - w.c.b. to Duty Desk with info on whether or not drums are on private property, whether or not they have been haz catted as waste oil, and whether or not they are leaking. Reply will dictate course of action needed from DEC 11/21/2002: WASTE OIL. SOME ABSORBANT, TIVEX SUITS, BAGS OF GARBAGE ON THE DRUMS. SUPER OF 409 EDGECOMB AVE COMPLAINED ABOUT 405 EDGECOMB AVE. SUPER. 9 DRUMS ON THE SIDEWALK. DO NOT SEND A TANKER TRUCK TO THE SITE. DRUMS HAVE MINIMUM OIL. 11/21/2002: called roberto diaz. busy signal. 11/29/2002: DEC SIGONA CALLED RP 401 Edgecomb Partners, LLC on 11/29/02, 10:10 A.M. and spoke to Mr. Hector Alers. According to Hector the drums are scheduled to be removed on 12/2/02, The facility has been transferred from prior PBS owner HSG Realty and 401 Edgecomb was faxed an application and instructions to file transfer of ownership as required by Part 612. AJS. 1/23/2004-Vought-Spill transferred from Vought to Austin. 1/27/04 - Sawyer - Spill transferred from Austin to Sawyer. 1/18/05 - Sawyer - Spoke with Jerry Edleman of J&M Realty 917 952 5676 and he will try to find a manifest or trip ticket for the drums removed. 1/24/05 - Sawyer - Received documentation in the form of an invoice from Petroleum Tank Cleaners. The drums were removed on 12/3/2002 as listed on bill. This concludes course of action for this spill report. Closed. "
Remarks:	"9 abandoned 55 gal drums - none have spilled"

DEC Memo:	"09/30/19-Hiralkumar Patel. 12:57 PM:- spoke with Bill at GZA. he mentioned that the site includes two lots (# 47 and 48) and block #: 2074. they conducted Phase I and Phase II investigation at the site and found no issues. they had submitted reports and remedial action

NYC BROTHERHOOD SISTERSOUL (Continued) **S125360452**

work plan to NYC DEP (not part of e-designation so OER is not involved). the site is being redeveloped into a 5-story building. during excavation, crew noted contaminated soil in north side of lot # 47 along the street. currently, excavation is about 13 ft deep and final depth of excavation will be 15 ft bg. 1:04 PM:- sent email to Bill and asked him to submit copy of Phase I/Phase II, property owner/developer s contact info, proposed redevelopment plan, remedial action work plan (previously submitted to NYCDEP), result of recent soil sampling, and site map including sampling location/depth. 1:54 PM:- received email from Bill including link to Phase I, Phase II and RAP. summary of Phase I dated May 2018: - site includes two lots on block #: 2074: lot 47 (512 W 143rd St) and lot 48 (514 W 143rd St) - at the time of inspection, lot 47 contained a three-story building that was used as a community center and lot 48 was a vacant lot - the three-story building was constructed in 1899. historical documents show the building had residential use and a small 1-story structure was attached to the back of the building. in 2000, the property underwent interior demolition and rehabilitation when it was converted into a community center - historical use of lot 48 includes two small offices structures located in the northwestern portion of the lot in early 1900s. by the 1940s, the lot was vacant. between 1960s and 2000s, lot 48 was used as a parking lot - an abandoned fill port was observed on the sidewalk in front of lot 47 summary of Phase II dated Feb. 2019: - three soil borings were advanced in lot 48 during geotechnical investigation in June 2017. field exploration showed a subsurface profile consisting of fill material fro m2 to 6.5 ft bg, underlain by a silt stratum down to boring refusal (assumed to be bedrock) at 25 to 30 ft bg. perched groundwater conditions were encountered at depths ranging from 9.5 to 10 ft bg - proposed development of the site will consist of a new 5-story community center building with a cellar that will occupy both lots 47 and 48 - proposed building will cover approx. 65% of the area and will include a proposed 32 ft long rear yard - cellar slab will be approx. 11 ft bg - cellar level will feature a commercial kitchen, dining hall, a storm water detention tank room, a storage room, mechanical and utility rooms, restrooms and building management rooms - ground level will be used as the great room with the lobby and reception area - upper floors will be occupied by offices and program spaces - conducted a geophysical survey and traced the fill port in the sidewalk in front of the building into cellar - no large anomalies consistent with potential USTs were identified - advanced six (6) soil borings (SB-01 through SB-03, SB-01A through SB-03A) to a maximum depth of 16 ft bg - one soil boring SB-04A was installed inside the cellar (cellar floor is to at 5 ft bg) to a depth of 15 ft bg (10 ft below cellar floor) - as per site map, borings SB-01A, SB-02A and SB-03A were installed at SB-01, SB-02 and SB-03 locations - no evidence of contamination were observed in borings - collected two soil samples from borings SB-01, SB-02 and SB-03: from 0-2 ft bg and from 13-15 ft bg - collected two soil samples from boring SB-04A: at 5-7 ft bg (right beneath cellar floor) and 13-15 ft bg - two soil vapor probes (SV-01 and SV-02; co-located with soil borings SB-1 and SB-02 respectively) were installed to 6 ft bg - no contamination noted in soil or soil-vapor samples a remedial action plan, submitted to NYC DEP, proposes installation of vapor barrier beneath the building slab and outside of subgrade foundation sidewalls. 1:58 PM:- received email from Bill including site map with sampling locations and result of soil samples collected on 09/25/19. two soil samples

NYC BROTHERHOOD SISTERSOUL (Continued) **S125360452**

were collected: AOC-1(SW) (15 ft depth) and AOC-1(Stock). noted contamination in both samples. soil analyticals (in ppb):
----------AOC-1(SW)------AOC-1(Stock)
Xylene----------1,870----------5,600
1,2,4-Trimethylbenzene--------17,000----------34,000
1,3,5-Trimethylbenzene---------6,000----------11,000
Naphthalene----------12,000----------25,000
10/02/19-Hiralkumar Patel. alternate address: 512-514 West 143rd Street no PBS or other spills found. The Brotherhood/Sister Sol, Inc. **property owner** c/o Khary Lazarre-White Executive Director 140 Hamilton Place New York, NY 10031 Ph. (212) 283-7044 Fax (212) 283-3700 email: klw@brotherhood-sistersol.org 12:50 PM:- left message for Bill. 12:58 PM:- received call from Bill. he confirmed that sample ACO-1(SW) was taken near the northwest corner of lot 47 and AOC-1(Stock) was collected from stockpiled soil. Bill also confirmed that there is shoring along the northern property line. based on review of available information, informed Bill that the department requires complete delineation of contamination noted on-site and investigation for soil contamination beneath the sidewalk, on other side of shoring, including a remote fill port observed during Phase I investigation. Gilbane Buliding Company **owner's representative** 88 Pine Street New York, NY Attn.: Mark Maysonet PH. (212) 896-1035 (732) 371-5905 email: mmaysonet@gilbaneco.com 10/03/19-Hiralkumar Patel. 2:48 PM:- sent letter to Mr. White requiring delineation/remediation of contamination and submission of report by the end of 12/06/19. letter emailed to Mr. White, Mr, Maysonet and Bill. **report due on 12/06/19.** **H drive**"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD Sangesland spoke with DEP Rep (Nicholas) who said the original caller said the super or someone at this address had a pump running from the basement spreading oil onto the grass lawn. Krimgold responded to the site. Krimgold says this is a major #6 oil spill in the basement of the building. 1/27/04. 3:40 PM J.Krimgold @ the site. Upon arrival J. Krimgold inspected the site and found a significant spill of #6 oil in the boiler room. Further investigation revealed that an oil release occurred on 1/24/04 due to a broken return line and about 600 gallons were spilled into a boiler pit. This spill incident was never reported to DEC, and no action was taken to clean it up. However, the oil was contained in the pit with an automatic sump-pump connected to the City sanitary sewers. It is believed (after consultation with DEP at the site) that a significant amount of oil was pumped out to the sewers before the pump become clogged. Building management called a service to repair the pump. During repairs the plumbers pumped some oil (3-4 gallons) and water into the backyard which was noticed by a concerned citizen who reported a spill. Building management was ordered to cease the illegal pumping

DELANO VILLAGE ASSOC., L.L.C. (Continued) **U003153195**

and to retain an environmental contractor to clean up the oil inside and to remove contaminated topsoil in the backyard. DLE Officer P. Blanton responded to the site and issued 4 summonses to the building owners for various environmental violations. DEP also responded and issued an NOV with a request to clean up the sump-pit, and they will follow up with inspection. An environmental contractor (Petroleum Tank Cleaners) was retained to do the job and began the cleanup late in the evening. As reported by Anthony (PTC) this morning (1/28/04) the cleanup has been completed. DEC will follow up with a site visit. Also, PTC will submit documentation for a spill closure. 2/2/04. J. Krimgold @ site. Cleanup has been completed. 2/18/04. PTC submitted documentation for a spill closure. NFA."

Remarks: "CITIZEN NOTIFIED DEP THAT HE SAW SOMEONE DUMPING OIL OUT OF BASEMENT INTO THE YARD, GOING INTO STREETS."

DEC Memo:	"8/9/12-Vought-Primary off hours responder. This spill assigned to DEC Feroze as part of routine Con Edison minor spill porfolio review and possible closure. Initial EMIS #230622 added to Cross Reference Field, deleted from Proxy and downloaded into E-docs. As per EMIS, John Schmaltz O/S reports that, while working under Acct.#W3282 he found that the unit in V-2156 had leaked approx. 10 gal of dielectric fluid and was below min. Env. Tag# 50398 was placed within the structure. A PCB sample was taken under COC#GG18737. The unit will be condemned OOE/2. 9/6/12 - Austin - Transformer was removed, and 50 gals. of 3 ppm PCB dielectric fluid was removed from vault, when cleaned - Con Ed contained and cleaned up the spill - See eDocs files for further information - Spill closed - end"
Remarks:	"nothing affected contained to vault - clean is pending"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND DEC Sangesland responded to scene. 1/6/2003 - Sangesland responded to the scene. Contacts: Building Super: Rolando Larancunet 212-694-0083 Property Manager: Bob Cohen 212-463-9970 Metro Fuel Oil: Scott Alnwick 718-383-1400 Site is a 5 floor apartment house with approx 25 units and a semi finished basement setup with several small rooms with bunk beds occupied by about 10 single men. In the basement, the tank room had 4 - 275 gal tanks piped together. Apparently during or just after a fuel delivery, the piping on the bottom on one of these tanks broke free and the volume of the tank let go on the basement floor. NYFD arrived on site and plugged the tank with a wood cork and poured speedie dry around the floor to restrict the oil pool to the front 4 rooms of the basement. NYFD also left 2 overpack drums with oil/debris in it. Scott Alnwick of Metro Fuel recovered the piping elbow which broke off the bottom of the tank. The elbow had a large handful of plumbers putty wrapped around it. (Mr. Alnwick took a photo of the joint) This shows that the joint had a history of leaking and the filling of the fuel tank probably just pushed the pressure just over the top and caused the joint to fail. Petroleum Tank Cleaners arrived on site with a vac truck to suck up the free liquid oil. The floors (linoleum sheets) were squeegie cleaned, soaked debris was bagged and removed to the outdoor courtyard area. Speedie dry was applied to the floor and the worst of the soaked speedie dry was picked up. Two of the four tanks were repiped together and set up as a temporary tank system for heating the building. Sangesland requested a meeting within 48 hours on the site with the property manager, and a rep from Metro Fuel to discuss rip out of sheetrock, wood frame walls, linoleum floor. After rip out, the floor will be inspected for cracks. Further work will be done based on what is found at that time. 1/8/2003 Sangesland made a site visit to inspect initial clean up and discuss longer term cleaning with property manager Bob Cohen. Inspection showed that the floor was in fact Peel & Stick tiles on top of a heavy stock tile floor. Oil was seen under several of the surface tile and between several of the under tiles. Sangesland presented Mr. Cohen with a Do Work letter with the following work due by Feb 8th, 2003: 1) Fuel oil tanks must be properly rebuilt & tested - Tank/boiler company is required to submit a written letter stating that the tanks and piping are all in proper order. 2) Lower 12’ of sheet rock walls in area of spill (2 rooms and hallway) must be cut out and disposed of. (wood framing 2x4 will be inspected for impact) 3) Tile floor in 2 rooms & hallway will be scraped up to show cement floor. 4) Cement floor will be cleaned After all of this work is done, DEC will reinspect to determine if any more work (borings?) are needed, or if the site can be closed up and put back into service. - Due Feb 8th, 2003 1/8/2003 Sangesland received a fax from Metro Fuel Oil stating that 3 - 275 gal tanks had been reconnected and were in proper working order. 1/16/2003 - Sangesland met on site with Mr. Cohen. Lower 12 of all

SPILL NUMBER 0210077 (Continued) **S106010504**

sheetrock /wood frame walls in the area of the spill were cut and removed. All tile (and subtile) layers were removed. Bare cement floor still had piles of speedie dry on it. Some areas showed oil soaked speedie dry. Tanks appeared to be appropriately piped (as per 1/8/03 fax) Approx 1 to 2 of contaminated soil/speedie dry was piled up under the oil tanks. Sangesland required that the entire floor in the basement area (including under the oil storage tanks) be cleaned and epoxy painted. When this work is done, Mr. Cohen was asked to submit photographs of this work along with a closure request letter. 4/14/2003 Sangesland received a letter and photos from Robert Cohen showing that the site has been properly cleaned, and the floor has been epoxy painted. Spill Closed"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL 11/25/03: Spoke with Rubin Castro (917) 395-3490, Manhattan North Operating group. He says no evidence of oil on street other than oil leaks from cars parked over SB. Oil samples were collected for PCB, ID and flashpoint. I requested that SB be cleaned out and checked for evidence of on-going oil seepage. (JHO) ~~~~~~~~~~~~~~~~ e2mis no. 151-275: On 11/25/03 R. Castro Underground supervisor called to report that at 12:10 he found a spill of what he believes to be fuel oil. He reports that in servicebox # 22132 located in front of 132 W. 139 St. there is 2 qts. of fuel oil & 5 gallons of water in it. He says it smells like fuel oil & also looks like it. Also the oil fill line to building 132 W. 139 St is in close proximity. He will take 3 samples 1 for pcb,ID, & flashpoint. Ruben Castro reported at 14:09 hrs. on 11/25/03 that Jane O'Connell, NYSDEC called him at 14:00 hrs. and requested information regarding the source of the spill. After the cleanup is completed she wants to know if there is any more oil entering the structure or if the source of the spill can be identified. She would like to be notified after the cleanup is completed. UPDATE 11/25/03 Lab Sequence Number: 03-09537-001 Total PCB < 1.0 ppm Lab Sequence Number: 03-09538-001 Analysis indicates the presence of a substance similar to a light fuel oil. Lab Sequence Number: 03-09537-002 Flash Point > 140 deg F Update: 1/29/04 Anthony Pizarro #14791 reported at 13:05 hrs. on 12/2/03 that the cleanup was completed in this service box. One bag of solid debris consisting of rags, matting and PPE was generated and removed. Liquids removed by the Vactor truck consisted of six gallons of oil, water and washwater. The walls & floor of the service box was double washed with Slix and rinsed with the Vactor truck. Environmental spill tag #10618 was removed. There is no visible sign of a source of the oil spill. This is a third party spill since the

SB 22132 (Continued) **S106702918**

Oil ID indicated a light fuel oil. The cleanup was completed on 12/2/03 at 12:45 hrs."

Remarks: "oil line to building and it had a leak , took samples to investigate further service box # 22132"

DER Facility ID:	314518
DEC Memo:	"05/23/06-Hiralkumar Patel. Left message for TJ Oconnor. Spoke to Jack, manager of property. property has 1500 gal UST. PBS # 2-602069 he asked me to send letter at following address: Pete Deorio Chappaqua Realty & Managmnt Co Inc 4 S Evarts Ave Elmsford, NY 10523 Ph.: (914) 345-9351 FAX: (914) 345-9352 sent out TTF. Faxed copy to management company. Received call from Jerry from Dry as a Bone. as per Jerry, owner is doing some kind of construction and part of that they did tank test. Jerry suggested owner to remove tank. he is not sure either owner will install new tank or will use gas heating system. 06/21/06-Hiralkumar Patel. REceived message from Mr. Deorio. spoke to Mr. Deorio. as per Mr. Deorio it is dry leak. they are going to meet USA Environmental Services Corp tomorrow about further testing. owner is planning to abandon old tank and to install new AST. asked Mr. Deorio to call once they decide with dates or someone from USA Environmental should call with such details. 06/29/06-Hiralkumar Patel. Received message from Christine (718-981-5710) from USA Environmental. they are planning to abandon current tank and will install new tank in basement. spoke to Christine. asked her to run isolation test before abandoning current tank as tank failed in test. unless i get information about which part had problem, they will not close this tank. Christine will call once she gets isolation test result. 07/10/06-Hiralkumar Patel. spoke with Christine. they will go tomorrow for further testing. 07/18/06-Hiralkumar Patel. received message from Christine. they did isolation and found corroded manhole cover plate. they put new cover plate and tested tank only and found tank tight. they found vent line leaking during isolation test. spoke with Christine and asked to send tank test result. 08/10/06-Hiralkumar Patel. spoke with Christine. she will send tank test result in fax today. 08/23/06-Hiralkumar Patel. spoke with Christine. she will fax documents today. 08/31/06-Hiralkumar Patel. spoke with Christine. she will fax documents today. 11/14/06-Hiralkumar Patel. spoke with Christine. she will send test result soon. 11/24/06-Hiralkumar Patel. spoke with Christine. she will send document. 01/05/07-Hiralkumar Patel. spoke with Christine. she will call back. spoke with Mr. Deorio. he asked to call building manager, Jack Zimmardo (Off.: 718-323-6710, cell: 917-864-9812). no response at Jack's number. 01/11/07-Hiralkumar Patel. spoke with Mr. Zimmardo. asked Mr. Zimmardo to submit tank test result with reason for initial test failure. he will call Kristin at USA environmental and asked her to send required documents. 06/04/07-Hiralkumar Patel. left message for Mr. Zimmardo. 06/05/07-Hiralkumar Patel. received call from Mr. Zimmardo. he will call his consultant and ask them to submit a report. 06/07/07-Hiralkumar Patel. received call from Mr. Zimmardo. he has some conflict about payment with his consultant. told Mr. Zimmardo that he doesn't get report from this consultant, then he has to hire another company for same work as the department requires report to close the case. 06/08/07-Hiralkumar Patel. received message from Mr. Zimmardo. spoke with Mr. Zimmardo. he spoke with consultant and they

APARTMENT BUILDING (Continued) **S107789440**

will submit report soon. 06/13/07-Hiralkumar Patel. received message from Kristin. she is preparing report and will submit soon. 07/25/07-Hiralkumar Patel. left message for Mr. Zimmardo. spoke with Kristin. they having payment conflicts with management. once they get paid, she will release report/documents. received call from Ruvane as Mr. Zimmardo is out on vacation. he will call Kristin and will send report soon. 08/27/07-Hiralkumar Patel. left message for Mr. Zimmardo to submit report. spoke with Jerry at True Blue environmental (previously known as USA environmental). he will check record and will call back. 08/28/07-Hiralkumar Patel. received call from Jerry. he couldn't find any documents/tank test results. he will talk to Mr. Zimmardo. received call from Mr. Zimmardo. he submit all work order copies to Jerry and waiting for report from Jerry. mentioned to Mr. Zimmardo that if no report available, then he has to do soil investigation around entire tank system (as tank has been abandoned). 09/05/07-Hiralkumar Patel. received call from Jerry. they will do work again and will submit a report. 10/11/07-Hiralkumar Patel. spoke with Jerry. he will send documents tomorrow. 10/31/07-Hiralkumar Patel. spoke with Jerry to submit documents. 11/26/07-Hiralkumar Patel. spoke with Jerry. he is preparing documents and will submit soon. 01/14/08-Hiralkumar Patel. spoke with Jerry. he doesn't know anything. he will look for report. spoke with Eddy at management. explained him that if no reports found, then the department requires soil investigation around tank and along underground lines. asked him to submit report by end of Feb. 2008. 02/21/08-Hiralkumar Patel. left message for property manager. spoke with Mr. Zimmardo. he is retired and Mr. Ruvane is handling this property now. received call from Mr. Vangelder. he works for new manager Ed. as per Mr. Vangelder, they are managing this building since last year. building still uses oil for heating purposes. Ed Ruvane Metropolitan Management Group 162-38 Cross Bay Blvd, Howard Beach, NY 11414 PH. (718) 323-6710 Fax (718) 323-1527 visited site. met Mr. Ruvane, Jerry and Kevin from True Blue. site has new 3000 gal AST (on saddles) inside concrete box with access. tank box floor was found in good condition with no stains. new tank box is inside boiler room area, in frnot of boiler. old tank, which has been abandoned, is also located in boiler room but parallel to boiler. old tank is under sidewalk. all lines runs aboveground except part of fill line that runs under sidewalk. spoke with Mr. Karl, who is working at site for 20 years. he mentioned that contractor removed sidewalk and cleaned tank and abandoned in-place. as per Jerry, no contamination was found during tank abandonment. and they also installed new vent line after finding leak in old one. found new sidewalk in front of building and new vent line. asked Jerry and Mr. Ruvane to submit passing tank test result for test done prior to old tank abandonment and statement about condition of soil around tank (any contamination) during tank abandonment. explained them that if test result is not available then soil investigation must be done around tank, atleast five feet below tank invert (as no bottom samples possible). Kevin will look for papers and will submit. as tank registration has expired and information never updated about closing old tank and installing new one, issued notice of violation. gave copy of notice of violation to DEC Brian. 03/20/08-Hiralkumar Patel. spoke with Jerry about documents about previous tank abandonment. Jerry will call back. left message for Mr. Ruvane. 03/24/08-Hiralkumar Patel. received message from Mr. Ruvane. left message for Mr. Ruvane. 03/27/08-Hiralkumar Patel. received tank test result from Jerry. tank test was done on 09/17/06 (done after initial

APARTMENT BUILDING (Continued) **S107789440**

failure on 05/22/06) and showed tank system passed. based on tank test result, case closed."

DEC Memo:	"03/29/06-Hiralkumar Patel. Received spill from hotline during off hours duty at around 7 AM today. Spoke with Mr. Bates. as per Mr. Bates there is 30-40 ft long oil/water mix stream coming out from boiler room going into drain. no cleanup done. he gave me number for property manager: Ms. Susan (212) 368-8110. Spoke with Mr. Fred at this number and he is unaware of any oil spill at location. Visited site. Met with Mr. Louis, super of building # 620. building is using #6 heating oil and there was small leak from joints in pipe for last week. and they had water leakage and the pit under two boilers was filled with water and oil floating on it. as the sump pump line is broken and its not working, super ran another pump and was throwing oil/water mix to sidewalk in builiding property. oil/water mix ran to drain at other end of building. DEP notified. DEP visited site before me. when i reached on site, little oil sheen found on remaining water on sidewalk in some part. in boiler room, water was still in pit under boilers, having no visible oil on it. little oil found stucked on pipe. no odor in boiler room. discharge stopped on DEP's request. asked super to stop anymore discharge, and as some one was working to repair sump pump and leaking line, to clean sidewalk with absorbent. no odor complaints anywhere. little oil with other debris found in drain catch basin. sidewalk concrete was in good condition. as oil ran down to drain already and there is no odor complaints, Case closed."
Remarks:	"on walkway at rear of building Possibly came from the boiler due to drainage "

Contact Name:	ILKAY CAN-SPANOS
DEC Memo:	"6/11/15-Vought-Received call from and spoke to Ilkay Cam Spanos Langan (212-479-5410) who noted that Vought worked on adjacent spill 1110699 which was probable source to this spill. Spanos noted there were onsite tanks (UST) removed in 2003. Langan is working for owners rep and owner is Madison Square Boys and Girls club. Site redeveloped with a community center (Boys and Girls Club). Ilkay will send conceptual development plans. Geotechnical drilling is ongoing as they want to put a swimming pool in basement and there is shallow bedrock. They have done borings to 100' and they have not hit bedrock. Development may begin within a year and they will submit a plan for moisture/vapor mitigation prior to development. 9/14/15-Vought-Spill transferred from Vought to Omar. Vought sent email to DEC Omar with cc to Ilkay that Rashad, Please review the Phase II Environmental Site Investigation that I just received and placed in D2 under the above referenced spill number and discuss with me so we can prepare a response to Langan (copied above). As you have been seeking more complicated sites as part of your training here in the Spills Unit, I believe this one is quite appropriate. Thanks, 9/14/2015: Rashad As per NYC building records 250 Bradhurst Avenue

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

has alternate addresses of 250-256 Bradhurst Avenue and 310-350 West 155 Street. According to PBS# 2-608783 there are 5, 550 gallon underground gasoline tanks, the status of all the tanks are closed-removed on 3/1/2003, no other spill cases were found for this site. 9/15/2015: Rashad According to the introduction of Langan's submitted phase 2 report there were three other reports on this property which are contained in the appendix. The three additional reports are a Phase 1 Environmental Site Assessment on 8/19/2004, Geophysical Survey to locate UST completed on 11/30/2011, and a Memorandum dated 12/9/2011. The phase 1 investigation will be summarized first (this report included 250 Bradhurst Ave and adjacent property 304-10 West 155th Street): The property is identified as two parking garages including one commercial unit located at 250 Bradhurst Avenue and 304-10 West 155th Street. During the investigation by LCS there was evidence observed that would indicate the presence or likely presence of a release or threatened release of hazardous, toxic, or other substances of concern which that constitute a recognized environmental condition. During inspection LCS noted the presence of five suspect vent pipes protruding from the roof of the parking garage addressed at 250 Bradhurst Avenue. One additional suspect vent pipe was noted on the north side of this structure and two inactive 275-gallon fuel oil aboveground storage tanks (ASTS) were noted within the basement portion of the structure. No staining and/or evidence of release was noted in the vicinity of these ASTs. Two suspect fill/vent ports were noted on the north side of the structure addressed at 303-10 West 155th Street. Cut/crimped copper line were observed within the basement of this structure. No tank closure documentation was provided for USTs on this portion of the subject property. According to historic Sanborn Maps, three 550-gallon underground gasoline tanks were identified as being buried beneath the parking garage at 250 Bradhurst Avenue and two 550-gallon underground gasoline tanks are identified as being buried beneath the parking garage at 304-10 West 155th street from at least 1939 through at least 1996. The Harlem River is located approximately 0.3 miles east of the subject property. This assessment has revealed no evidence of historical recognized environmental conditions in connection with the subject property. Geophysical Survey Summary (prepared on 11/30/2011): 155th Street Sidewalk (above long term parking ramp), a 4ft by 8ft rectangular anomaly was located outside the lower level concrete driveway ramp. The located target is a possible underground storage tank. A UST fill port and vent pipe are located in the sidewalk near the ramp overhead door. Lower level (long term parking garage) the concrete garage was surveyed on the north end of the garage. Two (2) possible USTs were imaged under the floor. Memorandum Summary (prepared on 12/9/2011): Cody Ehlers Group performed an on site inspection and these are the potential areas on concern: Historical use of underground storage tanks (USTs) for the storage of petroleum products. Documentation of removal of certain USTs from 250 Bradhurst Avenue is available, but no record of environmental sampling from the time of removal was identified. In ground hydraulic lifts. Historical use and management of automotive fluids. Nine soil boring were installed in the 250 Bradhurst Avenue garage using push drill rig. Groundwater samples were collected for laboratory analysis from three of the borings. According to the findings and conclusions section The soil and groundwater sampling and GPR program at 250 Bradhurst Avenue garage did not identify any areas of siginificat environmental concern. These activities

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

confirmed that the former USTs in the Bradhurst Avenue garage have been removed. No further soil or groundwater investigation is warranted and no remediation is necessary. According to soil analytics client ID B-3 (the depth and location of soil boring and samples is not clear) has 81,000ppb 1,2,4 Trimethylbenzene, 37,000ppb 1,3,5 Trimethylbenzene, 6,300ppb Ethylbenzene, 7,600ppb Isopropylbenzene, 1,300ppb Xylene, 19,000ppb Napthalene, 13,000ppb n-Butylbenzene, 19,000ppb n-Propylbenzene. Client ID MW-2 (Depth to groundwater is around 18ft, location is unclear) has 1,500ug/L 1,2,4-Trimethylbenzene, 540ug/L 1,3,5 Trimethylbenzene, 260ug/L Benzene, 650ug/L Ethylbenzene, 140ug/L Isopropylbenzene, 222ug/L Xylene, 430ug/L Napthalene, 32ug/L n-Butylbenzene, 240ug/L n-propylbenzene, 0.21ug/L Benz(a)anthracene, 0.2ug/L Benzo(a)pyrene, 0.38ug/L benzo(b)flouranthene, 0.23ug/L Chrysene. Client ID MW-5 has concentrations of 0.2ug/L benz(a)anthracene, 0.2ug/L benzo(a)pyrene, 0.26ug/L benzo(b)fluoranthene, 0.12ug/L benzo(k)fluoranthene, 0.18ug/L Chrysene. Phase 2 Environmental Site Investigation Summary (ES): Phase 2 ESI was conducted June 1-3, 2015 and included a geophysical survey; the advancement of six soil borings; the installation of three temporary groundwater monitoring wells and five soil vapor probes; and the collection of soil, groundwater and soil vapor samples for lab analysis. The proposed redevelopment project is still in the early planning stages and is subject to change, but is expected to include the demolition of the existing building and construction of a community center with a basement and a swimming pool. It is anticipated that an excavation depth of up to 15 feet may be required to accommodate the development. Based on Langans environmental and geotechnical investigation historic fill material typically consisting of silty, gravelly, medium to fine sand with trace to some clay and brick was encountered beneath the surface cover. The fill layer extends to depths ranging from about 13.5-18.t ftbgs. Bedrock was not encountered during the environmental investigation; however, fractured rock was encountered at about 78 ftbgs during a geotechnical investigation near the southwest corner of the site. The depth to groundwater measured during this Phase 2 ranged from 15.5-17.1 ftbgs, groundwater is inferred to flow east towards the Harlem River. In total 13 grab soil samples, 4 groundwater samples, 6 subsurface soil vapor samples, and 1 indoor air sample were taken. Soil boring SB01 at 15-16 ft recorded 0.38ppm Mercury. SB02 14-15 ft recorded 340ppm Lead, 0.95ppm Mercury, at 19-20 ft 17ppm n-Propylbenzene. SB03 17-18 ft recorded 1.5ppm Mercury, at 21-22 ft recorded 74ppm Ethylbenzene, 21ppm n-butylbenzene, 42ppm n-propylbenzene, 59ppm Napthalene, 17ppm sec-butylbenzene, 14ppm total Xylenes. SB04 15-16ft recorded 220ppm Lead, 0.36ppm Mercury. SB06 14-15ft recorded 430ppm Lead, 1.6ppm Mercury. In TMW02 there were high levels of Manganese and Sodium. In TMW03 there were elevated levels found at 9.1ug/L 1,2,4,5 Tetramethylbenzene, 12ug/L 1,2,4 Trimethylbenzene, 9.2ug/L 1,3,5 Trimethylbenzene, 9.9ug/L Benzene, 74ug/L Ethylbenzene, 19ug/L Isopropylbenzene, 6.4ug/L n-butylbenzene, 23ug/L n-Propylbenzene, 37ug/L Napthalene, 9.8ug/L p0Isopropyltoulene, 30ug/L Benzene, 6ug/L sec-butylbenzene, 8.8ug/L Toluene. In TMW06 there were elevated levels of Iron, Magnesium, Manganese, and Sodium. Soil vapor reading were all ND, indoor air sample only recorded one elevated reading of 1.42ug/m3 of Tetrachloroethene. Langan conclusions include several potential sources of petroleum contamination including, but not limited to, previously removed 550gallon USTs, two suspect fill

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

ports/vent pipes, two ASTs in the basements, the geophysical survey identified three hydraulic lifts associated with historical hydraulic tanks. Recommendations include excess soil generated during development of the site should be managed and disposed of as regulated solid waste in accordance with applicable local, state and federal regulations. Petroleum-impacted material cannot be reused on-site. The petroleum-impacted material should be transported and disposed of off site at a facility that is permitted to accept the material. Additional sampling may be necessary for material disposal based on the disposal facility selected. If dewatering is required during construction, groundwater should be sampled and analyzed for NYCDEP sewer discharge parameters, and a sewer discharge permit should be obtained prior to dewatering. Treatment of dewatered groundwater prior to discharge will likely be required. Depending on the extent of soil removed during the propsed development and whether or not residual petroleum-impacted soil and groundwater remain, incorporation of a continuous vapor barrier may be recommended into the proposed building design. As per Jeff: The Department approves plan depending on inclusion of; soil sidewall samples, bottom groundwater samples after excavation, and development plans. Prepared Report Receipt letter and sent it to Zubatkin Owner Representation with CC to Langan, document has been uploaded to D2. Email: I have reviewed the submitted Phase 2 Environmental Site Investigation with Jeff and have attached a letter approving the recommendations pending inclusion of additional requirements listed in the letter. We look forward to the submission of the Remedial Action Plan. The original letter was mailed to Zubatkin Owner Representation, LLC. 11/19/2015: Rashad Received email from Ilkay: We are preparing the RAP for the site and I would like to briefly discuss the RAP and the attached proposed development plan with you. I will be out of the office after tomorrow for 10 days; are you available tomorrow morning around 9 or 10AM for few minutes to discuss? Two structural drawing documents were attached detailing floor plans and section plans, they have been uploaded to D2. The plan drawing which depicts the cellar floor plan has a slab as deep as 13 ftbgs. The section drawings which show the difference in design between having no pool, a 4 foot pool, and an 8 foot pool are also provided. In all cases the pool will not be on ground level it will be on the 4th floor. Jeff and I called Ilkay, she said they are looking to install a slab 3 foot thick throughout the site with a vapor barrier and that only a small portion of the site will be 13 ftbgs. Ilkay will be sending RAP and we discussed that DOH must first approve the RAP and Phase 2 documents before moving forward. 4/22/2016: Rashad Received email from Ilkay: Hope all is well. Please see the link below for the remedial action plan for your review and approval. If you have any questions ,please let me know. Report uploaded to D2. 4/25/2016: Rashad Review of submitted RAP is as follows: The current site is occupied by a vacant, two-story garage with a partial basement. According to historical records the site was operated as an auto repair shop and garage between 1939-1996. Fractured bedrock was encountered about 78 ftbsg. Groundwater ranged from 15.5 to 17.1 ftbsg. Groundwater flow is inferred to travel east towards the Harlem River. Proposed redevelopment includes demolition of the existing structure and construction of a four story community center with partial cellar. It is anticipated the excavation across the majority of the site will extend to about 5 ftbsg, with excavation of a partial cellar extending to about 15 ftbsg. The partial cellar will have utility

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

rooms, a fire pump room, a stormwater detention tank, and an elevator machine room. The proposed structure will be supported by a 3 foot thick mat slab. Remedial Action Objectives are as follows: (1) Removal and closure of two out of service ASTs and any USTs encountered during construction; (2) Excavation and removal of historic fill material and native soil, as required for proposed foundation construction; (3) Collection and laboratory analysis of documentation soil samples; (4) Excavation dewatering during construction, if required; (5) Construction of an engineered composite cover and installation of a seamless waterproofing/vapor barrier system; (6) Preparation and submission of a Spill Closure Report. During excavation the out of service tanks and any other tanks found will be removed and post excavation samples will be taken. Six documentation soil samples will be collected from the bottom of the excavation prior to installation of the waterproofing/vapor barrier system. Sample locations will be biased towards any areas of residual petroleum contamination identified during prior sampling. The composite cover system will be comprised of an approximately 3-foot thick concrete building slab that will span the proposed buildings footprint. As a protective measure to mitigate potential soil vapor intrusion, a waterproofing/vapor barrier will be installed beneath the concrete slab and along the sub grade foundation walls. The waterproofing/vapor battier will have a minimum thickness of 20 mils. The only area without this cover system will be a 745 square foot area on the southeast corner of site which is a courtyard. Foundation construction will start in 2016 and take about 5 months to complete. As per building plans basketball court will be on third floor and pool will be on 4th floor. First floor will have offices/classrooms/general conference rooms. RAP sent to DOH for review. 5/6/2016: Rashad Ilkay send email asking if DOH has reviewed the RAP, I let her know I would follow up with Nate and get back to her. 5/11/2016: Rashad Nate responded on 5/10 after reviewing RAP and Phase 2: I have reviewed the Remedial Action Plan and the Phase II Environmental Site Investigation Report for the above referenced Spill site. Based on review of the data, it appears that there is residual contamination that is present beneath the site in soil vapor at elevated concentrations that have the potential to impact indoor air within the proposed building. It is recommended that during the redevelopment process piping for an Sub-Slab Depressurization System (SSDS) be installed and either be the system be made active or conduct soil vapor intrusion sampling during the heating season (November March) to determine whether the SSDS will need be made active based on concentrations in soil vapor and/or indoor air. Prepared report receipt review letter with Jeff's assistance, letter was sent to Nate/Mike for review. Nate indicated letter looked good and that he has no changes. Email sent to Ilkay with review letter (with cc to DOH): Please see the attached Review Letter in response to the submitted Remedial Action Plan. Please let me know if you have any questions. Thank you. Letter uploaded to D2. 6/3/2016: Rashad Teleconference will be scheduled for next week by Langan with DEC and DOH to discuss review letter requiring SSDS. 6/6/2016: Rashad Conducted teleconference with Langan and NYSDOH to discuss SSDS addition to RAP. Langan will be discussing options with client and getting back to us. Nate sent email and has indicated that any mitigation technique selected needs to be proven effective. Nate also indicated that Langan's suggestion of 3 foot slab, vapor barrier and HVAC modifications may be adequate, if proven effective.

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

6/17/2016: Rashad Sent email to Ilkay: What is the status on the design of the positive pressure mitigation system, as it may be the most feasible option that we discussed? Thank you, have a nice weekend. Ilkay responded: We will be working on the design starting next week, and should be able to share the design with you by mid-July. 8/15/2016: Rashad Received email from Michele Rogers with link for SMD system design, it has been uploaded to D2. 8/18/2016: Rashad Design was approved by NYSDOH and SVI investigation is required as per DOH. Report review letter was prepared with requirement for air sampling. Letter will be reviewed by DOH prior to submission to Langan. DOH Nathan edited letter and it was emailed to all parties and uploaded to D2. Letter outlines Soil Vapor Investigation requirements. DEC Possibly Requires: 1. Site map with all boring and groundwater sampling locations - Memorandum Report. 2. Review of RAP including possible SSDS requirement by DOH? 3. Development Plan (details including depth of excavation) 1/17/2017 Austin This spill report is being transferred from Rashad Omar to Jeffrey Vought end. 1/24/17-Vought-Received email from Langan (Michelle Rogers-mroger@langan.com Ph:212-479-5429) on 1/23/17 that Hi Jeff, To keep you in the loop, the foundations contractor (Moore) is planning to mobilize to the site within the next two weeks. We anticipate that implementation of the RAP will begin shortly thereafter. Please let us know if you have any questions. Thanks Vought replied with cc to NYSDOH Walz that Michele, Thanks for the update and we look forward to the documentation of the installation of the positive pressure mitigation system as well as the SVI results as per the approved RAP. 4/26/17-Vought-Received call from and spoke to Langan (Ilkay Cam Spanos) and she noted that construction ongoing and while they were excavating in southwest corner they found groundwater with sheen and they will stockpile soil separately. Groundwater samples were collected in same area during the Phase II. Vought noted that DEC looked forward to the installation of the positive pressure mitigation system as well as the SVI results as per the approved RAP. 5/1/17-Vought-Received email from Langan (Rogers) on 5/1/17 that Hi Jeff, To keep you in the loop, earlier today the contractor encountered what appears to be a 550-gallon tank while excavating in the southwest portion of the 250 Bradhurst Avenue construction site. Removal of the tank will be handled in accordance with the approved RAP and applicable state regulations. Please give us a call if you have any questions. Vought sent reply that Michelle, Thanks for the heads up and I recorded the tank discovery you noted below in my spill notes as well. We look forward to the report that will include the endpoint samples from this tank location, and installation of the positive pressure mitigation system and the SVI results as per the approved RAP. Note that I have copied NYSDOH above as well so that they may be informed. Thanks, 4/12/17-Vought-Received email from Langan(Rogers) on 5/10/17 that Hi Jeff, Attached for your review are the analytical results of the endpoint samples collected from yesterday s tank excavation. The tank was removed and found to be intact. Endpoint samples were collected from the base of excavation and the eastern, western, and northern sidewalls. The southern sidewall had been excavated as part of development when the tank was discovered and as such, a fourth sidewall sample could not be collected. The analytical results were below the CP-51 criteria with the exception of slight PAH exceedances identified in the sample collected from the eastern sidewall. No PID readings above background or odors were noted, and the contractor plans to backfill the

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

excavation as soon as possible. This information will be included in our spill closure report. Please let us know if you have any objections. Thanks, Vought added endpoint samples to D2 and sent reply email to Rogers, with cc to NYSDOH Walz, that Michelle, Thanks for the endpoint samples and description below. The Department has no objections to including the information regarding this tank in the Spill Closure Report. As I noted below, we look forward to the report that will include the endpoint samples from this tank location, and installation of the positive pressure mitigation system and the SVI results as per the approved RAP. Thanks, Rogers replied, with cc to all, Thanks Jeff . DEC Requires: 1)Installation of SSDS and performance of SVI once development completed as per NYSDOH 2)cc to Langan (Rogers/Spanos) and NYSDOH Walz. 12/18/17 - Austin - Project reassigned from Vought to Patel - end 04/20/18-Hiralkumar Patel. 2:00 PM:- went to site for inspection. Site is being redeveloped. 2:23 PM:- left message for Ilkay. 05/01/18-Hiralkumar Patel. 1:25 PM:- received call from Ilkay. she mentioned that the building construction will be completed by Aug. 2018 and SVI study will be conducted in Dec. 2019, after actively running SSDS system for a year. suggested Ilkay to submit report including summary/result of activities completed to date. 01/24/19-Hiralkumar Patel. 2:09 PM:- received call from Ilkay inquiring about need for SVI study if site has an active SSDS. asked Ilkay to contact NYSDOH in this matter. 03/21/19-Hiralkumar Patel. received email from Albert Tashji (ATashji@Langan.com) from Langan including sir sampling results. 11:33 AM:- received email from DOH Nathan. he reviewed the results and mentioned that it does not appear that the indoor air is impacted and the soil vapor concentrations are not indicating a concern at this point in time. 03/22/19-Hiralkumar Patel. 1:00 PM:- spoke with DOH Nathan, Albert and Ilkay. Albert mentioned that the SSD system was not in operation at the time of SVI sampling due to some adjustments being made to the system, and sub-slab vapor sample was collected by lowering a tube through SSDS riser pipe to perforated area. he also mentioned that the building's HVAC system was in operation at the time of SVI sampling. based on result of SVI sampling, NYSDOH agreed that no further investigation is required at the site and SSDS can be passive. informed Albert/Ilkay that the spill will be closed upon receipt of a SVI report (including summary of sampling methodology). 09/17/19-Hiralkumar Patel. 12:50 PM:- received email from Albert including copy of PBS registration form to include a 550 gal UST discovered during construction. 1:12 PM:- sent email to Albert and reminded him that SVI report is not submitted yet. email copied to Ilkay. 10/07/19-Hiralkumar Patel. 2:09 PM:- received email from Albert including link to spill closure report. 10/09/19-Hiralkumar Patel. case closed based on review of available information. MSBGC-NYC Support Corporation **property owner** c/o Jeffrey M. Dold Chief Financial Officer 250 Bradhurst Avenue New York, NY 10039 Ph. (212) 760-9600 Ext. 0366 email: jdold@madisonsquare.org 10:30 AM:- sent spill closure letter to Mr. Dold. letter emailed to Mr. Dold, Albert and DOH Nathan."

Remarks: "Caller advised received lab results back showing unk petroleum in ground water. CLean up is pending."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 4:30PM 3/15- CALLED EASTMOND. TANK WAS CORRODED. 2.300 GALLONS IN TANK ROOM. EASTMOND EMPTIED TANK. PUT DOWN SPEEDY DRY. 4/1/99 CHRIS MCNEUR AT MAHA REALTY SAYS SITE WAS CLEANED UP AND TEMP TANKS WERE INSTALLED. OWNER IS THINKING ABOUT EITHER A NEW TANK OR

APT COMPLEX (Continued) **S102233285**

REPAIRING THE OLD ONE. 5/20/99 CHRIS MCNEUR SAID MAHA REALTY NO LONGER MANAGES THIS BUILDING. THE OWNER WENT BANKRUPT AND MANAGEMENT OF THE BUILDING WAS TAKEN OVER BY NEW YORK CITY HPD. 1/17/2002 - Sangesland spoke with Tom Middleton (environmental consultant) who now works for the new owner of the property. Apparently the former property owner lost the building to the city. The city recently sold the building and now the new owner is trying to figure out what needs to be done to bring it into compliance. Mr. Middleton says he believes there is a new tank in the building, but this needs to be confirmed. Sangesland requested a submittal to the DEC including details of the original spill clean up, information related to either the repair or replacement for the subject tank and information on the present owner. As of 1/17/2002, the PBS records are out of date. (expired 1997) The new owner needs to update the PBS information and submit the appropriate PBS information. 3/21/2002 Sangesland received a 1 page letter from State Environmental Services, Inc. (718-265-3355) stating that the tank size was 3,000 (aboveground), it has a concrete Wrap in good condition, the area is clean and shows no leaks, a new seal gasket was installed and the tank and piping system tested tight on March 6, 2002. As of 3/21/2002 the PBS form still was out of date. Sangesland told Mr. Middleton that he needs to get the PBS paperwork straightened out before this spill number will be closed out. 11/19/2003 Sangesland received a copy of an updated PBS form (2-196525) for this site. Now that the PBS has been registered, the spill can be closed out."

Remarks: "CONTAINED IN A VAULTED AREA. TANK WILL BE REPALCED. EASTMAN CO CLEANED IT UP AND DID INSTALL TEMP. TANKS. ***MAY 20, 1999 UPDATE*** MAHA REALTY NO LONGER MANAGES THE BLDNG. ***NEW YORK CITY HPD TOOK OVER MANAGEMENT*** SEE DEC NOTES PAGE"

DEC Memo:	"11/9/09-Vought-Seconday off-hours responder. Vought performed site visit and met with super (Stanley cell:347-387-4582) and cause of spill was burst supply line to oil burner to boiler over boiler pit. Spill of approximately twenty five gallons to concrete 8'x12'x1.5'deep boiler pit that also had some plywood in it was well. At time of site visit Vought noted, pooled red #2 fuel oil and impacted wood and speedi dry as well. Sump pit also impacted in boiler pit. Empire Fuel oil aka Approved oil onsite removing product with shovel into five gallons buckets. Spill initially called in by tenant who observed odors in lobby who then in turn notified FDNY. Super opened windows to lobby and at time of DEC site visit, no odors were observed in lobby. Tank room is directly under Friedland Liquor Store and Vought noted no odors in store and left business card with occupants in case odors should arise. Owner of building is Michael Schwartz (cell:347-219-0430). Vought received call from and spoke to Donna (ABC Tank 718-272-2800 fax:718-272-3147) who is sending crew today to clean spill and Vought provided her with scope of work including removal of impacte debris and powerwashing of boiler pit. No soil borings required as pit noted to contain liquid product approximately 24 hours after spill indicating lack of seepage and suggesting integrity of concrete. See also closed spill #0908866 at same location. Vought sent out CSL with one month due date and submission of invoices from ABC and cc to ABC Tank. Vought called Renaissance Realty and spoke with Debbie and noted requirement for invoice submission for spill closure. CSL sent to owner as per PBS #2-196525: Mr. David Chemtob Renaissance Realty Group, LLC. 1950 Coney Island Avenue Brooklyn, NY 11223 Ph: (718) 376-5400 Fax: (718) 376-6910 11/9/09-Vought-Received copy of signed ABC work proposal including removal of oil impacted debris and speedy dry, pressure washing and disposal of liquid, collection of two soil samples from affected area. Proposal signed by Chemtob. 11/12/09-Vought-Conference

MULTIPLE DWELLING (Continued) **U003127874**

Remarks:	call with David Chemtob and Donna. Vought inquired as to status of soil borings. Vought spoke to Donna and no cracks in cement and as such no soil samples were collected. No soil samples required due to pooled oil numerous hours after spill suggesting lack of seepage to subsurface. Chemtob will fax in invoice for spill closure. 11/13/09-Vought-Received copy of fax invoice from ABC Tank Repair & Lining Co. Shows use of vacuum truck, pressure washer, disposal of washwater, soap and disposal of four drums of contaminated soil. Spill closed by Vought and spill closure letter sent to Chemtob. " "Spilled from Storage tank-caught in catch basin-clean up in progress."

DEC Memo:	"This building is one of 7 large apartment buildings in the complex. Eastmond is installing a new oil tank in the building basement. There in an existing 20,000 gal buried tank (#6 oil) associated with each of the buildings on the site. At some point in history there was a new fill line installed and they did not dig out the contaminated soil around the old fill line. Now they are installing a new oil tank in the building's basement and taking the old buried tank out of service. While Eastmond was digging to install a new fill line, they trenched and found contimated soil from a prior leaking fill line. There is an open trench with contamination.... Open trench is 2ft wide x 20 deep x 12 ft long Eastmond installed 1 new tank in one of the other buildings last year. They have now just signed a contract to install one new tank in each of the remaining 6 buildings. As part of this contract, they are installing new new fill lines and they will eventually abandon the existing 20,000 gal USTs associated with each of the other buildings. CSL sent to property owner: Vantage Properties 750 Lexington Ave - 17th Flr NY, NY 10022 Attn: Mr. Michael Ellsworth 06/15/07 Report from A.L Eastmond-30 tons of contaminated debris was removed.End point sample shows voc/svoc non detect.Manifest/photographs are attached in edocs.Spill can be closed.(SR)"
Remarks:	"DURING EXCAVATION FOR INSTALLATION OF A NEW FILL LINE FOR AN OIL TANK AT THE ABOVE LOCATION, WHICH IS AN APARTMENT COMPLEX, CONTAMINATED SOIL WAS DISOCOVERD:"

Contact Name:	ERIC TELEMAQUE
DEC Memo:	"Probably 2-1,000 gal tanks - Found product in borings around tanks. Proposal to either pull the tanks now while the building is in place vs waiting for the building to be knocked down first. Building/Lot is being sold and purchaser is deciding which option would be best. Either way Emteque is planning to prepare/submit a Remedial Action Plan. They are planning on pulling the tanks, removing the impacted soil and installing monitoring wells in the area. Then a series of groundwater samples taken over time to prove the area is clean. 5/2/12-Vought-Received call from Eric Telemaque (Ph:212-631-900 email:eric@emteque.com) and you are working for owner. Suspected three tanks (three anomolies), one below ramp and two below basement slab. One or both tanks below slab possible leaked in northeast corner of property. RAP will be submitted. Another site immediately adjacent within same block and lot will be developed along with property. Groundwater at 17-18'bg. Property has not been sold yet and will not be developed for a few months away from foundation placement. RAP will sumbmit will include tank removal and endpoint samples. Basement excavation will be left open and product will be vacuumed and remnants treated with Regenox. Telemaque will submit RAP

COMMERCIAL PROPERTY/PARKING GARAGE (Continued) **S111456729**

by 3/15 which will also include provisions for IRM if significant free product and surrounding area site plan. 6/18/12-Vought-Reviewed Hazardous Materials Remedial Action Plan dated May 2012 and prepared by Emteque. Plan prepared for: Mr. Michael Price Icon Parking 211 East 38th Street Ground Floor New York, NY 10016 Ph:(212)686-8663 email:mprice@iconparking.com Site is a commercial parking garage with one level on grade and one level below grade. Proposed use includes demolition of existing structures with redevelopment of the site . GPR survey performed as well as preparation of a Phase II report in November 2011. Vought called Telemaque and left message to send Phase II Report. One anomaly was discovered outside the lower level concrete driveway and two possible USTs were also noted on the north end of the parking garage. Fifteen Geoprobe borings installed with six converted to temporary monitoring wells. Select soil samples revealed the presence of VOCs and SVOCs but except boring B-3, all were below unrestricted SCO. MW2 also noted groundwater exceeences of VOCs. Lab data suggests that the contamination to groundwater and soils in the north east corner of the basement may have come from GPR anomolies which they believe to be USTs. Proposal for registration of tanks with PBS, removal of liquid and sludge for tanks, tank cutting and removal of steel and contaminated soil and free product and collection of endpoint samples. For lower level tanks, proposal for no bottom soil endpoint as bottom in groundwater. Proposal for collection of baseline groundwater sample and RegenOx application if no free product is noted. Proposal for monitoring groundwater in the excavation for dissolved oxygen, pH and redox every 30 days for a ninety day period. Construction Health and Safety Plan also included in RAP. Plan notes that a Remedial Closure Report will be submitted following implementation of the RAP. Vought drafted DEC requirement letter and will finalize upon receiving and reviewing Phase II from Emteque. 6/19/12-Vought-Received email from Emteque (Lynelle Cardone) with soil analyticals and a site plan from November 2011 but no soil boring logs or sampling depths of the soil samples are provided and as such DEC cannot determine if RAP is sufficient to cover the entire area as per the investigation results. Vought called Emteque (Cardone) and asked her to send in boring logs and complete report or at a minimum depths of soil samples collected. Soil analyticals show: 5300ppb ethylbenzene(B3 unknown depth), 1300ppb xylene(B3 unknown depth), 19000ppb napthalene(B3 unknown depth). Groundwater analyticals show: 260ppb benzene(MW2), 100ppb toluene(MW2), 650ppb ethylbenzene(MW2), 222ppb xylene(MW2), 430ppb napthalene(MW2). 6/21/12-Vought-Received email from Telemaque on 6/20 that This is what I have in my files from the Driller. Please let me know if you need additional information and please let me know once you have had a chance to review the RAP so that we can implement. We are prepared to file dwgs with DOB on Monday to pull permits and get the work scheduled. The borings with the deeper depths came from the property to the west which is slab on grade. The shallow borings came from the basement of the property at 155th Street, where we noted contamination. Vought sent letter to Price for review of Phase II and RAP and letter did not approve of Summary of Remedial Actions #11, #12 and 15 (for Regenox application) but letter did approve all other Summary of Remedial Actions. Letter also required submission of development plans for site, collection of bottom endpoint groundwater sample, determination of flow direction and installation of a downgradient well, submission of a surrounding area site plan and quarterly groundwater sampling and no development of site until RAP

COMMERCIAL PROPERTY/PARKING GARAGE (Continued) **S111456729**

is approved by DEC. Emteque cc'd on letter. 7/16/12-Vought-Received email from Telemaque on 7/2 that the site is not scheduled for development at this time , collection of one bottom sample will be incorporated into revised RAP, inquiry if attached receptor report from EDR will suffice, quarterly groundwater sampling will be incorporated into revised RAP and delineation via installation of downgradient wells and flow determination will also be incorporated into revised RAP. Received email on 7/11 from Telemaque that I sent you a couple of emails on 7/2 regarding the above referenced site. We would like to move forward with the work pending DOB permits which are in process. Can you please give me a call at your convenience to discuss? Ownership is anxious to remove the tanks and associated contaminated soils. Vought called Telemaque and left message to return call to Vought. Vought also sent email to Telemaque and cc to Price that Thanks for your patience and I have reviewed the below response to the Department's letter dated 6/21. A couple of questions: 1)Item 1- You noted on 5/12 during a phone conversation that the site will be sold. Will be it be redeveloped upon that time and to what use? Do we have a purchaser already? I 2)Item 3- I would like surrounding area site plan with labeled property uses and I am not sure EDR can do that. I am essentially looking for a block and lot map with uses such as school or residential building, stores etc to document the presence and/or absence of sensitive receptors. I just left a message on your cell phone as well and the Department looks forward to reception of the revised RAP .
7/17/12-Vought-Received email from Telemaque that no development or sale plan at this time. I will get you the sensitive receptor labelled map today . Vought replied that Department will consider ORC application once the delineation results and receptor maps are in.
2/22/13-Vought-File review by Vought due to inquiry by Emteqe (Jim Blaney): Email from Blaney-11/12/12. Email that We are waiting on a response from NYS DEC with regard to our remedial investigation strategy at the 304-310 West 155th Street Site. I have copied our NYDEC Case Manager, Jeffrey Vought, to this email. In the interim we are applying for a sidewalk opening permit from the City so that we may begin the work once we receive Jeffrey s input. Email from Emteque-2/20/13. Email from Telemaque that With regards to the above referenced spill number, we have been trying to reach you to schedule a discussion or a meeting at your offices to discuss the above referenced spill and possible closure of the spill. This is a follow up email to voicemail messages I have left at your office and on cell, today, regarding this spill and prior message from Jim Blaney. Our client has a potential buyer for the property and we are anxious to move the spill closure along. Please feel free to contact either myself or Jim Blaney to discuss. Jim is more familiar with the technical details and can be reached on cell at 609.613.2004. My contact information is detailed below. In the event that you are no longer managing this spill can you forward this email to the new case manager. 2/22/13-Vought-Received call from and spoke to Emteque (Jim Blaney) and unknown development plans to date and they did collect groundwater samples and they installed well points inside basement of garage and additional soils excavated due to VOCs and lead till clean and well also installed outside of building and temporary water samples came back as non-detect. They submitted proposal to DEC and due to lack of response, work plan was initiated. No data has been submitted to date. Five temporary well points total installed. Additional excavation was performed to encompass soil and groundwater

COMMERCIAL PROPERTY/PARKING GARAGE (Continued) **S111456729**

contamination at MW2 as such DEC will not require ORC injection. Closure report will be submitted and will include discusssion of vapor mitigation (eg vapor barrier). Data to be submitted to DEC within one month. 4/19/13-Vought-Received call from and spoke to Emteque (Lindemuth) who noted that site address was actually 302-304 West 155th Street and not 304-310 West 155th Street as previously reported. Vought changed spill address to same. 4/23/13-Vought-File review by Vought due to recent phone request by Emteque (Lindemuth) to review closure report. Email from Lindemuth to Vought-4/16/13. Email that am following up on a phone conversation we had last week (4/11) regarding the Remedial Action Report (RAR) submitted by Emteque for Spill Case No. 11-10699 assigned to the property located at 304-315 West 115th Street, NY, NY. During our conversation you indicated you would be able to review the report this week. The client has two potential purchasers and would like to be able to move the property transaction forward. Please contact Jim Blaney (cell 609-613-2004) or me for clarification during your review of the RAR. Thank you for your attention to this case. Email from Lindemuth to Vought-4/18/13. Email that Jeff,Per our conversation please use the link provided below to download a revised Spill Closure Report which corrects the address and Tax Map Block and Lot of the property. The correct address of the Site is 302-304 West 155th Street, New York, NY 10039, Tax Map Block 2047, Lot 37. Click here to view.Please contact Jim Blaney or me with any questions or comments.Thank you for you attention to this case. 4/23/13-Vought-Reviewed Remedial Action Report dated 3/25/13 received from Emteque and added report to E-docs. Future development plans of property are unknown . No UST was identified in GPR anomaly by driveway/ramp via test pit installation to 4'bg. Five USTs found in anomaly in basement where two USTs previously thought (Two 100-gallon steel USTs (which were most likely the USTs noted in the GRP survey) underlain by three concrete encased steel 500 gallon USTs. Groundwater at 4'bg. Contaminated soils removed as well and six endpoint samples collected from sidewalls and approximately 40 tons of impacted soil were removed. Elevated VOCs noted in three of six endpoint samples and another excavation was performed in two subsequent events and a total of 80 tons of impacted soil was removed. One groundwater grab sample also collected for the excavation. A total of 1300 gallons of liquid also removed from excavation. Additoinal delineation performed via installation of two monitoring wells (GW7 and GW8) onsite and three wells off-site (B18 thru B20). Report recommends closure. Vought called and spoke to Emteque (Lindemuth) and he will send in site plan with endpoint sample locations and delineation wells and noted that a DEC RAP review letter was not needed for this requirement. Groundwater analyticals show: 23ppb toluene(GW11), 7.2ppb napthalene(GW11). Note elevated PAH's found in soils most likely associated with fill material. Report also notes that It is also noted that NYSDEC recommended the incorporation of a vapor / moisture barrier into any future development plans for the property as part of the pending real estate transaction. 4/25/13-Vought-Received email from Lindemuth that Per our conversation please find the attached figure which shows the locations of the delineation borings and end-point samples. This Figure is included in the Remedial Action Report as Attachment E.Please let me know if you need any thing else. Vought added figure to E-docs. Spill closed by Vought due to minor groundwater contamination at GW11 within natural attenuation parameters as well as excavation of contaminated soil at site at

COMMERCIAL PROPERTY/PARKING GARAGE (Continued) **S111456729**

confirmation samples with VOCs below CP51 Unrestricted SCOs. Note also that as per 4/23/13 email from Emteque It is also noted that NYSDEC recommended the incorporation of a vapor / moisture barrier into any future development plans for the property as part of the pending real estate transaction. Vought sent Spill Closure Letter with residual soil contamination clause to: Mr. Michael Price Icon Parking 211 East 38th Street Ground Floor New York, NY 10016 Ph:(212)686-8663 email:mprice@iconparking.com Vought also added Closure Letter to e-docs as well. 4/25/13-Vought-Received email from CA Rich Cooper that Jeff, I am working on Phase I for a property at 302 West 155th Street in Manhattan. The property had an open spill number 11-10699 and it has since been closed out. I have a client who wants to buy the property, but I just want to make sure they do not need to do any follow up work such as sub slab soil vapor sampling. The person selling the property told me it was good, but he hasn t sent over the whole report. He mentioned that a vapor barrier may be needed if the building is redeveloped, but he has not provided it to me. Can you e-mail me or call me to discuss this project? Vought called and spoke to Jason Cooper and he noted that site will still be a parking garage with ventilation and Vought noted that if future use of the site was to change than sub slab vapor sampling may be warranted. Spill to remain closed. 8/11/17-Vought-Received message from Langan (Chris McMahon Ph:973-560-4861) that he was looking for information as he was going to file a FOIL request as part of a property transaction. Vought returned call and left message with summary of remedial action and closure based on fact that site was to remain a parking garage with ventilation."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD Fuel oil coming up in the basement. Perimeter of the drain. Fumes and oil all over. 12/02/03. J.Krimgold @ site. Fresh (pink color) #2 oil smeared around two storm drains of the basement. Dye test of the storm drain revealed that it connected to a buildings sanitary sewer which is almost blocked. Raised water brought oil up the drain. About 2-3 gal of oil observed in the storm drain. Spoke to Joanne Boyd (212)690-1553 - building owner. Building converted to a natural gas heat about 2 years ago and currently does not have oil tank or pipes. Ms. Boyd suggested that oil is coming from adjacent building 468 W. 153rd Street which has oil heat system. J.Krimgold inspected adjacent building and found that it has 2x275 gal ASTs and underground fill line. Ordered to test the fill line for tightness. In any case, it is not clear how the oil gets into the storm drain. 12/03/03. J.Krimgold @ site. Pitro Oil is performing a hydrostatic line test. The fill line passed the test. Ms. Boyd hired a contractor to unclog sewer and clean up the storm drain system from oil remains. Advised Ms. Boyd to contact the Department immediately if oil or petrol. odor reoccurred in her basement. NFA"
Remarks:	"caller states that oil is coming up drain in basement. "

Her records indicate that a closure report was submitted for this spill. I advised her that a copy of the report was not present in our file and requested another copy be sent. (Zalewski) 11/9/2005 - Handled a phone call from Steve (TDX). He called to request the address to submit the closure report. (Zalewski) 11/23/2005 - Reviewed spill closure report dated January 12, 2004. Report states that a 16 x 16 square hole, previously cut into the top of the tank by a cleaning company, was not properly sealed and hence the tank failed the tightness test. No evidence of product leakage or spill. No further action. (Zalewski) "

Contact Name:	JOHN TULLY
DEC Memo:	"08/14/06-Vought-Following notes copied from Spill 0600518 from 531W142nd Street; 4/13/2006 Through Property Shark, ownership was traced to city HPD. 3 story townhouse in Harlem starting a gut rehab. Contractor has opened the basement floor to lay new plumbing lines, open to soil. Boiler and tank were removed and spilled onto dirt floor. Sangesland gave the HPD rep the name of PTC and Eastmond to come in, dig out the contamination, remove the soil with manifests and do endpoint testing. HPD rep said he would forward the two names to the prime contractor on the site for followup. Sangesland warned the HPD rep that failure to dig out the problem and fix it now could lead to a very expensive legal problem if it needs to be treated after the building is sold. 4/17/2006 The general contractor hired by HPD to renovate the building is: Central Development Corp - 212-226-7261 - Contact: Samantha - This contractor hired Petroleum Tank Cleaners to dig out the oil in the basement. After digging for a full day, they determined that the oil was coming from an abandoned building next door - # 533 West 142nd St. 04/20/06 Sharif Rahman-Inspected the basement of 531 and 533 on 04/17/06.Both basements used to have ASTs.Basement of 533 is located downhill of 531. So its unlikely for the oil to seep from 533 cellar to 531 basement. Owner of 533 is Peter A. Moody,1950 Coney Island Avenue, Brooklyn,NY 11223, who has retained ABC tank(Bob-718.272.2800) to remove the sewage-water mix from the cellar. I suggested to do the soil testing, especially along the wall to 531 to identify any oil contamination that might seeped through the wall from 531 basement.A contaminated soil letter was also sent to Ecumenical Community Development Org 413 W 125th Street New York, NY 10027 Attn: Ms. Lydia Blakely, Vice President asking to investigate the level of contamination and begin the clean up in 531 basement. 05/23/06 Sharif Rahman-Soil analytical result for 531 indicated presence of fuel oil in the basement.ALC Environmental contracted to have the first 3.5 feet of soil removed from the basement floor of 531. A CSL was sent to Peter A. Moody 1950 Coney Island Avenue Brooklyn, NY 11223 to investigate and remove the contamination at 533 west 142nd street basement. 6/28/06- DEC Piper responded to site on behalf of Shariff

TULLY RESIDENCE (Continued) **S108130992**

Rahman. Upon arrival. Neighbor at 539 invited me to backyard where smell oil was heavy. It was spoken that there was a historic stream thet ran behing the properties of 142nd St. It has been filled in since construction of the houses on 142. Piper inspected 531. Construction site where smell first originated. The basement revealed approx 50-75 gallons of #2 Oil and has not been cleaned up for some time now. DEC Piper noted oil was entering basement on NE corner (Rear upgradient) approx 2.5 feet above the slab. Heavy odor present in basemnt. DEC Piper contacted contracter and ordered them to remove the oil on the water in ther basement of the building. There is a open frame from a window where vapors are escaping. Since the back of the properties have poor circulation, vapors are lingering. DEC Piper knocked on three houses upgradient of 531 to inspect tank though no one was home in all the houses. The next property is a Friary which indicated that there was a tank. There was a remote fill though a vent could not be found. A friar escorted me in to the basement where I observed a potential abandoned fill/ vent line. DEC Piper noted all addresses and had Sangesland look up ownership for inspection to be performed by Rahman. END. 06/30/06 Sharif Rahman- I and DEC Ms. Veronica inspected the basement of 531 on 06/29/06 and was also able to get to the besement of 529 with help of FDNY(FDNY was notified by one of the neighbors).In the basement of 529, by the boiler unit I observed a sump approx. 5x3' which is saturated with oil.The boiler unit in 529 is located on the other side of the impacted wall of 531. So there is a possibility that oil is seeping through the wall from 529 to 531. Again, pictures from 531 basement wall indicates the seepage of relatively fresh heating oil and the odor is strong in the basement of 531.I suggested to ALC Environmental(John Kurth,212.675.5544,917.412.4946), environmental consultant to 531 to take samples from the wall for finger printing as well as ground water samples from 531 basement.Oil saturated pit in the boiler room of 529 needs to be cleaned up and investigated for possible migration of oil to the 531 basement.FDNY Hazmat chief Frank J. Naglieri and Chief Gormly, Battalion 16 indicated that they did not pick up any reading of health hazardous stuff on their instruments.HPD Project manager Frederick J. Koster(212-863-7714) informed me they renovated building 525 including excavation in the basement and did not come across any heating oil contamination. 07/03/06 Sharif Rahman- A letter asking to do the clean up of oil in the sump near the boiler and delineation of the extent of contamination to downgradient side has been sent by certified mail(7003 2260 0004 0928 5442) to property owner's son Jon G. Tully 461 West 144th Street New York,NY 10031 , on his request. Another letter to begin the clean up has been sent via regular mail to property owner D.B. Tully 529 W. 142nd Street New York, NY 10031 DEC Piper: Rahman asked Piper to speak w/ Mr. Jon Tully. Piper reached Mr. tully at number provided. DEC Piper asked Jon to escort the Dept. into the basement of 529 (Potential Spiller. Rahman has photo documentation of pit under boiler in 529 when NYFD entered premesis due to call received by neighboring resident.) Jon was very defensive of requirements and refused to perform investigation. Piper explained that oil is entering the wall at the adjoining property to the west (531). The wall which is entering the property coincides with the location of the boiler and sump pit in 529. Therefore the property and it owner is a potential suspect for the cause of the free phase product in 531 and heavy odors in the neighborhood. Jon placed phone on speaker and unknown woman was very loud. jon also became very loud and said that the owner is in the the

TULLY RESIDENCE (Continued) **S108130992**

hospital. Jon and woman were interjecting with me and refused to cooperate. DEC Piper stated that additional potential parties are also being looked at and the DEPT will contact them shortly regarding additional information regarding the warranted investigation. DEC Piper and Rahman visited site due to odor complaint by *********. DEC inspected basement of 531. Oil still present (25 gal)in basemnt on groundwater. DEC explained to 531 William Kan of Central Development that they are required to remove oil and seal basement window with poly sheeting (onsite) since it is on their property and once responsible party is found, they can seek reimbursement. Piper photodocumented basement. ********* escorted DEC into back yard through DRIVETHRU garage(Geoprobe???). No odors were detected by nose or instrument (PID) upon arrival though at one time(a few seconds) a draft of fuel oil was detected by nose only. PIPER and Rahman noted addditional addresses to search PBS database that may have a potential to effect 531 due to their upgradient location. 07/06/06 Rahman- I called Ms. Blake of Ecumenical Community Development(212.531.3211 x 16)regarding the oil water that has been accumulated in the basement of 531 and generates odor, suggested to pump out the oil-water mix once or twice a week as they accumulate to prevent the odor that impacting the neighbors. 07/10/06-Vought-Spill transferred to Vought as per DEC Krimgold and DEC Nagi. Vought called John Kurth(consultant for 531 W142nd) and left message informing him of immediate site visit as per DEC Krimgold. Vought also called Martin Smith (rep. for Councilman Robert Jackson): (212)234-0551 and left message informing him of site visit. 07/11/06-Vought-File review by Vought: See also closed spill #0001105 for contaminated soil for 535 W142nd Street. Letter sent requiring investigation and submittal of

TULLY RESIDENCE (Continued) **S108130992**

results within one month. Fax from Central Development Corp (Samantha Wong) to DEC Rahman-4/20/06. The building is owned by HPD. However all related documents should be directed to the Developer (Ecumenical Development Org). Letter from ALC Environmental (Kurth) to DEC Rahman-5/19/06. Ecumenical Community Development Org hired ALC Environmental. ALC collected one composite sample of the surface level soil in the basement and four additional samples at a depth of approximately 3 feet below ground surface in a grid pattern in the basement . Sample analyzed for EPA Method 8270 and TPH (Method 8015). One sample broken in transit to lab. Due to the analytical results ALC has contracted to have the first 3.5 feet of soil removed from the basement floor... Three endpoint samples will be collected after excavation. TPH results prior to excavation show: 420000ppb TPH(ECDO-01), 53000ppb TPH(ECDO-02), 110000ppb TPH(ECDO-03), 4300000ppb TPH(ECDO-04). Contaminated Soil Letter for 533W142nd Street(DEC Rahman)-5/23/06. Letter sent requiring investigation and submittal of results within one month. Contaminated Soil Letter for 529W142nd Street(DEC Rahman)-6/30/06. Letter sent requiring immediate removal of discharge and submission of a letter report summarizing cleanup activities. If an investigation is performed then requirement made of submittal of results within one month. Email from Patrice-Tully Willimas to DEC McKeon (via website) to DEC Oliva-7/5/06. I am writing to enquire as to the process by which one may file a formal complaint or seek an investigation of a DEC employee who appears to be using his professional position to assist a group of interested parties in intimidating and elderly homowner . Email from DEC Krimgold to DEC Oliva-7/10/06. Email with case history Email from DEC Moore to DEC Oliva-7/10/06. Mooor received inquiry from Executive Director of We Act West Harlem Environmental Action Inc) who received complaint from M. Edwards. 7/10/06-Vought-Site visit by DEC Vought and DEC Zhune. 531W142nd Street-Vought met with William Kahn and all work on builing currently stopped due to oil in basement. Oil was first noted in December 2005 and has been located in same area of basement (adjacent to 529W142nd Street and in rear of building) during entire time. Product seepage noted through wall at height of 2' above grade of wall adjacent to 529W142nd Street. As per Kahn source of odors to adjacent properties was though rear stairwell of builing and to backyards of adjacent buildings(stairway was covered with tarp). As per Kahn oil was recovered on week ago via skimming and product reappeared (in same historical location) at rear of building. As per Kahn 275-gallon fuel oil AST was located in basement of 531W142nd however it was located in front of building (no free product seepage in front of building). 525W142nd Street-which is also Housing, Preservation and Development property. No UST located in basement, no fill or vent and no spill at site, drain in basement with standing water has no free product. Vought received call from John Kurth and as per Kerth, 11 tons of soil were removed from the basement, the fuel oil AST was removed approximately one year ago, when the AST was removed, some oil was spilled into the basement. 527W142nd Street-275-gallon AST was present with aboveground supply line to boiler. No sign of spills and no staining or odors. 533W412nd Street-No access at time of site visit. Vent pipe and fill port visible 535W142nd Street-No access at time of site visit. Vought spoke with owner(Oranato) and arranged site visit for 7/14 at 11am. Oranato also indicated that he could provide access to 537W142nd Street at same time. 537W142nd Street-No access at time of site visit. Call was received from owner (Edwards) later that no odors

TULLY RESIDENCE (Continued) **S108130992**

were noted in house. 539W142nd Street-Met with site owner (Briggs) and as per Briggs: 2.5-3 months ago residents noticed fuel odor in backyards. Last time odors were noticed was 6/30/06. Kahn also indicated that during heavy rains, water is located in most basements on the block (shallow water table). Briggs also indicated that he saw Sure Fire Oil deliver fuel oil to 529W142nd Street on 7/7/06. Vought inspected basement and no odors were noted. Hole in foundation with groundwater showed no sheen or odor. 07/12/06-Vought-DEC Requires: 1)535W142nd-Site visit and inquiry as to size of 2000 spill 2)cc to NYCDOH, NYSDOH 3)529W142nd-call regarding drop dead letter with requirements of soil boring and tightness testing, call to Sure Fire Oil, site visit on 7/14/06, assistance with insurance 4)531W142nd-call to HPD Lydia regarding submission of tank removal summary and soil endpoint analyticals from final excavation, possible opening of PIN for product recovery at 531 as per DEC Austin, former spill in basement and STIP with installation of a vapor barrier and possibly passive ventilation system, submission of previous Phase I on property 5)537W142nd-Site visit and FOIL application faxed to Marcus 10)533W142nd-site visit 07/12/06-Vought called Lydia from Ecumenical for above requirements and she has affadavit stating that tank was removed however no notes of environmental concern. Lydia mentioned that Phase I was performed and will be submitted to DEC. DEC Vought explained joint and several liability to Lydia and the fact that 531W142nd may be held partially liable depending upon submission of information regarding prior spill and former AST. Lydia said that she did everything she could do and would like the use of states contractors. Vought called and spoke to Pamela Tully and she requested one more day to make decision and she will also have Jon Tully return call. Vought called Marcus Edward and left message to return call regarding one day extension and site visit on 7/14/06. Vought called and left message with Sure Fire Oil to explain possible leak at 529W142nd and that DEC will be requiring tightness test and soil boring. Vought called owner of 533W142nd Street to arrange site visit. Vought called Kurth and left message explaining current status. Vought called Alexander Timlin and left message to return call with fax number for cc. Vought called West Harlem Environmental Action and left message to update her on status. Vought called and spoke to Martin Smith who requested cc on letters and Vought sent him spill notes (Director of Constituent Services fax 212-928-4177 and 212-234-0552). 07/13/06-Vought-Received call from Peter Moody and he will be onsite for DEC site visit on 7/14/06. Vought called Pamela Tully for update on decision and Tully still unsure if 529W142nd Street is source but he did agree for site visit on 7/14 at 10am. Vought to visit 533/537/537 and 529W142nd Street. Received call from Peter Moody that he will be onsite tomorrow for access. Vought received message from Alexander Timlin and returned call and left message to return call. Vought received message from Kurth and returned call and informed him of 7/14/06 site visit. Vought sent DRAFT Stip to DEC Urda for review prior to sending. 07/14/06-Vought-Site visit to 537W142nd Street and no odors in basement, no product in sump (only groundwater) and no stains. Site visit to 535W142nd Street and no odors in basement, no product in sump (only groundwater) and no stains. No site visit to 533W142nd despite assurance from owner (Moody) that he would be onsite. Site visit to 529W142nd Street with Jon Tully and Pamela Tully. 275-gallon #2 fuel oil tank system is entirely above ground. Staining, odors and adsorbent present in furnace pit at point where supply line enters

TULLY RESIDENCE (Continued) **S108130992**

boiler. Crack evident in containment pit. After lenghthy dicussion with Tully's regarding PIN process they asked for extension on decision to hire contractor. Vought extended deadline to 7/17/06. Vought received draft STIP back from DEC Urda and Austin and included their edits. 07/17/06-Vought-Called Jon Tully and he had placed call to Petroleum Tank Cleaners (Mark Salamack 718-624-4842) but had not received call back. Vought called PTC and left message with Salamack to return call confirming that they were hired by Tully. Vought called William Kahn and spoke to him inform him of progress and to notify him of upcoming site visit. Vought called Lydia and left message stating same. Vought to 1)send STIP to 531W142nd Street 2)send requirement letter to Tully if he is accepting responsibility 3)call Peter Moody and arrange site visit for same day as Vought/Tully/Kahn/Milro site visit. 07/18/06-Vought-Site visit with William Kahn, Lydia Blakely, Jon Tully and Mark Salamack (PTC). Tully agreed to the installation of one soil boring at the area of heaviest staining. DEC Vought will be contacted to perform site visit to witness boring so that Tully's expenses be spared. Vought explained to Tully that if soil and groundwater contamination was noted than DEC would require him to immediately recover free product in basement of 531w142nd Street. Vought also inspected Tully's 275-gallon AST and the poor condition of the steel was noted by PTC and as such they made the recommendation to replace and relocate the tank on concrete(tank is currently on soil). Vought also inspected basement of 531W142nd Street with Tully, Salamack, Kahn and Blakely. Small in increase in amount of product on groundwater. Total amount of free product is approximately 5 gallons of red #2 fuel oil. Product noted seeping out of wall of 529W142nd Street. No product at former AST location. Vought received call from Salamack and boring scheduled for 7/20/06. Vought received message from Kurth and returned call and left message summarizing progress. Vought will send out requirement letters upon installation of soil boring on 7/20/06 and determination of responsible party(s). Vought called and spoke to Peter Moody regarding site visit and visit scheduled for 7/20/06.
07/20/06-Vought-Heavy rains may have caused water table to rise. As such boring was requested by DEC to be postponed to prevent infiltration of free product into basement of 529W142nd street through boring location. Boring rescheduled for 7/25/06.
07/24/06-Vought-Site visit with Peter Moody at (533W142nd Street). Basement composed of mostly dirt and concrete was removed. Five small excavation locations (previously referred to as boring locations) contained groundwater. Two excavations on east side of site (closer to 531W142nd Street showed no free product or sheen (suggesting that contamination emanating from 529W142 and impacting 531W142nd Street has not impacted 533W142nd Street. Excavation closest to two (275-gallon) manifolded ASTs showed soil staining and may have had some emulsified free product. Part of line from ASTs to boiler is above concrete. Vought required Peter Moody to send in AB Environmental report with soil analyticals.
07/25/06-Vought-Preliminary review of Phase I Report for 531w142nd Street dated 5/25/04. With regards to AST in 532W142nd Street the tank appeared somewhat rusty and its base was resting on the floor of the basement. No holes were observed in the tank but it could not be thoroughly inspected due to its position on the floor. Oil staining was observed in the vicinity of the tank as well in the furnace room . 07/26/06-Vought-Installation of soil boring by Petroleum Tank Cleaners. Soil sample collected at 18 below fuel oil filter in area

TULLY RESIDENCE (Continued) **S108130992**

of heaviest staining. Soil samples show high soil contamination and as result no samples were taken to save expense. Tully agreed to recover oil in 531W142nd Street and also agreed to sealing walls between two properties. PTC scheduled vacuum truck for 7/27/06. Vought informed Walter Briggs of progress and asked him to relay infomation to Edwards and Oronato. 07/26/06-Vought-DEC requires: 1)533W142nd Street-submission of soil boring results (note that results were due to DEC by 6/23/06 as per DEC Rahman's letter dated 5/23/06). 2)531W142nd Street (impacted property)-submisssion of signed STIP that requires installation of vapor barrier and passive ventilation system 3)529W142nd Street-immediate recovery of fuel from 531W142nd Street, sealing of adjoining wall, possible soil remediation, notification to insurance company. Vought sent out STIPULATION with due date of 8/28/06 to 531W142nd street with above requirements and letter to 529W142nd Street with requirements. 08/10/06-Vought-Received message from PTC Salamack that 1300 gallons of oil water mix was removed from the basement of 531W142nd Street. Vought called Salamack for current update and product was removed on 7/28/06. PTC recommended that Tully hire professional waterproofing company to seal wall. Vought called William Kahn to see if any further product seepage and Kahn noted that additional product was conitnuing to infiltrate 531W142nd Street. Vought called Tully and set up site visit for 1pm on 8/14/06. Vought also explained that if free product was again present after initial recovery event then more aggressive remedial action (eg excavation) will be required by the DEC as approved by DEC Austin. Vought called Kahn and set up site access for site visit. Vought received message from ALC Kurth and returned call and left message informing him of continued infiltration and upcoming site visit. Vought received call from Martin Smith and returned call. 08/14/06-Vought-Received message from Martin Smith that he will be attending site visit scheduled for today. Vought called Smith and left message confirming of site visit and called Blakely informing her of Smiths attendence. Vought called Tully and told him of possible attendance of Smith and Blakely. Vought called William Kahn and confirmed site visit and participants. Site meeting with Blakely, Kurth, Kahn, Smith and Tully. Approximately 3gallons of fresh product noted in basement of 531W142nd Street. DEC proposed 2 day deadline for Tully to hire contractor however Smith suggested one week and due to previous history with HPD Blakely, he was able to ensure their cooperation. As such deadline was set for 7/21/06 at 8:30am for notice that Tully has hired contractor. Vought sent drop dead letter of one week. 08/17/06-Vought-Received notice from Mr. Tully agreeing to clean up the spill either by PTC or insurance. Vought requested callback with insurance company so that they could be added to the letter. 08/18/06-Vought-Called Mr. Tully for insurance information and Mr Tully indicated that he also received call back from PTC Salamack who asked Tully to send him copy of letter from DEC. Vought added address of NY Property Underwriting Insurance Association and called and sent fax to them: NY Property Underwriting Insurance Association 100 William Street New York, NY 10038 Fax: (212)344-0731 Ph:(212)208-9700 Vought called PTC Ray Lara and updated him on information and PTC Lara will have someone sent out to provide estimate. Ray Lara also confirmed receipt of fax from Tully. 08/22/06-Vought-Received call from PTC that PTC Salamack would not return from vacation till 8/28/06 and proposal should wait till then. Vought discussed site with DEC Austin and Austin required recovery of approximately 4

TULLY RESIDENCE (Continued) **S108130992**

gallons of free product. Vought called Tully and explained requirement and he agreed to placement of pads. Vought called William Kahn for access to place pads down and left message with update. Vought called Smith and voicemail box was full. Vought called Blakely and left message with update. Vought called PTC Ray Lara and and left message to return call. 08/29/06-Vought. Returned from vacation. Called PTC Salamack (917-559-5519) for update and left message to return call. As per PTC Salamack, Tully has not authorized any work to be done including placement of pads. Vought called Tully and as per Tully he was waiting for call from PTC. Vought provided Tully contact info for PTC Salamack. Vought called Salamack and left message indicating Tully would call and the need for absorbent pad placement. Vought called NY Property Insurance Underwriting Association. Vought left message with insurance that if call back was not received and Tully refused to cleanup spill, that ECO's would be sent to both insurer and Tully for fines. 08/30/06-Vought-Discussed site with DEC Austin and deadline set for work of 9/8/06. Vought called PTC for update and left message to return call. Vought called Smith and left message informing him of deadline and that he will b cc'd on DEC letter. Vought recived call from Smith and spoke with Smith and he agreed on deadline. Vought sent letter with deadline and faxed copies to all agencies. Vought called Tully and explained deadline. 09/06/06-Vought-Received call from PTC Salamack that he performed site visit to lay pads down at 531W142nd Street but no one was onsite to provide access. Salamack left pads onsite and is willing to perform additional site visit to lay pads down. Salamack also indicated that he sent proposal to Tully for excavation of basement. Vought called Salamack for copy of proposal. Salamack attempted to call Tully today but no answer and will fax over copy of proposal. 09/07/06-Vought-Received message from Salamack that he received message and verbal approval from Tully to begin work. Vought also received copy of proposal via fax that Salamack sent to Tully for approval. Vought received call from Blakely that absorbent pads left by PTC were not at site upon their arrival. Vought called PTC Salamack and he will arrange for more pads to be dropped off. 09/12/06-Vought-Received call from Tully that PTC proposal does not contain final cost and that PTC Salamack stated that job may take weeks. Vought assured Tully that work should only take a few days and that DEC will be onsite to ensure minimal expense and requirements. Vought called PTC Salamack and he will call Tully to discuss proposal approval. 09/13/06-Vought-Received message from Tully that he signed PTC proposal. Vought called PTC Salamack and Salamack has received copy of signed proposal. Vought received copy of signed fax proposal and forwarded copy to all previously cc'd parties. Vought called PTC Salamack and left message to return call with start date. 09/14/06-Vought-Received call from Tully that proposal was signed. Vought called Tully and as per Tully, PTC scheduled work to begin tentatively for 9/18/06. 09/20/06-Vought-Work started today by PTC. Site visit to be performed by DEC. Vought called Kahn to arrange access. Vought called William Kahn and site visit arranged for 12:30 today to place additional pads down at 531W142nd Street. Site visit performed and twelve drums of soil removed from under fuel pump area and additional excavation limited by boiler location. Tully will have boiler moved so that additional excavation can be performed. Product still present in basement of 531 W142nd Street and adsorbent plads were placed down. 9/21/06-Vought-Called Tully for update on boiler move. Vought received call from and spoke to Blakely who was

TULLY RESIDENCE (Continued) **S108130992**

expressing dissatisfaction with progress of work but was not requesting any additional action. Vought called Tully and boiler relocation set for Tuesday. Vought called Martin Smith and unable to leave message due to full mailbox. Vought called Blakely and left message informing her of Tuesday date. 09/22/06-Vought-Called Smith and left message updating Smith that excavation will proceed on 9/27 after boiler relocation at 529W142nd. 09/27/06-Vought-Called Tully for status of boiler relocation and spoke to his wife. Boiler relocation has started and is expected to be completed by today. Vought called Smith to leave update and left message with update but unable to leave voicemail due to full mailbox.
09/28/06-Vought-Received call from Tully that work was completed yesterday and excavation to continue today as was also confirmed by PTC Salamack on 9/26/06. 09/29/06-Vought-Spoke to PTC Salamack and groundwater in excavation and groundwater with free product in excavation. Soil drums will be removed today and excavation will continue on Monday. Groundwater was pumped with a vacuum truck. Vought called Blakely with update and left message with update. Vought set up meeting at site for 10/2 at 12pm. Vought called Salamack and Tully and informed them of meeting.
10/2/06-Vought-Called William Kahn, Tully and Salamack and changed meeting time to 1pm. Vought performed site visit and onsite were Blakely, Kahn, PTC Lara and John Tully. Approximately 30 drums of soil have been removed to date and excavation is 5' wide x 5'long x 4' deep. Pads in 531W142nd Street were replaced by PTC. As per Kahn proposed floor will be 2.5' above current groundwater level and excavation is going to continue tomorrow. Additional excavation will be performed and recovery wells will be installed in 529W142nd and also in 531 W142nd Street. DEC requires: 1)installation of recovery wells in both basements 529 and 531W142nd Street 2)continued excavation in 529W142nd Street 3)sealing of wall at 531W142nd Street 4)installation of vapor barrier and passive ventilation system in 531W142nd Street 5)monitoring of recovery wells. Vought called PTC Salamack to ensure that excavation continued to maximum depth possible so that recovery well could be installed. Vought emailed Kan links for vapor barrier, SSDS and foundation sealers.
10/05/06-Vought-Received call and spoke to ALC Kurth and provided updates with site. Vought stated that as site has not involved legal enforcement that documentation of 531W142nd Street is not required but also explained that documentation in the future may be needed if the State takes over the site and the AG goes for cost recovery. Kurth will call HPD Blakely to inquire if legal enforcement will proceed and whether he should submit documentation to DEC.
10/06/06-Vought-Called PTC Salamack for update on proposal and installation of drum well. PTC will not proceed until receive signed proposal from Tully. Vought called Tully and told him to call DEC once proposal was received and signed. 10/10/06-Vought-Received copy of proposal from PTC Salamack dated 10/4/06. Petroleum Tank Cleaners, LTD will provide the supervision, manpower and material to perform the following services: Continue excavation at prices already submitted. The purpose of this continued work is to provide an area in your basement that will effectively draw the water and oil back from the adjacent property's basement. The digging will continue to a pint as close to the wall as deemed safe and to a depth necessary to be lower than the basement next door. A four inch PVC pipe will be inserted into this low point to act as a collection point. As water and oil accumulate it will be necessary for you to contact Petroleum

TULLY RESIDENCE (Continued) **S108130992**

Tank to perform vacuum services to remove and dispose of contaminated liquid . Vought called PTC Salamack to discuss diameter of recovery well (larger diameter needed for larger radius of influence). PTC Salamack stated that excavation would continue to maximum depth possible (and then well would be installed for further vertical groundwater recovery. 10/16/06-Vought-Received call and spoke to Tully. Tully is seeking refinancing on building and will approve PTC once refinancing is approved (was supposed to be approved of last week). Vought called Tully and told him to keep DEC posted on approval of proposal. Vought called Blakely and updated her on progress and she requested application to spill fund. Vought spoke with DEC Austin who indicated that since Tully was taking action (albeit slowly) that the DEC would give him a drop dead date of Friday 10/20 and would send letter stating such. DEC Austin also indicated that work reimbursed by the spill fund must have approval of RSE and he would not approve such work till Friday. Blakely stated that she would wait and see how the drop dead deadline letter plays out . Blakely also stated that she had incurred costs already due to soil contamination removal and Vought suggested that she send in a letter to the Department and at the same time ensure that ALC Kurth submitted paperwork on previous spill at 531W142nd. Vought to include sealing of wall and installation of recovery well in letter. Vought called Tully and informed him of 10/20/06 deadline set by DEC Austin for work to begin. Tully explained that it would not be possible to begin work by Friday as he may not going to hear from title and refinance company till end of month (10/31). Vought explained that initiation of State Funded contractor will not happen till Friday. Vought called Martin Smith and could not leave message as mailbox was full. 10/20/06-Vought-Received call and spoke to Tully and he had not received word from finance company as of yet and was willing to have Department take over job as long as payment arrangements could be made with Milro at later date. Vought informed him repeatedly that Milro may accept payment however rates would be at private citizen amounts and as a result higher than the rates negotiated by the DEC in contract. Vought told him that he would consult with DEC Austin on morning of 10/23/06 and return call to Tully, 10/23/06-Vought-Spoke with DEC Austin and Austin authorized use of State Funded contractor (Milro) after discussing scope of work. As per Austin, he will ensure Milro accepts payment and sends bill out to Tully for future work. Austin required Vought to schedule site visit with Milro and Tully. Vought called Milro and scheduled site visit with Milro at 10am on 10/24/06. Vought called and Tully agreed to site visit for 10am on 10/24/06. Vought called Blakely and informed her of the site visit and Department take over of the job. Vought called Blakely and left her a message informing her of Department take over. Vought called Kahn and informed him of site visit and he will be present tomorrow. Vought called Martin Smith and left him message updating him with information. DEC Requires: 529WEST142ND ST: 1)excavation of contaminated soil below groundwater table 2)installation of recovery sump 3)possible groundwater and product recovery via VEFR 4)possible groundwater sampling and monitoring. 531WEST142ND ST: 1)product recovery 2)possible groudwater sampling 3)sealing of wall adjacent to 529W1542nd Street 4)installation of groundwater monitoring wells 5)possible groundwater monitoring. 10/30/06-Vought-Called Milro and left message to return call with update. Vought spoke with DEC Piper who performed site visit during time of Milro work and work performed included vacuuming out of groundwater from both sites, collection of

TULLY RESIDENCE (Continued) **S108130992**

soil and groundwater samples from 529W142nd Street and collection of groundwater samples from 531W142nd Street. Further remaining work includes: 1)analysis of soil and groundwater samples 3)installation of monitoring wells in basement of 531W142nd Street 4)sealing of wall 10/31/06-Vought-Called Milro and spoke to Basso regarding site. Paul confirmed the recovery of groundwater from both sites and the collection of four soil sidewall and one groundwater sample from 529W142nd Street and the collection of one groundwater sample from 531W142nd Street. Vought and Basso discussed additional scope of work including the washing and sealing of wall and the instalation of two 4 monitoring wells in the basement of 531W142nd Street. Basso noted that he also received a Hold Harmless agreement from Central Development Corporation (Chris Lee 212-226-7261). Vought asked for and received faxed copy of agreement from Milro (who was not willing to sign agreement) and spoke to DEC Drescher who explained that agreement was if Milro was working for owner. Vought called Lee and explained that DEC would probably not sign agreement however Vought would further consult with DEC Austin and DEC Urda. Lee noted that he would have his supervisor call Vought. Vought faxed copy of Milro contract with DEC to Blakely and Lee for review and requested them to call back if not sufficient upon which Vought will contact Contract Attorney in Albany as per DEC Austin. Vought called STL (Erin 203-929-8140) and informed her that only one soil sample and two groundwater samples should be anlayzed and the most contaminated soil sample should be the one selected for analysis. Vought requested Erin to return call to DEC once samples could be located. Erin returned call to DEC and samples were located and not analyzed as of yet. Erin noted that she and her lab techs selected the North sidewall sample as the most contaminated due to olfactory evidence. Vought requested that analysis be performed on that soil sample so that a soil source of contaminated could be documented at the Tully residence in case the AG was to go for reimbursement of State funds. Vought called Blakely and provided her with update and she requested that DEC violation could be removed so that building and Certificate of Occupancy(C of O) could be obtained. Vought explained that C of O was never revoked by DEC however NFA could be sent upon reception of ALC documentation. Blakely stated that ALC had submitted documentation. Vought reviewed file for documentation and as per 5/19/06 report from ALC Kurth, soil boring performed(ECD-01) at former AST location in 531W142nd Street shows minor SVOC contamination and no product noted seeping from former 275-gallon AST location. Vought closed spill 0600518 and sent No Further Action Letter to Blakely. Vought received call from Smith and returned call and gave him estimate of further expenses (at private rate) and faxed him copies of spill report for this spill number, 0600518 and copy of NFA letter for 531W142nd St. Vought received call from Sam Woo (Central Development Co 212-266-7261) and returned call and no answer at phone. 11/2/06-Vought-Called Lydia Blakely and left message to return call with update on review of Milro Contract with respect to Hold Harmless agreement. Vought also faxed Application for Damage Compensation for Spill Fund and suggested via phone message the website for the NYS Comptroller. 11/6/06-Vought-Received message from Blakely inquiring about when work will start. Vought returned call and left message to return call to DEC with respect to access and Hold Harmless agreement. Vought received call from HPD Blakely and she agreed to access. 11/7/06-Vought-Called Milro (Basso) to: 1)schedule work including the installation of two recovery wells and wash and seal

TULLY RESIDENCE (Continued) **S108130992**

wall 2)inquire if sample analyticals received yet 3)inquire about method of sealing of walls. Vought to call Kahn to discuss schedule, purpose of basement (whether monitoring wells are feasible, as per DEC Austin) and require dimensions of floor for well construction (if applicable). Vought called Milro and left message to return call. Vought spoke to Kahn and basement will be used as storage and utility space and well installation would be feasible, he will research floor dimensions and provide info to DEC. Vought spoke to Milro and they are able to start as soon as Tuesday. Milro receiving numerous calls from HPD contractor that access still not permitted due to lack of insurance info. Vought called Blakely and Kahn and left message to return call. Vought received call from Kahm who agreed that Tues 10/14/06 would be feasible date to wash wall for preparation of sealing. Vought spoke to Blakely and she needs insurance certificate naming county kullen Hdfac as additional insured and ECDO Ecumenical and additional insured. Vought, Austin and Blakely had teleconference regarding access and insurnace. Blakely will look into authorizing letter allowing Milro to enter and DEC will investigate addition of parties to insurance. Vought called and spoke DEC Meta Murray (Contact Attorney) with respect to addition of parties to insurance. Contractors should be adding property owners as additional insureds on contracts. DEC cannot provide idemnity and provided situation Murray would have to review contract to make determination if Milro had to add owner as per contract. Vought spoke to Blakely and explained to her that adding additonal contractors would take time as Albany would have to review contract. Blakely drafting letter authorizing use of Milro so that Hold Harmless agreement is not needed. Vought called Milro and spoke to Basso confirming schedule for Tuesday 10/14 at 10am to wash wall and Basso will research possibility of adding Ecumenical onto insurance and get back to Vought. Vought spoke to Blakely and received draft letter authorizing use of Milro with request for comments. Vought called Blakely and approved letter and Blakely requested copy of insurance. Vought reviewed Milro contract and as per Contract Milro has to produce insurance documents upon DEC request. Vought called DEC Murray to confirm validity of request. Murray confirmed that insurance was a public document and DEC could request it. Vought called Milro and Basso agreed to send copy of insurance certificate.
11/8/06-Vought-Called Milro Basso and made second request for insurance certificate to sent to HPD Blakely.
11/13/06-Vought-Received copy of Milro insurance and forwarded to Blakely. Vought also spoke to Basso and confirmed scope of work tormorrow including wall wash and recovery of washwater and groundwater from Tully excavation. Vought called and left message for Kahn confirming work and aslo spoke to Tully's wife and left her message that DEC will be onsite to inspect basement and recover groundwater. 11/14/06-Vought-Site visit by Vought and Milro and Blakely, Khan and Tully on site. Milro included three men, one box truck and one vacuum truck. Scope of work included groundwater recovery (approximately 1700 gallons), acid-washing (mureatic acid) and soap-washing of wall at 531W142nd Street, installation of two 4 monitoring wells to a depth of approximately 1.5' below present grade level at areas adjacent to former locations of product seepage. Upon recovery of groundwater approximately 3 ounces of product was noted seeping from wall, recovey of groundwater from 529W142nd Street residence (no product noted). Vought called Basso to schedule work for Monday and left message to return call. Vought called Smith and

TULLY RESIDENCE (Continued) **S108130992**

left message explainijng total cost of work for Tully and to return call for update on recent activities. Vought spoke to Basso and Kahn and arranged work for 10am on Monday 11/20. 11/20/06-Vought-Called and arranged site visit for Tully for pump out today (no free product noted however due to relatively low cost of water disposal versus vacuum truck mobilization (needed to recover water at 531 W142nd so epoxy can dry), groundwater will also be recovered at 529W142nd despite no free product. 11/21/06-Vought-Site visit by DEC Vought with Milro to seal wall and complete well installation. Milro mobilization included one vacuum truck, one box truck and three men. Groundwater again infiltrated in basement (heavy rains over weekend) and a small amount of free product (apprximately on spot of 9 wide) was noted on groundwater adjacent to infiltration location. Free product was light red (lower in concentration than previouly observed). Milro recovered groundwater from 531W142nd Street and also from the Tully residence (a total of 895 gallons of water were recovered for the day). Note that groundwater had to be recovered from 531W142nd so epoxy could dry. Due to product infiltration away from two in-place monitoring wells, a third monitoring well was installed (well casing dimensions were approved of by Kahn so that they could be included when basement floor is poured. Wall was sealed by Milro with two part epoxy. Due to product infiltration, DEC will contact Kahn to see if additional product noted coming through epoxy. If infiltration continues, then wall will be spot checked and sealed with epoxy. Vought sent copy of 529W142nd NFA to Kahn as per his request. DEC requires: 1)follow up of 533W142nd Street spill 2)monitoring of wells and excavation (by DEC, Milro or Tully contractor) and 3)submission of soil and groundwater analyticals. 11/27/06-Vought-Received message from Kahn and returned call and spoke to Kahn and three pinhole sites below slab level with approximate. Kahn and Vought agreed that pump out not warranted unless anayticals show different results and that site visit will be arranged to seal three pinhole sites and recovery of product via adsorbent pads. Vought spoke to Basso and analyticals not received to date. Basso will call STL for update and return call to DEC. If dissolved petroleum contamination is high further dissolved groundwater recovery via vacuum truck will be considered. Vought received copy of STL analyticals. Soil analyticals show: 370ppb xylene(Northwall), 140ppb isopropylbenzene(Northwall), 1100ppb 1,3,5-trimethylbenzene(Northwall), 3000ppb 1,2,4-trimethylbenzene(Northwall), 730ppb sec-butylbenzene(Northwall), 1600ppb p-Isopropyltoluene(Northwall), 1300ppb napthalene(Northwall). Groundwater analytilcals show: 19ppb napthalene(SB4), 120ppb acenaphthene(SB4), 230ppb fluorene(SB4), 680ppb phenanthrene(SB4), 120ppb anthracene(SB4), 240ppb pyrene(SB4), 23ppb chrysene(SB4), 17000ppb napthalene(SB5 East), 7400ppb acenapthene(SB5 East), 10000ppb fluorene(SB5 East), 25000ppb phenanthrene(SB5 East). Vought spoke to Basso and SB4 was from 529W142nd Street and SB5 was collected at 531W142nd Street. Vought reviewed data with DEC Austin and due to high levels of dissolved contamination at 531W142nd St another groundwater sample will be collected to see if concentrations are decreasing. DEC requires: 1)follow up of 533W142nd Street spill 2)sealing of intrusion points into 531W142nd Street 2)removal of trace free product at 531W142nd Street via absorbent pads 3)collection of groundwater sample from 531W1452nd with rapid turnaround time so floor can be installed. Vought called Basso and site visit arranged for DEC and Milro for

TULLY RESIDENCE (Continued) **S108130992**

11/30 at 10am to complete sealing of wall, recovery of trace free product and groundwater sample collection. 11/29/06-Vought-Received phone inquiry from Blakely that she needs a letter from NYSDOH certifying as to residences safety. Vought will contact NYC and NYSDOH once floor is completed for indoor air survey. 11/30/06-Vought-Site visit with Kahn and Milro. Minor free product removed via absorbent pads. Four points of infiltration at height of approximately 4 above groundwater. Total amount released less than 4oz. Wall was sealed with epoxy and additional manway was left for third well. Groundwater sample collected and analyzed for 8260/8270. No further groundwater recovery as per DEC Austin. Vought gave approval to construct floor and floor installation will begin tentatively by Wed next week. Rush turnaround time requested for groundwater analysis requested so results could be in by flour pour to determine of DEC will recover or HPD will recover (or as stated by Kahn discharge to sewer). Vought called STL (203-929-8140) to determine if 24hr turnaround time is possible and spoke to Paul Hobart who will return call to DEC with determination. 12/1/06-Vought-See spill #0609912 for free product impacting 540W142nd Street. Site visit by Vought with Milro and Marie King (212-368-4990). Scope of work included the placement of absorbent pads in the trenching in basement of 540 and recovery of used pads and replacememnt of fresh pads. Milro also recovered aged free product found in basement of 533 (Peter Moody). Vought inspected adjacent residences and found the following: 532 W142nd Street: 275-gallon AST will oil staining around bottom of tank and filled drip pan under fuel filter that is located approximately 8 away from groundwater sump. Groundwater present in sump however no sheen or free product observed in sump. DEC requires tightness testing of AST system. Vought spoke with property manager who instructed Vought to send letter to: Joy Spears Taylor Asset Management 718 St. Nicholas Ave New York, NY 10031 Fax: (212) 283-1940 Phone: (646) 345-4959 538 W142nd Street: Contact is Sondra Pearson and Vought inspected site which is using natural gas. No petroleum storage, no odors, no staining, no sump. 542 W142nd Street: Vought inspected site which is using natural gas. No petroleum storage, no odors, no staining, no sump. Access provided by Marie King 536 W142nd Street: Site not inhabitated and tank has not had oil for at least past ten years. No petroleum storage, no odors, no staining, no sump. Contact person is David Spell (718-358-3335). 534 W142nd Street: Site is using natural gas. 533 W142nd Street: Vought performed site visit and five holes still open in floor show no free product howerver sump adjacent to UST contains trace weathered free product. Additional inspection of UST system shows no soil impact however basement was filled with water and oil mix during time of DEC Rahman site visit so soil contamination may have been washed. Vought examined notes from 7/24/06 and due to lack of continued groundwater impact, no visible source of soil contamination and heavy free product impact to 529W142nd Street, DEC changed requirements to tightness testing of AST system at 533W142nd Street. 12/5/06-Vought-Sent email to Milro regarding status of groundwater analyticals. 12/6/06-Vought-Received call from King inquiring about when drainage ditches should be filled in. Vought requested after 1/1/07 so that soil and groundwater could be monitored for more possible free product impact. Vought called Hobart and Hobart will return call to DEC with update. 12/6/06-Vought-Called William Kahn and gave approval to schedule floor construction as groundwater results were received and

TULLY RESIDENCE (Continued) **S108130992**

concentrations show no volatiles. Vought sent email approving of floor installation. 12/11/06-Vought-Received call from Marie King and as per King, Patrice Tully passed away. Vought received call from Kahn and they will dewater directly into sewer this morning as per Vought. Dewatering will take place to estimate amount of raw material needed for floor installation. 12/14/06-Vought-Called Kahn and King for update on further product intrusion and to schedule site visit. Vought left message for Kahn to return call. Vought spoke to Kahn and excavation was backfilled and more gravel arriving today. Concrete pour scheduled for Monday tentatively. Site visit scheduled for Tuesday at 10pm. Vought called Marie King and informed her up upcoming site visit. Called Peter Moody for tightness testing requirement and requested that he send a letter to the Department that he owned the tanks and did not perform any repairs to ensure longetivity of system integrity. Vought sent letter requiring tightness test to Moody. As per DEC Austin due to possible probate condition of estate due to RP passing away, ISR should be filled out immediately. Vought called Smith to discuss and left message to return call. Received note from Erin Gaus from STL that soil sample analysis blanks not capable of being analyzed. I was informed by our extractions department that when one of our techs extracted samples SB#4 and SB#5 he failed to extract a Method blank (required QC) along with the samples. We do not have volume left to re-extract both samples. Is it possible that you could recollect the samples? I do apologize for the error, and the tech has since been retrained in proper extraction procedures. . Vought called Gaus and left message to see if DEC would be charged for the re-analysis. Vought received message that DEC would not be charged for analysis. Vought returned call and left message that samples would be recollected. Vought sent tightness testing letter to 532W142nd Street. 12/19/06-Vought-Site visit by Vought to 529 and 540W142nd Street. Vought met with Marie King and no water or oil in basement drainage trench. Pads show no evidence of being oiled suggesting that spill was one time event to date. Vought requested that trench be left open till after 1/1/07 and if no further product appeared trenches could be filled. At 529W142nd Street basement floor had been poured and three monitoring wells installed. No sign of product seepage on sealed wall and no product in monitoring wells. DEC requires: 1)recollection of samples from Tully's basement 2)ISR 3)submission of tightness testing for 533W142nd 4)submission of tightness testing for 532W142nd 5)continued monitoring of 529, 531 and 540 West 142nd Street. 1/18/06-Vought-Received invoices from Milro totalling approx 10,000. Vought called Tully for payment as per 10/20/07 conversation. Vought spoke to Tully and gave him till 1/24/07 to decide to pay. Tully preliminarily indicated that he did not have the funds and Vought discussed the possibility of AG putting lien on property and stated that may be the best thing. 1/24/07-Vought-Spoke to Tully and he has no funds to pay bill. Tully inquired about type of lien that may be put on property and Vought gave him contact information of AG Spill Fund secretary. 1/24/07-Vought-Contract Payment Package (Milro)-10/24/06-11/30/06. Site inspection for scope of work, vacuuming contaminated water from basement and collection of soil and groundwater samples, installation of three monitoring wells, epoxy sealing of common wall, contaminated water disposal. 1/30/07-Vought-Received call from Neil Katz Esq (212-290-7800)who is representing buyers of 531W142nd St and requesting information. Vought referred him to FOIL application and discussed site. Vought

TULLY RESIDENCE (Continued) **S108130992**

called and spoke to Katz and referred him to FOIL and explained cleanup and continued monitoring of 529W142nd Street. Upon notification that residents are moving in DEC will perform site inspection and close wells if no free product if found.
2/9/07-Vought-DEC Austin received call from Cassandra (517 W142nd Street 212-281-3020) that sheen is in the basement. Vought called Cassandra and sheen on water in owners house (Ms. Green). Groundwater seeping through wall. Vought spoke to Cassandra who performed inspection of basement at time of DEC call. Groundwater present in basement with no sheen. Cassandra reported that groundwater previously had odor of fish. Vought requested that she call immediately if sheen detected and/or odor reoccurred.
2/26/07-Vought-Contract Payment Package (STL)-Soil and groundwater sample analysis (10/30/06-11/29/06). 02/28/07-Vought-Contract Payment Package (Milro)-Cleaning oil in basement and replacement of booms and pads (12/1/06). 02/28/07-Vought-Contract Payment Package (STL)-Groundwater sample analysis (12/01/06-12/31/06).
03/26/07-Vought-Received message from Kahn and returned call and site visit scheduled for 1pm to confirm absence of product in wells. Site visit by Vought. Vought inspected wells at 529W142nd and no product in wells. Approximately five points of minor seepage through impacted wall adjacent to Tully. No odors in residence. Vought also performed site visit to 540 W142nd Street and no groundwater or product in drainage trench and no signs of former product such as stains on recovery pads left in trenches for past three months. Vought gave approval for King to seal up trenches. DEC requires: 1)sealing of remaining seepage points 2)decomissioning of monitoring wells.
3/27/07-Vought-Called Milro and spoke to Paul who will arrange for work to be done. Vought provided Basso with contact information for Kahn. 04/23/07-Vought-Contract Payment Package (Milro)-Work performed on 4/4/07 included sealing of wall where oil was leaking through and wells were decomissioned due to absence of free product. Spill closed by Vought due to removal of soil source, lack of groundwater impact and no further seepage to adjacent residence. Spill closed by Vought and final ISR submitted to DEC Austin for review.
05/11/07-Vought-Received call from Kahn that oil came through wall again due to heavy rains. Vought called Milro and arranged site visit with Milro and Kahn for 5/15 at 10:30am. Possible further action to include pumping wall with hydraulic cement and VEFR on Tully residence. Vought called DEC Farrar and left message as per DEC Austin to see if new spill number/PIN should be opened or this spill can be used despite Final ISR being completed. Vought receieved call from DEC Farrar who stated that he will intercept ISR and that this spill number and pin should be used. Spill reopened by Vought.
05/15/07-Vought-Site visit by Vought with Milro(Gordon). Four small points of seepage through wall of weathered product that was dried. No product seepage up through floor. Conference call held with Kahn and Gordon and wall will be cleaned and seepage points sealed. Site visit also performed to Tully residence and groundwater in excavation with no free product or sheen. Gordon provided number of Kahn to schedule cleaning and further sealing. 05/18/07-Vought-Received call and letter from Peter Moody requesting spill closure at 533 W142nd (0600518). Letter also included tank tightness test results dated 1/18/07 that show a tight tank and system. Letter also states that we take this oppurtunity to state unequivically that from our purchase of the property in February 2005 no alterations or repairs of any kind were ever made to the oil tanks or any lines leading to or from

TULLY RESIDENCE (Continued) **S108130992**

them. The 7A Administrator for the city of new york has assured me that he never made any such repairs to the tank or lines in the 7 years he managed the building prior to us . Moody requested spill closure however inspection of records show that DEC Rahman never opened a separate spill for 533. He did send a soil contaminaton letter to Moody with Spill #0600518 (Spill at 531W142nd St) however this spill was closed previously by Vought. Vought sent NFA letter to Moody referencing closed spill 0600518 for 531 W142nd Street. 07/31/07-Vought-Received copy of demand letter sent from AG Gil to Bernice Tully. 09/13/07-Vought-Contract Payment Package (Milro). Washed and sealed oil affected wall (5/17-5/21). 01/04/08-Vought-Received call from Lydia Blakely (212-531-3211x108) that new residents of 531 W142nd street reported fuel oil odors (Joel Mentor cell:917-232-4412). They called today with vapor complaint. Vought called Joel Mentor. Coming from the basement. Vapors have been present for last two weeks. More oil coming though wall. Vapors in basement only. No floods in basement. Site visit set up for Tues at 10:30am. Vought called John Tully and left message informing him of Tues 1/8/08 site visit and was unable to leave message as no voicemail picked up. 1/8/08-Vought-Vought called John Tully again to inform him of upcoming site visit and Vought spoke to Pamela Tully and as per Pamella, John Tully recently passed away during xmas holidays. Pamela was very upset and stated reason for her husbands and mothers and laws action was due to cleanup. Vought explained with sensitivity that reason for spill was negligence in maitaining oil filter. Vought also explained that DEC was trying to help since spill began by minimizing costs. Vought arranged site visit with Ms Tully at 9:30. Enroute to site visit, Vought called and left message with Martin Smith due to sensitivity of Ms. Tully. Vought performed site visit with Ms Tully and no product found in former excavation however clean groundwater noted. Pamela desired to have excavaton backfilled and Vought approved due to no free product since soil excavation. Vought told Pamela he would call her back with estimate by Milro on backfilling excavation and that one monitoring well would be required to be installed in excavation. No odors in building. Vought discussed situation with Ms. Tully and she indicated she had no funds for any type of cleanup and Vought reiterated agreement with Pamela to have AG put lien on property. Vought and Pamela met with Lydia Blakely and new homeowner of 531W142nd St: Joel Mentor 917-232-4412 212-283-0503 Pamela Tully also provided contact information: Pamela Tully cell:917-860-2232 phone: 212-926-0067 As per Joel, he had no odors in the living areas of the building however there were odors in the basement at the location of previous and current seepage through adjoining wall. Vought, Pamela, Lydia and Joel inspected basement and slight petroleum odor noted. Four pinpoint locations of product seepage ranging from approximately 1.5’ above floor to 2.5’ above floor impacted approximate one square foot of concrete. Product black in color suggesting no further source and degradation. Vought provided Pamela with contact information of Martin Smith and suggested she contact him regarding possible community assistance. Vought called Milro and spoke to Basso and asked him to call Mentor to schedule wall seal and floor clean and that scope of work was extremely small but urgent. Vought called and left message with DEC Karwiel to return call to confirm that PIN number was still opened. Vought called Milro Anthony to get rough approximate price of backfilling and he will return call to Vought with estimate. DEC requires: 1)estimate of backfilling excavation 2)installation of

TULLY RESIDENCE (Continued) **S108130992**

monitoring well in excavation 3)Milro to seal pinpoint intrusions on wall and clean floor 4)call to DEC Albany as Final ISR sent up and is PIN still open? 2/12/08-Vought-Called Milro (Anthony) for estimate of backfill and well installation. Anthony will return call with estimate of backfill and well installation. 03/26/08-Vought-Called Milro (Anthony) for estimate of backfill and well installation. Anthony will return call with estimate of backfill and well installation and he will return call to DEC. 04/02/08-Vought-Received estimate from Milro for backfill and well installation and called Ms. Tully (917-860-2232) to inform her of cost of backfill. Vought also sent copies of DEC letters dated 06/30/06, 07/26/06, 08/14/06, 08/18/06, 08/31/06 and AG letter dated 07/25/07 and copies of spill notes as per request of Ms. Tully. Ms. Tully agreed to have Milro do work after hearing estimate and stated that she would be available 4/8 for backfill. Vought called Milro and left message to return call with availabilty on that date for backfill and well installation. 04/04/08-Vought-Called Milro and they are not available on 4/8 and would prefer 4/9. Vought called Pamela Tully to inquire about availability on that date however she said that 4/10 and 4/11 were better. Vought called Milro and spoke to Paul and 4/10 and 4/11 are good to do work. Vought called Tully and she agreed to backfill and well installation of 4/10 and 4/11. 04/10/08-Vought-Received email from Milro Basso that due to emergency they cannot be onsite on 4/10 and 4/11. Vought called and spoke to Ms Tully who selected alternative date of 4/18, 4/21. Vought called Milro and they are available during 4/18 and 4/21. Vought confirmed dates with Ms. Tully who agreed to dates. 05/13/08-Vought-Contract Payment Package (Milro)- Wash floor, encapsulate wall (1/22/08). 05/14/08-Vought-Contract Payment Package (Milro)-Vac install one well into existing excavation, set manway, disposal of water (04/18/08-04/21/08). 10/2/08-Vought-Received message from Pamela Tully who requested callback (917-860-2232). Vought and building has been emptied and is on market for spill. Hole was backfilled with sand and concrete and installed well. Vought to call Milro to have then sample well and Tully available on 10/7, 10/10 and Vought will have Milro contact Tully. Vought called and spoke to Anthony Mariano (Milro) who will contact Tully and peform monitoring/sampling on 10/10. Vought called AAG Donna Ross and left message to return call to DEC. 10/7/08-Vought-Received call and spoke to AAG Ross regarding possible sale of property and also sent Ross copy of recent spill notes. 10/27/08-Vought-Scanned and Edoc'd file as per request of AAG Ross. 02/09/09-Vought-Contract Payment Package (Milro)-Groundwater monitoring and sample collection (10/10/08). 02/09/09-Vought-Contract Payment Package (STL)-Groundwater sample analysis(10/14/08-10/30/08). 05/07/09-Vought-Received copy of Intial Demand Letter from NYSOAG Donna Ross to Pamela Y Shaw-Tully dated 5/5/09. 05/20/09-Vought-Site visit by Vought to inspect spill at 533 W142nd St (see spill #0901971). Vought inspected 531W142nd St and observed two minor points of seepage in basement and received agreement from owner (Joel Mentor cell:917-232-4412) to provide Milro access to epoxy seal wall at two minor seepage locations. Vought issued Contractor Work Authorization Form to Fenly and Nicol (new best value PIN contractor to have them epoxy wall and clean residue). Vought also sent email with recent photos to F&N Linehan. 05/29/09-Vought-Received call from F&N Linehan and discussed necessity to keep expenses low due to historical conversation with Councilmen Jackson's Office. Brian proposed that due to conitnuing seepage that he will use a bonding

TULLY RESIDENCE (Continued) **S108130992**

primer followed by mesh application followed by Decothane application (epoxy). Costs estimated at 730.00 (more feasible for one time expense as opposed to repeated site visits as in past) and Vought approved cost and requested to be kept posted on application. 06/03/09-Vought-See also spill 0901971 at 533/535 W142nd st. Fresh red #2 fuel oil found in basement of 533 and Vought called Tully to arrange site visit. Vought received callback from Pamela Tully's son-in-law (Melvin Williams III cell:551-655-6291) and Vought discussed site history as well as requirement for basement inspection of 529 W142nd St. Williams agreed to DEC site visit and visit scheduled for 1pm on 6/4. Vought left message for Singh and Mentor informing them of site visit as well. 06/05/09-Vought-Site visit with Melvin Williams. 275-gallon AST onsite but no signs of leaks or spills (such as contaminated soil under tank). All lines run aboveground from AST to boiler. No signs of additional seepage. Monitoring well still in place in former excavation location and depth to water is approximately 3' below grade and no signs of oil in well such as sheen or product or odor. Clear water visible in well with flashlight. Vought discussed spill history with Williams and also provided him with UIS reports for this spill number and spill at 535W142nd. Vought also provided him foil information as well and informed him that DEC will be requesting site access periodically during the investigation for source of oil to 535 and 533W142nd St. 09/04/09-Vought-Received call from F&N Linehan requesting contact information for Mentor. Linehan explained that the request for epoxy from DEC from 6/09 was buried and never performed. Vought provided cell number for Mentor. 10/08/09-Vought-Called F&N Linehan for update on epoxy application and Linehan called cell number and left message but to date he has not received a response from Mentor. Vought called Mentor and left message to return call to cell. 11/4/09-Vought-Left message for F&N Linehan to see if access was gained and epoxy applied. Received email from NYSOAG Ross that she has been assigned to the case. Note to intermittent repeated seepage occurrences from soil contamination adjacent to the footing at the Tully residence, spill will remain open until one year of no seepage occurring. 6/10/09-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin due to Vought transfer to Section A. 2/9/11 - Raphael Ketani. There have been no complaints from the neighbor, Joel Mentor (212)283-0503/cell (917) 232-4412, in over a year. I attempted to contact Mr. Mentor in order to see whether conditions in his home were alright. However, I could only leave a voice mail at both phone numbers. 2/10/11 - Raphael Ketani. Mr. Mentor called me back and left a message that there were issues in his home at 531 West 142 Street. I called him and he explained what was happening. He said that the problems have been going on for some time since the epoxying of the wall was done. He said that he just hadn't gotten around to calling the DEC about the problems. Mr. Mentor stated that water seeps in when it rains. Brown sludge comes with water. He added that sometimes there are oil odors when it rains. I told Mr. Mentor that I will make a site visit to see what the situation is. We set up an appointment for 10AM on 2/16/11. 2/16/11 - Raphael Ketani. The site visit took place as planned at the Mentor home at 531 West 142nd Street. I met Mr. and Mrs. Mentor. My PID meter didn't detect any VOCs at the main floor level. We went down to the ground floor. No VOCs were detected. Next, we went down to the basement. Again, no VOCs were detected in the air. Mr. Mentor showed me the seeps. I could see many holes from which brown liquid was emanating. However, there were no oil odors.

TULLY RESIDENCE (Continued) **S108130992**

Mr. Mentor had put down some cat litter to catch the brown liquid. Once the liquid had passed through the litter, it turned completely clear. Mr. Mentor was allowing this clear liquid to drain towards and into a floor drain in the middle of the basement floor. Some of the seeps were active and some were not. The holes varied in size from the width of a small nail (about 1mm) to more than 5mm. It appeared as if the water had made channels through the mortar that separated the field stones making up the foundation wall. I told Mr. Mentor that no VOCs were detected coming from the brown seeps. So, there was no danger to the his family. I added that this was now a nuisance issue and not a hazard issue. I stated further that, because of the lack of a hazardous condition, the DEC may not do any additional work to plug the seeps. Mr. Mentor said that he understood. I took 7 pictures and returned to my office. I spoke to Randall Austin, Chief of the Spills Unit, and presented my findings. He told me to close the case. I wrote the Final ISR and gave it to Mr. Austin for his review and signature. 2/18/11 - Raphael Ketani. The Final ISR was signed by Mr. Austin and Lou Oliva of the Region 2 Office of General Counsel. It was sent to Dennis Farrar in Albany Remediation. As there is no oil entering the Mentor home, or anywhere else, and as the spill at 529 West 142nd Street was remediated, I have determined that there is no threat to the public or the environment. Therefore, I am closing the PIN and Spill case. 8/22/11 - Raphael Ketani. Joel Mentor (212)283-0503/cell (917) 232-4412 called me today. He said that oil was again seeping into his basement from the neighboring property. He said that this was caused by the heavy rain from past week. He said that there were oil odors. We set an appointment for 8/24/11 at 10AM. 8/24/11 - Raphael Ketani. I met Mr. Mentor and the inspection took place as planned. There were no oil odors, nor any other odors at the first floor level. The lower floor (street level) also was odor free.
We then entered the basement. Mr. Mentor said that he had previously ventilated the basement because of the oil odors. At the time I was there (about 10AM), I could not sense any oil odors. I did see a very slowly moving stream of water which had a slight brown tint to it along the center of the stream. It appeared to be coming from two large holes in the wall which was the common wall with his neighbor at 529 West 142nd Street. Mr. Mentor showed me a thick paper towel that had been soaking in the stream for many hours. He commented that he could smell the oil odor in the towel. I picked up the towel and sensed a very slight oil odor. I then put my fingers in the stream of water and put my wet fingers to my nose. I could just very faintly sense an oil odor. The water was not slippery, but I could see a sheen. I told Mr. Mentor that it was difficult to sense any oil odors from the streaming water and that there was a sheen. However, the sheen could have been caused by the clay in the soil below his neighbor's basement floor, by some types of organics, or by some residual oil. I told him that, if there was any oil, it was probably devolatized by now due to the treatment chemicals, the oxidation of the oil while being mixed with the groundwater, and by the aging of the oil itself. Therefore, the liquid was a nuisance, but not a hazard. I added that the DEC would not open the spill case because of a nuisance situation. I told him to get his neighbor to seal his side of the common wall so that no more water flows into his basement. He said that he will do this. With that, my inspection ended.
5/1/12-Vought-Received call from and spoke to Melvin Williams (ph:551-655-6291) son-in-law of John Tully and Melvin and wife will be selling property and they are seeking closure letter. Vought

TULLY RESIDENCE (Continued) **S108130992**

reviewed notes above and Spill Closure Letter never sent by Ketani. Williams noted that no oil in basement (still) and he will close one basement well. Vought issued closure letter with cc to AG Ross to: Mr. Melvin Williams III 529 West 142nd Street New York, NY 10031 Email:mwilliamsIII@gmail.com Vought sent out letter and added to E-docs. "

Remarks: "Soil boring performed by Petroleum Tank Cleaners and witnessed by DEC showed significant fuel oil contamination under formerly leaking oil filter."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was AUSTIN -4/21/00 Spoke to Tommy at BLT. A couple of gallons spilled outside on cement - contained and cleaned. When they went opened the tank vault in the basement, they encountered more oil. BLT is going to vac out the vault. BLT was trucking for Castle Oil - contact Jim Carey 579-3414. Tank Petroleum will do the repair on the tank system. The gauge read 1200, but when they tried to deliver 3000 gallons, the oil came spraying out of the fill. They think maybe there's something clogging the vent. It's a 5000 gallon tank in the basement in a cement vault. No odors in the apartments. Spoke to Felix at 212-234-4184 (name/number from prior spill 9611052 - also gauge malfunction that caused overfill.) He confirmed what Tommy said about both spill areas and that there are no vapors in the apartments. 9/15/03 - AUSTIN - THIS SPILL AND # 9611052 REVIEWED BY ME - CLOSED THIS ONE DUE TO CIRCUMSTANCES DESCRIBED BY WITNESSES - ORIG. ASSIGNED TO ROMMEL - END"

DEC Memo:	"4/13/2006 Through Property Shark, ownership was traced to city HPD. 3 story townhouse in Harlem starting a gut rehab. Contractor has opened the basement floor to lay new plumbing lines, open to soil. Boiler and tank were removed and spilled onto dirt floor. Sangesland gave the HPD rep the name of PTC and Eastmond to come in, dig out the contamination, remove the soil with manifests and do endpoint testing. HPD rep said he would forward the two names to the prime contractor on the site for followup. Sangesland warned the HPD rep that failure to dig out the problem and fix it now could lead to a very expensive legal problem if it needs to be treated after the building is sold. 4/17/2006 The general contractor hired by HPD to renovate the building is: Central Development Corp - 212-226-7261 - Contact: Samantha - This contractor hired Petroleum Tank Cleaners to dig out the oil in the basement. After digging for a full day, they determined that the oil was coming from an abandoned building next door - # 533 West 142nd St. 04/20/06 Sharif Rahman-Inspected the basement of 531 and 533 on 04/17/06.Both basements used to have ASTs.Basement of 533 is located downhill of 531. So its unlikely for the oil to seep from 533 cellar to 531 basement.Owner of 533 is Peter

APARTMENT (Continued) **S107787323**

A. Moody,1950 Coney Island Avenue, Brooklyn,NY 11223, who has retained ABC tank(Bob-718.272.2800) to remove the sewage-water mix from the cellar. I suggested to do the soil testing, especially along the wall to 531 to identify any oil contamination that might seeped through the wall from 531 basement.A contaminated soil letter was also sent to Ecumenical Community Development Org 413 W 125th Street New York, NY 10027 Attn: Ms. Lydia Blakely, Vice President asking to investigate the level of contamination and begin the clean up in 531 basement. 05/23/06 Sharif Rahman-Soil analytical result for 531 indicated presence of fuel oil in the basement.ALC Environmental contracted to have the first 3.5 feet of soil removed from the basement floor of 531. A CSL was sent to Peter A. Moody 1950 Coney Island Avenue Brooklyn, NY 11223 to investigate and remove the contamination at 533 west 142nd street basement. 6/28/06- DEC Piper responded to site on behalf of Shariff Rahman. Upon arrival. Neighbor at 539 invited me to backyard where smell oil was heavy. It was spoken that there was a historic stream thet ran behing the properties of 142nd St. It has been filled in since construction of the houses on 142. Piper inspected 531. Construction site where smell first originated. The basement revealed approx 50-75 gallons of #2 Oil and has not been cleaned up for some time now. DEC Piper noted oil was entering basement on NE corner (Rear upgradient) approx 2.5 feet above the slab. Heavy odor present in basemnt. DEC Piper contacted contracter and ordered them to remove the oil on the water in ther basement of the building. There is a open frame from a window where vapors are escaping. Since the back of the properties have poor circulation, vapors are lingering. DEC Piper knocked on three houses upgradient of 531 to inspect tank though no one was home in all the houses. The next property is a Friary which indicated that there was a tank. There was a remote fill though a vent could not be found. A friar escorted me in to the basement where I observed a potential abandoned fill/ vent line. DEC Piper noted all addresses and had Sangesland look up ownership for inspection to be performed by Rahman. END. 06/30/06 Sharif Rahman- I and DEC Ms. Veronica inspected the basement of 531 on 06/29/06 and was also able to get to the besement of 529 with help of FDNY(FDNY was notified by one of the neighbors).In the basement of 529, by the boiler unit I observed a sump approx. 5x3' which is saturated with oil.The boiler unit in 529 is located on the other side of the impacted wall of 531. So there is a possibility that oil is seeping through the wall from 529 to 531. Again, pictures from 531 basement wall indicates the seepage of relatively fresh heating oil and the odor is strong in the basement of 531.I suggested to ALC Environmental(John Kurth,212.675.5544,917.412.4946), environmental consultant to 531 to take samples from the wall for finger printing as well as ground water samples from 531 basement.Oil saturated pit in the boiler room of 529 needs to be cleaned up and investigated for possible migration of oil to the 531 basement.FDNY Hazmat chief Frank J. Naglieri and Chief Gormly, Battalion 16 indicated that they did not pick up any reading of health hazardous stuff on their instruments.HPD Project manager Frederick J. Koster(212-863-7714) informed me they renovated building 525 including excavation in the basement and did not come across any heating oil contamination. 07/03/06 Sharif Rahman- A letter asking to do the clean up of oil in the sump near the boiler and delineation of the extent of contamination to downgradient side has been sent by certified mail(7003 2260 0004 0928 5442) to property owner's son Jon G. Tully 461 West 144th Street New York,NY 10031 , on

APARTMENT (Continued) **S107787323**

his request. Another letter to begin the clean up has been sent via regular mail to property owner D.B. Tully 529 W. 142nd Street New York, NY 10031 DEC Piper: Rahman asked Piper to speak w/ Mr. Jon Tully. Piper reached Mr. tully at number provided. DEC Piper asked Jon to escort the Dept. into the basement of 529 (Potential Spiller. Rahman has photo documentation of pit under boiler in 529 when NYFD entered premesis due to call received by neighboring resident.) Jon was very defensive of requirements and refused to perform investigation. Piper explained that oil is entering the wall at the adjoining property to the west (531). The wall which is entering the property coincides with the location of the boiler and sump pit in 529. Therefore the property and it owner is a potential suspect for the cause of the free phase product in 531 and heavy odors in the neighborhood. Jon placed phone on speaker and unknown woman was very loud. jon also became very loud and said that the owner is in the the hospital. Jon and woman were interjecting with me and refused to cooperate. DEC Piper stated that additional potential parties are also being looked at and the DEPT will contact them shortly regarding additional information regarding the warranted investigation. DEC Piper and Rahman visited site due to odor complaint by *********. DEC inspected basement of 531. Oil still present (25 gal)in basemnt on groundwater. DEC explained to 531 William Kan of Central Development that they are required to remove oil and seal basement window with poly sheeting (onsite) since it is on their property and once responsible party is found, they can seek reimbursement. Piper photodocumented basement. ********* escorted DEC into back yard through DRIVETHRU garage(Geoprobe???). No odors were detected by nose or instrument (PID) upon arrival though at one time(a few seconds) a draft of fuel oil was detected by nose only. PIPER and Rahman noted addditional addresses to search PBS database that may have a potential to effect 531 due to their upgradient location. 07/06/06 Rahman- I called Ms. Blake of Ecumenical Community Development(212.531.3211 x 16)regarding the oil water that has been accumulated in the basement of 531 and generates odor, suggested to pump out the oil-water mix once or twice a week as they accumulate to prevent the odor that impacting the neighbors. 07/10/06-Vought-Spill transferred to Vought as per DEC Krimgold and DEC Nagi. Vought called John Kurth(consultant for 531 W142nd) and left message informing him of immediate site visit as per DEC Krimgold. Vought also called Martin Smith (rep. for Councilman Robert Jackson): (212)234-0551 and left message informing him of site visit. 07/11/06-Vought-File review by Vought: See also closed spill #0001105 for contaminated soil for 535 W142nd Street. Letter sent requiring investigation and submittal of results within one month. Fax from Central Development Corp (Samantha Wong) to DEC Rahman-4/20/06. The building is owned by HPD. However all related documents should be directed to the Developer (Ecumenical Development Org). Letter from ALC Environmental (Kurth) to DEC Rahman-5/19/06. Ecumenical Community Development Org hired ALC Environmental. ALC collected one composite sample of the surface level soil in the basement and four additional samples at a depth of approximately 3 feet below ground surface in a grid pattern in the basement . Sample analyzed for EPA Method 8270 and TPH (Method 8015). One sample broken in transit to lab. Due to the analytical results ALC has contracted to have the first 3.5 feet of soil removed from the basement floor... Three endpoint samples will be collected after excavation. TPH results prior to excavation show: 420000ppb TPH(ECDO-01), 53000ppb TPH(ECDO-02), 110000ppb TPH(ECDO-03), 4300000ppb TPH(ECDO-04). Contaminated Soil Letter for 533W142nd Street(DEC Rahman)-5/23/06. Letter sent requiring investigation and submittal of results within one month. Contaminated Soil Letter for 529W142nd Street(DEC Rahman)-6/30/06. Letter sent requiring immediate removal of discharge and submission of a letter report summarizing cleanup activities. If an investigation is performed then requirement made of submittal of results within one month. Email from Patrice-Tully Willimas to DEC McKeon (via website) to DEC Oliva-7/5/06. I am writing to enquire as to the process by which one may file a formal complaint or seek an investigation of a DEC employee who appears to be using his professional position to assist a group of interested parties in intimidating and elderly homowner . Email from DEC Krimgold to DEC Oliva-7/10/06. Email with case history Email from DEC Moore to DEC Oliva-7/10/06. Mooor received inquiry from Executive Director of We Act West Harlem Environmental Action Inc) who received complaint from M. Edwards. 7/10/06-Vought-Site visit by DEC Vought and DEC Zhune. 531W142nd Street-Vought met with William Kahn and all work on builing currently stopped due to oil in basement. Oil was first noted in December 2005 and has been located in same area of basement (adjacent to 529W142nd Street and in rear of building) during entire time. Product seepage noted through wall at height of 2’ above grade of wall adjacent to 529W142nd Street. As per Kahn source of odors to adjacent properties was though rear stairwell of builing and to backyards of adjacent buildings(stairway was covered with tarp). As per Kahn oil was recovered on week ago via skimming and product reappeared (in same historical location) at rear of building. As per Kahn 275-gallon fuel oil AST was located in basement of 531W142nd however it was located in front of building (no free product seepage

APARTMENT (Continued) **S107787323**

in front of building). 525W142nd Street-which is also Housing, Preservation and Development property. No UST located in basement, no fill or vent and no spill at site, drain in basement with standing water has no free product. Vought received call from John Kurth and as per Kerth, 11 tons of soil were removed from the basement, the fuel oil AST was removed approximately one year ago, when the AST was removed, some oil was spilled into the basement. 527W142nd Street-275-gallon AST was present with aboveground supply line to boiler. No sign of spills and no staining or odors. 533W412nd Street-No access at time of site visit. Vent pipe and fill port visible 535W142nd Street-No access at time of site visit. Vought spoke with owner(Oranato) and arranged site visit for 7/14 at 11am. Oranato also indicated that he could provide access to 537W142nd Street at same time. 537W142nd Street-No access at time of site visit. Call was received from owner (Edwards) later that no odors were noted in house. 539W142nd Street-Met with site owner (Briggs) and as per Briggs: 2.5-3 months ago residents noticed fuel odor in backyards. Last time odors were noticed was 6/30/06. Kahn also indicated that during heavy rains, water is located in most basements on the block (shallow water table). Briggs also indicated that he saw Sure Fire Oil deliver fuel oil to 529W142nd Street on 7/7/06. Vought inspected basement and no odors were noted. Hole in foundation with groundwater showed no sheen or odor. 07/12/06-Vought-DEC Requires: 1)535W142nd-Site visit and inquiry as to size of 2000 spill 2)cc to NYCDOH, NYSDOH 3)529W142nd-call regarding drop dead letter with requirements of soil boring and tightness testing, call to Sure Fire Oil, site visit on 7/14/06, assistance with insurance 4)531W142nd-call to HPD Lydia regarding submission of tank removal summary and soil endpoint analyticals from final excavation, possible opening of PIN for product recovery at 531 as per DEC Austin, former spill in basement and STIP with installation of a vapor barrier and possibly passive ventilation system, submission of previous Phase I on property 5)537W142nd-Site visit and FOIL application faxed to Marcus 10)533W142nd-site visit 07/12/06-Vought called Lydia from Ecumenical for above requirements and she has affadavit stating that tank was removed however no notes of environmental concern. Lydia mentioned that Phase I was performed and will be submitted to DEC. DEC Vought explained joint and several liability to Lydia and the fact that 531W142nd may be held partially liable depending upon submission of information regarding prior spill and former AST. Lydia said that she did everything she could do and would like the use of states contractors. Vought called and spoke to Pamela Tully and she requested one more day to make decision and she will also have Jon Tully return call. Vought called Marcus Edward and left message to return call regarding one day extension and site visit on 7/14/06. Vought called and left message with Sure Fire Oil to explain possible leak at 529W142nd and that DEC will be requiring tightness test and soil boring. Vought called owner of 533W142nd Street to arrange site visit. Vought called Kurth and left message explaining current status. Vought called Alexander Timlin and left message to return call with fax number for cc. Vought called West Harlem Environmental Action and left message to update her on status. Vought called and spoke to Martin Smith who requested cc on letters and Vought sent him spill notes (Director of Constituent Services fax 212-928-4177 and 212-234-0552). 07/13/06-Vought-Received call from Peter Moody and he will be onsite for DEC site visit on 7/14/06. Vought called Pamela Tully for update on decision and Tully still unsure if 529W142nd

APARTMENT (Continued) **S107787323**

Street is source but he did agree for site visit on 7/14 at 10am. Vought to visit 533/537/537 and 529W142nd Street. Received call from Peter Moody that he will be onsite tomorrow for access. Vought received message from Alexander Timlin and returned call and left message to return call. Vought received message from Kuth and returned call and informed him of 7/14/06 site visit. Vought sent DRAFT Stip to DEC Urda for review prior to sending. 07/14/06-Vought-Site visit to 537W142nd Street and no odors in basement, no product in sump (only groundwater) and no stains. Site visit to 535W142nd Street and no odors in basement, no product in sump (only groundwater) and no stains. No site visit to 533W142nd despite assurance from owner (Moody) that he would be onsite. Site visit to 529W142nd Street with Jon Tully and Pamela Tully. 275-gallon #2 fuel oil tank system is entirely above ground. Staining, odors and adsorbent present in furnace pit at point where supply line enters boiler. Crack evident in containment pit. After lenghthy dicussion with Tully's regarding PIN process they asked for extension on decision to hire contractor. Vought extended deadline to 7/17/06. Vought received draft STIP back from DEC Urda and Austin and included their edits. 07/17/06-Vought-Called Jon Tully and he had placed call to Petroleum Tank Cleaners (Mark Salamack 718-624-4842) but had not received call back. Vought called PTC and left message with Salamack to return call confirming that they were hired by Tully. Vought called William Kahn and spoke to him inform him of progress and to notify him of upcoming site visit. Vought called Lydia and left message stating same. Vought to 1)send STIP to 531W142nd Street 2)send requirement letter to Tully if he is accepting responsibility 3)call Peter Moody and arrange site visit for same day as Vought/Tully/Kahn/Milro site visit. 07/18/06-Vought-Site visit with William Kahn, Lydia Blakely, Jon Tully and Mark Salamack (PTC). Tully agreed to the installation of one soil boring at the area of heaviest staining. DEC Vought will be contacted to perform site visit to witness boring so that Tully's expenses be spared. Vought explained to Tully that if soil and groundwater contamination was noted than DEC would require him to immediately recover free product in basement of 531w142nd Street. Vought also inspected Tully's 275-gallon AST and the poor condition of the steel was noted by PTC and as such they made the recommendation to replace and relocate the tank on concrete(tank is currently on soil). Vought also inspected basement of 531W142nd Street with Tully, Salamack, Kahn and Blakely. Small in increase in amount of product on groundwater. Total amount of free product is approximately 5 gallons of red #2 fuel oil. Product noted seeping out of wall of 529W142nd Street. No product at former AST location. Vought received call from Salamack and boring scheduled for 7/20/06. Vought received message from Kurth and returned call and left message summarizing progress. Vought will send out requirement letters upon installation of soil boring on 7/20/06 and determination of responsible party(s). Vought called and spoke to Peter Moody regarding site visit and visit scheduled for 7/20/06. 07/20/06-Vought-Heavy rains may have caused water table to rise. As such boring was requested by DEC to be postponed to prevent infiltration of free product into basement of 529W142nd street through boring location. Boring rescheduled for 7/25/06. 07/24/06-Vought-Site visit with Peter Moody at (533W142nd Street). Basement composed of mostly dirt and concrete was removed. Five small excavation locations (previously referred to as boring locations) contained groundwater. Two excavations on east side of site (closer

APARTMENT (Continued) **S107787323**

to 531W142nd Street showed no free product or sheen (suggesting that contamination emanating from 529W142 and impacting 531W142nd Street has not impacted 533W142nd Street. Excavation closest to two (275-gallon) manifolded ASTs showed soil staining and may have had some emulsified free product. Part of line from ASTs to boiler is underground. Vought required Peter Moody to send in AB Environmental report with soil analyticals. 07/25/06-Vought-Preliminary review of Phase I Report for 531w142nd Street dated 5/25/04. With regards to AST in 532W142nd Street the tank appeared somewhat rusty and its base was resting on the floor of the basement. No holes were observed in the tank but it could not be thoroughly inspected due to its position on the floor. Oil staining was observed in the vicinity of the tank as well in the furnace room . 07/26/06-Vought-Installation of soil boring by Petroleum Tank Cleaners. Soil sample collected at 18 below fuel oil filter in area of heaviest staining. Soil samples show high soil contamination and as result no samples were taken to save expense. Tully agreed to recover oil in 531W142nd Street and also agreed to sealing walls between two properties. PTC scheduled vacuum truck for 7/27/06. Vought informed Walter Briggs of progress and asked him to relay infomation to Edwards and Oronato. 07/26/06-Vought-DEC requires: 1)533W142nd Street-submission of soil boring results (note that results were due to DEC by 6/23/06 as per DEC Rahman's letter dated 5/23/06). 2)531W142nd Street (impacted property)-submisssion of signed STIP that requires installation of vapor barrier and passive ventilation system 3)529W142nd Street-immediate recovery of fuel from 531W142nd Street, sealing of adjoining wall, possible soil remediation, notification to insurnace company. Vought sent out STIPULATION with due date of 8/28/06 to 531W142nd street with above requirements and letter to 529W142nd Street with requirements. 08/10/06-Vought-Received message from PTC Salamack that 1300 gallons of oil water mix was removed from the basement of 531W142nd Street. Vought called Salamack for current update and product was removed on 7/28/06. PTC recommended that Tully hire professional waterproofing company to seal wall. Vought called William Kahn to see if any further product seepage and Kahn noted that additional product was continuing to infiltrate 531W142nd Street. Vought called Tully and set up site visit for 1pm on 8/14/06. Vought also explained that if free product was again present after initial recovery event then more aggressive remedial action (eg excavation) will be required by the DEC as approved by DEC Austin. Vought called Kahn and set up site access for site visit. Vought received message from ALC Kurth and returned call and left message informing him of continued infiltration and upcoming site visit. Vought received call from Martin Smith and returned call. 08/14/06-Vought-Received message from Martin Smith that he will be attending site visit scheduled for today. Vought called Smith and left message confirming of site visit and called Blakely informing her of Smiths attendence. Vought called Tully and told him of possible attendance of Smith and Blakely. Vought called William Kahn and confirmed site visit and participants. Vought opened spill number 0650791 at 529W142nd Street and sent out letter. 08/15/06-Vought-Site visit by Vought on 8/14/06 with Blakely, Smith, Kurth, Khan and Tully. Continued free product infiltration to basement of 531W142nd Street. Approximately 4 gallons of new fresh product appeared out of historical location and wall and impacted groundwater in bottom of excavation. Vought initially gave Tully to 7/16 at 8:30am to decide on whether he was going to hire contractor (if not DEC would open

APARTMENT (Continued) **S107787323**

PIN). Martin Smith however suggested one week due (7/21/06 at 8:30am)date because due to his previous history with Blakely he could ensure her cooperation. Blakely approved on one week deadline and deadline also approved by DEC Austin. Vought sent out letter to Tully (after review and approval by DEC Austin) with one week deadline and again recommended to Tully that he contact his insurance company. Kurth will send in report of previous spill on 531W142nd Street and will also propose to do one upgradient soil and groundwater sample from 529W142nd Street. 08/16/06-Vought-Spoke to Steve Hiller and explained situation to him. Vought received message from Tully and returned call and no answer on phone. 09/27/06-Vought-Received call from and spoke to Donna (ABC Tank 718-272-2800) who is handling case. ABC pumped out water from basement on 4/17/06. Donna will fax soil and groundwater results to DEC. 10/31/06-Vought-Vought reviewed file for documentation and as per 5/19/06 report from ALC Kurth, soil boring performed at former AST location in 531W142nd Street shows minor SVOC contamination and no product noted seeping from location. Vought closed spill and sent No Further Action Letter to Blakely. See spill open spill #0650791 for ongoing PIN job at 529W142nd Street. 05/18/07-Vought-Received call and letter from Peter Moody requesting spill closure at 533 W142nd. Letter also included tank tightness test results dated 1/18/07 that show a tight tank and system. Letter also states that we take this oppurtunity to state unequivically that from our purchase of the property in February 2005 no alterations or repairs of any kind were ever made to the oil tanks or any lines leading to or from them. The 7A Administrator for the city of new york has assured me that he never made any such repairs to the tank or lines in the 7 years he managed the building prior to us . Moody requested spill closure however inspection of records show that DEC Rahman never opened a separate spill for 533. He did send a soil contaminaton letter to Moody with Spill #0600518 (Spill at 531W142nd St) however this spill was closed previously by Vought. Vought sent NFA letter to Moody referencing closed spill 0600518 for 531 W142nd Street. "

Spiller Name:	Not reported
Spiller Company:	PETER MOODY
Spiller Address:	533 W 142ND STREET
Spiller Company:	999
Contact Name:	JOSEPH ONORATO
DEC Memo:	"-Perhaps part of the long term problem at the Tulley Residence? 05/19/09-Vought-See also open spill and open PIN 0650791 and closed spill 0600518. Spoke with Joseph Onorato (ph:(212) 368-4579 cell 917-757-6675 fax:212-368-7755) and informed him of two potential sources (533W142nd St and 529W142nd St) and also informed him that DEC Ahmed enroute to site. Onorato indicated that Spills Hotline told him to call ECO desk and Vought checked with ECOs and ECO Machnica and ECO Wilson informed of spill. Vought had message sent to ECO Machnica and ECO Wilson that no response needed until site visit performed and possible RP determined. Note PIN for Tully (529 142nd St) still open. 05/19/09-Vought-Spoke to DEC Ahmed who performed site visit and noted that fresh red product in sump of 535 suggesting new spill and not old source such as Tully. Ahmed also noted fresh soil contamination at former connection of supply line to boiler and that one of two manifolded (275-gallon) ASTs was empty. Vought called Moody at: Peter Moody Wayne Restoration LLC 1950 Coney Island Avenue Brooklyn, NY 11223 mooddp5@aol.com Fax: (718)376-6910 ph: 646-242-0095 Vought spoke to Mr. Moody and informed him of spill and his potential responsibility and that Vought would callback after inspection of photos of samples and samples collected from sump of 535W142nd St and surface of 533W142nd Street and discussion with DEC Ahmed and DEC Austin. Vought, Austin and Ahmed reviewed field samples collected and sample collected from sump of 535W142 is fresh red #2 fuel oil (not brown weathered oil from 529W142nd aka Tully) and product also present in surface soil sample from 533W142nd St. DEC Ahmed noted contractors onsite and piles of wood placed over supply line which may have dislogded supply line. Two manifolded 275-gallon ASTs and both were empty. Vought called and spoke to Moody who also performed site visit and noted heavy odors in his basement as well. Moody will return call to Vought by 4pm today with contractor that he will hire. Vought called Onorato at 535W142nd Street and informed him of progress including 4pm deadline. Spill reassigned from DEC Ahmed to DEC Vought as per DEC Austin. Onorato noted that he could wait until tomorrow for response however DEC will urge immediate action due to vapors in residence. DEC Ahmed performed site visit to 531W142nd St and noticed no new product seepage from 529W142nd St. Onorato indicated that he noticed petroleum vapor three weeks ago and DEC Ahmed confirmed that basement renovation of 533W142nd Street stared approximately one month ago. 4:15pm-Vought-Received call from Mr. Moody that he will have licensed Hazmat contractor onsite by 6pm tonight to recover product from sump, cover sump and install ventilation. Moody will call back Vought with name of contractor by 6pm. Vought called Onorato and informed him of progress and told him that Vought would callback as soon as contractor info is received. 7pm-Vought-Received call from Peter Moody and Bill Perry from Troy Cutters(Ph:347-693-5222) and Cleaners onsite. Vought spoke to Perry and as per perry tanks were emptied last week and 495 gallons of #2 were recovered (total capacity of site is 2 x275=550 gallons) and tanks are currently empty. Futhermore as per Perry no observable spill onsite. Vought instructed Perry to recover oil from sump of 535W142nd St and also to cover sump with tape and plastic. Vought also informed Moody and Onorato of same and arranged site visit for

WAYNE RESTORATION LLC (Continued) **S109582990**

5/20 at 1pm. 05/20/09-Vought-Site visit by Vought with Onorato and Moody. Vought performed inspection of 535W142nd St and as per Onorato he did not smell any fuel vapors in residable portion of his residence (vapors only present in basement). Vought suggested that all basement doors be kept closed until remediation completed. Onorato indicated that he kept plastic duct taped over sump previous night as per Vought's recommendation. Onorato also confirmed that sump was cleaned last night by Troy Cutters however at time of DEC inspection that day, fresh red #2 fuel oil had entered the sump again. Onorato confirmed his residence utilizes natural gas heat and Vought reinspected basement and found no other sources of petroleum and noted no seepage through walls, only sump. Vought inspected basement of 533W142nd St with Onorato and Moody and noted two empty 275-gallon ASTs from which supply lines were removed and no boiler was attached. Vought noted fresh red #2 fuel oil on the surface of the basement dirt floor in puddles adjacent to the ASTs and former supply line locations(photograph in file). Vought also noted poor AST condition including pitting of AST bottoms and possible seepage of oil through bottoms. Note that no product was found in sump immediately cross gradient of ASTs indicating that source of spill is not upgradient. No upgradient spill in sump combined with fresh red oil next to ASTs indicate that 533W142nd is the potentially responsible party for impact to 535 W142nd St. Vought informed Moody of his responsibilty and reached agreeable deadline with Moody and Onorato that contractor must be selected by 5/26 and work must begin by 5/27. 05/22/09-Vought-Called and spoke to Moody who confirmed that he would be hiring Don Carlo Enviromental and that they would be onsite on 5/26/09 to recover additional oil from sump of 533W142nd and that they would begin excavation of 533W142nd St on 5/27. Vought called Onorato and informed him of start date and also arranged site visit with Moody and Onorato for 5/27 at noon. 05/26/09-Vought called Danny Singh (Don Carlo Ph.(718)857-3100 (347)728-0768(C) Fax: 718-857-2100) to confirm that work would begin tomorrow. Vought spoke to Singh and he emailed proposal to Moody on 5/22/09 but had not received signature back. Vought called and spoke to Moody and informed him of lack of committment by Don Carlo and he will sign proposal. Vought sent CSL to Wayne Restoration at above address with immediate deadline for below requirements and report submission within one month. Vought called and spoke to Onorato and informed him of recent updates. DEC requires for 535W142nd St: 1)covering of basement sump 2)product recovery from sump 3)continued monitoring of sump 4)NYCDOH site visit to 535W142nd St due to odors DEC requires for 533W142nd St: 1)excavation of impacted soil 2)collection of endpoints at 533W142nd St 3)epoxy sealing of floor and installation of wells and or SSD at 533W142nd St. 4)CSL with above requirements and cc to Oronato and Don Carlo. 5)Submission of disposal manifests for oil pumped form ASTs. 6)Installation of wells in excavation for recovery. 7)PID monitoring. 05/27/09-Vought-Site visit with DEC Vought, Onorato, Moody, Don Carlo (Danny Singh and Romeo Santos). Vought inspected basement of 535W142nd St with Onorato and Singh and noticeable odors in basement and basement stairway. Sump pit sealed with duct tape and pit not inspected as known to have product and not wanting to release more odors in basement. Note also sump cleaning not feasible until source removal due to immediate recharge of fuel oil upon last cleaning event. Onorato noted possible sore throat due to vapors and Vought offered relocation which was not accepted. In lieu, Vought required sealing of basement door with plastic,

WAYNE RESTORATION LLC (Continued) **S109582990**

installation of ventilation system in basement, additional covering of sump with plastic and immediate PID survey. Singh agreed to perform this steps immediately. Vought inspected basement of 533 W142nd St and no product in crossgradient slump. Excavation to begin tomorrow of impacted soil. 05/28/09-Vought-Called Onorato for status of odors in basement after implementation of vapor mitigation measures and left message to return call. Vought received conference callback and spoke to Onorato who confirmed that product was removed from sump at 535 W142nd, sump was resealed, ventilation fans installed and door was sealed as well. Onorato indicated that he no longer had sore throat and mitigation efforts were successful. Moody also confirmed that drums were being brought onsite and excavation would begin today. Vought arranged site visit for monday 6/1 at noon. Vought called and left message for Singh informing him of upcoming site visit. Vought received call from and spoke to Singh who confirmed that sump of 535W 142nd was cleaned and degreased and less oil was present. Singh also requested delineation requirement to be sent via email by Vought. Singh noted PID survey results of 0ppm in basement, .5ppm in stairwell and 0ppm in living area. Singh also noted 35ppm in basement of 533 W142nd. 06/01/09-Vought-Received call from and spoke to Oranoto and he will not be available for todays site visit as he is in NJ for family emergency. Onorato notes that no odors were only present in basement stairwell and basement and that vapor mitigation efforts were effective to date. Site visit by Vought and onsite were Onorato(was back from NJ), DonCarlo (Singh) and Moody. Vought inspected 535W142nd ST and noted no odors on first floor, some vapors in basement stairwell (adjacent to common wall of 533 W142nd St. No inspection performed of 535W142nd St as door sealed with plastic and Vought wanted to avoid comprimising containment. Ventilation system in basement still running. Vought inspected basement of 533W142nd st and two drums of contaminated soil was removed and groundwater (including some red #2 fuel oil was also recovered). Vought observed minor seepage of fresh red #2 fuel oil coming from wall common to 535W142nd St. Vought required collection of bottom groundwater sample and submission of RAP addressing dissolved phase groundwater contamination by Wed 6/3. PID survey and sump cleanout of 535W142nd St to be performed today. 06/03/09-Vought-Received email and call from Don Carlo (Singh) that PID survey was performed this morning of 535W142nd St and no reading were found (even in basement stairwell) and basement was free of product. Two test pits and one well installed in 533W142nd St. In test pit adjacent to wall of 531 fresh red #2 fuel was found suggesting additional or true source of product. Don Carlo not performing work to date and suggested that Vought call Sam Kerry or Mark Chemtob (who work with Moody at 718-376-5400). Vought called Sam/Kerry and not in office, but spoke with Debbie who indicated that she would take care of payment issue with Don Carlo. 06/05/09-Vought-Site visit by Vought with Moody and Don Carlo (Bobby). Vought spoke to DonCarlo (Singh) enroute to site. Excavation still open at former AST location and no product present. Three borings to the east however immediately adjacent to the common wall with 531W142nd St show red fresh #2 fuel oil. Vought inspected 529W142nd (Tully residence-Spill 0650791) and AST system aboveground and no product in well at that location. Vought required hold on ORC proposal (as free product still present), installation of soil delineation borings in basement and rear of property, measurement of product thicknesses, recovery of free product, report submission,

WAYNE RESTORATION LLC (Continued) **S109582990**

call to onorato to ensure absence of vapors, implementation of interim remedial measures. Vought called Onorato for presence of vapors and left message to return call to Vought. Vought searched PBS and called PBS contact for 516W143rd St (Mark Barhorin office: 646-210-7412 cell:917-559-8615) and left message to return call so site visit can be arranged. Vought sent email to Singh, Moody and Onorato with below requirements and updated spill report. Vought received callback from Barhorin and Vought will meet his super (Husko 917-687-7681) at site at 6/9 at 10am. Updated DEC requirements: DEC requires for 535W142nd St: 1)covering of basement sump 2)product recovery from sump 3)continued monitoring of sump 4)continued operation of basement ventilation system 5)NYCDOH site visit to 535W142nd St due to odors upon completion of remediation. 6)epoxy coating of basement stairway wall. DEC requires for 533W142nd St: 1)hold on ORC proposal (as free product still present) 2)installation of soil delineation borings in basement and rear of property and delineation wells in basement (wells to the south, east and north of wells containing product) 3)measurement of product thicknesses 4)report submission including site plan, product thicknesses, disposal manifests, endpoint analyticals 5)implementation of interim remedial measures including recovery of product from test pits/wells. 6)epoxy sealing of floor, installation of moisture barrier and installation of wells and or SSD at 533W142nd St. Vought to: 1)to peform site visit of surrounding area for possible additional sources (during well installation date at 533W142nd St). 06/05/09-Vought-Site visit scheduled for 6/9 at 10am with 516W143rd St. Vought received fax copy of oil removal bill for 533W142nd St from JB Waste Oil (718-370-1602) showing that pumped out + removed 490 gallons of #2 oil from 533 West 142 st. Harlem N.Y.C. Vought called and spoke to JB Waste Oil who confirmed validity of bill and that oil was combined with other petroleum products and disposed of at regulated facility. 06/09/09-Vought-Site visit by Vought. Vought met with Onorato who indicated that DonCarlo was onsite on 6/8/09 and performed soil borings in rear yard of 533W142nd St. Onorato indicated that there were oil vapors present on Friday 6/5 however after he aired out residence on Saturday they were minimalized. Onorato indicated also that sump had not been checked for last week as he was mostly unavailable to be at home due to work. Vought observed no vapors on first floor or in basement stairway but did observe odors in basement (observations confirmed by Onorato). Vought inspected sump and large amount of dissolved product present (evidenced by odors and slippery feel to water). Sump however was activating approximately every five minutes due to recent heavy rains and as such product (if any) may have been discharged to sewer system. Basement ventilation fans still in operation. Vought inspected 516 W143rd St with super (Husko) including 5000-gallon #2 fuel oil AST in secondary containment room. Secondary containment room floor filled with debris so unable to see tank bottom and as such Vought required debris be removed by Friday 6/12 so that another inspection could be performed. No oil odors or contaminated soil observed in secondary containment. Vought inspected fill, supply and return lines and all above ground with no signs of signficant spills. Sump located between tank room and 529W142nd Street showed no signs of oil. Vought also noted the following: 520 W143rd St-natural gas (no fill or vent) 524 W143rd St-natural gas (no fill or vent) 526 W143rd St-natural gas (no fill or vent) 528 W143rd St-natural gas (no fill or vent) Vought had conference call with Onorato and Don Carlo (Singh) and informed him of the above. Singh

WAYNE RESTORATION LLC (Continued) **S109582990**

indicated that basement of 533 W142nd St could be accessed via locked gate (able to be opened) and Singh had no problem with basement inspection by Vought (granted access). Singh also confirmed that borings were performed in rear yard of 533 W142nd and borings performed to groundwater and deepest dry sample collected for analysis and groundwater showed no odors via PID or evidence of product (suggesting that secondary source (if it exists) is not directly to the north of 533W142nd St. Vought arranged site visit with Onorato and Singh on Friday 6/12 at 10:30am during which PID survey would be performed. Singh to also have sump retaped tomorrow (6/10). Vought inspected basement with Onorato and observed: no product at former AST location, no product in area to the north of former boiler, no product in sump, no product in boring to the south of the stairwell, minimal product (red in color) in boring on east wall behind stairwell and no product in boring to the north of the product containing boring. Product amount reduced from last site visit and due to heavy rains, if there was a continual source more product would most likely be present suggesting that this may be on time spill event (source was soley Wayne Restoration). Further monitoring required to determine if there is second responsible party (in addition to Wayne Restoration). Vought spoke to Moody later and informed him that Vought would send email with current requirements. 06/12/09-Vought-Site visit and inspection of 516W143rd with Husko. Husko removed all debris from secondary containment however bottom of AST still not visible and as such tightness testing required of AST. Vought also met with Onorato, Moody and Singh. As per Onorato no vapors in living areas (mild odors in staircase). PID survey performed by Singh last Thursday showed no impact. Vought inspected sump and slight sheen in sump and sump will be cleaned by Don Carlo. Vought inspected basement of 533 W142nd and no additional accumulation of product since last DEC site visit on 6/9/09. Vought recommended and required excavation of entire material (impacted material will be segragated and disposed of via PID) which would also enable better secondary source determination (if any) and also recommended additional test pits installed between product location and former AST location BEFORE basement is entirely excavated (this may aid in source determination as well). Singh indicated that additional tests pits would be performed Monday and Moody indicated that excavation of basement was to begin on Wed or Thurs. Vought to send letter to tank owner with tightness testing requirement, monthly inspection submission and ten year inspection submission to be performed by Friday 6/19 to the address as per PBS #2-405736: Mr. Mark Barhorin Pinnacle Group P.O. Box 1919 New York, NY 10116 Fax:(646)341-9404 06/15/09-Vought-Received email from Singh that C&D debris has not been removed from basement and as such test pits have not been installed to date. Vought replied with email of above notes and noted urgency of basement excavation and also included cc to Onorato and Moody as well. Vought sent out certified letter to 516W143rd st with one week deadline of tank testing and left message for Barhorin as well of one week deadline and letter in mail. Vought called and spoke to Barhorin yesterday and he would return call to Vought with fax for letter but Vought never received return call. Vought received callback from Barhorin that he would arrange test with boiler company and would have secretary return call to Vought with fax number. Vought called and spoke to Barhorin and discussed testing requirements and ten year inspection requirement. Vought received call from secretary of Barhorin and faxed him copy of letter

WAYNE RESTORATION LLC (Continued) **S109582990**

as well. 06/18/09-Vought-Eroneously issed previously scheduled meeting at 10am (thought it was at noon). Vought spoke to Moody,Singh and Onorato and basement of 533W142nd St full of water but no product is present (even in rear location). Excavation of basement at 533W142nd St scheduled to begin on monday 6/22 and ORC will be applied before placement of moisture barrier and then concrete. Four monitoring wells (two on east wall and two on west wall to also be installed). Sump of 533W142nd St was cleaned on 6/17 and only slight sheen was observed. PID survey performed today by Singh showed no impact to basement and living areas. Slight odor in stairway few days ago as per Onorato and hence stairway wall to be epoxied by Don Carlo. Next PID survey and sump check to be performed Monday 6/22.On vacation from 6/19-6/29. Site being managed by DEC Patel. Patel on 6/22 to:1)call Moody with status of excavation of basement of 533W142nd and also for possible secondary source determination 2)call 516 W143rd st (Bahorin) for status of tank tightness test data 3)call Onorato for possible odors over wekend 3)send email to onorato and moody with status update and urgency for soil excavation if not performed to date. 06/18/09-Hiralkumar Patel. 11:32 AM:- received message from Laurene Gallway (212-564-2111 Ext. 3118) from Pinnacle group (516 W 143rd st). she mentioned that she didn't get fax and requested copy of letter. 06/22/09-Hiralkumar Patel. 11:17 AM:- spoke with Moody. he mentioned that excavation hasn't started as no contractor is available. Mr. Moody is talking to Sam Kerry and expect to start excavation by 06/24/09. 11:37 AM:- left message for Mr. Onorato. 11:40 AM:- left message for Laurene at Pinnacle. 11:44 PM:- spoke with Mark Chemptob. he mentioned that oil is coming from off-site and he wants responsible party to do cleanup. 12:40 PM:- spoke with Mr. Onorato. no odors in living space. minimal odors in stairway. 1:11 PM:- received call from Mr. Moody. he mentioned that finally Mark has contacted Don Carlo for required excavation in basement. Danny will send proposal today and Mr. Moody is expecting that proposal will be signed off by today evening and Don Carlo will be on-site tomorrow excavating the basement. 1:25 PM:- spoke with Mr. Singh regarding contract for excavation. he mentioned that Romeo is currently talking to Mark on unpaid invoices for work done to date and will call back by end of today with updates. 06/23/09-Hiralkumar Patel. 10:03 AM:- left message for Laurene. 11:16 AM:- received call from Laurene. they performed tank test and found tank tight. will send tank test result once get it from testing company. 10:05 AM:- left message for Mr. Moody. 10:16 AM:- received email from Danny. Romeo from Don Carlo met with Marc Chemtob and Sam Kairy and agreed that Don Carlo will perform the excavation for the ORC on the west wall (previous tank area) and the trench from the west to east walls in order to monitor the groundwater. ORC application will take place upon completing the west wall excavation. Don Carlo crew is at the site excavating basement. 06/24/09-Hiralkumar Patel. 12:03 PM:- left message for Danny. 12:05 PM:- received call from Danny. they finished excavation and applying ORC. asked Danny not to backfill the excavation before i visit the site. 2:20 PM:- visited site. met Danny and Romeo from Don Carlo. they excavated along west foundation wall in area where previous tanks were located. found water in excvation. no product observed in excavation. asked Danny to backfill excavation with ORC. two holes dug along eastern foundation wall. found few drops of free product in both holes. will excavate trench from western wall to eastern wall. based on oil in both holes, asked Danny to extend trench in north direction along eastern wall. as per Danny,

WAYNE RESTORATION LLC (Continued) **S109582990**

no product/odor noticed at Mr. Onorato's residence. 06/26/09-Hiralkumar Patel. 2:30 PM:- visited site. met Danny. trench excavated from western to eastern wall. water found in entire trench. no product observed in trench except few drops (less than during last site visit) along eastern wall. asked Danny to leave trench open for some time to monitor groundwater. Singh also performed PID monitoring of 535W142nd St and no odors detected and slight sheen in sump. 07/02/09-Vought-Site visit and onsite were Onorato, Moody and Singh. No odors in 535W142nd St as per PID inspection by Don Carlo and small 2 spot of product found in sump. Onorato removed plastic sheeting from basement door due to absence of odors. Furthermore he declined offer of NYCDOH site visit by Vought as he was comfortable with routine survey by Don Carlo. Ventilation system still operational and Onorato will continue to voluntarily cover sump. Don Carlo will do PID survey sump check in two weeks and inspect trench at 533 W142nd St in one week. 07/06/09-Vought-Sent email with below requirements to all parties and also sent separate email to all parties requiring excavation of basement to groundwater interface of 533 W 142nd St. DEC requires for 535W142nd St: 1)continued monitoring of sump and PID monitoring in two weeks, followed by another two weeks and then month if no impact. 2)continued operation of basement ventilation system 3)epoxy coating of basement stairway wall of 535W142nd St if odors return. DEC requires for 533W142nd St: 1)excavation of all soil to groundwater interface and installation of four monitoring wells (two on east wall and two on west wall). 2)report submission including site plan, product thicknesses, disposal manifests, endpoint analyticals, PID survey data and sump monitoring data 3)inspection of basement in one week for free product 4)epoxy sealing of floor, installation of moisture barrier upon development of basement. 5)Monitoring of wells for ORC natural attenuation parameters if odors recoccur at 535W142nd St. 07/06/09-Vought-Received email from Singh that excavation will be started on Monday, July 6. and that soil excavation will be monitored visually and by using a PID. 07/08/09-Vought-Received email from Singh that he was removed from the basement by Marc Chemoff as he would like lump sump price. Don Carlo provided lump sum price to Chemoff and he will hire another contractor to perform the work. Singh will perform inspection of 535 W142nd St tomorrow. 07/10/09-Vought-Received email from Singh that PID survey was performed at 535 W142nd St on 7/9/09 and no readings were found in the living space, basement, basement stairs and sump. Visual inspection of sump showed heavy sheen and petroleum odor. Also Joe mentioned to us that his cleaning lady went into the basement around 8am and noticed a high petroleum odor in the basement area . Vought sent reply that basement excavation must begin by Wed 7/15 or case will be referred to legal enforcement. 07/14/09-Vought-Received call from and spoke to Eastern Environmental (Doug Schrempf Ph:631-727-2700 Fax:631-727-2777) and Vought will fax him copy of spill report. Schrempf was contacted by Marc and Sam to install four wells and remove soil. Vought also discussed necessity of PID monitoring and sump monitoring at 535 W 142nd St. Vought received call from Moody and Don Carlo will performing soil excavation. Moody had conference call with Sam Kerry, Don Carlo and Moody. Don Carlo reduced estimate for soil excavation and as such they will perform work. Moody will send email to Vought with confirmation of contractor selection. 07/17/09-Called Moody for status of contractor selection and left message to return call. Vought received return call from Moody who granted permission to perform site visit. Site visit by

WAYNE RESTORATION LLC (Continued) **S109582990**

Vought and onsite was Don Carlo and plumbing crew who were excavated soil from basement via 5-gallon buckets. Groundwater level dropped approximately one foot as floor drain opened and groundwater (with no sheen or product observed) flowing into sewer system. No signs of free product and no petroleum odors onsite. Vought also met with Onorato who confirmed the absence of odors as well as only one small (.25) spot of free product in sump. Sump and PID monitoring to be performed within two weeks from this date. 08/03/09-Vought-Received email from Don Carlo (Singh) that basement excavation has been completed and DEC site visit is needed. Vought replied with availability and cc'd Onorato so that a site visit may be performed to 535 W142nd St as well to perform final monitoring event as no odors found during 7/31/09 monitoring event. 08/07/09-Vought-Site visit with DEC Ibeh, Don Carlo (Danny), Moody and Onorato. Inspected basement of 533 W142nd St and no odors and only biological sheen present in sump (possibly due to former addition of ORC) evidenced by iceberging of sheen and not petroleum swirl. Don Carlo had been monitoring sump every two weeks until this point. As per Onorato it has been approximately one month since last observed petroleum odors. Vought and Onorato agreed to cessation of sump and indoor air monitoring. Basement inspection of 535 W 142nd Street showed no product in monitoring wells and trace product on south end and east end of basement. Don Carlo will prepare report and submit to DEC within two weeks and upon submission of report, basement will be checked one additional time for presence of free product. Moody will install sump in his basement as part of building and basement redevelopment which will assist in groundwater control to adjacent properties. 08/28/09-Vought-Received message from Moody to return call. Vought called Moody and left message to return call. Vought received second call from Moody who will followup with Don Carlo and Sam with report submission and return call to DEC. No further oil impacts to 533 W142nd St observed to date. 10/08/09-Vought-Reviewed Tank/Spill Closure Report submitted by Don Carlo dated 8/31/09 and received on 9/1/09. History of cleanup including installation of basement ventilation system in 533 W 142nd, PID surveys and cleanup and monitoring of impacted sump at 533 W 142nd St, removal of two manifolded 275-gallon #2 fuel oil ASTs from basement of 531 W 142nd St., remediation of petroleum contaminated soil, removal of twelve drums of contaminated soil, removal of water and product from tests pits twice, installation of total of four monitoring wells, collection of two endpoint soil samples, application of ORC to groundwater. Soil analyticals show non-detect full list volatiles including TAGM Required Soil Cleanup Objective compounds. Groundwater analyticals show 44ppb ethylbenzene(MW2), 57ppb toluene(MW2), 100ppb methylnapthalene(MW2), 58ppb phenanthrene. Based on the PID surveys performed within the basement and living space of the adjacent property, the owner(Mr. Onorato) has confirmed that no mopre PID surveys are necessary and is happy with the conditions of the basement and living space. DCES recommends installation of a vapor barrier and encapsulation via epoxy sealant. During tank removal, Visual fuel oil contaminated soil was observed and suspected soil was placed on 6-mil polyurethane plastic sheet for legal disposal . 30lbs of ORC compound was applied to test pit. Vought spoke to Peter Moody and no further product or odors observed in sump and he is content with cleanup and spill closure. Vought called Moody and informed him that spill being closed due to acceptable soil and groundwater analyticals however callback needed to confirm no current impact,

WAYNE RESTORATION LLC (Continued) **S109582990**

installation of vapor barrier and well removal. Spill closed by Vought and SCL sent to Wayne Restoration with CC to Onorato. Vought spoke with Moody and no further oil observed in basement of 533 W 142nd. Moisure barrier being installed currently and wells will be removed today. Vought sent closure letter to Moody."

Remarks: "Caller advises an unknown amount of #2 heating oil is coming into basement and sump pump from construction site next door. Requesting callback from spill responder"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 3/13/03 REASSIGNED FROM ROMMEL TO VOUGHT. 4/30/04-Vought-Changed spill address from 87 St. Nicholas to 89 St. Nicholas due to correct address and address on all Tyree correspondence. Site may also be known as 89-91 St. Nicholas Ave due to use previously on Tyree reports. Also changed name of spiller to Getty. File review by Vought: Closure Report (Tyree Org Dan Ruffini 631-249-3150)-January 1996. Tanks removed as part of station rebuild. Removal of twelve (550-gallon) gasoline USTs and one (4000-gallon) tank. Tanks removed in June 1995. Tank upgrade included the installation of four (4000-gallon) gasoline USTs. New tanks placed in existing tank excavation. Visual evidence and petroleum odors detected during excavation. Depth of excavation was ten feet and 1040 tons of soil removed. Soil analyticals show 1460ppb benzene (North), 12000ppb toluene(North), 6720ppb toluene(South), 3240ppb xylene(South), 5230ppb toluene(West), 3040ppb xylene(west), 4010ppb toluene(west), 3330ppb xylene(west), 11500ppb toluene(bottom), and 2560ppb xylene(bottom). Subsurface Investigation Report (Tyree Org Paul Hatcher)-Dec 2000. Investigation result of DEC requirements. Five Geoprobe borings performed resulting in collection of six soil samples and two groundwater samples. Groundwater at depth of 26-27'. Soil analyticals show up to 104000ppb 1,2,4-trimethylbenzene(SB3 10-15'), 18500ppb xylene(SB3 10-15'), 13200ppb napthalene(SB3 10-15'), 819ppb benzene(SB4 10-15'), 5260ppb toluene(SB4 10-15'), 10900ppb 1,2,4-trimethylbenzene(SB4 10-15'), 323ppb benzene(SB4 20-25'), 1960ppb toluene(SB4 10-15'). Groundwater analyticals show up

LOT 20,TAXBLOCK 2069 (Continued) **S107657287**

to 184ppb benzene(SB4), 4470ppb MTBE(SB-4), 5ppb benzene(SB5) and 33ppb MTBE(SB5). Tank Removal Report (Tyree Org Phillip De Blasi)-December 2001. Reason for tank removal was tanks were identified while attempting to install monitoring wells in March 2001. Apartment building to the south, commercial buildings to the east and a garage to the west. Tanks removed were two (550-gallon) gasoline tanks. External corrosion and small hole in tank #2 . Five endpoint soil samples taken show no TAGM 4046 Required Soil Cleanup Objective exceedences. Quarterly Monitoring Reports (Tyree Org) August 2002 thru March 2003. Three monitoring wells onsite. Quarterly sampling and gauging. Free product in well W1 (.08'). Groundwater flow to the east at a depth of 14-16'. Soil analyticals show up to 9700ppb benzene(W1 10-15'), 122000ppb toluene(W1 10-15'), 41100ppb napthalene(W1 10-15') and 291pp benzene(W3 15-20'). Groundwater analyticals show up to 7490ppb benzene(W1), 3680ppb toluene(W1), 590ppb napthalene(W1), 92100ppb MTBE(W1), 200ppb benzene(W2), 318ppb MTBE(W2), 875ppb benzene(W3), 124ppb napthalene(W3) and 867ppb MTBE(W3). Letter from DEC(Vought)-4/29/03. Letter requesting expediting of sidewalk wells for wells in side walk on St. Nicholas Avenue. Well Proposal from Tyree-6/12/0. Letter proposing installation of two wells (in the northeast corner of the property and the other in the sidewalk along St. Nicholas Avenue). Letter from DEC(Vought)-6/25/03. Letter sent approving 6/12/03 proposal. Quarterly Monitoring Reports (Tyree Org) April 2003 thru Dec 2003. Three monitoring wells onsite. Quarterly sampling and weekly gauging. Free product in well W1 (.28'), W3 (.03'). Weekly bailing of wells recovering 1.25 gallons of free product. Groundwater flow to the east at a depth of 14-16'. Groundwater analyticals show up to 17400ppb benzene(W1), 14300ppb toluene(W1), 8580ppb MTBE(W1), 9ppb xylene(W2) and free product in W3. Subsurface Investigation Report (Tyree Org Gabriela Dory)-December 2003. Reason for investigation is DEC requirement. Two Geoprobe borings performed. Groundwater at 15'. Soil analyticals show 36700ppb benzene(TB-1 12-16'), 325000ppb toluene(TB1 12-16'), 66500ppb napthalene(TB1 12-16'), 60ppb benzene(TB2 12-16'), and 1752ppb xylene(TB2 12-16'). Groundwater analyticals show 14500ppb benzene(TB1), 1340ppb napthalene(TB1), 142ppb benzene(TB2), 1221ppb xylene(TB2) and 344ppb napthalene(TB2). 5/4/04-Vought-After file review DEC requires STIPULATION AGREEMENT WITH: 1)delineation of soil and groundwater north of former tank pad, east of W1, east of W3 and at former boring location TB-2. Vought handed over Stipulation during 5/5/04 Getty meeting with DEC with a due date to DEC by 6/4/04. 6/2/04-Vought-Received signed Stipulation from Shea and submitted to DEC Kunkel for implementation. Stipulation implemented by DEC Kunkel on 6/2/04. 10/7/04-Vought-New file review by Vought: Email from Tyree (Lapeitra) to DEC Vought dated 6/23/04. on June 24 and 25 four (4) monitoring wells will be installed as per the Stipulation Agreement . A subsurface investigation will follow shortly afterward . Subsuface Investigation Report (Tyree) received on 7/20/04. Commercial properties to the east, south, and west, park to the north. Installation of two onsite wells and two offsite wells. Groundwater 14-22' below grade and flow to the north. Soil analyticals show 494ppb benzene(B6 15-17') and minor PAH exceedences(B4 10-12'). Groundwater analyticals show 1220ppb benzene(MW4), 1340ppb toluene(MW4), 1700ppb ethylbenzene(MW4), 4490ppb xylene(MW4), 11ppb MTBE(MW4), 1ppb benzene(MW5), 8ppb xylene(MW5), 14ppb benzene(MW6), 13ppb xylene(MW6) and 670ppb MTBE(MW6). Groundwater Monitoring Report (Tyree)- July thru Sept 2004. Seven monitoring wells onsite.

LOT 20,TAXBLOCK 2069 (Continued) **S107657287**

Groundwater analyticals show 20600ppb benzene(W1), 42100ppb toluene(W1), 2820ppb ethylbenzene(W1), 15400ppb xylene(W1), 7190ppb MTBE(W1), 1ppb benzene(W2), 4720ppb benzene(W3), 41ppb toluene(W3), 429ppb ethylbenzene(W3), 403ppb xylene(W3), 5190ppb MTBE(W3), 633ppb benzene(W4), 16ppb toluene(W4), 4410ppb ethylbenzene(W4), 12700ppb xylene(W4), 982ppb benzene(W6), 21ppb toluene(W6), 78ppb ethylbenzene(W6), 84ppb xylene(W6) and 962ppb MTBE(W6). 10/7/04-Vought-Sent letter approving of Subsurface Investigation and requiring remedial Action Plan as per CAP. 5/12/05-Vought-New file review by Vought: Groundwater Monitoring Report (Tyree)-October 2004 thru March 2005. Seven monitoring wells onsite. Groundwater flow to the east and at depths of 13-24' below grade. Groundwater analyticals show 16700ppb benzene(W1), 13100ppb toluene(W1), 2710ppb ethylbenzene(W1), 14100ppb xylene(W1), 8070ppn MTBE(W1), 5ppb toluene(W2), 30ppb xylene(W2), 3450ppb benzene)W3), 22ppb toluene(W3), 128ppb ethylbenzene(W3), 176ppb xylene(W3), 4330ppb MTBE(W3), 217pppb benzene(W4), 93ppb toluene(W4), 2320ppb ethylbenzene(W4), 6600ppb xylene(W4), 28ppb xylene(W5), 224ppb benzene(W6), 9ppb ethylbenzene(W6), 32ppb xylene(W6), 1290ppb MTBE(W6), 8ppb xylene(W7). Site Status and Proposed Remedial Action Plan(Tyree Brothers)-February 2005. TBES is proposing the use of in-situ passive bailers to collect product from wells W-1 and W-3 . Bailers will be utilized until a permanent remedial alternative is in place . Proposal for a dual phase pilot extraction test. Extraction well will be located between wells with highest contamination(W1 and W3). Results of pilot test will be provided in a Pilot Test Report. Vought sent letter approving of Pilot Test. 08/31/2005 - Feng - Project transferred from Vought to Feng. 10/5/2005 - Feng - Quarterly Monitoring Report from Tyree (4/2005 - 6/2005). 7 monitoring wells onsite and offsite. NO LNAPL detected. Groundwater flow easterly (perched above bedrock) at a depth of 13.44' to 24.91' below grade. Analyticals for W-1: 46,280ppb BTEX, 6,130ppb MTBE. W-2: 3ppb BTEX, non-detected MTBE. W-3: 4,554ppb BTEX, 4,640ppb MTBE. W-4: 14,058ppb BTEX, non-detected MTBE. W-5: 11ppb BTEX, non-detected MTBE. W-6: 475ppb BTEX, 1,140ppb MTBE. W-7: non-detected for both BTEX and MTBE. Noted that the DPE Pilot Test will commence during the next quarter. 10/5/2005 - Feng - Subsurface Investigation Report, dated 6/27/2005. On 6/8/2005 to 6/10/2005, two (2) saturated zone piezometer wells (P1 and P2), three (3) vadose zone piezometer wells (A1, A2, A3), and one (1) extration well were installed on the southeast side of the site. VOCs test shows that P1(9'-11') has 271ppb Acetone, P2 (7'-9') has 364ppb Acetone, EW1(11'-13') has 200ppb acetone. The other concentrations are blow Guidance value. 10/7/2005 - Feng - Sent letter of approving Dual Phase Extraction system design, dated July 2005 (letter reviewed by Sun) to Getty, Tyree and Delta. In the system design, four (4) extraction wells onsite will be installed to cover the area of concern. Namely, there are four (4) extraction wells for vadose zone with Radius of Influence (ROI) of 28 feet. Among these four (4) wells, there is one (1) extraction well (EW-2) serves for both vadose and saturated zone purposes with ROI of 50 feet. DEC approved with some notes below: 1) Adjust the Location of Saturated Zone Extraction Well (EW-2) to cover the W-3 area and further W-4 area. 2) Revise the Proposed DPE System Flow Diagram. 3) Submit the System Design Specification. 4) tabulate and describe OMMP. 5) measurement and analysis of groundwater. 11/2/2005 - Feng - Quarterly Monitoring Report from Tyree (4/2005 - 6/2005). 7 monitoring wells onsite and offsite. NO LNAPL detected. Groundwater

LOT 20,TAXBLOCK 2069 (Continued) **S107657287**

flow easterly (perched above bedrock) at a depth of 15.30' to 24.53' below grade. Analyticals for W-1: 41,690ppb BTEX, 6,300ppb MTBE. W-2: low, dry this quarter. W-3: 2,053ppb BTEX, 1,990ppb MTBE. W-4: 7,938ppb BTEX, non-detected MTBE. W-5: 48ppb BTEX, non-detected MTBE. W-6: 74ppb BTEX, 1,360ppb MTBE. W-7: 38 BTEX and 1 MTBE. 1/17/2006 - Feng - Quarterly Monitoring Report, 10/2005 - 12/2005. That is an active gasoline /service station. Groundwater flows to east (perched above bedrock) at depth of 13.47' to 25.03' bg. 7 monitoring wells on and off site. W-1, 48,010 ppb BTEX, 3,860 ppb MTBE. W-2, 4 ppb BTEX, MTBE MDL. W-3, 2,956 ppb BTEX, 2,480 ppb MTBE. W-4, 13,485 ppb BTEX, MTBE MDL. W-5, 1 ppb BTEX, MTBE MDL. W-6, 415 ppb BTEX, 909 ppb MTBE. W-7, 10 ppb BTEX, MTBE MDL. (RJF) 1/18/2006 - Feng - Emailed Nick Marrone inquired the status of DPES installation. (RJF) 1/19/2006 - Feng - Reply from Nick Marrone Things were moving slowly in the beginning of the month because of the holidays, but we are scheduling field crew to start installing the system piping in the next few weeks. Our vendor who we purchase our systems from is reviewing our data and will be assembling it soon. 4/10/2006 - Feng - Emailed Nick Marrone and requesting the status of the system installation and asking for a approximate date of completing installation and start running the system. (RJF) 4/10/2006 - Feng - Reply from Paul Hatcher, The system is being designed right now. There are space considerations to be considered given the small site. Also, there was some problems connecting the wells (i.e. subsurface conditions) that delayed the trenching operations a bit, but that's all done now. We've started getting the electrician to make the connections and It's probably going to be a month or two until we get the system delivered and hooked up. (RJF) 5/3/2006 - Feng - Quarterly Monitoring Report, 1/2006 - 3/2006. Active gasoline/service station. Groundwater flows to east (perched above bedrock) at depth of 13.54' to 25.22' bg. There are 7 monitoring wells on and off site and 4 Dual Phase Extraction. Sampling as of 3/21/2006. W-1, decreased and 39,920 ppb BTEX (12,900 ppb Benzene, 10,900 ppb Toluene, 2,520 ppb Ethylbenzene, 13,600 ppb Total Xylenes), 3,710 ppb MTBE. W-2, MDL. W-3, 3,044 ppb BTEX (2,300 ppb Benzene, 29 ppb Toluene, 222 ppb Ethylbenzene, 493 ppb Total Xylenes), 3,760 ppb MTBE. W-4, 11,441 ppb BTEX (224 ppb B, 87 ppb T, 2,680 ppb E, 8,450 ppb X), MTBE MDL. W-5, MDL. W-6, 281 ppb BTEX (225 ppb B), 1,120 ppb MTBE. W-7, MDL. Noted that 3 more dual phase extraction wells were installed during this last quarter. Also trenching and system piping were installed (map attached). The Dual Phase System is/will be assembled and sent this next quarter. Electrical service will be obtained shortly. (RJF) 11/9/2006 - Feng - Quarterly Monitoring Report, 7/2006 - 9/2006, 9/28/2006, by Tyree. The site is active gasoline/service station. Sampled and gauged on 9/28/2006. DTW 12.88 to 23.50' bg. Flows easterly (perched above bedrock). No LNAPL. BTEX range ND to 78,880 ppb. MTBE range ND to 2,430 ppb. Noted that the Dual Phase System was delivered in 9/2006. Electrical service will be obtained shortly. (RJF) 1/18/2007 - Feng - Getty Properties portfolio meeting with Tyree and Delta. Passive skimmer in W-1 and W-3. DPES installed onsite, all DPE wells trenched. System electric to be hooked up in 2/2007. DPES will start 4/1/2007. (RJF) 2/20/2007 - Feng - Quarterly Monitoring Report, 10/2006 - 12/2006, 1/8/2007, by Tyree. Active gasoline/service station. Groundwater sampled and gauged 12/27/2006. 7 monitoring and 4 Dual Phase Extraction wells. DTW 12.91' to 24.66' bg. Flows easterly (perched above bedrock). No LNAPL. W-1, 60,170 ppb BTEX, 2,080 ppb MTBE. W-2, NA. W-3, 2,272 ppb BTEX, 3,270 ppb MTBE. W-4, 69

LOT 20,TAXBLOCK 2069 (Continued) **S107657287**

ppb BTEX, MTBE MDL. W-5, MDL. W-5, 787 ppb BTEX, 720 ppb MTBE. W-7, MDL. (RJF) 3/30/2007 - Feng - Email updates from R.S. (Tyree). Con Ed is in the process of running the electric from the street to the sidewalk. (RJF) 6/27/2007 - Feng - Quarterly Monitoring Report, 1/2007 - 3/2007, 4/2007. Groundwater smapled 4/2/2007. 7 monitoring wells and 4 dual phase extraction wells. DTW 12.34' to 24.42' bg. No LNAPL. Flows to east. W-1, 60,260 ppb BTEX, 1,050 ppb MTBE. W-2, MDL. W-3, 274 ppb BTEX, 243 ppb MTBE. W-4, 148 ppb BTEX, MTBE MDL. W-5, MDL. W-6, 601 ppb BTEX, 786 ppb MTBE. W-7, MDL. Spoke to Rob S. (Tyree), the dual phase system has been delivered and all the piping are set last year. The problem now Tyree has is the eletrical power supply from Con Edison. Rob will follow with Con Edison for the electrical power and may need DEC's assistance. (RJF) 9/28/2007 - Feng - Quarterly Monitoring Report, 4/2007 - 7/2007, 8/2007. Groundwater sampled 7/9/2007. 7 monitoring wells were sampled. DTW 12.32' to 22.89' bg. No LNAPL. Flows to east. W-1, 65,800 ppb BTEX, 456 ppb MTBE. W-2, 1 ppb BTEX, 13 ppb MTBE. W-3, 1,613 ppb BTEX, 2,010 ppb MTBE. W-4, 93 ppb BTEX, MTBE MDL. W-5, MDL. W-6, 681 ppb BTEX, 538 ppb MTBE. W-7, MDL. (RJF) 11/8/2007 - Feng - Portfolio meeting with Delta and Tyree. The system has been installed, and finally got the approval from Con Ed. The system will be started by the end of 11/2007. (RJF) 11/26/2007 - Feng - Email Paul Lindell (Delta) and Paul Hatcher (Tyree) reminding the startup of DPES due by the end of 11/2007. (RJF) 12/20/2007 - Feng - Email from R. Szcespanski (Tyree). He spoke with Con Edison and Con Edison will install the meter next week. The system shall be started within next 2 weeks. (RJF) 1/8/2008 - Feng - Email from R. Szcespanski (Tyree). The meter will be installed tomorrow. The scheduled startup of the remedial system will be on Monday, 1/14/2008. (RJF) 1/14/2008 - Feng - Site Visit and met with R. Szcespanski (Tyree). Problems encountered in startup. Tyree will troubleshoot the problems and will re-startup by this week. (RJF) 1/17/2008 - Feng - Email from R. Szcespanski (Tyree). DPES is running and samples were collected. (RJF) 1/28/2008 - Feng - Quarterly Monitoring Report, 8/2007 - 10/2007, 10/2007. Active gasline/service station. Groundwater gauged and sampled 9/24/2007. 7 monitoring wells and 4 dual phase extraction wells. DTW 12.87' to 23.52' bg. Flows to east. No LNAPL. BTEX range ND to 52,070 ppb (W-1). MTBE range ND to 543 ppb (W-6). (RJF) 3/19/2008 - Feng - eDoc Quarterly Monitoring Report 4Q2007. (RJF) 3/24/2008 - Feng - Quarterly Monitoring Report, 10/2007 - 12/2007, 1/2008. Active gasoline service station. Groundwater was gauged and sampled 12/18/2007. 7 monitoring wells. DTW 13.43' to 22.66' bg. Flows to east. No LNAPL. BTEX range ND to 37,450 ppb (W-1). MTBE range ND to 302 ppb (W-6). (RJF) 5/28/2008 - Email Tyree for dual phase system information. 7/7/2008 - 1Q2008, 1/2008 - 3/2008, 4/2008. Active gasoline service station. Groundwater was gauged and sampled 3/26/2008. 7 monitoring wells and 4 dual phase extraction wells. DTW 12.74' to 21.05' bg. Flows to east. No LNAPL. BTEX range ND to 22,300 ppb (W-1). MTBE range ND to 366 ppb (W-6). Dual phase system is on. Air phase, total BTEX before carbon 88.1 ppmv, MTBE before carbon 1.2 ppmv, total BTEX after carbon 6.31 ppmv, MTBE after carbon ND. Groundwater, total BTEX before carbon 1,010 ppb to 4,365 ppb, MTBE before carbon 93.7 ppb to 1,090 ppb, total BTEX and MTBE after carbon ND. (RJF) 9/4/2008 - Getty Proeprties portfolio meeting. 2 more wells upgradient of W-3 which has been has product will be installed. 12/2008 for work plan, installation will be in 1/2009. 10/6/2008 - Reviewed Investigation Work Plan dated 10/3/2008. Tyree proposed to

LOT 20,TAXBLOCK 2069 (Continued) **S107657287**

install 2 addtional wells. DEC provided comments via email to Tyree: 1) soil sampling and screening past groundwwater interface; 2) increase screen interval due to the depth of water. Need revision of the work plan. (RJF) 10/7/2008 - Received the revision of Investigation Work Plan dated 10/7/2008. Approved the IWP. Letter to Getty Properties. Work will be implemented by 3/20009. (RJF) 1/6/2009 - Getty Properties portfolio meeting with Delta and Tyree. 2 wells will be installed next week. (RJF) 4/13/2009 - Reviewed Subsurface Investigation Report, dated March 2009, by Tyree. On January 22, 2009, Associated Environmental Service installed 2 new monitoring wells. PID show some low level reading in both locations 0-5 feet through 15-20 feet. 4 soil samples were collected. MW-8 (5-10 feet), MW-8 (13-16 feet), MW-9 (5-8 feet) and MW-9 (10-15 feet), all ND or low level VOCs. MW-8 was installed at depth of 20 feet, with 15 feet 0.02 inch screen and 5 feet riser. MW-9 was installed at depth of 23 feet with 15 feet 0.02 inch screen and 8 feet riser. Groundwater was encountered at 13-16 feet. 2 groundwater samples were collected. MW-8, 0.69 ug/L benzene, no else exceedances of VOCs. (RJF) 4/30/2009 - Quarterly Monitoring Report, 7/2008 - 9/2008, 11/2008, by Tyree. Active gasoline service station. Groundwater was gauged and sampled 9/4/2008. 7 monitoring wells, 4 dual phase extraction wells. DTW 14.05' to 25.51' bg. Flows to east. NO LNAPL. BTEX range ND to 18,070 ppb (W-1). MTBE range ND to 284 ppb (W-6). Dual phase extraction system is on line. Air phase, 56.50 ppmv to 115.20 ppmv BTEX before carbon, ND to 3.05 ppmv after carbon, MTBE ND. Liquid phase, 107.10 ppb to 1,193.20 ppb total BTEX before carbon, 8.90 ppb to 63.10 ppb MTBE before carbon, ND to 2.03 ppb BTEX after carbon, MTBE ND after carbon. Quarterly Monitoring Report, 10/2008 - 12/2008, 12/2008, by Tyree. Active gasoline service station. Groundwater was gauged and sampled 11/21/2008. 7 monitoring wells, 4 dual phase extraction wells. DTW 13.22' to 25.26' bg. Flows to east. NO LNAPL. BTEX range ND to 15,492 ppb (W-1). MTBE range ND to 177 ppb (W-6). Dual phase extraction system is offline. The system was shut down due to carbon break through on the liquid and water. Carbon will be changed in Jan 2008. Air phase, 1.41 ppmv BTEX before carbon, 45.90 ppmv BTEX after carbon? NO MTBE. Liquid phase, 1,176.20 ppb BTEX before carbon, 43.70 ppb MTBE before carbon, 1.41 ppb BTEX after carbon, MTBE ND after carbon. email Jen Kotch (Tyree) for clarification on influent and effluent sampling data and the replacement of carbon. (RJF) 11/6/2009 - 2Q2009, 4/2009-6/2009, 9/2009, pdf, by Tyree. Active gasoline service station. 7 monitoring wells. Groundwater was gauged 4/24/2009, 5/27/2009, 6/29/2009 and 7/8/2009. NO LNAPL. DTW 13.84' to 25.06' bg. Flows to east (perched above bedrock). Groundwater was sampled 7/8/2009. BTEX range ND to 5,106 ppb (W-1). MTBE range ND to 66.3 ppb (W-1). The site was surveyed on May 28, 2009. (RJF) 2/2011 February 2011 Tyree submitted a request to the NYSDEC for approval to permanently shut down and decommission the DPHVES. Based on current concentrations it is anticipated that the current groundwater trends will continue to attenuate naturally until contaminant concentrations reach asymptotic levels. As such, Tyree, on behalf of Getty, respectfully requests closure of NYSDEC spill number 95-03535 and a status of No Further Action be granted. 2/1/2012 Getty portfolio transferred to KGH. 3/14/2013 KGH meets with Tyree/Getty to discuss remedial progress on various sites. Tyree PM Gerard Colling makes the case for closure on five of the Getty spill projects under his management. KGH agrees to review files and consider closure of select cases. 3/21/2013 KGH reviews case-file for Getty #340. 5/21/2013 -

LOT 20,TAXBLOCK 2069 (Continued) **S107657287**

Remarks:	The Department has reviewed the remedial actions taken to remedy NYSDEC spill number 95-03535 and accepts Getty's Petition for Closure. No Further Action is Required by the Department. NFA. KGH " "CONTAMINATED SOIL ORIGINAL SPILL ASSIGNED TO O'DOWD."

DEC Memo:	"Old number at the site was Spill #9208762 Remediation did NOT want to reopen the old spill so a new spill number was created. 12/9/2005 Contaminated Soil Letter sent to: Chris Calhoun West Realty 611 West 148th St New York, NY 10031 12/12/05 - Raphael Ketani. I reviewed the November 2005 Site Investigation Workplan. They need to remove soil, and properly register the 2 275 gal. tanks and the 1 5,000 gal. tank. They have a PBS case#2-218235. I will send a letter regarding these issues to Ken Brooks of Galli Engineering (631) 271-9292 and to Chris Calhoun of West Realty. 12/19/05 - Raphael Ketani. I will send a letter to Chris Calhoun stating that they have to close out the 5,000 gal. tank and register the 2 275 gal. tanks. 12/20/05 - Raphael Ketani. I reviewed the 12/20 letter from Galli discussing the planned use of a soil injected oxygenate (ORC) to remediate the #2 fuel contamination. I will send a letter stating that they can try the ORC, but DEC wont approve this means of removing the contamination. If the contamination is still above TAGM 4046, then they may possibly have to remove more soil. They also have to try and remove free product and test the fill and vent lines, and check to see if the petrometer and return line are alright. 1/5/06 - Raphael Ketani. Mr. Brooks called me up to say that, at this time, he had no plans to remove soil. He said they will install wells first to check the groundwater. Then they will remove some of the contaminaed soil and take end point samples. He expects work to start 1/16/06, tentatively. Lastly, he said that the owners of the property intend to use the 5,000 gal. tank. 07/18/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. Contacted to Mr. Scott Davidale, Gallon Engineering at (631)271-9292 he said that work is still going on at the site. He will fax me the groundwater sampling report. -QA 07/28/06: Contacted to Mr. Scott Davidale he said they are still doing work at the site. Project Manager is coming on July 31st. As soon as everything will be done Mr. Scott said he will send report to me for closing the spill. -QA 08/18/06: Contacted to Mr. Ken Brook

COMMERCIAL BUILDING (Continued) **S103517643**

(Project Manager) he said that as soon as report will be ready he will send it to me. -QA 09/06/06: Called Mr. Ken Brook he said that he has not removed any soil and also he has not taken any soil sample. -QA 09/25/06: This spill will be reassigned. -QA 9/25/06: This spill case was transferred from Q. Abidi to J.A. Maisonave. - JAM 10/6/06: Bioremediation Work Plan was reviewed by the Department on 9/18/06. Kevin Carpenter in Albany provided me with some of his comments. I will write a letter to the Respondent requesting addition information. - JAM 10/19/06: Sent a letter to Mr. Nick DeAcetis MDG Design & Construction, Inc. 1328 New York Avenue Huntington Station, NY 11746 Letter requests additional information on proposed Bioremediation Work Plan. Letter states that the proposed Work Plan lacks adequate supporting data and the site investigation is incomplete. The letter will be in edocs. - JAM 11/1/06 Spoke to Ken Brooks at Galli Engineers (631-271-9292). Galli will perform bench tests to determine if non-native bacteria is needed, determine groundwater flow direction, and verify if the existing wells are properly installed and straddle the water table. - JAM 02/09/07 Reviewed Bioremediation Work Plan from Galli, dated January 4, 2007 and received January 23, 2007. I sent an email response only approving Galli's proposals to: 1) perform a Bioremediation Pilot Test for the above referenced site to determine proper dosage amounts of the Biosolve NT and ORC products; 2) prepare the site by removing surface debris for the basement floor; 3) use a rototiller to break up surface soils and to level out the surface area; 4) evacuate the wells of floating product; 5) survey, gauge and sample the monitoring wells to determine groundwater flow direction and current groundwater quality. A comprehensive report should be submitted after the completion of the above tasks. The report should present a detailed remedial action plan, and should include groundwater gauging and sampling data (depth to water/ depth to product), a site location map showing surrounding properties, a site plan showing groundwater flow direction based on groundwater gauging data, and a site plan showing the contamination plume. The report should also include all chemical dosages. - JAM 03/14/07 Received a call from Ken Brooks from Galli. He said they went to the site to survey and sample the wells but found that all the wells in the basement were destroyed due to construction activities. There are three remaining wells outside the basement that are still intact but he wanted to hold off on surveying them until the wells in the basement are replaced. He said they will gather samples today for the bench/pilot tests and he should have results in about 2 weeks. The wells will be replaced at that time as well. - JAM 4/16/07 Spoke to Ken Brooks. The bioremediation bench test was completed by Regenesis and the results were good using a combination of two products. Ken said he will put together a package with the results and include a description about the injection process. - JAM 5/9/07 Reviewed the letter submitted by Galli dated April 16, 2007 which includes results from the pilot study performed by Micro-Bac (not Regenesis as stated above). The letter also includes remedial tasks for injecting a bacterica-nutrient mixture to address contamination. Tasks inlcude: - Attempt to locate remaining wells - Evacuate any remaining wells - Mix bacteria and nutrients as per the manufacturer's directions - inject the resulting solution using steel tubing and a positive dispplacement pump at 0.7gpm. Repeat throughout the affected area every 1 to 1.5 feet, and as deep as possible. I sent a letter today approving these tasks. Subsequent to the injections, monitoring wells must be installed in the basement

COMMERCIAL BUILDING (Continued) **S103517643**

to evaluate the remedial strategy effectiveness. During installation, soil should be screened with a PID and sampled at the deepest dry soil sample and at the interval with the highest PID reading. Samples should be analyzed for VOCs and SVOCs. After the wells installed, groundwater samples should be collected and continue on a quarterly schedule. The letter I sent and the letter from Galli are uploaded to edocs. - JAM 07/13/07 I visited the site today to witness the bacteria/nutrient injection for the enhanced bioremediation. Ken Brooks from Galli injected approximately 250 gallons of the mixture through a 6 foot length of stainless steel tubing. Only three wells were located, MW-02, MW-04 and MW-06. Mr. Brooks said that a second injection will occur in a few weeks. I requested that before the second injection, the remaining wells be gauged and sampled and if product is present it should be evacuated. The tank area and the tank itself have staining and show signs of petroleum contamination. I requested that they be cleaned. - JAM 7/23/07 Sent a Site Visit Follow-up Letter, based on observations from the July 13 site visit, to Mr. Nick DeAcetis at the address above. The letter states that the fuel oil tank and the surrounding area have visible petroleum impacts. The DEC requests the following: 1) The tank should undergo tightness testing; 2) The tank and surrounding area should be cleaned; 3) Contaminated soil should be excavated and end-point samples should be collected. The DEC also recommends that a concrete floor be poured around the tank; 4) Groundwater monitoring wells should be installed in the basement. A work plan with proposed well locations should be submitted for DEC approval. Also, corrections should be made to PBS registration. Tank location and product info are inaccurate. I sent PBS Application Form along with this letter, which in edocs. - JAM 4/28/08 Visited the site today to witness the second application of the bactreia/nutrient slurry injection. The concrete casing around the tank has been removed, however no soil was excavated from around the tank and alot of oil staining on the walls around the tank and on the tank remains. Pictures loaded to edocs. - JAM 8/5/08 Reviewed an Additional Site Investigation Work Plan letter dated July 28, 2008, submitted by Galli Engineering, P.C. The work plan proposes installing five (5) replacement monitoring wells in the basement of the above referenced site adjacent to the existing 5,000-gallon storage tank. Work plan uploaded to eDocs. I issued a letter today approving the work plan with the following adjustments: 1)Soil should be continuously screened using a PID meter and two soil samples should be collected, for laboratory analysis from each boring, one from the soil interval with the highest PID reading and another from the interval directly above the water table. If PID readings are non-detect then one sample from directly above the water should be collected and analyzed for the full TAGM 4046 list of petroleum related VOCs. 2)As stated in the NYSDEC letter dated July 23, 2007, The ceiling and walls of the tank area should be cleaned and contaminated soil around the tank should be excavated and end-point samples should be collected for laboratory analysis prior to backfilling. The NYSDEC recommends that a new concrete floor be poured around the tank when remediation is complete to prevent future releases of oil into the subsurface. A summary report should be submitted with recommendations. Letter uploaded to eDocs. - JAM 9/5/08 Visited the site to witness groundwater sampling. Scott Davidow from Galli sampled the five new wells. One well had free product, and another well was dry. Each well yield very little water so sampling for SVOCs may not be possible. A summary report including

COMMERCIAL BUILDING (Continued) **S103517643**

soil and groundwater samples and well installation logs will be submitted in 2 weeks. - JAM 11/19/08 Reviewed the Monitoring Well Installation and Groundwater and Soil Sampling Report submitted by Galli Engineering dated October 8, 2008. The report summarizes the installation of 5 new groundwater monitoring wells in the basement and results of soil samples collected during installation. Subsequent groundwater sampling results are also included. On August 22, 2008, five monitoring wells were intalled at the site. Groundwater was encountered at 8 feet below grade. Soil samples were collected from each boring and results showed no exceedences for VOCs, however some exceedences for SVOCs were reported and visibly stained soil and product was obersved in every boring. Groundwater monitoring samples were collected on September 10, 2008 from all wells and analyzed for VOCs except for well MW-1 because of the presence of free product. Free product was also observed in MW-8 initially but was gone after the well was purged. SVOCs were only analyzed from wells MW-2 and MW-8. The other wells did not yield enough water. Minor VOC contamination was detected in wells MW-2 MW-8 and MW-10. Minor SVOC contamination was deteced in MW-8. The report is uploaded to eDocs. Spoke with Scott Davidow from Galli and scheduled a meeting for tomrrow between DEC and Galli to discuss future remedial measures. - JAM 11/20/08 Meeting at DEC Region 2 office. Attendence: Joseph Maisonave, NYSDEC Jon Kolleeny, NYSDEC Ken Brooks, Galli Gary Blackler, Metro Environmental Gary Hughes, Metro Environmental Discussed alternative remedialy measures to address free product present in two monitoring wells and free product observed in the vadose zone of all of the other wells during installation. Galli will evaluate whether 2 inch wells could be installed in place of the 1 inch wells already installed and if the borings can go deeper. This would allow enhanced fluid recovery with a vac truck to remove the product. They will also look into cleaning the tank room with a solvent and painting the tank and the walls. A remedail proposal will be submitted by Galli for NYSDEC review and approval. - JAM 1/21/09 Reviewed the Site Remedial Action Workplan submitted by Galli dated January 16, 2009. The work plan proposes the following remedial activities: 1. Removal of part or all of the block wall forming the tank room. 2. Removal of soil from the basement floor. 3. Further cleaning of the exterior of the tank, and the tank room. 4. Removal of debris from around the tank. 5. One-time application of bacterial bioremediation nutrients. 6. Stockpiling soils and debris in a roll-off container. 7. Sample soils for disposal purposes. 8. Backfilling the excavation with clean fill. 9. Install three new 2-inch groudnwater recovery wells to a depth of 10 feet. 10. Vacuuming out floating product from the wells and dispose of waste water. There will aos be 4 new groundwater monitoring wells installed in the room adjacent to the tank (shown on Figure 1 of this workplan. Scott Davidow at Galli called me on Friday, Jaunary 16. He informed me that the wall has been removed and the basment floor is being excavated. I informed him that end-point soil samples should be collected and I should be notified prior to the collection of those samples and prior to backfilling the excavation. He will notify me when Galli goes to collect the samples. I aslo suggested that the excavation remain open until the results are returned. I also suggested that Galli contact the vendor providing the bonutrients and inquire about the effectiveness of their product based on the conditions at this site. The workplan is uploaded to eDocs.- JAM 1/26/09 Visited the site today to witness the excavation around the

COMMERCIAL BUILDING (Continued) **S103517643**

tank. Chris Calhoun from West Realty (property owner, email: westrealtygroup@hotmail.com) and Scott Davidow from Galli Engineering attended. Soil around the tank, and from the two adjacent rooms had been excavated to depths ranging from 1 to 3 feet. Soil directly under the tank could not be removed and was stained with oil. Galli collected 2 soil samples, one from directly under the tank and another from the adjacent room, approx. 7 to 10 feet from the tank. I advised Galli that the soil under the tank should be removed by any means possible. I suggested either supporting the tank so the soil could be removed or temporarily relocating the tank so the soil could be accessed. He will get back to me with Galli's proposal. - JAM 3/9/09 Received soil analytical results on March 5, 2009 via email. Two soil samples were collected from the basement floor on January 26, 2009. Some VOCs and SVOCs were detected however the concentrations were below TAGM. I sent an email today stating that the excavation could be backfilled and the tank stabilized. The Remedial Action Workplan should proceed as planned with the installation of 2-inch groundwater monitoring wells. I requested a report be submitted after the wells installed which summarizes all analytical results. - JAM 4/22/09 Received a call from Scott Davidow at Galli Engineering. He said that the tank was suspended and contaminated soil beneath it was removed. I met with Scott Davidow at the site today to witness the open excavation. Three rolloff containers have been filled with oil contaminated soil and the forth container is half full. The bottom of the excavation showed a little product floating on water which entered the excavation. I requested that the excavation extend in all directions as much as possible and end-point samples should be collected for VOC and SVOC analysis. I also requested the groundwater monitoring wells be gauged for product and sampled as well. I expect a report within a few weeks. - JAM 7/28/09 Received a Summary Report of Spill Closure Activities however, it did not include a table summarizing gauging data and product recovery. I called Ken Brooks and requested the report be revised to include that table. - JAM 9/2/09 Visited the site today. Met with Frank Gehrling from Galli and Allan Heussinger from West River Assciates, LLC (RP). Frank gauged the product in wells MW-1, RW-1, RW-2 and RW-3. Petroleum absorbent socks are installed in wells RW-1, RW-2 and RW-3. wells RW-1, RW-2 and MW-1 had the most measurable product. Well RW-3 only had some slight staining from a sheen. I suggested that vacuum enhanced fluid recovery be implemented to expedite free product recovery. Frank said he will look into it and get pricing and try to schedule it for next week. I also requested a table summarizing the product gauging and recovery data. Ken Brooks from Galli called. I explained to him that spill closure is not possible while free product continues to enter those three wells. Vacuum recovery is one way to move this spill towards closure sooner. - JAM 9/9/09 VEFR performed today. Vac-truck was on-site and recovering by 8:30am. I visited the site and met with Frank Gehrling and Allan Heussinger. A summary report will follow. - JAM 9/25/09 Received the Revised Summary Report dated September 17, 2009 (original Summary Report was dated July 28 but did not include product gauging and recovery data). The Summary Report includes all remedial work performed to date including excavation of contaminated soil, groundwater sampling results since February 2006 and soil sampling results from well installation and the excavation end-points. Approx. 45 tons of contaminated soil were excavated and disposed of. Minimal dissolved phase contamination has been detected

COMMERCIAL BUILDING (Continued) **S103517643**

in any GW samples. Soil samples also show minimal contamination. Section 5.1 shows Free Product Recovery data since February 2006. Well MW-1, which is a 1-inch well installed adjacent to the tank, has yielded the most free product (measuring approx. 0.76ft. on Sept 2, 2009. Five wells, MW-1, MW-8, Rw-1, RW-2, and RW-3, continue to show either measurable floating product or product sheens. Reviewed the Letter Report for Product Recovery dated 9/10/09. On 9/9/09, vacuum enhanced fluid recovery was performed on wells MW-1, MW-8, RW-1, RW-2, and RW-3. 200 gallons of oil/water mixture was removed from the site and an estimated 1 to 2 gallons of that was oil. MW-1 had the most measurable oil with a thickness of 0.49ft. After VEFR was performed, the thicknesses in all the wells were either trace product or a product sheen. Petroleum absorbent socks were installed in the wells. Reviewed the Letter Report for Product Recovery dated 9/17/09. On 9/16/09, wells MW-1, MW-8, RW-1, RW-2, and RW-3 were gauged for product and the product was removed with a hand bailer and petroleum absorbent socks. MW-1 had only a trace of oil and wells RW-1 and RW-3 had strong sewage odors. Well RW-2 was dry. Galli states that the sewage which appeares to be in the two wells is negatively affecting the hydrophobic properties of the petroleum absorbent socks. In the original Summary Report cover letter dated July 28, 2009, Galli says the walls and ceiling of the tank room will be grit blasted to clean the petroleum stains. This being a dry process will keep any liquid from recontaminating beneath the tank. Galli requests spill closure. I spoke with Ken Brooks from Galli on Sept. 22, 2009 and said that the spill cannot be closed at this time since there is still product in a number of wells. Monitoring should continue until the product is removed. All reports were uploaded to eDocs. - JAM 6/1/10 Spoke to Brandon Fuld from Galli Engineering today. He said that there are several wells on-site that have been used for product recovery and the product levels in those wells has decreased to a sheen. The product recovery was done with a vacuum truck and the last event was in April 2010. I asked for a summary report for all of the work that has been performed. Brandon will submit the report by the end of this week or early next week. - JAM 10/20/10 Email correspondence from Ken Brooks at Galli on October 4, 2010: Joe- When we spoke on 9/22, you mentioned a couple changes you wanted to see in the letter and report. I jotted a few of those down, but was expecting comments in writing. If you won t be sending a letter, please email me with the requested changes. I know you wanted cleaner copies of the well logs, with units; well designations; anything else? Ken Brooks, PE Senior Vice President Galli Engineering, PC 734 Walt Whitman Rd., Suite 402A Melville, NY 11747

Reply sent to K. Brooks on October 7, 2010 Ken, Please also submit a Site Figure with clear designations for the wells. Please do not submit a site figure that has hand-written items. Thanks, Joseph Maisonave Environmental Engineer 1 NYSDEC Region 2 Division of Environmental Remediation 12/02/10: This spill case transferred from J. Maisonave to J. Kolleeny. On 11/30/10, received hard copy of Rpt of Remedial Actions by Galli Engineering, P.C., dated 11/24/10. Rpt summarizes remedial actions performed at site, and provides data fof vac truck events from Oct. 2009 thru July 2010, showing generally decreasing product thicknesses. Rpt requests spill closure. On 12/2/10, I contacted Ken Brooks of Galli, requested pdf file of rpt for eDocs, and asked if well gauging measurements for vac truck events were taken before or after vacuuming wells. He was unsure

COMMERCIAL BUILDING (Continued) **S103517643**

about this, said he would send pdf file of rpt and get back to me about well gauging data. - J. Kolleeny 01/03/11: Received email from Ken Brooks of Galli Engrg: Do you have everything you need to review our closure request on spill? I sent email reply: Hi Ken, According to my notes, I spoke with you on Dec. 2, 2010 and asked that you send a pdf file of Galli's Nov. 24, 2010 Rpt of Remedial Actions for our database, and I also asked if you would find out if well gauging data in rpt represented measurements taken before or after vacuuming of wells. I have not yet received pdf file of rpt, or an answer to my question about well gauging data. Also, as I said when we spoke, it is contrary to DEC policy to close spills when there is measurable free product present in wells. Last monitoring data, from July 2010, showed 0.10 feet of product (more than an inch) in well MW-1 (1 diameter well), and 0.07 ft of product (little less than an inch) in recovery well RW-4 (4 diameter well). Tolerable levels Galli rpt cited from DEC's Spill Guidance Manual all refer to levels of dissolved-phase GW contamination; I see no reference there to tolerable levels of free product. On other hand, DEC's Guidelines for Petroleum Spill Inactivation state that free product should be removed to maximum extent feasible. Gauging data in rpt show more or less steady progress in reducing product thicknesses from Dec. 2009 thru July 2010, as result of vacuum truck events; they do not, in my opinion, represent a dead-end situation. I recognize that a lot of work has been done at this site, and I too would like to see this spill case closed. If you could do following, it would help me greatly in achieving this end: 1. Please send pdf file of rpt. 2. Please confirm whether well gauging data was collected before or after vacuuming. 3. Please gauge wells again to determine current product thicknesses; if there is significant measurable product in any well (0.08 ft or more in 1 diameter well, or 0.05 ft or more in 4 diameter well), conduct another vacuum truck event and then re-gauge well(s) after allowing water and product to fully recharge into well(s) and reach equilibrium, and send me data. - J. Kolleeny 02/16/11: On 2/11/11, received email from Ken Brooks of Galli Engrg: Do you have everything you need to review our closure request on spill? I sent email reply stating that I had sent email regarding site on 1/3/11, and attached said email. On 2/14/11, received response from Ken: That s last email I have, and one that I expect should have been responded to by now. I m assuming you did not and will look into this. On 2/16/11, received email from Ken: I ve attached pdf of final rpt as you requested [in eDocs]. In answer to your question, wells were always gauged before vaccing them out. I will contact client about setting up another round of gauging and product removal and will contact you with updates. - J. Kolleeny 04/08/11: Reviewed letter rpt presenting results of gauging of 4 wells and liquid removal at site, prepared by Galli Engineering and dated 4/5/11 (in eDocs). Data show product in wells has decreased to trace or non-measurable levels; following gauging, approx. 63 gallons of liquid were removed from wells. Based on data, I closed spill and sent spill closure letter (in eDocs) to Allan Heussinger of West Realty Group, 875 St. Nicholas Ave., #1, NY, NY 10032, cc to Ken Brooks of Galli Engineering. - J. Kolleeny "

Remarks: "PHSE TESTS WERE TAKEN AND THEY FOUND PETROLEUM CONTAMINATION UNDERNEATH THE TANK, OUTSIDE FILL PIPE, AND THE GROUND IS STAINED. GROUNDWATER WAS ALSO TESTED AND PROVED THAT THE WATER IS CONTAMINATED."

DEC Memo:	"12/03/07-I spoke with Ms. Erika George on 12/01/07, she said the building had an oil delivery on 11/30/07 afternoon and since then there is smell of oil everywhere, strong in hallway.She called 911 and FD responded.DEP Hazmat also responded.She lives on 3rd floor.She has a 16 months old baby.I called land lord Mr.Gordon(718.379.6818)and told him to get some body to clean up the spill. He said he would do that. About 1/2 hour later, I called him again and asked him if he has hired anybody to do the clean up. He said that he called the oil company.I responded to the site and inspected the building. This is a three family attached house.275 gallon AST in the basement. Two crews arrived from the oil company 'Schildwatcher'.We all together went to the basement.Entrance from first floor to the basement was open, therefore smell was strong on the first floor.Apparently, connecting point of fill line to the tank leaked and spilled while delivering oil to the tank.Spill was on the concrete floor.There are numerous debris on the floor which were oil soaked. Sump pump was not affected.Schildwatcher used absorbent to dry the floor and also used deodorizer to supress the odor.later on, I received another messege from Andrew Schildwatcher confirming that service tech will fix/replace the fill line soon.(SR) 12/07/07 I spoke with tenant Ms. Erika george, she said that there is still some odor of oil in the hallway. I called Andrew Schildwatcher and they have n't fixed the fill line yet, will do that soon and will recover the oil soaked absorbent sand from the basement floor.A report will be sent to DEC.(SR) 02/22/08 I spoke with land lord Mr. Gordon, who told me that the pipe leading to the tank was fixed, floor spill cleaned with absorbent sand, floor is dry now,no odor exist in the basement.Spill closed(sr)."
Remarks:	"Unknown quantity of oil in basement. DEP HazMat responding."

Spiller Company:	001
Contact Name:	RICHARD WETHERBEE
DEC Memo:	"09-15-05: JK contacted by Drew Lent of NYC School Construction Authority, who said this is a school construction site. Lent said some free product was observed on the water table, he requested a meeting with DEC, SCA and their consultant, the Louis Berger Group, to discuss situation. JK set up meeting for 9/20/05 at 2 p.m. - J. Kolleeny 09/20/05: Met with NYCSCA and consultant, LBG. SCA plans to build a school on the site. During construction activities, an unusual ceramic container that may have held petroleum was discovered, in addition to petroleum-contaminated soil and

CONSTRUCTION SITE -NYCSCA (Continued) **S107408900**

indications of a minor groundwater impact. I requested additional soil and groundwater sampling, as well as soil gas sampling (if feasible) to characterize and delineate contamination. - J. Kolleeny 02/28/06: Spoke with Drew Lent and Lee Guterman of NYCSCA. Their consultant, Louis Berger Group, has performed additional investigation at the site and prepared a report. Lee is doing final review of report and should send it to me next week (week of 3/6/06). - J. Kolleeny 06/09/06: Received hard copy of Remedial Investigation Report from SCA, prepared by Louis Berger Group and dated February 9, 2006; will review. - JK 09/28/06: Completed my review of Remedial Investigation Report (electronic version in eDocs); report states that 2,700 cubic yards of petroleum-contaminated soil were excavated and removed from source areas (ceramic container and UST) on western portion of site, which was excavated to a depth of 11 feet bgs. Excavation didn't extend beneath former building on eastern portion of site, where soil did not exhibit impacts. 34 post-excavation samples were collected from bottom and sidewalls; results showed no VOC exceedances of TAGM, but some SVOC exceedances, which could be attributable to fill materials. Eastern portion of site was excavated to 6 feet bgs during investigation, and to 10 feet prior to construction of new school. GW samples were collected from 2 temporary wells on western portion of site; results showed exceedances for only MTBE, with 21 ppb in TW-1 and 390 ppb in TW-2. Two soil gas samples were collected from eastern portion of site, where school was later built, as I had requested. Results showed detections of toluene, ethylbenzene and xylene above NYSDOH background levels, with toluene at 2,400 ug/m3 in SG-02. Report recommended NFA for soil and groundwater, and recommended installing a gas vapor barrier beneath foundation of proposed school. An SCA cover letter dated June 8, 2006 which accompanied the report stated that the vapor barrier had been installed and the school has been built (it is not yet in use). I discussed report with Koon Tang, who was concerned about soil gas results and suggested forwarding report to Geoffrey Laccetti of NYSDOH for review. I forwarded electronic copy of report to Koon, who forwarded it to GL. - J. Kolleeny 11/14/06: Having received no response from NYSDOH, Koon Tang contacted Geoff Laccetti, who said he had never received the report. I tried to email it to him, but got message saying it exceeded maximum message size set by administrator. I created an abridged version of report, without lab data sheets, chain of custody forms, etc., and emailed it again to GL. - JK 11/17/06: Sent email to Geoff Laccetti of DOH asking him to confirm receipt of abridged report I sent on 11/14/06; he sent reply saying he had received it and forwarded it to Charlotte Bethoney, who will be project manager for the site. - J. Kolleeny 01/24/07: Received email from Drew Lent of SCA with attached e-copy of Indoor Air Sampling Work Plan report dated 1/24/07 prepared by Louis Berger & Assoc., P.C.(in eDocs), sent to me and Charlotte Bethoney, apparently at Charlotte's request. Drew's email requested review within 2 weeks. - J. Kolleeny 1/26/07: Received hard copy of Berger's Indoor Air Sampling Workplan, will review. - JK 2/12/07: Received letter from Charlotte Bethoney of NYSDOH reviewing Indoor Air Sampling Workplan (in eDocs), with 3 main comments: report erroneously states that CB of DOH requested air sampling to fulfill requirements for spill closure ; air samples should be analyzed for tetrachloroethene in addition to benzene, toluene, ethylbenzene and m- and p-xylenes, as report states; building heating system should be operated for minimum of 24 hours

CONSTRUCTION SITE -NYCSCA (Continued) **S107408900**

prior to sampling event, all petroleum-fueled space heaters should be removed. Forwarded letter as pdf to Drew Lent of SCA. - J. Kolleeny 02/15/07: Prepared letter approving Indoor Air Sampling Workplan prepared by Berger & Assoc., dated Jan. 24, 2007, incorporating comments by Charlotte Bethoney of NYSDOH. Had Vadim Brevdo and Amar Nagi of Region 2 DER review letter, and sent draft to Ms. Bethoney; all gave OK to issue letter. Sent letter (in eDocs) by email to Lee Guterman of NYCSCA, copying Drew Lent of SCA, Geoff Lacetti and Ms. Bethoney of DOH, and mailed letter to Ms. Guterman. - J. Kolleeny 05/25/07: Received Indoor Air Quality Survey report by Louis Berger Group, dated 5/8/07 (in eDocs); samples found no detections of tetrachloroethene, and low detections of petroleum-related VOCs within background levels listed in NYSDOH Soil Vapor Guidance Memo, except for marginal exceedances for m,p-xylene at two locations and ethylbenzene at background ambient air sampling location; xylene detections may be attributed to recent painting activities in area of samples. Report concludes that soil vapor intrusion is not a concern for site building, and recommends closure of petroleum spill case. Report was also sent to Charlotte Bethoney of NYSDOH. I will await her review. - JK 06/27/07: Received review letter dated 6/20/07 from Charlotte Bethoney of DOH on 6/25/07. Letter makes two comments: (1) Lab data sheets in report indicate data is preliminary, not final - please provide final validated data; (2) Lab analyzed samples for total xylenes, but report text refers to m,p-xylenes, so comparisons of data to m,p-xylene background levels is in error, comparisons and conclusions should be based on total xylene background levels. I forwarded letter by email to Drew Lent of NYCSCA on 6/27/07, he called and said report would be revised and re-issued. - J. Kolleeny 06/28/07: Received electronic version of revised Indoor Air Quality Survey Report dated 6/28/07 by Louis Berger Group, from Drew Lent of SCA (in eDocs). Report has finalized lab data, with no changes from preliminary data. Also, report references total xylene concentrations as requested by Charlotte Bethoney. Report concludes (again) that soil vapor intrusion into the school building is not a concern. Will await response from DOH. - JK 08/08/07: On 8/7/07, received letter from Charlotte Bethoney of NYSDOH commenting on Final Indoor Air Quality Survey Report (in eDocs). Letter states that, based on removal of contaminant source area, installation of vapor barrier beneath new school building, and results of indoor air quality investigation, exposures via soil vapor intrusion are not expected. Discussed with my supervisor, Vadim Brevdo, and agreed that based on remedial actions performed and indoor air survey results, spill closure is appropriate. On 8/8/07 I sent NFA letter (in eDocs) to Lee Guterman of NYCSCA, cc's to Drew Lent of SCA, Charlotte Bethoney of NYSDOH. - J. Kolleeny "

Remarks: "2200 yards of contaminated material have been removed since April. Old oil lines found in the ground during an excavation. Believe groundwater was affected. Clean up is still ongoing."

SERVICE BOX # 22136 (Continued) **S106736475**

found approx. 5 gallons of antifreeze mixed with approx. 10 gallons of water. He goes on to say that it has a strong odor of antifreeze. The source of the spill is not known at this time there is no oil filled equipment in the structure. No sewer connection. Yellow tag 41958 has been placed. Chain Of Custody DD13728. Update 12-29-04 @ 21:48 Lab Sequence Number: 04-10818-001 PCBs < 1.0 ppm 12/30/04 15:34 Received lab results Lab Sequence Number: 04-10819-001 Propylene Glycol < 60.8 ppm EPA 8015 Ethylene Glycol 164 ppm EPA 8015 Update: 2/15/05 Manhattan Environmental Desk made arrangements with Allstate PowerVac to clean this structure on 2/3/05. R. Pellegrino #38620 Update: 2/15/05 @ 14:46 hrs. Eddie Cox #18594, Oper. Supervisor UG North reported at 13:08 hrs. on 2/3/05 that the cleanup was completed. No solids were removed from the service box. Approx. 150 gallons of water and antifreeze mix was removed from the structure by the Vactor truck from Allstate PowerVac. The structure was double washed with Citrus Clean solvent. Environmental Tag #41958 was removed. The cleanup crew was from Allstate. Mr. Cox stated that there was no visible sign of the source of the spill. The cleanup was completed by Allstate on 2/3/05 at 13:00 hours. R. Pellegrino #38620"

Remarks: "IN PROCESS OF BEING CLEANED UP. CONTAINED IN SERVICE BOX."

DEC Memo:	"5/20/16 - Ahmed - Spoke to Betty at Petro (718-628-3339). As per her, Petro service tech was there today and observed a line is leaking on concrete in the basement and there is a sump pump. Called City Tabernacle Church (212-234-5630) and left a message requesting call back. 5/21/16- Ahmed - Called City Tabernacle Church again and left a message requesting call back. Called DEC Demeo and requested to respond there to get the clear picture as the church is not calling back. 5/21/16 TJD Recall - site inspection. Met onsite with custodian (Patrick Wallcott 347.678.5261) at City Tabernacle Church. Spill due to leaking union on aboveground 1/2 inch suction line in boiler pit of basement mechanical room. At time of inspection, an estimated less than 5 gallons of product was observed to be floating on standing water. Leak was stopped the previous evening by technician from Petro Oil. Cleanup pending the arrival of Milro Associates. Church representative informed DEC that the work was scheduled for Monday 5/23/16. As leak has been stopped with no significant odors interior to the structure, DEC advised building staff to contractor and schedule cleanup earlier if possible. All product contained in concrete boiler pit. Water bottom present - sump

BOILER ROOM (Continued) **S118704825**

pump was unplugged pending completion of cleanup. Spoke with Dot Napoli at Milro Associates. Confirmed initial cleanup was performed by Milro on 5/21/16. Contractor is returning to site for final cleanup. 2/9/17 TJD File review - closure report submitted by Milro Associates. As per above notes the spill was caused by leaking suction line, associated with a 1,200 gallon AST. Leaking line was repaired by Petro Oil. As part of remedial efforts Milro removed 350 pounds of contaminated debris and recovered 80 gallons of oily water. Based upon the nature of reported event, a 5 gallon spill and the documented contractor activity to remediate the spill there is no further action required at this time. Spill file is administratively closed. All documentation has been uploaded to DECDOCS."

Remarks: "spill is not contained and clean up is pending"

DEC Memo:	"e2mis 156621 Sean Henihan #16850, #9, reported at 15:57 hrs. that he found approx. 2 pints of possible antifreeze and 1 gallon of water in service box SB24716 located in front 1592 Amsterdam Ave & West 138th Street. The source of the antifreeze is an Auto Body Shop adjacent to the service box and the cause is unknown. This is a possible third party spill. There was no fire involved, but there was smoke involved due to the burnouts in the structure. There was no sewer or waterway affected. There were no injuries related to the spill and no weather conditions contributed to the hazards of the spill. No private property was affected. There is no oil filled equipment in the structure, no sewer connection, no concrete sump, no visual water movement, no sump pump and no substantial cracks. There is standing water but no movement of the water. Liquid samples will be taken on a priority E basis from the spill by Sean Henihan #16850 for PCB and ID for antifeeze. No initial cleanup action was taken. Cleanup is pending lab results since a vendor may have to perform the cleanup. Update: 12/16/04 @ 17:33 hrs. Sean Henihan #16850 reported at 17:30 hrs. that he installed Environmental Spill Tag #00663 and issued Chain of Custody #AA21643 for the samples. Dec. 17. 2004 Lab Sequence Number: 04-10489-001 MATRIX: LIQUID GRAB Antifreeze Contamination Present Update: 2/15/05 Manhattan Environmental Desk made arrangements with Allstate PowerVac to clean this structure on 2/3/05. >>>>INSERT 2/15/05 >>>>>>>> Eddie Cox #18594, Operating Supervisor UG North, reported at 09:30 hrs. on 2/3/05 that this service box is in front of an autoparts store. He stated that this is the possible source of the antifreeze. Update: 2/15/05 @ 16:29 hrs. Eddie Cox #18594, Oper. Supervisor UG North, reported at 11:38 hrs. on 2/3/05 that the cleanup was completed. No solids were removed. Approx. 100 gallons of water and antifreeze mixed was removed by the Vactor truck from Allstate PowerVac. The structure was double washed with Citrus Clean. The cleanup was performed by Allstate PowerVac. Environmental tag #00663 was removed. The source of the spill was identified as possibly the autoparts store in front of the service box. The cleanup was completed at 10:45 hours on 2/3/05."
Remarks:	"2 PINTS OF MATERIAL ON A GALLON OF WATER. MATERIAL IS ALL CONTAINED IN A MANHOLE # 24716. SOURCE IS BELIEVED TO BE FROM AN AUTOBODY SHOP.

DEC Memo:	"1/2/2014 - Received a call from Nicole Willis, the tenant of the

APARTMENT BUILDING (Continued) **S116155838**

apartment building. She said that there was a spill occured on 11/4/2013, and she smelled some petroleum odor in her basement apartment. She worried that the cleanup was not done sufficient and had concern about her health. J. Vought and J. Feng Called the home owner, Erol Kekic (917-375-3087). The spill was an overfill, about 3-5 gallons. The oil company, South Carolina (212-234-5900) put down the absorbent pad and recovered. He washed the tank with dish detergent 3 times. There are (2) 275-gallon tanks. The 3-5 gallons came out from the petrometer. DEC K. Patel to do the site visit. Called Ms. Willis to inform her that DEC will conduct site visit and if at request, DOH will be notified. 01/02/14-Hiralkumar Patel. 2:00 PM:- visited site. met Mr. Kekic. it is three story building, with basement. there are two (2) 275 gal ASTs, on legs, in basement. one tank is located under front stair to 2nd floor. the other tank is located along southern foundation wall. Mr. Kekic mentioned that small amount of oil spilled from a loose gauge on tank which is along the foundation wall. most of oil spilled onto tank itself. spill was cleaned up immediately. after cleaning impacted areas on tank and basement floor, he washed basement floor couple of times and applied deodorizer. found deodorizer powder on basement floor. basement floor was found in good condition. found small area of oil film on tank top, around fill line connection to tank along southern foundation wall. asked Mr. Kekic to clean oil film on tank top. no petroleum odors noted in basement. no signs of spill noted from tanks' bottom. asked Mr. Kekic to either repair leaking gauge immediately or seal the fill port to prevent another spill event. also suggested him to change oil tanks, as found corrosion on tanks and tanks are more than 20 years old. inspected Ms. Willis's apartment. no petroleum odors noted in her apartment. Ms. Willis reported spill incident as never got update regarding spill cleanup. showed her pictures taken in basement. based on observations during the site visit, case closed."

DEC Memo:	"6/17/2016: Rashad Leak has been clamped and is estimated to be 100 gallons. This was found while searching for larger leak occurring on M52 (spill#1602673, EMIS 246486). Initial observation from EMIS: During leak search efforts for the Leak Declared on M52 on 6/16/16, reported under EMIS 246486, crews discovered 100 gals of dielectric fluid in the excavation along the Harlem River Drive. The leak was clamped at 01:26. A large quantity of oil was later discovered in a tunnel beneath the West 49th Street Substation. During the 07:00 Dielectric Fluid Leak Committee Conference Call it was decided to generate a separate EMIS and report for the oil discovered along the Harlem River Drive. Spill assigned to DEC Patel for follow up. EMIS 246487. 06/29/16-Hiralkumar Patel. 12:10 PM:- spoke with Tom Enrigh at ERT inquiring updates. he mentioned that leak is found in area of Harlem River Drive near exit for 155th Street where ConEd is upgrading M52 line. a permanent barrel has been installed and soil remediation will occur as part of upgrade project. 3:01 PM:- spoke with Tom and asked to submit updated emis report. 06/30/16-Hiralkumar Patel. received email from ERT (at 5:20 PM on 06/29/16) including updated emis report. 09/01/16-Hiralkumar Patel. 12:45 PM:- received email from Masood Hasmi from ConEd including cleanup summary, site map and sample results. endpoint samples were collected from east and west sidewalls. no samples were collected from excavation bottom as bedrock encountered in bottom. no endpoint samples from north and south sidewalls as it constitute of open space as part of the pipe enhancement program. case closed based on available information."
Remarks:	"Clamped the line. Spill to the soil. Clean up in progress."

DEC Memo:	"9/22/15 - Obligado - Desk Duty - I called ERT to follow up on this after hours spill and spoke to Tony Delgado. They were putting a permanent repair on the feeder from a previous spill. In the excavation, they saw signs of oil coming from further south, so they looked at their leak detection readings and they noticed that there was still an active leak. They continued excavating to locate the leak. They are estimating that it is 30 to 35 feet south of manhole 62580, which is on the Harlem River Drive near 155th street. Crew is on location looking for the leak. 80 gallons per hour, estimated total is 500 gallons. No impacts to surface water. Emis # 242720. Obligado - Update - Leak has been clamped at 1100 hrs. Total loss of 820 gallons. As per Demeo, spill has been assigned to Santosh Mahat, who responded. 9/22/15: Mahat Response: DEC Mahat responded to the reported 500 gallon (later corrected to be 820) of dialectical fluid due to a feeder line leak. Spill was on M52 Feeder line that runs between 14 Street Station and Spring Brook Station. Leak on the feeder line has been stopped. A clamped has been placed for the temporary repair of the line. A barrel will be placed for the permanent repair for the spill. 700+ gallons of dialectical fluid has

FEEDER LINE M52 (Continued) **S118261783**

been recovered from the excavation. Leaving approximately 120 gallon on the soil. All contaminated soil will be excavated from the site and end point samples will be collected. A complete spill closure report will be provided for the closure of the spill case. DEC is waiting for a result. 10/12/15: Mahat Spill # 1507324 : Duplicate Spill. It has been crossed referenced on DEC Spill Database. Spill # 1507324 is closed. DEC Mahat will be working on Spill # 1506599. 12/11/15: Mahat DEC Mahat received an email update on the spill case via email: Email: Hi Santosh Following up on our conversation, at spill 1506599 we removed all impacted soils but dielectric fluid kept pooling at the bottom of the excavation apparently trapped in sand seams around the excavation. As a result an 8 -diameter recovery well was installed at this location. We plan on gauging this well shortly and then will set up a schedule to recover fluids. Rolando Arco, P.G. Senior Specialist EH&S Operations (S&TO) 31-01 20th Avenue Astoria, NY 11105 718-204-4494 917-558-0077 DEC is waiting for a report. 8/10/16: Mahat e/c: DEC Mahat sent an email to ERT requesting an updated EMIS report on the spill case. 8/12/16: Mahat Spill case has been assigned to DEC Patel as discussed on Con Ed meeting on 7/28/16. 07/05/17-Hiralkumar Patel. received email from Camissa (at 2:58 PM on 06/30/17) from ConEd including closure report. leak was found on the bottom of the 10 inch feeder pipe due to disbanded coating. total of 1,082 gal of dielectric fluid were lost to the environment. endpoint samples were not collected as remediation was planned during pipe refurbishment project planned at a later date. impacted soils were removed from the excavation as part of the repair and refurbishment activities. due to the observation of LNAPL in excavation, a temporary 8-in dia. recovery well was installed. on 04/03/17, ConEd went to gauge and sample the recovery well. specific well construction information was not available so the screened interval could not be determined. the 8-inch well was gauged at 11.5 ft bg and water was found at approx. 5 ft bg, with 0.01 ft of product. the 8-in well was purged prior to groundwater sampling. 3.1 ppm of TPH noted in groundwater samples. based on limited information regarding construction of the 8-in well, the well was replaced with 4-in dia. recovery well, with 10 ft of screen. the 4-in well was installed to a depth of 11.55 ft bg. the 4-in dia well was gauged on 06/01/17 and 06/14/17 when no measurable LNAPL or sheen noted. groundwater was found at 7.52 ft bg on 06/01 and at 6.91 ft bg on 06/14. the LNAPL noted in 8-in well may have been stagnant LNAPL trapped in the well and had accumulated over a roughly two year period. endpoint samples collected from excavation on north and south side of the area show TPH below limit. case closed based on review of available information."

Remarks: "on going leak rate 80 gals. per hour UPDATE leak has been clamped at 1100 hrs...total loss at 820 gals"

DEC Memo:	"emis_258826 07/20/17 - Lakhani Dielectric Feeder Leak Committee Conference Call, July 20, 2017 at 1400 " The estimated leak rate is 6 gallons per hour and the estimated loss is 898 gallons of dielectric fluid. " The contractor installed 21 bar holes in the area of the Exit 23rd sign on the Harlem River Dr . ChemLab sampled Bar Holes and are running samples. " The Sprain Brook Substation has been marked out and will be surveyed with the PFT van. " EMIS 258826 has been created for this incident. 7/21/17-At 0050 hours, the Leak Declared was terminated when a clamp was installed in the excavation on the Harlem River Drive 500 feet north of the exit for 155th Street in Manhattan. The total estimated loss of dielectric fluid is 955

FEEDER LINE M52 (Continued) **S121100548**

gallons with a leak rate of 7 gallons per hours. EMIS 258826 is associated with this incident. Spill transferred to T. Demeo (Secondary Off-Hours). 7/21/17 TJD A leak watch for feeder M52 was declared on 7/16/17 with a reported leak rate of 7 gallons per hour. Following a trackdown investigation, Con Edison field crews located the leak along the southbound lanes of the Harlem River Drive approximately 800 feet north of 155th exit. The feeder was exposed and a temporary clamp installed on the morning of 7/21/17. An inspection of the excavation was performed by Spills staff, crews were preparing the excavation and involved feeder for the installation of a permanent repair barrel. This section of the Feeder M52 has recently undergone a refurbishment of the line due to multiple historic leaks in the area. Excavation of remaining contaminated soils is pending issuance of a required DOT permit. Permanent repairs are complete. 9/7/17 TJD File review. Con Edison has submitted a closure report for the M52 feeder line leak. As per report: Summary of the cleanup efforts for DEC Spill # 1703674 (Con Edison EMIS # 258826) The Dielectric Fluid Leak Committee declared a Dielectric Fluid Leak Watch on Feeder M52 at 10:16 hours on July 16, 2017 due to an alarm on the USi Leak Detection System (LDS). Patrols of the feeder were completed. The Chemlab detected airborne Perfluorocarbon Tracer (PFT) on the Harlem River Drive north of the 155th Street exit ramp. Bar holes were installed and high subsurface PFT levels were detected in the bar holes. An excavation was started at the location. The Dielectric Fluid Watch was changed to a Declared Leak at 16:55 hours on July 20 when a leak was found on the ten inch feeder pipe. The Leak was clamped at 00:50 hours on July 21, terminating the Declared Leak. Permanent repairs were completed at 15:00 hours on July 21. A total of 965 gallons of dielectric fluid was lost to the environment due to this leak. Additional coating removal revealed several spots with what appeared to be electrolysis on the steel pipe. This appears to be the cause of the leak. The GPS coordinates for this location is N40:50:19.15 W73:56:01.00 Excavation 1 Impacted soils were removed from the area surrounding the leak location. Four (4) post - excavation soil samples (one floor and three sidewalls) were collected from the excavation (EX-1), and analyzed for total petroleum hydrocarbon (TPH) using EPA 8015 method. The west wall was not sampled due to excavation to bedrock. Date Sampling Location Results 07/23/2017 Ex - 1 North Wall 40.7 PPM 07/23/2017 Ex - 1 South Wall 28.9 PPM 08/23/2017 Ex - 1 Floor 1,210 PPM 08/23/2017 Ex - 1 East Wall 2,040 PPM All four post-excavation samples exhibited analytical results below the 13,000 PPM remediation guideline for dielectric fluid and no further remediation was required. Based upon the documentation provided no further action is required. Spill closed. All documentation has been uploaded to DECDOCS."

Remarks: "Caller advised there is a leak in the feeder line and unknown exact location and have lost aprx 410 gal. Line is Leaking at 5 gal per hour."

DEC Memo:	"I spoke with Joe O of PTC. His crew is onsite and believes and inspection is warranted. DEC Piper reposnded to site on Sunday 1/25/09 to inspect cleanup progress as I was in area for another spill. Approx 4 drums of debris was cleaned from the tank room as of then. There is alot of debris that still needs to be removed and cleaned. The place is a mess. A small out spilled outside out of the vent that was cleaned. Additional work needed. 2/6/09- I spke with Rotem regarding the spill. He stated the spill was cleaned and a paid invoice will be sent. He e-mailed me an invoice only. I spoke with PTC and they stated they have not been paid and manifests are

TANK ROOM (Continued) **S109414685**

pending. I spoke with Rotem again about the confusion. He stated that they are not going to pay PTC because Stuyvesant hired them. I explained to Rotem that the spill will remain open until disposal manifests are recieved and an inspection is performed as no further work was done since the initial response. Case to remain open. DECPiper received manifests from PTC through ABC tank. Bsaed on owrk to date, this spill is closed. "

Remarks: "Approx. 7 gallons of oil spilled in the tank room due to equipment failure. Patrolem tank cleaners are en rt for clean up."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO/TIPPLE 05/08/01 SITE VISIT BY DEC TIPPLE REVEALED WHAT APPEARED TO BE #2 OIL SEEPING INTO THE BASEMENT OF THE CHURCH THROUGH A SMALL HOLE WHERE THE BASEMENT WALL MEETS THE FLOOR, JUST BELOW AN OLD ABANDON CON-ED CONDUIT. TIPPLE SET TEMPORARY ABSORBENT PADS TO CAPTURE OIL PRIOR TO THE OIL IMPACTING THE SUMP AND GETTING INTO THE CITY SYSTEM. 05/10/01 DEC TIPPLE AND MILLER ENVIRONMENTAL MET AT THE SITE, AN OIL WATER SEPARATOR WAS RECOMMENDED, AND SUBSEQUENTLY INSTALLED BY MILLER ENVIRONMENTAL. ACCESSED 143 & 141 W 138TH STREET BASEMENTS, THEY REVEALED NO APPARENT #2 OIL SOURCES. 05/17/01 SET APPOINTMENT WITH OWNERS OF 2361 7th AVE TO ACCESS FUEL OIL TANK IN BASEMENT, THE BOTTOM OF THE TANK WAS IN DEBRIS. 05/21/01 A RETURN VISIT TO 2361 7th AVE WITH RAKES, SHOVELS ETC. REVEALED THAT THE 2000GAL #2 OIL TANK TO BE SCALING, BUT SHOW NO SIGNS OF LEAKAGE IN THE DEBRIS BELOW THE TANK. A SMALL HOLE WAS EXCAVATED THROUGH THR FLOOR SLAB BELOW THE TANK THAT REVEALED DRY FILL. THE FILL LINE APPEARS TO HAVE BEEN REPLACED FIVE PLUS YEARS AGO. 8/23/05 - Raphael Ketani. Case transferred to Jeff Vought. 07/25/08-Vought-Spill reassigned from DEC Vought to DEC Ketani as per DEC Austin. 9/16/08 - Raphael Ketani. I began my investigation into the case. The spill took place on 3/2/2001, but wasn't reported until 5/8/2001 by Gregory Graves. A red liquid flowed into the basement of the church, supposedly from a vault in front of the building. Con Ed investigated, but said that it wasn't their spill. The owner is the Abyssinian Baptist Church of the City of New York. The block and lot are 2006 and 52. The main address is 132 W. 138 Street, NY, 10030. The address is also known as 132 Odell Clark Place. The alternate addresses are 132-142 W. 138 Street. The contact for mail correspondences is Ernestine Adams. The PBS case is #2-609511. They have one 3,000 gal. tank that is active and has #2 oil. Correspondences and documents in the paper file are: 7/19/01 FAX to Anthony Sigona of Spills: a site visit revealed vent pipes and fill ports -there are probable oil tanks; FAX depicts a lot of properties owned by the Abyssinian Development Corpoeration (ADC) 7/23/01 e-mail from Joan McLeod of ADC to Michelle Tipple of Spills: list of properties aquired from the HPD by ADC with dates of aquisition 8/10/01 FAX from McLeod to Tipple: passing tank test results from ABC Tank for 137 W. 138 St. 8/13/01 e-mail from McLeod to Tipple: cleanup of church should be coordinated by someone from the Abyssinian Baptist Church - Randolph or Gregory Graves 8/20/01 e-mail from Benjamin Conklin of DEC Albany Legal to Tipple stating that since HPD sold the properties without testing the fuel systems, then they are the responsible party, not the church 9/6/01 FAX from Tipple to Lonna Wilson of Miller Environmental Group (MEG): attached DEC letter for NYC DOT requesting permission to break the sidewalk to do work at 137 W. 138 St. 10/12/01 letter from Tipple to Wilson granting approval of the SIP dated 10/4/01 - plan includes installation of borings 3' to

THE ABYSSINIAN BAPTIST CHURCH (Continued) **S105055716**

10’ below grade in the basement of 137 W. 138 St. next to an encased AST, and 3 borings on the north side of 138 Street to bedrock 10/19/01 FAX from Wilson to Tipple: Rich and I have come up with a plan of attack we would like to discuss with you 11/26/01 letter from Wilson to Tipple regarding the inconclusive results and a request to do a ground penetrating radar (GPR) survey with a diagram attached 11/26/01 FAX from Mark Tibbe of Region 2 DER to Pashko Camaj (consultant?): sending of a FAX from Wilson to Tipple which contained the 11/26/01 letter from MEG stating that the boring at 137 W. 138 St. had no vapors, nor staining, and neither did the boring in the sidewalk at 138 St. - results were inconclusive, MEG proposes a further investigation using GPR to find possible sources and conduits, a copy of the diagram from the 10/19/01 FAX is included 12/12/01 Results of Geophysical Investigation report from NAEVA Geophysics: they did a GPR on the western half of the 100 block of W. 138 St., they detected metal anomalies infront of 137-135 W. 138 St. and the Abyssinian Baptist Church, no USTs were identified, piping associated with tanks was identified at 139 W. 138 St. (vents and fill ports), several conduits of undetermined use were identified, one conduit is infront of the church 2/4/02 letter from Wilson to Tipple: investigation of site is inconclusive thus far, they propose the installation of 2 borings - 1 infront of 139 W. 138 St. and 1 directly across the street 4/7/02 letter from Tipple to be sent by MEG for permission to do work in the sidewalks to install 3 groundwater wells at 132 W. 138 Street between 132 and 139 W. 138 St. on both sides of the street A 7/17/01 bill indicates the use of an oil-water separator on 6/14/01. There was one bill from 6/2/03 which indicates that an oil-water separator system was dismantled and that the wells were abandoned, both about 5/16/03. I tried to contact Lonna Wilson at MEG, but she no longer worked there. I spoke to Nicole Pepe of MEG (631) 369-4900 and asked her to go into MEG’s archived files and try to find the boring/soil reports for the borings that were previously performed. She said she will look into the archives and see whether she can find anything. I asked to send me copies of any documentation she finds. She said she will. I called up the Abyssinian Baptist Church and attempted to set up an appointment with Randolph Graves (212) 862-7474, ext 255 to see the fuel system in the basement. We set up a 10AM site visit for 9/23/08. 9/23/08 - Raphael Ketani. I met Randolph Graves, the head of maintenance, as scheduled. He took me to the basement and the wall where the oil had seeped through. Once there, I turned on my PID meter. No VOCs were detected. There was a slightly darkened stain on the field stone wall showing where the oil had come through the electrical pipes at the top. There was no wetness and the spring water conduit trench at the base of the wall was free of oil. Mr. Graves told me that he hasn’t seen even the slightest seepage of oil in the past 5 years. He said that where we are standing is directly below the sidewalk, not under the church. I took a couple of pictures of the wall (see E-docs). Next, we went outside. He showed me the Con Ed vault where the oil supposedly came from. It was in the street. The oil fill port was located about 11 feet away from the vault. I took more pictures (see E-docs). There was no indication from looking at the sidewalk whether there had been damage to the fill port in the past. We talked a little bit more about the oil spill, but Mr. Graves had no additional information to tell me. After this, I left the site. 10/3/08 - Raphael Ketani. I made a site visit to see where the groundwater monitoring wells and other items installed by the PIN

THE ABYSSINIAN BAPTIST CHURCH (Continued) **S105055716**

contractors were. I found two wells across the street from the church at some distance from the building. I found three wells on the same side of the street as the church. One well was some distance to the east and the other two were some distance to the west. That was all I could find. 10/22/08 - Raphael Ketani. I sent an e-mail to Jeffrey Bohlen ((631) 924-3001; jeffb@envirotrac.com) requesting that his crew take groundwater samples from each well and process them for 8260 and 8270, aside from also checking to see whether there is oil. 10/29/08 - Raphael Ketani. Mr. Bohlen called me. He said that his crew was out to the site. He said that they found all 5 wells, but they were all filled with concrete. He asked what should happen next. I told him that the wells need to be pulled out and new concrete sections of the sidewalk poured. I added that DEC has no groundwater analytical data, nor any presence of free product data. I told him that EnviroTrac should do test borings to make sure that there is no contamination below ground. He said that he will mobilize the necessary equipment. 11/17/08 - Raphael Ketani. Today I received a contractors pay package from EnviroTrac. The invoice number is 01.DC2014.00-1. The pay period is from 9/29/08 to 11/2/08. The work consisted of meeting with staff from the DEC regarding the project, additional phone conversations with staff from the DEC to discuss the project, setting up new billing and electronic and paper files, composing new work orders and the accompanying tables, maps, and labels, developed a new chain of custody for water sampling, travel to site, site evaluation and pictures, use of low value equipment, and inspecting the abandoned wells. I found the pay packages to be acceptable and forwarded them to Contracts and Payments Section of Albany DER. 11/18/08 - Raphael Ketani. I spoke to Dave Lorthioir of EnviroTrac (631) 924-3001 regarding the wells. He said that a crew from EnviroTrac had gone out to the site, but discovered that all of the wells had been filled with concrete. Mr. Lorthioir said that this was one site that he and Jeff Bohlen hadn't visited themselves. He asked that they be allowed to go to the site and inspect the wells as a double check to make sure the crew really found the wells in question. I told him to do so. I added that I will send Mr. Bohlen an e-mail instructing EnviroTrac to refurbish the concrete walkway in the vicinity of each well. I spoke to Michelle Tipple, the previous DEC case manager (845) 256-3153. She said that she remembered Miller Environmental Group installing the 5 wells and finding groundwater. I called up Dave at Miller (631) 369-4900, ext 210 and asked him to find the groundwater analytical data. He said he will look through their records. 11/21/08 - Raphael Ketani. I received a call from Dave of Miller Environmental. He said that they looked through their records, but could not find the analytical results. He said that after the date of the sampling, Miller had moved and many of their records are in storage trailers. He said that they were not very organized collections of records and that these old records were not in their database. 12/1/08 - Raphael Ketani. Miller Environmental never found the groundwater analyticals. So I spoke to Michelle Tipple (845) 256-3153, the former case manager, regarding the groundwater and the sampling. She said that she remembered that the groundwater had a very slight odor, but there was no sheen. She said that samples were taken, and there were no hits of concern. Ms. Tipple added that she then ordered the plugging of the wells. I spoke to Robert Leung, DEC Remediation tech. in Region 2 and PIN file manager, regarding whether there are more files for the site and more bills. He said that whatever is presently in the file cabinets up

THE ABYSSINIAN BAPTIST CHURCH (Continued) **S105055716**

here is the entire file. The FISR was written and submitted to Randall Austin, Chief of the Spills Unit, for his signature. Mr. Austin signed the FISR and it was forwarded to Lou Oliva, Chief Counsel for Region 2, for his signature. Mr. Oliva signed the FISR and an original and one copy were sent to Dennis Farrar in Albany DER. As the investigation had been performed as far as was practical, and as the oil spill was cleaned up and no other contamination was found, I am closing the spill case. 12/4/08 - Raphael Ketani. While moving papers on my desk, I found the unsigned Standby Contractor Authorization Form for EnviroTrac. Randall Austin, Chief of the Spills Unit, had returned it to me unsigned some time ago. The work that still needed to be done was the replacement of the sidewalk slabs at the locations of the 5 abandoned wells. I contacted Dennis Farrar in Technical Support, DER Albany (518) 402-9543 and asked him whether he had received the FISR. He said that he wasn't sure. I told him that there is no Responsible Party for this site and that only the sidewalk replacements needed to be done. Mr. Farrar said that as soon as he finds the FISR, he will just hold onto it. He added that he will call around to Glenn Meier at the Office of the State Comptroller (518) 473-7599 and Mike Cruden at the Office of the Attorney General to see whether they had received the FISR. Mr. Farrar called me back. He said that he hasn't received the FISR yet. However, he told Mr. Cruden to just hold onto it and do nothing until all of the work at the site is completed. 12/9/08 - Raphael Ketani. I submitted the Standby Contractor Authorization Form to Randall Austin, Chief of the Spills Unit, for his signature. He signed it and returned it to me. I sent the original signature form to Mr. Lorthioir. 12/18/08 - Raphael Ketani. I sent a letter to Mr. Bohlen approving the concrete sidewalk refurbishment work so that he can obtain all of the necessary City permits. 12/24/08 - Raphael Ketani. An e-mail was received yesterday from Mike Johnson (518) 623-1249 of DEC regarding a request by the OSC for all outstanding ISRs and FISRs for PIN cases that were near the 90 day deadline for filing claims against Responsible Parties. I spoke to Mr. Johnson and asked him who I should talk to since this case was on the list. He directed me to Glen Myer at OSC (518) 473-7599. I spoke to Mr. Myer regarding the case. I explained that there was no identified responsible party. I added that I had sent the FISR to Dennis Farrar in Albany DER and that a PIN contractor was about to begin work on repairing the sidewalk where the wells are situated. I told Mr. Myer that Mr. Farrar was sitting on the FISR as per my instructions so that the PIN case wont be closed, which would prevent the contractor from getting paid for the sidewalk repair work. Mr. Myer told me that since there is no responsible party, the OAG wont get involved. So the deadline doesn't apply anyway. He added that even if the cost center gets closed, it can be opened up by OSC at any time. 1/27/09 - Raphael Ketani. I received the following e-mail from Mr. Bohlen: Sorry for the delay, but the sidewalk permits for the Baptist Church and 225 E 70th Street had to be re-submitted b/c our bond with the DOT reportedly expired and had to be renewed. We hope to have the permits by next week and we will inform you of the start dates for the field work. - Jeff 1/30/09 - Raphael Ketani. On 1/27/09, I received the Contractor Pay Packages for analytical work performed by EnviroTrac Ltd. The work period is from 12/1/08 to 12/28/08. The invoice number is #01.DC2014.00-2. The work consisted of hiring an expeditor to obtain the sidewalk refurbishment permits, abandoning the wells, locating the wells, pyramid manufacturing, project management, use of

THE ABYSSINIAN BAPTIST CHURCH (Continued) **S105055716**

a light duty vehicle, and use of low value equipment. The packages were found to be acceptable and were sent to the Contracts and Payments Section of DER. 2/10/09 - Raphael Ketani. Mr. Bohlen of EnviroTrac called me today. He said that the 12/18/08 letter that DEC had sent EnviroTrac now had too old a date in order to get permits from the NYC DOB to do the sidewalk refurbishment work. He asked that I send him a currently dated letter. I sent the letter today. 3/9/09 - Raphael Ketani. I sent Mr. Lorthioir an e-mail asking him why DEC hasn't received any updates regarding the sidewalk refurbishment at the wells. I asked whether there was a problem and to forward a closure report to the DEC. I also stated that the lack of the report was holding up the closing of the case. Mr. Bohlen of EnviroTrac called me. He said that he sent the last letter I had written requesting the sidewalk refurbishment to the DOT the day he received it. He doesn't know why the DOT is taking so long to issue the permit. I told him not to wait for them to respond, but to call them and find out what is going on and whether there is a problem. He said he will. 3/10/09 - Raphael Ketani. Mr. Bohlen called me today. He said that EnviroTrac received the concrete refurbishment permit from the DOT. The work will start on 3/18/09. 3/18/09 - Raphael Ketani. I spoke to Mr. Lorthioir today regarding the sidewalk refurbishment. He said that it's been very difficult getting the work done. The two wells across the street are under scaffolding for different construction projects. So they can't replace the entire flag (section of concrete). Instead, they will cut out a smaller section of each flag and replace that. On the church side, one flag contains a monitoring well, but also a new fill box and fill pipe. The fill box and pipe were installed too high. So they almost stick up above the level of the sidewalk. Mr. Lorthioir said that he doesn't want to break up the concrete around the fill box and pipe. This is because if he do work and something goes wrong with the fill box or pipe and there's an oil spill, then the church can blame EnviroTrac. So he will cut the flag in two and only replace the section surrounding the well. Also, there has been a lot of activity on the street with funerals and such. So there's been alot of traffic. It's been tough getting the equipment down the street. However, they are working on the concrete refurbishment. 4/6/09 - Raphael Ketani. The 4/01/09 to 3/31/10 Standby Contractor Authorization Form was signed by Randall Austin, Chief of the Spills Unit, and sent to EnviroTrac. 4/16/09 - Raphael Ketani. Today I received a contractors pay package from EnviroTrac. The invoice number is 01.DC2014.00-3. The pay period is from 3/2/09 to 3/31/09. The work consisted of hiring an expeditor to obtain the concrete refurbishment permits, project management, abandonment of five wells, cutting of the sidewalk, replacement of sidewalk slabs, use of low value equipment, and inspecting the abandoned wells. I found the pay packages to be acceptable and forwarded them to the Contracts and Payments Section of Albany DER. 4/17/09 - Raphael Ketani. Today I received the sidewalk refurbishment report from EnviroTrac. I reviewed the report and found it to be acceptable. Therefore, I left a message and an e-mail for Mr. Farrar in Albany DER telling him that he can now move the FISR that he has been sitting on and give it to the next person who needs to review it. 5/21/09 - Raphael Ketani. Today I received a contractors pay package from EnviroTrac. The invoice number is 01.DC2014.01-4. The pay period is from 4/1/09 to 5/3/09. The work consisted of writing the well abandonment report, project management. I found the pay packages to be acceptable and forwarded them to the Contracts and

THE ABYSSINIAN BAPTIST CHURCH (Continued) **S105055716**

Payments Section of Albany DER. 6/30/09 - Raphael Ketani. Today I received a contractors pay package from EnviroTrac. The invoice number is 01.DC2014.01-4. The pay period is from 4/1/09 to 5/3/09. The invoice date is 6/26/09. This is the same invoice as I had previously received on 5/21/09. I spoke to Alisa Bubb of EnviroTrac and she said that the Albany Contracts had returned the previous invoice because it didn't have the cost and cost multiplier page that was required by the contract. The work consisted of writing the well abandonment report, project management. I found the pay packages to be acceptable and forwarded them to the Contracts and Payments Section of Albany DER."

Remarks: "caller states that a vault ifo above location is leaking a red oily substance. con ed was advised and did show up to investigate but state that the spill is not theirs. caller was advised to report spill 1 week ago but didn't until now"

DEC Memo:	"03/27/18 - Lakhani A 5000 gallon AST on the property was receiving a delivery. Prior to delivery the gage read 1300 gallons. A delivery of 1500 gallons was made, after which approx. 30 gallons of #2 fuel oil had spilled from the vent line, located behind the building, onto concrete. A drain was affected and is filled with oil. The tank is isolated and no evidence of a discharge from the tank was observed by United Metro Site Technical/Safety Supervisor JJ Halbert (201-452-2995, jameshalbert@umecny.com). Riteway was hired to conduct the cleanup. PBS #2-611946 03/28/18 - Lakhani DEC Lakhani met United Metro JJ on-site. The oil discharged from the vent and affected the entire length of the alley beside the building. There was some construction debris (i.e. garbage bags of ceramics, dry wall, scrap metal, etc.) piled in the alley that was also affected. A drain with a 3 pipe was affected. The pipe was attempted to be traced, however not outlet was determined. Both sump pits did not display evidence of #2 fuel oil. Catch basins at the end of the city block were checked for any evidence of oil. Both basins were filled with runoff material and no evidence of oil was observed. The 5000 gallon box AST did not display any evidence of oil leaking from the top of the tank. Riteway will drum up any affected debris, vacuum the drain, and lay absorbent on the ground and scrub the concrete alley. DEC Lakhani requested a tightness test to be performed on the pipe. 08/06/19 - Lakhani - Spill being transferred to Sekhon."

DEC Memo:	"207563. see eDocs ConEd has submitted results from seven soil samples to the ConEd Monitor. Mercury levels found are 0.07, 0.21, 0.9, 5, 24, 41 and 58 mg/Kg. (Breen) 8/21/07: E-mail from Con Ed (Brian Bellows) transmitting lab results for soil samples collected in excavation. Location is former gas metering station, where mercury was used. Results indicate that 6 of the 7 samples returned results of mercury greater than the TAGM RSCO of 0.1 ppm. Highest result was 57.7 ppm. Following discussions with Con Edison (Barry Cohen and Brian Bellows) it was agreed that additional soil removal and post-excavation sampling should be undertaken. See eDocs for site photos. (JHO) 8/28/07: Second set of post-excavation sampling results submitted by Con Ed (Bellows). Results following additional soil excavation area actually higher than first round (maximum concentration of 795 ppm in soil). It was noted by Con Ed Bellows that visible mercury was observed in the area where this sample was collected. A conference among DEC, Con Ed Bellows and Con Ed Dave Rubin) resulted in DEC request for formal work plan for additional remediation. See eDocs for additional site photos. (JHO) 9/7/07: site visit with Con Ed (Ken Kaiser, Brian Bellows, Dennis Morda, Tom

MERCURY EXCAVATION (Continued) **S108763784**

O'Connell) and Bureau Veritas (Bill Munoz - consultant) to discuss next steps in remediating mercury spill. BV (Munoz) plans to prepare a letter work plan for Con Ed review sometime next week. (JHO) 9/10/07: Spoke to DER Albany Jim Harrington - I requested that when work plan is submitted that he assign someone to review it, since we don't have expertise in the region on mercury remediation. He agreed. Will send work plan up when it is received. Also, received e-mail from Con Ed (Kaiser) transmitting site photos taken last week. See eDocs for photos. (JHO) 9/21/07: Bureau Veritas (Bill Munoz) submitted Remedial Action Work Plan for annubar excavation. RAWP forwarded to DER Albany (Harrington) who assigned it to Kevin Carpenter. See eDocs for RAWP.(JHO) 9/26/07: DER Albany (Carpenter) sent e-mail requesting additional information, as follows: Can the consultant provide specific information about the amalgam that they propose using (e.g. exact product description, manufacturer, exact product name, MSDS, etc.)? Also, can they provide similar information about the mercury vacuum that they propose using? E-mail sent to consultant conveying comments. Received response from Bureau Veritas (Munoz): I spoke with Evan Altmann of Clean Harbors regarding the Department's request. He indicated he should be able to provide the information in the next day or two. I asked Mr. Altmann to forward the requested information to me, I'll review it, then forward it to you. (JHO) 10/1/07: Bureau Veritas (Munoz) submitted letter report on 9/28/07 for gas main excavation (westernmost area of excavation), and requesting permission to backfill. Sent e-mail response: The appropriate cleanup standard to apply here would be Part 375-6.8(b), the lower of the following two Soil Cleanup Objectives: - Protection of Human Health (Residential) - 0.81 ppm - Protection of Groundwater - 0.73 ppm Based on the data submitted, all of the post-excavation samples for the gas main excavation are below 0.73 ppm mercury. As such, the excavation can be backfilled. I am awaiting further information from you regarding the annubar excavation to complete our review of the work plan. See eDocs for letter report.(JHO) 10/5/07: Bureau Veritas (Munoz) submitted MSDS sheet for the amalgam planned for use in the excavation. This information was forwarded to DER Albany (Carpenter) for his review. (JHO) 10/10/07: DER Albany (Carpernter) provided comments on the RAWP. On 10/11, the comments were e-mailed to Con Ed and Bureau Veritas: " The horizontal location of the annubar within the excavation area should be presented on a figure. " The investigation should be expanded areally in the direction of any sidewall samples the did not meet the cleanup objective. Excavation or direct-push soil sampling would be acceptable. It may be possible to continue the excavation in the direction of the building if necessary. We are not convinced that the stone retaining wall is related to the foundation of the building. Direct push samples could be collected between the wall and the building if necessary. " The document must clarify the depth to the top of bedrock in the excavation. The pictures show large rocks at the bottom of the excavation that do not appear to represent bedrock. We support the plan to remove all soil from the rock surface. " Neither the MSDS or the manufacturer s web site provide sufficient information on the amalgam product (Mercury Eater). The intent is to remove all of this product from the excavation after application. If there is a potential for any of this product to remain in the subsurface, we will need additional information on the contents (ingredients) of the product. " The proposed cap will not likely prevent or reduce lateral migration of mercury vapor or vertical

MERCURY EXCAVATION (Continued) **S108763784**

mercury migration. We don t believe that the cap adds any value to the remedy, especially since the surface of the excavation will be restored with concrete or asphalt. " Subsurface utilities in the vicinity of the spill could act as preferential pathways for the mercury vapor. A figure showing the utilities should be provided. " Since further vertical investigation or delineation beyond the bedrock surface is not practical, the work plan should include a post remediation mercury vapor monitoring plan to verify complete removal of the mercury. In particular, vapor sampling should be conducted adjacent to the building to assess exposure and the gas line or other potential preferential vapor pathways. The vapor monitoring can help compensate for the limited ability to completely delineate the contamination. If post-remediation mercury vapor is detected, additional measures could be required to prevent exposures. (JHO) 10/19/07: Revised RAWP, along with comment response letter, submitted by Bureau Veritas. Copy forwarded to DER Albany (Carpenter) for review. (JHO) 11/29/07: Revised RAWP conditionally approved. Post-remediation soil vapor sampling provision added in approval letter. See eDocs. (JHO) 2/24/12 - Raphael Ketani. I began my review of the spill case in order to determine whether additional work is necessary or whether the spill case can be closed. 2/27/12 - Raphael Ketani. I finished my review of the spill case. On 12/21/07, the DEC approved the revised Bureau Veritas RAWP dated 12/4/07. The revised RAWP contained a soil cleanup objective of 2.8 ppm. Through several rounds of excavation, the soil contamination was finally cleaned up on 5/30/08. The excavation pit was filled to the surface with concrete on 6/4/08. For soil vapor, the EPA indoor air standard is 0.3 ug/m3. A 1/11/08 e-mail from Jane O'Connell to Kenneth Kaiser of Con Ed contained a reference to the ATSDR residential exposure standard of 1.0 ug/m3. The 2/5/08 e-mail from Jyoti Agarwal of Con Ed to Jane O'Connell referred to the method detection limit used by their ELAP laboratory which is 0.06 ug/m3. This MDL is for NIOSH method 6009 and regards sampling time. The sampling time should be about 5 hours in order to achieve a 1 ug/m3 result. On 3/11/09, Joseph O'Connell took over the case and sent an e-mail to Bill Munoz of Con Ed. He had reviewed the 10/2/08 Bureau Veritas RAR and had a number of comments to make regarding the soil vapor sampling. Vapor monitoring was conducted on 5/30/08 just outside the building and achieved a result of 0.005 ppm, based on a conversation factor in Section 4 of the RAR. However, the Jerome (a mercury detecting instrument) reading was 40.5 ug/m3. Information from the NYS DOH indicated that the soil mercury vapors would NOT pass under the building next door. Next, I contacted Barry Cohen (718) 204-4252 at Con Ed regarding the project and about conducting indoor air surveying. He said that he wasn't familiar with this part of the project and that I should talk to Kenneth Kaiser. Mr. Cohen added that, many years ago, Jane O'Connell and Mr. Kaiser had conversations about the vapor issue and it was agreed that indoor air surveying wasn't necessary. However, he will have Mr. Kaiser contact me later. I told Mr. Cohen that the DEC believed that a good result of non-detection for the indoor air would settle the mercury vapor question for once and for all. 3/5/12 - Raphael Ketani. I spoke to Kenneth Kaiser of Con Ed (718) 267-3881 regarding the mercury spill. He said that the contaminated soil had been completely removed and that the bedrock was wiped clean. After this, three soil vapor sampling points were installed (2 within the excavation area and 1 between the building and the pit). The points were sampled for an

MERCURY EXCAVATION (Continued) **S108763784**

extended period of time. Mr. Kaiser didn't remember for how long. However, he said, no mercury vapors were found. I asked Mr. Kaiser whether mercury vapor sampling had been conducted inside the apartment building. He said that Con Ed didn't feel this was appropriate or necessary. The outside vapor sampling points didn't indicate the presence of mercury vapors and it would be hard to get good vapor sampling results if there are solvents and other chemical bearing materials in the basement of the building. Also, the residents would have to be notified that vapor sampling would be taking place. This would cause distress to the residents. I told Mr. Kaiser that I didn't have the latest vapor sampling results. He told me to call Mr. Cohen and have him send them to me. I tried to contact Mr. Cohen (718) 204-4252 regarding Con Ed sending the DEC the mercury vapor sampling results, but I could only leave a message. 3/6/12 - Raphael Ketani. I received two rounds of data for soil mercury vapor sampling by e-mail from Vito Mariani of Con Ed. I reviewed the results. Test America Level IV Data Package, dated 8/8/08, for sampling performed on 7/31/08 Location A: tube=0.00177mg/m3; 0.000216ppm; sample air volume 24.582L Location B: tube=0.00177mg/m3; 0.000216ppm; sample air volume 24.552L ambient air:tube=0.00176mg/m3; 0.000215ppm; sample air volume 24.648L Test America Level IV Data Package, dated 9/15/08, for sampling performed on 9/3/08 Location A: tube=0.000192mg/m3; 0.0000234ppm; sample air volume 227.04L Location B: tube=0.000188mg/m3; 0.000023 ppm; sample air volume 230.88L ambient air:tube=0.000189mg/m3; 0.000023 ppm; sample air volume 230.214L From the data in the Bureau Veritas reports in the case record, I have determined that the mercury in the soil has been cleaned up. Also, from the above vapor sample data, it appears that mercury is not vaporizing. 3/15/12 - Raphael Ketani. The soil vapor analytical results for mercury were submitted to Michael Hughes (518) 402-7810 of the NYS DOH for review. 3/16/12 - Raphael Ketani. Mr. Hughes responded back by e-mail that the DOH didn't believe that the concentrations were of a concern. The DOH didn't recommend further air testing. 3/27/12 - Raphael Ketani. Discussions took place today amongst staff at Region 2 DER regarding the soil and vapor results submitted by Con Ed and Mr. Hughes' comments regarding the soil vapor levls. It was determined that the remediation had been sufficient to reduce the concentrations of mercury such that residual material didn't pose a threat to the public and the environment. Therefore, Hassan Hussein, EE III and head of the Hazardous Materials Unit for Region 2, gave the approval to close the case. I closed the spill case effective today and sent a Spill Closure Letter to Mr. Cohen of Con Ed. "

Remarks: "Just over 1 lb. of mercury was found in the soil during an excavation. All info is unknown. A contractor has been notified for clean up. ConEd#207563 No to the five questions."

DEC Memo: "Problem with a #6 oil fill line coming into a basement. Patel will visit the site on 1/29/2013 01/29/13-Hiralkumar Patel. alternate addresses: 133-137 W 137th Street no other spills found. PBS #: 2-130389. as per PBS record, the site has one 5,000 gal #2 oil AST in contact with soil. the tank was installed in May 1992. Lenox 137 Holding L.P. c/o Barberry Rose Management 1024 Broadway, Suite 202 Woodmere, NY 11598 Attn.: Lewis Barbanel PH. (516) 374-2888 (516) 374-6080 Fax (516) 374-4068 email: Lewis@brmnyc.com 2:30 PM:- visited site. met Aidan Brownlie. the site has one 5,000 gal #6 oil AST completely wrapped with cinder blocks. the tank is located in the boiler room at the rear end of the building, in northeastern corner. vent pipe is located outside the tank/boiler room. the fill port is located about 4 ft from the building's front foundation wall and the fill line runs underground in alley between the subject site and adjancent property at 131 W 137th St. about 4 ft of fill line is exposed in pit located just inside the alley entrance (about 4.5 ft from fill port). this pit also contains gas main valve. found #6 oil inside the pit, towards the sidewalk indicating leak in fill line which runs about 6 inches below surface. Aidan mentioned that gas lines were rebuilt inside the entire building and now they need to change the main gas line from street to the valve. when ConEd visited site before changing main line, they noticed oil in pit and refused to change their pipe until the spill issue is resolved as fill line runs in same area where gas line is located. Aidan mentioned that to change the gas line, the fill line area needs to be excavated. as such, suggested him to expose the leaking fill line and remove any associated contamination. informed him that the fill line must be tested after necessary repairs. he will talk to property owner and submit plan/schedule by this week. asked Aidan to check building codes for vent pipe location, as current vent pipe is far from fill port and not visible, if alley door is closed. during visit, spoke with building super also. super mentinoed that they get delivery of 1,000 gal every 5 days. Aidan Brownlie AEC Engineering Design & Construction Services PLLC. Ph. (212) 879-7300 Ext. 14 (631) 353-3370 (917) 658-9824 (C) Fax (212) 879-7302 email: aidan@aecengineeringdesign.com 02/04/13-Hiralkumar Patel. 12:46 PM:- received call from Aidan. he has spoken with property owner/manager and they will expose the fill pipe between the fill port and the pit. he will call back by 02/06/13 with work schedule. 03/06/13-Hiralkumar Patel. 4:08 PM:- spoke with Aiden. he mentioned that ABC tank performed cleanup on 03/04/13. he will call back with more details. 03/06/13-Hiralkumar Patel. 4:38 PM:- received message from Donna from ABC Tank. 03/08/13-Hiralkumar Patel. 11:02 AM:- left message for Donna. 03/19/13-Hiralkumar Patel. 11:04 AM:- received call from Donna. she mentioned that the fill line was replaced from fill port to the pit inside alley. she confirmed that there was no contamination under the sidewalk. contamination only noted near the pit and ABC tank removed impacted soil and dug down to bedrock so no soil left for sampling. asked Donna to submit letter report with summary of work performed and observations. received fax from Donna including closure letter. she mentioned that total of four drums of contaminated soil/debris was removed from the pit. she also mentioned that the pit was made of cement and was left clean and free of contamination. based on available information, case closed.

MULTI FAMILY DWELLING (Continued) **S112809640**

05/22/13-Hiralkumar Patel. 11:26 AM:- received call from Asia (646-472-6272), permit expeditor for ABC tank. she mentioned that during installation of new gas line, additional soil contamination noted. ABC tank applied for DOT permit, but DOT asked for DEC letter about cleanup requirements. 11:27 AM:- spoke with Donna at ABC tank. she mentioned that ConEd noted additional soil contamination, but area was backfilled before ABC tank visit the site. now ABC tank is planning to open two sidewalk flags to do cleanup of any contamination. Donna mentioned that contamination noted couple of weeks ago. based on this information, case re-opened. 11:31 AM:- spoke with Jason (212-839-9577) at NYC DOT. he mentioned that due to fake permits being pulled with fake spill numbers, DOT wanted to confirm about open spill number on-site. informed Jason that based on available information, subject spill case is re-opened. he confirmed that no further document needed from DEC. 11:35 AM:- spoke with Asia and informed her about discussion with DOT. suggested her to print out DEC website spill search result, if needed. 12:00 PM:- spoke with Aidan and discussed about findings of additional soil contamination. he was unaware of this and will talk to ConEd and ABC tank. Aidan will call back with more information. 06/04/13-Hiralkumar Patel. 10:37 AM:- received call from Aidan. he mentioned that DOT permit will received this week. 06/05/13-Hiralkumar Patel. 3:55 PM:- received message from Aidan. he mentioned that ABC tank has already opened sidewalk flags and removed approx. 8 drums of contaminated soil. 06/06/13-Hiralkumar Patel. 9:15 AM:- visited site. met Aiden. found sidewalk excavation covered with wood plates. plumbing crew removed plates for inspection. area between the recently installed fill port and building's foundation wall looked fine. some stains on foundation wall. found another cut open pipe parallel to active fill line. the old line goes towards the curb, which could be old fill line. found some oily soil near this old fill line. Aiden mentioned that old line and associated contamination will be removed. 06/07/13-Hiralkumar Patel. 10:34 AM:- received call from Donna. she mentioned that the old fill line was running to the curb. ABC tank has removed the old fill line and will continue cleanup. 06/11/13-Hiralkumar Patel. 1:21 PM:- received call from Wilson (631-889-0556) from ABC Tank. they finished excavating contaminated soil. they excavated about 4 ft wide area from sidewalk curb (where old fill port was) to building's foundation wall. Wilson mentioned that excavation is about 4 ft deep. 1:59 PM:- received email from Donna including three pics. soil in excavation looks fine. 2:07 PM:- spoke with Wilson. he has covered the excavation and will backfill once approved by DEC. 3:20 PM:- spoke with Donna and scheduled site inspection at 10 AM tomorrow. 06/1/13-Hiralkumar Patel. 9:40 AM:- visited site. met Wilson. inspected excavation under sidewalk. the old fill port was about 4 ft from sidewalk curb. no stained soil or petroleum odors noted in excavation. based on observations, no further work needed. 12:26 PM:- spoke with Donna. informed her that no further investigation needed and case is closed. 07/18/13-Hiralkumar Patel. 3:08 PM:- received call from Donna requesting copy of spill closure letter. 3:16 PM:- sent spill closure letter to Mr. Barbanel. letter emailed to Mr. Barbanel, Donna and Aiden."

DEC Memo:	"2/4/09 - Raphael Ketani. An oil spill occurred at 6:00AM today. The spill location was indicated as 145th Street and Broadway. According to an e-mail from Edwin Reyes (see E-docs), the oil was coming in at column marker 144+00 on track #2 of the number 1 subway line. It was a lot of oil. Liz DeLuca of NYC Transit responded back and referenced her message to a Con Ed M51 feeder leak at Broadway and 150th Street. This leak happened on 12/28/08 (see spill case #0810802). I spoke to Con Ed (212) 580-8383. The person answering the phone checked the spill listings and said that the 145th Street and Broadway spill wasn't listed amongst today's spills. I told him to check and get back to me. Next, I spoke to Ms. DeLuca (917) 468-4232. She said that NYC Transit was 99% sure the oil was from the same Con Ed feeder leak as before. She said that they were in contact with Con Ed to resolve the issue. 02/04/2009-HRAHMED-Spoke to KATHY PERKINS of NYCT @(646) 772-8236. She gave the contact info for this incident for NYCT : Jennifer Wutine (646 252 5768). As per Jennifer ConEd contacted the NYCT yesterday to inquire if the authority discover any oil in their tracks, as there is a feeder leak nearby 145 st & Broadway, NY. The Transit authority discovered oil and water mix coming in the tracks near that area. ConEd confirmed that it was dielectric fluid. ConEd is in process to hire a contractor to do the cleanup who have proper certification to do cleanup work in subway tunnel. The ConED contact person for this event is Michael Pillig (718 204 4256, 347 386 5506) and ConEd incident event ID: 214993. 2/5/09 - Raphael Ketani. I spoke to Michael Pillig (718) 204-4256/ cell (347) 386-5506. He said that the dielectric fluid was discovered at the train station at 145 Street and Broadway, but the origin of the spill is 1200 feet north in the Transit tunnel. This puts is below the M51 feeder at 150th Street. Also, this makes it the same spill (#0810802) that happened in 12/2008. The feeder is about 7 feet off of the curb at 150th Street, which puts it a few feet off of the tunnel. Transit will get back to Con Ed regarding the cleanup. The oil is seeping in and is floating on top of water in the tunnel. Con Ed is repairing the feeder. They will do a water percolation test in the excavation to see how the liquids travel to the tunnel. The amount of oil is 30 to 50 gallons right now. Transit and Con Ed are discussing who will clean up the spill. If Transit has the ability, then they will clean it up. However, if they can't, then Con Ed will. Though this will mean that the cleanup wont happen quickly as Con Ed will have to get a supervisor and 6 crew members track trained to be able to go onto the tracks. I asked Mr. Pillig whether the trains are still running.

TRACK BED (Continued) **S109414988**

He said they are passing by every few minutes. I presented this information to Randall Austin, Chief of the Spills Unit. He told me to get ahold of Liz DeLuca and to get Transit to talk to Con Ed and come to an agreement very soon as regards who will do the cleanup. I tried to contact Ms. DeLuca (917) 468-4232, but could only leave a message that Transit and Con Ed need to work out who will do the cleanup. I also asked that she call me back to discuss this. Ms. DeLuca called at 11:20AM. She said that Transit and Con Ed are working together to get Con Ed's staff track safety trained. A little while later, Mr. Austin talked to me about the case. He said that Ms. DeLuca told him that Miller Environmental Group and Clean Ventures both have crews with current Transit track safety training. So Mr. Austin told me to suggest to Mr. Pillig that Con Ed subcontract the work to one of these companies. I tried to contact Mr. Pillig, but I could only leave a message that Miller and Clean Ventures both could do the work if Con Ed can hire them as subcontractors. I asked Mr. Pillig to call me back with an answer. Raphael Ketani. I called Mr. Pillig (718) 204-4256 and asked him what Transit and Con Ed had decided regarding who will clean up the spill. He said that he talked to Ms. DeLuca and they figured out that there were three options. The first option is to have Transit clean up the spill with their own crews. The second is for Transit to hire Clean Ventures to clean up the spill and back bill Con Ed, which Con Ed is willing to do. The third option is for Con Ed to hire Clean Ventures, but also train a couple of staff members as Transit wants a Con Ed representative on site when the work is taking place. Mr. Pillig also said that if Con Ed does the work, then Transit wants a certificate of insurance and financial assurance. This is to pay for the costs of the cleanup and for general orders for permits to do the work. Mr. Pillig said that each general order costs $25,000 and the Con Ed lawyers would have to get involved. He said that Con Ed is willing to do this, but things will take a little longer to get cleaned up than if Transit hired Clean Ventures. In the end, Mr. Pillig said that Transit will pursue option one and let him know if they can't do it. I brought this to the attention of Mr. Austin and he said to contact Ms. DeLuca cell (917) 468-4232/office (718) 694-4271 and suggest to her that DEC feels that option two is the best way to go. I tried to contact Ms. DeLuca, but could only leave a message that DEC suggests going with option two and to call me back. I sent Ms. DeLuca an e-mail with the same message. 2/6/09 - Raphael Ketani. I received the following e-mail from Ms. DeLuca: Rafiel, I'll take your suggestion into consideration, however, the options were listed in order of best option first, worst option last . Option #2 will not be the easiest or fastest method for the cleaning. If we used that method, we'd have to request a General Order to stop train traffic since we'll have contractors on the tracks. This would not only be very costly to Con Edison and NYCT, but it would also disrupt service on the subway line and it would probably take about six weeks to get it approved. The easiest and fastest method would be #1, which is having NYCT personnel clean the area. NYCT personnel does not require a G/O to stop train traffic, we can work under traffic. This can be done any night during the week or weekend without disrupting service to the line. We'd require Con Ed to supply the materials for clean up and to have the tainted material properly disposed of, but we'd supply the manpower and labor. I've been trying to communicate with the night crew to see if they can assist us with this or not. I'll let you know what the outcome is. Thanks, Liz Raphael Ketani. I spoke to Ms.

TRACK BED (Continued) **S109414988**

DeLuca (718)694-4271. She said that she is going to have the same crew of workers as she used before clean up the oil. She said that the workers had been at the 150 Street and Broadway location and they put down absorbent pads. Now, they will do this at 145 Street. She said that they will put down the pads this sunday, wait for awhile and then collect the pads. If more need to be put down, then they will do it. Con Ed will reimburse Transit for the materials. However, if the seepage gets worse, then they will have to come up with an alternate plan. She said that Transit wouldn't have noticed the spill because the dielectric oil doesn't smell or have color. They found the oil because Con Ed told them to look for it. I asked her how much oil was released from the feeder cable. She said she was told that it was 3,000 gals. Ms. DeLuca said that she hopes that not all of the 3,000 gals. comes through the tunnel wall or that this goes on for many months, or else they will have to do something more and maybe get Con Ed to send in a crew. I told her to keep me informed. She said she will. 2/9/09 - Raphael Ketani. I tried contacting Ms. DeLuca to get an update regarding the spill, but could only leave a message. 2/10/09 - Raphael Ketani. Ms. DeLuca was out sick. So I contacted her boss, Dennis Varley (718) 694-1488. He said that he was on the tracks and saw the cleaning that was taking place from the period of sunday midnight to monday morning. He said that the Transit crew soaked up maybe 10 gals. with the pads. Mr. Varley added that Con Ed will have to get Clean Ventures to clean up the rest of the oil when the track is closed for service. What's holding things up now is that Con Ed needs to get a few of their people track safety trained so that they can watch Clean Ventures' crew work. Right now, the trains are running and there is no danger to the passengers or the trains operating. 2/12/09 - Raphael Ketani. Jennifer Wuotinen of NYC Transit sent me the following e-mail: NYCT night personnel cleaned a portion of the spill last night. They will continue to monitor to see if it reoccurs and we have worked out an arrangement with ConEd to be reimbursed for the cost of cleaning it in house. If a major clean up is warranted, then a longer term agreement with them will be worked out. I believe we are having a meeting sometime next week. I'll let you know about further developments as I hear about it. Thanks 2/17/09 - Raphael Ketani. I tried to contact Ms. DeLuca (718) 694-4271/(917)468-4232 to let her know that I couldn't make the 11:00AM meeting today due to a family medical emergency. No one went to the meeting in my place. Ms. DeLuca e-mailed me back. She said that no cleanup work took place over the weekend. She wrote that they are waiting until after the meeting to decide what actions will take place and who will do them. Later today, Ms. DeLuca sent me a synopsis of what was discussed at the meeting. In summation, it was determined that the oil is seeping into the tunnel and poses no danger to the environment or subway service. Ms. DeLuca said that the seeping is nominal. So, the NYCT will continue to use its crews to cleanup the spill. The night crew will visit the site once a week for three weeks and then the situation will be reassessed. Con Ed will hire a contractor to dispose of all waste materials. Questions to be answered are: Does the night crew have enough material to do the spill cleanup? What are the night crew's hours? What time do they expect to be at the site? Ms. DeLuca will find out whether the night crew was cleaning up the spill over the weekend. 2/18/09 - Raphael Ketani. I contacted Mr. Pillig (718) 204-4256/cell (347) 386-5506 and discussed Con Ed's remediation of the spill from the street surface excavation. He said that they initially dug a trench 18' long. The

TRACK BED (Continued) **S109414988**

feeder was in a rock trench. They sampled above the trench to the east, west, and south and had non-detects. The north end had a detect well above TAGM. So they dug a 28 foot trench down to bedrock and resampled. The sample came back very slightly above TAGM. Mr. Pillig will send the analytical results and a diagram showing where the samples were taken. They also did the percolation test. They lined and sandbagged the trench, and poured in the water. The water dropped one inch in the first 8 minutes and then very slightly for some minutes after. It finally seemed to reach a static point that day. After the weekend, they noted that the water level had fallen very slightly. Based upon the staining in the soil that was seen during the excavation and the percolation test, he believes that much less than 3,000 gals. were lost. However, he can't say how much. At the request of Randall Austin, Chief of the Spills Unit, I e-mailed Ms. DeLuca a suggestion that Transit should try to seal the wall through which the seeping is originating. Later, Mr. Pillig sent me an e-mail containing the diagram showing where the soil samples were taken in the trench, photos of the trench, and sample results. 2/19/09 - Raphael Ketani. Ms. DeLuca sent me an e-mail today regarding an e-mail response she had received from Steven Leahy and Robert Cioffi of Transit. The response regarded her inquiry as to whether the night crew could continue to do the cleanup of the spill in the tunnel. These individuals responded that each week thursday or friday at 1:00AM would be the best time to do the work. They asked her to pick the date. They said that Con Ed should come to the station (the 145 Street station?) and pick up the bagged waste. They added that they had enough cleanup material on hand, but the oil reappeared this past teusday. They will keep on it with the same number of crew members. I tried to contact Mr. Pillig (718) 204-4256 to find out whether Con Ed can or intends to install some means of collecting the spilled dielectric oil that is outside of the tunnel walls. However, I could only leave a message. 2/23/09 - Raphael Ketani. Mr. Pillig called me back. He said that the recovery well sounded like a good idea. However, he would like to continue the oil collection in the tunnel for the next few weeks and see how things go. He will contact Ms. DeLuca to see how the oil recovery went in the tunnel this past weekend, and let me know. If the oil keeps coming in, then a recovery well will be installed. 2/24/09 - Raphael Ketani. I received the following e-mail today from Ms. DeLuca: Con Ed will be picking up the accumulated waste this Thursday at midnight, NYCT will be cleaning again while they are there also. As of last week, there hasn't been any change, but I'll get an update Friday morning. I have spoken to Sharif Rahman of the Region 2 Spills Unit about this case. He has a case for the same dielectric spill as this one. However, his is the earlier case #0810802. Therefore, we agreed to close spill case #08102003 and transfer the management of the spill to his active case. 2/25/09 - Raphael Ketani. I tried to contact Mr. Pillig, but could only leave a message that the DEC wants the recovery well to be installed as soon as possible. I also let him know that this spill case was closed and that Sharif Rahman will be the DEC case manager for the site. "

Remarks: "Caller states a building with an unknown address is leaking some water and oil mixture onto the tracks. No further info available."

DEC Memo:	"160084. 07/27/05 20:30. S.Asfour#49908, of I&A, notified the control center on 07/27/05 at 20:15 hrs. to report he found approx. 4 gallons of dielectric fluid leaking from the Transformer in V9780, which is located on the south side of W.144 st 37' west of Broadway. S.Asfour #49908 was at this location to do maintenance on the transformer when he found the spill, he was working under account number #W3282 at the time. S.Asfour #49908 states that the transformer is still leaking.

VAULT 9760 (Continued) **S106970087**

There was no fire or smoke involved and no sewers or waterways were affected. There were no injuries related to this spill and the weather conditions did not contribute to the hazards of this spill. There was no private property affected. The source and cause of this spill was a leaking transformer. There is oil filled equipment in V9760, the transformer. There is no water in V9760. S.Asfour #49908 states that there is a sump pump, but it is unplugged and not running when he got there. There are no substantial cracks in V9760. A yellow environmental tag numbered #41944 was hung in V9760. There was one sample taken from V9760, for PCB's. The sample was marked priority E . The chain of custody form number is #DD13316. There was no intial cleanup action taken. The cleanup is pending Feeder Deenergization, lab results, crews and a tanker. Logger : M.Casalta #12684. "

Remarks: "no to five questions - faulty piece of equipment - ref 160084 - sample taken, cleanup pending the transformer coming out of service"

DEC Memo:	"e2mis no. 156017: Operating Supervisor, Stephen J Asfour, 49908 I & A North Reports that in process of doing an inspection at this location found that transformer oil was leaking from bottom of unit at a slow rate onto concrete floor and soil under unit. At this time he approximates that a half gallon of transformer oil has leaked out, but not able to determine a drip rate as of this time. Mr. Asfour will be requesting feeder 2M18 to come off line OOE/2 to do a safe partial clean up and determine damage. 2 liquid samples were taken from the spill, 1 for id and 1 for pcb. Sample priority E . Chain of custody #CC 17432. Sump pump unplugged. No oil to sump. Clean up pending transformer removal. Update 10-29-04 @ 18:29 Lab Sequence Number: 04-08926-001 TOTAL PCB 11 ppm Lab Sequence Number: 04-08927-001 Analysis indicates the presence of a transformer oil 12/21/04 18:40 D.Pace#13149, I&A supervisor, notified the control center on 12/21/04 at 18:30hrs. to say that the paritial cleanup in V4472 was completed. There was no solids removed and 420 gallons of oil and water mixed was removed via tanker from V4472. The method used to wash was double washed with slix. Update: 2/8/05 @ 19:15 hrs. Ed Hulser #39723, Operating Supervisor, Cable Dept. reported at 13:35 hrs. on 2/8/05 that a final cleanup was performed in vault V4472. Solids removed -- approx. one (1) drum capacity of sludge was removed from the vault by the Vactor truck. The walls and floor of the vault were doubled washed with Simple Green and rinsed by the Vactor truck. Liquids removed -- approx. 50 gallons of wash water was removed from the vault by the Vactor truck. Environmental Tag #41929 was removed. The cleanup crew consisted of Supervisor - Ed Hulser and Crew - Chris Gordon #04280 and Herman Rivera #18638. The defective transformer was removed and a new transformer was installed. The final cleanup was completed at 13:15 hrs."
Remarks:	"NO SMOKE FIRE SEWERS OR WATERWAYS, SPILL IS CONTAINED BUT NOT YET STOPPED: CONED # 15601"

DEC Memo:	"04/22/09-Vought-Duty desk officer. Called and spoke to EEA Sean Martin (516)746-4400x25 cell: 347 527 3246, fax:516-746-4432 and they are working on Phase I and in course of reviewing prior documents found Phase II in 2006 done by Impact Environmental who collected six soil samples around 1000-gallon AST. 3 out of 6 soil samples had xylenes above TAGM 4046. Roux Associates then abandoned AST in May 2007 and AST was emptied and 500 gallons of oil was removed and one 55-gallon drum of sludge removed and work was performed by Brookside Environmental Services and AST was filled with inert foam and fill and vent were cut and sealed. Property was renovated. Reports will be sent to DEC Ahmed upon confirmation by owner. CSL sent with one month due date to owner: Mr. Hal Cooke HEC Real Estate Group 2550 Fredrick Douglas Blvd New York, NY 10030 Ph: 212-234-4358 06/10/09-HRAHMED-Started reviewing Phase I Environmental Site Assesment Report prepared by EEA on 11/21/2006: As per Ms. Adrienne Collier of HBC Real estate group, the building will undergo significant renovations in the near future. It's a 5-story brick walk-up residential apartment building with a basement, ground floor store front spaces, and an attached 1-story structure used for commercial/retail occupancy. An oil-fired heating system is located in the basement. A fillport and vent were identified outside of the building along W 136 St. A strong petroleum odor was noticed in the basement. Odor was traced to a dirt-filled basement crawl space located in the vicinity of the fillport and vent. There was no record of fuel oil tank in NYC FD database. EEA recommended a Phase II investigation should be performed prior to any building renovation projects to determine the classification of any tank and the extent of contamination that was obvious. Phase II Environmental Investigation Report by Impact Environmental on Nov 21, 2006: 10/4/09-Vought-Received inquiry from DEC Ahmed as to further action for site as recent sub-slab soil vapor samples show up to 108ug/m3 PCE and indoor air shows up to 6.5ug/m3 PCE. Vought discussed site with DEC O'Connell and site will be made a potential P-Site and file review need to aid in site classification. As per notes above, Site is a 5-story brick walk-up residential apartment building with a basement, ground floor store front spaces, and an attached 1-story structure used for commercial/retail occupancy. Vought recommended to DEC Ahmed that consultants sample for full list VOCs and install vapor barrier/SSD as owner is wishing to redevelop soon. 7/19/10-HRAHMED-Received Subslab vapor intrusion investigation. As per the report, in SV2 location the PCE level was 108.56 ug/m3. As per the NYS DOH guidance further monitoring is required. Scheduled a site visit. 8/18/10-HRAHMED-Did a site visit. They removed the aboveground tank. Ask them to do two soil boring in two location at least five foot below surface. 1/13/11-HRAHMED-Received Phase II

APT BLD (Continued) **S109582120**

Environmental Subsurface Investigation Report. As per the report, A total of two (2) soil test borings were advanced on the subject property, in the area of a former 1,000 gallon aboveground fuel-oil storage tank. A total of two (2) soil samples were collected from these borings.Soil obtained from borings consisted of fill material ranging from 0-2 feet below grade in boring B-1 and 0-4 feet below grade in boring B-2. Beneath this fill layer, lays a brown, medium, silty sand with traces of fine gravel. No VOCs or SVOCs were found at levels exceeding NYSDEC TAGM guidelines in boring B-1; however, fifteen (15) VOCs, and two (2) SVOCs [Bis(2-ethylhexyl)phthalate and Pyrene], were detected at levels above laboratory method detection limits. Furthermore, soil obtained from the 4-5 foot section of boring B-1, contained a strong fuel-oil odor and readings as high as 220 parts per million (ppm) on the PID. No VOCs or SVOCs were found at levels exceeding NYSDEC TAGM guidelines in boring B-2; however, one VOC (Methylene Chloride) and one SVOC (Pyrene) were detected at levels exceeding laboratory method detection limits. In addition, a fuel oil odor and PID readings between 10-15 ppm, were obtained on soil from boring B-2. It should be noted that no chlorinated solvents were detected in soil samples obtained during this Phase II Subsurface Investigation. In B1 location xylene was detected at 600 ppd which is above CP51 guidance value. No PCE or TCE was detected. 3/1/11-HRAHMED-Discussed the results with RSE Austin. Based on the discussion, Department sent a requirement to take subslab, indoor, ambient vapor samples in SV2 location to evalute the current condition. 5/5/11-HRAHMED-Received additional round of subslab, indoor and ambient air sample results for SV2 location. As per the report, TCE concentration was 16.96 ug/m3 in subslab and PCE was not detected. 5/17/11-HRAHMED-Discussed the results with RSE Austin. Based upon the discussion, with only one VOC component (Xylene 600 ppd) over CP51 value and comparing the air sampling results with NYS DOH dicision matrix table (which suggests no further action), this case is closable. 5/24/11-HRAHMED-Discussed the results with Remediation Section A Chief Jane O'Connell. As per her, if petroleum contamination is cleaned up for the case the case can be closed. As ask to send the investigation reports to her to see if any further action is required for vapor intrusion. 6/14/11-HRAHMED-Based upon the document review, this case is closed. COMPLETE E-DOCS FILE REVIEW BY INTERN IBEH ON 8/25/11. 11/21/06. Letter from EEA Inc (Lucchese) to Ms. Adrienne Collier (HBC Real Estate Group 2471 Frederick Douglass Boulevard, Suite 6, New York 10027)attaching Phase I ESA. No on-site potable water supply wells were noted within the basement of the building or on exterior portions of the property. No monitoring wells were observed on exterior portions of the property, or imbedded within adjacent sidewalk areas at the time of site visit. Sanborn Fire Insurance Maps depict building as a 5-story residential apartment building with a basement, ground floor storefronts, and an attached 1-story structure used for commercial/retail occupancy. A fillport and vent, normally associated with the presence of fuel oil storage tanks, were identified outside near the northeast corner of the subject building along West 136th Street but no storage tanks noted in the area. Records searches returned no RCRA TSD sites, hazardous waste generators or other toxic release records for the property. 258 NYSDEC spill incidents were identified within an approximate 1/2-mile radius of the property, of which 219 have been closed by NYSDEC. The remaining 39 spill incidents were listed as active within Spills Log database. 11/21/06. Letter from Impact

APT BLD (Continued) **S109582120**

Environmental to Ms. Collier re: Phase II ESA. That Impact installed 6 soil probes on 10/20/06, SP1-SP6 and determined that the tank onsite was an AST enclosed in an aboveground tank vault within building basement. SP1-SP4 were installedproximal to the location of the existing AST running from east to west along southern side of tank. SP5 and SP6 were installed in the remaining portion of the nasement floor. Hydrocarbons were detected in all soil samples collected from the probes and one sample from each of the six probes was sent for analysis. 6/11/07. Letter from Roux Associates ot Ms. Collier re: AST Closure. That Roux has completed the closure of a 1,000-gallon heating oil AST at the property and that bassed on the lack of soil staining or free product in soil samples, as well as lack of SVOCs and only 1 VOC above regulatory criteria, it did not appear that AST had leaked or impacted soil to the extent requiring remediation. Approximately 500 gallons of oil ad one 55-gallon drum of sludge were removed from the tank on 5/14/07 by Brookside Environmental Services. The tank was then filled with inert foam with the fill and vent ports cut and sealed. Tank was also cleaned and sprayed to eliminate residual odor. 4/22/09. Letter from DEC Ahmed to Hal Cooke of address below: HEC Real Estate Group 2550 Fredrick Douglas Blvd New York, NY 10030 Ph: 212-234-4358 That on date above, the DEC was notified of a petroleum release on the above-mentioned address and Mr. Cooke was required to promptly clean up and remove the discharge . Also, a letter report was to be submitted to the department no latter than one month from the date of this letter. 4/27/09. Phase I ESA Report from EEA Inc to Hal Cooke for 3 properties viz: a) 2479 Frederick Douglass Blvd, Blk 1958, Lot 32 (ESA-08298) b) 270 W136th Str, Blk 1941, Lot 61 (ESA-08299) c) 2014-2016 Adam Clayton Powell Blvd, Blk 1926, Lots 33&34 (ESA-08300). Previous investigations conducted were found and are summarised as thus. A previous Phase I ESA of 8/2006 performed by EEA on the subject property was discovered and it noted that a fillport and vent line, indicative of an onsite fuel oil tank, were found outside the subject building on the sidewalk fronting 136th street. Petroleum odo was noted in building basement indicative of a leak but the tank could not be located during the inspection. As a result, a Phase II was recommended to locate tank and determine potential contamination. An 11/2006 Phase II ESA was conducted and the tank was located and identified as an AST fuel oil tank containing 1,000 gallons of oil. 6 soil samples were taken around the AST and 3 of these samples showed elevated Xylene concentrations above state guidelines thus further action was recommended. Subject property is ~2,490ft2, is relatively flat and is improved with a five-storey residential apartment building with a basement. Subject building has 2 apartment units, 6 of which were occupied at the time. According to historical information, subject property was constructed pre-1909 as residential apartment building with a basement and commercial storefront. No evidence for recognized environmental conditions that could have affected subsurface soils. No fillports or vent lines indicative of storage tanks were found within the building or on exterior portions of it as of EEA's 11/2008 site visit and it was concluded that the storage tank was likely removed from the basement during total gut rehabilitation of the site. An NYCFD search request confirmed the tank-1,080-gallon fuel oil tank- as being sealed and removed from the property. A search in the DEC's Inactive Hazardous Waste Disposal Site Registry lists 1 property within a 1 mile radius of subject property: New York City Public School No. 141, 2350 Fifth

APT BLD (Continued) **S109582120**

Avenue, New York(NYSDEC Facility ID 231004). Subject property was not identified in this Registry. Spills log did not identify property but 302 spill incidents were identifies within a half-mile radius of subject property. 10/9/09. Letter from DEC Ahmed to Hal Cooke. Stating that the Departent requires delineation of soil and groundwater contamination via determination of groundwater flow direction, submission of surrounding area site map and former/current locations of all USTs, remote fill ports and dispenser islands and performance of indoor air monitoring. 01/2011. Phase II Environmental Subsurface Investigation prepared for NY Residential Works, 347 Lenox Ave, NY, 10027 by EEA Inc. 2 soil test borings were advanced in the area of the former AST and 2 samples were collected using a hand auger as basement area was inaccessible to Geoprobe and and drill rigs. PID screenings conducted and samples taken from depth exhibiting the highest PID reading or 5ft bgs. No VOCs or SVOCs were found at levels exceeding NYSDEC TAGM guidelines in boring B-1; however, 15 VOCs, and 2 SVOCs [Bis(2-ethylhexyl)phthalate and Pyrene], were detected at levels above laboratory method detection limits. Furthermore, soil obtained from the 4-5 foot section of boring B-1, contained a strong fuel-oil odor and readings as high as 220 parts per million (ppm) on the PID. No VOCs or SVOCs were found at levels exceeding NYSDEC TAGM guidelines in boring B-2; however, one VOC (Methylene Chloride) and one SVOC (Pyrene) were detected at levels exceeding laboratory method detection limits. In addition, a fuel oil odor and PID readings between 10-15 ppm, were obtained on soil from boring B-2. No chlorinated solvents detected at this point. 04/2011. Phase II Soil Vapor Intrusion Monitoring Program prepared for NY Residential Works by EEA Inc.- Previous soil vapor intrusion investigation conducted in June 2010 (by EEA) found PCE concentrations in subslab that required further monitoring in sample location-SV-2. DEC contacted property owner for another round of soil vapor intrusion investigation as well as another sample from SV-2. Fuel odor present upon entrance to basement. 1 indoor air, 1 outdoor air and 1 sub-slab soil vapor (SV-2) sample were collected from property basement. Results- VOCs detected in sub-slab, indoor and outdoor air samplesat concentrations exceeding method detection limits. TCE concentrations were below lab detection limits for sub-slab, indoor and outdoor air samples; PCE concentrations were 16.963ugm-3 for sub-slab vapor sample and below detection limits for indoor and outdoor air and according to NYSDOH Indoor Air Matrix 2, no further action required for PCE. DEC requires: 1) Clarification of 4/2011 Site Map for soil vapor. SV-1 put in legend and in Table of Analytical Results but SV-2 indicated inside storage room on Map. "

Remarks: "CALLER STATES THAT THEY GOT TEST RESULTS BACK SHOWING CONTAMINATED SOIL. CLEAN UP STATUS UNK."

DEC Memo:	"4/11/11-Vought-Primary off hours responder. Spill assigned to DEC Feroze as part of routine minor Con Ed Spill portfolio review and possible closure. Initial EMIS report #225386 added to Cross Reference Field, downloaded into e-docs and deleted from proxy. As per EMIS 5 oz of unknown oil mixed in approximately one pint of water in the dirt of an open excavation on the W/S Broadway 30' S/O W143rd Street. Samples being collected for PCB and oil identification and All State Power Vac notified by Transmission Operations. Vought called Con Ed ERT and spoke with Niel Skow(Ph:212-580-8383)for update and to request followup notification once petroleum id is received. Skow will return call to Vought with more information. Vought received callback from and spoke to Con Ed Skow and excavation was being dug for installation of a freeze pit and All-State excavated soil to top of sewer line and excavation is already framed and boxed out as per Skow. Analyticals indicated oil was dielectric fluid. Vought required endpoint sidewall soil samples analyzed for EPA Method Modified 8100 and requested copy of anlayticals and Skow will send via email. 7/25/11 - Austin - 5 oz spill, product identified - no further action needed - Con Ed contained and cleaned up the spill - See eDocs files for more information - Spill closed - end"
Remarks:	"1157 THE CALLER ADVISED DISPATCH THE SPILL WAS FOUND AND THE AMOUNT IS ONE OUNCE. SOIL HAS BEEN IMPACTED. THE CLEAN UP IS PENDING UNTIL RESULTS OF TESTING."

DEC Memo:	"162040. At 1553 hours the Leak Committee declared an oil leak on 345kV transmission feeder M51. The leak rate is approx. 600 Gallons per hour, it is estimated that 1200 gallons has leaked from the feeder so far with approximately 25 gallons reported leaking into the environment. No oil has been reported in any sewers or waterways. An incident command post has been set up in an upgraded level at West 155th Street between St. Nicolas and Edgecombe Avenue’s. The incident Commander is Larry Crilley, the communicator is Brian McGeever who can be reach at 347-386-4069. The spill is currently contained and a tanker, a vactor truck and New York City Sanitation are in route to the location. The OEM, DEP and Con Edison Environmental response team are on location. There were no injuries or media reported. 16:39 Allstate cleanup contractors on site. Logged by: D. Gaynair 20079 AT 14:25 CSD notified TO of feeder fault and large oil leak on M51. At 14:35 TO was notified by Manhattan #9 of a large oil leak at a manhole on 155th St and St.Nicholas Ave in Manhattan. NYFD on site pumping oil from manhole into 55 gallon drums. Sand was placed around manhole to prevent further loss to street. TO crews sent to location. Allstate power vac notified to respond. Additional crews sent to

FEEDER BREAK (Continued) **S107488664**

close valves in stop joint MH 63639. Additional crews sent to deliver oil from E16th St to W49th St. Chem lab notified to take samples. At 16:30 Allstate tanker on site and setting up to pump manholes. At 17:20 manhole was pumped down and TO crews attempting to install clamp. Leak reported as 8 long and 2 wide on top of 10 feeder pipe. At 17:30 the 10 stop joint valves were closed. At 18:10 5 valves in stop joint were closed. At 18:18 TO crews reported that temp clamp was installed. clamp continues to drip but is contained in half drum under pipe. As of 19:15 ERT PAul Walsh will be making notifications that 25 gallons of dielectric fluid was lost to the environment and 4650 gallons was contained and captured with a tanker. VS 78367 11/26/05 17:35. Nov. 26, 2005. 20:38. Lab Sequence Number: 05-12533-001 < 1.0 ppm E 608/8082 UPDATE: Leon C. Paretsky, Transmission Operations, NOV 27-2005 1230 hrs. (a) The following is the Incident Command System chronology prepared by Brian McGeever: Con Edison, Emergency Response Group, Substation Operations, Incident Briefing M51 Feeder Leak: Date / Time: 11/26/05 14:01 Incident Type: M51 OA with dielectric oil leak.. Location: F/O 404 W 155th St between Edgecombe Ave and ST Nicholas Ave in Manhattan Injuries / Evacuations: None Environmental Impact: ~ 25 gallons of dielectric oil on the sidewalk, Street, and private car from M62579, which is located on an incline. Property Damage: Private car White Mini Van, NYS Plate# CUV-8584 Customer Outage: None Media: NoOutside Agencies: FDNY Chief O'Kelly, FDNY HAZMAT 1, NYPD Capt Wishnia 33rd PCT, DEP Hazmat Mahendra Rawnarine, & Nick Loaknanth, DEP Sewers Andrew Kelly. Vendor All State Power Vac Equipment Overview: Hole in the 10 dielectric pipe on feeder M51 in M62579 Narrative: At 14:01 Transmission Feeder M51 opened auto with a loss of oil pressure. A CNS message was sent out for a conference call for the leak committee. Shortly after the FDNY reported to MECC that oil was coming from a Manhole in front of 404 W 155th st. MECC notified TO, and requested tankers from Astoria. ERT Paul Walsh responded. ERG McGeever was notified via text message, and Vern Shaffer notified Lawrence Crilley. ERG Natale called ahead to find out status and have FDNY request sand trucks. At TOA FDNY Hazmat laid sand down grade from M62579 to stop free flowing oil. In addition FDNY HAZMAT started pumping oil from M62579 to keep the oil level from over flowing onto the street. W 155th St was closed between ST Nicholas Ave & Edgecombe Ave. Building 404 (parking garage) had oil on the facade, along with a private vehicle mentioned above. 15:31 Command Post established. At this time ~25 gallons of oil are on the street, and 1 gallon in the catch basin on the S/W/C of Edgecombe Ave & W 155th St, but did not appear to enter the waterway. On site at this time are FDNY Chief Donnelly & Chief O'Kelly, NYPD Capt Wishnia from the 33rd Pct along with ME #9 OS T. Carey & ERT Paul Walsh. I (Brian McGeever) assumed the White Hat. 15:40 Conference call leak committee updated on status. FDNY is in progress on maintaining the oil level and preventing in from overflowing into the street by pumping out the oil in M62579 into 55-gallon drums. Tankers have been ordered, #9 OS Carey requested Vac Truck, McGeever called OEM for additional sanders. Natale will call for police escort for tanker. 15:42 TO OS L. Crilley on site being briefed. Chem Lab on site to take sample. 15:45 TO OS L. Crilley will be the IC, ERG McGeever will be the Communicator, and ERT Paul Walsh will be the EH&S Officer. 16:00 OEM requested Police escort for tanker from Astoria. ME will send a small dump truck, barricades, and drums. OEM reports DSNY is in the middle of a shift change and will provide sand spreaders as soon as they

FEEDER BREAK (Continued) **S107488664**

can. 16:14 DEP on site being briefed. OEM responder A. Timlin on site being briefed. FDNY is running out of drums and have removed 500 gallons at this time. TO has crews in route with drums. 16:18 TO Crew #1 Jason Hypolite, M. Cintron, and Morgan Donald are on site with additional drum FDNY continuing to pump and maintain oil level. ME Environmental OS Tracy Taylor is on site. TO OS A. Nardis on site and is the OC. 16:32 All State Power Vac Tanker (5000 gallon capacity) on site. 16:43 All State Power Vac Tanker in progress. 16:55 ME Vactor #1 Kevin Hyde & Mike Godfrey on site in staging area. CFS Manager Bob Anderson on site. FDNY is requesting the MSDS sheet be emailed to FH. 17:15 ERT P. Walsh reports the e2mis # is 162040. Safeway Contractor is on site. 17:19 CE tanker on site and is in staging area. IC request 2nd tanker to structure. Tanker being positioned. ERG Natale on site. Safeway Contractor Backhoe and Dump Truck full of sand on site and staged. DSNY Sand spreaders on site being staged. 17:31 IC requests sample to be taken from the source. The hole in the pipe is visible. OS Tracy reports additional Vactor and small dump truck are on site in staging area. Vactor #2 Mr. Raeford, and Small Dumper is Mr. Leverock. 17:56 Sample being taken from feeder M51. Fitting on pipe near break is being grinded off in order to make previsions for clamp. All State Tanker has 4,600 gallons and is pulling off site. IC requesting Vactor out of staging area to keep two trucks at the site. CE Tanker 80411 is in progress. Manager R. Foster called for update and reports he will have additional pressure reduction on the feeder. 18:13 BX/West Spill Van on site in staging area D. Walker and S. Spann. 18:10 Clamp in place leak slowed and is now at 30 gallons per hour. Bob Anderson reports CE Tanker is at TB Bridge toll plaza and in route. DEP Kelly issued a Commissioners order # E22715 to repair pipe, and clean all affected area. 18:30 Vac #1 off site. 18:45 Tanker on site Vac #2 moved out, and Tanker moved in place. 18:46 CP meeting with the following people: IC L. Crilley. EH&S P. Walsh & L. Paretsky. Environmental OS T. Taylor. Logistics Bob Anderson. ERG A. Natale. OC A. Nardes. Comm B. McGeever. OEM A. Timlin. DSNY J. Torres Temp clamp is in place, oil is at 30 gallons per hour, All State will clean building (404 W 155th St, sidewalk, street, private car, and driveway to Getty Gas Station. OEM will have PD keep street closed. Garage will re-open in the morning. A larger clamp is being sent from Astoria. FD wants replacement clamps for the ones the supplied (6 & 12) One light tower is on site, and the 2nd is in route. FDNY is off site. Police will maintain a secure area. ERG Natale gave MSDS to FDNY. ERT P. Walsh will provide all agencies with the sample results from Chem Lab. IC reports the break is at 75’ elevations according to diagram. OEM updated. All trucks from ME are being released at this time along with the Spill Van from BWE. DSNY Sanders are being released also. Safeway Dumper with Backhoe will remain in staging. 19:05 Meeting ended. 20:30 Photo on site. 20:45 DEP HAZMAT is discussing sample return time with EH&S. Senior System Operator Brian Horton called for update. At this time two tankers one CE and the other All State Tanker have taken 4,600 gallons of oil each, FDNY pumped out 715 gallons of oil into 13 drums, and 25 gallons of oil were released onto the street with one gallon in the catch basin. 20:55 CE tanker reports they have taken 4,600 gallons. Total gallons captured at this time are 9,915. 21:45 2nd clamp is on the pipe is at a slow drip. The incident is being down graded to Routine. Clean up and oil recovery are still in progress. 22:10 Tanker driver reports from Astoria that the load on level ground read at 3,500 gallons, not 4,600. Total changed to 8,815 gallons. 23:36 Senior System Operator

FEEDER BREAK (Continued) **S107488664**

Brian Horton updated with site contact supervisor Robert Tremberger phone # (646) 235-2474. Command Post has been disassembled. (B) The following are the PCB sampling results. (1) Lab Sequence Number: 05-12533-001. < 1.0 ppm. (C) Cleanup activities. The folllowing cleanup plan was developed and implemented: Transmision Operatsions EH&S L. Paretsky on site till 0430 hrs, Sunday, Nov 27th,; M. Albani from 0400 hrs til 1200 hrs Sunday Nov 27th, at which time the cleanup activities described below were completed. * The affected areas of the garage building were cleaned by Allstate. The cleanup proceeding west to east (along the direction of the incline of the street). The concrete/brick facade was power washed; the roll-up door was hand washed. * The sidewalk and street was cleaned, again proceeding west to east. Speedy dry/aabosrbent was placed on the street/sidewalk, removed, and then the surfaces were cleaned with a detergent, scrubbing in, and then power washed. A bood was placed downstream of the cleaning area to contain and help collect any runoff. * The car in the area was cleand and then removed by the owner * There were tracks into the gas station at the southwest corner of 155th St & St Nicholas Place. The gas station area was cleaned. *The catchbasin on the southwest corner of W155th St &7 St Nicholas Place was cleaned. The debris in the basin was removed and the basin was then washed. * There was some staining inside the garage (404 W155th St). When the garage opened on Sunday, Nov 27th, it was cleaned. * A service box southwest of the feeder manhjole was opened and inspected for the presence of any oil from the incident. The service box was found to be dry. (D) Permanent Repairs A permanent repair barrel is being installed by Transmission Operations. Per Don Schaaf, project manager, Transmission Operations anticpate completing repairs at about 1300 hrs. (E) A NYCDEP Commisssioner's order was issued. The following email summarizes the order: From: Duke, David Sent: Sunday, November 27, 2005 3:23 AM To: dl - Environmental Response Team Cc: Paretsky, Leon Subject: Commissioner's Order for the cleanup of TO Manhole 62579... Commissioner's order E22715 for W.155th Street & Saint Nicholas Avenue in Manhattan (e2MIS 162040) DEP Inspector Andrew T. Kelly (Badge #67) issued a Commissioner's Order on November 26, 2005 for the 10,000 gallon spill of Transmission Feeder Dielectric fluid in ConEd Manhole # 62579, located at W.155th Street & Saint Nicholas Avenue, Manhattan, NY. The order states the following: Pursuant to the authority of Commissioner of the Department of Environmental Protection, as set forth in the New York City Chapter and Administrative Code, including, without limitation, Sections 24-523 and 24-524 of the Administrative Code and Rules of the City of New York relating to the Use of the Public Sewers, 15 RCNY, Chapter 19, the above named party is herby ORDERED to take the following actions at the premises located at W.155th Street & Saint Nicholas Avenue in Manhattan immediately after receiving this ORDER. Administrative Code Section 24-524(a): Specific details of corrective actions: 1) Must repair the damaged feeder line so that it does not leak oil. 2) Must remove via certified environmental agent, the oil that spilled. 3) Clean-up must include the catch basin at W.155 Street & St. Nicholas Place, the sidewalk, street, and the 55 gallon drums. Based upon the above cleanup activities, the Commissioners' order was satisfied. (F) Per the attached Email from Mike Daughtrey ERT, the start time of the incident was revised 1553 to 1449 hrs. Mike Based upon the above, the first reported time and the report to env services will also be changed to 1449 hrs. This is distinct from the feeder leak times, which were 17:05 and 18:03, respectively.

FEEDER BREAK (Continued) **S107488664**

Remarks:	Discussed latter revisions with Paul Walsh, ERt. L Paretsky, Transmission Operations. Closed. 12-28-05. see eDocs. GB " "unknown amount of dielectric fluid coming out of manhole cover on to the street. 162040"

DEC Memo:	"02/14/17-Hiralkumar Patel. alternate address: 3458-3468 Broadway no other spills found. PBS #: 2-604130. as per PBS record, the site has one (1) 5,000 gal #2 oil AST in contact with soil, in-service, installed in Jul. 1995. as per NYC DOB records, a permit application was approved on 11/15/1993 to replace dry cleaning machine and equipment supports in existing store. another permit application was approved on 02/08/1999 to install dry cleaning room with vapor barrier system, and install F.A.I and exhaust fan. 1:04 PM:- spoke with Chris. he mentioned that site has multi-family residential building including dry cleaner. due to historical and current use of dry cleaning operation at the site, bank asked for Phase II investigation as part of refinancing. PVE Shaffler collected indoor air samples and subsurface soil samples. asked Chris to submit available sample results and site sketch with sample locations for review. Chris mentioned that the 5,000 gal #2 oil AST is out-of-service. based on findings of soil contamination, he is preparing a work proposal including removal of the tank and associated contamination. 1:08 PM:- spoke with Ms. Sloan, property manager. informed her about discussion with Chris and incorrect PBS record. Birdie 141 Broadway Associates, LLC. **property owner** c/o Stellar Management 156 William Street, 10th Floor New York, NY 10038 Attn.: Candice Sloan Ph. (212) 843-3559 email: csloan@stellarmanagement.com Chirstopher Brown PVE Shaffler PH. (845) 454-2544 (724) 444-1100 (914) 475-2650 email: cbrown@pve-llc.com 1:20 PM:- sent email to Chris and asked him to submit site map with sample locations and results of soil and soil-vapor/indoor air samples. also asked him to submit copy of Phase I report, if available. email copied to Ms. Sloan. 1:27 PM:- sent email to Ms. Sloan including PBS application. asked her to submit PBS application to correct tank status. email copied to Chris. 02/16/17-Hiralkumar Patel. received email from Chris (at 5:43 PM on 02/15/17) including site map and results of soil and groundwater samples. site map included locations of soil and groundwater samples. eight soil borings were installed and total of sixteen soil samples were collected. one groundwater sample was collected. no contamination found in soil or groundwater samples. email missing information about vapor study and boring/well logs. 9:12 AM:- spoke with Chris and asked him to submit results of sub-slab/indoor air samples and site map with sampling locations. 9:15 AM:- left message for Ms. Sloan to submit results of sub-slab/indoor air samples. 9:19 AM:- sent email to Chris and asked him to submit site map with vapor sample locations, results of sub-slab/indoor air samples and detailed soil boring/well logs. email copied to Ms. Sloan. 02/23/17-Hiralkumar Patel. 1:04 PM:- left message for (and sent email to) Chris and asked him to immediately submit site map, boring/well logs and results of soil-vapor samples. email copied to Ms. Sloan. 02/24/17-Hiralkumar Patel. 11:41 AM:- received email from Chris including boring logs and results of sub-slab/indoor air samples. Chris mentioned that due to lack of chlorinated VOCs in sub-slab samples, he believes that concentration of VOCs in indoor air (basement) are a results of leaky piping which

APT BUILDING - PHASE II (Continued) **S120700355**

directs air exhaust from dry cleaning equipment through the basement and out of the building. based on boring logs, borings were installed to different depths: - boring SB-1 was installed to 6 ft depth; groundwater was found at 5.5 ft bg; no indication of contamination; two soil samples were collected; groundwater sample was not collected - boring SB-2 was installed to 8 ft depth; groundwater was found at 7 ft bg; no indication of contamination; two soil samples were collected; groundwater sample was not collected - boring SB-3 was installed to 8 ft depth; groundwater was found at 6 ft bg; no indication of contamination; two soil samples were collected; groundwater sample was not collected - boring SB-4 was installed to 8 ft depth; groundwater was found at 7 ft bg; no indication of contamination; two soil samples were collected; groundwater sample was not collected - boring SB-5 was installed to 8 ft depth; groundwater was found at 6 ft bg; petroleum odors were noted throughout boring; 130.7 ppm recorded on PID at 4-6 ft bg; two soil samples were collected; groundwater sample was not collected - as per site map, a groundwater sample was collected near boring SB-5 ---------- - boring SB-6 was installed to 10 ft depth; groundwater was found at 8 ft bg; no indication of contamination; two soil samples were collected; groundwater sample was not collected - boring SB-7 was installed to 12 ft depth; groundwater was found at 10 ft bg; no indication of contamination; two soil samples were collected; groundwater sample was not collected - boring SB-8 was installed to 10 ft depth; groundwater was found at 8 ft bg; no odors were detected, but recorded 228.1 ppm on PID at 6-8 ft bg; two soil samples were collected; groundwater sample was not collected - four sub-slab vapor samples and two indoor air samples were collected - found chlorinated solvent contamination in sub-slab and indoor air samples soil-vapor analyticals (ug/m3):
----------SS-1------SS-2------SS-3------SS-4------IA-1------IA-2
TCE--------150----------46--------26--------29---------4
PCE------7,300-------110-------930-------710-----4,200-----4,100
based on submitted sample result tables and boring logs, indoor air and sub-slab vapor samples were collected on 07/28/2016, and soil and groundwater samples were collected on 01/23/2017. but spill was not reported until 02/06/17. ---------- 11:56 AM:- left message for Chris. 12:45 PM:- spoke with Chris. he mentioned that as there is no chlorinated solvent contamination in sub-slab soil or groundwater samples, chlorinated VOCs in sub-slab vapor samples may be result of absorption of indoor air into sub-surface through basement concrete. he believes that leaking piping on dry cleaning unit is the source of chlorinated VOCs in air samples. asked Chris to call DEC Jane to discuss soil-vapor study results. 12:52 PM:- left message for Ms. Sloan. 12:56 PM:- left message for Scott Smith (212-682-2001, ssmith@hunterpa.com), whose name is included in email from Chris. discussed with DEC Jane and informed her about detection of chlorinated solvents in sub-slab and indoor air samples. she requested discussion with Chris. 12:59 PM:- sent email to Chris and asked him to contact DEC Jane. email copied to Ms. Sloan, Mr. Smith and Conor Tarbell (ctarbell@pve-llc.com). discussed with DEC Vought. based on high results of chlorinated solvent VOCs in sub-slab and indoor air samples and due to site's use as residential building, Vought suggested to refer this case to DEC Gandhi also as possible issues with on-site dry cleaning operation. discussed with DEC Gandhi and informed him about site's use and findings of chlorinated solvent VOCs in sub-slab/indoor air samples. he requested copy of sampling

APT BUILDING - PHASE II (Continued) **S120700355**

results. 1:11 PM:- forwarded Chris's email to DEC Gandhi. email copied to DEC Jane and DEC Vought. 04/04/17-Hiralkumar Patel. 11:09 AM:- left message for Chris. 04/05/17-Hiralkumar Patel. 9:32 AM:- received call from Chris. he mentioned that they have not met DEC Jane yet and property owner/operator has not taken any action to address chlorinated solvent contamination in soil-gas/indoor air. 04/07/17-Hiralkumar Patel. after discussing with DEC Jane, case transferred to Jane as only chlorinated solvent contamination noted in sub-slab and indoor air samples."

Remarks: "contamination based on sample results"

Site Description: Location: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in the borough of Manhattan, City and State of New York. Site Features: The site is approximately 1.54 acres, and is entirely occupied by a building. The building is comprised of three connected sections: a two-story section along Fifth Avenue, a three-story section in the center, and a one-story section to the west. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200 to 300 feet east of the site. Following completion of remediation,

2350 FIFTH AVENUE CORP (Continued) **1000108749**

the site is currently occupied by a self-storage facility and a charter school. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or perc) as a cleaning solvent. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building. Currently the site is use for self storage facility and for art studio space. Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.

Env Problem: Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were tetrachloroethene (PCE) and its breakdown products [trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), vinyl chloride (VC)] in soil, groundwater and soil vapor and sub-slab insulation material. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil, groundwater, soil vapor and sub-slab insulation material is being managed under the Site Management Plan.

Health Problem: People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement and the on-site building. Volatile organic

2350 FIFTH AVENUE CORP (Continued) **1000108749**

compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Site-related contaminants were historically found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air guidelines. To minimize the potential for the inhalation of site-related contaminants, a sub-slab depressurization system was installed beneath the building. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Site-related contaminants were historically found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air guidelines. To minimize the potential for the inhalation of site-related contaminants, a sub-slab depressurization system was installed beneath the building. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

City,State,Zip: NEW YORK, NY 10037
Site Code: 57691
HW Code: 231004
Control Code: 13
Control Type: ENG
Date Record Added: 11/04/2014
Date Rec Updated: 07/23/2019
Updated By: YYWONG
Site Description: Location: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in the borough of Manhattan, City and State of New York. Site Features: The site is approximately 1.54 acres, and is entirely occupied by a building. The building is comprised of three connected sections: a two-story section along Fifth Avenue, a three-story section in the center, and a one-story section to the west. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200 to 300 feet east of the site. Following completion of remediation, the site is currently occupied by a self-storage facility and a charter school. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied

2350 FIFTH AVENUE CORP (Continued) **1000108749**

by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or perc) as a cleaning solvent. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building. Currently the site is use for self storage facility and for art studio space. Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.

Env Problem: Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were tetrachloroethene (PCE) and its breakdown products [trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), vinyl chloride (VC)] in soil, groundwater and soil vapor and sub-slab insulation material. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil, groundwater, soil vapor and sub-slab insulation material is being managed under the Site Management Plan.

Health Problem: People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement and the on-site building. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Site-related contaminants were historically found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air guidelines. To minimize the potential for the inhalation of site-related contaminants, a sub-slab depressurization system was installed beneath the building. Environmental sampling indicates soil

Currently the site is use for self storage facility and for art studio space. Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.

Env Problem: Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were tetrachloroethene (PCE) and its breakdown products [trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), vinyl chloride (VC)] in soil, groundwater and soil vapor and sub-slab insulation material. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil, groundwater, soil vapor and sub-slab insulation material is being managed under the Site Management Plan.

Health Problem: People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement and the on-site building. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Site-related contaminants were historically found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air guidelines. To minimize the potential for the inhalation of site-related contaminants, a sub-slab depressurization system was installed beneath the building. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Site Code: 57691
Site Description: Location: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in the borough of Manhattan, City and State of New York. Site Features: The site is approximately 1.54 acres, and is entirely occupied by a building. The building is comprised of three connected sections: a two-story section along Fifth Avenue, a three-story section in the center, and a one-story

2350 FIFTH AVENUE CORP (Continued) **1000108749**

section to the west. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200 to 300 feet east of the site. Following completion of remediation, the site is currently occupied by a self-storage facility and a charter school. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or perc) as a cleaning solvent. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building. Currently the site is use for self storage facility and for art studio space. Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building. Currently the site is use for self storage facility and for art studio space. Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.

Env Problem: Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were tetrachloroethene (PCE) and its breakdown products [trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), vinyl chloride (VC)] in soil, groundwater and soil vapor and sub-slab insulation material. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil, groundwater, soil vapor and sub-slab insulation material is being managed under the Site Management Plan.

Health Problem: People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement and the on-site building. Volatile organic

2350 FIFTH AVENUE CORP (Continued) **1000108749**

compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion.
Site-related contaminants were historically found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air guidelines. To minimize the potential for the inhalation of site-related contaminants, a sub-slab depressurization system was installed beneath the building. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Site Code: 57691
Site Description: Location: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in the borough of Manhattan, City and State of New York. Site Features: The site is approximately 1.54 acres, and is entirely occupied by a building. The building is comprised of three connected sections: a two-story section along Fifth Avenue, a three-story section in the center, and a one-story section to the west. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200 to 300 feet east of the site. Following completion of remediation, the site is currently occupied by a self-storage facility and a charter school. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or perc) as a cleaning solvent. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or perc) as a cleaning solvent. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building. Currently the site is use for self storage facility and for art studio space. Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and

2350 FIFTH AVENUE CORP (Continued) **1000108749**

approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.

Env Problem: Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were tetrachloroethene (PCE) and its breakdown products [trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), vinyl chloride (VC)] in soil, groundwater and soil vapor and sub-slab insulation material. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil, groundwater, soil vapor and sub-slab insulation material is being managed under the Site Management Plan.

Health Problem: People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement and the on-site building. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Site-related contaminants were historically found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air guidelines. To minimize the potential for the inhalation of site-related contaminants, a sub-slab depressurization system was installed beneath the building. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Site Code: 57691
Site Description: Location: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in the borough of Manhattan, City and State of New York. Site Features: The site is approximately 1.54 acres, and is entirely occupied by a building. The building is comprised of three connected sections: a two-story section along Fifth Avenue, a three-story section in the center, and a one-story section to the west. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200 to 300 feet east of the site. Following completion of remediation, the site is currently occupied by a self-storage facility and a charter school. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the

FINDS:

Registry ID: 110000808074

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

VCP: Voluntary Cleanup Agreements
New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing
In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Data Release Frequency: Quarterly

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 06/11/2019

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

UTM Y (Meters):	4519493.0
Elevation:	28 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5940599 CENTRAL PARK, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

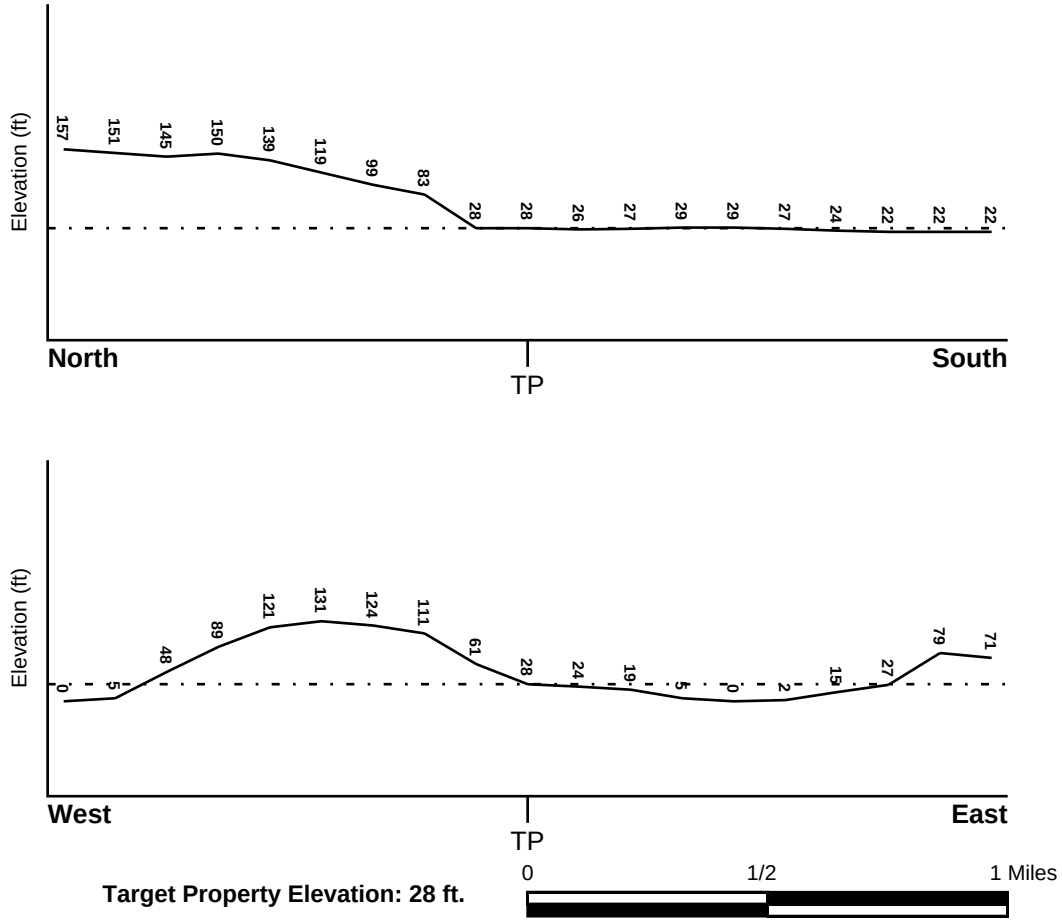
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 28 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3604970079F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
3604970083F	FEMA FIRM Flood data
3604970087F	FEMA FIRM Flood data
3604970091F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CENTRAL PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
4	1/2 - 1 Mile WSW	W
1G	1/2 - 1 Mile WSW	W

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT **GEOLOGIC AGE IDENTIFICATION**

Era:	Paleozoic	Category:	Stratified Sequence
System:	Ordovicias		
Series:	Lower Ordovician and Cambrian carbonate rocks		
Code:	OC *(decoded above as Era, System & Series)*		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

FOIL Request :: W063028-122719

1 message

New York DEC Support <newyorkdec@mycusthelp.net> Fri, Dec 27, 2019 at 3:53 PM
To: "emenos@akrf.com" <emenos@akrf.com>

Dear Emmanuelle :

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 12/27/2019 and given the reference number FOIL #W063028-122719 for tracking purposes. You may expect the Department's response to your request no later than **1/28/2020**.

Record Requested: **Records pertaining to: underground storage tanks (USTs), spill records, remediation sites, dump sites, soil and groundwater remediation, storage of hazardous materials, and/or hazardous materials activities for 2735 Fredrick Douglass Boulevard and 2737 8th Avenue (Block 2045, Lots 13 and 14) New York, NY**

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

The Department of Environmental Protection (DEP) has **closed** your FOIL request FOIL-2019-826-06025 for the following reasons:

- A diligent search for records responsive to your request did not locate any such records. Accordingly, your request is denied.

You may appeal the decision to deny access to material that was redacted in part or withheld in entirety by contacting the agency's FOIL Appeals Officer: foilappeals@dep.nyc.gov within 30 days.

FOIL #: 19-12-375

Dear Ms. Menos:

This letter responds to your Freedom of Information Law (FOIL) request of December 27, 2019, in which you requested environmental records pertaining to "2735 Fredrick Douglass Boulevard and 2737 8th Avenue . . . New York, NY."

Please be advised that after conducting a diligent search, no records responsive to your request have been located.

Additionally, please note that the addresses are served by the New York City public water system (NY7003493). Any violation reports for the public water system can be found at the following link:

http://www.health.ny.gov/environmental/water/drinking/violations/previous_compliance_reports.htm

Should you feel that you have been unlawfully denied access to records, you may appeal such denial in writing within 30 days to the Records Access Appeals Officer, Division of Legal Affairs, Empire State Plaza, 2438 Corning Tower, Albany, New York, 12237-0026.

If you require additional information or wish to discuss this matter further, please do not hesitate to contact me at (518) 474-8734.

Sincerely,

Rosemarie Hewig, Esq.
Records Access Officer

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

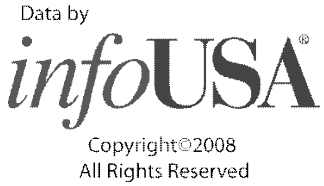
Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.



RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.
