MALCOLM X APARTMENTS CORP. (Continued) **A100183214**

Tank Info:

Tank Number:	001
Tank Id:	61667
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

	F00 - Pipe External Protection - None
	C01 - Pipe Location - Aboveground
	A00 - Tank Internal Protection - None
	B01 - Tank External Protection - Painted/Asphalt Coating
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	H00 - Tank Leak Detection - None
	L09 - Piping Leak Detection - Exempt Suction Piping
	G00 - Tank Secondary Containment - None
	J02 - Dispenser - Suction Dispenser
	I05 - Overfill - Vent Whistle
Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	04/20/1973
Capacity Gallons:	2000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported

Spiller Company:	999
Contact Name:	GEORGE CUNNINGHAM
DEC Memo:	"They say the spill was cleaned, but this must be confirmed. Need to get contact phone number from Mark Tibbe 7/18/07 - Raphael Ketani. One hundred and fifty gallons of hydraulic oil spilled from a broken line at lift #9 at the bus depot. I tried to call Sherry Bulkley at (646) 252-5774 to find out whether the oil had been cleaned up, but could only leave a message. I talked to George Cunningham (646) 252-3607 at NYC Transit. He said that the oil was contained and the floor of the shaft is solid concrete. He said they will power wash the elevator shaft and collect the wash fluid. He will get back in touch with me. 7/19/07 - Raphael Ketani. Mr. Cunningham called me back. He said that 800 gals. of total liquids were removed from the shaft. Groundwater had been seeping in. After they pumped out the shaft, more water entered. The lift is not going to be used ever again and has been shut down for good. The walls of the lift will be powerwashed. The entire depot will be demolished in one year due to the other oil leaks/releases and tank problems at the site. It will be a giant cleanup of the grounds of the site. Mr. Cunningham added that he will send me a manifest for the removed liquids and a letter describing the events. 08-02-07: Reassigned to tibbe from Ketani. Spill is within the area of excavation of a larger remediation/construction project. Any residual contamination will be addressed at that time. 08/16/07: The investigation and remediation (if warranted) will be performed during a large remedial and construction project at this depot. The depot is slated to be demolished and rebuilt in 2008. An SSRP/RD is being prepared to address all of the known contamination and to investigate any areas where contamination is suspected, namely the lifts and associated pits. Refer to 98-13017. 06-17-08: Closed and consolidated under 8902374."
Remarks:	"BROKEN HYDRALIC COUPLING- LIFT #9; HAS BEEN CLEANED;"

FINDS:

Registry ID: 110001610891

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the

NYCTA (Continued) **1000140959**

estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Tank Info:

Tank Number:	009
Tank Id:	6506
Material Code:	0009
Common Name of Substance:	Gasoline

MOTHER CLARA HALE BUS DEPOT (Continued) **U003074372**

Equipment Records:

A00 - Tank Internal Protection - None
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
D02 - Pipe Type - Galvanized Steel
F00 - Pipe External Protection - None
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None
I04 - Overfill - Product Level Gauge (A/G)
J02 - Dispenser - Suction Dispenser

Tank Location:	Aboveground in subterranean vault with access for inspections..... Tank in subterranean vault but accessible for inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	12/01/1982
Capacity Gallons:	4000
Tightness Test Method:	-
Date Test:	Not reported
Next Test Date:	Not reported

DEC Memo:	"6/16/2016: Rashad PBS 2-189995. Called Daniel he said tank test was on tank DSL-3A which is a 10,000 gallon diesel tank. There was no discharge and the tank is now out of service. His email is danielyu@nyct.com (send TTL to Francine and cc Daniel). 6/17/2016: Rashad Emailed TTF letter to Francine and uploaded it to D2. 721 Lenox Ave has alternate addresses of 721-735 Esplande Gardens Plaza, 101-165 West 46th Street, and 100-162 West 47th Street. Numerous previous spills exist for depot. 6/27/2016: Rashad Received email from Francine with closure letter. As per the report A petroleum release did not occur from the primary piping of the underground storage tank UST. The cause of the failure was a faulty diaphragm valve. The UST was temporarily taken out of service on June 16, 2016. The line leak detector and diaphragm were replaced on June 20, 2016 and retested on the same date. The test passed and the system was put back into service. Report uploaded to D2. Spill closed as no release occurred and repairs made. "

DEC Memo:	"Obligado - Desk Duty - 2-18-16 - I called Richard Isayere. Left a message to call back the NYSDEC. Richard Called me back. They are all underground tanks. According to Franklin, the testing company, there was no loss of product, No sign of leak. They will conduct further investigation. Richard said they will conduct more tests tomorrow and will update us upon completion of the tests if any additional tanks failed. Summary for PBS # 2-189995 3 tanks failed tightness test 1 antifreeze - failed hydrostatic test GEN1 - failed Hydrostatic test DSL-2A - Over fill prevention valve on diesel tank Assigned to Kumar Patel. 2-24-16 - Obligado - Update from Richard. One additional Motor Oil tank M/O-1A also failed the tightness test. No apparent spill or loss of product to the environment. 03/28/16-Hiralkumar Patel. 1:37 PM:- left message for Richard. 3:33 PM:- received message from Richard. 03/29/16-Hiralkumar Patel. 9:02 AM:- left message for Richard. 3:24 PM:- received message from Richard. 04/20/16-Hiralkumar Patel. 1:47 PM:- left message for Richard. 2:56 PM:- received call from Richard. he asked to contact Josephine Brown. 3:03 PM:- spoke with Ms. Brown and inquired her about tank test failures. she will

NYC-TA MOTHER CLARA HALE BUS DEPOT (Continued) **S103559730**

review record and submit information/documents. Josephine Brown MTA Ph. (718) 566-3415 email: Josephine.brown@nyct.com 3:22 PM:- sent email to Ms. Brown and asked to submit information about tank size, tank location, cause of failure, repair activities and cleanup of any petroleum discharge. also asked to submit copy of result of subsequent tank system test confirming its integrity. 04/25/16-Hiralkumar Patel. received email from Ms. Brown (at 5:08 PM on 04/21/16) including document confirming cause of failure and actions taken. - 1,000 gal tank for waste anti-freeze (tank # WANTI-1) failed hydrostatic sump test due to sump seam walls and penetration fitting not being tight. containment sump seams repaired by using a fiberglass made adhesive and penetration boot repaired with by installing a new penetration boot. there was no release to the environment. containment sump passed the integrity test after repairs. - 2,500 gal tank for motor oil (tank # M/O-1A) failed hydrostatic sump test due to sump walls not being tight. repaired by using a fiberglass made adhesive. there was no release to the environment. containment sump passed the integrity test after repairs. - 10,000 gal tank for diesel (tank # DSL-2A) failed overfill prevention inspection due to piece of 2 inch pipe (drop tube) missing on bottom of overfill prevention valve. a section of 2 inch pipe was installed to the bottom of overfill prevention valve. there was no release to the environment. as per the submitted document, a fourth tank (5,000 gal diesel tank # GEN-1) also failed hydrostatic test due to penetration boots not being tight. there is no information about repairs made on tank # GEN-1. as per discussion between DEC Andrea and Richard, three underground tanks [1 antifreeze and two diesel tanks (GEN-1 and DSL-2A)] failed test. on 02/24/16, Richard called DEC Andrea and informed him about failure of one more tank (motor oil tank # M/O-1A). 11:51 AM:- sent email to Ms. Brown inquiring about status on 5,000 gal diesel tank (GEN-1). after discussing with DEC Leszek about 5,000 gal diesel tank system failing hydrostatic test due to penetration boot not being tight, no further investigation needed and case can be closed on available information. case closed based on available information."

Remarks: "there was 2 tank test failure."

NYC-TA MOTHER CLARA HALE BUS DEPOT (Continued) **S103559730**

Spiller Company: MOTHER CLARA HILL BUS
Spiller Address: 721 LENOX AVE
Spiller Company: 001
Contact Name: JAIKISAN
DEC Memo: "02/10/06. Feroze. Talked with Mr. Jakisan Achaibar 646-252-5772. All fuel is in secondary cointainment. They will submit DEC all documents regarding cleaning the site. 02/10/06-Hiralkumar Patel. Left message for Jaikisan at 3:20 PM. Spoke with Jaikisan. as per him, whatever spill happened its contained in secondary container. both hydrolic lifts are lock out/tag out. on monday, private contractor will come and suck the mixture of water and oil. Jaikisan will call me once they clean site on monday 13th Feb. 02/14/06-Hiralkumar Patel. Left message for Jaikisan. 02/16/06-Hiralkumar Patel. Left message for Jaikisan. Spoke with Jay at System Safety. as they suck out oil and water mixture from pits, they did water level test. among the four pits (pit# 4, 5, 8 & 9) they found three pits (pit# 5, 8 & 9) were leaking. and pit # 8 & 9 had accumulated oil (inch or so). Jay told me that they had spill previously and had plume underground and the site is under remediation. now because two pits accumulate some oil, CPM Remediation group is handling site and investigating. URS consultants is the company who is doing remediation work on site. Jay call back with more information and results of remediation group's investigation. as per him, DEC Mark Tibbe is handling all the site under remediation for NYC transit. Discussed with Mark and Koon in remediation. Mark is working with two different plumes on the same site. as Mark talked with guy at site, the lifts are away from the site where the plume was previously. so it is probably not related to previous plumes.(Refer Spill# 8902374) Spoke with Jay. they have taken some samples for fingerprint and as they get results, Jay will call back. 02/23/06-Hiralkumar Patel. Left message for Jaikisan. 02/24/06-Hiralkumar Patel. Left message for Jaikisan. Spoke with Jay. they haven't got results yet. once he will get result, he will call back. and depends on results this project will go to remediation department in transit. 03/03/06-Hiralkumar Patel. Received call from Jay from Transit. he got sample results and all three samples came back with confirmation that it is lubricating oil. now remediation department at Transit is handling this case. he will update me on this case as he gets information. Received copy of lab results. if we need any information, call Jay at system Safety. 04/04/06-Hiralkumar Patel. Spoke with Jay and he still don't know whether this site will be remediated under remediation section or not. he will call back. Received fax from Jay. abstract of letter: - Source of spill/leak identified: over a period of time, product (hydraulic fluid) and sludge accumulated in all four pits (# 4, 5, 8, 9) due to broken line, and poor seal in piston - Source of Spill/leak was stopped: brokken hydraulic fluid line, poor seal were replaced and lift load test was performed as part of MP2 preventive maintenance. - Spill cleaned: AB Oil removed 1029 gals of oily water and 1 cy of sludge and pressure washed all 4 pits. refer to AB Oil Work orders (3 18739, 18738) and manifests (# 18738, 18739) - Samples taken: samples were collected from two of the lift pits and hydraulic fluid reservoir, and analyzed by URS subcontractor laboratory. the finger print analysis identified the product as hydraulic fluid - Disposal of contaminated waste: AB Oil transported and disposed the oily water, and the sludge as non-hazardous industrial waste. - Investigation required/Refer to CPM: lost water in pit # 5 and gained water in pits # 8 & 9 during standing water test. CPM needs to investigate for any

NYC-TA MOTHER CLARA HALE BUS DEPOT (Continued) **S103559730**

potential product plume in the bus lift area. 06/06/06-Hiralkumar Patel. Left message for Jay. Received call from Jay. he hasn't heard from CPM section and doesn't know whether this will be investigated under existing remediation or will be addressed separately. 07/10/06-Hiralkumar Patel. spoke with Jay. they are still working to determine who will handle this case. 08/31/06-Hiralkumar Patel. left message for Jay. 12/01/06-Hiralkumar Patel. left message for Jay. 12/11/06-Hiralkumar Patel. received message from Racheal from NYC transit. Jay is no longer handling spills. as per Racheal this spill has been transferred to their remedial investigation unit in NYC Transit. Racheal will be call back with more information. **Once MTA Remediation department takes over this case, ask Randy who will handle this case: me or Remediation section of DEC.** 08/16/07: The investigation and remediation (if warranted) will be performed during a large remedial and construction project at this depot. The depot is slated to be demolished and rebuilt in 2008. An SSRP/RD is being prepared to address all of the known contamination and to investigate any areas where contamination is suspected, namely the lifts and associated pits. Refer to 98-13017. 06-17-08: Closed and consolidated under 8902374."

Remarks: "ALL IN A CONTAINMENT AREA, AROUND THE HYDRALIC LIFTS"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE transfered from Hale to Tibbe on 12/27/00. see also 89-02952,89-04241, 91-06264, 93-04003, 96-06076, 01-02743. tanks repaired/replaced/upgraded. remediation ongoing. See also 98-13017 for waste oil plume. 12/19/07: Since the depot is slated to be demolished, NYCT has decided to remove as much of the contaminated soil and LNAPL as physically possible. They submitted an SSRP/RD for excavation, which was approved. At the time of the remediation, Spill #s 05-13028, 07-03983 & 06-10604 will be investigated and if necessary remediated. 06-17-08: Spill #s 9813017, 0513028, 0610604 & 0703983 have been closed and consolidated under this number because all of the spills will be remediated at the same time. 11/12/10 - spill re-assigned from Tibbe to Joe O'Connell 5/19/2011 The spill was reassigned from Joe O'Connell to Linda Ross 2/27/12 - Raphael Ketani. Site was transferred to me during February 2012. 4/26/12 - Raphael Ketani. The DEC was informed during the monthly meeting that depot construction is still taking place. 5/28/13 - Raphael Ketani. I reviewed the March 2013 Monthly Status Report for all of the subject NYCT bus depot sites. More wells were destroyed as a result of the ongoing construction. Only two wells are left. These are at the east end of the property. 5/29/13 - Raphael Ketani. Gregory Mathelier (212) 252-3470/cell (646) 765-0336, Construction Administrator for the NYCT bus depot sites, sent me the May 2013 Engineering Report for Site Remediation Through In-situ Solidification/Stabilization of the oil contaminated soil (prepared by URS). Mr. Mathelier stated in the text of his e-mail that: The subject Final Engineering Report (FER) prepared by our consultant (URS) for the In-situ Solidification/Stabilization (ISS) performed at the Mother Clara Hale Bus Depot is attached. This report presents a background of remedial investigations performed at the site, the bench scale study conducted prior to the ISS and documents the pilot tests and full scale open-pit mixing for ISS performed within the footprint of the site. The goal of the ISS Program was to solidify contaminated petroleum-impacted soil within the footprint of the site as a means of remediation; this method was approved by the NYSDEC. The ISS program was implemented by Hayward Baker, a subcontractor to NYCT s Remediation Contractor, Franklin, through a bench scale study, a pilot study and a full-scale treatment (ISS) that covered delineated areas of petroleum-impact within the footprint of the site. The results of the bench scale study confirmed the effectiveness of the ISS for the established criteria for unconfined compressive strength, permeability and reduced leaching potential. I reviewed the report.

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

5/31/13 - Raphael Ketani. I finished reviewing the ISS report. The Site Specific Remedial Plan was approved during July 2009. The remedial method specified is in-situ solidification/stabilization (ISS). Franklin Company Contractors substantially completed the work by October 4, 2010. The report was prepared in compliance with Subparagraph III.E.4.i of the Consent Order. From 1993 to 2010, numerous investigations were performed. Various product recycling methods were used with limited success. The old building was demolished, but long sections of the 9 foot high retaining walls were left in place. Subsurface structures were also present within the old footprint. DEC agreed to using solidification/stabilization if it could be demonstrated that unconfined compressive strength equal to or greater than 50 psi, permeability of equal to or less than 1 X 10-6 cm/sec and reduced leaching potential towards achieveing groundwater standards could be achieved. First, bench scale tests were done. Two design mixes were successful - one for diesel oil areas, and one for waste oil and hydraulic fluid areas. They used a 3:1 ratio dry mix of slag and Portland cement. A 6% mix with soil was used for the waste oil and hydraulic lift areas. An 8.5% mix with soil was used for the diesel oil areas. Hayward Baker Inc. performed the solidification/stabilization work. The work started on 2/3/10 and finished on 10/7/10. The work took place with maximum volume 100 cu. yd. cells and each cell had to be completed the same day. The treatments were in 6' x 20' cells aligned perpendicular to the walls. Interior cells were 10' x 25'. A minimum period of 7 days was required between treatment in a given cell and treatment of an adjacent cell. The work was done by removing the surficial structures, removing the overburden and structures on a cell by cell basis, pre-clearing the treatment zone on a cell by cell basis via excavation and structure removal, and finally the application and mixing of the ISS mix. The soil was mixed in an open pit with a mixing head. The soil was mixed with grout consisting of type I/II Portland cement, granular blast furnace slag and water. The pit was mixed from bottom to top of each cell. There were 19 subareas of mixing. The DEC required sampling of the grout to insure that the results were unifiorm and compliant. Tests were done regarding permeability and 56 day breaks for data regarding the curing. Four wet samples were obtained from each cell - 2 from the bottom and 2 from the top. The samples were formed into 3 in. by 6 in. cylinders for strength testing via ASTM D2166. Cylinders were formed 3 in. by 3 in. for permeability testing via ASTM D5084. Other cylinders were formed 2 in. by 4 in. for leachability testing via method ANS/NSI 16.1. Slump tests were performed by Franklin staff for bottom samples only. Pilot tests were done by Hayward Baker on 11 cells in diesel oil area H on 3/18/10, but it rained heavily during the tests and the cells ended up with 2 feet of water at the top. New pilot tests were performed on 3/19/10 in waste oil area A and a second test and a third test were performed in diesel oil area D on 3/19/10 and 3/22/10, respectively. The fourth pilot test was performed in hydraulic lift area P. Full scale work started with a rich mix as a contingency against excessive water. The full scale mixing started on 3/22/10. A retaining wall was found in front of the west wall. This required a change from the open pit mixing method. The new method involved the installation of 2 rows of grout columns (secant piles). Each column was 36 inches in diameter and 16 feet deep. There were 33 columns per row. Also, holes were drilled through the toe of the retaining wall and grout was injected beneath the wall and between

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

the columns and foundation wall. Seventy six 6 inch diameter holes were drilled. The grout columns were installed from 8/11/10 to 8/17/10. Later, from 8/19/10 to 9/7/10, another 66 columns were installed - most of which were 26 inches in diameter as the larger diameter cutting head had broken. The open pit mixing east of the columns was completed on 9/13/10 and grouting in the toe holes was completed on 9/28/10. Only 2 of the 1,000 grout samples did not meet the 50 psi compressive strength criteria. However, the 28 day break samples were satifactory. So no action was required. Thirteen of the 1,000 grout samples did not meet the permeability criteria. URS staff expected that they would meet the criteria as they would cure. So no action was warranted. The leachability results were given to the DEC, but not included in the report. All of the samples were deemed to have met the reduced leaching potential such that the goal of meeting the groundwater standards was achieved, if practicable. About 26,500 cu. yds. of soil was treated through ISS. An additional 100 cu. yds. was treated using low pressure grouting. Areas were backfilled with treated soil and 6,100 tons of recycled concrete aggregate to the level of the pre-remediation grades. Scope variance: due to the groundwater rise as a result of the heavy rain, clean soil layers nearer to the surface were contaminated. An agreement was reached between the DEC and the NYCT to raise the vertical limit for soil treatment. Due to staining along the southern wall of the excavation, a 21' x 23' x 12' area south of areas O and P was treated. About 7,300 tons of unimpacted structures and debris were disposed of off site. Additionally, 6,100 tons of fill were imported to bring the site up to grade. A larger than anticipated quantity of overburden soil was treated - 4,575 cu. yds. In order to address the variances, the contract was extended to 10/18/10. I found the report to be acceptable and approved it without comment. 1/28/15 - Raphael Ketani. I reviewed the January 5, 2015 Site Specific Investigation Work Plan for the Confirmatory Soil and Groundwater Investigation. The investigation is being implemented in order to verify current contamination conditions beneath the sidewalks on the north and east sides of the building and in order to gather information to develope alternative recommendations, if warranted, to address any residual contamination. Fifteen (15)borings will be installed using the direct push method. Up to 4 will be groundwater probes. These will be performed where there is no soil contamination in order to be able to sample just dissolved analytes in the groundwater. Up to 3 borings will become wells. Groundwater is 8 to 10 feet bgs. Soil and groundwater samples will be collected and will be processed via methods 8260 and 8270. The soil samples will be taken with 4 foot macrocores. The borings will end at 20 feet bgs. If contamination is found, then the borings will continue until clean material is encountered. The wells will be screened from 5 to 17 feet below grade. The wells will be sampled one week after development. Purging and sampling will use a low flow method. One composite soil sample from the waste material drums will be collected and sent off to the lab for waste characterization. I found the SSIWP to be acceptable with one comment. The waiting time between well development and sampling of one week was too short. By general environmental practice, well sampling should not take place any sooner than one month after development. Preferably, sampling should take place at least 3 months after development. I drafted a letter stating that the DEC was approving the SSIWP, but that well sampling must not take place any sooner than one month after well development. The letter

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

was submitted to Hassan Hussein, EE III and head of Unit C, for his review and approval. 2/5/14 - Raphael Ketani. Mr. Hussein approved the letter and it was sent out today. 9/29/15 - Raphael Ketani. There have been repeated attempts by the NYCT to gain access to well MW-30R in order to conduct groundwater monitoring. However, these attempts had all failed as the superintendent of the building had continuously refused to grant access to the well which is behind a locked fence. Yesterday, Ms. Cadecia Josephs, assistant to Gregory Mathelier, sent me an email with the names of two people in the NYCHA who may be able to provide access to this locked location. These people were Brian Honan (brian.honan@nycha.nyc.gov) and Keith Mitchell (keith.mitchell@nycha.nyc.gov). Today, I sent an email to Mr. Honan and Mr. Mitchell requesting their help with the situation. 11/16/15 - Raphael Ketani. As I had not received an email from Mr. Honan or Mr. Mitchell regarding providing access to well MW-30R, I sent another email to them requesting their assistance. I included Mr. Mathelier [(212) 252-3470/cell (646) 765-0336, Construction Administrator] as a c-c. Soon afterwards, Mr. Honan sent me an email asking when the NYCT would need to gain access to MW-30R. I responded that he should coordinate access with Mr. Mathelier of the MTA-NYCT. Mr. Honan is the Director of the Office of Intergovernmental Relations (212) 306-8108. Mr. Honan added Luis Ponce and Brian Clarke to the email he had sent when responding to me. Later, Mr. Ponce sent me an email stating that he will contact Mr. Mathelier in order to resolve the matter. 4/20/16 - Raphael Ketani. Ms. Cadecia Josephs, assistant to Mr. Mathelier, sent me an email containing the following work schedule: Below is our proposed initial schedule for the Mother Clara Hale Supplemental Investigation: Monday, May 2, 2016 Geophysical survey. Initiate sidewalk saw-cutting and guzzler pre-clearing activities. Tuesday, May 3, 2016 and Wednesday, May 4, 2016 Continue sidewalk saw-cutting and guzzler pre-clearing activities. Thursday, May 5, 2016 through Tuesday, May 10, 2016 Soil boring and groundwater probe installation activities. Wednesday, May 11, 2016 through Monday, May 16, 2016 Soil boring and groundwater monitoring well installation activities. Tuesday, May 17, 2016 through Tuesday, May 24, 2016 Sidewalk flag repair Tuesday, May 31, 2016 Well development and survey of sample locations. Thursday, June 30, 2016 Groundwater sampling of newly-installed monitoring wells. Please note that these dates may change based on the findings of the investigation and/or any input from the Depot AGM during our site meeting next week. AARCO is currently coordinating for NYCDOT permits, which will take some time and is driving the start date 2 weeks from now. 9/28/17 - Raphael Ketani. Today, at a general remedial progress meeting for NYCT bus depots and related properties, Mr. Mathelier gave me the NYCT September 2017 Confirmatory Soil and Groundwater Investigation/Petition for Spill Closure Report for the site that was written by staff from Dvirka & Bartilucci Engineers and Architects. I gave the report today's date as the date of publication as none was indicated. 10/2/17 - Raphael Ketani. I began my review of the Confirmatory Soil and Groundwater Investigation/Petition for Spill Closure Report. 10/3/17 - Raphael Ketani. I finished my review of the Confirmatory Soil and Groundwater Investigation/Petition for Spill Closure Report. The Mother Clara Hale depot had 3 known types of subsurface petroleum impacts: diesel fuel, waste oil and hydraulic oil. An estimated 44,354 gallons of total liquid was released from leaking USTs, their associated piping and the oil/water separator system. A total of 7016 gallons of product was recovered, but only

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

during the early years of the remediation process. Only wells MW-13R and MW-30R remained after the new depot building had been constructed. Petroleum impacts were identified at 3 to 16 feet below grade. The majority of the impacts were within the zone of groundwater fluctuation which was at 8 to 10 feet below grade. Up to 3.6 feet of product had been measured in one well (MW-12) in the southeast corner of the site. No free product was found in the hydraulic lift areas. On site impacts were addressed through In Situ Soil Stabilization (ISS). The intent of ISS was to immobilize the residual soil contamination. Before ISS could be performed, all subsurface structures were removed (i.e. foundations) and clean soil. Contaminated soil was mixed with water, cement and ground furnace slag. ISS was initiated during February 2010. Off site impacts found at MW-10R, MW-11R and MW-12 were addressed as a separate remedial activity. URS (previous consulting company) did an off site delineation investigation during February 2010. It consisted of conducting 15 soil borings within the sidewalk and street to the north and east of the depot. Free product was found at borings B-84, B-85 and B-86. These locations were identified as the former area of the remote diesel fills. Samples from B-77, B-78, B-84 and M-86 had soil VOC exceedances above the clean up criteria. Samples from B-87 and B-90 exceeded the SVOC cleanup criteria. Though the draft Shallow Excavation and Surfactant Flushing SSRP/RD dated September 2010 was written by URS, it could not be implemented as the new depot construction was taking place. Dvirka & Bartilucci (D&B; the current consulting company) wrote an SSIWP for conducting confirmatory borings and a groundwater investigation in order to verify the current conditions in these areas. The SSIWP was approved by the NYS DEC on 2/5/15. The program was implemented by D&B from May 9th to the 26th of 2016. A total of 24 borings, 4 groundwater probes (MCSB-04, 09, 13 and 18 and later renamed MWGP-01 to MWGP-04), 4 wells and soil and groundwater sampling were conducted along the northeast sidewalk and around the southeast corner. The total depths of the borings varied from 20 to 25 feet below grade. Both the soil samples and the groundwater samples were analyzed for VOCs and SVOCs. The screens for the groundwater probes and wells were installed from 5 to 20 feet below grade. The wells were sampled on 7/13/16. The free product program took place based on the results of this investigation. The enhanced petroleum monitoring and recovery program took place from May 2016 to June 2017 and consisted mostly of VEFRing from May 2016 to May 2017. It was implemented due to the appearance of free product at MCMW-02 and MCMW-03. Forty seven soil samples and 9 groundwater samples were collected from 5/6/16 to 7/13/16 as part of the confirmatory soil and groundwater investigation. The soil under the site was determined to be tan to brown with fine to medium subangular sand with varying amounts of fine to medium gravel, silt, cobbles. A thin layer of anthropogeneic fill covered the natural soil. Groundwater was encountered at 9 to 13.75 feet below grade. Oil staining and odors were found in 22 of the 24 soil samples at depths from 6 to 22 feet below grade. The borings with the most significant contamination were at MCSB-16 to 22 and 24 at depths of 10 to 15 feet bgs. Hydrocarbon odors were present in the purge water from MCMW-01 to MCMW-04. Nine groundwater samples were taken from groundwater probe locations MCGP-01 to 04, MCMW-01, 02 and 04 and MW-13R and MW-30R. MCMW-03 consistently had product from 0.13' to 2.29' (1/11/16 sample) thick and MCMW-02 had 0.01' of product on 9/9/17. Product was recovered using manual methods during the last month of monitoring.

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

The product in MCMW-03 was reduced to 0.01 feet thick or less since the 4/20/17 monitoring event. No product was observed in any well on 5/26/17. An additional 15 gallons of product was recovered at MCMW-02 and MCMW-03, which brought the total amount of product recovered for the site to 7044 gallons. I reviewed Appendix B - Boring Logs and Appendix C - Monitoring Well Construction Logs and had no comments. Next, I reviewed Appendix D - Investigation Analytical Data Tables. Here were listed the soil and groundwater analytical results from sampling which had taken place during May 2016. Specifically, the soil sampling took place on 5/6/16, 5/9/16, 5/10/16, 5/13/16 and 5/23/16 to 5/25/16. The VOC concentrations for the soil samples from locations MCSB-01 to MCSB-25 were either entirely non-detect, mostly non-detect or had mostly very low results which did not exceed the CP-51 unrestricted residential standards. Exceptions to this were MCSB-01 (10-11.5 foot interval) with 4 exceedences to 20 ppm, MCSB-04 (10'-12') with 1 exceedence to 2.5 ppm and MCSB-09 (10'-12'), MCSB-10 (6'-8'), MCSB-11 (6.5'-8.5'), MCSB-12 (7'-9'), MCSB-16 (10'-12'), MCSB-17 (10.5'-12.5') and MCSB-18 (10.5'-12.5') each with 4 low to moderate (0.13 ppm to 76 ppm) VOC exceedences consisting of isopropylbenzene, n-butylbenzene, n-propylbenzene and sec-butylbenzene. MCSB-09 had 4 VOC exceedences which were in addition to those previously mentioned. The SVOC soil results for all of the samples were almost entirely non-detect, except for MCSB-07 (10'-12') and MCSB-15 (6'-7.5'). Groundwater was sampled from MCGP-01 to MCGP-04 on 5/13/16 and from MCMW-01 and MCMW-02 on 6/13/16. The VOC analytical results were mostly non-detect or below the TOGS 1.1.1 standards, except for the VOC results for benzene (2.8 ppb to 15 ppb), isopropylbenzene (12 ppb to 40 ppb), n-butylbenzene (7.2 ppb to 16 ppb), n-propylbenzene (8.5 ppb to 72 ppb) and sec-butylbenzene (6.5 ppb to 25 ppb). Also, MCGP-02 had 130 ppb of naphthalene and MCMW-02 had 24 ppb of naphthalene. The SVOC results were almost entirely non-detect for all of the samples mentioned above, except for 3 low exceedences in the sample from MW-13R. Samples were analyzed for soil DRO (diesel range organics) on 5/9/16 and 5/25/16. The results were 180 ppm to 20,000 ppm. [Reviewers note: the results indicate the presence of low to moderate contamination under the northeast and southeast sidewalks, but removing it would be difficult due to the utilities just under these areas]. Appendix E - Data Validation Checklist was reviewed. The Organic Analyses were determined to be mostly acceptable in performance with only a small number of unacceptable performances. The exceptions to the acceptable determination were internal standard areas below or above the QC limits for various analytes for a number of soil sample VOCs and SVOCs. Appendix F - Waste Disposal Documents. I found the documents to be fully signed and, thus, acceptable. In the Conclusions and Recommendations section, D&B found that the soil contamination had been either immobilized or stabilized. They recommended no further investigating or remediation of the soil and the groundwater. They also stated that the spill is not migrating from the site. As per the above information, staff from D&B asked that the spill case be closed. 10/4/17 - Raphael Ketani. Based upon my review of the case file and the information in the Confirmatory Soil and Groundwater Investigation/Petition for Spill Closure Report, I determined that as much free product had been collected as was feasible, that the great majority of the soil contamination was permanently contained by the solidification and stabilization process, the groundwater contamination was very low and that there was little or no risk of

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

the residual contamination affecting the public or the environment. I wrote a Spill Closure Letter and sent it to Mr. Mathelier for closing spill #8902374, Mother Clara Hale bus depot. I closed the spill case effective 10/4/17. 12/20/17 - Raphael Ketani. Today Mr. DeVinney [MDeVinney@db-eng.com/(516) 364-9890 X 3054] sent me the following email: As you are aware, D&B is currently in the process of properly decommissioning the monitoring wells at Mother Clara Hale Depot following closure of the open spill number at the site. During the decommissioning process, we identified approximately 1.4 of free-phase petroleum in MCMW-03. All other monitoring wells did not contain any measureable free-phase petroleum. As a result, we halted decommissioning activities at MCMW-03 and would like to setup a conference call with NYSDEC to discuss this issue. Please let us know your availability for a call today and what time would be good for you, and I will distribute call-in information. I responded by email and asked what the reason could be for the sudden appearance of so much oil in the well. I suggested illegal dumping of waste oil or a spill from a neighboring building. Next, I suggested a conference call anytime up to 4 PM today and up to 2:30 PM tomorrow. I noted that I would be out all day Friday. Later, a conference call was held at 2 PM. In attendance were Gregory Mathelier, Construction Administrator at the NYCT, Cadecia Josephs, Geologist at the NYCT and assistant to Mr. Mathelier, Matt DeVinney and Stephen Tauss from Dvirka & Bartilucci, Vadim Brevdo and myself. Mr. DeVinney led the discussion. He proposed fingerprinting the oil. Mr. Mathelier asked whether the oil looked like the same product that had been seen earlier in the year. Mr. DeVinney stated that they had opened up well MCMW-03 during the summer and had seen the same product. However, he wasn't sure whether this was hydraulic oil from the pocket on the other side of the depot. Mr. DeVinney added that large concrete structures were installed below the depot and that the oil may have traveled across the top of them. The oil sample was already sent to the lab for a 48 hour turnaround analysis. Mr. DeVinney also said that for a long time, the well didn't have product as the recharge was very slow. Mr. Mathelier stated that he wondered whether the spill would need to be opened up again. I responded that Dvirka & Bartilucci should go back to the well in several days and see whether the oil has returned. Mr. DeVinney stated that they could monitor the well every 2 weeks for a couple of months, see whether the oil has returned and collect it by hand pump if it appears. Both Mr. Brevdo and myself stated that this plan of action was acceptable to the Department. With that, the conversation ended."

FINDS:

Registry ID: 110004480507

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"11/16/2016: Rashad Called Isabel and left message. 11/17/16 - Obligado - This spill has been assigned to me as per Vought as it is a NYCT subway facility. According to Francine, NYCT observed an intrusion at 148th Street Station/Lennox Yard in Manhattan. With the water there is a sheen, and it is suspected the school, which has a boiler room on the other side of this wall has had a release. OSS has been told, no one from the school has been able to be contacted. The intrusion is intermittent, but was first identified sometime on Tuesday 11/15/2016. We are seeking the assistance of NYSDEC, please advise if an investigation will be conducted to see if the school is the RP of this most recent Intrusion. I believe Omar also called Isabel to follow up, and may be assigned to the case. I called Francine Maebauer. The product is seeping into the under ground station. The seep is in a non public area. The hydraulics division believes that there is a tank adjacent to the station in the Frederick Douglas Academy. They will arrange for access for me to observe the seep. I called DOE Fuel Division and spoke to Munendra at 718-349-5752 regarding PBS #2-354007 Public School 10 at 2581 Adam Clayton Powell Jr Blvd, which is the adjacent school. He said they have 2 15,000 double wall ASTs. I will meet Tilac Ramautar 347 764 3949 at the site. 11/18/16 - Obligado - I met Tilac at the site and we inspected the basement. There was approximately 2 inches of water in the basement and floating oil on the water leaking from an oil transfer pump. We walked outside to the NYCT subway yard and there was oil on top of water in a small alcove area adjacen to the building. Tilac hired Riteway who arrived and began pumping oil and water from the basement. They then proceeded to remove oil stained debris and pump out oil and water from the NYCT yard alcove area. When I left the site at 1600 hrs Riteway was still working in the yard area. 11/19/16- Obligado - I inspected the site first thing in the AM and observed that the NYCT yard alcove area still had water with floating oil on top, about a 20 square foot area, slightly smaller then the day before. After returning to the office I called Riteway and Anthony Lara said his guys finished pumping oil from the alcove area yesterday and today they were working in the tank room to pump oil and water from the tank room. He said that the oil I saw in the alcove had come back in over night after he pumped the area dry. He said the remediation work in the NYCT will be more complicated as the oil appears to be coming from the subsurface. He said there is about 3 ft of soil in that area that is likely contaminated and he does not have authorization from NYCT to do excavation in that area. I called BOE Munandra and reiterated to him the situation in the NYCT yard and he agreed that additional work will need to be done but they will do what they have to do. He said they will do a full system test on the system to make sure there are no continuing leaks. 11/21/16 - Obligado - I spoke to Francine and told her the status of the clean up and that the remediation was more complicated due to subsurface impacts in the yard. We agreed to potentially have a site meeting to discuss further. I called Rob Hill of Riteway. They are cleaning tank

FREDERICK DOUGLASS ACADEMY (Continued) **S119028056**

1 today and they will test the system after. Tomorrow they will empty and clean and test Tank 2. 11/23/16 - Obligado - Representatives from NYCT (Francine Ocampo and others), DOE, and DEC (Obligado) and Riteway (Anthony Lara) met at the site to discuss the spill and remedial options. The subway yard alcove was still impacted by petroleum. Floating oil was still present on top of standing water. The following is a summary: DOE will submit a Remedial Work Plan for to remediate the alcove. NYCT will provide subway yard as builts of the Area of Concern to DEC, to provide to DOE. The Area of Concern is the alcove north of the walkway. We discussed remediation via a guzzler to remove contaminated soils, water, and product. The RAWP will need to be approved by NYCTransit. The RAWP will need to be P.E. Stamped. 11/30/16 - Obligado - I sent an email summary to all parties with the following points: -According to the DOE, the tank system at the School passed a complete system test. -At the time of the meeting, the sump pump in the school basement was still inoperable. DOE needs to replace the pump which may address high water table conditions. -The DEC requires additional clean-up work in school tank vault which still had residual oil and contaminated material on the vault floor. -The Area of Concern (AOC) for remediation in the subway yard is limited to the square alcove area west (school side) of the elevated walkway. There may be has much as 3 feet of residual fuel oil contaminated soil on top of bedrock in the alcove from historic oil spill(s) from the school basement. The high water table appears to have brought residual oil to the surface. -The current conceptual remedial plan is to use a guzzler to remove oil and contaminated soil from the alcove. If feasible, the guzzler hose will snake through the gap between the school and subway station walls. Riteway may need to find an alternate type of hose which will fit through that gap. -NYCT will provide the DEC with as-built drawings of the AOC. DEC will provide drawings to DOE to develop a Remedial Action Work Plan (RAWP) -DOE will submit a RAWP for the remediation of the subway yard to the DEC. After DEC review, DEC will provide the RAWP to NYCT for approval. -NYCT requires the RAWP to be signed by a P.E. 1/6/17 - Obligado - I sent Francine an email inquiring if they had located design drawings of the area in question yet. 1/10/17 - Obligado - I emailed Munendra to inquire about the status of the clean up in the School. According to Mununendra the status is as follows: Thus far both oil pumps and sump pumps were replaced. All debris and contaminated materials were removed and properly disposed. The entire tank room including the tanks were power washed clean. Both tanks are getting painted. When this is done we will we will epoxy paint the tank room floor. 1/12/17 - Obligado - I spoke with Francine Ocampo at NYCT system safety. They have no additional design drawings of the area in question. She said based on her discussion with NYCT MOW generally speaking the conceptual guzzler plan for soil removal was ok. I sent an email to Munendra informing him there are no additional design drawings and that he should submit a Work Plan to the DEC which will be forwarded to NYCT for review. 2/2/17 - Obligado - I inspected the boiler pump room and tank room with Anthony of Riteway and Tilak from DOE. The clean up in the building is complete. The entire tank vault has been cleaned and apoxy painted. He still plans to paint the boiler pump room. The sump pump has been repaired and was operational. In the NYCT yard, the ponded water and floating product has subsided below the surface. A small 1 x 1 pit was evident in the alcove, it is unknown who dug the pit. Free product was observed in the pit at about 1 ft depth, which is the presumed new

FREDERICK DOUGLASS ACADEMY (Continued) **S119028056**

depth to water when the sump pump is operational. It appears that the water level in the alcove yard and the sump room are hydraulicly connected. Riteway will develop a remedial plan. 4/25/17 - Obligado - I sent a letter to the NYC Dept of Education Mr. Sharma notifying him that the RAWP is overdue. I required submission of the overdue RAWP within 30 days or this case will be referred to the office of General Counsel. 5/2/17 - Obligado - I received the work plan submitted by Riteway. I disapproved the work plan based on the below comments and required resubmission within 30 days. 1) results of Engineering Assessment included in the plan 2) Utility Markout prior to excavation 3) 8260//8270 analysis 4) Scaled site plan showing excavation area 5) submission of Remedial Action Completion Report after remediation 6) Remove cost and contract language from submission 7) Implementation Schedule 5/22/17 - Obligado - I received the revised Work Plan. 6/7/17 - Obligado - I completed review of the Work PLan. Items 2 and 4 were not addressed in this second submittal. Due to failure to submit an acceptable and approvable workplan I sent Munendra Sharma of DOE a Stipulation AGreement to clean up the spill in accordance with a corrective action plan. 6/13/17 - Obligado - I spoke to Munendra over the phone. He said that Riteway did not have the resources to provide the RAWP the DEC required. He will have the School Construction Authority take over the clean-up as they have an engineering firm who is capable of preparing an appropriate work plan. I told him that I agreed with the proposed course of action. 7/14/17 - Obligado - I received a phone call from Melisa Demmet at SCA. SCA is taking over the clean up. A tentative site meeting is scheduled for 7/14/17 with AKRF and SCA. 7/19/17 - Obligado - I met SCA, AKRF, and NYCT personnel at the site. We inspected the school pump room and tank vault. We observed oil seeping up through the tank vault floor with the groundwater. Photos in edocs. There was a slight sheen on the water in the sump. We discussed the remediation plan. In light of the product seepage into the tank vault room, AKRF is considering doing some remedial investigation to determine the extent of the product plume beneath the building. Preliminary discussions for some hand borings in the basement and in the alcove. They will submit a Remedial Investigiation Plan to the DEC for review. 8/9/17 - Obligado - I reviewed and approved an investigation workplan to do 5 soil borings in the school basement. The borings will be 3 ft deep or to bedrock, which ever is shallower. The purpose of the boring is to observe for the presence of LNAPL beneath the school basement floor. Prior to advancing soil borings they will perform a geophysical markout both in the school basement and in the alcove area in the NYCT transit property. I forwarded the workplan to Michael Mandac of NYCT for access approval. 11/1/17 - Obligado - I reviewed the Spill Delineation Report. 5 soil borings were advanced in the basement. The borings were advanced 3 ft until bedrock refusal. No Groundwater or LNAPL was detected in the borings. Elevated PID readings were detected between 47.8 ppm and 403 ppm in SB5. No LNAPL was detected in the soil borings. The report recommends excavation in accessible area, and to the amount practically feasible, collection of post excavation soil endpoint samples, and backfilling with clean backfill. I sent an email to Melissa Demerrit concurring with the recommendations and requesting submission of a Remedial Action Work Plan. 11/6/17 - Obligado - RAWP received. 11/9/17 - Obligado - I reviewed the RAWP. The plan proposes to excavate the contaminated soil in the alcove area to extent feasible and collection of endpoint samples. I provided comments on the RAWP. 11/15/17 - Obligado - I

FREDERICK DOUGLASS ACADEMY (Continued) **S119028056**

reviewed a response from Melissa Demmett on my comments. She adequately addressed my comments. I sent an approval letter to NYCSA with 2 modifications, 1) remediation work during off-school days, 2) stockpiled soil will be covered with plastic sheeting. RAWP implementation upon approval from NYCT Office of System Safety. 3/27/18 - Obligado - I received an email from Melisa Demmet at the NYCSCA. We would like to touch base with regard to the on-going coordination and delays of the project. In a February field meeting was set-up to discuss the scope of work between IEH, AKRF and Lyudmila Bord and Miron Kuchuk from the Capital Program Management (CPM) group of NYCTA. At that time SCA was still awaiting feedback regarding RAWP approval and/or comments. Last week AKRF received a call from Norman Lindo of the NYCTA, and he has requested the submission of a full-sized stamped drawing set with cross-section views showing the existing Transit structures and the extent of our excavation. He is particularly concerned about our proposed excavation shifting the footings for the control house. Since we currently do not have access to this information, AKRF will need to try to obtain this information from the NYCTA microfilm records. In addition to the stamped drawing set, Track Safety Training is required and will be arranged by NYCTA. 4/12/18 - Obligado - I received and approved a revised RAWP Figure 2. The figure adds a 3 foot buffer around NYCT transit structures due to concerns of undermining the footings for the control house. 9/26/18 - Obligado - Remediation Work was Completed the 1ast week of August.. Report to be submitted by the end of next week. 10/9/18 - Obligado - I reviewed a Remediation Completion Report. 25 yards of contaminated soil was removed from the alcove down to the bedrock at 3 ft below grade. Additionally the oily water mixture was vacuumed out of the vaults. Manifests were included. A three foot buffer around NYCT structures and building footings prevented removal of all contamination. Several endpoint samples were above soil clean up levels for petroleum. While residual petroleum impacts remain, the spill has been remediated to the extent feasible based on constraints in the NYCT yard. Additionally, significant tank system repairs and oil clean up activities was undertaken in public school 10. This spill no longer appears to be a threat to human health or the environment. Spill closed. "

Remarks: "School next to building is leaking clean up is pending School has not been notified at this time"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 11/13/2001 - Sangesland received a report from Emteque Environmental Corporation detailing the failure of all 3 - 40,000 gal buried tanks. 2/27/2002 - Sangesland received another report from Emteque stating that the plan is to remove the three tanks, remove all associated piping & system equipment, Remove all visually contaminated soil, Install 2 new 40,000 gal tanks along with associated piping, Install a natural gas line, Install monitoring wells around the new fuel tanks. Sangesland left a message with Dave Keil (consultant) saying the proposal looks good. Requested a meeting for around April 2, 2002 to discuss the details. 4/2/2002 - Sangesland met Dave Keil of CDM on site to review the work plan. 3 - 40,000 gal. #6 fuel oil tanks will be dug out. Boring work done on site indicates the spill has not spread far. It is beleived that there is a clean zone between the tanks and the building. Sangesland said, since the excavation will be so large, the DEC will require 8 side wall samples (2 per side) and 4 bottom samples. PLUS groundwater sampling. Consultant will prepare a work plan and submit it to the property owner/ project developer, but he may not be associated with work in the future (depends if he's hired to continue the effort) 2/5/2003 - Sangesland visited site and spoke with John Raguso of Emteque (631-271-6622). Tank excavation work was done (3 - 40,000 gal tanks pulled). Excavation hole was open and held back on 4 sides by steel pilings. Standing water at approx 10' depth showed partial floating product (30% of water surface). Vac truck is expected later today. After vac out, photos will be taken of cement slab base to confirm no below slab contamination. Some residual contamination is expected, but after the source is removed and most of the standing contamination is removed, the spill can be closed out. 3/24/2003-Vought-Fowarded message from Sigona to Duty Desk: Sigona received call from Michelle Grant (212-491-7025) regarding spill and presence of oil/water in excavation. Vought called Grant back and

ESPLANADE GARDENS (Continued) **1001752340**

explained remedial actions. 6/26/2003 Sangesland reviewed a report from Emteque dated 6/16/03 Report outlines the removal of 498.85 tons of contaminated soil from the area outside around the tanks. Some excavation was also done in the basement where a spill existed. Both the basement and the outside excavation came back with clean end points. Report in file. Spill Closed"

Remarks: "CALLER STATES LAB RESULTS FROM ABOVE PROPERTY SHOW SOIL CONTAMINATION WITH # 6 FUEL-WILL CHECK GROUND WATER-REMOVE TANKS AND CONTAMINATED SOILS."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 05/16/01 SCHOOL CONSTRUCTION ATHORITY PRESSURE SEALING BASEMENT AREAS WHERE THERE IS A WATER PROBLEM. THIS HAPPENDS TO INCLUDE THE BOILER PIT. WHILE PRESSURE GROUTING, WHAT APPEARS TO BE A #6 FO WAS PUSHED THROUGH THE GROUT HOLES. THE GROUT APPEARS TO HAVE A SPECIFIC GRAVITY BETWEEN WATER AND # 6 OIL. THE SCHOOL MUST CLEAN AND PROPERLY DISPOSE OF THE OIL, AND I RECOMMENDED THAT THE GROUT HOLES BE SEALED AND THE SURFACE OF THE FLOOR BE EPOXY SEALED ESENTIALLY ENTOMBING ANY RESIDUAL OIL. 12/8/2005: James Merlo, coordinator for NYC School Spill Sites indicates that oil continues to be collected and disposed of from a sump in the building. He thinks that it has been going on for quite a long time and may not be entirely related to the spill they had at the school but may be from an outside source other than the school. 02/01/07: Reassigned from Mandy to Chanda. 4/16/07: Kartik Chanda of DEC has reviewed documents regarding this spill case. On 4/16/07, Chanda sent a letter to James Merlo, Manager fuel division, NYC Department of Education, requiring that the following information be submitted to the DEC for review by 5/31/07. 1. An explanation of the cause of the tank system failure; 2. Either a description of the work performed to restore the integrity of the tank system (including retesting results), or a description of the work performed to close (decommission) the tank; 3. Information regarding petroleum contamination found at the site and cleanup activities (if any) associated with a release from this tank system; 4. Any available documentation (i.e., invoices, bills, sampling analysis reports, etc.) pertaining to the work performed at this site associated with this violation 5/10/07: Chanda received a letter from James Marlo, NYC Department of Education regarding this spill. He stated that there is no oil being collected from PS 194. There is no ongoing problem at this location. 5/17/07: Chanda has reviewed the spill report form, the spill report indicated that the NYCSCA was involved cleanup activity associated with this spill dated 5/14/01. On 5/17/07, Kartik Chanda of DEC sent a letter to Ms. Lee Guterman, NYCSCA, requiring that an Investigation Report associated with this violation be submitted to DEC for review by 7/02/07. 6/29/07: Chnada received a Remedial Action Letter dated 7/31/01 and Emergency Response to Oil Spill Letter dated 5/15/01, from NYCSCA on 6/27/07. 7/16/07: Chanda has reviewed the Remedial Action Letter and Emergency Response to Oil Spill Letter regarding this spill at the site. ATC Associates Inc., prepared the remedial action letter dated July 31, 2001. This letter did not indicate the site plan regarding this spill. This report did not include soil and GW investigation data regarding this spill. Chanda discussed with Joe Sun (Unit Supervisor)on 7/16/07 and decided a site visit is required to get the decision regarding this spill case. 7/18/07: Chanda spoke with NYCSCA (Mr. Drew Pardus)regarding a site visit schedule with NYCSCA representative. He agrees with NYSDEC requirements regarding this spill case. He will call to NYSDEC to select a date and time to make a site visit. 8/01/07: Chanda visited the site, met with Mr.Drew Pardus (NYCSCA) and consultant Peter Burger of STV Incorporated (Consultant). It is concluded that an investigation work plan regarding investigation of # 6 fuel oil storage tanks area and boilers floor area is required for approval. 10/22/07: Chanda received a Phase II Environmental Site Investigation Proposal/Scope of Work plan prepared by STV Incorporated (Consultant) dated Auguest 31, 2007. 10/26/07: Chanda reviewed and approved the Phase II Environmental Site Investigation Proposal/Scope of Work Plan. The

NYCSCA - PUBLIC SCHOOL # 194 (Continued) **S105057411**

work plan proposes the installation of ten(10)soil boring at the site. 0n 10/24/07, Chanda sent an approval letter to Ms. Lee Guterman and her consultant, requiring that a final investigation report must be submitted to the DEC by 01/15/08 for review and approval. 11/6/07: Chanda received a phone call from NYCSCA(Mr. Drew Pardus) regarding the drilling schedule for side subsurface investigation. He stated that the installation work for the ten(10) soil borings at the property has been scheduled. Work will commence on November 11& 12 (Sunday & Monday), 2007.These two days are weekend and holidy. 3/13/08: Chanda received a Subsurface Investigation Report from NYCSCA prepared by STV Inc., dated January 8, 2008. 5/12/08: Chanda reviewed the Subsurface Investigation Report and had the following comments: * One 10,000-gallon UST (active) and one 15,000-gallon AST (inactive) No.6 fuel oil located at the site; *Groundwater was not encountered within 20 ft bgs during the investigation. Bedrock was encountered at depths that ranged from 12.5 ft to 20ft bgs; *Fourteen (14) soil borings were advanced around UST area and along the run of the remote pipe line; * No VOCs were detected above the TAGM RSCOs; * Several SVOCs were detected at concentrations grater than the TAGM RSCOs; * The extent of No. 6 fuel oil impact in soil is conservatively estimated to be approximately 58 ft by 32 ft with a 7 ft thick zone between the bottom of the UST (13 ft bgs) and the deepest bedrock surface 920 ft bgs); Based on the findings of this SIR, STV recommended the followings: " excavation and removal of the UST; " excavation and disposal of impacted soil;. " sampling and analysis of post-excavation samples;. " site restoration; and " Preparation of a UST Closure Report. 5/14/08: Chanda sent a letter to Ms. Guterman, NYCSCA requiring that a UST closure report be submitted to DEC by 7/15/08 for review and approval. 9/18/08: Chanda received a letter from NYCSCA (Lee Guterman)dated 8/8/08, regarding the UST out of service status. The letter stated that the NYCSCA has a schedule to remove the UST and petroleum impacted soil at the site. It is anticipated that the boiler upgrade would commence in the summer of 2009 and continue through the summer of 2010. The UST closure report would be submitted to DEC in the summer of 2010. (see eDocs) 10/30/08: A meeting was held on 10/21/08 among DER staff, the NYCSCA representative to discuss the site status, UST out of service status letter and time extension request for this site. The meeting s consensus was that the UST Closure Report would be submitted to DEC in the summer of 2010. Chanda sent an approval letter to NYCSCA requiring that UST Closure Report be submitted to DEC by 7/15/2010 for Review and approval.(see eDocs) 05/13/2009: This spill case was transferred to A. Doronova. - AD Reviewed the file. RAP was approved by K. Chanda of DEC, UST Closure Report to be submitted to DEC by 7/15/2010 for review and approval. AD 01/05/2010: Received a phone call from Mr. Pardus of NYCSCA. He asked for a meeting to discuss boundaries of the proposed area of excavation. Met with D. Pardus and Bob Kanaparthi of NYCSCA. It was agreed that 11 post-excavation end-point soil samples will be collected after UST removal for lab. analysis. Excavation on the north-western part of the property will coinside with the property line. Five day notice before start of field work will be given to DEC. AD 07/29/2010: Called and left a message to D. Pardus of Pardus Env. Consulting regarding site status update info. AD 05/11/2011: Received an e-mail from D. Pardus saying: Hi Ainura, Attached are attachments to the UST Closure Report for PS 194M (DEC Spill Case 0101789). A hard copy of the report will follow. Please feel free to contact me at 646-577-8280 if you have any

NYCSCA - PUBLIC SCHOOL # 194 (Continued) **S105057411**

questions. Sincerely, Drew Pardus Will review. AD 06/28/2011: Reviewed the report. It was prepared by STV Incorporated. The report states that on March 9, 2010 a total of 500-gallons of oil and water mixture were removed from the two tanks and were disposed off-site. Following cleaning, the tanks were cut up and transported off-site to scrap metal facilities. Excavation activities were conducted intermittently from April to September 2010. The Site was excavated within the boundaries of the shoring lines using conventional hydraulic excavation equipment to remove petroleum-impacted soil/fill. Shoring was required to support the excavation walls along the perimeter of the excavation footprint not abutting the walls of the school building. The shoring was installed at locations where soil borings conducted during the Phase II ESI confirmed that there were no petroleum impacts. The excavation dimensions were approximately 57 ft (north-south) by 27 ft (east-west) by approximately 16 ft bgs. The excavation was completed down to the exposed bedrock surface throughout the entire tank pit cavity area. Excavated material was directly loaded for transport and off-Site disposal. LIAL provided oversight, field screened soil, and signed soil disposal manifests during excavation and soil load-out. Soil transportation was performed by licensed haulers in accordance with all applicable regulations, including New York State Department of Transportation (NYSDOT) road permit requirements. In total, 1205.45 tons (37 truckloads) of petroleum-contaminated soil was transported from the Site and disposed of at either, Clean Earth of Carteret, Carteret, New Jersey or Clean Earth of New Castle, New Castle, Delaware. After reaching the final remediation depth/bedrock (approximately 16-ft bgs) within the shored excavation area, three sidewall endpoint soil samples (sample IDs: ES@15, SS@15, and WS@15) were collected on August 15, 2010. Samples were analyzed for VOCs and SVOCs. Laboratory results indicated that no VOCs or SVOCs were detected. STV made the following conclusions and recommendations based on the remedial activities conducted at the Site: " All the tank closure and remediation activities were conducted in accordance with the NYSDEC approved recommendations provided in STV s Subsurface Investigation Report dated January 8, 2008; " All accessible petroleum-impacted material was removed to the final excavation depth of 16 ft bgs (i.e., depth to bedrock) and disposed of at appropriate permitted facilities; " The results of post-excavation endpoint soil sampling state that no STARS VOCs or SVOCs were detected in any of the three sidewall samples. STV recommends no further action with respect to the subsurface conditions at the Site and recommends NYSDEC issue a No Further Action determination for Spill Case #0101789. Will discuss the recommendation for the spill case closure with J. Kolleeny of DEC. AD 07/05/2011: Discussed closure of the case with J. Kolleeny of DEC. Based on the data provided in the Closure Report, it was decided to approve the spill case closure. Issued and sent Spill Closure Letter to Lee Guterman. DL pdf copy to eDocs. Case closed. AD "

Remarks: "spill was observed while waterproofing the basement. spill contractor has been called for clean up of basement...there are 2 tanks underground that will need a case manager to work w/ caller to get them taken care of. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was FOLEY Con Ed e2mis #144267: 7-31-02 @ 01:20 M Milano #68073 reports that while applying a ground in vs4088 @ n/s w 143 st 43' e/o 7 ave , he discovered 25 gallons of an unknown oil and 3 gallons of water had spilled onto the dirt and concrete floor of the structure, also some of the oil has migrated into the sump of the structure which according to the conduit plate # m-58-g-1 has no sewer connection , M Milano belives that this is only a catch basin. No sewer or waterway affected. No smoke or fire was or is involved. No injuries , weather had no affect. Account # f3242 is being used for this incident. No measuring device was used. Transformer is connected to feeder # 2m23. Source and cause of spill are unknown. No private property affected. Environmental Yellow tag #32207 was applied . Water is standing , no visual water movement. Sump is concrete. No substantial cracks. No dielectric filled feeder. Access anytime. 2 liquid samples were taken from the spill by M Milano #68073 , 1 for id and 1 for pcb. Chain of custody # bb05519 . Sample priority e. No initial cleanup action taken . I & A was dispatched to this location to investigate. Cleanup will be pending tranformer removal . Partial cleanup to start asap. CIG S McKeever and T Marcinek notified @ 01:54 Update 1/14/04 Sample results - 33 ppm PCBs. Cleanup completed on 8/1/02."
Remarks:	"25 GLS OF UNKNOWN OIL ON 3 GLS OF WATER. CLEAN UP WILL BEGIN AFTER TEST RESULTS. CON ED #144267"

Contact Name:	ROB HILL
DEC Memo:	"2/4/2014 - Feng - Talked to Rob Hill of RiteWay (718-855-7272). It was an oil delievery of #6 oil. 10-15 gallons of oil came out of the vent line and went to the snow and onto the wall where the vent line located. Their crews were onsite to clean the stain on the wall and shovel all the impacted snow and put into the drum. No other leaks from the tank or the lines. No oil in the tank room. No vapor complaint. Spill is closed. "
Remarks:	"spill to out side fill area/clean up underway"

FINDS:

Registry ID: 110064254319

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110004402254

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Also, see open spill 9615011 for this site. - J. Kolleeny 02/09/07 - J.Kann - Spill reassigned from S.Kraszewski to J.Kann. 11/19/07 - J.Kann - spill 9615011 closed and consolidated with this spill. 10/14/10: J.Kann - investigative work plan received on 10/5/10. 8/15/14: J.Kann- Based on review of the site file, the spill has been closed based on the following: -An ISRP from 1996 was reviewed. 5 borings and 3 wells were installed. Minor SVOCs were detetected in one soil sample. No elevated SVOCs or VOCs were detected in groundwater. At that time the Department agreed that no remedial action needed to be taken at the site (other than periodic visual fluid level monitoring and the removal of contaminated soils encountered during subsurface investigation) -One of the two on site tanks were subsequently removed in 2001. No spills were called in at that time of replacement activities. Endpoint samples collected during tank excavation yielded only minor exceedences of 6 SVOCs, and no exceedences of VOCs. All historic information is included as attachments to the Work Plan which is edoced. Based on the review of the file additional work is not necessary and the spill has been closed."

DEC Memo:	"Sangesland spoke to Mario at the Housing Authority. He said the building is a basement plus 2 floors. The elevator is hydraulic and a seal broke near the base. Approx 30 gallons poured into the cement elevator pit (totally enclosed) Housing Authority pumped out the oil & layed in absorbants. The hydraulic seal will be repaired on Monday Feb 27th. Probably will be OK to close on Monday 3/21/06- DECP iper confirmed w/ MArio that spill was cleaned up. As per mario, elevator is scheduled for repiars and that it is located away, on outside of building as an addition, from child center. CLosed."

FINDS:

Registry ID: 110041681999

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"11/15/16 - Lakhani No PBS and no spills were recorded for the addresses at: 2600 - 2614 Adam Clayton Powell Jr. Blvd, New York, NY and; 201 - 203 West 150th Street, New York, NY and; 200 - 204 West 151st Street, New York, NY. 3:50 PM - Vought and Lakhani called and spoke to Frank Galdun (Merritt Environmental - 6316176200), the location was excavated as it was an old gas station and now a vacant site that is being redeveloped for residential purposes. The location was not listed as an NYC OER site. Upon excavation, twelve (12) unregistered 550 gallon USTs encased in concrete were unearthed. They continued and demolished the concrete casings. Minor soil discoloration was discovered and there was a slight gasoline odor. No vapor complaints were received to date. Currently there is no observed groundwater on site. Soil samples are required and will be attempted to be taken from the bottom bedrock surface and will also be collected from the soil side walls. All soil was excavated to the bedrock. 2 USTs were removed to date and there was no sign of corrosion - there is no indication of a leak. The remaining USTs are yet to be removed. All soil was stock piled and covered in poly (plastic) at the end of the day of excavation. Proposed development

VACANT COMMERCIAL (Continued) **S119027997**

includes a parking garage the is the size of the entire footprint of the building. Once the development plans are confirmed that the parking garage will occupy the entire basement, a sub slab depressurization system will not be needed as per prior guidance from NYSDOH, as per Vought. Each UST excavation site is 25' x 10'. Upon excavation of the USTs, piping was taken out. Pipes were followed to the dispensers and removed. Soil samples along the pipe lines will be collected. The USTs were found filled with gas and water. Their contents were pumped out by Action Environmental. Fill ports were not found on the sidewalk, but were found in between the two excavations. Lakhani and Vought intend to send a letter to Galdun regarding the case. Galdun said that he will circle back with progress on the site and with samples. Lakhani gave Galdun his contact along with Manilar's contact for more info for PBS registration. Vought gave Galdun his email. As per Vought, Lakhani is to be the lead for the spill. 11/16/15 - Lakhani On 11/15/16, Frank Galdun wrote: Jeff, As discussed below is the contact name of the property owner. Peter Chen Truss Development 43-73 Union Street, Suite 1A Flushing NY 11355 516-209-8404 peterchen33@yahoo.com Have all emails related to the job site emailed to: peterchen@trussdevelopmentgroup.com and; info@trussdevelopmentgroup.com. Address the property owner to 2600 7th Ave Realty LLC. 11/16/15 - Lakhani Spill temporarily assigned to Vought until Lakhani is put into UIS database. Letter sent including the following: 1) delineation of soil and groundwater (if applicable) contamination 2) submission of development plans for the site 3) collection of confirmation (endpoint samples 4) Collection of soil samples from along the piping line 5) approval of RAP prior to redevelopment 6) CC to Galdun, Vought, Peter Chen (Truss Development - 5162098404, peterchen@trussdevelopmentgroup.com) 7) PBS Registration. There is a one month (12/16/16) due date on the report. Letter added to D2 and sent to Chen via email and US Mail. 11/16/16 - 1:46 pm - Lakhani Frank emailed Vought regarding time for site visit. Site visit scheduled for 1 PM on 11/18/16. Frank claimed that all USTs will be removed by the morning of 11/18/16. 11/17/16 - Lakhani Galdun CCed Vought in email to Peter Chen stating that he has completed the NYSDEC storage tank registration documents. Peter has yet to send fees ($500) and registration documents to Central Office (Albany). 11/18/16 - Lakhani Vought and Lakhani visited the location and met with Frank Galdun, Peter Chen, and owner's representatives. There was a pile of piping that was removed but not characterized. Unearthed USTs and contaminated soils were covered by poly. Frank is awaiting results after sending waste classification on the contaminated soil. There were no olfactory odors present. There was an underground transformer on the southern sidewalk of 151st St. A gasoline remote fill for a UST exists on the northern sidewalk of 150th St. Possible down gradient of the site is a NYC park with no basement. Upon entering the location, there was a pit that was filled with some rainwater. Rainwater had no sheen. The sidewalls of the pit contained dark spots which indicated that the soil was contaminated with gasoline. Dark spots soils were confirmed to be contaminated after observing gasoline/diesel VOC odors. USTs were removed, but two (2) more 550 gallon USTs full of water with fill lines and encased in concrete were found after PBS registration for the prior twelve (12) was submitted. Frank must update the registration submittal for the total fourteen (14) USTs found at the location. Frank took soil samples from three (3) sidewalls. PID readings were low (highest reading recorded was 0.2). No complaints regarding odors have been

VACANT COMMERCIAL (Continued) **S119027997**

received from the surrounding area. Endpoint samples will be collected. Frank will be returning to the location on Monday to evaluate, remove, and drain new found tanks. For the development of the site, developer only needs to go down 6'bg. Bedrock is at a maximum of 8'bg. If contamination is below 8'bg then soil samples will have to be collected to delineate. Since a parking garage is intended to be built below the footprint of the building, a vapor intrusion barrier will be required but piping will not be necessary because garage will be above the contaminated soils. Therefore garage will vent any vapors. As per Vought, the above described pit requires a soil boring and further sampling due to the found soil contamination. The said pit should have the rainwater pumped out and then a soil boring should be placed. Frank notified Vought and Lakhani that prior due diligence sampling was done for the location but nothing was found. He said he would share those analyticals with Vought and Lakhani. Frank will share the UST closure report, sampling from holes, and scaled site plans with Vought and Lakhani. 11/21/16 - Lakhani Emailed Galdun and CCed Peter Chen regarding the gasoline remote fill port found on the northern sidewalk of 150th St. Notified him that as per PBS regulation, the fill port must be closed. Also since there was no tank tightness data to show that the fill had no leaks, a limited investigation must be performed with either installation of a soil boring or endpoint sample collection. Galdun responded that he will have the excavation contractor expose the line for excavation. 12/5/16 - Lakhani Emailed Galdun and CCed Peter Chen regard the due diligence reports and proposed investigation around the fill port on the northern sidewalk of 150th Street. Galdun responded informing DEC Lakhani of the discovery of one (1) 550 gallon waste oil UST and one (1) 550 gallon heating oil UST in a filled in basement. There was no evidence of a petroleum discharge discovered at that location and soil samples were collected. He also completed an investigation of the fill line by creating a 30' long trench to bedrock. From here, soil samples were collected along the excavation. No evidence of discharge was discovered. 3:54 AM: Called Frank about the site, but he was busy out in the field. Left name and number with Merritt Environmental and will follow up tomorrow. 12/6/16 - Lakhani 9:28 AM: Frank called back and notified DEC Lakhani of an old basement found in the northeast section of the property, fairly close to the gasoline area. They found it while scraping asphalt off the surface and uncovered a fill port. The basement was set into bedrock. The basement floor was 8'bg. The basement was filled in with soil and within the basement they had found one (1) 550 gallon waste oil UST and one (1) 550 gallon heating oil UST. The waste oil UST was full with waste motor oil and the heating oil UST was about 10% full with #2 heating oil. Both tanks were drained, cleaned, and removed from the site by Action Environmental. They took samples below each tank and sidewalls. Analyticals can be expected in 5-6 days. The fill port found on the northern sidewalk of 150th St has been concreted over. No vapor complaints have been made to date. 12/20/16 - Lakhani Called Frank Galdun. A draft of the closure report was sent to the client, Peter Chen. Frank said that analyticals from samples taken from the basement with the two (2) tanks showed indication of some contamination in the samples, but it was below CP-51 standards. Four (4) samples were taken: two (2) from the bottom and at least two (2) from the sidewalls because the sidewalls were mostly rock and stone. Some SVOCs were found in the basement samples as well, but nothing was above standards. The anaylticals from the

VACANT COMMERCIAL (Continued) **S119027997**

30’ trench were returned with no evidence of discharge occurring. The could not find the pipe during digging. All tanks have been registered and forms included in closure report. Past Phase II reports have been included in the closure report. One of the past Phase II reports indicate a bedrock well drilled 20’ down detected MTBE. Closure report should be received by early next week (12/27/16 - 12/30/16). They also did more digging along the east wall of the property where the gasoline stained soil was in the pit. They did not encounter further significant contamination. 12/27/16 - Lakhani Called Merritt to obtain the closure report. Maryann Wegh, project manager from Merritt Consulting, sent the Closure Report to DEC Lakhani. Uploaded to D2. 12/28/16 - Lakhani UST Closure Report (Merritt Environmental - Frank Galdun, 12/15/16) - Removal of twelve (12) 550 gallon gasoline USTs and associated dispenser/fill piping formerly located beneath the east side of the 2600 to 2614 Adam Clayton Powell Jr. Boulevard property. In addition one (1) 550 gallon waste motor oil UST and one (1) 550 gallon waste motor oil UST and one (1) 550 gallon heating oil UST was removed from the site. The size of the site is 19,910 sq. ft. and is currently unimproved in preparation for redevelopment to contain a residential apt. building with a partial underground vehicle parking garage. Historically the site contained one (1) single-story 1800 sq. ft. permanent structure that was used as a car wash. The remainder of the site contained exterior paved surfacing used as a commercial parking lot. Site appears to have been connected to municipal potable water supply and combined sewer/stormwater systems. According to a Limited II Subsurface Investigation Report from 8/13/15 by AEI Consultants, three (3) soil borings were installed at the site. Soil samples were collected from two of the three borings show that no VOCs were detected at concentrations that exceed applicable regulatory limits in either sample. Refusal of the drilling equipment occurred on shallow bedrock at all three borings. Two additional borings were subsequently installed into bedrock to intersect the water table to collect groundwater samples. Groundwater sample collected from this boring indicates MTBE was detected at 55 ppb. No MTBE was detected in any of the post-UST removal soil samples collected by Merritt. Upon UST removal activities, gasoline USTs were found approx. 10’ of the temp. bedrock having Merritt believe that only residual impact to the groundwater quality occurred. Merritt completed a Focused Subsurface Site Investigation Report on 2/18/16 and installed a total of 11 soil borings. The max. depth of the soil borings was 8.5’bgs and no evidence of petroleum contamination at actionable or reportable concentrations was discovered. First Excavation Group of NY, Inc. was retained to remove twelve (12) 550 gallon gasoline USTs and associated piping, one (1) 550 gallon waste motor oil UST and one (1) 550 gallon heating oil UST. Twelve (12) USTs were encased in concrete. Three (3) abandoned gasoline fill ports and on e (1) remote fill was observed at the site. A trench was excavated to bedrock where the fill line may have extended. Trench was approx. 35’ to the gasoline UST excavation and 3’ in depth. No piping or evidence of gasoline contamination was identified. Isolated zones of discolored soil exhibiting strong gasoline odors was uncovered near the base of the east gasoline UST excavation wall. The material was removed and stockpiled to the extent feasible since Adam Clayton Powell Jr. Boulevard was directly adjacent to the east excavation wall. No free-phase product or staining was observed on the bedrock surface. NO physical evidence of a petroleum release was encountered in fill

VACANT COMMERCIAL (Continued) **S119027997**

material excavated from the waste motor oil and heating oil UST excavation. Grab soil samples collected from waste motor oil and heating oil UST excavation were taken for which the sidewall samples taken at 7'bgs contain several SVOCs the exceed SCLs. No SVOCs were detected at levels in the bottom samples. Elevated SVOC concentrations are caused by the composition of the fill material in the sidewalls rather than representing a petroleum release to the environment. A vapor barrier shall be installed under the basement of the site building as a precautionary measure against possible future sources of vapor intrusion into the structure. Closure report is not sufficient. Groundwater sidewalk sampling down gradient of EXC A SIDE 1 and EXC A SIDE 4 is required to delineate possible groundwater contamination. Or if Frank claims that EXC A SIDE 1 & 4 were clean, then require a groundwater and soil samples at the bottom of the eastern pit. 12/29/16 - Lakhani 3:06 PM: Called Maryann Wegh, Project Manager, and explained to her the need for monitoring wells down-gradient of Exc A Side 1 and Side 4. She said she would relay the message to Frank Galdun. Will be speaking to Frank tomorrow (12/30/16). 3:56 PM: Called Frank to tell him that a sidewalk groundwater samples down-gradient of EXC A Side 1 is required since no vertical delineation was done. Sent a requirement letter to Peter Chen via U.S. Mail and sent the letter to Peter and Frank via email. 01/03/17 - Lakhani Frank called and informed that since there is a chance that installing a boring for a groundwater sample adjacent to EXC A Side 1 and Side 4 may not yield a sample, he asked whether two (2) borings can be done: one (1) adjacent to EXC A Side 1 and 4 and another adjacent to the southern portion of EXC B. 01/04/17 - Lakhani Frank has yet to receive a PBS number for the registration. Email Frank, as per DEC Vought, that two (2) sidewalk borings adjacent to EXC A and B will be sufficient. If the EXC A boring does not yield any water, a bedrock well is not necessary. 01/26/17 - Lakhani Contaminant Delineation Report (Merritt, 01/2017) - Installation of three (3) soil borings into the Adam Clayton Powell, Jr. Blvd sidewalk that abuts the east site perimeter. The two (2) southerly borings encountered bedrock at 4.5'bgs and the northerly boring extended to 12'bgs on bedrock refusal. A water bearing deposit was encountered at 9.2'bgs in the northerly boring (B2). Since a slight gasoline odor was detected in the water extracted from B2, a permanent well was installed as a precautionary measure designated (MW1). Soil samples were collected from the three (3) borings reported no VOCs at concentrations that exceed applicable regulatory limits. Some SVOCs were detected above limits. Lab analysis of the groundwater sample reported: benzene 0.83 ug/L(MW1, 9.2'bgs). As per Vought, spill is closed. DEC Requires: 1) delineation of soil and groundwater (if applicable) contamination 2) submission of development plans for the site 3) collection of confirmation (endpoint samples) 4) Collection of soil samples from along the piping line 5) approval of RAP prior to redevelopment 6) CC to Galdun, Vought, Peter Chen (Truss Development - 5162098404, peterchen@trussdevelopmentgroup.com) 7) PBS Registration 8) Submission of due diligence reports by Galdun as per meeting on 11/18/16"

Remarks: "found 12 usts during excavation"

DEC Memo: "1/12/06-Vought-Called Sherry Bulkley and left message to return call to DEC. Vought spoke to Sherry and contractor was called to cleanup spill to remove mercury rectifier and contigency plan was in effect when spill was occurred. Containment set up prior to removal. Some mercury went into containment and onto plastic lining and mercury salt was used to solidy material. Liquid mercury was transferred into flasks for removal and removal of solidified mercury. All barriers and containment will be transferred as disposed of as haz waste and floor will be washed with a mercury salt. Drains not affected as it was covered prior to work starting. Spill closed by Vought."
Remarks: "contained."

DEC Memo:	"5/18/2016: Rashad Responded to site where I was met by general contactor and property owner Alexis. The property is under construction in a narrow area as part of redevelopment between 2 existing buildings, further excavation will be difficult as structural piles have been placed in excavation as they have reached proposed building depth. The excavation is exposing groundwater, no visual or olfactory evidence was observed at time of inspection, only a slight sheen was observed. They have excavated down about 12-15 feet. The property owner mentioned she had a phase 1 investigation done and the consultant recommended no further work as no significant evidence of contamination or threat of contamination was found.

VACANT LOT/FORMER APT BUILDING (Continued) **S118704719**

Alexis has provided the Phase 1 investigation. In addition engineering controls are in place for the existing redevelopment, there will be a vapor barrier installed. Neighboring property 304 West 148th Street was also inspected, they have a 2000 gallon AST wrapped in concrete, no spill or odor was present. PBS registrations in area are 302 West 148th 2-470147, 304 West 148th Street 2-609734, 104 Bradhurst Ave 2-606738. I let Alexis know that she should bring in an environmental contractor to pump out oil water mix and to see if it returns, and have contractor advise them as to what options they have. According to Alexis the proposed property will already have vapor barrier installed. Photos need to be uploaded to D2. 5/19/2016: Rashad Review of Phase 1 is as follows: The subject property building consisted of a residential building from at least 1909-2004, which was then demolished between 2004-2005, the property has been vacant since 2005 until construction began. Groundwater flow is inferred to be to the southeast direction, and present at a depth of 6-10 ftbgs. The report concluded that no further action is needed and no Phase 2 needs to be done. 306 West 148th Street does not have an alternate address. No additional spills of PBS registrations found for site. No spills found for 304 West 148th Street or 302 West 148th Street. Called Alexis, she has been in touch with contractors and will let me know when she picks one. I also asked Alexis to send me a document or a note indicating that a vapor barrier will be installed as part of building plans. Phase 1 and photos have been uploaded to D2. Received email from Alexis with drainage plan that indicates a 6 mil vapor barrier will be installed, drawing was uploaded to D2. 5/25/2016: Rashad Spoke to Alexis yesterday she indicated Riteway just left site and recovered approximately 2000 gallons of liquid. She indicated she was dealing with Rob Hill and that they will be coming up with plan, she also indicated they took samples for analysis. Spoke to Rob, he indicated they did pump out 2000 gallons of water with some oil mixed in. Rob said his guys indicated that the oil was a heavy oil, maybe #4 or #6 oil. Rob said they may return to possibly excavate some soil however it will be difficult because of the depth of the excavation being near groundwater as well as the structural piles already in place. I let him know that he should sent the samples out for analysis and to reassess after receiving the results. Sent email to Alexis letting her know I spoke to Rob and that we will see what samples look like before any further requirements are made by the Department. 6/3/2016: Rashad Received email from Rob Hill: Please see the following attachment for samples results 306 w 148 st, NYC. If you have any questions or concerns feel free to contact me at 718-855-7272. Email had two attachments, they have been uploaded to D2. Sample results only show slight exceedances in SVOCs they are as follows: Dibenzo(a,h)Anthracene-436ppb, 392ppb benzo(k)fluoranthene-1050ppb, benzo(a)pyrene-1300ppb, 1020ppb, and indeno(1,2,3-cd)pyrene-1300ppb, 1130ppb. Sent email to Alexis: I apologize for missing your call yesterday. After reviewing the soil data I will require no further action. I will be closing spill#1601635 for 306 West 148th Street today. Please let me know if you have any questions. Thank you. Spill will be closed due to minor SVOC exceedances and installation of vapor barrier in new building. "

Remarks: "found contamination during excavation/site has gone thru phase one study"

DER Facility ID: 289093
DEC Memo: "Sangesland spoke to Ellis Mercer Dep Mgr of Recreation Ctr. (212-234-9607) He says Rapid Fuel Oil delivered fuel today and over filled the tank. During the oil delivery the driver went back into his truck to read the paper and Mr. Mercer had to yell at him that the tank was overflowing onto the sidewalk/street. Mr. Mercer got some peat moss and soil used to maintain the rec center, but the truck driver drove off.Sangesland spoke to Bobby at Rapid Fuel Oil (917-807-8720) He says it was not his drivers fault and there was no big spill at the site. 3/31/2005 - Rapid hired Petroleum Tank Cleaners to clean up the site. 11/18/05- DEC Piper contacted KC Reilly at rec center. Left Message. Spoke w/ Mark at PTC. Only did surface cleanup. 11/28/05- DEC Piper spoke w/ Ellis Mercer of Parks Dept. All cleaned up by PTC inside and outside. Very pleased, no complaints, no odors."
Remarks: "Location is between west 146th and west 147th street. Product went into a near by storm drain, a person on the scene soaked up the remainder of material that was outside drain cleaned up with speedy dry."

At other phone number, (212)689-1520, which is the caller, staff has no knowledge about the spill. Mr. Celeste called and said that a NYCDEP HazMat unit picked up a leaking drum, containing unknown substance, from the street and a residue on the sidewalk was cleaned by NYC Dept. of Sanitation. The case is closed."
Remarks:	"Unknown amount of nitrogen was released from an unknown tank and is impacting the sewer. Unknown clean up also."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 141th St & 7th Ave (Morningside heights) 173 West 141 St (sump building) 2419 7th Ave (Tank building) 05/02/01 (M. Tipple) APPLIED TECHNOLOGY SERVICES (914-654-0080) NEIL VANDERWOUDE WILL BE THE CONTACT PERSON FOR THIS CLEANUP AN ELEVATOR PIT IN AN ADJACENT BUILDING IS CURRENTLY BEING THE UNPLANNED RECOVERY PIT. tHE LEAKING TANK IS AN 3000 GAL. ABOVE GROUND VAULTED TANK. IT WAS DRAINED SOON AFTER DISCOVERING THE LEAK. IT IS CURRENTLY BELIEVED BY THE CONSULTANT THAT VIBRATION FROM A NEARBY CON-ED EXPLOSION MAY HAVE BEEN A FACTOR IN THE TANK LEAKING. THE CONSULTANT WILL BE WORKING ON DELINEATING THE CONTAMINATION. 5/17/2001 - Notes above were entered while Sangesland was away. Contact: Steve Vanderwoude from Applied Technologies. Tank is out of service (temporarily for the season) Shortly after the Tank and oil(elevator) pit are 30 to 40 ft apart (in next door building) Same owner on both buildings. 8/15/2001 Sangesland called both RP - Jeffery Garfinkel 212-967-2200 and the consultant Neil Vanderwoude. Neither was in so messages were left. 6/20/2002 Sangesland called both RP - Jeffery Garfinkel and consultant Neil Vanderwoude again. Once again neither was available and messages were left. 3/26/2004 Sangesland called both RP - Jeffery Garfinkel and consultant Neil Vanderwoude again. Once again neither was available and messages were left. 6/15/2006 Sangesland called both contact numbers associated with this case. Voice messages were left again. 9/14/2010 Mr. Mike Guarino (fax 212-807-0534) contacted Sangesland and asked what work would be needed to close out this case. Requirements: Site plan, Photos, Soil borings of area between tank and elevator pit next door, lab results showing the area is clean. Consultant needs to call DEC Sangesland to discuss, before any testing work is done. Copy of this report was faxed to his office. 10/12/2011 Sangesland reviewed a report prepared by Merritt Environmental Consulting (see eDocs) Which showed that there was no petroleum present on the site. Various borings were drilled, elevator shaft was inspected and drains traced. Any oil which may have been on the site in 2001 is no longer there. Based on this report, the NYSDEC is closing this case."
Remarks:	"contaminated soil found surrounding a partially exposed tank. tank was filled with approx 3000 gals - unknown how much still in tank."

would appreciate any update or documentation on the current status of the 10,000 gallon tank. The original letter is being mailed to the address provided on the PBS registration (#2-604973). Letter uploaded to D2. 12/31/2015: Rashad Received email from Gabe: Department of Design and Construction has a contractor finalizing the scope of work needed to properly close and remove the oil tank in compliance to DEC guidelines and convert the site to natural gas. 10/19/2016 After consultation with Rashad this spill is transferred to Alex Zhitomirsky. AZ 1-3-2019 Reviewed a report for this site dated November 2, 2018, and issued by URS. The report stated that the tank was removed by The Franklin Company. Franklin performed the tank closure work between April and May 2018. The remote fill port was excavated and removed. The remaining piping abandoned in place. Franklin completed tank closure sampling. One water sample and 13 soil samples were collected for lab analyses. The water sample was collected of water that accumulated inside the tank vault. Four soil borings were advanced to 15' bgs. The borings were terminated due to refusal. There were no VOCs or SVOCs detected above Unrestricted Use SCOs in any of the soil samples. Groundwater at the site wasn't encountered during the UST closure investigation. URS requested a closure of this spill. Based on the presented information this spill was closed on 2/3/2019. AZ The following e-mail was sent to K. Shanahan and V. Brevdo: Dear Mr. Shanahan, Based on the documentation provided to date, the New York State Department of Environmental Conservation (the Department) has closed the above-referenced spill case. All monitoring wells associated with this spill case should be properly closed in accordance with the Department's guidance document, Groundwater Monitoring Well Decommissioning Procedures . The Department hereby reserves all of its rights concerning, and such forbearance shall not extend to, any further investigation or remedial action the Department deems necessary due to: I. The off-site migration of petroleum contaminants that was unknown at the time of this closure. II. Environmental conditions related to this spill case which were unknown to the Department at the time of this closure. III. Information received, in whole or part, after the Department's spill case closure, which indicates that corrective action was not sufficiently protective of human health and/or the environment. IV. Fraud in obtaining this spill case closure determination. As a precaution, we must bring your attention to our concerns for the future use of this site. If subsurface contamination is encountered while excavating for any construction activity, appropriate remedial and vapor mitigation efforts may need to be taken to fully prevent vapor intrusion into any site development and to ensure human health and safety. This spill closure does not exempt the Responsible Parties from compliance with any applicable laws and regulations. Please be advised that you should maintain a permanent file of all documentation and correspondence regarding this case for future use as the Department's files may not be maintained indefinitely. Sincerely, Alex Zhitomirsky - Engineering Geologist 2 NYS Department of Environmental Conservation 47-40 21st Street, Long Island City, NY 11101 Phone: 718.482.6387 - Fax: 718.482.6390 Email: alexander.zhitomirsky@dec.ny.gov "

DEC Memo:	"nyc parks & recreation Parks Dept Building with tank in vault Contact: Franklin Company or Gabe Ramos Parks Dept - 212-410-8916 8/15/2012 TTF Spill Case transferred to DEC Tim DeMeo. 10/22/15 TJD File review. Address is incorrect on spill report - changed today from #79 to #89 Bradhurst. Additionally street location corrected from Broadhurst to Bradhurst. PBS #is 2-604973. Following proper identification of spill location the facility was contacted to obtain a status of the open spill - the facility manager Valerie Edwards was unaware of the condition and requested an email outlining specific requirements. An email was sent to Valerie with request for specific documentation in support of spill closure. Email uploaded to DECDOCS. 12/23/2015: Rashad Spill reassigned from DeMeo to Omar as per DeMeo. 89 Bradhurst Avenue has alternate addresses of 75-95 Bradhurst avenue and 319-341 West 145 street. There are multiple spills at Jackie Robinson Park, spill#9302297 was a discharge into the sewer and has no DEC remarks it was closed in 1993, spill#0102259 was closed in 2008 because of a TTF on a 10,000 gallon tank which was retested, passed, and no evidence of release to environment. Spill#0603232 was cross referenced to other spill#0600573, spill#0603738 was closed because of a duplicate spill it was referred to spill#0600573. Spill#1203515 is open at 89 Bradhurst Ave & 146 st and only info is 10,000 gal UST in caller remarks. There is another spill# 0600573 is managed by Vadim and a comment on 9/9/09 says DDC will replace tank, case is still open. PBS#2-604973 has a 10,000 gallon UST containing biodiesel. TTF letter and email correspondence found in D2. 12/28/2015: Rashad Emailed Gabriel: Attached is a tank test failure letter for spills#0600573, 1100352, and 1203515 for 89 Bradhurst Avenue, New York NY 10039. There are three open spill cases for this site and I would appreciate any update or documentation on the current status of the 10,000 gallon tank. The original letter is being mailed to the address provided on the PBS registration (#2-604973). Letter uploaded to D2. 1/4/2016: Rashad On 12/31/15 Gabe responded: Department of Design and Construction has a contractor finalizing the scope of work needed to properly close and remove the oil tank in compliance to DEC guidelines and convert the site to natural gas. 4/14/2016: Rashad This spill will be administratively closed and cross referenced to spill#0600573 as it is tank test failure on same 10,000 gallon tank. Please refer to spill#0600573 for future information. "

JACKIE ROB REC CENTER (Continued) **S121102034**

#2 oil UST, in-service, installed in June 1982. another spill case (# 0600573) was reported on 04/14/2006 due to tightness test failure of 10,000 gal tank. case still open. 9:55 AM:- left message for Mike. 9:57 AM:- left message for Mr. Ramos. discuss with DEC Alex, project manager for spill #: 0600573. Alex will discuss with NYCDDC consultant who is handling this project. case assigned to Alex. 6-2-2017 Contacted K. Shanahan (URS). Asked him to dispatch staff to the spill site immediately, take the tank out of service, notify NYC Parks and NYC DDC. Explore if the leaking tank could be excavated. AZ 6/6/2017 Received the following e-mail from K. Shanahan: Hi Alex, In accordance with your request, I have prepared this e-mail to provide NYSDEC information regarding new Spill No. 1702073 reported at Jackie Robinson Pool. The spill was called in at 3 PM on June 1, 2017 after a failed tank tightness test was performed on the 10,000-gallon No. 2 fuel oil UST located between the building and Bradhurst Avenue (see attached photo P1010104). You indicated to me that Michael Sepe of Aarco Environmental Services performed the tightness testing. I called Michael Sepe on June 2 and 5 and left him messages. I called him again today and he told me that there was a major issue with the wet portion of the tank in either a pipe or the tank itself. He also indicated to me that the fuel was removed from the tank and that the tank was taken out of service. I asked Michael Sepe if he inspected the concrete tank vault for evidence of product. Michael said a visual inspection was not performed since access was limited and he had no reason to enter the vault (he implied a possible confined space issue see remaining photos). URS is managing the removal of this UST and installation of a natural gas service to fuel the boilers. The tank will be removed but the vault will remain to due it s proximity to the building and Bradhurst Avenue (see attached photo P1010104). URS has retained The Franklin Company to perform the work. The work is scheduled to be completed in 2017. Franklin will perform a tank closure investigation in accordance with NYSDEC protocols. URS will evaluate the data collected and determine whether additional investigation or remediation is required. Let me know if you need any additional information. Thanks - Kevin J. Shanahan Project Manager, Environment Business Unit, Metro New York Direct 716-923-1215 Cell 716-480-7352 kevin.shanahan@aecom.com "

DEC Memo:	"10/5 - Sangesland spoke to Rep from Hess Oil. Hess has hired ABC Tank Cleaners (718-272-2800) They were on their way to the site as of 3:15PM Building Super is Giovani 646-529-5757 Unknown if it is a simple clean up, or if there is a digout/repairs to be made. 03/01/06 Sharif Rahman-I spoke with the building super, Giovani(646-529-5757). He told me the gauge was not working properly and they cleaned it up.

APARTMENT (Continued) **S107410697**

Need to know the cause of the spill. I left a messege for building manager, Mr. Abidin from PINNACLE Group,(212)222-7206. 03/27/06 Sharif Rahman- A violation letter was sent to Pinnacle Group 106 W. 105 Street New York, NY 10025 Attn: Abidin Radondic,Fax:(212)222-8459 05/02/06 Sharif Rahman- Department has not receive any correspondence regarding the spill clean up. I faxed the previous letter to Michelle Morales @(212)729-5495.Her office no is (212)564-2111 x 3021. 07/11/06 Rahman- I called Michelle Morales today again to follow up on the spill, DEC has not received any report about the clean up, she said she would send the paper works to DEC. 07/14/06 Rahman-Rec'd work invoice from ABC tank regarding the closure of the spill.ABC tank pumped out and washed the area affected by the oil spill.The cause of the spill was overfill from a precut on top of the tank.Approx. 75 gallons spilled on the floor.ABC tank fixed the pre cut on the tank.Need to check the floor condition for cracks,leakage. 08/07/06 Rahman- Inspected the floor, found no drain, cracks, condition looked good.NFA required. "

Emailed Gabriel: Attached is a tank test failure letter for spills#0600573, 1100352, and 1203515 for 89 Bradhurst Avenue, New York NY 10039. There are three open spill cases for this site and I would appreciate any update or documentation on the current status of the 10,000 gallon tank. The original letter is being mailed to the address provided on the PBS registration (#2-604973). Letter was uploaded to D2. 1/4/2016: Rashad On 12/31/15 Gabe responded:

JACKY ROBINSON (PARK?) TTF (Continued) **S112148829**

Department of Design and Construction has a contractor finalizing the scope of work needed to properly close and remove the oil tank in compliance to DEC guidelines and convert the site to natural gas. 4/14/2016: Rashad This spill will be administratively closed and cross referenced to spill#0600573 as it is for same tank. Refer to spill#0600573 for future reference. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was RODRIGUEZ E2MIS 147773 4/4/2003 @ 0210 On 4/4 @ 01:53, V Mannino # 56899 of I&A reported to me that while working on 2M23 in VS-8863 he discovered approx 8 gallons of Transformer fluid on the floor and in the concrete sump. He stated that sewer/waterway may be affected because when he put a pad in the exit pipe he saw fluid on the pad, but at this time there is no definite indication that the environment was in fact affected. According to Conduit plate 57-G-1 there is a sewer connection. He disconnected the pump. The source of the spill was the Transformer and the cause is damaged equipment. No initial cleanup has been taken Lab Sequence Number: 03-02812-001 TOTAL PCB 35 ppm 4/4/03 The tanker removed 190 gallons of oil from the unit and 125 gallons from the floor the unit oil capacity is 315 gallons. The vault was double washed with slix and all debris was removed by the flush truck. Final cleanup pending removal of the transformer. 4/30/03 cleanup is complete as of 115. Double washed with slix and flushed. "

DEC Memo:	"8/9/12-Vought-Primary off hours responder. This spill assigned to DEC Feroze as part of routine Con Edison minor spill porfolio review and possible closure. Initial EMIS #230622 added to Cross Reference Field, deleted from Proxy and downloaded into E-docs. As per EMIS, John Schmaltz O/S reports that, while working under Acct.#W3282 he found that the unit in V-2156 had leaked approx. 10 gal of dielectric fluid and was below min. Env. Tag# 50398 was placed within the structure. A PCB sample was taken under COC#GG18737. The unit will be condemned OOE/2. 9/6/12 - Austin - Transformer was removed, and 50 gals. of 3 ppm PCB dielectric fluid was removed from vault, when cleaned - Con Ed contained and cleaned up the spill - See eDocs files for further information - Spill closed - end"
Remarks:	"nothing affected contained to vault - clean is pending"

Spiller Company:	001
Contact Name:	NYCDEP
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD Sangesland spoke with DEP Rep (Nicholas) who said the original caller said the super or someone at this address had a pump running from the basement spreading oil onto the grass lawn. Krimgold responded to the site. Krimgold says this is a major #6 oil spill in the basement of the building. 1/27/04. 3:40 PM J.Krimgold @ the site. Upon arrival J. Krimgold inspected the site and found a significant spill of #6 oil in the boiler room. Further investigation revealed that an oil release occurred on 1/24/04 due to a broken return line and about 600 gallons were spilled into a boiler pit. This spill incident was never reported to DEC, and no action was taken to clean it up. However, the oil was contained in the pit with an automatic sump-pump connected to the City sanitary sewers. It is believed (after consultation with DEP at the site) that a significant amount of oil was pumped out to the sewers before the pump become clogged. Building management called a service to repair the pump. During repairs the plumbers pumped some oil (3-4 gallons) and water into the backyard which was noticed by a concerned citizen who reported a spill. Building management was ordered to cease the illegal pumping and to retain an environmental contractor to clean up the oil inside and to remove contaminated topsoil in the backyard. DLE Officer P. Blanton responded to the site and issued 4 summonses to the building owners for various environmental violations. DEP also responded and issued an NOV with a request to clean up the sump-pit, and they will follow up with inspection. An environmental contractor (Petroleum Tank Cleaners) was retained to do the job and began the cleanup late in the evening. As reported by Anthony (PTC) this morning (1/28/04)

DELANO VILLAGE ASSOC., L.L.C. (Continued) **U003153195**

the cleanup has been completed. DEC will follow up with a site visit. Also, PTC will submit documentation for a spill closure. 2/2/04. J. Krimgold @ site. Cleanup has been completed. 2/18/04. PTC submitted documentation for a spill closure. NFA."

Remarks: "CITIZEN NOTIFIED DEP THAT HE SAW SOMEONE DUMPING OIL OUT OF BASEMENT INTO THE YARD, GOING INTO STREETS."

Contact Name:	INSPECTOR TUCKER
DEC Memo:	"obligado - desk duty -3-23-16 - I called Mr. Tucker. He was at the site. He responded to a tenant Ms. Cerano - 646-675-4597, Apt 4a. complaint of boiler odors. White smoke was bellowing from the front of the building and the boiler room. The chief of FDNY said there was oil spilled in the boiler room. This is the 3rd time the FDNY is there. The boiler is shut down. Tucker reached the ground floor and reached 10 ppm of CO. There is one fire truck left. Fire Chief Kirwin, 16th Batallion. Obligado - I called the PBS site phone #. The fire department is there. Control combustion is on site cleaning up the oil in the boiler. Ms. Natalie Mills 646-319-8731. Residential building. There was a fire in the boiler. Obligado - I spoke to Jerry Williams 7183679800 ext 204. J.williams@heatingny.com. Less then a gallon was spilled on the floor. Controlled is doing the clean-up. No response needed."
Remarks:	"Caller is unsure about a lot of information. He is just calling it in. He got notes from the fire department."

DEC Memo:	"03/29/06-Hiralkumar Patel. Received spill from hotline during off hours duty at around 7 AM today. Spoke with Mr. Bates. as per Mr. Bates there is 30-40 ft long oil/water mix stream coming out from boiler room going into drain. no cleanup done. he gave me number for property manager: Ms. Susan (212) 368-8110. Spoke with Mr. Fred at this number and he is unaware of any oil spill at location. Visited site. Met with Mr. Louis, super of building # 620. building is using #6 heating oil and there was small leak from joints in pipe for last week. and they had water leakage and the pit under two boilers was filled with water and oil floating on it. as the sump pump line is broken and its not working, super ran another pump and was throwing oil/water mix to sidewalk in buiilding property. oil/water mix ran to drain at other end of building. DEP notified. DEP visited site before me. when i reached on site, little oil sheen found on remaining water on sidewalk in some part. in boiler room, water was still in pit under boilers, having no visible oil on it. little oil found stucked on pipe. no odor in boiler room. discharge stopped on DEP's request. asked super to stop anymore discharge, and as some one was working to repair sump pump and leaking line, to clean sidewalk with absorbent. no odor complaints anywhere. little oil with other debris found in drain catch basin. sidewalk concrete was in good condition. as oil ran down to drain already and there is no odor complaints, Case closed."
Remarks:	"on walkway at rear of building Possibly came from the boiler due to

VAULT #5678 (Continued) **S106867604**

V5678 - W 151 ST & 8 AVE SWC Stephen J Asfour, 49908 Operating Supervisor I&A Dept reports that in process of doing an inspection in V5678, that was due for removal found approx. one half pint of unknown oil on top of approx. 300 gallons of water, sump pump was found un plugged. No smoke or fire involved in this incident. No sewer or waterway affected by this spill. No injuries involved in this incident. Weather had no affect. Account #F3246 is being used for this incident. No measuring device was used to determine the amount of the spill. Source and cause of spill are unknown. Oil filled equipment in the structure V5678. Water is standing. No substantial cracks. No dielectric filled feeders in the structure. 2 liquid samples were taken from the spill, 1 for id and 1 for pcb. Sample priority E . Chain of custody #DD13308. Logger F.Curtis 38078. 3/30/05 10:47 Received lab results. Analysis indicates the presence of a transformer oil. Aroclor 1242 < 1.0 ppm EPA 608/8082 Aroclor 1254 < 1.0 ppm EPA 608/8082 Aroclor 1248 < 1.0 ppm EPA 608/8082 Aroclor 1260 33.7 ppm EPA 608/8082 E Hulzer # 39723 reported to me that the cleanup was completed at 14:15 on 3/31/2005. No solid waste was removed. All other waste liquid and solid was removed by the Vactor truck. The structure was double-washed with Simple green . Environmantal tag # 42036 was removed. The remediation of the spill was to install a new Transformer unit in the Vault: Logger R Pagano # 48703 Update: 5/17/05 @ 12:30. For clarification the remediation of the spill included installation of a new transformer. A. Drummings # 84163. Closed on 6-29-05. George Breen "

Remarks: "PRODUCT IS 1/2 PINT OF UNKNOWN OIL ON 300 GALLONS OF WATER. NO SMOKE, FIRE, SEWERS, WATERWAYS, SAMPLES WERE TKANE AND CLEAN UP IS PENDING THE RESULTS OF SAMPLES. 157858."

DEC Memo:	"This building is one of 7 large apartment buildings in the complex. Eastmond is installing a new oil tank in the building basement. There in an existing 20,000 gal buried tank (#6 oil) associated with each of the buildings on the site. At some point in history there was a new fill line installed and they did not dig out the contaminated soil around the old fill line. Now they are installing a new oil tank in the building's basement and taking the old buried tank out of service. While Eastmond was digging to install a new fill line, they trenched and found contimated soil from a prior leaking fill line. There is an open trench with contamination.... Open trench is 2ft wide x 20 deep x 12 ft long Eastmond installed 1 new tank in one of the other buildings last year. They have now just signed a contract to install one new tank in each of the remaining 6 buildings. As part of this contract, they are installing new new fill lines and they will eventually abandon the existing 20,000 gal USTs associated with each of the other buildings. CSL sent to property owner: Vantage Properties 750 Lexington Ave - 17th Flr NY, NY 10022 Attn: Mr. Michael Ellsworth 06/15/07 Report from A.L Eastmond-30 tons of contaminated debris was removed.End point sample shows voc/svoc non detect.Manifest/photographs are attached in edocs.Spill can be closed.(SR)"

DEC Memo:	"Buried fill line appears to be leaking into soil and up through the sidewalk. Temp fill line has been installed. Contractor is getting sidewalk permits and will then dig out the old line and any contaminated soil. Preferred Environmental has been hired to do the cleanup, testing and close out report. - 12/22/11 02/03/12-Hiralkumar Patel. alternate addresses: 345-385 W 145th Street, 251-265 Edgecombe Ave, 696-708 St. Nicholas Ave PBS #: 2-201111. as per PBS record, the

SIDEWALK (Continued) **S111457056**

site has one 20,000 gal #6 oil AST in subterranean vault. tank was installed in Oct. 1956. no other spills found. 2:30 PM:- spoke with Jill at Preferred. she mentioned that they sent proposal but never heard back. 2:53 PM:- spoke with Ms. Rodriguez, property manager. she mentioned that J&R Mechanical is in process of hiring contractor for cleanup. Hillview Owners Corp. c/o Midboro Management, Inc. 148 West 37th Street, 8th Floor **main office** New York, NY 10018 Ph. (212) 877-8500 Hillview Owners Corp. **property owner** c/o Midboro Management, Inc. 345 West 145th Street **on-site management office** New York, NY 10031 Attn.: Felicia Rodriguez **property manager** PH. (212) 281-3300 email: frodriguez@midboro.com Mr. Smiley Building Engineer Ph. (646) 773-3138 2:56 PM:- spoke with Mr. Grand at J&R Mechanical. he mentioned that #6 oil was coming out from sidewalk during a delivery. its about 20 ft long sidewalk between the curb (where fill port is) and the building foundation wall. he also mentioned that the tank and all associated lines run aboveground expcet the part of fill line that runs under the sidewalk. they have installed a temporary fill line. he has sent proposal from Preferred to property manager who has forwarded it to co-op board. they are waiting for response from board. J & R Mechanical Services Inc. Lenny Grand Ph. (718) 328-9935 email: leggett2@verizon.net 3:36 PM:- sent letter to Ms. Rodriguez requiring soil delineation and endpoint samples. asked her to submit report by 03/23/12. letter emailed to Ms. Rodriguez and Mr. Grand. 03/01/12-Hiralkumar Patel. 4:13 PM:- received email from David from Riteway. he inquired if borings needed prior to excavation. 03/07/12-Hiralkumar Patel. 4:11 PM:- spoke with Joe at Riteway. they will replace the fill line and will remove any contaminated soil. as they are planning for excavation, no need for soil boring at this time. 03/20/12-Hiralkumar Patel. 2:56 PM:- received email from Bill from Preferred. Preferred has been authorized to do work and they will install soil boring on 03/26/12. 3:36 PM:- spoke with Bill at Preferred. he mentioned that due to oil seepage through basement wall and oil coming up through sidewalk, owner decided to perform soil delineation prior to any excavation. Preferred will do some borings to define area of contamination, then Riteway will perform excavation. Bill is hoping to get NYC DOT permit tomorrow and will do soil delineation next week. 06/08/12-Hiralkumar Patel. 2:10 PM:- spoke with Bill. they finished investigation and submitted report to property manager. Bill will send copy of investigation report for review. Bill mentioned that property manager was going to hire Riteway for cleanup of contaminated soil. 2:13 PM:- spoke with Joe at Riteway. he confirmed that Riteway did not do the job. 2:18 PM:- spoke with Mr. Grand. he does not have much information and asked to contact Ms. Rodriguez or Mr. Smiley (buiding engineer). tried Ms. Rodriguez's phone number, but no response. 2:25 PM:- spoke with Ms. Rodriguez on Mr. Smiley's phone. she mentioned that Preferred drilled on sidewalk and collected samples. she mentioned that work has been completed. informed her that the spill cleanup report was due on 03/23/12 and must be submitted to the Department by the end of 06/15/12, or else case will be referred for enforcement. 3:01 PM:- sent email to Ms. Rodriguez and informed her that the cleanup report must be submitted to the department by the end of 06/15/12 or else case will be referred for enforcement. email copied to Bill. 3:35 PM:- received email from Bill including investigation report. abstract: - an existing 20,000 gal AST, installed circa 1956, is present within a subterranean vault in the sub-basement of the building - the AST is set on top of concrete

SIDEWALK (Continued) **S111457056**

piers within the subterranean vault, which has a pourcd concrete floor - standing water was noted within the vault <---------- - observed fuel oil on the interior wall of the AST vault, immediately beneath the location of the entry point of the remote fill piping, a depth of approx. 4 ft below outside grade <-------- - fuel oil staining was also noted on the concrete sidewalk immediately above fill piping, exterior, to the south of the building - J&R Mechanical installed a new remote fill line within the sidewalk of 145th street - during site inspection, Preferred confirmed that two former remote fill lines were abandoned and filled with concrete and one new remote fill line was present along 145th st - four soil borings (SB-1 through SB-4) were installed to refusal, ranging from 7 to 10 ft bg - soil borings were pre-cleared to a depth of six ft bg - as the subject property is situated on a steep topographic slope toward the southeast, boring SB-1 was installed just northwest (inferred upgradient) of the former remote fill lines and borings SB-2 through SB-4 were installed southeast of the former remote fill lines, in a linear pattern, along W 145th street - soils within the borings consisted of silty sands with various fill material and cobble - field screening did not identify any evidence (staining, odors, discoloration or elevated PID) of contamination within any of the four soil borings - no groundwater found before refusal - collected three soil samples at 4-5 ft bg from boring SB-1, SB-2 and SB-3 - no contamination found in soil samples - proposed to excavated soils directly below and within the trench of the former remote fill lines report includes pics showing oil seepage into the tank room. 06/13/12-Hiralkumar Patel. 3:29 PM:- left message for Ms. Rodriguez. informed her that the department requires cleanup of contaminated soil. asked her to call back to discuss. 3:32 PM:- spoke with Bill. he received call from management office and requested a cost estimate for the work. Bill is planning to remove the former fill lines and any associated contamination. Bill will submit cost estimate by 06/15/12. he will call back with update. 06/26/12-Hiralkumar Patel. 10:57 AM:- spoke with Bill. he hasn't received work authorization yet. 11:00 AM:- left message for Ms. Rodriguez. informed her that case will be referred to legal if no response, about cleanup status, by the end of today. 11:02 AM:- spoke with lady at management's main office and informed her about possible enforcement, if no response by the end of today. 12:38 PM:- received call from Ms. Rodriguez. she mentioned that they were waiting for response from Preferred. asked Ms. Rodriguez to submit a work schedule by the end of tomorrow. informed her that the work must begin within two weeks (by 07/10/12) to avoid enforcement. 06/27/12-Hiralkumar Patel. 11:33 AM:- received call from Bill. he received verbal approval from property manager. once he receive signed approval, he will apply for sidewalk permit. informed him that the work must begin by 07/10/12. 07/05/12-Hiralkumar Patel. 9:14 AM:- received email from Bill. he mentioned that Preferred has been authorized to conduct the required cleanup and will apply for DOT permit. based upon anticipated receipt of sidewalk permit next week, work may begin in week of 07/16/12. 07/06/12-Hiralkumar Patel. 12:14 PM:- received message from Bill. he mentioned that sidewalk permit application will be submitted, as soon as they get payment from owner (which is expected today). 07/17/12-Hiralkumar Patel. 2:30 PM:- spoke with Bill. he mentioned that due to on-going DOT work in area, they have to wait to get permit for required sidewalk work. asked Bill to call back by 07/23/12 with updates. 07/30/12-Hiralkumar Patel. 6:47 AM:- received

SIDEWALK (Continued) **S111457056**

email from Bill. they received DOT permit late last week and have scheduled work for 08/01/12. 08/17/12-Hiralkumar Patel. 1:02 PM:- spoke with Bill. they finished work and endpoint samples came back clean. he will submit report soon. 09/10/12-Hiralkumar Patel. 3:07 PM:- spoke with Bill. he will submit report tomorrow. 10/02/12-Hiralkumar Patel. 1:58 PM:- sent email to Ms. Rodriguez inquiring updates regarding the spill cleanup report. email copied to Bill. 11/06/12-Hiralkumar Patel. 10:45 AM:- received email from Bill including report. abstract: - excavated soil along former remote fill line - excavation was approx. 16 ft long by 3 ft wide with varying depths of 2-3 ft bg - two endpoint samples collected - no contamination found in endpoint samples 11/29/12-Hiralkumar Patel. based on available information, case closed. 4:23 PM:- sent spill closure letter to Ms. Rodriguez. letter emailed to Ms. Rodriguez and Bill."

Remarks: "1-10 gallons spilled from a line undergrounded. True amount won't be known until the sidewalk is removed."

DEC Memo:	"11/22/05: This spill transferred from J.Kolleeny to S.Kraszewski. 01/03/06: Site Assessment said to be complete by Sept. 2000, by Yellowstone Industries. No record of report on file. Need site assessment report. - SK 07/10/06: NYCHA update summary states that one 32K UST installed in 1977 and stored #4 and #6 oil was replaced by a 25K UST that currently stores #2 oil. Contaminated soil was encountered during the tank replacement, no product recovery system and no MWs. A site assessment is available and NYCHA recommends DEC review it. - SK 02/08/07 : DEC lead changed from S. Kraszewski to J. Kann. J.Kann 3/10/11: J.Kann - Investigative work plan submitted on 3/3/11. 2/11/15: J.Kann - IWP indicates the yellowstone report was incomplete and stated that 50 cy of soil were removed and that petroleum contamination was encountered. Given the limited site history, the work plan only includes soil sampling (with option to install wells only if visible contamination is encountered.). Will approve the IWP provided that at a minimum temp gw wells are installed an sampled. If visisble/olfactory contamination is encountered, permanent wells will be needed. 1/26/16: J.Kann - Four borings were advanced and 2 wells installed. Based on soil analyticals, minor SVOCs were detected in two locations CP-51 SB-2 (15-17 ft) SB-4 (15-17 ft) Benzo(k)fluoranthene 0.8 0.9 0.87 Chrysene 1.0 1.3 1.0 Groundwater was also sampled and benzo(a)anthracene and chrysene were estimated at 0.051ppb (TOGS 0.002ppb). All other constituents were below TOGS. Tank was removed in 2000. Given the staining and oil odor in MW-2, I emailed NYCHA to gauge the wells one

HARLEM RIVER II HOUSES (HARLEM RIVER I) (Continued) **U001840722**

more time before I close the spill. 3/22/16: J.Kann - wells were gauged on 1/28/16 as requested. No product or odor noted. Based on the site file and IWP, the spill has been closed. Spill closure email sent to NYCHA and file DecDoced."

Remarks: "SOIL CONTAMINATION DISCOVERED AT ABOVE LOCATION DURING TANK REPLACEMENT. SOIL EXCAVATED FURTHER TESTING TO BE DONE. NO CALL BACK REQUESTED."

DEC Memo:	"e2mis no. 156017: Operating Supervisor, Stephen J Asfour, 49908 I & A North Reports that in process of doing an inspection at this location found that transformer oil was leaking from bottom of unit at a slow rate onto concrete floor and soil under unit. At this time he approximates that a half gallon of transformer oil has leaked out, but not able to determine a drip rate as of this time. Mr. Asfour will be requesting feeder 2M18 to come off line OOE/2 to do a safe partial clean up and determine damage. 2 liquid samples were taken from the spill, 1 for id and 1 for pcb. Sample priority E . Chain of custody #CC 17432. Sump pump unplugged. No oil to sump. Clean up pending transformer removal. Update 10-29-04 @ 18:29 Lab Sequence Number: 04-08926-001 TOTAL PCB 11 ppm Lab Sequence Number: 04-08927-001 Analysis indicates the presence of a transformer oil 12/21/04 18:40 D.Pace#13149, I&A supervisor, notified the control center on 12/21/04 at 18:30hrs. to say that the paritial cleanup in V4472 was completed. There was no solids removed and 420 gallons of oil and water mixed was removed via tanker from V4472. The method used to wash was double washed with slix. Update: 2/8/05 @ 19:15 hrs. Ed Hulser #39723, Operating Supervisor, Cable Dept. reported at 13:35 hrs. on 2/8/05 that a final cleanup was performed in vault V4472. Solids removed -- approx. one (1) drum capacity of sludge was removed from the vault by the Vactor truck. The walls and floor of the vault were doubled washed with Simple Green and rinsed by the Vactor truck. Liquids removed -- approx. 50 gallons of wash water was removed from the vault by the Vactor truck. Environmental Tag #41929 was removed. The cleanup crew consisted of Supervisor - Ed Hulser and Crew - Chris Gordon #04280 and Herman Rivera #18638. The defective transformer was removed and a new transformer was installed. The final cleanup was completed at 13:15 hrs."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 4:30PM 3/15- CALLED EASTMOND. TANK WAS CORRODED. 2.300 GALLONS IN TANK ROOM. EASTMOND EMPTIED TANK. PUT DOWN SPEEDY DRY. 4/1/99 CHRIS MCNEUR AT MAHA REALTY SAYS SITE WAS CLEANED UP AND TEMP TANKS WERE INSTALLED. OWNER IS THINKING ABOUT EITHER A NEW TANK OR REPAIRING THE OLD ONE. 5/20/99 CHRIS MCNEUR SAID MAHA REALTY NO

APT COMPLEX (Continued) **S102233285**

LONGER MANAGES THIS BUILDING. THE OWNER WENT BANKRUPT AND MANAGEMENT OF THE BUILDING WAS TAKEN OVER BY NEW YORK CITY HPD. 1/17/2002 - Sangesland spoke with Tom Middleton (environmental consultant) who now works for the new owner of the property. Apparently the former property owner lost the building to the city. The city recently sold the building and now the new owner is trying to figure out what needs to be done to bring it into compliance. Mr. Middleton says he believes there is a new tank in the building, but this needs to be confirmed. Sangesland requested a submittal to the DEC including details of the original spill clean up, information related to either the repair or replacement for the subject tank and information on the present owner. As of 1/17/2002, the PBS records are out of date. (expired 1997) The new owner needs to update the PBS information and submit the appropriate PBS information. 3/21/2002 Sangesland received a 1 page letter from State Environmental Services, Inc. (718-265-3355) stating that the tank size was 3,000 (aboveground), it has a concrete Wrap in good condition, the area is clean and shows no leaks, a new seal gasket was installed and the tank and piping system tested tight on March 6, 2002. As of 3/21/2002 the PBS form still was out of date. Sangesland told Mr. Middleton that he needs to get the PBS paperwork straightened out before this spill number will be closed out. 11/19/2003 Sangesland received a copy of an updated PBS form (2-196525) for this site. Now that the PBS has been registered, the spill can be closed out."

Remarks: "CONTAINED IN A VAULTED AREA. TANK WILL BE REPALCED. EASTMAN CO CLEANED IT UP AND DID INSTALL TEMP. TANKS. ***MAY 20, 1999 UPDATE*** MAHA REALTY NO LONGER MANAGES THE BLDNG. ***NEW YORK CITY HPD TOOK OVER MANAGEMENT*** SEE DEC NOTES PAGE"

DEC Memo:	"11/9/09-Vought-Seconday off-hours responder. Vought performed site visit and met with super (Stanley cell:347-387-4582) and cause of spill was burst supply line to oil burner to boiler over boiler pit. Spill of approximately twenty five gallons to concrete 8'x12'x1.5'deep boiler pit that also had some plywood in it was well. At time of site visit Vought noted, pooled red #2 fuel oil and impacted wood and speedi dry as well. Sump pit also impacted in boiler pit. Empire Fuel oil aka Approved oil onsite removing product with shovel into five gallons buckets. Spill initially called in by tenant who observed odors in lobby who then in turn notified FDNY. Super opened windows to lobby and at time of DEC site visit, no odors were observed in lobby. Tank room is directly under Friedland Liquor Store and Vought noted no odors in store and left business card with occupants in case odors should arise. Owner of building is Michael Schwartz (cell:347-219-0430). Vought received call from and spoke to Donna (ABC Tank 718-272-2800 fax:718-272-3147) who is sending crew today to clean spill and Vought provided her with scope of work including removal of impacte debris and powerwashing of boiler pit. No soil borings required as pit noted to contain liquid product approximately 24 hours after spill indicating lack of seepage and suggesting integrity of concrete. See also closed spill #0908866 at same location. Vought sent out CSL with one month due date and submission of invoices from ABC and cc to ABC Tank. Vought called Renaissance Realty and spoke with Debbie and noted requirement for invoice submission for spill closure. CSL sent to owner as per PBS #2-196525: Mr. David Chemtob Renaissance Realty Group, LLC. 1950 Coney Island Avenue Brooklyn, NY 11223 Ph: (718) 376-5400 Fax: (718) 376-6910 11/9/09-Vought-Received copy of signed ABC work proposal including removal of oil impacted debris and speedy dry, pressure washing and disposal of liquid, collection of two soil samples from affected area. Proposal signed by Chemtob. 11/12/09-Vought-Conference call with David Chemtob and Donna. Vought inquired as to status of soil borings. Vought spoke to Donna and no cracks in cement and as such no soil samples were collected. No soil samples required due to pooled oil numerous hours after spill suggesting lack of seepage to

MULTIPLE DWELLING (Continued) **U003127874**

subsurface. Chemtob will fax in invoice for spill closure.
11/13/09-Vought-Received copy of fax invoice from ABC Tank Repair & Lining Co. Shows use of vacuum truck, pressure washer, disposal of washwater, soap and disposal of four drums of contaminated soil. Spill closed by Vought and spill closure letter sent to Chemtob. "

Remarks: "Spilled from Storage tank-caught in catch basin-clean up in progress."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT 6/7/95, 1545: Mr. Smith, Con Ed CIG - fluid level is 350 gallons normally. OIl leaked into submerged vault and did go to sewer. OIl has 369 ppm PCB (historical) - will take sample for analysis. 6/9/95, 1219 hrs: Steve Cribbin, Con Ed CIG - 25 gallons oil pumped into sewer. Transformer pit and transformer have been drained. Will clean up when permits are obtained to shut down the transformer. 2/1/05: Con Ed submitted copy of notification letter to DEP which states: Transformer in Vault 6094 developed a leak. Oil from the transformer was pumped into the sewer by a sump pump located on the floor of the vault. PCB's = 373 ppm. The sump pump was immediately disconnected upon discovery of oil in the vault. The transformer and sump pit were drained of oil on the evening of June 8 following the feeder being taken out of service and the live ends capped. Clean up completed by L. Roman on 6/23/95. Close out. (JHO)"

Contact Name:	JASON HAYES
DEC Memo:	"1/29/09 - Raphael Ketani. Joel Landis and Joe Good of Langan Engineering called me to discuss the case. They said that the spill was called in because test pits were being performed in part of the old Bronx Terminal Market area and contaminated soil was found. They said that two other contaminated areas were discovered previously. At least some of this contamination was from a spill that happened several years ago. The old Bronx Terminal Market grounds were mostly along the Major Deegan Expressway (the present site of the new mall for Target and Home Depot), but a small part was next to the new Yankee Stadium. It is this small area that has the contamination and concerns this case. Right now, there is a project to replace and rebuild the tennis courts at this small part of the old Bronx Terminal. They want to drive piles for some small buildings that will be next to the new tennis courts. They will send a plan to DEC for the digging, stockpiling, and removal of the contaminated soil. They told me that they want to get rid of the soil fast. Excavation and stockpiling will take place next week. I told them that I will look at the plan when they send it. Mr. Good sent me the work plan by e-mail. 2/4/09 - Raphael Ketani. I spoke to Mr. Good and Jason Hayes (both of Langan) regarding why they wanted to dig just in this small area and not the whole area of piers 2 and 3. They said that the great majority of the areas had already been excavated and cleaned up. They said that Sharif Rahman of Region 2 Spills had been the case manager and had overseen the project (see spill cases #0609955 and #0712507). They added that the contaminated area was discovered during a trenching operation and appeared to be an isolated location. I reviewed the work plan. It appeared to be a standard or routine set of proposed remediation operations and soil sampling. Based on these methods and the fact that the future use of the site is as a set of tennis courts, I approved the plan. I sent Mr. Good the approval by e-mail. 2/23/09 - Raphael Ketani. Mr. Good (212) 479-5427 left me a voice mail today. He said that he will visit the site today to observe the excavating and soil sampling. 2/25/09 - Raphael Ketani. Mr. Hayes called me this morning. He said that they did an excavation of 30’ by 90’. Then they did additional test pitting at the site. This made them realize that there was more contaminated soil to remove. So they extended the excavation until it was 90’ by 80’. One corner was found to be deeply contaminated. So they started digging. They dug down 3’ below the water table during low tide. Mr. Hayes said that they were into the organic silt that was originally at the bottom of a small former inlet which is under the site. He said that they are 12’ below the surface and the oil appears to be thick and old, and like #6 oil. He said that they are below the capillary fringe for the water table. Mr. Hayes said that he would like to stop digging. I told him that since he has dug below the capillary fringe and will remove the oil that was found, then he can stop digging. 3/18/09 - Raphael Ketani. I tried to contact Mr. Hayes, but could

CONSTRUCTION SITE (Continued) **S103570832**

only leave a message. Mr. Hayes called me back shortly afterwards. He said that they excavated 5,000 square feet of area. They took 22 end point samples. Two samples came back too high. So they will over excavated these areas. The contaminated soil is being removed right now. The excavation work will take place next week. 4/16/09 - Raphael Ketani. Mr. Hayes e-mailed me and wrote that they had finished the excavating and sampling. The closure report will be sent out soon. 7/9/09 - Raphael Ketani. Mr. Hayes called requesting the status of the case. I told him that the case was still open. He asked why. I told him that I hadn't received the closure report. He sounded embarassed and said that he will send it to DEC very shortly. I received the Spill Closure Report dated 5/27/09 by express delivery service. 7/10/09 - Raphael Ketani. I reviewed the closure report and found it to be acceptable. Based upon the information in the 5/27/09 Closure Report, I have determined that the oil spill has been remediated and there is no threat to human health or the environment at this time from conditions at this site. Therefore, I am closing the spill case. "

Remarks: "CALLER STATES THAT THERE IS PETROLEUM CONTAMINATED SOIL. THIS IS A HISTORIC SPILL. CLEAN UP IS PENDING."

DEC Memo:	"Yankee Stadium site 03/19/08 I spoke with Jason Hayes, Langan Engineering today.He indicated that contamination found in a 10X10' pit near Pier 4.Hiring contractor to remediate this site is on process.(sr) 08/11/08 Langan Engineering performed remediation between pier 4 and Harlem river(pier 5). Activities included:Excavation of all petroleum contaminated soils between Pier 4 and 5 for disposal,separation of concrete surface cover and petroleum-impacted soils into separate disposal stockpiles, collection of end point samples and backfilling the site.The site is approx 1200 sq ft in former Bronx Terminal Market area.The site has a long history of commercial and industrial use.Pictures in report.Prior to removal, waste characterization samples was collected by ECI to obtain approval from waste disposal faclities. Excavation was completed to approx 1 ft below the ground water table.Petroleum contaminated soil removed from the remediation area consisted of brown to dark gray and black,stained fill material, and was observed in a layer located approx. 3 to7.5 ft below grade surface throughout most of the excavationarea. AB Environmental of Bohemia, NY removed 883 gallons of water and oil from the hole.A pipe about 8' long,four inch diameter was located and removed within the excavation area. Observations of Harlem river shoreline between Pier 4 and 5 showed no petroleum impacts, as per LANGAN. Approx. 319.31 tons of petroleum impacted soil were removed and disposed.End point samples result show VOCs/SVOCs within acceptable limit.Final remediation was extended or contracted based on field observations and analytical results, as per LANGAN.NFA required.(sr)"
Remarks:	"unknown amount spilled; happened during excavation; went down about 8 feet and found a pool of oil starting to surface; are not excavating at this time; is contained; not yet cleaned up"

DEC Memo:	"01/10/08 - See eDocs for Con Ed report detailing cleanup and closure. 159207. June 15,2005. Found @ 11:30. Called E/V desk @ 11:44 hrs M40867 - ST NICHOLAS AVE 656. Edward P Cox 18594, Operating Supervisor, District 3 Underground Reports that at this location in process of working on an outage, found approx. 1 pint of what he thinks may be cable oil on top of apprx. 5 gallons of water. Note: Due to heat contingency this will not be able to be cleaned as a 24 Hour-DeMinimus spill. Due to availability of tankers. There was no fire or smoke involved and no sewer or waterway was affected. There

MANHOLE # #40867 (Continued) **S106968828**

were no injuries related to the spill and no weather conditions contributed to the hazards of the spill. No private property was affected. The source of the spill is unknown but may be cable oil. There is oil filled equipment in the structure - primary cables. There is standing water, but no movement, and no substantial cracks. Environmental spill tag #18740 was installed. Chain of Custody DD13038. Logger F.Curtis 38078 CIG called @ 12:28 spoke to P.McGuire 61959. Logger F.Curtis 38078 See eDocs "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL 11/25/03: Spoke with Rubin Castro (917) 395-3490, Manhattan North Operating group. He says no evidence of oil on street other than oil leaks from cars parked over SB. Oil samples were collected for PCB, ID and flashpoint. I requested that SB be cleaned out and checked for evidence of on-going oil seepage. (JHO) ~~~~~~~~~~~~~~~~ e2mis no. 151-275: On 11/25/03 R. Castro Underground supervisor called to report that at 12:10 he found a spill of what he believes to be fuel oil. He reports that in servicebox # 22132 located in front of 132 W. 139 St. there is 2 qts. of fuel oil & 5 gallons of water in it. He says it smells like fuel oil & also looks like it. Also the oil fill line to building 132 W. 139 St is in close proximity. He will take 3 samples 1 for pcb,ID, & flashpoint. Ruben Castro reported at 14:09 hrs. on 11/25/03 that Jane O'Connell, NYSDEC called him at 14:00 hrs. and requested information regarding the source of the spill. After the cleanup is completed she wants to know if there is any more oil entering the structure or if the source of the spill can be identified. She would like to be notified after the cleanup is completed. UPDATE 11/25/03 Lab Sequence Number: 03-09537-001 Total PCB < 1.0 ppm Lab Sequence Number: 03-09538-001 Analysis indicates the presence of a substance similar to a light fuel oil. Lab Sequence Number: 03-09537-002 Flash Point > 140 deg F Update: 1/29/04 Anthony Pizarro #14791 reported at 13:05 hrs. on 12/2/03 that the cleanup was completed in this service box. One bag of solid debris consisting of rags, matting and PPE was generated and removed. Liquids removed by the Vactor truck consisted of six gallons of oil, water and washwater. The walls & floor of the service box was double washed with Slix and rinsed with the Vactor truck. Environmental spill tag #10618 was removed. There is no visible sign of a source of the oil spill. This is a third party spill since the Oil ID indicated a light fuel oil. The cleanup was completed on 12/2/03 at 12:45 hrs."
Remarks:	"oil line to building and it had a leak , took samples to investigate further service box # 22132"

Mailing Address: 695 NICHOLAS REALTY CORP 225 WEST 34TH STREET ROOM 2010NEW YORK, NY 10001 ATTN : KENNETH FRIEDMAN PBS : 2-100390 [It has been crossed referenced] 7/30/15: Mahat DEC Mahat received a call back from Hector (@ 646-773-2033 - Property Director) inquiring more about the progress on the spill case on Department end. He will provide pasting TTF, failed TTF results and brief repair description. DEC is waiting for a closure report. 8/19/15: Mahat DEC Mahat received

ABOVE GROUND TANK (Continued) **S118142065**

passing TT report. It has been uploaded on D2 for reference. However, the TT is performed before another TT failure was reported on 7/22/15. Tank passed the pressure test on 6/3/15 and failed again on 7/22/15. Further investigation is warranted by the Department. Tank system will be out of commission until further notice. DEC Mahat has left a voice message to Hector to call back for a hot wash. A TTF letter has been sent to above address and failing TT result has been uploaded on D2. 8/31/15: Mahat DEC Mahat received another Passing TT result with expired calibration date on the TT equipment. Updated TT Result with proper calibration date has been uploaded on D2 for reference. The tank did not passed the pressure test because of the loose threat in manhole cover and there was a leak on return and sucksen line. Repair has been performed and the tank has passed the pressure test. Based on the provided information to the Department : No further investigation is warranted by the Department. Spill case will be closed on NYSDEC Spill database. "

DEC Memo:	"09/09/2005 - Changed lead from Sigona to Zalewski. (Zalewski) 11/7/2005 - Returned a phone call to Fatemeh Afhkan (NYC DDC). She was calling to check on the status of sevreal spills. Her records indicate that a closure report was submitted for this spill. I advised her that a copy of the report was not present in our file and requested another copy be sent. (Zalewski) 11/9/2005 - Handled a phone call from Steve (TDX). He called to request the address to submit the closure report. (Zalewski) 11/23/2005 - Reviewed spill closure report dated January 12, 2004. Report states that a 16 x 16 square hole, previously cut into the top of the tank by a cleaning company, was not properly sealed and hence the tank failed the tightness test. No evidence of product leakage or spill. No further action. (Zalewski) "

BROWNFIELDS:

Name:	BRONX POINT
Address:	65 EAST 149TH STREET
City,State,Zip:	BRONX, NY 10451
Program:	BCP
Site Code:	577942
Acres:	4.5
HW Code:	C203117
SWIS:	301
Town:	New York City
Record Added Date:	10/05/2018
Record Updated Date:	01/22/2019
Update By:	JHOCONNE
Site Description:	Location: The site, referred to as Bronx Point, is located at 65 East 149th Street in the West Concourse neighborhood of the Bronx, New York. The site is bound by Mill Pond Park to the north; Major Deegan Expressway/Exterior Street followed by the Bronx Terminal Market to the east; East 149th Street/145th Street Bridge followed by a New York Recycling facility to the south; and a railroad right-of-way followed by the Harlem River to the west. According to the United States Geology Survey (USGS) 7.5-Minute Quadrangle Map, the site elevation is about 3 feet above mean sea level (msl). Site Features: The site is currently comprised of vacant, asphalt-paved lots with one remnant steel loading structure on the western portion of the site. Current Zoning and Land Use: The site is currently located in a R7-2/C2-5 mixed-use district. The site is located within the Special Harlem River Waterfront District. The adjoining parcels are used for commercial and light industrial purposes, with the surrounding area generally consisting of residential, commercial, light industrial, and institutional (schools and churches) use. Site Geology and Hydrogeology: The general stratigraphy of the site, from the surface down, consisted of about 19 feet of historic fill, followed by alternating layers of clay, silt, sand and bedrock. The historic fill layer consisted of black/brown/gray sand with varying amounts of gravel, silt, concrete, brick, and shell fragments. Bedrock was encountered at about 67 feet bgs in the central and southeastern portion of the site and at about 78 feet bgs in the southwestern portion of the site. Groundwater, presumably flows west towards the Harlem River, was encountered at about 3 feet bgs in the southwest portion of the site and at about 6 feet bgs in the eastern portion of the site during previous investigations.
Env Problem:	Known or suspected sources of contamination include: (1) petroleum impacted soil in the western portion of the site; (2) at least 8-19 feet of historic fill exceeding the Title 6 NYCRR part 375-6.8(a,b) UUSCOs and RRUSCOs for PAHs and metals lead, barium and mercury; and (3) groundwater exceeding the 6NYCRR part 703.5 Water Quality Standards for Class GA water for PAHs and metals lead, manganese, and those associated with salt water intrusion.
Health Problem:	Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

DEC Memo:	"e2mis no. 156730: Dec 29,2004 @ 13:45 hrs S22136 - W 139 ST 104 (LENOX AVE). Leighton W Burgher 19715, Mechanic A of I & A Dept. found approx. 5 gallons of antifreeze mixed with approx. 10 gallons of water. He goes on to say that it has a strong odor of antifreeze. The source of the spill is not known at this time there is no oil filled equipment in the structure. No sewer connection. Yellow tag 41958 has been placed. Chain Of Custody DD13728. Update 12-29-04 @ 21:48 Lab Sequence Number: 04-10818-001 PCBs < 1.0 ppm 12/30/04 15:34 Received lab results Lab Sequence Number: 04-10819-001 Propylene Glycol < 60.8 ppm EPA 8015 Ethylene Glycol 164 ppm EPA 8015 Update: 2/15/05 Manhattan Environmental Desk made arrangements with Allstate PowerVac to clean this structure on 2/3/05. R. Pellegrino #38620 Update: 2/15/05 @ 14:46 hrs. Eddie Cox #18594, Oper. Supervisor UG North reported at 13:08 hrs. on 2/3/05 that the cleanup was completed. No solids were removed from the service box. Approx. 150 gallons of water and antifreeze mix was removed from the structure by the Vactor truck from Allstate PowerVac. The structure was double washed with Citrus Clean solvent. Environmental Tag #41958 was removed. The cleanup crew was from Allstate. Mr. Cox stated that there was no visible sign of the source of the spill. The cleanup was completed by Allstate on 2/3/05 at 13:00 hours. R. Pellegrino #38620"

DEC Memo:	"207563. see eDocs ConEd has submitted results from seven soil samples to the ConEd Monitor. Mercury levels found are 0.07, 0.21, 0.9, 5, 24, 41 and 58 mg/Kg. (Breen) 8/21/07: E-mail from Con Ed (Brian Bellows) transmitting lab results for soil samples collected in excavation. Location is former gas metering station, where mercury was used. Results indicate that 6 of the 7 samples returned results of mercury greater than the TAGM RSCO of 0.1 ppm. Highest result was 57.7 ppm. Following discussions with Con Edison (Barry Cohen and Brian Bellows) it was agreed that additional soil removal and post-excavation sampling should be undertaken. See eDocs for site photos. (JHO) 8/28/07: Second set of post-excavation sampling results submitted by Con Ed (Bellows). Results following additional soil excavation area actually higher than first round (maximum concentration of 795 ppm in soil). It was noted by Con Ed Bellows that visible mercury was observed in the area where this sample was collected. A conference among DEC, Con Ed Bellows and Con Ed Dave Rubin) resulted in DEC request for formal work plan for additional remediation. See eDocs for additional site photos. (JHO) 9/7/07: site visit with Con Ed (Ken Kaiser, Brian Bellows, Dennis Morda, Tom O'Connell) and Bureau Veritas (Bill Munoz - consultant) to discuss next steps in remediating mercury spill. BV (Munoz) plans to prepare a letter work plan for Con Ed review sometime next week. (JHO) 9/10/07: Spoke to DER Albany Jim Harrington - I requested that when work plan is submitted that he assign someone to review it, since we don't have expertise in the region on mercury remediation. He agreed. Will send work plan up when it is received. Also, received e-mail from Con Ed (Kaiser) transmitting site photos taken last week. See eDocs for photos. (JHO) 9/21/07: Bureau Veritas (Bill Munoz) submitted Remedial Action Work Plan for annubar excavation. RAWP forwarded to DER Albany (Harrington) who assigned it to Kevin

MERCURY EXCAVATION (Continued) **S108763784**

Carpenter. See eDocs for RAWP.(JHO) 9/26/07: DER Albany (Carpenter) sent e-mail requesting additional information, as follows: Can the consultant provide specific information about the amalgam that they propose using (e.g. exact product description, manufacturer, exact product name, MSDS, etc.)? Also, can they provide similar information about the mercury vacuum that they propose using? E-mail sent to consultant conveying comments. Received response from Bureau Veritas (Munoz): I spoke with Evan Altmann of Clean Harbors regarding the Department's request. He indicated he should be able to provide the information in the next day or two. I asked Mr. Altmann to forward the requested information to me, I'll review it, then forward it to you. (JHO) 10/1/07: Bureau Veritas (Munoz) submitted letter report on 9/28/07 for gas main excavation (westernmost area of excavation), and requesting permission to backfill. Sent e-mail response: The appropriate cleanup standard to apply here would be Part 375-6.8(b), the lower of the following two Soil Cleanup Objectives: - Protection of Human Health (Residential) - 0.81 ppm - Protection of Groundwater - 0.73 ppm Based on the data submitted, all of the post-excavation samples for the gas main excavation are below 0.73 ppm mercury. As such, the excavation can be backfilled. I am awaiting further information from you regarding the annubar excavation to complete our review of the work plan. See eDocs for letter report.(JHO) 10/5/07: Bureau Veritas (Munoz) submitted MSDS sheet for the amalgam planned for use in the excavation. This information was forwarded to DER Albany (Carpenter) for his review. (JHO) 10/10/07: DER Albany (Carpernter) provided comments on the RAWP. On 10/11, the comments were e-mailed to Con Ed and Bureau Veritas: " The horizontal location of the annubar within the excavation area should be presented on a figure. " The investigation should be expanded areally in the direction of any sidewall samples the did not meet the cleanup objective. Excavation or direct-push soil sampling would be acceptable. It may be possible to continue the excavation in the direction of the building if necessary. We are not convinced that the stone retaining wall is related to the foundation of the building. Direct push samples could be collected between the wall and the building if necessary. " The document must clarify the depth to the top of bedrock in the excavation. The pictures show large rocks at the bottom of the excavation that do not appear to represent bedrock. We support the plan to remove all soil from the rock surface. " Neither the MSDS or the manufacturer s web site provide sufficient information on the amalgam product (Mercury Eater). The intent is to remove all of this product from the excavation after application. If there is a potential for any of this product to remain in the subsurface, we will need additional information on the contents (ingredients) of the product. " The proposed cap will not likely prevent or reduce lateral migration of mercury vapor or vertical mercury migration. We don t believe that the cap adds any value to the remedy, especially since the surface of the excavation will be restored with concrete or asphalt. " Subsurface utilities in the vicinity of the spill could act as preferential pathways for the mercury vapor. A figure showing the utilities should be provided. " Since further vertical investigation or delineation beyond the bedrock surface is not practical, the work plan should include a post remediation mercury vapor monitoring plan to verify complete removal of the mercury. In particular, vapor sampling should be conducted adjacent to the building to assess exposure and the gas line or other potential preferential vapor pathways. The vapor monitoring can help

MERCURY EXCAVATION (Continued) **S108763784**

compensate for the limited ability to completely delineate the contamination. If post-remediation mercury vapor is detected, additional measures could be required to prevent exposures. (JHO) 10/19/07: Revised RAWP, along with comment response letter, submitted by Bureau Veritas. Copy forwarded to DER Albany (Carpenter) for review. (JHO) 11/29/07: Revised RAWP conditionally approved. Post-remediation soil vapor sampling provision added in approval letter. See eDocs. (JHO) 2/24/12 - Raphael Ketani. I began my review of the spill case in order to determine whether additional work is necessary or whether the spill case can be closed. 2/27/12 - Raphael Ketani. I finished my review of the spill case. On 12/21/07, the DEC approved the revised Bureau Veritas RAWP dated 12/4/07. The revised RAWP contained a soil cleanup objective of 2.8 ppm. Through several rounds of excavation, the soil contamination was finally cleaned up on 5/30/08. The excavation pit was filled to the surface with concrete on 6/4/08. For soil vapor, the EPA indoor air standard is 0.3 ug/m3. A 1/11/08 e-mail from Jane O'Connell to Kenneth Kaiser of Con Ed contained a reference to the ATSDR residential exposure standard of 1.0 ug/m3. The 2/5/08 e-mail from Jyoti Agarwal of Con Ed to Jane O'Connell referred to the method detection limit used by their ELAP laboratory which is 0.06 ug/m3. This MDL is for NIOSH method 6009 and regards sampling time. The sampling time should be about 5 hours in order to achieve a 1 ug/m3 result. On 3/11/09, Joseph O'Connell took over the case and sent an e-mail to Bill Munoz of Con Ed. He had reviewed the 10/2/08 Bureau Veritas RAR and had a number of comments to make regarding the soil vapor sampling. Vapor monitoring was conducted on 5/30/08 just outside the building and achieved a result of 0.005 ppm, based on a conversation factor in Section 4 of the RAR. However, the Jerome (a mercury detecting instrument) reading was 40.5 ug/m3. Information from the NYS DOH indicated that the soil mercury vapors would NOT pass under the building next door. Next, I contacted Barry Cohen (718) 204-4252 at Con Ed regarding the project and about conducting indoor air surveying. He said that he wasn't familiar with this part of the project and that I should talk to Kenneth Kaiser. Mr. Cohen added that, many years ago, Jane O'Connell and Mr. Kaiser had conversations about the vapor issue and it was agreed that indoor air surveying wasn't necessary. However, he will have Mr. Kaiser contact me later. I told Mr. Cohen that the DEC believed that a good result of non-detection for the indoor air would settle the mercury vapor question for once and for all. 3/5/12 - Raphael Ketani. I spoke to Kenneth Kaiser of Con Ed (718) 267-3881 regarding the mercury spill. He said that the contaminated soil had been completely removed and that the bedrock was wiped clean. After this, three soil vapor sampling points were installed (2 within the excavation area and 1 between the building and the pit). The points were sampled for an extended period of time. Mr. Kaiser didn't remember for how long. However, he said, no mercury vapors were found. I asked Mr. Kaiser whether mercury vapor sampling had been conducted inside the apartment building. He said that Con Ed didn't feel this was appropriate or necessary. The outside vapor sampling points didn't indicate the presence of mercury vapors and it would be hard to get good vapor sampling results if there are solvents and other chemical bearing materials in the basement of the building. Also, the residents would have to be notified that vapor sampling would be taking place. This would cause distress to the residents. I told Mr. Kaiser that I didn't have the latest vapor sampling results. He told

MERCURY EXCAVATION (Continued) **S108763784**

me to call Mr. Cohen and have him send them to me. I tried to contact Mr. Cohen (718) 204-4252 regarding Con Ed sending the DEC the mercury vapor sampling results, but I could only leave a message. 3/6/12 - Raphael Ketani. I received two rounds of data for soil mercury vapor sampling by e-mail from Vito Mariani of Con Ed. I reviewed the results. Test America Level IV Data Package, dated 8/8/08, for sampling performed on 7/31/08 Location A: tube=0.00177mg/m3; 0.000216ppm; sample air volume 24.582L Location B: tube=0.00177mg/m3; 0.000216ppm; sample air volume 24.552L ambient air:tube=0.00176mg/m3; 0.000215ppm; sample air volume 24.648L Test America Level IV Data Package, dated 9/15/08, for sampling performed on 9/3/08 Location A: tube=0.000192mg/m3; 0.0000234ppm; sample air volume 227.04L Location B: tube=0.000188mg/m3; 0.000023 ppm; sample air volume 230.88L ambient air:tube=0.000189mg/m3; 0.000023 ppm; sample air volume 230.214L From the data in the Bureau Veritas reports in the case record, I have determined that the mercury in the soil has been cleaned up. Also, from the above vapor sample data, it appears that mercury is not vaporizing. 3/15/12 - Raphael Ketani. The soil vapor analytical results for mercury were submitted to Michael Hughes (518) 402-7810 of the NYS DOH for review. 3/16/12 - Raphael Ketani. Mr. Hughes responded back by e-mail that the DOH didn't believe that the concentrations were of a concern. The DOH didn't recommend further air testing. 3/27/12 - Raphael Ketani. Discussions took place today amongst staff at Region 2 DER regarding the soil and vapor results submitted by Con Ed and Mr. Hughes' comments regarding the soil vapor levls. It was determined that the remediation had been sufficient to reduce the concentrations of mercury such that residual material didn't pose a threat to the public and the environment. Therefore, Hassan Hussein, EE III and head of the Hazardous Materials Unit for Region 2, gave the approval to close the case. I closed the spill case effective today and sent a Spill Closure Letter to Mr. Cohen of Con Ed. "

Remarks: "Just over 1 lb. of mercury was found in the soil during an excavation. All info is unknown. A contractor has been notified for clean up. ConEd#207563 No to the five questions."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER Sangesland spoke to Mr. Rice. He said the building next door at #232 west 139th St got an oil delivery today and there is a large spill all over the sidewalk and street infront of #232 and his building at #234 west 139th. Sangesland checked city tax records and found owner: William Mack 92 Crisfield St, Yonkers, NY 10710. No phone number was available for that name or reverse directory for that address. Reverse directory lookup for 232 west 139th st gave 2 names/numbers - neither worked. 4/01/04 - Sawyer - Responded to this spill because no one was reachable on 3/11/04. Arrived at 4:30 to find spill from fill pipe of about 10 gallons of #2 Fuel oil. The area affected was about a six foot diameter from fill pipe. The area had been semi covered with speedy-dri, but not worked in. I eventually found an older lady that was renting the apartment on the bottom floor. She was distraut and feeling the affects of the strong vapors. From this tenant I got the number for the land lady Miss Brown and called her for information. She did not return my call but showed up about 5:00 pm. I received the number and information that she was to get a delivery the day before. Her fuel company was SJ

OIL DELIVERY AT (Continued) **S106383675**

Fuel and I told them to send a clean up crew back down here to clean this mess up. The driver who put down the speedy-dri did not notify his company that he had made a mess, but I did. Around 6:30 two different cleanup vans from SJ came to the sight to finish the clean up. All of the spill was on the surface and after they finished you could not tell there had been a spill there. When I left at 7:30 all parties involved were happy and the spill was totally remediated."

DEC Memo: "Sangesland spoke to Vinny at Island Tank. He said they removed a 275 gal heating oil tank from under a porch. The tank had already been patched once and had been leaking. Island Tank dug out 8 to 10 bags of contaminated soil. They will return to the site to dig out more and then take end point samples. 10/30/07-Hiralkumar Patel. left message for Ms. Sherman. spoke with Vinny. as per him, tank and fill line leaking. fill box at curb and fill line goes through sidewalk (about 8 inches) directly into coal chute under sidewalk and then runs aboveground to tank. as per Vinny, he found dripping from fill line into coal chute and from tank bottom. floor was not in good condition. he has installed new tank at site. Mr. & Mrs. Sherman 240 West 139th Street New York, NY 10030 Ph. (212) 926-8025 Fax (212) 368-0580 10/31/07-Hiralkumar Patel. sent letter to Mr. Sherman requiring soil delineation and endpoint sampling. letter faxed to Mr. Sherman. 11/06/07-Hiralkumar Patel. received call from Ms. Sherman. as per her, basement floor is in good condition. asked Ms. Sherman to send color photographs of basement floor around tank system and area where spill noticed and also photographs of fill line (aboveground/underground?). mentioned to her that if floor is in good condition with no cracks, then no soil samples needed. she will send photographs. 11/16/07-Hiralkumar Patel. received photographs of tank location. floor looks in good condition. spoke with Vinny at Island tank. he removed about two drums of contaminated dirt and found solid concrete under it. he installed new tank system. based on available information, case closed."

Contact Name:	MATTHEW CARROLL
DEC Memo:	"10/28/13-Zhune called Mattew Carol from Pennnen Environmental 646-606-2332. could not get him. Left message to call back. 10/31/13-Mattew Carrol called. he said due to deligence they did soil borings and soil vapor. They terminated most of the borings at 2' due to shallow bedrock. They found no indication of groundwater or perched water. They found what they belive is perched water at 11' in borings located northeast (PID 1000 ppm, gasoline odor). They are waiting for the analytical results. They are working for potential purchaser. 11/20/2013-Pete Lakatos from TERMS Emvironmental Services Inc. sent the following email\\ I am representing Mr. Abe Caller the owner of the site.. I provided our contact information below (we have worked together in the past on another project) We are in the process of scheduling and performing an environmental remediation for Spill No. 1307746 at 655 Saint Nicholas Avenue NY Block 2050, Lot 149. Evidence of a petroleum release was observed in the northeast corner of the property. The impact has been delineated to the south, west and north; Benzene was detected at a concentration of 0.19 ppm, above the Unrestricted Use SCO of 0.06 ppm. Total xylenes were detected at a concentration of 2.22 ppm, above the Unrestricted Use SCO of 0.26

FORMER GAS STATION (Continued) **S114561120**

ppm. No groundwater was encountered Although several compounds were detected in the soil vapor samples collected at the Site. No compounds were detected above the NYSDOH AGVs. No compounds were detected that are also associated with an NYSDOH matrix. TERMS proposed services for addressing this localized impact include performing an at peril remediation. We assume that an excavation of approximately 15 x 15 x 4 in depth will be required and generate approximately 50 tons. All the contaminated soil encountered during these activities will require offsite disposal. End point post excavation samples will be collected and analyzed to verify the success of the remediation. A RAR report will be prepared and submitted to the NYDEC for NFA approval. Pete Lakatos TERMS Environmental Services, Inc Office 908-464-0028 Fax 800-459-8488 E mail plakatos@termsconsulting.com 2/10/14- The Remedial Action Report was received and reviewed. The RAR was sent by Terms Environmental dated 2/10/14. 3/7/14- In a DEC letter dated 3/7/14, the Department required the following requirements: 1. Submission of surounding areasite map and former/current location of any USTs, piping, remote fill ports and the dispensers islands 2. Installation of soil boring at all remote fill port. 3. Submission of vapor and moisture mitigation techniques to be used in site development. 4. Collection of soil samples along piping run 5. Submission of development plan for the site. As per Jeff we will wait for submission of develpoment plan for the site, if excavation extent to bedrock or to a determine depth then we will require endpoint soil samples. Based on the endpoint results we may require the installation of a bedrock well for groundwater investigation. About confirmatory air samples we will wait untill they send the imformation for active or passive SSDS. 4/24/14-Vought-Zhune of out office on extended vacation. Received call and email from Pete Lakatos (Terms). Email contained followiing string: Email from Lakatos to DEC Zhune-4/1/14. Email that Hi Veronica, Mr. Caller (the owner of the property) forwarded the attached March 7 letter you had sent to (TERMS) and the prospective purchaser (Harlem School of Arts) and their environmental consultant (Tennen). Based on the location of the fill port and piping run located by GPR in the sidewalk and depicted in attached photo, the proposed 4 sample locations were agreed upon by all parties and based on the sampling requirements contained within your letter. These are well within the 20ft distance and biased toward pipe joints/elbows and at fill port. We are proposing 1 additional sample where the GPR could not locate any piping located on site and where piping may have existed. Previous samples S1, S2, SB,5 S3, S4, SB7 and S5 and analysis collected by both TERMS and Tenen did not detect any petroleum contamination in the area which may have contained former piping and would satisfy the 20ft pipe sample requirements contained within the March 7 letter. An attached figure has been proved for your review and approval. We have called in a mark out and should be onsite in about a week to perform the investigation based on your requirements, approval or suggestions. Therefore we are asking for an extension on the April 7 report submission. Upon receiving results (2weeks) we are requesting a May 7 2013 submittal report date. I addition, If the results reveal no impacts, Mr. Caller has asked me to inquire if letter could be issued stating no further action/ investigation for SPILL 1307746. The remaining requirements contained within the letter (Vapor mitigation plans and site plans) will be submitted at a later date. Please note that the development of a school is only a proposed plan at this time, and future use is

FORMER GAS STATION (Continued) **S114561120**

subject to change. Again thank you for your time and assistance. Please feel free to contact me if you require any additional information before we proceed. Email from Lakatos to Vought-4/3/14. Email that Hi Jeff, Veronica's email stated that she would be out of the office And she let your email for a contact. If you remember we had discussed this case a couple of weeks ago and I am requesting an extension date for the report and a review/approval of the plan so that we are in compliance. Please let me know if there are any concerns. Thank you for your time and assistance. Pete Email from Lakatos to Vought-4/8/14. Email that Hi Jeff, Just to inform you that we are planning to be onsite later this week. To perform the investigation as previously described. 4/24/14-Vought-Sent email to Terms (Lakatos) that My apologies on the delay of response to your below emails. The Department has no objection to extending the due date of the report. When do you think we can expect it? With respect to your note below that In addition If the results reveal no impacts, Mr. Caller has asked me to inquire if letter could be issued stating no further action/ investigation for SPILL 1307746. The remaining requirements contained within the letter (Vapor mitigation plans and site plans) will be submitted at a later date. Please note that the development of a school is only a proposed plan at this time, and future use is subject to change. The Department when notified of a possible development of a site with a potential sensitive receptor must err on the side of caution. As such if the development plans are known at the time when the Report is submitted, submission of documentation of vapor mitigation efforts will be required. If the development plans are not known at the time of submittal than closure may be granted and a clause included in the closure letter that vapor mitigation efforts must be installed, if the property is developed. Please stress to the owner, however, that if the site is going to be developed a school, then it is in their best interest to follow up on vapor mitigation. If vapors were to arise after the school is constructed, not only would it be a media issue but also possibly an evacuation issue as well as involving local politicians. DEC would then hold both the spiller (current property owner) AND the school responsible for the cleanup, which could be that much more costly after the site is occupied and developed. Unfortunately as you know just because the property owner sells the property with a closed case, their potential liability if an issue (including vapors) was to arise, remains. Thanks. Abe Caller 917-578-7434"

Remarks: "Gas odor in soil discovered in boring. No groundwater affected."

Report shows TTF in June 2001. Repair work was done on the manway and the tank (and lines) were retested (and Passed in Oct 2001). The statement says no contamination was found during this period. Now in 2005, much of the piping has been pulled out and the basement/boiler are in the process of being rebuilt/replaced. The existing tank will remain, but all the lines are being replaced. Color photos of the basemnet (and cut oil lines) were submitted May 2005. System will be repermitted and retested after construction on this site is completed. Spill Closed"

Spiller Address:	150TH /EXTERIOR STREET
Spiller Company:	001
Contact Name:	REBECCA DARR
DEC Memo:	"Sangesland spoke to Rebecca Darr of the New York City Economic Development Corportation. Her group is involved with the construction of the New Yankee Stadium next to the existing stadium. As part of this project, the city needed to replace some neighborhood parkland and ball fields that were being taken over by the new stadium construction. The City is rebuilding several old piers along the waterfront and turning them into parkland and ball fields. During the effort to rebuild these piers, the city found several buried tanks used 50 years ago when this was part of a railroad parking area. Trench work done on these piers finds that the fill material is contaminated with petroleum. A sheen was found on the Ground Water at approx 5 ft depth. Langen Engineering has been hired by the city to Deal With the contamination issues. It has not yet been determined how the remediation will be done. 12/12/06 Rahman- Jason Hayes from Langan Engineering(917.859.4908/212.479.5427,jahayes@langan.com) called to say they have found one additional UST while removing those previously discovered USTs.New PBS application will be submitted to DEC. 02/26/07 Rahman-Email from Langan describe the following: 1) The Pier 3 excavation is nearly complete and has resulted in the removal of the vast majority of the source area; current remedial excavation size is approximately 170 feet by 170 feet.A portion of the western sidewall, approximately 80 to 90 linear feet adjacent to the Harlem River, contains grossly contaminated soil that can not be feasibly removed.The sidewall contamination can not be feasibly removed due to the risk of compromising existing waterfront structures (i.e., crib wall, rip rap) that hold the shoreline in-tact and separates the Harlem River from the excavation.The shoreline opposite this sidewall section has been carefully observed at varying tide elevations and no indication of contamination (visual or olfactory) has been observed. Endpoint samples were collected on either side of the contaminated sidewall to delineate its extent. Previous investigation samples and endpoint samples (TCL VOCs and TCL SVOCs) in the area show SVOC exceedances characteristic of historic urban fill and occasional slight VOC exceedances. Given the large amount of source area removed from the pier and considering protection of the existing waterfront structures, the limited area of grossly contaminated material associated with the sidewall will be left in-place and is expected to naturally attenuate over time.The contaminated layer in the sidewall is approx. 2 to 8 inches thick and is at a depth of approximately 6 to 10 feet below surface grade. 2) The Pier 2 excavation is roughly 80 percent delineated, with the grossly-contaminated material removal area currently estimated at 60 feet by 90 feet. As discussed, a portion of the northern sidewall,approximately 40 to 50 linear feet adjacent to an inlet (interpier) shared with the Harlem River, contains grossly contaminated soil that can not be feasibly removed. The sidewall contamination can not be feasibly removed due to the risk of compromising existing waterfront structures (i.e., crib wall, bulkhead) that hold the shoreline in-tact and separates the Harlem River interpier from the excavation. Note that the interpier shoreline opposite this sidewall section has been carefully observed at varying tide elevations and no indication of contamination (visual

NEXT TO YANKEE STADIUM (Continued) **S108130247**

or olfactory) has been observed. Endpoint samples were collected on either side of the contaminated sidewall to delineate its extent. Previous investigation samples and endpoint samples (TCL VOCs, TCL SVOCs, lead) in the area show SVOC exceedances characteristic of historic urban fill, and VOC exceedances (previous investigation samples). Given the large amount of source area to be removed from the pier and considering protection of the existing waterfront structures,the limited area of grossly contaminated material associated with the sidewall will be left in-place. Because of the presence of VOCs observed in the soil during the previous investigation, a chemical oxidant (Oxygen Release Compound) will be added to the remedial excavation and on the grossly-contaminated sidewall material to be left in-place. The Oxygen Release Compound (ORC) will be added prior to backfill of the excavation and will consist of approximately 600 pounds of compound; 300 pounds of RegenOX Oxidizer Complex and 300 pounds of RegenOX activator complex. Note that the contaminated layer in the sidewall is approximately 2 to 6 inches thick and is at a depth of approximately 6 feet below surface grade. 3) Backfill of the remedial excavations shall consist of crushed 3/4-inch stone to approx. 1 foot above the water table, geotextile fabric on top of the gravel layer (to keep the soil backfill separate),and compacted soil to grade level. All Soil brought on-site to be used as backfill will contain no exceedances of the NYSDEC Technical and Administrative Guidance Memorandum 4046 Recommended Soil Cleanup Objectives (TAGM 4046 RSCOs), which will be demonstrated by one composite soil sample per 1,000 cubic yards of backfill. 06/21/07 Closure report from Langan Engineering dated May 2007.Remediaiton activities included: removal and disposal of 13,368.88 tons of non hazardous contaminated soil, removal and disposal of 8,195.57 tons of concrete, asphalt and general construction and demolition debris,removal and disposal of nine USTs, removal and disposal of 4,477 gallons of product and UST cleaning fluids, application of chemical oxidant to the pier 2 excavation, post excavation end point sampling and backfill ofthe piers 2 & 3 remediation excavation.At pier 2,approx. 40-50 linear ft of northern excavation sidewall,contained petroleum contaminated soil that could not be feasibly removed due to the risk of compromising existing waterfront structures that hold the shoreline in-tact and separate the Harlem river from the excavation.ORC was applied in that area to remediate.Eighteen end point samples were taken from pier 2- no VOC was detected above TAGM RSCOs.SVOC exceedances typical of historic fill were detected in the samples.Fifty six end point samples were collected from Pier 3. VOC/SVOCs were within acceptable limit.Details report in edocs. "

Contact Name:	DYLAN MARCHESCHI
DEC Memo:	"2/21/14-Zhune spoke to Dylan Marcheschi 347-927-7871 (tenant at appartment 66 top floor). He said there is oil odor in his apartment that the odor sicked him. He also said that he spoke to the super and the super told him that there was oil spill in the boiler room. Spuer 212- 564-2111 2/21/14-Zhune spoke to Rasin Poskic (Manager of the building) 917-509-5133. He said they had a delivery three days ago and oil was coming by the fill line but the plumber fixed the problem. Two days ago the tenant called the Fire Department they inspected the site and found nothing. Con-Ed also inspected the site and found nothing. As per Rasin today morning they had a delivery in the morning and probably the vapors that came by the vent pipe went up and entered in Mr. Dylan apartment. 2/21/14-Zhune called Dylan and let him know that the DEC will investigate the oil odors but if he wants his lawyer to speak to the DEC lawyer he has to bring his lawyer to the office. He said that is ok that all he wants is a writting document of the findings. 02/21/14-Hiralkumar Patel. alternate address: 402-410 West 148th Street PBS #: 2-267228. as per PBS record, the site has one 7,500 gal #4 oil AST in contact with soil. the tank was installed in Jan. 1950. other spill # 0913598 was reported on 03/24/10 as #6 oil tank failed a tightness test. as per caller, testing was done for potential buyer at that time. as per Protest, the tank testing company, stains were noted on the wall where remote fill line comes to the building and also on top of the tank where supply/return lines are connected to the tank. DEC Brevdo spoke with Bob at Protest who stated that no further work was done after tank test on 03/24/10. case still open. 402-412 West 148 LLC. **property owner** c/o Pinnacle Management Group **property management** 1 Penn Plaza, Suite 4000 New York, NY 10119 Attn.: Rasim Toskic **property manager** PH. (212) 564-2111 Ext. 3001 (O) (917) 509-6133 (C) 11:58 AM:- spoke with Mr. Toskic. inquired him about tank test failure report in 2010 and recent fill line leak. he mentioned that after noticing leak in remote fill line, located under the sidewalk, they abandoned the leaking fill line and installed a new fill line. couple of days ago, they noted couple of drips from the existing fill line which was fixed immediately. 02/21/14-Hiralkumar Patel. 2:45 PM:- visited site. met Ragip, building super. site has six story building with a basement. site has one 7,500 gal AST, sitting on the floor, in secondary vault. as per tank label, tank contains #6 oil. the tank is located along the building's northern foundation wall, in northwest portion of the building. the existing fill port and vent pipes are located along the building wall. all lines are aboveground. noted some oil on tank room floor. Ragip mentioned that there was some oil spilled from an elbow on existing fill line. oil spilled onto tank room's concrete surface.

BOILER ROOM (Continued) **S116552921**

observed oil on north side of the tank and some oil spots at west end of the tank. asked Ragip to clean remaining spill in tank room. found old, previously abandone, fill line in tank room. noted signs of oil seepage from building's foundation wall in area underneath the previously closed fill line. Ragip mentioned that they found leak in former fill line in 2010 (spill #: 0913598) and installed a new aboveground line. noted petroleum odors inside the elevator only. no odors noted outside the elevator. due to odors in elevator, inspected elevator pit. no signs of petroleum product noted in elevator pit. Mr. Marcheschi lives in apartment 66, located on 6th floor, in northeast corner of the building. no odors noted in 6th floor lobby. following actions requires, based on observations during the site visit: - subsurface investigation along the formerly abandoned remote (and leaking) fill line - tightness test of the tank 3:12 PM:- spoke with Mr. Toskic. asked him to test the tank, by the end of 02/25/14. Ragip **building super** PH. (646) 261-0797 3:34 PM:- received call from Isak from building management. informed him about required subsurface investigation along abandoned remote fill line and tank test by the end of 02/25/14. Isak Radoncic Pinnacle Management Group PH. (212) 564-2111 Ext. 3110 (O) (646) 739-1461 (C) email: isakr@pinnacleny.com 02/24/14-Hiralkumar Patel. discussed with DEC Austin and DEC Vought. due to petroleum odors in elevator, the Department requires immediate sealing of the elevator pit. 12:26 PM:- left message for Isak and informed him that the department requires immediate sealing of elevator pit. 12:30 PM:- spoke with Ms. Toskic. he mentioned that Isaac handles building maintenance issues and he will call back. Mr. Toskic also mentioned that boiler company will do tank test today. 02/25/14-Hiralkumar Patel. 11:50 AM:- spoke with Isak. he mentioned that during inspection, they noted broken gasket on tank manhole and crack in vent pipe. they fixed manhole gasket and vent line and will test tank either today afternoon or tomorrow morning. Isak confirmed no more odors in elevator after fixing manhole and vent pipe. 11:58 AM:- spoke with Mr. Marcheschi. he confirmed no odors in building right now, but suspects that odors will come back next week. 02/26/14-Hiralkumar Patel. 9:33 AM:- received call from Abraham Wachsler from NYC Tank Testing. he went to site for tank test, but due to some issues with welding on tank top, testing could not be done today. 10:12 AM:- left message for Isak. 10:13 AM:- received call from Isak. he has discussed tank issues with NYC Tank Testing. he has also informed him oil company not to deliver anymore oil until tank is repaired and tested. suggested him to seal the fill port to prevent misdelivery from other companies. he mentioned that currently tank has around 4500 gal of oil in it. as no active leak noted from the tank, they choose to burn oil down to 1500 gal. at that point, contractor will pump out remaining oil/sludge, clean the tank, repair it and test it. Isak mentioned that based on daily consumption, tank cleaning will happen by middle of next week. based on available information, asked him to provide tank test result by the end of 03/10/14. also asked thim to monitor air quality in elevator. due to no indication of oil in elevator pit and no more odors in elevator (also confirmed by Mr. Marcheschi), agreed with Isak not to seal the elevator pit, at this time. but it may required based upon information/observation after tank repair/testing done next week. 10:35 AM:- sent email to Isak and asked to submit tank system test result by 03/10/14 and monitor elevator daily, until tank repair and test done. 03/04/14-Hiralkumar Patel. 2:30 PM:- visited site. met Ragip. no petroleum odors noted in elevator. minor odors in

BOILER ROOM (Continued) **S116552921**

tank room. Ragip mentioned that tank will be cleaned on 03/06/14. 03/10/14-Hiralkumar Patel. 9:40 AM:- spoke with Isak. he mentioned that the tank passed tightness test on 03/07/14. he will submit copy of test result. 03/13/14-Hiralkumar Patel. 11:19 AM:- received email from Isak including tank system test result. the tank system was tested tight on 03/06/14. based on available information, case closed. **also refer to spill #: 0913598.**"

DEC Memo:	"03/24/10. Zhune spoke to Bob urban from Protest 631-3214670. he said they test the AST 7005 gallons in a vault. The test fail with a gross dry leak. There is stain at the wall with the remote fill comes to the building. There is stain on top of the tank where suply-return line connected to the tank. they are doing this work to the byer of the building not to the owner. PBS 2-267228. 07/16/13 - Spill Case is transferred from Brian Falvey (PBS Unit) to V. Brevdo (Section B) as per DER Region 2 decision - Tank Test Failure Spill Case. VB 11/05/2013 - V. Brevdo Called and spoke with Bob Urban of Protest (631) 321-4670 and asked if he has any information indicating that spill can be closed or whether action is needed. Mr. Urban stated he will look in to this case and will call me back. V.B. Bob Urban called back and said he can not be of much help. They did this testing for potential buyer who seems to have walked away. They did not do any followup work which would help to assertain status of this spill. VB. 03/13/2014 - V. Brevdo e-mail from Kumar Patel of Spill Prevention and Response: On 02/21/14, we received another spill report for the above referenced site (spill #: 1310983) due to petroleum odors in the building. After further investigation, the spill # 1310983 is closed. I did informed property manager about other open spill case due to leaking fill line. Please note that during my site visits, I did observed petroleum stain on building's foundation wall, under the location of former leaking fill line. Below are some numbers related to the site: 402-412 West 148 LLC. **property owner** c/o Pinnacle Management Group **property management** 1 Penn Plaza, Suite 4000 New York, NY 10119 Attn.: Rasim Toskic **property manager** PH. (212) 564-2111 Ext. 3110 (O) (646) 739-1461 (C) email: isakr@pinnacleny.com 03/13/2014 - V. Brevdo e-mail to property manager Mr. Isak Radoncic: March 13, 2014 Dear Mr. Radoncic: On 02/21/14, the New York State Department of Environmental Conservation (the Department) received second spill report for the above referenced site (Spill No. 1310983) due to petroleum odors in the building. After further investigation, the Spill Case No. 1310983 is closed via administrative consolidation with the earlier Spill Case No. 0913598 opened on March 24, 2010. The Department's Spill Prevention and Response staff (Mr. Kumar Patel) informed property manager about the other open spill case No 0913598 due to leaking fill line. Please note that during the site visit Mr. Kumar Patel observed petroleum stain on building's foundation wall, under the location of former leaking fill line. Please be advised that according to the Environmental Conservation Law and New York State Navigation Law, the site owner is under the obligation to conduct environmental investigation and remediation of the property and to rectify leakage of oil from the tank and/or tank equipment. Please contact me at your earliest convenience at 718-482-4928 or via e-mail so the we can discuss the appropriate course of action by the

APT BUILDING (Continued) **S110243968**

property owner to address aforementioned environmental site condition. Sincerely, Vadim Brevdo V. Brevdo also called Mr. Isak Radoncic on 212-564-2111 Ext. 3110 (Office) and left voice mail explaining the nature of my call (see e-mail above). VB 06/26/2014 - V. Brevdo e-mail from NYC Tank Testing to Kumar Patel: Dear Inspector HiralKumar Patel, Attached please find our closure report for spill # 1310983 at 402 West 148th Street. Please review the case at your earliest convenience. If any additional information is required, please feel free to call Abe at 646-321-2876 or our office at 718-731-7011. Thank you, Goldie New York City Tank Testing Inc. 1624 Webster Ave. Bronx, NY 10457 Phone:718-731-7011 Fax: 718-228-4238 06/27/2014 - V. Brevdo June 27, 2014 Dear Goldie: My name is Vadim Brevdo and I was assigned to review information pertinent to spill cases 1310983 and 0913598 for the subject property. Please note that spill case 1310983 had been administratively closed and consolidated with spill case 0913598 which remains open at this time. I have a question on your submission to Mr. Patel (your e-mail of 6/26/2014, 2:50 p.m.): June 12, 2014 letter from New York City Tank Testing, Inc. states in first paragraph on the second page that enclosed are copies of analytical report and the chain of custody . Attachments to your e-mail did not appear to contain aforementioned analytical report, which the Department needs to review. Could you please send a copy of analytical report to my attention? Contact me if you have questions. Thank you. Vadim Brevdo 07/02/2014 - V. Brevdo Spill Case Closure Decision July 2, 2014 402 West 148th Street, Manhattan Spill Cases 1310983 and 0913598 The samples were taken at three locations in the area of old fill box and old fill route pipe between the building wall and the curb at 5 7 below surface grade. Two out of three soil samples showed non detect (ND) for both VOCs and SVOCs. One sample showed ND for VOCs but presence of SVOCs. Some of the SVOCs (pyrene, phenanthrene, fluoranthene) were below CP-51 cleanup values in this one sample. Some of the SVOCs (Benzo(a)anthracene, Benzo(a)pyrene, Benz(b)fluoranthene, Benz(k)fluoranthene, Crysene) were above CP-51 values but within the same order of magnitude as CP-51 values for these compounds. Taking aforementioned analytical data into consideration, the Department concurs with the spill case closure request by NYC Tank Testing in their June 12, 2014 letter report. This is very limited impact, no threat to human health of the environment as long as there is no long term contact with the soils beneath the sidewalk at one location. Spill case is closed effective July 2, 2014. V. Brevdo "

Remarks: "in basement - doing test for buyer - cleanup pending"

DEC Memo:	"e2mis 156683 On 12/22/2004 @ 03:37, Calderon # 19847 of #9 reported that at 03:35 HRS while getting out of his Vehicle # 41186 he noticed a Transmission spill beneath his truck. (5) gallons spilled on the asphalt floor. He was at 215 w.138 St. responding to an Outage . No sewer/waterway was affected, no private property was affected, no fire/smoke was involved, no injuries and weather did not contribute. The source of the spill was the Vehicle and the cause is a leak from the transmission. The spill has been contained using balonies and the spill can only be cleaned up after Transportation arrives to move the vehicle from over the spill. Tansportation has been called and is on their way to the location. Notified CIG, spoke to Elliott # 81653 at 03:45. ERT was also alerted due to the fact that there is a possibility that this situation may not be cleaned up in (2) hours. 12/22 @ 05:10 Calderon reports that the cleanup has been completed as of 05:00 HRS. After the Vehicle was moved all fluid was soaked up. Also the car that was next to the disabled truck was jacked up and the affected area there was also cleaned. The waste was put in a plastic bag and was given to Transportation to dispose of in the proper manner. 12/22 @ 05:20 IMPORTANT UPDATE The correct amount of

Updated By: JHOCONNE
Site Description: Location: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in the borough of Manhattan, City and State of New York. Site Features: The site is approximately 1.54 acres, and is entirely occupied by a building. The building is comprised of three connected sections: a two-story section along Fifth Avenue, a three-story section in the center, and a one-story section to the west. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200 to 300 feet east of the site. Following completion of remediation,

2350 FIFTH AVENUE CORP (Continued) **1000108749**

the site is currently occupied by a self-storage facility and a charter school. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or perc) as a cleaning solvent. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building. Currently the site is use for self storage facility and for art studio space. Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.

Env Problem: Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were tetrachloroethene (PCE) and its breakdown products [trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), vinyl chloride (VC)] in soil, groundwater and soil vapor and sub-slab insulation material. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil, groundwater, soil vapor and sub-slab insulation material is being managed under the Site Management Plan.

Health Problem: People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement and the on-site building. Volatile organic

2350 FIFTH AVENUE CORP (Continued) **1000108749**

compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Site-related contaminants were historically found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air guidelines. To minimize the potential for the inhalation of site-related contaminants, a sub-slab depressurization system was installed beneath the building. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Site Description:	Location: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in the borough of Manhattan, City and State of New York. Site Features: The site is approximately 1.54 acres, and is entirely occupied by a building. The building is comprised of three connected sections: a two-story section along Fifth Avenue, a three-story section in the center, and a one-story section to the west. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200 to 300 feet east of the site. Following completion of remediation, the site is currently occupied by a self-storage facility and a charter school. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or perc) as a cleaning solvent. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building. Currently the site is use for

2350 FIFTH AVENUE CORP (Continued) **1000108749**

	self storage facility and for art studio space. Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.
Env Problem:	Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were tetrachloroethene (PCE) and its breakdown products [trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), vinyl chloride (VC)] in soil, groundwater and soil vapor and sub-slab insulation material. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil, groundwater, soil vapor and sub-slab insulation material is being managed under the Site Management Plan.
Health Problem:	People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement and the on-site building. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Site-related contaminants were historically found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air guidelines. To minimize the potential for the inhalation of site-related contaminants, a sub-slab depressurization system was installed beneath the building. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.

Env Problem: Post-Remediation Remediation at the site is complete. Prior to

2350 FIFTH AVENUE CORP (Continued) **1000108749**

remediation, the primary contaminants of concern were tetrachloroethene (PCE) and its breakdown products [trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), vinyl chloride (VC)] in soil, groundwater and soil vapor and sub-slab insulation material. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil, groundwater, soil vapor and sub-slab insulation material is being managed under the Site Management Plan.

Health Problem: People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement and the on-site building. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Site-related contaminants were historically found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air guidelines. To minimize the potential for the inhalation of site-related contaminants, a sub-slab depressurization system was installed beneath the building. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Site Code: 57691
Site Description: Location: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in the borough of Manhattan, City and State of New York. Site Features: The site is approximately 1.54 acres, and is entirely occupied by a building. The building is comprised of three connected sections: a two-story section along Fifth Avenue, a three-story section in the center, and a one-story section to the west. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200 to 300 feet east of the site. Following completion of remediation, the site is currently occupied by a self-storage facility and a charter school. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or perc) as a cleaning solvent. The dry cleaning operation utilized

2350 FIFTH AVENUE CORP (Continued) **1000108749**

both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building. Currently the site is use for self storage facility and for art studio space. Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.

The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was

2350 FIFTH AVENUE CORP (Continued) **1000108749**

renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building. Currently the site is use for self storage facility and for art studio space. Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.

Env Problem: Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were tetrachloroethene (PCE) and its breakdown products [trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), vinyl chloride (VC)] in soil, groundwater and soil vapor and sub-slab insulation material. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil, groundwater, soil vapor and sub-slab insulation material is being managed under the Site Management Plan.

Health Problem: People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement and the on-site building. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Site-related contaminants were historically found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air guidelines. To minimize the potential for the inhalation of site-related contaminants, a sub-slab depressurization system was installed beneath the building. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Site Code: 57691
Site Description: Location: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in the borough of Manhattan, City and State of New York. Site Features: The site is approximately 1.54 acres, and is entirely occupied by a building. The building is comprised of three connected sections: a two-story section along Fifth Avenue, a three-story section in the center, and a one-story section to the west. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200 to 300 feet east of the site. Following completion of remediation,

2350 FIFTH AVENUE CORP (Continued) **1000108749**

the site is currently occupied by a self-storage facility and a charter school. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or perc) as a cleaning solvent. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in

2350 FIFTH AVENUE CORP (Continued) **1000108749**

1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or perc) as a cleaning solvent. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building. Currently the site is use for self storage facility and for art studio space. Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.

Env Problem: Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were tetrachloroethene (PCE) and its breakdown products [trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), vinyl chloride (VC)] in soil, groundwater and soil vapor and sub-slab insulation material. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil, groundwater, soil vapor and sub-slab insulation material is being managed under the Site Management Plan.

Health Problem: People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement and the on-site building. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Site-related contaminants were historically found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air

2350 FIFTH AVENUE CORP (Continued) **1000108749**

guidelines. To minimize the potential for the inhalation of site-related contaminants, a sub-slab depressurization system was installed beneath the building. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Site Code: 57691
Site Description: Location: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in the borough of Manhattan, City and State of New York. Site Features: The site is approximately 1.54 acres, and is entirely occupied by a building. The building is comprised of three connected sections: a two-story section along Fifth Avenue, a three-story section in the center, and a one-story section to the west. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200 to 300 feet east of the site. Following completion of remediation, the site is currently occupied by a self-storage facility and a charter school. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. FINDS:

Registry ID: 110000808074

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"5/23 Sangesland called Gilmore at DEP. Limited info, only name of

STREET TO GROUND (Continued) **S111012184**

Mr. Okoli (unknown how Mr. Okoli is related to the building) Sangesland left a voice mail for Mr. Okoli (got no response) 5/27 Sangesland tracked down PBS (2-331058 expired) after several forwarding calls, finally spoke to property manager Limbert 646-773-2619. He said he was just at the building (6/1) and did not see any spill. He said the oil company may know. 6/1 Sangesland spoke to Richard at Approved Oil 718-238-1050. He asked for all the spill number & info and said he would investigate and call back. ***Richard called back a few minutes later: Approved Acct #FR18ST01 - Last delivery was May 1, 2011 - He has no record of spill or problems*** Unknown if this is a real spill - Who is Mr Okoli???? Sangesland forwarded a copy of the PBS form with new contact number to Nick Lombardo to update & process PBS info. 06/06/11 Spoke with Limbert (646)773-2619.He confirmed that there was no spill either by the fill line or in the building.He also indicated that he would send the PBS renewal application to DEC ASAP.Case closed.(sr)"

DEC Memo:	"10/21/08-Vought-Spoke with off-hours responder DEC Piper who was on-scene with DEC Ahmed. Petro hired Milro to respond to spill last night and Piper/Ahmed performing site inspection to determine DEC requirements (if any). DEC Piper responded to site with DEC Ahmed. Milro on scene last night and pumped 2 manifolded 275s. Upon arrival no odors were present in ground floor of brownstone. 0.0 on pid. I entered basement through closed door and slight odors were present, 0.0 on pid. The tanks were behind another door and when I opened it there were high amounts of vapors. Oil soaked speedy dry was present. I spke with Petro, which stated that there was a delivery yesterday though has been on a stop order since march bc of a bad line. The

RESIDENCE (Continued) **S109372708**

line was replaced and tanks were filled. It is now assumed that the tank was bad the entire time though it needs to be investigated. Milro was hired to complete work. 12/11/08- DECPiper- I recieved call from Toy, homeowner requesting I perform and inspection. 12/15/08- DECPiper- I inspected site. PID readings on ground level were 0.0. As I entered basement PID readings increased to 2 on stairs and 4 on basement level. The floors were pulled up and a solid concrete floor existed. There wasa small area of wood that needed to be removed that had readings of 50ppm. No otherareas exhibited PID readings above 4 ppm. The floor can be epoxied and once docmentation is recieved, the spill can be closed. 1/7/08- DECPiper recieved and reviewed closure report. Based on work to date, this spill is closed. See e-docs if warranted."

DEC Memo:	"05/03/07 - See e-docs for Con Ed report detailing cleanup and closure. 161015. Found @ 09:35 hrs. Called E/V desk @ 09:43. SB40856 - ST NICHOLAS AVE 645 & W 141 ST. Larry C Hughes 18341,Mechanic A, Maintenance Services Was at this location doing a inspection in SB40856, and found approx one half gallon of fuel oil on top of 5 gallons of water. There was no fire or smoke involved and no sewer or waterway was affected. There were no injuries related to the spill and no weather conditions contributed to the hazards of the spill. There was no private property affected. The source and cause of the spill is unknown. Environmental tag #42712 was installed. There is standing water but no visual water movement. There is no sewer connection; no substantial cracks and a concrete sump could not be verified due to the amount of fluid in the hole. Chain of Custody # EE05020, Samples taken for PCB, ID & Flashpoint. Logger F.Curtis 38078. 9/13 @ 21:20. Lab Sequence Number: 05-09610-001. Oil

SERVICE BOX 40856 (Continued) **S107408961**

Identification Analysis indicates the presence of a mixture similar to a light fuel oil and 9/13 @ 23:15. Lab Sequence Number: 05-09609-001. < 1.0 ppm. Lab Sequence Number: 05-09609-002 Flash Point Test. Flash Point, PMCC > 140 deg F Update: 9/15/05 @ 15:55 hrs. Manhattan Environmental Desk made arrangements to have this service box cleaned on 9/15/05 at 11:30 hrs. UG crews, Tanker and Vactor truck scheduled. Operating Supervisor, UG North reported that there was a car parked over the service box, which prevented access to the structure. The next available parking access is Monday, 9/19/05. The Manhattan Environmental Desk, therefore, made a decision at 15:50 hrs. to re-classify this incident as a reportable spill since the cleanup will not be completed in 72 hours. The Incident Type was, therefore, changed from Spill - DeMinimis (72 hr. underground) to Spill - Fuel Oil . R. Pellegrino #38620 "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO/TIPPLE 05/08/01 SITE VISIT BY DEC TIPPLE REVEALED WHAT APPEARED TO BE #2 OIL SEEPING INTO THE BASEMENT OF THE CHURCH THROUGH A SMALL HOLE WHERE THE BASEMENT WALL MEETS THE FLOOR, JUST BELOW AN OLD ABANDON CON-ED CONDUIT. TIPPLE SET TEMPORARY ABSORBENT PADS TO CAPTURE OIL PRIOR TO THE OIL IMPACTING THE SUMP AND GETTING INTO THE CITY SYSTEM. 05/10/01 DEC TIPPLE AND MILLER ENVIRONMENTAL MET AT THE SITE, AN OIL WATER SEPARATOR WAS RECOMMENDED, AND SUBSEQUENTLY INSTALLED BY MILLER ENVIRONMENTAL. ACCESSED 143 & 141 W 138TH STREET BASEMENTS, THEY REVEALED NO APPARENT #2 OIL SOURCES. 05/17/01 SET APPOINTMENT WITH OWNERS OF 2361 7th AVE TO ACCESS FUEL OIL TANK IN BASEMENT, THE BOTTOM OF THE TANK WAS IN DEBRIS. 05/21/01 A RETURN VISIT TO 2361 7th AVE WITH RAKES, SHOVELS ETC. REVEALED THAT THE 2000GAL #2 OIL TANK TO BE SCALING, BUT SHOW NO SIGNS OF LEAKAGE IN THE DEBRIS BELOW THE TANK. A SMALL HOLE WAS EXCAVATED THROUGH THR FLOOR SLAB BELOW THE TANK THAT REVEALED DRY FILL. THE FILL LINE APPEARS TO HAVE BEEN REPLACED FIVE PLUS YEARS AGO. 8/23/05 - Raphael Ketani. Case transferred to Jeff Vought. 07/25/08-Vought-Spill reassigned from DEC Vought to DEC Ketani as per DEC Austin. 9/16/08 - Raphael Ketani. I began my investigation into the case. The spill took place on 3/2/2001, but wasn't reported until 5/8/2001 by Gregory Graves. A red liquid flowed into the basement of the church, supposedly from a vault in front of the building. Con Ed investigated, but said that it wasn't their spill. The owner is the Abyssinian Baptist Church of the City of New York. The block and lot are 2006 and 52. The main address is 132 W. 138 Street, NY, 10030. The address is also known as 132 Odell Clark Place. The alternate addresses are 132-142 W. 138 Street. The contact for mail correspondences is Ernestine Adams. The PBS case is #2-609511. They have one 3,000 gal. tank that is active and has #2 oil. Correspondences and documents in the paper file are: 7/19/01 FAX to Anthony Sigona of Spills: a site visit revealed vent pipes and fill ports -there are probable oil tanks; FAX depicts a lot of properties owned by the Abyssinian Development Corpoeration (ADC) 7/23/01 e-mail from Joan McLeod of ADC to Michelle Tipple of Spills: list of properties aquired from the HPD by ADC with dates of aquisition 8/10/01 FAX from McLeod to Tipple: passing tank test results from ABC Tank for 137 W. 138 St. 8/13/01 e-mail from McLeod to Tipple: cleanup of church should be coordinated by someone from the Abyssinian Baptist Church - Randolph or Gregory Graves 8/20/01 e-mail from Benjamin Conklin of DEC Albany Legal to Tipple stating that since HPD sold the properties without testing the fuel systems, then they are

THE ABYSSINIAN BAPTIST CHURCH (Continued) **S105055716**

the responsible party, not the church 9/6/01 FAX from Tipple to Lonna Wilson of Miller Environmental Group (MEG): attached DEC letter for NYC DOT requesting permission to break the sidewalk to do work at 137 W. 138 St. 10/12/01 letter from Tipple to Wilson granting approval of the SIP dated 10/4/01 - plan includes installation of borings 3' to 10' below grade in the basement of 137 W. 138 St. next to an encased AST, and 3 borings on the north side of 138 Street to bedrock 10/19/01 FAX from Wilson to Tipple: Rich and I have come up with a plan of attack we would like to discuss with you 11/26/01 letter from Wilson to Tipple regarding the inconclusive results and a request to do a ground penetrating radar (GPR) survey with a diagram attached 11/26/01 FAX from Mark Tibbe of Region 2 DER to Pashko Camaj (consultant?): sending of a FAX from Wilson to Tipple which contained the 11/26/01 letter from MEG stating that the boring at 137 W. 138 St. had no vapors, nor staining, and neither did the boring in the sidewalk at 138 St. - results were inconclusive, MEG proposes a further investigation using GPR to find possible sources and conduits, a copy of the diagram from the 10/19/01 FAX is included 12/12/01 Results of Geophysical Investigation report from NAEVA Geophysics: they did a GPR on the western half of the 100 block of W. 138 St., they detected metal anomalies infront of 137-135 W. 138 St. and the Abyssinian Baptist Church, no USTs were identified, piping associated with tanks was identified at 139 W. 138 St. (vents and fill ports), several conduits of undetermined use were identified, one conduit is infront of the church 2/4/02 letter from Wilson to Tipple: investigation of site is inconclusive thus far, they propose the installation of 2 borings - 1 infront of 139 W. 138 St. and 1 directly across the street 4/7/02 letter from Tipple to be sent by MEG for permission to do work in the sidewalks to install 3 groundwater wells at 132 W. 138 Street between 132 and 139 W. 138 St. on both sides of the street A 7/17/01 bill indicates the use of an oil-water separator on 6/14/01. There was one bill from 6/2/03 which indicates that an oil-water separator system was dismantled and that the wells were abandoned, both about 5/16/03. I tried to contact Lonna Wilson at MEG, but she no longer worked there. I spoke to Nicole Pepe of MEG (631) 369-4900 and asked her to go into MEG's archived files and try to find the boring/soil reports for the borings that were previously performed. She said she will look into the archives and see whether she can find anything. I asked to send me copies of any documentation she finds. She said she will. I called up the Abyssinian Baptist Church and attempted to set up an appointment with Randolph Graves (212) 862-7474, ext 255 to see the fuel system in the basement. We set up a 10AM site visit for 9/23/08. 9/23/08 - Raphael Ketani. I met Randolph Graves, the head of maintenance, as scheduled. He took me to the basement and the wall where the oil had seeped through. Once there, I turned on my PID meter. No VOCs were detected. There was a slightly darkened stain on the field stone wall showing where the oil had come through the electrical pipes at the top. There was no wetness and the spring water conduit trench at the base of the wall was free of oil. Mr. Graves told me that he hasn't seen even the slightest seepage of oil in the past 5 years. He said that where we are standing is directly below the sidewalk, not under the church. I took a couple of pictures of the wall (see E-docs). Next, we went outside. He showed me the Con Ed vault where the oil supposedly came from. It was in the street. The oil fill port was located about 11 feet away from the vault. I took more pictures (see E-docs). There was no indication from looking

THE ABYSSINIAN BAPTIST CHURCH (Continued) **S105055716**

at the sidewalk whether there had been damage to the fill port in the past. We talked a little bit more about the oil spill, but Mr. Graves had no additional information to tell me. After this, I left the site. 10/3/08 - Raphael Ketani. I made a site visit to see where the groundwater monitoring wells and other items installed by the PIN contractors were. I found two wells across the street from the church at some distance from the building. I found three wells on the same side of the street as the church. One well was some distance to the east and the other two were some distance to the west. That was all I could find. 10/22/08 - Raphael Ketani. I sent an e-mail to Jeffrey Bohlen ((631) 924-3001; jeffb@envirotrac.com) requesting that his crew take groundwater samples from each well and process them for 8260 and 8270, aside from also checking to see whether there is oil. 10/29/08 - Raphael Ketani. Mr. Bohlen called me. He said that his crew was out to the site. He said that they found all 5 wells, but they were all filled with concrete. He asked what should happen next. I told him that the wells need to be pulled out and new concrete sections of the sidewalk poured. I added that DEC has no groundwater analytical data, nor any presence of free product data. I told him that EnviroTrac should do test borings to make sure that there is no contamination below ground. He said that he will mobilize the necessary equipment. 11/17/08 - Raphael Ketani. Today I received a contractors pay package from EnviroTrac. The invoice number is 01.DC2014.00-1. The pay period is from 9/29/08 to 11/2/08. The work consisted of meeting with staff from the DEC regarding the project, additional phone conversations with staff from the DEC to discuss the project, setting up new billing and electronic and paper files, composing new work orders and the accompanying tables, maps, and labels, developed a new chain of custody for water sampling, travel to site, site evaluation and pictures, use of low value equipment, and inspecting the abandoned wells. I found the pay packages to be acceptable and forwarded them to Contracts and Payments Section of Albany DER. 11/18/08 - Raphael Ketani. I spoke to Dave Lorthioir of EnviroTrac (631) 924-3001 regarding the wells. He said that a crew from EnviroTrac had gone out to the site, but discovered that all of the wells had been filled with concrete. Mr. Lorthioir said that this was one site that he and Jeff Bohlen hadn't visited themselves. He asked that they be allowed to go to the site and inspect the wells as a double check to make sure the crew really found the wells in question. I told him to do so. I added that I will send Mr. Bohlen an e-mail instructing EnviroTrac to refurbish the concrete walkway in the vicinity of each well. I spoke to Michelle Tipple, the previous DEC case manager (845) 256-3153. She said that she remembered Miller Environmental Group installing the 5 wells and finding groundwater. I called up Dave at Miller (631) 369-4900, ext 210 and asked him to find the groundwater analytical data. He said he will look through their records. 11/21/08 - Raphael Ketani. I received a call from Dave of Miller Environmental. He said that they looked through their records, but could not find the analytical results. He said that after the date of the sampling, Miller had moved and many of their records are in storage trailers. He said that they were not very organized collections of records and that these old records were not in their database. 12/1/08 - Raphael Ketani. Miller Environmental never found the groundwater analyticals. So I spoke to Michelle Tipple (845) 256-3153, the former case manager, regarding the groundwater and the sampling. She said that she remembered that the groundwater had a very slight odor, but there was no sheen. She said

THE ABYSSINIAN BAPTIST CHURCH (Continued) **S105055716**

that samples were taken, and there were no hits of concern. Ms. Tipple added that she then ordered the plugging of the wells. I spoke to Robert Leung, DEC Remediation tech. in Region 2 and PIN file manager, regarding whether there are more files for the site and more bills. He said that whatever is presently in the file cabinets up here is the entire file. The FISR was written and submitted to Randall Austin, Chief of the Spills Unit, for his signature. Mr. Austin signed the FISR and it was forwarded to Lou Oliva, Chief Counsel for Region 2, for his signature. Mr. Oliva signed the FISR and an original and one copy were sent to Dennis Farrar in Albany DER. As the investigation had been performed as far as was practical, and as the oil spill was cleaned up and no other contamination was found, I am closing the spill case. 12/4/08 - Raphael Ketani. While moving papers on my desk, I found the unsigned Standby Contractor Authorization Form for EnviroTrac. Randall Austin, Chief of the Spills Unit, had returned it to me unsigned some time ago. The work that still needed to be done was the replacement of the sidewalk slabs at the locations of the 5 abandoned wells. I contacted Dennis Farrar in Technical Support, DER Albany (518) 402-9543 and asked him whether he had received the FISR. He said that he wasn't sure. I told him that there is no Responsible Party for this site and that only the sidewalk replacements needed to be done. Mr. Farrar said that as soon as he finds the FISR, he will just hold onto it. He added that he will call around to Glenn Meier at the Office of the State Comptroller (518) 473-7599 and Mike Cruden at the Office of the Attorney General to see whether they had received the FISR. Mr. Farrar called me back. He said that he hasn't received the FISR yet. However, he told Mr. Cruden to just hold onto it and do nothing until all of the work at the site is completed. 12/9/08 - Raphael Ketani. I submitted the Standby Contractor Authorization Form to Randall Austin, Chief of the Spills Unit, for his signature. He signed it and returned it to me. I sent the original signature form to Mr. Lorthioir. 12/18/08 - Raphael Ketani. I sent a letter to Mr. Bohlen approving the concrete sidewalk refurbishment work so that he can obtain all of the necessary City permits. 12/24/08 - Raphael Ketani. An e-mail was received yesterday from Mike Johnson (518) 623-1249 of DEC regarding a request by the OSC for all outstanding ISRs and FISRs for PIN cases that were near the 90 day deadline for filing claims against Responsible Parties. I spoke to Mr. Johnson and asked him who I should talk to since this case was on the list. He directed me to Glen Myer at OSC (518) 473-7599. I spoke to Mr. Myer regarding the case. I explained that there was no identified responsible party. I added that I had sent the FISR to Dennis Farrar in Albany DER and that a PIN contractor was about to begin work on repairing the sidewalk where the wells are situated. I told Mr. Myer that Mr. Farrar was sitting on the FISR as per my instructions so that the PIN case wont be closed, which would prevent the contractor from getting paid for the sidewalk repair work. Mr. Myer told me that since there is no responsible party, the OAG wont get involved. So the deadline doesn't apply anyway. He added that even if the cost center gets closed, it can be opened up by OSC at any time. 1/27/09 - Raphael Ketani. I received the following e-mail from Mr. Bohlen: Sorry for the delay, but the sidewalk permits for the Baptist Church and 225 E 70th Street had to be re-submitted b/c our bond with the DOT reportedly expired and had to be renewed. We hope to have the permits by next week and we will inform you of the start dates for the field work. - Jeff 1/30/09 - Raphael Ketani. On 1/27/09, I received the

THE ABYSSINIAN BAPTIST CHURCH (Continued) **S105055716**

Contractor Pay Packages for analytical work performed by EnviroTrac Ltd. The work period is from 12/1/08 to 12/28/08. The invoice number is #01.DC2014.00-2. The work consisted of hiring an expeditor to obtain the sidewalk refurbishment permits, abandoning the wells, locating the wells, pyramid manufacturing, project management, use of a light duty vehicle, and use of low value equipment. The packages were found to be acceptable and were sent to the Contracts and Payments Section of DER. 2/10/09 - Raphael Ketani. Mr. Bohlen of EnviroTrac called me today. He said that the 12/18/08 letter that DEC had sent EnviroTrac now had too old a date in order to get permits from the NYC DOB to do the sidewalk refurbishment work. He asked that I send him a currently dated letter. I sent the letter today. 3/9/09 - Raphael Ketani. I sent Mr. Lorthioir an e-mail asking him why DEC hasn't received any updates regarding the sidewalk refurbishment at the wells. I asked whether there was a problem and to forward a closure report to the DEC. I also stated that the lack of the report was holding up the closing of the case. Mr. Bohlen of EnviroTrac called me. He said that he sent the last letter I had written requesting the sidewalk refurbishment to the DOT the day he received it. He doesn't know why the DOT is taking so long to issue the permit. I told him not to wait for them to respond, but to call them and find out what is going on and whether there is a problem. He said he will. 3/10/09 - Raphael Ketani. Mr. Bohlen called me today. He said that EnviroTrac received the concrete refurbishment permit from the DOT. The work will start on 3/18/09. 3/18/09 - Raphael Ketani. I spoke to Mr. Lorthioir today regarding the sidewalk refurbishment. He said that it's been very difficult getting the work done. The two wells across the street are under scaffolding for different construction projects. So they can't replace the entire flag (section of concrete). Instead, they will cut out a smaller section of each flag and replace that. On the church side, one flag contains a monitoring well, but also a new fill box and fill pipe. The fill box and pipe were installed too high. So they almost stick up above the level of the sidewalk. Mr. Lorthioir said that he doesn't want to break up the concrete around the fill box and pipe. This is because if he do work and something goes wrong with the fill box or pipe and there's an oil spill, then the church can blame EnviroTrac. So he will cut the flag in two and only replace the section surrounding the well. Also, there has been a lot of activity on the street with funerals and such. So there's been alot of traffic. It's been tough getting the equipment down the street. However, they are working on the concrete refurbishment. 4/6/09 - Raphael Ketani. The 4/01/09 to 3/31/10 Standby Contractor Authorization Form was signed by Randall Austin, Chief of the Spills Unit, and sent to EnviroTrac. 4/16/09 - Raphael Ketani. Today I received a contractors pay package from EnviroTrac. The invoice number is 01.DC2014.00-3. The pay period is from 3/2/09 to 3/31/09. The work consisted of hiring an expeditor to obtain the concrete refurbishment permits, project management, abandonment of five wells, cutting of the sidewalk, replacement of sidewalk slabs, use of low value equipment, and inspecting the abandoned wells. I found the pay packages to be acceptable and forwarded them to the Contracts and Payments Section of Albany DER. 4/17/09 - Raphael Ketani. Today I received the sidewalk refurbishment report from EnviroTrac. I reviewed the report and found it to be acceptable. Therefore, I left a message and an e-mail for Mr. Farrar in Albany DER telling him that he can now move the FISR that he has been sitting on and give it to the next person who needs to review

THE ABYSSINIAN BAPTIST CHURCH (Continued) **S105055716**

it. 5/21/09 - Raphael Ketani. Today I received a contractors pay package from EnviroTrac. The invoice number is 01.DC2014.01-4. The pay period is from 4/1/09 to 5/3/09. The work consisted of writing the well abandonment report, project management. I found the pay packages to be acceptable and forwarded them to the Contracts and Payments Section of Albany DER. 6/30/09 - Raphael Ketani. Today I received a contractors pay package from EnviroTrac. The invoice number is 01.DC2014.01-4. The pay period is from 4/1/09 to 5/3/09. The invoice date is 6/26/09. This is the same invoice as I had previously received on 5/21/09. I spoke to Alisa Bubb of EnviroTrac and she said that the Albany Contracts had returned the previous invoice because it didn't have the cost and cost multiplier page that was required by the contract. The work consisted of writing the well abandonment report, project management. I found the pay packages to be acceptable and forwarded them to the Contracts and Payments Section of Albany DER."

Remarks: "caller states that a vault ifo above location is leaking a red oily substance. con ed was advised and did show up to investigate but state that the spill is not theirs. caller was advised to report spill 1 week ago but didn't until now"

DEC Memo:	"05/23/06-Hiralkumar Patel. Left message for TJ Oconnor. Spoke to Jack, manager of property. property has 1500 gal UST. PBS # 2-602069 he asked me to send letter at following address: Pete Deorio Chappaqua Realty & Managmnt Co Inc 4 S Evarts Ave Elmsford, NY 10523 Ph.: (914) 345-9351 FAX: (914) 345-9352 sent out TTF. Faxed copy to management company. Received call from Jerry from Dry as a Bone. as per Jerry, owner is doing some kind of construction and part of that they did tank test. Jerry suggested owner to remove tank. he is not sure either owner will install new tank or will use gas heating system. 06/21/06-Hiralkumar Patel. REceived message from Mr. Deorio. spoke to Mr. Deorio. as per Mr. Deorio it is dry leak. they are going to meet USA Environmental Services Corp tomorrow about further testing. owner is planning to abandon old tank and to install new AST. asked Mr. Deorio to call once they decide with dates or someone from USA Environmental should call with such details. 06/29/06-Hiralkumar Patel. Received message from Christine (718-981-5710) from USA Environmental. they are planning to abandon current tank and will install new tank in basement. spoke to Christine. asked her to run isolation test before abandoning current tank as tank failed in test. unless i get information about which part had problem, they will not close this tank. Christine will call once she gets isolation test result. 07/10/06-Hiralkumar Patel. spoke with Christine. they will go tomorrow for further testing. 07/18/06-Hiralkumar Patel. received message from Christine. they did isolation and found corroded manhole cover plate. they put new cover plate and tested tank only and found tank tight. they found vent line leaking during isolation test. spoke with Christine and asked to send

APARTMENT BUILDING (Continued) **S107789440**

tank test result. 08/10/06-Hiralkumar Patel. spoke with Christine. she will send tank test result in fax today. 08/23/06-Hiralkumar Patel. spoke with Christine. she will fax documents today. 08/31/06-Hiralkumar Patel. spoke with Christine. she will fax documents today. 11/14/06-Hiralkumar Patel. spoke with Christine. she will send test result soon. 11/24/06-Hiralkumar Patel. spoke with Christine. she will send document. 01/05/07-Hiralkumar Patel. spoke with Christine. she will call back. spoke with Mr. Deorio. he asked to call building manager, Jack Zimmardo (Off.: 718-323-6710, cell: 917-864-9812). no response at Jack's number. 01/11/07-Hiralkumar Patel. spoke with Mr. Zimmardo. asked Mr. Zimmardo to submit tank test result with reason for initial test failure. he will call Kristin at USA environmental and asked her to send required documents. 06/04/07-Hiralkumar Patel. left message for Mr. Zimmardo. 06/05/07-Hiralkumar Patel. received call from Mr. Zimmardo. he will call his consultant and ask them to submit a report. 06/07/07-Hiralkumar Patel. received call from Mr. Zimmardo. he has some conflict about payment with his consultant. told Mr. Zimmardo that he doesn't get report from this consultant, then he has to hire another company for same work as the department requires report to close the case. 06/08/07-Hiralkumar Patel. received message from Mr. Zimmardo. spoke with Mr. Zimmardo. he spoke with consultant and they will submit report soon. 06/13/07-Hiralkumar Patel. received message from Kristin. she is preparing report and will submit soon. 07/25/07-Hiralkumar Patel. left message for Mr. Zimmardo. spoke with Kristin. they having payment conflicts with management. once they get paid, she will release report/documents. received call from Ruvane as Mr. Zimmardo is out on vacation. he will call Kristin and will send report soon. 08/27/07-Hiralkumar Patel. left message for Mr. Zimmardo to submit report. spoke with Jerry at True Blue environmental (previously known as USA environmental). he will check record and will call back. 08/28/07-Hiralkumar Patel. received call from Jerry. he couldn't find any documents/tank test results. he will talk to Mr. Zimmardo. received call from Mr. Zimmardo. he submit all work order copies to Jerry and waiting for report from Jerry. mentioned to Mr. Zimmardo that if no report available, then he has to do soil investigation around entire tank system (as tank has been abandoned). 09/05/07-Hiralkumar Patel. received call from Jerry. they will do work again and will submit a report. 10/11/07-Hiralkumar Patel. spoke with Jerry. he will send documents tomorrow. 10/31/07-Hiralkumar Patel. spoke with Jerry to submit documents. 11/26/07-Hiralkumar Patel. spoke with Jerry. he is preparing documents and will submit soon. 01/14/08-Hiralkumar Patel. spoke with Jerry. he doesn't know anything. he will look for report. spoke with Eddy at management. explained him that if no reports found, then the department requires soil investigation around tank and along underground lines. asked him to submit report by end of Feb. 2008. 02/21/08-Hiralkumar Patel. left message for property manager. spoke with Mr. Zimmardo. he is retired and Mr. Ruvane is handling this property now. received call from Mr. Vangelder. he works for new manager Ed. as per Mr. Vangelder, they are managing this building since last year. building still uses oil for heating purposes. Ed Ruvane Metropolitan Management Group 162-38 Cross Bay Blvd, Howard Beach, NY 11414 PH. (718) 323-6710 Fax (718) 323-1527 visited site. met Mr. Ruvane, Jerry and Kevin from True Blue. site has new 3000 gal AST (on saddles) inside concrete box with access. tank box floor was found in good condition with no stains. new tank box is inside boiler room area, in frnot of boiler. old

APARTMENT BUILDING (Continued) **S107789440**

tank, which has been abandoned, is also located in boiler room but parallel to boiler. old tank is under sidewalk. all lines runs aboveground except part of fill line that runs under sidewalk. spoke with Mr. Karl, who is working at site for 20 years. he mentioned that contractor removed sidewalk and cleaned tank and abandoned in-place. as per Jerry, no contamination was found during tank abandonment. and they also installed new vent line after finding leak in old one. found new sidewalk in front of building and new vent line. asked Jerry and Mr. Ruvane to submit passing tank test result for test done prior to old tank abandonment and statement about condition of soil around tank (any contamination) during tank abandonment. explained them that if test result is not available then soil investigation must be done around tank, atleast five feet below tank invert (as no bottom samples possible). Kevin will look for papers and will submit. as tank registration has expired and information never updated about closing old tank and installing new one, issued notice of violation. gave copy of notice of violation to DEC Brian. 03/20/08-Hiralkumar Patel. spoke with Jerry about documents about previous tank abandonment. Jerry will call back. left message for Mr. Ruvane. 03/24/08-Hiralkumar Patel. received message from Mr. Ruvane. left message for Mr. Ruvane. 03/27/08-Hiralkumar Patel. received tank test result from Jerry. tank test was done on 09/17/06 (done after initial failure on 05/22/06) and showed tank system passed. based on tank test result, case closed."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL 12/14/00 - spoke with Dan Shah, ERT - he is enroute to site. Crew is awaiting outage to begin draining transformer and start clean up. e2mis notes: Approx. 3 gallons transformer oil mixed with debris and approx. 10 gallons water in vault V3804. Source of spill is the transformer and cause is possible bottom leak. Checked the piping to sewer and found oil indicating possible release to sewer. Sump pump was not running but was plugged in. There are substantial cracks in the vault. Reinforcing rods can be seen in the concrete walls. Samples were taken. Prior PCB history indicates 103 ppm. Cleanup to start ASAP as >50 cleanup. Update at 1737 hrs: >50 tanker never arrived at location today. It was re-routed by Astoria Transportation to another emergency job at Ravenswood. Crew initiated partial cleanup of vault. Absorbent pigs placed around sump pit and around transformer. Oil, water & debris pushed away from sump pit and blocked to prevent migration to pit. Pump disconnected. Bed of absorb-all granules was spread on vault floor. Over 50 tanker was ordered for tomorrow (12/15/00). Lab results: oil similar to dielectric fluid, PCB count 8 ppm. 12/15/00 - No tanker available to drain transformer today. Tanker ordered for 12/16/00, drain scheduled for 7-3:30 shift. Final cleanup pending removal of transformer. Removal scheduled for 12/20. 12/19/00 - Transformer drained via corporate tanker. 360 gallons removed from the unit. 5 gallons free oil recovered from sump pit. Estimated 10 gallons oil in saturated debris on floor of structure. Estimated amount of residual oil in unit after it was drained is 5 gallons. Transformer nameplate states unit contains 390 gallons. Material balance estimates 10 gallons released to sewer. 12/21/00 - cleanup completed with flush truck. Cleanup completed at 1930 hrs."
Remarks:	"BOTTOM LEAK ON TRANSFORMER. CLEAN UP PENDING. OIL IN LINE TO THE SEWER AS WELL, POSS OIL RELEASED INTO SEWER."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 2/28/2004 Sangesland spoke with property manager Mr. Helman. He said the spill was all cleaned up by Summit Transport. Sangesland spoke to super Leo (212-926-2021). He said the basement and outside looked very clean. He also said Summit hired AL Eastmond for the cleanup. Leo lives at 28 St Nicholas - Apt #1A Issac at AL Eastmond says the liquid in the basement was cleaned by Summit (973) 777-0404, but the long term oil problem in a pit outside the vent line was powerwashed by PTC (718) 624-4842. Issac does not know how the oil came into the basement, He will check it out and get back to the DEC with the information. 4/27/06 - Austin - Spill inadvertantly assigned to CO staff (Keating) - reassigned to Ketani 7/13/06 - Raphael Ketani. I spoke to Issac of Eastmond (718) 378-3000 regarding the site. He said that he didn't remember the site, but would look it up and get back to me. 8/7/06 - Raphael Ketani. I tried calling Summit to find out what involvement and documentation they have regarding the spill. However, I could only leave a voice mail for Mark Rosen. I tried getting ahold of Isaac of Eastmond, but he wasn't in. I will try tomorrow. 8/9/06 - Raphael Ketani. I called up Diana Parker at

APARTMNET BUILDING (Continued) **S106468509**

PTC and asked her for documentation for this site's cleanup. She said there was nothing in PTC's records for this site address and that PTC hasn't done a cleanup for Summit in a very long time. Next, I called up Isaac of Eastmond and he said that he found an invoice and paid bill for the site. He FAXed it to me. The documents show that a cleanup was done at the site. There was power washing of the sidewalk, walls, and a pit outside the vent line. Also, 2 bags of debris were removed and soap was used to clean up the site. Based upon these documents, I am closing the spill case. "

DEC Memo:	"See Caller Remarks above. IMPORTANT PHONE NUMBERS: Lindos Lindsay (nephew of one of the pastors/owners) says he is the one who really handles the financial matters and legal aspects, not Kira: (347) 228-8039 Patrick Peters: lives across the street from the church, son of an Archbishop Carlyle Clark - (212) 690-0630 Carlyle Clark: second archbishop at the church - no phone Archbishop (a.k.a. Reverend) Maxton France: 3519 DeReimer Ave., Bronx, 10466; phone (718) 519-7344 Kira Leid-King: sort of a treasurer-secretary , home (914) 632-0665; cell (914) 879-8126; work FAX (212) 455-2502; work phone (212) 455-2501 Cistine Grit (a.k.a. Ingrid; associated in some way with the church): (212) 234-0484/0485 Marlene Martin (exec. dir. Childrens Art Carnival): (212) 234-4093; cell (917) Northeast Environmental (company that did the partial cleanup on 1/14): Dwayne Monaco (914) 777-1930; cell (914) 403-5525 Community Board 9: (212) 864-6200 Cristine Brooks (lawyer; also involved with Board 9 and neighborhood organztn.): (212) 883-7600 Martin Smith (rep. for Councilman Robert Jackson): (212) 928-1322 Robani Oil (Robert Pearson): (212) 687-8699 On 1/14/06, Northeast Environmental sucked up about 120 gals. of #2 oil from the church basement and did 2 borings 18 down to bedrock. The borings were clean. Further work needs to be done in the corner of the courtyard where the wrought iron fence turns next to the Childrens Art Carnival (spill #0511700). The Carnival has oil in their front sump. A second vent pipe and a remote fill port (inside the church fence) were discovered by a technician from Northeast. There is the possibility of a third tank under the courtyard. Northeast had sucked up some oil from the front sump at the Carnival, but refused to go back there for free as they said that they were hired by the church. When I tried to call Rev. France on 1/17, Ingrid picked up the phone. She said that the church has done the cleanup and that’s all they are doing. On 1/17/06, Jeff Vought, spill case manager, called up the church and left a message that they have to cleanup the entire oil spill and do an investigation. The church didn’t return the phone call. I visited the Carnival on this date and found 10.1ppm total vapors (via PID) in the basement and high vapor concentrations throughout the building. This is a day care center and is presently closed due to the high vapors. 1/18/06 - Raphael Ketani. I tried calling the Church of Nazareth at (212) 234-0485, but no one answered and there was no answering machine. So I called (917) 642-8913, the cell for Archbishop Maxton France, and left a message for him to call me. I will send a contaminated soil letter. Another number was found for Archbishop France and an address: (718) 519-7344; 3519 DeReimer Ave., Bronx, 10466. I called the number and a man got on. I asked for Archbishop France and he put me on hold. A woman answered the phone and I spoke to her. She said Archbishop France was out for a week and to call Cistine Grit for any information I needed. I mentioned the oil spill and I asked for the person who owns or manages the church, but she again referred me to Ms. Grit. I made contact with Cistine Grit from the church at the (212) 234-0485 number. I asked to speak to someone responsible. She

CHURCH OF NAZARETH (Continued) **S107523027**

said that there was no one present to talk to. I told her that the state was going to hire its own consultants and open up the church and do an investigation on the grounds. Later I got a call from Kira Leid-King. She told me that she had paid Northeast to come and do the oil removal at the church. I told her there was oil on the basement floor and that Northeast had pumped out 120 gals. on 1/14/06 from the 2 275 gal. tanks in the basement. She said that there wasn't any oil on the floor and that the tanks had been pumped dry after the fire by order of the Fire Dept. I told her that there was a second vent pipe, a remote fill port, and a gauge for a 550 gal. tank mounted on the wall inside the basement. She said that she knew nothing about this. I told her that there may be a third tank under the courtyard. She said that she had no idea if there was. I told her that oil was coming out of the front basement sump of the Childrens Art Carnival and getting onto their basement floor. She said that was the Carnival's own fault and that the church has no oil so it is not responsible. I told her that the state is hiring its own contractors and will do an investigation of the church. She had no comment. MILRO Assocs. Inc. ((516) 379-1500) has been called and I spoke to Paul. I asked him to come to the Carnival to do ventilation and water removal work. We will meet at 10:30AM tomorrow. 1/19/06 - Raphael Ketani. A site visit was made by Randall Austin, Chief Spills Engineer Region 2, and myself. We were there to see the Childrens Art Carnival, but Patrick Peters came by and gave us access to the church basement. We saw the 2 275 gals. tanks, the fill line connected to the first tank, a vent line connected to a second tank, the filter apparatus in the floor and a suction line that was partially buried in the floor. No drains were observed in the room, but we didn't spend much time looking at the floor with our flashlights. We also saw a gauge that was mounted on the basement wall above the first tank. There was a light smell of oil in the room, but no oil on the floor. From best that can be determined, there is probably a third tank under the courtyard. We went to the Carnival and saw red oil in the top of the front sump. There was water seeping through the wall opposite the Carnival's oil tank, but it didn't feel or smell of oil. 1/25/06 - Raphael Ketani. I spoke to Lindsay Lindoss, nephew of one of the pastors, regarding what needs to be done concerning a possible third tank. He said he was unaware of a third tank there. I told him that there is a second vent pipe and a second fill port present that are not connected to the tanks in the basement. So the DEC believes that a third tank is present. I told him that he has to hire an environmental company and have them do an investigation immediately. He said he will do this. 1/30/06 - Raphael Ketani. I tried to contact Mr. Lindoss, but could only leave a voice mail message. 2/6/06 - Raphael Ketani. I tried to contact Mr. Lindoss again, but could only leave a voice mail message. Ms. Leid-King tried to call me and I tried to return her call, but could only leave a voice mail message. 2/8/06 - Raphael Ketani. I received a call from Ms. Leid-King. She said that she has hired Commonwealth Land Title Insurance Co. to do a records (and title) search for the number of tanks on the church property. She said that they will look at Fire Department tank registration records, among others. I told her I was waiting to hear from Lindsay Lindoss regarding the hiring of an environmental investigation company. She said she had never heard of him, but she will find out who he is and try to talk to him. I told her he claimed to be a pastor at the church. She said there was only one pastor. Our conversation changed and she said that the present owners bought the

CHURCH OF NAZARETH (Continued) **S107523027**

church in 1965 and didn't install a tank under the courtyard. She said the only oil spill on church grounds she knew of was the one that was cleaned up on 1/14 in the church basement. She said the church is using over $1,000,000 in grants to get ready to rebuild the building and doesn't have any money for doing an environmental investigation. She said she would send me the results of the document search. 2/9/06 - Raphael Ketani. Ms. Leid-King called to say that Commonwealth finished their document search and came up with information from the NYFD that states there are only 2 tanks. I asked her to send a copy of the document to me. She said she would. 2/10/06 - Raphael Ketani. On 2/9/06, I tried to contact officials at the Housing Preservation & Development office, and the Landmarks Preservation Commission in order to find out whether the DEC can have its own contractor, MILRO, go to the courtyard, dig it up, and remediate the situation (whatever they find). I had left a number of voice mails as none of the appropriate officials were reachable. Today, Amanda Sutphin, Director of Archeology ((212) 669-7823), called me back. I explained the oil spill situation, the church's potential involvement, and the impact of the oil on the Childrens Art Carnival. I described the courtyard conditions. She said it sounded fine to go ahead and have our contractor dig up the courtyard and do whatever remediation work is deemed necessary. She said that I didn't need any special permits or paperwork, only her word over the phone. She said she will inform the other people in her office and elsewhere who need to know about the impending work in the courtyard. A little while later, John Weiss, Deputy Council of LPC ((212) 669-7921), called and asked what the situation was. I told him what I told Ms. Sutphin. He said that, normally, a paper permit signed by the representative from the church would be necessary to do the work in the courtyard. I told him the church either refuses or has not been reachable. He said that in emergencies, verbal permission is all that is necessary. He said he would get back to me. Mr. Weiss called me back and said that I would have to send him an e-mail describing the history of the oil spill, the impacts to the Childrens Art Carnival, what needs to be done to fix the situation, and that the impact is a danger to life, health, or property. He said that once I do this, then he can give me an emergency authorization. I sent him the e-mail letter listed below: NYSDEC Spill #0551505 Dear Mr. Weiss: My name is Raphael Ketani. I am an oil spill case manager, engineering geologist 2, with the Spills Unit of the Division of Environmental Remediation within the NYS Dept. of Environmental Conservation. Presently, I am conducting an investigation to find the source of #2 fuel oil which is leaking into the Childrens Art Carnival at 62 Hamilton Terrace, Manhattan. This problem has been taking place since January 3, 2006. The CAC provides daycare to children ages 4 to 6. The oil is entering the CAC through a sump in the front of the basement of the building. When it rains heavily, the water flows out of the sump and carries the oil with it. The oil flows onto the basement floor, in the process. Once on the floor, the oil vaporizes and the vapors travel throughout the building. The vapor concentrations have been as high as 5,000 ppb in the basement and as high as 700 ppb where the children's activity areas are. The NYCDOH visited the site on January 12, 2006, declared the vapors unsafe, stated that children were not to enter the building, and ordered the building closed. An indoor air pollution closure order was written up by the NYCDOH and signed by staff from the CAC. After this date, the NYSDEC has been having our own contractor, MILRO Environmental, come and pump out the oil from

CHURCH OF NAZARETH (Continued) **S107523027**

the sump and clean the floor in order to control the vapors. This took place many times, but still the oil keeps coming and keeps pouring out of the sump when it rains heavily. The CAC has remained closed to children. The NYSDEC has noted that there is an extra fill port and an extra vent pipe behind the Church of Nazareth which is next door at 72 Hamilton Terrace, NY. This has led us to believe that there is an undiscovered old oil tank under the courtyard behind the church. It is this tank which may be releasing the oil. However, there are no records with the NYFD, or with title companies, or on Sanborn Maps, or with any agency city or state that indicates there is a tank or that there isn't a tank. Therefore, the NYSDEC, through its contractor, needs to break up the concrete surface of the courtyard and see whether a tank exists and conduct a remediation project. As the church is a historic structure (previously a large end of row townhouse), representatives of the church are unwilling or unreachable to obtain permission from the Landmarks Preservation Commission for work to take place, and the children's health is at risk, the NYSDEC is asking the Landmarks Preservation Commission for permission to conduct our oil spill investigation. If we receive permission from the LPC, we expect to start work shortly after February 18, 2006. Thank you for your help and attention to our letter and have a pleasant day. Sincerely, Raphael Ketani Engineering Geologist 2 At 4:00PM today, I sent a letter to Ms. Leid-King stating that the Department will have its contractor conduct an investigation for a third fuel tank under the church courtyard since the church hasn't notified DEC that they are going to hire an environmental company to do so. I told her that this will happen sometime after Feb. 18 (the one month deadline in the DEC January 19, 2006 letter). 2/14/06 - Raphael Ketani. I tried informing the church officials that the DEC's contractor will be on site next week to begin digging up the church courtyard to investigate the possiblity of a third tank. I tried calling Mr. Lindoss, but could only leave a voice mail. Next, I tried calling Mr. Peters, but he wasn't home and a woman answered the phone. She wouldn't identify herself, but she took my name and message. I called Ms. Leid-King to tell her that the DEC contractor would be starting work in the courtyard next week. Ms. Leid-King said that DEC can't do that without permission from the Landmarks Preservation Commission. I told her that I had spoken to their lawyer, explained the situation, and he gave me verbal permission as an emergency situation due to the impact to the day care center (CAC). She said that this was no good and that everyone knows you have to get written permission. She demanded a letter from the LPC lawyer. I told her we didn't need one. She said that if anyone tries to set foot on the property, she will call the police and have them arrested. I told her its her right to inform the police, but the DEC has been dealing with this situation for a month, has given the church also a month to fix the problem, that we have to act, and that we are just giving her a courtesy call. Ms. Leid-King flew into a rage over the phone and stated she would call together a mass of people from the community to block anyone setting foot on church grounds. I ended the conversation by reminding her that this was just a courtesy call. Later, the woman I spoke to when I tried to call Mr. Peters called me back and said that she had talked to Mr. Lindoss and he told her that he is going to contract with an environmental company very soon and that the work will start next week. I told her to have Mr. Lindoss give me a call when the work will start. She said she would. 2/15/06 - Raphael Ketani. I tried to find out who the

CHURCH OF NAZARETH (Continued) **S107523027**

church's lawyer is by calling Mr. Peters again, but the same woman answered the phone. She said she would call some people, try to find out who it is, and let me know. I still haven't heard back from Mr. Lindoss and the woman didn't tell me when the environmental investigation will take place at the church. Next, I tried calling Cristine Brooks (the lawyer involved with Community Board 9) and left a message asking whether she knew who the church's lawyer was and if she could give me her name and number. 2/16/06 - Raphael Ketani. I called Mr. Weiss, Deputy Council of LPC, and told him that the contractor may have to take down a portion of the wrought iron fence when it comes to removing the third tank. He said this may require a written permit. He said he has to contact his General Council and get back to me. Cristine Brooks-Lee called me back at about 12:25PM. She said she didn't know who the lawyer for the church was, but she will find out. I told her that once we know, then our legal staff will contact the church's and send a warrant. She said she will keep looking for their lawyer. She added that she can get affidavits if we need them. 2/21/06 - Raphael Ketani. I received a call from Cristin Ciaburri of USA Environmental (718) 981-5710. She said she met with Mr. Lindsay and she believes her company will do the work of investigating whether there is a third tank on the property. She just has to get together a few more cost estimates for Mr. Lindsay and submit them to him. The proposal will go out soon. 2/24/06 - Raphael Ketani. I sent an e-mail to Mr. Weiss of the Landmarks Preservation Commission informing him that USA Environmental may be getting ready to do work on the site without realizing that they need to contact the Commission. 2/28/06 - Raphael Ketani. I talked to Cristin Ciaburri of USA Environmental regarding the beginning of the investigation for the third tank. She said that the work should start either this week or next week. However, she is waiting for the owner of the property, Mr. Lindsay's boss (as she referred to him), to sign the proposal so they can get started. She said she has contacted the Landmarks Preservation Commission and they will send her a letter by e-mail approving the work. Kristin said she is sure there is a third tank for the church. I asked her who Mr. Lindsay's boss is. She said the name was garbled on her voice mail and so she didn't know, but that if there is an investigation, the DEC will get a copy of the report with the owner's name on it. I told her to inform me when the work is going to start so I can be there. She said she would. 3/6/06 - Raphael Ketani. I spoke with Ms. Ciaburri today. She said that Mr. Lindsay had told her that he would get back to her by 3/3/06, but he never did. She also hasn't heard from the LPC regarding the letter allowing USA Environmental to dig up the courtyard. I told her to call Mr. Lindsay and the LPC and try and get things going. She said she would. 3/9/06 - Raphael Ketani. I received a call today from Marlene Martin of the Childrens Art Carnival. She said that a bunch of people pulled up to the church in plain cars last teusday, 3/7, and went to work on the courtyard. She said that they uncovered and opened up a tank today. 3/10/06 - Raphael Ketani. I made a site visit to the church. I saw an uncovered and opened tank. Soil had been dug away from the top of the tank. I took pictures of the tank and the environment around the tank. The dug up soil didn't have any odors, but looked wet. There was a sheen on the water in the tank and a little bit of red color to one side of the sheen. I called up Ms. Ciaburri and asked her why she didn't notify me when the work was going to start. She said that Mr. Lindsay still hasn't signed the papers to contract USA Environmental to do any work. She added that

CHURCH OF NAZARETH (Continued) **S107523027**

she knew nothing about the digging and the tank opening that took place. I will write letters to Mr. Lindsay and Ms. Leid-King telling them what the next step should be, to close the tank so that no one or any rain enters the tank, and to let DEC know when more work will take place. 3/20/06 - Raphael Ketani. I asked Marvin Edwards, Program Manager at the Childrens Art Carninval next door, to take a look at the exposed tank in the courtyard and tell me if any work appears to have been done. He looked and said that nothing has changed. Therefore, I wrote a letter to Mr. Lindos and Ms. Leid-King telling them that the church has until April 5 to resume work, or else the DEC will bring in its own contractor and do the investigative work. I also left an update for Ms. Cristine Brooks-Lee of Community Board #9. 3/27/06 - Ms. Ciaburri ((718) 981-5710) called to say that she received a call from Cistine Grit (a.k.a. Ingrid) on 3/24, friday. Ms. Grit asked that Ms. Ciaburri put together an investigation plan, send it to her and she would pass it along to Archbishop Maxton France and then send it to USA Environmental. Ms. Ciaburri asked what the DEC wanted as a plan. I told her two wells, soil samples sent to the lab for analysis, an oil sample from the tank for analysis, and possible abandonment in place or removal of the 550 gal. oil tank and removal of soil. She said she would forward this plan to Ms. Grit and keep me informed. Later, Randall Austin, Program Manager for DEC Region 2 Spills, received a call from Kira Leid-King. Mr. Austin told her that the tank had been dug up and opened. She said she didn't know that this had happened. He asked her whether she knew Lindoss Lindsay or Cistine Grit. She said she didn't. When he asked her whether she was the lawyer for the church, she said she wasn't. Mr. Austin asked her where she worked and she said Ury Leid and Associates at (718) 547-7200 - her dad's firm. She said to ask for Sherrell at the law firm. I tried calling Sherrell, but could only leave a message. I tried reaching Cistine Grit at the numbers in the record, but no one picked up the phone. I later made contact with Sherrell Distant, a paralegal at the Ury Leid law firm, and she directed me to Mr. Leid. I spoke with Mr. Leid and he said he is the lawyer for the church, but only regarding the roof situation. He said that he doesn't know who the lawyer for the church is, but he is in contact with Archbishop France. He said he will call Archbishop France and tell him to call me. 3/28/06 - Raphael Ketani. I received a call from Kira Leid-King today at about 9:45AM. She was very angry that DEC had sent the letter stating that we would take action if the church did not investigate the tank by April 5. She made some threats and told me to be very careful regarding what I say. She said she was going to take people to court for saying the wrong things. She even threatened my job and the jobs of others. After this, she calmed down and asked why DEC sent a $10,000 environmental fine. I told her we hadn't issued any fines to date. I told her it must be the NYC Building Department (I had been told by someone at the Building Department or by Cristine Brooks-Lee that there was a $10,000 fine pending). She asked who told me about the tank. I told her someone from the community informed me that, several weeks ago on a teusday, a group of people in plain cars had dug up the tank. She asked who. I told her the party wanted to remain confidential. After this Ms. Leid-King said that Sister Ingrid (Cistine Grit) gave her the $10,000 bill. I told her that Ingrid had been in contact with USA Environmental and had asked about a plan for investigating the tank. I added that this plan was supposed to go to Lindos Lindsay and that this group was moving forward with addressing the tank issue. I said

CHURCH OF NAZARETH (Continued) **S107523027**

there appears to be that group of people in the congregation and her group. She said there is only one group. She asked why I didn't get in contact with Sister Ingrid to find out what is going on with the tank investigation by the congregation itself. I told her I had been trying many times, but Sister Ingrid doesn't answer the phone. She asked Did you try every day? I told her that I have many cases to deal with here at the DEC and I can't call her every day. [In fact, I tried calling her on several occasions, including 3/27/06 and 3/28/06] Ms. Leid-King said that she speaks to Lindos Lindsay. After this, she said that the people who opened up the tank already took soil and water samples. I asked who was the environmental contractor and Ms. Leid-King wouldn't say. Next, she asked me what type of work would be necessary for the investigation. I told her about soil sampling between the church and the tank and the tank and the CAC, about the installation of 2 groundwater wells, about the possibility of either abandoning the tank in place or removing it, about updating the PBS record, and about sediment removal. She ended the conversation after that. 4/4/06 - Raphael Ketani. I finally got ahold of someone who represents the church. This person was Lindos Lindsay, nephew of one of the pastors. He said that progress is being made as the church is in negotiations with an environmental company for the work. He said that they didn't use Northeast Environmental as they wanted $40,000 or so dollars and this was too expensive. He said that they need several more days to set the plan and the costs. I told him this would be alright. I asked whether the church has a lawyer. He said No and asked whether the church needs one. I told him that if oil is discovered in the soil around the tank, then the DEC will hold the church responsible for the contamination at the Childrens Art Carnival and may bring legal charges against the church. He said he will try to find someone. I contacted Cristine Brooks and gave her an update on the CAC and church situation. She told me that the owner of 60 Hamilton Terrace is Lisa Silversmith at lisasilversmith@yahoo.com. I will send Ms. Silversmith a reminder through e-mail that the DEC would like access to her basement. Ms. Silversmith has real estate offices at 38 Hamilton Terrace and West 145 Street, NY. 4/5/06 - Raphael Ketani. Mr. Lindoss called to say that the church contracted with Petroleum Tank Cleaners (PTC; (718) 624-4842) to do the tank investigation and possible remediation. He said they will be on site on thursday, 4/6. I told him I will meet PTC there. Mr. Lindoss added that PTC told him they could start work this friday. I spoke to Joe of PTC and he said that PTC has not been contracted yet by the church. He said the only thing that is going to happen is that one of his guys will show up at the church, look over what the situation is, talk to Mr. Lindos about the job, and give him a price. Joe said his guy has 4 or 5 other jobs to take care of first and so he doesn't know when he will be there. 4/6/06 - Raphael Ketani. Cristin Ciaburri of USA Environmental (fax 718-981-7537) called. She said that no one from the church has been in contact with her since the last time she spoke to them. She has mailed a proposal to Cistine Grit (Sister Ingrid). Later this morning, John Weiss of the Landmarks Preservation Commission called to say that there is an open oil tank at the property and an open basement door. He wanted to know who to call regarding the open tank. I gave him the phone number of the NYC Fire Department. 4/11/06 - Raphael Ketani. I received a call from Ms. Ciaburri of USA Environmental. She said that Bishop France signed the contract to have an investigation done. She said the first step will be to empty out the tank and tank 4 soil samples from borings around

CHURCH OF NAZARETH (Continued) **S107523027**

the tank. I told her I also wanted sampling of the oil floating on top of the water in the tank and fingerprinting of the oil. She said that her company is willing to do all the investigation steps that the DEC wants, but first she wants to do the tank and the soil borings. 4/17/06 - Raphael Ketani. I received a call today from Ms. Ciaburri. She said that she will be at the church on 4/19/06 between 9:30AM and 10:00AM to pump out the tank. I told her I will meet her there. 4/19/06 - Raphael Ketani. The tank investigation crew from USA Environmental arrived on site. Ms. Ciaburri wasn't there, but the foreman for the crew was, Keith Bartley. The crew made up to six attmepts at three different locations to do geoprobing around the east, north, and south sides of the tank. They even tried to punch the probe withing the tank pit, about 2 feet away from the tank. All attempts failed due to hitting hard rock. Mr. Bartley said that they will come back another day and punch two holes through the bottom of the empty tank. I spoke to Ms. Ciaburri later and told her what happened and what Mr. Bartley proposed. I told her that emptying the tank, taking an oil sample for fingerprinting, punching 2 holes through the bottom of the tank, and taking soil samples sounded fine. She agreed. 4/26/06 - Raphael Ketani. I spoke to Ms. Ciaburri regarding progress on the site investigation. She said the vac truck broke down so they didn't pump this week. She said they will pump next monday or teusday. I told her to call Mr. Vought if they do. She said she would. She added that Cistine Grit got a fine from the NYFD for not having abandoned the 550 gal. and 2 275 gal. tanks. She said James Kendal of the NYFD issued the fines and the church has 30 days to pay the fines. Also, Cristine Brooks-Lee called to find out the progress on the site investigation. I gave her a briefing regarding the attempted soil sampling and future plans. 5/16/06 - Raphael Ketani. I spoke to Ms. Ciaburri regarding the soil sampling. She said they emptied the tank and did 1 soil boring and sampling through the bottom of the tank. She said that they also took soil samples from under the end of the fill line where it still exists and under the return line where it still exists. A total of three (3) samples. She said that they will get the soil sample analytical results either at the end of this week or next week. Also, the case is being transfered to Jeff Vought today in order to consolidate all of the PINS cases (and associated cases) under one Spills case manager. 06/06/06-Vought-Complete File Review by Vought: See also spill numbers: 0209311(60 Hamilton Terrace-closed 12/22/05), 0511505(72 Hamilton Terrace). Sale of 72 Hamilton Terrace by City of New York to Nazareth Spiritual Church and resulting Deed transfer-4/20/72. Site visit on 1/11/05 by DEC Vought-DEC required: 1)tank testing results 2)notification to NYCDOH 3)installation of ventilation system in basement 4)sealing of sump and washing of basement floor. Vought left message with NYCDOH Nieves, spoke to Mike Hughes(NYSDOH) and decision to close is the call of Marlene Martin. Oil was first noted on 1/3/06 and basement filled with water during times of heavy rains. Three sumps present in basement of Childrens Art Carnival(CAC). Sump closed to Hamilton Terrace contained fresh #2 fuel oil. As per Marlene Martin, she contacted 60 Hamilton Terrace to see if they had spill and no spill was found in the basement and she contacted the Church who noted an oil spill next door at 72 Hamilton Terrace. Email from NYSDOH Hughes to NYCDOH Peter Stallbohm with cc to NYCDOH Nieves- How did you inspectors make out at the 64 Hamilton Terrace spill? . Email from NYSDOH Hughes to NYCDOH Stallbohlm and DEC Vought-1/18/06. ...any updates about the Childrens Center in Manhattan? Have they

CHURCH OF NAZARETH (Continued) **S107523027**

re-opened, cleanup status? . Response from Stalbohlm At 64 Hamilton Terrace, readings of 4-5ppm of VOC was detected. A contractor was contracted to conduct a cleanup yesterday. The center voluntarily closed until so. After cleanup, another visit will be made to check effectiveness of cleanup (possibly today). Email from NYSDOH Hughes to DEC Vought-1/19/06. Peter Stallbohlm, NYCity Health, sent an inspector back to the Children's Center on Tuesday, 1/17. The inspector reported odors are still present... Fuel product still present in basement. The center is still closed and NYCity Health recommends staying closed until the additional clean-up is performed. Would you be able to also make a site visit and recommend some specific actions as well? . Letter from DEC Ketani to Kira-Leid King (Nazareth Deliverance Church NDC)-1/19/06. The New York State Department of Environmental Conservation (the Department) was notified on January 10, 2006 that a petroleum release took place at the above referenced site. Odors were noticed coming from the basement of the church during an inspection of the area on January 11, 2006. Staff from the Department were at the site on January 14, 2006 to observe the removal of No. 2 fuel oil by Northeast Environmental from Nazareth Deliverance Church . (6/6/06-Note that I, jeff Vought was onsite and liquid was recovered from basement when I arrived on-site, I did not observe oil in the basement as the liquid was already recovered). The Department has identified the Nazareth Deliverance Church as a potential responsible party for this release . Letter required submission of an investigative summary report including the investigation of a possible third tank under the church courtyard. The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness . If no reply regarding the investigation is received from the Nazareth Deliverance Church within (5) days of receipt of this letter the Department may proceed with the required work... . Letter from DEC Ketani to CAC Martin-1/19/06. The Department has identified the Childrens Art Carnival as a potentially responsible party for this release . Notification that the Departrment has contracted Milro and will invesigate the source of oil. Upon one of the inspections of the Childrens Art Carnival, staff from the Department noticed a three foot long piece of suction line at the foot of the stairs of the basement. The Department requires that the Childrens Art Carnival immediately conduct a site investigation to determine why the line was replaced, whether there was a release of product and how large the release was, when the suction line was replaced and which company did the replacement work. The Childrens Art Carnival must also hire a contractor to have the suction line and return line (the two 3/4 inch copper lines) pressure tested . Letter from DEC Ketani to CAC Martin-1/23/06. ...the Department was notified on January 20, 2006 that a tank system test was conducted by AL Eastmond & Son, Inc. on this date and that a leak was detected in the tank and vent line. At this time, the Department is ordering the Childrens Art Carnival to repair or replace the tank and the vent pipe, and to hire a contractor to investigate the oil spill and remove all contaminated concrete flooring, soil and rock and all product and contaminated water . Letter from Marlene Martin (CAC) to DEC Ketani-1/27/06. To date we have cooperated with the Department of Environmental Conservation on all requests, recommendations and mandates. Enclosed, please find the job tickets for work performed by Eastmond and Sons, Inc. as per your Department's madates and directives. It is our hope that a resolve can be reached as soon as possible and or that the

CHURCH OF NAZARETH (Continued) **S107523027**

Carnival can be eliminated as the potential source of this release... Enclosed as Eastmonds & Sons job tickets: 1)1/11/06- Removed 50 bags of contamianted soil washed floor, 1 bucket of oil wash, removed 102 gallons of water, pressure washed floor 2)1/18/06- pump out oil and water from floor also wash down used 1x5 gallon can oil wash 3)1/20/06- Test tank, tank failed, wet leak 4)1/23/06- transfer oil to 275. Remove jacket and remove 30 bags of contaminated soil. Job completed 5)1/24/06- Install 275-gallon temporary . Contractor Work Authorization Form for Milro-2/2/06. Email from Landmarks Preservation Comission(LPC 212-669-7921)-John Weiss to DEC Ketani-02/10/06. Under the circumstances you described to me, no permit from the Landmarks Preservation Comission is needed for the NYSDEC contractor to break up the concrete paving in the courtyard next to 72 Hamilton Terrace in order to undertake and emergency remediation project . Because this work is being undertaken to remedy a dangerous condition, pursuant to section 25-312 of the NYC Administrative Code, no LPC permit is needed. No work is to be performed on 72 Hamilton Terrace . Fax from Kira-Leid King(NDC) to DEC Ketani-2/11/06. As discussed, attaached please find a serach from the fire department indicating that there are only two tanks located at the above-referenced premises. Therefore, there isn't another tank located in the court yard . The Church had a fire four years ago causing the building to be inhabitable . Letter from DEC Ketani to Leid-King (NDC)-2/10/06. ...the Department has not been notified by Lindsay Loss or other representatives from the Nazareth Deliverance Spiritual Church, that the church will hire a company to conduct a site investigation to determine whether a fuel oil tank is present under the church courtyard. Deadline of 2/18/06 given to investigate the court yard. Email from LPC Weiss to DEC Ketani-2/22/06. I am writing in response to our recent telephone conversation regarding the possibility that the historic wrought iron fence in front of the side yard at 72 Hamilton Terrace may have to be removed in an oil tank has to be removed. Suggestion to take the tank out in pieces to save the fence. If fence has to be removed it also has to be replaced. Letter from DEC Ketani to Lindos Lindsay(NDC) and Kira Leid-King(NDC)-3/10/06. Site visit made by Department on 2/10/06. ...a third fuel tank was observed to be present beneath the courtyard behind the Nazareth Deliverance Church. Department required NDC to perform a soil boring between the foundation wall of the Childrens Art Carnival at 62 Hamilton Terrace and the tank, and taking soil and groundwater samples. Another boring must be installed between the tank and the church. Deadline given for nine days within date of letter (2/19/06) to respond to DEC and resume investigation of tank and soil. STL Analyticals-2/10/06. Sample from CAC sump pit ran for fuel id analysis and showed 920000ppb #2 fuel oil. Fuel oil sampled by Milro. STL Analyticals-2/17/06. Sample from CAC outside by fill #5 @1'. Sample analysis performed for TPH310.3 shows oil parameters below method detection limits. STL Analyticals-2/17/05. Four sample from CAC front basement area near sump. . Sample analysis performed for TPH310.3. Soil analyticals show all below method detection limit except for 7400ppm #2 fuel oil(SB#2 @ 1'), 110ppm #2 fuel oil(SB#3 @1'). Letter from DEC Ketani to NDC Lindsay and NDC Leid-King-3/20/06. On March 20, 2006 the New York State Department of Environmental Conservation (the Department) made a site visit to the above listed property. No work appeared to have taken place to investigate the tank or the surrounding soil since the last site visit that took place on March 10, 2006 . Letter requiring

CHURCH OF NAZARETH (Continued) **S107523027**

investigation. Due date of 4/5/06 for the work to resume. Letter from DEC Ketani to Lisa Silversmith-03/20/06. We would like to install two(2) wells in the groundwater beneath the basement of your home. These wells will be constructed and sampled by out contractor. Contractor Work Authorization for STL-3/21/06. Fax from Milro to DEC Ketani-3/24/06. Milro proposes the following scope of work to address the oil spill cleanup: 1)Saw cutting of concrete slab in the basement and excavation of contaminated soil 2)disposal at a licensed disposal facility 3)recover of product using a vaccum truck if contaminated groundwater is encountered 4)collection of endpoint samples from excavation 5)restoration of the concrete slab 6)pressure washing of basement and epoxy application. Letter from DEC Ketani to CAC Martin-3/28/06. ...(the Department) is presently looking into other methods of controlling and preventing the petroleum vapors from entering Childrens Art Carnival . Milo remediation plan has been enclosed for Martin's review. Cost Estimate (Milro-Moriano)-4/4/02. Cost estimate for basement excavation and replacement. Site visit by DEC Vought during endpoint sampling of tank in couryard-5/11/06. Sampling performed by USA Environmental (Cristin Ciaburri 718-981-5710). Onsite was Keith Bartley(USA). Pumped out water from 550-gallon UST in courtyard. No product in UST, just sheen and water. Three soil samples were collected (one through bottom of tank, one below fill line and one below supply/return line). No odors or staining observed in all of the soil samples. Site visit performed to CAC and no odors in basement and no free product in sump. Some oil staining showing up on floor from underlying groundwater. One sample also collected for analyiss from NDC basement floor. Vought spoke to USA Ciaburri and DEC will receive report by 6/12/06. DEC tentative requirements: 1)60 Hamilton Terrace-followup to see if any recent spills 2)72 Hamilton-results of basement borings by 275-gallon ASTs 2)72 Hamilton-submittal of documentation of 1/14/06 clean up by Northeast 3)72 Hamilton-notification to Bishop France of requirements 4)72 Hamilton-backfilling of UST excavation in courtyard 5)62 Hamilton-continued monitoring of sump 6)62 Hamilton-call back to Martin regarding possibility of use of Spill funds for AST replacement and likelihood of NYSOAG cost recovery against Art Carnival 7)cc to Northeast, Marlene Martin (Art Carnival), Cristine Brooks(Comm Bd 9), Martin Smith(Councilman Robert Jackson), LPC and USA, Eastmond 8)62 Hamilton Terrace-copy of tank testing results of old AST 9)72 Hamilton Terrace- The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness as per 1/19/06 letter 10)62 Hamilton-submission of tank test results from Eastmond and Sons of AST in CAC as per requirement on 1/19/06 letter 11)62 Hamilton-borings at tank location for 8260/8270 12)62 Hamilton-Milro boring logs and site plan from 2/17/06 analyticals 13)62 Hamilton-implemenation of Randy's workplan(installation of monitoring wells at CAC and basement excavation) from Milro 14)62 Hamilton-sealing of basement floor 15)72 Hamilton-backfilling of NDC excavation to prevent continued groundwater infiltration into CAC 06/19/06-Vought-See spill #0511700 at 62 Hamilton Terrace for further information. 7/25/08 - Raphael Ketani. This spill case which is associated with the spill case #0511700/ pin #3832 has been transfered to me. 8/22/08 - Raphael Ketani. I tried to visit the site, but couldn't get in. The building is boarded up and the area of the 550 tank has been filled in. The door to the basement was closed, but not set well in the frame, thereby allowing air circulation. There was also an open basement vent. No odors were sensed coming

CHURCH OF NAZARETH (Continued) **S107523027**

from the basement. I put my meter as close as possible to the vent, but didn't detect anything. I put the nose of the meter inside the front doors to the church, but, again, didn't detect any vapors. I visited the basement of the Childrens Art Carnival and found the premises to be odor free, stain free, and without oil in the sumps. As: the oil that had spilled on the basement floor of the church had been cleaned up; the soil samples taken in the basement of the church didn't have contamination; the oil in the two 275 gallon tanks was sucked up; the 550 gal. tank didn't have oil; there are no apparent signs of the presence of oil inside the church or under the property; the Childrens Art Carnival is free of oil contamination; I am closing the spill case. I sent Jacob Krimgold, EE II of the PBS Unit, an e-mail stating that the church has 3 unregistered tanks. 8/25/08 - Raphael Ketani. Mr. Krimgold e-mailed me back that the tanks do not need to be registered. "

Remarks: "Spill is in the basement of the church that had a fire 2 years ago and now stands mostly gutted. Northeastern Environmental was called to the site on 1/14/06 by someone from the church and vacuumed 120 gals. There are 2 275 gal. tanks (ASTs) in the basement which are connected to a filter device in the floor. There may be a third tank (UST) under the courtyard. Two soil borings were done down to bedrock (18) in the basement. Oil is impacting the front sump in the basement of the Childrens Art Carnival (day care center) next door at 62 Hamilton Terrace - spill #0511700. Raphael Ketani spoke to Ingrid at the church telephone number on 1/17/06 and she said that they had cleaned up the spill and were not going to do anything more. Vapor concentrations in the basement of the Childrens Art Carnival were measured at 10.1ppm today by Mr. Ketani. No activities can take place due to the high vapor concentrations in the building. DEC will try to contact church officials tomorrow, 1/18, in order to have them proceed with investigating and further cleanup of the site."

DEC Memo:	"04/22/13-Hiralkumar Patel. after discussing with DEC Austin and DEC Vought, case transferred from Vought to Patel. 12/29/15-Hiralkumar Patel. previous project manager's notes from 09/14/1993 to 04/22/2013 are on D2. alternate address: 800-808 St. Nicholas Ave, 11-19 St. Nicholas Place, 399 West 150th Street, 390-398 West 151st Street PBS #: 2-600647, 2-611145 as per PBS # 2-600647, the site has/had following tanks: - seven (7) 550 gal gasoline USTs, closed-in-place in Jun 2000 - three (3) 4,000 gal gasoline/ethanol USTs, in-service, installed in Feb. 1986 as per PBS # 2-611145, the site has one (1) 275 gal waste oil AST in contact with impervious barrier, in-service, installed in Feb. 1998. the PBS registration expired on 08/19/2014. other spills: 8803083, 9313461, 9702241 spill # 8803083 was reported on 07/08/1988 as 300 gal gasoline spilled due to line knocked out by a cab. case closed without any notes. spill # 9313461 was reported on 02/15/1994 due to suspected leak in subway area. case closed without any notes. spill # 9702241 was reported on 05/21/1997 as 4,000 gal gasoline tank system failed a tightness test. case closed. Steady Realty LLC. **property owner** c/o Benjamin Hadar P.O. Box 926 **address from DOB permit in 2000** New York, NY 10025 Ph. (212) 749-7851 49 W 94TH ST #1 10025-7129, NEW YORK (NY) **possible address for Mr. Hadar** Oz Levy **info from DOB permit in Jan. 2011** Sugar Hill Gas Station Inc. 2753 Broadway Ave, Suite 377 New York, NY 10025 Ph. (212) 942-5550 Fax (212) 942-0366 summary of available information: - the subject spill was reported due to gasoline seepage into subway tube located west of the subject site - monitoring wells were installed on southern portion of the site - proposed to install remediation system including free phase product recovery, dissolved hydrocarbon recover and soil/vapor hydrocarbon recovery - record indicates operation of recovery systems, but no records available indicating when these recovery systems were initiated and terminated - as per available reports/documents, total of fourteen (14) monitoring wells were installed at the site: MW-1 through MW-6, MW-8 through MW-15 - site maps are available showing location of MW-1 through MW-6 and MW-8 through MW-12; but no maps indicate location of wells MW-13, MW-14 or MW-15 - groundwater samples were analyzed from

STATION 800, LLC (Continued) **U000414037**

multiple monitoring wells at the site - last available groundwater sample result indicate collection of groundwater samples on 12/14/2001 - last available invoice from Winston Contracting dated 05/01/2002 includes wells gauging and purging 12/31/15-Hiralkumar Patel. 1:00 PM:- visited site to confirm location of previously installed monitoring wells. total of fourteen (14) well covers noted at the site. available records show installation of fourteen (14) monitoring wells (MW-1 through MW-6, MW-8 through MW-15) at the site. Jose Pimentel **on-site tenant** PH. (917) 893-2253
01/04/16-Hiralkumar Patel. 9:48 AM:- sent email to OAG Jennifer Dentinger inquiring updates. 01/06/16-Hiralkumar Patel. discussed with OAG Jennifer. 01/27/16-Hiralkumar Patel. 3:25 PM:- left message for OAG Jennifer. 02/04/16-Hiralkumar Patel. 9:39 AM:- left message for OAG Jennifer. 02/17/16-Hiralkumar Patel. 2:44 PM:- left message for OAG Jennifer. 04/26/16-Hiralkumar Patel. 9:01 AM:- sent email to OAG Jennifer inquiring about if formal report needed for possibly a last round of groundwater sampling. 9:38 AM:- received email from OAG Jennifer stating that a formal report is not needed.
05/23/16-Hiralkumar Patel. 1:48 PM:- sent email to Dave including copy of standby contractor authorization form. asked Dave to schedule well sampling asap. 05/26/16-Hiralkumar Patel. 10:40 AM:- spoke with Mayra Rojas, property manager and informed her about required groundwater sampling. Steady Realty LLC. **property owner** c/o New City Management LLC. 2753 Broadway, Suite 377 New York, NY, 10025 Attn.: Mayra Rojas PH. (646) 376-9952 (C) (212) 913-0823 email: mayra@newcity.nyc 10:56 AM:- sent email to Dave including contact number for Ms. Rojas. asked Dave to contact her to schedule sampling. email copied to Ms. Rojas. 06/20/16-Hiralkumar Patel. 11:41 AM:- received email from Melissa from TestAmerica requesting call-out for lab. 11:55 AM:- sent email to Melissa including copy of standby contractor authorization form. 12:02 PM:- received email from Dave. he has collected samples from three wells and composited into one sample for disposal classification. he mentioned that based on site condition and use, it may take two days to complete the sampling. 06/24/16-Hiralkumar Patel. approved EnviroTrac's invoice (# DC2069.00-1) for project coordinate, file review and calls to property owner/lab. 07/05/16-Hiralkumar Patel. 8:36 AM:- received email from Shalini Williams (shalini.williams@testamericainc.com) from Test America including results of waste classification sample. 07/22/16-Hiralkumar Patel. 9:21 AM:- received email from Dave requesting signature on waste characterization report as generator for disposal of purge water from site. 07/27/16-Hiralkumar Patel. 10:22 AM:- sent email to Dave including signed copy of waste characterization report. approved EnviroTrac's invoice (# DC2069.00-2) for project management, sample collection for disposal parameters and coordination with lab. 8/23/16-Vought-Received email from EnviroTrac (Lorthior) on 8/17 requesting a contract increase on this spill as Albany recently rejected an invoice as amount was over the callout. Vought sent email reply on 8/18 to Dave with cc to RSE and DEC Patel that Dave, If you can provide the spill number, brief scope of the ongoing and upcoming work (in three or four sentences), and an approximate estimate, we will have someone take care of it and get back to you, most likely me. On 8/22/16, Vought received email from Lorthior with cc to RSE and DEC Patel that Attached is the original call out. Job was for a few days of sampling at the site. Problem was we were handed the job, but knew nothing about it. We spent quite a bit of time gaining access to the site and making sure

STATION 800, LLC (Continued) **U000414037**

the wells were A) accessible (small site, lots of parked cars) and B) the wells were actually usable. Sampling was the easy part. We had a budget of $5,000.00. Between the initial site visits to figure out what we needed to do, the sampling and the waste disposal, we are up to $6,325.00. Vought increased Work Authorization and submitted to RSE for signature. 8/29/16 TJD Test America C008010 Petroleum CAP #56 was approved. Document already in DECDOCS. 08/31/16-Hiralkumar Patel. DEC Vought sent revised standby contractor authorization form to EnviroTract on 08/23/16. 9:57 AM:- sent email to Dave and asked him to submit sample results for review. 10:22 AM:- received email from Dave including sample results. groundwater analyticals:

MTBE----------7--------5-------64--------5--------8-----
---6-------53--------26 out of fourteen (14) wells installed previously, only thirteen wells were sampled. well MW-4 was not sampled. based on review of recent groundwater sampling, the department requires further groundwater monitoring and possibly remediation. 12:16 PM:- left message for OAG Jennifer. 1:28 PM:- sent email to OAG Jennifer requesting copy of correspondences sent/received by AG's office in this matter after Mar. 8, 1999. email copied to OAG Riggie and DEC Austin. 12/14/16-Hiralkumar Patel. approved Test America's invoice (# 46265898) for analysis of groundwater samples collected in Oct. 2016. 01/12/17-Hiralkumar Patel. approved EnviroTrac's invoice (# DC2069.00-5) for project management, well gauging and groundwater sampling. 01/29/19-Hiralkumar Patel. reviewed initial documents from 1993/1994. as per subsurface investigation report dated 04/06/1994, highest level of free phase petroleum product (in MW-8) and dissolved VOC contamination (in MW-9) were noted in middle of property near the tank mat. also as per the report, the reduced levels of dissolved BTEX in the perimeter wells indicate that the center of the plume is defined on the subject property. as per PBS record, seven (7) 550 gal gasoline USTs were closed-in-place in June 2000. DEC Vought and DEC Krimgold reviewed PBS record on 05/14/09 and noted that closed USTs were never tightness tested. as per ISR issued on 09/30/1996, the subject site was listed as spiller and the Department took over the spill investigation/remediation due to owner's lack of concern (financial inability). as per NYC ACRIS records, Bejamin Hadar purchased the subject site on 06/07/1985 and transferred deed to Steady Realty LLC. as per the NYS Department of State Division of Corporations, Bejamin Hadar is listed in mailing address for Steady Realty LLC. 1:19 PM:- sent text message to Ms. Rojas requesting a call back. 2:05 PM:- spoke with Mike Alvin at Alvin Petroleum who provides tank system maintenance service to the site. Mike remembers spill investigation in 1993, but doesn't know who paid (property owner or Amoco) for initial investigation conducted at the site. Mike stated that Jose Pimentel is dealer for the site and generally calls for any required maintenance. 2:11 PM:- spoke with Mr. Pimentel. he manages maintenance/inventory of existing tank systems since 2012. Mr. Pimentel conducted a subsurface investigation in 2012 prior to start managing tank systems. he stated that property owner owns tank systems and BP provides fuel. asked Mr. Pimentel to submit copy of Phase II report from 2012. Jose Pimentel **on-site tenant** Station 800 LLC. PH. (917) 893-2253 email: republic052@yahoo.com 2:42 PM:- sent email to Mr. Pimentel and Ms. Rojas. asked Mr. Pimentel to submit copy of subsurface investigation conducted in 2012. asked Mr. Rojas to call back to discuss requirements for further investigation/remediation at the site. 3:09 PM:- sent email to OAG Jennifer requesting information as per email dated 11/03/16. email copied to OAG Riggie. **need Phase I for historical tank system

DEC Memo:	"1/10/06 -Austin - Also received complaint from: Cristina Lee, Chairman of Health Committee of Community Board #9 212-883-7600; 212-864-6200 contact her for further background info, as well as Ortiz - end Carnival e-mails: mamudd1@aol.com or mamartin@childrensartcarnival.org FAX: (212) 234-4011 1/11/06 - Raphael Ketani. I tried contacting Mr. Ortiz ((212) 234-4093), but a man answering the phone said he would not be in until 10:30AM. The man said that the church had a fire 2 years ago and hasn't rebuilt or reopened. He passed the phone to a woman who said that they have been trying to find out more information about the oil leaking from the church and she gave me the phone number of Cistine Grit (212) 234-0484. I called the number, but no one picked up. I then called (212) 883-7600 - the law office of Cristina Brooks Lee - but could only leave a message. I called (212) 864-6200 - the Community Board #9 phone 10AM to 5PM - and got a man on the line. He said that I should call Martin Smith (not available until 11AM) at (212) 928-1322, who is the representative of Councilman Robert Jackson. I will make a site visit at 10:45AM today. I made a site visit at 11:15AM. I met Dionis Ortiz, Program Manager, Jose Ortiz, his assistant, and Marlene Martin, executive director of the Children's Art Carnival. I went to the basement and looked at the oil tank, the fill and vent lines, and the boiler. There were no signs of spillage. However, I did see many cracks in the basement floor that looked wet. Mr. Ortiz said that there is a spring below the building and that the water seeps into the floor. The basement has 3 sumps. The front one is next to the front basement wall, the middle one is 16 feet away, and the third one is about 25 feet behind the second one. The second and third sumps had only clear water at the level of the floor. The front one had red oil floating on top. There were signs of oil spillage on the basement floor next to the sump. Mr. Ortiz said that when it rained heavily a little while ago, the water level rose and pushed out the oil onto the floor. He said that an oil odor was noticed to be coming from the basement on 1/3/06. He said that Robani Oil was called and they put down some oil absorbent material. I spoke to Robert Pearson of Robani Oil (212) 687-8699, Colonial Park Station, P.O. Box 188, NY, 10039, and he said he didn't think the oil was coming from the property, but he didn't do any system tightness testing. He said that the customer would have to order it and pay for the testing. The PID readings were as follows: over the sump: 11.8ppm breathing area front basement: 4.4ppm breathing area at second sump: 1.4ppm first floor hallway: 1.3ppm children's work room first floor: 570ppb main floor (second floor): 600ppb (light odor) third floor art work room: 650ppb third floor copier room: 750ppb fourth floor front and back: 750ppb Mr. Ortiz told me that the church next door burned two years ago and has never been repaired. He said there is a man (David - later called Patrick) living across the street who is affiliated with the church. Mr. Ortiz knocked on the window, but no one seemed to be home. He said that David told him that the church uses gas and that Con Ed had shut off the gas. Mr. Ortiz said that,

CHILDRENS ART CARNIVAL (Continued) **S107521874**

after the fire, someone entered the church basement and saw an oil spill. I spoke to Ms. Martin and she said that she didn't have any other church contacts other than Cistine Grit (a.k.a. Ingrid). She called Ms. Grit's number, but didn't get an answer. I looked at the outside of the church. The schedule display panel has Nazareth Deliverance Spiritual Church, Inc., Archbishop C. Clark. The name over the 72 Hamilton Terrace entrance is Church of Nazareth. The church is boarded up and the roof looks to be in bad shape. There were oily odors emanating from a small basement window near the basement door of the church. It is unclear if there is an oil spill in the basement of the church. I called Randall Austin, Chief Spills Engineer Region 2, with the information. He sent Jeff Vought, E.G. 1, over to look at the situation. Mr. Vought arrived at 1:30PM and looked over the situation. He noted 3 suction lines at the foot of the basement stairs. One line was only 3 feet long as it had been cut. No one at the Carnival knew when this happened or if a previous oil spill took place. Though Mr. Ortiz told me that the Carnival has been in the building for 36 years. I saw a short stream of red oil between one of the fuel lines and the wall next to the stairs. A conference call took place between Ms. Martin, Mr. Vought, and Michael Hughes of NYS DOH. Mr. Hughes said that the building should be ventilated and the basement door sealed. Ms. Martin said that she told all the parents about the odors and that all of the parents decided to have their children stay in class. Later, at between 3PM and 4PM, Martin Smith of Councilman Robert Jackson's office and Claudius Wickham of NYCDOH showed up. We went with them and Bruce Tilley of the Neighborhood Organization to the home of Diana Laird and David Zapol at 418 W.144 Street. This is the home which shares a common wall with the church. PID readings in the kitchen were 940ppb. Readings in the corner of the basement where paint and wall finishing material were reached 1300 to 1600ppb. A dirt hole in the basement floor had 2500ppb readings. The front part of the home's basement had 500ppb. Next, Mr. Smith and Mr. Wickham went with us to the Carnival's basement. They both looked at the situation with the oil in the front sump and noted the odors. Then Mr. Wickham measured the air in the art work room on the first floor. He noted about 650ppb readings. He said that the odors weren't dangerous, but just a nusiance. He said to ventilate the building. 1/12/06 - Raphael Ketani. I made a followup visit at 3:10PM. Eastmond had finished their cleanup work. The front sump had been vacuumed and the floor had been cleaned. Fans were blowing the air around in the basement. Ms. Martin said that Eastmond didn't arrive until this morning as, otherwise, there would have been high overtime charges to do the work yesterday at night. Eastmond told her that the oil tank will be picked up off of the floor or else the dampness will corrode the bottom and the tank will leak. The odors were not as bad as yesterday. The tank room had about 3ppm, the director's office about 750ppb, and the children's work area on the main floor was about 300ppb - there were no odors on the main floor. However, the oil reappeared in the front sump. Ms. Martin told me that she had made contact with someone from the Church of Nazareth and that this person will let people in saturday morning (1/14). Ms. Martin said that she will let me know what time the church will be opened up. She also said that her company is not going to spend any more money on removing the oil in the sump until DEC finds out whether the oil is coming from somewhere else or from the Carnival. I informed Randall Austin, Chief Spills Engineer Region 2, and Jeff Vought, E.G. 1

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Spills, about this and about the return of the oil in the sump and about the levels of the odors today. 1/13/06 - Raphael Ketani. I spoke to Ms. Martin. She said that there are no odors on the main floor. I asked whether she made contact with anyone from the church. She said no one called her and she couldn't get ahold of anyone. I asked whether the front sump was covered. She said it wasn't. I told her to have someone cover it with plastic bags and then use tape to seal the bags to the sump clay pipe. She said she would have someone do it. 1/17/06 - Raphael Ketani. Ms. Martin called me today. She said that the basement had flooded over the weekend because the sump pump didn't work. She said she had water and oil all over the floor. Also, she said that the oil guage on the oil tank is in the red zone. I asked her when was the last time she had a delivery. She said that it was some time ago and no one really keeps track of the level of oil in the tank. She said she called Robani Oil to get a delivery. However, the odors are bad again in the building. I told her to set up the fans. She said there are problems with the electricity in the basement and the fans aren't running. I also told her that Northeast Environmental ((914) 777-1930) showed up at the church on saturday, 1/14/06, and found oil all over the basement. I told her to call them and get them to clean up the oil in her basement. I told her that if they wont do it, then to call Eastmond again and have them clean up the oil as the odors are bad. Jeff Vought, the off hours spill responder for the weekend, came in and gave me the following notes. He said that Northeast Environmental arrived on site at 11:30AM on saturday 1/14. Oil was all over the floor of the Childrens Art Carnival. Northeast collected the oil and water on the basement floor and pumped out the front sump. Northeast then went to the Church of Nazareth and recovered 120 gals. of #2 fuel from the two 275 gallon tanks in their basement. They did 2 borings, one next to the two 275 gal. tanks (ASTs) and one some feet to the west. They end at bedrock and are only 18 deep. Mr. Vought had them leave the borings open. There is a fuel filter in a concrete casing in the floor. From there, a line runs to the boiler. Mr. Vought suggested to me that they either do 2 wells in the corner of the wrought iron fence next to the Carnival or an oil recovery pit. The contact at Northeast is Dwayne Monaco (914) 777-1930 or (914) 403-5525 cell. I spoke to Mr. Monaco and he said that he was hired by the church and has no plans to pump out more oil from the Carnival. His techinician noticed a second vent line and a remote fill at the back of the church. He believes that there may be a third tank under the courtyard. I contacted Ingrid at (212) 234-0485, the Church of Nazareth - Archbishop Maxton France (cell (917) 642-8913). She said this was the Archbishop's number and that I can send a letter to 72 Hamilton Terrace, NY 10031. She said they didn't have plans to do anything more regarding the cleanup. I visited the site at 2:50PM. Oil vapors were still noticeable from the church. I entered the Carnival and sensed strong odors on the main floor. There were no activities or children at the day care center. I went to the basement and there was 3 of water there. However, I could not see a sheen. Ms. Martin said that Eastmond could not come and pump out the water as they didn't have a truck available. She said that they will come at 9AM on 1/18. The vapors in the buidling are as follows: basement=10.1ppm first floor art room=2250ppb executive director's office=3400ppb hallway at first floor=6600ppb main floor=2300ppb third floor art room=3000ppb third floor front room=4600 third floor landing=7100ppb fourth floor art room=5600ppb fourth floor front room=4600ppb fourth floor landing=7100ppb I met

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Mr. Pearson of Robani Oil at the site. He said he wasn't going to deliver oil until the oil spill at the church was cleaned up and not until it was determined that the Carnival's system wasn't leaking. Ms. Martin said that someone from the NYCDOH was supposed to show up to test the air, but I stayed until 3:35PM and he arrived. Ms. Martin said that they were out of oil and so the heat was off. 1/18/06 - Raphael Ketani. I tried to call the Carnival to find out how the water/oil removal in the basement went at 9AM (contractor was Eastmond), but no one answered the phone. Later, I got ahold of Ms. Martin via her cell phone (917) 805-3154. She told me that Eastmond had been at the Carnival at 9AM and had pumped out the basement. She said that the school is still closed. I called up MILRO (516) 379-1500 (FAX (516) 379-4596) and spoke to Paul Basso. I told him that we needed Milro to set up ventilation for the school and pump out the basement. We decided to meet at 10:30AM tomorrow. Kira Leid-King (home(914) 632-0665; cell (914) 879-8126; work FAX (212) 455-2502) called me to explain that the oil wasn't spilled on the floor of the church's basement. However, I told her that Northeast Environmental had been to the church on 1/14/06 and had pumped out 120 gals. from the two 275 gallon tanks. She said that the church hadn't had a delivery in 3 years and that the Fire Dept. had ordered the church to pump out the oil after the fire. She said the tanks never had oil in them. I told her that there was a second vent pipe and a second fill port. I added that there is a gauge for a 550 gal. tank on the wall of the church's basement. I told her that DEC suspects there is a third tank under the courtyard. She said that she had no idea. Finally, I told her that the state would be hiring a contractor to investigate the church's oil spill and tank situation. She said that it's the Carnival's fault, not the church. I asked her what her relationship was to the church. She said that she is sort of the secretary-treasurer and paid for Northeast to do the oil vacuuming. 1/19/06 - Raphael Ketani. A site visit was made by Randall Austin, Chief Spills Engineer Region 2, and myself to monitor the work of MILRO Assocs. Inc. We met Gordon Sandtorv, Operations Supervisor from MILRO, on site. MILRO was already cleaning the floor in the basement of the Carnival. Vapors in the basement were about 3000ppb. However, the floor looked very clean. Red oil was again on top of the water in the front sump. Water was seeping through the north wall (opposite the oil tank) of the basement. It didn't have any odor or feel oily. I found out that Robani Oil had delivered 100 gals. and the heat was back on. Patrick Peters (phone (212) 690-0630; son of Archbishop Carlyle Clark) showed up at the Carnival. We asked him to let us into the church basement and he did. We saw the two 275 gals. tanks and one vent line that extended from the second tank. A filter apparatus was in the floor for the oil. The suction line ran through the floor and came up 8 feet away at the furnace. There was a light smell of oil, but no oil was visible on the floor. A gauge was mounted onto the wall above the first tank. Gordon said that it was a petrometer for a third tank. vapor concentrations for 1/19: basement: about 3000ppb directors office: 425ppb first floor art room: initially 1000ppb, then 400ppb main floor: 350ppb third floor: 700ppb back room/ 600ppb front room fourth floor: 400ppb back room/ 1000ppb front room Mr. Austin talked to Mr. Sandtorv and told him that if the Carnival doesn't test the suction line and the return line, then MILRO will have to do it. He added that he wanted MILRO to construct some kind of low flow sump and collection system with an oil/water separator to collect the water and pump it to the city sewer. Then we

CHILDRENS ART CARNIVAL (Continued) **S107521874**

left. 1/20/06 - Raphael Ketani. I called up Paul Basso and asked him what MILRO was doing to install a sump and oil/water separator. He said that he thought this idea was tentative and that DEC wasn't so sure this is what they wanted. So he hadn't looked into investigating a possible system. I told him DEC DOES want a slow pump system to hold down the water level and collect the oil. I told him that it needs to be installed immediately. He said that such a system that will work with the sump that exists is tricky to find, but he will investigate a possible one now. Paul added that oil samples were sent to Severn Trent today. He said there is a 2 week turnaround. I also told him to put down lots of absorbent pads on the floor around the front sump because rain is expected over the weekend. He said he will have someone do this. I called up Ms. Martin and asked her how things were. She said that the odors were low due to the fans that were going all night and that the basement was free of oil. She said that she will get someone to the Carnival soon to do an entire tank system tightness test. Ms. Martin called me at about 3:15PM today and said that Eastmond had done a system test. They found that the tank leaked pressure and the vent pipe had a wet failure. Otherwise, Eastmond said, the suction, return and fill lines were alright. I told Ms. Martin that the next step was to have the tank cleaned out, removed, and a temporary tank installed. She said she would do that. I told her to have Eastmond put absorbent pads around the front sump to absorb oil when the water level rises again and to hire a company to either dig up the contaminated soil below the basement or to start with soil borings to find the extent of the oil pool. I gave her a list of digging and investigative companies with no recommendation. She said she would pick a company to start work. 1/23/06 - Raphael Ketani. I spoke to Paul of MILRO today and told him to hold off doing more work at the site. He said that his crew had been there this morning and pumped out more oil. I told him that was fine, but to stop work for now. He said he would. I then spoke to Ms. Martin. She said that Eastmond was on site and they were cutting up the tank. She said that MILRO had been on site and had pumped out more oil. Ms. Martin asked for a letter ordering the Carnival to do the tank removal and break up the floor of the basement to remove the contaminated soil and water. I told her I would send it. 1/25/06 - Raphael Ketani. I spoke with Marlene by cell phone. She said that this was the best way to reach her now because of the tank removal yesterday. She said that when Eastmond removed the oil, cut up the old tank, and welded the new tank, the vapors were so strong that they chased everyone out of the building. She said that everyone is now working from their respective homes. She said that she thinks the Carnival has found a temporary place to hold their saturday workshops. Ms. Martin said that a temporary tank has been set up in the backyard and Robani is supposed to get things running to provide heat. I told her to open all of the windows again to get more vapors out. She said she will do this and that she will call Eastmond to see what they plan to do and when. I called Eastmond and spoke to Isaac Mungra. He said that his crew removed the tank and saw holes on the opposite side which were 15 inches above the floor. He said that it did not appear that oil leaked onto the floor from the tank or anywhere (according to Rene from his crew who was there). Mr. Mungra said that he didn't feel it was necessary to break up the floor to see whether oil was underneath. I asked him whether Eastmond was going to wash the floor and pump the sump. He said no because he didn't want to take on the large cost. I asked whether Eastmond

CHILDRENS ART CARNIVAL (Continued) **S107521874**

tested the suction, return, and fill lines. He said no because it was his understanding that Robani was going to replace the lines anyway. He said he was only responsible for cutting up the tank. I called Robani and asked Mr. Pearson whether Robani Oil was going to test the 3 lines. He said no and that he had no plans to. He said that he was just going to supply 2 temporary 275 gal. tanks and get the furnace running again. I asked whether Robani Oil was going to clean the basement floor and suck out the sump. He said no because he didn't want to take on the large cost as the Carnival doesn't have a lot of money. He told me to have Eastmond do it. I called Ms. Martin back and told her the situation with Eastmond and Robani and told her that I would call MILRO, with her permission, and have them come and do the 3 line tests, clean the floor, suck the sump and ventilate the buidling. She said that was alright and to call them. I tried calling Paul Basso, but could only leave a message. Mr. Marvin Edwards (cell (404) 790-2592) called to ask what he should put in the response letter to DEC. I told him to give me a chronology of who performed what service, what events happened, and how the tank failure was discovered and what actions were taken to resolve the matter. He said he would. He added that he is taking over some of the cleanup coordination responsibility from Ms. Martin as she has other work to do. He asked that I coordinate with him. I told him that I was trying to get MILRO to take over the cleanup. He said that would be fine. I made contact with Mr. Basso and told him what the DEC wanted MILRO to do: 3 line tests, ventilate building, clean floor, pump sump daily. He said that MILRO can do all of the work. I asked him when his crew could come out. Mr. Basso said at 1 PM tomorrow. I said that would be alright. I called up Ms. Martin and asked her whether 1PM tomorrow would be alright. She said yes. I then called up Mr. Edwards to let him know when MILRO will be there. He said that 1PM would be good. 1/26/06 - Raphael Ketani. I visited the site today at 12:30PM and met Ms. Martin and Mr. Ortiz. They said that MILRO had already been here at 11:30PM and pumped out the sump. Ms. Martin said that MILRO told her they would be over tomorrow to clean the floor. I looked at the front sump and saw only clear water. There still were odors in the building as the floor in the front basement needed washing, though it didn't look oily and smelled only very slightly when I got very close to it. The floor where the tank used to be didn't have cracks or oil stains. There were fans in the basement blowing the vapors out the back entrance. Fans were present on all floors and were blowing the air out the windows. The building was cool inside due to the open windows. Vapor concentrations were as follows: basement front/back: 3500ppb/520ppb first floor director's office/art room: 89/210 main floor: 162 third floor front/back: 200/290 fourth floor front/back: 218/194 1/27/06 - Raphael Ketani. I received a call from Ms. Martin. She said that MILRO tested the 3 lines and the return line failed. She said that they cleaned the floor today, too. Ms. Martin added that the odors are light today. 1/30/06 - Raphael Ketani. I spoke to Paul Basso today. He said that the fill line wasn't tested. I asked him to test this line, also. He said they vacuumed out oil from the front and middle sumps on friday and cleaned the floor. He said that they will be over tomorrow, 1/31, and test the fill line, vacuum again and clean the floor, if necessary. I told him this would be fine. I made a site visit 10:45AM. I met Jose Ortiz who let me check on the odors at each floor and the presence of oil in the sump. The vapor concentrations were: 2,000ppb in the front basement; 750ppb in the back basement; about 250ppb at each floor above the basement.

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Odors were light on the main floor, but the building is still cool due to a problem with the furnace and the windows are partially open. I met Mr. Pearson on site. He told me that he will replace the suction line and that the return line was not in service even before Robani was the Carnival's oil supplier. I told Mr. Ortiz and Ms. Martin that MILRO will come tomorrow to suck out the sump and do 4 soil borings in the front basement. I told them that there will be 2 borings where the tank used to be, 1 between the tank position and the sump, and 1 on the other side of the sump. They said they understood. I will try to be at the site to watch the soil sampling. Mr. Lindos Lindsay called and left a message that he is scheduled to meet with an environmental company tomorrow at 11AM to discuss what needs to be done and how to go about it. 1/31/06 - Raphael Ketani. I met Gordon of MILRO at the site just as he finished doing the fourth boring - about 11AM. All four borings had been done where I wanted them. Gordon told me that he had soil at each location and that the soil at boring #1 (between the sump and the wall) was the most contaminated. He said that boring #4 at the west end of the former tank area was the cleanest. He said that he will submit the samples for analysis. Oil was still floating and accumulating in the sump. I asked Gordon to call Paul Basso and have a vacuum truck come over and suck out the sump. Gordon said that one will be here today and tomorrow. The crew from Robani Oil began their work right after Gordon was done. They will install 2 275 gal. tanks and replace all of the lines. The vapors in the building were slightly worse than yesterday. I talked to Jose Ortiz and Marvin regarding why the borings were taken and what will happen next. I told them to set up the fans again and to ventilate the building. At 3:30PM I spoke to Gordon of MILRO to find out the details of how the return line was tested. Gordon said that he capped off the line, pumped with a manual push-pull pump until he had 5 lbs. of vacuum and waited half an hour. He said he used soap solution to check all the valves and they were fine. He said the vacuum truck had been there about 1 hour after he left and pumped out a lot of oil. I told him to test the fill line. Gordon said that he believed the line was already removed. I told him that if this is true, then I wanted him to do a couple of borings outside the building next to the fill line tomorrow morning. He said he will do it. 2/1/06 - Raphael Ketani. I met Gordon at the Carnival. He did one boring (#5) next to the fill pipe. However, Robani had replaced the old fill pipe with a new one yesterday and had been sloppy by spilling a little oil onto the area when they pulled the pipe. The sample was sandy fill soil and had a slight odor. The PID reading was 500ppb, but Gordon had collected the sample in a plastic bag. This was sand that was used to backfill the upper end of the abandoned coal shute that is infront of the building. I went into the basement and checked the portion of the sand that had spilled into the coal shute. It didn't have an odor. Gordon said that they just sent off the oil samples that were collected. I told him to order the lab to do a fingerprint of the oil. In the basement, Robani had installed two 275 gal. tanks, a new fill line, a new vent pipe, and a plastic coated suction line. The suction line was cemented to the floor and covered with concrete where it met the landing of the stairs to the basement. All of the old lines were removed. The heat was back on and a hot water pipe almost over the back and another one against the opposite wall of the basement were leaking hot water. Part of the floor of the front basement was wet. Some of the wetness extended under the new tanks, but they are on feet above the floor.

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Red oil is in the front sump, but is transparent enough so that the bottom of the sump can easily be seen. I told Gordon to call Paul Basso and have him send a vac. truck over to pump out the sump. Vapors in the building were: basement: front 1000ppb/ middle 500ppb first floor: front 350ppb/ back 225ppb second (main) floor: 230ppb third floor: front 250ppb/ back 350ppb fourth floor: front and back 300ppb Paul from MILRO called at 3PM and said that he will send the samples to a DEC contract lab for fingerprinting and he will resample soil sample #5 and put it in a jar. 2/2/06 - Raphael Ketani. I received a call from Rick Bayer of Severn Trent Labs regarding the soil samples. He said he will send a copy of the report to MILRO and to DEC. 2/3/06 - Raphael Ketani. I FAXed a copy of the Standby Contractor Authorization Form to Paul Basso of MILRO. 2/6/06 - Raphael Ketani. I visited the site today. Vapors in the building were 3600ppb in the basement, 200ppb in the first floor art room, and 170 ppb in the main floor art work area. However, the heat was off as the plumbers were replacing a couple of hot water pipes. Oil was still in the front sump, but it had turned thinner and brownish in color. Aside from this, Marvin Edwards of the Carnival pointed out black spots from 2 to 14 that had suddenly started to appear on the basement floor. Mr. Edwards said that he first noticed them today. There were about 12 spots and all except for a couple were in the front basement area. I touched some and oil came off onto my hand. The PID detected 6200ppb of vapors. I called MILRO to come over tomorrow to suck out the front sump and try to reduce the amount of oil seeping through the floor. Paul of MILRO said they would do it. 2/7/06 - Raphael Ketani. I tried to find out whether MILRO had pumped out the front sump, but could only leave a voice mail for Marlene Martin. I called up Paul at MILRO and he said his worker was there with the vacuum truck and pumped out 120 gals. of water. 2/8/06 - Raphael Ketani. I called up Mr. Wickham of NYCDOH ((212) 442-3372), but he wasn't in. I reached the receptionist and she said that all inspectors get their work assignments a week in advance and that Mr. Wickham already had a full schedule and could not make it to the CAC. She connected me with Mr. Wickham's supervisor, Inspector Stallbohm. Mr. Stallbohm said that someone was out at the CAC on 1/17 and still found unacceptable vapors. He would see what he can do to get someone to the CAC quickly. Mr. Stallbohm called back to say that an inspector went out to the CAC on 2/3 and determined that the vapors had decreased to safe levels for children. He said that Marvin Edwards of the CAC had signed the DOH report to this effect. He added that Mr. Edwards was told the children could come back and that an inspector will make a followup visit on about 2/17. I called up Marvin, but got Jose Ortiz. I told him that the NYCDOH had told me that the children could come back to the CAC. He said that everyone was aware of this, but the boiler broke again and so the children will be staying off-site for a while longer. 2/9/06 - Raphael Ketani. I made a site visit today. The heat was off again as they had many hot water pipe leaks. They are in the process of replacing much of their hot water piping. Oil was still in the top of the front sump, but you could easily see to the bottom of the sump and the oil appeared to be just a sheen. Vapor concentrations were: basement: 1400 to 1500 ppb first floor art room: 200 ppb main floor: 325 ppb third floor: back/front, 325/290 fourth floor: back/front, 380/400 Kira Leid-King, lawyer for the Church of Nazareth, called me yesteday to say that she had hired a title company to do a records search for the third tank. No physical investigations were taking place at the

CHILDRENS ART CARNIVAL (Continued) **S107521874**

church. 2/14/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that the odors were very slight in the building. I told him I would like to send over a vacuum truck to suck out the oil in the front sump. He said that would be alright. He said that someone will be at the CAC today and tomorrow. I called MILRO and they said they will be over at the CAC on thursday morning. I let Mr. Edwards know and he said someone will be there. 2/16/06 - Raphael Ketani. I spoke to Ms. Martin. She said she knew that MILRO wasn't coming today, but would come tomorrow. I asked her about Robani Oil and how service has been over the years - whether they clean up whatever they release. She said they had no problem with them and that nothing has ever happened. I then asked her whether she had heat today. She said yes and that there was plenty of it since they repaired all of the water pipes. I asked her how the history of the boiler has been. She said that except for now and the pipes, she hasn't had a problem - though it's tempermental. I asked her whether in the past it ever leaked. She said not to her knowledge. I ended the conversation after this. At 3:45PM I received a call from Bill Hunter, insurance adjuster for Utica Insurance ((516) 479-5089). He represents the insurance company for Robani Oil. He said he was trying to go over the information that Robani had given him regarding the oil release to see who had liability. He said the insurance claim number was 1016566. He said that the CAC first called Robani to complain of a loss on 1/6/06. He said Robani came to investigate and found oil 5 feet from the tank, but he said he wasn't sure whether that meant in the sump or on the floor. He asked whether the church was the source. I told him we didn't know yet, but we intend to do an investigation. 2/23/06 - Raphael Ketani. I spoke to Jose Ortiz regarding the conditions at the CAC. He said he did notice a slight odor on the main floor. I asked him to look at the front sump. He called me a little while later and said there was lots of oil in the sump. Then I called MILRO and told Paul of MILRO to send the vacuum truck. He said he would send it tomorrow, friday. Paul told me that DEC should be receiving the first bill soon for the work they have done so far. I let Mr. Ortiz know that MILRO will be over tomorrow. 2/27/06 - Raphael Ketani. I visited the CAC today. I met Mr. Edwards. He showed me the front basement area. The door is being kept closed now to confine the odors as much as possible. The room had 1500 ppb of vapors. A thin film of oil was present on the surface of the water in the sump with widely scattered small orange droplets of oil. The floor had lots of Speedi-Dri on it to absorb oil seeping up through the floor as oval stains. Mr. Edwards said that MILRO had been over last friday and had pumped out the sump. The air about the second sump had about 560 ppb vapors. There was a sheen on top of the water, but it did not smell like oil. In the art room on the first floor the vapors were about 500 ppb. The main floor and the third floor both had vapor concentrations of about 450 ppb. Mr. Edwards said that they just had a cleaning crew mop the floors. The air smelled of some kind of vapors of a cleaner. I told Mr. Edwards that I will have MILRO come over sometime this week to pump out the sump again. He said anytime is alright. I received the analytical reports for the 5 soil samples taken at the CAC some weeks ago. Four (4) samples were collected on 1/31/06 in the front basement near the front sump. One (1) sample was taken on 2/2/06 at the fill pipe where it passes below ground. Three (3) of the front basement samples and the fill pipe sample indicate the presence of only #2 oil. One (1) basement sample indicated the presence of #1 oil. However, this oil was also in the

CHILDRENS ART CARNIVAL (Continued) **S107521874**

blank. 3/1/06 - Raphael Ketani. I spoke to Paul of MILRO today and asked him to vacuum out the front sump this week. He said his truck will be over tomorrow. 3/6/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that MILRO was over on friday and pumped out the sump. He said that odors were definitely noticeable in the front basement, but the door is kept closed. He added that the odors in the rest of the building are slight and that they had classes on saturday with no problems. 3/9/06 - Raphael Ketani. I received a call from Ms. Martin today. She said that some men in plain cars showed up at the church on teusday, 3/7, and began working in the courtyard. She said that they uncovered and opened a tank today. 3/10/06 - Raphael Ketani. I visited the CAC and the church courtyard today. I took pictures of the exposed tank and the sheen floating at the top of the water in the tank. The soil from above the tank didn't have an odor. Next, I visited the CAC. They had fans blowing in the basement. They were blowing from the front sump area to the open back door of the basement. Vapors in the front sump area were about 560 ppb, vapors in the basement sink room where new oil stains showed up were 1100 ppb, the first floor was about 190 ppb, the main floor was 140 ppb, and the third floor was about 200 ppb. I will call MILRO to have the front sump pumped out again. 3/15/06 - Raphael Ketani. I talked to Jose Ortiz of the CAC. He said that MILRO was there on monday to pump out the front sump, but they had to wait for 10 or 15 minutes before they could get into the basement. Mr. Ortiz said that everything was pumped out and the odors are slight throughout the CAC. However, where the oil has been seeping through the floor in the basement sink room, the odors and the staining are getting worse. He said that no work is taking place at the church courtyard next door to investigate the tank and the oil. Kristina Lee (212) 883-7600, Chairman of the Health Committee of Community Board #9, called for an update. She said that she saw the exposed open tank in the church courtyard. I told her that the church brought a bunch of people to the site and they dug up and exposed the tank and then opened the tank. I told her DEC sent a letter ordering the church to continue the remediation by friday, 3/17, or the DEC will send in its own contractors. I told her the DEC will send a letter stating that we are taking over the investigation and cleanup if DEC hears or sees nothing happening. I added that we will get a court order to enter the property and then start the work. Ms. Lee said that the congregation meets every sunday at St. James Presbyterian Church. She added that on March 2, the NYC Dept. of Buildings fined the church $10,000 for not repairing the landmark building. SHE ASKED THAT A WELL BE PUT IN BETWEEN THE TANK AND THE NEIGHBOR'S GARDEN WALL AND ASKED THAT SHE BE KEPT INFORMED BY NEXT WEEK. I told her I would. 03/17/06-Thomas-Contract Payment Package-(Severn)- took samples-02/01/06-02/28/06 took sample of sump pit 01/01/06-01/31/06 03/17/06-Thomas_ Contract Payment Package-(Milro)- washed basement floor, took samples, removed pads, washed tank room, took borings, purge sumps (01/19/06-02/24/06). 3/20/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that the odors in the rest of the building are slight. However, the odors in the basement sink room are increasing and more oil staining is showing up in the floor. He said that the fans are ventilating the basement. I told him that I will call MILRO to have them suck up the water and oil from the middle and front sumps. I contacted MIRLO and they said they will be over at 9:30AM to pump out both sumps. 3/22/06 - Raphael Ketani. I FAXed the Standby Contractor Authorization Form to Severn Trent Labs (phone:

CHILDRENS ART CARNIVAL (Continued) **S107521874**

(845) 562-0890; FAX: (845) 562-0841). 3/23/06 - Raphael Ketani. I received the bills from MILRO today for work done on 3/1 and 3/13/06. 03/24/06 Thomas- Contract Payment Package-(Milro)- vacuumed oil from sump pits, disposed of oil and water (03/03/06-03/13/06). 3/28/06 - Raphael Ketani. I sent a letter to Ms. Martin with the 3/24/06 remediation plan that MILRO had FAXed to me. I received a call from Bill Hunter of Utica Insurance, the insurance company for Robani Oil. This is the second time he called me for information. He wanted to know what the status was with the spill case. I explained to him what was going on at the church courtyard and what DEC wanted to do to eliminate the vapors and contaminated water under the CAC. 4/4/06 - Raphael Ketani. I received a call from Marlene Martin of the CAC on 4/3/06. She wanted to know what the total cost of the cleanup has been so far for the CAC. I told her a close estimate is $8710. She asked what the cost would be for the future/proposed work plan that I had sent her from MILRO. I told her I would find out. I called up Anthony at MILRO and he said he will try to get back to me with an approximate price. 2:30 Anthony Mariano of MILRO FAXed me the rough estimate of what it may cost for all of the construction work that would take place to: break open the concrete floor and suck out the contaminated soil, water and oil, repair the floor, install 2 access wells in the floor, power wash the floor, and paint with two part expoxy paint. The total came to $36,642.95. I informed Ms. Martin about the estimated amount. 3:50PM I sent an e-mailed letter to Lisa Silversmith, the owner of the property on the other side of the CAC. I hadn't heard anything from her in response to the Department's 3/20/06 letter. So I sent her an e-mail to lisasilversmith@yahoo.com. The letter appears below: CONFIDENTIAL New York State Department of Environmental Conservation Division of Environmental Remediation, Region 2 Bureau of Spill Prevention and Response 47-40 21ST Street, Long Island City, NY 11101-5407 Phone: (718) 482-4933 " FAX: (718) 482-4098 Website: www.dec.state.ny.us April 4, 2006 Lisa Silversmith 60 Hamilton Terrace New York, NY 10031 RE: Spill #0511700 Childrens Art Carnival 62 Hamilton Terrace New York, NY Dear Ms. Silversmith: As of April 4, 2006, the New York State Department of Environmental Conservation (the Department) has not received a response to its March 20, 2006 letter regarding the property at 60 Hamilton Terrace (see attached below). It is important that the Department make an inspection to the basement of your property. We are aware that a spill had previously taken place at 60 Hamilton Terrace and was subsequently cleaned up and the case closed. The Department would like to determine that there are no impacts from the oil that is presently seeping into the Childrens Art Carnival next door. Temporary groundwater monitoring wells installed in the floor of your basement would help to collect any oil under your property. Please call me at (718) 482-4634 to make arrangements for the site inspection. Sincerely, Raphael Ketani Enigneering Geologist II 4/10/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that due to the rain last thursday, the odors in the sink room have gotten worse. However, he said, the odors in the rest of the basement are fine due to the ventilation and the odors in the building are slight. I told him that I would send over the vacuum truck to suck out more oil and water tomorrow. I told him to have someone at the CAC at 9AM so that MILRO can get in. He said he would do so. I asked him whether Ms. Martin was in. He said no. I called up Paul at MILRO and told him we would need his vac. truck at the CAC tomorrow. He said he would be there. 4/17/06 - Raphael Ketani. I

CHILDRENS ART CARNIVAL (Continued) **S107521874**

spoke to Mr. Edwards. He said that the situation at the CAC is the same as last week with only slight odors in the occupied parts of the building and stronger odors in the basement. He said there was no flooding. I tried to contact Ms. Martin regarding MILRO's proposal, but could only leave a voice mail message. 4/24/06 - Raphael Ketani. I spoke to Mr. Edwards. He said that there are no changes at the CAC. He said the odors are the same - even in the basement. He said that there was no flooding from the 3 of rain over the weekend. However, the oil staining is slightly more in the basement. 5/15/06 - Raphael Ketani. I received the bills from MILRO for the work done on 3/21/06 and 4/11/06. I signed them and forewarded them for processing. 5/17/06 - Raphael Ketani. I spoke to Mr. Edwards today. He said the odors in the building were still only slight. He said the rains over the past weekend and week haven't caused any recurrence of oil seepage. He said the basement was fine. This case is being transfered today from myself to Jeff Vought in order to consolidate all of the PINS cases under one Spills case manager. 06/06/06-Vought-Received call from Marlene Martin requesting information on possibility of state funding for tank replacement. Marlene also said that basement flooded during past weekends with heavy rains and no free product was noted. 06/06/06-Vought-Complete File Review by Vought: See also spill numbers: 0209311(60 Hamilton Terrace-closed 12/22/05), 0551505(72 Hamilton Terrace-open). Sale of 72 Hamilton Terrace by City of New York to Nazareth Spiritual Church and resulting Deed transfer-4/20/72. Site visit on 1/11/05 by DEC Vought-DEC required: 1)tank testing results 2)notification to NYCDOH 3)installation of ventilation system in basement 4)sealing of sump and washing of basement floor. Vought left message with NYCDOH Nieves, spoke to Mike Hughes(NYSDOH) and decision to close is the call of Marlene Martin. Oil was first noted on 1/3/06 and basement filled with water during times of heavy rains. Three sumps present in basement of Childrens Art Carnival(CAC). Sump closed to Hamilton Terrace contained fresh #2 fuel oil. As per Marlene Martin, she contacted 60 Hamilton Terrace to see if they had spill and no spill was found in the basement and she contacted the Church who noted an oil spill next door at 72 Hamilton Terrace. Email from NYSDOH Hughes to NYCDOH Peter Stallbohm with cc to NYCDOH Nieves- How did you inspectors make out at the 64 Hamilton Terrace spill? . Email from NYSDOH Hughes to NYCDOH Stallbohlm and DEC Vought-1/18/06. ...any updates about the Childrens Center in Manhattan? Have they re-opened, cleanup status? . Response from Stalbohlm At 64 Hamilton Terrace, readings of 4-5ppm of VOC was detected. A contractor was contracted to conduct a cleanup yesterday. The center voluntarily closed until so. After cleanup, another visit will be made to check effectiveness of cleanup (possibly today). Email from NYSDOH Hughes to DEC Vought-1/19/06. Peter Stallbohlm, NYCity Health, sent an inspector back to the Children's Center on Tuesday, 1/17. The inspector reported odors are still present... Fuel product still present in basement. The center is still closed and NYCity Health recommends staying closed until the additional clean-up is performed. Would you be able to also make a site visit and recommend some specific actions as well? . Letter from DEC Ketani to Kira-Leid King (Nazareth Deliverance Church NDC)-1/19/06. The New York State Department of Environmental Conservation (the Department) was notified on January 10, 2006 that a petroleum release took place at the above referenced site. Odors were noticed coming from the basement of the church during an inspection of the area on January 11, 2006. Staff from the Department were at the site on January 14,

CHILDRENS ART CARNIVAL (Continued) **S107521874**

2006 to observe the removal of No. 2 fuel oil by Northeast Environmental from Nazareth Deliverance Church . (6/6/06-Note that I, jeff Vought was onsite and liquid was recovered from basement when I arrived on-site, I did not observe oil in the basement as the liquid was already recovered). The Department has identified the Nazareth Deliverance Church as a potential responsible party for this release . Letter required submission of an investigative summary report including the investigation of a possible third tank under the church courtyard. The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness . If no reply regarding the investigation is received from the Nazareth Deliverance Church within (5) days of receipt of this letter the Department may proceed with the required work... . Letter from DEC Ketani to CAC Martin-1/19/06. The Department has identified the Childrens Art Carnival as a potentially responsible party for this release . Notification that the Departrment has contracted Milro and will invesigate the source of oil. Upon one of the inspections of the Childrens Art Carnival, staff from the Department noticed a three foot long piece of suction line at the foot of the stairs of the basement. The Department requires that the Childrens Art Carnival immediately conduct a site investigation to determine why the line was replaced, whether there was a release of product and how large the release was, when the suction line was replaced and which company did the replacement work. The Childrens Art Carnival must also hire a contractor to have the suction line and return line (the two 3/4 inch copper lines) pressure tested . Letter from DEC Ketani to CAC Martin-1/23/06. ...the Department was notified on January 20, 2006 that a tank system test was conducted by AL Eastmond & Son, Inc. on this date and that a leak was detected in the tank and vent line. At this time, the Department is ordering the Childrens Art Carnival to repair or replace the tank and the vent pipe, and to hire a contractor to investigate the oil spill and remove all contaminated concrete flooring, soil and rock and all product and contaminated water . Letter from Marlene Martin (CAC) to DEC Ketani-1/27/06. To date we have cooperated with the Department of Environmental Conservation on all requests, recommendations and mandates. Enclosed, please find the job tickets for work performed by Eastmond and Sons, Inc. as per your Department’s madates and directives. It is our hope that a resolve can be reached as soon as possible and or that the Carnival can be eliminated as the potential source of this release... Enclosed as Eastmonds & Sons job tickets: 1)1/11/06- Removed 50 bags of contamianted soil washed floor, 1 bucket of oil wash, removed 102 gallons of water, pressure washed floor 2)1/18/06- pump out oil and water from floor also wash down used 1x5 gallon can oil wash 3)1/20/06- Test tank, tank failed, wet leak 4)1/23/06- transfer oil to 275. Remove jacket and remove 30 bags of contaminated soil. Job completed 5)1/24/06- Install 275-gallon temporary . Contractor Work Authorization Form for Milro-2/2/06. Email from Landmarks Preservation Comission(LPC 212-669-7921)-John Weiss to DEC Ketani-02/10/06. Under the circumstances you described to me, no permit from the Landmarks Preservation Comission is needed for the NYSDEC contractor to break up the concrete paving in the courtyard next to 72 Hamilton Terrace in order to undertake and emergency remediation project . Because this work is being undertaken to remedy a dangerous condition, pursuant to section 25-312 of the NYC Administrative Code, no LPC permit is needed. No work is to be performed on 72 Hamilton Terrace . Fax from Kira-Leid King(NDC) to

CHILDRENS ART CARNIVAL (Continued) **S107521874**

DEC Ketani-2/11/06. As discussed, attached please find a search from the fire department indicating that there are only two tanks located at the above-referenced premises. Therefore, there isn't another tank located in the court yard . The Church had a fire four years ago causing the building to be inhabitable . Letter from DEC Ketani to Leid-King (NDC)-2/10/06. ...the Department has not been notified by Lindsay Lindos or other representatives from the Nazareth Deliverance Spiritual Church, that the church will hire a company to conduct a site investigation to determine whether a fuel oil tank is present under the church courtyard. Deadline of 2/18/06 given to investigate the court yard. Email from LPC Weiss to DEC Ketani-2/22/06. I am writing in response to our recent telephone conversation regarding the possibility that the historic wrought iron fence in front of the side yard at 72 Hamilton Terrace may have to be removed in an oil tank has to be removed. Suggestion to take the tank out in pieces to save the fence. If fence has to be removed it also has to be replaced. Letter from DEC Ketani to Lindos Lindsay(NDC) and Kira Leid-King(NDC)-3/10/06. Site visit made by Department on 2/10/06. ...a third fuel tank was observed to be present beneath the courtyard behind the Nazareth Deliverance Church. Department required NDC to perform a soil boring between the foundation wall of the Childrens Art Carnival at 62 Hamilton Terrace and the tank, and taking soil and groundwater samples. Another boring must be installed between the tank and the church. Deadline given for nine days within date of letter (2/19/06) to respond to DEC and resume investigation of tank and soil. STL Analyticals-2/10/06. Sample from CAC sump pit ran for fuel id analysis and showed 920000ppb #2 fuel oil. Fuel oil sampled by Milro. STL Analyticals-2/17/06. Sample from CAC outside by fill #5 @1'. Sample analysis performed for TPH310.3 shows oil parameters below method detection limits. STL Analyticals-2/17/05. Four sample from CAC front basement area near sump. . Sample analysis performed for TPH310.3. Soil analyticals show all below method detection limit except for 7400ppm #2 fuel oil(SB#2 @ 1'), 110ppm #2 fuel oil(SB#3 @1'). Letter from DEC Ketani to NDC Lindsay and NDC Leid-King-3/20/06. On March 20, 2006 the New York State Department of Environmental Conservation (the Department) made a site visit to the above listed property. No work appeared to have taken place to investigate the tank or the surrounding soil since the last site visit that took place on March 10, 2006 . Letter requiring investigation. Due date of 4/5/06 for the work to resume. Letter from DEC Ketani to Lisa Silversmith-03/20/06. We would like to install two(2) wells in the groundwater beneath the basement of your home. These wells will be constructed and sampled by out contractor. Contractor Work Authorization for STL-3/21/06. Fax from Milro to DEC Ketani-3/24/06. Milro proposes the following scope of work to address the oil spill cleanup: 1)Saw cutting of concrete slab in the basement and excavation of contaminated soil 2)disposal at a licensed disposal facility 3)recover of product using a vaccum truck if contaminated groundwater is encountered 4)collection of endpoint samples from excavation 5)restoration of the concrete slab 6)pressure washing of basement and epoxy application. Letter from DEC Ketani to CAC Martin-3/28/06. ...(the Department) is presently looking into other methods of controlling and preventing the petroleum vapors from entering Childrens Art Carnival . Milo remediation plan has been enclosed for Martin's review. Cost Estimate (Milro-Moriano)-4/4/02. Cost estimate for basement excavation and replacement. Site visit by DEC Vought during endpoint sampling of tank in couryard-5/11/06.

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Sampling performed by USA Environmental (Cristin Ciaburri 718-981-5710). Onsite was Keith Bartley(USA). Pumped out wate from 550-gallon UST in courtyard. No product in UST, just sheen and water. Three soil samples were collected (one through bottom of tank, one below fill line and one below supply/return line). No odors or staining observed in all of the soil samples. Site visit performed to CAC and no odors in basement and no free product in sump. Some oil staining showing up on floor from underlying groundwater. One sample also collected for analyiss from NDC basement floor. Vought spoke to USA Ciaburri and DEC will receive report by 6/12/06. DEC tentative requirements: 60 HAMILTON TERRACE: 1)followup to see if any recent spills 72 HAMILTON TERRACE 1)results of basement borings by 275-gallon ASTs 2)submittal of documentation of 1/14/06 clean up by Northeast 3)notification to Bishop France of requirements 4)backfilling of UST excavation in courtyard 5) The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness as per 1/19/06 letter 6)backfilling of NDC excavation to prevent continued groundwater infiltration into CAC 62 HAMILTON TERRACE: 1)continued monitoring of sump 2)call back to Martin regarding possibility of use of Spill funds for AST replacement and likelihood of NYSOAG cost recovery against Art Carnival 2)submission of tank test results from Eastmond and Sons of AST in CAC as per requirement on 1/19/06 letter 4)borings at tank location for 8260/8270 5)Milro boring logs and site plan from 2/17/06 analyticals 6)implemenation of Randy's workplan(installation of monitoring wells at CAC and basement excavation) from Milro 7)sealing of basement floor 8)borings by UST, sump and and fill port 9)Summary of description of cleanup activities by AL Eastmond including source of 30 bags of soil removed during tank removal and description of removed tank. 06/15/06-Vought-Spoke with Marlene Martin who inquired about status of spill. Martin stated that there were no odors in the school to date. Vought drafted letter with above requirements to both parties and cc'd Northeast, Marlene Martin (Art Carnival), Cristine Brooks Lee(Comm Bd 9), Martin Smith(Councilman Robert Jackson), LPC and USA, Eastmond. DEC Vought to call Milro regarding: 1)boring logs and site plan for borings on 2/17/06 and installation of new borings in floor or school. DEC Vought to call Martin regaring: 1)non use of Spill Funds for AST replacement as per NYSOAG Buss 2)further soil and groundwater investigation by the DEC. 06/19/06-Vought-Called Martin(212-234-4093), faxed her copy of requirement letter and letter to NDC and left message informing her her that there was no way for Spill Fund to pay for CAC tank replacement and to dicuss letter sent on 6/15/06. Vought called Lindos Lindsay (347-228-8039) for fax number and to inform him of outstanding requirements. Vought faxed him copy of requirement letter to 72 and 62 Hamilton Terrace. Lindsay requested that letter be transmitted via mail only and be sent to: Lindos Lindsay 163 Myrtle Avenue Brooklyn, NY 11201 Vought sent letter to above address. Vought called Christine Lee (Comm. Bd. 9 212-883-7600) and she requested correspondence via mail only. Vought sent info to: Christina Lee 48 Hamilton Terrace New York, NY 10031. Vought called and spoke to Martin Smith (ph 212-234-0551 fax 212-234-0552) for fax number and to explain requirements. Vought faxed Smith copy of requirement letters for 60, 62 and 72 Hamilton Terrace. Vought called John Weiss (Landmarks Preservation 212-669-7921) for fax number and to explain requirements. Vought left message to return call. Vought called and left message with Christin Ciaburri (USA 718-951-5710) for fax number and to explain

CHILDRENS ART CARNIVAL (Continued) **S107521874**

requirements. Vought called Renee Lewis (AL Eastmond 718-378-3000 fax 718-378-4560) and he was not in office. Vought faxed him copy of letters to 62 and 72 Hamilton Terrace. Vought called Bob Rafferty(NYSDOH 518-402-7800 fax 518-402-7819) for fax number and to explain requirements. Vought faxed Rafferty copy of requirements. Vought faxed NYCDOH Nieves copy of requirements for 60, 62 and 72 Hamilton Terrace. Vought called Dwayne Monaco(Northeast 914-777-1930 fax 914-777-1928) for fax number and to explain requirements. Vought faxed Monaco copy of requirements. Vought received call from Monaco and returned call and spoke to Monaco and no analyticals were performed and Monaco will send in pictures. Monaco did say his men saw oil on the floor. Monaco will submit report and pictures to DEC. 06/27/06-Vought-Received call from Marvin Edwards (212-234-4093) requesting letter with amount spent to date on PIN (8713.53 as per UIS). Vought returned call and left messge explaining that DEC will not provide the letter as amount may increase and Vought willing to call insurance directly. 06/28/06-Vought-Received call from Marvin Edwards and they filed claim with general liability insurance. Their claim representative asked for further costs. Claim may file under third party liability portion of coverage. Marvin will contact insurance and arrange conference call with DEC. 07/12/06-Vought-Received message from Martin and returned call and spoke to Martin. Martin will be faxing in tightness test results and approved installation of additional borings. Martin will seal the basement floor upon no occurrence of product in the sump during monitoring period. 4/23/07-Vought-Reviewed above notes and both CAC and 72 Hamilton Ave are potential sources, CAC due to failed tank test and 72 Hamilton due to presence of oil spill during cleanup by Northeast Environmental. Both parties listed as potentially responsible and site visit scheduled with Martin for this week to confirm no further impact and close spill. Vought called Martin. Martin had not seen oil in recent months and site visit scheduled tomorrow at 10am. Vought also reviewed documentation and photos submitted by Northast dated 6/27/06. On January 14th, 2006 Northeast mobilized a crew and equipment to 72 Hamilton Terrace were technicians conducted a clean up of #2 fuel oil from the tank and boiler room of the building . Absorbent material was applied to the boiler room floor where puddles of standing fuel oil was observed... . No tank test results for 72 Hamilton included. Vought also received copy of failing test results for CAC which show Ullage (dry portion leak) from Eastmond and Sons dated 1/20/06. 4/24/07-Vought-Site visit by Vought and Marlene Martin not present at site due to emergency. Vought performed site visit with super and no product or olfactory odor of groundwater noted in sump, no staining noted in concrete at former tank location or fill location, product stains noted on floor towards 72 Hamilton but as per super they were present for long time. No product in other sumps of CAC. Vought discussed with DEC Austin including possible groundwater sample at 72 Hamilton Avenue and investigation whether a former spill occurred at Daycare center by mechanics. 72 Hamilton Avenue boarded with no signs of development. Tank in courtyard excavation was backfilled. 07/25/08-Vought-Spill reassigned from DEC Vought to DEC Ketani as per DEC Austin. 8/21/08 - Raphael Ketani. I called up Paul Basso of MILRO Associates (516) 379-1500. I asked him to send DEC a copy of the report from about 1/27/06 whereby the return line for the fuel system at the CAC was tested and it failed. He said he will look for it. I called up the CAC and asked for Ms. Martin (212) 234-4093, but the receptionist

CHILDRENS ART CARNIVAL (Continued) **S107521874**

told me that she wont be back until September. I asked for Marvin Edwards, but she told me that he didn't work here anymore. I was transfered to Fatima Faloye, the Operations Manager. I asked Ms. Faloye whether I could make an inspection at 11:30AM tomorrow. She said that would be alright. 8/22/08 - Raphael Ketani. I made the scheduled site visit. The church next door was completely boarded up. It appeared that no work had taken place, since early 2006 when I first visited the site, to restore the church. There were no petroleum odors coming from the basement vent. I put the PID meter as close as I could to a basement vent near the side entrance gate, but didn't detect anything. The area where the 550 gallon tank was buried had been filled in and was overgrown with weeds. I met Ms. Faloye and she took me to the basement. There were no signs of free product on the floor. There were no oil stains. There were no oil odors. The PID meter registered 0 ppb of vapors. The front sump had only water. I thanked Ms. Faloye for the opportunity to visit the site and left. 8/25/08 - Raphael Ketani. The Final ISR was written for the case and submitted to Randall Austin, Chief of the Spill Prevention and Response Unit, for his signature. I talked to Dwayne Monaco of Northeast Environmental (914) 777-1930 regarding the submission of an investigation report for the church. He said that they did only a cleanup of the basement and some oil collection. He said that no report was generated. 9/2/08 - Raphael Ketani. Today I received a FAX from Paul Basso of MILRO. The attached page was a simple form stating that the return line did not hold, but that the supply line was O.K. The date of the test was 1/27/06. Additionally, the last time that oil was collected from the CAC was on 4/11/06. This also appears to be the last time any cleanup took place. 9/4/08 - Raphael Ketani. The FSIR was signed by Randall Austin, Chief of the Spills Unit, and Lou Oliva, Chief Counsel Region 2, and sent to Dennis Farrar in DER, Albany. As there was no oil contamination, nor oil vapors at the site during my visit on 8/22/08, and as the DEC does not intend to do further investigatory work, nor sees the need for further remediation work at the site, I am closing the spill case. "

Remarks: "Material is coming into the basement of the Childrens Art Carnival and is originating from the church next door. The Art Carnival's oil company came and used a powder to control the odor but no clean up has been done. They need DEC's help. Groundwater was affected.... material is mixed with the water from the natural spring there. Unsure of what else they can do for a clean up."

Contact Name:	DIONIS ORTIZ
DEC Memo:	"1/10/06 -Austin - Also received complaint from: Cristina Lee, Chairman of Health Committee of Community Board #9 212-883-7600; 212-864-6200 contact her for further background info, as well as Ortiz - end Carnival e-mails: mamudd1@aol.com or mamartin@childrensartcarnival.org FAX: (212) 234-4011 1/11/06 - Raphael Ketani. I tried contacting Mr. Ortiz ((212) 234-4093), but a man answering the phone said he would not be in until 10:30AM. The man said that the church had a fire 2 years ago and hasn't rebuilt or reopened. He passed the phone to a woman who said that they have been

CHILDRENS ART CARNIVAL (Continued) **S107521874**

trying to find out more information about the oil leaking from the church and she gave me the phone number of Cistine Grit (212) 234-0484. I called the number, but no one picked up. I then called (212) 883-7600 - the law office of Cristina Brooks Lee - but could only leave a message. I called (212) 864-6200 - the Community Board #9 phone 10AM to 5PM - and got a man on the line. He said that I should call Martin Smith (not available until 11AM) at (212) 928-1322, who is the representative of Councilman Robert Jackson. I will make a site visit at 10:45AM today. I made a site visit at 11:15AM. I met Dionis Ortiz, Program Manager, Jose Ortiz, his assistant, and Marlene Martin, executive director of the Children's Art Carnival. I went to the basement and looked at the oil tank, the fill and vent lines, and the boiler. There were no signs of spillage. However, I did see many cracks in the basement floor that looked wet. Mr. Ortiz said that there is a spring below the building and that the water seeps into the floor. The basement has 3 sumps. The front one is next to the front basement wall, the middle one is 16 feet away, and the third one is about 25 feet behind the second one. The second and third sumps had only clear water at the level of the floor. The front one had red oil floating on top. There were signs of oil spillage on the basement floor next to the sump. Mr. Ortiz said that when it rained heavily a little while ago, the water level rose and pushed out the oil onto the floor. He said that an oil odor was noticed to be coming from the basement on 1/3/06. He said that Robani Oil was called and they put down some oil absorbent material. I spoke to Robert Pearson of Robani Oil (212) 687-8699, Colonial Park Station, P.O. Box 188, NY, 10039, and he said he didn't think the oil was coming from the property, but he didn't do any system tightness testing. He said that the customer would have to order it and pay for the testing. The PID readings were as follows: over the sump: 11.8ppm breathing area front basement: 4.4ppm breathing area at second sump: 1.4ppm first floor hallway: 1.3ppm children's work room first floor: 570ppb main floor (second floor): 600ppb (light odor) third floor art work room: 650ppb third floor copier room: 750ppb fourth floor front and back: 750ppb Mr. Ortiz told me that the church next door burned two years ago and has never been repaired. He said there is a man (David - later called Patrick) living across the street who is affiliated with the church. Mr. Ortiz knocked on the window, but no one seemed to be home. He said that David told him that the church uses gas and that Con Ed had shut off the gas. Mr. Ortiz said that, after the fire, someone entered the church basement and saw an oil spill. I spoke to Ms. Martin and she said that she didn't have any other church contacts other than Cistine Grit (a.k.a. Ingrid). She called Ms. Grit's number, but didn't get an answer. I looked at the outside of the church. The schedule display panel has Nazareth Deliverance Spiritual Church, Inc., Archbishop C. Clark. The name over the 72 Hamilton Terrace entrance is Church of Nazareth. The church is boarded up and the roof looks to be in bad shape. There were oily odors emanating from a small basement window near the basement door of the church. It is unclear if there is an oil spill in the basement of the church. I called Randall Austin, Chief Spills Engineer Region 2, with the information. He sent Jeff Vought, E.G. 1, over to look at the situation. Mr. Vought arrived at 1:30PM and looked over the situation. He noted 3 suction lines at the foot of the basement stairs. One line was only 3 feet long as it had been cut. No one at the Carnival knew when this happened or if a previous oil spill took place. Though Mr. Ortiz told me that the Carnival has

CHILDRENS ART CARNIVAL (Continued) **S107521874**

been in the building for 36 years. I saw a short stream of red oil between one of the fuel lines and the wall next to the stairs. A conference call took place between Ms. Martin, Mr. Vought, and Michael Hughes of NYS DOH. Mr. Hughes said that the building should be ventilated and the basement door sealed. Ms. Martin said that she told all the parents about the odors and that all of the parents decided to have their children stay in class. Later, at between 3PM and 4PM, Martin Smith of Councilman Robert Jackson's office and Claudius Wickham of NYCDOH showed up. We went with them and Bruce Tilley of the Neighborhood Organization to the home of Diana Laird and David Zapol at 418 W.144 Street. This is the home which shares a common wall with the church. PID readings in the kitchen were 940ppb. Readings in the corner of the basement where paint and wall finishing material were reached 1300 to 1600ppb. A dirt hole in the basement floor had 2500ppb readings. The front part of the home's basement had 500ppb. Next, Mr. Smith and Mr. Wickham went with us to the Carnival's basement. They both looked at the situation with the oil in the front sump and noted the odors. Then Mr. Wickham measured the air in the art work room on the first floor. He noted about 650ppb readings. He said that the odors weren't dangerous, but just a nusiance. He said to ventilate the building. 1/12/06 - Raphael Ketani. I made a followup visit at 3:10PM. Eastmond had finished their cleanup work. The front sump had been vacuumed and the floor had been cleaned. Fans were blowing the air around in the basement. Ms. Martin said that Eastmond didn't arrive until this morning as, otherwise, there would have been high overtime charges to do the work yesterday at night. Eastmond told her that the oil tank will be picked up off of the floor or else the dampness will corrode the bottom and the tank will leak. The odors were not as bad as yesterday. The tank room had about 3ppm, the director's office about 750ppb, and the children's work area on the main floor was about 300ppb - there were no odors on the main floor. However, the oil reappeared in the front sump. Ms. Martin told me that she had made contact with someone from the Church of Nazareth and that this person will let people in saturday morning (1/14). Ms. Martin said that she will let me know what time the church will be opened up. She also said that her company is not going to spend any more money on removing the oil in the sump until DEC finds out whether the oil is coming from somewhere else or from the Carnival. I informed Randall Austin, Chief Spills Engineer Region 2, and Jeff Vought, E.G. 1 Spills, about this and about the return of the oil in the sump and about the levels of the odors today. 1/13/06 - Raphael Ketani. I spoke to Ms. Martin. She said that there are no odors on the main floor. I asked whether she made contact with anyone from the church. She said no one called her and she couldn't get ahold of anyone. I asked whether the front sump was covered. She said it wasn't. I told her to have someone cover it with plastic bags and then use tape to seal the bags to the sump clay pipe. She said she would have someone do it. 1/17/06 - Raphael Ketani. Ms. Martin called me today. She said that the basement had flooded over the weekend because the sump pump didn't work. She said she had water and oil all over the floor. Also, she said that the oil guage on the oil tank is in the red zone. I asked her when was the last time she had a delivery. She said that it was some time ago and no one really keeps track of the level of oil in the tank. She said she called Robani Oil to get a delivery. However, the odors are bad again in the building. I told her to set up the fans. She said there are problems with the electricity in the

CHILDRENS ART CARNIVAL (Continued) **S107521874**

basement and the fans aren't running. I also told her that Northeast Environmental ((914) 777-1930) showed up at the church on saturday, 1/14/06, and found oil all over the basement. I told her to call them and get them to clean up the oil in her basement. I told her that if they wont do it, then to call Eastmond again and have them clean up the oil as the odors are bad. Jeff Vought, the off hours spill responder for the weekend, came in and gave me the following notes. He said that Northeast Environmental arrived on site at 11:30AM on saturday 1/14. Oil was all over the floor of the Childrens Art Carnival. Northeast collected the oil and water on the basement floor and pumped out the front sump. Northeast then went to the Church of Nazareth and recovered 120 gals. of #2 fuel from the two 275 gallon tanks in their basement. They did 2 borings, one next to the two 275 gal. tanks (ASTs) and one some feet to the west. They end at bedrock and are only 18 deep. Mr. Vought had them leave the borings open. There is a fuel filter in a concrete casing in the floor. From there, a line runs to the boiler. Mr. Vought suggested to me that they either do 2 wells in the corner of the wrought iron fence next to the Carnival or an oil recovery pit. The contact at Northeast is Dwayne Monaco (914) 777-1930 or (914) 403-5525 cell. I spoke to Mr. Monaco and he said that he was hired by the church and has no plans to pump out more oil from the Carnival. His techinician noticed a second vent line and a remote fill at the back of the church. He believes that there may be a third tank under the courtyard. I contacted Ingrid at (212) 234-0485, the Church of Nazareth - Archbishop Maxton France (cell (917) 642-8913). She said this was the Archbishop's number and that I can send a letter to 72 Hamilton Terrace, NY 10031. She said they didn't have plans to do anything more regarding the cleanup. I visited the site at 2:50PM. Oil vapors were still noticeable from the church. I entered the Carnival and sensed strong odors on the main floor. There were no activities or children at the day care center. I went to the basement and there was 3 of water there. However, I could not see a sheen. Ms. Martin said that Eastmond could not come and pump out the water as they didn't have a truck available. She said that they will come at 9AM on 1/18. The vapors in the buidling are as follows: basement=10.1ppm first floor art room=2250ppb executive director's office=3400ppb hallway at first floor=6600ppb main floor=2300ppb third floor art room=3000ppb third floor front room=4600 third floor landing=7100ppb fourth floor art room=5600ppb fourth floor front room=4600ppb fourth floor landing=7100ppb I met Mr. Pearson of Robani Oil at the site. He said he wasn't going to deliver oil until the oil spill at the church was cleaned up and not until it was determined that the Carnival's system wasn't leaking. Ms. Martin said that someone from the NYCDOH was supposed to show up to test the air, but I stayed until 3:35PM and he arrived. Ms. Martin said that they were out of oil and so the heat was off. 1/18/06 - Raphael Ketani. I tried to call the Carnival to find out how the water/oil removal in the basement went at 9AM (contractor was Eastmond), but no one answered the phone. Later, I got ahold of Ms. Martin via her cell phone (917) 805-3154. She told me that Eastmond had been at the Carnival at 9AM and had pumped out the basement. She said that the school is still closed. I called up MILRO (516) 379-1500 (FAX (516) 379-4596) and spoke to Paul Basso. I told him that we needed Milro to set up ventilation for the school and pump out the basement. We decided to meet at 10:30AM tomorrow. Kira Leid-King (home(914) 632-0665; cell (914) 879-8126; work FAX (212) 455-2502) called me to explain that the oil wasn't spilled on the

CHILDRENS ART CARNIVAL (Continued) **S107521874**

floor of the church's basement. However, I told her that Northeast Environmental had been to the church on 1/14/06 and had pumped out 120 gals. from the two 275 gallon tanks. She said that the church hadn't had a delivery in 3 years and that the Fire Dept. had ordered the church to pump out the oil after the fire. She said the tanks never had oil in them. I told her that there was a second vent pipe and a second fill port. I added that there is a gauge for a 550 gal. tank on the wall of the church's basement. I told her that DEC suspects there is a third tank under the courtyard. She said that she had no idea. Finally, I told her that the state would be hiring a contractor to investigate the church's oil spill and tank situation. She said that it's the Carnival's fault, not the church. I asked her what her relationship was to the church. She said that she is sort of the secretary-treasurer and paid for Northeast to do the oil vacuuming. 1/19/06 - Raphael Ketani. A site visit was made by Randall Austin, Chief Spills Engineer Region 2, and myself to monitor the work of MILRO Assocs. Inc. We met Gordon Sandtorv, Operations Supervisor from MILRO, on site. MILRO was already cleaning the floor in the basement of the Carnival. Vapors in the basement were about 3000ppb. However, the floor looked very clean. Red oil was again on top of the water in the front sump. Water was seeping through the north wall (opposite the oil tank) of the basement. It didn't have any odor or feel oily. I found out that Robani Oil had delivered 100 gals. and the heat was back on. Patrick Peters (phone (212) 690-0630; son of Archbishop Carlyle Clark) showed up at the Carnival. We asked him to let us into the church basement and he did. We saw the two 275 gals. tanks and one vent line that extended from the second tank. A filter apparatus was in the floor for the oil. The suction line ran through the floor and came up 8 feet away at the furnace. There was a light smell of oil, but no oil was visible on the floor. A gauge was mounted onto the wall above the first tank. Gordon said that it was a petrometer for a third tank. vapor concentrations for 1/19: basement: about 3000ppb directors office: 425ppb first floor art room: initially 1000ppb, then 400ppb main floor: 350ppb third floor: 700ppb back room/ 600ppb front room fourth floor: 400ppb back room/ 1000ppb front room Mr. Austin talked to Mr. Sandtorv and told him that if the Carnival doesn't test the suction line and the return line, then MILRO will have to do it. He added that he wanted MILRO to construct some kind of low flow sump and collection system with an oil/water separator to collect the water and pump it to the city sewer. Then we left. 1/20/06 - Raphael Ketani. I called up Paul Basso and asked him what MILRO was doing to install a sump and oil/water separator. He said that he thought this idea was tentative and that DEC wasn't so sure this is what they wanted. So he hadn't looked into investigating a possible system. I told him DEC DOES want a slow pump system to hold down the water level and collect the oil. I told him that it needs to be installed immediately. He said that such a system that will work with the sump that exists is tricky to find, but he will investigate a possible one now. Paul added that oil samples were sent to Severn Trent today. He said there is a 2 week turnaround. I also told him to put down lots of absorbent pads on the floor around the front sump because rain is expected over the weekend. He said he will have someone do this. I called up Ms. Martin and asked her how things were. She said that the odors were low due to the fans that were going all night and that the basement was free of oil. She said that she will get someone to the Carnival soon to do an entire tank system tightness test. Ms. Martin called me at about 3:15PM today and said

CHILDRENS ART CARNIVAL (Continued) **S107521874**

that Eastmond had done a system test. They found that the tank leaked pressure and the vent pipe had a wet failure. Otherwise, Eastmond said, the suction, return and fill lines were alright. I told Ms. Martin that the next step was to have the tank cleaned out, removed, and a temporary tank installed. She said she would do that. I told her to have Eastmond put absorbent pads around the front sump to absorb oil when the water level rises again and to hire a company to either dig up the contaminated soil below the basement or to start with soil borings to find the extent of the oil pool. I gave her a list of digging and investigative companies with no recommendation. She said she would pick a company to start work. 1/23/06 - Raphael Ketani. I spoke to Paul of MILRO today and told him to hold off doing more work at the site. He said that his crew had been there this morning and pumped out more oil. I told him that was fine, but to stop work for now. He said he would. I then spoke to Ms. Martin. She said that Eastmond was on site and they were cutting up the tank. She said that MILRO had been on site and had pumped out more oil. Ms. Martin asked for a letter ordering the Carnival to do the tank removal and break up the floor of the basement to remove the contaminated soil and water. I told her I would send it. 1/25/06 - Raphael Ketani. I spoke with Marlene by cell phone. She said that this was the best way to reach her now because of the tank removal yesterday. She said that when Eastmond removed the oil, cut up the old tank, and welded the new tank, the vapors were so strong that they chased everyone out of the building. She said that everyone is now working from their respective homes. She said that she thinks the Carnival has found a temporary place to hold their saturday workshops. Ms. Martin said that a temporary tank has been set up in the backyard and Robani is supposed to get things running to provide heat. I told her to open all of the windows again to get more vapors out. She said she will do this and that she will call Eastmond to see what they plan to do and when. I called Eastmond and spoke to Isaac Mungra. He said that his crew removed the tank and saw holes on the opposite side which were 15 inches above the floor. He said that it did not appear that oil leaked onto the floor from the tank or anywhere (according to Rene from his crew who was there). Mr. Mungra said that he didn't feel it was necessary to break up the floor to see whether oil was underneath. I asked him whether Eastmond was going to wash the floor and pump the sump. He said no because he didn't want to take on the large cost. I asked whether Eastmond tested the suction, return, and fill lines. He said no because it was his understanding that Robani was going to replace the lines anyway. He said he was only responsible for cutting up the tank. I called Robani and asked Mr. Pearson whether Robani Oil was going to test the 3 lines. He said no and that he had no plans to. He said that he was just going to supply 2 temporary 275 gal. tanks and get the furnace running again. I asked whether Robani Oil was going to clean the basement floor and suck out the sump. He said no because he didn't want to take on the large cost as the Carnival doesn't have a lot of money. He told me to have Eastmond do it. I called Ms. Martin back and told her the situation with Eastmond and Robani and told her that I would call MILRO, with her permission, and have them come and do the 3 line tests, clean the floor, suck the sump and ventilate the buidling. She said that was alright and to call them. I tried calling Paul Basso, but could only leave a message. Mr. Marvin Edwards (cell (404) 790-2592) called to ask what he should put in the response letter to DEC. I told him to give me a chronology of who performed

CHILDRENS ART CARNIVAL (Continued) **S107521874**

what service, what events happened, and how the tank failure was discovered and what actions were taken to resolve the matter. He said he would. He added that he is taking over some of the cleanup coordination responsibility from Ms. Martin as she has other work to do. He asked that I coordinate with him. I told him that I was trying to get MILRO to take over the cleanup. He said that would be fine. I made contact with Mr. Basso and told him what the DEC wanted MILRO to do: 3 line tests, ventilate building, clean floor, pump sump daily. He said that MILRO can do all of the work. I asked him when his crew could come out. Mr. Basso said at 1 PM tomorrow. I said that would be alright. I called up Ms. Martin and asked her whether 1PM tomorrow would be alright. She said yes. I then called up Mr. Edwards to let him know when MILRO will be there. He said that 1PM would be good. 1/26/06 - Raphael Ketani. I visited the site today at 12:30PM and met Ms. Martin and Mr. Ortiz. They said that MILRO had already been here at 11:30PM and pumped out the sump. Ms. Martin said that MILRO told her they would be over tomorrow to clean the floor. I looked at the front sump and saw only clear water. There still were odors in the building as the floor in the front basement needed washing, though it didn't look oily and smelled only very slightly when I got very close to it. The floor where the tank used to be didn't have cracks or oil stains. There were fans in the basement blowing the vapors out the back entrance. Fans were present on all floors and were blowing the air out the windows. The building was cool inside due to the open windows. Vapor concentrations were as follows: basement front/back: 3500ppb/520ppb first floor director's office/art room: 89/210 main floor: 162 third floor front/back: 200/290 fourth floor front/back: 218/194 1/27/06 - Raphael Ketani. I received a call from Ms. Martin. She said that MILRO tested the 3 lines and the return line failed. She said that they cleaned the floor today, too. Ms. Martin added that the odors are light today. 1/30/06 - Raphael Ketani. I spoke to Paul Basso today. He said that the fill line wasn't tested. I asked him to test this line, also. He said they vacuumed out oil from the front and middle sumps on friday and cleaned the floor. He said that they will be over tomorrow, 1/31, and test the fill line, vacuum again and clean the floor, if necessary. I told him this would be fine. I made a site visit 10:45AM. I met Jose Ortiz who let me check on the odors at each floor and the presence of oil in the sump. The vapor concentrations were: 2,000ppb in the front basement; 750ppb in the back basement; about 250ppb at each floor above the basement. Odors were light on the main floor, but the building is still cool due to a problem with the furnace and the windows are partially open. I met Mr. Pearson on site. He told me that he will replace the suction line and that the return line was not in service even before Robani was the Carnival's oil supplier. I told Mr. Ortiz and Ms. Martin that MILRO will come tomorrow to suck out the sump and do 4 soil borings in the front basement. I told them that there will be 2 borings where the tank used to be, 1 between the tank position and the sump, and 1 on the other side of the sump. They said they understood. I will try to be at the site to watch the soil sampling. Mr. Lindos Lindsay called and left a message that he is scheduled to meet with an environmental company tomorrow at 11AM to discuss what needs to be done and how to go about it. 1/31/06 - Raphael Ketani. I met Gordon of MILRO at the site just as he finished doing the fourth boring - about 11AM. All four borings had been done where I wanted them. Gordon told me that he had soil at each location and that the soil at boring #1 (between the sump and the wall) was the most

CHILDRENS ART CARNIVAL (Continued) **S107521874**

contaminated. He said that boring #4 at the west end of the former tank area was the cleanest. He said that he will submit the samples for analysis. Oil was still floating and accumulating in the sump. I asked Gordon to call Paul Basso and have a vacuum truck come over and suck out the sump. Gordon said that one will be here today and tomorrow. The crew from Robani Oil began their work right after Gordon was done. They will install 2 275 gal. tanks and replace all of the lines. The vapors in the building were slightly worse than yesterday. I talked to Jose Ortiz and Marvin regarding why the borings were taken and what will happen next. I told them to set up the fans again and to ventilate the building. At 3:30PM I spoke to Gordon of MILRO to find out the details of how the return line was tested. Gordon said that he capped off the line, pumped with a manual push-pull pump until he had 5 lbs. of vacuum and waited half an hour. He said he used soap solution to check all the valves and they were fine. He said the vacuum truck had been there about 1 hour after he left and pumped out a lot of oil. I told him to test the fill line. Gordon said that he believed the line was already removed. I told him that if this is true, then I wanted him to do a couple of borings outside the building next to the fill line tomorrow morning. He said he will do it. 2/1/06 - Raphael Ketani. I met Gordon at the Carnival. He did one boring (#5) next to the fill pipe. However, Robani had replaced the old fill pipe with a new one yesterday and had been sloppy by spilling a little oil onto the area when they pulled the pipe. The sample was sandy fill soil and had a slight odor. The PID reading was 500ppb, but Gordon had collected the sample in a plastic bag. This was sand that was used to backfill the upper end of the abandoned coal shute that is infront of the building. I went into the basement and checked the portion of the sand that had spilled into the coal shute. It didn't have an odor. Gordon said that they just sent off the oil samples that were collected. I told him to order the lab to do a fingerprint of the oil. In the basement, Robani had installed two 275 gal. tanks, a new fill line, a new vent pipe, and a plastic coated suction line. The suction line was cemented to the floor and covered with concrete where it met the landing of the stairs to the basement. All of the old lines were removed. The heat was back on and a hot water pipe almost over the back and another one against the opposite wall of the basement were leaking hot water. Part of the floor of the front basement was wet. Some of the wetness extended under the new tanks, but they are on feet above the floor. Red oil is in the front sump, but is transparent enough so that the bottom of the sump can easily be seen. I told Gordon to call Paul Basso and have him send a vac. truck over to pump out the sump. Vapors in the building were: basement: front 1000ppb/ middle 500ppb first floor: front 350ppb/ back 225ppb second (main) floor: 230ppb third floor: front 250ppb/ back 350ppb fourth floor: front and back 300ppb Paul from MILRO called at 3PM and said that he will send the samples to a DEC contract lab for fingerprinting and he will resample soil sample #5 and put it in a jar. 2/2/06 - Raphael Ketani. I received a call from Rick Bayer of Severn Trent Labs regarding the soil samples. He said he will send a copy of the report to MILRO and to DEC. 2/3/06 - Raphael Ketani. I FAXed a copy of the Standby Contractor Authorization Form to Paul Basso of MILRO. 2/6/06 - Raphael Ketani. I visited the site today. Vapors in the building were 3600ppb in the basement, 200ppb in the first floor art room, and 170 ppb in the main floor art work area. However, the heat was off as the plumbers were replacing a couple of hot water pipes. Oil was still in

CHILDRENS ART CARNIVAL (Continued) **S107521874**

the front sump, but it had turned thinner and brownish in color. Aside from this, Marvin Edwards of the Carnival pointed out black spots from 2 to 14 that had suddenly started to appear on the basement floor. Mr. Edwards said that he first noticed them today. There were about 12 spots and all except for a couple were in the front basement area. I touched some and oil came off onto my hand. The PID detected 6200ppb of vapors. I called MILRO to come over tomorrow to suck out the front sump and try to reduce the amount of oil seeping through the floor. Paul of MILRO said they would do it. 2/7/06 - Raphael Ketani. I tried to find out whether MILRO had pumped out the front sump, but could only leave a voice mail for Marlene Martin. I called up Paul at MILRO and he said his worker was there with the vacuum truck and pumped out 120 gals. of water. 2/8/06 - Raphael Ketani. I called up Mr. Wickham of NYCDOH ((212) 442-3372), but he wasn't in. I reached the receptionist and she said that all inspectors get their work assignments a week in advance and that Mr. Wickham already had a full schedule and could not make it to the CAC. She connected me with Mr. Wickham's supervisor, Inspector Stallbohm. Mr. Stallbohm said that someone was out at the CAC on 1/17 and still found unacceptable vapors. He would see what he can do to get someone to the CAC quickly. Mr. Stallbohm called back to say that an inspector went out to the CAC on 2/3 and determined that the vapors had decreased to safe levels for children. He said that Marvin Edwards of the CAC had signed the DOH report to this effect. He added that Mr. Edwards was told the children could come back and that an inspector will make a followup visit on about 2/17. I called up Marvin, but got Jose Ortiz. I told him that the NYCDOH had told me that the children could come back to the CAC. He said that everyone was aware of this, but the boiler broke again and so the children will be staying off-site for a while longer. 2/9/06 - Raphael Ketani. I made a site visit today. The heat was off again as they had many hot water pipe leaks. They are in the process of replacing much of their hot water piping. Oil was still in the top of the front sump, but you could easily see to the bottom of the sump and the oil appeared to be just a sheen. Vapor concentrations were: basement: 1400 to 1500 ppb first floor art room: 200 ppb main floor: 325 ppb third floor: back/front, 325/290 fourth floor: back/front, 380/400 Kira Leid-King, lawyer for the Church of Nazareth, called me yesteday to say that she had hired a title company to do a records search for the third tank. No physical investigations were taking place at the church. 2/14/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that the odors were very slight in the building. I told him I would like to send over a vacuum truck to suck out the oil in the front sump. He said that would be alright. He said that someone will be at the CAC today and tomorrow. I called MILRO and they said they will be over at the CAC on thursday morning. I let Mr. Edwards know and he said someone will be there. 2/16/06 - Raphael Ketani. I spoke to Ms. Martin. She said she knew that MILRO wasn't coming today, but would come tomorrow. I asked her about Robani Oil and how service has been over the years - whether they clean up whatever they release. She said they had no problem with them and that nothing has ever happened. I then asked her whether she had heat today. She said yes and that there was plenty of it since they repaired all of the water pipes. I asked her how the history of the boiler has been. She said that except for now and the pipes, she hasn't had a problem - though it's tempermental. I asked her whether in the past it ever leaked. She said not to her knowledge. I ended the conversation after

CHILDRENS ART CARNIVAL (Continued) **S107521874**

this. At 3:45PM I received a call from Bill Hunter, insurance adjuster for Utica Insurance ((516) 479-5089). He represents the insurance company for Robani Oil. He said he was trying to go over the information that Robani had given him regarding the oil release to see who had liability. He said the insurance claim number was 1016566. He said that the CAC first called Robani to complain of a loss on 1/6/06. He said Robani came to investigate and found oil 5 feet from the tank, but he said he wasn't sure whether that meant in the sump or on the floor. He asked whether the church was the source. I told him we didn't know yet, but we intend to do an investigation. 2/23/06 - Raphael Ketani. I spoke to Jose Ortiz regarding the conditions at the CAC. He said he did notice a slight odor on the main floor. I asked him to look at the front sump. He called me a little while later and said there was lots of oil in the sump. Then I called MILRO and told Paul of MILRO to send the vacuum truck. He said he would send it tomorrow, friday. Paul told me that DEC should be receiving the first bill soon for the work they have done so far. I let Mr. Ortiz know that MILRO will be over tomorrow. 2/27/06 - Raphael Ketani. I visited the CAC today. I met Mr. Edwards. He showed me the front basement area. The door is being kept closed now to confine the odors as much as possible. The room had 1500 ppb of vapors. A thin film of oil was present on the surface of the water in the sump with widely scattered small orange droplets of oil. The floor had lots of Speedi-Dri on it to absorb oil seeping up through the floor as oval stains. Mr. Edwards said that MILRO had been over last friday and had pumped out the sump. The air about the second sump had about 560 ppb vapors. There was a sheen on top of the water, but it did not smell like oil. In the art room on the first floor the vapors were about 500 ppb. The main floor and the third floor both had vapor concentrations of about 450 ppb. Mr. Edwards said that they just had a cleaning crew mop the floors. The air smelled of some kind of vapors of a cleaner. I told Mr. Edwards that I will have MILRO come over sometime this week to pump out the sump again. He said anytime is alright. I received the analytical reports for the 5 soil samples taken at the CAC some weeks ago. Four (4) samples were collected on 1/31/06 in the front basement near the front sump. One (1) sample was taken on 2/2/06 at the fill pipe where it passes below ground. Three (3) of the front basement samples and the fill pipe sample indicate the presence of only #2 oil. One (1) basement sample indicated the presence of #1 oil. However, this oil was also in the blank. 3/1/06 - Raphael Ketani. I spoke to Paul of MILRO today and asked him to vacuum out the front sump this week. He said his truck will be over tomorrow. 3/6/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that MILRO was over on friday and pumped out the sump. He said that odors were definitely noticeable in the front basement, but the door is kept closed. He added that the odors in the rest of the building are slight and that they had classes on saturday with no problems. 3/9/06 - Raphael Ketani. I received a call from Ms. Martin today. She said that some men in plain cars showed up at the church on teusday, 3/7, and began working in the courtyard. She said that they uncovered and opened a tank today. 3/10/06 - Raphael Ketani. I visited the CAC and the church courtyard today. I took pictures of the exposed tank and the sheen floating at the top of the water in the tank. The soil from above the tank didn't have an odor. Next, I visited the CAC. They had fans blowing in the basement. They were blowing from the front sump area to the open back door of the basement. Vapors in the front sump area were about 560 ppb,

CHILDRENS ART CARNIVAL (Continued) **S107521874**

vapors in the basement sink room where new oil stains showed up were 1100 ppb, the first floor was about 190 ppb, the main floor was 140 ppb, and the third floor was about 200 ppb. I will call MILRO to have the front sump pumped out again. 3/15/06 - Raphael Ketani. I talked to Jose Ortiz of the CAC. He said that MILRO was there on monday to pump out the front sump, but they had to wait for 10 or 15 minutes before they could get into the basement. Mr. Ortiz said that everything was pumped out and the odors are slight throughout the CAC. However, where the oil has been seeping through the floor in the basement sink room, the odors and the staining are getting worse. He said that no work is taking place at the church courtyard next door to investigate the tank and the oil. Kristina Lee (212) 883-7600, Chairman of the Health Committee of Community Board #9, called for an update. She said that she saw the exposed open tank in the church courtyard. I told her that the church brought a bunch of people to the site and they dug up and exposed the tank and then opened the tank. I told her DEC sent a letter ordering the church to continue the remediation by friday, 3/17, or the DEC will send in its own contractors. I told her the DEC will send a letter stating that we are taking over the investigation and cleanup if DEC hears or sees nothing happening. I added that we will get a court order to enter the property and then start the work. Ms. Lee said that the congregation meets every sunday at St. James Presbyterian Church. She added that on March 2, the NYC Dept. of Buildings fined the church $10,000 for not repairing the landmark building. SHE ASKED THAT A WELL BE PUT IN BETWEEN THE TANK AND THE NEIGHBOR'S GARDEN WALL AND ASKED THAT SHE BE KEPT INFORMED BY NEXT WEEK. I told her I would. 03/17/06-Thomas-Contract Payment Package-(Severn)- took samples-02/01/06-02/28/06 took sample of sump pit 01/01/06-01/31/06 03/17/06-Thomas_ Contract Payment Package-(Milro)- washed basement floor, took samples, removed pads, washed tank room, took borings, purge sumps (01/19/06-02/24/06). 3/20/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that the odors in the rest of the building are slight. However, the odors in the basement sink room are increasing and more oil staining is showing up in the floor. He said that the fans are ventilating the basement. I told him that I will call MILRO to have them suck up the water and oil from the middle and front sumps. I contacted MIRLO and they said they will be over at 9:30AM to pump out both sumps. 3/22/06 - Raphael Ketani. I FAXed the Standby Contractor Authorization Form to Severn Trent Labs (phone: (845) 562-0890; FAX: (845) 562-0841). 3/23/06 - Raphael Ketani. I received the bills from MILRO today for work done on 3/1 and 3/13/06. 03/24/06 Thomas- Contract Payment Package-(Milro)- vacuumed oil from sump pits, disposed of oil and water (03/03/06-03/13/06). 3/28/06 - Raphael Ketani. I sent a letter to Ms. Martin with the 3/24/06 remediation plan that MILRO had FAXed to me. I received a call from Bill Hunter of Utica Insurance, the insurance company for Robani Oil. This is the second time he called me for information. He wanted to know what the status was with the spill case. I explained to him what was going on at the church courtyard and what DEC wanted to do to eliminate the vapors and contaminated water under the CAC. 4/4/06 - Raphael Ketani. I received a call from Marlene Martin of the CAC on 4/3/06. She wanted to know what the total cost of the cleanup has been so far for the CAC. I told her a close estimate is $8710. She asked what the cost would be for the future/proposed work plan that I had sent her from MILRO. I told her I would find out. I called up Anthony at MILRO and he said he will try to get back to me with an

CHILDRENS ART CARNIVAL (Continued) **S107521874**

approximate price. 2:30 Anthony Mariano of MILRO FAXed me the rough estimate of what it may cost for all of the construction work that would take place to: break open the concrete floor and suck out the contaminated soil, water and oil, repair the floor, install 2 access wells in the floor, power wash the floor, and paint with two part expoxy paint. The total came to $36,642.95. I informed Ms. Martin about the estimated amount. 3:50PM I sent an e-mailed letter to Lisa Silversmith, the owner of the property on the other side of the CAC. I hadn't heard anything from her in response to the Department's 3/20/06 letter. So I sent her an e-mail to lisasilversmith@yahoo.com. The letter appears below: CONFIDENTIAL New York State Department of Environmental Conservation Division of Environmental Remediation, Region 2 Bureau of Spill Prevention and Response 47-40 21ST Street, Long Island City, NY 11101-5407 Phone: (718) 482-4933 " FAX: (718) 482-4098 Website: www.dec.state.ny.us April 4, 2006 Lisa Silversmith 60 Hamilton Terrace New York, NY 10031 RE: Spill #0511700 Childrens Art Carnival 62 Hamilton Terrace New York, NY Dear Ms. Silversmith: As of April 4, 2006, the New York State Department of Environmental Conservation (the Department) has not received a response to its March 20, 2006 letter regarding the property at 60 Hamilton Terrace (see attached below). It is important that the Department make an inspection to the basement of your property. We are aware that a spill had previously taken place at 60 Hamilton Terrace and was subsequently cleaned up and the case closed. The Department would like to determine that there are no impacts from the oil that is presently seeping into the Childrens Art Carnival next door. Temporary groundwater monitoring wells installed in the floor of your basement would help to collect any oil under your property. Please call me at (718) 482-4634 to make arrangements for the site inspection. Sincerely, Raphael Ketani Enigneering Geologist II 4/10/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that due to the rain last thursday, the odors in the sink room have gotten worse. However, he said, the odors in the rest of the basement are fine due to the ventilation and the odors in the building are slight. I told him that I would send over the vacuum truck to suck out more oil and water tomorrow. I told him to have someone at the CAC at 9AM so that MILRO can get in. He said he would do so. I asked him whether Ms. Martin was in. He said no. I called up Paul at MILRO and told him we would need his vac. truck at the CAC tomorrow. He said he would be there. 4/17/06 - Raphael Ketani. I spoke to Mr. Edwards. He said that the situation at the CAC is the same as last week with only slight odors in the occupied parts of the building and stronger odors in the basement. He said there was no flooding. I tried to contact Ms. Martin regarding MILRO's proposal, but could only leave a voice mail message. 4/24/06 - Raphael Ketani. I spoke to Mr. Edwards. He said that there are no changes at the CAC. He said the odors are the same - even in the basement. He said that there was no flooding from the 3 of rain over the weekend. However, the oil staining is slightly more in the basement. 5/15/06 - Raphael Ketani. I received the bills from MILRO for the work done on 3/21/06 and 4/11/06. I signed them and forewarded them for processing. 5/17/06 - Raphael Ketani. I spoke to Mr. Edwards today. He said the odors in the building were still only slight. He said the rains over the past weekend and week haven't caused any recurrence of oil seepage. He said the basement was fine. This case is being transfered today from myself to Jeff Vought in order to consolidate all of the PINS cases under one Spills case manager. 06/06/06-Vought-Received

CHILDRENS ART CARNIVAL (Continued) **S107521874**

call from Marlene Martin requesting information on possibility of state funding for tank replacement. Marlene also said that basement flooded during past weekends with heavy rains and no free product was noted. 06/06/06-Vought-Complete File Review by Vought: See also spill numbers: 0209311(60 Hamilton Terrace-closed 12/22/05), 0551505(72 Hamilton Terrace-open). Sale of 72 Hamilton Terrace by City of New York to Nazareth Spiritual Church and resulting Deed transfer-4/20/72. Site visit on 1/11/05 by DEC Vought-DEC required: 1)tank testing results 2)notification to NYCDOH 3)installation of ventilation system in basement 4)sealing of sump and washing of basement floor. Vought left message with NYCDOH Nieves, spoke to Mike Hughes(NYSDOH) and decision to close is the call of Marlene Martin. Oil was first noted on 1/3/06 and basement filled with water during times of heavy rains. Three sumps present in basement of Childrens Art Carnival(CAC). Sump closed to Hamilton Terrace contained fresh #2 fuel oil. As per Marlene Martin, she contacted 60 Hamilton Terrace to see if they had spill and no spill was found in the basement and she contacted the Church who noted an oil spill next door at 72 Hamilton Terrace. Email from NYSDOH Hughes to NYCDOH Peter Stallbohm with cc to NYCDOH Nieves- How did you inspectors make out at the 64 Hamilton Terrace spill? . Email from NYSDOH Hughes to NYCDOH Stallbohlm and DEC Vought-1/18/06. ...any updates about the Childrens Center in Manhattan? Have they re-opened, cleanup status? . Response from Stalbohlm At 64 Hamilton Terrace, readings of 4-5ppm of VOC was detected. A contractor was contracted to conduct a cleanup yesterday. The center voluntarily closed until so. After cleanup, another visit will be made to check effectiveness of cleanup (possibly today). Email from NYSDOH Hughes to DEC Vought-1/19/06. Peter Stallbohlm, NYCity Health, sent an inspector back to the Children's Center on Tuesday, 1/17. The inspector reported odors are still present... Fuel product still present in basement. The center is still closed and NYCity Health recommends staying closed until the additional clean-up is performed. Would you be able to also make a site visit and recommend some specific actions as well? . Letter from DEC Ketani to Kira-Leid King (Nazareth Deliverance Church NDC)-1/19/06. The New York State Department of Environmental Conservation (the Department) was notified on January 10, 2006 that a petroleum release took place at the above referenced site. Odors were noticed coming from the basement of the church during an inspection of the area on January 11, 2006. Staff from the Department were at the site on January 14, 2006 to observe the removal of No. 2 fuel oil by Northeast Environmental from Nazareth Deliverance Church . (6/6/06-Note that I, jeff Vought was onsite and liquid was recovered from basement when I arrived on-site, I did not observe oil in the basement as the liquid was already recovered). The Department has identified the Nazareth Deliverance Church as a potential responsible party for this release . Letter required submission of an investigative summary report including the investigation of a possible third tank under the church courtyard. The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness . If no reply regarding the investigation is received from the Nazareth Deliverance Church within (5) days of receipt of this letter the Department may proceed with the required work... . Letter from DEC Ketani to CAC Martin-1/19/06. The Department has identified the Childrens Art Carnival as a potentially responsible party for this release . Notification that the Departrment has contracted Milro and will invesigate the source of oil. Upon one of the inspections of the

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Childrens Art Carnival, staff from the Department noticed a three foot long piece of suction line at the foot of the stairs of the basement. The Department requires that the Childrens Art Carnival immediately conduct a site investigation to determine why the line was replaced, whether there was a release of product and how large the release was, when the suction line was replaced and which company did the replacement work. The Childrens Art Carnival must also hire a contractor to have the suction line and return line (the two 3/4 inch copper lines) pressure tested . Letter from DEC Ketani to CAC Martin-1/23/06. ...the Department was notified on January 20, 2006 that a tank system test was conducted by AL Eastmond & Son, Inc. on this date and that a leak was detected in the tank and vent line. At this time, the Department is ordering the Childrens Art Carnival to repair or replace the tank and the vent pipe, and to hire a contractor to investigate the oil spill and remove all contaminated concrete flooring, soil and rock and all product and contaminated water . Letter from Marlene Martin (CAC) to DEC Ketani-1/27/06. To date we have cooperated with the Department of Environmental Conservation on all requests, recommendations and mandates. Enclosed, please find the job tickets for work performed by Eastmond and Sons, Inc. as per your Department's madates and directives. It is our hope that a resolve can be reached as soon as possible and or that the Carnival can be eliminated as the potential source of this release... Enclosed as Eastmonds & Sons job tickets: 1)1/11/06- Removed 50 bags of contamianted soil washed floor, 1 bucket of oil wash, removed 102 gallons of water, pressure washed floor 2)1/18/06- pump out oil and water from floor also wash down used 1x5 gallon can oil wash 3)1/20/06- Test tank, tank failed, wet leak 4)1/23/06- transfer oil to 275. Remove jacket and remove 30 bags of contaminated soil. Job completed 5)1/24/06- Install 275-gallon temporary . Contractor Work Authorization Form for Milro-2/2/06. Email from Landmarks Preservation Comission(LPC 212-669-7921)-John Weiss to DEC Ketani-02/10/06. Under the circumstances you described to me, no permit from the Landmarks Preservation Comission is needed for the NYSDEC contractor to break up the concrete paving in the courtyard next to 72 Hamilton Terrace in order to undertake and emergency remediation project . Because this work is being undertaken to remedy a dangerous condition, pursuant to section 25-312 of the NYC Administrative Code, no LPC permit is needed. No work is to be performed on 72 Hamilton Terrace . Fax from Kira-Leid King(NDC) to DEC Ketani-2/11/06. As discussed, attached please find a search from the fire department indicating that there are only two tanks located at the above-referenced premises. Therefore, there isn't another tank located in the court yard . The Church had a fire four years ago causing the building to be inhabitable . Letter from DEC Ketani to Leid-King (NDC)-2/10/06. ...the Department has not been notified by Lindsay Lindos or other representatives from the Nazareth Deliverance Spiritual Church, that the church will hire a company to conduct a site investigation to determine whether a fuel oil tank is present under the church courtyard. Deadline of 2/18/06 given to investigate the court yard. Email from LPC Weiss to DEC Ketani-2/22/06. I am writing in response to our recent telephone conversation regarding the possibility that the historic wrought iron fence in front of the side yard at 72 Hamilton Terrace may have to be removed in an oil tank has to be removed. Suggestion to take the tank out in pieces to save the fence. If fence has to be removed it also has to be replaced. Letter from DEC Ketani to Lindos Lindsay(NDC) and Kira

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Leid-King(NDC)-3/10/06. Site visit made by Department on 2/10/06. ...a third fuel tank was observed to be present beneath the courtyard behind the Nazareth Deliverance Church. Department required NDC to perform a soil boring between the foundation wall of the Childrens Art Carnival at 62 Hamilton Terrace and the tank, and taking soil and groundwater samples. Another boring must be installed between the tank and the church. Deadline given for nine days within date of letter (2/19/06) to respond to DEC and resume investigation of tank and soil. STL Analyticals-2/10/06. Sample from CAC sump pit ran for fuel id analysis and showed 920000ppb #2 fuel oil. Fuel oil sampled by Milro. STL Analyticals-2/17/06. Sample from CAC outside by fill #5 @1'. Sample analysis performed for TPH310.3 shows oil parameters below method detection limits. STL Analyticals-2/17/05. Four sample from CAC front basement area near sump. . Sample analysis performed for TPH310.3. Soil analyticals show all below method detection limit except for 7400ppm #2 fuel oil(SB#2 @ 1'), 110ppm #2 fuel oil(SB#3 @1'). Letter from DEC Ketani to NDC Lindsay and NDC Leid-King-3/20/06. On March 20, 2006 the New York State Department of Environmental Conservation (the Department) made a site visit to the above listed property. No work appeared to have taken place to investigate the tank or the surrounding soil since the last site visit that took place on March 10, 2006 . Letter requiring investigation. Due date of 4/5/06 for the work to resume. Letter from DEC Ketani to Lisa Silversmith-03/20/06. We would like to install two(2) wells in the groundwater beneath the basement of your home. These wells will be constructed and sampled by out contractor. Contractor Work Authorization for STL-3/21/06. Fax from Milro to DEC Ketani-3/24/06. Milro proposes the following scope of work to address the oil spill cleanup: 1)Saw cutting of concrete slab in the basement and excavation of contaminated soil 2)disposal at a licensed disposal facility 3)recover of product using a vaccum truck if contaminated groundwater is encountered 4)collection of endpoint samples from excavation 5)restoration of the concrete slab 6)pressure washing of basement and epoxy application. Letter from DEC Ketani to CAC Martin-3/28/06. ...(the Department) is presently looking into other methods of controlling and preventing the petroleum vapors from entering Childrens Art Carnival . Milo remediation plan has been enclosed for Martin's review. Cost Estimate (Milro-Moriano)-4/4/02. Cost estimate for basement excavation and replacement. Site visit by DEC Vought during endpoint sampling of tank in couryard-5/11/06. Sampling performed by USA Environmental (Cristin Ciaburri 718-981-5710). Onsite was Keith Bartley(USA). Pumped out wate from 550-gallon UST in courtyard. No product in UST, just sheen and water. Three soil samples were collected (one through bottom of tank, one below fill line and one below supply/return line). No odors or staining observed in all of the soil samples. Site visit performed to CAC and no odors in basement and no free product in sump. Some oil staining showing up on floor from underlying groundwater. One sample also collected for analyiss from NDC basement floor. Vought spoke to USA Ciaburri and DEC will receive report by 6/12/06. DEC tentative requirements: 60 HAMILTON TERRACE: 1)followup to see if any recent spills 72 HAMILTON TERRACE 1)results of basement borings by 275-gallon ASTs 2)submittal of documentation of 1/14/06 clean up by Northeast 3)notification to Bishop France of requirements 4)backfilling of UST excavation in courtyard 5) The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness as per 1/19/06 letter 6)backfilling of NDC excavation

CHILDRENS ART CARNIVAL (Continued) **S107521874**

to prevent continued groundwater infiltration into CAC 62 HAMILTON TERRACE: 1)continued monitoring of sump 2)call back to Martin regarding possibility of use of Spill funds for AST replacement and likelihood of NYSOAG cost recovery against Art Carnival 2)submission of tank test results from Eastmond and Sons of AST in CAC as per requirement on 1/19/06 letter 4)borings at tank location for 8260/8270 5)Milro boring logs and site plan from 2/17/06 analyticals 6)implemenation of Randy's workplan(installation of monitoring wells at CAC and basement excavation) from Milro 7)sealing of basement floor 8)borings by UST, sump and and fill port 9)Summary of description of cleanup activities by AL Eastmond including source of 30 bags of soil removed during tank removal and description of removed tank. 06/15/06-Vought-Spoke with Marlene Martin who inquired about status of spill. Martin stated that there were no odors in the school to date. Vought drafted letter with above requirements to both parties and cc'd Northeast, Marlene Martin (Art Carnival), Cristine Brooks Lee(Comm Bd 9), Martin Smith(Councilman Robert Jackson), LPC and USA, Eastmond. DEC Vought to call Milro regarding: 1)boring logs and site plan for borings on 2/17/06 and installation of new borings in floor or school. DEC Vought to call Martin regaring: 1)non use of Spill Funds for AST replacement as per NYSOAG Buss 2)further soil and groundwater investigation by the DEC. 06/19/06-Vought-Called Martin(212-234-4093), faxed her copy of requirement letter and letter to NDC and left message informing her her that there was no way for Spill Fund to pay for CAC tank replacement and to dicuss letter sent on 6/15/06. Vought called Lindos Lindsay (347-228-8039) for fax number and to inform him of outstanding requirements. Vought faxed him copy of requirement letter to 72 and 62 Hamilton Terrace. Lindsay requested that letter be transmitted via mail only and be sent to: Lindos Lindsay 163 Myrtle Avenue Brooklyn, NY 11201 Vought sent letter to above address. Vought called Christine Lee (Comm. Bd. 9 212-883-7600) and she requested correspondence via mail only. Vought sent info to: Christina Lee 48 Hamilton Terrace New York, NY 10031. Vought called and spoke to Martin Smith (ph 212-234-0551 fax 212-234-0552) for fax number and to explain requirements. Vought faxed Smith copy of requirement letters for 60, 62 and 72 Hamilton Terrace. Vought called John Weiss (Landmarks Preservation 212-669-7921) for fax number and to explain requirements. Vought left message to return call. Vought called and left message with Christin Ciaburri (USA 718-951-5710) for fax number and to explain requirements. Vought called Renee Lewis (AL Eastmond 718-378-3000 fax 718-378-4560) and he was not in office. Vought faxed him copy of letters to 62 and 72 Hamilton Terrace. Vought called Bob Rafferty(NYSDOH 518-402-7800 fax 518-402-7819) for fax number and to explain requirements. Vought faxed Rafferty copy of requirements. Vought faxed NYCDOH Nieves copy of requirements for 60, 62 and 72 Hamilton Terrace. Vought called Dwayne Monaco(Northeast 914-777-1930 fax 914-777-1928) for fax number and to explain requirements. Vought faxed Monaco copy of requirements. Vought received call from Monaco and returned call and spoke to Monaco and no analyticals were performed and Monaco will send in pictures. Monaco did say his men saw oil on the floor. Monaco will submit report and pictures to DEC. 06/27/06-Vought-Received call from Marvin Edwards (212-234-4093) requesting letter with amount spent to date on PIN (8713.53 as per UIS). Vought returned call and left messge explaining that DEC will not provide the letter as amount may increase and Vought willing to call insurance directly. 06/28/06-Vought-Received call from Marvin

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Edwards and they filed claim with general liability insurance. Their claim representative asked for further costs. Claim may file under third party liability portion of coverage. Marvin will contact insurance and arrange conference call with DEC. 07/12/06-Vought-Received message from Martin and returned call and spoke to Martin. Martin will be faxing in tightness test results and approved installation of additional borings. Martin will seal the basement floor upon no occurrence of product in the sump during monitoring period. 4/23/07-Vought-Reviewed above notes and both CAC and 72 Hamilton Ave are potential sources, CAC due to failed tank test and 72 Hamilton due to presence of oil spill during cleanup by Northeast Environmental. Both parties listed as potentially responsible and site visit scheduled with Martin for this week to confirm no further impact and close spill. Vought called Martin. Martin had not seen oil in recent months and site visit scheduled tomorrow at 10am. Vought also reviewed documentation and photos submitted by Northast dated 6/27/06. On January 14th, 2006 Northeast mobilized a crew and equipment to 72 Hamilton Terrace were technicians conducted a clean up of #2 fuel oil from the tank and boiler room of the building . Absorbent material was applied to the boiler room floor where puddles of standing fuel oil was observed... . No tank test results for 72 Hamilton included. Vought also received copy of failing test results for CAC which show Ullage (dry portion leak) from Eastmond and Sons dated 1/20/06. 4/24/07-Vought-Site visit by Vought and Marlene Martin not present at site due to emergency. Vought performed site visit with super and no product or olfactory odor of groundwater noted in sump, no staining noted in concrete at former tank location or fill location, product stains noted on floor towards 72 Hamilton but as per super they were present for long time. No product in other sumps of CAC. Vought discussed with DEC Austin including possible groundwater sample at 72 Hamilton Avenue and investigation whether a former spill occurred at Daycare center by mechanics. 72 Hamilton Avenue boarded with no signs of development. Tank in courtyard excavation was backfilled. 07/25/08-Vought-Spill reassigned from DEC Vought to DEC Ketani as per DEC Austin. 8/21/08 - Raphael Ketani. I called up Paul Basso of MILRO Associates (516) 379-1500. I asked him to send DEC a copy of the report from about 1/27/06 whereby the return line for the fuel system at the CAC was tested and it failed. He said he will look for it. I called up the CAC and asked for Ms. Martin (212) 234-4093, but the receptionist told me that she wont be back until September. I asked for Marvin Edwards, but she told me that he didn't work here anymore. I was transfered to Fatima Faloye, the Operations Manager. I asked Ms. Faloye whether I could make an inspection at 11:30AM tomorrow. She said that would be alright. 8/22/08 - Raphael Ketani. I made the scheduled site visit. The church next door was completely boarded up. It appeared that no work had taken place, since early 2006 when I first visited the site, to restore the church. There were no petroleum odors coming from the basement vent. I put the PID meter as close as I could to a basement vent near the side entrance gate, but didn't detect anything. The area where the 550 gallon tank was buried had been filled in and was overgrown with weeds. I met Ms. Faloye and she took me to the basement. There were no signs of free product on the floor. There were no oil stains. There were no oil odors. The PID meter registered 0 ppb of vapors. The front sump had only water. I thanked Ms. Faloye for the opportunity to visit the site and left. 8/25/08 - Raphael Ketani. The Final ISR was written for the case and

CHILDRENS ART CARNIVAL (Continued) **S107521874**

submitted to Randall Austin, Chief of the Spill Prevention and Response Unit, for his signature. I talked to Dwayne Monaco of Northeast Environmental (914) 777-1930 regarding the submission of an investigation report for the church. He said that they did only a cleanup of the basement and some oil collection. He said that no report was generated. 9/2/08 - Raphael Ketani. Today I received a FAX from Paul Basso of MILRO. The attached page was a simple form stating that the return line did not hold, but that the supply line was O.K. The date of the test was 1/27/06. Additionally, the last time that oil was collected from the CAC was on 4/11/06. This also appears to be the last time any cleanup took place. 9/4/08 - Raphael Ketani. The FSIR was signed by Randall Austin, Chief of the Spills Unit, and Lou Oliva, Chief Counsel Region 2, and sent to Dennis Farrar in DER, Albany. As there was no oil contamination, nor oil vapors at the site during my visit on 8/22/08, and as the DEC does not intend to do further investigatory work, nor sees the need for further remediation work at the site, I am closing the spill case. "

Remarks: "Material is coming into the basement of the Childrens Art Carnival and is originating from the church next door. The Art Carnival's oil company came and used a powder to control the odor but no clean up has been done. They need DEC's help. Groundwater was affected.... material is mixed with the water from the natural spring there. Unsure of what else they can do for a clean up."

DEC Memo:	"1/10/06 -Austin - Also received complaint from: Cristina Lee, Chairman of Health Committee of Community Board #9 212-883-7600; 212-864-6200 contact her for further background info, as well as Ortiz - end Carnival e-mails: mamudd1@aol.com or mamartin@childrensartcarnival.org FAX: (212) 234-4011 1/11/06 - Raphael Ketani. I tried contacting Mr. Ortiz ((212) 234-4093), but a man answering the phone said he would not be in until 10:30AM. The man said that the church had a fire 2 years ago and hasn't rebuilt or reopened. He passed the phone to a woman who said that they have been trying to find out more information about the oil leaking from the church and she gave me the phone number of Cistine Grit (212) 234-0484. I called the number, but no one picked up. I then called (212) 883-7600 - the law office of Cristina Brooks Lee - but could only leave a message. I called (212) 864-6200 - the Community Board #9 phone 10AM to 5PM - and got a man on the line. He said that I should call Martin Smith (not available until 11AM) at (212) 928-1322, who is the representative of Councilman Robert Jackson. I will make a site visit at 10:45AM today. I made a site visit at 11:15AM. I met Dionis Ortiz, Program Manager, Jose Ortiz, his assistant, and Marlene Martin, executive director of the Children's Art Carnival. I went to the basement and looked at the oil tank, the fill and vent lines, and the boiler. There were no signs of spillage. However, I did see many cracks in the basement floor that looked wet. Mr. Ortiz said that there is a spring below the building and that the water seeps into the floor. The basement has 3 sumps. The front one is next to the front basement wall, the middle one is 16 feet away, and the third one is about 25 feet behind the second one. The second

CHILDRENS ART CARNIVAL (Continued) **S107521874**

and third sumps had only clear water at the level of the floor. The front one had red oil floating on top. There were signs of oil spillage on the basement floor next to the sump. Mr. Ortiz said that when it rained heavily a little while ago, the water level rose and pushed out the oil onto the floor. He said that an oil odor was noticed to be coming from the basement on 1/3/06. He said that Robani Oil was called and they put down some oil absorbent material. I spoke to Robert Pearson of Robani Oil (212) 687-8699, Colonial Park Station, P.O. Box 188, NY, 10039, and he said he didn't think the oil was coming from the property, but he didn't do any system tightness testing. He said that the customer would have to order it and pay for the testing. The PID readings were as follows: over the sump: 11.8ppm breathing area front basement: 4.4ppm breathing area at second sump: 1.4ppm first floor hallway: 1.3ppm children's work room first floor: 570ppb main floor (second floor): 600ppb (light odor) third floor art work room: 650ppb third floor copier room: 750ppb fourth floor front and back: 750ppb Mr. Ortiz told me that the church next door burned two years ago and has never been repaired. He said there is a man (David - later called Patrick) living across the street who is affiliated with the church. Mr. Ortiz knocked on the window, but no one seemed to be home. He said that David told him that the church uses gas and that Con Ed had shut off the gas. Mr. Ortiz said that, after the fire, someone entered the church basement and saw an oil spill. I spoke to Ms. Martin and she said that she didn't have any other church contacts other than Cistine Grit (a.k.a. Ingrid). She called Ms. Grit's number, but didn't get an answer. I looked at the outside of the church. The schedule display panel has Nazareth Deliverance Spiritual Church, Inc., Archbishop C. Clark. The name over the 72 Hamilton Terrace entrance is Church of Nazareth. The church is boarded up and the roof looks to be in bad shape. There were oily odors emanating from a small basement window near the basement door of the church. It is unclear if there is an oil spill in the basement of the church. I called Randall Austin, Chief Spills Engineer Region 2, with the information. He sent Jeff Vought, E.G. 1, over to look at the situation. Mr. Vought arrived at 1:30PM and looked over the situation. He noted 3 suction lines at the foot of the basement stairs. One line was only 3 feet long as it had been cut. No one at the Carnival knew when this happened or if a previous oil spill took place. Though Mr. Ortiz told me that the Carnival has been in the building for 36 years. I saw a short stream of red oil between one of the fuel lines and the wall next to the stairs. A conference call took place between Ms. Martin, Mr. Vought, and Michael Hughes of NYS DOH. Mr. Hughes said that the building should be ventilated and the basement door sealed. Ms. Martin said that she told all the parents about the odors and that all of the parents decided to have their children stay in class. Later, at between 3PM and 4PM, Martin Smith of Councilman Robert Jackson's office and Claudius Wickham of NYCDOH showed up. We went with them and Bruce Tilley of the Neighborhood Organization to the home of Diana Laird and David Zapol at 418 W.144 Street. This is the home which shares a common wall with the church. PID readings in the kitchen were 940ppb. Readings in the corner of the basement where paint and wall finishing material were reached 1300 to 1600ppb. A dirt hole in the basement floor had 2500ppb readings. The front part of the home's basement had 500ppb. Next, Mr. Smith and Mr. Wickham went with us to the Carnival's basement. They both looked at the situation with the oil in the front sump and noted the odors. Then Mr. Wickham measured the

CHILDRENS ART CARNIVAL (Continued) **S107521874**

air in the art work room on the first floor. He noted about 650ppb readings. He said that the odors weren't dangerous, but just a nusiance. He said to ventilate the building. 1/12/06 - Raphael Ketani. I made a followup visit at 3:10PM. Eastmond had finished their cleanup work. The front sump had been vacuumed and the floor had been cleaned. Fans were blowing the air around in the basement. Ms. Martin said that Eastmond didn't arrive until this morning as, otherwise, there would have been high overtime charges to do the work yesterday at night. Eastmond told her that the oil tank will be picked up off of the floor or else the dampness will corrode the bottom and the tank will leak. The odors were not as bad as yesterday. The tank room had about 3ppm, the director's office about 750ppb, and the children's work area on the main floor was about 300ppb - there were no odors on the main floor. However, the oil reappeared in the front sump. Ms. Martin told me that she had made contact with someone from the Church of Nazareth and that this person will let people in saturday morning (1/14). Ms. Martin said that she will let me know what time the church will be opened up. She also said that her company is not going to spend any more money on removing the oil in the sump until DEC finds out whether the oil is coming from somewhere else or from the Carnival. I informed Randall Austin, Chief Spills Engineer Region 2, and Jeff Vought, E.G. 1 Spills, about this and about the return of the oil in the sump and about the levels of the odors today. 1/13/06 - Raphael Ketani. I spoke to Ms. Martin. She said that there are no odors on the main floor. I asked whether she made contact with anyone from the church. She said no one called her and she couldn't get ahold of anyone. I asked whether the front sump was covered. She said it wasn't. I told her to have someone cover it with plastic bags and then use tape to seal the bags to the sump clay pipe. She said she would have someone do it. 1/17/06 - Raphael Ketani. Ms. Martin called me today. She said that the basement had flooded over the weekend because the sump pump didn't work. She said she had water and oil all over the floor. Also, she said that the oil guage on the oil tank is in the red zone. I asked her when was the last time she had a delivery. She said that it was some time ago and no one really keeps track of the level of oil in the tank. She said she called Robani Oil to get a delivery. However, the odors are bad again in the building. I told her to set up the fans. She said there are problems with the electricity in the basement and the fans aren't running. I also told her that Northeast Environmental ((914) 777-1930) showed up at the church on saturday, 1/14/06, and found oil all over the basement. I told her to call them and get them to clean up the oil in her basement. I told her that if they wont do it, then to call Eastmond again and have them clean up the oil as the odors are bad. Jeff Vought, the off hours spill responder for the weekend, came in and gave me the following notes. He said that Northeast Environmental arrived on site at 11:30AM on saturday 1/14. Oil was all over the floor of the Childrens Art Carnival. Northeast collected the oil and water on the basement floor and pumped out the front sump. Northeast then went to the Church of Nazareth and recovered 120 gals. of #2 fuel from the two 275 gallon tanks in their basement. They did 2 borings, one next to the two 275 gal. tanks (ASTs) and one some feet to the west. They end at bedrock and are only 18 deep. Mr. Vought had them leave the borings open. There is a fuel filter in a concrete casing in the floor. From there, a line runs to the boiler. Mr. Vought suggested to me that they either do 2 wells in the corner of the wrought iron fence next to the

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Carnival or an oil recovery pit. The contact at Northeast is Dwayne Monaco (914) 777-1930 or (914) 403-5525 cell. I spoke to Mr. Monaco and he said that he was hired by the church and has no plans to pump out more oil from the Carnival. His techinician noticed a second vent line and a remote fill at the back of the church. He believes that there may be a third tank under the courtyard. I contacted Ingrid at (212) 234-0485, the Church of Nazareth - Archbishop Maxton France (cell (917) 642-8913). She said this was the Archbishop's number and that I can send a letter to 72 Hamilton Terrace, NY 10031. She said they didn't have plans to do anything more regarding the cleanup. I visited the site at 2:50PM. Oil vapors were still noticeable from the church. I entered the Carnival and sensed strong odors on the main floor. There were no activities or children at the day care center. I went to the basement and there was 3 of water there. However, I could not see a sheen. Ms. Martin said that Eastmond could not come and pump out the water as they didn't have a truck available. She said that they will come at 9AM on 1/18. The vapors in the buidling are as follows: basement=10.1ppm first floor art room=2250ppb executive director's office=3400ppb hallway at first floor=6600ppb main floor=2300ppb third floor art room=3000ppb third floor front room=4600 third floor landing=7100ppb fourth floor art room=5600ppb fourth floor front room=4600ppb fourth floor landing=7100ppb I met Mr. Pearson of Robani Oil at the site. He said he wasn't going to deliver oil until the oil spill at the church was cleaned up and not until it was determined that the Carnival's system wasn't leaking. Ms. Martin said that someone from the NYCDOH was supposed to show up to test the air, but I stayed until 3:35PM and he arrived. Ms. Martin said that they were out of oil and so the heat was off. 1/18/06 - Raphael Ketani. I tried to call the Carnival to find out how the water/oil removal in the basement went at 9AM (contractor was Eastmond), but no one answered the phone. Later, I got ahold of Ms. Martin via her cell phone (917) 805-3154. She told me that Eastmond had been at the Carnival at 9AM and had pumped out the basement. She said that the school is still closed. I called up MILRO (516) 379-1500 (FAX (516) 379-4596) and spoke to Paul Basso. I told him that we needed Milro to set up ventilation for the school and pump out the basement. We decided to meet at 10:30AM tomorrow. Kira Leid-King (home(914) 632-0665; cell (914) 879-8126; work FAX (212) 455-2502) called me to explain that the oil wasn't spilled on the floor of the church's basement. However, I told her that Northeast Environmental had been to the church on 1/14/06 and had pumped out 120 gals. from the two 275 gallon tanks. She said that the church hadn't had a delivery in 3 years and that the Fire Dept. had ordered the church to pump out the oil after the fire. She said the tanks never had oil in them. I told her that there was a second vent pipe and a second fill port. I added that there is a gauge for a 550 gal. tank on the wall of the church's basement. I told her that DEC suspects there is a third tank under the courtyard. She said that she had no idea. Finally, I told her that the state would be hiring a contractor to investigate the church's oil spill and tank situation. She said that it's the Carnival's fault, not the church. I asked her what her relationship was to the church. She said that she is sort of the secretary-treasurer and paid for Northeast to do the oil vacuuming. 1/19/06 - Raphael Ketani. A site visit was made by Randall Austin, Chief Spills Engineer Region 2, and myself to monitor the work of MILRO Assocs. Inc. We met Gordon Sandtorv, Operations Supervisor from MILRO, on site. MILRO was already cleaning the floor

CHILDRENS ART CARNIVAL (Continued) **S107521874**

in the basement of the Carnival. Vapors in the basement were about 3000ppb. However, the floor looked very clean. Red oil was again on top of the water in the front sump. Water was seeping through the north wall (opposite the oil tank) of the basement. It didn't have any odor or feel oily. I found out that Robani Oil had delivered 100 gals. and the heat was back on. Patrick Peters (phone (212) 690-0630; son of Archbishop Carlyle Clark) showed up at the Carnival. We asked him to let us into the church basement and he did. We saw the two 275 gals. tanks and one vent line that extended from the second tank. A filter apparatus was in the floor for the oil. The suction line ran through the floor and came up 8 feet away at the furnace. There was a light smell of oil, but no oil was visible on the floor. A gauge was mounted onto the wall above the first tank. Gordon said that it was a petrometer for a third tank. vapor concentrations for 1/19: basement: about 3000ppb directors office: 425ppb first floor art room: initially 1000ppb, then 400ppb main floor: 350ppb third floor: 700ppb back room/ 600ppb front room fourth floor: 400ppb back room/ 1000ppb front room Mr. Austin talked to Mr. Sandtorv and told him that if the Carnival doesn't test the suction line and the return line, then MILRO will have to do it. He added that he wanted MILRO to construct some kind of low flow sump and collection system with an oil/water separator to collect the water and pump it to the city sewer. Then we left. 1/20/06 - Raphael Ketani. I called up Paul Basso and asked him what MILRO was doing to install a sump and oil/water separator. He said that he thought this idea was tentative and that DEC wasn't so sure this is what they wanted. So he hadn't looked into investigating a possible system. I told him DEC DOES want a slow pump system to hold down the water level and collect the oil. I told him that it needs to be installed immediately. He said that such a system that will work with the sump that exists is tricky to find, but he will investigate a possible one now. Paul added that oil samples were sent to Severn Trent today. He said there is a 2 week turnaround. I also told him to put down lots of absorbent pads on the floor around the front sump because rain is expected over the weekend. He said he will have someone do this. I called up Ms. Martin and asked her how things were. She said that the odors were low due to the fans that were going all night and that the basement was free of oil. She said that she will get someone to the Carnival soon to do an entire tank system tightness test. Ms. Martin called me at about 3:15PM today and said that Eastmond had done a system test. They found that the tank leaked pressure and the vent pipe had a wet failure. Otherwise, Eastmond said, the suction, return and fill lines were alright. I told Ms. Martin that the next step was to have the tank cleaned out, removed, and a temporary tank installed. She said she would do that. I told her to have Eastmond put absorbent pads around the front sump to absorb oil when the water level rises again and to hire a company to either dig up the contaminated soil below the basement or to start with soil borings to find the extent of the oil pool. I gave her a list of digging and investigative companies with no recommendation. She said she would pick a company to start work. 1/23/06 - Raphael Ketani. I spoke to Paul of MILRO today and told him to hold off doing more work at the site. He said that his crew had been there this morning and pumped out more oil. I told him that was fine, but to stop work for now. He said he would. I then spoke to Ms. Martin. She said that Eastmond was on site and they were cutting up the tank. She said that MILRO had been on site and had pumped out more oil. Ms. Martin asked for a letter ordering the Carnival to do the tank

CHILDRENS ART CARNIVAL (Continued) **S107521874**

removal and break up the floor of the basement to remove the contaminated soil and water. I told her I would send it. 1/25/06 - Raphael Ketani. I spoke with Marlene by cell phone. She said that this was the best way to reach her now because of the tank removal yesterday. She said that when Eastmond removed the oil, cut up the old tank, and welded the new tank, the vapors were so strong that they chased everyone out of the building. She said that everyone is now working from their respective homes. She said that she thinks the Carnival has found a temporary place to hold their saturday workshops. Ms. Martin said that a temporary tank has been set up in the backyard and Robani is supposed to get things running to provide heat. I told her to open all of the windows again to get more vapors out. She said she will do this and that she will call Eastmond to see what they plan to do and when. I called Eastmond and spoke to Isaac Mungra. He said that his crew removed the tank and saw holes on the opposite side which were 15 inches above the floor. He said that it did not appear that oil leaked onto the floor from the tank or anywhere (according to Rene from his crew who was there). Mr. Mungra said that he didn't feel it was necessary to break up the floor to see whether oil was underneath. I asked him whether Eastmond was going to wash the floor and pump the sump. He said no because he didn't want to take on the large cost. I asked whether Eastmond tested the suction, return, and fill lines. He said no because it was his understanding that Robani was going to replace the lines anyway. He said he was only responsible for cutting up the tank. I called Robani and asked Mr. Pearson whether Robani Oil was going to test the 3 lines. He said no and that he had no plans to. He said that he was just going to supply 2 temporary 275 gal. tanks and get the furnace running again. I asked whether Robani Oil was going to clean the basement floor and suck out the sump. He said no because he didn't want to take on the large cost as the Carnival doesn't have a lot of money. He told me to have Eastmond do it. I called Ms. Martin back and told her the situation with Eastmond and Robani and told her that I would call MILRO, with her permission, and have them come and do the 3 line tests, clean the floor, suck the sump and ventilate the buidling. She said that was alright and to call them. I tried calling Paul Basso, but could only leave a message. Mr. Marvin Edwards (cell (404) 790-2592) called to ask what he should put in the response letter to DEC. I told him to give me a chronology of who performed what service, what events happened, and how the tank failure was discovered and what actions were taken to resolve the matter. He said he would. He added that he is taking over some of the cleanup coordination responsibility from Ms. Martin as she has other work to do. He asked that I coordinate with him. I told him that I was trying to get MILRO to take over the cleanup. He said that would be fine. I made contact with Mr. Basso and told him what the DEC wanted MILRO to do: 3 line tests, ventilate building, clean floor, pump sump daily. He said that MILRO can do all of the work. I asked him when his crew could come out. Mr. Basso said at 1 PM tomorrow. I said that would be alright. I called up Ms. Martin and asked her whether 1PM tomorrow would be alright. She said yes. I then called up Mr. Edwards to let him know when MILRO will be there. He said that 1PM would be good. 1/26/06 - Raphael Ketani. I visited the site today at 12:30PM and met Ms. Martin and Mr. Ortiz. They said that MILRO had already been here at 11:30PM and pumped out the sump. Ms. Martin said that MILRO told her they would be over tomorrow to clean the floor. I looked at the front sump and saw only clear water. There still were odors in the

CHILDRENS ART CARNIVAL (Continued) **S107521874**

building as the floor in the front basement needed washing, though it didn't look oily and smelled only very slightly when I got very close to it. The floor where the tank used to be didn't have cracks or oil stains. There were fans in the basement blowing the vapors out the back entrance. Fans were present on all floors and were blowing the air out the windows. The building was cool inside due to the open windows. Vapor concentrations were as follows: basement front/back: 3500ppb/520ppb first floor director's office/art room: 89/210 main floor: 162 third floor front/back: 200/290 fourth floor front/back: 218/194 1/27/06 - Raphael Ketani. I received a call from Ms. Martin. She said that MILRO tested the 3 lines and the return line failed. She said that they cleaned the floor today, too. Ms. Martin added that the odors are light today. 1/30/06 - Raphael Ketani. I spoke to Paul Basso today. He said that the fill line wasn't tested. I asked him to test this line, also. He said they vacuumed out oil from the front and middle sumps on friday and cleaned the floor. He said that they will be over tomorrow, 1/31, and test the fill line, vacuum again and clean the floor, if necessary. I told him this would be fine. I made a site visit 10:45AM. I met Jose Ortiz who let me check on the odors at each floor and the presence of oil in the sump. The vapor concentrations were: 2,000ppb in the front basement; 750ppb in the back basement; about 250ppb at each floor above the basement. Odors were light on the main floor, but the building is still cool due to a problem with the furnace and the windows are partially open. I met Mr. Pearson on site. He told me that he will replace the suction line and that the return line was not in service even before Robani was the Carnival's oil supplier. I told Mr. Ortiz and Ms. Martin that MILRO will come tomorrow to suck out the sump and do 4 soil borings in the front basement. I told them that there will be 2 borings where the tank used to be, 1 between the tank position and the sump, and 1 on the other side of the sump. They said they understood. I will try to be at the site to watch the soil sampling. Mr. Lindos Lindsay called and left a message that he is scheduled to meet with an environmental company tomorrow at 11AM to discuss what needs to be done and how to go about it. 1/31/06 - Raphael Ketani. I met Gordon of MILRO at the site just as he finished doing the fourth boring - about 11AM. All four borings had been done where I wanted them. Gordon told me that he had soil at each location and that the soil at boring #1 (between the sump and the wall) was the most contaminated. He said that boring #4 at the west end of the former tank area was the cleanest. He said that he will submit the samples for analysis. Oil was still floating and accumulating in the sump. I asked Gordon to call Paul Basso and have a vacuum truck come over and suck out the sump. Gordon said that one will be here today and tomorrow. The crew from Robani Oil began their work right after Gordon was done. They will install 2 275 gal. tanks and replace all of the lines. The vapors in the building were slightly worse than yesterday. I talked to Jose Ortiz and Marvin regarding why the borings were taken and what will happen next. I told them to set up the fans again and to ventilate the building. At 3:30PM I spoke to Gordon of MILRO to find out the details of how the return line was tested. Gordon said that he capped off the line, pumped with a manual push-pull pump until he had 5 lbs. of vacuum and waited half an hour. He said he used soap solution to check all the valves and they were fine. He said the vacuum truck had been there about 1 hour after he left and pumped out a lot of oil. I told him to test the fill line. Gordon said that he believed the line was already removed. I told him

CHILDRENS ART CARNIVAL (Continued) **S107521874**

that if this is true, then I wanted him to do a couple of borings outside the building next to the fill line tomorrow morning. He said he will do it. 2/1/06 - Raphael Ketani. I met Gordon at the Carnival. He did one boring (#5) next to the fill pipe. However, Robani had replaced the old fill pipe with a new one yesterday and had been sloppy by spilling a little oil onto the area when they pulled the pipe. The sample was sandy fill soil and had a slight odor. The PID reading was 500ppb, but Gordon had collected the sample in a plastic bag. This was sand that was used to backfill the upper end of the abandoned coal shute that is infront of the building. I went into the basement and checked the portion of the sand that had spilled into the coal shute. It didn't have an odor. Gordon said that they just sent off the oil samples that were collected. I told him to order the lab to do a fingerprint of the oil. In the basement, Robani had installed two 275 gal. tanks, a new fill line, a new vent pipe, and a plastic coated suction line. The suction line was cemented to the floor and covered with concrete where it met the landing of the stairs to the basement. All of the old lines were removed. The heat was back on and a hot water pipe almost over the back and another one against the opposite wall of the basement were leaking hot water. Part of the floor of the front basement was wet. Some of the wetness extended under the new tanks, but they are on feet above the floor. Red oil is in the front sump, but is transparent enough so that the bottom of the sump can easily be seen. I told Gordon to call Paul Basso and have him send a vac. truck over to pump out the sump. Vapors in the building were: basement: front 1000ppb/ middle 500ppb first floor: front 350ppb/ back 225ppb second (main) floor: 230ppb third floor: front 250ppb/ back 350ppb fourth floor: front and back 300ppb Paul from MILRO called at 3PM and said that he will send the samples to a DEC contract lab for fingerprinting and he will resample soil sample #5 and put it in a jar. 2/2/06 - Raphael Ketani. I received a call from Rick Bayer of Severn Trent Labs regarding the soil samples. He said he will send a copy of the report to MILRO and to DEC. 2/3/06 - Raphael Ketani. I FAXed a copy of the Standby Contractor Authorization Form to Paul Basso of MILRO. 2/6/06 - Raphael Ketani. I visited the site today. Vapors in the building were 3600ppb in the basement, 200ppb in the first floor art room, and 170 ppb in the main floor art work area. However, the heat was off as the plumbers were replacing a couple of hot water pipes. Oil was still in the front sump, but it had turned thinner and brownish in color. Aside from this, Marvin Edwards of the Carnival pointed out black spots from 2 to 14 that had suddenly started to appear on the basement floor. Mr. Edwards said that he first noticed them today. There were about 12 spots and all except for a couple were in the front basement area. I touched some and oil came off onto my hand. The PID detected 6200ppb of vapors. I called MILRO to come over tomorrow to suck out the front sump and try to reduce the amount of oil seeping through the floor. Paul of MILRO said they would do it. 2/7/06 - Raphael Ketani. I tried to find out whether MILRO had pumped out the front sump, but could only leave a voice mail for Marlene Martin. I called up Paul at MILRO and he said his worker was there with the vacuum truck and pumped out 120 gals. of water. 2/8/06 - Raphael Ketani. I called up Mr. Wickham of NYCDOH ((212) 442-3372), but he wasn't in. I reached the receptionist and she said that all inspectors get their work assignments a week in advance and that Mr. Wickham already had a full schedule and could not make it to the CAC. She connected me with Mr. Wickham's supervisor, Inspector Stallbohm.

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Mr. Stallbohm said that someone was out at the CAC on 1/17 and still found unacceptable vapors. He would see what he can do to get someone to the CAC quickly. Mr. Stallbohm called back to say that an inspector went out to the CAC on 2/3 and determined that the vapors had decreased to safe levels for children. He said that Marvin Edwards of the CAC had signed the DOH report to this effect. He added that Mr. Edwards was told the children could come back and that an inspector will make a followup visit on about 2/17. I called up Marvin, but got Jose Ortiz. I told him that the NYCDOH had told me that the children could come back to the CAC. He said that everyone was aware of this, but the boiler broke again and so the children will be staying off-site for a while longer. 2/9/06 - Raphael Ketani. I made a site visit today. The heat was off again as they had many hot water pipe leaks. They are in the process of replacing much of their hot water piping. Oil was still in the top of the front sump, but you could easily see to the bottom of the sump and the oil appeared to be just a sheen. Vapor concentrations were: basement: 1400 to 1500 ppb first floor art room: 200 ppb main floor: 325 ppb third floor: back/front, 325/290 fourth floor: back/front, 380/400 Kira Leid-King, lawyer for the Church of Nazareth, called me yesteday to say that she had hired a title company to do a records search for the third tank. No physical investigations were taking place at the church. 2/14/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that the odors were very slight in the building. I told him I would like to send over a vacuum truck to suck out the oil in the front sump. He said that would be alright. He said that someone will be at the CAC today and tomorrow. I called MILRO and they said they will be over at the CAC on thursday morning. I let Mr. Edwards know and he said someone will be there. 2/16/06 - Raphael Ketani. I spoke to Ms. Martin. She said she knew that MILRO wasn't coming today, but would come tomorrow. I asked her about Robani Oil and how service has been over the years - whether they clean up whatever they release. She said they had no problem with them and that nothing has ever happened. I then asked her whether she had heat today. She said yes and that there was plenty of it since they repaired all of the water pipes. I asked her how the history of the boiler has been. She said that except for now and the pipes, she hasn't had a problem - though it's tempermental. I asked her whether in the past it ever leaked. She said not to her knowledge. I ended the conversation after this. At 3:45PM I received a call from Bill Hunter, insurance adjuster for Utica Insurance ((516) 479-5089). He represents the insurance company for Robani Oil. He said he was trying to go over the information that Robani had given him regarding the oil release to see who had liability. He said the insurance claim number was 1016566. He said that the CAC first called Robani to complain of a loss on 1/6/06. He said Robani came to investigate and found oil 5 feet from the tank, but he said he wasn't sure whether that meant in the sump or on the floor. He asked whether the church was the source. I told him we didn't know yet, but we intend to do an investigation. 2/23/06 - Raphael Ketani. I spoke to Jose Ortiz regarding the conditions at the CAC. He said he did notice a slight odor on the main floor. I asked him to look at the front sump. He called me a little while later and said there was lots of oil in the sump. Then I called MILRO and told Paul of MILRO to send the vacuum truck. He said he would send it tomorrow, friday. Paul told me that DEC should be receiving the first bill soon for the work they have done so far. I let Mr. Ortiz know that MILRO will be over tomorrow. 2/27/06 -

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Raphael Ketani. I visited the CAC today. I met Mr. Edwards. He showed me the front basement area. The door is being kept closed now to confine the odors as much as possible. The room had 1500 ppb of vapors. A thin film of oil was present on the surface of the water in the sump with widely scattered small orange droplets of oil. The floor had lots of Speedi-Dri on it to absorb oil seeping up through the floor as oval stains. Mr. Edwards said that MILRO had been over last friday and had pumped out the sump. The air about the second sump had about 560 ppb vapors. There was a sheen on top of the water, but it did not smell like oil. In the art room on the first floor the vapors were about 500 ppb. The main floor and the third floor both had vapor concentrations of about 450 ppb. Mr. Edwards said that they just had a cleaning crew mop the floors. The air smelled of some kind of vapors of a cleaner. I told Mr. Edwards that I will have MILRO come over sometime this week to pump out the sump again. He said anytime is alright. I received the analytical reports for the 5 soil samples taken at the CAC some weeks ago. Four (4) samples were collected on 1/31/06 in the front basement near the front sump. One (1) sample was taken on 2/2/06 at the fill pipe where it passes below ground. Three (3) of the front basement samples and the fill pipe sample indicate the presence of only #2 oil. One (1) basement sample indicated the presence of #1 oil. However, this oil was also in the blank. 3/1/06 - Raphael Ketani. I spoke to Paul of MILRO today and asked him to vacuum out the front sump this week. He said his truck will be over tomorrow. 3/6/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that MILRO was over on friday and pumped out the sump. He said that odors were definitely noticeable in the front basement, but the door is kept closed. He added that the odors in the rest of the building are slight and that they had classes on saturday with no problems. 3/9/06 - Raphael Ketani. I received a call from Ms. Martin today. She said that some men in plain cars showed up at the church on teusday, 3/7, and began working in the courtyard. She said that they uncovered and opened a tank today. 3/10/06 - Raphael Ketani. I visited the CAC and the church courtyard today. I took pictures of the exposed tank and the sheen floating at the top of the water in the tank. The soil from above the tank didn't have an odor. Next, I visited the CAC. They had fans blowing in the basement. They were blowing from the front sump area to the open back door of the basement. Vapors in the front sump area were about 560 ppb, vapors in the basement sink room where new oil stains showed up were 1100 ppb, the first floor was about 190 ppb, the main floor was 140 ppb, and the third floor was about 200 ppb. I will call MILRO to have the front sump pumped out again. 3/15/06 - Raphael Ketani. I talked to Jose Ortiz of the CAC. He said that MILRO was there on monday to pump out the front sump, but they had to wait for 10 or 15 minutes before they could get into the basement. Mr. Ortiz said that everything was pumped out and the odors are slight throughout the CAC. However, where the oil has been seeping through the floor in the basement sink room, the odors and the staining are getting worse. He said that no work is taking place at the church courtyard next door to investigate the tank and the oil. Kristina Lee (212) 883-7600, Chairman of the Health Committee of Community Board #9, called for an update. She said that she saw the exposed open tank in the church courtyard. I told her that the church brought a bunch of people to the site and they dug up and exposed the tank and then opened the tank. I told her DEC sent a letter ordering the church to continue the remediation by friday, 3/17, or the DEC will send in its own

CHILDRENS ART CARNIVAL (Continued) **S107521874**

contractors. I told her the DEC will send a letter stating that we are taking over the investigation and cleanup if DEC hears or sees nothing happening. I added that we will get a court order to enter the property and then start the work. Ms. Lee said that the congregation meets every sunday at St. James Presbyterian Church. She added that on March 2, the NYC Dept. of Buildings fined the church $10,000 for not repairing the landmark building. SHE ASKED THAT A WELL BE PUT IN BETWEEN THE TANK AND THE NEIGHBOR'S GARDEN WALL AND ASKED THAT SHE BE KEPT INFORMED BY NEXT WEEK. I told her I would. 03/17/06-Thomas-Contract Payment Package-(Severn)- took samples-02/01/06-02/28/06 took sample of sump pit 01/01/06-01/31/06 03/17/06-Thomas_ Contract Payment Package-(Milro)- washed basement floor, took samples, removed pads, washed tank room, took borings, purge sumps (01/19/06-02/24/06). 3/20/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that the odors in the rest of the building are slight. However, the odors in the basement sink room are increasing and more oil staining is showing up in the floor. He said that the fans are ventilating the basement. I told him that I will call MILRO to have them suck up the water and oil from the middle and front sumps. I contacted MIRLO and they said they will be over at 9:30AM to pump out both sumps. 3/22/06 - Raphael Ketani. I FAXed the Standby Contractor Authorization Form to Severn Trent Labs (phone: (845) 562-0890; FAX: (845) 562-0841). 3/23/06 - Raphael Ketani. I received the bills from MILRO today for work done on 3/1 and 3/13/06. 03/24/06 Thomas- Contract Payment Package-(Milro)- vacuumed oil from sump pits, disposed of oil and water (03/03/06-03/13/06). 3/28/06 - Raphael Ketani. I sent a letter to Ms. Martin with the 3/24/06 remediation plan that MILRO had FAXed to me. I received a call from Bill Hunter of Utica Insurance, the insurance company for Robani Oil. This is the second time he called me for information. He wanted to know what the status was with the spill case. I explained to him what was going on at the church courtyard and what DEC wanted to do to eliminate the vapors and contaminated water under the CAC. 4/4/06 - Raphael Ketani. I received a call from Marlene Martin of the CAC on 4/3/06. She wanted to know what the total cost of the cleanup has been so far for the CAC. I told her a close estimate is $8710. She asked what the cost would be for the future/proposed work plan that I had sent her from MILRO. I told her I would find out. I called up Anthony at MILRO and he said he will try to get back to me with an approximate price. 2:30 Anthony Mariano of MILRO FAXed me the rough estimate of what it may cost for all of the construction work that would take place to: break open the concrete floor and suck out the contaminated soil, water and oil, repair the floor, install 2 access wells in the floor, power wash the floor, and paint with two part expoxy paint. The total came to $36,642.95. I informed Ms. Martin about the estimated amount. 3:50PM I sent an e-mailed letter to Lisa Silversmith, the owner of the property on the other side of the CAC. I hadn't heard anything from her in response to the Department's 3/20/06 letter. So I sent her an e-mail to lisasilversmith@yahoo.com. The letter appears below: CONFIDENTIAL New York State Department of Environmental Conservation Division of Environmental Remediation, Region 2 Bureau of Spill Prevention and Response 47-40 21ST Street, Long Island City, NY 11101-5407 Phone: (718) 482-4933 " FAX: (718) 482-4098 Website: www.dec.state.ny.us April 4, 2006 Lisa Silversmith 60 Hamilton Terrace New York, NY 10031 RE: Spill #0511700 Childrens Art Carnival 62 Hamilton Terrace New York, NY Dear Ms. Silversmith: As of April 4, 2006, the New York State Department of Environmental

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Conservation (the Department) has not received a response to its March 20, 2006 letter regarding the property at 60 Hamilton Terrace (see attached below). It is important that the Department make an inspection to the basement of your property. We are aware that a spill had previously taken place at 60 Hamilton Terrace and was subsequently cleaned up and the case closed. The Department would like to determine that there are no impacts from the oil that is presently seeping into the Childrens Art Carnival next door. Temporary groundwater monitoring wells installed in the floor of your basement would help to collect any oil under your property. Please call me at (718) 482-4634 to make arrangements for the site inspection. Sincerely, Raphael Ketani Enigneering Geologist II 4/10/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that due to the rain last thursday, the odors in the sink room have gotten worse. However, he said, the odors in the rest of the basement are fine due to the ventilation and the odors in the building are slight. I told him that I would send over the vacuum truck to suck out more oil and water tomorrow. I told him to have someone at the CAC at 9AM so that MILRO can get in. He said he would do so. I asked him whether Ms. Martin was in. He said no. I called up Paul at MILRO and told him we would need his vac. truck at the CAC tomorrow. He said he would be there. 4/17/06 - Raphael Ketani. I spoke to Mr. Edwards. He said that the situation at the CAC is the same as last week with only slight odors in the occupied parts of the building and stronger odors in the basement. He said there was no flooding. I tried to contact Ms. Martin regarding MILRO's proposal, but could only leave a voice mail message. 4/24/06 - Raphael Ketani. I spoke to Mr. Edwards. He said that there are no changes at the CAC. He said the odors are the same - even in the basement. He said that there was no flooding from the 3 of rain over the weekend. However, the oil staining is slightly more in the basement. 5/15/06 - Raphael Ketani. I received the bills from MILRO for the work done on 3/21/06 and 4/11/06. I signed them and forewarded them for processing. 5/17/06 - Raphael Ketani. I spoke to Mr. Edwards today. He said the odors in the building were still only slight. He said the rains over the past weekend and week haven't caused any recurrence of oil seepage. He said the basement was fine. This case is being transfered today from myself to Jeff Vought in order to consolidate all of the PINS cases under one Spills case manager. 06/06/06-Vought-Received call from Marlene Martin requesting information on possibility of state funding for tank replacement. Marlene also said that basement flooded during past weekends with heavy rains and no free product was noted. 06/06/06-Vought-Complete File Review by Vought: See also spill numbers: 0209311(60 Hamilton Terrace-closed 12/22/05), 0551505(72 Hamilton Terrace-open). Sale of 72 Hamilton Terrace by City of New York to Nazareth Spiritual Church and resulting Deed transfer-4/20/72. Site visit on 1/11/05 by DEC Vought-DEC required: 1)tank testing results 2)notification to NYCDOH 3)installation of ventilation system in basement 4)sealing of sump and washing of basement floor. Vought left message with NYCDOH Nieves, spoke to Mike Hughes(NYSDOH) and decision to close is the call of Marlene Martin. Oil was first noted on 1/3/06 and basement filled with water during times of heavy rains. Three sumps present in basement of Childrens Art Carnival(CAC). Sump closed to Hamilton Terrace contained fresh #2 fuel oil. As per Marlene Martin, she contacted 60 Hamilton Terrace to see if they had spill and no spill was found in the basement and she contacted the Church who noted an oil spill next door at 72 Hamilton

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Terrace. Email from NYSDOH Hughes to NYCDOH Peter Stallbohm with cc to NYCDOH Nieves- How did you inspectors make out at the 64 Hamilton Terrace spill? . Email from NYSDOH Hughes to NYCDOH Stallbohlm and DEC Vought-1/18/06. ...any updates about the Childrens Center in Manhattan? Have they re-opened, cleanup status? . Response from Stalbohlm At 64 Hamilton Terrace, readings of 4-5ppm of VOC was detected. A contractor was contracted to conduct a cleanup yesterday. The center voluntarily closed until so. After cleanup, another visit will be made to check effectiveness of cleanup (possibly today). Email from NYSDOH Hughes to DEC Vought-1/19/06. Peter Stallbohlm, NYCity Health, sent an inspector back to the Children's Center on Tuesday, 1/17. The inspector reported odors are still present... Fuel product still present in basement. The center is still closed and NYCity Health recommends staying closed until the additional clean-up is performed. Would you be able to also make a site visit and recommend some specific actions as well? . Letter from DEC Ketani to Kira-Leid King (Nazareth Deliverance Church NDC)-1/19/06. The New York State Department of Environmental Conservation (the Department) was notified on January 10, 2006 that a petroleum release took place at the above referenced site. Odors were noticed coming from the basement of the church during an inspection of the area on January 11, 2006. Staff from the Department were at the site on January 14, 2006 to observe the removal of No. 2 fuel oil by Northeast Environmental from Nazareth Deliverance Church . (6/6/06-Note that I, jeff Vought was onsite and liquid was recovered from basement when I arrived on-site, I did not observe oil in the basement as the liquid was already recovered). The Department has identified the Nazareth Deliverance Church as a potential responsible party for this release . Letter required submission of an investigative summary report including the investigation of a possible third tank under the church courtyard. The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness . If no reply regarding the investigation is received from the Nazareth Deliverance Church within (5) days of receipt of this letter the Department may proceed with the required work... . Letter from DEC Ketani to CAC Martin-1/19/06. The Department has identified the Childrens Art Carnival as a potentially responsible party for this release . Notification that the Departrment has contracted Milro and will invesigate the source of oil. Upon one of the inspections of the Childrens Art Carnival, staff from the Department noticed a three foot long piece of suction line at the foot of the stairs of the basement. The Department requires that the Childrens Art Carnival immediately conduct a site investigation to determine why the line was replaced, whether there was a release of product and how large the release was, when the suction line was replaced and which company did the replacement work. The Childrens Art Carnival must also hire a contractor to have the suction line and return line (the two 3/4 inch copper lines) pressure tested . Letter from DEC Ketani to CAC Martin-1/23/06. ...the Department was notified on January 20, 2006 that a tank system test was conducted by AL Eastmond & Son, Inc. on this date and that a leak was detected in the tank and vent line. At this time, the Department is ordering the Childrens Art Carnival to repair or replace the tank and the vent pipe, and to hire a contractor to investigate the oil spill and remove all contaminated concrete flooring, soil and rock and all product and contaminated water . Letter from Marlene Martin (CAC) to DEC Ketani-1/27/06. To date we have cooperated with the Department of Environmental

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Conservation on all requests, recommendations and mandates. Enclosed, please find the job tickets for work performed by Eastmond and Sons, Inc. as per your Department's madates and directives. It is our hope that a resolve can be reached as soon as possible and or that the Carnival can be eliminated as the potential source of this release... Enclosed as Eastmonds & Sons job tickets: 1)1/11/06- Removed 50 bags of contamianted soil washed floor, 1 bucket of oil wash, removed 102 gallons of water, pressure washed floor 2)1/18/06- pump out oil and water from floor also wash down used 1x5 gallon can oil wash 3)1/20/06- Test tank, tank failed, wet leak 4)1/23/06- transfer oil to 275. Remove jacket and remove 30 bags of contaminated soil. Job completed 5)1/24/06- Install 275-gallon temporary . Contractor Work Authorization Form for Milro-2/2/06. Email from Landmarks Preservation Comission(LPC 212-669-7921)-John Weiss to DEC Ketani-02/10/06. Under the circumstances you described to me, no permit from the Landmarks Preservation Comission is needed for the NYSDEC contractor to break up the concrete paving in the courtyard next to 72 Hamilton Terrace in order to undertake and emergency remediation project . Because this work is being undertaken to remedy a dangerous condition, pursuant to section 25-312 of the NYC Administrative Code, no LPC permit is needed. No work is to be performed on 72 Hamilton Terrace . Fax from Kira-Leid King(NDC) to DEC Ketani-2/11/06. As discussed, attached please find a search from the fire department indicating that there are only two tanks located at the above-referenced premises. Therefore, there isn't another tank located in the court yard . The Church had a fire four years ago causing the building to be inhabitable . Letter from DEC Ketani to Leid-King (NDC)-2/10/06. ...the Department has not been notified by Lindsay Lindos or other representatives from the Nazareth Deliverance Spiritual Church, that the church will hire a company to conduct a site investigation to determine whether a fuel oil tank is present under the church courtyard. Deadline of 2/18/06 given to investigate the court yard. Email from LPC Weiss to DEC Ketani-2/22/06. I am writing in response to our recent telephone conversation regarding the possibility that the historic wrought iron fence in front of the side yard at 72 Hamilton Terrace may have to be removed in an oil tank has to be removed. Suggestion to take the tank out in pieces to save the fence. If fence has to be removed it also has to be replaced. Letter from DEC Ketani to Lindos Lindsay(NDC) and Kira Leid-King(NDC)-3/10/06. Site visit made by Department on 2/10/06. ...a third fuel tank was observed to be present beneath the courtyard behind the Nazareth Deliverance Church. Department required NDC to perform a soil boring between the foundation wall of the Childrens Art Carnival at 62 Hamilton Terrace and the tank, and taking soil and groundwater samples. Another boring must be installed between the tank and the church. Deadline given for nine days within date of letter (2/19/06) to respond to DEC and resume investigation of tank and soil. STL Analyticals-2/10/06. Sample from CAC sump pit ran for fuel id analysis and showed 920000ppb #2 fuel oil. Fuel oil sampled by Milro. STL Analyticals-2/17/06. Sample from CAC outside by fill #5 @1'. Sample analysis performed for TPH310.3 shows oil parameters below method detection limits. STL Analyticals-2/17/05. Four sample from CAC front basement area near sump. . Sample analysis performed for TPH310.3. Soil analyticals show all below method detection limit except for 7400ppm #2 fuel oil(SB#2 @ 1'), 110ppm #2 fuel oil(SB#3 @1'). Letter from DEC Ketani to NDC Lindsay and NDC Leid-King-3/20/06. On March 20, 2006 the New York State Department of

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Environmental Conservation (the Department) made a site visit to the above listed property. No work appeared to have taken place to investigate the tank or the surrounding soil since the last site visit that took place on March 10, 2006 . Letter requiring investigation. Due date of 4/5/06 for the work to resume. Letter from DEC Ketani to Lisa Silversmith-03/20/06. We would like to install two(2) wells in the groundwater beneath the basement of your home. These wells will be constructed and sampled by out contractor. Contractor Work Authorization for STL-3/21/06. Fax from Milro to DEC Ketani-3/24/06. Milro proposes the following scope of work to address the oil spill cleanup: 1)Saw cutting of concrete slab in the basement and excavation of contaminated soil 2)disposal at a licensed disposal facility 3)recover of product using a vaccum truck if contaminated groundwater is encountered 4)collection of endpoint samples from excavation 5)restoration of the concrete slab 6)pressure washing of basement and epoxy application. Letter from DEC Ketani to CAC Martin-3/28/06. ...(the Department) is presently looking into other methods of controlling and preventing the petroleum vapors from entering Childrens Art Carnival . Milo remediation plan has been enclosed for Martin's review. Cost Estimate (Milro-Moriano)-4/4/02. Cost estimate for basement excavation and replacement. Site visit by DEC Vought during endpoint sampling of tank in couryard-5/11/06. Sampling performed by USA Environmental (Cristin Ciaburri 718-981-5710). Onsite was Keith Bartley(USA). Pumped out wate from 550-gallon UST in courtyard. No product in UST, just sheen and water. Three soil samples were collected (one through bottom of tank, one below fill line and one below supply/return line). No odors or staining observed in all of the soil samples. Site visit performed to CAC and no odors in basement and no free product in sump. Some oil staining showing up on floor from underlying groundwater. One sample also collected for analyiss from NDC basement floor. Vought spoke to USA Ciaburri and DEC will receive report by 6/12/06. DEC tentative requirements: 60 HAMILTON TERRACE: 1)followup to see if any recent spills 72 HAMILTON TERRACE 1)results of basement borings by 275-gallon ASTs 2)submittal of documentation of 1/14/06 clean up by Northeast 3)notification to Bishop France of requirements 4)backfilling of UST excavation in courtyard 5) The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness as per 1/19/06 letter 6)backfilling of NDC excavation to prevent continued groundwater infiltration into CAC 62 HAMILTON TERRACE: 1)continued monitoring of sump 2)call back to Martin regarding possibility of use of Spill funds for AST replacement and likelihood of NYSOAG cost recovery against Art Carnival 2)submission of tank test results from Eastmond and Sons of AST in CAC as per requirement on 1/19/06 letter 4)borings at tank location for 8260/8270 5)Milro boring logs and site plan from 2/17/06 analyticals 6)implemenation of Randy's workplan(installation of monitoring wells at CAC and basement excavation) from Milro 7)sealing of basement floor 8)borings by UST, sump and and fill port 9)Summary of description of cleanup activities by AL Eastmond including source of 30 bags of soil removed during tank removal and description of removed tank. 06/15/06-Vought-Spoke with Marlene Martin who inquired about status of spill. Martin stated that there were no odors in the school to date. Vought drafted letter with above requirements to both parties and cc'd Northeast, Marlene Martin (Art Carnival), Cristine Brooks Lee(Comm Bd 9), Martin Smith(Councilman Robert Jackson), LPC and USA, Eastmond. DEC Vought to call Milro regarding: 1)boring logs

CHILDRENS ART CARNIVAL (Continued) **S107521874**

and site plan for borings on 2/17/06 and installation of new borings in floor or school. DEC Vought to call Martin regaring: 1)non use of Spill Funds for AST replacement as per NYSOAG Buss 2)further soil and groundwater investigation by the DEC. 06/19/06-Vought-Called Martin(212-234-4093), faxed her copy of requirement letter and letter to NDC and left message informing her her that there was no way for Spill Fund to pay for CAC tank replacement and to dicuss letter sent on 6/15/06. Vought called Lindos Lindsay (347-228-8039) for fax number and to inform him of outstanding requirements. Vought faxed him copy of requirement letter to 72 and 62 Hamilton Terrace. Lindsay requested that letter be transmitted via mail only and be sent to: Lindos Lindsay 163 Myrtle Avenue Brooklyn, NY 11201 Vought sent letter to above address. Vought called Christine Lee (Comm. Bd. 9 212-883-7600) and she requested correspondence via mail only. Vought sent info to: Christina Lee 48 Hamilton Terrace New York, NY 10031. Vought called and spoke to Martin Smith (ph 212-234-0551 fax 212-234-0552) for fax number and to explain requirements. Vought faxed Smith copy of requirement letters for 60, 62 and 72 Hamilton Terrace. Vought called John Weiss (Landmarks Preservation 212-669-7921) for fax number and to explain requirements. Vought left message to return call. Vought called and left message with Christin Ciaburri (USA 718-951-5710) for fax number and to explain requirements. Vought called Renee Lewis (AL Eastmond 718-378-3000 fax 718-378-4560) and he was not in office. Vought faxed him copy of letters to 62 and 72 Hamilton Terrace. Vought called Bob Rafferty(NYSDOH 518-402-7800 fax 518-402-7819) for fax number and to explain requirements. Vought faxed Rafferty copy of requirements. Vought faxed NYCDOH Nieves copy of requirements for 60, 62 and 72 Hamilton Terrace. Vought called Dwayne Monaco(Northeast 914-777-1930 fax 914-777-1928) for fax number and to explain requirements. Vought faxed Monaco copy of requirements. Vought received call from Monaco and returned call and spoke to Monaco and no analyticals were performed and Monaco will send in pictures. Monaco did say his men saw oil on the floor. Monaco will submit report and pictures to DEC. 06/27/06-Vought-Received call from Marvin Edwards (212-234-4093) requesting letter with amount spent to date on PIN (8713.53 as per UIS). Vought returned call and left messge explaining that DEC will not provide the letter as amount may increase and Vought willing to call insurance directly. 06/28/06-Vought-Received call from Marvin Edwards and they filed claim with general liability insurance. Their claim representative asked for further costs. Claim may file under third party liability portion of coverage. Marvin will contact insurance and arrange conference call with DEC. 07/12/06-Vought-Received message from Martin and returned call and spoke to Martin. Martin will be faxing in tightness test results and approved installation of additional borings. Martin will seal the basement floor upon no occurrence of product in the sump during monitoring period. 4/23/07-Vought-Reviewed above notes and both CAC and 72 Hamilton Ave are potential sources, CAC due to failed tank test and 72 Hamilton due to presence of oil spill during cleanup by Northeast Environmental. Both parties listed as potentially responsible and site visit scheduled with Martin for this week to confirm no further impact and close spill. Vought called Martin. Martin had not seen oil in recent months and site visit scheduled tomorrow at 10am. Vought also reviewed documentation and photos submitted by Northast dated 6/27/06. On January 14th, 2006 Northeast mobilized a crew and equipment to 72 Hamilton Terrace were

CHILDRENS ART CARNIVAL (Continued) **S107521874**

technicians conducted a clean up of #2 fuel oil from the tank and boiler room of the building . Absorbent material was applied to the boiler room floor where puddles of standing fuel oil was observed... . No tank test results for 72 Hamilton included. Vought also received copy of failing test results for CAC which show Ullage (dry portion leak) from Eastmond and Sons dated 1/20/06. 4/24/07-Vought-Site visit by Vought and Marlene Martin not present at site due to emergency. Vought performed site visit with super and no product or olfactory odor of groundwater noted in sump, no staining noted in concrete at former tank location or fill location, product stains noted on floor towards 72 Hamilton but as per super they were present for long time. No product in other sumps of CAC. Vought discussed with DEC Austin including possible groundwater sample at 72 Hamilton Avenue and investigation whether a former spill occurred at Daycare center by mechanics. 72 Hamilton Avenue boarded with no signs of development. Tank in courtyard excavation was backfilled. 07/25/08-Vought-Spill reassigned from DEC Vought to DEC Ketani as per DEC Austin. 8/21/08 - Raphael Ketani. I called up Paul Basso of MILRO Associates (516) 379-1500. I asked him to send DEC a copy of the report from about 1/27/06 whereby the return line for the fuel system at the CAC was tested and it failed. He said he will look for it. I called up the CAC and asked for Ms. Martin (212) 234-4093, but the receptionist told me that she wont be back until September. I asked for Marvin Edwards, but she told me that he didn't work here anymore. I was transfered to Fatima Faloye, the Operations Manager. I asked Ms. Faloye whether I could make an inspection at 11:30AM tomorrow. She said that would be alright. 8/22/08 - Raphael Ketani. I made the scheduled site visit. The church next door was completely boarded up. It appeared that no work had taken place, since early 2006 when I first visited the site, to restore the church. There were no petroleum odors coming from the basement vent. I put the PID meter as close as I could to a basement vent near the side entrance gate, but didn't detect anything. The area where the 550 gallon tank was buried had been filled in and was overgrown with weeds. I met Ms. Faloye and she took me to the basement. There were no signs of free product on the floor. There were no oil stains. There were no oil odors. The PID meter registered 0 ppb of vapors. The front sump had only water. I thanked Ms. Faloye for the opportunity to visit the site and left. 8/25/08 - Raphael Ketani. The Final ISR was written for the case and submitted to Randall Austin, Chief of the Spill Prevention and Response Unit, for his signature. I talked to Dwayne Monaco of Northeast Environmental (914) 777-1930 regarding the submission of an investigation report for the church. He said that they did only a cleanup of the basement and some oil collection. He said that no report was generated. 9/2/08 - Raphael Ketani. Today I received a FAX from Paul Basso of MILRO. The attached page was a simple form stating that the return line did not hold, but that the supply line was O.K. The date of the test was 1/27/06. Additionally, the last time that oil was collected from the CAC was on 4/11/06. This also appears to be the last time any cleanup took place. 9/4/08 - Raphael Ketani. The FSIR was signed by Randall Austin, Chief of the Spills Unit, and Lou Oliva, Chief Counsel Region 2, and sent to Dennis Farrar in DER, Albany. As there was no oil contamination, nor oil vapors at the site during my visit on 8/22/08, and as the DEC does not intend to do further investigatory work, nor sees the need for further remediation work at the site, I am closing the spill case. "

Remarks: "Material is coming into the basement of the Childrens Art Carnival

CHILDRENS ART CARNIVAL (Continued) **S107521874**

and is originating from the church next door. The Art Carnival's oil company came and used a powder to control the odor but no clean up has been done. They need DEC's help. Groundwater was affected.... material is mixed with the water from the natural spring there. Unsure of what else they can do for a clean up."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 12/11/2002-Vought-Called Ugene Martin and left message to call Demeo or Vought. Also called Dr. Eli N. Avila (917-848-4889) who is owner of property along with Banco Popular and according to Mr. Avila on 4/9/99 there was a large oil spill in basement by Robani Oil and Crystal Oil (subcontractor). According to Dr. Avila: Robani Oil's president (Mr. Robert Pearson-owner) came to site and told Avila that delivery could not be performed due to crack in whistle and that he would have to fix whistle. Mr. Avila told Mr. Pearson to fix whistle. Pearson came to site and replaced fill pipe instead of whistle. As a result basement was filled during delivery event. Robani was called and performed site visit. Free product was removed and sorbent was placed down. Odors still persist till this day. Mr. Avila called hotline in 4/99 and spoke to a Mr. Greene who referred him to DEP. DEP performed site vist and fined Mr. Robani for discharge to sewer. Mr. Avila is currently going to court for damages. Dr. Martin came and performed soil borings and sent soil samples for analysis. 12/17/2002-Vought-Site visit by Vought. Visual inspection of basement shows oil stains 2 above grade on drywall. Weathered fuel oil odors present in basement. One 1'x 1' excavation with water at depth of 6 . No odor or sheen to water. On-site were Dr. Avila and Eugene Martin (consultant). According to Dr. Avila: 1) his lawyer will send him a copy of affadavit regarding admission of liability against Crystal and Robani oil companies 2) Robani/Crystal performed four soil borings in 4/02 3) Eugene Martin (consultant hired by Dr. Avila) performed four soil borings in 5/02. 4) no one is currently living in residence due to odors. NYSDEC requested of Dr. Avila: 1) Boring site plan and analyticals 2) affadavit from judge and all other documents regarding court decisions 3) copy of delivery receipt. NYSDEC inspected neighboring properties at 58 Hamilton Terrace (Troy White 212-694-0445) and Childrens Art Carnival at 62 Hamilton Terrace (Marline Martin 212-234-4093) and found no detectable odors or petroleum impacts. 12/20/02-Vought-Received boring site plan from Martin Geochemistry. 12/23/2002-Vought-Received affadavit, delivery receipt and analyticals from Dr. Avila. 1/8/2003-Vought-Review of documents provided by Dr. Avila. Vought spoke with Randall Austin who directed Vought to 1) investigate the call made to Mr. Greene at spills hotline on 4/9/99 and 2) foward file to David Rubinton (NYSDEC

MR. AVILA (Continued) **S106009941**

legal for review). Vought called Avila and left him message of directive. 1/8/2003-Vought-Vought instructed by Rubinton to contact RP to give them opportunity to clean spill. Vought called Robani Oil 212-687-8699 and left message for Mr. Pearson to call NYSDEC. Vought called Crystal Transportation 718-828-3100 and spoke with Mr. Frank Rizzo who said that message would be passed on to company owners. Mr. Rizzo could not say whether NYSDEC would receive a call back from Crystal and that further inquiries should be fowarded to Robani. 1/8/2003-Vought-Spoke with Robert Pearson who will turn call over to Chris Foley (attorney). Mr. Pearson stated that Robani will not institute remedial acivities due to possiblity of previous spills at Site. Vought also spoke with Rubinton who said to fill out case initiation form and send it to Region 2 legal. 1/9/2003-Vought-Gave case intiation form to David Rubinton (Region 2-legal). Vought spoke with supervisor Rommel who instructed to send do work letters to both oil companies and respective lawyers. Vought called Dr. Avila and informed him of case intiation and sending of do work order to Crystal, Robani and respective lawyers. Do work letters sent by Vought on 1/9/2003. 1/10/2003-Vought-Received letter fom Foley stating they were interested in discussing and potentially resolving issues of 1/9/2003 do work letter. 1/13/2003-Vought-Received fax from Chirstopher Foley (representing Robani Energy) who stated that after he spoke with representation of Crystal Transportation a contractor would be called to perform remediation. Vought recevied call from Brian Campbell (Vertex Engineering 781-952-6047) stating that he was called by Foley and was requesting list of contractors. Campbell will supervise contractors. Vought faxed list on 1/13/2003 and also suggested to Campbell that he contact Eugene Martin. Campbell will call back NYSDEC with contractor decision. Vought also gave Campbell names and contacts at NY State Dept of Health to certify reoccupation. 1/13/2003-Vought-Received message from Matt Spears (Kressner 718-584-8484) representing Dr. Avila requesting FOIL information. Vought called and left Spears message. Vought also received message from Eric Slessinger (Caroll & Mcnulty-212-868-9090x405) reresenting Crystal Transportation. Vought called Slessinger and left message to call NYSDEC. 1/14/2003-Vought-Received message from Spears requesting foil information. Vought called Spears and suggested postponing FOIL request until decision arrives from Foley and Robani Energy. Vought told Spears to call 1/21 for updates (after due date on Do Work letter) sent 1/9/2003. 1/15/2003-Vought-Received message from Eric Slessinger. Vought called Slessinger who received letter and said that he will call Rubinton to discuss legal issues. Slessinger stated that it would be difficult to obtain contactor by due date on Due Work letter because they were looking to seek action against other oil companies which delivered to Site before spill event. Vought will contact Rubinton before PIN job is opened. 1/17/2003-Vought-Received message from Foley. Vought called Foley and left message. Foley returned call who was in court on 1/16. According to Judge Marcy Friedman Robani/Crystal will have time before trial to clean spill. Trial is scheduled for 3/24/2003. Foley has called Miller and Milro and scheduled a possible site visit for Wed 2/22/2003. Vought called Avila and notified him of possible site visit date. Vought will call Kressner to facilitate site visit. 1/21/2003-Vought-Spoke to Foley and contractors will be Milro and Brookside. Will attempt to arrange site for tommorrow (212-363-1300) despite lack of response from Kressner or Avila. Vought called Kressner to facilitate visit and

MR. AVILA (Continued) **S106009941**

left message to return call to NYSDEC. Vought spoke with Kressner and site visit is arranged for tomorrow. Kressner left message for Foley approving of site visit. 2/4/2003-Vought- Spoke with Dr. Martin performed test bore under 58 Hamilton on 1/29/03 and found PID reading of 5ppm. Sample will be sent for analysis and will fax me analyticals. Vought called Foley (212-363-1300) for update on contractors and left message to call Vought back. Vought called Kressner and he is skeptical of results and does not believe in state supervision. Vought called Dr. Avila. According to Dr. Avila three consulting companies performed a site visit and no proposals were submitted. Vought will attempt to arrange meeting between Kressner, Foley, RObani, Avila, DOH, Landmarks, Martin to prevent PIN project from being opened. Vought arranged meeting for 2/27/2003. 2/5/2003-Vought-Received letter from Foley asking if DEC was instructing them to refrain from proceeding with remediation until 2/27/2003 meeting. 2/7/2003-Vought-Letter sent by NYSDEC (Rubinton) to Kressner stating that failure of Avila to take actions to address petroleum discharges would subject Avila to liabilities as a responsible party. 2/11/2003-Vought-NYSDEC sent letter to Foley that pre-hearing conference for 2/19 is adjourned due to scheduled 2/27 meeting. 2/20/2003-Vought-Work proposals submitted by Brookside Environmental (environmental consultant) and H2M (structural engineer). 2/26/2003-Vought-Send work proposal review letter to Brookside and all involved parties requiring STARS 8260/8270 analyes, collection of endpoint samples, description of sampling methods, scaled Site plan and concrete encapsulation. 2/27/2003-Vought-Meeting at NYSDEC with Kressner,Foley , Stapleton, Landmarks, NYC Dept. of Heath, Martin, Robani. Meeting. All parties agreed that a structual engineer report will be produced by Vertex engineering (Scott Hamarich 631-758-1580). Vertex will be supervising Brookside. Engineer report will be sent to Landmarks and then to Dept. of Buildings for approval who will review report by 3/21. Copies of report will also be sent to DEC and Kressner. Brookside will also produce addendum to scope of work incorporating NYSDEC 2/26 proposal review letter comments. 3/7/2003-Vought-Received proposal from H2M (Michael McKeown-631-756-8000) who is structural engineer hired by Robani. Proposal approves basement excavation and aslo said that boring was performed by H2M and bedrock is at 2.5'. Vought sent letter to Dr. Martin requesting all previous boring logs, sample analyticals and sample depths. 3/18/2003-Vought-Spoke with Brian Stapleton submitted report to Kressner on 3/10. Stapleton has not yet received response from Kressner. Vought told Stapleton that Landmarks and DOB approval of structural report and final draft workplan to NYSDEC were needed as stated in meeting. 4/30/2003-Vought-Spoke with Dr. Avila who inquired about next step for remedial action despite private lawsuit between Avila and Oil companies. Vought told Avila to call Rubinton because Rubinton told Vought not to take any action until Rubinton gave approval. 12/10/03 - AUSTIN - PROJECT TRANSFERRED FROM VOUGHT TO SAWYER - END 12/2/04 - Sawyer - Received work proposal on 10/21 from Vinny at Island Environmental Tank. 1/6/05 - Sawyer - Talked to Melanie at Island Environmental Tank and answered her questions about offsite contamination. The subsurface investigation and delineation will encompass all areas associated with the spill. 5/31/05 - reassigned to Vought by Koon Tang since DEE needs technical support for enforcement action, and Chris Sawyer has just left the Department. - KST 9/12/05 - Obligado - Site transferred from Vought to Obligado. 12/22/05 - Obligado - Meeting with Jeff Vought and John

MR. AVILA (Continued) **S106009941**

Urda. Recommends closure based on no odors detected in last site wisit. NFA with Koon's approval. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND Sangesland spoke with the homeowner - She says they have had a strong smell of oil in the house for several weeks. Today was a regular delivery, so she called the driver into the house to check. He said there was a leak near the boiler from an old oil filter canister. The filter was replaced last month by Petro and when the canister was put back, it apparently was cracked. Petro sent a service person to change the canister and he left speedie dry on the floor for a couple of days to soak up as much oil as possible (only 2 gallons?) Sangesland told the homeowner to leave the speedie dry for several days to absorb as much oil as possible. Then the material can be swept up, bagged in plastic and put out with her trash. Wash the floor with Dawn detergent. When the floor is as clean and dry as possible, the floor can be painted with epoxy paint to seal in any remaining oil vapor. 3/23/2004 Mrs. Prezzio called back to say the cleanup was complete and the oil problem has been taken care of. Spill Closed"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD 8/11/04. Tanks were already full. Stuyvesant Fuel made the delivery. As a result one of two 125 gal tanks developed a leak from the bottom. Oil contained within a tank room. USA Environmental (718-981-5710) was retained by the the homeowner Estella Job (347-351-6695) to perform a clean up. J.Krimgold ordered the RP to pump out the tank and clean up tank room. YK. 7/22/05. J.Krimgold spoke to USA Env. This job was completed the next day. Tank was removed and replaced after spill been cleaned up. NFA. "
Remarks: "WHEN MAKING AN OIL DELIVERY, DRIVER DISCOVERED THAT TANK WAS ALREADY FULL, CAUSING AN OVERFILL. TECHNICIAN IS USING A SPILL KIT TO CONTAIN, BUT IT APPEARS THAT SOME MAY HAVE ENTERED A DRAIN IN THE BASEMENT. "

VACANT AREA (Continued) **S106866839**

DEC Memo: "send contaminated soil letter 3/15/05 tipple recieved submittal revealing low level svoc's. e-mail sent requiring proper disposal and documentation when site excavation proceeds. There were only two addresses on record for the Fredrick Douglas Blvd betweeen 139 and 140, this vacant lot is located just north of the building on the corner of FDB and West 139th Street. 4/4/05 Tipple spoke with potential purchaser, site Block 02041, Lot 0052 correlate with 2601-2603 FDB. Database updated to reflect the updated address. Alexander Taylor BRP Development. 11/23/05 - Raphael Ketani. John Gerrity, Director Environmental Planning, NYC HPD ((212) 863-8052), called to find out whether I had any information on the site. I told him that this case hasn't been active for awhile. He said that a phase 2 was done by a consulting company because a bank wanted to know more about the property. The site is approximately 10,000 sq. ft. He told me that 4 soil borings were done, but the consulting company is telling him that more need to be done and some soil removal. He said that the only exceedences of the TAGM were chrysene, a couple of benzo SVOCs, and a dibenzo. He said that the results look like historical fill. I told him I agreed with his interpretation.
Mr. Gerrity said that as far as he knew there was nothing left in this open lot. I recommended that a geophysical survey be done just to make sure there are no hidden tanks, utilities, etc. He said he would have this done. 12/12/05 - I reveived a call from Kathy Devoe of Hydro Tech Environmental, Corp. ((631) 462-5866; FAX (631) 462-5877). She said Hydro Tech was waiting for a letter from DEC instructing them as to what needs to be done to finish the investigation of the site. I told her 2 soil borings were needed (center, and 25 feet left of center) and a geophysical investigation to make sure there are no buried tanks, pipes or structures. I told her I would send the letter tomorrow. 12/13/05 - Raphael Ketani. I sent the letter. 1/5/06 - Raphael Ketani. I called Ms. Devoe and she said that work was being held up because Hydro Tech had to submit a lot of paperwork in order to get permission to investigate the site as it is owned by the City. She said that there was just a little more paperwork to sign and then they can get ready to start the investigation. She believes the investigation will start next week. 1/25/06 - Raphael Ketani. I called Ms. Devoe. She said that the 2 soil borings were done on about 1/13/06. One boring was done in the center and one to the right of center. She said that there were SVOCs, but no VOCs. I told her to get me a copy of the analytical and the soil descriptions. She said she would. Ms. Devoe said that the geophysical testing was still to be done. She didn't know when this would take place. I told her to send me a report of the results. 2/17/06 - Raphael Ketani. I spoke to Ms. Devoe. She said the investigation was just completed wednesday, 2/15. She said one anomaly was found, but turned out to be a piece of metal and some pipes. She said I should get the report very soon. 3/6/06 - Raphael Ketani. I received the Phase II Environmental Site Assessment Report dated 2/16/06 from Hydro Tech. I will review it. 3/7/06 - Raphael Ketani. I reviewed the Phase II Report and determined that the documentation satisfied the requirements of the December 12, 2005 letter from the Department. Therefore, I am closing the case and sending the NFA letter that they requested."

Remarks: "SOIL ELEVATED LEVELS OF SVOC IN THE SOIL FOUND DURING TESTING FILL MATERIAL"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 10/10/95: This is additional information about material spilled from the translation of the old spill file: POSSIBLY HEATING OIL. 5/10/04 - AUSTIN - TRANSFERRED FROM TOMASELLO TO DEMEO - END 8/23/05 - Raphael Ketani. Case transferred to Jeff Vought. 07/25/08-Vought-Spill reassigned from DEC Vought to DEC Ketani as per DEC Austin. 3/30/09 - Raphael Ketani. I restarted the case today. I made an unannounced site visit to get an idea of what the case involved. The site is a series of three townhouses. Each has been divided up into several apartments. The townhouses are across from a park and the City College of New York. The townhouses at 419 and 417 West 141 Street both use oil. A patch was visible in the sidewalk which corresponds to a picture in the case file of a concrete patch being constructed many years ago after the removal of the contaminated soil. I rang the door bells and intercom buzzers to the buildings, but no one was home. 5/29/09 - Raphael Ketani. I spoke to Bonnie Riggi of the Office of the Attorney General regarding the 8/1/2001 Demand Letter. She said that they collected on the entire amount. According to the documentation in the 11/2/95 Winston

TOWNHOUSE (Continued) **S102150184**

Contracting pay package, the broken fill pipe and the associated fill box were replaced in front of 419 W. 141 Street and the spill was remediated where it affected 415, 417, and 419 West 141 Street. There is a 9/9/95 letter from A.R. Fuels to Winston Contracting indicating that the fill line and box were replaced. The 8/11/95 and the 11/27/95 remediation reports from Winston Contracting contain pictures showing the line and box replacement, the contaminated soil removal, and the rest of the remediation work that was performed. I brought this case to the attention of Randall Austin, Chief of the Spills Unit, and told him that I wanted to write the Final ISR and close the spill case. He said to go ahead and do this. 6/2/09 - Raphael Ketani. The Final ISR was submitted to Mr. Austin and Lou Oliva, Regional Attorney, for their signatures. They signed the FISR and it was forwarded to Dennis Farrar in Albany DER. As A.R. Fuels had replaced the broken fill pipe at 419 W. 141 Street, and as Winston Contracting had removed the old fill pipe and had cleaned up the spilled oil in #419 and in #417 and #415, and as the OAG had recovered the money that was expended to do the remediation work, I am closing the spill case. 6/15/09 - Raphael Ketani. Today I received a copy of a letter dated 6/11/09 from Mike Johnson of Albany Spills to Mr. Hasso of the Comptrollers office indicating that they considered the spill cleanup project to be complete. The letter was E-doc'd. "

DEC Memo:	"7/15/2008 TTF letter sent to: Robert Grace Robmill Realty Inc. 347 Convent Ave #A, NY, NY 10031 see eDocs 12/08/08 Atec Environmental sent a letter saying the following: Atec Environmental is a staten based Environmental Company dealing with all aspects of fuel oil storage tank maintenance. Dr. Robert Grace is the owner for the above referenced property. On june 26, 2008. Pro Test arrived at the above mentioned location and performed a System Test. of which failed. Dr. Grace called Atec Environmental for a second opinion. Upon commencement of starting the test it was observed by the tank tester that the fill line looked a little corroded. The fill line which run aboveground but covered by small driveway stones was corroded, and Atec as well as the tester felt this was very strongly the reasons to why the tank had failed the initial test. Atec Environmental promptly replaced the existing fill line from the tank to the sidewall. During our removal of the driveway stone we did not uncovered any liquid oil, nor did we find any evidence that at anytime the oil impacted the ground. Due to this fact no soil samples were taken. Attached you will find copy of the passing tank test report as well as a verity of photo's of the work performed. Case Closed. "

DER Facility ID:	349644
DEC Memo:	"4/20/17-Zhune spoke to Victoria from Protest Environmental. Victoria said the tank was tested and it failed with a dry leak. They sent the proposal to isolate the tank and retest it. 4/25/17-Zhune spoke to Victoria. Victoria said they are going to do excavation, isolation and retest this week. 4/25/17-TTF letter sent to; Robmill Realty Dr. Robert Grace 416 west 151 Street Apt 1A New York, NY 10031 9/12/17 TJD File review. Closure report submitted to PBS Unit (Falvey) and forwarded to Spill PM (DeMeo). As per report submitted by ProTest: On April 19, 20 17 Pro Test Environmental performed a tightness test on the above subject tank system and it failed with a combination wet/dry leak. On April 27th, Pro Test returned to isolate the tank from its associated lines. Technicians dug to uncover connections at the top of the tank. The connection to the remote fill line at the top of the tank was plugged. After isolating the suction and return lines, the partially isolated tank failed with a dry leak only. Breaking the concrete mat over the tank revealed the true dimensions of the tank. It was initially reported that this was a standard 3,000 gallon cylindrical underground storage tank. This tank is actually a square tank measuring 100 inches by 154 inches with a depth of 60 inches. Based on these direct measurements, the tank has a capacity of 4,000 gallons. Uncovering the whole top of the tank revealed that the petrometer gauge was disconnected from the tank. The tank was fully isolated including remote fill , vent line, stick line, supply and return lines. The manhole cover was regasketed and rebolted. The tank only passed a tightness test on May 3rd. Technicians returned on May 17th to begin repairing the piping. Due to landmark building permitting restrictions, the bad remote fill line under the city sidewalk was not able to be removed at this time. There was evidence of staining where the line crossed under the sidewalk but the extent of any contamination could not be assessed without removing a section of the sidewalk. A new remote fill line was installed to the fence line. Technicians installed a new vent line with vent alarm and vent cap. A new stick line with fill box was installed. New supply and return lines were installed. Work to replace the piping was completed on May 25th. A final system test was performed on June 5th and passed. Based upon the information provided by the contractor and the passing system test results following repairs, no further action is required at this time. All documentation has been uploaded to DECDOCS. Spill closed. "

DEC Memo:	"Spill transferred to Greco in July, 2005 as part of Spills Closure Initiative. 7/25/05 Called Axelrod Management and left a message for the property manager to call me back. 7/26/05 Axelrod Management returned my call, however, they appeared to be completely unaware that there property was associated with a release. Caller said he knows the area where the fill pipe is and he is certain any release would have been remedied. He also said he will check records from that time to see if he has any paperwork documenting the cleanup. JDG 09/22/05 I received another call from Axelrod Management. They will be checking with Castle Oil to see if there is any proof of remediation. They will call back on the 26th or 27th. 11/1/05 I called Axelrod Mgmt. at (212) 368-8110 to see if there has been any measures taken. I was told by a different person than I had originally talked to that I had better send something in writing. A letter will be sent giving 30 day notice. Property Shark shows the following contact information: Recent Title Document: Delano Village Associates, L.L.C. C/O Axelrod Management 720 White Plains Road Scarsdale NY 10583 Notice Address: Afp Forty One Corp 9 Park Pl Great Neck NY 11021-5030 Billing Address: Glendale Federal Bank 8435 N Stemmons Fwy Dallas TX 75247-3907 Recent Building Permit: BERNARD AXELROD 45 WEST 139TH STREET NEW YORK, NY 10037 11/3/05 Mr. Jay Axelrod contacted me and had further info. He is still attempting to address the situation. I will hold-off on the 30 day notice. JDG 11/30/05 Mr. Axelrod contacted me again to see what would be required to close the spill. I explained that past invoices for remedial work would be ideal, or he could take samples of the site as it currently exists. He said he would get back to me soon and hoped to wrap this up by the end of the year. JDG 12/14/05 I was alerted on the 14th of December that Mr. Axelrod has retained the services of an environemntal firm in order to close the release. JDG 1/04/06 Greco to retain project. 3/3/06 Consultant for Axelrod Management (Dorsen Consulting)sent in raw data from two borings and one well. The data looks good, however, the consultant will be sending in a final report seeking closure. JDG 5/18/06 I contacted Axelrod Management and was told that Mr. Axelrod's company had been bought out by Vantage Mgmt., and that the property manager's name was Mr. Paulson. Mr. Paulson was not at work that day. Also contacted Dorsen Environmental and asked to speak with Mr. Gallinger (who had been managing the project) and was informed that he has left the company. Dorsen is to get back to me with the new PM's name. I will call Mr. Paulson at a later date. JDG 5/22/06 Dorsen Environmental faxed a Subsurface Investigation report (Dated March 17, 2006). The report includes data that shows no

2300 5TH AVENUE (Continued) **S102149853**

significant impact in the vicinity of the release (the release is 12 years old and poorly documented, so the exact location is difficult to determine). Based on the data supplied, the recomendations of the consultant, and upon the age of the spill, the spill was closed. JDG 5/22/06 (see eDocs for a copy of the report) "

DEC Memo:	"12/4/14- Spoke to Ray Lara from PTC. He said they cleaned and emptied he tank. They tested the tank and failed. They are going to perform the isolation test. 2/20/15-Mark Salamack from PTC sent an email dated 2/9/15 with the following information. The one on Lenox Avenue and the one on 5th Avenue are both in the same complex called the Savoy...whose main address is 45 West 139th Street in Manhattan...these are both above ground tanks that were tested when they went from #6 oil to #2 oil...both had a problem with the way an electronic gauge was connected on top of each tank...there was no contamination or spilled oil in either case...they have both been retested and passed the tightness tests...as we have not been paid yet for the job we have not sent anything to you to get the spill #s closed. Based on the information that the gauge was repaired, there was no contamination or spill in this site and the tank system was retested and past the test this spill is closed"

DEC Memo:	"06/02/12-Zhune responded to this site. As per the owner Mr. Stwart of building 419 W 142nd street Water is coming from the back yard of building 19-Hamilton to the back yard of her neighbor at building 419 W 141 st street and then is coming to her basement. She said a month ago the DEP-Water Department use dying and traced back to 19-Hamilton. They found the water main broke. She also mention that DEP told her that the oil tank at 19-hamilton is leaking. During the inpection I found water continously seeping through the wall and black stain on the floor of the basement. There is no oil. 06/13/12-Zhune spoke to Viata mnanager of 19-hamilton building. she said tehy have a 5000 AST oil tank. the super checked and the tank is no leaking. There is no oil outside the tank. PBS #2-603829. Spill Closed. "

MULTI FAMILY DWELLING (Continued) **S112809640**

contact with soil. the tank was installed in May 1992. Lenox 137 Holding L.P. c/o Barberry Rose Management 1024 Broadway, Suite 202 Woodmere, NY 11598 Attn.: Lewis Barbanel PH. (516) 374-2888 (516) 374-6080 Fax (516) 374-4068 email: Lewis@brmnyc.com 2:30 PM:- visited site. met Aidan Brownlie. the site has one 5,000 gal #6 oil AST completely wrapped with cinder blocks. the tank is located in the boiler room at the rear end of the building, in northeastern corner. vent pipe is located outside the tank/boiler room. the fill port is located about 4 ft from the building's front foundation wall and the fill line runs underground in alley between the subject site and adjancent property at 131 W 137th St. about 4 ft of fill line is exposed in pit located just inside the alley entrance (about 4.5 ft from fill port). this pit also contains gas main valve. found #6 oil inside the pit, towards the sidewalk indicating leak in fill line which runs about 6 inches below surface. Aidan mentioned that gas lines were rebuilt inside the entire building and now they need to change the main gas line from street to the valve. when ConEd visited site before changing main line, they noticed oil in pit and refused to change their pipe until the spill issue is resolved as fill line runs in same area where gas line is located. Aidan mentioned that to change the gas line, the fill line area needs to be excavated. as such, suggested him to expose the leaking fill line and remove any associated contamination. informed him that the fill line must be tested after necessary repairs. he will talk to property owner and submit plan/schedule by this week. asked Aidan to check building codes for vent pipe location, as current vent pipe is far from fill port and not visible, if alley door is closed. during visit, spoke with building super also. super mentinoed that they get delivery of 1,000 gal every 5 days. Aidan Brownlie AEC Engineering Design & Construction Services PLLC. Ph. (212) 879-7300 Ext. 14 (631) 353-3370 (917) 658-9824 (C) Fax (212) 879-7302 email: aidan@aecengineeringdesign.com 02/04/13-Hiralkumar Patel. 12:46 PM:- received call from Aidan. he has spoken with property owner/manager and they will expose the fill pipe between the fill port and the pit. he will call back by 02/06/13 with work schedule. 03/06/13-Hiralkumar Patel. 4:08 PM:- spoke with Aiden. he mentioned that ABC tank performed cleanup on 03/04/13. he will call back with more details. 03/06/13-Hiralkumar Patel. 4:38 PM:- received message from Donna from ABC Tank. 03/08/13-Hiralkumar Patel. 11:02 AM:- left message for Donna. 03/19/13-Hiralkumar Patel. 11:04 AM:- received call from Donna. she mentioned that the fill line was replaced from fill port to the pit inside alley. she confirmed that there was no contamination under the sidewalk. contamination only noted near the pit and ABC tank removed impacted soil and dug down to bedrock so no soil left for sampling. asked Donna to submit letter report with summary of work performed and observations. received fax from Donna including closure letter. she mentioned that total of four drums of contaminated soil/debris was removed from the pit. she also mentioned that the pit was made of cement and was left clean and free of contamination. based on available information, case closed. 05/22/13-Hiralkumar Patel. 11:26 AM:- received call from Asia (646-472-6272), permit expeditor for ABC tank. she mentioned that during installation of new gas line, additional soil contamination noted. ABC tank applied for DOT permit, but DOT asked for DEC letter about cleanup requirements. 11:27 AM:- spoke with Donna at ABC tank. she mentioned that ConEd noted additional soil contamination, but area was backfilled before ABC tank visit the site. now ABC tank is

MULTI FAMILY DWELLING (Continued) **S112809640**

planning to open two sidewalk flags to do cleanup of any contamination. Donna mentioned that contamination noted couple of weeks ago. based on this information, case re-opened. 11:31 AM:- spoke with Jason (212-839-9577) at NYC DOT. he mentioned that due to fake permits being pulled with fake spill numbers, DOT wanted to confirm about open spill number on-site. informed Jason that based on available information, subject spill case is re-opened. he confirmed that no further document needed from DEC. 11:35 AM:- spoke with Asia and informed her about discussion with DOT. suggested her to print out DEC website spill search result, if needed. 12:00 PM:- spoke with Aidan and discussed about findings of additional soil contamination. he was unaware of this and will talk to ConEd and ABC tank. Aidan will call back with more information. 06/04/13-Hiralkumar Patel. 10:37 AM:- received call from Aidan. he mentioned that DOT permit will received this week. 06/05/13-Hiralkumar Patel. 3:55 PM:- received message from Aidan. he mentioned that ABC tank has already opened sidewalk flags and removed approx. 8 drums of contaminated soil. 06/06/13-Hiralkumar Patel. 9:15 AM:- visited site. met Aiden. found sidewalk excavation covered with wood plates. plumbing crew removed plates for inspection. area between the recently installed fill port and building's foundation wall looked fine. some stains on foundation wall. found another cut open pipe parallel to active fill line. the old line goes towards the curb, which could be old fill line. found some oily soil near this old fill line. Aiden mentioned that old line and associated contamination will be removed. 06/07/13-Hiralkumar Patel. 10:34 AM:- received call from Donna. she mentioned that the old fill line was running to the curb. ABC tank has removed the old fill line and will continue cleanup. 06/11/13-Hiralkumar Patel. 1:21 PM:- received call from Wilson (631-889-0556) from ABC Tank. they finished excavating contaminated soil. they excavated about 4 ft wide area from sidewalk curb (where old fill port was) to building's foundation wall. Wilson mentioned that excavation is about 4 ft deep. 1:59 PM:- received email from Donna including three pics. soil in excavation looks fine. 2:07 PM:- spoke with Wilson. he has covered the excavation and will backfill once approved by DEC. 3:20 PM:- spoke with Donna and scheduled site inspection at 10 AM tomorrow. 06/1/13-Hiralkumar Patel. 9:40 AM:- visited site. met Wilson. inspected excavation under sidewalk. the old fill port was about 4 ft from sidewalk curb. no stained soil or petroleum odors noted in excavation. based on observations, no further work needed. 12:26 PM:- spoke with Donna. informed her that no further investigation needed and case is closed. 07/18/13-Hiralkumar Patel. 3:08 PM:- received call from Donna requesting copy of spill closure letter. 3:16 PM:- sent spill closure letter to Mr. Barbanel. letter emailed to Mr. Barbanel, Donna and Aiden."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL / / : FIRE DEPT. ON THE SCENE. D.E.C. ON THE WAY. 2/18/04 -AUSTIN - REASSIGNED FROM TOMASELLO TO ROMMEL 7/2005 Spill transferred to Greco as part of Spills Closure Initiative. A quick review indicates this spill cannot be easily closed. JDG Owner appears to be: Gamma Precision Corp Address: 256 E 138th St, Bronx, New York 10451-6428 Telephone: 718-402-6333 Greco spoke with Mr. Imre Mersich, the former owner and current operator of Gamma Precision. Mr. Mersich claims that the NYSDEC was involved in a cleanup of the gas station next door and that cleanup was finished several years ago. He also states that he is in the basement often, and no-longer smells any problem. I will need to check with region 2 to see what cleanup efforts were taken. JDG 7/28/05 12/29/05 The property next door is the home of two open spills (No. 9101008 & No. 9101289) which are being addressed under PIN 91214. These spill(s) are apparently the cause of problems detected previously at 256 East 138th St. Since recent contact with the operator of the building at 256 East 138th Street indicated that the impacts to that property have been addressed satisfactorally, this spill is being closed. JDG "

Spiller Address:	Not reported
Spiller Company:	999
Contact Name:	CHRIS KENDROD
DEC Memo:	"3/10/2016: Rashad 323 Convent Ave does not have an alternate address. No additional spills or PBS registrations found for site. Chris Kendrod is with NYC DEP not EPA as stated in spill report. She said she responded to site and that it seems that an overfill occurred, the daughter did not note any spill or odor in home. Chris said that the spill was on the sidewalk and she will be sending me a few photographs. Called Superfuel 12:35pm 929-376-5446 and spoke to Rosanne, she took message and said I will be receiving call in about an hour. Tim called from Superfuel 1:22pm and I let him know that there was a minor spill outside of 323 Convent Avenue in a flower box. I directed him to remove contaminated soil and confirm with homeowner that there are no issues in the home. I also told him to send me an email with post clean up photo and confirmation that homeowner noted no issues by the end of the day. Tim called back 3:27pm and said that they have removed affected soil and have cleared the fuel line pushing the remaining fuel into the tank. He will be uncovering fill line tomorrow to see if there is an issue with the check valve and he will be raising fill box so that oil does not back up and seep out if this problem occurs again. Tim confirmed no issues were in home. 3/11/2016: Rashad Received email from Tim: Attached are before and after photos of minor oil leak at the fill box of 323 Convent Ave. We removed 4 deep of soil 24 around fill box until we found clean soil. We relocated fill box and made it 20 higher to avoid this leak from happening in the future. There is no oil spill at vent or in the basement. We trust this will meet with your approval. Tims email address is tim.superfuel@verizon.net. Two photos were attached, they have been uploaded to D2. As per photos and confirmation there are no issues in home, spill will be closed."

DEC Memo:	"03/14/07-Hiralkumar Patel. received during off hours duty. spoke with Erik, property manager. asked him to hire contractor for initial cleanup to prevent any vapors inside building. received call from Anthony from PTC. they did little cleanup. found oil seeping into basement through wall where fill line enters into building. fill line runs underground under sidewalk for about 8 ft. cleaned out oil on surface in basement. visited site. met Jose (646-228-6255), building super. site has 3000 gal # 4 oil tank enclosed in concrete box. found oil leak from wall where fill line enters into building. no odors inside building. Jose noticed little oil from same location about month ago after oil delivery and after last delivery, which was yesterday morning, he noticed more oil coming into building. 41 residential units in building. found fill box sealed with cement. fill line leaked. PBS #: 2-000442 Arik Lifshitz 341 E 10th Street New York, NY 10009 Ph. (212) 673-2300 Fax (212) 673-2999 spoke with Mr. Lifshitz. asked him to renew tank registration as it expires on 04/17/2007. sent letter to Mr. Lifshitz requiring tank test, soil/groundwater delineation and endpoint sample. letter faxed to Mr. Lifshitz. 04/05/07-Hiralkumar Patel. left message for Arik for updates. 04/12/07-Hiralkumar Patel. received message from Arik. spoke with Arik and Ralph. Ralph told that they hired PTC for required work. he will call PTC and ask them to submit report. asked Ralph to renew thier PBS registration. 06/04/07-Hiralkumar Patel. left message for Arik. 07/24/07-Hiralkumar Patel. spoke with Arik. he will check with property manager, Ralph for any reports. left message for Ralph. 08/27/07-Hiralkumar Patel. spoke with Ralph at management. asked him to submit report by Aug. 31st, 2007. 08/31/07-Hiralkumar Patel. received call from Mark from PTC. he will send report next week. 10/11/07-Hiralkumar Patel. left message for Mark at PTC. spoke with Ralph. he will talk to Mark and will send report. 10/31/07-Hiralkumar Patel. spoke with Ralph. asked him to submit report by Nov. 9, 2007. 11/02/07-Hiralkumar Patel. received report from Mark. they found fill line leaking. replaced fill line and found tank system tight. PTC took eight soil samples from borings and found no contamination. no indication of any excavation done at site. report missing following: - sampling depth - boring logs spoke with Jose, building super. as per him, they installed new fill box on foundation wall and never opened sidewalk. 11/26/07-Hiralkumar Patel. visited site. found patches on sidewalk and bore holes inside basement near tank location. borings on sidewalk are done about foot away from original loation of old fill line. left message for Ralph. 11/28/07-Hiralkumar Patel. received message from Ralph. spoke with Ralph. asked him to submit sampling depth. also asked him to open area where old fill line enters into building. asked Ralph to call once then open area. 11/30/07-Hiralkumar Patel. received call from Mark from PTC. he will open wall area where old fill line enters into building. he will also

RESIDENCE (Continued) **S108466713**

fax updated report with missing sampling depth. received fax from Mark with updates that samples inside building were taken at about 1 inch depth from bottom surface of concrete layer. spoke with Mark again. explained him that oil inside building was on surface but leak started from fill line and the department requires depth of samples taken on sidewalk alongwith depth of old fill line.
01/31/08-Hiralkumar Patel. spoke with Ralph. he doesn't know where new fill box is and whether any excavation done along old fill line. Ralph will ask Mark to call back. spoke with Mark. asked him to provide scaled site map with sampling location and depth. also asked to open area of wall from where old fill line enters into the building. 02/21/08-Hiralkumar Patel. spoke with Ralph about expired PBS registration. he mentioned that they already submitted form but due to missing information, it got delayed. spoke with Mark. they will open old fill line area probably on 02/26/08.
03/03/08-Hiralkumar Patel. visited site. PTC opened area where old fill line enters into building. no contamination found under sidewalk. old fill line located about 8 inches below grade. based on observations during site visit, case closed."

DEC Memo:	"12/24/14-Zhune spoke to Bob Risseto 201-232-1214. Bob said the tank coverted from #6 fuel oil to #2 fuel oil. They had a delivery a week ago. The superintendent discovered the sipll today at 11:00 am. A line from a pre-heater was leaking and spilled approximately 100 gallons of oil into the sump-pump located under the boiler. The pump was disconected. Spill is contained in the sump. As per Bob there is no oil odor in the building. The boiler company (SNS Energy Distribution) is trying to clean the spill. Mattew SNS Energy Distribution 631-704-5709 12/24/14-Anthony Lara from Riteway called and said they are on the way to clean the spill. 12/24/14-Anthony Lara called and said they pumped out the oil from the sump. The spill is cleaned. They inspected the building and there is no odor in the building. A spill closure letter will be send. 12/29/14-Bob Risseto called and said everything has been cleaned up. He also said they hired JLC Environmental to check and make sure cleand up was perform correctly. 12/20/14- Zhune spoke to Jerry Tiss from JLC Environmental. He said Riteway really did a good job. Spill Closed."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY TRANSFERRED FROM Y.KRIMGOLD TO KOLLEENY TO I. ISLAM. 6/20/06- The site's soil and GW are under remediation by LiRo Enginers by installing SVE system and implementing monitoring program to document natural attenuation of dissolved phase contaminats respectively since 2004. Reviewed the Jan-Mar/05 quarterly report. The system performance data show effectiveness of soil remediation. The GW monitoring data also show substantial improvement. Soil sampling will be scheduled when influent air sampling results suggest the SVE system no longer effectively recovering VOCs and routine

CONVENT GARDENS DPR -DDC (Continued) **S102663768**

system monitoring to continue.- II 8/30/05- Reviewed the Apr.-Jun/05 monitoring report. The SVE system collected approx. 12.1 pounds of VOCs during the monitoring period. April 2005 groundwater sampling results showed a northward shift in dissolved phase contamination from MW-3 to the area of MW-4. However, overall dissolved phase contaminant concentrations were observed to decrease substantially in compared to previous site-wide levels. Routine monitoring (monthly) of SVE system and GW sampling(quarterly) will continue. Copied the report in the eDoc folder.- II 12/2/05- Reviewed the Jul-Sept/05 monitoring report dt. Oct. 18/05 submitted by LiRo Enginers. July 2005 GW sampling results indicate that dissolved phase contaminant concentrations continue to decrease at the site under natural attenuation. The only contamination identified at the site during the July 2005 GW sampling were minor exceedances of NYSDEC quality criteria for benzene (4 ppb) and ethylbenzene (14 ppb) in one well only out of the four wells sampled. The SVE system collected only 0.1 lbs of VOCs during the monitoring period and produced substantial induced vacuum levels at the site. LiRo recommends continued operation and monitoring of the SVE system. LiRo also recommends advancing four soil borings (location included in the report) in support of soil closeout once two consecutive rounds of influent system air sampling indicate a low volume of VOC capture. LiRo's recommendation is hereby approved. Filed the report in the eDoc folder.- II 04/05/06: This spill transferred from I. Islam to Q. Abidi. Reviewed the Quarterly Monitoring Report for Oct - Dec. 2005, dated January 20, 2006 submitted by LiRo Engineers. LiRo advanced four soil borings in Feb 2006 and they will send the report with sample results in a week. LiRo recommends discontinuation of groundwater monitoring at the site, as the latest groundwater results came out clean. Sent email to DDC on April 5, 2006 approving LiRo s request to discontinue groundwater monitoring. - QA 08/25/06: This spill transferred from Q. Abidi to J. Kolleeny. - JK 09/06/06: Reviewed LiRo's Quarterly Report for Jan.-March 2006. System monitoring data indicate SVE system has reached limit of effectiveness. Groundwater sampling in March '06 showed ND in all three on-site wells. Confirmation soil sampling in Feb. '06 showed no contamination in 3 of 4 boring locations; however, boring LBR-2, near south end of closed-in-place 4K motor fuel UST, showed highly contaminated soil from 10 to 13 feet below grade, with total VOCs of 1,404 ppm in 11-12 foot interval. Nevertheless, downgradient well MW-3, which in past has showed worst GW contamination of 3 on-site wells, has been ND for 2 consecutive sampling events, suggesting residual soil contamination is not impacting GW quality. Options for addressing residual soil contamination are limited; SVE system appears to have done as much good as it can, excavation would be difficult due to depth of contamination and presence of adjacent closed UST, and would likely damage nearby gazebo in the park. After discussion with Koon Tang, it was agreed that problems with attempting to excavate soil outweigh potential benefits, and that since contamination is localized and no longer impacting groundwater, no further remedial action is warranted. However, if usage of this property were to change, presence of residual soil contamination should be taken into consideration, especially if site is ever developed with a building, in which case there may be a vapor intrusion hazard. Closed spill and issued NFA letter (in eDocs folder). - J. Kolleeny "

DEC Memo:	"6/22/06 - Raphael Ketani. There is an active 5,000 gal. tank on site. It is listed as PBS case #2-610477 and contains #2 oil. I received a FAX of the water and soil analyticals for samples GW-1 to GW-5 and SB-1 through SB-6 taken from 6/19 to 6/20/06. The results show no hits or only a few hits under TAGM 4046 for GW-1 to GW-4. GW-5 had 7 VOC hits slightly above TAGM and 1,2,4-trimethylbenzene at 63.5 ppb and naphthalene at 66.4 ppb. SB-1 to SB-3 had either no hits or only a few hits below TAGM. SB-4 had 5 VOC hits - all well above TAGM. SB-5 had 7 VOC hits (from below to slightly above TAGM) and O-xylene at 3180 ppb and naphthalene at 27500 ppb. 7/14/06 - Raphael Ketani. I tried to call Mr. Myers of ATC (631) 451-0617, but could only leave a message. 7/18/06 - Raphael Ketani. I tried calling Mr. Myers, but could only leave a voice message. 8/2/06 - Raphael Ketani. I tried calling Mr. Myers, but could only leave a voice message. 8/4/06 - Raphael Ketani. Mr. Myers called me back. He said he knows he has to get moving on this site and he stated he will. 8/21/06 - Raphael Ketani. I contacted Mr. Myers. He said he hasn't forgotten about the site, but things have been getting in the way. He said he will get me documentation. 9/14/06 - Raphael Ketani. I received a message from Peter Kolodner of ATC Associates today (212) 353-8280, ext. 285. He said he wanted to talk about the contamination. I tried returning his call, but could only leave a voice mail. Mr. Kolodner called me back and I told him that sites GW-5, SB-4, and SB-5 needed water removal and soil removal, respectively. He said he will tell this to the client. Mr. Kolodner called me again. He said that it would be best if DEC would send an official letter to the present owners stating what needs to be done and to c-c ATC and the prospective new owners, Community Preservation Corporation. The addresses to send to are: Jeff Ewing, UHAB (owner), 120 Wall Street, NY, 10005 Peter J. Kolodner, ATC Associates, 104 E. 25 Street, NY, 10010 Naim Brown, Community Preservation Corporation (CPC; prospective new owners), 3154 Albany Crescent, Bronx, 10463 I sent the letter today. 9/18/06 - Raphael Ketani. Mr. Ewing called today. He said that UHAB is not the present owner. He said they are the sponsor and will close on the title and put together a low income housing development plan. He added that UHAB is the FUTURE owner. Mr. Ewing said that the lender is Community Preservation Corporation and the present owner is Neighborhood Restore. He said to send a letter to: Errol Cooper (212) 584-8981, ext. 19 at Neighborhood Restore, 150 Broadway, 21st Floor, NY, 10006. I sent the letter. 9/25/06 - Raphael Ketani. Mr. Cooper called me back. He said that my letter was the first that he heard there was contamination at the site. He said he didn't have a copy of the report or know what to do. I told him that the soil and water need to be cleaned up. He asked who he can contact so that he knows where to do the cleaning. I told him that he can contact the prospective buyer's environmental company. I gave him the phone number. He said he will have the site cleaned up. 9/29/06 -

RETAIL/RES. BLDG (Continued) **S108057687**

Raphael Ketani. I spoke to Anton Popovik of 14K Management (914) 237-1600 regarding the contamination at the site. I mentioned to him that the groundwater has to be collected, resampled for levels of analytes and the results sent to DEC. I also told him that the soil will have to be removed at SB-4 and SB-5, resampled and the results sent to DEC. He said he will have this done. 12/19/06 - Raphael Ketani. I tried contacting Mr. Popovik, Mr. Myers, and Mr. Kolodner, but could only leave voice mails. Mr. Popovik called to say that he is aware that the site needs to be cleaned up and will contact the remediation company. Mr. Kolodner called to say that ATC Associates submitted 3 proposals to Neighborhood Restore and is waiting for them to get back to him. Later, Pam Oelerich (212) 432-8545 of the NYC office of ATC tried to contact me. I left a voice mail for her. 12/21/06 - Raphael Ketani. Ms. Oelerich returned my call. She said that she is the lead person at ATC Associates and that her company is working for CPC. She said that ATC presently has a proposal with Neighborhood Restore (NR) to do excavation first in the vicinity of SB-4 and SB-5 and then take post excavation samples. I told her that plan would be acceptable to the DEC, but the sample results may indicate that more digging will be necessary. She said she understood this and she felt that NR would be agreeable to this, also. I told her to send me the plan that NR agrees to, I'll review it, and respond back with a Nay or Yay. She said she would do this. 3/7/07 - Raphael Ketani. I spoke to Ms. Oelerich and asked her why DEC hadn't received the plan for the remediation work. She said that she wasn't sure why as the plan was approved by Neighborhood Restore a while ago. I told her to send me the plan. I asked her when the remediation would take place. She said when the construction takes place. I asked her when that would be. She said she didn't know. I told her to send the DEC the manifests and the end-point results and to tell her client that the DEC is very concerned that the cleanup is not taking place in a timely manner. She said she would contact Neighborhood Restore. 3/14/07 - Raphael Ketani. I received the 1/9/07 soil removal and groundwater sampling plan from Ms. Oelerich by e-mail. 3/16/07 - Raphael Ketani. I spoke to Ms. Oelerich and asked her whether the soil and groundwater samples would be analyzed via methods 8260 and 8270. She said Yes. In that case, I told her the plan is acceptable to the Department. I asked her to get started as soon as possible. 5/9/07 - Raphael Ketani. I tried to reach Ms. Oelerich (o-le-rick) (212) 432-8545, but could only leave a message regarding the soil sampling. Ms. Olerich returned my call and left a message that the property is undergoing a transfer of ownership right now. She stated that once the transfer is completed in the end of June of 2007, then UHAB will take posession and do the remediation. 6/13/07 - Raphael Ketani. Ms. Olerich sent me the 6/5/07 Proposal for Soil Excavation Oversight and Groundwater Sample Collection plan by e-mail. I reviewed the plan and told her that the soil and groundwater sampling part of the plan were fine and to test via methods 8260 and 8270. 7/25/07 - Raphael Ketani. I spoke to Ms. Olerich. She said the closing/transfer of ownership just took place. She said that NR just gave her the O.K. to go ahead and do the remediation and sampling. 10/17/07 - Raphael Ketani. I tried to contact Ms. Oelerich, but could only leave a message. 10/18/07 - Raphael Ketani. Ms. Oelerich called to say that the soil at SB-4 and SB-5 was dug out and end point samples taken. She said that the water that is present on site is not groundwater, but is rain water that collects in a little depression. She said that I should be getting the investigation report soon. I

RETAIL/RES. BLDG (Continued) **S108057687**

told her the tank is still listed as active in PBS. She said she will take care of it. 10/31/07 - Raphael Ketani. Today, I received by e-mail the Soil Excavation Oversight report dated 10/31/07 from Ms. Oelerich. I reviewed the report which contained analytical results for three soil samples that were taken from the excavation hole sidewalls in the vicinity of SB-4 and SB-5. All three sample analyticals were almost entirely non-detect with only a few analytes having hits that were very far below the TAGM limits. I called up Ms. Oelerich and asked her about the tank. She said they had it looked at and it is in good shape. So they are using it. Based upon the 10/31/07 Soil Excavation Oversight report and my conversation with Ms. Oelerich regarding the tank, I am closing the spill case. 11/7/13 - Raphael Ketani. Mr. Chul Gugich (212) 479-3378/gugich@uhab.org called requesting the remediation report for the site. I sent it to him by e-mail. "

Remarks: "Soil testing and groundwater tests were taken on 6/12/2006. The results came in today 6/22/06 and showed contasmination in both groundwater and soil. Unknown who is doing the clean up."

DEC Memo:	"Duplicate spill number (0712836) was called in by building super/manager Jose Munoz 516-574-1415. Says 5 gal was in the sump pump and in sewer - spill has not been cleaned Property Manager Winton Knight cell 516-690-1815 Gillman Management (Nassau County) Manager says ABC Tank pulled the bad old tank 3 weeks ago. 03/07/08-Hiralkumar Patel. visited site with DEC Hasan. met Jose, a building super. Jose is working for last five years. site has 3000 gal #6 oil tank. tank is located in one corner of tank room so one side and one end of tank is covered by foundation walls and another side and end is covered by concrete wall. tank is currently empty. found oil in sump in boiler room. sump pump found disconnected. boiler room is located in sub-sub basement. boiler room floor is about 7 ft deeper than tank room floor. Jose first noticed oil spill at entrance of boiler room through wall between tank and boiler room. spoke with Donna at ABC tank. they responded after initial spill. they removed part of concrete around tank and found holes in tank. ABC tank removed oil from tank and cleaned inside tank. ABC tank cleaned tank room surface also and left site on 02/04/2008. they have submitted proposal for tank removal, but haven't heard back. site is currently using temporary tanks. found about 5-7 gal oil on tank room floor. this could be leftover oil around tank, between tank and concrete wall, which is now seeping out. no oil seepage found through any tank room wall, except one at boiler room entrance. no odors noticed in Jose's apartment, who is living in basement. no vapor complaints from tenants. Jose Munoz **building super** Ph. (516) 574-1415 PBS #: 2-609847 subway tunnel running in front of building. spoke with Mr. King, building manager. he claimed that there is no spill at site. explained him situation and asked him to clean oil spill from tank and boiler room surface by end of March 10, 2008. also asked him to provide company's name, who will remove tank and contamianted material, and work schedule by end of March 14, 2008. alternname addresses: 81-91 Edgecombe Ave, 336-340 W 139th STreet, 572-576 St. Nicholas Ave Winston King 574 St. Nicholas Avenue Assoc. c/o Gilman Management Corp. 51-55 Watermill Lane Great Neck, NY 11021 Ph. (516) 764-0226 (O) (516) 690-1815 (C) Fax (516) 536-4650 sent letter to Mr. King requiring immediate cleanup of surface spill inside tank and boiler room (documents must be submitted by 03/10/08), soil delineation inside tank/boiler room and endpoint samples. letter faxed to Mr. King. received call from Donna from ABC tank. they are going for surface cleanup on 03/10/08. letter faxed to Donna (Ph. 718-272-2800, Fax 718-272-3147) at ABC. 03/11/08-Hiralkumar Patel. left message for Mr. King. 03/18/08-Hiralkumar Patel. spoke with Mr. King. ABC tank working at

APRT (Continued) **S109060276**

site. left message for Donna at ABC Tank. 03/20/08-Hiralkumar Patel. received call from Donna. they removed vault around tank and found some saturated stuff behind and below tank. will meet to Mr. King for further work. 04/03/08-Hiralkumar Patel. received call from Donna from ABC tank. they disconnected tank and rolled over to another corner in tank room. found heavily contaminated debris under tank. they stopped work as owner hasn't paid anything yet. as per technician from ABC tank, another boiler company was cutting tank with oil on floor around it and owner is planning to install new tank. visited site. found crew from JD Boiler working at site. they were cutting tank out. walked inside tank room and found floor mostly in good condition. no odors noticed. found oil in sump and sump pump was connected. unplugged sump pump. also found bucket filled with oil under filter on supply line. JD Boiler Jose Dia Ph. (646) 773-1165 spoke with Mr. King. asked him to clean sump and area around it. also asked to repair/replace filter on supply line, as might be leaking. asked Mr. King to call for tank room inspection, once they remove everything. no tank should be installed prior to final inspection. spoke with Jose Dia at JD Boiler. asked him to contact once tank and other stuff removed from tank room. 04/25/08-Hiralkumar Patel. received message from Mr. King. they finished cleanup inside tank room. 04/28/08-Hiralkumar Patel. visited site. JD boiler removed tank and cleaned floor. found tank room floor in good condition (no cracks noticed). no odors inside tank room. minor stains left on wall. some oil stains found on wall where fill line enters into building. old fill line runs about 6 ft under sidewalk. asked Mr. King to check area under sidewalk. they will remove old fill line and will remove any contaminated soil. they cleaned sump and replaced leaking line that goes from filter to burner. spoke with Jose at JD boiler. asked him to check old fill line area while new tank installation. 08/18/08-Hiralkumar Patel. spoke with Jose at JD boiler. they installed new tank and replaced fill line. no contamiantion found along underground fill line. spoke with Mr. King. asked him to submit report. 08/26/08-Hiralkumar Patel. received letter from Allstate ORC. they removed contamianted material from tank room and powerwashed the room. doesn't include disposal manifests. spoke with Thomas Warden at Allstate ORC. asked him to submit disposal manifests. Thomas Warden AllState O.R.C. Ph. (973) 696-3122 09/08/08-Hiralkumar Patel. received disposal manifest. based on submitted documents, case closed."

Remarks: "TANK WAS LEAKING FOR A REALLY LONG TIME AND HAS BEEN REMOVED BUT NEVER CALLED IN AND NEVER CLEANED UP AND WENT INTO SEWER SYSTEM"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD 5/6/2004 Sangesland spoke to Mark Salamack at PTC. He said there was a fuel delivery on 5/5 and today the super saw oil coming out onto the basement floor. The existing tank is wrapped in concrete and oil is coming out from under this wrap. PTC will set up temp tanks on 5/7. Then they will drain the existing tank, pull it out (along with all the lines) and reinstall a new tank/lines system. During this process PTC will determine if any spill occured below the basement floor. If there is a contamination problem, they will clean it up and submit manifests and endpoint samples as required. 04/13/06- Case was transferred from Jake Krimgold to Koon Tang. 11/03/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. Called Mr. Mark Salamack (PTC Company) at (718)624-4842 and talk to Ms. Dianna she said PTC Company only did Tank Cleaning for J & M Reality survices (212)721-0424. -QA 11/17/06: Called J & M Realty at (212)721-0424 and left message to call me back regarding information of the spill. -QA Called Mr. Mark Salamack (Petroleum Tank Cleaner) at (718)624-4842 and talked about the spill. He said that he did only Tank Test. He said tank test was failure. He will try to send me Tank

APARTMENT (Continued) **S106471583**

Test failure report. Rest other work who did that PTC do not know. -QA 11/30/06: Called J & M Realty at (212)721-0424 and talked to Mr. Jerry he said. This spill is cleaned up. He is going to fax me closing confirmation letter to close the spill. -QA 12/13/06: Mr. Jerry Edelman, Agent (J & M Realty Services Corp.) sent a closing confirmation letter in which he has mentioned that cause of the spill is a small amount of oil was released in to the concrete alley when the driver of the truck flushed out the delivery line with air. According to Mr. Jerry spill was promptly cleaned up using and oil absorbing compound. According to Mr. Jerry spill is cleaned. -QA 01/02/07: Called Mr. Mark Salamack and talk about the spill. According to Mr. Mark Salamack (PTC), when he went to see the spill oil was out of the tank in the basement. It could be the cause of overfilling, could be leaking of tank. Tank should be removed and soil should be checked soil underneath the tank. Called J & M Realty (212)721-0424 and talked to Mr. Jerry Edelman he said that he will send a letter mentioning the actual reason of the spill 02/05/07: Called Mr. Jerry Edelman at (212)721-0424 extension 13 and left message to call me back to discuss the spill. -QA 06/21/07: Called Mr. Jerry Edelman at (212)721-0424 extension 13 to discuss regarding spill. He was not there talked to Mr. Victor he said he will talk to Mr. Jerry about it. He will find out about the Tank Test Report (tank must be tested every five years). After getting that he will call me back. -QA 09/13/07: Called Mr. Jerry Edelman to discuss regarding present status of the spill and to send the tank test report. He was not there, left message to call me back. -QA

---------- 6/25/08: Reassigned from Vadim Brevdo to Kartik Chanda. (Chanda) 8/5/08:Chanda has reviewed this spill related documents and sent a certified letter to RP (Jerry Edelman, J&M Reality Corp), requiring that a letter or report must be submitted to DEC by 9/20/08 for review and approval. (see eDocs) 02/06/2012 - Brevdo - Review of the project information available demonstrated that there is no documented subsurface contamination that resulted from the alleged spill. According to project records of 12/13/2006, the cause of the spill was a small amount of oil release into the concrete alley when the driver of the truck flushed out the delivery line with air. According to J&M Realty Services Corp. the spill was promptly cleanup up using an oil absorbing compound. With the lack of documented subsurface contamination I do not feel there is sufficient rationale to pursue further investigation of this spill event, let alone conduct enforcement action. Spill closure is appropriate. Spills is closed effective February 6, 2012. "

Remarks: "tank is wrapped in concrete,doesnt know if it has holes in it,it is leaking out onto the ground"

Contact Name:	ERIC TELEMAQUE
DEC Memo:	"Probably 2-1,000 gal tanks - Found product in borings around tanks. Proposal to either pull the tanks now while the building is in place vs waiting for the building to be knocked down first. Building/Lot is being sold and purchaser is deciding which option would be best. Either way Emteque is planning to prepare/submit a Remedial Action Plan. They are planning on pulling the tanks, removing the impacted soil and installing monitoring wells in the area. Then a series of groundwater samples taken over time to prove the area is clean. 5/2/12-Vought-Received call from Eric Telemaque (Ph:212-631-900 email:eric@emteque.com) and you are working for owner. Suspected three tanks (three anomolies), one below ramp and two below basement slab. One or both tanks below slab possible leaked in northeast corner of property. RAP will be submitted. Another site immediately adjacent within same block and lot will be developed along with property. Groundwater at 17-18'bg. Property has not been sold yet and will not be developed for a few months away from foundation placement. RAP will sumbmit will include tank removal and endpoint samples. Basement excavation will be left open and product will be vacuumed and remnants treated with Regenox. Telemaque will submit RAP by 3/15 which will also include provisions for IRM if significant free product and surrounding area site plan. 6/18/12-Vought-Reviewed Hazardous Materials Remedial Action Plan dated May 2012 and prepared by Emteque. Plan prepared for: Mr. Michael Price Icon Parking 211 East 38th Street Ground Floor New York, NY 10016 Ph:(212)686-8663 email:mprice@iconparking.com Site is a commercial parking garage with one level on grade and one level below grade. Proposed use includes demolition of existing structures with redevelopment of the site . GPR survey performed as well as preparation of a Phase II report in November 2011. Vought called Telemaque and left message to send Phase II Report. One anomaly was discovered outside the lower level concrete driveway and two possible USTs were also noted on the north end of the parking garage. Fifteen Geoprobe borings installed with six converted to temporary monitoring wells. Select soil samples revealed the presence of VOCs and SVOCs but except boring B-3, all were below unrestricted SCO. MW2 also noted groundwater exceeences of VOCs. Lab data suggests that the contamination to groundwater and

COMMERCIAL PROPERTY/PARKING GARAGE (Continued) **S111456729**

soils in the north east corner of the basement may have come from GPR anomolies which they believe to be USTs. Proposal for registration of tanks with PBS, removal of liquid and sludge for tanks, tank cutting and removal of steel and contaminated soil and free product and collection of endpoint samples. For lower level tanks, proposal for no bottom soil endpoint as bottom in groundwater. Proposal for collection of baseline groundwater sample and RegenOx application if no free product is noted. Proposal for monitoring groundwater in the excavation for dissolved oxygen, pH and redox every 30 days for a ninety day period. Construction Health and Safety Plan also included in RAP. Plan notes that a Remedial Closure Report will be submitted following implementation of the RAP. Vought drafted DEC requirement letter and will finalize upon receiving and reviewing Phase II from Emteque. 6/19/12-Vought-Received email from Emteque (Lynelle Cardone) with soil analyticals and a site plan from November 2011 but no soil boring logs or sampling depths of the soil samples are provided and as such DEC cannot determine if RAP is sufficient to cover the entire area as per the investigation results. Vought called Emteque (Cardone) and asked her to send in boring logs and complete report or at a minimum depths of soil samples collected. Soil analyticals show: 5300ppb ethylbenzene(B3 unknown depth), 1300ppb xylene(B3 unknown depth), 19000ppb napthalene(B3 unknown depth). Groundwater analyticals show: 260ppb benzene(MW2), 100ppb toluene(MW2), 650ppb ethylbenzene(MW2), 222ppb xylene(MW2), 430ppb napthalene(MW2). 6/21/12-Vought-Received email from Telemaque on 6/20 that This is what I have in my files from the Driller. Please let me know if you need additional information and please let me know once you have had a chance to review the RAP so that we can implement. We are prepared to file dwgs with DOB on Monday to pull permits and get the work scheduled. The borings with the deeper depths came from the property to the west which is slab on grade. The shallow borings came from the basement of the property at 155th Street, where we noted contamination. Vought sent letter to Price for review of Phase II and RAP and letter did not approve of Summary of Remedial Actions #11, #12 and 15 (for Regenox application) but letter did approve all other Summary of Remedial Actions. Letter also required submission of development plans for site, collection of bottom endpoint groundwater sample, determination of flow direction and installation of a downgradient well, submission of a surrounding area site plan and quarterly groundwater sampling and no development of site until RAP is approved by DEC. Emteque cc'd on letter. 7/16/12-Vought-Received email from Telemaque on 7/2 that the site is not scheduled for development at this time , collection of one bottom sample will be incorporated into revised RAP, inquiry if attached receptor report from EDR will suffice, quarterly groundwater sampling will be incorporated into revised RAP and delineation via installation of downgradient wells and flow determination will also be incorporated into revised RAP. Received email on 7/11 from Telemaque that I sent you a couple of emails on 7/2 regarding the above referenced site. We would like to move forward with the work pending DOB permits which are in process. Can you please give me a call at your convenience to discuss? Ownership is anxious to remove the tanks and associated contaminated soils. Vought called Telemaque and left message to return call to Vought. Vought also sent email to Telemaque and cc to Price that Thanks for your patience and I have reviewed the below response to the Department's letter dated 6/21. A couple of questions: 1)Item 1- You noted on 5/12 during a phone conversation

COMMERCIAL PROPERTY/PARKING GARAGE (Continued) **S111456729**

that the site will be sold. Will be it be redeveloped upon that time and to what use? Do we have a purchaser already? I 2)Item 3- I would like surrounding area site plan with labeled property uses and I am not sure EDR can do that. I am essentially looking for a block and lot map with uses such as school or residential building, stores etc to document the presence and/or absence of sensitive receptors. I just left a message on your cell phone as well and the Department looks forward to reception of the revised RAP .
7/17/12-Vought-Received email from Telemaque that no development or sale plan at this time. I will get you the sensitive receptor labelled map today . Vought replied that Department will consider ORC application once the delineation results and receptor maps are in.
2/22/13-Vought-File review by Vought due to inquiry by Emteqe (Jim Blaney): Email from Blaney-11/12/12. Email that We are waiting on a response from NYS DEC with regard to our remedial investigation strategy at the 304-310 West 155th Street Site. I have copied our NYDEC Case Manager, Jeffrey Vought, to this email. In the interim we are applying for a sidewalk opening permit from the City so that we may begin the work once we receive Jeffrey s input. Email from Emteque-2/20/13. Email from Telemaque that With regards to the above referenced spill number, we have been trying to reach you to schedule a discussion or a meeting at your offices to discuss the above referenced spill and possible closure of the spill. This is a follow up email to voicemail messages I have left at your office and on cell, today, regarding this spill and prior message from Jim Blaney. Our client has a potential buyer for the property and we are anxious to move the spill closure along. Please feel free to contact either myself or Jim Blaney to discuss. Jim is more familiar with the technical details and can be reached on cell at 609.613.2004. My contact information is detailed below. In the event that you are no longer managing this spill can you forward this email to the new case manager. 2/22/13-Vought-Received call from and spoke to Emteque (Jim Blaney) and unknown development plans to date and they did collect groundwater samples and they installed well points inside basement of garage and additional soils excavated due to VOCs and lead till clean and well also installed outside of building and temporary water samples came back as non-detect. They submitted proposal to DEC and due to lack of response, work plan was initiated. No data has been submitted to date. Five temporary well points total installed. Additional excavation was performed to encompass soil and groundwater contamination at MW2 as such DEC will not require ORC injection. Closure report will be submitted and will include discusssion of vapor mitigation (eg vapor barrier). Data to be submitted to DEC within one month. 4/19/13-Vought-Received call from and spoke to Emteque (Lindemuth) who noted that site address was actually 302-304 West 155th Street and not 304-310 West 155th Street as previously reported. Vought changed spill address to same. 4/23/13-Vought-File review by Vought due to recent phone request by Emteque (Lindemuth) to review closure report. Email from Lindemuth to Vought-4/16/13. Email that am following up on a phone conversation we had last week (4/11) regarding the Remedial Action Report (RAR) submitted by Emteque for Spill Case No. 11-10699 assigned to the property located at 304-315 West 115th Street, NY, NY. During our conversation you indicated you would be able to review the report this week. The client has two potential purchasers and would like to be able to move the property transaction forward. Please contact Jim Blaney (cell 609-613-2004) or me for clarification during your review of the RAR.

COMMERCIAL PROPERTY/PARKING GARAGE (Continued) **S111456729**

Thank you for your attention to this case. Email from Lindemuth to Vought-4/18/13. Email that Jeff,Per our conversation please use the link provided below to download a revised Spill Closure Report which corrects the address and Tax Map Block and Lot of the property. The correct address of the Site is 302-304 West 155th Street, New York, NY 10039, Tax Map Block 2047, Lot 37. Click here to view.Please contact Jim Blaney or me with any questions or comments.Thank you for you attention to this case. 4/23/13-Vought-Reviewed Remedial Action Report dated 3/25/13 received from Emteque and added report to E-docs. Future development plans of property are unknown . No UST was identified in GPR anomaly by driveway/ramp via test pit installation to 4'bg. Five USTs found in anomaly in basement where two USTs previously thought (Two 100-gallon steel USTs (which were most likely the USTs noted in the GRP survey) underlain by three concrete encased steel 500 gallon USTs. Groundwater at 4'bg. Contaminated soils removed as well and six endpoint samples collected from sidewalls and approximately 40 tons of impacted soil were removed. Elevated VOCs noted in three of six endpoint samples and another excavation was performed in two subsequent events and a total of 80 tons of impacted soil was removed. One groundwater grab sample also collected for the excavation. A total of 1300 gallons of liquid also removed from excavation. Additoinal delineation performed via installation of two monitoring wells (GW7 and GW8) onsite and three wells off-site (B18 thru B20). Report recommends closure. Vought called and spoke to Emteque (Lindemuth) and he will send in site plan with endpoint sample locations and delineation wells and noted that a DEC RAP review letter was not needed for this requirement. Groundwater analyticals show: 23ppb toluene(GW11), 7.2ppb napthalene(GW11). Note elevated PAH's found in soils most likely associated with fill material. Report also notes that It is also noted that NYSDEC recommended the incorporation of a vapor / moisture barrier into any future development plans for the property as part of the pending real estate transaction. 4/25/13-Vought-Received email from Lindemuth that Per our conversation please find the attached figure which shows the locations of the delineation borings and end-point samples. This Figure is included in the Remedial Action Report as Attachment E.Please let me know if you need any thing else. Vought added figure to E-docs. Spill closed by Vought due to minor groundwater contamination at GW11 within natural attenuation parameters as well as excavation of contaminated soil at site at confirmation samples with VOCs below CP51 Unrestricted SCOs. Note also that as per 4/23/13 email from Emteque It is also noted that NYSDEC recommended the incorporation of a vapor / moisture barrier into any future development plans for the property as part of the pending real estate transaction. Vought sent Spill Closure Letter with residual soil contamination clause to: Mr. Michael Price Icon Parking 211 East 38th Street Ground Floor New York, NY 10016 Ph:(212)686-8663 email:mprice@iconparking.com Vought also added Closure Letter to e-docs as well. 4/25/13-Vought-Received email from CA Rich Cooper that Jeff, I am working on Phase I for a property at 302 West 155th Street in Manhattan. The property had an open spill number 11-10699 and it has since been closed out. I have a client who wants to buy the property, but I just want to make sure they do not need to do any follow up work such as sub slab soil vapor sampling. The person selling the property told me it was good, but he hasn t sent over the whole report. He mentioned that a vapor barrier may be needed if the building is redeveloped, but he has not provided it to

COMMERCIAL PROPERTY/PARKING GARAGE (Continued) **S111456729**

me. Can you e-mail me or call me to discuss this project? Vought called and spoke to Jason Cooper and he noted that site will still be a parking garage with ventilation and Vought noted that if future use of the site was to change than sub slab vapor sampling may be warranted. Spill to remain closed. 8/11/17-Vought-Received message from Langan (Chris McMahon Ph:973-560-4861) that he was looking for information as he was going to file a FOIL request as part of a property transaction. Vought returned call and left message with summary of remedial action and closure based on fact that site was to remain a parking garage with ventilation."

DEC Memo:	"07/15/11-Hiralkumar Patel. alternate address: 118-120 W 137th Street. no other spills reported. PBS #: 2-606707. as per PBS record, the site has one 2,000 gal #2 oil AST on legs. 10:01 AM:- spoke with Uzi Evron, building owner. Mr. Evron is not at the site and doesn't know about spill. he will talk to someone at the building and will call back. 10:07 AM:- spoke with Bob at Bobco. he mentioned that Bobco delivered oil for Boro Fuel. he mentioned that the site has two fill ports and driver started delivery into the fill port which was disconnected. he has contacted their insurance broker and they have hired Atlantic Response. he asked to contact driver for more information. Coverage Concept **insurance broker for oil company** MaryEllen Fatscher Ph. (631) 331-7700 email: maryellen@coverageconcept.com Atlantic Response Ph. (732) 969-8555 118 West 137 Holding LLC **property owner** c/o Uzi Evron 118 West 137th Street Basement Apartment New York, NY 10030 Ph. (917) 295-1565 (C) email: uzievron@gmail.com 10:18 AM:- spoke with Mr. Evron. he confirmed that oil spilled at site. he mentioned that Borough fuel changed fill line about a year ago. he also mentioned that FDNY and NYPD is on-scene. 10:21 AM:- spoke with John (direct connect:

APARTMENT BLDG (Continued) **S111158720**

173*865185*8), truck driver. he mentioned that he connected delivery hose to a fill port on sidewalk and started delivery. but that fill line was disconnected and oil started coming out in staircase to basement apartment. he mentioned that oil spilled only outside of the building. he stopped delivery immediatley and cleaned up little. he then delivered to right fill port which is located behind the dumpster area. he left the site. 10:25 AM:- spoke with Jose, building super. he confirmed that oil spilled only outside of the building. due to petroleum odors in area, one of the neighbour called FDNY. Jose **building super** Ph. (917) 295-0892 10:35 AM:- spoke with Chris at Atlantic Response. they will be on-site by 11:30 AM. 10:47 AM:- spoke with Bob regarding any previous delivery to this address as fill line was changed by Boro fuel. Bob mentioned that they did delivered to this building for Boro Fuel few times last year, but today the driver was new and he did not knew about new fill port. 10:54 AM:- spoke with Lenny at Boro Fuel. he confirmed that fill line was changed by Boro Fuel in October 2010. he mentioned that boro fuel's in-house cleanup crew is on site for further cleanup. Boro Fuel Oil Co., Inc. 2 Church Avenue Brooklyn, NY 11218 Attn.: Jeff Cohn **owner** Ph. (718) 854-7500 email: BoroFuelOil@aol.com 07/15/11-HRAHMED-Responded to the site. it was a scheduled delivery, but the driver connected with the wrong fill port which was not connected to the tank. When the old fill port was abandoned, portion of it under the sidewalk was not removed, it was cutoff at window well for the basement. The driver delivered approx 15 gal and it was released on the floor of window well. Notice strong odor in the adjacent office room. Ask the manager to turn off the AC, because the intake of the AC was towards the window well and open the door to ventilate the place. Suggested the owner if possible to let the employees leave early. Atlantic Response responded to do the cleanup. Told them to install a fan to ventilate the office. After collecting the loose oil, they will powerwash the window well. They will remove the contaminated plants from the window well. 8/1/11-HRAHMED-Spoke to owner Uzi. He confirmed that the cleanup was done and there is no odor in the office room. This case is closed. "

Remarks: "Fill pipe of tank loose and when delivery made oil spilled in basement staircase. All concrete. Cleanup being planned."

DEC Memo:	"1/15/19 - Sekhon Jim Mulvey - Eastern Environmental - 631 - 727 - 2700 (office) 631 -745-7581 (cell) jmulvey@easternenviro.com Notifier reported that a spill was discovered during a Phase II investigation, the property had a Phase I completed by another company, and it determined that the property was at one time a gas station. Eastern conducted a GPR survey and installed 15 soil boring to 15' below grade, all the soils had a fuel oil/gasoline odor. Five samples were selected from the 10'-15' range to be analyzed, all the soil samples had levels above the NYSDEC protection of groundwater and residential. Case transferred to DEC Kumar. 01/17/19-Hiralkumar Patel. alternate address: none no PBS or other spills found. as per NYC DOB record, the site has environmental restrictions for 'hazmat/air'. 10:15 AM:- sent email to Jim and asked him to submit Phase I and Phase II reports for review. also asked him to provide property owner's contact info and site's redevelopment plans, if any. 02/11/19-Hiralkumar Patel. received email from OER Shaminder (at 11:20 AM on 02/08/19) including site map and sample result summary table. as per site map, total of fifteen (15) bore holes installed at the site. sample result summary table includes results of four soil

COMMERCIAL (Continued) **S123660201**

sample collected from 10-15 ft bg from borings SB-1, SB-5, SB-8 and SB-11. found contamination in SB-5, SB-8 and SB-11. 12:07 PM:- sent email to OER Shaminder and asked him for copy of Phase I/Phase II reports for review. downloaded available reports from OER EPIC database. summary of Phase I dated 04/05/2017: - in 2017, the site consisted a small 1-story commercial building and two (2) storage containers - subject property was occupied by a filling station during the years 1935-1989 - Sanborn maps for the years 1935-1946 indicates there are six (6) 550 gal gasoline tanks buried at the site - during site inspection, twelve (12) gasoline vents were noted going through the rear wall of the original building - in 2017, there were three (3) small active hydraulic lifts on site. no hydraulic oil staining or pooling was noted at the time of inspection summary of Phase II dated 05/11/2017: - site contains a vehicle tire repair and sales operation - site was historically used as a gasoline service station - GPR survey was conducted in limited area as much of the site (approx. 3/4 of the site) is covered by stacks of tires and tire racks - GPR survey was unable to identify any subsurface anomalies resembling USTs - site is approx. 4,100 sq. ft. in size and current improvements consists of a single-story approx. 200 sq. ft. building used as a sales office - exterior of the site is entirely paved - no physical evidence of USTs or former gasoline dispensing equipment at the site - site elevation is approx. 20 ft above mean sea level - depth to the water table was measured at 14 ft bg - a thick layer of fill material is present beneath the site and was encountered to a depth of at least 20 ft bg in one boring - installed four soil borings (B1 through B4) - borings B1 through B3 were installed at the northwest section of the site which was the only open space within the site - boring B4 was installed to the south, after removing several rows of stacked tires - boring B1 was installed to a depth of 11 ft bg where concrete refusal encountered; gasoline odor was detected at the end of the boring - borings B2 and B3 were installed to a depth of 7 ft bg where concrete refusal encountered; no evidence of contamination noted in these borings - it appears that B1 through B3 encountered a concrete pad refusal at depth that may represent the base of a former gasoline UST area - boring B4 was completed to a depth of 20 ft bg; strong gasoline odors and staining were noted at 15 ft bg; no discoloration or odors at 20 ft bg - grab soil samples were collected from borings B1 (11 ft bg), B2 (7 ft bg) and B4 (12 ft bg) - a temporary 1-inch well was installed at B4 - little or no physical evidence of contamination noted in soil in B1 through B3 - significant field evidence of petroleum contamination was encountered at the water table in B4 - PID readings ranges from 0.7 ppm at 10 ft bg to over 300 ppm at 14-15 ft bg in B4 - no free-phase product was encountered at B4 which is the only boring that was deep enough to intersect the water table - reviewed subsurface investigation data for adjoining redevelopment site to the east and noted: 1) low level of gasoline-related VOCs in groundwater sample collected near the east border of the subject site, and 2) no gasoline-related VOCs in other groundwater samples collected from remaining areas of the adjoining property - no contamination noted in soil samples - found heavy contamination in groundwater sample groundwater analyticals (in ppb): ----------B4GW Benzene----------2,000 Toluene----------180 Ethylbenzene----------980 Xylene----------1,700 1,2,4-Trimethylbenzene--1,100 1,3,5-Trimethylbenzene----380 summary of Phase II dated 01/11/2019: - GPR was conducted to encompass the entire property (excluding the

COMMERCIAL (Continued) **S123660201**

building footprint and the sidewalk) - findings of GPR survey revealed one anomaly indicative of USTs or former UST area - GPR picked up the old pipes associated with former active tank vault area - installed fifteen (15) soil borings - majority of soil borings were advanced from grade to 15 ft bg - evidence of petroleum impacted soils identified at all the sample locations, the highest readings were at the 10-15 ft sample interval - groundwater was encountered at approx. 15 ft bg - soil samples were submitted for analysis from 10-15 ft interval from borings SB-1, SB-5, SB-8 and SB-11 - no groundwater samples collected soil analyticals (in ppb):
----------SB-8-------SB-11 10-15 ft 10-15 ft
Benzene----------1,200---------300
Toluene----------1,400---------300
Ethylbenzene----------1,900-------6,800
Xylene----------3,900-------4,100
1,2,4-Trimethylbenzene-----1,500-------5,100 Phase II report from Eastern Env. (dated 01/11/19) is missing detailed logs for all soil borings. 100 E 149, LLC. **property owner** 5 East 22nd Street New York, NY 10010 Attn.: Tony Boemi Ph. (347) 464-2142
02/19/19-Hiralkumar Patel. 9:13 AM:- sent email to OER Shaminder. asked him for copy of detailed logs for all fifteen soil borings installed by Eastern Env. also asked for an investigation work plan for complete delineation of soil and groundwater contamination. email copied to OER Samantha. 05/02/19-Hiralkumar Patel. 1:45 PM:- sent email to OER Shaminder inquiring updates. email copied to OER Samantha. 2:59 PM:- received email from OER Samantha including link to EPIC for boring logs/RIWP. logs for borings SB-4 and SB-5 are identical. highest PID reading of 122 ppm was recorded at 10 ft depth in boring SB-5. obvious/slight odors noted in all fifteen borings. there are no notes of findings of groundwater in any borings. DEC requires: 1) complete delineation of soil and groundwater contamination, 2) remediation **e-designation.** **site map on H drive.**"

Remarks: "there was a gas station before in this property. The new owner just purchase the property. The cleanup is pending"

Contact Name:	GEORGE
DEC Memo:	"12/03/07-I spoke with Ms. Erika George on 12/01/07, she said the building had an oil delivery on 11/30/07 afternoon and since then there is smell of oil everywhere, strong in hallway.She called 911 and FD responded.DEP Hazmat also responded.She lives on 3rd floor.She has a 16 months old baby.I called land lord Mr.Gordon(718.379.6818)and told him to get some body to clean up the spill. He said he would do that. About 1/2 hour later, I called him again and asked him if he has hired anybody to do the clean up. He said that he called the oil company.I responded to the site and inspected the building. This is a three family attached house.275 gallon AST in the basement. Two crews arrived from the oil company 'Schildwatcher'.We all together went to the basement.Entrance from first floor to the basement was open, therefore smell was strong on the first floor.Apparently, connecting point of fill line to the tank leaked and spilled while delivering oil to the tank.Spill was on the concrete floor.There are numerous debris on the floor which were oil soaked. Sump pump was not affected.Schildwatcher used absorbent to dry the floor and also used deodorizer to supress the odor.later on, I received another messege from Andrew Schildwatcher confirming that

BETWEEN 7TH & 8TH AVES (Continued) **S108957223**

service tech will fix/replace the fill line soon.(SR) 12/07/07 I spoke with tenant Ms. Erika george, she said that there is still some odor of oil in the hallway. I called Andrew Schildwatcher and they have n't fixed the fill line yet, will do that soon and will recover the oil soaked absorbent sand from the basement floor.A report will be sent to DEC.(SR) 02/22/08 I spoke with land lord Mr. Gordon, who told me that the pipe leading to the tank was fixed, floor spill cleaned with absorbent sand, floor is dry now,no odor exist in the basement.Spill closed(sr)."

Remarks: "Unknown quantity of oil in basement. DEP HazMat responding."

DEC Memo:	"Sangesland left a voice message with Mr. Cafferty asking for more information on what contamination was found during this digging AND which Brownfields case this site is associated with. If this is part of a Brownfields project, this spill can be closed out and the project forwarded to that Brownfields manager here at the DEC. This site is under separate contract and is nopt associated with the brownfield project. While digging excessive contamiantion was found. PID results were pinned at 2000ppb. Piper left message for chief Engineer of Deegan Project. MAzher Usmani- 973-441-7225. requesting callback. need to send csl. 7/26/07- DEC Piper recieved and reviewed closure report. While diggigng a sewer contruction crew observed cont soil in trench. Trench was 110' long zx 8' wide x 15' deep. Cont soil was stockpioled and disposed of. 365 tons of soil was disposed of. ENdpoints revealed no VOC's and exceedances in SVOC's which is most likely due to fill material. A slab was put in the trench and a slab capped the trench. Closed. See e-docs if warranted."

DEC Region:	2
DER Facility ID:	218930
DEC Memo:	"PBS 2-156590 1/20/04 File review (Foley): Prior to divesting this site in March 1990, a site assessment was performed by Roux (hired by Mobil) which indicated elevated BTEX existed in both groundwater and soil, but no free product was found. Upon transfer of property(8/90), the new owner began to install new USTs. During tank replacement, 875 tons of contaminated soil was removed and disposed of. During construction, two upgradient wells were destroyed. Three downgradient wells remained intact. The two wells which were destroyed showed ND

MOBIL (Continued) **S104278682**

for BTEX during sampling. In May 1991, there was an apparent vapor problem in the kiosk at the now active Amoco station. Amoco installed a venting system to alleviate the problem. Based on this, Mobil installed two borings and one well in the vicinity of the kiosk. The report indicated that the soils surrounding the kiosk did not contain very high levels of BTEX in soil. The monitoring well installed contained 0.01' of product. This well is upgradient of all former Mobil tank areas. Additional constuction at the site for a car wash has destroyed three downgradient wells. Thus, only one well remains on the property. However, upon completion of the construction, up to ten additional wells shall be installed at the site. Wells will be installed after construction is completed. 11/91 Eleven monitoring wells and a sparge point were installed. 12/9/91 MW-11 had 0.84' of product. 1/22/92 MW-11 had 0.21' of product. 2/20/92 MW-11 had 7.16' of product. A vac truck has been scheduled on a biweekly basis to extract LNAPL from MW-11. 3/92 LNAPL was detected in MW-11 (0.07-3.02'). Approx 70gal was extracted from MW-11 on 3/4, 3/13, 3/16 using vac truck. Trace amounts of LNAPL were hand-bailed from MW-11 on 3/18 & 3/27. Water sample from car wash well was collected by Tyree, analyzed by Method 602, and returned ND. 4/92 MW-11 had 0.08-0.18' of LNAPL and approx 2.5gal LNAPL bailed. 6/8/92 An EZY Skimmer was installed in MW-11. 7/92-6/93 No LNAPL was detected in any wells. 1/94-3/94 MW-10 had 0.28' product. MW-11 had 0.01' product. 5/94 MW-11 had trace amount of product. 7/11/94 SVE started. DTW 16' bgs. 6 combination SVE/AS points. Will sample all MWs before sparge system started. 2/8/95 0.01' product in BD-1. BTEX from ND(MW-1) to 30,000ppb(MW-5). 10/27/99 Cross Deegan Realty notified by station operator of possible inventory loss. Alvin Petroleum exposed portions of system over next two weeks. No system leaks were detected. 11/9/99 Alvin Petro. requests a tightness test be performed. Crompco detected a leak in one of the four tanks and reported the failure. 11/10/99 Alvin Petro. exposed and removed remote fill box on the tank that failed test. A coupling that connects the piping to the overflow box was found cracked. The coupling was replaced and system retested tight. 11/16/99 Crompco retested system with FDNY and passed. 11/22/99 Impact Environmental performed a limited subsurface investigation of soil adjacent to coupling and concluded that gasoline had impacted soil/GW. Report states that current owner only intends on addressing contamination from 10/99 spill and not the 1992 spill. 10/31/00 Three wells sampled and gauged. SVE system removed from service. ORC socks in wells MW-1 and MW-5. BTEX from 15ppb(MW-12) to 868ppb(MW-1). MTBE from 31ppb(MW-11) to 49,000ppb(MW-1). 2/5/01 Seven wells sampled. BTEX from ND(MW-12) to 240ppb(MW-1). MTBE from <1ppb(MW-12) to 64,000ppb(MW-7). 4/26/01 Seven wells sampled. MTBE has increased in monitoring wells hydraulically downgradient from the current dispenser island and USTs. MTBE ranged from 14ppb(MW-11) to 920,000ppb(MW-10). BTEX ranged from 12.8ppb(MW-11) to 6,080ppb(MW-10). 10/23/01 Eight wells sampled. BTEX from 14ppb(MW-6) to 4,750ppb(MW-10). MTBE from 18ppb(MW-11) to 270,000ppb(MW-10). 1/17/02 Eight wells sampled. BTEX from ND(MW-5) to 1,794ppb(MW-10). MTBE from 29(MW-5) to 65,000ppb(MW-7). 4/30/02 Six wells sampled. BTEX from ND(MW-5 & MW-6) to 1173ppb (MW-10). MTBE from 7.6ppb(MW-1) to 24,000ppb(MW-5). 5/15/02 Sensitive Receptor survey identified PS 31 approx 850' to the southeast. There are residential and commercial buildings with basements immediately adjacent to the site to the north. A subway tunnel is located beneath E 149th St.

MOBIL (Continued) **S104278682**

03/17/03 REASSIGNED FROM ROMMEL TO VOUGHT. 11/18/03 Received CAP/Remediation Plan, 3rd Quarter 2003 monitoring report, and tank test results(pass). 12/10/03 Reassigned from Vought to Foley. See closed spills #0307681, 9208906. Review of Remediation Plan: A SVE/AS system was installed by Handex and operated on the property to address spill #9208906. The system is comprised of four soil vapor extraction wells and six air sparge points. At this time, the system is not operational. A monitoring program is being performed. 11/9/99 Tank system tightness test performed by Crompco indicated a leak near the remote fill box. The leak was repaired. Soil staining and petroleum odor was noted below the fill box. Spill 9909670 was reported. 11/22/99 Impact Environmental started subsurface investigation. Groundwater results exceeded standards. 7/7, 7/25, 10/23/00 Enhanced fluid recovery performed on MW-2 as an IRM. Impact Environmental proposes 1) monthly EFR on hottest wells for 6 months, 2) replacement/upgrade of air sparge equipment installed to address #9208906, 3) SVES to be modified to include MW-2. 9/3/03 Impact Environmental sampling data (for Amoco): BTEX levels range from ND(MW-5, 11, 12) to 1606ppb(MW-6). MTBE ranges from ND(MW-12) to 650,070ppb(MW-6). 10/6/03 GSC sampling data (for Mobil): BTEX ranged from ND(MW-2) to 3800ppb(MW-6). MTBE ranges from 9.8ppb(MW-11) to 1,240,000ppb(MW-6). 11/26/03 Impact Environmental data from 4Q2003 report shows MW-6 and MW-2 to be hot spots. BTEX ranges from ND(MW-12) to 6923ppb(MW-6). MTBE ranges from ND(MW-12) to 869,600ppb(MW-6). 2/2/04 Faxed stip to Mr. Hank Alpert, Cross Deegan Realty. Due back 2/23/04. (FAX 516-365-1606) 2/11/04 STIP returned. Cover letter states that a previous CAP for spill #9909670 was already approved by DEC and was authorized to develop CAP for spill #0307681 (dated 11/13/03). 2/13/04 STIP fully executed. 3/4/04 Letter received from DDC(Bruce Rottner) to J. Semelmacher. Requests Amoco's participation in DOT reconstruction project instead of reimbursement of cleanup costs. 3/15/04 Called B. Rottner. He explained that he recieved a phonecall from the owners attorney who stated that contamination was from a Dept of Sanitation garage. However, monitoring well on that property was installed and was clean. Spartan will be sending another letter to DDC at which time B. Rottner will forward a copy to me. 3/10/04 Received 1Q04 monitoring report. Need to delineate around MW-6 and MW-2. 6/18/04 Received 2Q2004 monitoring report. 6/30/04 Met with Spartan Petroleum (H. Alpert) and Impact Env. Received hand-delivered letter dated 6/28/04. Site is located on 149th St between Gerard and River Avenues. The site was impacted by a release detected in 1992 while under lease to Mobil Oil. Mobil installed an SVE/AS system. A new release was confirmed and Spartan released Mobil from contractual obligations. As an IRM, EFR was performed on MW-2. Approx 1075gal GW was extracted. An enhanced SVE/AS was run from July 12, 2001 to the present. During the period from 11/9/99 to 3/3/03, there was a steady decline in contaminant concentrations. In May 2003, BTEX concentrations began to increase unexpectedly. A system test was performed and all lines and tanks tested tight. An off-site source was suspected. Identified a NYCDOS truck terminal upgradient. Also found many monitoring wells on the NYSDOS site. Thru a FOIL request, review of the NYSDEC files incidate that the NYCDOS site is impacting 99 E 149th St. Request closure. 10/4/04 Received 3Q04 monitoring report. 11/19/04 Met with K. Kleaka and K. Scroope, Impact Env. NYCDOS property on eastside of Gerard Avenue (DOS Manhattan West 9). See spill #s 9513870, 9910856.

MOBIL (Continued) **S104278682**

11/23/04 Email from J. Kolleeny- City's consultant, LiRo, had been performing EFR on wells with free product for several years until last year when a multi-phase extraction system went on line. A MW along E 149th St has had product in it which LiRo identified as weathered #2FO. Although they have been willing to vac out this well, and the remedial system now has extraction wells near it, LiRo has argued that the product in the well was likely coming from off-site because they claimed there was no DOS tanks at that end of their site. However, the PBS list an old 2000gal heating oil tank and a new (4/03) tank at the site. Asked LiRo to locate these tanks. Will keep me updated. 4/13/05 Spoke to K. Kleaka, Impact Env. Will be proposing to shutdown system soon as recovery is decreasing. Still concerned about DOS site having impacts on property. Proposal will include confirmatory soil sampling. 5/6/05 1Q05- GW sample collected on 3/14/05 from MW-8 did not detect any VOCs. Samples from MW-1 and MW-5 detected concentrations of VOCs but not above GWQS. MW-12 was paved over. Several detected concentrations from MW-2,6,7,9,10 & 11 exceeded GWQS. These concentrations are within ROI of system. Told H. Benjamin that it was not necessary to reinstall MW-12. 5/23/05 Sent email to K. Kleaka, Impact Env. After reviewing the July 2004-Sept 2004 and Jan 2005-March 2005 quarterly reports for Manhattan West 9 (operated by NYCDOS at 125 East 149th St, Bronx), it is not clear that the contamination detected at MW-2 is due to impacts from the NYCDOS facility. Historical data for 99 E 149th St shows a significant spike of MTBE at MW-6(869.6ppm) and at MW-2(191.2ppm). The historical data for the NYCDOS facility, dating back to 2000(with some data gaps), does not indicate that the facility is acting as a source of off-site contamination. The only MTBE detection in the NYCDOS wells was in the NW corner of the property(170ppb in 1/00). NYSDOS has been operating a MPE system since 11/12/03. 11/8/05 3Q05 report - Total of 537.84lbs of hydrocarbons removed. Approx 9lbs recovered in last 22 day period. Groundwater concentrations highest in MW-2 at 1420ppb total BTEX and 1500ppb MTBE. MW-6 at 100ppb BTEX and 53ppb MTBE. MW-7 at 10ppb BTEX and 56ppb MTBE. 1/11/06 Met with K. Kleaka and H. Benjamin, Impact. To submit 4Q05 report. Redeveloped sparge points to try and increase efficiency of system which continues to operate. 2/17/06 4Q05 report submitted. SVE continues to operate. Lab analysis from 11/28/05 did not detect VOCs in MW-8. Wells MW-5 and MW-11 had concentrations which did not exceed GWQS. Samples from MW-1,2,6,9,and 10 did exceed GWQS. 3/30/06 1Q06 report submitted. BTEX from ND(MW-1,5,6,8,9,11) to 970ppb(MW-2). MTBE from ND(MW-5,6,8) to 980ppb(MW-2). SVE continues to operate. Total estimated hydrocarbons recovered is 538lbs. 6/30/06 DEC lead transferred from K. Foley to J.A. Maisonave. - JAM 11/27/06 Reviewed 2nd and 3rd Qtr 2006 Monitoring Reports. Groundwater contamination persists in the area of monitoring well MW-2 (~4000ppb). H. Benjamin of Impact Env. proposed performing a pulse test on the system to see if rebound will occur since the system appears to have reached asymptotic conditions. I sent an email to Mr. Benjamin requesting a map showing the radius of influence for each air sparge and SVE point and that GW contamination at MW-2 must be addressed. I also asked if there was soil contamination at the site. If so, has the SVE system effectively treated it? Must prove by confirmatory soil sampling. Email is in the file. - JAM 02/13/07 Reviewed a letter submitted by Impact Env. and dated January 17, 2007. The letter proposes: 1. All monitoring wells will be redeveloped utilizing a surge block and vacuum truck. 2. Monthly Enhanced Fluid Recovery (EFR) events will be

MOBIL (Continued) **S104278682**

performed on MW-2 to reduce the contaminant concentrations in the surrounding area. Said events will be performed utilizing a 2X4 inch diameter K-Packer on a 2-inch diameter drop pipe to maximize liquid and vapor capture. 3. Groundwater sampling will continue on a quarterly schedule. 4. SVE & Sparge operations will continue with the existing system. I sent an email approving these proposals. Groundwater sampling data and recommendations will be submitted in the next quarterly report. A hard copy of the email will be in the file. - JAM 3/29/07 Reviewed 4th Qtr 2006 Monitoring Report submitted by Impact Env. and dated March 6, 2007. All wells were sampled on November 29, 2006. Results were non-detect for total VOCs except for MW-2, which shows persistent levels of VOCs (2,675ppb Total VOCs). The SVE/AS system continues to operate at the site. According to the report, monthly EFR events on MW-2 should have begun in February 2007 and results will be included in the next Monitoring Report. - JAM 6/21/07 Reviewed 1st Qtr 2007 Monitoring Report submitted by Impact Env and dated May 30, 2007. On February 28, 2007, all wells were redeveloped and EFR events commenced on MW-2 All wells were then sampled on March 1, 2007. Wells MW-1, MW-6, and MW-9 showed non-detect results for total VOCs. Wells MW-5, MW-7, MW-8, MW-10 and MW-11 had slight exceedences for Napthalene (ranging from 68ppb to 100ppb). MW-2 showed a decrease of total VOCs from last monitoring round to 1,936ppb. The SVE/AS system continues to operate. - JAM 12/04/07 Reviewed 2nd Qtr 2007 Monitoring Report submitted by Impact Env and dated Sept 18, 2007. All wells were sampled on June 14, 2007 and monthly EFR events continue on MW-2. Wells MW-1, MW-2, MW-9, MW-10 and MW-11 showed exceedences for total VOCs. Wells MW-5, MW-6 were not sampled because they were dry. MW-2 still has the highest level of VOCs, however, it showed a decrease from the last monitoring round to 857ppb from 1,936ppb. The SVE/AS system continues to operate. - JAM Reviewed 3rd Qtr 2007 Monitoring Report submitted by Impact Env and dated Oct 30, 2007. All wells were sampled on Sept 6, 2007 and monthly EFR events continue on MW-2. Results from wells MW-1, MW-2, MW-5, MW-6, MW-7, MW-8 and MW-9 showed non-detect levels for total VOCs. Wells MW-10, MW-11 showed minor exceedences for MTBE (44ppb and 50ppb respectively). Based on the latest result, monthly EFR events appear to have effectively reduced contaminants in MW-2. The SVE/AS system continues to operate. - JAM 4/14/08 Received a call from Hal Benjamin about the Exposure Assessment submitted in March 2008 by Impact Env. They are requesting spill closure and I will get back to him after I review the report. - JAM 5/1/08 Reviewed Exposure Assessment Report. Based on the Exposure Assessment, Impact Env. concludes that the source of contamination has been effectively mitigated and small levels of residual groundwater contamination pose no threat to human health. Impact requests spill closure. I requested a summary of historic soil data associated with this spill. -JAM 6/11/08 Spoke to Hal Benjamin, Impact. An on-site well provides the operating car wash with water. I requested that this well be sampled and results reported in a letter. Spill closure will be reevaluated when results are available. - JAM 8/8/08 Reviewed letter from Spartan dated July 16, 2008. The on-site well that services the carwash was sampled and all analytes were found non-detect. I called Hal and asked the depth at which the car wash well pulls water from and if there are any sampling requirements for that well. He will get back to me. - JAM 11/13/08 Since the on-site car wash supply well did not detect and VOCs and only minor levels of MTBE were detected in two on-site wells, this site poses no threat to human health or the

MOBIL (Continued) **S104278682**

environment. This spill case was closed and an NFA letter was issued to: Henry Alpert Cross Deegan Realty, Corp. 3333 New Hyde Park Rd, Suite 201 New Hyde Park, NY 11042 NFA letter uploaded to eDocs. - JAM"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was K FOLEY 10/10/95: This is additional information about material spilled from the translation of the old spill file: CONTAM. SOIL G/W. 12/10/03 Reassigned from Sigona to Foley. 1/28/04 Spoke to Brian Melancon of GSC (845-561-9890), Mobil's consultant. Mobil wants to close out spills. They divested property in March 1990 but have been active in remediating their spill. Cross Deegan Realty only plans on addressing their spill #9909670 (by restoring to pre-spill conditions). I requested that GSC send in a formal closure request with data justifying closure of Mobil spills. 3/1/04 GSC submitted closure request report. 7/94-10/00 ExxonMobil operated an SVE/AS system removing approx 8861 lbs of VOCs. Four air sparge/vapor extraction wells and one air sparge well were installed. In October 2000, the system was shut down due to asymptotic recovery rates. DEC was notified of system deactivation in March 2001 Handex Site Status Report. Spill #9708729 was issued to the site on 10/25/97 in response to dumping of oil into sewer system. Spill #9909670 was issued to the site on 11/9/99 for petrotite failure on 4000gal gas UST. 4/6/04 NFA letter to be hand delivered at Albany meeting 4/7. Reviewed GSC's closure request report(3/1/04). Concentrations were decreasing to ND prior to Spartan's tank test failure. See Spartan files (spill #9909670)"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY LiRo installed and is currently operating a multi-phase extraction system to address soil and groundwater contamination and recover free product. Product in some wells may be from off-site source (?), there's a nearby gas station and it's possible that some product in wells at the gas station may be coming from Manhattan 9. See Kerry Foley for details. Kolleeny approved boring locations for LiRo's semi-annual soil monitoring on October 26, 2004. This site transferred from Kolleeny to A. Zhitomirsky on 4/15/05. - JK 4/20/2005 AZ reviewed a Monitoring Report for the remedial system dated January 28, 2005. The site was formerly managed by Jonathan Kolleeny (NYSDEC). The report presents remedial system performance monitoring data. The report states that based on the site monitoring data, the MPE system is effectively treating contamination. Induced vacuum measurements from monitoring wells MW-3, MW-4 and MW-14 were

MOBIL (Continued) **S104278682**

observed to be below desirable levels. Vacuum should be increased in these wells. LiRo has proposed to shut down extraction wells EW-1, EW-3 and EW-5 since analytical data indicate that no apparent VOC contamination persists in that portion of the site. The Department concured with this proposal.AZ 6-7-2005 AZ reviewed a Monitoring Report received on May 3, 2005. The report presented remedial system performance and groundwater monitoring data. The report stated that based on the site monitoring data, the MPE system is effectively treating contamination. In the report LiRo proposed to shut down extraction wells EW-1 through EW-6, EW-13 and EW-14, since soil and groundwater data indicate that no apparent VOC contamination persists away from the Gerard Avenue sidewalk portion of the site. The Department concured with shutting down EW-1, EW-2, EW-3, and EW-13. The other extraction wells should continue to operate to address the remaining soil and groundwater contamination. However, the induced vacuum measurements from monitoring wells along Gerard Avenue were observed to be below desirable levels. The vacuum in nearby extraction wells should be increased to improve the induced vacuum in these monitoring wells. AZ 8-22-2005 Reviewed a Monitoring Report dated July 29, 2005. The report presented remedial system performance and groundwater monitoring data. In the report LiRo proposed to modify the current groundwater sampling schedule. Also, LiRo recommended completing proposed soil borings LBR-9 and LBR-10 with shallow screens to allow them to serve as pressure monitoring points in order to better evaluate system performance. The Department concured with these proposals.AZ 1-3-2006 Reviewed a Monitoring Report dated November 30, 2005. The report presents remedial system performance and groundwater monitoring data. The report states that elevated VOC concentrations persist in the area of PM-1. Naphthalene was also observed to exceed NYSDEC guidance value at PM-1. Results of recent groundwater sampling indicate that MW-10 continue to exceed 100 ppb total VOCs. In the report LiRo proposes to shut down several extraction wells. The Department concurred with shutting down wells EW-4, EW-6 and EW-14. The remainder of extraction wells should continue to operate to address the remaining soil and groundwater contamination. AZ 4-10-2006 Reviewed a Monitoring Report dated February 27, 2006. LiRo recommended continued operation of extraction wells EW-8,9 and 10 to continue rmediation of the soil contamination recently observed at LBR-9/PM-1. AZ 7/5/2006 Reviewed a Monitoring Report for the remedial system dated April 21, 2006. The site was formerly managed by Jonathan Kolleeny (NYSDEC). The report presents remedial system performance monitoring data. Groundwater samples were collected from monitoring wells MW-2, MW-6 and MW-10 on March 1, 2006. TVOCs in MW-6 is 139 ppb which is the highest number observed in this well. The numbers are on the clear upward trend in this well. MW-10 - TVOCs - 91 ppb, MW- 2 - TVOCs - 91 ppb - upward trend. AZ 11-20-2006 Reviewed a Monitoring Report for the remedial system dated August 9, 2006. URS proposed to advance a confirmation soil boring SB-5 near MW-04, LBR-02 and PM-01. I called J. Staten (URS)and concurred with this proposal. E-mail with the approval for the soil sampling plan was sent to Jane Staten (URS). AZ 12-18-2006 Reviewed a Monitoring Report for the remedial system dated August 10, 2006. MPE is operated at the site. The vacuum measurements ranged from 0 (MW-07) to 3.1 The closest extraction well to MW-07 has been shut off. Total VOCs and naphthalene ranged from 1 ppb to 56 ppb in MW-02. Low volumes of gw were extracted and treated during this monitoring period. URS has instructed Franklin to adjust the drop tubes in an

MOBIL (Continued) **S104278682**

effort to extract more groundwater. AZ 1-9-2007 Reviewed a Monitoring Report July through October 2006 for the remedial system dated November 14, 2006. MPE is operated at the site. Flowmeter broke at the end of September. It was not fixed; therefore, the total amount of gallons treated is unknown. Vacuum readings in MW-14 is 0 on 3 occasions. GW results - 65 ppb of total VOC in MW-02. AZ 1/23/2007 At the meeting with DDC/URS on January 10, 2007, the site was discussed. The firm, ATC Associates, will be taking over operation of Manhattan West 9. DEC requested that URS will analyze and improve performance of MW-14. AZ 7-6-2007 Reviewed a Monitoring Report for the remedial system for the period of November 2006 through January 2007 and dated February 15, 2007. MPE is operated at the site. The MPE flowmeter continues to malfunction and requires replacement, but ATC will replace the flowmeter at this time. According to the report, only monitring well MW-02 is exhibiting contaminant concentrations above DEC GW Quality Criteria. The minor exceedances in MW-02 are too low for remedial treatment. On December 2006 URS advanced two soil borings. The analytical results showed VOC exceedances of TAGM #4046 in each soil sample. Total VOCs ranged from 403,400 to 446,260 ppb. Based on the latest sampling resultsURS will operate MPE system using only extraction well EW-09. Also, drop tubes will be raised to 5' above GWT to focus on vadose zone contamination. If MPE modifications are not effective, URS will excavate any remaining vadose zone soil contamination. AZ 11/30/2007 I have reviewed System Performance Monitoring Report for the period April through August 2007. An e-mail was sent to DDC/URS/V. Brevdo: ...URS will sample all monitoring wells during the next quarterly groundwater event. Also, URS will advance a soil boring near the location of boring SB-05. URS requested NYSDEC permission to shut down the MPE system while samples are collected. This recommendation is rejected. Neither soil sampling results of the previous sampling round nor a figure with estimated extent of soil contamination were included in the report. Soil sampling data should be included in proposals for future borings and/or proposals for the system shutdown. Soil sampling performed in December 2006 showed total VOC contamination in a range of 400, 000 ppb. These high levels of soil contamination justify continuing operation of the MPE system. AZ 6-5-2008 An e-mail sent to Jane Staten: I have reviewed the System Performance Monitoring Report and Confirmation Soil Sampling results for the above site. I have a few questions/comments: 1. It seems that the contaminated interval is soil is between 5' and 7' in the area of MW-04. However, you proposing excavation to the depth of five feet. I suggest performing the excavation to the depth of seven feet underground structures and utilities allowing. Also, the area near soil borings B-3.5, LBR-4 and well MW-10 is not covered by your excavation plan. What are your suggestions for this area? Could you submit to DEC soil plume map so we can decide on the extent of the excavation or other soil remediation strategy? AZ 7-18-2008 An e-mail was sento to URS: DEC concurs to the removal of the MPE system under the condition that the remaining contaminated soil be removed via excavation and end-point samples will be taken to confirm complete removal of the contamination. Also, a soil plume map showing historical contaminant concentrations throughout the site should be included in the post excavation remedial report. AZ 9-12-2008 I contacted Jane Staten. She advised me that URS is preparing documentation for soil excavation. They received DEC approval for excavation. AZ 1-5-2009 Reviewed a Monitoring Report through the 3rd Quarter 2008 and dated October 2,

MOBIL (Continued) **S104278682**

2008. MPE system was operating since April 2004. Currently MPE system is being removed. On July 28 and 29, 2008, URS sampled groundwater monitoring wells. Total VOCs concentrations ranged from non detect to 80 ppb. DEC approved hot spot excavation on September 12, 2008. According to the report, URS is currently preparing the bid documents for the excavation work. Due to the low contaminant concentrations in groundwater, DEC suggests decreasing frequency of groundwater sampling from quarterly to semi-annual. An e-mail was sent to DDC/URS/V.Brevdo. AZ 3-3-2009 An e-mail was sent to J. Staten (URS): It seems that monitoring well MW-16 should be decommissioned. If the floor of the garage is covered in oily sludge then a new spill should be called in by the City or URS. Hot spot excavation should be performed as planned. Full round of groundwater sampling should be performed before petitioning for the spill closure. A temporary well (groundwater sampling point) might be installed at the location of MW-16 (which exhibited 83 ppb of the total VOC). AZ 4-23-2009 An e-mail was sent to J. Staten (URS): I have reviewed a Monitoring Report for this site for the 4th Quarter of 2008. The report stated that monitoring well MW-10 will be removed from the monitoring list because no components exceeded the quality criteria. However, downgradient wells should be monitored regardless of the contaminants presence. Since this site has groundwater flowing in northern and western directions, at least one downgradient well should be monitored in each direction. MW-10 should be monitored. Also, one downgradient well should be monitored at the western edge of the plume. AZ 9-10-2009 An e-mail was sent to J. Staten (URS): I have reviewed report for the above site. The report stated that well MW-16 was decommissioned because URS observed that it was filled to the top of the riser with dirt and water. This well consistently showed elevated reading for VOCs. This well should be re-installed. Also, a well downgradient from the contaminated wells should monitored. URS should add a downgradient well to their monitoring schedule. AZ 9-14-09 Based on the latest URS's submissions (report for the 2nd quarter 2009 dated June 10-2009) and on a correspondence from J. Staten, downgradient wells were sampled. MW-16 was sampled over 8-year period. Over this time, well MW-16 did not exhibit compounds above Groundwater Quality Criteria until a minor exceedance occurred in December 2007. Subsequent samples collected in 2008 also showed a couple of compounds above Groundwater Quality Criteria, but the concentrations were not significant (total VOC concentration under 100 ppb). AZ 12-1-09 An e-mail was sent to Jane Staten/Afsar Samani/Marcy Abzagh/Vadim Brevdo: Dear Jane, I have reviewed Summary of the Excavation Activities and Request for Spill Closure for the above site dated August 19, 2009. Also, I'm in receipt of your e-mail dated Nov. 20, 2009. The e-mail stated that the City, through DCAS, is involved with the owner of the Manhattan West 9 Garage (a private party) in an extensive renovation of that building. DDC stated that the planned renovation work is imminent and includes partial replacement of the Garage floor slab which will destroy the monitoring wells inside the garage. The hot spot excavation found that no VOCs or SVOCs were detected in any soil samples. The results of the excavation are approved. Please make sure that grab samples are taken when performing any soil sampling. Composite samples could be taken only in addition to grab samples. Groundwater samples were collected from 19 wells. No groundwater samples were taken from wells MW-15 and MW-16 because they were destroyed. The latest site-wide groundwater sampling results showed that MW-06 had exceedances of

MOBIL (Continued) **S104278682**

VOCs. Also, the latest available results from MW-16, which is destroyed, showed that it had VOCs exceedances. Groundwater natural attenuation is being used at this site as a remedial strategy for groundwater. Since the groundwater wells will be destroyed at this facility during floor slab replacement and the City would like to close this spill, I request that soil sampling should be performed while doing garage floor replacement. Special attention should be given to the area where MW- 06 and MW-16 are located. These activities should be coordinated between DCAS and NYCDDC. Environmental consultant should be present at the time of the excavation and perform soil sampling. If signs of contaminated soil/groundwater are observed during the excavation, A NEW SPILL SHOULD BE CALLED IN TO NYSDEC HOTLINE. If contaminated soil is discovered it should be removed to the extent possible, end point samples taken and activities immediately reported to NYSDEC. AZ 3-5-2010 Discussed with Jane Staten sampling plan for MW-9 site. She asked for directions for locations of soil sampling points. If utilities, underground structures and the scope of future work allow, samples should be taken in the area of MW-06, MW-16, diesel dispenser, 550 gal gasoline UST (removed), 4,000 gal diesel UST (removed), 4,000 gal diesel UST, 550 hoist oil, 550 kerosene, 550 motor oil and 550 gasoline USTs (abandoned in place). About 23 samples will be taken. AZ 8-3-2010 An e-mail was sent to H. Roberts: Harvey,Request regarding closure of spill 9513870 was denied as per my letter dated 12/01/2009. Soil sampling should be performed at the site as per my letter. If you have any questions regarding this matter please contact me at 718-482-6387. Thank you, AZ 8-3-2010 An e-mail from H. Roberts: Alex, We've been in touch with DOS regarding the renovation work at the Manhattan West 9 Garage. There is no schedule yet for floor slab replacement (see emails below). We'll let you know when the floor replacement gets scheduled. AZ 10-11-2011 I was contacted by K. Shenahan. The current site owner is postponing work on breaking the existing floor and sampling the soil due to the lack of funds. 10/13/2011 an e-mail was received from K. Shenahan: Alex, NYCDDC s environmental consultants have been successfully implementing site remediation at this site since 2004. Remediation technologies included a multi-phase extraction system, natural attenuation and excavation. Recently, the owner of the property informed NYCDDC that the financing of a proposed facility rehabilitation project would not be approved until the spill number was closed. Therefore, URS has prepared this e-mail to summarize the current situation at this site and formally request closure of spill #9513870. Background There has been no activity on this site since late 2009. The MPE system began operating in April 2004 and consisted of a network of 14 extraction wells. By February 2005, site monitoring data showed that free product was no longer present at the site and groundwater contaminant levels were significantly reduced. In addition, soil borings showed significant decreases in soil contamination. Based on these results, three of the extraction wells were shut off. In October and November 2005, LiRo advanced an additional five soil borings to evaluate system performance. Two of the five borings showed the presence of minor residual contamination. In December 2006, URS completed another round of confirmation soil sampling and the data was clean except for one boring near well EW-09. As a result, operation of the MPE system was focused on the area around EW-09. In October 2007, URS advanced another confirmation soil boring and collected two soil samples from the area that was

MOBIL (Continued) **S104278682**

previously found to be contaminated. This data also indicated the presence of residual soil contamination. On January 24, 2008, URS issued an investigation summary report with recommendations for a hot spot excavation for soil and natural attenuation for groundwater. In an e-mail dated June 5, 2008, the NYSDEC responded to the report with several comments to which URS responded in a letter dated June 12, 2008. In an e-mail dated July 18, 2008, the NYSDEC approved removal of the MPE system, hot spot excavation, and natural attenuation for groundwater. In addition, the NYSDEC approved closure of spill #9910856 in an e-mail dated September 12, 2008. The hot spot excavation work was performed by Franklin on June 23, 2009. On August 19, 2009, URS issued a report to the NYSDEC documenting the results of soil excavation work conducted to remediate petroleum contaminated soil (soil confirmation sampling results are attached). The As-Built drawing illustrated the limits of soil excavation. The report also included a formal request to close spill #9513870 assigned to the site. The request to close the spill number was based on the fact that the remedial excavation was successful and there was only trace concentrations of volatile organic compounds (VOCs) detected in groundwater samples collected from the site (groundwater data for the past 5 years is attached). On November 20, 2009, URS also sent the NYSDEC an e-mail notifying them that owner of the facility was planning an extensive renovation of the site including replacement of the concrete floor slab which would destroy the monitoring wells located inside the garage. On December 1, 2009, the NYSDEC sent an e-mail to URS indicating the favorable results of soil excavation were acceptable. In addition, the NYSDEC deferred approving the request for spill number closure until after floor slab replacement project. The NYSDEC requested that field screening and soil sampling be conducted during the concrete floor slab replacement project especially in the area of monitoring wells MW-06 and MW-16. The most recent groundwater data collected at the site indicates very low concentrations of VOC in the following wells: MW-02 (14 ppb, no exceedances) MW-06 (42 ppb, 4 exceedances) MW-14 (2 ppb, no exceedances) MW-15 (4 ppb, no exceedances) MW-16 (65 ppb, 2 exceedances) MW-20 (13 ppb, no exceedances) MW-21 (9 ppb, no exceedances) Summary URS is formally requesting spill #9513870 be closed since it appears that the groundwater and soil have been remediated to the limits of the effectiveness of the approved remedial technologies. We hope this summary and attached data provides you with sufficient information to evaluate this request. URS will reiterate to the property owner that if and when he performs the facility rehabilitation project, he is required by law to notify the NYSDEC if petroleum contaminated soils are encountered. AZ The following e-mail was sent to K. Shenahan/V. Brevdo/M. Asbagh: Dear Kevin, I have reviewed the Technical Memo dated October 12, 2011. The Memo stated that NYCDDC's Environmental Consultants have been successfully implementing site remediation since 2004. Remediation technologies included a multi-phase extraction (MPE) system and excavation. MPE system was operating at the site in 2004-2008. As a result, free phase product was no longer present at the site and groundwater contaminant levels were significantly reduced. The hot spot excavation work was performed in 2009. Post excavation end point sampling detected that no VOCs or SVOCs were detected in any soil samples. The remedial excavation was successful and there was only trace concentrations of volatile organic compounds (VOC) detected in groundwater. Based on the most recent groundwater sampling results,

MOBIL (Continued) **S104278682**

only six minor exceedances of groundwater standards were detected. A current owner of the facility is planning an extensive renovation of the site including replacement of the concrete floor slab which would destroy the monitoring wells located inside the garage. If contamination is encountered during the slab replacement, a spill should be called in. Based on the documentation provided to date, spill case 9513870 has been closed. All monitoring wells associated with this project should be closed according to the Department's Groundwater Monitoring Well Decommissioning Procedures . The Department hereby reserves all of its rights concerning, and such forbearance shall not extend to, any further investigation or remedial action the Department deems necessary due to: I. The off-site migration of petroleum contaminants that was not addressed by this evaluation. II. Environmental conditions related to the Site which were unknown to the Department at the time of this approval. III. Information received, in whole or in part, after the Department's spill case closure, which indicates that the corrective action was not sufficiently protective of human health for the reasonably anticipated use(s) of the site; or IV. Fraud in obtaining this approval for inactivation. Please be advised that you should maintain a permanent file of all documentation and correspondence regarding this case for future use. The Department's files regarding this release may not be maintained indefinitely. Sincerely, Alex Zhitomirsky "

Remarks: "under ground tanks with unk petroleum or waste oil have caused soil to be contaminated-still under investigation"

DEC Memo:	"6/11/15-Vought-Received call from and spoke to Ilkay Cam Spanos Langan (212-479-5410) who noted that Vought worked on adjacent spill 1110699 which was probable source to this spill. Spanos noted there were onsite tanks (UST) removed in 2003. Langan is working for owners rep and owner is Madison Square Boys and Girls club. Site redeveloped with a community center (Boys and Girls Club). Ilkay will send conceptual development plans. Geotechnical drilling is ongoing as they want to put a swimming pool in basement and there is shallow bedrock. They have done borings to 100' and they have not hit bedrock. Development may begin within a year and they will submit a plan for moisture/vapor mitigation prior to development. 9/14/15-Vought-Spill transferred from Vought to Omar. Vought sent email to DEC Omar with cc to Ilkay that Rashad, Please review the

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

Phase II Environmental Site Investigation that I just received and placed in D2 under the above referenced spill number and discuss with me so we can prepare a response to Langan (copied above). As you have been seeking more complicated sites as part of your training here in the Spills Unit, I believe this one is quite appropriate. Thanks, 9/14/2015: Rashad As per NYC building records 250 Bradhurst Avenue has alternate addresses of 250-256 Bradhurst Avenue and 310-350 West 155 Street. According to PBS# 2-608783 there are 5, 550 gallon underground gasoline tanks, the status of all the tanks are closed-removed on 3/1/2003, no other spill cases were found for this site. 9/15/2015: Rashad According to the introduction of Langan's submitted phase 2 report there were three other reports on this property which are contained in the appendix. The three additional reports are a Phase 1 Environmental Site Assessment on 8/19/2004, Geophysical Survey to locate UST completed on 11/30/2011, and a Memorandum dated 12/9/2011. The phase 1 investigation will be summarized first (this report included 250 Bradhurst Ave and adjacent property 304-10 West 155th Street): The property is identified as two parking garages including one commercial unit located at 250 Bradhurst Avenue and 304-10 West 155th Street. During the investigation by LCS there was evidence observed that would indicate the presence or likely presence of a release or threatened release of hazardous, toxic, or other substances of concern which that constitute a recognized environmental condition. During inspection LCS noted the presence of five suspect vent pipes protruding from the roof of the parking garage addressed at 250 Bradhurst Avenue. One additional suspect vent pipe was noted on the north side of this structure and two inactive 275-gallon fuel oil aboveground storage tanks (ASTS) were noted within the basement portion of the structure. No staining and/or evidence of release was noted in the vicinity of these ASTs. Two suspect fill/vent ports were noted on the north side of the structure addressed at 303-10 West 155th Street. Cut/crimped copper line were observed within the basement of this structure. No tank closure documentation was provided for USTs on this portion of the subject property. According to historic Sanborn Maps, three 550-gallon underground gasoline tanks were identified as being buried beneath the parking garage at 250 Bradhurst Avenue and two 550-gallon underground gasoline tanks are identified as being buried beneath the parking garage at 304-10 West 155th street from at least 1939 through at least 1996. The Harlem River is located approximately 0.3 miles east of the subject property. This assessment has revealed no evidence of historical recognized environmental conditions in connection with the subject property. Geophysical Survey Summary (prepared on 11/30/2011): 155th Street Sidewalk (above long term parking ramp), a 4ft by 8ft rectangular anomaly was located outside the lower level concrete driveway ramp. The located target is a possible underground storage tank. A UST fill port and vent pipe are located in the sidewalk near the ramp overhead door. Lower level (long term parking garage) the concrete garage was surveyed on the north end of the garage. Two (2) possible USTs were imaged under the floor. Memorandum Summary (prepared on 12/9/2011): Cody Ehlers Group performed an on site inspection and these are the potential areas on concern: Historical use of underground storage tanks (USTs) for the storage of petroleum products. Documentation of removal of certain USTs from 250 Bradhurst Avenue is available, but no record of environmental sampling from the time of removal was identified. In ground hydraulic lifts. Historical use and management of automotive

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

fluids. Nine soil boring were installed in the 250 Bradhurst Avenue garage using push drill rig. Groundwater samples were collected for laboratory analysis from three of the borings. According to the findings and conclusions section The soil and groundwater sampling and GPR program at 250 Bradhurst Avenue garage did not identify any areas of siginificat environmental concern. These activities confirmed that the former USTs in the Bradhurst Avenue garage have been removed. No further soil or groundwater investigation is warranted and no remediation is necessary. According to soil analytics client ID B-3 (the depth and location of soil boring and samples is not clear) has 81,000ppb 1,2,4 Trimethylbenzene, 37,000ppb 1,3,5 Trimethylbenzene, 6,300ppb Ethylbenzene, 7,600ppb Isopropylbenzene, 1,300ppb Xylene, 19,000ppb Napthalene, 13,000ppb n-Butylbenzene, 19,000ppb n-Propylbenzene. Client ID MW-2 (Depth to groundwater is around 18ft, location is unclear) has 1,500ug/L 1,2,4-Trimethylbenzene, 540ug/L 1,3,5 Trimethylbenzene, 260ug/L Benzene, 650ug/L Ethylbenzene, 140ug/L Isopropylbenzene, 222ug/L Xylene, 430ug/L Napthalene, 32ug/L n-Butylbenzene, 240ug/L n-propylbenzene, 0.21ug/L Benz(a)anthracene, 0.2ug/L Benzo(a)pyrene, 0.38ug/L benzo(b)flouranthene, 0.23ug/L Chrysene. Client ID MW-5 has concentrations of 0.2ug/L benz(a)anthracene, 0.2ug/L benzo(a)pyrene, 0.26ug/L benzo(b)fluoranthene, 0.12ug/L benzo(k)fluoranthene, 0.18ug/L Chrysene. Phase 2 Environmental Site Investigation Summary (ES): Phase 2 ESI was conducted June 1-3, 2015 and included a geophysical survey; the advancement of six soil borings; the installation of three temporary groundwater monitoring wells and five soil vapor probes; and the collection of soil, groundwater and soil vapor samples for lab analysis. The proposed redevelopment project is still in the early planning stages and is subject to change, but is expected to include the demolition of the existing building and construction of a community center with a basement and a swimming pool. It is anticipated that an excavation depth of up to 15 feet may be required to accommodate the development. Based on Langans environmental and geotechnical investigation historic fill material typically consisting of silty, gravelly, medium to fine sand with trace to some clay and brick was encountered beneath the surface cover. The fill layer extends to depths ranging from about 13.5-18.t ftbgs. Bedrock was not encountered during the environmental investigation; however, fractured rock was encountered at about 78 ftbgs during a geotechnical investigation near the southwest corner of the site. The depth to groundwater measured during this Phase 2 ranged from 15.5-17.1 ftbgs, groundwater is inferred to flow east towards the Harlem River. In total 13 grab soil samples, 4 groundwater samples, 6 subsurface soil vapor samples, and 1 indoor air sample were taken. Soil boring SB01 at 15-16 ft recorded 0.38ppm Mercury. SB02 14-15 ft recorded 340ppm Lead, 0.95ppm Mercury, at 19-20 ft 17ppm n-Propylbenzene. SB03 17-18 ft recorded 1.5ppm Mercury, at 21-22 ft recorded 74ppm Ethylbenzene, 21ppm n-butylbenzene, 42ppm n-propylbenzene, 59ppm Napthalene, 17ppm sec-butylbenzene, 14ppm total Xylenes. SB04 15-16ft recorded 220ppm Lead, 0.36ppm Mercury. SB06 14-15ft recorded 430ppm Lead, 1.6ppm Mercury. In TMW02 there were high levels of Manganese and Sodium. In TMW03 there were elevated levels found at 9.1ug/L 1,2,4,5 Tetramethylbenzene, 12ug/L 1,2,4 Trimethylbenzene, 9.2ug/L 1,3,5 Trimethylbenzene, 9.9ug/L Benzene, 74ug/L Ethylbenzene, 19ug/L Isopropylbenzene, 6.4ug/L n-butylbenzene, 23ug/L n-Propylbenzene, 37ug/L Napthalene, 9.8ug/L p0Isopropyltoulene, 30ug/L Benzene, 6ug/L

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

sec-butylbenzene, 8.8ug/L Toluene. In TMW06 there were elevated levels of Iron, Magnesium, Manganese, and Sodium. Soil vapor reading were all ND, indoor air sample only recorded one elevated reading of 1.42ug/m3 of Tetrachloroethene. Langan conclusions include several potential sources of petroleum contamination including, but not limited to, previously removed 550gallon USTs, two suspect fill ports/vent pipes, two ASTs in the basements, the geophysical survey identified three hydraulic lifts associated with historical hydraulic tanks. Recommendations include excess soil generated during development of the site should be managed and disposed of as regulated solid waste in accordance with applicable local, state and federal regulations. Petroleum-impacted material cannot be reused on-site. The petroleum-impacted material should be transported and disposed of off site at a facility that is permitted to accept the material. Additional sampling may be necessary for material disposal based on the disposal facility selected. If dewatering is required during construction, groundwater should be sampled and analyzed for NYCDEP sewer discharge parameters, and a sewer discharge permit should be obtained prior to dewatering. Treatment of dewatered groundwater prior to discharge will likely be required. Depending on the extent of soil removed during the propsed development and whether or not residual petroleum-impacted soil and groundwater remain, incorporation of a continuous vapor barrier may be recommended into the proposed building design. As per Jeff: The Department approves plan depending on inclusion of; soil sidewall samples, bottom groundwater samples after excavation, and development plans. Prepared Report Receipt letter and sent it to Zubatkin Owner Representation with CC to Langan, document has been uploaded to D2. Email: I have reviewed the submitted Phase 2 Environmental Site Investigation with Jeff and have attached a letter approving the recommendations pending inclusion of additional requirements listed in the letter. We look forward to the submission of the Remedial Action Plan. The original letter was mailed to Zubatkin Owner Representation, LLC. 11/19/2015: Rashad Received email from Ilkay: We are preparing the RAP for the site and I would like to briefly discuss the RAP and the attached proposed development plan with you. I will be out of the office after tomorrow for 10 days; are you available tomorrow morning around 9 or 10AM for few minutes to discuss? Two structural drawing documents were attached detailing floor plans and section plans, they have been uploaded to D2. The plan drawing which depicts the cellar floor plan has a slab as deep as 13 ftbgs. The section drawings which show the difference in design between having no pool, a 4 foot pool, and an 8 foot pool are also provided. In all cases the pool will not be on ground level it will be on the 4th floor. Jeff and I called Ilkay, she said they are looking to install a slab 3 foot thick throughout the site with a vapor barrier and that only a small portion of the site will be 13 ftbgs. Ilkay will be sending RAP and we discussed that DOH must first approve the RAP and Phase 2 documents before moving forward. 4/22/2016: Rashad Received email from Ilkay: Hope all is well. Please see the link below for the remedial action plan for your review and approval. If you have any questions ,please let me know. Report uploaded to D2. 4/25/2016: Rashad Review of submitted RAP is as follows: The current site is occupied by a vacant, two-story garage with a partial basement. According to historical records the site was operated as an auto repair shop and garage between 1939-1996. Fractured bedrock was encountered about 78 ftbsg. Groundwater ranged from 15.5 to 17.1 ftbsg. Groundwater flow is

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

inferred to travel east towards the Harlem River. Proposed redevelopment includes demolition of the existing structure and construction of a four story community center with partial cellar. It is anticipated the excavation across the majority of the site will extend to about 5 ftbsg, with excavation of a partial cellar extending to about 15 ftbsg. The partial cellar will have utility rooms, a fire pump room, a stormwater detention tank, and an elevator machine room. The proposed structure will be supported by a 3 foot thick mat slab. Remedial Action Objectives are as follows: (1) Removal and closure of two out of service ASTs and any USTs encountered during construction; (2) Excavation and removal of historic fill material and native soil, as required for proposed foundation construction; (3) Collection and laboratory analysis of documentation soil samples; (4) Excavation dewatering during construction, if required; (5) Construction of an engineered composite cover and installation of a seamless waterproofing/vapor barrier system; (6) Preparation and submission of a Spill Closure Report. During excavation the out of service tanks and any other tanks found will be removed and post excavation samples will be taken. Six documentation soil samples will be collected from the bottom of the excavation prior to installation of the waterproofing/vapor barrier system. Sample locations will be biased towards any areas of residual petroleum contamination identified during prior sampling. The composite cover system will be comprised of an approximately 3-foot thick concrete building slab that will span the proposed buildings footprint. As a protective measure to mitigate potential soil vapor intrusion, a waterproofing/vapor barrier will be installed beneath the concrete slab and along the sub grade foundation walls. The waterproofing/vapor battier will have a minimum thickness of 20 mils. The only area without this cover system will be a 745 square foot area on the southeast corner of site which is a courtyard. Foundation construction will start in 2016 and take about 5 months to complete. As per building plans basketball court will be on third floor and pool will be on 4th floor. First floor will have offices/classrooms/general conference rooms. RAP sent to DOH for review. 5/6/2016: Rashad Ilkay send email asking if DOH has reviewed the RAP, I let her know I would follow up with Nate and get back to her. 5/11/2016: Rashad Nate responded on 5/10 after reviewing RAP and Phase 2: I have reviewed the Remedial Action Plan and the Phase II Environmental Site Investigation Report for the above referenced Spill site. Based on review of the data, it appears that there is residual contamination that is present beneath the site in soil vapor at elevated concentrations that have the potential to impact indoor air within the proposed building. It is recommended that during the redevelopment process piping for an Sub-Slab Depressurization System (SSDS) be installed and either be the system be made active or conduct soil vapor intrusion sampling during the heating season (November March) to determine whether the SSDS will need be made active based on concentrations in soil vapor and/or indoor air. Prepared report receipt review letter with Jeff's assistance, letter was sent to Nate/Mike for review. Nate indicated letter looked good and that he has no changes. Email sent to Ilkay with review letter (with cc to DOH): Please see the attached Review Letter in response to the submitted Remedial Action Plan. Please let me know if you have any questions. Thank you. Letter uploaded to D2. 6/3/2016: Rashad Teleconference will be scheduled for next week by Langan with DEC and DOH to discuss review letter requiring SSDS.

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

6/6/2016: Rashad Conducted teleconference with Langan and NYSDOH to discuss SSDS addition to RAP. Langan will be discussing options with client and getting back to us. Nate sent email and has indicated that any mitigation technique selected needs to be proven effective. Nate also indicated that Langan's suggestion of 3 foot slab, vapor barrier and HVAC modifications may be adequate, if proven effective. 6/17/2016: Rashad Sent email to Ilkay: What is the status on the design of the positive pressure mitigation system, as it may be the most feasible option that we discussed? Thank you, have a nice weekend. Ilkay responded: We will be working on the design starting next week, and should be able to share the design with you by mid-July. 8/15/2016: Rashad Received email from Michele Rogers with link for SMD system design, it has been uploaded to D2. 8/18/2016: Rashad Design was approved by NYSDOH and SVI investigation is required as per DOH. Report review letter was prepared with requirement for air sampling. Letter will be reviewed by DOH prior to submission to Langan. DOH Nathan edited letter and it was emailed to all parties and uploaded to D2. Letter outlines Soil Vapor Investigation requirements. DEC Possibly Requires: 1. Site map with all boring and groundwater sampling locations - Memorandum Report. 2. Review of RAP including possible SSDS requirement by DOH? 3. Development Plan (details including depth of excavation) 1/17/2017 Austin This spill report is being transferred from Rashad Omar to Jeffrey Vought end. 1/24/17-Vought-Received email from Langan (Michelle Rogers-mroger@langan.com Ph:212-479-5429) on 1/23/17 that Hi Jeff, To keep you in the loop, the foundations contractor (Moore) is planning to mobilize to the site within the next two weeks. We anticipate that implementation of the RAP will begin shortly thereafter. Please let us know if you have any questions. Thanks Vought replied with cc to NYSDOH Walz that Michele, Thanks for the update and we look forward to the documentation of the installation of the positive pressure mitigation system as well as the SVI results as per the approved RAP. 4/26/17-Vought-Received call from and spoke to Langan (Ilkay Cam Spanos) and she noted that construction ongoing and while they were excavating in southwest corner they found groundwater with sheen and they will stockpile soil separately. Groundwater samples were collected in same area during the Phase II. Vought noted that DEC looked forward to the installation of the positive pressure mitigation system as well as the SVI results as per the approved RAP. 5/1/17-Vought-Received email from Langan (Rogers) on 5/1/17 that Hi Jeff, To keep you in the loop, earlier today the contractor encountered what appears to be a 550-gallon tank while excavating in the southwest portion of the 250 Bradhurst Avenue construction site. Removal of the tank will be handled in accordance with the approved RAP and applicable state regulations. Please give us a call if you have any questions. Vought sent reply that Michelle, Thanks for the heads up and I recorded the tank discovery you noted below in my spill notes as well. We look forward to the report that will include the endpoint samples from this tank location, and installation of the positive pressure mitigation system and the SVI results as per the approved RAP. Note that I have copied NYSDOH above as well so that they may be informed. Thanks, 4/12/17-Vought-Received email from Langan(Rogers) on 5/10/17 that Hi Jeff, Attached for your review are the analytical results of the endpoint samples collected from yesterday s tank excavation. The tank was removed and found to be intact. Endpoint samples were collected from the base of excavation and the eastern, western, and northern sidewalls. The

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

southern sidewall had been excavated as part of development when the tank was discovered and as such, a fourth sidewall sample could not be collected. The analytical results were below the CP-51 criteria with the exception of slight PAH exceedances identified in the sample collected from the eastern sidewall. No PID readings above background or odors were noted, and the contractor plans to backfill the excavation as soon as possible. This information will be included in our spill closure report. Please let us know if you have any objections. Thanks, Vought added endpoint samples to D2 and sent reply email to Rogers, with cc to NYSDOH Walz, that Michelle, Thanks for the endpoint samples and description below. The Department has no objections to including the information regarding this tank in the Spill Closure Report. As I noted below, we look forward to the report that will include the endpoint samples from this tank location, and installation of the positive pressure mitigation system and the SVI results as per the approved RAP. Thanks, Rogers replied, with cc to all, Thanks Jeff . DEC Requires: 1)Installation of SSDS and performance of SVI once development completed as per NYSDOH 2)cc to Langan (Rogers/Spanos) and NYSDOH Walz. 12/18/17 - Austin - Project reassigned from Vought to Patel - end 04/20/18-Hiralkumar Patel. 2:00 PM:- went to site for inspection. Site is being redeveloped. 2:23 PM:- left message for Ilkay. 05/01/18-Hiralkumar Patel. 1:25 PM:- received call from Ilkay. she mentioned that the building construction will be completed by Aug. 2018 and SVI study will be conducted in Dec. 2019, after actively running SSDS system for a year. suggested Ilkay to submit report including summary/result of activities completed to date. 01/24/19-Hiralkumar Patel. 2:09 PM:- received call from Ilkay inquiring about need for SVI study if site has an active SSDS. asked Ilkay to contact NYSDOH in this matter. 03/21/19-Hiralkumar Patel. received email from Albert Tashji (ATashji@Langan.com) from Langan including sir sampling results. 11:33 AM:- received email from DOH Nathan. he reviewed the results and mentioned that it does not appear that the indoor air is impacted and the soil vapor concentrations are not indicating a concern at this point in time. 03/22/19-Hiralkumar Patel. 1:00 PM:- spoke with DOH Nathan, Albert and Ilkay. Albert mentioned that the SSD system was not in operation at the time of SVI sampling due to some adjustments being made to the system, and sub-slab vapor sample was collected by lowering a tube through SSDS riser pipe to perforated area. he also mentioned that the building's HVAC system was in operation at the time of SVI sampling. based on result of SVI sampling, NYSDOH agreed that no further investigation is required at the site and SSDS can be passive. informed Albert/Ilkay that the spill will be closed upon receipt of a SVI report (including summary of sampling methodology). 09/17/19-Hiralkumar Patel. 12:50 PM:- received email from Albert including copy of PBS registration form to include a 550 gal UST discovered during construction. 1:12 PM:- sent email to Albert and reminded him that SVI report is not submitted yet. email copied to Ilkay. 10/07/19-Hiralkumar Patel. 2:09 PM:- received email from Albert including link to spill closure report. 10/09/19-Hiralkumar Patel. case closed based on review of available information. MSBGC-NYC Support Corporation **property owner** c/o Jeffrey M. Dold Chief Financial Officer 250 Bradhurst Avenue New York, NY 10039 Ph. (212) 760-9600 Ext. 0366 email: jdold@madisonsquare.org 10:30 AM:- sent spill closure letter to Mr. Dold. letter emailed to Mr. Dold, Albert and DOH Nathan."

Contact Name:	CALLER
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY DEC'S KOLLEENY VISITED SITE 12/19/01. SPILL OCCURRED IN BASEMENT OF 465 W. 147TH ST., OIL DELIVERY IN MORNING, OVERFILLED TANK, APPROX. 10-15 GALLONS OF OIL CAME OUT TOP OF TANK AT LOOSE GAUGE, SPILLED ON FLOOR AND WALLS, FLOWED INTO NEXT ROOM WHERE FURNACE IS LOCATED. FIRE DEPT. RESPONDED AND PUT DOWN SPEEDY DRY. KOLLEENY CONTACTED OIL COMPANY, SOUTH CAROLINA FUEL OIL (212-234-5900), GLORIA AND MARION CAME TO SITE, TOLD THEM THEY MUST COMPLETE CLEANUP BY COLLECTING/DISPOSING OF SPEEDY DRY, POWER WASH AFFECTED FLOOR AND WALLS, AND TOLD THEM THEY ARE RESPONSIBLE TO CHECK IF TANK CAN RECEIVE DELIVERY PRIOR TO FILLING TANK. KOLLEENY ALSO SPOKE TO BUILDING OWNER, ELTON BUTCH GILKES JR., TOLD HIM TO MAKE SURE OIL COMPANY DOES THOROUGH CLEANUP AND TO MAKE ANY NEEDED REPAIRS TO TANK (275-GAL AST) TO PREVENT REPEAT OCCURRENCE, SUCH AS REPAIRING OR REPLACING GAUGE, WHICH IS NOT WORKING, AND POSSIBLY VENT WHISTLE. OK to close. - J. Kolleeny 3/8/05"
Remarks:	"Caller states that there is a strong odor coming from location; previous leaks there before. Request a call back."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND CROSS REF #0109203 12/28/05 Transferred to E. Hampston via Spill Initative. Forwarded letter to owner requesting an update on spill status. 2/3/06 Contacted by Frank Giannattasio of Frank Crystal & Co. Insurance Broker. Represents holder of current general liability policy for the site. He doesn't have any documentation on site and unlikely pollution coverage is available for the site. 2/3/06 Spoke to Bill O'Brien (of Paul Weis) representing owner pro bono. They are seeking information on spill and will seek to provide. Also spoke to Mike Daniels (#212-247-2660) of Danton Architects. Owner would like to close spill as part of contract punchlist/closeout for site. Spill was reported during construction and appeared to be remnants of fill line from tank(s) removed prior to construction project when older building on-site was demolished. They have spoken to David Spader of ATC who did some work after this report and should have archived copies of disposal manifests and cleanup. 2/7/06 Returned call from Mark Christie of Safeco Insurance (#509-944-2676). Safeco opened claim on site after contact by owner. Called David Spader of ATC (212-853-8280) and left message seeking

UNKNOWN (Continued) **S105055813**

archived file. 2/15/06 Envirotactics (#732-449-0077) provided report with documentation of soil disposal (90 Tons) and confirmatory sampling. Spill closed. Report in file."

Remarks: "during digging they found product in the ground water of a hole that was being dug in - appears to have come from a old oil line"

Spiller Company: 999
Contact Name: TIM REAGAN
DEC Memo: "11/04/2016- DEC Piper- EMIS 252987- Construction Rep Craig Hartage 18363 reported that crews discovered 1 gal diesel fuel from a third party fuel line in the soil while excavating for a new gas service. CSL Sent to Jose Rodriguez at: Greater Harlem Nursing Home 30 West 138th Street New York, New York, 10037 PBS registration is also expired and outlined in letter to renew. 2-606589 11/30/16 TJD Teleconference with Abraham at NYC Tank Testing - he is calling to request an extension to 30 day requirement as referenced in TTF letter. As per Abraham, Con Edison crews are still working in area and do not want contractor to work adjacent to trench. Soil contamination encountered by Con Edison crews has been removed and disposed of by Con Edison - minor soil staining in area of fill box (curb fill) remains - removal pending site access. NYC Tank Testing plans to excavate remaining contamination and collect endpoint samples once work area is accessible. DeMeo has required a full system test upon completion of remedial work. Notification from NYC Tank Testing once remedial work is initiated has been requested. 4/24/18 TJD Closure report received. No passing system test provided with closure documents. Email requesting missing documentation sent to Abraham/Goldie at NYC Tank Testing. Awaiting response. 6/6/18 TJD File review. All required closure documents have been received. A total of 19 drums of contaminated soils were excavated, transported and disposed of off-site as part of the remedial process associated with a failed fill pipe. An new above ground fill line is now installed. Endpoint samples were taken upon completion of excavation activities - then the excavation was immediately backfilled due to structural concerns. Laboratory results reveal minor exceedances to URSCO's in the south side wall exclusively - this sidewall is the closest to the building foundation and further excavation is not recommended due to structural concerns. Following remedial work a full system tank test was performed with passing results. No further action is required. All documentation has been uploaded to DECDOCS. Spill closed."
Remarks: "Contamination found while digging. Clean up pending."

Contact Name:	STEVEN FRANK
DEC Memo:	"10/21/2014 - Feng - Duty Desk Officer. Talked to Steven Frank of LIRO Engineering (718-321-3136 x236, franks@liro.com). This is an E-Designation site and in the planning stage to develop into affordable housing and a hotel. The site owner is currently working with NYCOER. The NYCOER has approved the RIWP and a Phase 2 has been done. A total of 5 soil borings have been installed onsite, i.e. in 2 corners and soil and groundwater were sampled. Petroleum contamination has been identified at the boarder line near next door property. Mainly BTEX with highest of xylenes were found in the soil samples. According to the Phase 1 conducted by previous consultant, the site has been used for warehouse, lumber yard, and heating oil tank in the other portion of the site, but the soil boring results did not indicate petroleum impacts in this area. The above mentioned Phase 1 did indicate that the next door property 100 East 149th Street was a filling station and they suspected it is the source of the petroleum impact at 110 East 149th Street. The demolish of the onsite warehouse might occur in Spring 2015. There is no schedule for the development. Next, they will submit the investigation report to OER and DEC. 3/30/2016 Feng - This spill is transferred from J. Feng

PHASE 2 - OER (Continued) **S117363725**

to J. Vought as per J. Vought. 12/19/2017 - Austin - Project transferred from Vought to Lakhani - end 07/23/18 - Lakhani OER Colin Sullivan emailed a summary of the spill. The spill was opened in October 2014 during the remedial investigation when petroleum compounds were detected at elevated concentrations in MW-2 and MW-3. Results are as follow: benzene 140 ug/L(MW-2), xylene 79.6 ug/L(MW-2), toluene 9.5 ug/L(MW-2), benzene 52 ug/L(MW-3), ethylbenzene 5.3 ug/L(MW-3), isopropylbenzene 110 ug/L(MW-3), xylene 29.1 ug/L(MW-3), toluene 7.4 ug/L(MW-3). The site was initially composed of one lot, Lot 25. This lot has since been divided into three lots since the development plan involved constructing three new buildings: Block 2351, Lot 25, Lot 50 and Lot 40. MW-3 is on Lot 25 and MW-2 is on Lot 40. Currently the buildings on lots 25 and 50 have been constructed and TCOs have been issued for both buildings. These buildings are now seeking to obtain certificate of occupancy.\\ RAR (Impact Environmental, 06/20/18) - Depth to groundwater at the site ranged from approx. 9'bg in the southern portion to 18.5'bg in the northern portion of the site. Apparent groundwater flow was generally to the northwest, west, and southwest. For Lot 50, excavated and removed soil/fill for development purposes within the footprint of the site building to 2'bg in the northeast slab-on-grade corner, 1'bg in the southeastern slab-on-grade corner, 10.5'bg in the eastern-central cellar area along Gerard Ave, 5'bg along the slab-on-grade northern side of the building, and 5.5'bg in the cellar areas parallel to the courtyard/parking area. Additionally, installation of the building's elevator pit required excavation down to 15'bg. No USTs or new petroleum spills were found. For Lot 25, pile caps and grade beams were excavated to approx. 4.5'bg for the majority of the slab-on-grade construction. The detention tank structure and elevator pit were excavated to 6'bg. For Lot 25, Pile caps and grade beams were excavated to approximately 4.5'bg for the majority of the slab on-grade construction with the exception of the detention tank structure and elevator pit, which were excavated to approximately 6'bg. 07/24/18 - Lakhani The development team's plan is to start construction on Lot 40 in about 6 months and finish remedial activities 6 months after that. 07/26/18 - Lakhani Emailed NYSDOH Walz regarding the soil vapor at the site. 07/27/18 - Lakhani NYSDOH Walz has no concerns with Building B/C because they have sub-grade parking garages. However, soil vapor and indoor air data will have to be collected once the hotel is finished and within the heating season to determine whether full activation of these SSDS systems will be necessary. RAWP, indicates that all the buildings will have an SSDS that is semi-active (wind turbine on top of pipe). However, the RAR indicates that no SSDS was installed. Engineering controls at the site include a vapor barrier and composite cover. 08/10/18 - Lakhani Building plans were changed at the last minute (during pre construction meeting) from sub grade parking to parking at grade. A cellar was never proposed beneath building A. Previously, sub grade parking was proposed beneath court yard between two buildings. Future Hotel Building (orange area) will include SSDS. Plans have changed from hotel to commercial office. 08/24/18 - Lakhani Conference call with Colin Sullivan, Nathan Walz, and Shaminder Chawla. It was decided that an SVI study will be conducted at Building B/C during the heating season. It will be proposed in the next RAWP since the site is being developed under the Affordable Housing Project. The commercial office will be implementing an active SSDS. 10/18/18 - Lakhani DEP Collin Sullivan informed that owner requested to perform

PHASE 2 - OER (Continued) **S117363725**

indoor air sampling rather than the initially agreed upon full SVI study. The owner believes that an SVI study would be intrusive of the new buildings and would undermine the integrity of the vapor barrier. While this is a legitimate concern because the owner rather not puncture the vapor barrier after it was installed, but without soil vapor data the potential for future issues is unknown unless a long-term air monitoring program is implemented. 08/05/19 - Lakhani - Spill being transferred to Lin."

DEC Memo:	"Spoke with notifier Joseph Galvin.He indicated that the spill occurred few days ago when they replaced the tank. Odor is strong. Spoke with home owner Erin,she said it was only 1 gallon spill. DEC Veronica responded to check the situation. 11/22/11-Zhune responded to this site. The fill line to the hot water heater is leaking There are oil stain arround the heater. Odor are strong at entrance of house and basement. I could not inspect first floor apartment becouse tenants left the apartment. Second floor apartment is ocupied by Barbara(tenant)and therer is no odor in her apartment. Owner called and said that American Mechanical is on the way to fix the line and cleanup the spill. 12/01/11-Zhune spoke to American Mechanical. They repaired the leaking line. 12/02/11- Zhune spoke to Joseph Galvin (first floor's tenant). He said there is no more oil odor in his apartment. He also said the owner has a ventilation system running in the basement. 12/06/11- Zhune visited the site. The line is fixed and spill is cleaned. As per The owner her contractor removed the speedy-dry. Spill Closed. "
Remarks:	"Oil is leaking from a line connected to the furnace snice yeasterday, it has pooled in the basement with a soil floor."

documentation in support of spill closure relating to reported tank test failure. System failed initial system test (Dry as a Bone)on 7/17/12 - reported as a dry leak. Tank alone was retested on 7/23/12 and passed. Failure determined to be associated with a failed vent pipe which was replaced 9/11/12 by Windmill Tank Service. Additionally threads on interstial space access bung on tank top were also determined to be contributing to an air leak and were repaired by maufacturer (Highland Tank) on 9/11/12. Following repairs entire tank system was retested by AARCO on 9/13/12 and passed. No further action is required. Spill closed."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE Sangesland spoke with Ken McHale of Metro North Environmental. At mile marker 5.88 post on the Hudson line they have evidence of a deliberate leak (Pipe drain) pouring oil out of the back of a building up on the cliff. This has been a long term problem and continues to be a new source. Source building is GAL Manufacterers at 50 East 153rd St. There is a pipe which seems to come from the back of their building, under a rear parking lot and then down the slope to the tracks. Contact person at Metro North should be Tom Water (Walter?) Asst. Supervisor for Track Operations. 718-742-6651. The pipe may be visible from the rear parking lot of the source building. If you want to see the pipe from the tracks, an appointment will need to be made with Mr. Water to have an escort on the tracks. 05/23/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. Called to Herbert w. Glazer at(718)292-9000 left message. -QA 05/25/06: Contacted to owner Mr. Herbert w. Glazer on phone at (718)292-9000. This spill is not in his knowledge. Mr. Herbert will find out about spill and he will call me back. -QA 07/18/06: Contacted to Mr. Fredrick Weaver at (212)499-4535 he said that spill is not in his knowledge. He said to talk to Karen Timko (Director of Environmental Compliance) at (212)340-3322. Called Karen Timko and left message to call me back. -QA 04/10/07: Called Mr. Glazer he was not available. He will be there tomorrow. -QA 08/31/07: I visited Behind Gal Manufacturers and inspected the site today with Mr. W. Glaser (Executive Vice President of Gal Manufacturing Corporation. Due to the storage of big container of metal, There was oil film on metal in the container. Due to heavy rain oil washed out and gone to railway

BEHIND GAL MANUFACTURERS (Continued) **S106018707**

track. Gal Manufacturer dug out that place. They put the new stones at the place. There is no stain at the place of railway track which Mr. Glazer shown to me. I checked the area of railway track was visible from the boundary wall fence of Gal Manufactures, there was no stain. It is also confirmed from Mr. Glazer that there was no such pipe lines in the parking lot going to railway track. On the basis of site inspection and information provided by Mr. Glazer this spill should be closed. Entered Photo 1 in e-doc -QA 09/06/07: Called Mr. Ken Mchale to ask that he is satisfied by the cleaning of Railway track by Gal Manufactures or not? He was not there, Left message to call me back to discuss regarding cleaning of spill. -QA 09/10/07: Called Mr. Ken Mcale (914)686-8681 to discuss regarding spill. He was not there. Left message to call me back. -QA 09/20/07: Called Mr. Ken Mchale and discussed regarding spill. He said that he will go to site with his supervisor Mr. Angello then he will write a letter to regarding spill. -QA 09/21/07: Mr. Ken Mchale and Mr. Angello they said to me verbally on phone that they are satisfied with this cleaning. So on the basis of information provided and my field inspection of August 31, I closed this spill. -QA "

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2019

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2019

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State and tribal institutional control / engineering control registries

RES DECL: Restrictive Declarations Listing
A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements
New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing
In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

COOLING TOWERS: Registered Cooling Towers
This data includes the location of cooling towers registered with New York State. The data is self-reported by owners/property managers of cooling towers in service in New York State. In August 2015, the New York State Department of Health released emergency regulations requiring the owners of cooling towers to register them with New York State.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health

UTM Y (Meters):	4519358.0
Elevation:	21 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5940599 CENTRAL PARK, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

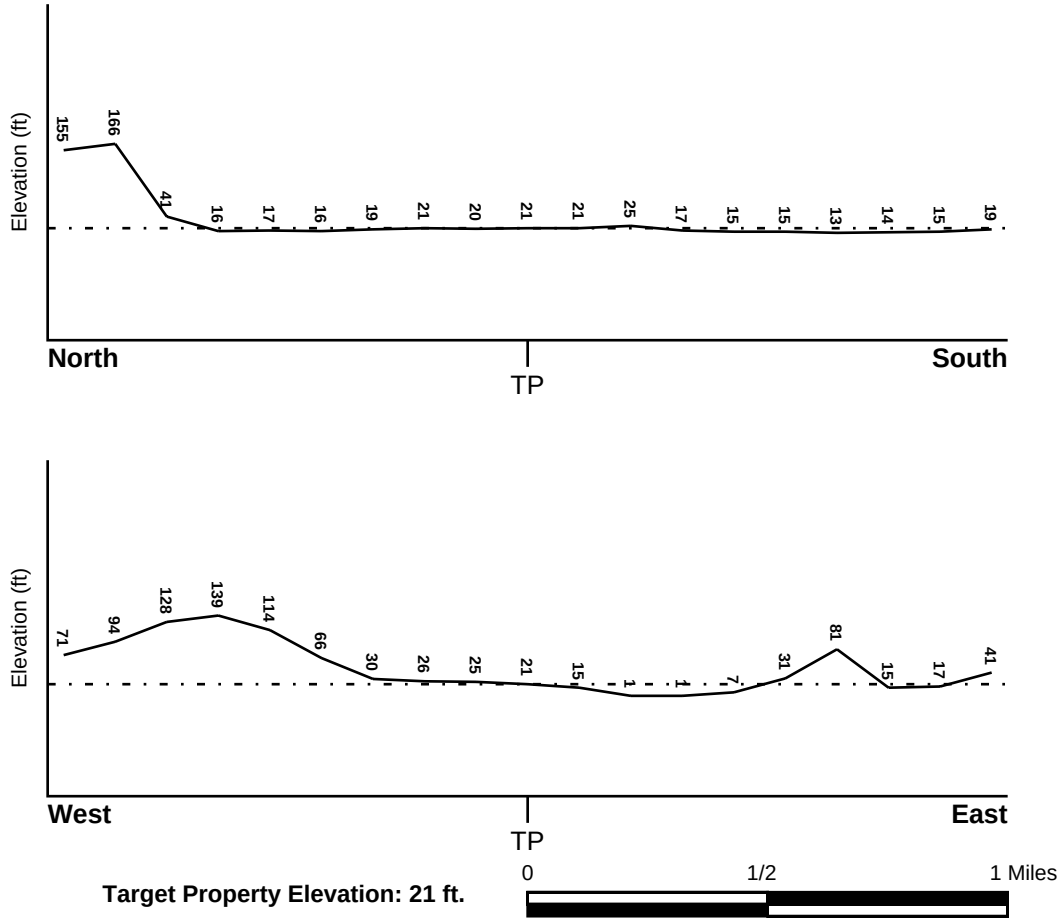
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 21 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3604970079F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
3604970083F	FEMA FIRM Flood data
3604970087F	FEMA FIRM Flood data
3604970091F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CENTRAL PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT **GEOLOGIC AGE IDENTIFICATION**

Era:	Paleozoic	Category:	Stratified Sequence
System:	Ordovicias		
Series:	Lower Ordovician and Cambrian carbonate rocks		
Code:	OC *(decoded above as Era, System & Series)*		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

New York Public Water Wells
Source: New York Department of Health
Telephone: 518-458-6731

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Database
Source: Department of Environmental Conservation
Telephone: 518-402-8072
These files contain records, in the database, of wells that have been drilled.

FOIL Request :: W063031-122719

1 message

New York DEC Support <newyorkdec@mycusthelp.net> Fri, Dec 27, 2019 at 3:54 PM
To: "emenos@akrf.com" <emenos@akrf.com>

Dear Emmanuelle :

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 12/27/2019 and given the reference number FOIL #W063031-122719 for tracking purposes. You may expect the Department's response to your request no later than **1/28/2020**.

Record Requested: **Records pertaining to: underground storage tanks (USTs), spill records, remediation sites, dump sites, soil and groundwater remediation, storage of hazardous materials, and/or hazardous materials activities for 2521 Adam C Powell Boulevard (Block 2015, Lot 1) New York, NY**

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

RE: PUBLIC RECORDS REQUEST of 12/27/2019, Reference # W063031-122719

Date: 01/13/2020

Dear Administrator Emmanuelle Menos,

I write in response to your Freedom of Information Law (FOIL) request seeking:

> *Records pertaining to: underground storage tanks (USTs), spill records, remediation sites, dump sites, soil and groundwater remediation, storage of hazardous materials, and/or hazardous materials activities for 2521 Adam C Powell Boulevard (Block 2015, Lot 1) New York, NY*

Please be advised that a diligent search of the files maintained by DEC produced no responsive records.

If you believe you have been unlawfully denied access to responsive records, you have the right to appeal. Any such appeal must be submitted in writing and within thirty (30) days of the date of this email. Appeals must be directed to:

FOIL Appeals Officer
Office of General Counsel
New York State Department of Environmental Conservation
625 Broadway, 14th Floor
Albany, NY 12233-1500

Your FOIL request is now closed. If I can be of further assistance, please contact me at (718) 482-3103 and reference FOIL #W063031-122719, or simply reply to this email. Thank you.

Sincerely,

Region 2 FOIL Coordinator

Emmanuelle Menos <emenos@akrf.com>

[OpenRecords] Request FOIL-2019-826-06028 Submitted to Department of Environmental Protection (DEP)

Reply-To: foil@dep.nyc.gov
To: emenos@akrf.com

The Department of Environmental Protection (DEP) has **closed** your FOIL request FOIL-2019-826-06028 for the following reasons:

- A diligent search for records responsive to your request did not locate any such records. Accordingly, your request is denied.

You may appeal the decision to deny access to material that was redacted in part or withheld in entirety by contacting the agency's FOIL Appeals Officer: foilappeals@dep.nyc.gov within 30 days.
