STEERING COMMITTEE MEETING 1

Agenda

@David and Joyce Dinkins Garden
263 West 153rd Street ~ Btwn Macomb's Place and FDB
Thursday, October 22, 2015 -- 6:30pm-7:30pm

Bradhurst Brownfield Opportunity Area Grant & Study
Steering Committee Meeting

Hosted By HCCI, Inc.

AGENDA

I. Call to Order and Welcome

II. Steering Committee Introductions

III. Recap of Bradhurst BOA Phase 1 Project (Malcolm Punter)

IV. Bradhurst Revitalizaiton Phase 2 Introduction (Shachi Pandey)

V. Understanding the BOA planning process, Steering Committee responsibilities – funding, boundaries, objectives and goals (Malcolm Punter)

VI. Comments/Q & A

Notes:

Barbara	Williams	Polo Grounds-President	2937 Frederick Douglass Blvd #19E	(212) 694-2112	bbbj65@yahoo.com	**Attending. Spoke and invited via verbal conversion 10/14**
Patreinnah	Acosta-Pelle	PR City, Company		(917) 768-3220	ppelle@hcci.com	Consultant Coordinator
Bernadette	McNear	Rangel Houses Tenant Assocaition-President Ralph J. Rangel Community Association Inc - CEO	159-48 Harlem River Drive #12G	(646) 825-1294	ralphjrangel.ta@usa.com	**Attending. Spoke and invited via verbal conversion 10/14**
M. Starita	Boyce Ansari, Ph.D.	Resident		(646) 285-1068	Drpinkie@verizon.net	**Verbal RSVP - 10/16**
Charles	Callaway	WE ACT	1854 Amsterdam Ave	(212) 961-1000 ext 309	charles@weact.org	**Verbal RSVP 10/21 Via Phone**

Meeting Notes

David and Joyce Dinkins Garden
263 West 153rd Street ~ Btwn Macomb's Place and FDB
Thursday, October 22, 2015 -- 6:30pm-7:30pm

Bradhurst Brownfield Opportunity Area Grant & Study
Steering Committee Meeting

Hosted By HCCI, Inc

Meeting started at 6:35pm

1) Patreinnah Acosta-Pelle started out meeting and had everyone introduce themselves.
2) Next meeting is to happen in 2016.
3) Malcolm Punter gave an overview of HCCI and BOA.
   - HCCI was created in 1986 by several clergymen of different dominations to help, as a community, revitalize the Bradhurst area (144th to 163rd street) as it was one of the poorest areas in Manhattan.
   - Worked with Columbia University, City College, as well as city offices such as the mayor's office and city planning.
   - 30 years later, we made progress in terms of housing; however, now the main goal is economic development of this area (double digit unemployment). Part of the BOA's effort is targeted to help that development.
   - Grant given in 2008 (Governor Paterson in office), that resulted in a published report (2011) on the conditions in the area. Community has to be intimately involved in the process.
   - Submitted to the Department of State for a second round of grant funding (supplemental step 2). This is the step we are currently on.
4) Tom Lunke went over the history of the "economic richness of the Bradhurst area"
   - Concerns that were originally brought to the table at the previous meeting and still need to be addressed: Improving neighboring connections, urban design and safety, expanding and repurposing open spaces, reemphasizing the cultural components like those that were in the area before (dancehall, stadium, etc), need for lighting under the Viaduct, police not following parking guidelines.
5) Shachi Pandey gave presentation.
   - Went over the members participating in the project and their roles
   - Overall positive trends in the Bradhurst area:
   - 800 new residential units; high quality commercial corridor on 145th street.
   - Fastest growing neighborhoods in NY, has a higher percentage of younger people, and even though it has high unemployment, income growth has been the highest in NYC.

- Location advantages of this area are close proximity to the Bronx Terminal Market, Lincoln Medical Center, The Yankee Stadium, and City College.
- Goals of this project are to balance new growth and new development with what the resident community needs, plan for more youth recreational opportunities, vocational skill development and educational opportunities. Bradhurst also wants to be actively engaged in green practices such as habitat improvement, stormwater management, streetscape improvement as well as working with businesses to promote environmentally friendly business practices. An important urban design goal of the project is to create seamless and safe networks between areas within the community as well as to and from places around the community.
- As illustrated on slide number 9 of Attachment 1, there are three broad project focus areas.
- Went over the opportunities and constraints of each of the possible sites (these are preliminary since this project has only started a few weeks ago) *Note: See slides for more details*.
  - ✓ Davis Warshow Site and 155th Street Viaduct (A1 and A2)
    - Opportunities: Higher pedestrian traffic in coming years, close to subway B/D and future Madison boys and girls club. May be an opportunity to formalize a community node.
    - Constraints: Steep grade changes, zoning restrictions and height restrictions due to close proximity to historical viaduct.
  - ✓ Post Office Site (A3)
    - Opportunities: To create an iconic gateway into Bradhurst with views of the Harlem River.
    - Constraints: Dangerous intersection with a high number of vehicular and pedestrian injuries
  - ✓ 145th Street Site (B1)
    - Opportunity: An emerging commercial corridor with a potential demand for hotel, office, residential and retail space (details to be determined after market study). Close proximity to waterfront and bus depot. Great opportunity for economic development.
    - Constraints: Multiple lots with private owners which makes future development plans unknown and uncertain.
  - ✓ City owned lot (B2)
    - Opportunity: City owned lot with greater chance of getting something done.
    - Constraint: Small lot size that limits the total development area
  - ✓ Car wash site (B3)
    - Opportunity: Proximity to Frederick Johnson Park, subway 3 line and PS 200 giving opportunity to create a community node / public realm with safe pedestrian networks
    - Constraint: Unknown contamination issues
  - ✓ Area C has two broad emphases; one focuses on creating continuous public access along the Harlem River (C1) and the other focuses on creating safe upland connections for the Bradhurst community (C2).
  - ✓ Continuity along Harlem River (C1)
    - Opportunity: To provide community based waterfront programming. Increase much needed recreation and public realm amenity for the Bradhurst community. Habitat restoration and green stormwater management practices.

- Constraints: A lot of these areas are separate and are owned by multiple owners. Heavy infrastructure uses such as the Harlem River Drive, MTA yards etc. create additional challenges for the safe design of public access that will have to coexist with the infrastructure uses.

✓ Upland Connections (C2)
- Opportunities: To thread the Bradhurst public realm into a walkable network.
- Constraints: Topography, fenced off areas and lack of adequate pedestrian infrastructure.

✓ Stopped presentation to ask if anyone had anything to add or if they have any questions.
- **Question**: "On 145th and Lenox Ave, the segment by the KFC, I thought they were going to do construction on that avenue to widen it so more cars can pass by and create a walkway. Is this the area that you want to redevelop?"
- **Answer**: There is a DOT proposal to put a median in the middle of the street. They circulated some designs and made some changes based on feedback they got from the community. They are supposed to recirculate the new design. This site used to have a car repair and tire repair shops before the KFC was built, so there is most likely petroleum contamination. There are different owners of this area. They have a senior care and day cares there. Some of the owners are planning on selling and developing their properties making it a prime brownfield to look into.
- **Comment**: Loss of this site means the loss of daycares and senior services. So when developing this site we should consider what services we can offer in terms of senior and child care.
- **Question:** "Have you noticed any illegal dumping anywhere within this area?"
- **Answer:** 155th street (from Harlem River to Bradhurst Avenue) is a dump site. With Barbara Williams' leadership we got the Parks Department to realize that High bridge Park area behind the Polo grounds was their land. Worked with Parks Department and NY Restoration Project pulled out dumpsters full of garbage and cutting a lot of the excessive growth. A lot to be done in this area. There is some dumping going on there but it is not as severe as it was before.
- **Question:** "Certain portions of the Harlem River Drive would flood regularly; will you be doing some mapping to look at the 100 year and 500 year flood to understand some of the risks?"
- **Answer:** Yes. Tom Lunke's office did map this and will share it.
- **Question:** "What are the plans for the 155th street site?"
- **Answer:** Still have to do more research as to what we can actually put there (extension of library? Job training center?) Housing was considered too complex because of zoning (one or two stories for commercial space).
- **Comment**: "We have been asking to get a state-of-the-art library. I would like that to be included in all of these studies."
- **Question:** "Can we create a partnership with the Board of Education, so we can have a driving school for the children who don't go to college but can still get a job driving?"
- **Answer**: Make a partnership with the DOE to include more opportunities for vocational training.
- **Comment:** This was something the Council Member had proposed back in 2012, to create a partnership between the DOE and many of the city contract unions to prepare

kids for the Civil Service exam. However, there are issues between NYC and the city unions.

- **Comment:** There are, however, many jobs that are private and are not involved with the Unions. We should look into those opportunities for the children as well.
- **Comment:** "One of the sites you had mentioned was on the corner of 146th street and 7 Ave, that lot is still being used by the MTA and their contractors for the Bus Depot. So before you start the project you should contact the MTA and NYCHA"
- **Comment:** This lot seems to be vacant and used for people's own private businesses. City-wide Administrative Services owns it.
- **Question:** "What are the plans for transportation upgrades (155th train station and 145th 3 train station)?"
- **Answer:** Need more lighting at the 155th train station. There are also a lot of safety issues. Need an elevator. Need more connections. We would like to engage with the MTA, however, this process will take a very long time and may take away from the other projects so right now it is not a priority. However, if the community sees it fit we are willing to move it up on our list. The MTA has said that there has to be a large amount of community support for it to be placed on their capital plan.
- **Question:** "We have the greatest concentration of seniors in Manhattan. Are you looking into making more senior housing more available?"
- **Answer**: Yes, we will look into it and base our efforts on the demand for it.
- **Comment:** Trying to bring in a senior daycare. This would allow for more jobs.
- **Comment:** Possibly co-locating senior care and daycare
- **Comment:** On the viaduct on 155th, there was a meeting earlier at DOT, they will be doing work on that Viaduct, and so we should get in contact with them.
- **Comment:** Lee's office has resources to help determine the contamination status of certain areas. EPIC (Environment Project Information Center), will be launched towards the end of the year. This is a site, where teams that are working on redeveloping areas will have their own page to say its priorities, geographic areas, etc.
- **Comment:** Look into inviting NYCHA representatives since there are many of our sites that touch some NYCHA sites.
- **Comment:** The Parks Department is going to open up the High Bridge, connect the High bridge park to the Bronx, and maybe look into connecting the Valley to that as a possible bicycling/pedestrian opportunity.
- **Comment:** There is staircase between Rangel Houses and Polo Grounds that goes up to the Harlem River Driveway but there is no crossing across the Harlem River Driveway. It was suggested to create a connection, however, the response was that they would open a new staircase and see what issues transpired and then doing a study on it. Maybe the steering committee can suggest doing the study in tandem or in advance of the new staircase opening.
- **Comment:** From the tip of Rangel Houses there is a walkway ("Up on the Hill") but it isn't signed very well and it doesn't seem very inviting, perhaps there can be an analysis of how you get from Frederick Douglass Blvd to this pathway that leads you over the Harlem River Drive to the Harlem River Waterfront and improving it visually.

- **Comment:** This walkway is going away from the community, there should be something developed to go from 163rd on the waterfront going back to 145th.
- **Comment:** Rangel Houses was awarded money to help in the recovery process from Sandy and Irene. They are planning on putting in a generator. This will be happening within the next year or two. Not sure how this will impact the plans we want to do but we should look into working with Rangel Houses. When they have drawings of what they are planning on doing they will send them to us.
- **Comment:** 207th Street rail yard was flooded as a result of Sandy. They are currently building a seawall and we should get in touch with them. Lenox Terminal is working on storm mitigation planning.
- **Question:** "Are there any proposals for mental wellness centers in these development areas?"
- **Answer:** No. It is something that is usually not spoken about but we should look into it.

Meeting end 8:06

Meeting Materials

BRADHURST STEP 2 SUPPLEMENTAL STUDY
LOCAL STEERING COMMITTEE AGREEMENT

The Bradhurst Brownfield Opportunity Area (BOA) Nomination Study is an initiative of Harlem Congregations for Community Improvement Inc (HCCI) who received a grant for the study from the Department of State (DOS) in 2008 and in 2015. The DOS grant supports a major community-based planning effort that will facilitate the redevelopment of brownfield properties and create a framework for physical and economic growth in the Bradhurst area. Additionally, the BOA study will advance development planning which will result in eligibility for remediation and redevelopment funding.

An important component of the BOA project is the Local Steering Committee; a group of local residents, businesses, community-based organizations, elected officials and City agency representatives that are joined by a common goal of working with the community to plan and implement the ideas that come out of the BOA process. The process is anticipated to take approximately eighteen (18) months and the responsibilities for committee members are outlined below:

1. Attend Steering Committee meetings- estimated to be two per year
2. Attend community workshops during which various plans will be presented to the community for their input
3. Review documents produced by HCCI and its consultants in connection with the BOA Step 2 Supplemental Nomination Study. Such documents may include:
    a. Meeting notes
    b. Project schedules
    c. Interim memos that summarize consultants' findings related to design and analysis
    d. Grant Applications regarding BOA Site Clean-up

4. Be an advocate for the BOA process and support its mission
5. Bring local knowledge, perspectives and ideas to the process
6. Respectfully engage in the process and in discussions with others
7. Engage other members of the community, such as property owners, and City Agencies as needed in the BOA process

Study Area & Planning Priorities

The Bradhurst BOA Study area encompasses the area in Harlem from West 145th Street to 163rd Street between Edgecombe Avenue and the Harlem River and includes portions of Community Districts 9, 10 and 12. Specific corridors within the area have been highlighted for evaluation: including Frederick Douglass Boulevard, Macombs Place, 145th, 149th, 150th, 155th and 159th Streets. These corridors have the potential to reconnect the Harlem and Hudson River waterfronts with Bradhurst and the adjoining neighborhoods. The framework for the study, Under the Viaduct: Bradhurst and Vicinity Neighborhood Plan was created in partnership with the Harlem Community Development Corporation (HCDC).

HCCI, in concert with the participants of several planning sessions has developed a baseline vision for the redevelopment of the Bradurst area BOA sites that emphasizes the following priorities:

- Working with Bradhurst area businesses, the City and state to develop environmentally friendly business practices;
- Creating employment, job training and youth recreational/educational opportunities for the local community;
- Creating appropriate waterfront access, shoreline and habitat restoration and recreational use opportunities;
- Creating a set of Harlem urban design principles for the Bradhurst Area.

I _____ representing _____
(Please print your name clearly) (Name of Company/Agency/Government Office)

agree to participate on the Harlem Congregations for Community Improvement (HCCI) Bradhurst

Brownfield Opportunity Area (BBOA) Steering Committee.

BRADHURST BOA TECHNICAL APPROACH
INTRODUCTION & PROJECT BACKGROUND

Task 1: Public Engagement

The Consultant Team will implement a comprehensive public engagement with the aim of gathering meaningful feedback from community members and stakeholders. This feedback will ultimately inform an urban design strategy for the improvement of key corridors and sites in the Bradhurst neighborhood.
This engagement will include Steering Committee Meetings, Public Meetings and an Online Engagement Platform. These distinct elements are detailed out below:

Task 1.1 / Steering Committee Meetings

The Consultant Team will conduct three Local Steering Committee (LSC) meetings at strategic milestones throughout the Supplemental Step 2 process. These meetings will be used as opportunities to update the committee members on project progress, receive feedback on draft proposals and recommendations, prepare for public meetings, and vet important ideas at key decision-making junctures. These meetings are outlined below but will be reviewed and refined along with the Client at the kick off meeting.

- **Steering Committee Meeting 1**: This first meeting will include a recap of the project goals, scope and timeline. As a significant amount of time has passed since the submission of the initial Step 2 BOA Study, this will be an opportunity to reengage the LSC and revisit the goals of this project. To that effect the Consultant Team will prepare a presentation with a recap of the work submitted in the initial Step 2 BOA as well as other existing studies done in the neighborhood. This steering committee meeting will also be an opportunity to review a detailed community outreach plan and outreach techniques.

- **Steering Committee Meeting 2**: This meeting is proposed to take place at the end of an in-depth market study and analysis, environmental analysis / Phase 1 studies and an initial outreach with property business owners. The Consultant Team will develop a presentation of their works, which will include the aforementioned scopes. This presentation and subsequent discussions with the LSC will guide the identification from among the four Strategic Sites; for additional analysis and design work prior to the drafting of final recommendations.

- **Steering Committee Meeting 3**: This final steering committee meeting and presentation will include discussions on the draft recommendation. The draft recommendations will include urban design strategies for the overall study area and in-depth, potential site programming and reuse alternatives for the Strategic (and Priority) Sites. Feedback provided by the LSC will be incorporated into recommendations prior to a public meeting.

Task 1.2 / Public Meetings and Design Workshops

The Consultant Team plans to conduct at least two and if needed, three public meetings to gather feedback from the larger Bradhurst community. These meetings will be designed to include both presentation and workshops with the intent of keeping the community abreast of proposed plans and gathering specific feedback on the urban programs for the Strategic (and Priority) sites. These meetings are outlined below but will be reviewed and refined along with the Client at the kick off meeting.

- **Public Meeting / Workshop 1:** At the first public meeting, the Consultant Team will present their preliminary findings and analyses to the community and gather their feedback on programming of the four Strategic (and Priority) Sites. This public meeting will be conducted right after Steering Committee Meeting 2 OR near the completion of the urban design framework and the in-depth market studies, and

will include a presentation on findings as well as a workshop to determine community priorities on programming of the Strategic (and Priority) Sites. Prior to the community meeting, the presentation and workshop materials will be submitted to the Client (and/or LSC) for their review and approval.

• **Public Meeting / Workshop 2:** The second public meeting will be held after the presentation of draft recommendations to the LSC (Steering Committee Meeting 3). The purpose of this meeting will be to provide the community members with the opportunity to provide feedback and comments on the draft recommendations. These comments will be incorporated in the final recommendations. Prior to the community meeting, the presentation (and workshop materials if any) will be submitted to the Client (and/or LSC) for their review and approval.

Task 1.3 / Online Engagement Platform

As part of the outreach process, the Consultant Team will establish an online engagement platform, which will help engage the larger population in an accessible and inclusive conversation. This online engagement platform will either be created in the form of a website or through an already established virtual idea gathering platform such as www.allourideas.org, www.mindmixer.com, and other similar systems. The website will provide the viewer ongoing updates about the project as well as be able to host online surveys. The Consultant Team will create and maintain the website. The content of the website will be developed in consultation with the Client / LSC. This new project website can also be linked to existing HCCI website.

Deliverables / Task 1

1. Outreach plan, project goals, scope and timeline
2. Three steering committee meetings including presentations
3. Design of materials for the advertisement of public meetings (meeting posters etc.)
4. Draft public meeting presentations for Client / LSC review and approval
5. Two public meetings / workshops including presentations
6. Website design, development, hosting and maintenance for the duration of the project

Task 2 / Urban Design Framework for the Study Area

Based on the findings and recommendations of the initial Step 2 BOA Study, and feedback from the community and LSC, the Consultant Team will develop a set of urban design principles and best practices to guide the development along major corridors in the study area. This framework will support the coordinated development of the Strategic Sites, link key nodes of activities and focus on strategies for public realm improvements. At a minimum the framework will address the historic character, community needs, environmental sustainability, streetscapes and public open space networks on a neighborhood scale. This task has the following subtasks

Task 2.1 / Identify Potential Open Space and Waterfront Access Pedestrian Realm Improvements

Although parks and recreational opportunities exists in and near the Bradhurst area, limited entrances, poor visibility and the dramatic topography of the study area limits residents' access to these facilities. Further, pedestrian safety and mobility is hindered by the poor conditions of sidewalks and other infrastructure, the preponderance of on-street parking, steep inclines along major corridors and superblock developments, and highway infrastructure that limits connections between the Bradhurst neighborhood and important destinations including the Harlem River waterfront, which has recently been transformed with the development of the Harlem River Greenway. To address these concerns, the Consultant Team will build on the open space and pedestrian realm issues identified in the initial Step 2 BOA Study and catalogue all modes of pedestrian connections to waterfront, parks, major community facilities and other destinations/activity nodes. This analysis and cataloguing will lead to the development of a public realm and pedestrian connectivity plan for the study area. This plan will include streetscape and urban design

guidelines addressing the relationship between the built environment and public right of way. Proposed streetscape improvements will be supported with rough back of the envelope cost estimates.

Task 2.2 / Multi-Modal Transportation Analysis with Focus on Potential Pedestrian Realm Improvements

The study area is served by several subway lines, bus routes, and bridges, which provide connections to the rest of New York City and the region. The major east-west corridors include 155th, 145th, and 135th Streets, and the major north-south connectors include Frederick Douglass Boulevard and Adam Clayton Powell, Jr. Boulevard, all of which have the potential to server as vibrant commercial corridors. The Consultant Team will engage in an analysis of pedestrian and vehicle circulation within the study area and provide recommendations for improving mobility and safety.

This multi-modal transportation analysis will focus on the aforementioned corridors as well as major intersections along these corridors and their connections to the residential neighborhood. Throughout the analyses, special attention will be paid to safe and visible pedestrian/bicycle connections (and public transportation access) to the Harlem River Greenway and other public places. In addition, the Consultant Team will evaluate the potential for ferry service along the Harlem River (near the Lenox Terminal site), and a transit hub serving the Bradhurst community.

The multi-modal transportation analysis will include the following:

- Summary of existing conditions in the transportation network for vehicular and non-motorized transportation (bicycle and pedestrian);
- Demographic data to support analysis of modes of transit used to travel into and out of the study area;
- Analysis of the location and condition of bicycle and pedestrian facilities and identification of current gaps in transit service and pedestrian network;
- Assessment of the quality of existing pedestrian/ bicycle paths and crossing locations;
- Identification of pedestrian and bicycle safety issues or high-accident locations based on collision data;
- Preliminary list of concept-level transportation improvements;
- Assessment of opportunity for ferry service along Harlem River (near the Lenox Terminal Site); and
- List of multimodal transportation improvements in the study area and an implementation strategy to prioritize and identify primary responsibility for those improvements.

Deliverables / Task 2

1. Overall urban design framework including visual representation and texts as needed;
2. Streetscape and urban design guidelines for main streets / corridors within the BOA neighborhood;
3. Best practices and precedents, including documentation from local, national and global examples;
4. Conceptual design (and visualization) for public realm access and improvements
5. Maps describing land use strategies and potential
6. Multi-modal transportation strategy including recommendations and implementation of strategies for key improvements in the pedestrian realm.

Task 3: Alternative Redevelopment Scenarios

The initial Step 2 BOA Study analyzed redevelopment and reuse scenarios for the four Strategic Sites, each of which include two or more individual tax lots. For the Supplemental Step 2 analyses, the Consultant Team will build on the work completed thus far and evaluate the development potential for the tax lot clusters that comprise each Strategic Site. The assessment will be based location characteristics, overall size, ownership patterns, potential contamination issues, and other key factors that will determine the viability of potential future uses. In addition, in-depth market studies will be conducted for those uses deemed most suitable. These highest-and best uses will then be incorporated into development programs that have the greatest potential for successful implementation.

When analyzing potential use options, the assessment will also consider the need for employment opportunities and the changing demographics in the study area. The desire to improve the pedestrian experience along major corridors will be important when translating the recommended uses into an attractive development program that fits the neighborhood and may, for example, result in smaller scale retail opportunities.

Overall, the activities described below for the Supplemental Step 2 analysis are designed to provide additional information about the study area, its businesses and resident as well as the Strategic Sites (in-depth market studies, land assemblage studies, Environmental Phase 1s). This task will ensure a more in depth understanding of the issues and opportunities and thus help guide the implementation of the recommendations.

Task 3.1 / In-depth Market Studies

The Consultant Team will conduct in-depth market studies for the uses being considered for the Strategic Sites and inform this analysis by feedback received from the LSC and community in the past, as well as supplement it with new input from residents and stakeholders.

Based on the current understanding of potential market opportunities in the study area, it is anticipated that the Consultant Team will analyze the market potential and financial viability of a hotel development, apparel stores for children and young adults, educational facilities, incubator facilities, and artisanal markets. Once the most suitable uses are determined, the Consultant Team will develop redevelopment scenarios for each strategic site, including market potential and the total amount of space to be dedicated to each use. Strengths and weaknesses of each potential redevelopment program will be analyzed, taking into account market feasibility, community goals and recommendations but also area-wide elements such as existing infrastructure and urban design challenges and opportunities associated with each site. Once a set of high priority uses is identified, the Consultant Team will reach out to the local development and brokerage communities to vet results and to gather input to refine and finalize the use selection.

Task 3.2 / Assessments on Strategic Sites

Work completed during the initial Step 2 indicated that the entire Bradhurst neighborhood is underlain with urban fill. With this soil profile, uses such as gasoline stations in the area may present an elevated contamination risk. The study will provide detailed historical information about the environmental conditions on parcels that are part of the Strategic Sites and may have potential contamination issues. With these considerations in mind, the proposed scope for the Supplemental Step 2 includes provisions for conducting Phase 1 assessments on a few of the tax lots included in the Strategic Sites (- the total number of Phase 1s will be determined at the kick off meeting). The Phase 1 findings will inform the appropriate land use mix and the development remediation costs for the Strategic Sites. The availability of Phase 1 reports will also help move the sites closer to readiness for development.

Task 3.3 / Development of Remedial Plans and Costs

Based on the information obtained during the Phase 1 assessments the plans and estimated costs for remediation developed for the Strategic Sites during the initial Step 2 will be refined. These cost estimates will be incorporated in the feasibility analysis of the alternative redevelopment scenarios for the four Strategic Sites.

Task 3.4 / Development Feasibility Analysis

The Consultant Team will conduct a development feasibility analysis for each of the four Strategic Sites. This feasibility analysis will include:

• A pro forma model to analyze the financial viability of the specific development programs and to identify potential gaps and
• Definition and summary of development constraints that may delay or potentially derail the implementation of the redevelopment project(s). This will help proactively plan / take action for the development of the Strategic Sites.

Using Rough, Order-of-Magnitude (ROM) remediation costs, the Consultant Team will use the financial model created in the first phase of the Nomination Study to test the feasibility of alternative redevelopment scenarios. Model outputs will identify potential financing gaps and help to determine if additional subsidy will be required.

The larger goal of the feasibility analysis will be to inform the development of revitalization strategies for the Strategic Sites. However, while the financial and physical feasibility aspects will play a major role when developing implementation strategies for the Strategic Sites, it will be equally important to take the needs of the community into consideration.

Task 3.5 / Implementation Strategies (including Land Assemblage)
The Consultant Team will develop an assemblage strategy for each of the Strategic Sites. Using the information gathered in previous tasks we will develop a profile of the cluster that will include ownership information and other data from public sources such as the NYC Departments of Finance, Buildings and City Planning but also information provided by HCCI, HCDC, and other local stakeholders. We understand that some of the individual parcels are owned by public entities such as DOT, MTA, and the Board of Education and these could be used to jumpstart the revitalization process. Keeping that in mind, the Consultant Team will therefore identify assemblage characteristics that are unique to each cluster and develop a recommended assemblage plan that has the highest likelihood of success. Additionally, if the need is identified, the Consultant Team in close consultation with the Client will develop an outreach strategy for engaging property owners. It will be imperative to determine the sequence and timeliness of this outreach so as to avoid speculative activities that may drive up development costs in the future.

Deliverables / Task 3
1. In-depth market analysis focused on Strategic Sites; *
2. Phase 1 assessments for Strategic Sites tax lots (total number to be determined at project kick off);
3. Analysis of potential remediation plans and costs and implications for each Strategic Site;
4. Detailed feasibility analysis for each redevelopment scenario including gap analysis;
5. Memorandum describing land assemblage challenges and strategies for Strategic Sites; and
6. Ongoing outreach to government agencies and property owners of Strategic Sites.

*These analyses will be used to support the Steering Committee's selection of two Priority Sites from among the four Strategic Sites for 3-D Massing Recommendations and Conceptual Designs.

Task 4: Opportunities to Promote Sustainable Development
Task 4.1 / Analysis of Land Infrastructure in the BOA Study Area
The Consultant Team will analyze publicly available information to identify issues with the existing infrastructure, in particular storm water management-, drainage-, and floodplain-related issues. This analysis will also identify opportunities and typologies for creating green infrastructure that can be integrated with the urban public realm. For example, overhead structures, wide sidewalks, steps, and other features that navigate the Bradhurst neighborhood topography create storm water runoff and drainage issues that could be minimized through green infrastructure initiatives.

Task 4.2 / Opportunities for Green Infrastructure within the Public Realm

The Consultant Team will identify green infrastructure opportunities that minimize or eliminate storm water runoff and redirect the flow toward open spaces for management in swales and wetlands. Strategies such as bioswales, enhanced tree pits, permeable paving, and green rooftops will be evaluated. Green rooftops are particularly desirable because they reduce storm water discharge to the sewer and reduce urban heat island effects that in turn reduce the energy requirements for heating and air conditioning. Once the opportunities are identified, they can be organized into management zones and programmed with upland spaces for public access and education.

Task 4.3 / Green Strategies for Neighborhood Development

Using existing initiatives such as the green roof top at the Erbograph building, the Consultant Team will review HCCI's recent initiatives with respect to renovations and new construction of housing and retail building stock within the study area. This will form the basis of further research on best practices regarding the implementation of neighborhood scale, homeowner directed greening programs. The Consultant Team will eventually develop recommendations and outreach strategies for HCCI to solicit assistance from the local business community and homeowners for financing and implementation of cost-efficient green upgrades as well as to create a set of goals for new development projects. These findings will be presented to the community in one of the public meetings to the community.

Deliverables / Task 4

1. Infrastructure analysis focused on identifying features that contribute to storm water run-off;
2. Green infrastructure or best management practices to mitigate sources of storm water run-off;
3. Detailed overview of specific strategies for incorporating environmentally sustainable practices into new and existing housing and other building stock.

Task 5: Summary Findings, Analysis and Recommendations

Task 5.1 / Urban Design Framework and Preferred Reuse Alternatives (Findings and Recommendations)

Based on the studies and analysis from the initial Step 2 and Supplemental Step 2, the Consultant Team will develop draft findings and recommendations for the BOA Study Area. This effort will draw on the waterfront, open space and transportation studies as well as sustainable development studies to produce a revised vision statement and graphics that present the vision for the study area and for the Strategic Sites. This work will also include a list of issues, opportunities and recommendations for specific open space, streetscape, infrastructure improvements, and zoning initiatives that would promote the overall urban design framework for the study area and the Strategic Sites.

Findings from the development feasibility analysis, including the in-depth market studies and the land assemblage studies will be used to support the development of reuse alternatives for the four Strategic Sites. With regards to the Strategic Sites, the work will also define associated development constraints and/or issues for further investigation, and financial modeling to examine program feasibility and any financial gaps of each redevelopment scenario.

Task 5b / 3-D Massing Recommendations and Conceptual Designs

Based on direction from HCCI, HCDC and the LSC, the Consultant Team will identify two of the Strategic Sites for more detailed study and will prepare massing recommendations, and conceptual designs integrating parameters for height, bulk, and other physical guidelines associated with the preferred redevelopment alternative. Street-level renderings for the preferred redevelopment alternative will be completed for primary view angles. This work will also quantify and diagram floor area ratio (FAR) and bulk control as well as other development criteria for the sites.

After finalizing conceptual designs for two Strategic Sites, and after review by the LSC members, the Consultant Team will present the draft recommendations and conceptual designs to the public. The presentation will include issues and opportunities, visuals representing the vision for the study area and for the Strategic Sites, as well as streetscape and infrastructure improvements.

Deliverable / Task 5

1. Summary of urban design issues and opportunities for four Strategic Sites;
2. Summary of redevelopment alternatives for four Strategic Sites;
3. Ranking of strategic sites (based on feedback from HCCI, HCDC and the LSC members and urban design and development criteria) for selection of two Priority Sites; and
4. 3D massing and conceptual design for two sites.

Task 6 / Nomination Study Report

Task 6.1 / Preparation of Draft Nomination Report

A graphically rich Draft Nomination Report will be prepared for the BOA Study Area; it will contain a description of the findings from all of the activities conducted during the initial and Supplemental Step 2 studies and will be prepared in accordance with NYS DOS guidelines. The Draft Nomination Report will include the vision statement; goals and objectives for the study area; delineation and justification of the BOA project boundary and sub-areas; description and analysis of existing conditions (physical and economic); findings and recommendations and include the ideas and views expressed during the community participation process. The Consultant Team will also prepare the draft executive summary to provide an overview of the full document. Upon its completion, the draft report will be provided to the LSC and the NYS DOS for review and comment.

Task 6.2 / Preparation of Final Nomination Report

The Consultant Team will incorporate comments on the draft report and prepare a Final Nomination Report for distribution. Final recommendations will be presented to/reviewed by Local Steering Committee members.

Deliverables / Task 6

1. Draft Nomination Report
2. Final Nomination Report including input from Local Steering Committee, HCCI and DOS staff

Task 7 / Project Management and Coordination

The Consultant Team will support the Client, HCCI, with the management of the Supplemental Step 2 activities. In particular the Consultant Team will assist with any outreach activities, meeting with public agencies, elected officials, LSC and preparation of any presentation materials required for these meetings or to garner support for the Supplemental Step 2 activities. In addition, the Consultant Team will ensure overall conformance of activities with NYS DOS requirements for the BOA program. Shachi Pandey is on the team, who has hands on experience with BOA projects in the NYC and in upstate NY, will review all consultant works for conformance and adherence to the scope of work outlined here and the NYS BOA guidelines. If needed, she will also be available for ongoing communication with and reporting to the NYS DOS. This coordination will help HCCI with the approval and payment of subcontractor invoices as well as the preparation and submission of payment requests to the NYS DOS.

Deliverables / Task 7

1. Ongoing project management and coordination support to HCCI

A.2
STEERING COMMITTEE MEETING 2

Invitation

Agenda

@David and Joyce Dinkins Garden
263 West 153rd Street ~ Btwn Macomb's Place and FDB
Thursday, October 22, 2015 -- 6:30pm-7:30pm

Bradhurst Brownfield Opportunity Area Grant & Study Steering Committee Meeting

Hosted By HCCI, Inc.

AGENDA

I. Call to Order and Welcome

II. Steering Committee Introductions

III. Recap of Bradhurst BOA Phase 1 Project (Malcolm Punter)

IV. Bradhurst Revitalizaiton Phase 2 Introduction (Shachi Pandey)

v. Understanding the BOA planning process, Steering Committee responsibilities, funding, boundaries, objectives, and goals

Attendee List

HCCI Bradhurst BOA Steering Committee Meeting
Thursday, March 31, 2016 - 6:30pm - 8:00pm
David Joyce Dinkins Gardens - 253 West 153rd Street

First Name	Last name	Company/Affliation	Address	Phone	Email	RSVP for 3/31/16 meeting	Signature
Amanda	Duchesne	Mayor's Office of Environment Remediation	100 Gold Street, 2nd Floor	(212) 341-2077	aduchesne@dep.nyc.gov	**Attending**	
Athena	Moore	Manhattan Borough President Office	431 West 125th Street	(212) 531-1609	AMoore@manhattanbp.nyc.gov	**Tentative. Via email plans on attending**	
Barbara	Williams	Polo Grounds-President	2937 Frederick Douglass Blvd #19E	(212) 694-2112	bbbj65@yahoo.com	**Confirmed via phone**	
Beatrice	Sibblies	BOS Developer		(917) 841-2275	sibblies_beatrice@bosdevelopment.com	**Confirmed verbally on Wed. 23rd**	
Brenda	Baulkman	Resident		(917) 570-2832	joycsw@aol.com	**Tentative**	
Charles	Callaway	WE ACT	1854 Amsterdam Ave	(212) 961-1000	charles@weact.org	**Attending**	
Christian	Michel	AKRF	440 Park Avenue South	(646) 388-9783	cmichel@akrf.com		
David	Ashton	NYS BOA Coordinator	New York Department of State Suite 1010 One Commerce Place, 99 Washington Avenue Albany, New York 12231-0001	(518) 474-6000 (518) 473-2473	david.ashton@dos.ny.gov	**Attending**	
Eric	Rothstein	E Design Dynamics	402 West 40th Street	(646) 688-3113	erothstein@edesigndynamics.com		
Grace	Tang	New York City Parks and Recreation Dept Coastal Project Manager Planning and Parklands Division		(212) 360-3467 (917) 231-6458	Grace.Tang@parks.nyc.gov	**Confirmed via email**	
Jacoub	Reda	Philip Habib & Associates		212-929-5656		**jreda@phaeng.com**	
Johane	Cleremont	(guest of MUD Workshop)					
Kyshia	Smith	Policy and Outreach Specialist Office of Council Member Mark Levine, 7th Council District	500 West 141st Street, New York NY 10031	(212) 928-6814 (212) 788-7007	KSmith2@council.nyc.gov	**Attending**	
Lee	Ilan	Mayor Office of Environmental Remediation (Chief of Planning)	100 Gold Street, 2nd Floor	(212) 788-2929	lilan@cityhall.nyc.gov	**Tentative**	
Malcolm	Punter	Harlem Congregations for Community	2854 Frederick Douglass Blvd	(212) 281-4887	mpunter@hcci.org	**Attending**	
Nina	Saxon	New York City Comptroller Scott M. Stringer	One Centre Street, New York, NY 10007	(212) 669-4459 (212) 669-3916	nsaxon@comptroller.nyc.gov	**Confirmed via text**

Tom	Lunke	Harlem Community Development Corporation	167 West 125th Street	(212) 961-4140	tlunke@esd.ny.gov marcus.browne@esd.ny.gov	**Confirmed via phone 3/21**	
Vannette	Dandridge	Resident Leader	2542 Adamc Clayton Powell, Jr. Blvd	(917) 573-8282	vad225@nyu.edu	**Confirmed via email**	

Meeting Notes

David and Joyce Dinkins Garden
263 West 153rd Street ~ Btwn Macomb's Place and FDB
Thursday, October 22, 2015 -- 6:30pm-7:30pm

Bradhurst Brownfield Opportunity Area Grant & Study
Steering Committee Meeting

Hosted By HCCI, Inc

Meeting started at 6:35pm

1) Patreinnah Acosta-Pelle started out meeting and had everyone introduce themselves.
2) Next meeting is to happen in 2016.
3) Malcolm Punter gave an overview of HCCI and BOA.
   - HCCI was created in 1986 by several clergymen of different dominations to help, as a community, revitalize the Bradhurst area (144th to 163rd street) as it was one of the poorest areas in Manhattan.
   - Worked with Columbia University, City College, as well as city offices such as the mayor's office and city planning.
   - 30 years later, we made progress in terms of housing; however, now the main goal is economic development of this area (double digit unemployment). Part of the BOA's effort is targeted to help that development.
   - Grant given in 2008 (Governor Paterson in office), that resulted in a published report (2011) on the conditions in the area. Community has to be intimately involved in the process.
   - Submitted to the Department of State for a second round of grant funding (supplemental step 2). This is the step we are currently on.
4) Tom Lunke went over the history of the "economic richness of the Bradhurst area"
   - Concerns that were originally brought to the table at the previous meeting and still need to be addressed: Improving neighboring connections, urban design and safety, expanding and repurposing open spaces, reemphasizing the cultural components like those that were in the area before (dancehall, stadium, etc), need for lighting under the Viaduct, police not following parking guidelines.
5) Shachi Pandey gave presentation.
   - Went over the members participating in the project and their roles
   - Overall positive trends in the Bradhurst area:
   - 800 new residential units; high quality commercial corridor on 145th street.
   - Fastest growing neighborhoods in NY, has a higher percentage of younger people, and even though it has high unemployment, income growth has been the highest in NYC.

- Location advantages of this area are close proximity to the Bronx Terminal Market, Lincoln Medical Center, The Yankee Stadium, and City College.
- Goals of this project are to balance new growth and new development with what the resident community needs, plan for more youth recreational opportunities, vocational skill development and educational opportunities. Bradhurst also wants to be actively engaged in green practices such as habitat improvement, stormwater management, streetscape improvement as well as working with businesses to promote environmentally friendly business practices. An important urban design goal of the project is to create seamless and safe networks between areas within the community as well as to and from places around the community.
- As illustrated on slide number 9 of Attachment 1, there are three broad project focus areas.
- Went over the opportunities and constraints of each of the possible sites (these are preliminary since this project has only started a few weeks ago) *Note: See slides for more details*.
  - ✓ Davis Warshow Site and 155th Street Viaduct (A1 and A2)
    - Opportunities: Higher pedestrian traffic in coming years, close to subway B/D and future Madison boys and girls club. May be an opportunity to formalize a community node.
    - Constraints: Steep grade changes, zoning restrictions and height restrictions due to close proximity to historical viaduct.
  - ✓ Post Office Site (A3)
    - Opportunities: To create an iconic gateway into Bradhurst with views of the Harlem River.
    - Constraints: Dangerous intersection with a high number of vehicular and pedestrian injuries
  - ✓ 145th Street Site (B1)
    - Opportunity: An emerging commercial corridor with a potential demand for hotel, office, residential and retail space (details to be determined after market study). Close proximity to waterfront and bus depot. Great opportunity for economic development.
    - Constraints: Multiple lots with private owners which makes future development plans unknown and uncertain.
  - ✓ City owned lot (B2)
    - Opportunity: City owned lot with greater chance of getting something done.
    - Constraint: Small lot size that limits the total development area
  - ✓ Car wash site (B3)
    - Opportunity: Proximity to Frederick Johnson Park, subway 3 line and PS 200 giving opportunity to create a community node / public realm with safe pedestrian networks
    - Constraint: Unknown contamination issues
  - ✓ Area C has two broad emphases; one focuses on creating continuous public access along the Harlem River (C1) and the other focuses on creating safe upland connections for the Bradhurst community (C2).
  - ✓ Continuity along Harlem River (C1)
    - Opportunity: To provide community based waterfront programming. Increase much needed recreation and public realm amenity for the Bradhurst community. Habitat restoration and green stormwater management practices.

- Constraints: A lot of these areas are separate and are owned by multiple owners. Heavy infrastructure uses such as the Harlem River Drive, MTA yards etc. create additional challenges for the safe design of public access that will have to coexist with the infrastructure uses.

✓ Upland Connections (C2)
- Opportunities: To thread the Bradhurst public realm into a walkable network.
- Constraints: Topography, fenced off areas and lack of adequate pedestrian infrastructure.

✓ Stopped presentation to ask if anyone had anything to add or if they have any questions.
- **Question**: "On 145th and Lenox Ave, the segment by the KFC, I thought they were going to do construction on that avenue to widen it so more cars can pass by and create a walkway. Is this the area that you want to redevelop?"
- **Answer**: There is a DOT proposal to put a median in the middle of the street. They circulated some designs and made some changes based on feedback they got from the community. They are supposed to recirculate the new design. This site used to have a car repair and tire repair shops before the KFC was built, so there is most likely petroleum contamination. There are different owners of this area. They have a senior care and day cares there. Some of the owners are planning on selling and developing their properties making it a prime brownfield to look into.
- **Comment**: Loss of this site means the loss of daycares and senior services. So when developing this site we should consider what services we can offer in terms of senior and child care.
- **Question:** "Have you noticed any illegal dumping anywhere within this area?"
- **Answer:** 155th street (from Harlem River to Bradhurst Avenue) is a dump site. With Barbara Williams' leadership we got the Parks Department to realize that High bridge Park area behind the Polo grounds was their land. Worked with Parks Department and NY Restoration Project pulled out dumpsters full of garbage and cutting a lot of the excessive growth. A lot to be done in this area. There is some dumping going on there but it is not as severe as it was before.
- **Question:** "Certain portions of the Harlem River Drive would flood regularly; will you be doing some mapping to look at the 100 year and 500 year flood to understand some of the risks?"
- **Answer:** Yes. Tom Lunke's office did map this and will share it.
- **Question:** "What are the plans for the 155th street site?"
- **Answer:** Still have to do more research as to what we can actually put there (extension of library? Job training center?) Housing was considered too complex because of zoning (one or two stories for commercial space).
- **Comment**: "We have been asking to get a state-of-the-art library. I would like that to be included in all of these studies."
- **Question:** "Can we create a partnership with the Board of Education, so we can have a driving school for the children who don't go to college but can still get a job driving?"
- **Answer**: Make a partnership with the DOE to include more opportunities for vocational training.
- **Comment:** This was something the Council Member had proposed back in 2012, to create a partnership between the DOE and many of the city contract unions to prepare

kids for the Civil Service exam. However, there are issues between NYC and the city unions.

- **Comment:** There are, however, many jobs that are private and are not involved with the Unions. We should look into those opportunities for the children as well.
- **Comment:** "One of the sites you had mentioned was on the corner of 146th street and 7 Ave, that lot is still being used by the MTA and their contractors for the Bus Depot. So before you start the project you should contact the MTA and NYCHA"
- **Comment:** This lot seems to be vacant and used for people's own private businesses. City-wide Administrative Services owns it.
- **Question:** "What are the plans for transportation upgrades (155th train station and 145th 3 train station)?"
- **Answer:** Need more lighting at the 155th train station. There are also a lot of safety issues. Need an elevator. Need more connections. We would like to engage with the MTA, however, this process will take a very long time and may take away from the other projects so right now it is not a priority. However, if the community sees it fit we are willing to move it up on our list. The MTA has said that there has to be a large amount of community support for it to be placed on their capital plan.
- **Question:** "We have the greatest concentration of seniors in Manhattan. Are you looking into making more senior housing more available?"
- **Answer**: Yes, we will look into it and base our efforts on the demand for it.
- **Comment:** Trying to bring in a senior daycare. This would allow for more jobs.
- **Comment:** Possibly co-locating senior care and daycare
- **Comment:** On the viaduct on 155th, there was a meeting earlier at DOT, they will be doing work on that Viaduct, and so we should get in contact with them.
- **Comment:** Lee's office has resources to help determine the contamination status of certain areas. EPIC (Environment Project Information Center), will be launched towards the end of the year. This is a site, where teams that are working on redeveloping areas will have their own page to say its priorities, geographic areas, etc.
- **Comment:** Look into inviting NYCHA representatives since there are many of our sites that touch some NYCHA sites.
- **Comment:** The Parks Department is going to open up the High Bridge, connect the High bridge park to the Bronx, and maybe look into connecting the Valley to that as a possible bicycling/pedestrian opportunity.
- **Comment:** There is staircase between Rangel Houses and Polo Grounds that goes up to the Harlem River Driveway but there is no crossing across the Harlem River Driveway. It was suggested to create a connection, however, the response was that they would open a new staircase and see what issues transpired and then doing a study on it. Maybe the steering committee can suggest doing the study in tandem or in advance of the new staircase opening.
- **Comment:** From the tip of Rangel Houses there is a walkway ("Up on the Hill") but it isn't signed very well and it doesn't seem very inviting, perhaps there can be an analysis of how you get from Frederick Douglass Blvd to this pathway that leads you over the Harlem River Drive to the Harlem River Waterfront and improving it visually.

- **Comment:** This walkway is going away from the community, there should be something developed to go from 163rd on the waterfront going back to 145th.
- **Comment:** Rangel Houses was awarded money to help in the recovery process from Sandy and Irene. They are planning on putting in a generator. This will be happening within the next year or two. Not sure how this will impact the plans we want to do but we should look into working with Rangel Houses. When they have drawings of what they are planning on doing they will send them to us.
- **Comment:** 207th Street rail yard was flooded as a result of Sandy. They are currently building a seawall and we should get in touch with them. Lenox Terminal is working on storm mitigation planning.
- **Question:** "Are there any proposals for mental wellness centers in these development areas?"
- **Answer:** No. It is something that is usually not spoken about but we should look into it.

Meeting end 8:06

David and Joyce Dinkins Garden
263 West 153rd Street ~ Btwn Macomb's Place and FDB
Thursday, October 22, 2015 -- 6:30pm-7:30pm

Bradhurst Brownfield Opportunity Area Grant & Study
Steering Committee Meeting

Hosted By HCCI, Inc

Meeting started at 6:35pm

1) Patreinnah Acosta-Pelle started out meeting and had everyone introduce themselves.
2) Next meeting is to happen in 2016.
3) Malcolm Punter gave an overview of HCCI and BOA.
   - HCCI was created in 1986 by several clergymen of different dominations to help, as a community, revitalize the Bradhurst area (144th to 163rd street) as it was one of the poorest areas in Manhattan.
   - Worked with Columbia University, City College, as well as city offices such as the mayor's office and city planning.
   - 30 years later, we made progress in terms of housing; however, now the main goal is economic development of this area (double digit unemployment). Part of the BOA's effort is targeted to help that development.
   - Grant given in 2008 (Governor Paterson in office), that resulted in a published report (2011) on the conditions in the area. Community has to be intimately involved in the process.
   - Submitted to the Department of State for a second round of grant funding (supplemental step 2). This is the step we are currently on.
4) Tom Lunke went over the history of the "economic richness of the Bradhurst area"
   - Concerns that were originally brought to the table at the previous meeting and still need to be addressed: Improving neighboring connections, urban design and safety, expanding and repurposing open spaces, reemphasizing the cultural components like those that were in the area before (dancehall, stadium, etc), need for lighting under the Viaduct, police not following parking guidelines.
5) Shachi Pandey gave presentation.
   - Went over the members participating in the project and their roles
   - Overall positive trends in the Bradhurst area:
   - 800 new residential units; high quality commercial corridor on 145th street.
   - Fastest growing neighborhoods in NY, has a higher percentage of younger people, and even though it has high unemployment, income growth has been the highest in NYC.

Athena	Moore	Manhattan Borough President Office	431 West 125th Street	(212) 531-1609	AMoore@manhattanbp.nyc.gov	**Is looking to send a rep. Spoke via email 10-5. Sent follow-up text 10/16**	
Lee	Ilan	Mayor Office of Environmental Remediation (Chief of Planning)	100 Gold Street, 2nd Floor	(212) 788-8841	lilan@cityhall.nyc.gov	**RSVP via Outlook**	
First Name	**Last name**	**Company/Affliation**	**Address**	**Phone**	**Email**	**RSVP for 10/22 meeting**	**Signature**
Shachi	Pandey	Mud Workshop	240 Kent Avenue, Suite B-29 Brooklyn, NY 11249	(732) 299 9218	shachi@mudworkshop.com	**RSVP via Outlook**	
Nina	Saxon	New York City Comptroller Scott M. Stringer	One Centre Street	(212) 669-4459 (212) 669-3916	nsaxon@comptroller.nyc.gov	**Sent follow-up text 10/16**	
Edwin	Marshall	New York City Department of City Planning Senior Planner and Project Manager at the Manhattan Office	22 Reade Street	(212) 720-3300	emarsha@planning.nyc.gov	**RSVP via Outlook**	
Margaret	Forgione	NYC Department of Transportation	59 Maiden Lanc 37th D28th New York, NY 10041	(212) 839-6210 (646) 879-4039	mforgione@dot.nyc.gov	**Sent follow-up email 10/16. Unable to come to night meetings. Will have to make separate mtg during the day**	
Barbara	Williams	Polo Grounds-President	2937 Frederick Douglass Blvd #19E	(212) 694-2112	bbbj65@yahoo.com	**Attending. Spoke and invited via verbal conversion 10/14**	
Patreinnah	Acosta-Pelle	PR City, Company		(917) 768-3220	ppelle@hcci.com	Consultant Coordinator	
Bernadette	McNear	Rangel Houses Tenant Assocaition-President Ralph J. Rangel Community Association Inc - CEO	159-48 Harlem River Drive #12G	(646) 825-1294	ralphjrangel.ta@usa.com	**Attending. Spoke and invited via verbal conversion 10/14**	
M. Starita	Boyce Ansari, Ph.D.	Resident		(646) 285-1068	Drpinkie@verizon.net	**Verbal RSVP - 10/16**	
Charles	Callaway	WE ACT	1854 Amsterdam Ave	(212) 961-1000 ext 309	charles@weact.org	**Verbal RSVP 10/21 Via Phone**	

Meeting Minutes

David and Joyce Dinkins Garden
263 West 153rd Street ~ Btwn Macomb's Place and FDB
Thursday, October 22, 2015 -- 6:30pm-7:30pm

Bradhurst Brownfield Opportunity Area Grant & Study
Steering Committee Meeting

Hosted By HCCI, Inc

Meeting started at 6:35pm

1) Patreinnah Acosta-Pelle started out meeting and had everyone introduce themselves.
2) Next meeting is to happen in 2016.
3) Malcolm Punter gave an overview of HCCI and BOA.
   - HCCI was created in 1986 by several clergymen of different dominations to help, as a community, revitalize the Bradhurst area (144th to 163rd street) as it was one of the poorest areas in Manhattan.
   - Worked with Columbia University, City College, as well as city offices such as the mayor's office and city planning.
   - 30 years later, we made progress in terms of housing; however, now the main goal is economic development of this area (double digit unemployment). Part of the BOA's effort is targeted to help that development.
   - Grant given in 2008 (Governor Paterson in office), that resulted in a published report (2011) on the conditions in the area. Community has to be intimately involved in the process.
   - Submitted to the Department of State for a second round of grant funding (supplemental step 2). This is the step we are currently on.
4) Tom Lunke went over the history of the "economic richness of the Bradhurst area"
   - Concerns that were originally brought to the table at the previous meeting and still need to be addressed: Improving neighboring connections, urban design and safety, expanding and repurposing open spaces, reemphasizing the cultural components like those that were in the area before (dancehall, stadium, etc), need for lighting under the Viaduct, police not following parking guidelines.
5) Shachi Pandey gave presentation.
   - Went over the members participating in the project and their roles
   - Overall positive trends in the Bradhurst area:
   - 800 new residential units; high quality commercial corridor on 145th street.
   - Fastest growing neighborhoods in NY, has a higher percentage of younger people, and even though it has high unemployment, income growth has been the highest in NYC.

- Location advantages of this area are close proximity to the Bronx Terminal Market, Lincoln Medical Center, The Yankee Stadium, and City College.
- Goals of this project are to balance new growth and new development with what the resident community needs, plan for more youth recreational opportunities, vocational skill development and educational opportunities. Bradhurst also wants to be actively engaged in green practices such as habitat improvement, stormwater management, streetscape improvement as well as working with businesses to promote environmentally friendly business practices. An important urban design goal of the project is to create seamless and safe networks between areas within the community as well as to and from places around the community.
- As illustrated on slide number 9 of Attachment 1, there are three broad project focus areas.
- Went over the opportunities and constraints of each of the possible sites (these are preliminary since this project has only started a few weeks ago) *Note: See slides for more details*.
  - ✓ Davis Warshow Site and 155th Street Viaduct (A1 and A2)
    - Opportunities: Higher pedestrian traffic in coming years, close to subway B/D and future Madison boys and girls club. May be an opportunity to formalize a community node.
    - Constraints: Steep grade changes, zoning restrictions and height restrictions due to close proximity to historical viaduct.
  - ✓ Post Office Site (A3)
    - Opportunities: To create an iconic gateway into Bradhurst with views of the Harlem River.
    - Constraints: Dangerous intersection with a high number of vehicular and pedestrian injuries
  - ✓ 145th Street Site (B1)
    - Opportunity: An emerging commercial corridor with a potential demand for hotel, office, residential and retail space (details to be determined after market study). Close proximity to waterfront and bus depot. Great opportunity for economic development.
    - Constraints: Multiple lots with private owners which makes future development plans unknown and uncertain.
  - ✓ City owned lot (B2)
    - Opportunity: City owned lot with greater chance of getting something done.
    - Constraint: Small lot size that limits the total development area
  - ✓ Car wash site (B3)
    - Opportunity: Proximity to Frederick Johnson Park, subway 3 line and PS 200 giving opportunity to create a community node / public realm with safe pedestrian networks
    - Constraint: Unknown contamination issues
  - ✓ Area C has two broad emphases; one focuses on creating continuous public access along the Harlem River (C1) and the other focuses on creating safe upland connections for the Bradhurst community (C2).
  - ✓ Continuity along Harlem River (C1)
    - Opportunity: To provide community based waterfront programming. Increase much needed recreation and public realm amenity for the Bradhurst community. Habitat restoration and green stormwater management practices.

- Constraints: A lot of these areas are separate and are owned by multiple owners. Heavy infrastructure uses such as the Harlem River Drive, MTA yards etc. create additional challenges for the safe design of public access that will have to coexist with the infrastructure uses.

✓ Upland Connections (C2)
- Opportunities: To thread the Bradhurst public realm into a walkable network.
- Constraints: Topography, fenced off areas and lack of adequate pedestrian infrastructure.

✓ Stopped presentation to ask if anyone had anything to add or if they have any questions.
- **Question**: "On 145th and Lenox Ave, the segment by the KFC, I thought they were going to do construction on that avenue to widen it so more cars can pass by and create a walkway. Is this the area that you want to redevelop?"
- **Answer**: There is a DOT proposal to put a median in the middle of the street. They circulated some designs and made some changes based on feedback they got from the community. They are supposed to recirculate the new design. This site used to have a car repair and tire repair shops before the KFC was built, so there is most likely petroleum contamination. There are different owners of this area. They have a senior care and day cares there. Some of the owners are planning on selling and developing their properties making it a prime brownfield to look into.
- **Comment**: Loss of this site means the loss of daycares and senior services. So when developing this site we should consider what services we can offer in terms of senior and child care.
- **Question:** "Have you noticed any illegal dumping anywhere within this area?"
- **Answer:** 155th street (from Harlem River to Bradhurst Avenue) is a dump site. With Barbara Williams' leadership we got the Parks Department to realize that High bridge Park area behind the Polo grounds was their land. Worked with Parks Department and NY Restoration Project pulled out dumpsters full of garbage and cutting a lot of the excessive growth. A lot to be done in this area. There is some dumping going on there but it is not as severe as it was before.
- **Question:** "Certain portions of the Harlem River Drive would flood regularly; will you be doing some mapping to look at the 100 year and 500 year flood to understand some of the risks?"
- **Answer:** Yes. Tom Lunke's office did map this and will share it.
- **Question:** "What are the plans for the 155th street site?"
- **Answer:** Still have to do more research as to what we can actually put there (extension of library? Job training center?) Housing was considered too complex because of zoning (one or two stories for commercial space).
- **Comment**: "We have been asking to get a state-of-the-art library. I would like that to be included in all of these studies."
- **Question:** "Can we create a partnership with the Board of Education, so we can have a driving school for the children who don't go to college but can still get a job driving?"
- **Answer**: Make a partnership with the DOE to include more opportunities for vocational training.
- **Comment:** This was something the Council Member had proposed back in 2012, to create a partnership between the DOE and many of the city contract unions to prepare

kids for the Civil Service exam. However, there are issues between NYC and the city unions.

- **Comment:** There are, however, many jobs that are private and are not involved with the Unions. We should look into those opportunities for the children as well.
- **Comment:** "One of the sites you had mentioned was on the corner of 146th street and 7 Ave, that lot is still being used by the MTA and their contractors for the Bus Depot. So before you start the project you should contact the MTA and NYCHA"
- **Comment:** This lot seems to be vacant and used for people's own private businesses. City-wide Administrative Services owns it.
- **Question:** "What are the plans for transportation upgrades (155th train station and 145th 3 train station)?"
- **Answer:** Need more lighting at the 155th train station. There are also a lot of safety issues. Need an elevator. Need more connections. We would like to engage with the MTA, however, this process will take a very long time and may take away from the other projects so right now it is not a priority. However, if the community sees it fit we are willing to move it up on our list. The MTA has said that there has to be a large amount of community support for it to be placed on their capital plan.
- **Question:** "We have the greatest concentration of seniors in Manhattan. Are you looking into making more senior housing more available?"
- **Answer**: Yes, we will look into it and base our efforts on the demand for it.
- **Comment:** Trying to bring in a senior daycare. This would allow for more jobs.
- **Comment:** Possibly co-locating senior care and daycare
- **Comment:** On the viaduct on 155th, there was a meeting earlier at DOT, they will be doing work on that Viaduct, and so we should get in contact with them.
- **Comment:** Lee's office has resources to help determine the contamination status of certain areas. EPIC (Environment Project Information Center), will be launched towards the end of the year. This is a site, where teams that are working on redeveloping areas will have their own page to say its priorities, geographic areas, etc.
- **Comment:** Look into inviting NYCHA representatives since there are many of our sites that touch some NYCHA sites.
- **Comment:** The Parks Department is going to open up the High Bridge, connect the High bridge park to the Bronx, and maybe look into connecting the Valley to that as a possible bicycling/pedestrian opportunity.
- **Comment:** There is staircase between Rangel Houses and Polo Grounds that goes up to the Harlem River Driveway but there is no crossing across the Harlem River Driveway. It was suggested to create a connection, however, the response was that they would open a new staircase and see what issues transpired and then doing a study on it. Maybe the steering committee can suggest doing the study in tandem or in advance of the new staircase opening.
- **Comment:** From the tip of Rangel Houses there is a walkway ("Up on the Hill") but it isn't signed very well and it doesn't seem very inviting, perhaps there can be an analysis of how you get from Frederick Douglass Blvd to this pathway that leads you over the Harlem River Drive to the Harlem River Waterfront and improving it visually.

- **Comment:** This walkway is going away from the community, there should be something developed to go from 163rd on the waterfront going back to 145th.
- **Comment:** Rangel Houses was awarded money to help in the recovery process from Sandy and Irene. They are planning on putting in a generator. This will be happening within the next year or two. Not sure how this will impact the plans we want to do but we should look into working with Rangel Houses. When they have drawings of what they are planning on doing they will send them to us.
- **Comment:** 207th Street rail yard was flooded as a result of Sandy. They are currently building a seawall and we should get in touch with them. Lenox Terminal is working on storm mitigation planning.
- **Question:** "Are there any proposals for mental wellness centers in these development areas?"
- **Answer:** No. It is something that is usually not spoken about but we should look into it.

BRADHURST REVITALIZATION STEERING COMMITTEE MEETING NO. 3

The Bradhurst BOA Team is trying to assess the interest and support of the Steering Committee Members for the implementation of individual projects. Please take the survey below to let us know how you can help us.

Name .....

Affiliation .....

Contact | Email: ..... Phone: (.....) .....

A / Area of Interest (please provide any additional detail in the space provided)

- ○ Community Development .....
- ○ Economic Development .....
- ○ Public Realm Improvement .....
- ○ Climate Change and Resiliency .....
- ○ All of the Above
- ○ Any Other .....

B / Projects of Interest (please refer to the map for project numbers and names)

- ○ .....
- ○ .....
- ○ .....
- ○ .....
- ○ .....
- ○ .....

C / Nature of Potential Support (please provide any additional detail in the space provided)

- ○ Financial (e.g. grant/matching grant)
- ○ Political Will
- ○ Technical (e.g. grant writing/guidance from a City or State agency)
- ○ Building Community Consensus
- ○ All of the Above
- ○ Any Other .....

D / Would you or any other representative of your organization be willing to discuss the interests and support in more detail? If yes, please provide the best way to reach you.

.....

.....

E / If you have any other suggestion for implementation, please elaborate below.

.....

.....

.....

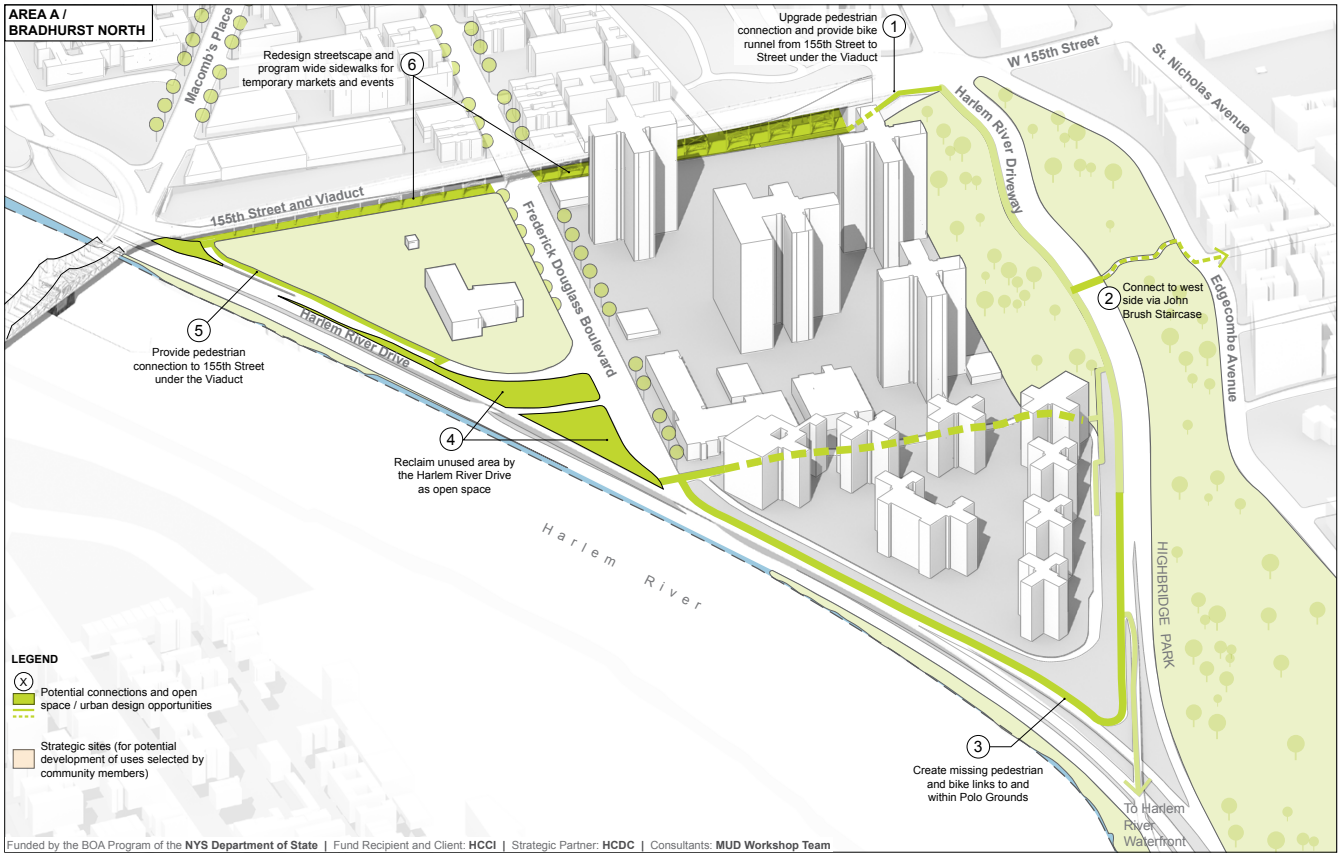
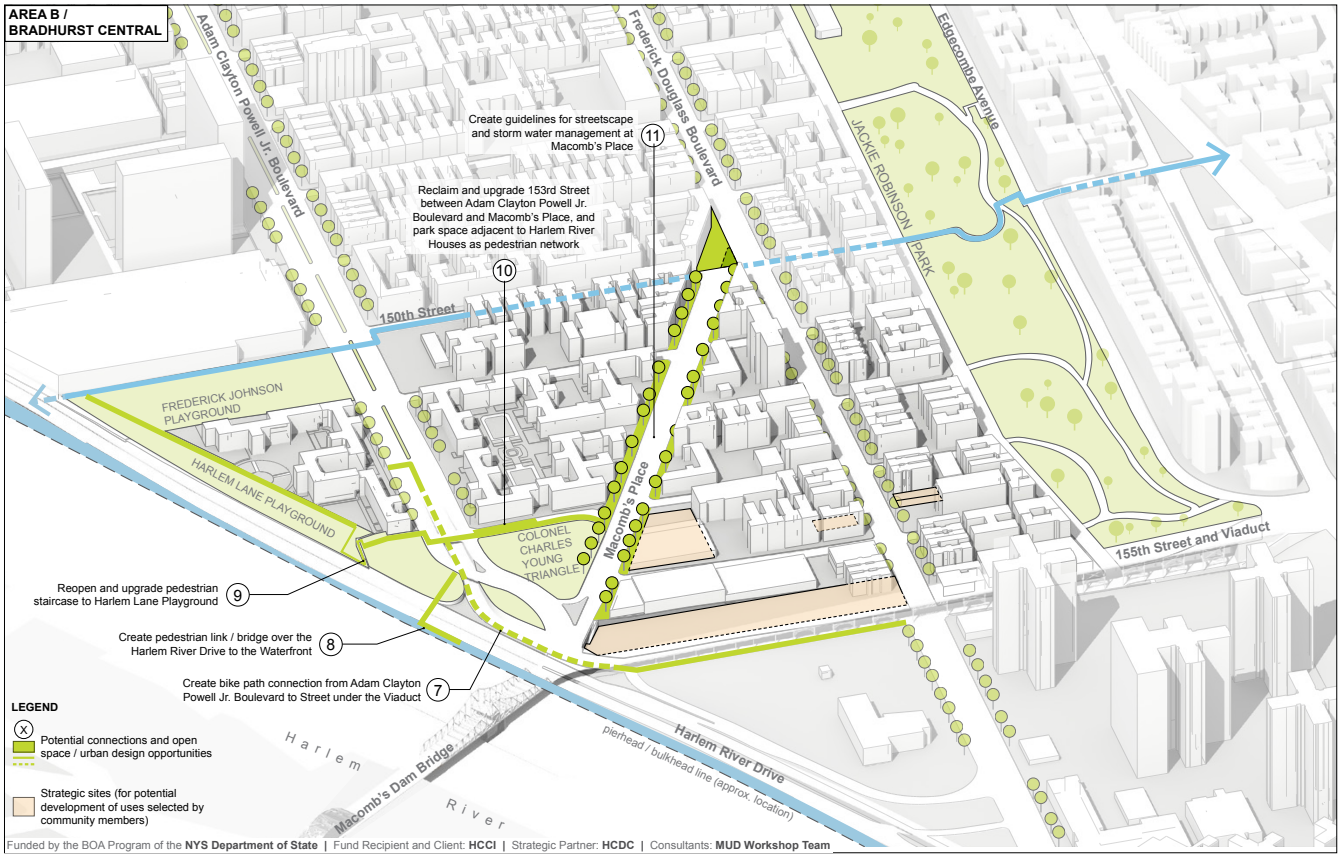
Funded by the BOA Program of the **NYS Department of State** | Fund Recipient and Client: **HCCI** | Strategic Partner: **HCDC** | Consultants: **MUD Workshop Team**



AREA A / BRADHURST NORTH
Macomb's Place
Redesign streetscape and program wide sidewalks for temporary markets and events
6
Upgrade pedestrian connection and provide bike runnel from 155th Street to Street under the Viaduct
1
W 155th Street
St. Nicholas Avenue
Harlem River Driveway
155th Street and Viaduct
Frederick Douglass Boulevard
Connect to west side via John Brush Staircase
2
Edgecombe Avenue
5
Provide pedestrian connection to 155th Street under the Viaduct
Harlem River Drive
4
Reclaim unused area by the Harlem River Drive as open space
Harlem River
HIGHBRIDGE PARK
LEGEND
X
Potential connections and open space / urban design opportunities
Strategic sites (for potential development of uses selected by community members)
3
Create missing pedestrian and bike links to and within Polo Grounds
To Harlem River Waterfront
Funded by the BOA Program of the NYS Department of State | Fund Recipient and Client: HCCI | Strategic Partner: HCDC | Consultants: MUD Workshop Team



AREA B / BRADHURST CENTRAL
Adam Clayton Powell Jr. Boulevard
Frederick Douglass Boulevard
Edgecombe Avenue
Create guidelines for streetscape and storm water management at Macomb's Place
11
JACKIE ROBINSON PARK
Reclaim and upgrade 153rd Street between Adam Clayton Powell Jr. Boulevard and Macomb's Place, and park space adjacent to Harlem River Houses as pedestrian network
10
150th Street
FREDERICK JOHNSON PLAYGROUND
HARLEM LANE PLAYGROUND
COLONEL CHARLES YOUNG TRIANGLE
Macomb's Place
155th Street and Viaduct
Reopen and upgrade pedestrian staircase to Harlem Lane Playground
9
Create pedestrian link / bridge over the Harlem River Drive to the Waterfront
8
Create bike path connection from Adam Clayton Powell Jr. Boulevard to Street under the Viaduct
7
LEGEND
X
Potential connections and open space / urban design opportunities
Strategic sites (for potential development of uses selected by community members)
Harlem River
Macomb's Dam Bridge
Harlem River Drive

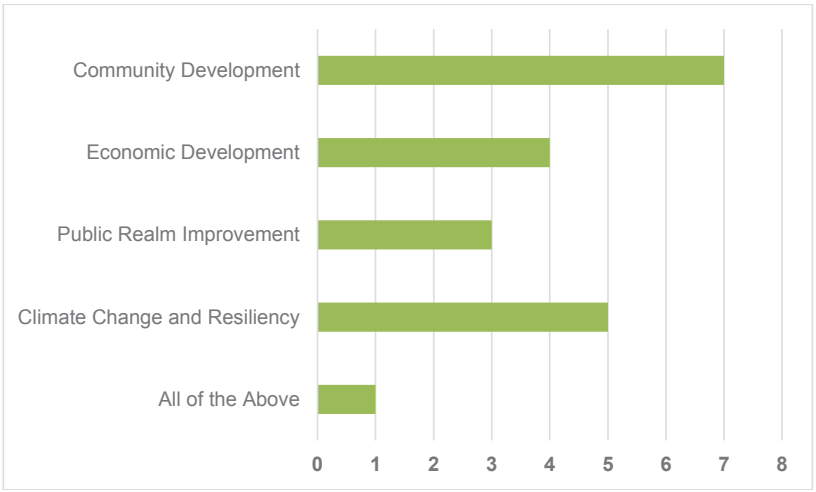
Findings from Workshop Exercises

Bradhurst Revitalization
Steering Committee 3 (November 9, 2016)

FINDINGS AND SUGGESTIONS

A /
Steering Committee Response to Area of Interest



Top Ranks

1. Community Development
2. Climate Change and Resiliency
3. Economic Development

B /
Steering Committee Response to Projects of Interest

Top Ranks

4. Project 1: Upgrade pedestrian connection and provide bike runnel from 155th Street to Street under the viaduct
5. Project 3: Create missing pedestrian and bike links to and within Polo Grounds
6. Project 5: Provide pedestrian connection to 155th Street under the Viaduct
7. Project 10: Reclaim and upgrade 153rd Street between Adam Clayton Powell Jr. Boulevard and Macomb's Place, and park space adjacent to Harlem River Houses as pedestrian network
8. Project 11: Create guidelines for streetscape and storm water management at Macomb's Place
9. Project 12: Link Jackie Robinson Park to Frederick Johnson Playground and Harlem River Waterfront via 150th Street waterfront connector and urban plaza

C /
The following organizations expressed interest in providing support in implementation of individual projects:

- Manhattan Borough President's Office
- Harlem Community Development Corporation (HCDC)
- Full Spectrum of NY LLC
- New York Restoration Project
- CERT / COAD
- eDesign Dynamics
- MOER
- NYC Parks
- Rangel Houses / Rangel Community Association

A.4
COMMUNITY WORKSHOP 1

Invitation

Bradhurst Revitalization : COMMUNITY MEETING

PROVIDE FEEDBACK TO DEFINE NEIGHBORHOOD CONNECTIONS AND FUTURE DEVELOPMENT

Meeting Notes

David and Joyce Dinkins Garden
263 West 153rd Street ~ Btwn Macomb's Place and FDB
Thursday, October 22, 2015 -- 6:30pm-7:30pm

Bradhurst Brownfield Opportunity Area Grant & Study
Steering Committee Meeting

Hosted By HCCI, Inc

Meeting started at 6:35pm

1) Patreinnah Acosta-Pelle started out meeting and had everyone introduce themselves.
2) Next meeting is to happen in 2016.
3) Malcolm Punter gave an overview of HCCI and BOA.
   - HCCI was created in 1986 by several clergymen of different dominations to help, as a community, revitalize the Bradhurst area (144th to 163rd street) as it was one of the poorest areas in Manhattan.
   - Worked with Columbia University, City College, as well as city offices such as the mayor's office and city planning.
   - 30 years later, we made progress in terms of housing; however, now the main goal is economic development of this area (double digit unemployment). Part of the BOA's effort is targeted to help that development.
   - Grant given in 2008 (Governor Paterson in office), that resulted in a published report (2011) on the conditions in the area. Community has to be intimately involved in the process.
   - Submitted to the Department of State for a second round of grant funding (supplemental step 2). This is the step we are currently on.
4) Tom Lunke went over the history of the "economic richness of the Bradhurst area"
   - Concerns that were originally brought to the table at the previous meeting and still need to be addressed: Improving neighboring connections, urban design and safety, expanding and repurposing open spaces, reemphasizing the cultural components like those that were in the area before (dancehall, stadium, etc), need for lighting under the Viaduct, police not following parking guidelines.
5) Shachi Pandey gave presentation.
   - Went over the members participating in the project and their roles
   - Overall positive trends in the Bradhurst area:
   - 800 new residential units; high quality commercial corridor on 145th street.
   - Fastest growing neighborhoods in NY, has a higher percentage of younger people, and even though it has high unemployment, income growth has been the highest in NYC.

- Location advantages of this area are close proximity to the Bronx Terminal Market, Lincoln Medical Center, The Yankee Stadium, and City College.
- Goals of this project are to balance new growth and new development with what the resident community needs, plan for more youth recreational opportunities, vocational skill development and educational opportunities. Bradhurst also wants to be actively engaged in green practices such as habitat improvement, stormwater management, streetscape improvement as well as working with businesses to promote environmentally friendly business practices. An important urban design goal of the project is to create seamless and safe networks between areas within the community as well as to and from places around the community.
- As illustrated on slide number 9 of Attachment 1, there are three broad project focus areas.
- Went over the opportunities and constraints of each of the possible sites (these are preliminary since this project has only started a few weeks ago) *Note: See slides for more details*.
  - ✓ Davis Warshow Site and 155th Street Viaduct (A1 and A2)
    - Opportunities: Higher pedestrian traffic in coming years, close to subway B/D and future Madison boys and girls club. May be an opportunity to formalize a community node.
    - Constraints: Steep grade changes, zoning restrictions and height restrictions due to close proximity to historical viaduct.
  - ✓ Post Office Site (A3)
    - Opportunities: To create an iconic gateway into Bradhurst with views of the Harlem River.
    - Constraints: Dangerous intersection with a high number of vehicular and pedestrian injuries
  - ✓ 145th Street Site (B1)
    - Opportunity: An emerging commercial corridor with a potential demand for hotel, office, residential and retail space (details to be determined after market study). Close proximity to waterfront and bus depot. Great opportunity for economic development.
    - Constraints: Multiple lots with private owners which makes future development plans unknown and uncertain.
  - ✓ City owned lot (B2)
    - Opportunity: City owned lot with greater chance of getting something done.
    - Constraint: Small lot size that limits the total development area
  - ✓ Car wash site (B3)
    - Opportunity: Proximity to Frederick Johnson Park, subway 3 line and PS 200 giving opportunity to create a community node / public realm with safe pedestrian networks
    - Constraint: Unknown contamination issues
  - ✓ Area C has two broad emphases; one focuses on creating continuous public access along the Harlem River (C1) and the other focuses on creating safe upland connections for the Bradhurst community (C2).
  - ✓ Continuity along Harlem River (C1)
    - Opportunity: To provide community based waterfront programming. Increase much needed recreation and public realm amenity for the Bradhurst community. Habitat restoration and green stormwater management practices.

- Constraints: A lot of these areas are separate and are owned by multiple owners. Heavy infrastructure uses such as the Harlem River Drive, MTA yards etc. create additional challenges for the safe design of public access that will have to coexist with the infrastructure uses.

✓ Upland Connections (C2)
- Opportunities: To thread the Bradhurst public realm into a walkable network.
- Constraints: Topography, fenced off areas and lack of adequate pedestrian infrastructure.

✓ Stopped presentation to ask if anyone had anything to add or if they have any questions.
- **Question**: "On 145th and Lenox Ave, the segment by the KFC, I thought they were going to do construction on that avenue to widen it so more cars can pass by and create a walkway. Is this the area that you want to redevelop?"
- **Answer**: There is a DOT proposal to put a median in the middle of the street. They circulated some designs and made some changes based on feedback they got from the community. They are supposed to recirculate the new design. This site used to have a car repair and tire repair shops before the KFC was built, so there is most likely petroleum contamination. There are different owners of this area. They have a senior care and day cares there. Some of the owners are planning on selling and developing their properties making it a prime brownfield to look into.
- **Comment**: Loss of this site means the loss of daycares and senior services. So when developing this site we should consider what services we can offer in terms of senior and child care.
- **Question:** "Have you noticed any illegal dumping anywhere within this area?"
- **Answer:** 155th street (from Harlem River to Bradhurst Avenue) is a dump site. With Barbara Williams' leadership we got the Parks Department to realize that High bridge Park area behind the Polo grounds was their land. Worked with Parks Department and NY Restoration Project pulled out dumpsters full of garbage and cutting a lot of the excessive growth. A lot to be done in this area. There is some dumping going on there but it is not as severe as it was before.
- **Question:** "Certain portions of the Harlem River Drive would flood regularly; will you be doing some mapping to look at the 100 year and 500 year flood to understand some of the risks?"
- **Answer:** Yes. Tom Lunke's office did map this and will share it.
- **Question:** "What are the plans for the 155th street site?"
- **Answer:** Still have to do more research as to what we can actually put there (extension of library? Job training center?) Housing was considered too complex because of zoning (one or two stories for commercial space).
- **Comment**: "We have been asking to get a state-of-the-art library. I would like that to be included in all of these studies."
- **Question:** "Can we create a partnership with the Board of Education, so we can have a driving school for the children who don't go to college but can still get a job driving?"
- **Answer**: Make a partnership with the DOE to include more opportunities for vocational training.
- **Comment:** This was something the Council Member had proposed back in 2012, to create a partnership between the DOE and many of the city contract unions to prepare

kids for the Civil Service exam. However, there are issues between NYC and the city unions.

- **Comment:** There are, however, many jobs that are private and are not involved with the Unions. We should look into those opportunities for the children as well.
- **Comment:** "One of the sites you had mentioned was on the corner of 146th street and 7 Ave, that lot is still being used by the MTA and their contractors for the Bus Depot. So before you start the project you should contact the MTA and NYCHA"
- **Comment:** This lot seems to be vacant and used for people's own private businesses. City-wide Administrative Services owns it.
- **Question:** "What are the plans for transportation upgrades (155th train station and 145th 3 train station)?"
- **Answer:** Need more lighting at the 155th train station. There are also a lot of safety issues. Need an elevator. Need more connections. We would like to engage with the MTA, however, this process will take a very long time and may take away from the other projects so right now it is not a priority. However, if the community sees it fit we are willing to move it up on our list. The MTA has said that there has to be a large amount of community support for it to be placed on their capital plan.
- **Question:** "We have the greatest concentration of seniors in Manhattan. Are you looking into making more senior housing more available?"
- **Answer**: Yes, we will look into it and base our efforts on the demand for it.
- **Comment:** Trying to bring in a senior daycare. This would allow for more jobs.
- **Comment:** Possibly co-locating senior care and daycare
- **Comment:** On the viaduct on 155th, there was a meeting earlier at DOT, they will be doing work on that Viaduct, and so we should get in contact with them.
- **Comment:** Lee's office has resources to help determine the contamination status of certain areas. EPIC (Environment Project Information Center), will be launched towards the end of the year. This is a site, where teams that are working on redeveloping areas will have their own page to say its priorities, geographic areas, etc.
- **Comment:** Look into inviting NYCHA representatives since there are many of our sites that touch some NYCHA sites.
- **Comment:** The Parks Department is going to open up the High Bridge, connect the High bridge park to the Bronx, and maybe look into connecting the Valley to that as a possible bicycling/pedestrian opportunity.
- **Comment:** There is staircase between Rangel Houses and Polo Grounds that goes up to the Harlem River Driveway but there is no crossing across the Harlem River Driveway. It was suggested to create a connection, however, the response was that they would open a new staircase and see what issues transpired and then doing a study on it. Maybe the steering committee can suggest doing the study in tandem or in advance of the new staircase opening.
- **Comment:** From the tip of Rangel Houses there is a walkway ("Up on the Hill") but it isn't signed very well and it doesn't seem very inviting, perhaps there can be an analysis of how you get from Frederick Douglass Blvd to this pathway that leads you over the Harlem River Drive to the Harlem River Waterfront and improving it visually.

- **Comment:** This walkway is going away from the community, there should be something developed to go from 163rd on the waterfront going back to 145th.
- **Comment:** Rangel Houses was awarded money to help in the recovery process from Sandy and Irene. They are planning on putting in a generator. This will be happening within the next year or two. Not sure how this will impact the plans we want to do but we should look into working with Rangel Houses. When they have drawings of what they are planning on doing they will send them to us.
- **Comment:** 207th Street rail yard was flooded as a result of Sandy. They are currently building a seawall and we should get in touch with them. Lenox Terminal is working on storm mitigation planning.
- **Question:** "Are there any proposals for mental wellness centers in these development areas?"
- **Answer:** No. It is something that is usually not spoken about but we should look into it.

Meeting end 8:06

05 MAY 2016
BRADHURST REVITALIZATION COMMUNITY MEETING NO. 1

WORKSHOP EXERCISE 1:
Please choose upto **FOUR** uses that you would like to see develop in the Bradhurst Brownfield Opportunity Area

- ◯ Retail (e.g., restaurant, grocery store, health food store, drug store, electronic store)
- ◯ Neighborhood Services (e.g., clothing/shoe store, dry cleaning/tailoring, computer repair store)
- ◯ Affordable Housing
- ◯ Commercial Development (e.g. offices, retail, hotel)
- ◯ Workforce Development for Adults (e.g. job training center, entrepreneurship / business development information Center, co-working space etc.)
- ◯ Youth Development Programs (e.g. vocation training school, after school tuition program for high school, teen family / young mothers support programs)
- ◯ Programs for Young Children (e.g. after school activities, day care, recreation programs)
- ◯ Community Uses (e.g. library, event space that can be rented)
- ◯ Others (not listed above) _____

_____

Optional: Provide additional details

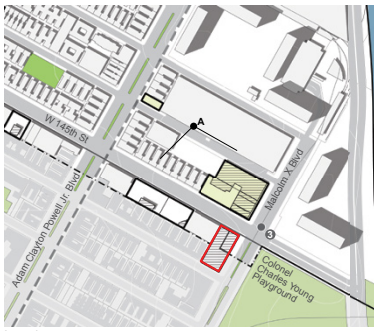
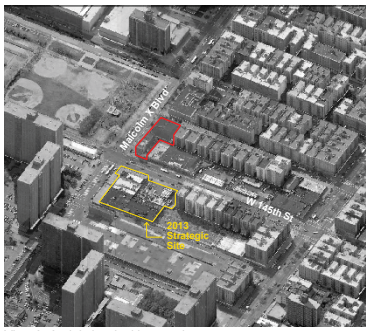
05 145TH ST GATEWAY SITE



Location



View A: Aerial view looking south

View B: Corner site at 145th Street and Malcolm X Boulevard

REVITALIZATION GOALS AND DEVELOPMENT CONSIDERATIONS

	STRENGTH	WEAKNESS
Ownership		Private owner (same owner) for both parcels
Zoning	Split zoning - allows large format commercial, limited community and residential use	
Others	Key location (good visibility and access). Potential to create gateway (across existing strategic site)	

COMMUNITY RESPONSE MATRIX: Please only use ONE sticker per site

06 145TH ST GAS STATIONS

Location

View A: Aerial view looking south

View B: Highly visible site with limited built structure

REVITALIZATION GOALS AND DEVELOPMENT CONSIDERATIONS

	STRENGTH	WEAKNESS
Ownership		Separate private owners for the two parcels
Zoning	As-of-right uses allow commercial (large retail) and limited community uses	
Others	Key location (good visibility and access). Opportunity for environmental clean up. Limited built structure on site.	

COMMUNITY RESPONSE MATRIX: Please only use ONE sticker per site

Project Funded by the Brownfield Opportunity Area Program of the **NYS Department of State** | Fund Recipient and Client: **Harlem Congregation for Community Improvement** | Strategic Partner: **Harlem Community Development Corporation** | Consultants: **MUD Workshop** (with AKRF, EDesign Dynamics, Philip Habib Eng., VJ Associates)

Location

View A: Aerial view looking west

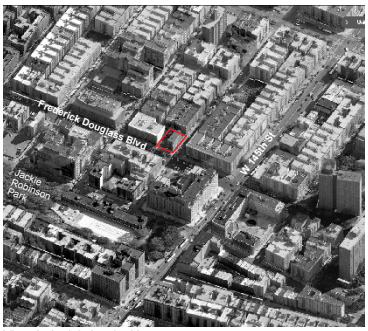
View B: View looking towards Jackie Robinson Park

REVITALIZATION GOALS AND DEVELOPMENT CONSIDERATIONS		
	STRENGTH	**WEAKNESS**
Ownership	Part public and part private ownership, allowing some community influence in the development of the site	
Zoning	As-of-right uses allow for residential and commercial uses in a contextual zoning district	
Others	Pedestrian connection to Jackie Robinson Rec Center. Vacant site with no built structure	

COMMUNITY RESPONSE MATRIX: Please only use ONE sticker per site

09 146TH ST NEIGHBORHOOD NODE (EAST)

Location



View A: Aerial view looking east

View B: Corner vacant lots

REVITALIZATION GOALS AND DEVELOPMENT CONSIDERATIONS		
	STRENGTH	**WEAKNESS**
Ownership	Two parcels are privately owned and one parcel is publically owned	
Zoning	As-of-right uses allow for residential and neigborhood scale retail	
Others	Pedestrian connection to Jackie Robinson Rec Center. Vacant site with no built structure	

COMMUNITY RESPONSE MATRIX: Please only use ONE sticker per site

Project Funded by the Brownfield Opportunity Area Program of the **NYS Department of State** | Fund Recipient and Client: **Harlem Congregation for Community Improvement** | Strategic Partner: **Harlem Community Development Corporation** | Consultants: **MUD Workshop** (with AKRF, EDesign Dynamics, Philip Habib Eng., VJ Associates)

10 148TH ST MID-BLOCK SITE

Location

View A: Aerial view looking north

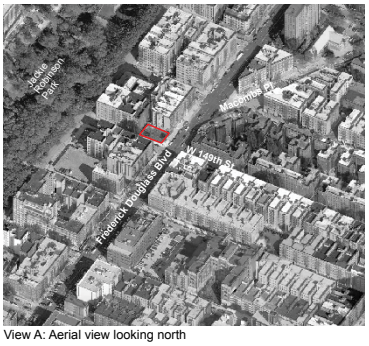
View B: Site temporarily used as an open space

REVITALIZATION GOALS AND DEVELOPMENT CONSIDERATIONS		
	STRENGTH	**WEAKNESS**
Ownership	HCCI has ownership control over all the parcels	
Zoning	As-of-right uses allow residential and educational facilities (library, professional schools, museums etc.)	
Others		Mid-block location (less visible and accessible compared to other sites)

COMMUNITY RESPONSE MATRIX: Please only use ONE sticker per site

11 149TH ST NODE

Location



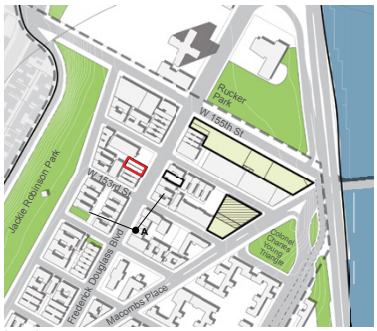
View A: Aerial view looking north

View B: Vacant site within easy access to Jackie Robinson Park

REVITALIZATION GOALS AND DEVELOPMENT CONSIDERATIONS		
	STRENGTH	**WEAKNESS**
Ownership	Part public and part private ownership, allowing some community influence in the development of the site.	
Zoning	As-of-right uses allow for residential and neigborhood scale retail	
Others	Corner location. Easy access to Jackie Robinson Rec Center and Macomb's Place (pedestrian environment)	

COMMUNITY RESPONSE MATRIX: Please only use ONE sticker per site

12 153RD ST COMMUNITY NODE (WEST)



Location

View A: Aerial view looking north

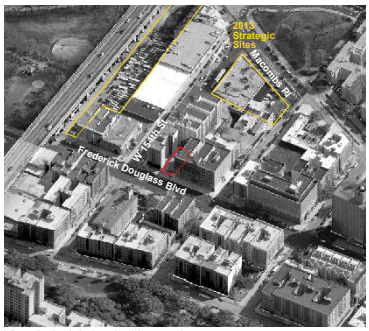
View B: Vacant site close to potential community node

REVITALIZATION GOALS AND DEVELOPMENT CONSIDERATIONS		
	STRENGTH	**WEAKNESS**
Ownership		Separate private owners (Bethany Church and private owner for the two parcels
Zoning	As-of-right uses allow for residential and neigborhood scale retail	
Others	Proximity to other strategic sites with potential for creating a community node	

COMMUNITY RESPONSE MATRIX: Please only use ONE sticker per site

13 153RD ST COMMUNITY NODE (EAST)

Location



View A: Aerial view looking north

View B: Vacant site close to potential community node

REVITALIZATION GOALS AND DEVELOPMENT CONSIDERATIONS		
	STRENGTH	**WEAKNESS**
Ownership		Privately owned site, currently listed for sale at a reasonably high price
Zoning	As-of-right uses allow for residential and neigborhood scale retail	
Others	Proximity to other strategic sites with potential for creating a community node	

COMMUNITY RESPONSE MATRIX: Please only use ONE sticker per site

Project Funded by the Brownfield Opportunity Area Program of the **NYS Department of State** | Fund Recipient and Client: **Harlem Congregation for Community Improvement** | Strategic Partner: **Harlem Community Development Corporation** | Consultants: **MUD Workshop** (with AKRF, EDesign Dynamics, Philip Habib Eng., VJ Associates)

Funded by the BOA Program of the **NYS Department of State** | Fund Recipient and Client: **HCCI** | Strategic Partner: **HCDC** | Consultants: **MUD Workshop Team**

07 145TH ST SHELL GAS STATION

Location

View A: Aerial view looking south

View B: Highly visible site with limited built structure

REVITALIZATION GOALS AND DEVELOPMENT CONSIDERATIONS

	STRENGTH	WEAKNESS
Ownership		Private owner (same owner) for both parcels
Zoning	As-of-right uses allow for residential and neigborhood scale retail	
Others	Key location (good visibility). Opportunity for environmental clean up. Limited built structure on site.	

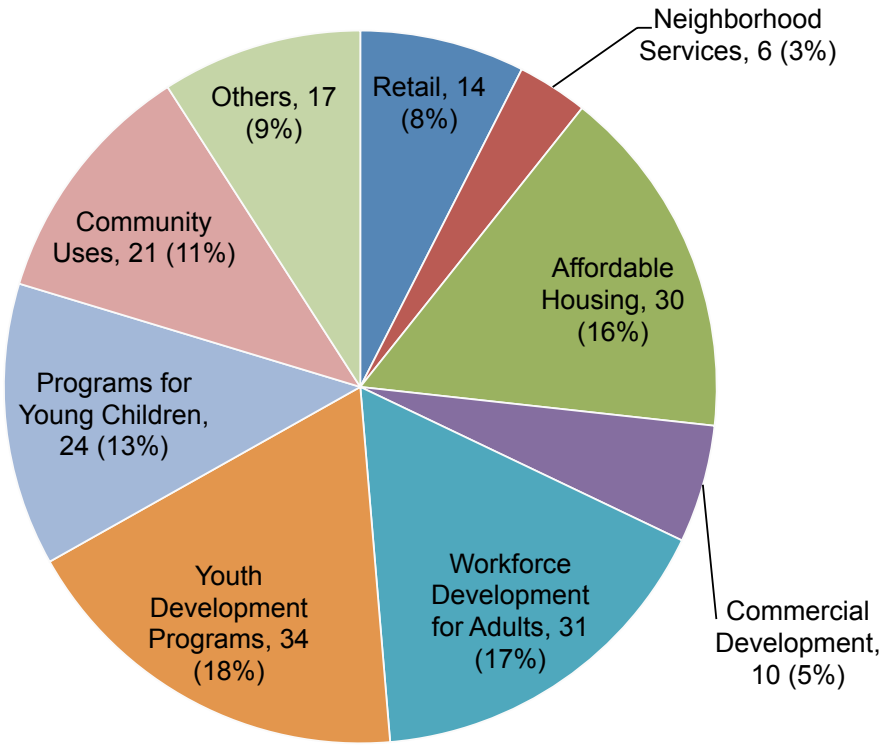
COMMUNITY RESPONSE MATRIX: Please only use ONE sticker per site

Workshop Findings

Bradhurst Revitalization
Community Meeting 1 (May 05, 2016)

FINDINGS AND SUGGESTIONS (Draft)

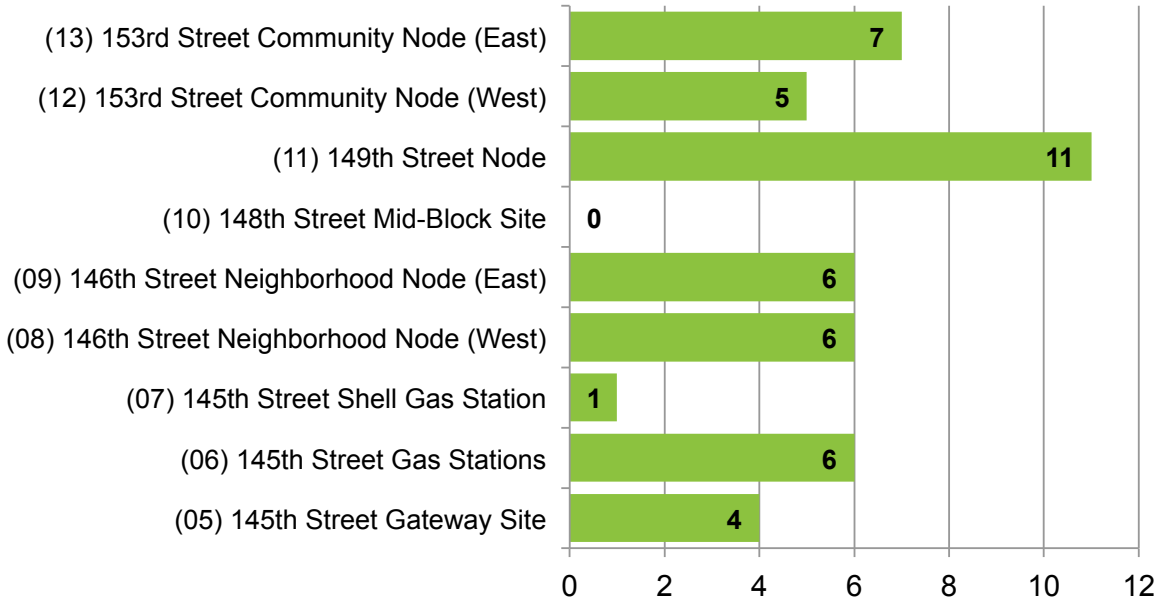
A /
Community Response to the uses they would like to see develop in the Bradhurst BOA Neighborhood



Top four uses based on community feedback

- Youth Development Programs (18%)
- Workforce Development for Adults (17%)
- Affordable Housing (16%)

B /
Ranking of the 2016 Strategic Sites in Bradhurst BOA neighborhood



Top Ranks

1. **149th Street Node** – at the end of Macombs Pl
2. **153rd Street Community Node (East)** – the site that is currently on sale
3. **146th Street Neighborhood Nodes** – on Frederick Douglass Blvd and close to Jackie Robinson Park
3. 145th Street Gas Stations – Hess and Mobil, south of 146th Street

C /
Other Suggested Updates to the Community Outreach

- **Venue:** Suggestion to host future community presentations, information sessions and workshops at a community facility like a church or a school versus holding them at HCCI buildings
- **High School Buddy Program / Lectures**: I'd like to propose a series of five / six lectures this summer for high school students who might be interested in urban planning. MUD Workshop can give talks and do sites walks to help students understand simple concepts such as zoning, land use and community planning process etc. I'd like to be able to then invite these Bradhurst students to the community meetings as youth hosts, who will then help conduct the workshops. This is just an idea and I'd to discuss in greater detail with HCCI and get their help in the organizing of these lectures
- **Responsiveness**: Suggestion that we release findings / meeting minutes within two weeks on the website for community and steering committee. If MUD Workshop is able to receive the meeting minutes from HCCI within a week of any public / steering committee event, we can get back within three days with our comments for a final read at your end
- **Website:** We are in the process of domain name search, costs etc. to set up the website. I'll be in touch with HCCI late next week with a rough sketch of website and the information that it will host
- **Community Workshop 1 – Opportunity for More Surveys:** We have 48 responses and to get more responses, I'd suggested at the meeting that I'd design web / email versions of the Strategic Site Ranking Boards and Use Questionnaires. This will enable people who were not able to participate at the face to face community meeting do so through email / website. Residents with no internet access can use the HCCI public computer at HCCI offices. Our goal is to get this web-based survey ready by the first or second week of June and have it up all summer (until the end of August).

A.5
COMMUNITY WORKSHOP 2

Invitation

Bradhurst Revitalization : COMMUNITY MEETING

PROVIDE FEEDBACK TO DEFINE NEIGHBORHOOD CONNECTIONS AND FUTURE DEVELOPMENT

Agenda

@David and Joyce Dinkins Garden
263 West 153rd Street ~ Btwn Macomb's Place and FDB
Thursday, October 22, 2015 -- 6:30pm-7:30pm

Bradhurst Brownfield Opportunity Area Grant & Study Steering Committee Meeting

Hosted By HCCI, Inc.

AGENDA

I. Call to Order and Welcome

II. Steering Committee Introductions

III. Recap of Bradhurst BOA Phase 1 Project (Malcolm Punter)

IV. Bradhurst Revitalizaiton Phase 2 Introduction (Shachi Pandey)

V. Understanding the BOA planning process, Steering Committee responsibilities – funding, boundaries, objectives and goals (Malcolm Punter)

VI. Comments/Q & A

Notes:

Attendee List

HCCI Bradhurst BOA Steering Committee Meeting
Thursday, October 22, 2015 - 6:30pm - 7:30pm
David Joyce Dinkins Gardens - 253 West 153rd Street

First Name	Last name	Company/Affliation	Address	Phone	Email	RSVP for 10/22 meeting	Signature
Ernestine	Temple-Bell	Assemblyman Herman D Farrell	2541-55 Adam Clayton Powell Jr. Boulevard	(212) 234-1430 (917) 865-5548	belltemplee@assembly.state.ny.us ebtxx12000@yahoo.com	**Verbal RSVP - 10/15**	
Andrew	Lassalle	Community Board 10 District Manager	215 West 125th Street, 4th Fl	(212) 749-3105	alassalle@cb.nyc.gov	**RSVP via Outlook**	
Valerie	Settles	Community Leader	2730 Frederick Douglass Blvd	(917) 995-5720	bigval145@gmail.com	**Verbal RSVP - 10/15**	
Fred	Wilson	Community Leader	210 West 146th Street	(917) 515-8046	fredwil4@hotmail.com	**Sent Email RSVP**	
Robert William	Balder	Cornell University		(347) 443-4504	rwb43@cornell.edu	**RSVP via Outlook**	
Lermond	Mayes	Councilwoman Dickens-Chief of Staff	163 W 125th Street	(212) 788-7397	lwmayes@gmail.com	**RSVP via phone 10/20**	
Alexander	Horwitz	DOE Fund	Frederick Douglass Blvd	(646) 672-4236	ahorwitz@doe.org	**Derek Bowers will be attending - 646-672-2981**	
Craig	Hartley	Esplanade Gardens Management		(212) 368-2700 (718) 902-2676	oosorio@esplanadegardens.net CHartley@prestigemgt.com jmatos@prestigemgt.com	**RSVP from Julia Matos. Attending with Superindent Orlando Osorio**	
Walter	Edwards	Full Spectrum	102 W 124th Street	(212) 864-7410	wedwards@fullspectrumny.com	**RSVP via email - Regina Smith from HBA attending on his behalf**	
Tom	Lunke	Harlem Community Development Corporation	167 West 125th Street	(212) 961-4140	tlunke@esd.ny.gov marcus.browne@esd.ny.gov	**RSVP via Outlook Also Marcus Brown is attending**	
Malcolm	Punter	Harlem Congregations for Community	2854 Frederick Douglass Blvd	(212) 281-4887	mpunter@hcci.org	**STEERING COMMITTEE HOST**	
Athena	Moore	Manhattan Borough President Office	431 West 125th Street	(212) 531-1609	AMoore@manhattanbp.nyc.gov	**Is looking to send a rep. Spoke via email 10-5. Sent follow-up text 10/16**	

HCCI Bradhurst BOA Steering Committee Meeting
Thursday, October 22, 2015 - 6:30pm - 7:30pm
David Joyce Dinkins Gardens - 253 West 153rd Street

First Name	Last name	Company/Affliation	Address	Phone	Email	RSVP for 10/22 meeting	Signature
Shachi	Pandey	Mud Workshop	240 Kent Avenue, Suite B-29 Brooklyn, NY 11249	(732) 299 9218	shachi@mudworkshop.com	**RSVP via Outlook**	
Nina	Saxon	New York City Comptroller Scott M. Stringer	One Centre Street	(212) 669-4459 (212) 669-3916	nsaxon@comptroller.nyc.gov	**Sent follow-up text 10/16**	
Edwin	Marshall	New York City Department of City Planning Senior Planner and Project Manager at the Manhattan Office	22 Reade Street	(212) 720-3300	emarsha@planning.nyc.gov	**RSVP via Outlook**

Barbara	Williams	Polo Grounds-President	2937 Frederick Douglass Blvd #19E	(212) 694-2112	bbbj65@yahoo.com	**Attending. Spoke and invited via verbal conversion 10/14**	
Patreinnah	Acosta-Pelle	PR City, Company		(917) 768-3220	ppelle@hcci.com	Consultant Coordinator	
Bernadette	McNear	Rangel Houses Tenant Assocaition-President Ralph J. Rangel Community Association Inc - CEO	159-48 Harlem River Drive #12G	(646) 825-1294	ralphjrangel.ta@usa.com	**Attending. Spoke and invited via verbal conversion 10/14**	
M. Starita	Boyce Ansari, Ph.D.	Resident		(646) 285-1068	Drpinkie@verizon.net	**Verbal RSVP - 10/16**	
Charles	Callaway	WE ACT	1854 Amsterdam Ave	(212) 961-1000 ext 309	charles@weact.org	**Verbal RSVP 10/21 Via Phone**	

Meeting Notes

David and Joyce Dinkins Garden
263 West 153rd Street ~ Btwn Macomb's Place and FDB
Thursday, October 22, 2015 -- 6:30pm-7:30pm

Bradhurst Brownfield Opportunity Area Grant & Study
Steering Committee Meeting

Hosted By HCCI, Inc

Meeting started at 6:35pm

1) Patreinnah Acosta-Pelle started out meeting and had everyone introduce themselves.
2) Next meeting is to happen in 2016.
3) Malcolm Punter gave an overview of HCCI and BOA.
   - HCCI was created in 1986 by several clergymen of different dominations to help, as a community, revitalize the Bradhurst area (144th to 163rd street) as it was one of the poorest areas in Manhattan.
   - Worked with Columbia University, City College, as well as city offices such as the mayor's office and city planning.
   - 30 years later, we made progress in terms of housing; however, now the main goal is economic development of this area (double digit unemployment). Part of the BOA's effort is targeted to help that development.
   - Grant given in 2008 (Governor Paterson in office), that resulted in a published report (2011) on the conditions in the area. Community has to be intimately involved in the process.
   - Submitted to the Department of State for a second round of grant funding (supplemental step 2). This is the step we are currently on.
4) Tom Lunke went over the history of the "economic richness of the Bradhurst area"
   - Concerns that were originally brought to the table at the previous meeting and still need to be addressed: Improving neighboring connections, urban design and safety, expanding and repurposing open spaces, reemphasizing the cultural components like those that were in the area before (dancehall, stadium, etc), need for lighting under the Viaduct, police not following parking guidelines.
5) Shachi Pandey gave presentation.
   - Went over the members participating in the project and their roles
   - Overall positive trends in the Bradhurst area:
   - 800 new residential units; high quality commercial corridor on 145th street.
   - Fastest growing neighborhoods in NY, has a higher percentage of younger people, and even though it has high unemployment, income growth has been the highest in NYC.

- Location advantages of this area are close proximity to the Bronx Terminal Market, Lincoln Medical Center, The Yankee Stadium, and City College.
- Goals of this project are to balance new growth and new development with what the resident community needs, plan for more youth recreational opportunities, vocational skill development and educational opportunities. Bradhurst also wants to be actively engaged in green practices such as habitat improvement, stormwater management, streetscape improvement as well as working with businesses to promote environmentally friendly business practices. An important urban design goal of the project is to create seamless and safe networks between areas within the community as well as to and from places around the community.
- As illustrated on slide number 9 of Attachment 1, there are three broad project focus areas.
- Went over the opportunities and constraints of each of the possible sites (these are preliminary since this project has only started a few weeks ago) *Note: See slides for more details*.
  - ✓ Davis Warshow Site and 155th Street Viaduct (A1 and A2)
    - Opportunities: Higher pedestrian traffic in coming years, close to subway B/D and future Madison boys and girls club. May be an opportunity to formalize a community node.
    - Constraints: Steep grade changes, zoning restrictions and height restrictions due to close proximity to historical viaduct.
  - ✓ Post Office Site (A3)
    - Opportunities: To create an iconic gateway into Bradhurst with views of the Harlem River.
    - Constraints: Dangerous intersection with a high number of vehicular and pedestrian injuries
  - ✓ 145th Street Site (B1)
    - Opportunity: An emerging commercial corridor with a potential demand for hotel, office, residential and retail space (details to be determined after market study). Close proximity to waterfront and bus depot. Great opportunity for economic development.
    - Constraints: Multiple lots with private owners which makes future development plans unknown and uncertain.
  - ✓ City owned lot (B2)
    - Opportunity: City owned lot with greater chance of getting something done.
    - Constraint: Small lot size that limits the total development area
  - ✓ Car wash site (B3)
    - Opportunity: Proximity to Frederick Johnson Park, subway 3 line and PS 200 giving opportunity to create a community node / public realm with safe pedestrian networks
    - Constraint: Unknown contamination issues
  - ✓ Area C has two broad emphases; one focuses on creating continuous public access along the Harlem River (C1) and the other focuses on creating safe upland connections for the Bradhurst community (C2).
  - ✓ Continuity along Harlem River (C1)
    - Opportunity: To provide community based waterfront programming. Increase much needed recreation and public realm amenity for the Bradhurst community. Habitat restoration and green stormwater management practices.

- Constraints: A lot of these areas are separate and are owned by multiple owners. Heavy infrastructure uses such as the Harlem River Drive, MTA yards etc. create additional challenges for the safe design of public access that will have to coexist with the infrastructure uses.

✓ Upland Connections (C2)
- Opportunities: To thread the Bradhurst public realm into a walkable network.
- Constraints: Topography, fenced off areas and lack of adequate pedestrian infrastructure.

✓ Stopped presentation to ask if anyone had anything to add or if they have any questions.
- **Question**: "On 145th and Lenox Ave, the segment by the KFC, I thought they were going to do construction on that avenue to widen it so more cars can pass by and create a walkway. Is this the area that you want to redevelop?"
- **Answer**: There is a DOT proposal to put a median in the middle of the street. They circulated some designs and made some changes based on feedback they got from the community. They are supposed to recirculate the new design. This site used to have a car repair and tire repair shops before the KFC was built, so there is most likely petroleum contamination. There are different owners of this area. They have a senior care and day cares there. Some of the owners are planning on selling and developing their properties making it a prime brownfield to look into.
- **Comment**: Loss of this site means the loss of daycares and senior services. So when developing this site we should consider what services we can offer in terms of senior and child care.
- **Question:** "Have you noticed any illegal dumping anywhere within this area?"
- **Answer:** 155th street (from Harlem River to Bradhurst Avenue) is a dump site. With Barbara Williams' leadership we got the Parks Department to realize that High bridge Park area behind the Polo grounds was their land. Worked with Parks Department and NY Restoration Project pulled out dumpsters full of garbage and cutting a lot of the excessive growth. A lot to be done in this area. There is some dumping going on there but it is not as severe as it was before.
- **Question:** "Certain portions of the Harlem River Drive would flood regularly; will you be doing some mapping to look at the 100 year and 500 year flood to understand some of the risks?"
- **Answer:** Yes. Tom Lunke's office did map this and will share it.
- **Question:** "What are the plans for the 155th street site?"
- **Answer:** Still have to do more research as to what we can actually put there (extension of library? Job training center?) Housing was considered too complex because of zoning (one or two stories for commercial space).
- **Comment**: "We have been asking to get a state-of-the-art library. I would like that to be included in all of these studies."
- **Question:** "Can we create a partnership with the Board of Education, so we can have a driving school for the children who don't go to college but can still get a job driving?"
- **Answer**: Make a partnership with the DOE to include more opportunities for vocational training.
- **Comment:** This was something the Council Member had proposed back in 2012, to create a partnership between the DOE and many of the city contract unions to prepare

kids for the Civil Service exam. However, there are issues between NYC and the city unions.

- **Comment:** There are, however, many jobs that are private and are not involved with the Unions. We should look into those opportunities for the children as well.
- **Comment:** "One of the sites you had mentioned was on the corner of 146th street and 7 Ave, that lot is still being used by the MTA and their contractors for the Bus Depot. So before you start the project you should contact the MTA and NYCHA"
- **Comment:** This lot seems to be vacant and used for people's own private businesses. City-wide Administrative Services owns it.
- **Question:** "What are the plans for transportation upgrades (155th train station and 145th 3 train station)?"
- **Answer:** Need more lighting at the 155th train station. There are also a lot of safety issues. Need an elevator. Need more connections. We would like to engage with the MTA, however, this process will take a very long time and may take away from the other projects so right now it is not a priority. However, if the community sees it fit we are willing to move it up on our list. The MTA has said that there has to be a large amount of community support for it to be placed on their capital plan.
- **Question:** "We have the greatest concentration of seniors in Manhattan. Are you looking into making more senior housing more available?"
- **Answer**: Yes, we will look into it and base our efforts on the demand for it.
- **Comment:** Trying to bring in a senior daycare. This would allow for more jobs.
- **Comment:** Possibly co-locating senior care and daycare
- **Comment:** On the viaduct on 155th, there was a meeting earlier at DOT, they will be doing work on that Viaduct, and so we should get in contact with them.
- **Comment:** Lee's office has resources to help determine the contamination status of certain areas. EPIC (Environment Project Information Center), will be launched towards the end of the year. This is a site, where teams that are working on redeveloping areas will have their own page to say its priorities, geographic areas, etc.
- **Comment:** Look into inviting NYCHA representatives since there are many of our sites that touch some NYCHA sites.
- **Comment:** The Parks Department is going to open up the High Bridge, connect the High bridge park to the Bronx, and maybe look into connecting the Valley to that as a possible bicycling/pedestrian opportunity.
- **Comment:** There is staircase between Rangel Houses and Polo Grounds that goes up to the Harlem River Driveway but there is no crossing across the Harlem River Driveway. It was suggested to create a connection, however, the response was that they would open a new staircase and see what issues transpired and then doing a study on it. Maybe the steering committee can suggest doing the study in tandem or in advance of the new staircase opening.
- **Comment:** From the tip of Rangel Houses there is a walkway ("Up on the Hill") but it isn't signed very well and it doesn't seem very inviting, perhaps there can be an analysis of how you get from Frederick Douglass Blvd to this pathway that leads you over the Harlem River Drive to the Harlem River Waterfront and improving it visually.

- **Comment:** This walkway is going away from the community, there should be something developed to go from 163rd on the waterfront going back to 145th.
- **Comment:** Rangel Houses was awarded money to help in the recovery process from Sandy and Irene. They are planning on putting in a generator. This will be happening within the next year or two. Not sure how this will impact the plans we want to do but we should look into working with Rangel Houses. When they have drawings of what they are planning on doing they will send them to us.
- **Comment:** 207th Street rail yard was flooded as a result of Sandy. They are currently building a seawall and we should get in touch with them. Lenox Terminal is working on storm mitigation planning.
- **Question:** "Are there any proposals for mental wellness centers in these development areas?"
- **Answer:** No. It is something that is usually not spoken about but we should look into it.

Workshop Materials

BRADHURST REVITALIZATION: BOA STEP 2

COMMUNITY MEETING NO. 2 | RULES OF ENGAGEMENT

December 12th 2016, 6:30 pm to 8:30 pm @ Jackie Robinson Park Recreation Center

Project Funded By
NYS Department of State

Fund Recipient
HCCI

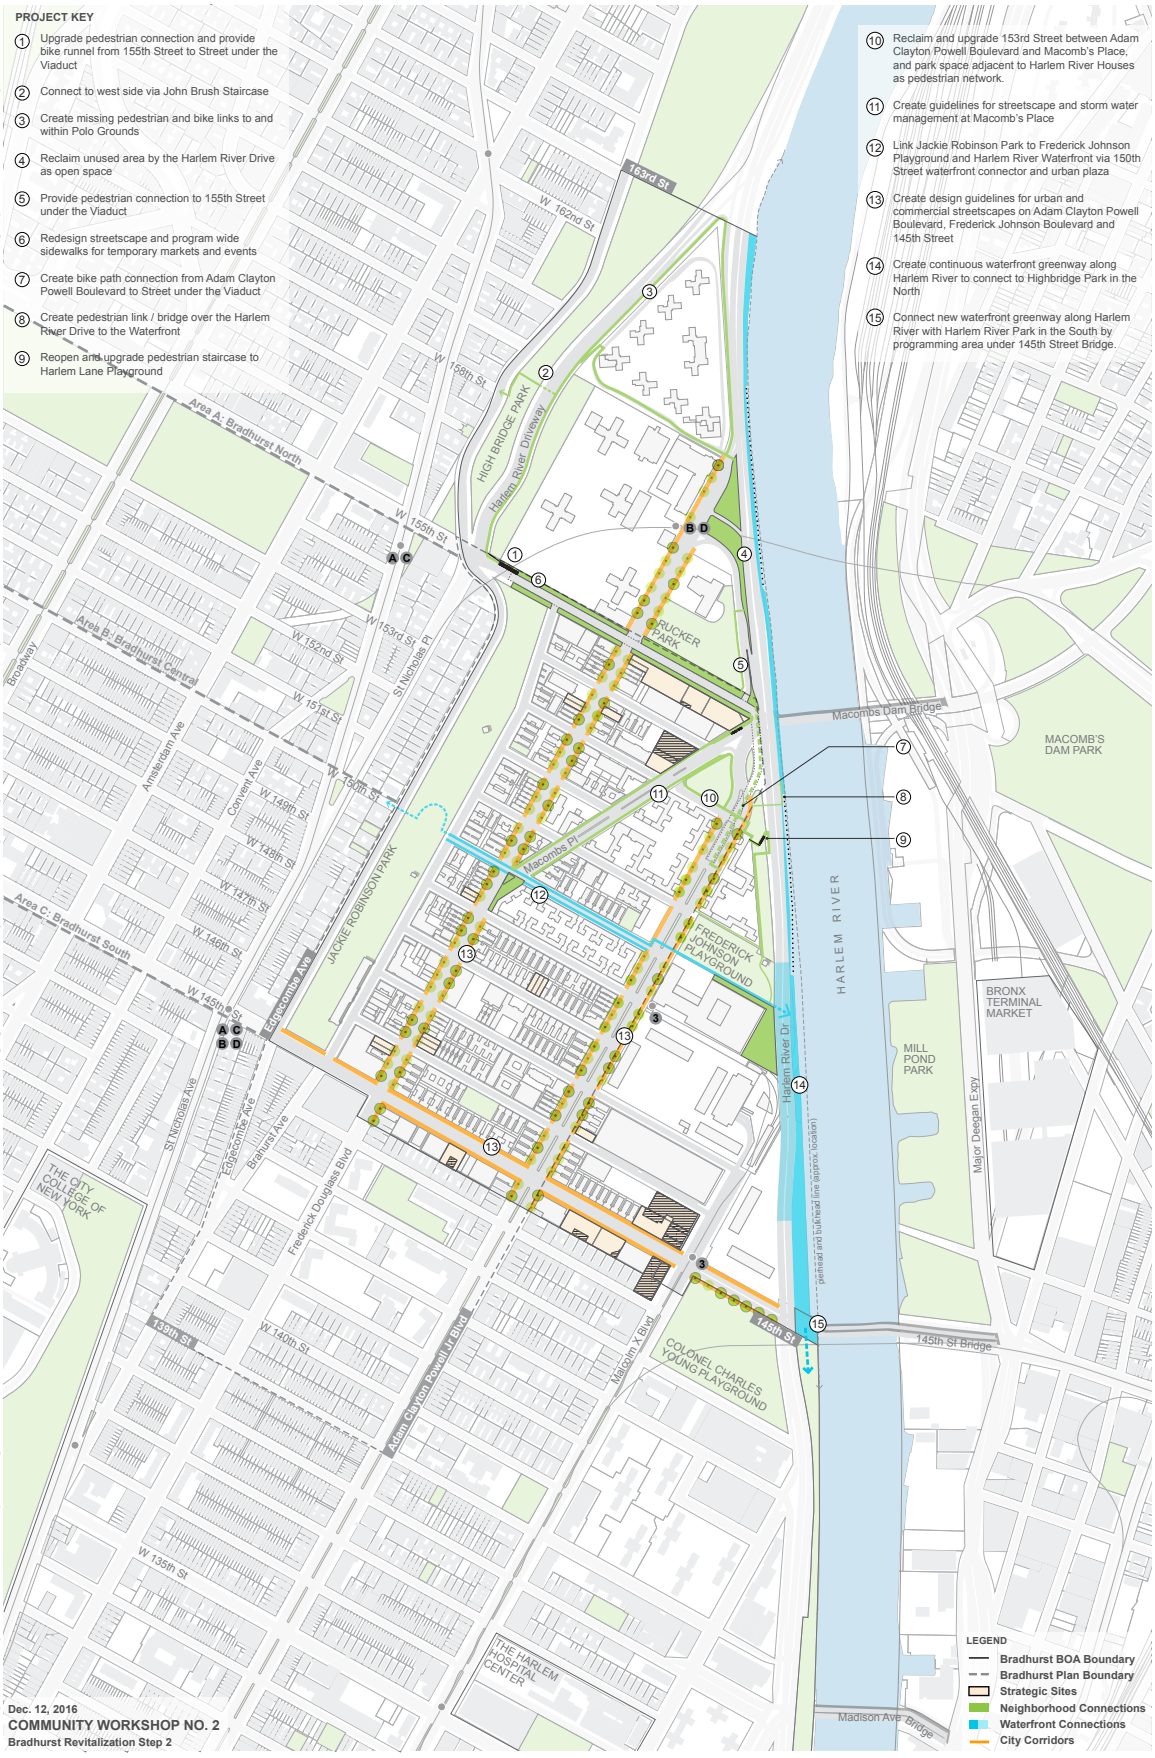
Strategic Partner
HCDC

Lead Consultant
Metropolitan Urban Design (MUD) Workshop

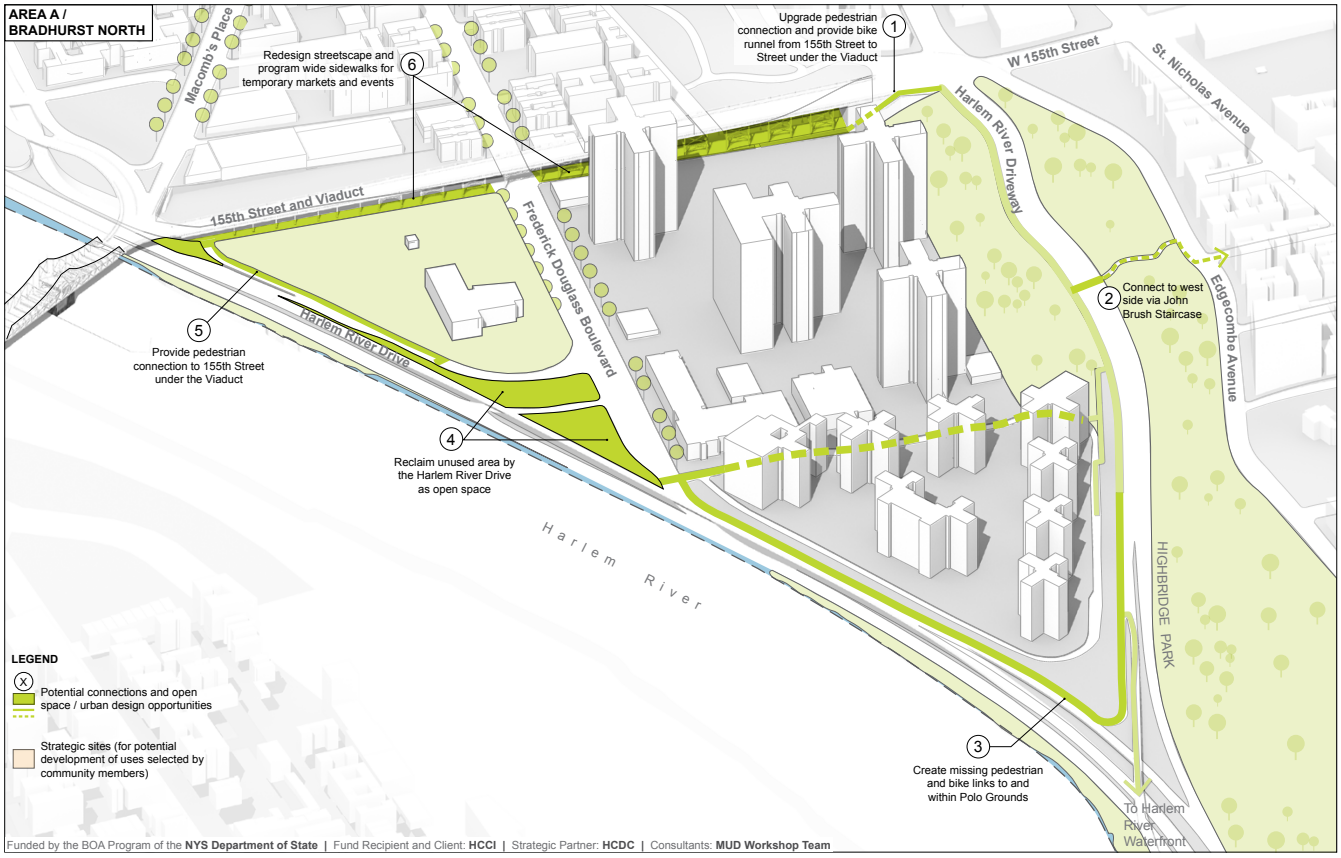
Sub-consultants
AKRF Inc., Philip Habib and Associates, EDesign Dynamics, VJ Associates

---

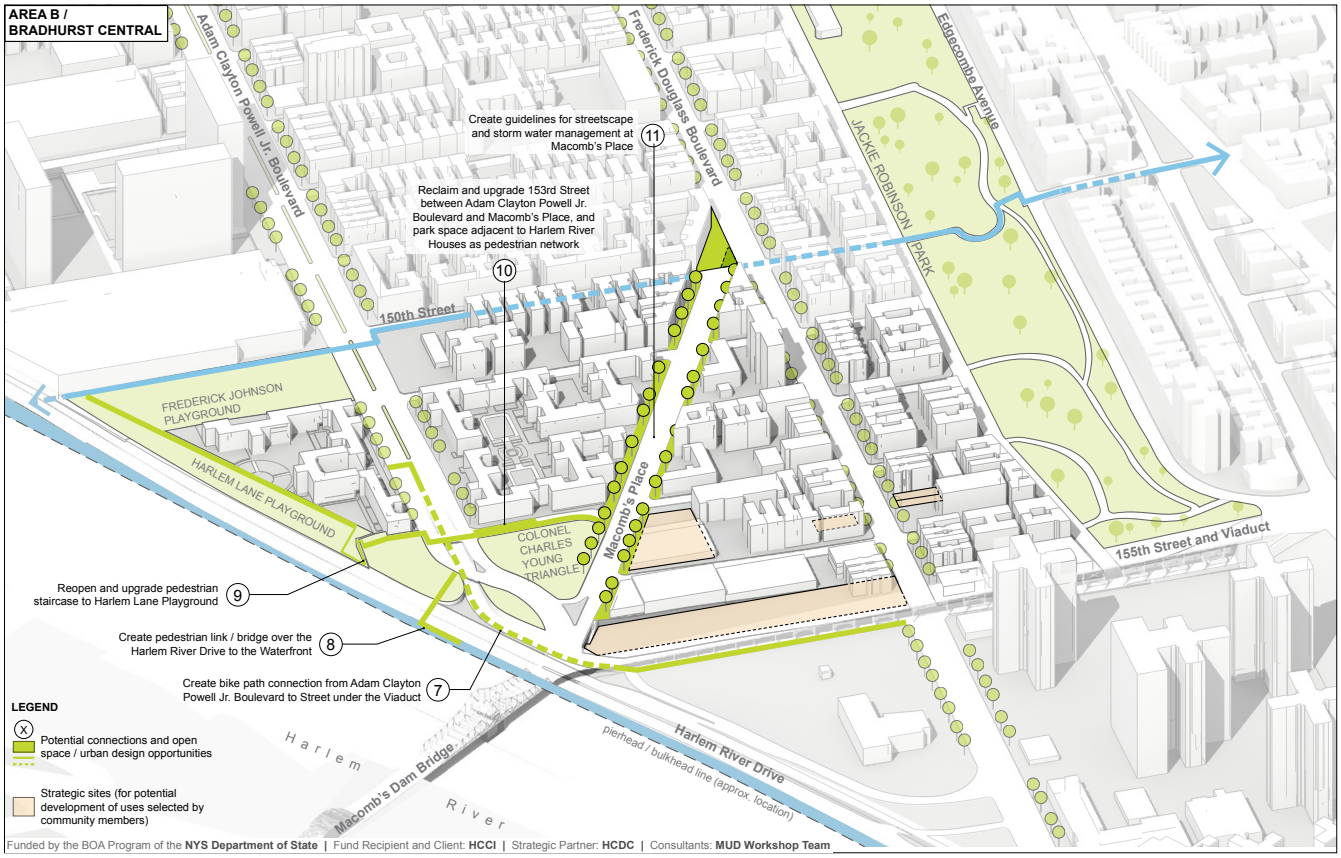
- **Listen to your colleagues** when they speak. Don't interrupt.
- **Be respectful** of differing ideas and opinions. Feel free to question the assumptions being raised without personally criticizing the people you don't agree with.
- **Avoid side bar conversations** unless they are necessary to improve the value or accuracy of something you are about to contribute.
- **Stick to the agenda** rather than going off on tangents or verbalizing matters of self-interest.
- **Participate actively**, making the input that reflects the unique expertise or experience you bring to the table.
- **Don't dominate discussions.** Be brief and crisp when you make a point.
- **Support your colleagues** by adding information that strengthens and sharpens their ideas.



Project Funded by the Brownfield Opportunity Area Program of the NYS Department of State | Fund Recipient and Client: Harlem Congregation for Community Improvement | Strategic Partner: Harlem Community Development Corporation | Consultants: MUD Workshop (with AKRF, EDesign Dynamics, Philip Habib Eng., VJ Associates)



AREA A / BRADHURST NORTH
Macomb's Place
Redesign streetscape and program wide sidewalks for temporary markets and events
6
Upgrade pedestrian connection and provide bike runnel from 155th Street to Street under the Viaduct
1
W 155th Street
St. Nicholas Avenue
Harlem River Driveway
155th Street and Viaduct
Frederick Douglass Boulevard
Connect to west side via John Brush Staircase
2
Edgecombe Avenue
5
Provide pedestrian connection to 155th Street under the Viaduct
Harlem River Drive
4
Reclaim unused area by the Harlem River Drive as open space
Harlem River
HIGHBRIDGE PARK
LEGEND
X
Potential connections and open space / urban design opportunities
Strategic sites (for potential development of uses selected by community members)
3
Create missing pedestrian and bike links to and within Polo Grounds
To Harlem River Waterfront
Funded by the BOA Program of the NYS Department of State | Fund Recipient and Client: HCCI | Strategic Partner: HCDC | Consultants: MUD Workshop Team



AREA B / BRADHURST CENTRAL
Adam Clayton Powell Jr. Boulevard
Frederick Douglass Boulevard
Edgecombe Avenue
Create guidelines for streetscape and storm water management at Macomb's Place
11
JACKIE ROBINSON PARK
Reclaim and upgrade 153rd Street between Adam Clayton Powell Jr. Boulevard and Macomb's Place, and park space adjacent to Harlem River Houses as pedestrian network
10
150th Street
FREDERICK JOHNSON PLAYGROUND
HARLEM LANE PLAYGROUND
COLONEL CHARLES YOUNG TRIANGLE
Macomb's Place
155th Street and Viaduct
Reopen and upgrade pedestrian staircase to Harlem Lane Playground
9
Create pedestrian link / bridge over the Harlem River Drive to the Waterfront
8
Create bike path connection from Adam Clayton Powell Jr. Boulevard to Street under the Viaduct
7
LEGEND
X
Potential connections and open space / urban design opportunities
Strategic sites (for potential development of uses selected by community members)
Harlem River
Macomb's Dam Bridge
Harlem River Drive
pierhead / bulkhead line (approx. location)

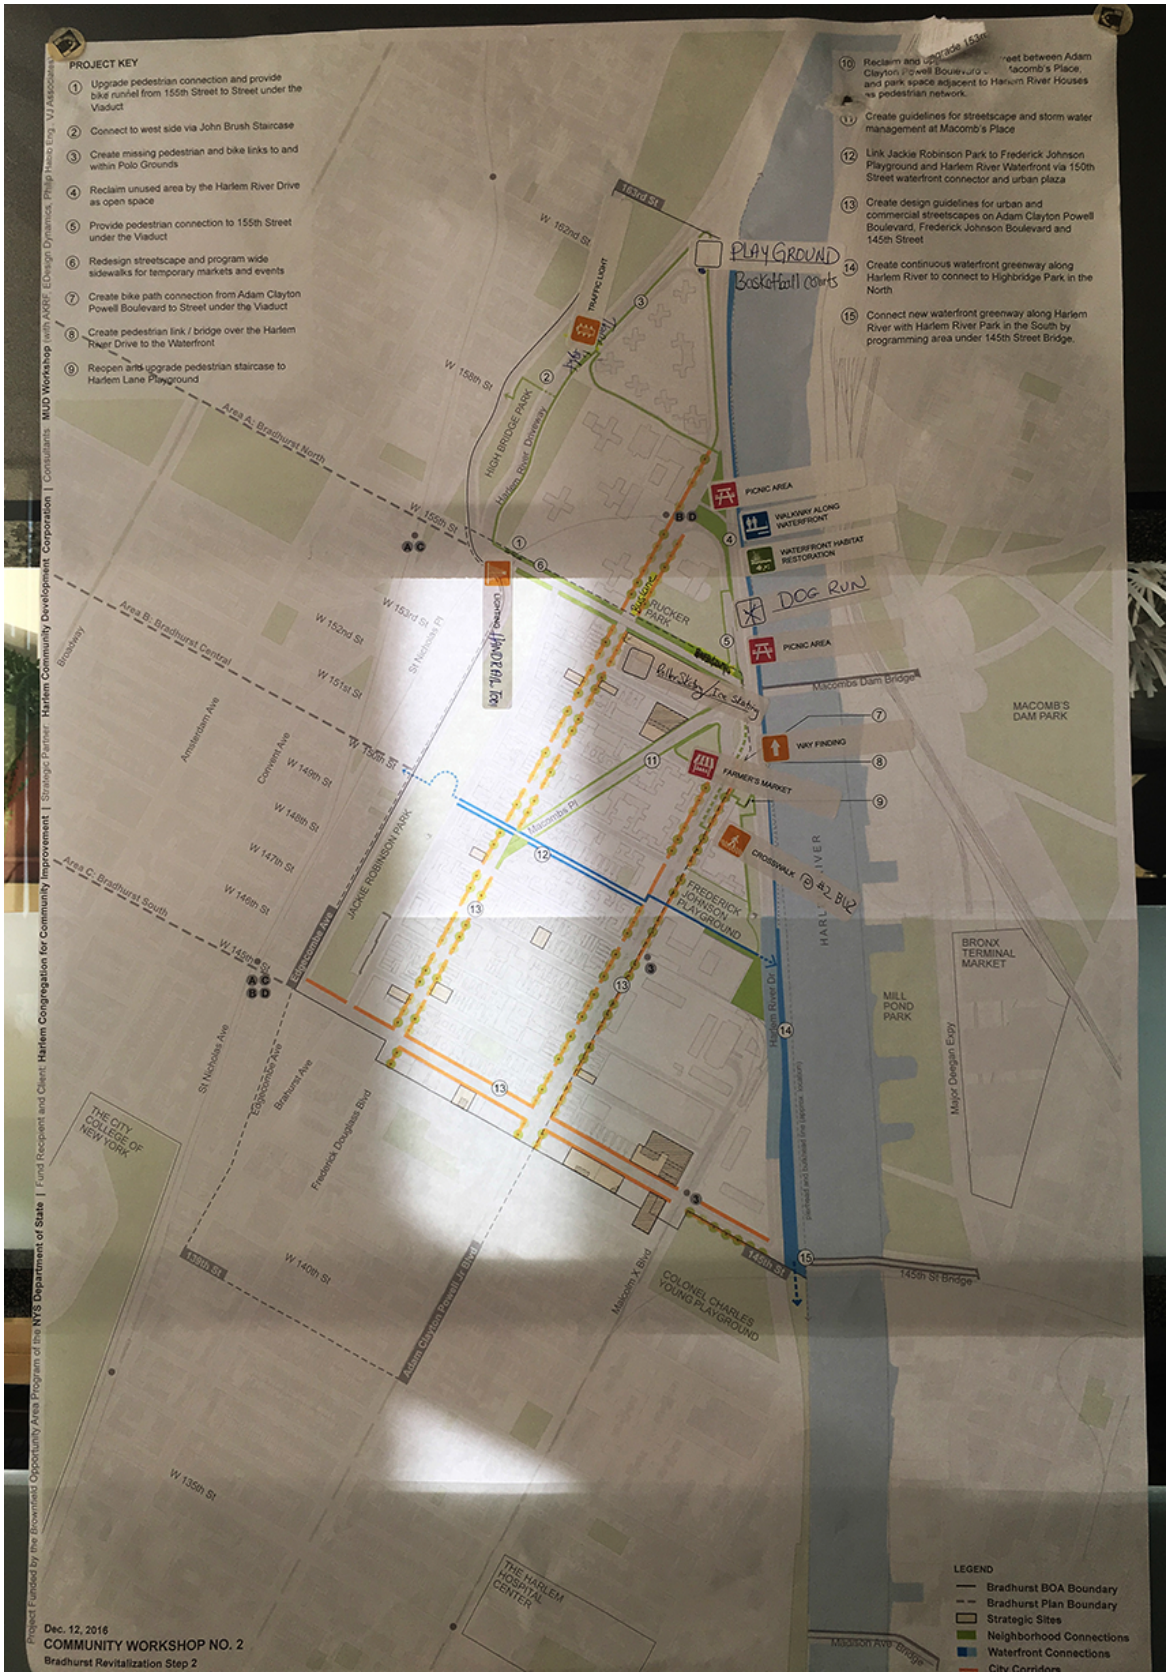
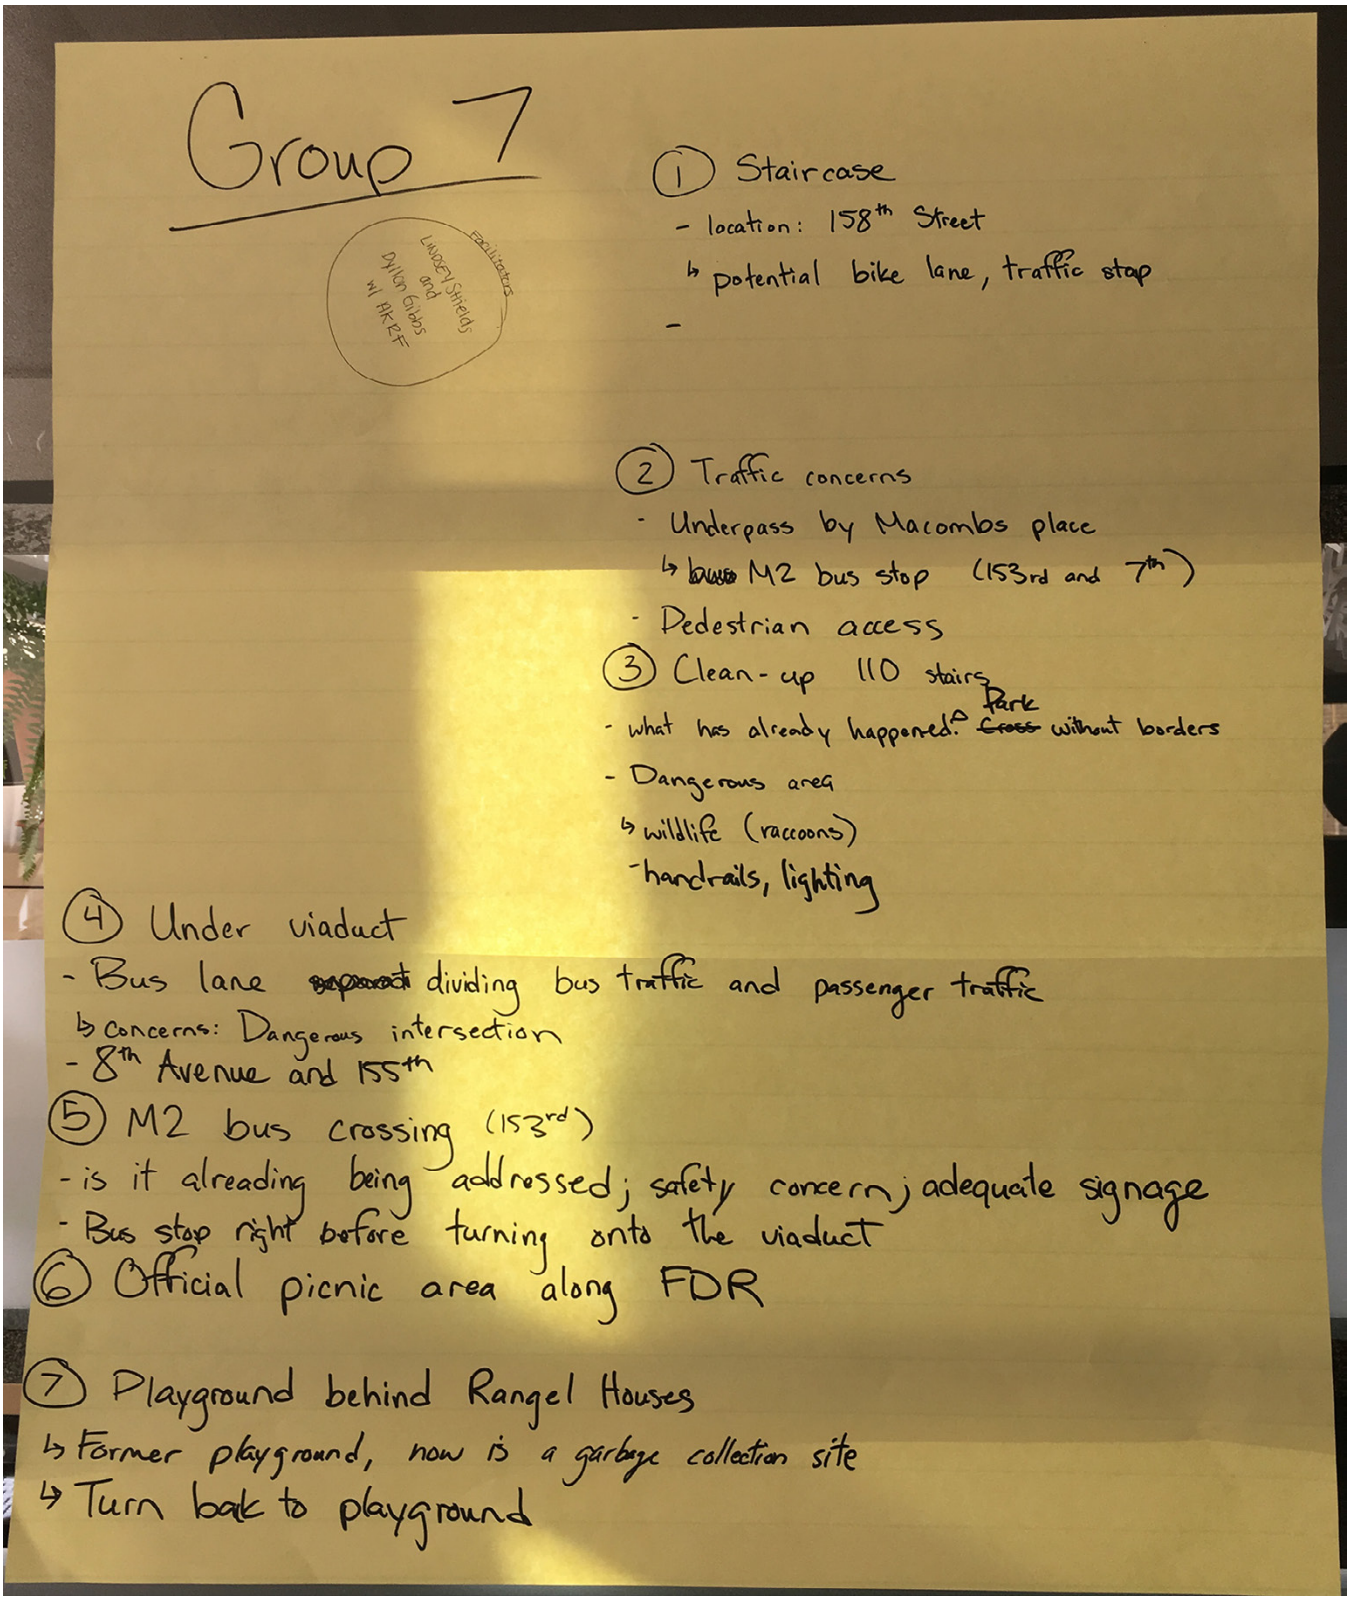
Workshop Findings





Group 7

Facilitators
Lindsey Stivers and Dylan Gibbs w/ HKRF

(1) Staircase
- location: 158th Street
  ↳ potential bike lane, traffic stop
-

(2) Traffic concerns
- Underpass by Macombs place
  ↳ ~~bus~~ M2 bus stop (153rd and 7th)
- Pedestrian access

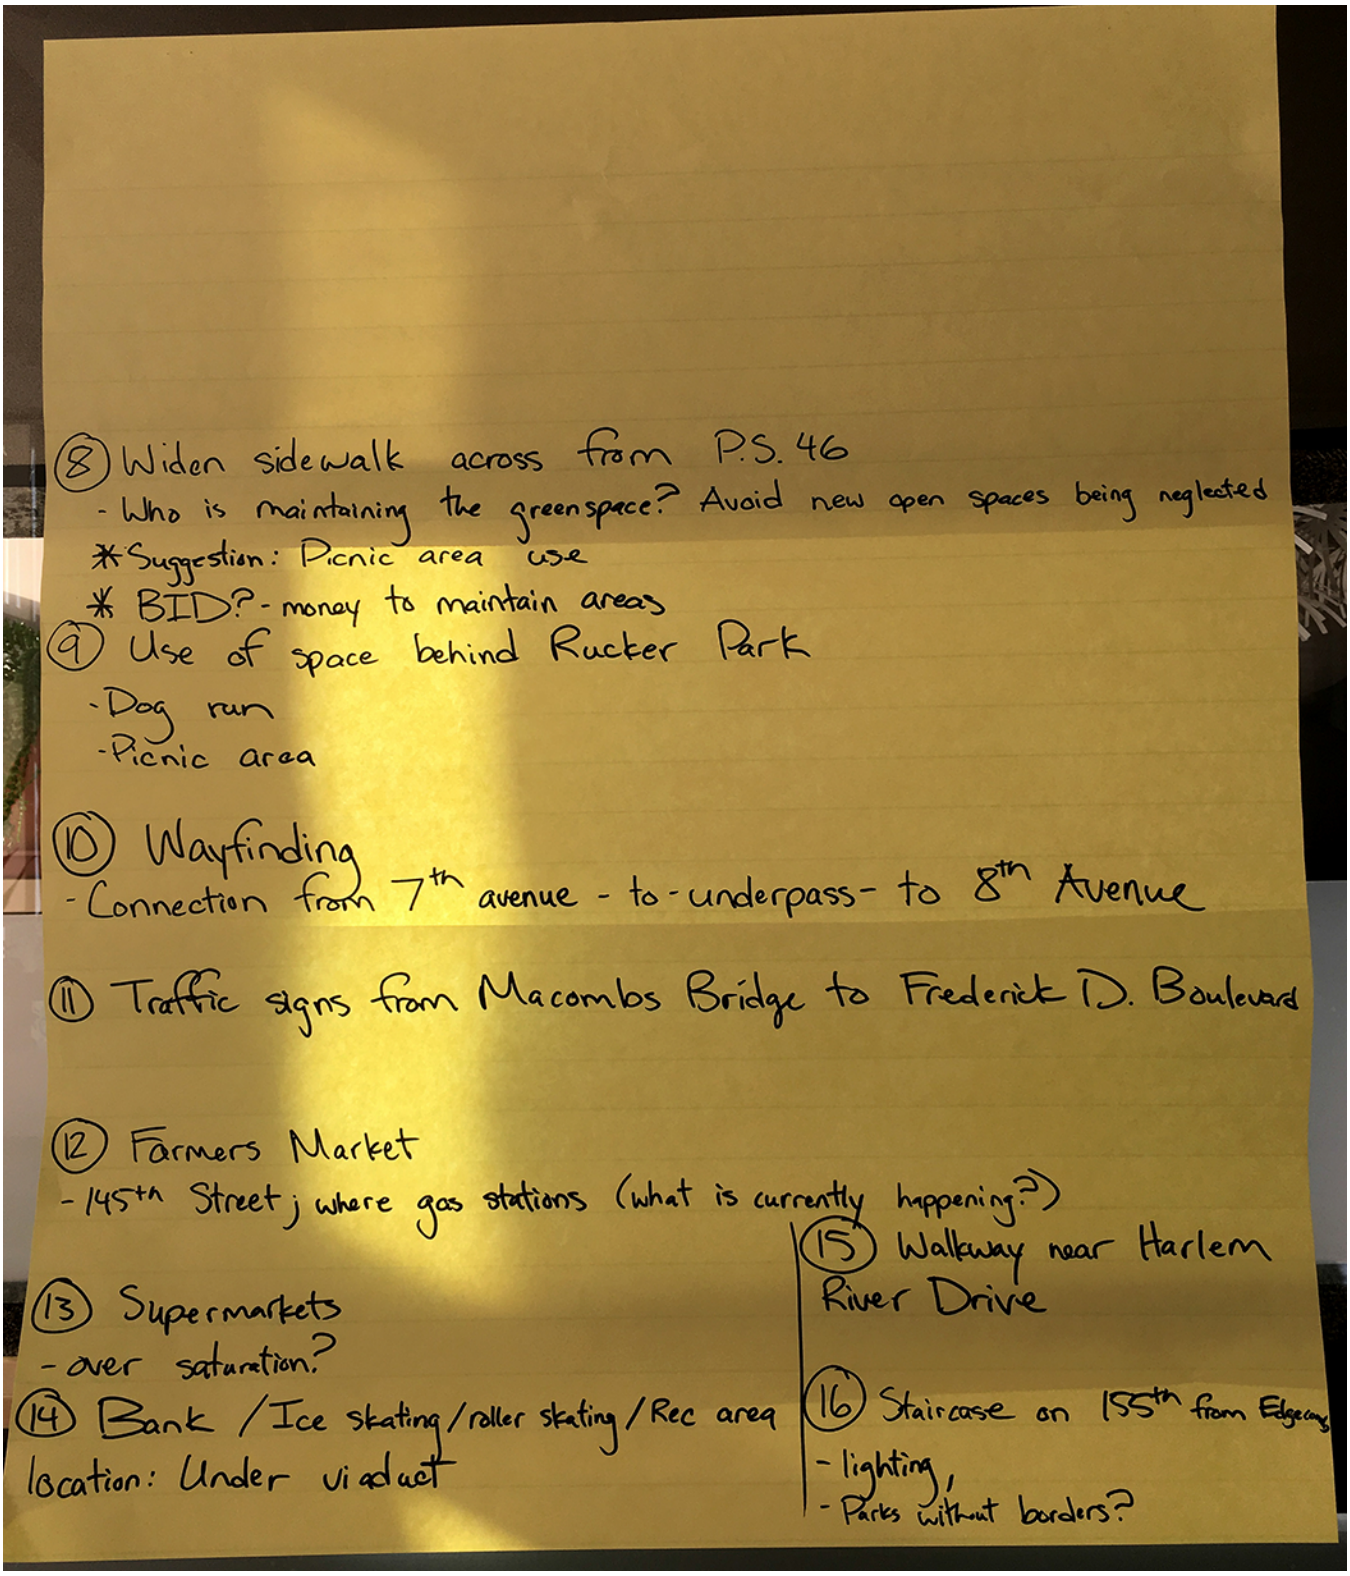
(3) Clean-up 110 stairs
- what has already happened? ~~Grass~~ Park without borders
- Dangerous area
  ↳ wildlife (raccoons)
  - handrails, lighting

(4) Under viaduct
- Bus lane ~~separate~~ dividing bus traffic and passenger traffic
  ↳ concerns: Dangerous intersection
- 8th Avenue and 155th

(5) M2 bus crossing (153rd)
- is it already being addressed; safety concern; adequate signage
- Bus stop right before turning onto the viaduct

(6) Official picnic area along FDR

(7) Playground behind Rangel Houses
↳ Former playground, now is a garbage collection site
↳ Turn back to playground



(8) Widen sidewalk across from P.S. 46
- Who is maintaining the greenspace? Avoid new open spaces being neglected
* Suggestion: Picnic area use
* BID? - money to maintain areas
(9) Use of space behind Rucker Park
- Dog run
- Picnic area
(10) Wayfinding
- Connection from 7th avenue - to - underpass - to 8th Avenue
(11) Traffic signs from Macombs Bridge to Frederick D. Boulevard
(12) Farmers Market
- 145th Street; where gas stations (what is currently happening?)
(13) Supermarkets
- over saturation?
(14) Bank / Ice skating / roller skating / Rec area
location: Under viaduct
(15) Walkway near Harlem River Drive
(16) Staircase on 155th from Edgecomb
- lighting,
- Parks without borders?

PROJECT KEY
1 Upgrade pedestrian connection and provide bike runnel from 155th Street to Street under the Viaduct
2 Connect to west side via John Brush Staircase
3 Create missing pedestrian and bike links to and within Polo Grounds
4 Reclaim unused area by the Harlem River Drive as open space
5 Provide pedestrian connection to 155th Street under the Viaduct
6 Redesign streetscape and program wide sidewalks for temporary markets and events
7 Create bike path connection from Adam Clayton Powell Boulevard to Street under the Viaduct
8 Create pedestrian link / bridge over the Harlem River Drive to the Waterfront
9 Reopen and upgrade pedestrian staircase to Harlem Lane Playground
10 Reclaim and upgrade 153rd Street between Adam Clayton Powell Boulevard and Macomb's Place, and park space adjacent to Harlem River Houses as pedestrian network.
11 Create guidelines for streetscape and storm water management at Macomb's Place
12 Link Jackie Robinson Park to Frederick Johnson Playground and Harlem River Waterfront via 150th Street waterfront connector and urban plaza
13 Create design guidelines for urban and commercial streetscapes on Adam Clayton Powell Boulevard, Frederick Johnson Boulevard and 145th Street
14 Create continuous waterfront greenway along Harlem River to connect to Highbridge Park in the North
15 Connect new waterfront greenway along Harlem River with Harlem River Park in the South by programming area under 145th Street Bridge.
Project Funded by the Brownfield Opportunity Area Program of the NYS Department of State | Fund Recipient and Client: Harlem Congregation for Community Improvement | Strategic Partner: Harlem Community Development Corporation | Consultants: MUD Workshop (with Arcet, LDesign Lyn

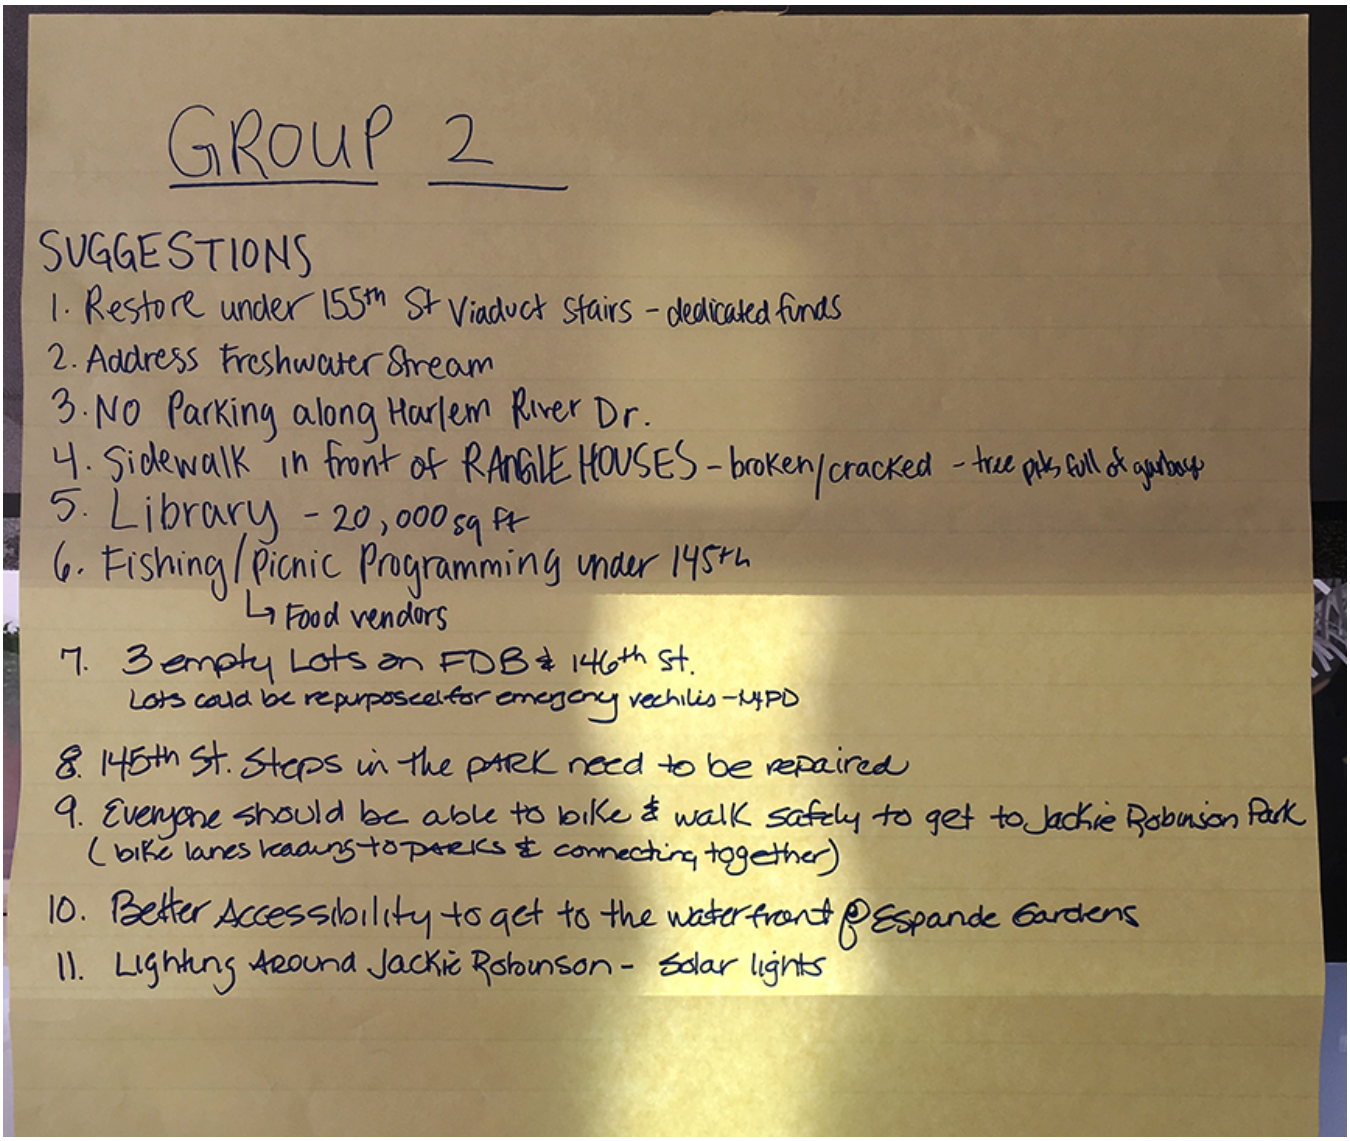
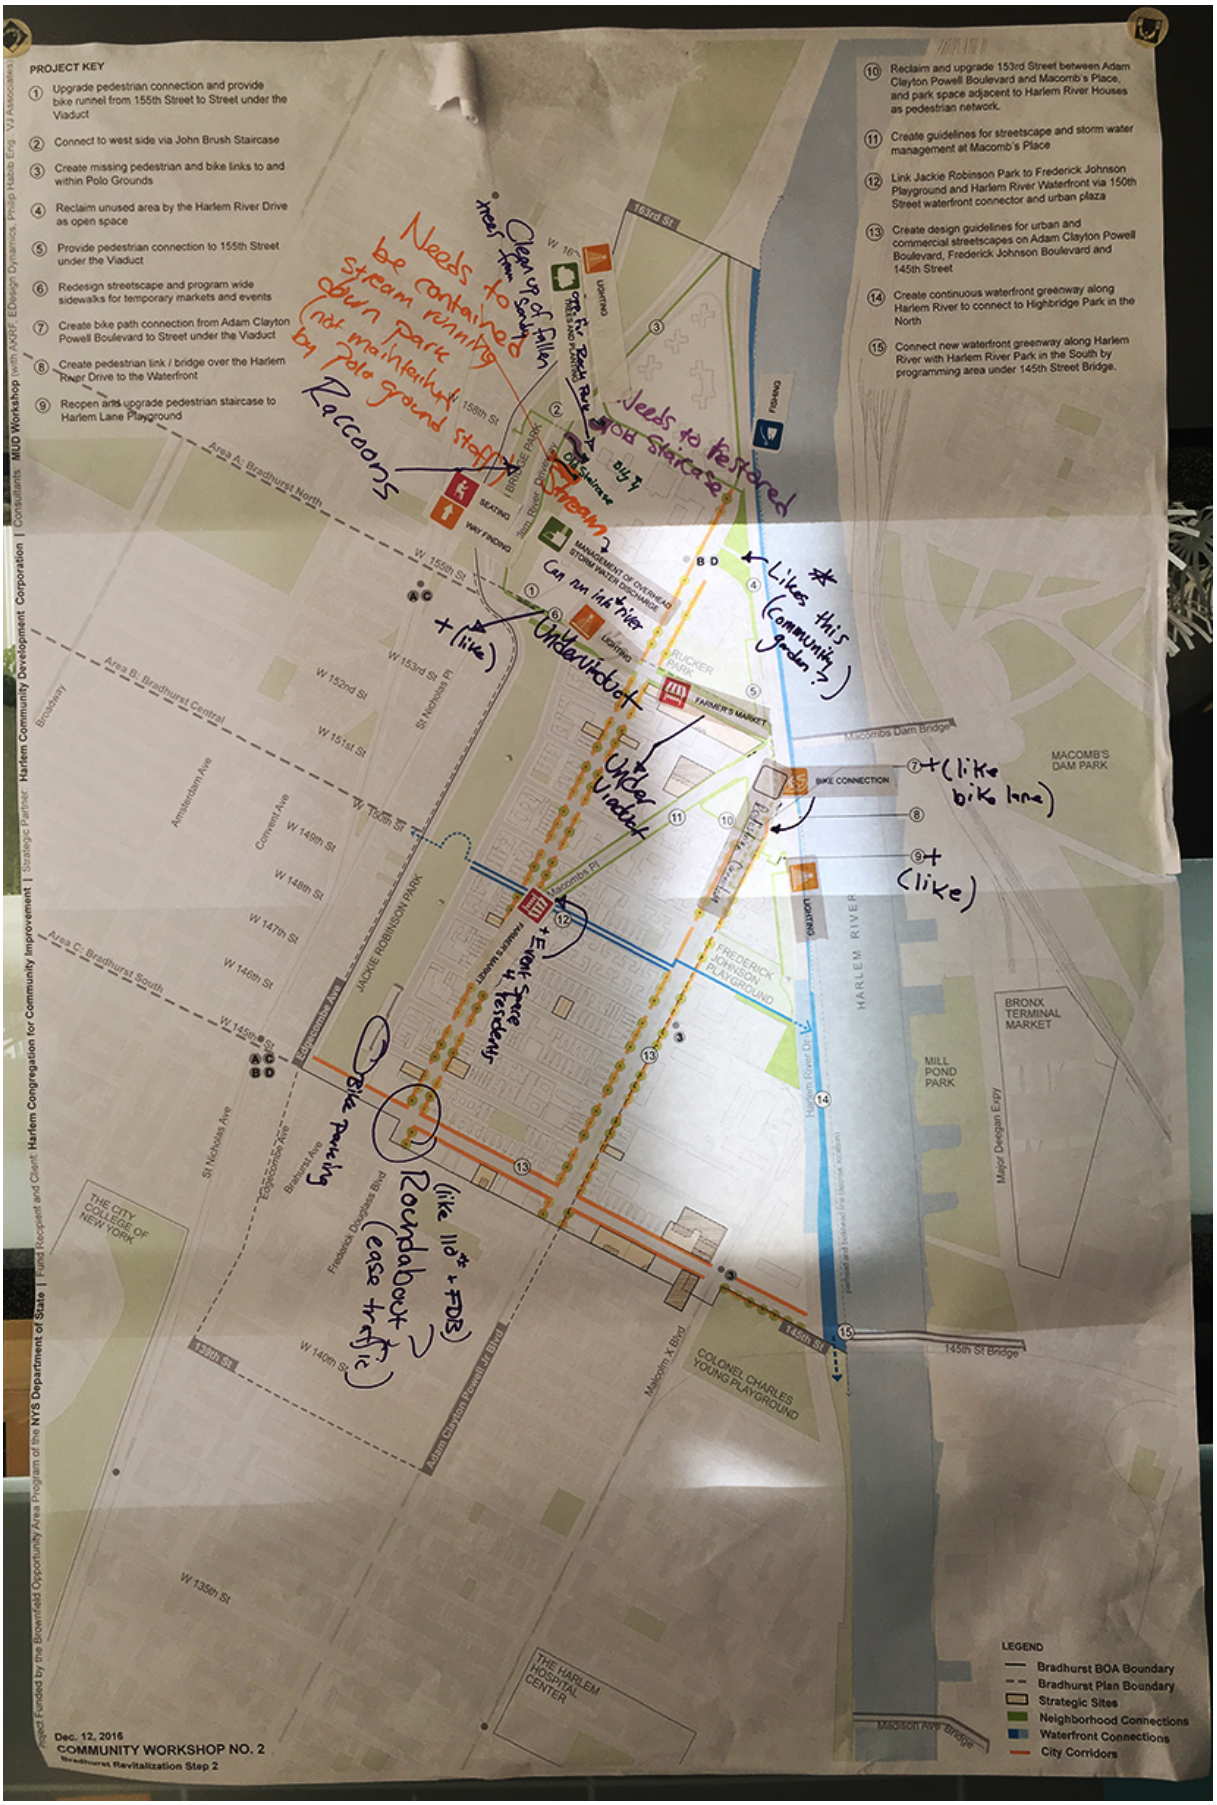
COMMUNITY WORKSHOP NO. 2
Bradhurst Revitalization Step 2



GROUP 2
SUGGESTIONS
1. Restore under 155th St Viaduct stairs - dedicated funds
2. Address Freshwater Stream
3. NO Parking along Harlem River Dr.
4. Sidewalk in front of RANGLE HOUSES - broken/cracked - tree pits, full of garbage
5. Library - 20,000 sq ft
6. Fishing/Picnic Programming under 145th
↳ Food vendors
7. 3 empty Lots on FDB & 146th St.
Lots could be repurposed for emergency vechilis - NYPD
8. 145th St. Steps in the PARK need to be repaired
9. Everyone should be able to bike & walk safely to get to Jackie Robinson Park
(bike lanes leading to parks & connecting together)
10. Better Accessibility to get to the water-front & Esplande Gardens
11. Lighting Around Jackie Robinson - Solar lights



PROJECT KEY
1 Upgrade pedestrian connection and provide bike runnel from 155th Street to Street under the Viaduct
2 Connect to west side via John Brush Staircase
3 Create missing pedestrian and bike links to and within Polo Grounds
4 Reclaim unused area by the Harlem River Drive as open space
5 Provide pedestrian connection to 155th Street under the Viaduct
6 Redesign streetscape and program wide sidewalks for temporary markets and events
7 Create bike path connection from Adam Clayton Powell Boulevard to Street under the Viaduct
8 Create pedestrian link / bridge over the Harlem River Drive to the Waterfront
9 Reopen arts upgrade pedestrian staircase to Harlem Lane Playground
10 Reclaim and upgrade 153rd Street between Adam Clayton Powell Boulevard and Macomb's Place, and park space adjacent to Harlem River Houses as pedestrian network.
11 Create guidelines for streetscape and storm water management at Macomb's Place
12 Link Jackie Robinson Park to Frederick Johnson Playground and Harlem River Waterfront via 150th Street waterfront connector and urban plaza
13 Create design guidelines for urban and commercial streetscapes on Adam Clayton Powell Boulevard, Frederick Johnson Boulevard and 145th Street
14 Create continuous waterfront greenway along Harlem River to connect to Highbridge Park in the North
15 Connect new waterfront greenway along Harlem River with Harlem River Park in the South by programming area under 145th Street Bridge.
Project Funded by the Brownfield Opportunity Area Program of the NYS Department of State | Fund Recipient and Client: Harlem Congregation for Community Improvement | Strategic Partner: Harlem Community Development Corporation | Consultants: MUD Workshop (with AKRF, EDesign Dynamics, Philip Habib Eng., VJ Associates)

Area around ②

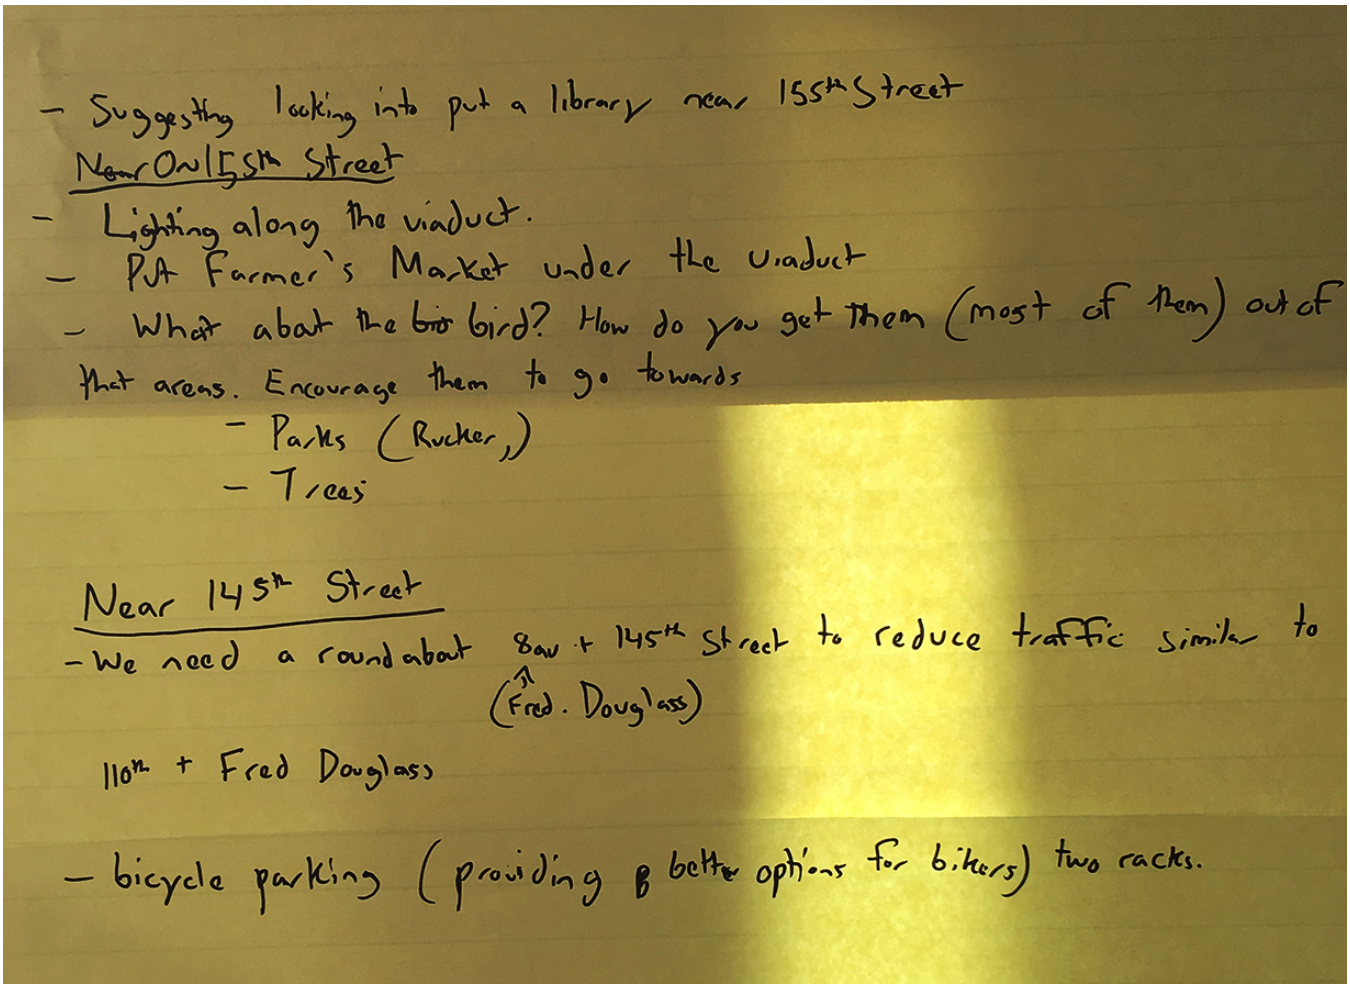
-155th Viaduct - an old stair case near #2 needs to be restored
-Building #4 - stream needs to be contained running park behind buildg (along Harlem River Driveway) ~~rock~~ possible build a rock garden. Put up lillies.
- stream could be a runoff going into the river
- putting in some lights, signage identifying it as Highbridge Park, seating, wayfinding signs
- put in reflector signs
- taking care of trees (especially fallen trees from Sandy)
- Containing the raccoons in the park.

- 155th → 163rd street
- nothing along walkway. Just greenary.
- possible put in a community garden, fishing,
-

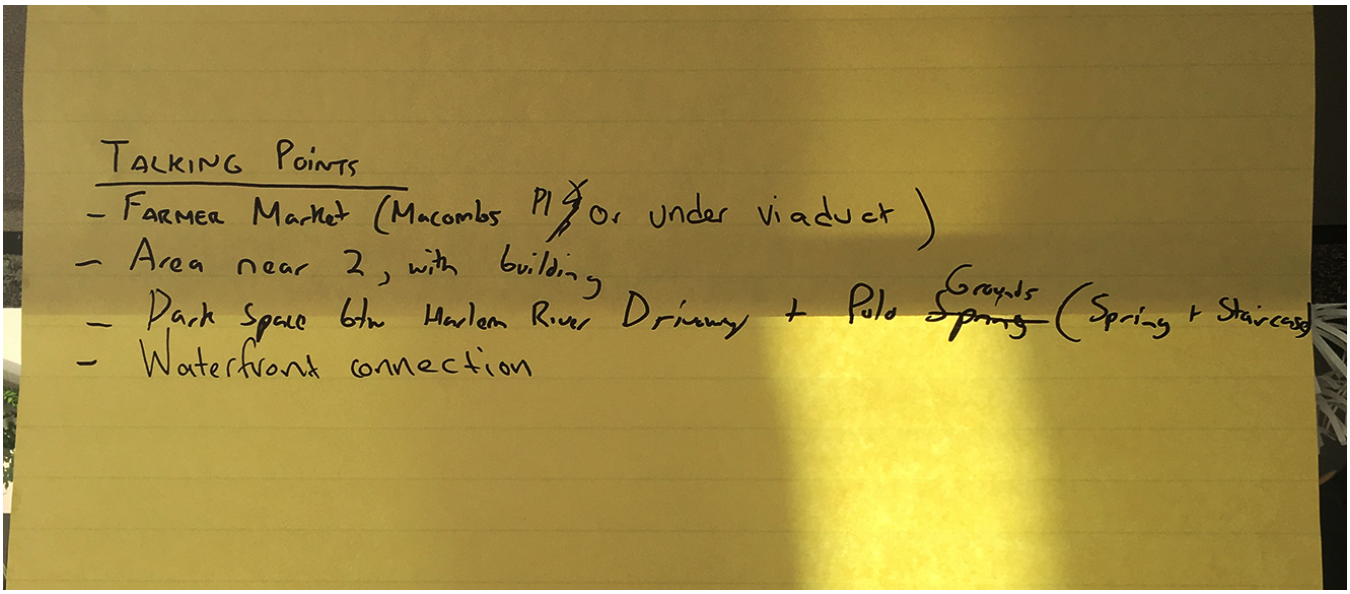
- part of the area is fenced off.
- put in a connector between uptown + downtown

NEAR 7-10
- Restore the steps
- Put in lighting because of the viaduct.
- Possible put in a walkway. With a bike lane. May be a sidewalk.
- Put in pedestrian connection.

Near 12 ~ ~~Putting~~ Revisiting putting in a farmer's market.



- Suggesting looking into put a library near 155th Street
Near On 155th Street
- Lighting along the viaduct.
- Put Farmer's Market under the viaduct
- What abaut the big bird? How do you get them (most of them) out of that areas. Encourage them to go towards
- Parks (Rucker,)
- Trees
Near 145th Street
- We need a roundabout 8av + 145th Street to reduce traffic similar to (Fred. Douglass)
110th + Fred Douglass
- bicycle parking (providing better options for bikers) two racks.



TALKING POINTS
- FARMER Market (Macombs Pl or under viaduct)
- Area near 2, with building
- Park Space btw Harlem River Driveway + Polo Grounds (Spring + Staircase)
- Waterfront connection

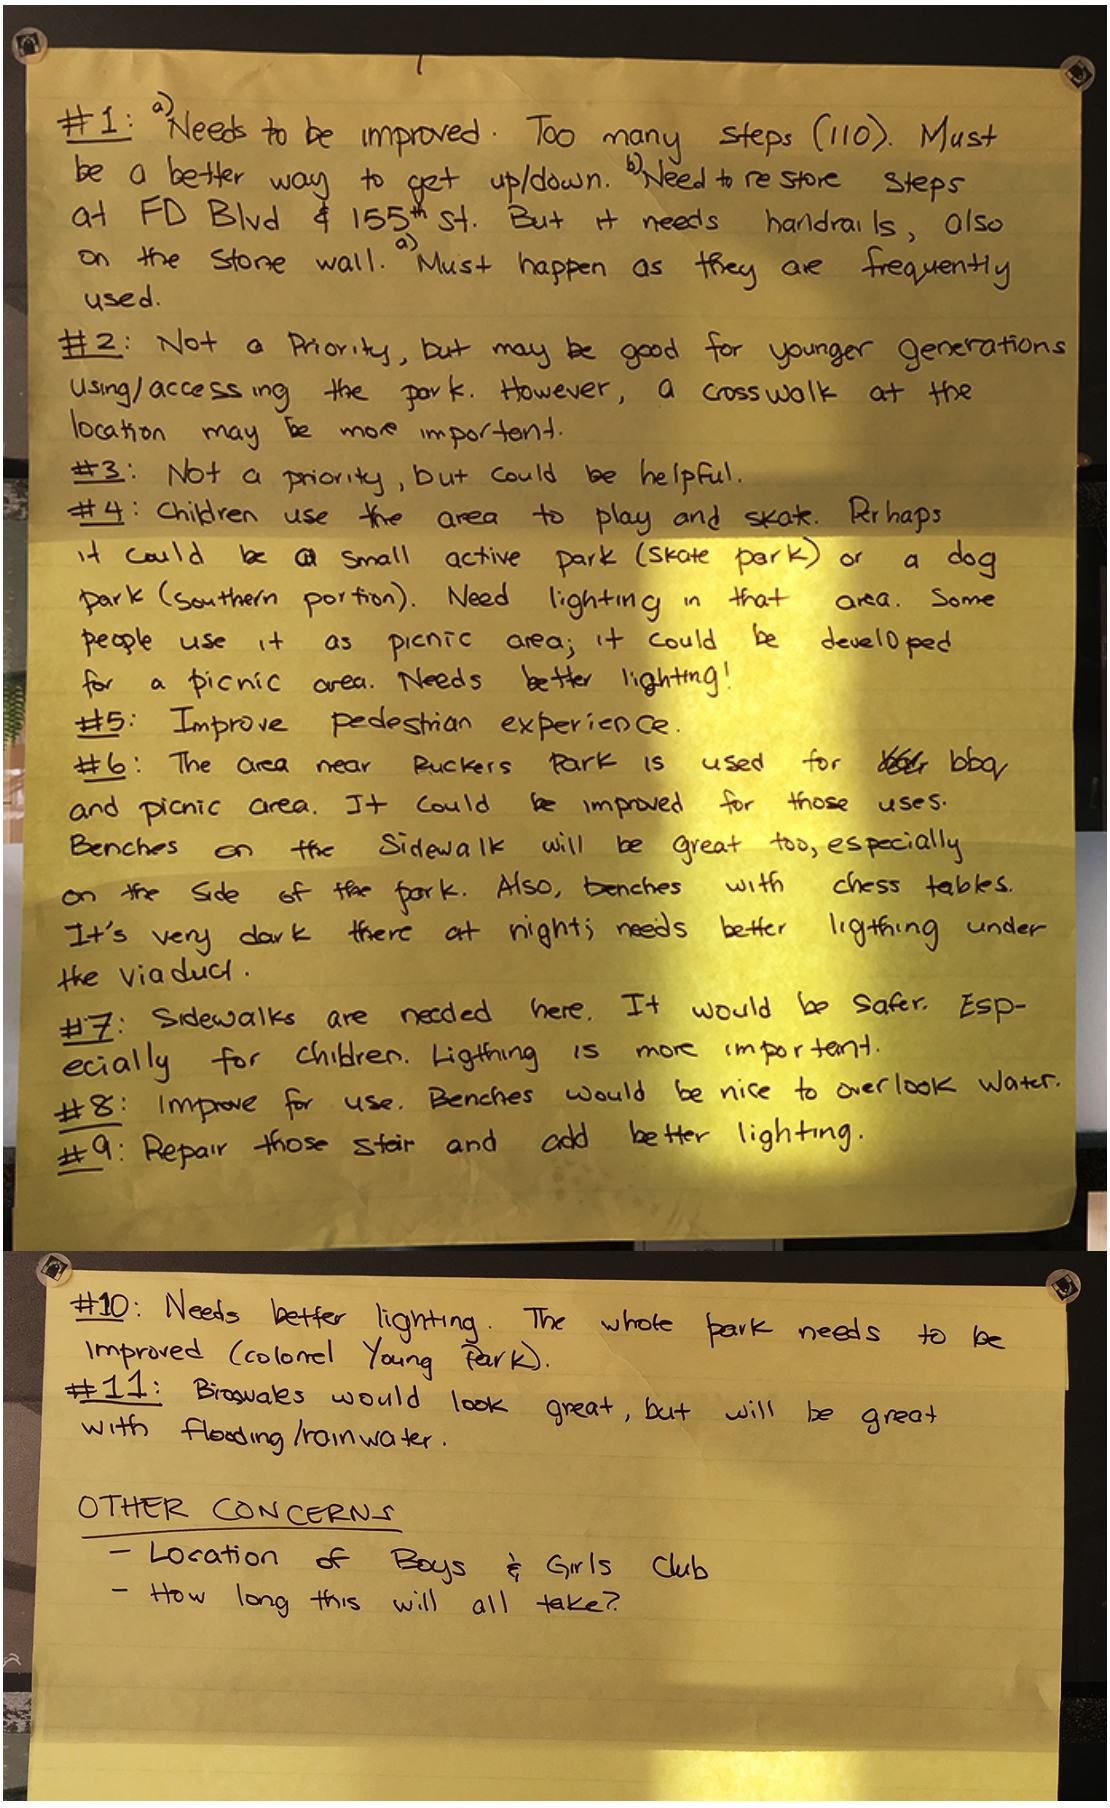
COMMUNITY WORKSHOP NO. 2
Bradhurst Revitalization Step 2
Project Funded by the Brownfield Opportunity Areas Program of the NYS Department of State | Fund Recipient and Client: Harlem Congregation for Community Improvement | Strategic Partner: Harlem Community Development Corporation | Consultants: MUD Workshop (with AKRF, EDesign Dynamics, Philip Habib Eng., V.J Associates)



#1: a) Needs to be improved. Too many steps (110). Must be a better way to get up/down. b) Need to restore steps at FD Blvd & 155th St. But it needs handrails, also on the stone wall. a) Must happen as they are frequently used.

#2: Not a Priority, but may be good for younger generations using/accessing the park. However, a crosswalk at the location may be more important.

#3: Not a priority, but could be helpful.

#4: Children use the area to play and skate. Perhaps it could be a small active park (skate park) or a dog park (southern portion). Need lighting in that area. Some people use it as picnic area; it could be developed for a picnic area. Needs better lighting!

#5: Improve pedestrian experience.

#6: The area near Ruckers Park is used for ~~beer~~ bbq and picnic area. It could be improved for those uses. Benches on the sidewalk will be great too, especially on the side of the park. Also, benches with chess tables. It's very dark there at night; needs better lighting under the viaduct.

#7: Sidewalks are needed here. It would be safer. Especially for children. Lighting is more important.

#8: Improve for use. Benches would be nice to overlook water.

#9: Repair those stair and add better lighting.

#10: Needs better lighting. The whole park needs to be improved (colonel Young Park).

#11: Broswales would look great, but will be great with flooding/rainwater.

OTHER CONCERNS

- Location of Boys & Girls Club
- How long this will all take?

OUTREACH WITH MANHATTAN BOROUGH PRESIDENT'S OFFICE

Meeting 1
In Person Meeting
Date: October 14, 2015 @11:00AM
Location: 1 Centre Street, 19th Floor, NYC 10007

Attendees -
Sam Levine (MBPO)
Debbie Timothy (MBPO)
Athena Moore (MBPO)
Patreinnah Acosta-Pelle (HCCI)
Malcolm Punter – (HCCI)
Thomas Lunke (HCDC)
Shachi Pandey (MUD Workshop)

Met with Budget Director, Sam Levine and Analyst, Debbie Timothy to discuss the Capital Funding Application Process. These discussion were held with the objective to potentially partner with MBPO on CFA grants for the year 2016. In addition to understanding the capital funding application process, the discussion focused on figuring out whether the BOA community priorities align with the MBPO's mission and would be a good candidate for capital grants. Specific projects / project areas included:

1. NYS CFA Water Revitalization Grant
2. Step 3 BOA Clean-up
3. Step 2 Current BOA
4. Design/Schematics/Construction Plans

Meeting 2
In Person Meeting
Date: September 30, 2016 @11:00AM
Location: 1 Centre Street, 19th Floor, NYC 10007

Attendees -
Members from the MBPO team including Borough President Gale Brewer
Malcolm Punter – (HCCI)
Sherill Henry – (HCCI)
Shachi Pandey (MUD Workshop)

HCCI discussed capital funding for development of affordable housing in the Bradhurst neighborhood. In particular, gaining site control of Strategic Site located at 2421 Adam Clayton Powell Boulevard was discussed with Gale Brewer, who mentioned that the City would look at any affordable housing development favorably given the new zoning regulations. Subsequently, MUD Workshop submitted an as-of-right development scenario for the site to HCCI to help facilitate further conversations with MBPO for gaining site control and potential development of affordable housing units with community facilities on this site.

Meeting 1 Presentation

BRADHURST REVITALIZATION

HCCI

BOA SNAPSHOT and OPPORTUNITIES

The BOA has a "quiet, small-town feel", convenient Manhattan location and great access to public transportation, all of which have been attracting significant retail and residential development

Recent Trends and Opportunities

1. More than 800 new residential units completed in the BOA neighborhood since 2004
2. High quality amenities and national / regional retail tenants are increasingly attracted to the neighborhood e.g. New York Sports Club, Duane Reade etc. now on 145th Street
3. New MTA bus depot building at Malcolm X Boulevard strengthening public transportation in the area

Mother Clara Hale Bus Depot | Opened in January 2015

Project Funded by the Brownfield Opportunity Area Program of the NYS Department of State

BOA SNAPSHOT and OPPORTUNITIES

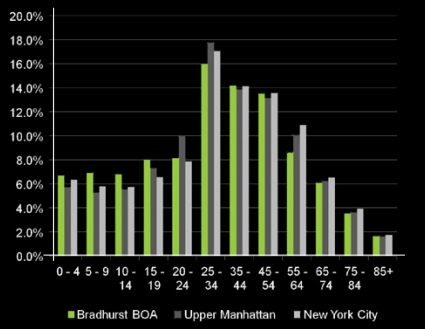
The BOA has a high population growth rate and high percentage of youth compared to Upper Manhattan and NYC

Total BOA Population: 24,000 persons

Annualized population growth
- Bradhurst BOA: Approx. 1%
- New York City: Approx. 0.2%
- Upper Manhattan: Approx. (-) 0.1%

BOA Median Age: 33.4 years

Percentage of school aged children (5 – 19 yrs)
- Bradhurst BOA: 22%
- New York City: 18%
- Upper Manhattan: 18%



Source: Existing Conditions and Development Feasibility Analysis | Step 2 Nomination Study

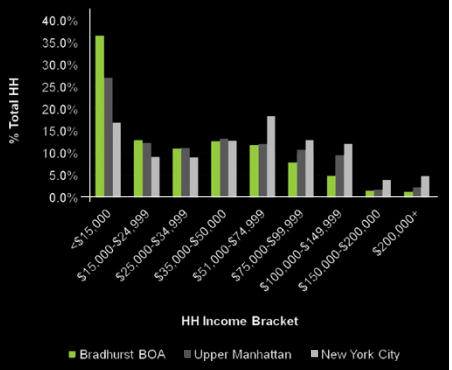
BOA SNAPSHOT and OPPORTUNITIES

The BOA has the lowest median household income, however, it has grown by 3.8% annually outpacing Upper Manhattan and NYC

BOA Median Household Income: $25,391

Households earning less than $35,000 annually
- Bradhurst BOA: > 60%
- New York City: 35%
- Upper Manhattan: 51%

Median Household Income Growth Rate
- Bradhurst BOA: 3.8%
- New York City: 3.3%
- Upper Manhattan: 3.2%



Source: Existing Conditions and Development Feasibility Analysis | Step 2 Nomination Study

REVITALIZATION GOALS

Community and Economic Development

- Create employment, job training and youth recreational/educational opportunities for the local community;
- Work with Bradhurst area businesses, the City and state to develop environmentally friendly business practices; and
- Assess business needs and need for services to best implement a diverse mix of land uses.

Urban Design

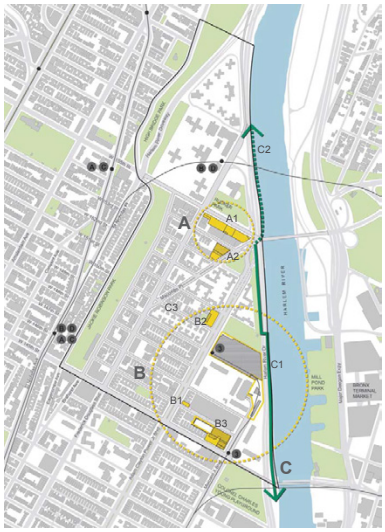
- Create appropriate waterfront access, shoreline and habitat restoration and recreational use opportunities;
- Create a set of Harlem urban design principles for the Bradhurst Area that improve physical connections in the neighborhood and make it more walkable, accessible and integrated; and
- Reinvigorate the area under the 155th Street viaduct and develop it into a community focal point.

PROJECT FOCUS AREAS

Cluster A | 2 Brownfield Sites
A1. Davis Warshow / Western Beef Site
A2. Post Office Site

Cluster B | 3 Brownfield Sites
B1. City owned staging area
B2. Harlem Soft Touch Car Wash Site
B3. 145th Street Assemblage Site across Mother Clara Hale Bus Depot

Area C | Harlem River Waterfront
C1. Esplanade Gardens Waterfront
C2. Continuity and Public Access along Harlem River
C3. Upland Connections e.g. 150th Street



MAP LEGEND
Strategic Sites
Sites to consider on Overall Urban Design Framework
Potential Economic Clusters
Existing Waterfront Land
Potential Waterfront Pathway over Harlem River

POTENTIAL CAPITAL IMPROVEMENTS

Brownfield Sites
- Site clean up

Public Realm Revitalization
- Streetscape improvements
- Upland waterfront connections e.g. 150th Street
- Harlem River waterfront pathway

Existing photo of area at the Esplanade Gardens waterfront

Conceptual diagram showing a waterfront pathway along Esplanade Gardens

POTENTIAL CAPITAL IMPROVEMENTS

Transportation Improvements
- Pedestrian connectivity and safety along Adam Clayton Powell Jr. Boulevard
- 155th Street subway entrance

Broken or missing pedestrian connections in the Bradhurst Neighborhood e.g. Adam Clayton Powell Jr. Boulevard

Adam Clayton Powell Jr. Boulevard looking towards south

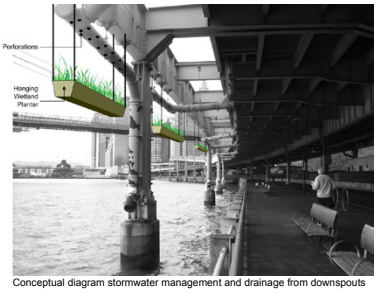
Adam Clayton Powell Jr. Boulevard looking towards 155th Street Viaduct

POTENTIAL CAPITAL IMPROVEMENTS

Existing photo of drainage problems under the Harlem River Drive

Green Strategies and Ecology

- Right of way bioswales, rain gardens, permeable pavements and / or stormwater greenstreets
- Roof top vegetation (and habitat restoration)
- Coastal scrub-shrub upland planting
- Stormwater management of discharge from elevated infrastructure



Conceptual diagram stormwater management and drainage from downspouts

Location

TAX LOT INFORMATION

Block:	2015
Lot:	1
Owner:	DCAS
Lot Dimensions:	40' X 101'
Total Area:	4,040 S.Ft.

KEY OPPORTUNITIES

- **High Visibility:** Corner lot at the intersection of Adam Clayton Powell Blvd. and 146th St.
- **Easy Transit Access:** Located within 10 minute walking distance from 3 train stop at 145th St. and Lennox Terminal
- **Key Location:** Situated within walking distance of a a highly underserved area with high unemployment rate

ZONING & USE INFORMATION

Zoning District:	R7-2 (Max. FAR: 3.44)
Overlay:	C2-4 (Max. FAR: 2.0)
Permissible FAR:	6.5 3.44: Residential 2: Commercial 1: Community Facility
Other Incentives:	Lot is located in the NY Empowerment Zone (incentives can include direct loans and grants, tax exempt bond financing and other tax incentives)
Current Use:	Vacant lot previously used as a staging area for construction of Mother Clara Hale Bus Depot
Permissible Uses:	Commercial / retail, Residential and Community Uses including schools, library, museums, residential facilities for special needs population, community center, non-for profit facilities etc. (Zoning Use Groups 3 and 4)
Feedback from Community on Desired Uses	**Workforce Development Programs for Adults, Youth Development Programs, After School Programs for Children, Affordable Housing.** **View project website for details: www.bradhurstboa.com**

A.7
OUTREACH WITH DEPARTMENT OF TRANSPORTATION

Site walkthrough
Date: December 08, 2015 @3:30PM

Attendees -
Margaret Forgione (Commissioner of Transportation for Manhattan Borough, NYC DOT)
Noah Levenson (DOT)
Malcolm Punter – (HCCI)
Patreinnah Acosta-Pelle (HCCI)
Thomas Lunke (HCDC)
Shachi Pandey (MUD Workshop)
Jacoub Reda (Philip Habib and Associates)

MUD Workshop conducted a site walkthrough with the Commissioner of Transportation for Manhattan Borough, Margaret Forgione to apprise her of immediate priorities regarding transportation improvements in the Bradhurst BOA. A detailed graphic summary of the presentation and priorities was presented during the walkthrough and refined based on feedback received from DOT (see attached)

Meeting Materials

MACOMBS PLACE (south)

Aerial view of Macombs Place between 150th and 152nd Streets

Street level view of Macombs Place looking south at 151st Street

Street level view of Macombs Place looking north at 151st Street

Proposed Improvements at 1 2

- Restripe Macombs Place between W 150th and W 151st Streets to provide angled or perpendicular parking along both east and west curbs
- Use striping and qwick-kurbs to channelize travel lane and align approach with the north-bound receiving end at the intersection with W 151st Street. This will help prevent vehicles from crashing into the incoming green-streets median

MACOMBS PLACE (north)

Aerial view of Macombs Place between 153rd and 155th Streets

View of potential east receiving end of the W 153rd Street approach at Macombs Place

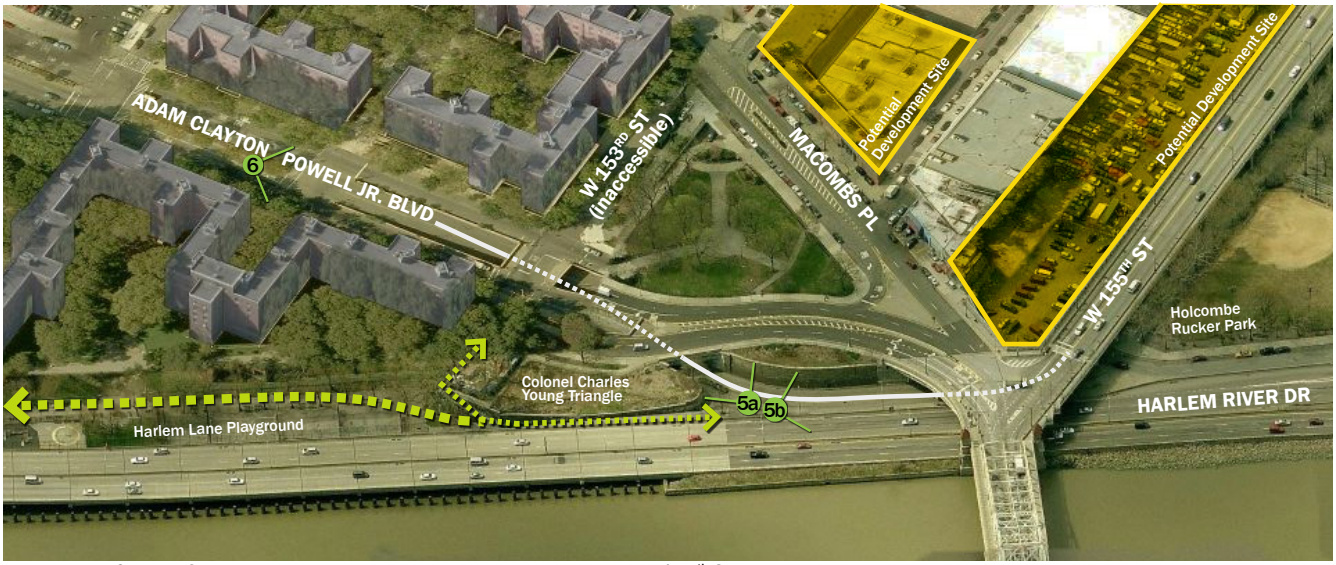
Intersection of Macombs Place and Adam Clayton Powell Jr. Boulevard

Proposed Improvements at 3 4a and b

- Explore possibility of providing north-bound right turn onto 153rd Street from Macombs Place (currently the expected 153rd ROW is fenced off and inaccessible for traffic movement)
- Explore possibility of making Macombs Place one-way south-bound between 153rd and 155th Streets and close north-bound right turn onto Adam Clayton Powell Jr. Boulevard from Macombs Place. Include the resultant traffic island as an extension of Colonel Charles Young Triangle and convert former north-bound roadway into a green plaza

Intersection of Macombs Place and Adam Clayton Powell Jr. Boulevard

ADAM CLAYTON POWELL JR. BOULEVARD



Aerial view of Adam Clayton Powell Jr. Boulevard and it's intersection with 155th Street below grade

Broken pedestrian link on Adam Clayton Powell Jr. Boulevard
Looking south

Looking north towards 155th Street Viaduct

View of Adam Clayton Powell Jr. Boulevard going below grade

Proposed Improvements at 5 a and b, and 6

- Convert roadway connection to one-way south-bound or alternatively, narrow travel lanes to provide space for a new pedestrian sidewalk and bikeway connection along the east side of the street alignment adjacent the Harlem River Drive. This new pedestrian and bike connection will connect Harlem Lane Playground, Colonel Charles Young Triangle and public space under the 155th Street Viaduct

155th STREET VIADUCT

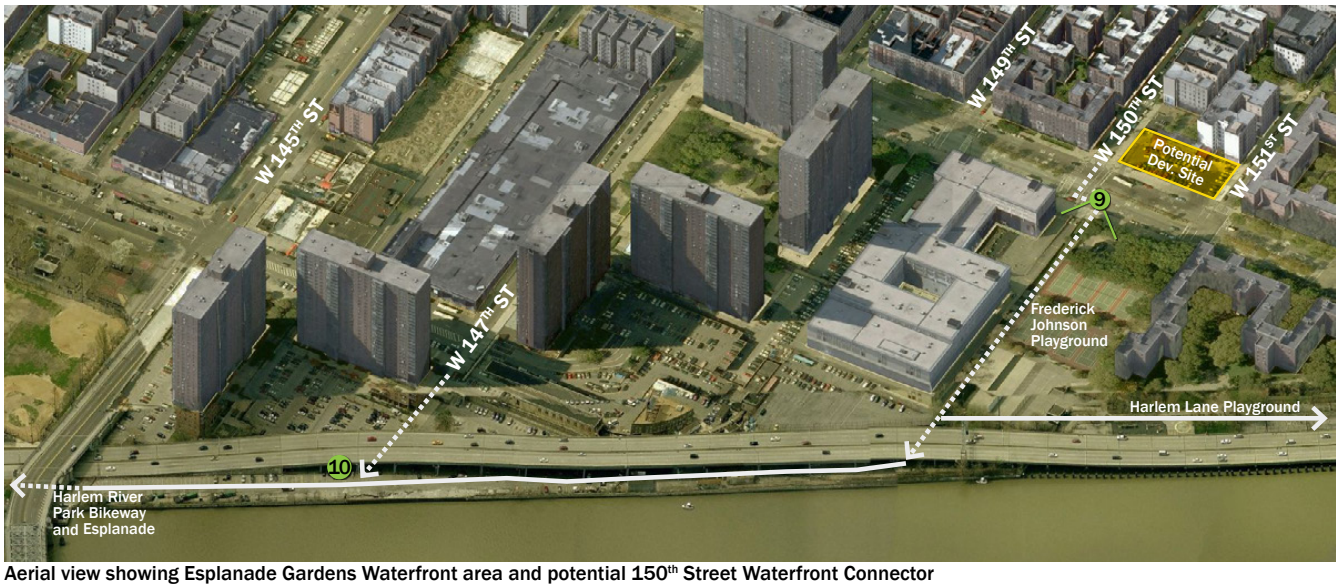
View of W 155th Street Viaduct looking west (limited lighting and wide unlandscaped sidewalks)

View of W 155th Street Viaduct looking east (downspouts discharge rainwater on to street)

Proposed Improvements at 7 8

- Improve lighting below viaduct (DOT to confirm current street light level sufficiency)
- Plant street trees and/or planters along north sidewalks adjacent to the south side of the Polo Grounds housing complex
- Manage stormwater discharge from downspouts on W 155th Street Viaduct and prevent street flooding
- Explore possibility for temporary street closures to host community events / farmer's market etc.

150th UPLAND WATERFRONT CONNECTOR AND ESPLANADE GARDENS WATERFRONT



Aerial view showing Esplanade Gardens Waterfront area and potential 150th Street Waterfront Connector

View of path to the south of Frederick Johnson Playground

Storm water outfalls from Harlem River Drive cause surface flooding

Proposed Improvements 9 10 11

- Develop path running along south side of Frederick Johnson Playground as upland waterfront access and connect with waterfront lot along Harlem River (see image 9)
- Provide access from the playground to the paved path located at the eastern limits of the park
- Manage stormwater discharge from downspouts under Harlem River Drive and prevent surface flooding and damage
- Provide pedestrian / bikepath continuity along Harlem River (at Esplanade Gardens)

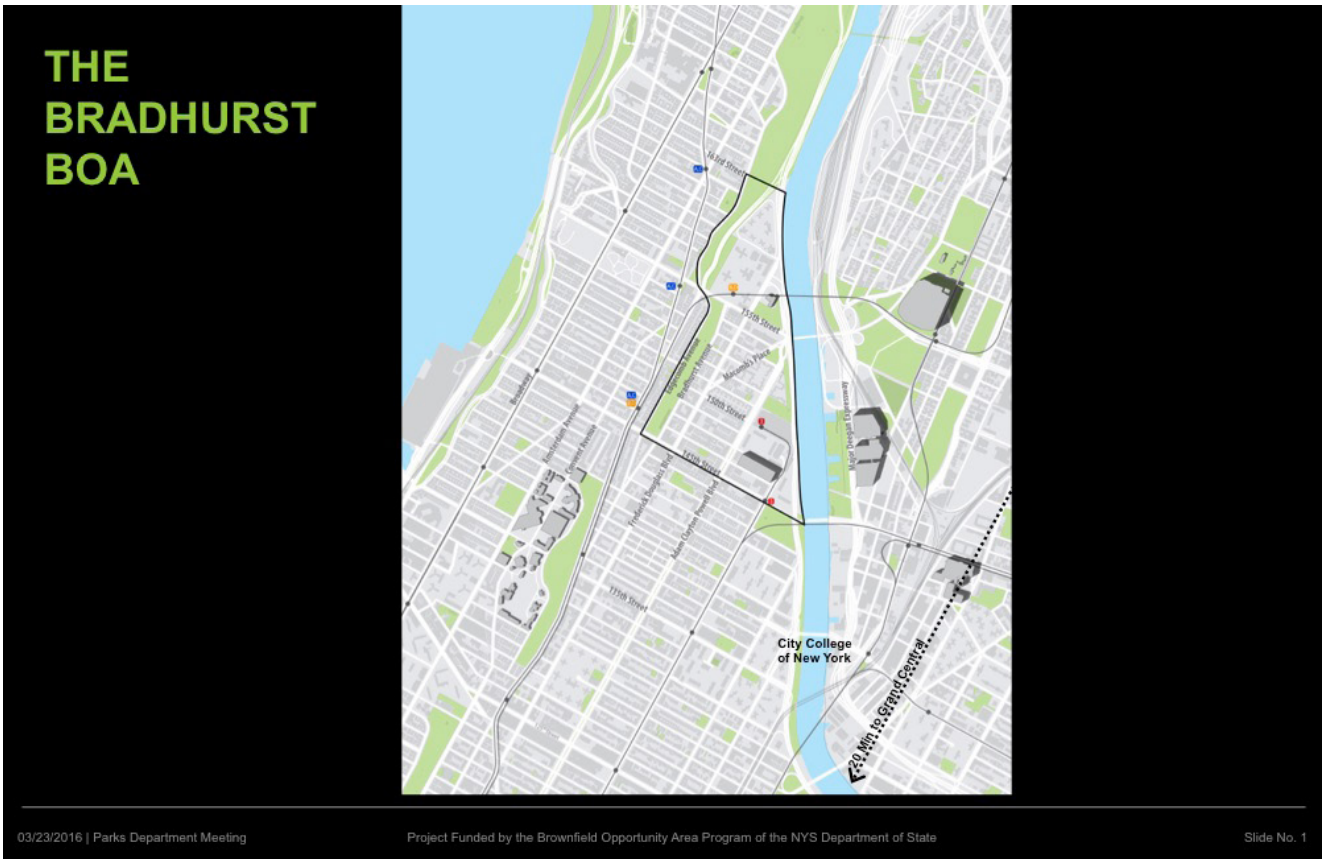
OUTREACH WITH DEPARTMENT OF PARKS

Presentation and Meeting
Date: March 23, 2016 @2:30PM

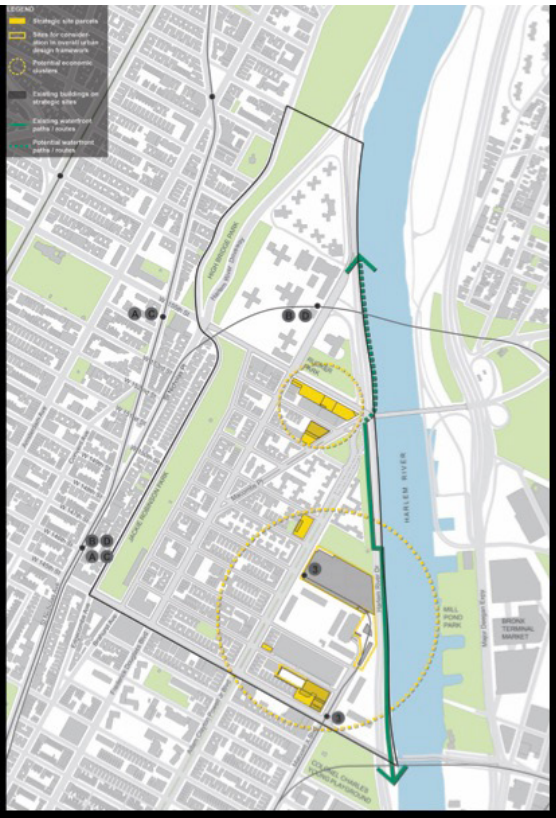
Attendees -
Grace Tang (NYC DPR)
Jennifer Gardner (NYC DPR)
Malcolm Punter – (HCCI)
Patreinnah Acosta-Pelle (HCCI)
Thomas Lunke (HCDC)
Shachi Pandey (MUD Workshop)

MUD workshop engaged with Department of Parks to discuss the potential expansion of Harlem River Park (currently ending just south of 145th Street and located along Harlem River's edge) along Bradhurst BOA's eastern edge. A short presentation that included the Manhattan Greenway plan of 2006 and an assessment of land availability for park development was followed by a discussion. DPR requested to be apprised of the BOA study development and asked that they be included on the Steering Committee list. They also mentioned that they would be releasing an RFP to look at flooding issues and resiliency in East Harlem and that the study area for this RFP would potentially include a part of the Bradhurst BOA – between 145th and 155th Street along the Harlem River's edge.

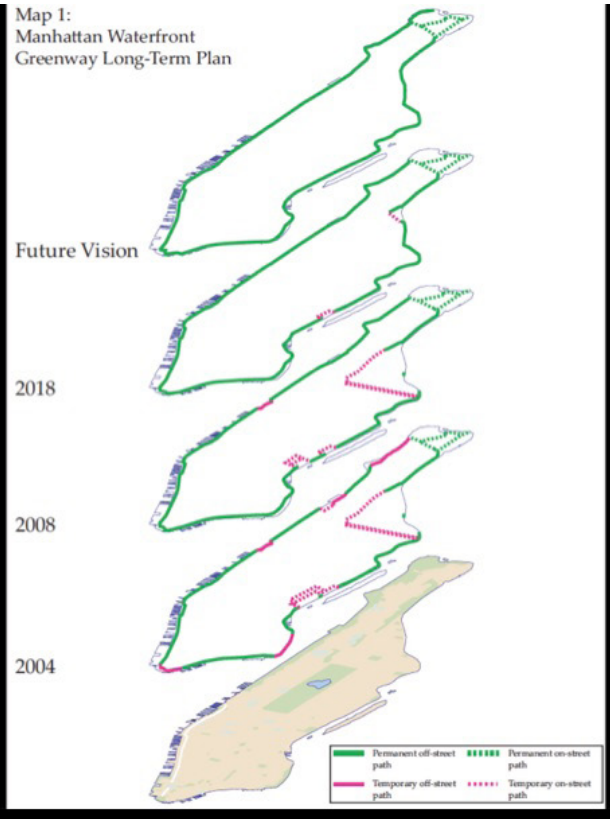
Presentation



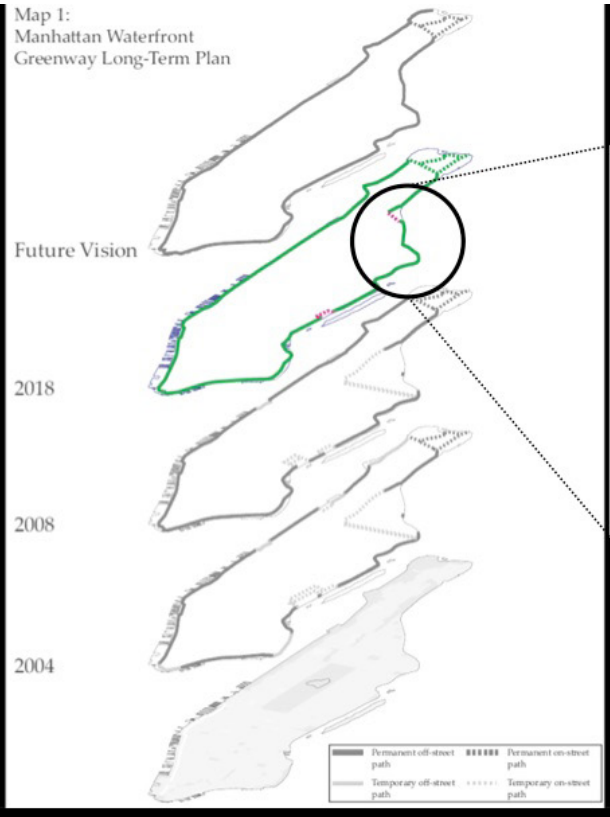
THE BRADHURST BOA



2004 GREENWAY PLAN



2018 FOCUS AREAS



HARLEM RIVER SHORES

1. Esplanade Gardens: 145th to 151st
2. Connection to 155th Entrance Ramp on Harlem River Speedway – access to 162nd Street
3. Future Plans: Polo Grounds

Project Funded by the Brownfield Opportunity Area Program of the NYS Department of State

Esplanade Gardens 145th to 151st

Esplanade Gardens parking lot

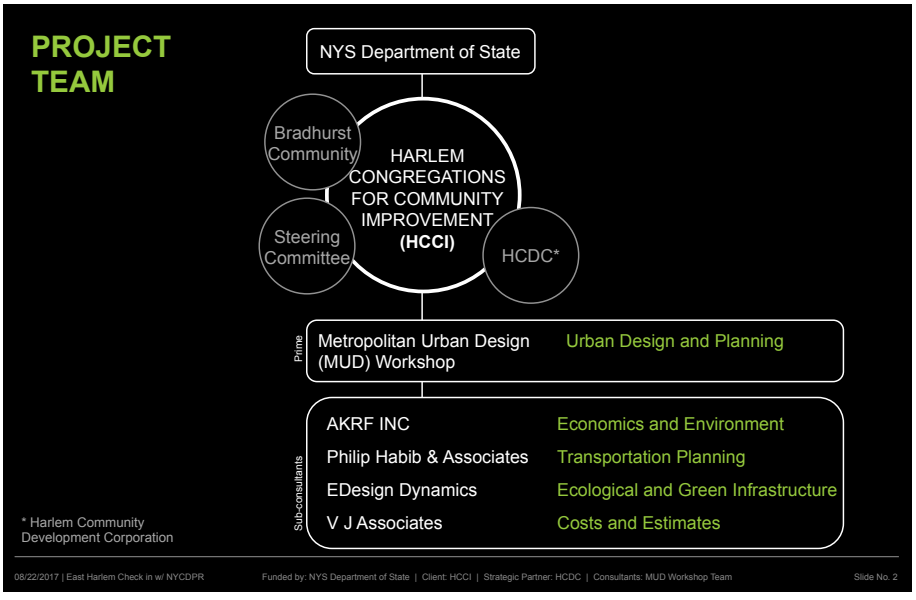
Presentation and Conference Call
Date: August 22, 2017 @4:00PM

Attendees –
Alda Chan (NYC DPR)
Eileen Munsch (NYC DPR)
Fiona Akins (NYC DPR)
Grace Tang (NYC DPR)
Sarah Nielson (NYC DPR)
Malcolm Punter – (HCCI)
Shachi Pandey (MUD Workshop)

MUD Workshop gave a presentation of findings and community priorities determined through the outreach process on the Bradhurst BOA. The objective of the presentation was to ensure that the East Harlem Resiliency RFP and study would acknowledge the work already done along the Harlem River's edge and incorporate community feedback in the planning and programming of the waterfront.

Presentation



BOA BOUNDARY

1. North: 163rd Street
2. West: Edgecombe Avenue
3. South: 145th Street
4. East: Harlem River

REVITALIZATION GOALS

Community and Economic Development

- Create employment, job training and youth recreational/educational opportunities for the local community;
- Assess business needs and need for services to best implement a diverse mix of land uses; and
- Work with Bradhurst area businesses, the City and state to develop environmentally friendly business practices.

Open Space and Urban Design

- Create a set of Harlem urban design principles for the Bradhurst Area that improve physical connections in the neighborhood and make it more walkable, accessible and integrated;
- Reinvigorate the area under the 155th Street viaduct and develop it into a community focal point; and
- Create appropriate waterfront access, shoreline and habitat restoration and recreational use opportunities.

PROCESS and RECAP

DESIRES
- Safe pedestrian connections
- More bike connections
- Community based programming where possible

CONSTRAINTS
- Steep topography
- Residual spaces
- Missing links

NEIGHBORHOOD CONNECTIONS

OUTREACH WITH ESPLANADE GARDENS

Presentation and Meeting
Date: September 27, 2016 @7:30PM
Venue: Board Room | Esplanade Gardens, 2569 7th Avenue, Bldg 2, New York, NY 10039

Attendees -
Shachi Pandey (MUD Workshop)
Grace Tang (NYC Department for Parks and Recreation)
Saundra Alexander
Madra Crump
Shameeka Germany
Ross Jackson
Carolyn Lewis
Michele P. Potillo
Robert Powell
Adrienne Thomas
James White
Miles Anthony Williams
Sharon Williams

MUD workshop made a presentation followed by a discussion with the Board of Directors of Esplanade gardens on September 27, 2016 at their general board meeting. This presentation and discussion was primarily conducted to gauge Esplanade Garden's interest in a potential waterfront park on their property along Harlem River. MUD workshop recalled how severely Esplanade Gardens was impacted by super-storm Sandy and discussed the benefits green infrastructure and a waterfront park that would also help with shoreline stabilization. Board members mentioned that they would be interested in discussing this further if the Department of Parks would get involved and prioritize shoreline stabilization and bulkhead maintenance. See copy of handouts given to Board of Directors.

August 22, 2016

Ms. Jeanette Washington
Assistant General Manager
Esplanade Gardens Inc.

Dear Ms. Washington,

I write to express my interest in attending the Esplanade Gardens board meeting on September 13, 2016, which includes a conversation with the NYC Department of Parks and Recreation.

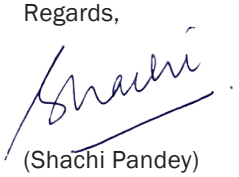
I am currently managing a multidisciplinary team of experts in urban design, urban planning, environment and ecology, transportation, economics and cost estimation, to complete the Bradhurst Revitalization Brownfield Opportunity Area (BOA) Plan, which was funded by the NYS Department of State. The plan area extends from 163rd Street in the north to 145th Street in the south, and from Edgecombe Avenue in the west to Harlem River in the east (please see maps on slides 2 and 3 in the attached presentation).

In addition to determining key opportunity sites for redevelopment, an important element of the BOA Plan is strengthening pedestrian and bike connections to existing parks and open spaces and where possible, creating new public open space. During our analysis, we determined potential for waterfront access and open space programming on land abutting the Harlem River, between 145th Street and Frederick Douglass Academy (FDA). Earlier this year on March 23rd, we met with representatives from NYC Department of Parks and Recreation to go over our findings – slides from our presentation are attached to this letter.

Through our work, we've found that waterfront programming and access in the aforementioned section of the Harlem River will not only provide a much needed open space amenity to residents of this area, but it will also open up access to a regional system of parks, walkways and bike paths that was envisioned in the 2004 Manhattan Waterfront Greenway Plan (Greenway Plan) of the Department of City Planning (please see slides 4 and 5 of the attached presentation). Given the Harlem River Park in the south and Highbridge Park in the north, this area of the waterfront sits between two developed parks and can link these open spaces, thereby allowing easy park access for residents of the area. In addition, the area has potential for recreational programming as well as green infrastructure that can help mitigate impacts of storm surge and manage storm-water discharge from the elevated Harlem River Drive.

As we move forward with the BOA Plan, we would like to coordinate our efforts with other ongoing efforts and investments in the neighborhood, so as to maximize benefits to the community. I am therefore requesting to listen in at the Esplanade Gardens meeting with Department of Parks and Recreation, and participate if and as you see fit.

Thank you for considering my request. I look forward to hearing from you.
Regards,



(Shachi Pandey)

GUEST: Grace Tang - NYC Parks Department & Shacki Pandey - Metropolitan Urban Design Workshop

Ms. Tang related information concerning the proposed work that is going to be done on the waterfront area in the near future.

The area that is going to be included in the survey starts at 92nd street up to 154th street, which includes Esplanade Gardens waterfront. After the survey/study is completed another meeting will be held with the Board of Directors to update the Board on their findings.

Ms. Pandey presented the initial ideas that the Metropolitan Urban Design Workshop has for the area from 145th Street to 162nd Street from the east river to Edgecombe Avenue, this also includes Esplanade Gardens troubled waterfront. They will perform a survey also, separate from the NYC Department of Parks. Their study will be completed in 2017.

Both agencies are interested in open space(parks, bike lanes etc), flooding, greenway and improvements for the waterfront.

A meeting will be held in October by NYC Parks Department and the Metropolitan Urban Design Workshop. Notices will be posted in the lobby of each building for all to attend.

Bradhurst Brownfield Opportunity Area Grant & Study
Steering Committee Meeting

Hosted By HCCI, Inc

Meeting started at 6:35pm

1) Patreinnah Acosta-Pelle started out meeting and had everyone introduce themselves.
2) Next meeting is to happen in 2016.
3) Malcolm Punter gave an overview of HCCI and BOA.
   - HCCI was created in 1986 by several clergymen of different dominations to help, as a community, revitalize the Bradhurst area (144th to 163rd street) as it was one of the poorest areas in Manhattan.
   - Worked with Columbia University, City College, as well as city offices such as the mayor's office and city planning.
   - 30 years later, we made progress in terms of housing; however, now the main goal is economic development of this area (double digit unemployment). Part of the BOA's effort is targeted to help that development.
   - Grant given in 2008 (Governor Paterson in office), that resulted in a published report (2011) on the conditions in the area. Community has to be intimately involved in the process.
   - Submitted to the Department of State for a second round of grant funding (supplemental step 2). This is the step we are currently on.
4) Tom Lunke went over the history of the "economic richness of the Bradhurst area"
   - Concerns that were originally brought to the table at the previous meeting and still need to be addressed: Improving neighboring connections, urban design and safety, expanding and repurposing open spaces, reemphasizing the cultural components like those that were in the area before (dancehall, stadium, etc), need for lighting under the Viaduct, police not following parking guidelines.
5) Shachi Pandey gave presentation.
   - Went over the members participating in the project and their roles
   - Overall positive trends in the Bradhurst area:
   - 800 new residential units; high quality commercial corridor on 145th street.
   - Fastest growing neighborhoods in NY, has a higher percentage of younger people, and even though it has high unemployment, income growth has been the highest in NYC.

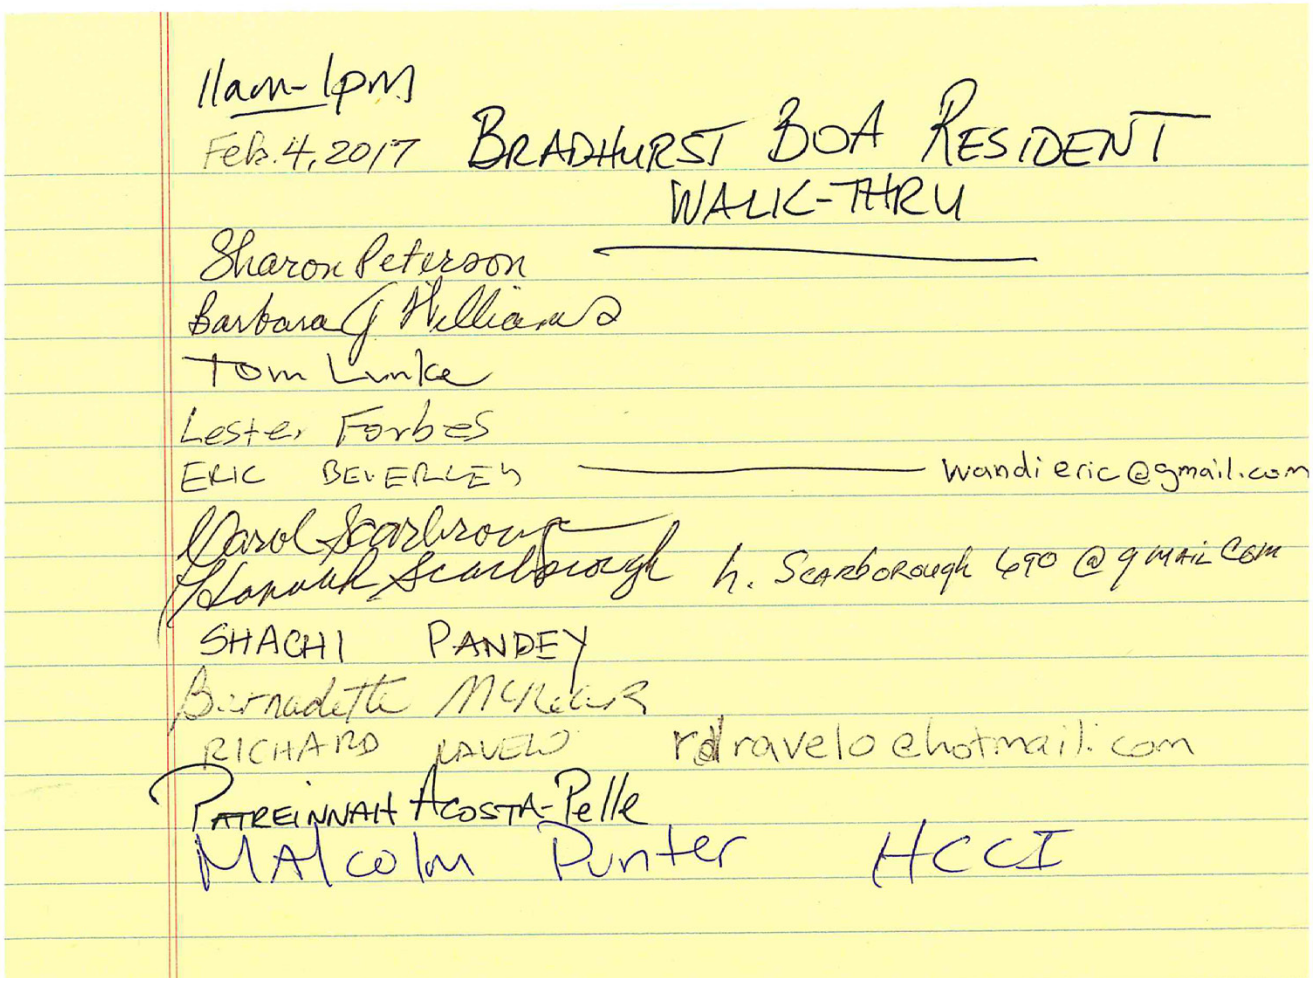
- Location advantages of this area are close proximity to the Bronx Terminal Market, Lincoln Medical Center, The Yankee Stadium, and City College.
- Goals of this project are to balance new growth and new development with what the resident community needs, plan for more youth recreational opportunities, vocational skill development and educational opportunities. Bradhurst also wants to be actively engaged in green practices such as habitat improvement, stormwater management, streetscape improvement as well as working with businesses to promote environmentally friendly business practices. An important urban design goal of the project is to create seamless and safe networks between areas within the community as well as to and from places around the community.
- As illustrated on slide number 9 of Attachment 1, there are three broad project focus areas.
- Went over the opportunities and constraints of each of the possible sites (these are preliminary since this project has only started a few weeks ago) *Note: See slides for more details*.
  - ✓ Davis Warshow Site and 155th Street Viaduct (A1 and A2)
    - Opportunities: Higher pedestrian traffic in coming years, close to subway B/D and future Madison boys and girls club. May be an opportunity to formalize a community node.
    - Constraints: Steep grade changes, zoning restrictions and height restrictions due to close proximity to historical viaduct.

A.11
SITE WALKTHROUGH WITH RESIDENT ASSOCIATION LEADERS

Presentation and Meeting
Date: February 04, 2017 @11:00AM
Sites: Polo Grounds, Rangel Houses and surrounding public spaces.

Attendees -
See below

MUD Workshop conducted a site walkthrough of NYCHA Properties with resident association leaders and community representatives from Bradhurst BOA. The site walkthrough which was held right after outreach with NYCHA and the community workshop in December 2016, helped identify maintenance and open space priorities for the resident community.



A.12
OUTREACH WITH ELDERS OF BRADHURST BOA

Presentation and Discussion
Date: April 22, 2017 @11:00AM
Venue: Dr. Muriel Petioni Plaza | 203 West 146th Street, New York, NY 10039

Attendees -
See attached

A special meeting was organized with the Elders of Bradhurst BOA to discuss the history of and opportunities for open space improvements, pedestrian connections and waterfront access. The knowledge of this group help shed light on some of the connections that were active before the construction of Harlem River Drive but are now decommissioned or eliminated making the Harlem River waterfront inaccessible for this community.

Invitation

PRIVATE OWNER ENGAGEMENT STRATEGY

BRADHURST BOA STRATEGIC SITES: Private Owner Engagement Strategy Discussion | HCCI, MUD Workshop, AKRF Inc.

ACQUISITION STRATEGY FOR HCCI

Development in the Bradhurst area has undoubtedly become more difficult. Development sites become scarcer and pressure from market rate developers has increased. It will become more challenging for HCCI to identify and implement development in the coming years. However, with its history, links within the community, and its development experience, HCCI has much to offer. Having worked with HCCI for over a year now on the Bradhurst BOA project, our team has a much better understanding of the area and HCCI's role in the community. We would like to help HCCI to position itself for additional development in the area by helping to answer a few important questions that we believe are critical for identifying new opportunities and successfully leveraging HCCI's experience and skill set.

In terms of its strategic future goals:

1. Where does HCCI see itself in the future?
    - Will it continue to act as a developer of affordable housing and other uses?
    - Will it manage existing assets and continue to focus on non-real estate program?

2. With development opportunities becoming fewer, does HCCI want to continue focusing on the same geography and uses (primarily affordable housing and mixed use development) as in the past?

In terms of the available development sites:

3. Are HCCI's priorities aligned with what the community has suggested they want to see developed in the neighborhood?

4. Does HCCI have a relationship with any of the site owners? If so, which ones?

5. With regard to HCCI's development priorities, which of the strategic sites work best in terms of physical characteristics (location, area, zoning etc.)?

6. Does HCCI have partners in mind for specific sites? If so, which sites are these?

7. Can existing development contacts be leveraged for development on any of the strategic sites shortlisted in Bradhurst?

On the sites for which HCCI does not have a contact or relationship, HCCI may want to start reaching out to owners. However, this process needs to be coordinated and thought through, and the outreach approach needs to be cautious and informative. Our recommendation would be that before reaching out to private property owners, HCCI defines what they can offer, what their limitations are, and how they can add value for the owner and / or to the development process. We recommend that HCCI comment on and think through some of the following potential approaches:

8. With deals becoming more competitive, what kind of (partnership) agreements is HCCI willing to support (e.g., only majority partner, junior partner, facilitator)?

9. What do you think are HCCI's core strengths / competitive advantage? When seeking out deals with owners and partners that are not from the neighborhood or are not familiar with HCCI's activities, which characteristics would you say can add value to the deal?

Once HCCI has developed its value-added position and decided to reach out to individual owners;

10. Who at the organization can / will support the effort? This will be a process to establish relationships and will require a person dedicated to follow up with and maintain connections.

11. Once initial relationships are developed, HCCI can tap into the network to reach a larger community of site owners.

1/ Project Team
2/ Neighborhood Snapshot and Revitalization Goals
3/ Project Scope and Focus
4/ Key Project Milestones and Next Steps

1/ PROJECT TEAM

* Harlem Community Development Corporation

Project Funded by the Brownfield Opportunity Area Program of the NYS Department of State

2/

Neighborhood Snapshot and Revitalization Goals

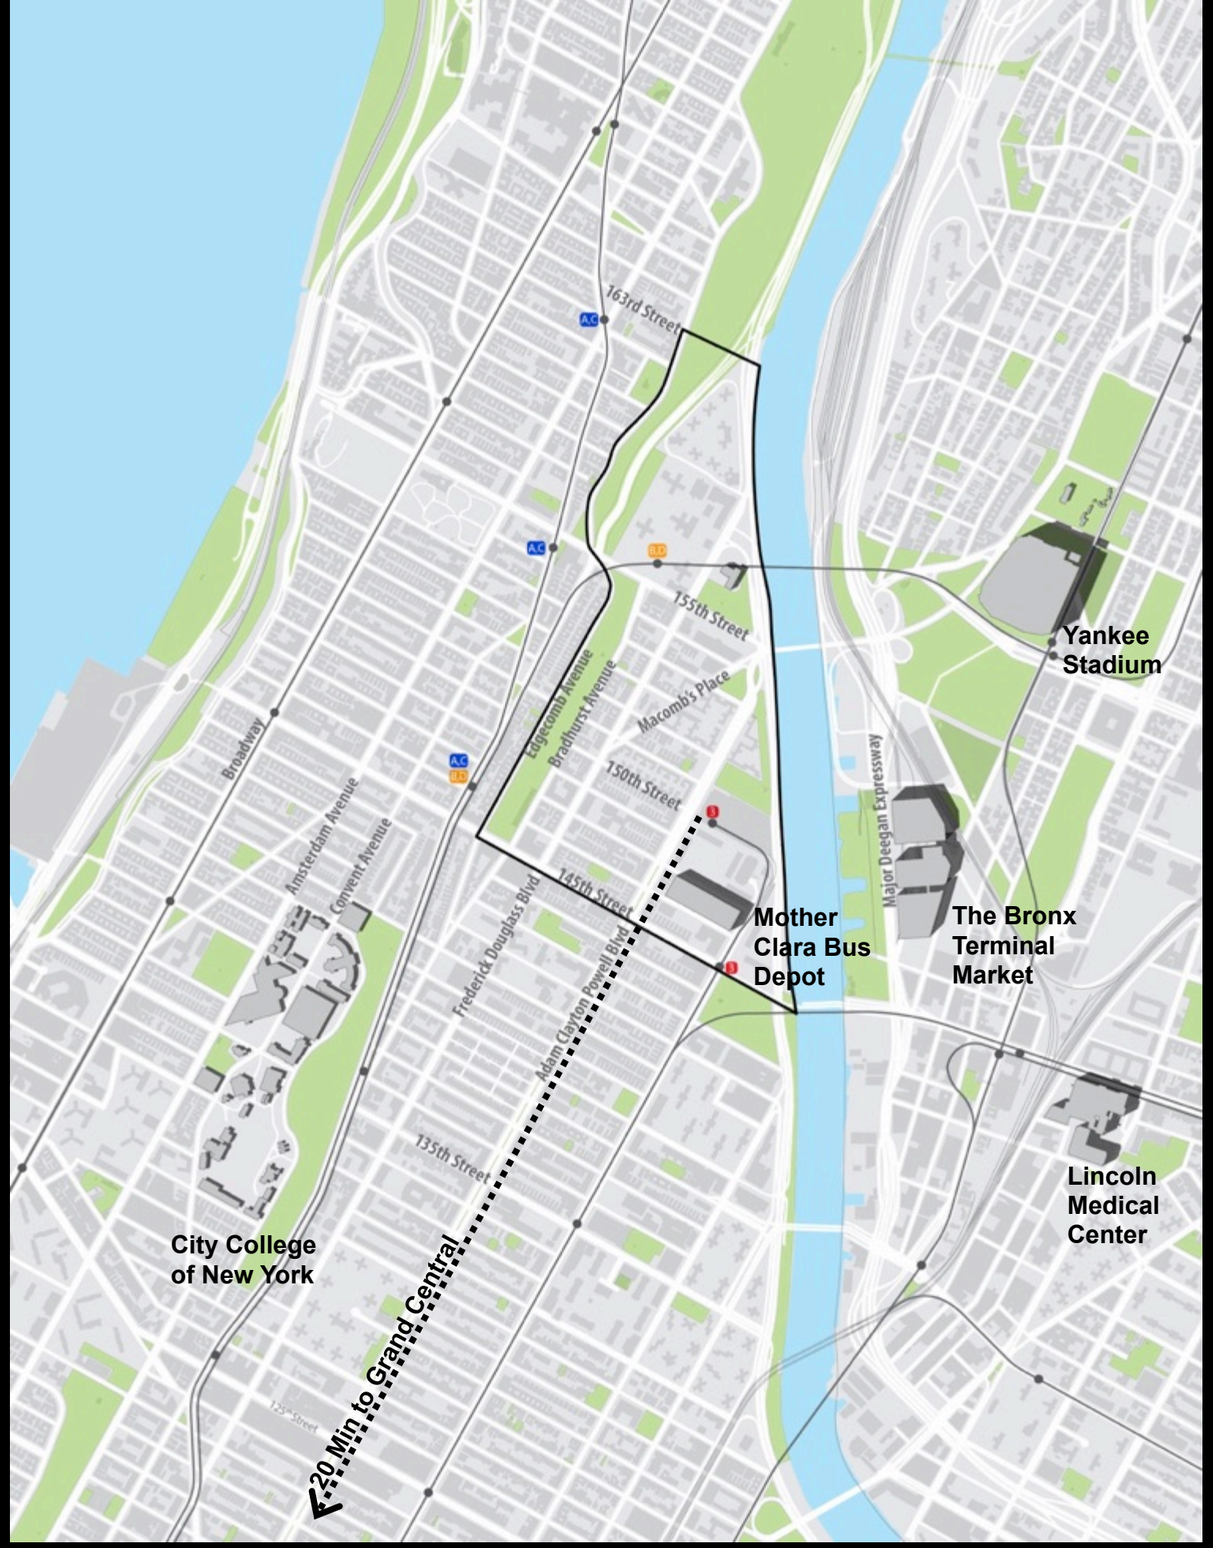
RECENT TRENDS

The BOA has a “quiet, small-town feel”, convenient Manhattan location and great access to public transportation, all of which have been attracting significant retail and residential development

1. Residential Growth
   - 800+ new residential units since 2004

2. Commercial Growth
   - Influx of high quality retail tenants primarily on 145th Street, e.g., NY Sports Club, Duane Reade

3. Major public investments
   - Maintain accessibility and retain jobs



Project Funded by the Brownfield Opportunity Area Program of the NYS Department of State

THE BOA COMMUNITY

STRONG POPULATION GROWTH

2010 : 24,200 persons
2015 : 25,600
2020 : 26,900 projected

- Vibrant community with a built-in demand
- Need for more housing

YOUNG DEMOGRAPHIC

- Bradhurst BOA : 22%
- New York City : 18%
- Upper Manhattan : 16%

- High % of productive population in coming years
- Urgent need to create youth recreational and educational opportunities

HIGH UNEMPLOYMENT and LOW MEDIAN INCOME

- BOA Unemployment : 17% (NYC: 7.5%)
- BOA Median Income : $ 28,600 (NYC: $ 51,750)
- Income Growth Rate : 3.8% (NYC: 3.2%)

- Need for skill development and business development opportunities
- Employment generating uses

Project Funded by the Brownfield Opportunity Area Program of the NYS Department of State

REVITALIZATION GOALS

Community and Economic Development

- Create employment, job training and youth recreational/educational opportunities for the local community;
- Work with Bradhurst area businesses, the City and state to develop environmentally friendly business practices; and
- Assess business needs and need for services to best implement a diverse mix of land uses.

Urban Design

- Create appropriate waterfront access, shoreline and habitat restoration and recreational use opportunities;
- Create a set of Harlem urban design principles for the Bradhurst Area that improve physical connections in the neighborhood and make it more walkable, accessible and integrated; and
- Reinvigorate the area under the 155th Street viaduct and develop it into a community focal point.

3/

Project Scope and Focus Area

PROJECT SCOPE AND FOCUS

Area A

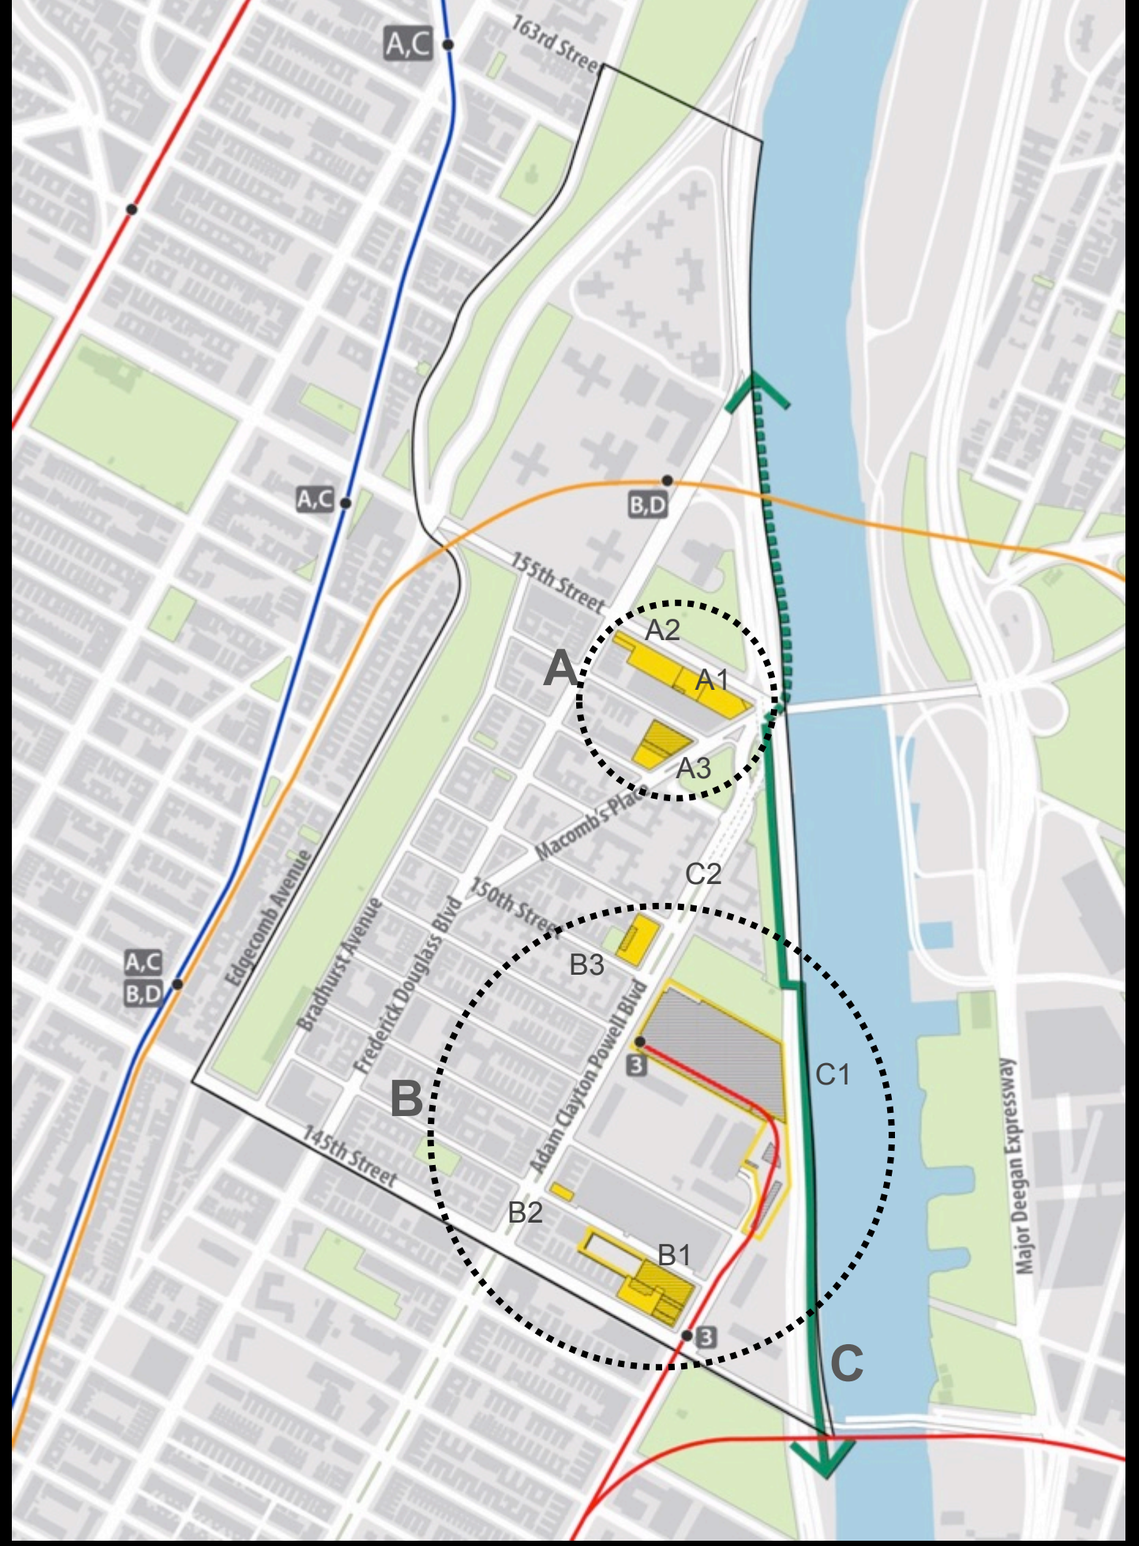
A1. Davis Warshow / Western Beef Site
A2. 155th Street Viaduct
A3. Post Office Site

Area B

B1. 145th Street Site
B2. City owned staging area
B3. Harlem Soft Touch Car Wash Site

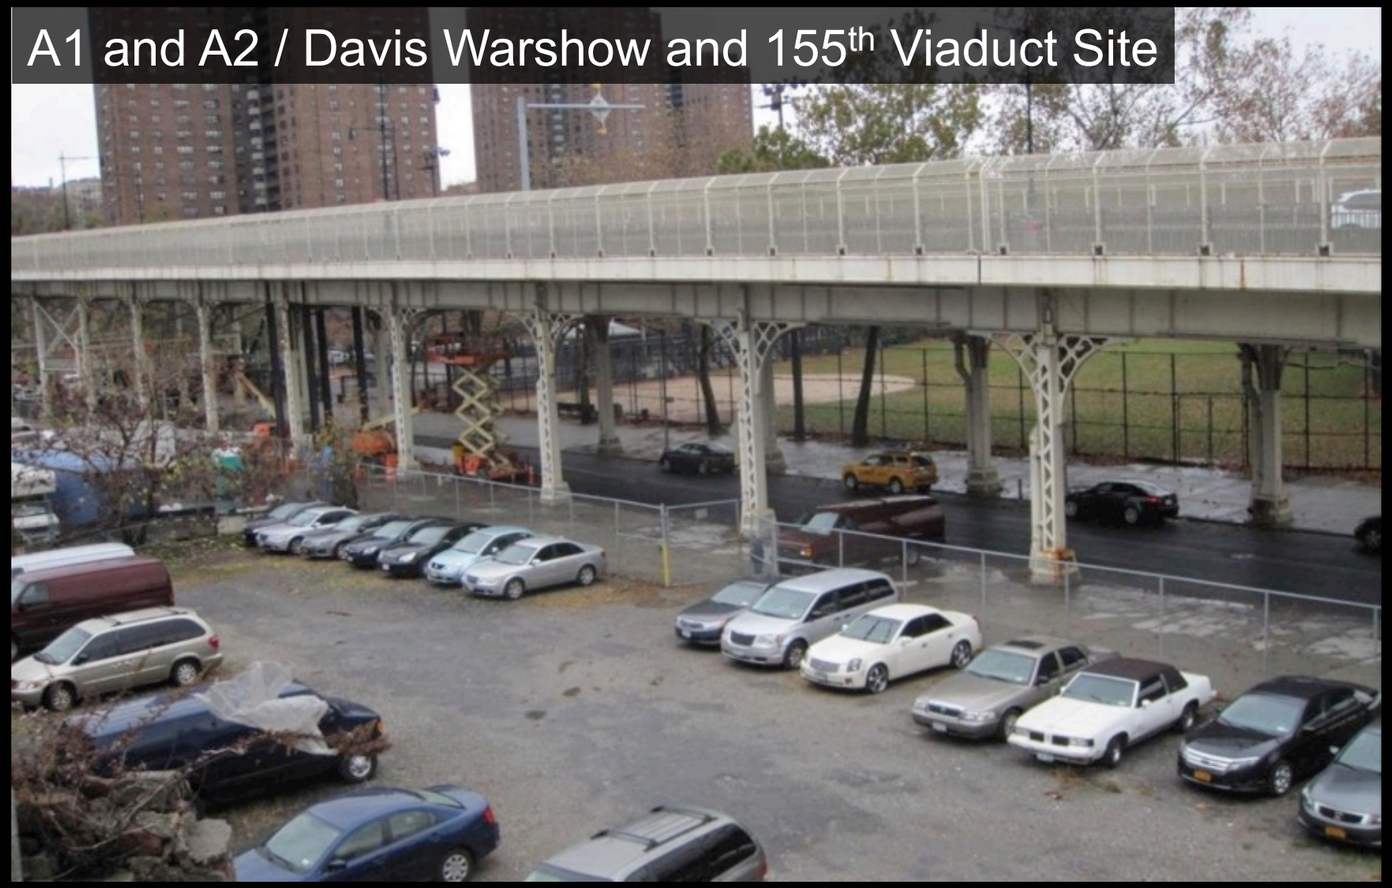
Area C

C1. Continuity and Public Access along Harlem River
C2. Upland Connections e.g. Adam Clayton Powell Pedestrian connections



Project Funded by the Brownfield Opportunity Area Program of the NYS Department of State

A1 and A2 / Davis Warshow and 155th Viaduct Site

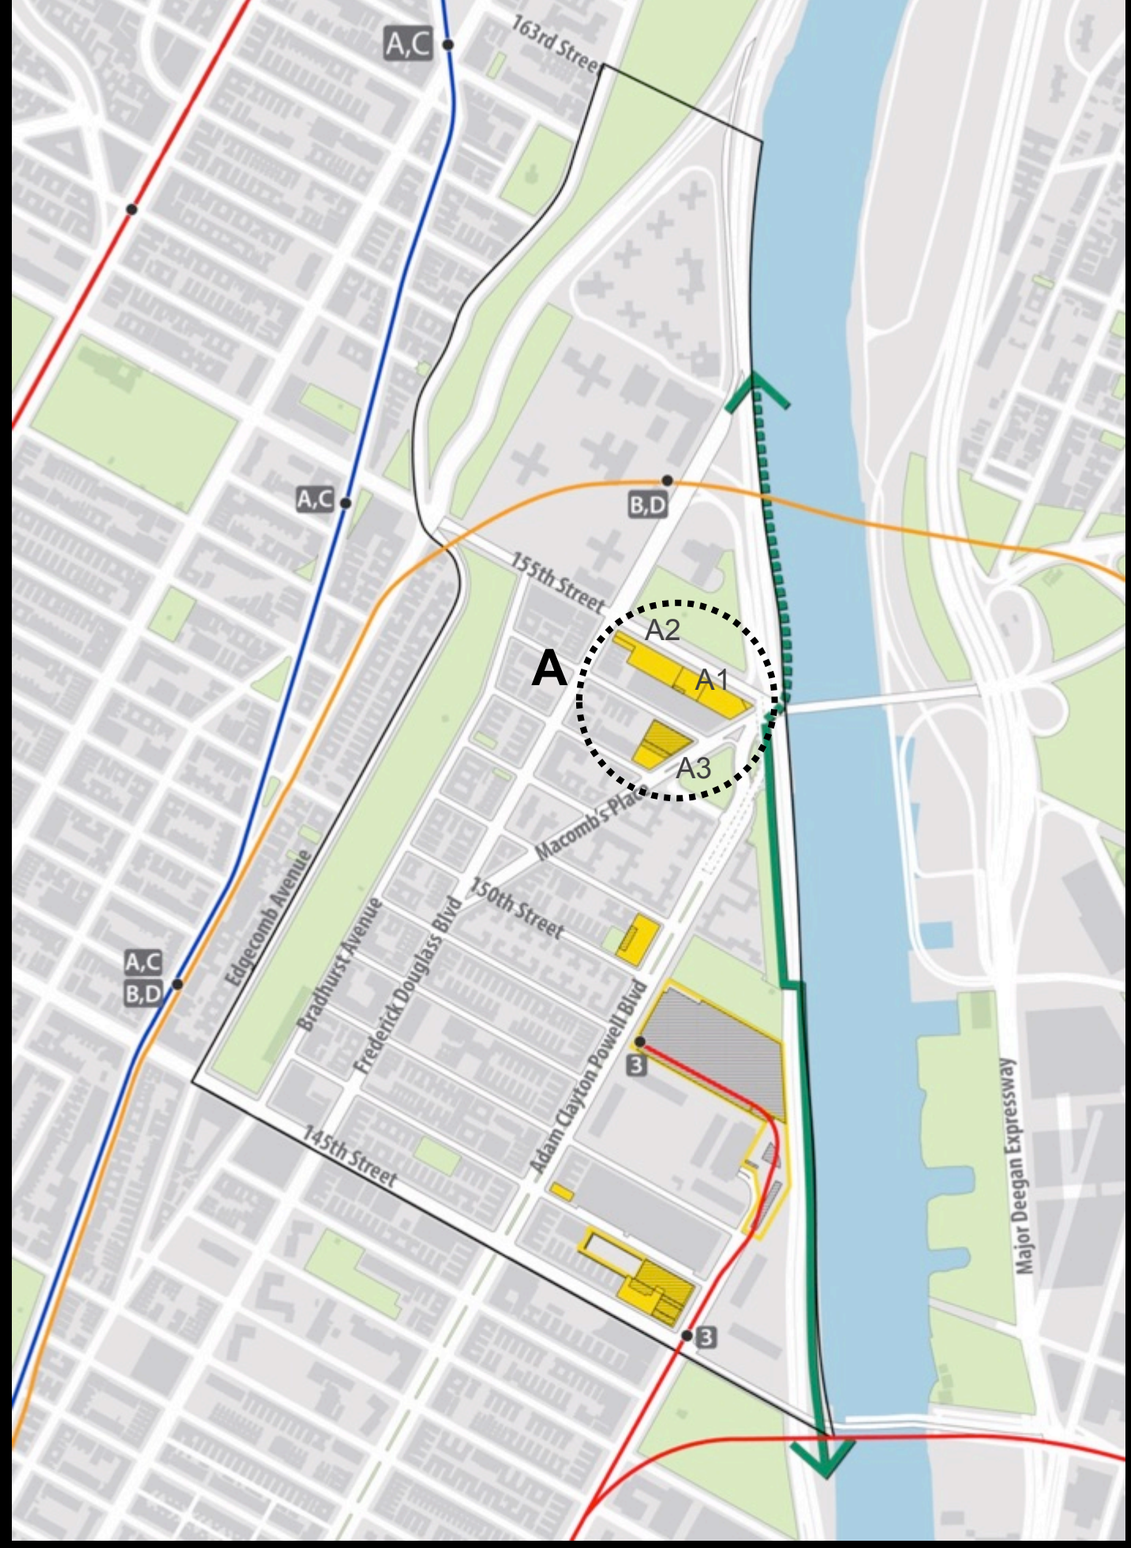


Opportunity

- To strengthen an emerging community node ; close proximity to B / D subway line, Rucker Park, future Madison Square boys and girls club
- To activate area under 155th Street Viaduct ; attract community-based uses

Constraints

- Steep grade changes
- Height limitations and shading considerations



Project Funded by the Brownfield Opportunity Area Program of the NYS Department of State

A3 / Post Office Site

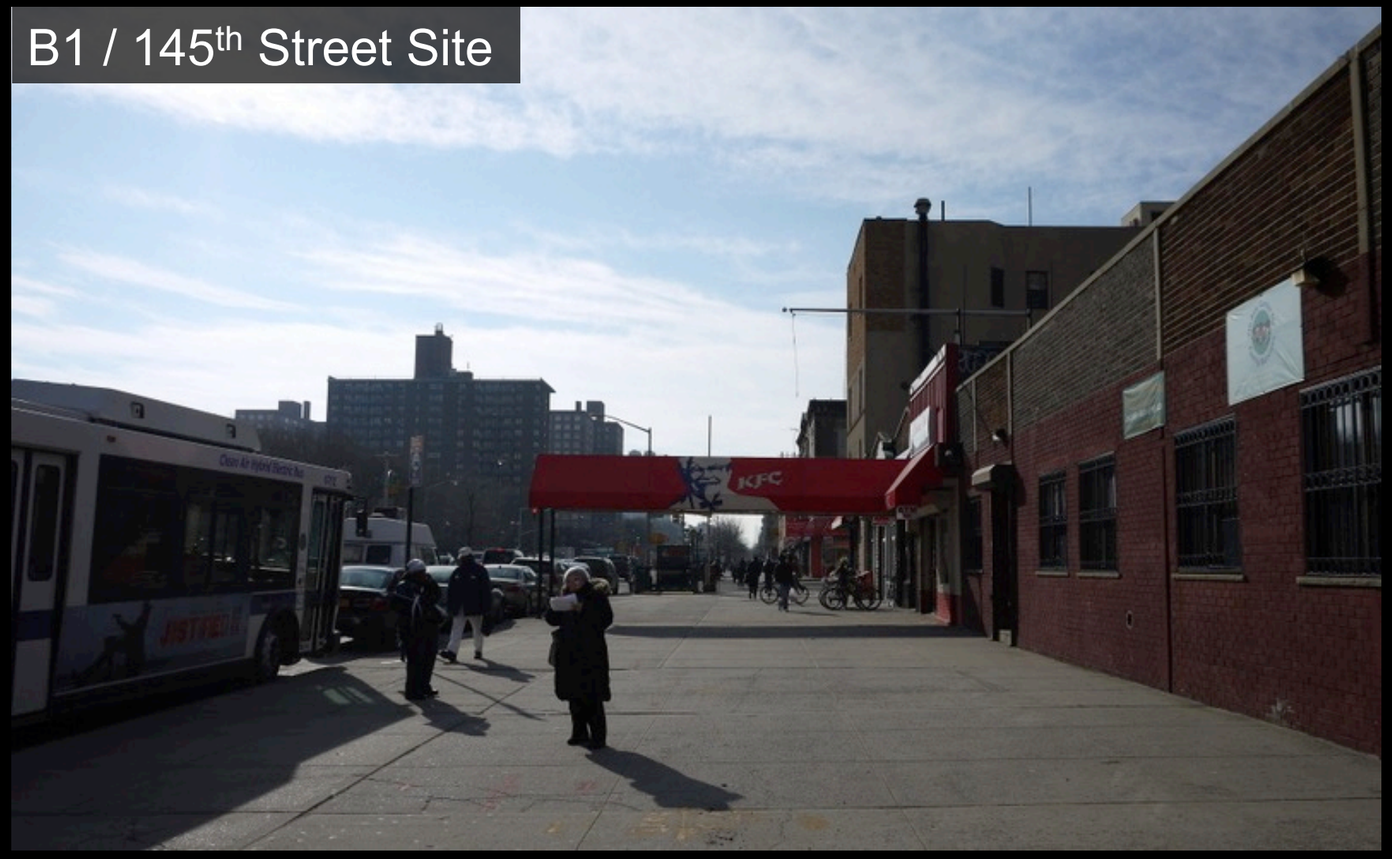
Opportunity

- To create an iconic gateway into Bradhurst ; corner location near Macombs Dam Br., views of Harlem River
- To strengthen public realm networks ; proximity to waterfront and Colonel Charles Young Triangle

Constraints

- Traffic, pedestrian and bike safety ; 15 injuries this year

B1 / 145th Street Site

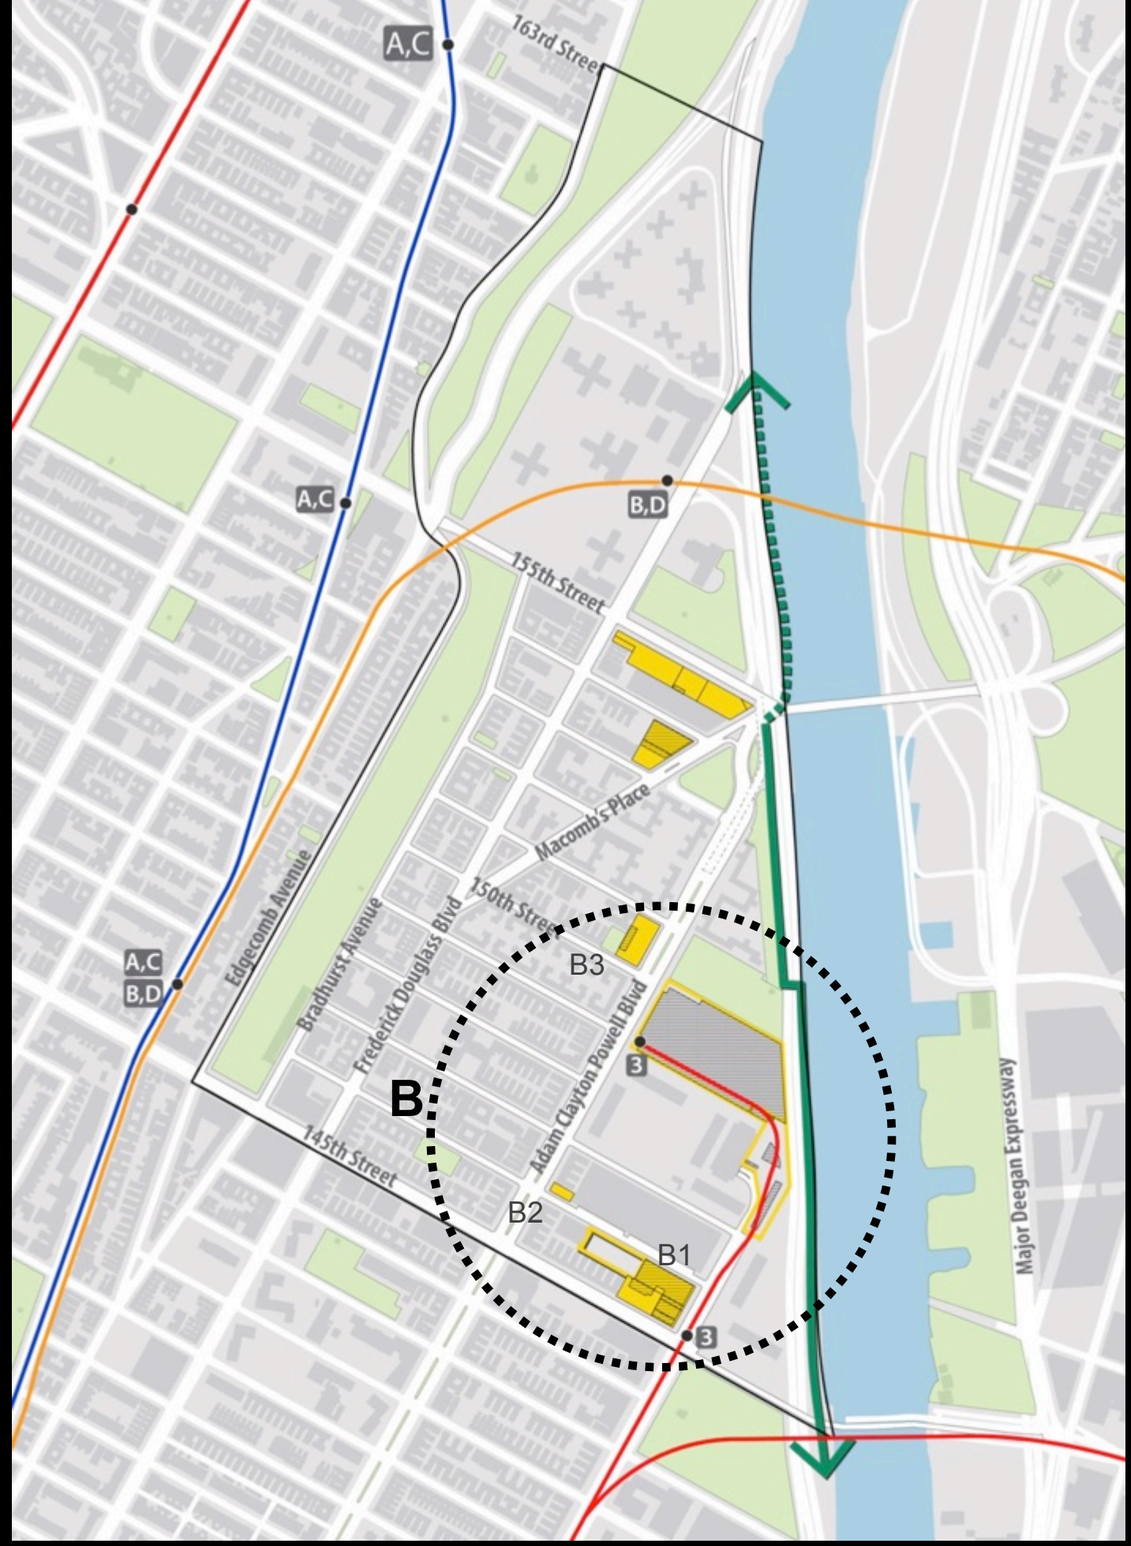


Opportunity

- To strengthen emerging commercial corridor ; demand for hotel, office, residential and retail space
- To connect 145th Street Corridor with transportation hub ; Mother Clara Bus Depot, Lenox Terminal and waterfront

Constraints

- Multiple lots and private owners; future dev. unknown



Project Funded by the Brownfield Opportunity Area Program of the NYS Department of State

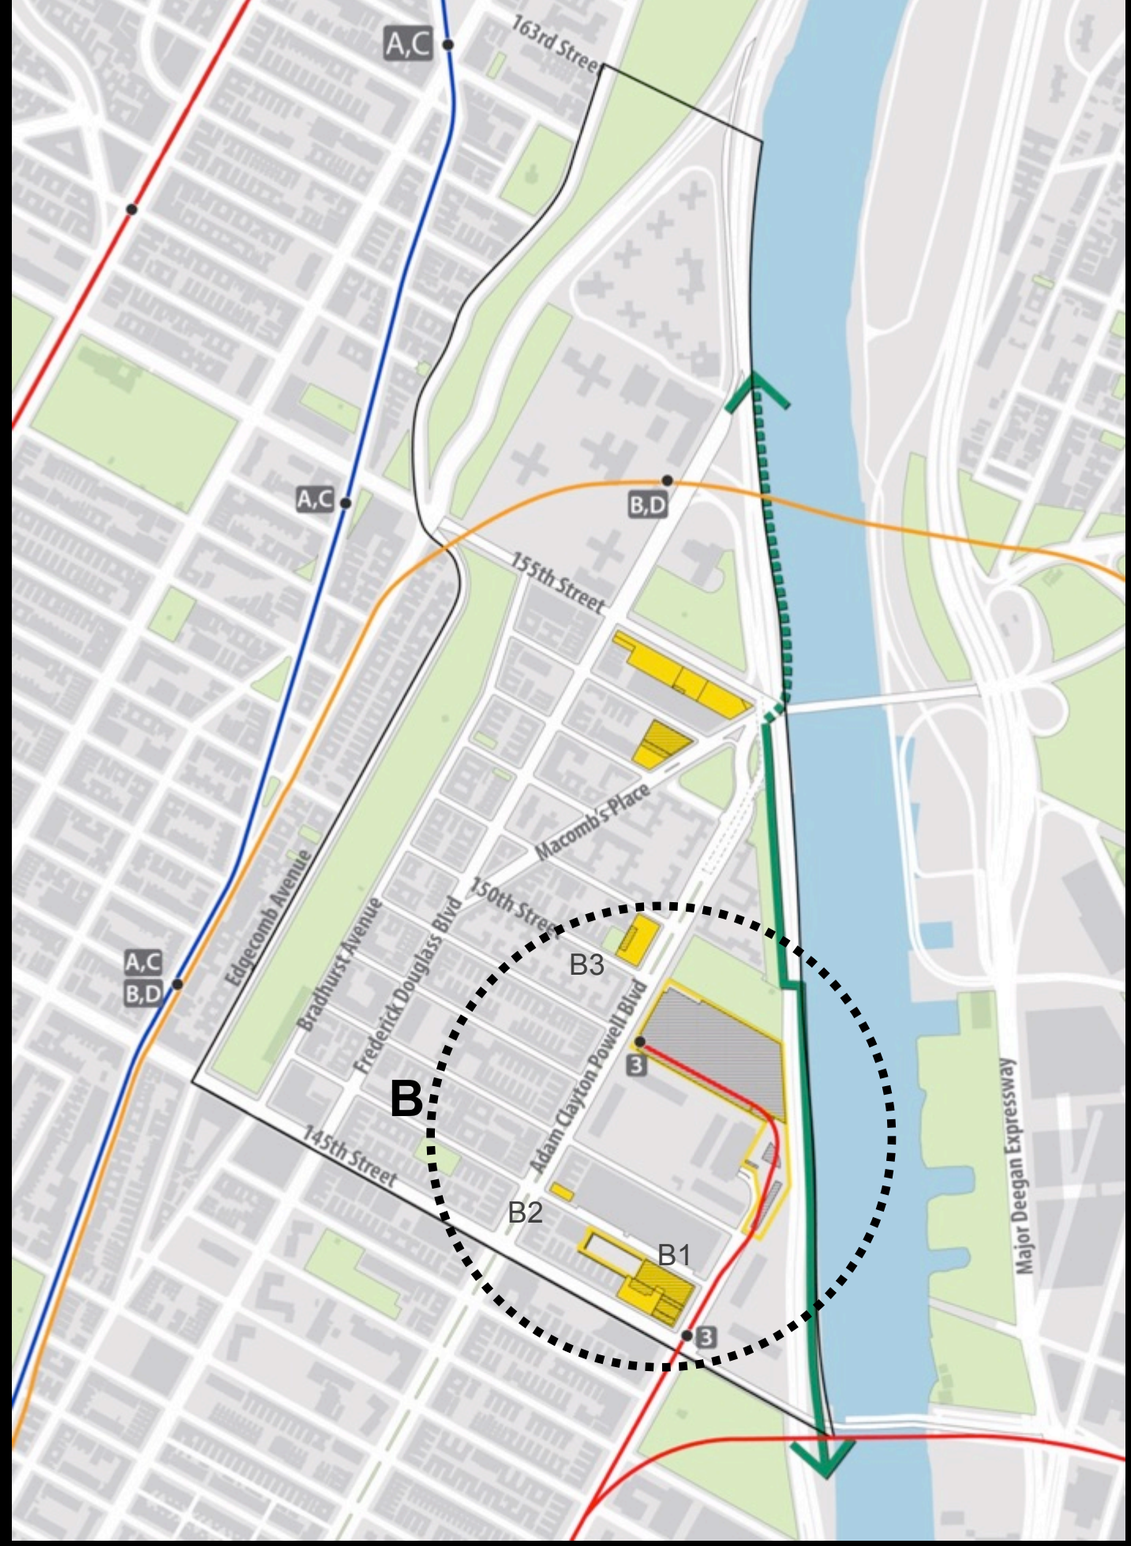
B2 / City Owned Lot

Opportunity

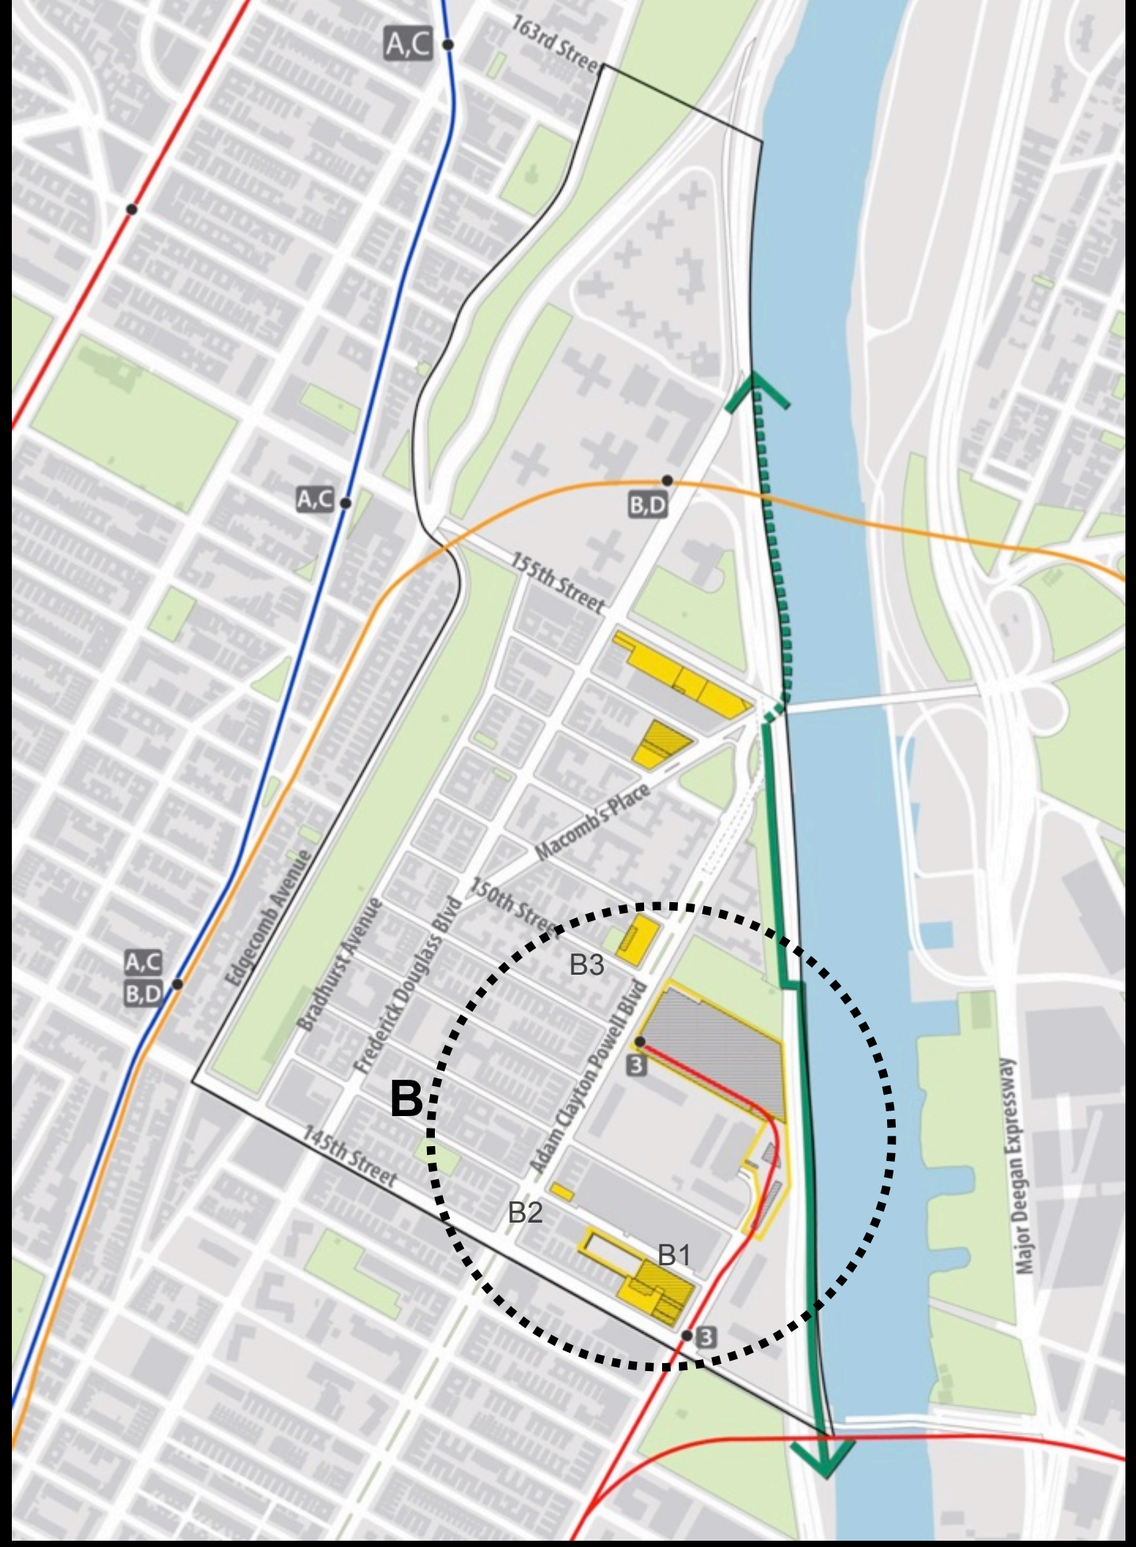
- To work with public agencies and develop community centric uses ; educational opportunity or a DMV remote location

Constraints

- Small lot size that limits total development area



B3 / Car Wash Site



Opportunity

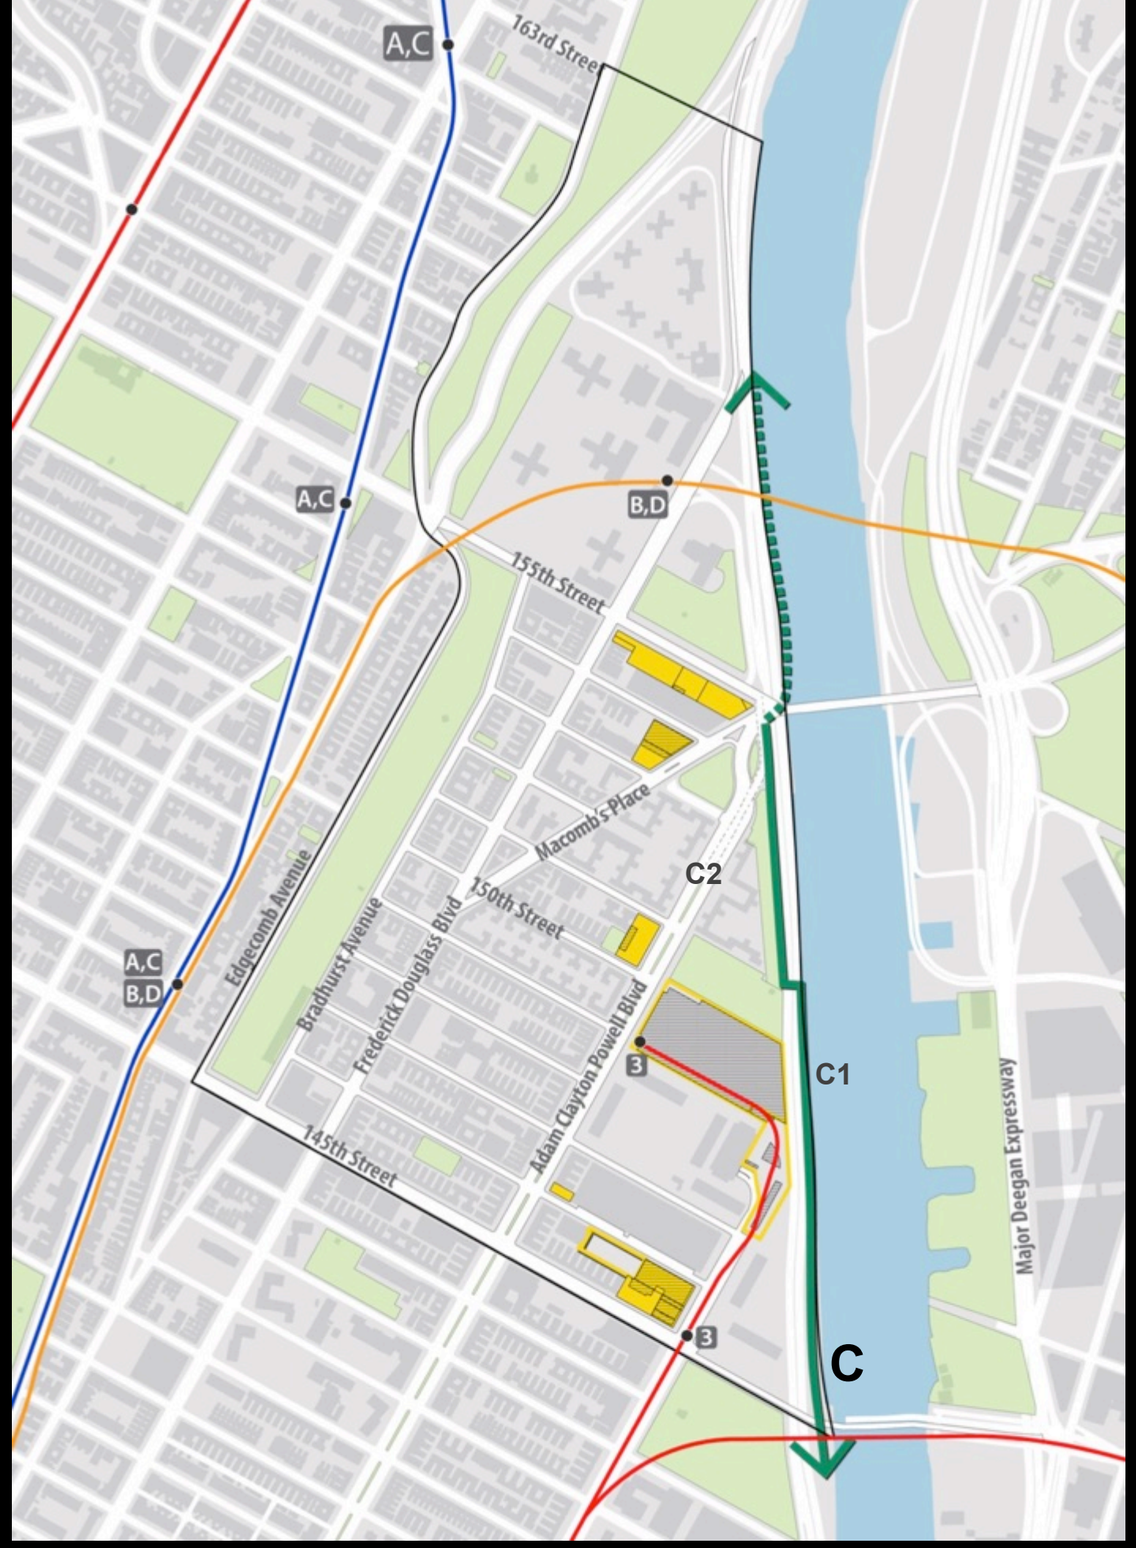
- To strengthen public realm and create safe pedestrian movement ; proximity to Frederick Johnson Park, 3 subway line and PS 200

- To develop uses synergistic with neighboring community amenities

Constraints

- Unknown contamination issues

C1 and C2 / Continuity and Public Access along Harlem Rvr



Opportunity

- To create public access and pedestrian continuity along waterfront ; Harlem River Park, Frederick Johnson Park
- To program waterfront with community based activities ; natural habitat, storm water management, active recreation

Constraints

- Topography
- Fenced off areas and public safety issues

Project Funded by the Brownfield Opportunity Area Program of the NYS Department of State

C1 and C2 / Continuity and Public Access along Harlem Rvr

Broken or missing pedestrian connections in the Bradhurst Neighborhood

Adam Clayton Powell Jr. Boulevard looking towards south

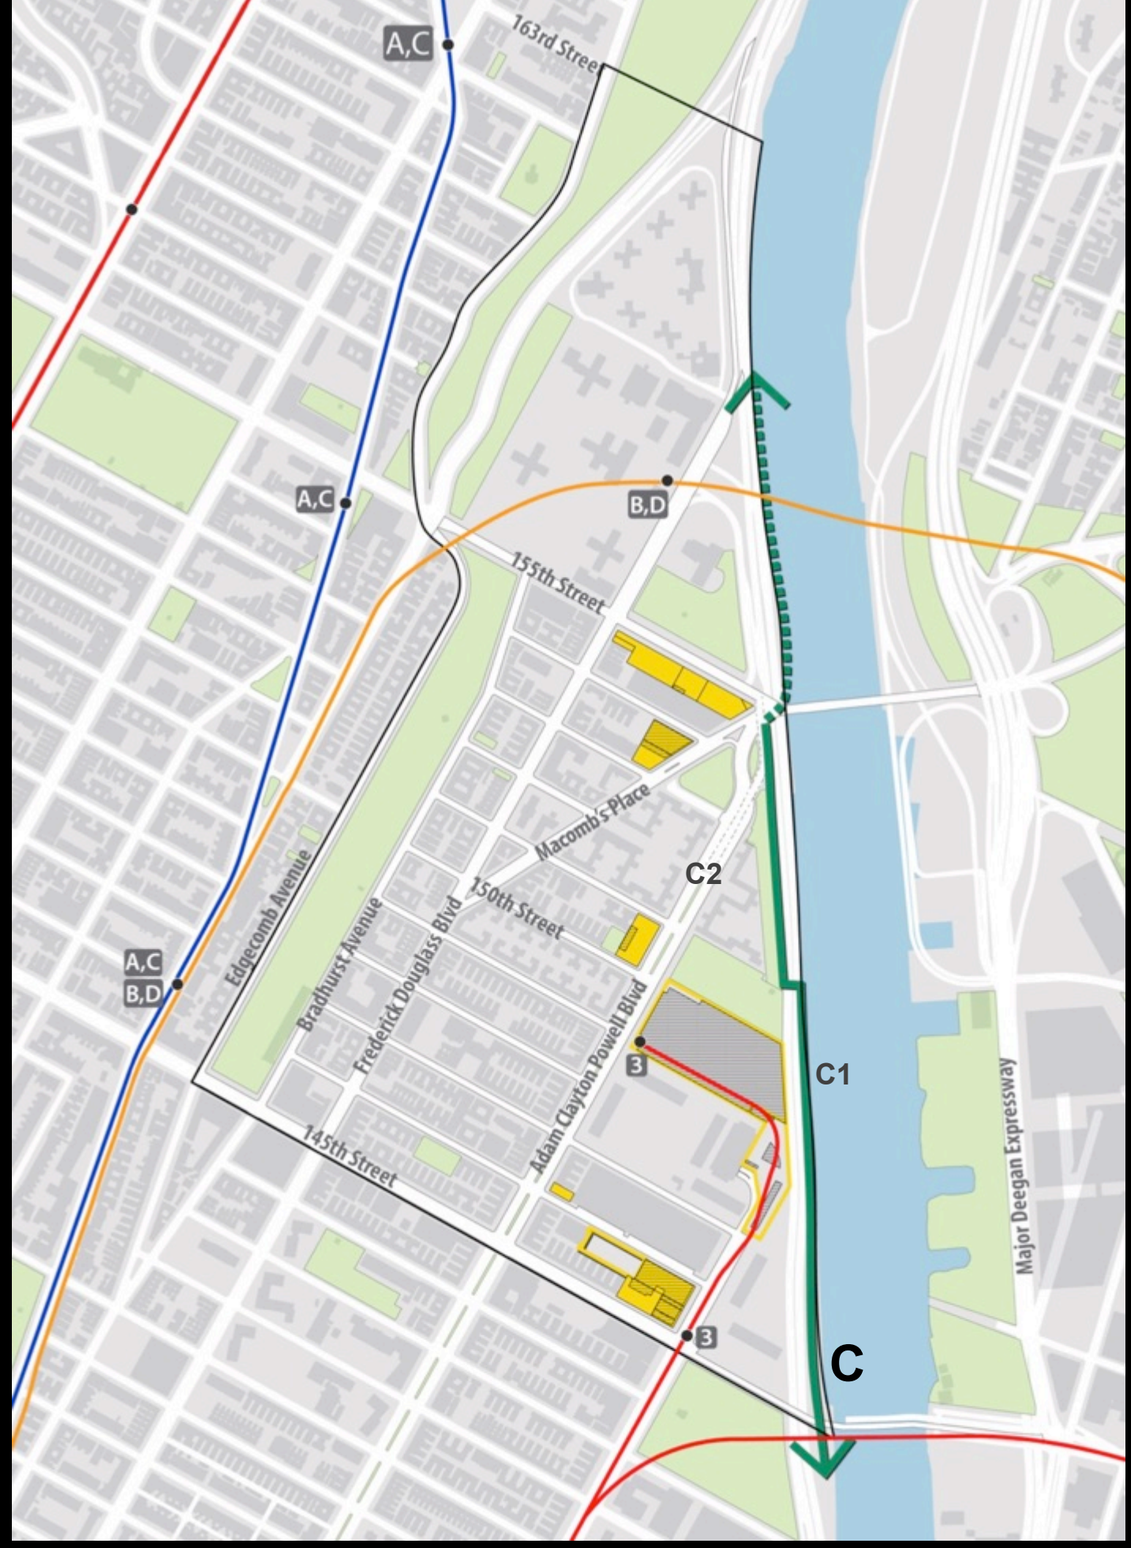
Adam Clayton Powell Jr. Boulevard looking north towards 155th Street Viaduct

Opportunity

- To thread Bradhurst's public realm into a walkable network ; waterfront, parks, street connectors

Constraints

- Topography
- Fenced off areas and public safety issues



Project Funded by the Brownfield Opportunity Area Program of the NYS Department of State

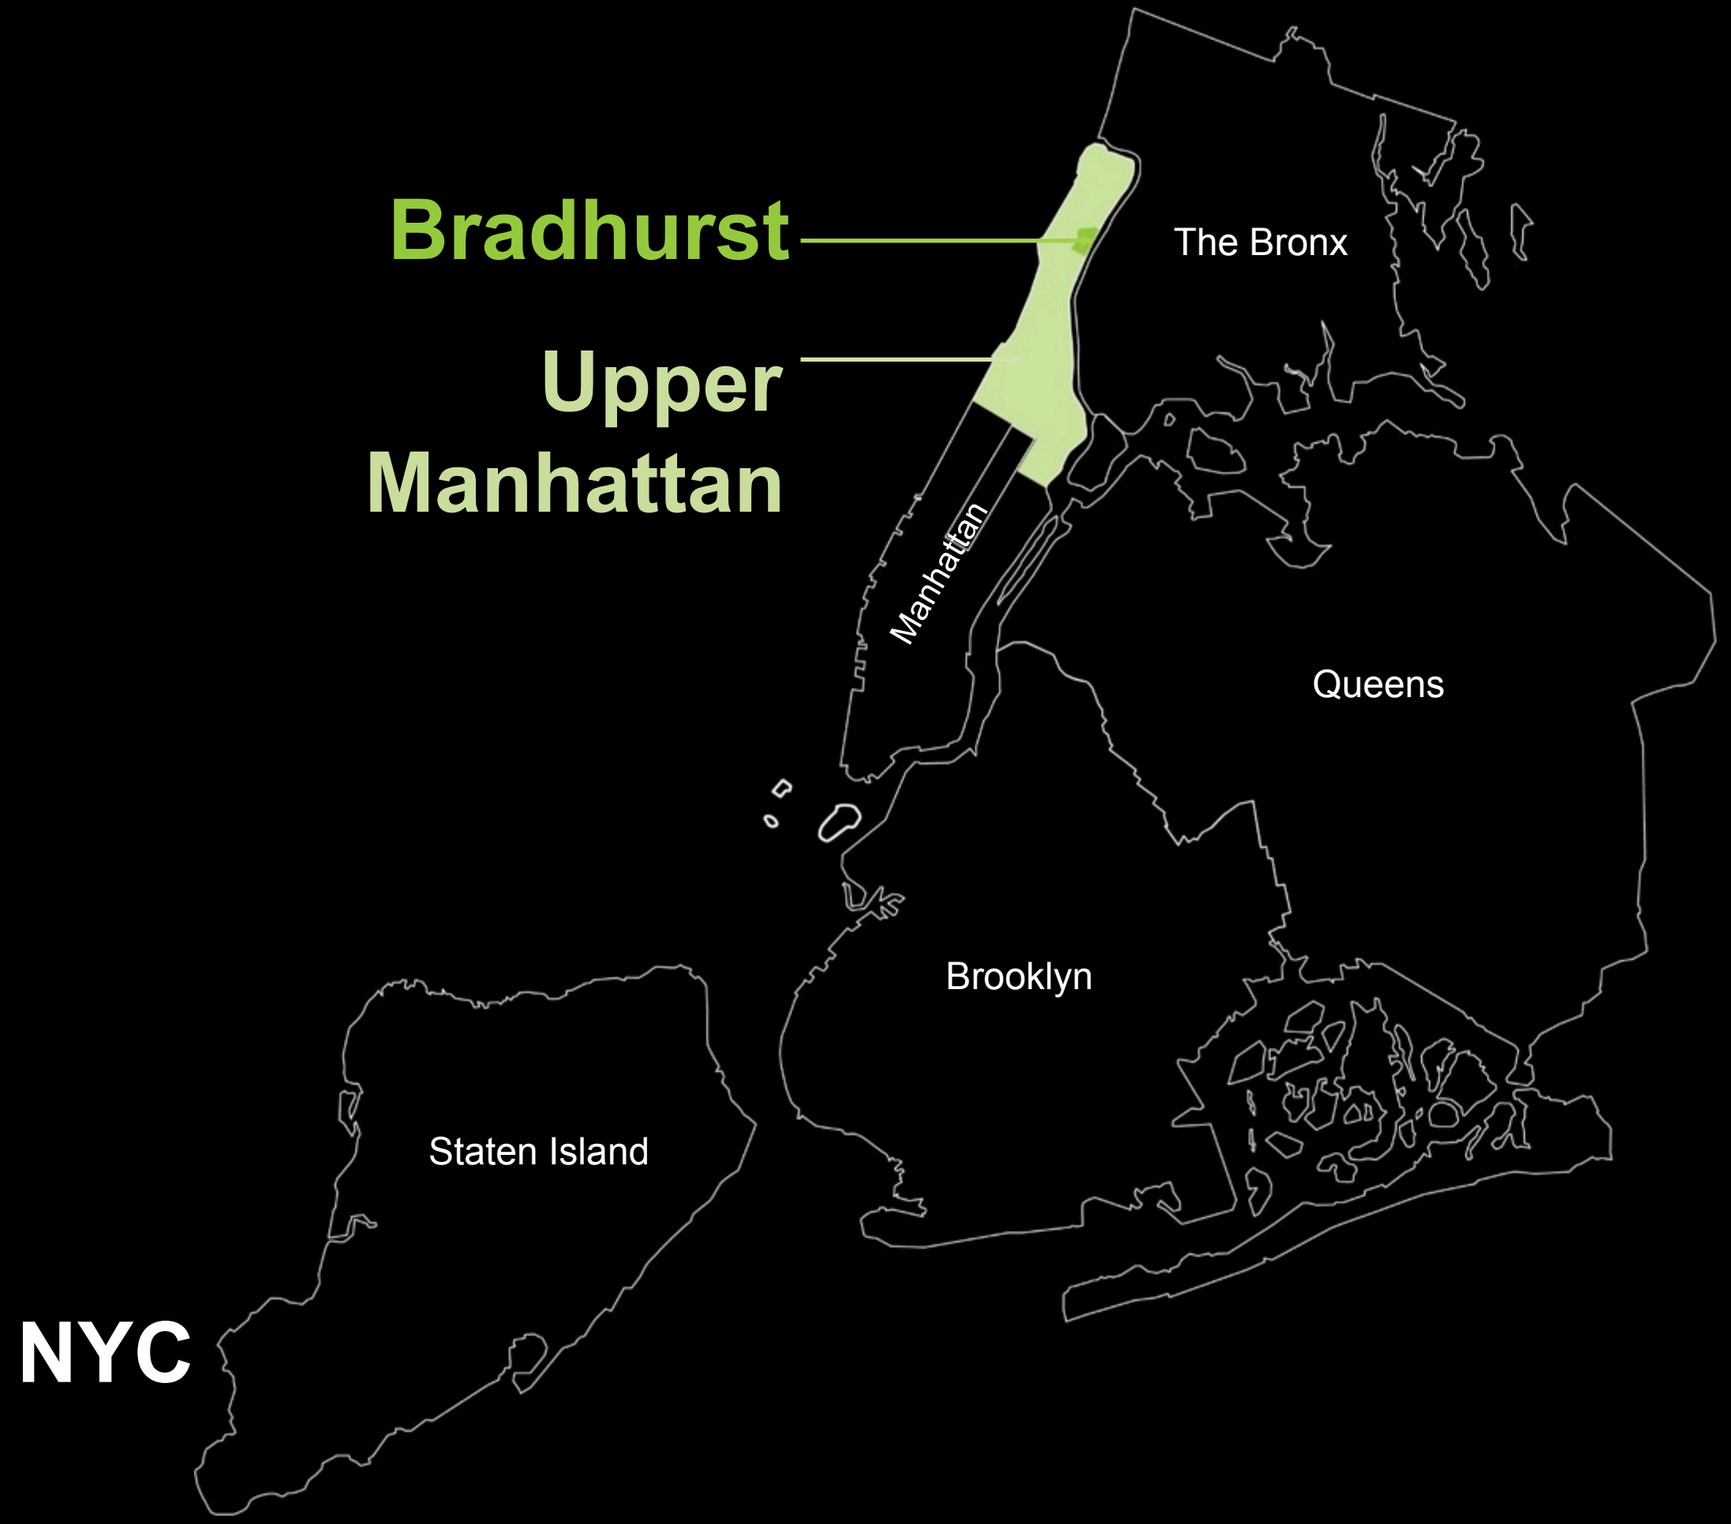
2/

Existing Conditions and Analysis

Socio-economic and real estate market

Geographies for Socio-Economic Comparison



Urban Environment

Population Growth

Strong growth in the Bradhurst BOA with increased demand for neighborhood goods and services

- Currently, there are approximately 25,600 residents living in the Bradhurst BOA.
- The area is one of the fastest growing neighborhood in NYC
- Additional residents will create additional demand for already limited neighborhood goods and services.
- Additional residents will also increase demand for educational, recreational and health related uses (and facilities) in the area.

Household Size

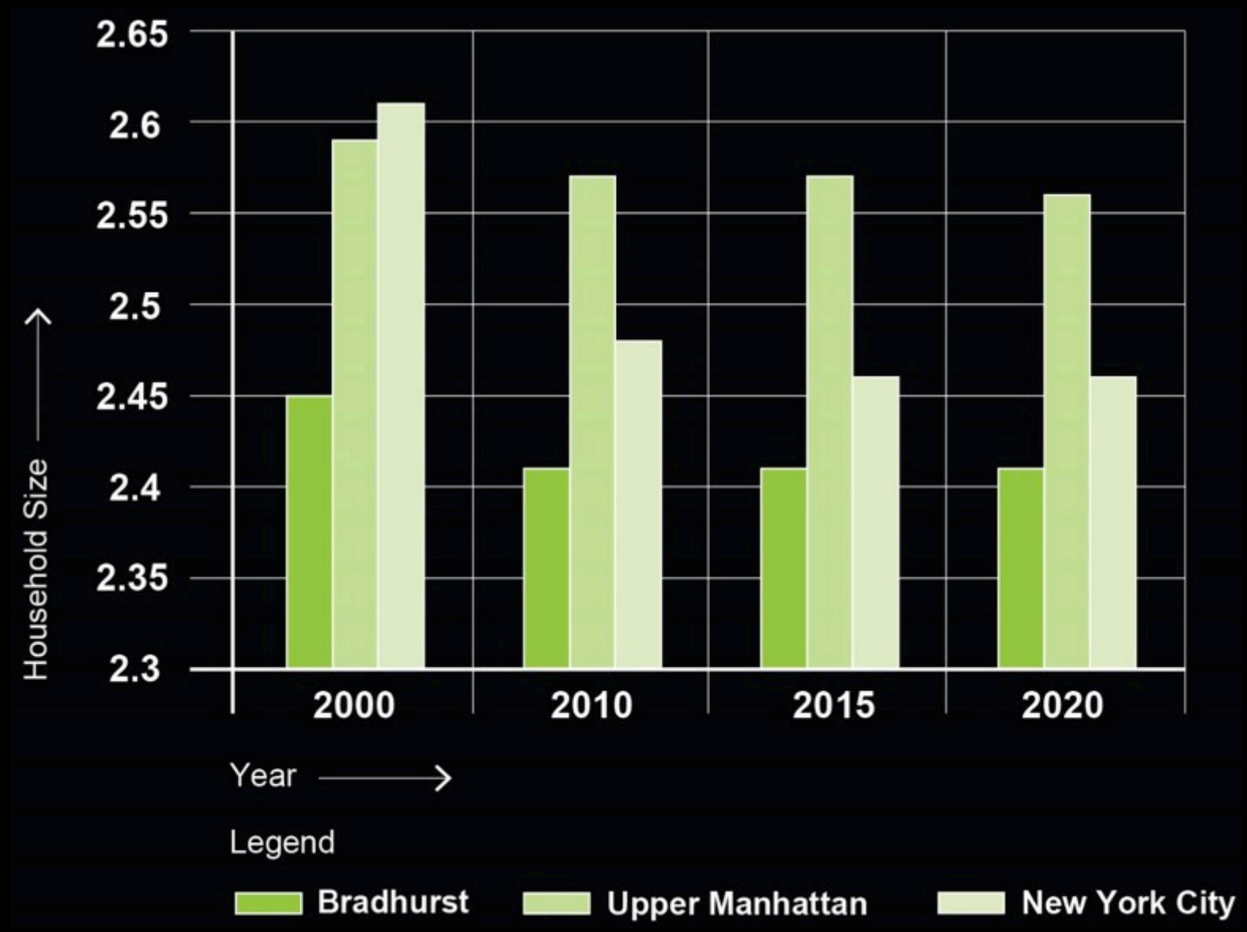
There were 10,550 households in Bradhurst BOA in 2015, with an annual growth rate of 1%

- A significantly smaller household size in the Bradhurst BOA indicates strong demand for one- and two bedroom units.

- And while families tend to be smaller when compared to NYC and Upper Manhattan, the average family household requires a large two- or three bedroom apartment.

Average Family Size 2015

Geography	Avg. Size
Bradhurst BOA	3.13
Upper Manhattan	3.26
New York City	3.32



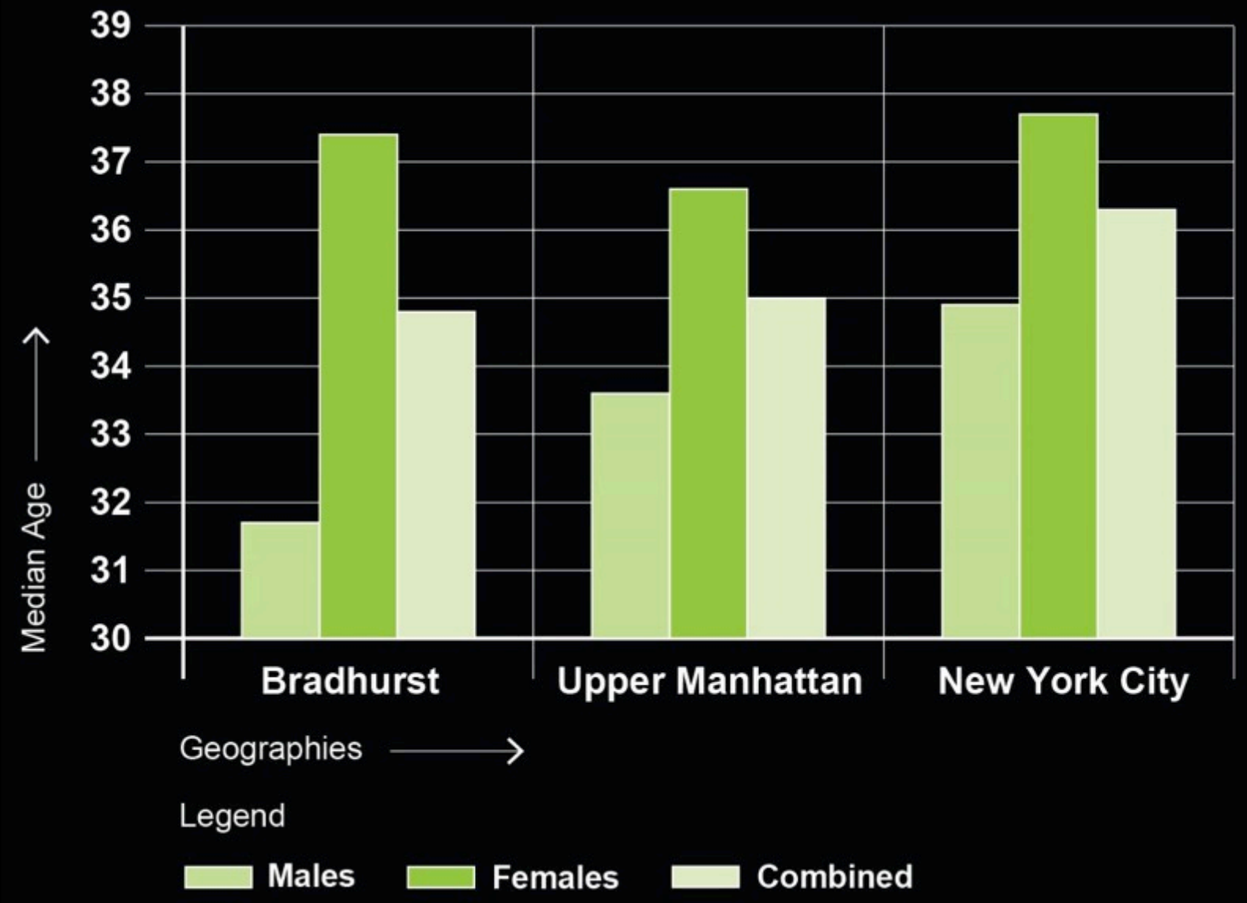
Age Trends – Median Age

When compared to the reference geographies, the median age of men in the Bradhurst BOA is significantly lower

1. Bradhurst BOA's overall median age is similar to the other geographies.

2. However, the median age of men is more than 6 years lower than that of women. A lower median age indicates that older male cohorts are missing from the population and are under represented in the 50+ age categories

3. One reason why these cohorts are missing could be that lacking employment opportunities causes men to leave the area.



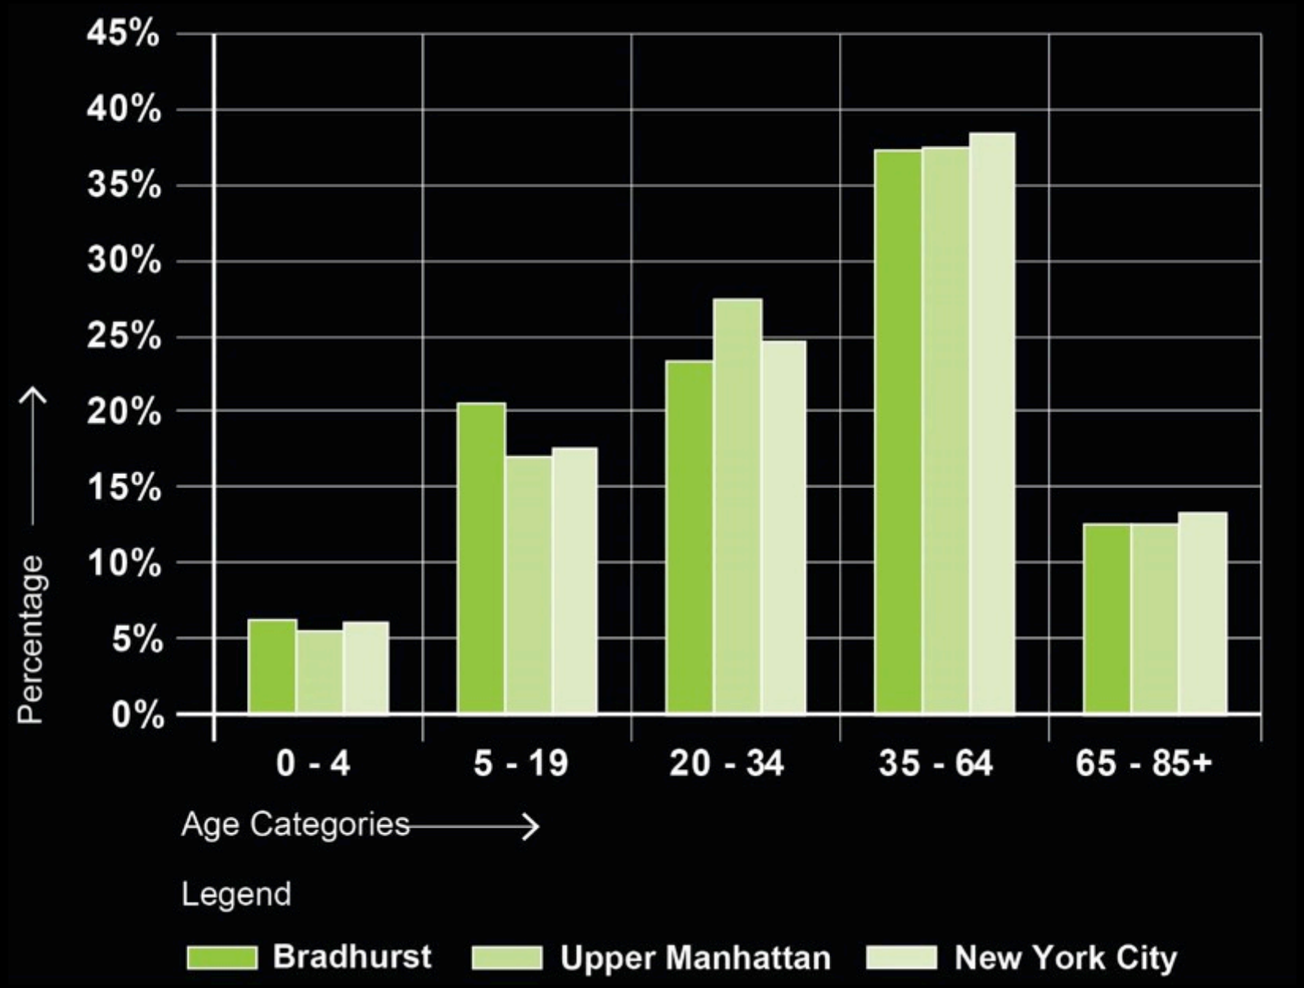
Age Trends – Age Cohorts

The Bradhurst BOA has a noticeably larger share of school age children

1. Bradhurst has a much larger share of school age children (residents between ages 5 – 19) than the other geographies.

2. The share of this age group is approximately 3 percentage points (or 23 percent) larger than in the other referenced geographies.

3. This extraordinarily share of school age children requires a much stronger emphasis on school and after school programs than in other neighborhoods.

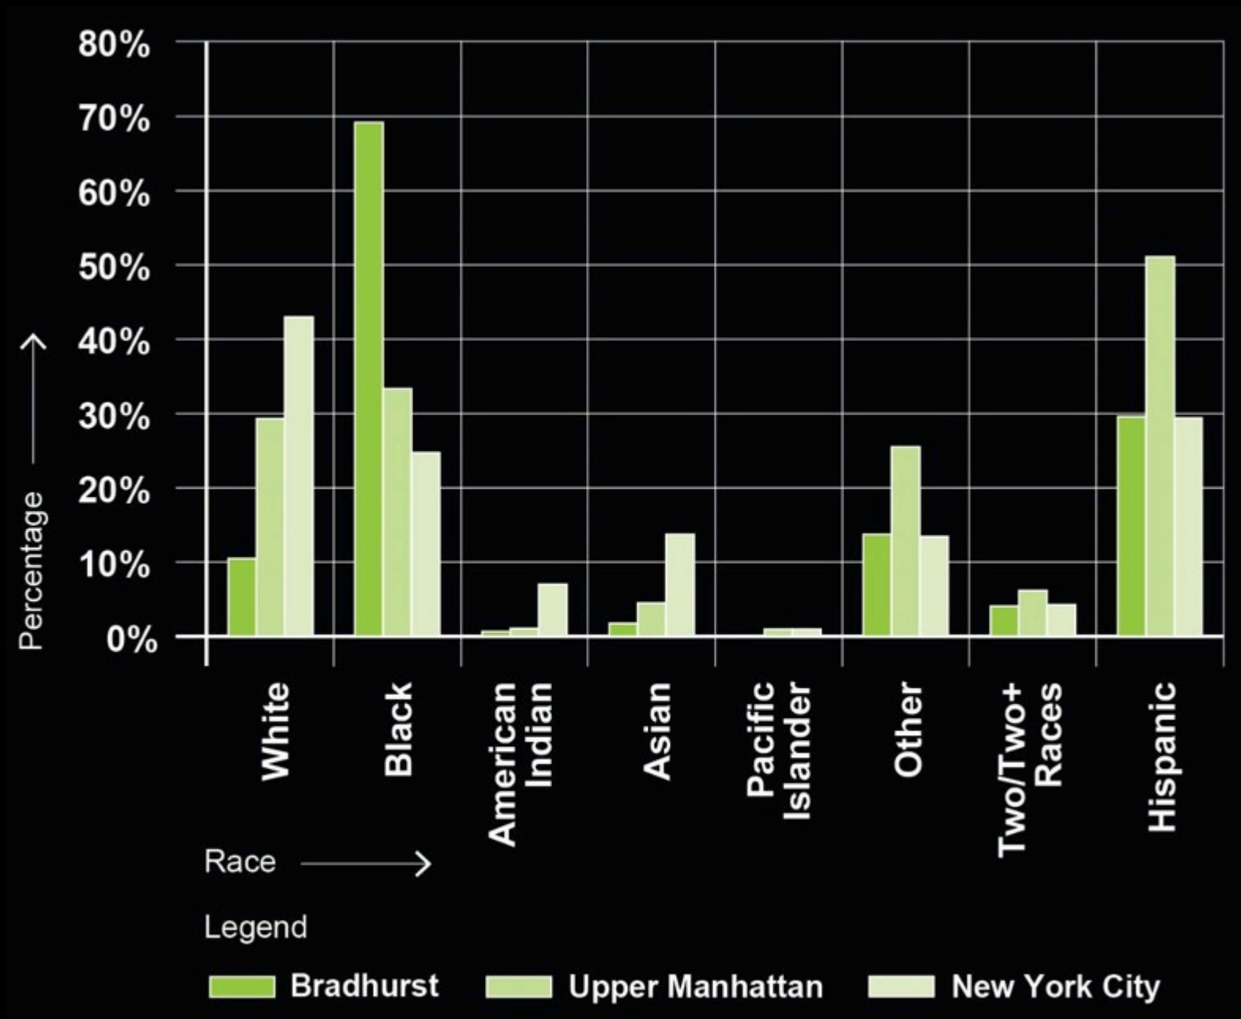


Race Trends

The neighborhood of Bradhurst has maintained its neighborhood identity

1. The racial composition has remained fairly stable over the last few decades and is likely to remain the same in the coming years

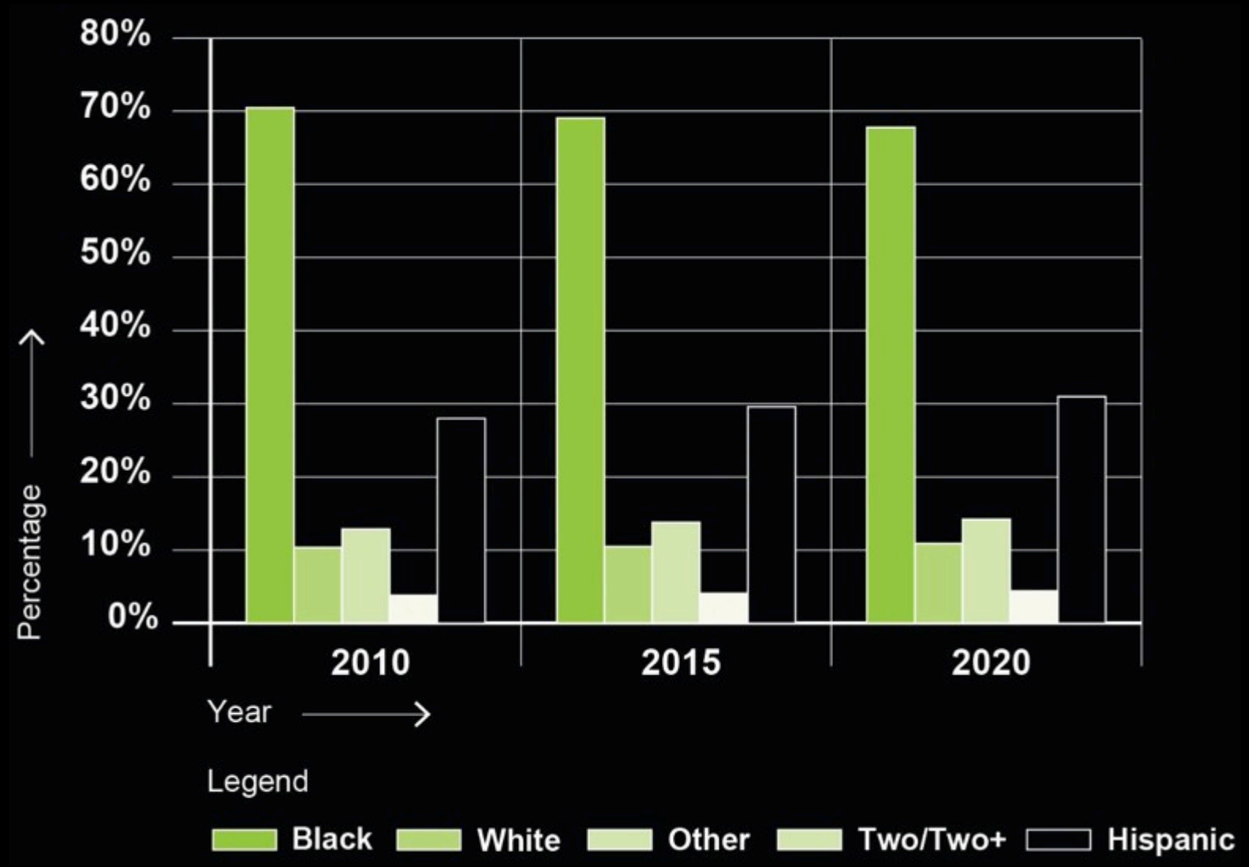
2. Overall, Bradhurst was able to preserve its character and identity in times when rising real estate values have created displacement and neighborhood change



Race Trends

The neighborhood of Bradhurst has maintained its neighborhood identity

1. The creation of new affordable housing has been a major contributing aspect to maintain the neighborhood's identity.



Housing Trends

Overall, Bradhurst remains affordable despite high demand and pressure on the housing market

1. Similar to Upper Manhattan, Bradhurst's housing stock is overwhelmingly renter occupied (84%)

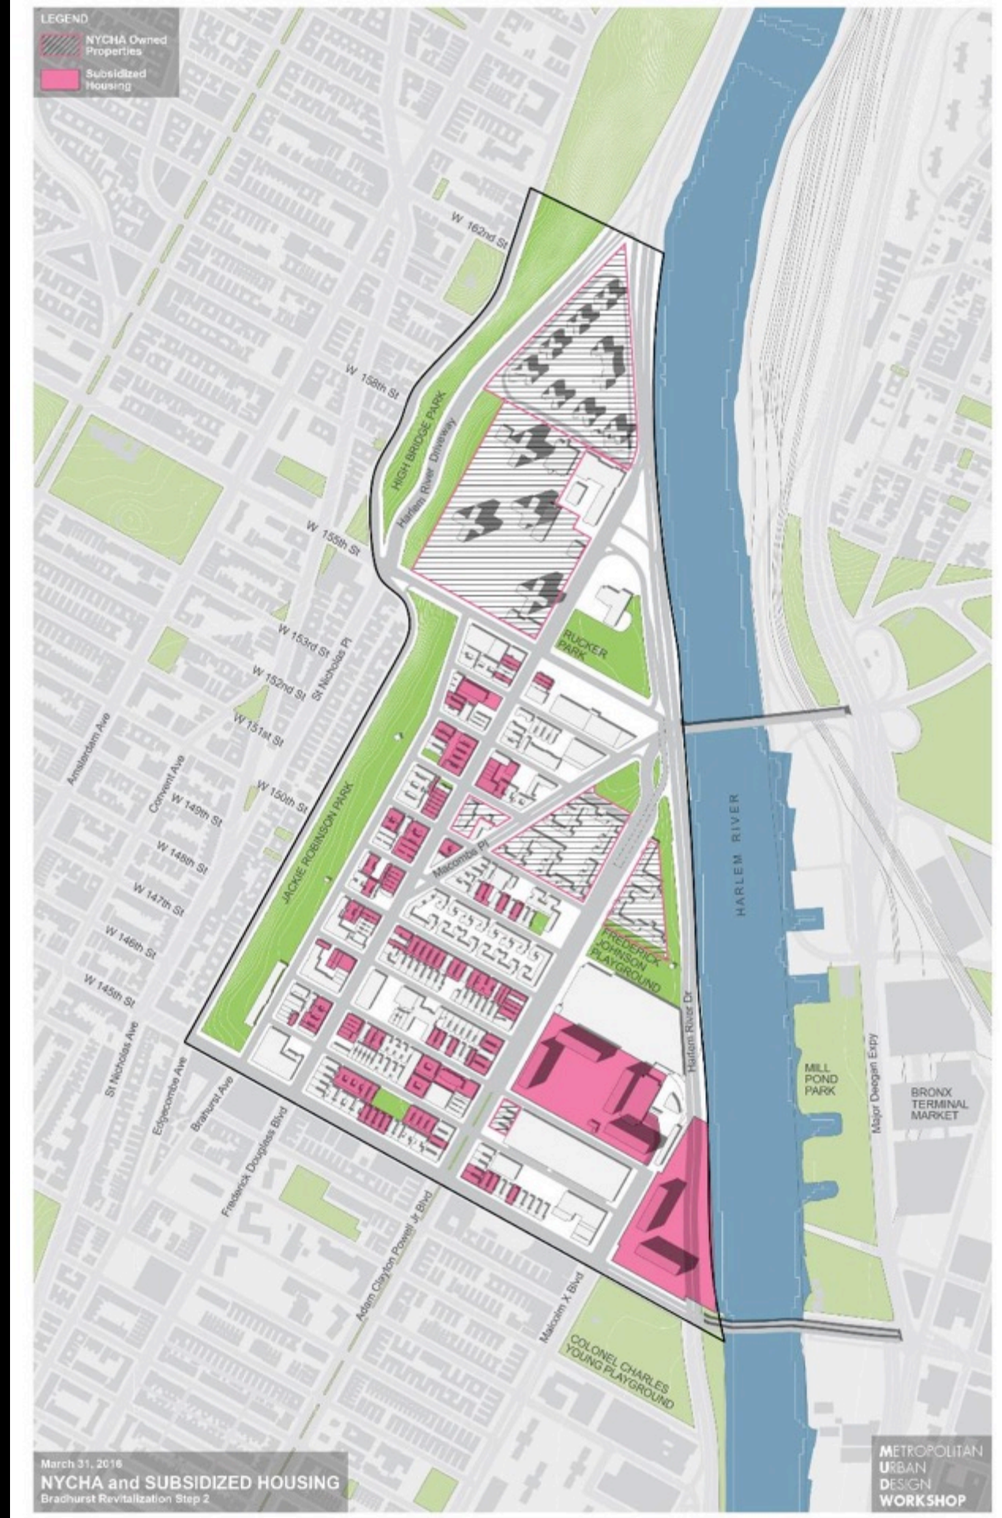
2. Median Housing Values are about 30% lower than in the other geographies

3. Median and average rents are about 20% lower than in Upper Manhattan and 30% lower than in all of NYC.

4. Overall, residents are not excessively burdened by housing costs.

Median Housing Value and Rents

	Bradhurst	Upper Manhattan	NYC
Median Value (Owner Occupied)	$ 352,300	$ 486,590	$ 490, 847
Average Rent	$ 807	$ 1,055	$ 1,279
Median Rent	$ 802	$ 995	$ 1,200



Income Trends

The BOA has a large share of middle-income households but also a concerning large share of very low-income residents

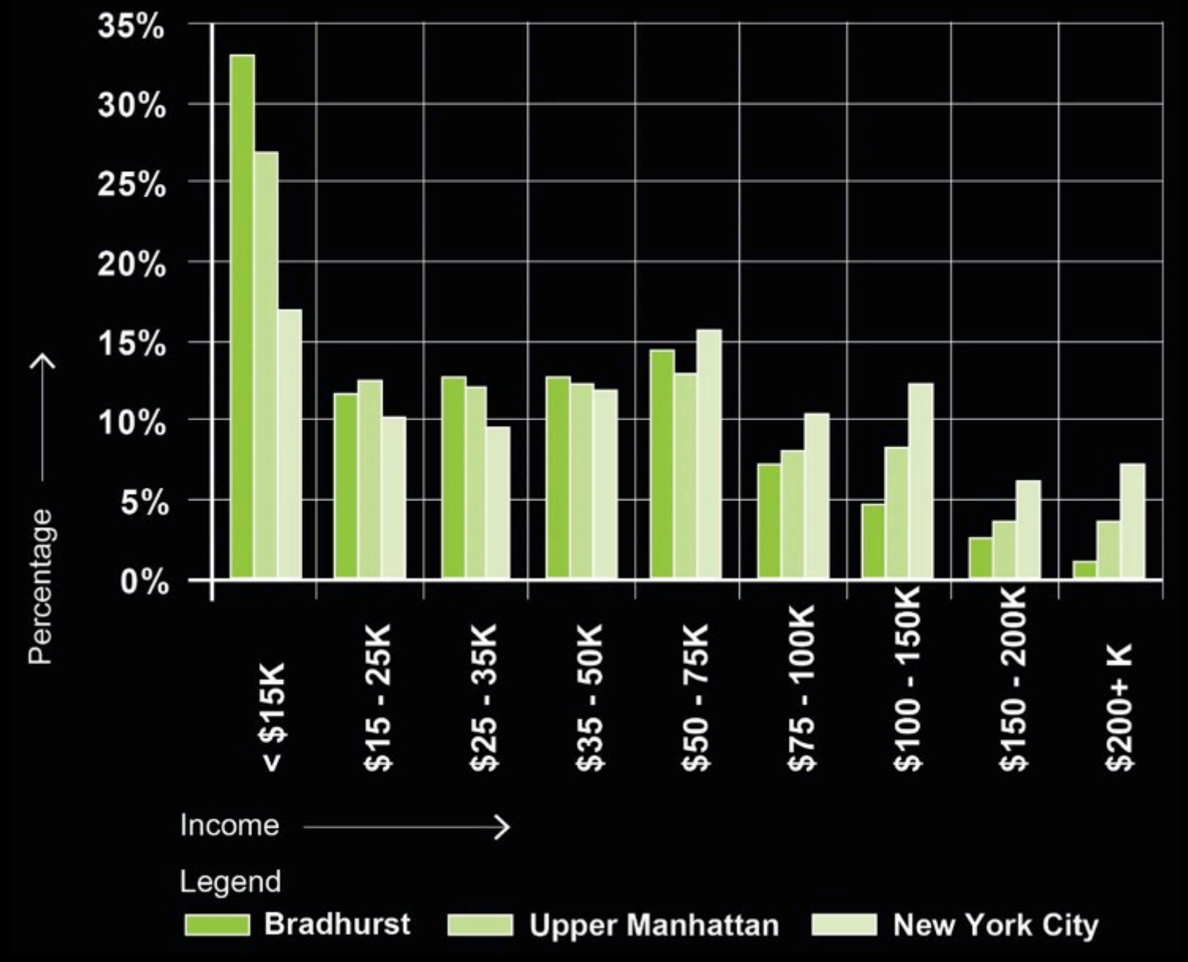
1. One third of households earns $15k or less, which coincides with a similar share of BOA residents near or below the Federal Poverty Level (FPL)

2. At the same time, the Bradhurst BOA also has a large share of middle-income households earning between $35k and 100k per year.

3. Programs need to address this disparity and create more economic opportunities for residents.

Median Household (HH) Income

	Bradhurst	Upper Manhattan	NYC
Median HH Income	$ 28,586	$ 33,695	$ 51,753
Average HH Income	$ 42,573	$ 55,799	$ 78,646



Poverty

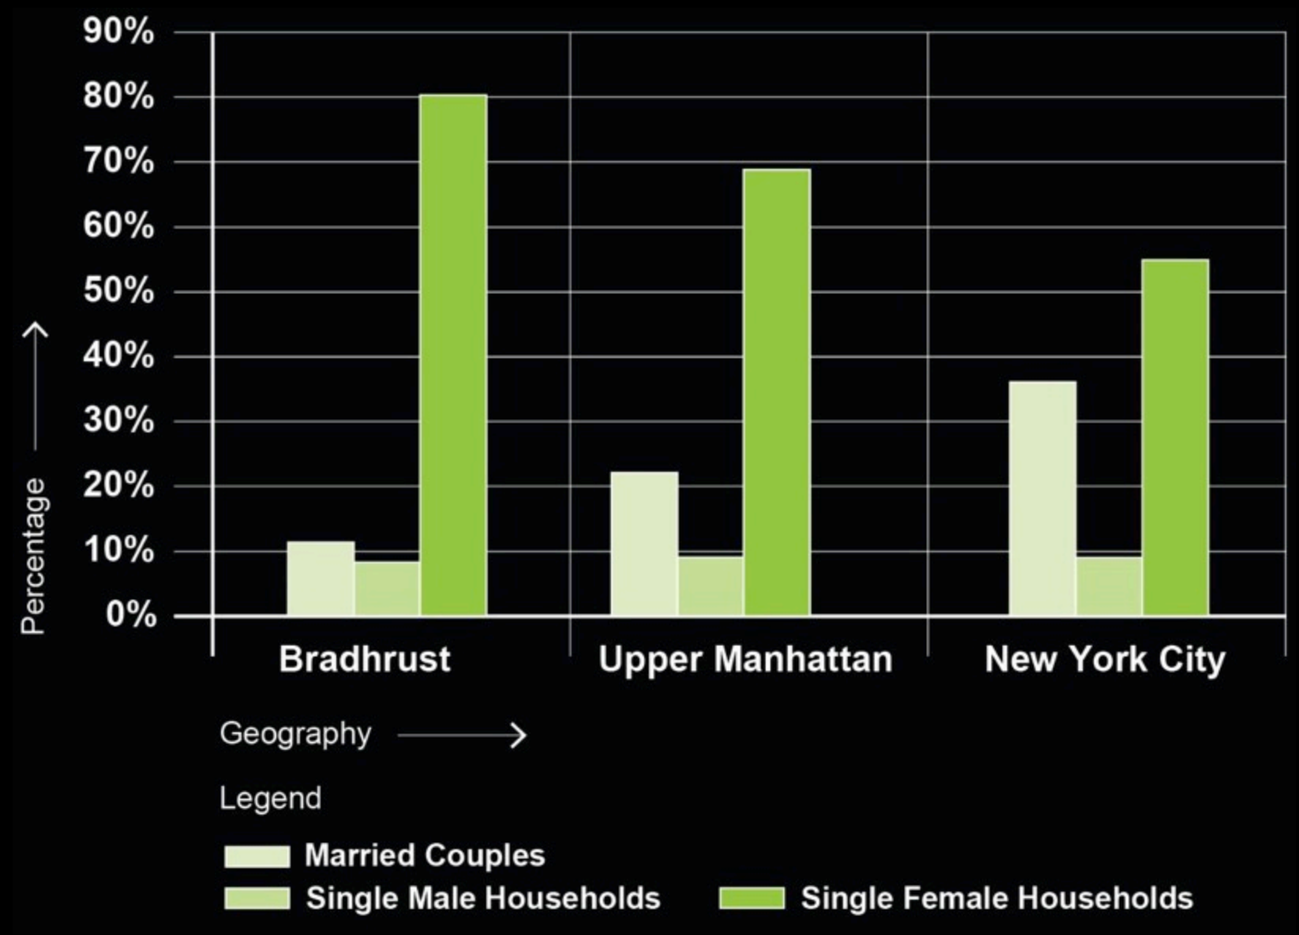
Poverty is prominent in the Bradhurst BOA (30% of all residents) but particularly plagues single female households.

1. Women are most often affected by poverty and single female households constitute 80% of total households below the Federal Poverty Line

Population Below the Poverty Level

Population	Bradhurst	Upper Manhattan	NYC
Total	25,600	553,400	8,433,000
Below Poverty			
Total	7,700	153,200	1,714,000
Percent	30.1%	27.7%	20.3%

Population in Poverty by Education and Gender



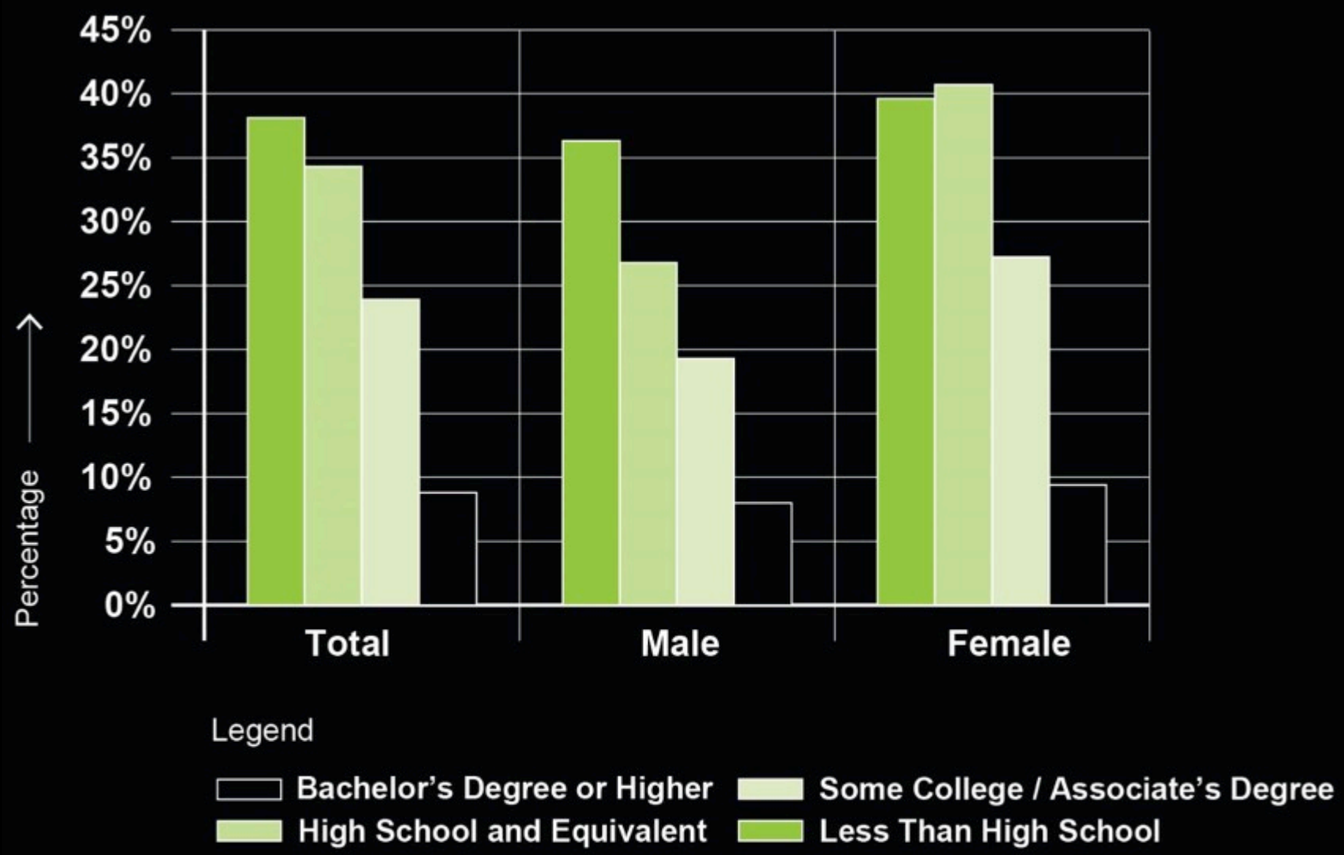
Poverty

Poverty is prominent in the Bradhurst BOA (30% of all residents) but particularly plagues single female households.

1. Even the portion of women in poverty with a high school degree (40%) and some college (27%) is very high

2. Fighting poverty will require a multi-tiered approach: after-school programs supporting single mothers in addition to more economic opportunities for women

Population in Poverty by Education and Gender



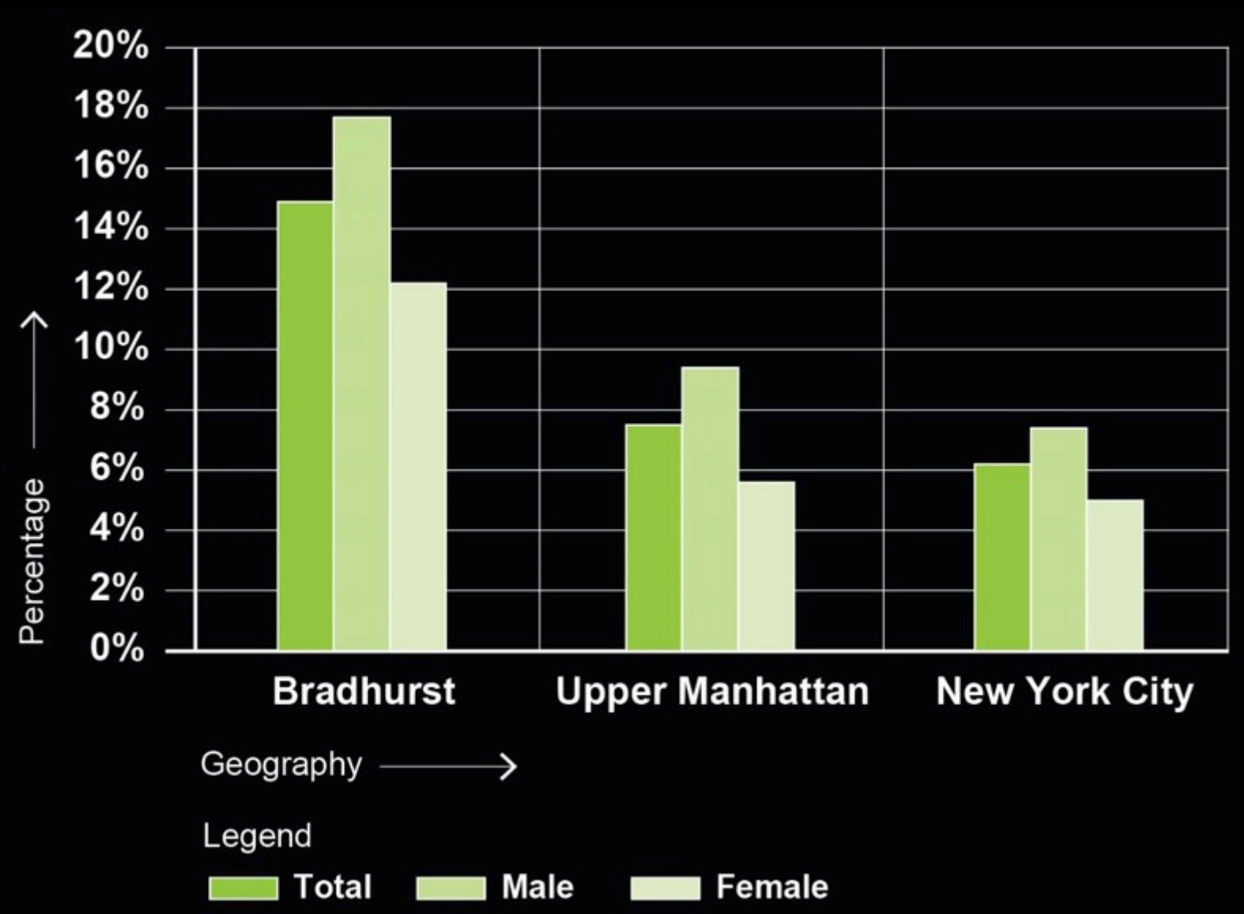
Education

The share of high school drop outs is very high in Bradhurst and almost 18% young men are leaving without a degree. Future programs must differentiate between skill levels and genders

1. Teenage drop-out (high school) rates are more than double (!) that of Upper Manhattan and NYC

2. Young men are 1.5 times more likely to drop out than women

3. After school programs and initiatives need to address the different needs of young men and women separately and create links to employment opportunities



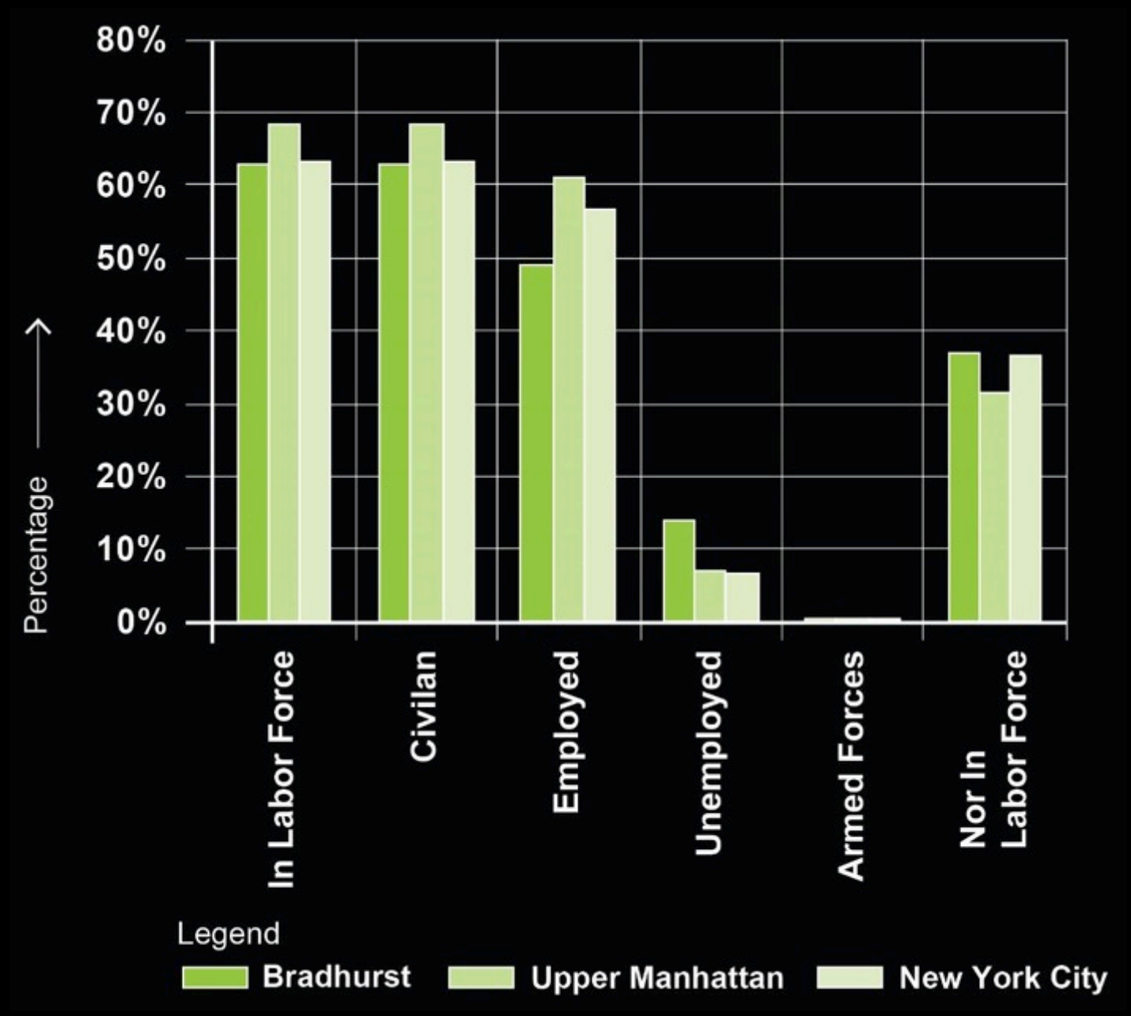
Employment

Despite a high labor force participation rate, unemployment is major issue in Bradhurst.

1. 63% of the Bradhurst BOA 16+ population participates in the labor workforce (i.e., they work or are actively looking for work) – at par with NYC but 5% points lower than Upper Manhattan

2. Despite the high participation rate and willingness to work, the area's unemployment rate is very high at 14% (compared to 6.5% for NYC)

3. Programs need to create new opportunities (e.g., incubators) or better connect residents with existing opportunities in the rest of NYC



Occupations

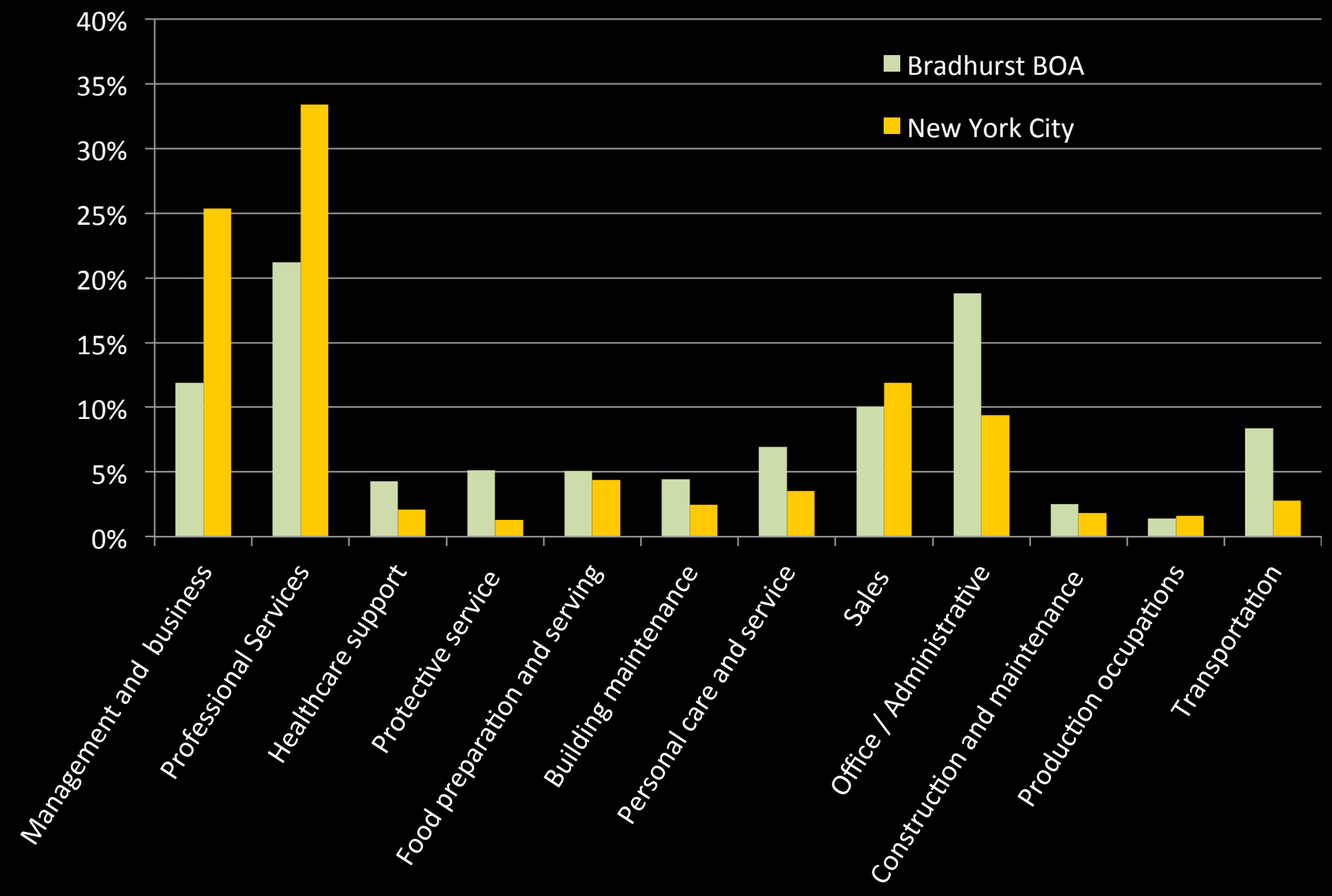
Focus on occupation with higher wage and overall growth potential (i.e., Management & Business and Professional Services).

1. Although 40% of all employed residents in Bradhurst work either in Professional or Office / Administrative occupations.

2. An additional 20% of residents work in Management and Business Operations and Sales.

3. Noticeable is the smaller share of workers in Management and Business Operations and Professional Services when compared to NYC

4. The share of Bradhurst residents in supportive occupations is substantially higher than in all of NYC



Businesses

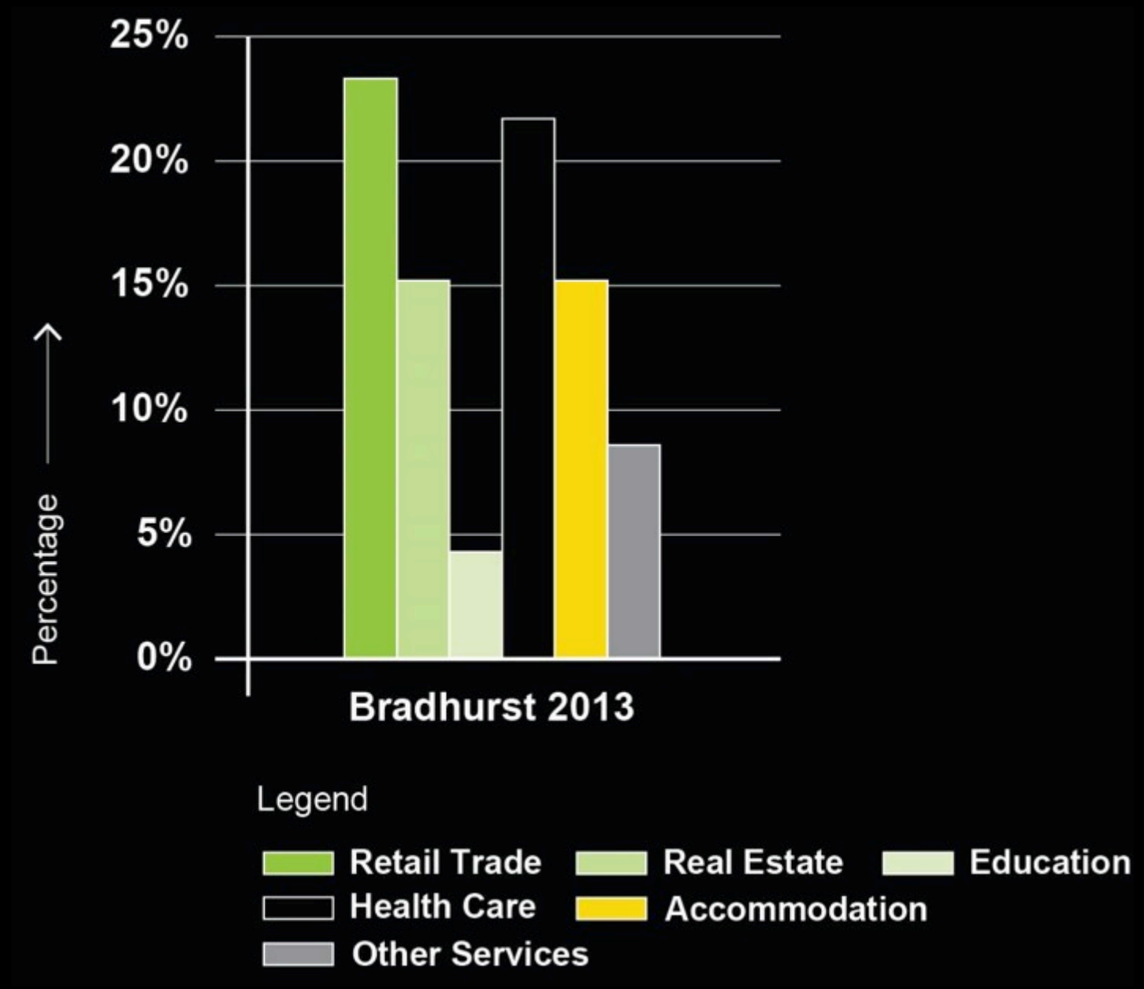
Local businesses in the Bradhurst BOA mainly cater to the local residential population .

1. There are currently 1,700 people employed by business in Bradhurst

2. The mix of businesses is typical for a neighborhood such as Bradhurst and includes mostly consumer goods stores and neighborhood services establishments.

3. Retail employees constitutes almost 1/4th of the total employees in the Bradhurst BOA

4. Employees in health care related business represent about 21% of all employees



Retail Demand

Tremendous growth potential for more neighborhood businesses.

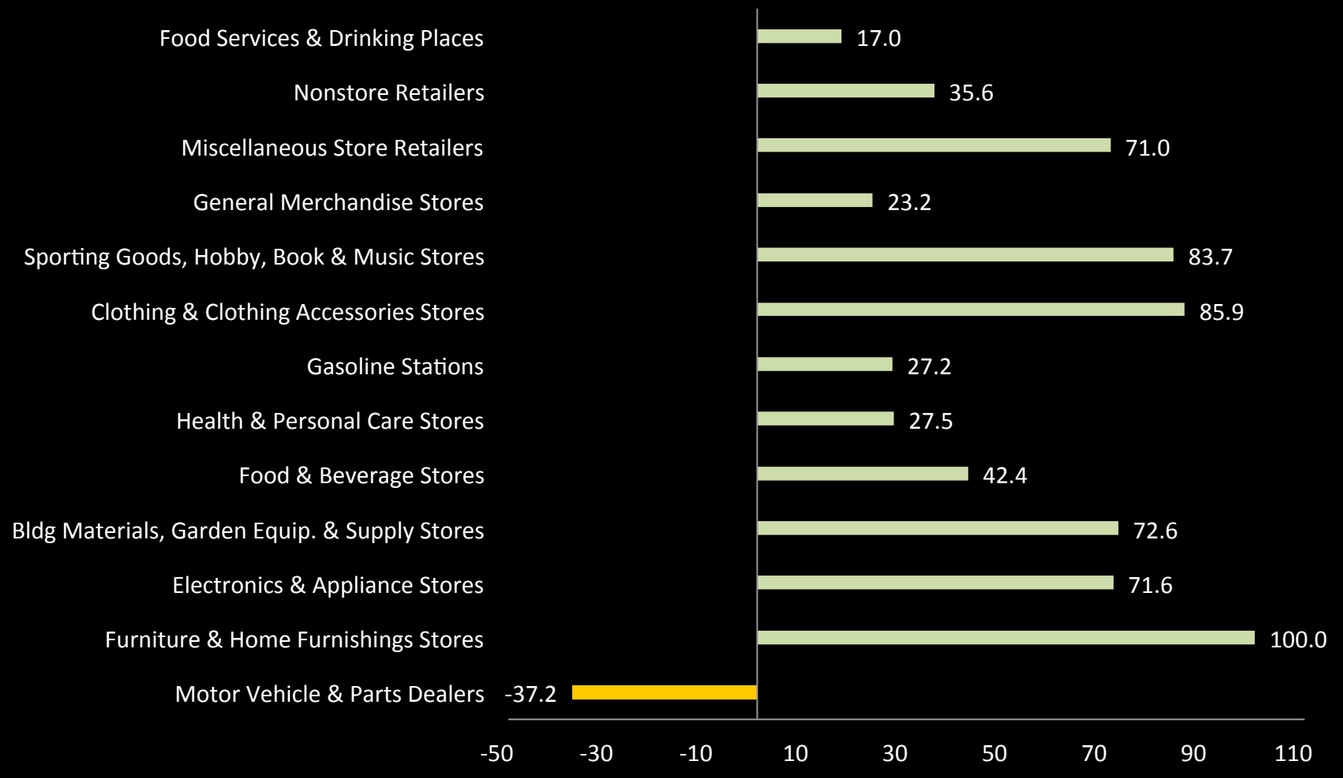
1. While the business landscape already includes mostly consumer goods and neighborhood service businesses, demand is not satisfied.

2. Available expenditures for most retail categories are spent outside the Bradhurst area.

3. Only Motor Vehicle & Parts Dealer attract customers from outside Bradhurst.

4. Residents spend approximately $200 million in retail expenditures outside of Bradhurst.

5. While not all can be captures by local business, a substantial amount could be captured by new business coming to the area.



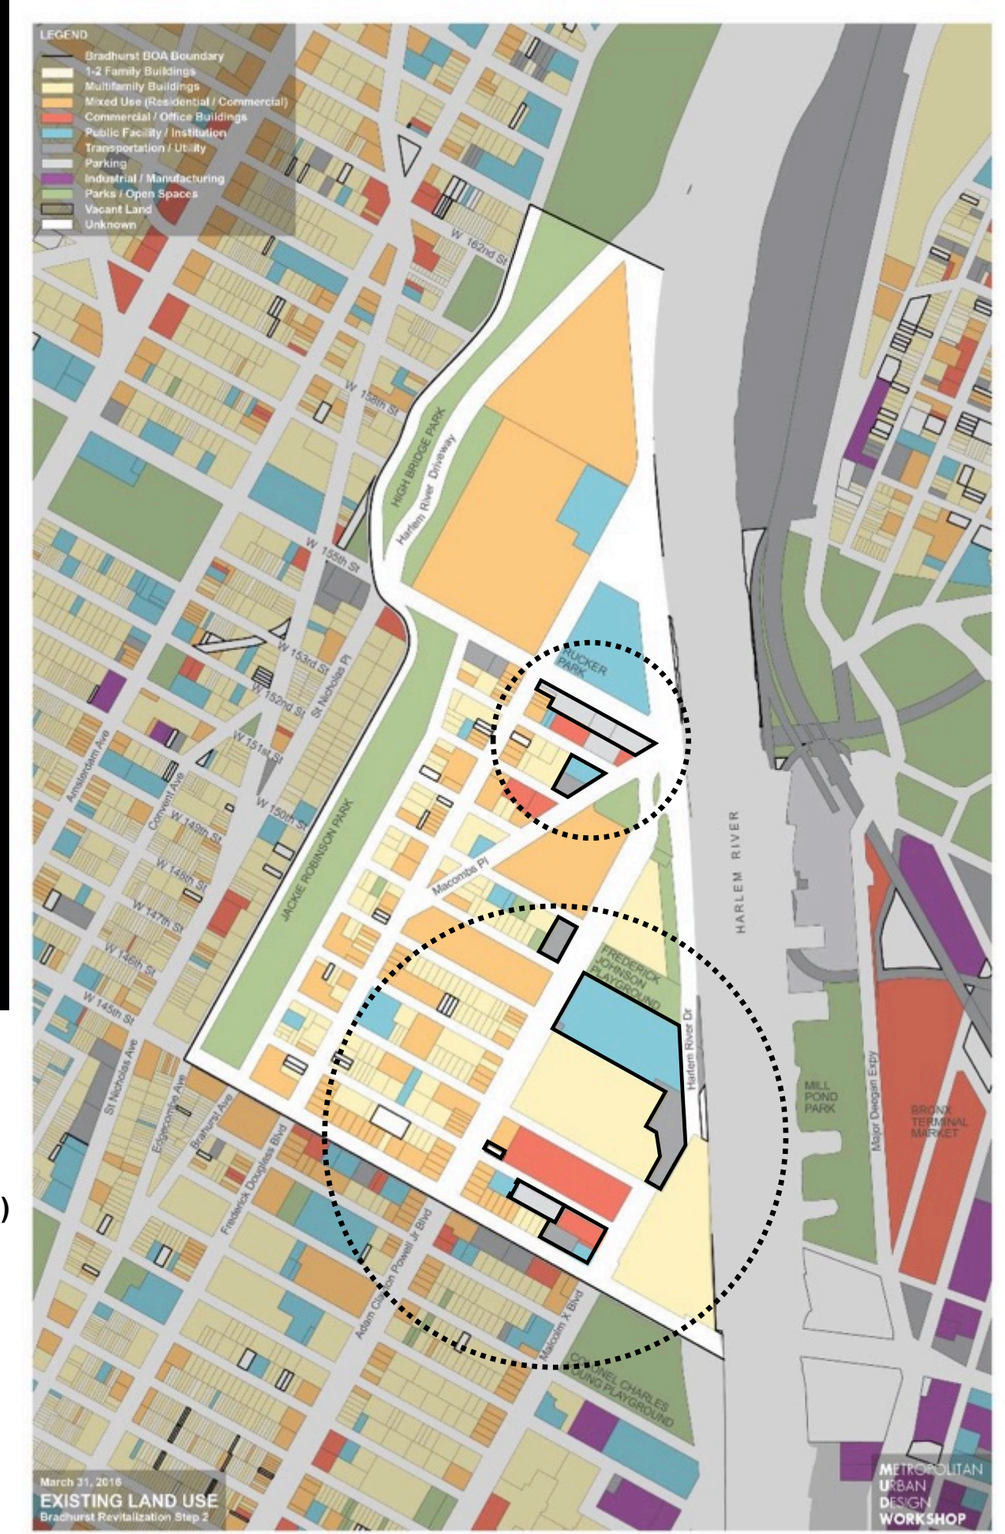
Land Use

57% residential (24% or residential + 33% mixed residential + commercial uses)

Only 1.25% commercial uses

1. Developable strategic sites are mostly under transportation related uses or underutilized commercial uses

2. Sites along waterfront are vacant



LEGEND

Project Funded by the Brownfield Opportunity Area Program of the NYS Department of State | HCCI | MUD Workshop BOA Team

Connectivity

150th Street Upland Waterfront Connector

1. Develop path running along south side of Frederick Johnson Playground as upland waterfront access (No. 9)

2. Manage stormwater discharge from downspouts under Harlem River Drive and prevent surface flooding and damage (No. 10)

3. Provide pedestrian / bikepath continuity along Harlem River

Aerial view showing Esplanade Gardens Waterfront area and potential 150th Street Waterfront Connector

View of path to the south of Frederick Johnson Playground

Storm water outfalls from Harlem River Drive cause surface flooding

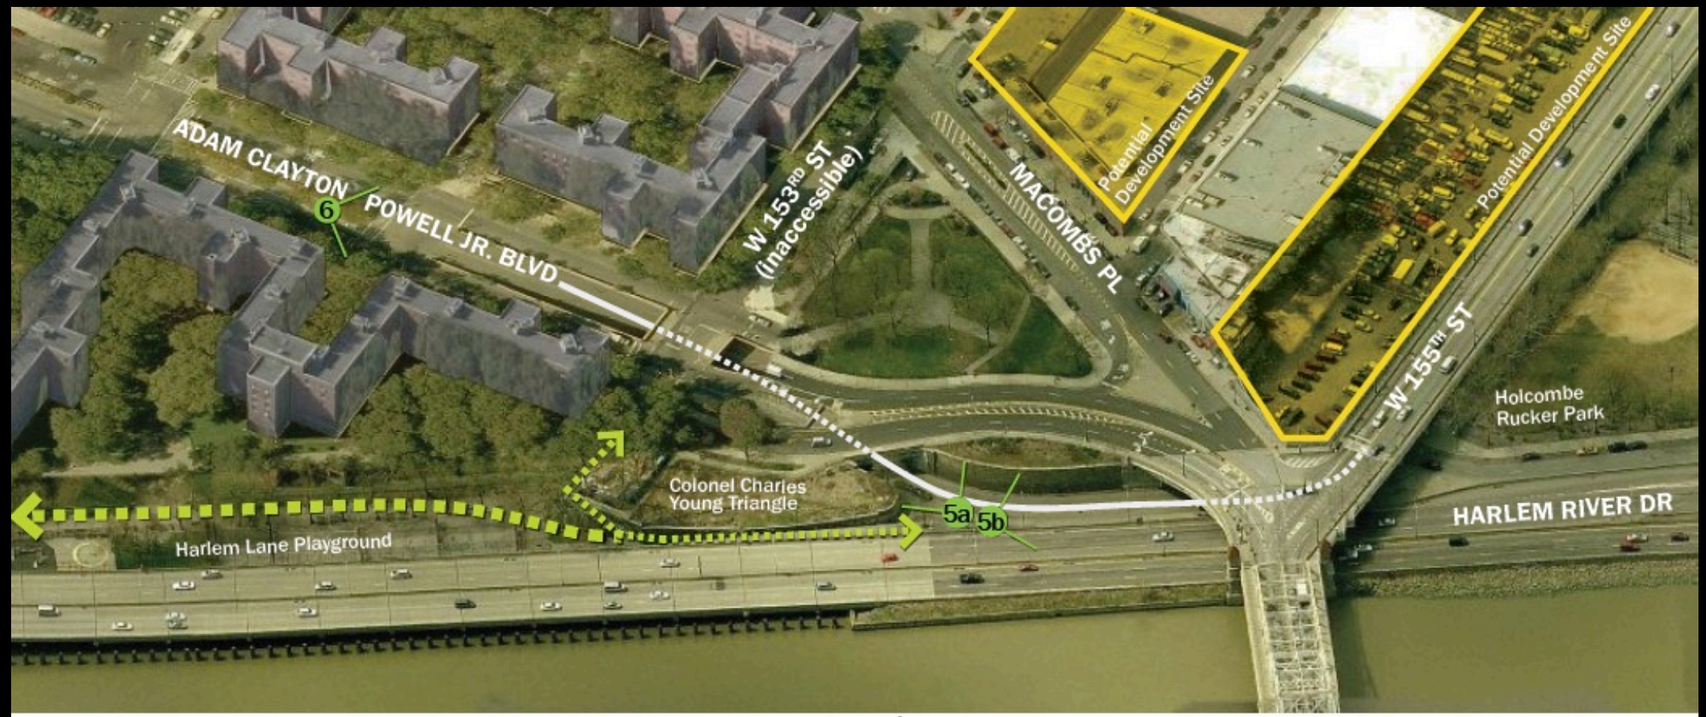
Connectivity

Harlem Lane Playground, Colonel Charles Young Triangle and public space under the 155th Street Viaduct

Convert roadway connection to one-way south-bound

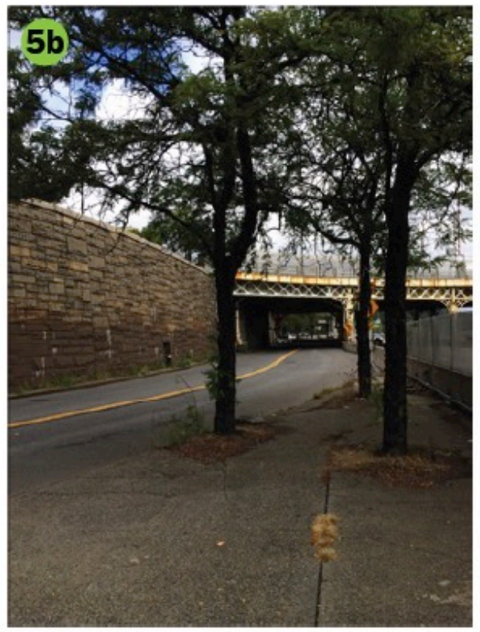
OR

Narrow travel lanes to provide space for a new pedestrian sidewalk and bikeway connection along the east side of the street alignment adjacent the Harlem River Drive. This new pedestrian and bike connection will connect



Aerial view of Adam Clayton Powell Jr. Boulevard and it's intersection with 155th Street below grade

Broken pedestrian link on Adam Clayton Powell Jr. Boulevard
Looking south



Looking north towards 155th Street Viaduct

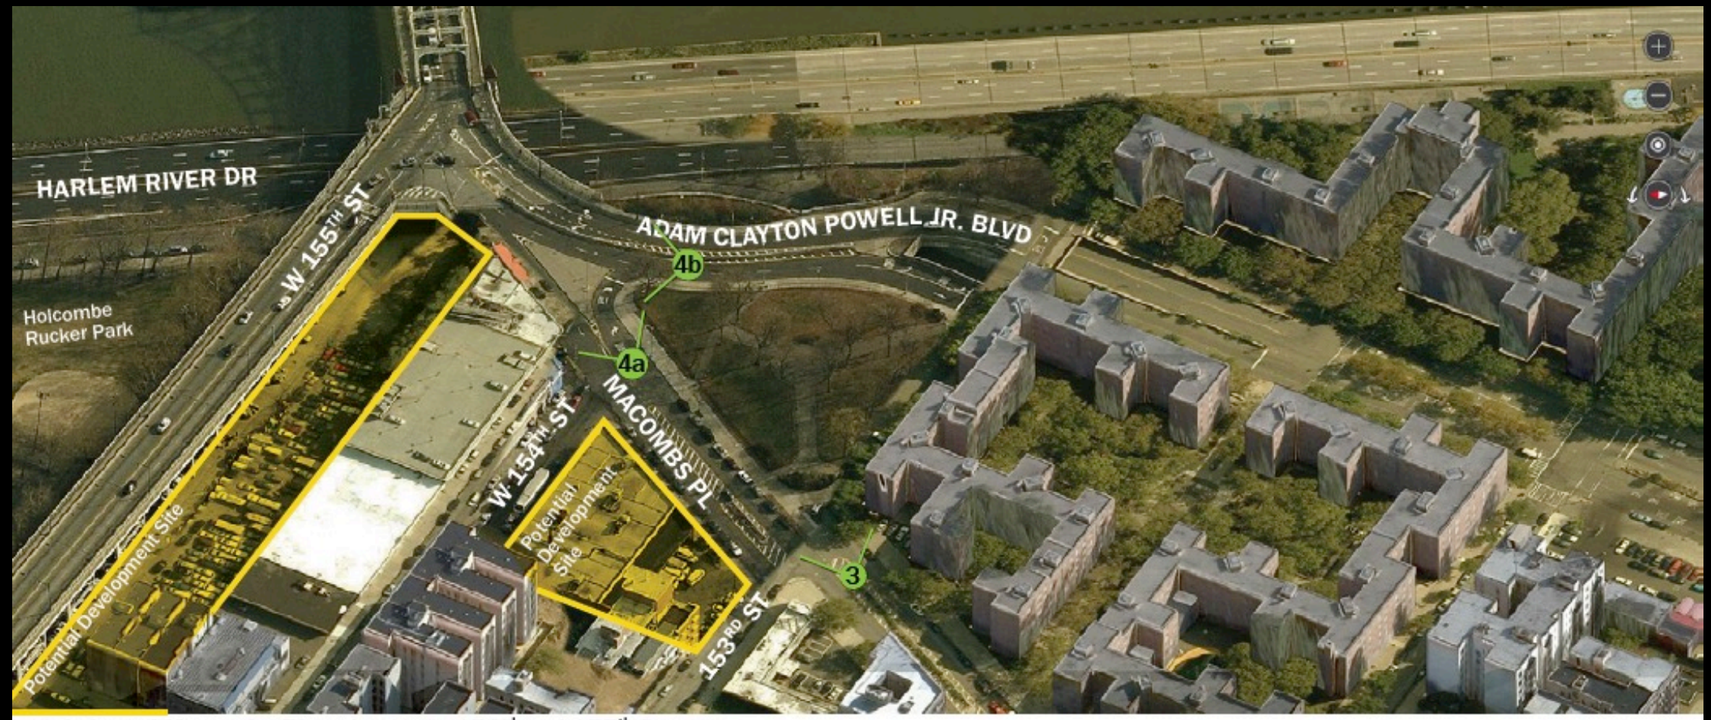
View of Adam Clayton Powell Jr. Boulevard going below grade

Connectivity

Macomb's Place (North)

1. Explore possibility of providing north-bound right turn onto 153rd Street from Macombs Place

2. Explore possibility of making Macombs Place one-way south-bound between 153rd and 155th Streets and close north-bound right turn onto Adam Clayton Powell Jr. Boulevard from Macombs Place.



Aerial view of Macombs Place between 153rd and 155th Streets

View of potential east receiving end of the W 153rd Street approach at Macombs Place

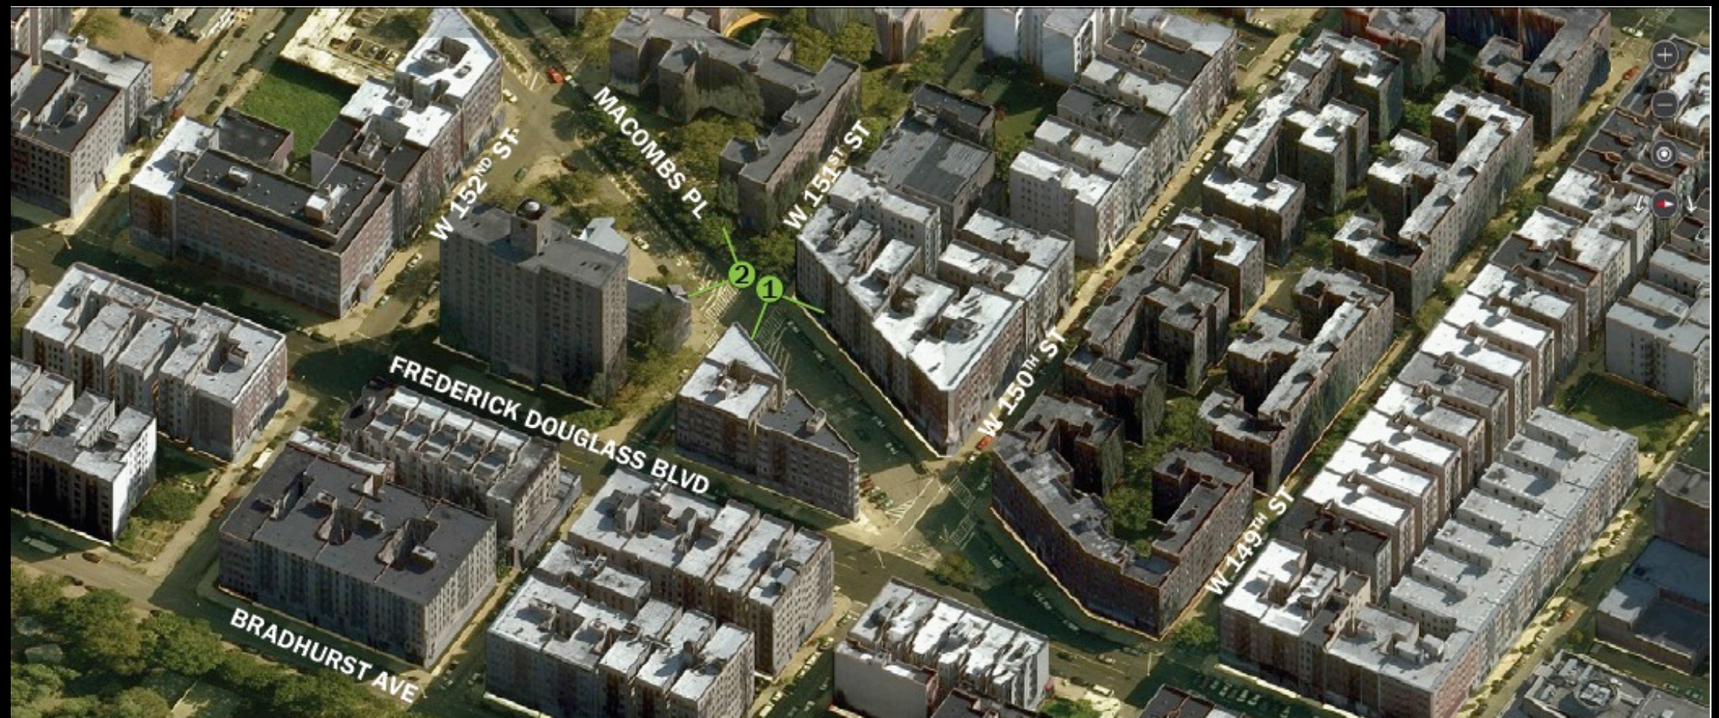
Intersection of Macombs Place and Adam Clayton Powell Jr. Boulevard

Connectivity

Macomb's Place (South)

Restripe Macombs Place between W 150th and W 151st Streets to provide angled or perpendicular parking along both east and west curbs

Use striping and qwick-kurbs to channelize travel lane and align approach with the north-bound receiving end at the intersection with W 151st Street. This will help prevent vehicles from crashing into the incoming green-streets median



Aerial view of Macombs Place between 150th and 152nd Streets

Street level view of Macombs Place looking south at 151st Street

Street level view of Macombs Place looking north at 151st Street

Connectivity

155th Street Viaduct

1. Improve lighting below viaduct
2. Plant street trees and/or planters along north sidewalks adjacent to the south side of the Polo Grounds housing complex
3. Manage stormwater discharge from downspouts
4. Explore possibility for temporary street closures to host community events / farmer's market

View of W 155th Street Viaduct looking west (limited lighting and wide unlandscaped sidewalks)

View of W 155th Street Viaduct looking east (downspouts discharge rainwater on to street)

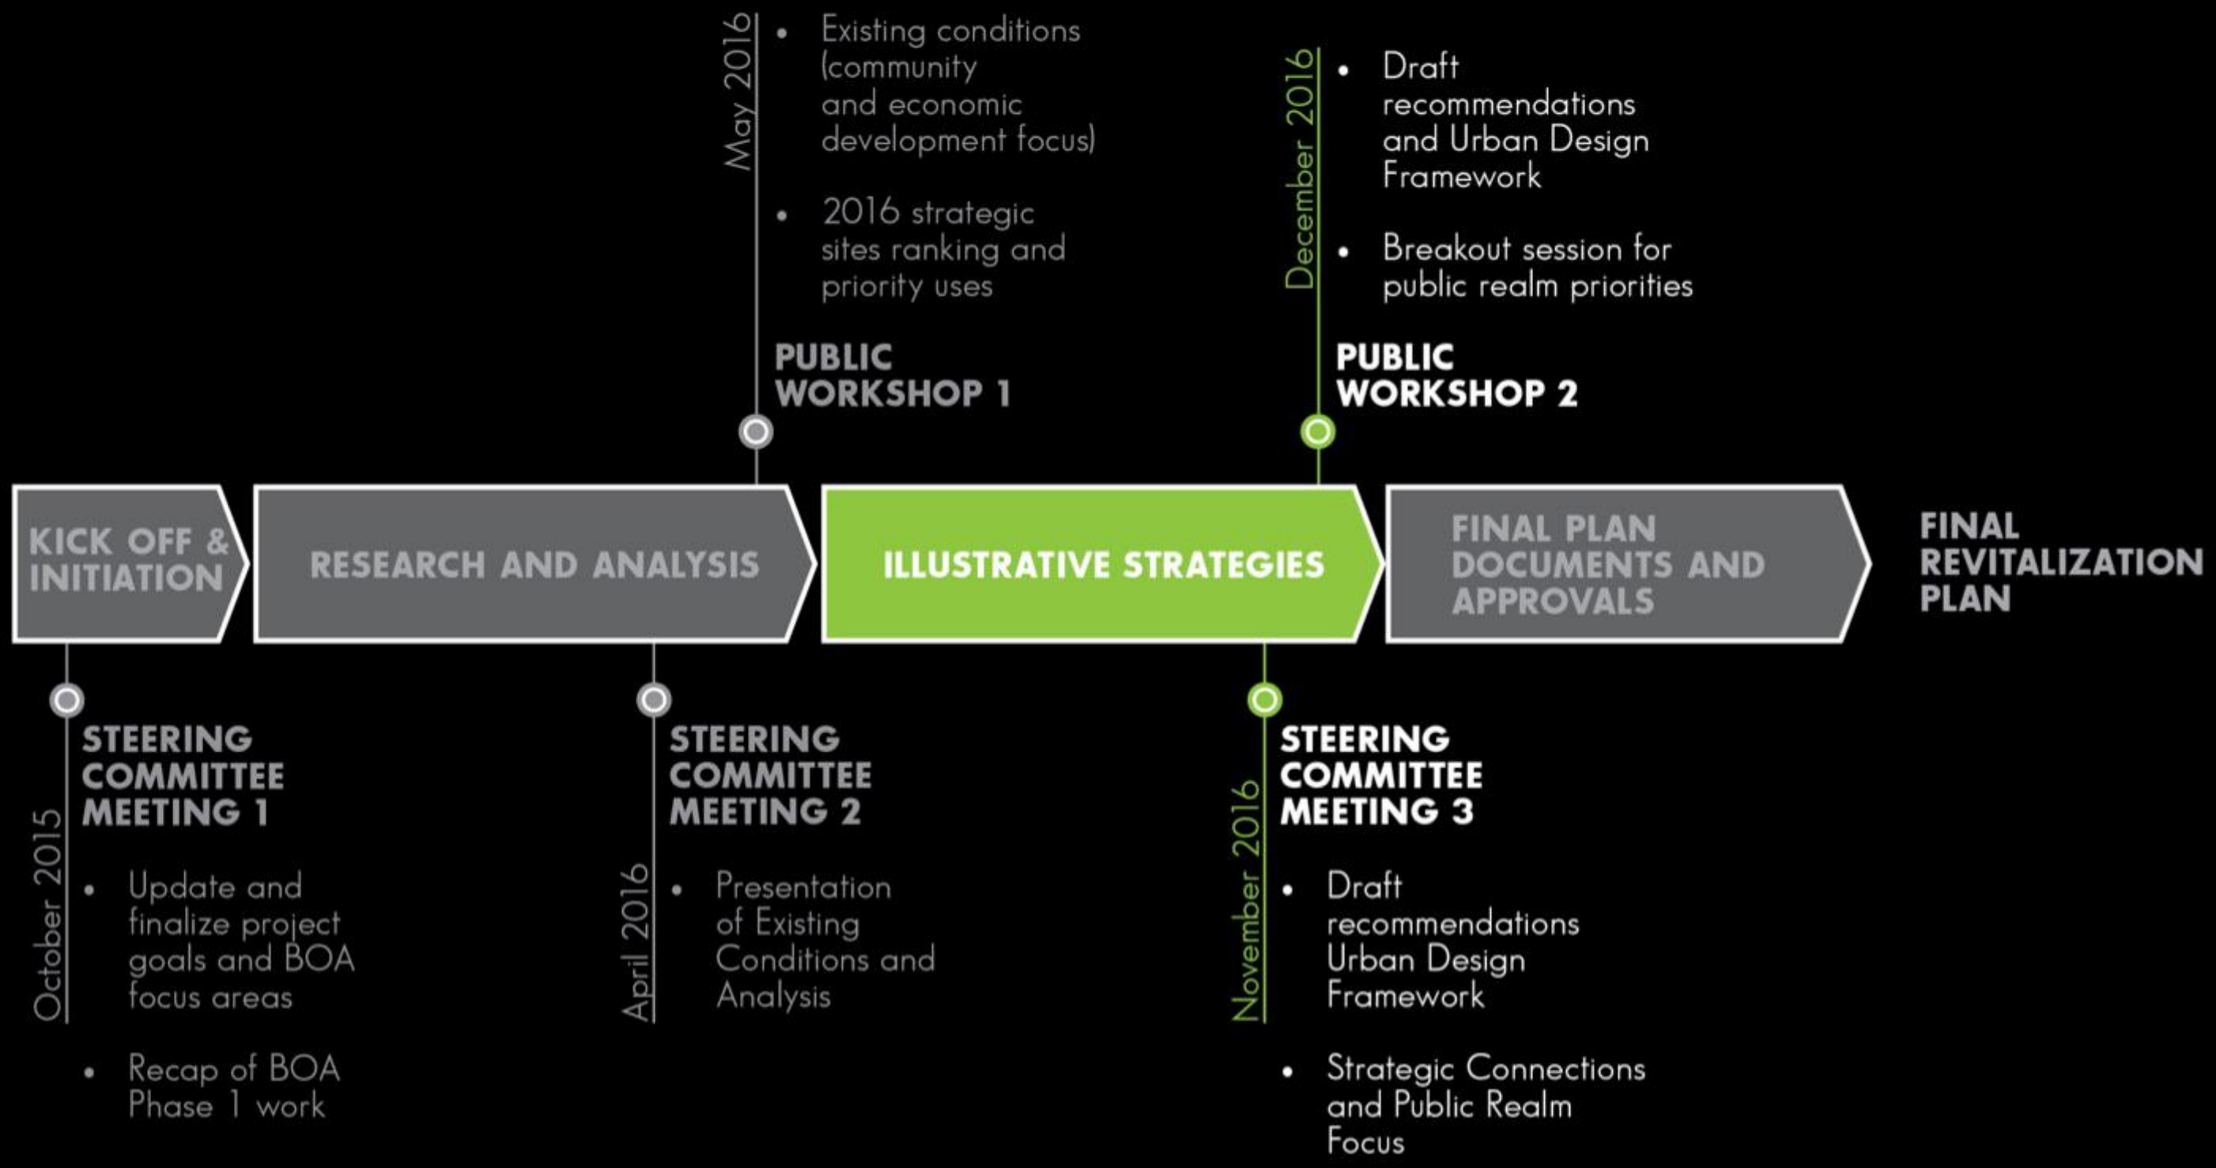
PROCESS and RECAP

PROCESS and RECAP



Demographic Trends

1. One of the **FASTEST GROWING** neighborhoods in NYC with a large share of school going children and **YOUTH POPULATION**

2. Large share of middle-income households but also a **LARGE SHARE OF VERY LOW-INCOME RESIDENTS** with **80%** of households below the poverty line being **SINGLE FEMALE HOUSEHOLDS**, despite higher education

3. There is a **HIGH TEENAGE DROP OUT** rate – more than double compared to Upper Manhattan and NYC – with 18% of men leaving high school without a degree

4. Despite high labor force participation rate, **UNEMPLOYMENT IS A MAJOR ISSUE**. Higher employment in support services vs. professional and management positions

Projected Community Needs

Housing Trends

1. **HOUSING VALUES** in Bradhurst are about **30% LOWER** compared to NYC and Upper Manhattan

2. **RESIDENTIAL RENTS** are **20% to 30% LOWER** than the rest of Upper Manhattan and NYC

3. Housing affordability over the decades has also contributed to maintaining a **STABLE RACIAL AND CULTURAL CHARACTER** of the Bradhurst neighborhood

4. **HOUSEHOLD SIZE** continues to **DECREASE**, this trend is similar to the rest of the City. Bradhurst has the smallest household size compared to NYC and Upper Manhattan

Projected Community Needs

DEMAND FOR MORE 1-BEDROOM AND 2-BEDROOM AFFORDABLE UNITS

MAINTAIN AFFORDABILITY

Funded by: NYS Department of State | Client: HCCI | Strategic Partner: HCDC | Consultants: MUD Workshop Team

Industry Trends

1. Businesses within the area mostly include **CONSUMER GOODS** stores and **NEIGHBORHOOD SERVICE** establishments

2. Despite that, there is **UNMET DEMAND** for neighborhood service businesses with residents purchasing approximately **$114 M of RETAIL GOODS** outside of the BOA

Projected Community Needs

RETAIL

(Restaurant / Health Food Stores / Drug Store / Electronic Store)

COMMERCIAL DEVELOPMENT

(Hotels / Offices / Specialized Retail)

NEIGHBORHOOD SERVICES

(Clothing / Shoe Store / Dry Cleaning / Tailoring / Computer Repair Store)

Community Workshop Findings

TOP FOUR USES THAT RESIDENTS WANT TO SEE IN THEIR NEIGHBORHOOD

1. Youth Development Programs
2. Workforce Development for Adults

REVITALIZATION GOALS

PUBLIC WORKSHOP 1

Community and Economic Development

- Create employment, job training and youth recreational/educational opportunities for the local community;
- Assess business needs and need for services to best implement a diverse mix of land uses; and
- Work with Bradhurst area businesses, the City and state to develop environmentally friendly business practices.

PUBLIC WORKSHOP 2

Urban Design

- Create a set of Harlem urban design principles for the Bradhurst Area that improve physical connections in the neighborhood and make it more walkable, accessible and integrated;
- Reinvigorate the area under the 155th Street viaduct and develop it into a community focal point; and
- Create appropriate waterfront access, shoreline and habitat restoration and recreational use opportunities.

Venues and Shows

1940 – 1960s

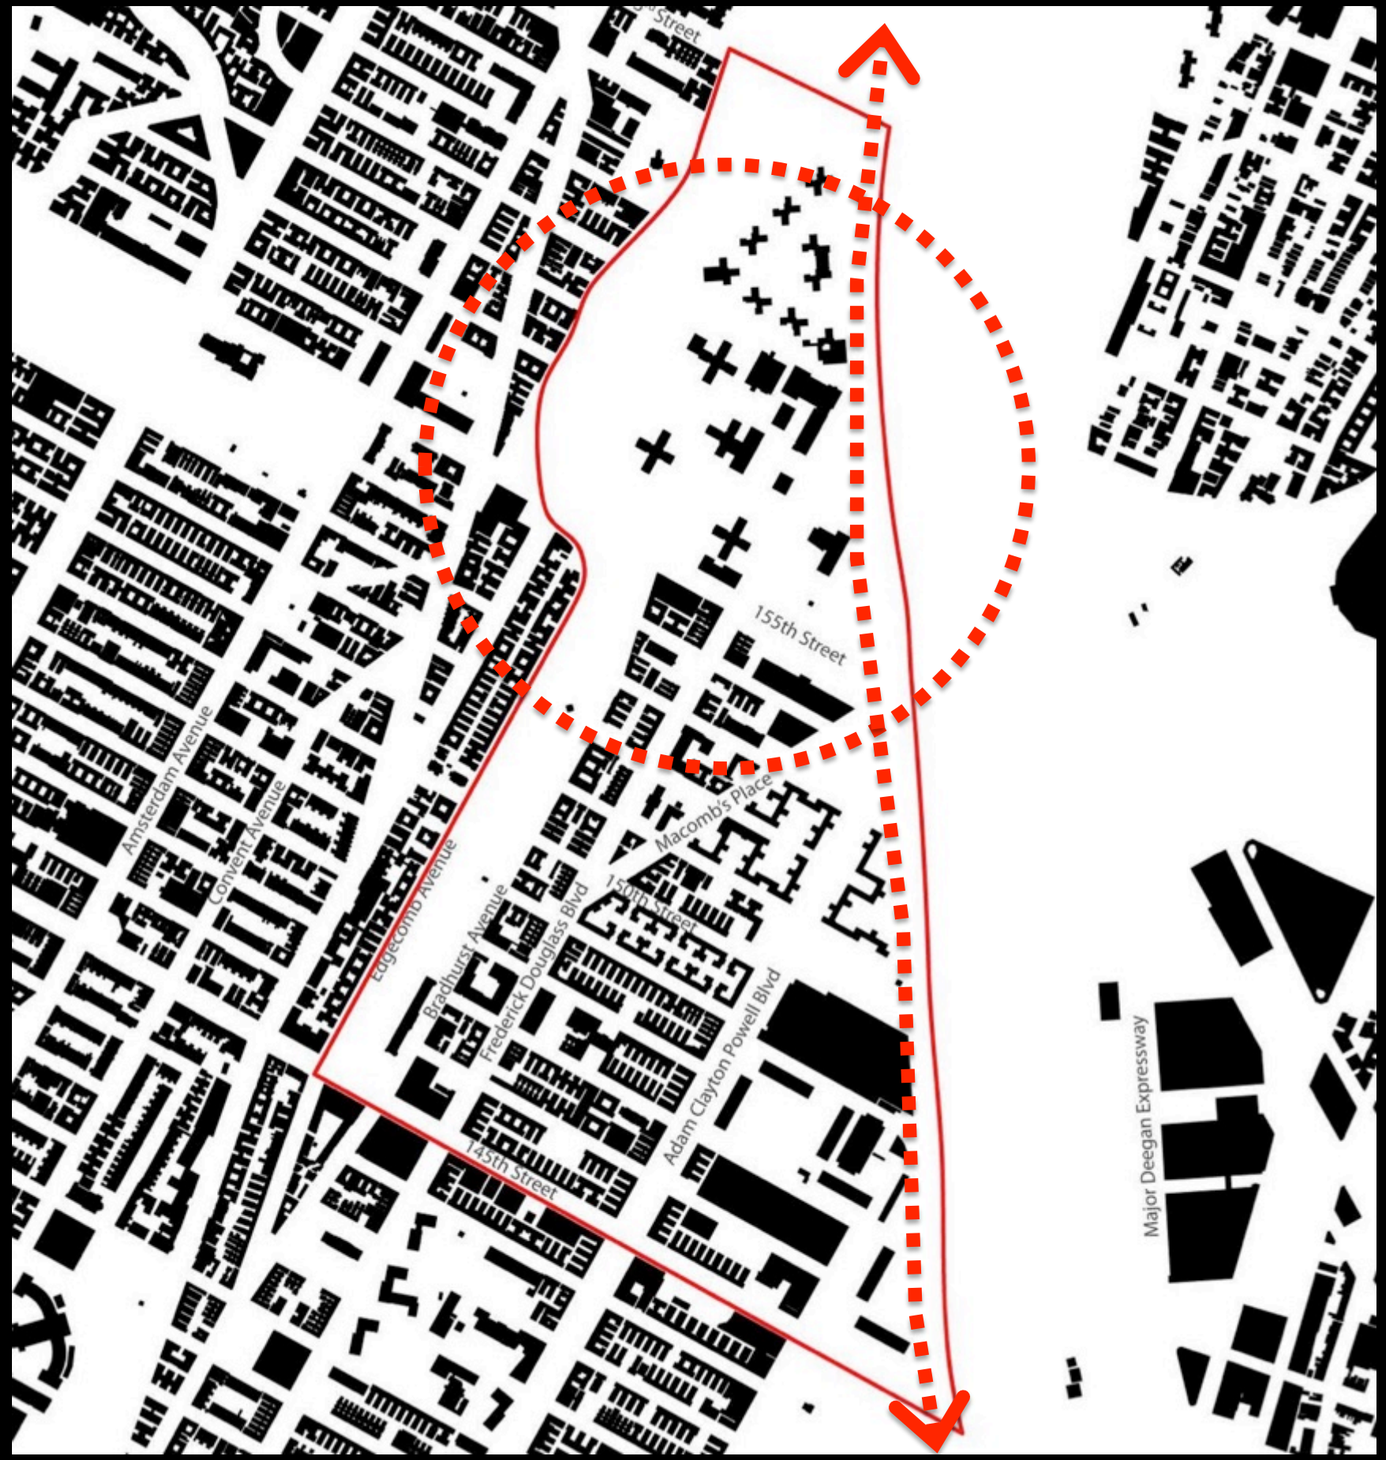
Large scale urban and infrastructure development was one of the solutions to urban problems coming out of the Depression Era

Polo Ground – cut off from the urban fabric

Robert Moses Harlem River Drive – became a physical barrier between Harlem River and upland neighborhoods

1940 – 1960s

Despite being great solutions at that time, today their impact is felt in the breakdown of the urban fabric, which makes access to the waterfront and pedestrian movement a challenge



1970 – 1990s

Abandoned neighborhoods and fading vitality. Large inventory of foreclosed property – disposed to developers – who then disposed to local organizations – development was still not feasible

Derelict building at the corner of 145th and Frederick Douglass Boulevard circa late 1990s

Images from the Bradhurst Redevelopment Area

Late 1990s – Present

State, City and the Community together developed the Bradhurst Urban Renewal Plan focusing on mixed-use development of publically owned properties

New mixed use development at Frederick Douglass and 145th Street

Mixed use and development at 152nd and Frederick Douglass Street

REVITALIZATION GOALS

PUBLIC WORKSHOP 1

Community and Economic Development

- Create employment, job training and youth recreational/educational opportunities for the local community;
- Assess business needs and need for services to best implement a diverse mix of land uses; and
- Work with Bradhurst area businesses, the City and state to develop environmentally friendly business practices.

PUBLIC WORKSHOP 2

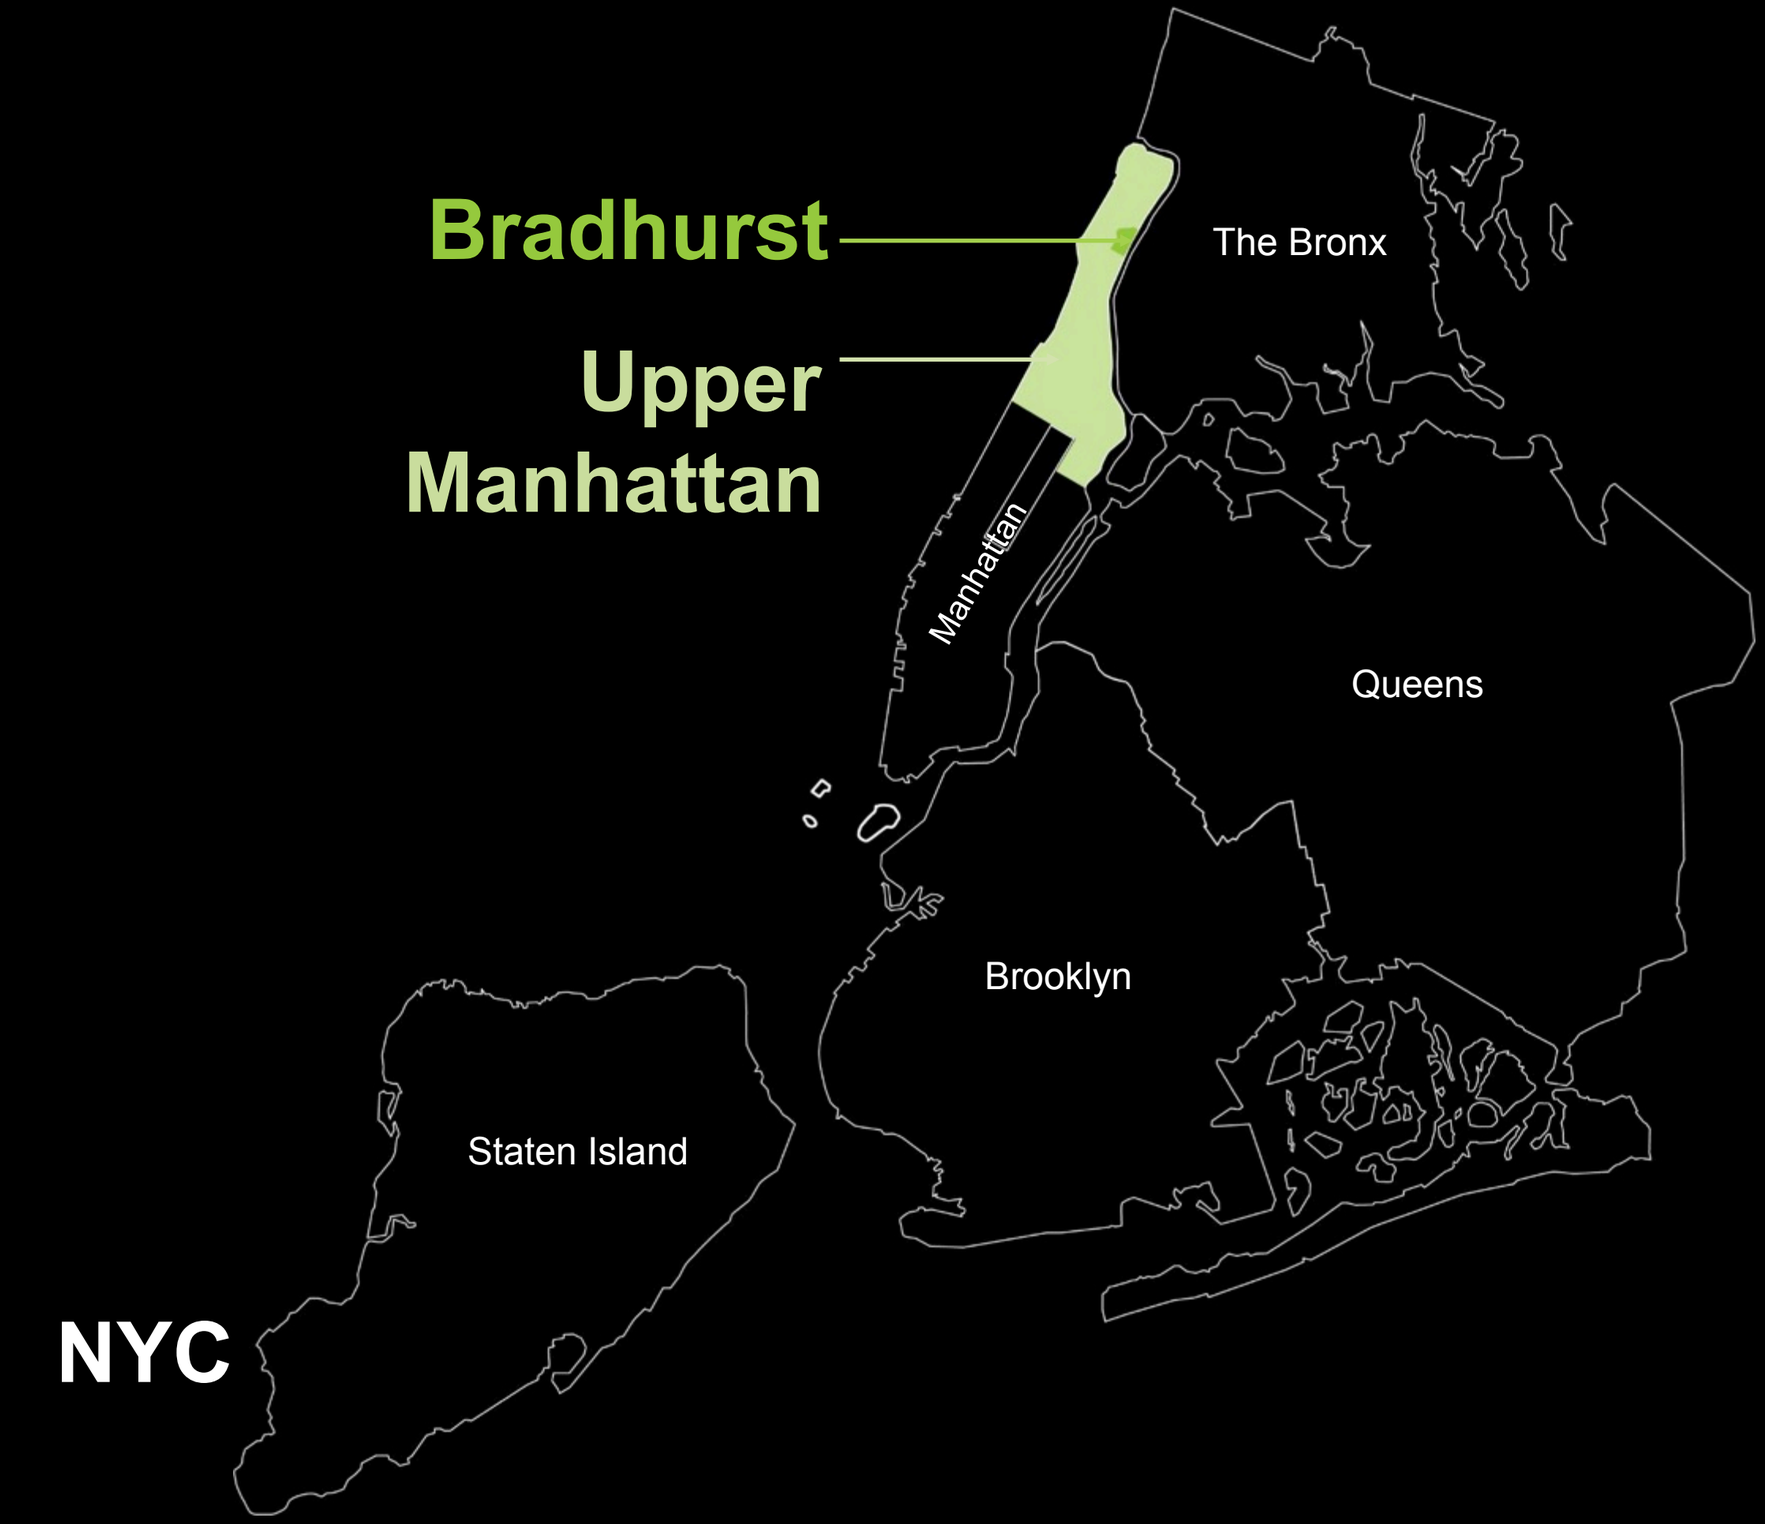
Urban Design

- Create a set of Harlem urban design principles for the Bradhurst Area that improve physical connections in the neighborhood and make it more walkable, accessible and integrated;
- Reinvigorate the area under the 155th Street viaduct and develop it into a community focal point; and
- Create appropriate waterfront access, shoreline and habitat restoration and recreational use opportunities.

2/

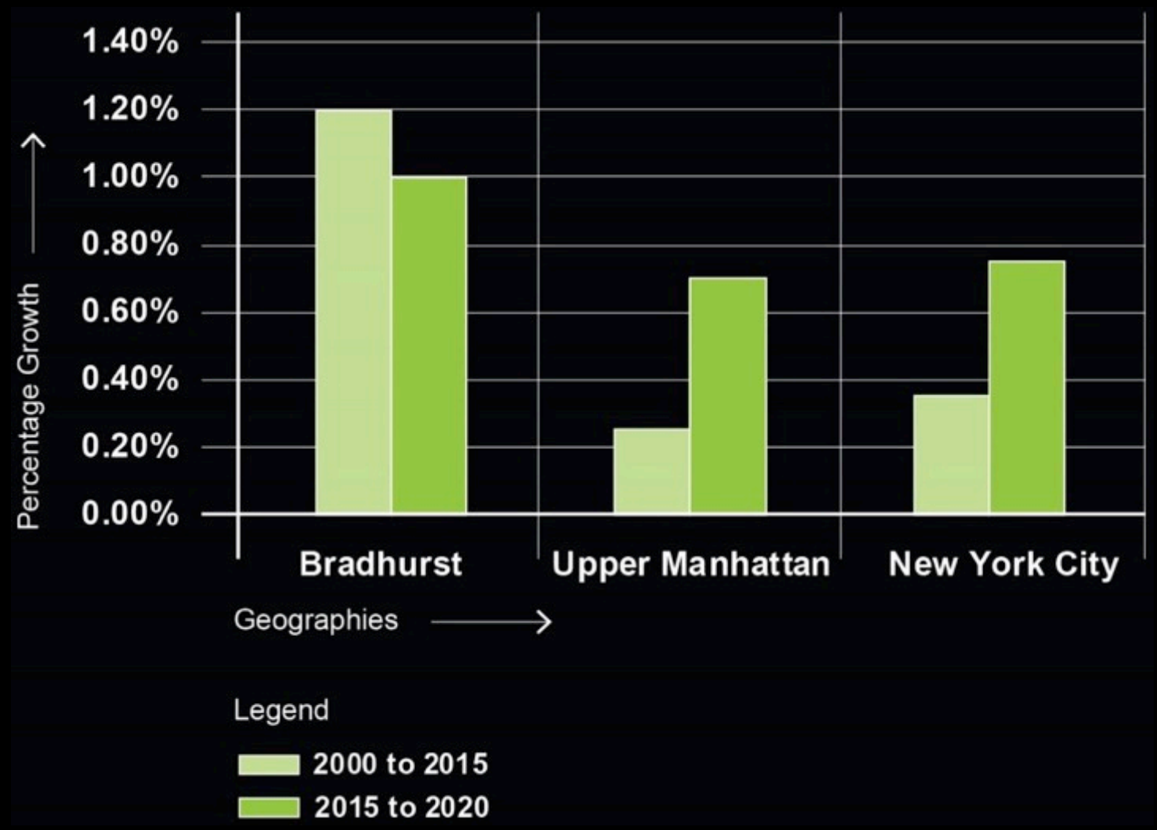
Existing Conditions Analysis

SOCIO-ECONOMIC GEOGRAPHIES FOR ANALYSIS



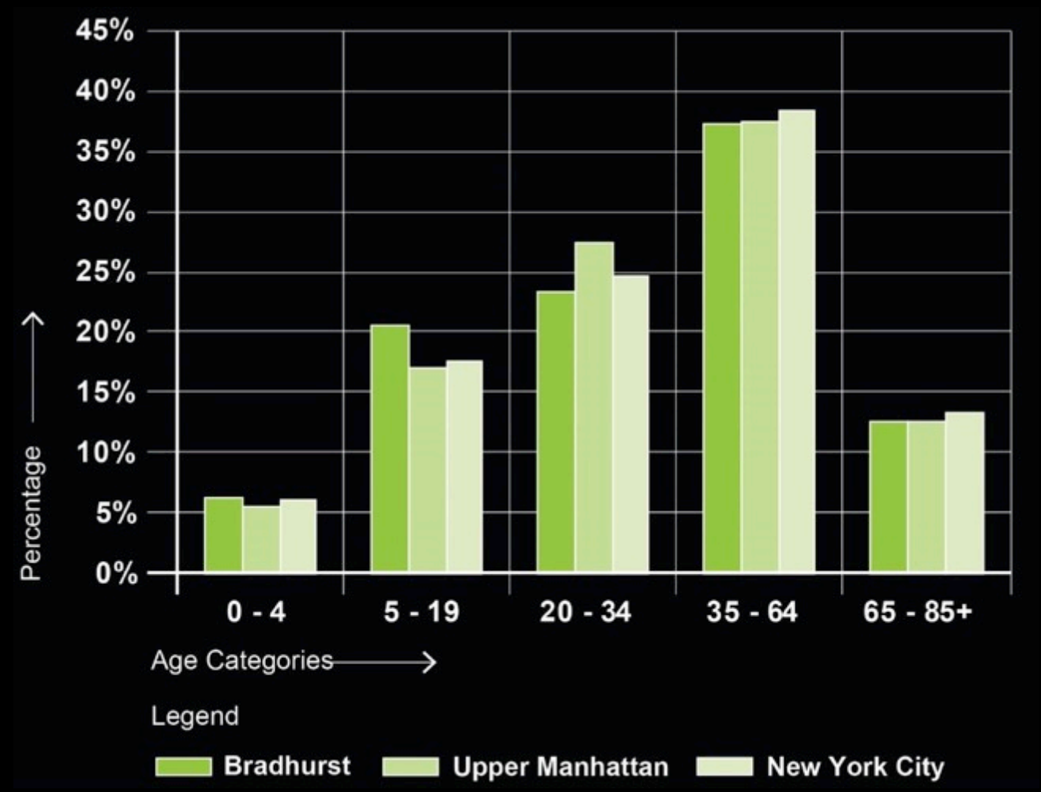
Population Growth

One of the fastest growing neighborhoods in NYC with an increasing demand for neighborhood goods and services



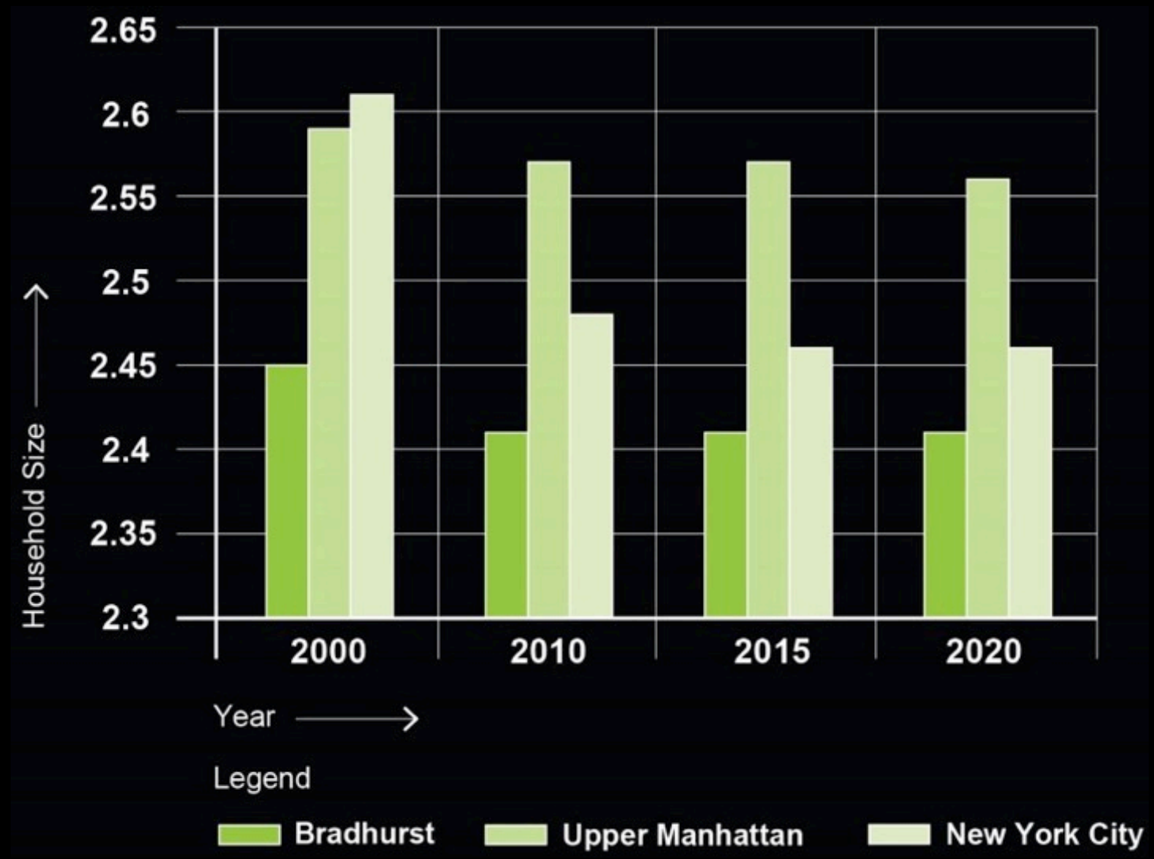
Age Trends

Large share of school going children (after-school / education opportunities) and noticeably younger males (employment opportunities)



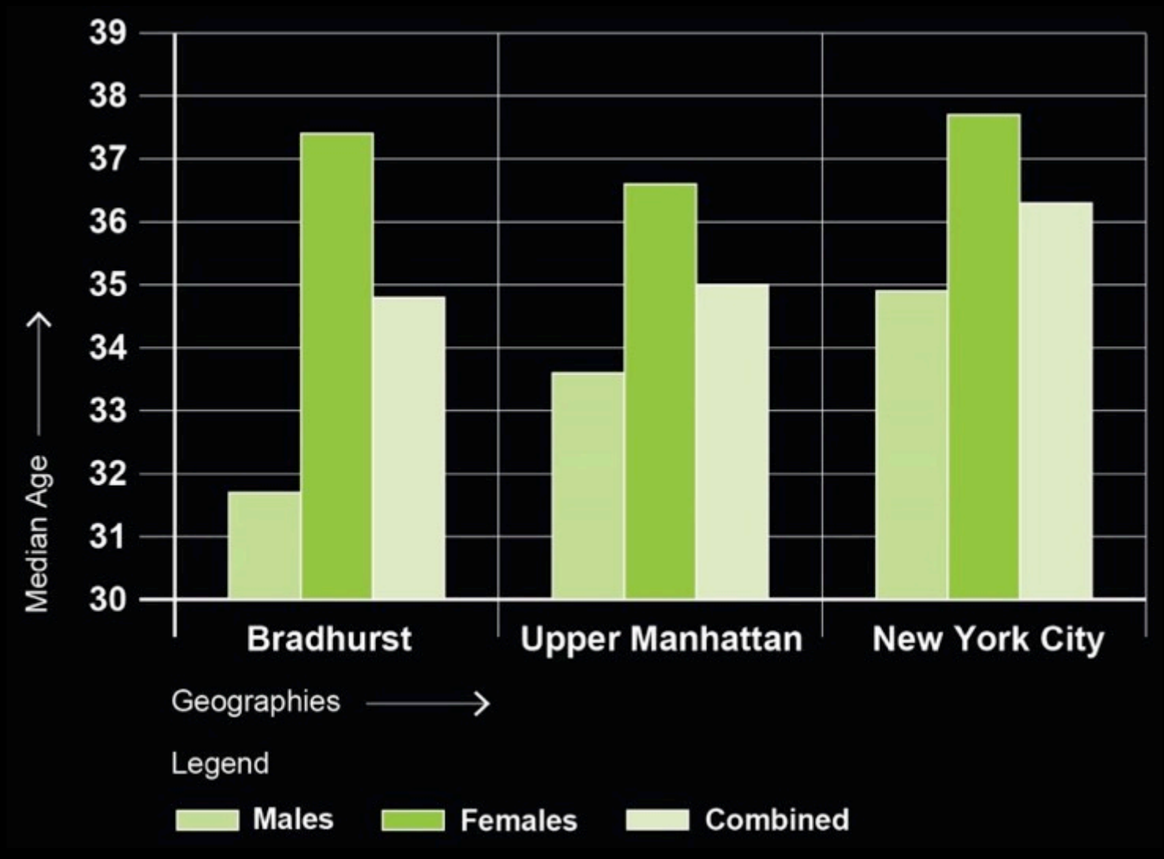
Population Growth

One of the fastest growing neighborhoods in NYC with an increasing demand for neighborhood goods and services



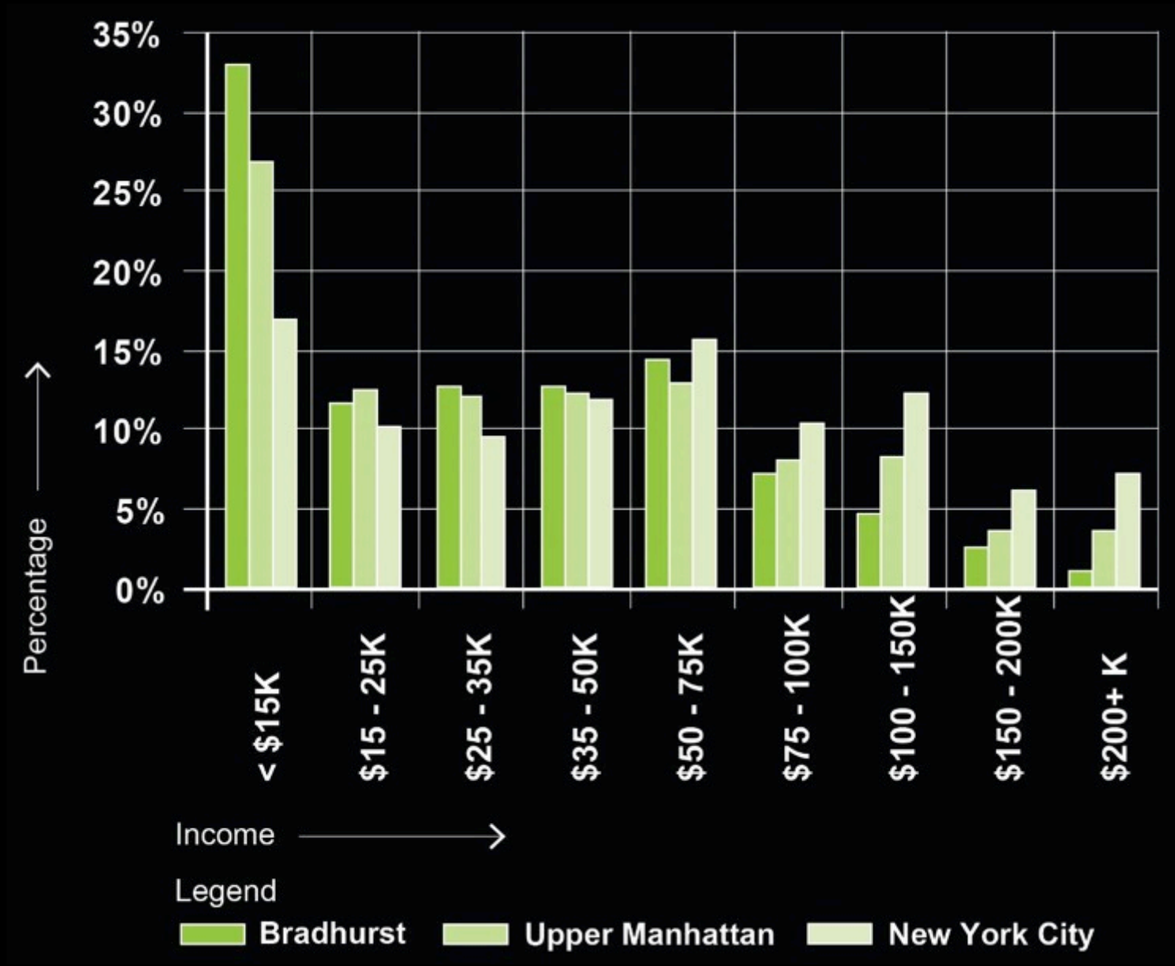
Age Trends

Large share of school going children (after-school / education opportunities) and noticeably younger males (employment opportunities)



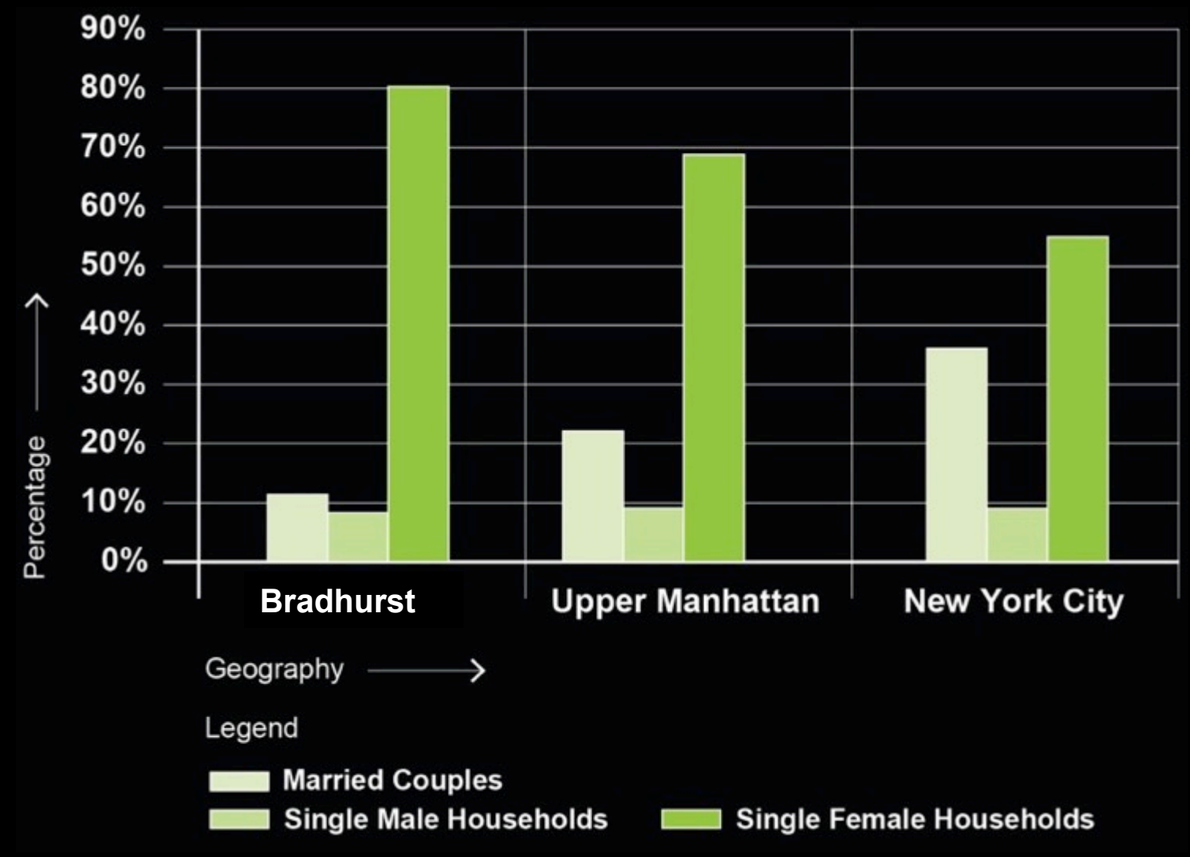
Income Trends

Large share of middle-income households but also a large share of very low-income residents
Median Income: $ 28,586 | $ 33,695 | $ 51,753



Poverty

Women are most affected by poverty. Despite higher education levels, 80% of households below the poverty line are single female households



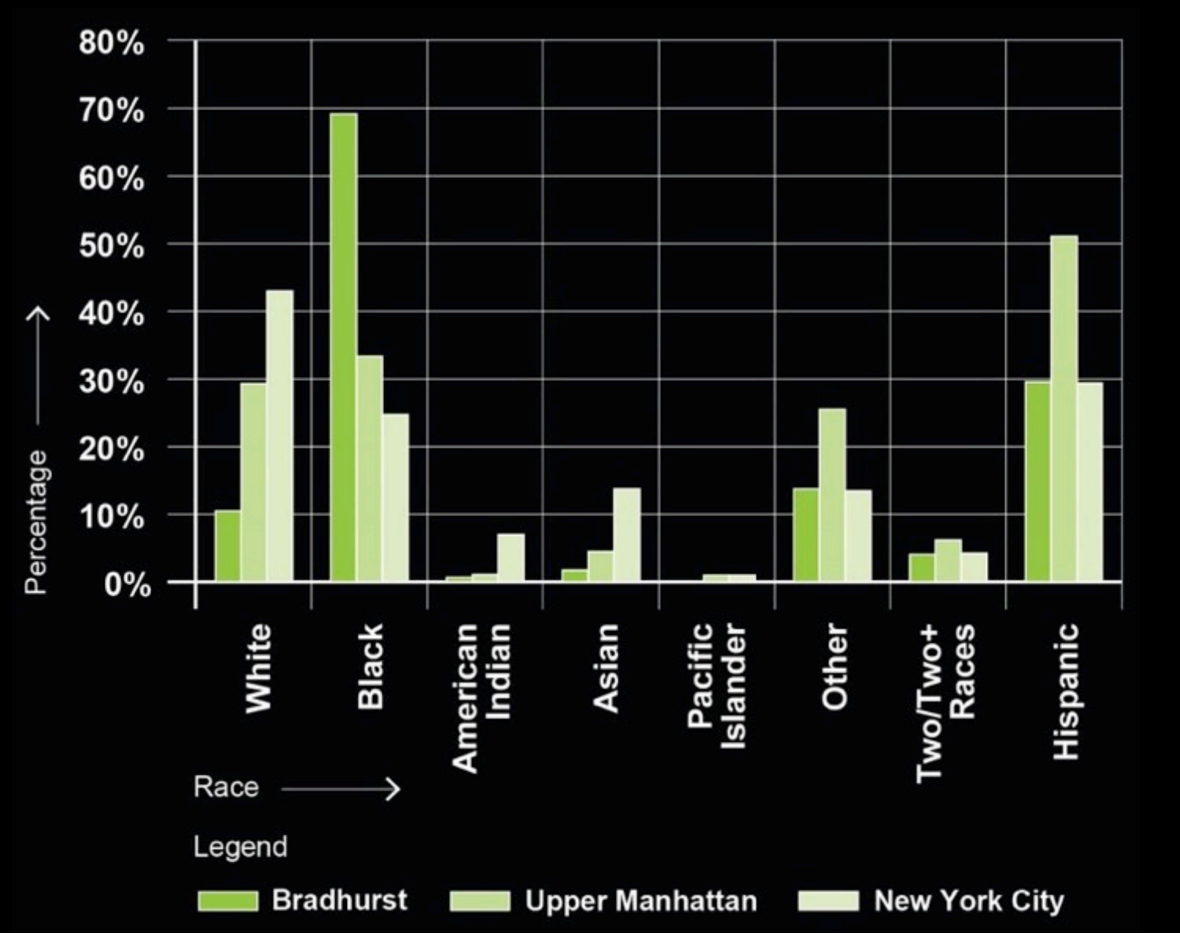
Housing Affordability

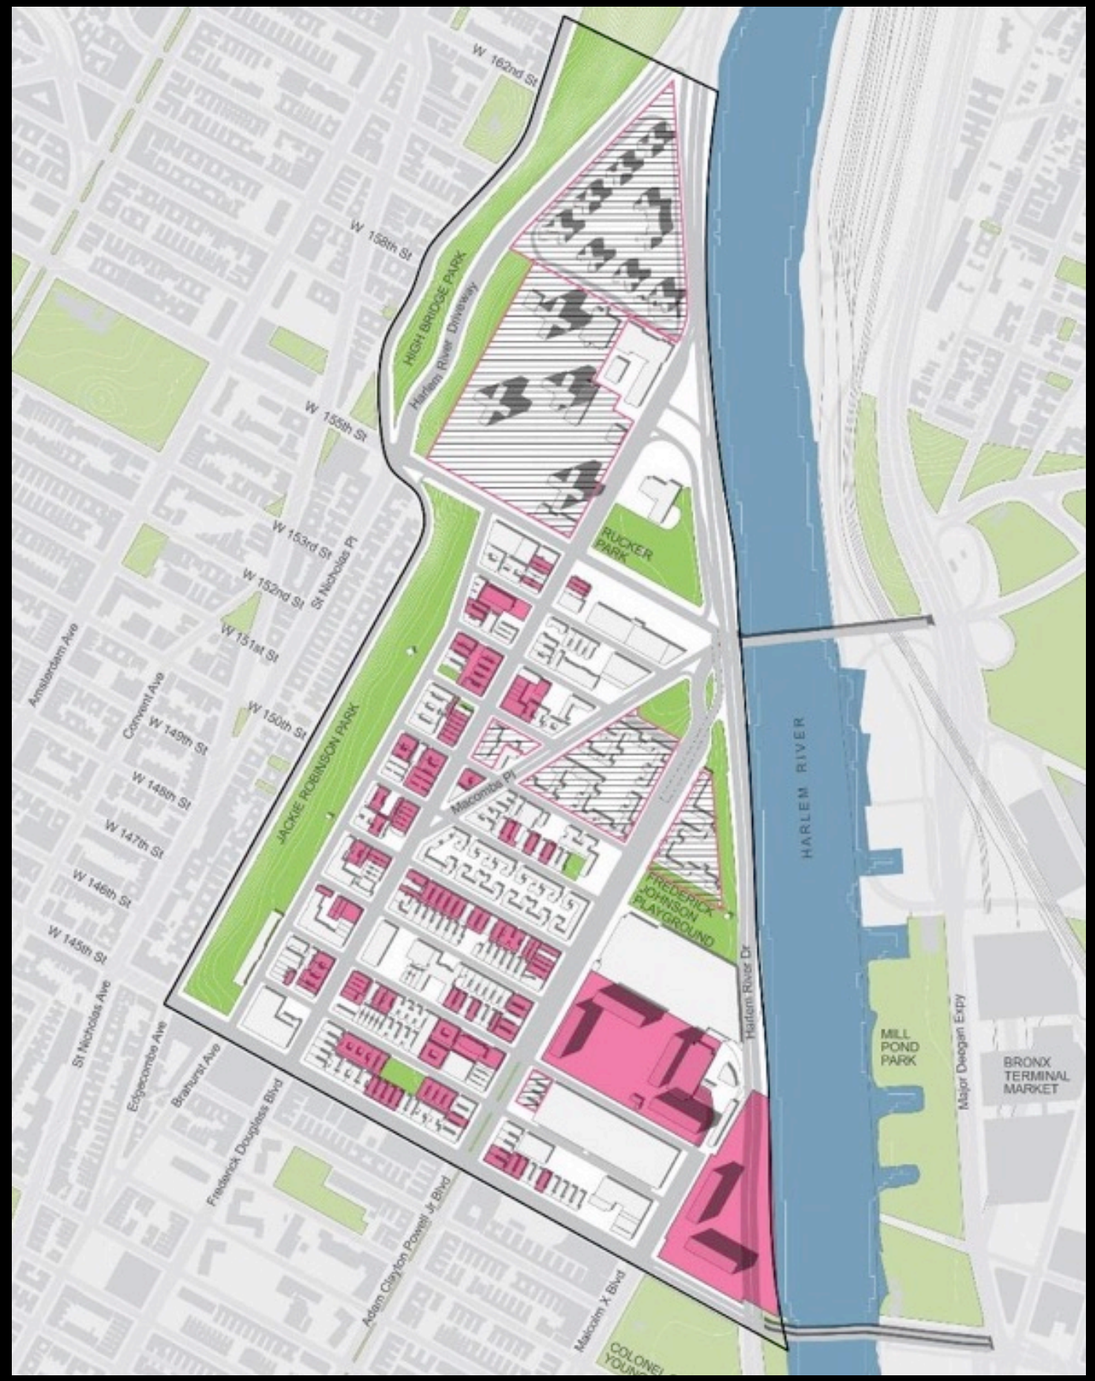
Housing Values are about 30% lower and rents are 20% to 30% lower compared to other geographies

	Bradhurst	Upper Manhattan	NYC
Median Value (Owner Occupied)	$ 352,300	$ 486,590	$ 490, 847
Average Rent	$ 807	$ 1,055	$ 1,279
Median Rent	$ 802	$ 995	$ 1,200

Neighborhood Character

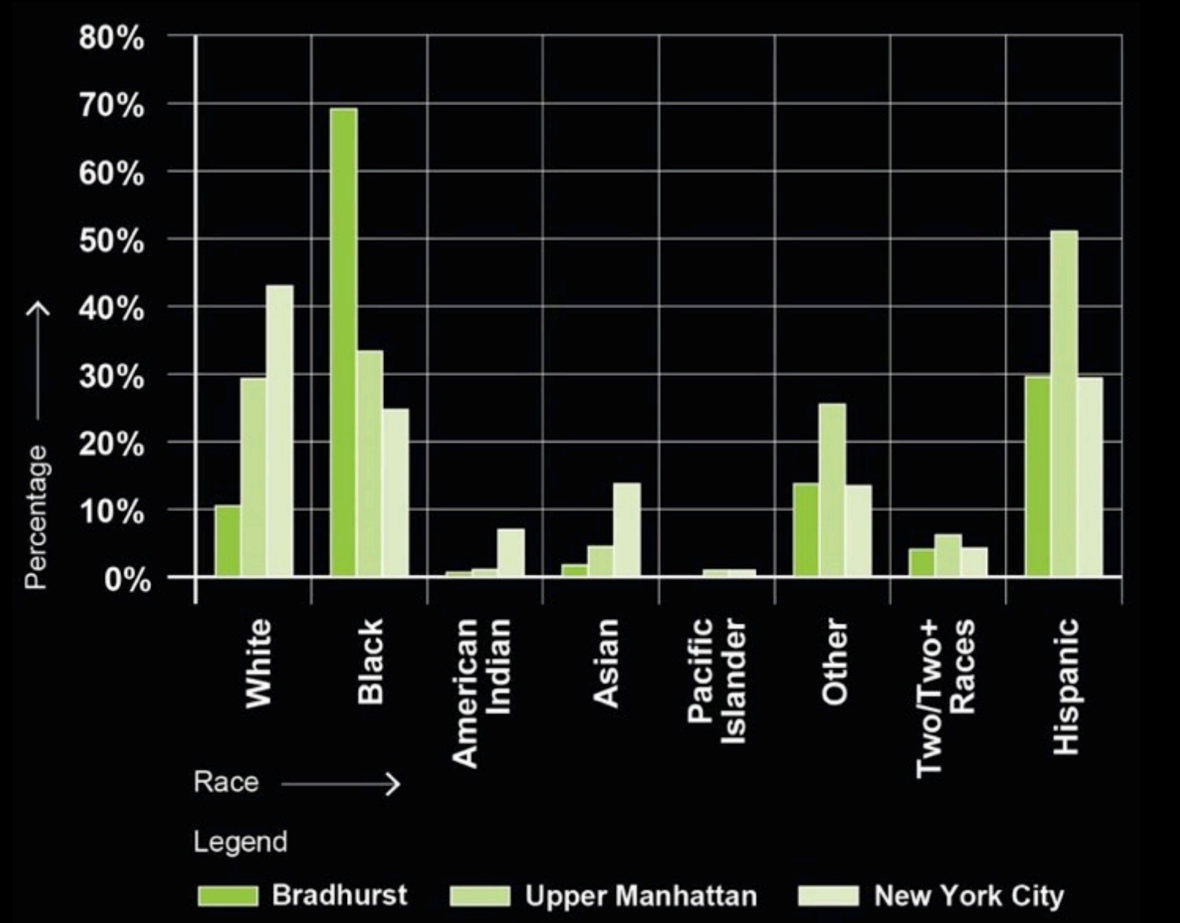
Affordability has contributed to a stable racial and cultural character over the years





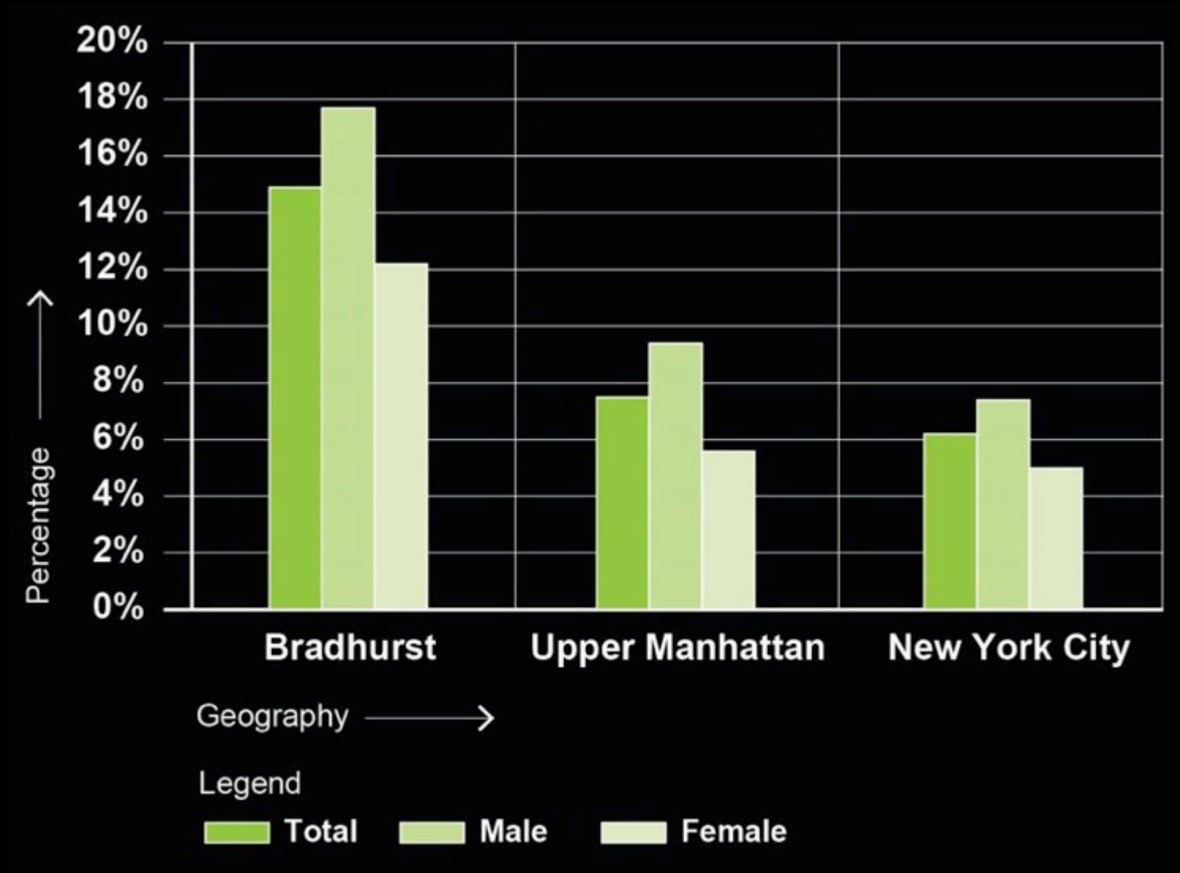
Neighborhood Character

Affordability has contributed to a stable racial and cultural character over the years



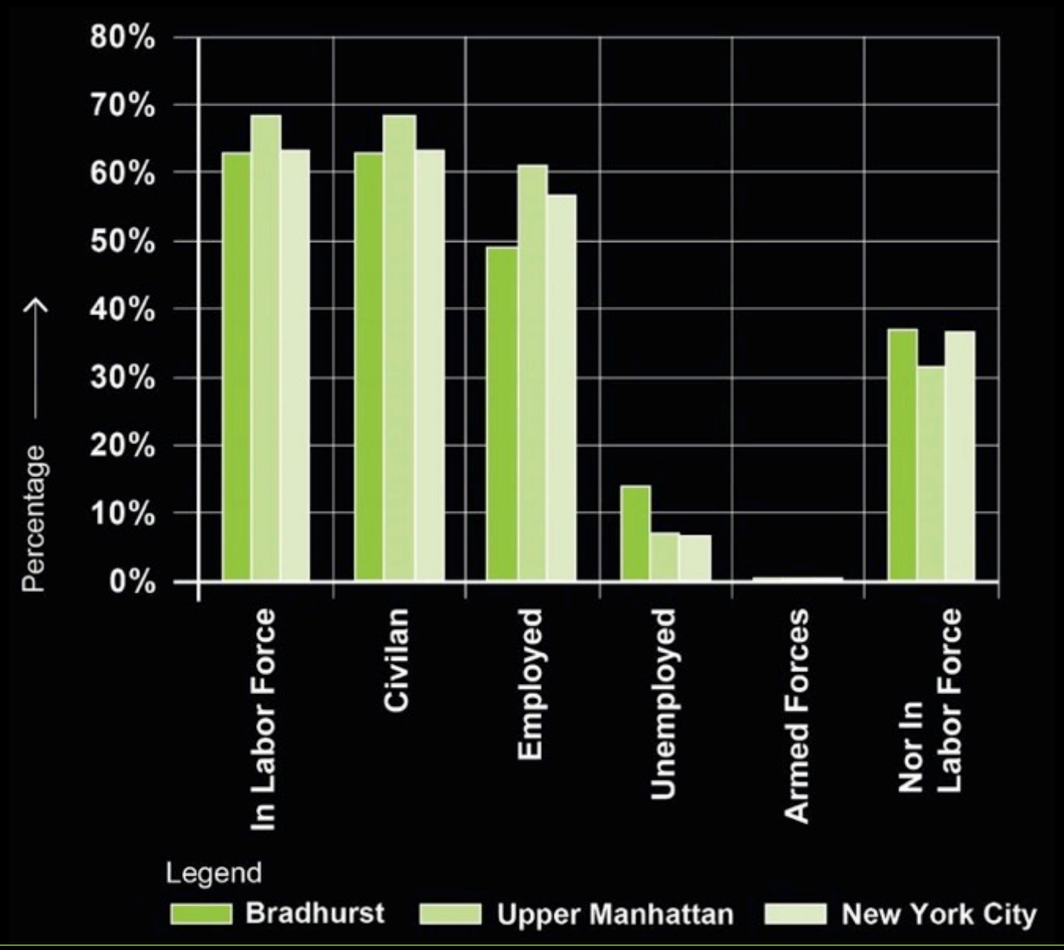
Education

Teenage drop out rates are more than double compared to Upper Manhattan and NYC. 18% of men leave high school without a degree



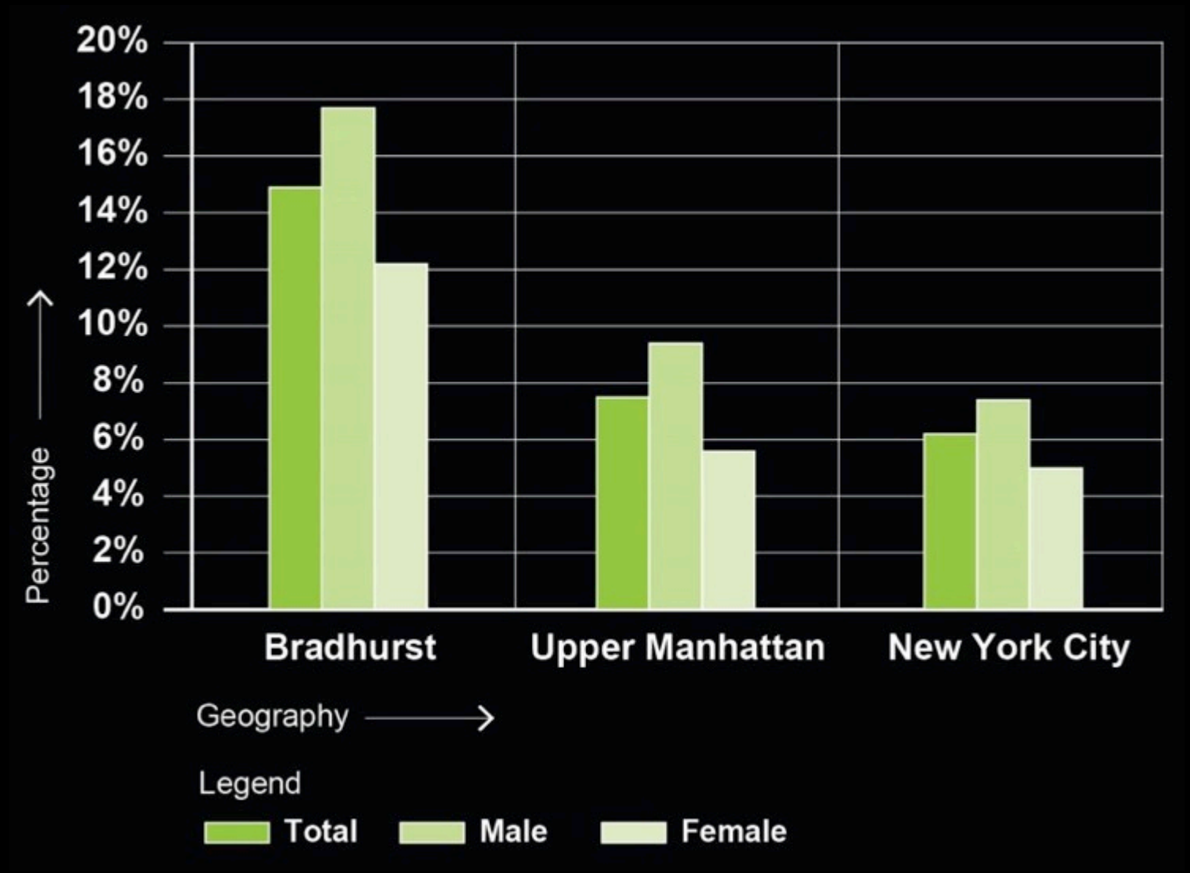
Employment

Despite a high labor force participation rate, unemployment is major issue in Bradhurst. Higher employment in support services vs. professional and management positions



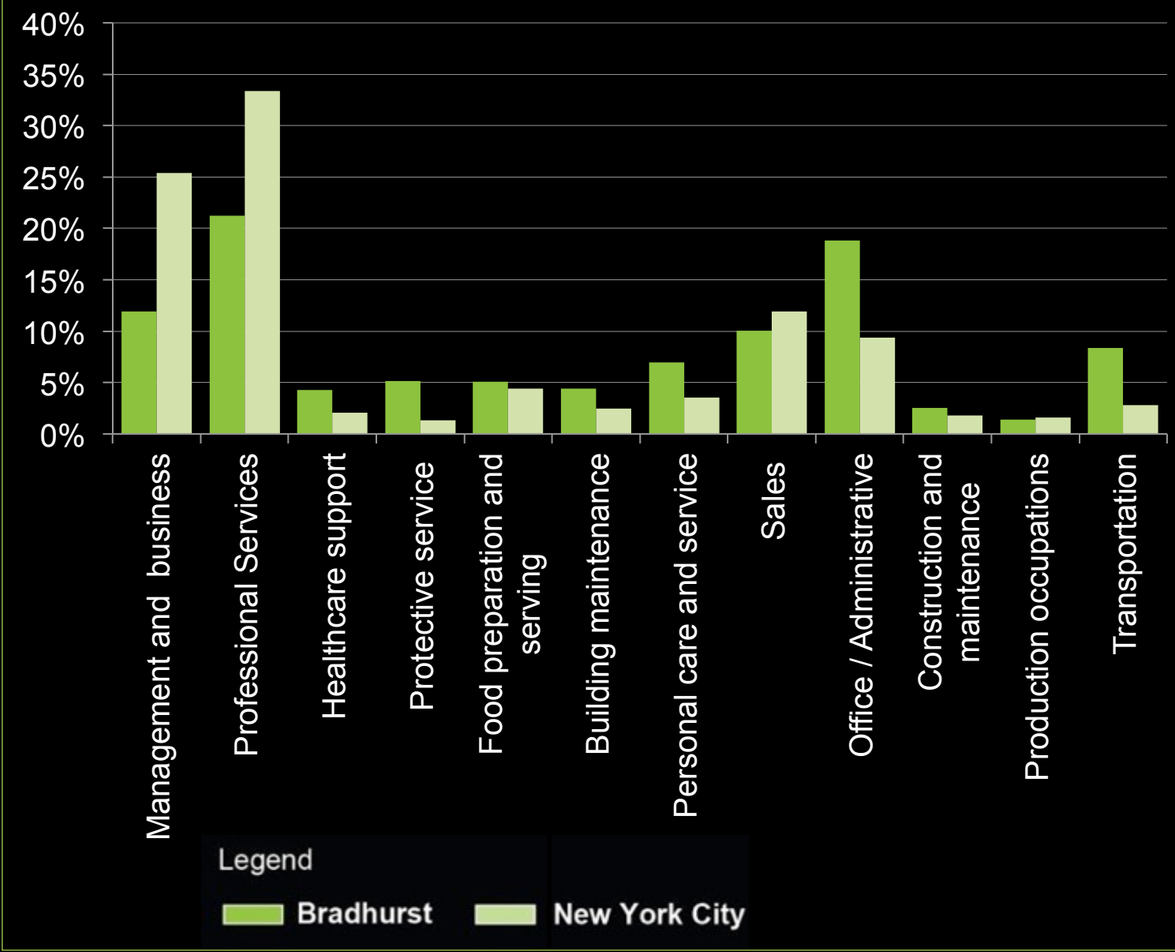
Education

Teenage drop out rates are more than double compared to Upper Manhattan and NYC. 18% of men leave high school without a degree



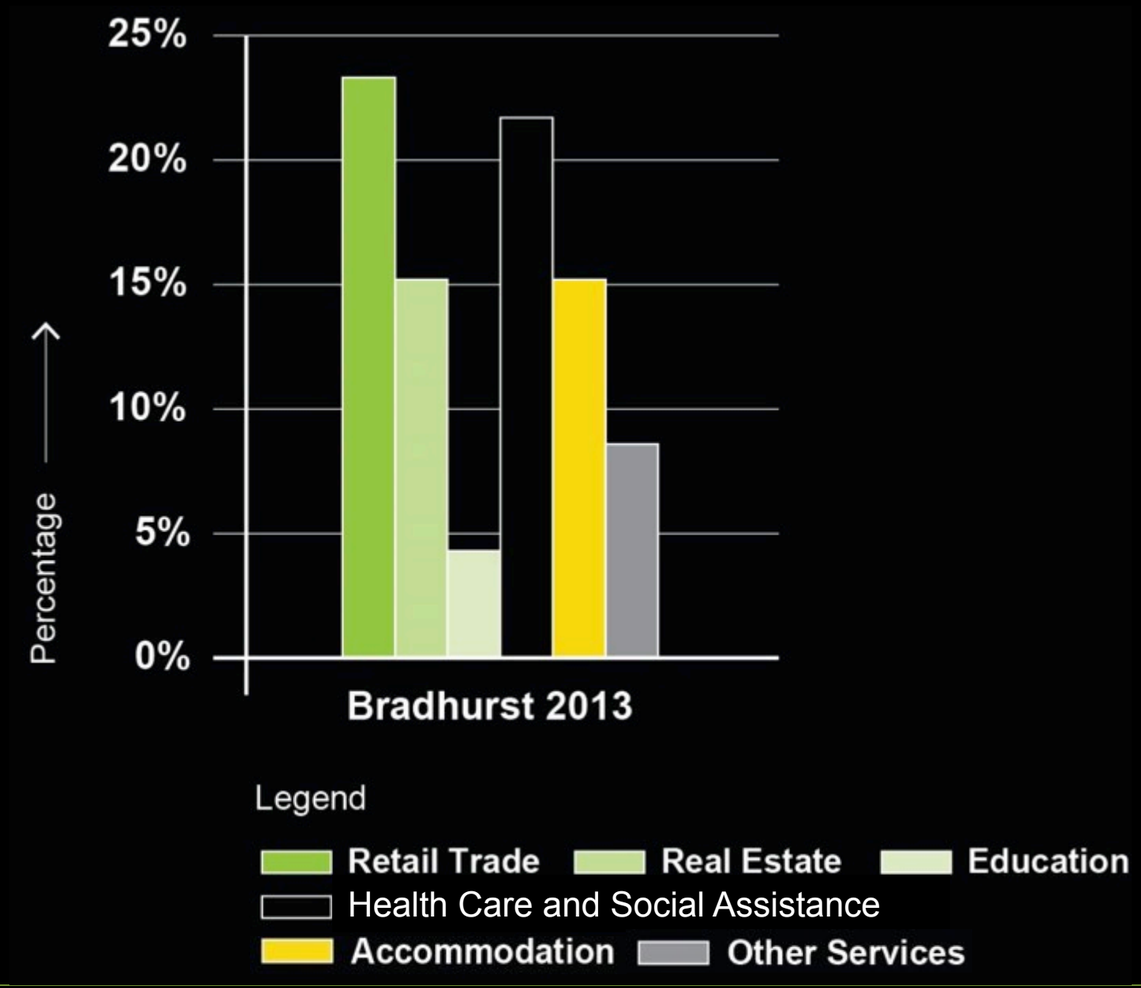
Employment

Despite a high labor force participation rate, unemployment is major issue in Bradhurst. Higher employment in support services vs. professional and management positions



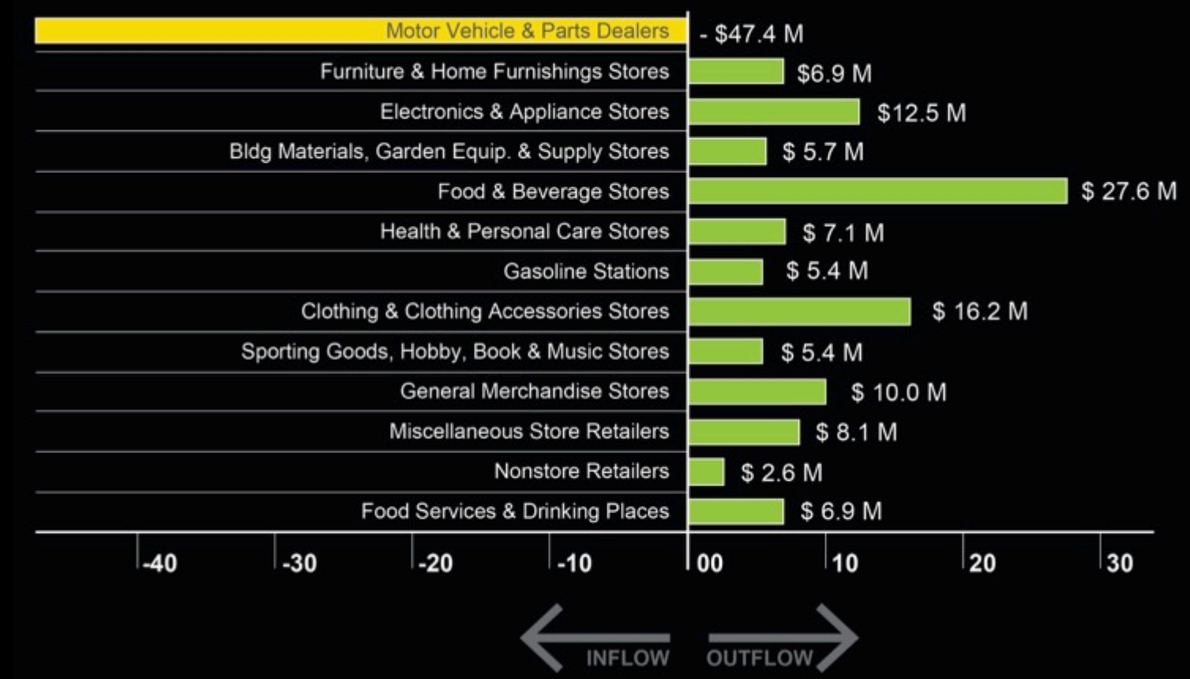
Industries

Mix of businesses include mostly consumer goods stores and neighborhood service establishments



Retail Demand

Neighborhood service businesses demand is not satisfied and residents purchase approximately $114M in retail goods outside of the BOA



Land Use

57% residential (24% residential and 33% mixed residential + commercial/neighborhood scale services)

Only 1.25% commercial uses

C/ PROJECT ADVANCEMENT

Place-Based Community Brownfield Planning
Grant Application

Eligibility Requirements

- ✓ Must be a Community Based Organization (CBO).
- ✓ Proposed planning area is located completely within New York City.
- ✓ A representative of the CBO has met with OER to discuss proposed planning area.
- ✓ Must enter into an agreement with OER for the planning area to be recognized as a place-based community brownfield planning area.
- ✓ Must agree to conduct one community meeting to discuss the project and the proposed planning area.

How to Apply for the Grant

Step 1:	Fill in applicant information……..	Section A
Step 2:	Fill in information about proposed planning area ……...	Section B
Step 3:	Fill in information about proposed development site ……..	Section C
Step 4:	Fill in proposed scope of work ……..	Section D
Step 5:	Fill in vendor information ……..	Section E
Step 6:	Certify the application ……..	Section F
Step 7:	Send application and to BIG Program Administrator at Grants@NYCBIG.info ..……..	Submit
	or by mail to the address below	

How to Submit the Application

This application is available from the OER web site (www.nyc.gov/oer). Please complete electronically and send via email to the BIG Program Administrator at: Grants@NYCBIG.info. Alternatively, this application may be printed, completed manually and mailed, with all required attachments, to:

Office of Environmental Remediation
Brownfield Incentive Grant (BIG) Program
Attn.: Grants Administrator
100 Gold Street, 2nd Floor
New York, NY 10038

How to Receive More Information about BIG Program Grants

For more information about BIG Grants please refer to www.nyc.gov/big; or contact the BIG Program Administrator at (212) 380-1562 or via email at Grants@NYCBIG.info.

City / State / Zip	

In the box below, describe the organization, its mission and accomplishments, and how it has worked with the surrounding community. Attach additional pages if necessary.

The Harlem Congregations for Community Improvement, Inc., founded in 1986, in response to the poverty and unavailability of adequate housing for low-income and struggling middle class residents. The organization is a coalition of more than ninety (90) diverse inter-faith congregations, committed to a holistic approach in revitalizing Harlem, This process includes but not limited to providing economic development and empowerment opportunities to help Harlem residents rebuild and sustain their community.

Over the past thirty (30) years, HCCI implemented a comprehensive portfolio of programs to provide affordable housing to low and moderate income residents, safe streets; offer opportunities for individuals and groups to become and remain economically independent through capital development programs and job placement; offer commercial development opportunities to local businesses; create health and human service facilities and programs; expand cultural programs; increase understanding of and access to health care; provide substantive educational programs for adults and young people. HCCI is committed to forging alliances with community organizations, elected officials and local residents. These alliances have resulted in reduction of crime in the community; increase public sanitation; and preservation and transformation of open spaces.

HCCI is a not-for-profit, 501(c)(3) corporation governed by a Board of Directors, and relies on support from grants, donations and operating reserve funds. HCCI provides a grass roots response from the religious community to the cries of the poor and the struggling middle class, in one of the most densely populated and economically disadvantaged communities in the nation.

Leveraging more than $300 million in support from federal, state and city agencies, HCCI's real estate office has developed more the 3,500 units of low, moderate and middle income housing and an average of sixty (60) commercial spaces including a 45,000 sq ft supermarket and a 10,000 sq ft day care center. HCCI's social services department provides scattered site housing for sixty (60) families and individuals living with HIV/AIDS. HCCI extends the affordability of housing, when regulatory agreements expire, thus preserving the availability of apartments for low-income and middle class residents. HCCI assisted more than 2,000 families and individuals in achieving the dream of homeownership. HCCI counseled more than 35,000 residents through group seminars and individual home ownership and financial literacy training.

To date, HCCI facilitated approximately 2,000 residents in employment opportunities. This was accomplished through adult education programs which include soft employment skills, (literacy training in conjunction with literacy partners), computer software training and job placement.

Section B: Proposed Planning Area Description

Bradhurst BOA	200 acres	Manhattan
Provide a name for the proposed area	Approximate acreage	Borough

Describe the proposed planning area and its boundaries, and identify any strategic development sites within the area. Describe any known or suspected environmental contamination, the need for the project, and the Applicant's and community's vision for the area. Explain the steps the Applicant will take to realize this vision. Attach additional pages if necessary. Attach a map of the geographic area and strategic sites to the application.

The larger planning area also known as the Bradhurst Brownfield Opportunity Area (BOA) is in Phase 2 of the New York State Brownfield Opportunity Area (NYS BOA) Program. The area is roughly 210 acres and is located entirely in Manhattan Community Board 10. Exhibit A shows in detail the extents of the Proposed Planning Area (Bradhurst BOA) which is roughly bound by 145th Street in the south, 163rd Street in the north, Harlem River in the east and Edgecombe Avenue in the west. As part of the NYS BOA program, the Bradhurst Revitalization study (which includes the entire Bradhurst BOA) will provide an in-depth and thorough description and analysis of existing conditions, opportunities, and reuse potential of strategic sites that can be catalysts for the revitalization of Bradhurst neighborhood.

Planning Background
As part of Bradhurst Revitalization efforts, in addition to the technical planning and economic analysis, over the last two years HCCI along with Harlem Community Development Corporation (HCDC) and the MUD Workshop Consultant Team (together, referred to as the "BOA team") conducted three steering committee meetings, two community workshops, and several site walkthrough and focus groups with stakeholders and community members to ascertain community vision for the revitalization of the Bradhurst BOA. The vision for the revitalization of the area included both community & economic development goals and open space & urban design goals as stated below:

Community & Economic Development Goals
• Create employment, job training and youth recreational/educational opportunities for the local community;
• Assess business needs and need for services to best implement a diverse mix of land uses; and
• Work with Bradhurst area businesses, the City and state to develop environmentally friendly business practices.

Open Space & Urban Design Goals
• Create a set of Harlem urban design principles for the Bradhurst Area that improve physical connections in the neighborhood and make it more walkable, accessible and integrated;
• Reinvigorate the area under the 155th Street viaduct and develop it into a community focal point; and
• Create appropriate waterfront access, shoreline and habitat restoration and recreational use opportunities.

To further the aforementioned community goals, the BOA team has determined a list of strategic sites and potential uses / community based program, and is currently developing an "implementation toolkit" including an urban design framework, priority sites and projects, potential funding sources and partners that will further these goals and help with the implementation of individual projects and initiatives.

Section C: Anticipated Development Site in Proposed Planning Area

Describe any proposed development site(s) located within the planning area discussed in Section B. Please include the property address, tax block(s) and lot(s), and a description of site's future development and use. Describe the community support for the project, e.g. from elected officials, Community Boards, local residents, and/or other local organizations. Indicate when a community meeting about the project will take place. Attach additional pages if necessary.

Project Description

A majority of the strategic sites within the Bradhurst BOA are privately owned and this poses a huge constraint to the development of these sites in accordance with community priorities. A number of private property owners who were holding onto their properties or renting them for uses such as car wash, storage or gas stations are now keen to capitalize on the changing market trends and new public investments in the area.

The revitalization work led by HCCI and its stakeholders over the last few decades has made Bradhurst a secure and safe neighborhood and has added (as well as preserved) many affordable housing units for the community currently residing in the area. In addition, Bradhurst's excellent transit connectivity and recent public investments announced by the NYC Department of Parks & Recreation has attracted the attention of many developers who are keen on exploring this area for "highest and best use" (most profitable use in response to market conditions). Meaning, sites that were utilized for lower revenue generating uses such as gas stations, car wash etc. can now support higher revenue generating uses such as housing, commercial etc. Over the last year, the Consultant Team discovered through site walkthroughs and public records that at least two of the privately owned strategic sites were slated for high rise 100% market rate condominium development. These type of developments are not consistent with the community feedback received during the outreach process and is bound to displace current residents at a fast pace.

In order to address this issue, the Bradhurst BOA team is applying for a grant to conduct a zoning analysis of the most sought after areas within the Brahurst BOA. This study will be conducted to understand the likely development scenarios in the future and then recommend strategies to plan for a mixed use community consistent with the community goals and including an increase in specialized workforce and economic opportunities, and the preservation of affordable / subsidized housing. This area is shows in the Exhibit B.

Project Site Description

The project site indicated in Exhibit B extends from 150th Street in the north to 145th Street in the south and from Harlem River in the east to Jackie Robinson Park in the west. Within this defined project site, the existing zoning is predominantly R7-2 (and R8 in small pockets) with commercial overlays along the north-south avenues, and small pockets of C4-4D commercial districts. R7-2 districts have a maximum allowable FAR of 3.44, of which up to 2 FAR can be used for local commercial uses. The existing zoning is therefore not ideal for promoting a robust mixed-use neighborhood. In order to promote a more mixed-use character, the area could be rezoned to a commercial district, which would allow for a wider range of commercial activity while maintaining residential uses and housing supply. Alternatively, a special zoning district could be proposed, similar to the Special Clinton District. Such a special district could provide area-specific mechanisms aimed at preserving existing uses (e.g., subsidized housing), while promoting/incentivizing additional desired uses via floor area bonuses for example. All these scenarios however, will have to be tested with regards to built environment density, market conditions, infrastructure etc.

Section D: Proposed Scope of Work

Describe the proposed scope of work. Include specific deliverables, the vendor(s) who will perform the work and the price for each deliverable or service. Attach additional pages if necessary.

Description of Tasks

Task 1: Existing Conditions Analysis

The existing conditions analysis will involve documenting existing zoning and uses within a ¼ mile radius of the outlined project site (Exhibit B). The BOA team will also identify any major rezonings and residential market / development trends. In addition the BOA team will conduct a soft sites analysis to determine sites that could be slated for development within the coming years. This soft sites analysis be based on the guidelines provided by the Department of City Planning and will include sequential maps / visuals showing the soft sites selection process. In addition to selecting the soft sites, The BOA team will also develop a digital 3D view of the existing project area.

Deliverables

- Maps / visuals and accompanying texts to support analysis of existing and new proposed rezonings
- Maps / visuals and accompanying texts to show soft sites selection and analysis
- Digital 3-D view of existing project area

Task 2: As-of-Right Full Build Out Analysis

This task will entail developing the digital 3D model to show the bulk (volumes and heights) of new developments that would be allowed as of right under the current zoning. At this stage the BOA team anticipates that this build out will be done for the soft sites and strategic sites already selected by the team and community members.

Deliverables

- 3D massing showing the as of right bulk on soft sites and strategic sites

Task 3: Defining Zoning Options

Based on existing market trends, development trends, current application for new developments / public infrastructure improvements in the area and a review of recent community (and Community Board) input on developments, the BOA team will define two to three rezoning options within the project area. These rezoning options will be tested on the soft sites and strategic sites and the BOA team will develop 3D visuals to visually show the defined zoning options. Based on these visuals and analysis, the BOA team will develop zoning recommendations that will uphold the community vision and needs stated above, as well as acknowledge the existing market and development trends.

Deliverables

- 3D massing showing the new defined zoning options on soft sites and strategic sites
- Recommendations that will balance market trends and uphold community vision and needs

Note:

Each of the three tasks listed above will include regular meetings within the BOA team. These meetings will include HCCI, HCDC and Metropolitan Urban Design Workshop as well as any other stakeholder / member of BOA consultant depending on the requirements / needs of particular tasks. Exhibit C shows the schedule of work for all tasks.

Section E: Vendor(s) to Perform Work

Please identify the vendor(s) who will be performing the work discussed in Section D.

Section F: Application Certifications

Read the following statements and certify below that you have read, understand and agree to all terms:

- The individual signing on behalf of the Applicant is fully authorized to do so, and to certify as to the following on behalf of the Applicant.
- Applicant has read and is aware of the eligibility criteria, rules and regulations applicable to the BIG Program, and to the particular type(s) of grants applied for, and agrees to be bound by the terms of the BIG Program and by the determinations of the BIG Program Administrator and the New York City Office of Environmental Remediation.
- Applicant is eligible for the type of grant(s) applied for and is not debarred from receiving federal or New York City funding.
- Applicant certifies that all statements and certifications made in this application are in all respects complete, accurate, true and not misleading as of the date of this application, and shall remain so as of the date of the Grant Agreement, if any. Should any material changes occur prior to entering into a Grant Agreement, Applicant shall submit a revised and updated application.
- Applicant recognizes and acknowledges: (i) that Applicant will be required to enter into a Grant Agreement as a condition of any grant that may be directly awarded to the applicant; (ii) that grant monies, if awarded, may cover only a portion of the cost of the project; and (iii) that the BIG Program Administrator is acting only as a conduit of City funds and not as a principal, and that payment of grant monies, if awarded, will be forthcoming only when and if the grant monies are provided to the BIG Program Administrator by the New York City Economic Development Corporation.
- Applicant certifies that the City, NYCEDC and the Grant Administrator are entitled to rely on the above certifications.

☑ ***I certify that I have read, understand and agree to all statements provided above.***

Provide the name and contact information for the organization representative filling out this certification.

Post Office Site

The post office site is part of the Bradhurst Brownfield Opportunity Area Study. The post office site located on two tax lots (83 Macombs Place and 93 Macombs Place) is one of the strategic sites that will catalyze the revitalization of the Bradhurst neighborhood. This site was selected as strategic revitalization site and prioritized by the community for development after a series of workshops and community outreach meetings. The community determined several uses for this site that would benefit the neighborhood and its residents. These uses include affordable housing and a community space, which could potentially be programmed with one or more of the following specific uses:

- Workforce training center for youth and adults
- Library
- Other cultural programming
- Potential environmental learning center
- After school programs
- Community gathering space

Harlem Congregations for Community Improvement, who are the grantees of the Brownfield Opportunity Area Grant have engaged with the owners to further conversations regarding development on this site. Following tasks and technical assistance in these areas will help further the development of this site:

1. Development of real estate program for the development of the site
2. Cost benefit analysis
3. Identification of gaps in funding and identification of funding sources that will help fill the financial gaps
4. Assessment of potential assets and barriers to implementing this project
5. Identifying next steps/actions needed for implementation

BACKGROUND INFORMATION

Executive Summary:

The Post Office Site is located in an area, which was historically part of the Harlem River. The site was likely filled in with an unregulated urban fill material. Urban fill in the New York City metropolitan area often contains contaminated materials. Based on the names or the former owners of the site and the New York State Department of Environmental Conservation (NYSDEC) Petroleum Bulk Storage (PBS) listing, the site may have been previously used as a gasoline station. The current PBS records also indicate that there are active oil storage tanks at the site.

Parcel Information (Borough/Block/Lot): a: MN/2039/15
b: MN/2039/45

Name: Post Office Site

Address: a: 83 Macombs Place New York, NY 10039
b: 93 Macombs Place New York, NY 10039

Owner: a: United States Postal Service
b: Colonial Park Management

Previous Owner(s)/Operators:

a: Atlantic Richfield Co; BP Oil Corp; Charles J Bensley; Leemilts Petroleum, Inc; Sinclair Refining Corp; 83 Macombs Place Inc.; United States Postal Service
b: Colonial Park Po Inc.; United States of America; Charles J./L/W/T Bensley; Colonial Park Management LLC

Size: (sq ft) 27,978

Size: (acres) 0.642286

Zoning: R7-2

Use Status:

The property is used as a United States Post Office (Colonial Park Station) with associated parking lot.

Adjacent Use:

North: To the north of the site is Fordham Toyota showroom and service center.
South: To the south of the site is the Harlem Vista Hotel.
East: To the east of the site is Macombs Place, beyond which is Colonel Charles Young Triangle.
West: To the west of the site are four adjoined apartment buildings with associated parking lot.

Property Description:

The site is located along the west side of Macombs Place between West 153rd Street and West 154th Street. The site consists of two parcels of land located at the corner of Macombs Place and West 154th Street. The site contains one single-story brick building housing the United States Postal Service Colonial Park Station, and associated parking lot and loading dock for postal trucks.

Existing Infrastructure and Access Points: The site is serviced by the M2 bus route located about a block to the east along Adam Clayton Powell Jr. Boulevard. The M2 and Bx6 bus routes can also be accessed one block to the north along West 155th Street and the M10 bus route can be accessed one bock to the west along Frederick Douglass Boulevard.

Natural and Cultural Resources and Features: Elevation at the site varies from approximately 21 feet above mean sea level (amsl) to 29 feet amsl. The nearest body of water is the Harlem River, located approximately 410 feet east of the site's eastern edge.

Environmental History: The site exists in a location which was formerly a part of the Harlem River. The site was potentially filled in with material which was not under any regulatory agency control and therefore may have contained contaminated material. This urban fill material in the NYC metropolitan area has been known to contain construction and demolition (C&D) debris, soil, gravel, industrial debris, and various forms of ash.

The site is currently registered on the New York State Department of Environmental Conservation (NYSDEC) Petroleum Bulk Storage (PBS) database under regulatory numbers 2-291943 (Parcel a) and 2- 476099 (Parcel b). The PBS record for 2-291943 indicates that the site name is Power Test/Getty #00281, suggesting that the site was formerly a gasoline station. The record indicates that one 550-gallon Aboveground Storage Tank (AST) is currently active at the site. The record also indicates that one 2,000- gallon Underground Storage Tank (UST) and five 550-gallon USTs were removed from the site. The PBS record for 2-476099 indicates that one 1,500-gallon UST was removed from the site.

FY2019

Instructions

Instructions

This application must be completed by an officer or employee of the organization that is applying for discretionary funding. All requests for funding must to legible, organized, complete and accurate. Keep a copy of the completed application for your records before it is submitted. All sections of the application are mandatory unless otherwise noted.

The person who completes this form must be authorized by the organization to complete it and must know enough about the organization to be able to fully, truthfully and accurately complete the form.

Requests for funding that are submitted to the City Council are considered public documents.

WHERE AND WHEN TO SUBMIT THIS APPLICATION:

Applications must be submitted from January 2, 2018 through February 20, 2018. Please be advised that no late applications will be accepted.

In the checklist you will be provided with everything you will need to have access to in order to complete the application.

All questions should be directed to discretionary@council.nyc.gov.

Once the application is complete you will be prompted to print and sign certain documents to be uploaded at the end of this application. Please note that applications are not considered finalized/complete without submission of required forms.

Checklist

Application Checklist

Below is a list of information you will need access to in order to complete the application. Be sure to have this information handy to ensure a smooth application process.

Information required:

1. Federal Employer Identification Number (FEIN)

2. New York State Charities Bureau Registration Number

3. Budget of Organization requesting funds

4. HHS Accelerator Prequalification Status and Approved Service Areas

5. Documentation concerning Independent Inquiries, Monitorships, Government Investigations, Inquiries or Audits (other than routine annual audit)

6. Staffing information for the program you are requesting funds for

7. Certificate of Incorporation (for those incorporated on or after July 1, 2016)

8. Adobe Reader is required for viewing and printing the Portable Document Format (PDF) documents at the end of this application.

Has the organization ever applied for Council funding in the past?
Yes

Was the organization incorporated before July 1, 2016
Yes

If no, please provide the date of incorporation

If No, you must fill out and attach this form:Supplementary Application Form
Any organization applying for New York City Council discretionary funding that was Created after July 1, 2016 must complete this form

Is/Will the organization be applying for Prequalification Status from MOCS via HHS Accelerator?
If your organization receives more than $10,000 in City Council funding, it must be prequalified in HHS Accelerator and complete the Capacity Building Training Requirement.
Yes

Is the organization registered with the Charities Bureau of the New York State Attorney General
Yes

If Yes, Please Provide ID Number
61707

Is the organization exempt from registering with the Charities Bureau
No

If yes, you must fill out and attach this form: Charities Bureau Exemption Form

What is the estimated budget for the organization's current fiscal year
3528282

Please provide the organization the mission / goal.
Harlem Congregations for Community Improvement, Inc. (HCCI) is committed to the holistic revitalization of Harlem. We provide economic development and empowerment opportunities to help Harlem residents rebuild and sustain their community.

Founded in 1986, HCCI is a coalition of inter-faith congregations that has implemented a comprehensive portfolio of programs to provide affordable housing and safe streets; offer opportunities for individuals and groups to become and remain economically independent; increase understanding of and access to health care; and provide substantive educational programs for adults and young people. Through alliances with other community organizations, elected officials and local residents, HCCI has also helped reduce crime in the community; increase public sanitation; and preserve and transform open space.

Leveraging more than $350 million in support from federal, state, and city agencies, HCCI's real estate office has developed more than 3,500 units of low, moderate and middle-income housing and nearly 50 commercial spaces including a 45,000 sq. ft. Pathmark supermarket. Our health office provides scattered-site housing for 60 families and individuals living with HIV/AIDS. HCCI's adult education programs include soft employment skills, literacy training (in conjunction with Literacy Partners), and computer software training–all linked with job placement. To date, we have placed more than 1800 residents in employment opportunities.

Independent Inquiries, Monitorships, and Government Investigations, Inquiries, and Audits

Within the last 5 years, has the organization been the subject of an independent inquiry, monitorship or government investigation or audit (by any local, state or federal government including any current or past audit by the City Comptroller, request for information or other inquiry from the Department of Investigation and any audit or inquiry by a licensing agency) other than a routine annual audit
Yes

Briefly describe the staffing for the program
Malcolm Punter - President and CEO
Sherill Henry - Associate Deputy Director of Real Estate Development
HCCI community planner and outreach consultant
Metropolitan Urban Design Workshop LLC who are the current NYS Brownfield Opportunity Area Consultants for HCCI will be hired as sub-consultants on this project

Purpose and Use of Funds

Please provide the name of the program
The Harlem Community Waterfront

Please describe the specific programming/services to be funded.
Include a description on how the requested funds will be used.
The Harlem River waterfront bordering the eastern edge of the Bradhurst neighborhood has the potential to become an integral part of the public space network serving the Central Harlem and Bradhurst Community. The Manhattan Greenway Plan of 2006 that envisioned a continuous greenway along the Manhattan shoreline phased this section of the project to be planned in 2018. Once planned and developed, this section of the water's edge will provide continuous and unimpeded access to Manhattan's public waterfront and park system to all residents of Central Harlem.

Historically, the Harlem River Speedway was once a popular recreation spot offering horse and boat racing and a vibrant waterfront promenade. But in the mid-20th century, the Harlem River Drive was constructed in its place as part of Robert Moses' grand roadway plans. What brought a new efficiency for automotive travel, also left a community completely cutoff from access to the water's edge. In 2012, public housing area Polo Grounds and Esplanade Gardens were severely impacted by Hurricane Sandy, which left the waterfront property in need of infrastructural repair.

As part of the Bradhurst Revitalization project which was also funded by the Bradhurst Brownfield Opportunity Area (BOA) program, the project team conducted extensive outreach in 2015-2016 which revealed that the community as a whole desired access to the Harlem River waterfront despite the challenges posed by the Harlem River Drive. The outreach highlighted the community's desire to reclaim this part of the waterfront as a civic amenity with community-based programming, natural habitat restoration and green design that will mitigate the impact of wave actions, storm surges, and sea level rise.
This grant is being requested to create a community plan that will guide the design and development of the water's edge in line with Manhattan Greenway Plan of 2006. The scope of the work will involve technical planning analysis as well as community workshops that will inform the

programming and design of the edge.

Did the organization receive funding for Fiscal Year 2017
Yes

If yes, please describe how the Fiscal Year 2017 funds were utilized.
(Please respond to each separate allocation your organization received.)
• NYC Dept of Human Resources - $1.7 million -Funding to facilitate 60 units of scattered site housing for
people living with HIV/AIDS.
• HPD - $29,730 to fund a community consultant to work with tenant and resident organizations in the HCCI housing portfolio, and to provide affordable housing counseling to the general community.
• SBS - $30,000 to attract business to Harlem's Bradhust area.

Target population to be served
General Population of Central Harlem; NYC

Geographic Area served
e.g. Citywide; Brooklyn; Council District 39; Community Board 6; Flatbush, etc.
Citywide; Council District 9; Community Board 10

Please provide a description of what the organization does and plans to do that invite the community
The project will host three community workshops that will be interactive and open to all community members. These workshops will apprise the community of existing conditions on the site and employ hands-on engagement techniques using scaled drawings, models, programming icon-labels etc. that'll help the community ascertain their priorities and develop an achievable design concept for the area. These community meetings will be advertised at key community locations and residential areas in the Bradhurst neighborhood using posters and flyers and digitally on the HCCI website and Community Board 10 announcements so as to have a more regional reach. In addition, Community Board 10 will also be engaged and the project team will make presentations at their general meetings to get their input and build their support for future implementation.
When will the program operate
Please list the times the program services operate
2018-2019

Please describe the community benefit of the program / services that is being considered for funding
The most immediate community benefit will include a community based plan that will have the support of the Community Board and will serve as a guiding document for development of this section of the Harlem River Waterfront. The services being considered for funding are community outreach workshops, Community Board 10 engagement and presentation, technical planning analyses and to develop a planning report that documents the findings of all community engagement efforts, clarifies the community vision and presents visuals that simulate community desires and goals.
State the location / address where the services are to be provided.
Harlem Congregations for Community Improvement, Inc.
256 W 153rd Street
New York, NY 10039

Proposed or similar services in the past
Yes

If 'YES', please briefly describe how long the services have been offered
Community outreach conducted in 2015-2016 as part of the New York State-funded Bradhurst BOA project helped ascertain the need and some initial community goals regarding the waterfront

development for this section of the Harlem River.
If 'NO', please explain why these services have not been provided before and what qualifications the organization has to start providing these services

Please list all performance evaluations from federal and state entities for the last three years
Include agency, rating and date
HUD Mortgage Coalition Audit June 14, 2016 Findings: None; Conclusion: Clients are well served by this agency. Harlem Congregations for Community Improvement is serving client needs in New York, NY. Unconditional reapproval

An organization requesting discretionary funding must itself deliver the programming/services of the funded program. Subcontractors or consultants must only be an ancillary part of the delivery of the programming/services. Does your organization have the capacity to provide the proposed programming/services?
Yes

Affiliation

Will the program be located in, operated by, or affiliated with a religious school
No

What percentage of the program participants do you estimate also attend the religious school

Will the program be located in, operated by, or affiliated with a religious organization or place of worship
No

What percentage of the program participants do you estimate also are members of or participate in the religious organization or place of worship

If YES, (to either question) please describe what types of outreach and/ or advertising is done to invite the community/general public to participate in the programming/services being offered

Are the services that the funds are being requested for open to all members of the general public regardless of enrollment, membership or any affiliation?
Yes

Acknowledgement

Before you resume, please review the discretionary funding policies and procedures .

Have you viewed the discretionary polices?

Sherill Henry - Associate Deputy Director of Real Estate Development
HCCI community planner and outreach consultant
Metropolitan Urban Design Workshop LLC who are the current NYS Brownfield Opportunity Area Consultants for HCCI will be hired as sub-consultants on this project

Purpose and Use of Funds

Please provide the name of the program
Community Planning and Education Portal

Please describe the specific programming/services to be funded.
Include a description on how the requested funds will be used.
The community planning and education portal will provide information and engagement opportunities to citizens of Central Harlem, enabling them to learn, engage and partner on critical issues impacting community development and the nature of future development / planning in their neighborhood. All tools and information on this portal – including the history of the area's development will empower residents to engage in a more meaningful way to further their aspirations and goals.

The community portal will be digital and accessible from the HCCI website and will have the most up-to-date information regarding projects being currently undertaken by HCCI and being considered by other agencies and community boards.

Original and analytical content will provide awareness to the public on aspects that shape communities and the built environment. These will include discourse and information on policy, zoning, affordable housing, large-scale infrastructure projects, etc. in a way that is digestible. There will be special focus on providing community members with a comprehensive account of their neighborhood and balancing current actions underway with historical background. Any opinions and thoughts expressed on this portal will take into account community input that has been provided through direct community engagement on various initiatives. The portal will also show best examples that reflect current community aspirations and goals. It will help to bridge understanding in both directions between HCCI and the community where each will benefit improved transparency and putting into effect a system of accountability.

This community portal which will be digital, will be developed on a user-friendly content management system and will be maintained on a regular basis.

In addition, the project team will provide special attention educating middle and high school

students in the community on subjects that shape our urban environment and neighborhoods. As the next generation of planners and community leaders these youth and students will be engaged through school presentations, evening class series, or other helpful assemblies that can provide both a history and a how-to for getting involved in the community.

Did the organization receive funding for Fiscal Year 2017
Yes

If yes, please describe how the Fiscal Year 2017 funds were utilized.
(Please respond to each separate allocation your organization received.)
• NYC Dept of Human Resources - $1.7 million -Funding to facilitate 60 units of scattered site housing for
people living with HIV/AIDS.
• HPD - $29,730 to fund a community consultant to work with tenant and resident organizations in the HCCI housing portfolio, and to provide affordable housing counseling to the general community.

Instructions

This application must be completed by an officer or employee of the organization that is applying for discretionary funding. All requests for funding must to legible, organized, complete and accurate. Keep a copy of the completed application for your records before it is submitted. All sections of the application are mandatory unless otherwise noted.

The person who completes this form must be authorized by the organization to complete it and must know enough about the organization to be able to fully, truthfully and accurately complete the form.

Requests for funding that are submitted to the City Council are considered public documents.

WHERE AND WHEN TO SUBMIT THIS APPLICATION:

Applications must be submitted from January 2, 2018 through February 20, 2018. Please be advised that no late applications will be accepted.

In the checklist you will be provided with everything you will need to have access to in order to complete the application.

All questions should be directed to discretionary@council.nyc.gov.

Once the application is complete you will be prompted to print and sign certain documents to be uploaded at the end of this application. Please note that applications are not considered finalized/complete without submission of required forms.

Checklist

Application Checklist

Below is a list of information you will need access to in order to complete the application. Be sure to have this information handy to ensure a smooth application process.

Information required:

1. Federal Employer Identification Number (FEIN)

2. New York State Charities Bureau Registration Number

3. Budget of Organization requesting funds

4. HHS Accelerator Prequalification Status and Approved Service Areas

5. Documentation concerning Independent Inquiries, Monitorships, Government Investigations, Inquiries or Audits (other than routine annual audit)

6. Staffing information for the program you are requesting funds for

7. Certificate of Incorporation (for those incorporated on or after July 1, 2016)

8. Adobe Reader is required for viewing and printing the Portable Document Format (PDF) documents at the end of this application.

Organization and Contact Info

Organization Information

Legal Name of Organization Requesting Funding
Harlem Congregations for Community Improvement, Inc.

Organization Acronym and Other Names Used
HCCI

What is the Organization's Current Federal Employment Number (FEIN)
(FEIN,TIN,EIN) Use the following format: 123456789 (no dash)
133156262

Is the organization's FEIN now, or has it in the past, ever been used by any other organization(s)?
No

If YES please list the name of the organization(s)

Does the organization now use, or in the past, used an FEIN other than the one provided?
No

If yes, please enter the past FEIN Number

Is the organization tax exempt under the Internal Revenue Code?
Yes

If YES, is the organization's tax exempt status current with the Internal Revenue Service?
Yes

Has the organization ever had its tax exempt status revoked?
No

Please Provide the Organization's Web site
www.hcci.org

Please provide the administrative Street Address
256 W. 153rd Street

City	State
New York	NY

Zip Code
10039

Does the organization share office space, staff, equipment, or expenses with any other organization?
No

If YES, please name the organization(s) and the nature of the relationship

Has the organization ever applied for Council funding in the past?
Yes

Was the organization incorporated before July 1, 2016
Yes

If no, please provide the date of incorporation

If No, you must fill out and attach this form:Supplementary Application Form
Any organization applying for New York City Council discretionary funding that was Created after July 1, 2016 must complete this form

Is/Will the organization be applying for Prequalification Status from MOCS via HHS Accelerator?
If your organization receives more than $10,000 in City Council funding, it must be prequalified in HHS Accelerator and complete the Capacity Building Training Requirement.
Yes

Is the organization registered with the Charities Bureau of the New York State Attorney General
Yes

If Yes, Please Provide ID Number
61707

Is the organization exempt from registering with the Charities Bureau
No

If yes, you must fill out and attach this form: Charities Bureau Exemption Form

What is the estimated budget for the organization's current fiscal year
3528282

Please provide the organization the mission / goal.
Harlem Congregations for Community Improvement, Inc. (HCCI) is committed to the holistic revitalization of Harlem. We provide economic development and empowerment opportunities to help Harlem residents rebuild and sustain their community.

Founded in 1986, HCCI is a coalition of inter-faith congregations that has implemented a comprehensive portfolio of programs to provide affordable housing and safe streets; offer opportunities for individuals and groups to become and remain economically independent; increase understanding of and access to health care; and provide substantive educational programs for adults and young people. Through alliances with other community organizations, elected officials and local residents, HCCI has also helped reduce crime in the community; increase public sanitation; and preserve and transform open space.

Leveraging more than $350 million in support from federal, state, and city agencies, HCCI's real estate office has developed more than 3,500 units of low, moderate and middle-income housing and nearly 50 commercial spaces including a 45,000 sq. ft. Pathmark supermarket. Our health office provides scattered-site housing for 60 families and individuals living with HIV/AIDS. HCCI's adult education programs include soft employment skills, literacy training (in conjunction with Literacy Partners), and computer software training–all linked with job placement. To date, we have placed more than 1800 residents in employment opportunities.

Council Member
Manhattan Delegation
Perkins

Has the principal, authorized official or any executive member of the organization ever applied for funding as the representative of another organization
(please provide year and outcome if yes)
No.

Independent Inquiries, Monitorships, and Government Investigations, Inquiries, and Audits

Within the last 5 years, has the organization been the subject of an independent inquiry, monitorship or government investigation or audit (by any local, state or federal government including any current or past audit by the City Comptroller, request for information or other inquiry from the Department of Investigation and any audit or inquiry by a licensing agency) other than a routine annual audit
Yes

Briefly describe the staffing for the program
Malcolm Punter - President and CEO
Sherill Henry - Associate Deputy Director of Real Estate Development
HCCI community planner and outreach consultant
Metropolitan Urban Design Workshop LLC who are the current NYS Brownfield Opportunity Area Consultants for HCCI will be hired as sub-consultants on this project

Purpose and Use of Funds

Please provide the name of the program
Bradhurst Zoning Study

Please describe the specific programming/services to be funded.
Include a description on how the requested funds will be used.
The revitalization work led by HCCI and its stakeholders over the last few decades has made Bradhurst a secure and safe neighborhood and has added many affordable housing units to support the community currently residing in the area. However, as the real estate market becomes more stable, the neighborhood's excellent transit connectivity and recent public investments announced by the NYC Department of Parks & Recreation has attracted the attention of many developers who are keen on exploring the neighborhood for the most profitable use in response to market conditions. As a result, over the last few year, there have been quite a few sites within the area defined below that have capitalized on these trends to initiate talks of developments that just focus on profitability e.g. a 100% market rate condominium tower at 150th and Adam Clayton Powell Boulevard. These developments are not consistent with the community feedback received during extensive outreach that HCCI conducted as part of the NYS Brownfield Opportunity Area (BOA) Study that they are currently conducting, and are bound to displace current residents at a fast pace.

To address this issue, we are requesting a grant to conduct and an area wide zoning analysis within the Bradhurst BOA and neighborhood. This analysis will simulate likely development scenarios the future and recommend strategies to plan for a mixed use community consistent with the community goals of providing for an increase in specialized workforce and economic opportunities and preservation of affordable / subsidized housing. Upon a market based zoning analysis, recommendations may include creation of a special zoning district that can provide area-specific mechanisms aimed at preserving existing uses (e.g., subsidized housing), while promoting/incentivizing additional desired uses via floor area bonuses for example. All these scenarios however, will have to be tested with regards to built-environment density, market conditions, infrastructure etc. which will be conducted at an area wide scale.

The proposed zoning study will include the area bound by 150th Street in the north, 145th Street in the south, Harlem River in the east and Jackie Robinson Park in the west. Below is a brief description of tasks that will be undertaken for this project.

Task 1: Existing Conditions Analysis
The existing conditions analysis will involve documenting existing zoning and uses within a ¼ mile radius of the outlined project site. The team will also identify any major rezonings and residential market / development trends and determine existing school districts and 2018/2019 utilization. In addition the team will conduct a soft sites analysis to determine sites that could be slated for development within the coming years. This soft sites analysis be based on the guidelines provided by the Department of City Planning and will include sequential maps / visuals showing the soft sites selection process. In addition to selecting the soft sites, The BOA team will also develop a digital 3D view of the existing project area.

Task 2: As-of-Right Full Build Out Analysis
This task will entail developing the digital 3D model to show the bulk (volumes and heights) of new developments that would be allowed as of right under the current zoning. At this stage the team anticipates that this build out will be done for the soft sites and strategic sites already selected by the team and community members.

Task 3: Defining Zoning Options
Based on existing market trends, development trends, current application for new developments / public infrastructure improvements in the area and a review of recent community (and Community Board) input on developments, the team will define two to three rezoning options within the project area. These rezoning options will be tested on the soft sites and strategic sites and the team will develop 3D visuals to visually show the defined zoning options. Based on these visuals and analysis, the team will develop zoning recommendations that will uphold the community vision and needs stated above, as well as acknowledge the existing market and development trends. The team will also provide an evaluation of density related effects for each of the zoning options.

Did the organization receive funding for Fiscal Year 2017
Yes

If yes, please describe how the Fiscal Year 2017 funds were utilized.
(Please respond to each separate allocation your organization received.)
• NYC Dept of Human Resources - $1.7 million -Funding to facilitate 60 units of scattered site housing for
people living with HIV/AIDS.
• HPD - $29,730 to fund a community consultant to work with tenant and resident organizations in the HCCI housing portfolio, and to provide affordable housing counseling to the general community.
• SBS - $30,000 to attract business to Harlem's Bradhust area.

Target population to be served
General population

Geographic Area served
e.g. Citywide; Brooklyn; Council District 39; Community Board 6; Flatbush, etc.
Citywide; Council District 9; Community Board 10

Please provide a description of what the organization does and plans to do that invite the community
The project will make four presentations and town hall style meetings inviting feedback from community at Community Board 10’s Land Use Committee monthly meetings, occurring on the third Thursday of each month. The first meeting will provide an introduction to the zoning study, along with the scope and intentions of the project. The second meeting will present findings from the

existing conditions analysis described in task 1 above. The final two presentations will be town hall style presentations inviting feedback from the general public and community members, regarding their opinions on proposed zoning alternatives. Specifically, the third meeting will present digital build out analysis and potential zoning alternatives for selection of a preferred alternative and the fourth and final meeting will present final recommendations for the area will support the community's vision and needs, as well as acknowledge existing pertinent trends. All meetings and feedback will be documented by the project team.

In addition to these meetings, the project team will create standard materials for the community that will be accessible through HCCI's website.

When will the program operate

Please list the times the program services operate

2018-2019

Please describe the community benefit of the program / services that is being considered for funding
The zoning analysis will help promote community and economic revitalization, assess business and service needs and prevent displacement of existing residents and promote a diverse mix of land uses. Zoning scenario simulation will further these with recommendations to improve specialized workforce and economic opportunities and preserve the existing portfolio of affordable / subsidized housing.
State the location / address where the services are to be provided.
Harlem Congregations for Community Improvement, Inc.
256 W 153rd Street
New York, NY 10039

Proposed or similar services in the past
Yes

If 'YES', please briefly describe how long the services have been offered
As part of Bradhurst Revitalization efforts, in addition to the technical planning and economic analysis, over the last two years HCCI along with Harlem Community Development Corporation (HCDC) and sub-consultants Metropolitan Urban Design Workshop LLC have conducted three steering committee meetings, two community workshops, and several site walk through and focus groups with stakeholders and community members to ascertain community vision for the revitalization of the Bradhurst BOA. The vision for the revitalization of the area included both community & economic development goals and open space & urban design goals. HCCI has already completed the first phase of the BOA study in 2013 and is now in the second phase which is anticipated to be completed by 2018. Detailed reports and information on community outreach feedback can be found on the website www.bradhurstboa.com.
If 'NO', please explain why these services have not been provided before and what qualifications the organization has to start providing these services

Please list all performance evaluations from federal and state entities for the last three years

Include agency, rating and date

HUD Mortgage Coalition Audit June 14, 2016 Findings: None; Conclusion: Clients are well served by this agency. Harlem Congregations for Community Improvement is serving client needs in New York, NY. Unconditional reapproval

An organization requesting discretionary funding must itself deliver the programming/services of the funded program. Subcontractors or consultants must only be an ancillary part of the delivery of the programming/services. Does your organization have the capacity to provide the proposed programming/services?

Yes

Affiliation

Will the program be located in, operated by, or affiliated with a religious school
No

What percentage of the program participants do you estimate also attend the religious school

Will the program be located in, operated by, or affiliated with a religious organization or place of worship
No

What percentage of the program participants do you estimate also are members of or participate in the religious organization or place of worship

If YES, (to either question) please describe what types of outreach and/ or advertising is done to invite the community/general public to participate in the programming/services being offered

Are the services that the funds are being requested for open to all members of the general public regardless of enrollment, membership or any affiliation?
Yes

Acknowledgement

Before you resume, please review the discretionary funding policies and procedures .

Have you viewed the discretionary polices?
Yes

Do you certify that all statements, answers, information and representations given in the foregoing application and in all the supporting forms and documentation, are true, correct and accurate?
Yes

E/
PHASE 1 ESA AND CONCEPTUAL REMEDIATION COSTS

Preliminary Estimate of Remediation Costs Based on January 2020 Phase I ESAs

	Phase II Work Plan	Phase II Investigation	RAP/CHASP	Remedial Closure	Estimated Remedial Costs	Justification
2521 Adam Clayton Powell Boulevard	$5,000	$25,000	$7,500	$7,500	$45,000 - $500,000	Assuming requirements include vapor barrier installation and inspections, potentially elevated costs if USTs or petroleum impacted soil are encountered from historic use or off-site impacts from adjacent sites.
2735 Frederick Douglass Boulevard	$5,000	$25,000	$7,500	$7,500	$75,000 - $500,000	Assuming requirements include vapor barrier installation and inspections, potential groundwater impacts from off-site sources, potential for buried tanks exist but is not reflected in the costs.
2803-2805 Frederick Douglass Boulevard	$5,000	$25,000	$7,500	$7,500	$50,000- $500,000	Assuming requirements include vapor barrier installation and inspections, potential for buried tanks exist, and vapor intrusion from historic laundry operations.
HCCI Open Space Site	$5,000	$30,000	$7,500	$7,500	$75,000 - $100,000	Assuming requirements include vapor barrier installation and inspections, no RECs were identified.
Post Office Site	$7,500	$50,000	$7,500	$10,000	$250,000 - $1,000,000	Assuming requirements include vapor barrier installation and inspections, potentially elevated costs if USTs or petroleum impacted soil are encountered from historic use as a gasoline service station.
Western Beef Site	N/A	N/A	N/A	N/A	N/A	This project is enrolled in the Brownfield Cleanup Program and subject to the requirments set forth by NYSDEC. Based on information in the databases, subsurface investigation has already taken place at the Site.

Notes:

Costs described herein are not based on any development scenario, does not include soil characterization or disposal.
Actual costs may vary significantly (higher or lower) dependent upon actual development program and remedial requirements.
These remedial estimates assume that the Sites will be remediated under oversight of NYCDEP. Requirements including but not limited to approvals from other environmental regulatory bodies, engineering controls or design are not reflected in this estimate.

Estimated remediation costs do **not** include the following:

- Hazardous materials removal or reporting
- Reportable SPILLS
- Removal of unlisted USTs
- Stormwater or other permitting
- Sewer site connection permit or sewer discharge fees
- Excavation or loading of soil (assumed to be foundation construction cost)
- Asbestos abatement
- Dewatering or pre-treatment of groundwater
- On-site environmental or CAMP monitoring, or sampling during construction
- Active post-construction remediation (e.g., soil vapor extraction, air sparging, pump and treat) or extensive in-situ remediation (e.g., chemical oxidation)
- Building demolition or disposal of concrete, asphalt, or other debris
- Inflationary escalator - prices based upon estimated costs as of January 2020
- Site cap (e.g., pavement, building or two feet of clean fill)
- Sales tax

January 30, 2020

Mr. Malcom A. Punter
Harlem Congregations for Community Improvement
256 West 153rd Street
New York, NY 10039

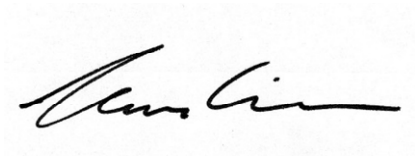
Re: Phase I Environmental Site Assessment
2735-2737 Frederick Douglass Boulevard, New York, New York 10039
AKRF Project Number: 12310

Dear Mr. Punter,

AKRF, Inc. is pleased to submit this Phase I Environmental Site Assessment Report for the above-referenced Property. This report includes the findings of a reconnaissance of the Property, an evaluation of readily available historical information and selected environmental databases and electronic records. AKRF, Inc. met the requirements of American Society for Testing and Materials (ASTM) as established by ASTM Standard E1527-13 unless noted otherwise in Section 9.0: "Limitations and Data Gaps".

We appreciate the opportunity to provide you with our services. If you should have any questions, please do not hesitate to contact us.

Sincerely,
AKRF, Inc.



Marcus Simons
Senior Vice President

EXECUTIVE SUMMARY

AKRF, Inc. (AKRF) was retained by Harlem Congregations for Community Improvement (HCCI) to perform a Phase I Environmental Site Assessment (ESA) of 2735-2737 Frederick Douglass Boulevard (Eighth Avenue) in New York, NY (Manhattan Tax Block 2045, Lots 13 and 14) (the "Property"). At the time of the reconnaissance, the Property included an approximately 6,300-square foot fenced vacant lot in the Bradhurst section of Manhattan as shown on Figure 2. The surrounding area consisted of mixed residential and commercial uses, parkland, medical facilities, and religious centers.

The Property was developed prior to 1893 with two five-story residential and commercial buildings with basements and backyards. In 1939, the northern Property building (2737 Frederick Douglass Boulevard) was improved with a one-story commercial addition. By 1976, this building had been demolished. In 1998, the southern Property building (2735 Frederick Douglass Boulevard) was demolished. The Property has remained vacant since.

This Phase I Environmental Site Assessment was performed in conformance with ASTM Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice*. Any exceptions to, or deletions from, the Standard are described in Section 8.0. The term "Recognized Environmental Condition" (REC) means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The Standard also includes definitions of Historic REC, Controlled REC and *De Minimis* Condition.

A Tier 1 Vapor Encroachment Screen was also conducted in accordance with ASTM Standard E2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. The term "Vapor Encroachment Condition (VEC)" means the presence or likely presence of vapors from chemicals of concern (COC) in the subsurface of a property caused by the release of vapors on or near the property.

This assessment revealed the following:

Recognized Environmental Conditions (RECs)

- Computerized NYC Buildings Department (DOB) records included a 1956 oil burner application for 2735 Frederick Douglass Boulevard, likely associated with a fuel oil tank used for heating. No tanks were registered at the Property with the New York State Department of Environmental Conservation (NYSDEC), consistent with demolition of the building before registration requirements went into effect. No evidence of petroleum storage tanks was noted during the reconnaissance, but it is likely the tank would have been located in the basement rather than buried underground. The tank was likely removed but may remain beneath the Property.
- Historical off-site uses with some potential to affect the Property were identified by Sanborn maps and City Directory listings as follows: nearby dry cleaners and laundries (potential dry cleaners), including a dry cleaner in the south-adjacent building; a printer, a battery service shop, and a plumbing and heating shop on the north-adjacent block. In addition, a regulatory database search identified off-site petroleum spills and hazardous waste generator listings (associated with dry cleaning) with some potential to affect the Property.

Non-REC on-site environmental concerns (items outside the scope of E1527-13 like ACM, LBP and/or PCBs in building materials or fill/debris)

- If demolition debris from historical structures is present beneath the Property, it may contain ACM, PCB-containing equipment, mercury-containing lighting fixtures, and/or lead-based paint.
- Computerized DOB records included complaints in 2008 and 2014 regarding trash being dumped on the Property, which was vacant at the time. During the site visit, evidence of debris and trash was observed on the Property.

Potential for Vapor Encroachment

This Phase I assessment identified prior petroleum storage and thus some potential for subsurface vapors and thus a potential for vapor encroachment into future buildings at the Property, based on the RECs noted above.

RECOMMENDATIONS

- Subsurface conditions beneath the Property may have been affected by past or present, on- or off-site uses. AKRF recommends a subsurface investigation involving the collection and laboratory analysis of subsurface samples prior to Property redevelopment. It is possible that this investigation may uncover evidence of a petroleum spill or other situation reportable to NYSDEC and/or other regulatory agencies.
- If redevelopment activities requiring soil disturbance are conducted, all excavated soil should be managed in accordance with applicable regulatory requirements. All soil and any other materials intended for off-site disposal should be tested in accordance with the requirements of the intended receiving facility. Transportation of material leaving the site for off-site disposal should be in accordance with federal, state and local requirements covering licensing of haulers and trucks, placarding, truck routes, manifesting, etc. If contaminated soil or underground storage tanks are discovered at the Property, they should be removed and disposed of in accordance with applicable regulatory requirements, including those relating to tank registration and spill reporting, if necessary. Any evidence of a petroleum spill should be reported to NYSDEC and addressed in accordance with applicable requirements.
- If dewatering is required during future construction activities, water must be discharged in accordance with New York City Department of Environmental Protection (NYCDEP) requirements.
- If demolition debris containing any suspect ACM, PCB-containing electrical equipment, or fluorescent lighting fixtures is encountered beneath the Property, such materials must be properly handled and disposed of in accordance with the applicable regulations.
- Any activities with the potential to disturb lead-based paint must be performed in accordance with applicable requirements (including federal Occupational Safety and Health Administration regulation 29 CFR 1926.62 - *Lead Exposure in Construction*).

1.0 INTRODUCTION

AKRF, Inc. (AKRF) was retained by Harlem Congregations for Community Improvement (HCCI) to perform a Phase I Environmental Site Assessment (ESA) of 2735 – 2737 Frederick Douglass Boulevard (former 8th Avenue) in New York, NY (Manhattan Tax Block 2045, Lots 13 and 14) (the "Property"), a. vacant approximately 6,300-square foot Property in the Bradhurst section of Manhattan, as shown on Figure 2. The surrounding area consisted primarily of residential and commercial uses, parkland, medical facilities, and religious centers.

The scope of services for this assessment was in conformance with ASTM Standard E1527-13 (*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice).* Any exceptions to, or deletions from, this practice are described in Section 8.0. The scope included the following:

- Observations of the Property (reconnaissance) to identify potential sources or indications of hazardous substances, including: aboveground storage tanks (ASTs); underground storage tanks (USTs); tank vents and fill ports; transformers and other items that could contain polychlorinated biphenyls (PCBs), drums or areas where hazardous materials were used, stored, or disposed; stained surfaces and soils; stressed vegetation, leaks, odors. In addition, neighboring properties were viewed, but only from public rights-of-way, to identify similar concerns.
- Readily available geological and groundwater (hydrogeological) information was evaluated to assist in determining the potential for contamination migration (including in soil, soil vapor, and/or groundwater) within, from, and onto the Property.
- The reconnaissance of the Property included observation of any readily visible suspect asbestos-containing materials (ACMs) and potential lead-based paint. However, no samples were collected or analyzed, and this reconnaissance provides neither definitive nor exhaustive information.
- A state database of county-level radon concentrations was used to determine typical indoor radon levels and compare them to United States Environmental Protection Agency (USEPA) guidelines.
- Historical fire insurance maps, topographic maps, and aerial photographs for the Property and nearby properties were reviewed to evaluate historical land uses.
- The following federal regulatory databases were reviewed to determine the regulatory status of the Site and properties within the ASTM-specified radii: National Priority List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); Emergency Response Notification System (ERNS); Toxic Chemical Release Inventory System (TRIS); the Permit Compliance System of Toxic Wastewater Discharges (WWD); the Air Discharge Facilities Index (ADF) the USEPA Civil Enforcement Docket. The federal listing of facilities which are subject to corrective action under the Resource Conservation and Recovery Act (CORRACTS) is discussed with the State databases of RCRA listings.
- The following state regulatory databases were reviewed to determine the regulatory status of the Property, adjacent properties, and properties within a predetermined study area; the listings of hazardous material spills (SPILLS); Resource Conservation and Recovery Act Notifiers (RCRA); Chemical Bulk Storage (CBS); Solid Waste Facilities (SWF); Petroleum Bulk Storage (PBS); State Inactive Hazardous Waste Disposal Sites (SHWS); Major Oil Storage Facilities (MOSF); Brownfield Sites; and Historic Utility Sites.
- Local agency reviews including NYC Fire Department records (obtained as part of the database search), online Buildings and Finance Departments records, and Environmental Quality Review (CEQR) E Designation Sites were conducted for the Property only.

2.0 PHYSICAL SITE DESCRIPTION

Visual assessment of the Property and adjacent areas was performed on January 28, 2020 by Mr. Evan Venice of AKRF. Site access was not granted and observations were only from public rights-of-way. The weather was overcast and approximately 40° F, and the visibility generally good. The Property was inspected through the surrounding chain link fence for the presence of stained surfaces, storage tanks, drums, leaking pipes, transformers, suspect asbestos-containing materials (ACMs), suspect lead-containing paint, distressed vegetation, and any other evidence of hazardous material usage and storage on-site. Photographs documenting the site inspection are included in Appendix A.

2.1 General Site Conditions

The Property comprised an approximately 6,300-square foot vacant lot with vegetated, dirt, and gravel areas. Debris on the site included bricks and concrete, as well as limited household garbage. The Property was surrounded by a chain link fence with a locked gate.

No staining or evidence of a spill/release was noted in exterior areas directly around the perimeter of the Property.

2.2 Topography and Hydrogeology

Topography at the Property sloped downward toward the southeast along West 146th Street. Based on the 2013 U.S. Geological Survey (USGS) Central Park, NY - NJ Quadrangle map, the Property is approximately 25 feet above the National Geodetic Vertical Datum of 1988 (an approximation of mean sea level). The Property block was located immediately east of Jackie Robinson Park, which sloped steeply downward to the southeast and included bedrock outcrops. Based on USGS mapping, bedrock beneath the Property is anticipated to be approximately 25 feet below grade.

Groundwater is anticipated to be approximately at the surface of bedrock, and is assumed to flow in a southeasterly direction, based on local topography. However, actual groundwater flow can be affected by many factors including subway tunnels, underground utilities, and other factors beyond the scope of this study. Groundwater in Manhattan is not used as a source of drinking water.

2.3 Storage Tanks

2.3.1 Underground Storage Tanks (USTs)/Aboveground Storage Tanks (ASTs)

During the Property inspection, no evidence, such as manways, vent pipes, or dispenser equipment, was observed that would indicate past or present USTs/ASTs at the Property. Regulatory database records did not indicate any registered USTs or ASTs at the Property. However, computerized NYC Buildings Department (DOB) records included a 1956 oil burner application for 2735 Frederick Douglass Boulevard, likely associated with a heating oil tank on the Property. The records did not indicate whether the associated tank was aboveground or underground. If aboveground, it was likely removed as part of building demolition. If underground, it may have been removed, or may remain beneath the Property.

Off-site storage tanks are discussed in Section 5.2.2.

2.4 Polychlorinated Biphenyls (PCBs) and Mercury

Until 1979, polychlorinated biphenyls (PCBs), which provided beneficial insulating properties, were used in a variety of products, in particular electrical equipment such as transformers, capacitors, fluorescent light fixtures, and voltage regulators, but also in hydraulic fluids and some other products such as caulking.

The Property was a vacant lot, and no suspect PCB- or mercury-containing equipment was noted during the reconnaissance. If demolition debris is present beneath the Property, it may contain PCB- and/or mercury-containing components.

2.5 Lead-Based Paint

Lead-based paint was generally not used inside residential buildings after 1960 in NYC. . If demolition debris is present beneath the Property, it may contain lead-based paint.

Activities with the potential to disturb lead-based paint must be performed in accordance with the applicable Occupational Safety and Health Administration regulation (OSHA 29 CFR 1926.62—Lead Exposure in Construction).

2.6 Utilities

The site is vacant and utilities do not currently service the Property. The surrounding area was supplied with electricity and natural gas by Consolidated Edison (Con Ed), and was connected to the New York City municipal water and sanitary/storm sewer systems.

2.7 Waste Management and Chemical Handling

The site is vacant; however, debris and apparent dumping was observed. Debris included bricks, concrete, black plastic liner, and household garbage.

2.8 Radon

Radon is a colorless, odorless radioactive gas that results from the natural breakdown of uranium minerals in soil, rock, and water, which subsequently enters the atmosphere. It can concentrate in buildings, entering through cracks and other penetrations of a building foundation. Some areas are more likely to have elevated concentrations of radon than others, reflecting subsurface lithologic conditions.

The New York State Department of Health (NYSDOH) maintains a database of radon test results on a local and county level. According to NYSDOH, 124 radon tests were conducted in Manhattan in October 2019. The average basement radon level was found to be 2.07 picoCuries per liter (pCi/L), below the USEPA recommended action level of 4.0 pCi/L.

3.0 ASBESTOS-CONTAINING MATERIALS (ACM)

Asbestos refers to a group of natural minerals that provide good fire resistance and insulation. Asbestos is also commonly found in vinyl flooring, plaster, sheetrock, joint compound, ceiling tiles, roofing materials, gaskets, mastics, caulks and other products. Materials containing more than one percent asbestos are considered asbestos-containing materials (ACM). ACM are classified as either friable (i.e., more readily release fibers, such as most spray-applied fireproofing) or non-friable (such as floor tiles).

No suspect asbestos-containing materials (ACM) were observed on the Property. If demolition debris is present beneath the Property, it may contain ACM.

4.0 ADJACENT LAND USE

The Property was abutted to the north, south, and west by mixed residential and commercial buildings; and to the east by Frederick Douglass Boulevard followed by mixed residential and commercial buildings. The surrounding area was primarily residential and commercial uses. The west-adjacent superblock was occupied by Jackie Robinson Park approximately 200 feet west of the Property.

5.0 PROPERTY HISTORY AND RECORDS REVIEW

5.1 Prior Ownership and Usage

5.1.1 Historical Land Use Maps

Historical insurance maps were reviewed for indications of uses (or other evidence) suggesting hazardous materials generation, usage, or disposal on or near the Property. Specifically, Sanborn Fire Insurance Maps from 1893, 1909, 1939, 1950, 1968, 1976, 1977, 1979-1981, 1983, 1986, 1988-1996 and, 2001-2005 were reviewed.

1893

The Property was developed with two five-story unlabeled structures with backyards.

Two five-story unlabeled structures were developed to the north of the Property, across West 146th Street, and multiple five-story unlabeled structures were developed to the south of the Property. The surrounding area to the east and southeast of the Property, across Eighth Avenue, was sparsely developed with unlabeled structures operated by the Manhattan Railway Company. Elevated railroad tracks and platforms were shown along Eighth Avenue. Vacant land was shown to the west and northwest of the Property, along Bradhurst Avenue.

1909

The Property was unchanged, but the buildings were noted to have basements.

The surrounding area to the north, northeast, and west of the Property was further developed with multi-story residential and commercial structures. Land to the east and southeast, across Eighth Avenue, which was previously occupied by the Manhattan Railway Company, was now developed with six-story residential and commercial structures and a movie theater. Elevated railroad tracks and platforms remained present along Eight Avenue. Laundry buildings were present approximately 100 feet south of the Property, along West 145th Street (on the same block), and approximately 300 feet east of the Property, along West 146th Street. A commercial building labeled "Simpson Crawford Co." and a paint shop were present approximately 500 feet south the Property, along West 144th Street. Colonial Park was present to the west, across Bradhurst Avenue.

1939

The backyard of the northern Property building (2737 Eighth Avenue) was improved with a one-story addition labeled as a store.

The surrounding area to the east, along West 145th Street, West 146th Street, and West 147th Street, was further developed with multi-story residential and commercial structures, including a paint shop located approximately 250 feet southeast of the Property. Multiple recreational structures and two swimming pools were developed in Colonial Park, and a laundry was present approximately 575 feet northwest of the Property, along Colonial Parkway. A filling station with eight 550 gallon gasoline USTs was shown approximately 550 feet southeast of the Property, along West 145th Street. A garage with a 500-gallon gasoline UST was shown approximately 500 feet south of the Property, along West 144th Street. . No further significant changes from the 1909 map were noted in the surrounding area.

1950

The northern Property building included a furniture store. No further significant changes from the 1939 map were noted.

A dry cleaner was shown approximately 350 feet southeast of the Property, along West 145th Street. No further significant changes from the 1939 map were noted in the surrounding area.

1968-1969

The Property appeared similar to the 1950 map.

A church was shown on the north-adjacent block, along Bradhurst Avenue. Dry cleaners were shown approximately 200 feet north of the Property, along West 147th Street, and approximately 580 feet northeast of the Property, along West 148th Street. The previously identified filling station, located approximately 550 feet southeast of the Property, was reconfigured, and USTs were no longer shown at this facility. The previously identified dry cleaner located approximately 350 feet southeast of the Property was no longer present. No further significant changes from the 1950 map were noted in the surrounding area.

1976-1977

The northern Property building was demolished and the lot was vacant. The southern portion of the Property remained similar to the 1968-1969 maps.

The previously identified laundry located approximately 300 feet east of the Property was no longer present. Several buildings north and northeast of the Property, including the previously identified dry cleaner located approximately 580 feet northeast of the Property, were demolished and replaced with vacant land. No further significant changes from the 1968-1969 maps were noted in the surrounding area.

1979-1996

The Property appeared similar to the 1976-1977 maps.

Eight Avenue was relabeled Frederick Douglass Boulevard. Multiple structures in the surrounding area were demolished or noted to be vacant. The previously identified gasoline filling station located approximately 550 feet southeast of the Property was improved with an additional structure between 1989 and 1991. Colonial Park was renamed Jackie Robinson Park between 1983 and 1986. No further significant changes were noted from the 1976-1977 maps.

2001

The southern Property building was demolished, and the entire Property was vacant.

A police station was developed to the northeast of the Property, along Frederick Douglass Boulevard. A dry cleaner formerly shown approximately 200 feet north of the Property was no longer present. Multiple structures to the south, west, and southwest were demolished and the lots vacant. No further significant changes were noted from the 1979-1996 maps.

2002-2005

The Property remained similar to the 2001 map.

A six-story apartment building was constructed on the south-adjacent block between 2003 and 2004. No further significant changes from the 2001 map were noted in the surrounding area.

In summary, historical maps indicated the Property was developed prior to 1893 with two five-story residential and commercial buildings with basements and backyards. In 1939, the northern Property building (2737 Frederick Douglass Boulevard) was improved with a one-story commercial addition. By 1976, the northern Property building was demolished and by 2001, the southern Property building was demolished. The Property has since remained vacant.

The surrounding neighborhood was mixed-use throughout its history, with commercial and residential buildings, churches, and parkland. Between 1950 and 1996, several dry cleaners and facilities with gasoline USTs were shown on nearby blocks, but in anticipated cross-gradient or downgradient groundwater flow directions relative to the Property. Between 1909 and 2005, several laundries (which may have included dry cleaning) were shown in the vicinity of the Property, including a laundry approximately 100 feet to the south on the same block, and a laundry approximately 575 feet to the northwest (in an anticipated upgradient groundwater flow direction).

5.1.2 Aerial Photographs

Since historical fire insurance maps were available for the Property and surrounding area, and these maps included information relating to land use, aerial photographs would, most likely, not provide additional useful information relevant to the potential for recognized environmental conditions or other environmental concerns. As such, aerial photographs were not reviewed.

5.1.3 Property Tax Files and Zoning Records

Based on NYC Department of City Planning's Zoning and Land Use Map (ZoLa), the Property is zoned as C4-4D (Commercial District).

5.1.4 Recorded Land Title Records

Copies of title records were not provided to AKRF for review. A review of computerized New York City Automated City Register Information System (ACRIS) records, which included records of financial transactions involving the Property, identified no environmental liens for the Property. The ACRIS records are summarized in Section 5.2.3.

5.1.5 Local Street Directories

A City Directory prepared by Environmental Data Resource, Inc. was reviewed as part of this Phase I ESA. The City Directory consisted of the names of businesses located on-site and in adjacent properties, compiled from city and reverse telephone directories at approximately five-year intervals starting in 1920. No records prior to 1920 were found. The following alternate addresses were associated with the Property: 2735-2737 Eighth Avenue, 2735-2737 Frederick Douglass Boulevard, and 300-302 West 146th Street.

The following records were identified for the Property:

- Residential uses at 2735 Eighth Avenue/Frederick Douglass Boulevard in 1920-1978;
- Commercial uses (a barbershop, a bakery, and a restaurant) at 2735 Eighth Avenue/Frederick Douglass Boulevard in 1923-1988;

- Residential uses at 2737 Eighth Avenue/2737 Frederick Douglass Boulevard/300-302 West 146th Street in 1920-1968; and
- Commercial uses (a pharmacy, a store, a furniture shop, a stationery store) at 2737 Eighth Avenue//2737 Frederick Douglass Boulevard/300-302 West 146th Street in 1923-1963. A "watch and jewelry clinic" was listed at this building in 1956.

The City Directory search identified nearby off-site listings with some potential to have affected subsurface conditions beneath the Property, including: Ajax Cleaners at 2733 Eighth Avenue (the south-adjacent building) in 1963; Service First Laundromat (a potential dry cleaner) at 2741 Eighth Avenue, approximately 50 feet north of the Property, in 1998-2000; Hartford Battery Service, Forrest Compact Press, and Harry Finkel Plumbing and Heating at 2745 Eight Avenue (approximately 150 feet north of the Property) in 1927-1942; and Big Five Cleaners at 2755 Eighth Avenue, approximately 200 feet north of the Property, in 1973.

A copy of the City Directory is included in Appendix E.

5.2 Regulatory Review

Regulatory database information, as shown in Appendix C, was obtained from EDR, Inc. of Shelton, CT. The Introduction of Appendix C includes summaries of the databases searched, their radii around the Property and limitations of the data. The databases searched and associated radii were consistent with ASTM E1527-13.

5.2.1 Federal

The federal databases searched included the National Priority List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); Emergency Response Notification System (ERNS); Toxic Chemical Release Inventory System (TRIS); the Permit Compliance System of Toxic Wastewater Discharges (WWD); the USEPA Civil Enforcement Docket; and the Air Discharge Facilities (ADF). The federal listing of facilities which are subject to corrective action under the Resource Conservation and Recovery Act (CORRACTS) is discussed with the State databases of RCRA listings.

The federal databases searched included the National Priority List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); Superfund Enterprise Management System Archive (SEMS-ARCHIVE), Emergency Response Notification System (ERNS); Toxic Chemical Release Inventory System (TRIS); and Federal Institutional Control/Engineering Control Registries. The federal listing of facilities which are subject to corrective action under the Resource Conservation and Recovery Act (CORRACTS) is discussed with the State databases of RCRA listings.

National Priority List (NPL)

The NPL is the USEPA's compilation of some sites that probable remedial action under the Superfund Program. NPL sites can pose a significant risk of stigmatizing surrounding properties and thus impacting property values.

The Property was not identified in the NPL database.

One NPL site was identified within a one-mile radius of the Property. The Hudson River PCBs site, located approximately 4,180 feet west of the Property. The site was also identified in the SEMS database. Based on the distance from the Property, the NPL site would not be expected to have affected subsurface conditions at the Property.

Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)

CERCLIS is a compilation of sites which the USEPA has investigated, or plans to investigate, pursuant to the Superfund Act of 1980 (CERCLA). As such, some of these sites may ultimately present concerns and others may not (but could still pose a perceived threat, thus affecting property values).

The Property was not identified in the CERCLIS database, and no CERCLIS sites were identified within a ½-mile radius of the Property.

SEMS-ARCHIVE (Superfund Enterprise Management System Archive)

This database tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time.

The Property was not identified in the SEMS-ARCHIVE database, and no SEMS-Archive sites were identified within a ½-mile radius of the Property.

Emergency Response Notification System (ERNS)

This federal database, compiled by the Emergency Response Notification System, records and stores information on certain reported releases of petroleum and other potentially hazardous substances.

No ERNS listings were identified as potentially located on the Property in the database information.

Toxic Chemical Release Inventory System (TRIS)

The TRIS contains information reported by a variety of industries on their annual estimated releases of certain chemicals.

No TRIS sites were identified within a ⅛-mile radius of the Property.

Federal Institutional Control/Engineering Control Registries

These registries are listings of sites with engineering and institutional controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site.

The Property was not listed in the Federal Institutional Control/Engineering Control Registries database.

5.2.2 State

The state records reviewed included listings of hazardous material spills; Resource Conservation and Recovery Act (RCRA) Notifiers; Chemical Bulk Storage (CBS); Solid Waste Facilities (SWF); Petroleum Bulk Storage (PBS); State Inactive Hazardous Waste Disposal Sites (SHWS); State Hazardous Substance Waste Disposal Sites (SHSWDS); Major Oil Storage Facilities (MOSF); Brownfield Sites; Environmental Restoration Program (ERP) sites; Voluntary Cleanup Program (VCP) sites, and Brownfield Cleanup Program (BCP) sites.

New York SPILLS Database

This database includes releases reported to the NYSDEC, including tank test failures (for USTs only) and tank failures.

The Property was not listed in the Spills database. A total of 453 spills were reported within a ½-mile radius of the Property, including 92 LTANKS and 361 NY Spills sites.

Most listings were for small quantities of recovered material identified in manholes, vaults, and service boxes on the surrounding intersections, or materials abandoned on vacant properties or along the road. Recovered materials included petroleum, dielectric fluid, and lead waste. The following listings were notable:

- Spill No. 1702073 was reported in June 2017 at Jackie Robinson Recreation Center, located at 89 Bradhurst Avenue, approximately 230 feet northwest of the Property. According to the listing, the spill was reported after a 10,000-gallon No. 2 fuel oil UST, located between the building and Bradhurst Avenue, failed a tightness test. Action was taken to decommission the UST and investigate the whether it was actively leaking. Removal of the UST was scheduled to be completed in 2017. However, no further information was provided, and the listing remains open.

  Additionally, five closed-status spills (Spill Nos. 0600573, 1203515, 0603738, 0102259, and 0413607) reported for Jackie Robinson Recreation Center, Jackie Robinson Park, and Jackie Robinson Pool between May 2001 and November 2012 appeared to be associated with the same UST based on listing details. These included four tank test failures (reportedly without releases to the subsurface) and a tank overfill. These listings were closed by NYSDEC between November 2005 and January 2019.

Based on listing details, including nature of the spills, distance from the Property, and/or inferred groundwater flow direction, these and the the remaining spill listings would not be expected to have significantly affected subsurface conditions at the Property. Details from all spills are included in Appendix C.

Resource Conservation and Recovery Act (RCRA) Notifiers Listings

This database lists sites that have filed notification forms regarding hazardous waste activity, including: treatment, storage and disposal facilities (TSDs); small-quantity (SQG) and large-quantity generators (LQG); and transporters regulated under RCRA. The discussion below includes any CORRACTS listings of facilities that are subject to corrective action under RCRA.

One CORRACTS site was listed within a one-mile radius of the Property. The site was identified as Ashland Inc., located at 609 W 131st Street, approximately 4,730 feet southwest of the Property.

The facility was listed between 1992 and 1994 with a low priority for corrective action. Based on the distance from the Property, this site is not expected to have affected subsurface conditions at the Property.

No TSD facilities were listed within a one-half mile radius of the Property. Two Generators/Transporters and 57 non-generators were reported within a ⅛-mile radius of the Property. The Property was not listed as a RCRA generator (or non-generator) of hazardous wastes. One facility with some potential to have had releases but little potential to have affected the Property based on its distance was:

- Ro-Bess Cleaners, located at 341 West 145th Street, approximately 515 feet west-northwest of the Property, was listed as a non-generator in 1999 and 2006, but was an LQG of chlorinated solvents in 1985.

Based on their locations or listing details (i.e., waste type), this and the remaining listed RCRA facilities, which were generally Con Edison listings associated with utility vaults near the Property, are not anticipated to affect the Property (releases within utility vaults tend to be contained within the vaulted structures).

Chemical Bulk Storage (CBS) Database

The New York CBS is a list of facilities that store regulated non-petroleum substances in aboveground tanks with capacities greater than 185 gallons and/or in underground tanks of any size.

The Property was not identified as a CBS facility.

One CBS facility was listed within a ⅛-mile radius of the Property. The site was identified as Jackie Robinson Pool, located at 146 Street and Bradhurst Avenue, approximately 230 feet northwest of the Property. The facility was listed with CBS No. 2-000329, and contained one 1,400-gallon chlorine AST and four 300-gallon chlorine ASTs, all of which were closed and removed in 2006 and 2007. Based on the listing details, the CBS listing would not be expected to have affected subsurface conditions at the Property.

Solid Waste Facilities (SWF)

This database includes certain landfills, incinerators, transfer stations, recycling centers, and other sites which manage solid waste.

No Solid Waste Facilities were identified within a ½-mile radius of the Property.

Petroleum Bulk Storage (PBS) Database

This database lists facilities that registered having either aboveground or underground petroleum tanks with total storage exceeding 1,100 gallons. Facilities with more than 400,000 gallons appear on the Major Oil Storage Facilities (MOSF) database (see below).

A total of 30 PBS facilities were identified within a ⅛-mile radius of the Property. Based on listing details, distance, and/or anticipated groundwater flow direction, the identified PBS listings are not likely to have significantly affected subsurface conditions at the Property. Details of all identified PBS facilities are included in Appendix C.

State Inactive Hazardous Waste Disposal Site Registry (SHWS)

This program (also known as State Superfund) lists information regarding a variety of sites likely requiring cleanup.

Three State Inactive Hazardous Waste Disposal Sites were reported within a one-mile radius of the Property. Based on listing details, distance from the Property (over 700 feet away), and inferred groundwater flow direction, these facilities are not anticipated to have affected environmental conditions at the Property.

State Hazardous Substance Waste Disposal Site Study (SHSWDS)

This database tracks certain sites that were not listed on SHWS, but may still require investigation and/or cleanup.

No SHSWDS facilities were identified within a ½-mile radius of the Property.

Major Oil Storage Facilities (MOSF) Database

These facilities have petroleum storage of 400,000 gallons or more.

No Major Oil Storage Facilities were reported within a ½-mile radius of the Property.

Environmental Restoration Program

These sites (which are generally municipally-owned) are receiving New York State funding for site investigation and remediation. Some sites in this program have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present.

No ERP sites were identified within a ½-mile radius of the Property.

Voluntary Cleanup Program/Brownfield Cleanup Program

The Voluntary Cleanup Program (VCP) is a NYSDEC program for investigation and remediation of (generally) privately-owned sites. Some sites in this program have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present. The Brownfield Cleanup Program (BCP) program is the successor to the Voluntary Cleanup Program. Again, some sites have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present.

No BCP sites were listed within ½-mile of the Property. Two VCP sites were identified within ½-mile of the Property. Based on listing details and distance from the Property (over 2,000 feet away), these facilities are not anticipated to have affected environmental conditions at the Property.

New York City (E) Designation Site Listing

A New York City (E) designation for a property requires that the owner conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the New York City Office of Environmental Remediation (NYCOER) before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements).

The Property was not assigned an E-designation according to the database information.

Registered Dry Cleaners/EDR US Hist Cleaners

The registered dry cleaners database was researched to identify listings within one-quarter mile of the Site. As a supplement to the registered dry cleaners database, EDR's proprietary listing of potential drycleaner sites (listings based on the opinion of EDR) was also reviewed.

The Property was not listed in the EDR US Historic Cleaners database. Five Registered Dry Cleaners sites were listed within a one-half mile radius of the Site. Details of the Registered Dry Cleaners/EDR US Historic Cleaners including the "Ro-Bess Cleaners/One Hr. Perm. Cl." facility discussed above.

Based on the listing details, distance, and/or assumed groundwater flow direction, the listings are not likely to have affected subsurface conditions at the Property.

5.2.3 Local Agency File Review

Electronic DOB records for the Property were reviewed to determine whether there were any references to buildings, tanks or other structures, property usage or inspection reports that may have indicated the presence, past use, or release of hazardous substances, wastes or petroleum products within the Property. Copies of pertinent information are included in Appendix D.

Buildings Department (DOB)

Computerized DOB records for 2735 Frederick Douglass Boulevard included the following:

- A 1956 oil burner application, likely associated with a historical building on the Property;
- Two new building applications dated 1973 and 1983;
- A 1996 complaint regarding the condition of a vacant building;
- A 1998 complaint regarding damage to a nearby structure during demolition of a building on the Property; and
- Complaints in 2008 and 2014 regarding trash being dumped on an unsecured vacant lot. However, both complaints noted that DOB inspected the Property and observed that it was surrounded by a chain-link fence.

No details were provided for the oil burner or new building applications. No Certificates of Occupancy were included in the electronic DOB files. No pertinent records were identified for 2737 Frederick Douglass Boulevard.

Department of City Planning

Online NYCDCP records identified no E-Designations or Restrictive Declarations (RDs) for the Property.

Department of Finance

Electronic property transaction records for the Property Block and Lot were reviewed from the New York City Department of Finance Office Automated City Register Information System (ACRIS). Deed information obtained from the ACRIS files is summarized as follows:

2735 Frederick Douglass Boulevard (Block 2045, Lot 13):

Year	Grantor/Grantee
1971	Grantor is: Jerene Realty Corp..; Grantee is: Isabel Fuentis
1975	Grantor is: Isabel Fuentis; Grantee is: 3735 8th Ave Realty Corp.
1976	Grantor is: Finance Administrator of The City of New York; Grantee is: The City of New York

2737 Frederick Douglass Boulevard (Block 2045, Lot 14):

Year	Grantor/Grantee
1967	Grantor is: Paul Friedman & George Schwack; Grantee is: Debon Realty, Inc.
1972	Grantor is: Finance Administrator of The City of New York; Grantee is: The City of New York
1975	Grantor is: The City of New York; Grantee is: West Paterson 46 Corp.
1986	Grantor is: West Paterson 46 Corp.; Grantee is: Olympia-York Development Corp.
1987	Grantor is: Olympia-York Development Corp.; Grantee is: Livorno Partners
1996	Grantor is: Livorno Partners; Grantee is: Calfrist Properties, LLC
1999	Grantor is: Calfrist Properties, LLC; Grantee is: Abraham Shehebar
2002	Grantor is: Abraham Shehebar; Grantee is: BII Steinway LLC
2002	Grantor is: BII Steinway LLC; Grantee is: 2737 Trading LLC

New York City Department of Environmental Protection (NYCDEP)

AKRF sent a FOIL request pertaining to environmental records to the NYCDEP on December 27, 2019. On December 27, 2019, NYSDEC issued a response e-mail acknowledging the request. In an email dated January 8, 2020, NYCDEP indicated that no records associated with the Property were identified.

New York City Department of Health and Mental Hygiene (NYCDOHMH)

AKRF sent a FOIL request pertaining to environmental records to the NYCDOHMH on December 27, 2019. To date, no response has been provided. If issues of potential concern are noted upon receipt of the information, an addendum to this report will be created to discuss relevant findings.

New York State Department of Health (NYSDOH)

AKRF sent a FOIL request pertaining to environmental records to the NYSDOH on December 27, 2019. In a letter dated January 15, 2020, NYSDOH indicated that no records associated with the Property were identified.

5.2.4 Additional Environmental Record Sources

To enhance the search, ASTM requires that additional local records be reviewed (i.e., beyond those included as part of the standard database search or checked online) when, in judgment of the environmental professional, such records for the Property or any adjoining property would be reasonably ascertainable; and useful, accurate and complete in light of the objective of the records review. These records include:

- Local brownfields lists
- Local lists of landfill/solid waste disposal sites
- Local lists of hazardous waste/contaminated Sites
- Local lists of registered tanks
- Local land records (for activity use limitations)
- Records of emergency release reports
- Records of contaminated public wells

Sources for these records include:

- Fire Department
- Local/Regional Water Quality Agency
- Local Electric Utility (for PCB records)

In addition to the Local Agency File Review, AKRF sent Freedom of Information Law (FOIL) requests to the NYSDEC to determine whether pertinent environmental records for the Property could be obtained for further review. To date, no response has been provided. If issues of potential concern are noted upon receipt of the information, an addendum to this report will be created to discuss relevant findings.

Copies of the FOIL requests and responses are included in Appendix D.

If issues of potential concern are noted upon receipt of this information, an addendum to this report will be created to discuss relevant findings. In AKRF's judgment, no such additional local records meeting the ASTM criteria are pertinent for the Property.

6.0 USER-PROVIDED INFORMATION

In preparing this Phase I ESA, AKRF requested that the client provide any pertinent information regarding the Property, specifically:

- The reason for performing the Phase I ESA;
- Whether they were aware of any pertinent current or historic activities at or near the Property, including but not limited to: hazardous substances or petroleum, waste management practices, filling or disposal drains, septic/sewer systems, and potable and non-potable wells;
- Owner and occupant information and whether they were aware of any previous Phase I ESAs or other potentially pertinent reports, plans or information;
- Whether any *environmental liens* or *activity and land use limitations* are in place or filed or recorded against the Property or whether there was pending, threatened, ongoing or past violations, litigation or enforcement action relevant to hazardous substances or petroleum products;
- Whether they had any specialized knowledge or experience related to the Property or nearby properties (e.g., specialized knowledge of the chemicals used by this type of business);
- Whether the (anticipated) purchase price reflects that the Property is or could be contaminated; and
- Whether they were aware of commonly known or reasonably ascertainable information about environmental conditions of the Property including current/past uses of the Property and adjacent properties.

The Phase I ESA was conducted to provide preliminary environmental information as part of due diligence for the potential redevelopment of the Property. To the extent that pertinent additional information was provided, it has been summarized elsewhere in this report.

7.0 PREVIOUS STUDIES

No previous studies for the Property were provided to AKRF for review.

8.0 VAPOR ENCROACHMENT SCREENING

A Tier 1 Vapor Encroachment Screening was conducted in accordance with ASTM Standard E2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. The term "Vapor Encroachment Condition" means the presence or likely presence of vapors from chemicals of concern (COC) in the subsurface of a Property caused by the release of vapors on or near the Property. The object of the Tier 1 screening is to conduct a screen for vapor encroachment based on findings from the Phase I ESA to determine if a possible VEC exists at the Property.

Based on AKRF's review of historical and regulatory database records, a potential VEC was identified based on the Tier 1 Vapor Encroachment Screening, due to Computerized DOB records including a 1956 oil burner application for 2735 Frederick Douglass Boulevard, likely associated with a fuel oil tank in a historical building on the Property.

9.0 LIMITATIONS AND DATA GAPS

This assessment met the requirements of the American Society for Testing and Materials (ASTM) as established by ASTM Standard E1527-13 at the time it was performed, with the following limitations:

- Results of this investigation are valid as of the dates on which the investigation was performed.
- There was no Property access. The inspection of the property was limited to viewing from outside of the chain link fence.
- Interviews and user-provided information were limited to those discussed in Section 6.0. To the extent that interviews were not conducted with the list of interviewees cited in the ASTM Standard (past and present owners, operators, and occupants of the Property and local government officials), AKRF does not believe that this represents a significant data gap likely to result in additional or significantly changed recognized environmental conditions or conclusions.
- The Property area history was not conducted in five-year intervals. However, sufficient information about the history of the site and surrounding area could be obtained from the available historical Sanborn and topographic maps, Buildings Department records, and interviews, and this data gap is not likely to alter the conclusions of this report.
- Agency file reviews for the Property and adjacent properties consisted of a review of standard databases and electronic records maintained by pertinent departments and agencies (summarized in Section 5.2). AKRF believes that this file review was sufficient in determining the potential for recognized environmental conditions or other environmental concerns at the Property and additional reviews beyond this are not warranted and would not likely change the conclusions of this assessment.

10.0 CONCLUSIONS AND RECOMMENDATIONS

This Phase I Environmental Site Assessment was performed in conformance with ASTM Standard E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice. Any exceptions to, or deletions from, the Standard are described in Section 8.0. The term "Recognized Environmental Condition" (REC) means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The Standard also includes definitions of Historic REC, Controlled REC and De Minimis Condition.

A Tier 1 Vapor Encroachment Screen was also conducted in accordance with ASTM Standard E2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. The term "Vapor Encroachment Condition (VEC)" means the presence or likely presence of vapors from chemicals of concern (COC) in the subsurface of a property caused by the release of vapors on or near the property.

This assessment revealed the following:

Recognized Environmental Conditions (RECs)

- Computerized NYC Buildings Department (DOB) records included a 1956 oil burner application for 2735 Frederick Douglass Boulevard, likely associated with a fuel oil tank used for heating. No tanks were registered at the Property with the New York State Department of Environmental Conservation (NYSDEC), consistent with demolition of the building before registration requirements went into effect. No evidence of petroleum storage tanks was noted during the reconnaissance, but it is likely the tank would have been located in the basement rather than buried underground. The tank was likely removed but may remain beneath the Property.

- Historical off-site uses with some potential to affect the Property were identified by Sanborn maps and City Directory listings as follows: nearby dry cleaners and laundries (potential dry cleaners), including a dry cleaner in the south-adjacent building; a printer, a battery service shop, and a plumbing and heating shop on the north-adjacent block. In addition, a regulatory database search identified off-site petroleum spills and hazardous waste generator listings (associated with dry cleaning) with some potential to affect the Property.

Non-REC on-site environmental concerns (items outside the scope of E1527-13 like ACM, LBP and/or PCBs in building materials or fill/debris)

- If demolition debris from historical structures is present beneath the Property, it may contain ACM, PCB-containing equipment, mercury-containing lighting fixtures, and/or lead-based paint.

Computerized DOB records included complaints in 2008 and 2014 regarding trash being dumped on the Property, which was vacant at the time. During the site visit, evidence of debris and trash was observed on the Property.

Recommendations

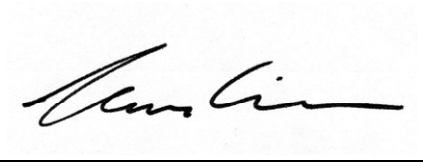
- Subsurface conditions beneath the Property may have been affected by past or present, on- or off-site uses. AKRF recommends a subsurface investigation involving the collection and laboratory analysis of subsurface samples prior to Property redevelopment. It is possible that this investigation may uncover evidence of a petroleum spill or other situation reportable to NYSDEC and/or other regulatory agencies.

- If redevelopment activities requiring soil disturbance are conducted, all excavated soil should be managed in accordance with applicable regulatory requirements. All soil and any other materials intended for off-site disposal should be tested in accordance with the requirements of the intended receiving facility. Transportation of material leaving the site for off-site disposal should be in accordance with federal, state and local requirements covering licensing of haulers and trucks, placarding, truck routes, manifesting, etc. If contaminated soil or underground storage tanks are discovered at the Property, they should be removed and disposed of in accordance with applicable regulatory requirements, including those relating to tank registration and spill reporting, if necessary. Any evidence of a petroleum spill should be reported to NYSDEC and addressed in accordance with applicable requirements.
- If dewatering is required during future construction activities, water must be discharged in accordance with New York City Department of Environmental Protection (NYCDEP) requirements.
- If demolition debris containing any suspect ACM, PCB-containing electrical equipment, or fluorescent lighting fixtures is encountered beneath the Property, such materials must be properly handled and disposed of in accordance with the applicable regulations.
- Any activities with the potential to disturb lead-based paint must be performed in accordance with applicable requirements (including federal Occupational Safety and Health Administration regulation 29 CFR 1926.62 - *Lead Exposure in Construction*).

11.0 SIGNATURE PAGE

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property for which the assessment was performed. We have performed all the appropriate inquiries in conformance with standards and practices set forth in 40 CFR Part 312.



Marcus Simons
Senior Vice President

12.0 QUALIFICATIONS

The purpose of this assessment was to convey a professional opinion about the potential presence or absence of contamination, or possible sources of contamination on the property, and to identify existing and/or potential environmental problems associated with the property including *Recognized Environmental Conditions* as defined in ASTM Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice.*

The assessment was performed in accordance with customary principles and practices in the environmental consulting industry, and in accordance with the above-referenced ASTM Standard, except as noted otherwise in Section 8.0. It should only be used as a guide in determining the possible presence or absence of hazardous materials on the property at the time of the reconnaissance, as it is based upon the review of readily available records relating to both the property and the surrounding area, as well as a visual reconnaissance of current conditions.

This Phase I Assessment is not, and should not be construed as, a guarantee, warranty, or certification of the presence or absence of hazardous substances, which can be made only with testing, and contains no formal plans or recommendations to rectify or remediate the presence of any hazardous substances which may be subject to regulatory approval. This report is not a regulatory compliance audit.

This report is based on services performed by AKRF, Inc. professional staff and observation of the property and its surroundings. We represent that observations made in this assessment are accurate to the best of our knowledge, and that no findings or observations concerning the potential presence of hazardous substances have been withheld or amended. The research and reconnaissance have been carried to a level that meets accepted industry and professional standards. Nevertheless, AKRF and the undersigned shall have no liability or obligation to any party other than Harlem Congregations for Community Improvement (HCCI) and their successors or assignees, and AKRF's obligations and liabilities to the above, their successors or assignees is limited to fraudulent statements made, or grossly negligent or willful acts or omissions.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Federal Delisted NPL site list

Delisted NPL ---------- National Priority List Deletions

Federal CERCLIS list

FEDERAL FACILITY ---------- Federal Facility Site Information listing

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE ---------- Superfund Enterprise Management System Archive

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System

Federal ERNS list

ERNS ---------- Emergency Response Notification System

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF ---------- Facility Register

State and tribal leaking storage tank lists

INDIAN LUST ---------- Leaking Underground Storage Tanks on Indian Land
NY HIST LTANKS ---------- Listing of Leaking Storage Tanks

State and tribal registered storage tank lists

FEMA UST ---- Underground Storage Tank Listing
NY CBS UST ---- Chemical Bulk Storage Database
NY MOSF UST ---- Major Oil Storage Facilities Database
NY MOSF ---- Major Oil Storage Facility Site Listing
NY MOSF AST ---- Major Oil Storage Facilities Database
INDIAN UST ---- Underground Storage Tanks on Indian Land

State and tribal institutional control / engineering control registries

NY RES DECL ---- Restrictive Declarations Listing

State and tribal voluntary cleanup sites

INDIAN VCP ---- Voluntary Cleanup Priority Listing

State and tribal Brownfields sites

NY ERP ---- Environmental Restoration Program Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

NY SWTIRE ---- Registered Waste Tire Storage & Facility List
NY SWRCY ---- Registered Recycling Facility List
INDIAN ODI ---- Report on the Status of Open Dumps on Indian Lands
DEBRIS REGION 9 ---- Torres Martinez Reservation Illegal Dump Site Locations
ODI ---- Open Dump Inventory
IHS OPEN DUMPS ---- Open Dumps on Indian Land

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL ---- Delisted National Clandestine Laboratory Register
NY DEL SHWS ---- Delisted Registry Sites
US CDL ---- National Clandestine Laboratory Register
NY PFAS ---- PFAS Contamination Site Location Listing

Local Lists of Registered Storage Tanks

NY HIST UST ---- Historical Petroleum Bulk Storage Database
NY HIST AST ---- Historical Petroleum Bulk Storage Database

Local Land Records

LIENS 2 ---- CERCLA Lien Information

Records of Emergency Release Reports

HMIRS ---- Hazardous Materials Information Reporting System

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/25/2019 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/24/2019 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/24/2019 has revealed that there is 1

RCRA-LQG site within approximately 0.125 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/24/2019 has revealed that there is 1 RCRA-SQG site within approximately 0.125 miles of the target property.

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 08/12/2019 has revealed that there are 3 NY SHWS sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 11/11/2019 has revealed that there are

EXECUTIVE SUMMARY

92 NY LTANKS sites within approximately 0.5 miles of the target property.

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS AST site within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/24/2019 has revealed that there are 57 RCRA NonGen / NLR sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EPA Id: NYP004752127

NY VAPOR REOPENED: "Vapor intrusion" refers to the process by which volatile chemicals move from a subsurface source into the indoor air of overlying or adjacent buildings. The subsurface source can either be contaminated groundwater or contaminated soil which releases vapors into the pore spaces in the soil. Improvements in analytical techniques and knowledge gained from site investigations in New York and other states has led to an increased awareness of soil vapor as a medium of concern and of the potential for exposures from the soil vapor intrusion pathway. Based on this additional information, New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

A review of the NY VAPOR REOPENED list, as provided by EDR, and dated 12/01/2018 has revealed that there is 1 NY VAPOR REOPENED site within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

CON EDISON - WEST 13	12TH AVE. BETWEEN W.	S 1/2 - 1 (0.678 mi.)	777	1576
CON EDISON - W 132ND	12TH AVE BETWEEN W 1	WSW 1/2 - 1 (0.911 mi.)	779	1586

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past

sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 7 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
ONE HOUR PERMAC CLEA	341 W 145TH ST	WNW 0 - 1/8 (0.098 mi.)	J107	223

Hazardous Waste Summary:

. Waste code: B002
. Waste name: Petroleum oil or other liquid containing 50 ppm or greater of PCBs, but less than 500 ppm PCBs. This includes oil from electrical equipment whose PCB concentration is unknown, except for circuit breakers, reclosers and cable.

. Waste code: B007
. Waste name: Other PCB wastes, including contaminated soil, solids, sludges, clothing, rags and dredge material.

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

JACKIE ROBINSON REC. CENT (Continued) **S106869028**

DEC Memo: "Sangesland spoke to Ellis Mercer Dep Mgr of Recreation Ctr. (212-234-9607) He says Rapid Fuel Oil delivered fuel today and over filled the tank. During the oil delivery the driver went back into his truck to read the paper and Mr. Mercer had to yell at him that the tank was overflowing onto the sidewalk/street. Mr. Mercer got some peat moss and soil used to maintain the rec center, but the truck driver drove off.Sangesland spoke to Bobby at Rapid Fuel Oil (917-807-8720) He says it was not his drivers fault and there was no big spill at the site. 3/31/2005 - Rapid hired Petroleum Tank Cleaners to clean up the site. 11/18/05- DEC Piper contacted KC Reilly at rec center. Left Message. Spoke w/ Mark at PTC. Only did surface cleanup. 11/28/05- DEC Piper spoke w/ Ellis Mercer of Parks Dept. All cleaned up by PTC inside and outside. Very pleased, no complaints, no odors."

Remarks: "Location is between west 146th and west 147th street. Product went into a near by storm drain, a person on the scene soaked up the remainder of material that was outside drain cleaned up with speedy dry."

DEC Memo:	"06/01/17-Hiralkumar Patel. 3:45 PM:- left message for Mike at AARCO. 3:46 PM:- spoke with Gabe Ramos (212-410-8916) at NYC Parks. informed him that caller's remarks suggests leak in tank's bottom and there may be active discharge. asked Mr. Ramos to contact AARCO and pump out tank immediately, if actively leaking. 06/02/17-Hiralkumar Patel. PBS #: 2-604973. as per PBS record, the site has one (1) 10,000 gal #2 oil UST, in-service, installed in June 1982. another spill case (# 0600573) was reported on 04/14/2006 due to tightness test failure of 10,000 gal tank. case still open. 9:55 AM:- left message for Mike. 9:57 AM:- left message for Mr. Ramos. discuss with DEC Alex, project manager for spill #: 0600573. Alex will discuss with NYCDDC consultant who is handling this project. case assigned to Alex. 6-2-2017 Contacted K. Shanahan (URS). Asked him to dispatch staff to the spill site immediately, take the tank out of service, notify NYC Parks and NYC DDC. Explore if the leaking tank could be excavated. AZ 6/6/2017 Received the following e-mail from K. Shanahan: Hi Alex, In accordance with your request, I have prepared this e-mail to provide NYSDEC information regarding new Spill No. 1702073 reported at Jackie Robinson Pool. The spill was called in at 3 PM on June 1, 2017 after a failed tank tightness test was performed on the 10,000-gallon No. 2 fuel oil UST located between the building and Bradhurst Avenue (see attached photo P1010104). You indicated to me that Michael Sepe of Aarco Environmental Services performed the tightness testing. I called Michael Sepe on June 2 and 5 and left him messages. I called him again today and he told me that there was a major issue with the wet portion of the tank in either a pipe or the tank itself. He also indicated to me that the fuel was removed from the tank and that the tank was taken out of service. I asked Michael Sepe if he inspected the concrete tank vault for evidence of product. Michael said a visual inspection was not performed since access was limited and he had no reason to enter the vault (he implied a possible confined space issue see remaining photos). URS is managing the removal of this UST and installation of a natural gas service to fuel the

JACKIE ROB REC CENTER (Continued) **S121102034**

boilers. The tank will be removed but the vault will remain to due it s proximity to the building and Bradhurst Avenue (see attached photo P1010104). URS has retained The Franklin Company to perform the work. The work is scheduled to be completed in 2017. Franklin will perform a tank closure investigation in accordance with NYSDEC protocols. URS will evaluate the data collected and determine whether additional investigation or remediation is required. Let me know if you need any additional information. Thanks - Kevin J. Shanahan Project Manager, Environment Business Unit, Metro New York Direct 716-923-1215 Cell 716-480-7352 kevin.shanahan@aecom.com "

Remarks: "nyc park. failed with gross problem, to be dealt with immediately."

DEC Memo:	"nyc parks & recreation Parks Dept Building with tank in vault Contact: Franklin Company or Gabe Ramos Parks Dept - 212-410-8916 8/15/2012 TTF Spill Case transferred to DEC Tim DeMeo. 10/22/15 TJD File review. Address is incorrect on spill report - changed today from #79 to #89 Bradhurst. Additionally street location corrected from Broadhurst to Bradhurst. PBS #is 2-604973. Following proper identification of spill location the facility was contacted to obtain a status of the open spill - the facility manager Valerie Edwards was unaware of the condition and requested an email outlining specific requirements. An email was sent to Valerie with request for specific documentation in support of spill closure. Email uploaded to DECDOCS. 12/23/2015: Rashad Spill reassigned from DeMeo to Omar as per DeMeo. 89 Bradhurst Avenue has alternate addresses of 75-95 Bradhurst avenue and 319-341 West 145 street. There are multiple spills at Jackie Robinson Park, spill#9302297 was a discharge into the sewer and has no DEC remarks it was closed in 1993, spill#0102259 was closed in 2008 because of a TTF on a 10,000 gallon tank which was retested, passed, and no evidence of release to environment. Spill#0603232 was cross referenced to other spill#0600573, spill#0603738 was closed because of a duplicate spill it was referred to spill#0600573. Spill#1203515 is open at 89 Bradhurst Ave & 146 st and only info is 10,000 gal UST in caller remarks. There is another spill# 0600573 is managed by Vadim and a comment on 9/9/09 says DDC will replace tank, case is still open. PBS#2-604973 has a 10,000 gallon UST containing biodiesel. TTF letter and email correspondence found in D2. 12/28/2015: Rashad Emailed Gabriel: Attached is a tank test failure letter for spills#0600573, 1100352, and 1203515 for 89 Bradhurst Avenue, New York NY 10039. There are three open spill cases for this site and I would appreciate any update or documentation on the current status of the 10,000 gallon tank. The original letter is being mailed to the address provided on the PBS registration (#2-604973). Letter uploaded to D2. 1/4/2016: Rashad On 12/31/15 Gabe responded: Department of Design and Construction has a contractor finalizing the scope of work needed to properly close and remove the oil tank in compliance to DEC guidelines and convert the site to natural gas. 4/14/2016: Rashad This spill will be administratively closed and cross referenced to spill#0600573 as it is tank test failure on same 10,000 gallon tank. Please refer to spill#0600573 for future information. "
Remarks:	"TANK TEST FAILURE FOR VAULT, NO ENVIRONMENTAL IMPACT."

at this facility and currently out for Bid. he asked to contact Ruben Olmedo at 718-391-1062. 05/24/12-Hiralkumar Patel. 2:02 PM:- sent email to Mr. Ramos inquiring updates. 10/06/14-Hiralkumar Patel. as per DEC Austin, case assigned to DEC Vadim. 12/28/2015: Rashad Spill transferred from Vadim to Rashad as per discussion with Vadim and Jeff. Emailed Gabriel: Attached is a tank test failure letter for spills#0600573, 1100352, and 1203515 for 89 Bradhurst Avenue, New York NY 10039. There are three open spill cases for this site and I would appreciate any update or documentation on the current status of the 10,000 gallon tank. The original letter is being mailed to the address provided on the PBS registration (#2-604973). Letter uploaded to D2. 12/31/2015: Rashad Received email from Gabe: Department of Design and Construction has a contractor finalizing the scope of work needed to properly close and remove the oil tank in compliance to DEC guidelines and convert the site to natural gas. 10/19/2016 After consultation with Rashad this spill is transferred to Alex Zhitomirsky. AZ 1-3-2019 Reviewed a report for this site dated November 2, 2018, and issued by URS. The report stated that the tank was removed by The Franklin Company. Franklin performed the tank closure work between April and May 2018. The remote fill port was excavated and removed. The remaining piping abandoned in place. Franklin completed tank closure sampling. One water sample and 13 soil samples were collected for lab analyses. The water sample was collected of water that accumulated inside the tank vault. Four soil borings were advanced to 15' bgs. The borings were terminated due to refusal. There were no VOCs or SVOCs detected above Unrestricted Use SCOs in any of the soil samples. Groundwater at the site wasn't encountered during the UST closure investigation. URS requested a closure of this spill. Based on the presented information this spill was closed on 2/3/2019. AZ The following e-mail was sent to K. Shanahan and V. Brevdo: Dear Mr. Shanahan, Based on the documentation provided to date, the New York State Department of Environmental Conservation (the Department) has closed the above-referenced spill case. All monitoring wells associated with this spill case should be properly closed in accordance with the Department's guidance document, Groundwater Monitoring Well Decommissioning Procedures . The Department hereby reserves all of its rights concerning, and such forbearance shall not extend to, any further investigation or remedial action the Department deems necessary due to: I. The off-site migration of petroleum contaminants that was unknown at the time of this closure. II. Environmental conditions related to this spill case which were unknown to the Department at the time of this closure. III. Information received, in whole or part, after the Department's spill case closure, which indicates that corrective action was not sufficiently protective of human health and/or the environment. IV. Fraud in obtaining this spill case closure determination. As a precaution, we must bring your attention to our concerns for the future use of this site. If subsurface contamination is encountered while excavating for any construction activity, appropriate remedial and vapor mitigation efforts may need to be taken to fully prevent vapor intrusion into any site development and to ensure human health and safety. This spill closure does not exempt the Responsible Parties from compliance with any applicable laws and regulations. Please be advised that you should maintain a permanent file of all documentation and correspondence regarding this case for future use as the Department's files may not be maintained indefinitely. Sincerely, Alex Zhitomirsky - Engineering Geologist 2

FINDS:

Registry ID: 110066948165

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

JACKY ROBINSON (PARK?) TTF (Continued) **S112148829**

Emailed Gabriel: Attached is a tank test failure letter for spills#0600573, 1100352, and 1203515 for 89 Bradhurst Avenue, New York NY 10039. There are three open spill cases for this site and I would appreciate any update or documentation on the current status of the 10,000 gallon tank. The original letter is being mailed to the address provided on the PBS registration (#2-604973). Letter was uploaded to D2. 1/4/2016: Rashad On 12/31/15 Gabe responded: Department of Design and Construction has a contractor finalizing the scope of work needed to properly close and remove the oil tank in compliance to DEC guidelines and convert the site to natural gas. 4/14/2016: Rashad This spill will be administratively closed and cross referenced to spill#0600573 as it is for same tank. Refer to spill#0600573 for future reference. "

FINDS:

Registry ID: 110069672107

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110069672125

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110069672134

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number:	001
Tank Id:	61788
Material Code:	0002
Common Name of Substance:	#4 Fuel Oil (On-Site Consumption)

Equipment Records:

	B01 - Tank External Protection - Painted/Asphalt Coating
	D02 - Pipe Type - Galvanized Steel
	H00 - Tank Leak Detection - None
	E00 - Piping Secondary Containment - None
	K99 - Spill Prevention - Other
	G00 - Tank Secondary Containment - None
	C01 - Pipe Location - Aboveground
	A99 - Tank Internal Protection - Other
	J03 - Dispenser - Gravity
	L00 - Piping Leak Detection - None
	I99 - Overfill - Other
	F99 - Pipe External Protection - Other
Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	01/01/1910
Capacity Gallons:	5000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported

Tank Info:

Tank Number:	001
Tank Id:	280472

Equipment Records:

H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping
A01 - Tank Internal Protection - Epoxy Liner
E00 - Piping Secondary Containment - None
B00 - Tank External Protection - None
F00 - Pipe External Protection - None
I04 - Overfill - Product Level Gauge (A/G)
C01 - Pipe Location - Aboveground
D10 - Pipe Type - Copper
G02 - Tank Secondary Containment - Vault (w/access)
I05 - Overfill - Vent Whistle
J02 - Dispenser - Suction Dispenser

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	10/23/2013
Capacity Gallons:	3000
Tightness Test Method:	-
Date Test:	Not reported
Next Test Date:	Not reported

DEC Memo: "1/12/06-Vought-Called Sherry Bulkley and left message to return call to DEC. Vought spoke to Sherry and contractor was called to cleanup spill to remove mercury rectifier and contigency plan was in effect when spill was occurred. Containment set up prior to removal. Some mercury went into containment and onto plastic lining and mercury salt was used to solidy material. Liquid mercury was transferred into flasks for removal and removal of solidified mercury. All barriers and containment will be transferred as disposed of as haz waste and floor will be washed with a mercury salt. Drains not affected as it was covered prior to work starting. Spill closed by Vought."
Remarks: "contained."

DEC Memo:	"5/18/2016: Rashad Responded to site where I was met by general contactor and property owner Alexis. The property is under construction in a narrow area as part of redevelopment between 2 existing buildings, further excavation will be difficult as structural piles have been placed in excavation as they have reached proposed building depth. The excavation is exposing groundwater, no visual or olfactory evidence was observed at time of inspection, only a slight sheen was observed. They have excavated down about 12-15 feet. The property owner mentioned she had a phase 1 investigation done and the consultant recommended no further work as no significant evidence of contamination or threat of contamination was found.

VACANT LOT/FORMER APT BUILDING (Continued) **S118704719**

Alexis has provided the Phase 1 investigation. In addition engineering controls are in place for the existing redevelopment, there will be a vapor barrier installed. Neighboring property 304 West 148th Street was also inspected, they have a 2000 gallon AST wrapped in concrete, no spill or odor was present. PBS registrations in area are 302 West 148th 2-470147, 304 West 148th Street 2-609734, 104 Bradhurst Ave 2-606738. I let Alexis know that she should bring in an environmental contractor to pump out oil water mix and to see if it returns, and have contractor advise them as to what options they have. According to Alexis the proposed property will already have vapor barrier installed. Photos need to be uploaded to D2. 5/19/2016: Rashad Review of Phase 1 is as follows: The subject property building consisted of a residential building from at least 1909-2004, which was then demolished between 2004-2005, the property has been vacant since 2005 until construction began. Groundwater flow is inferred to be to the southeast direction, and present at a depth of 6-10 ftbgs. The report concluded that no further action is needed and no Phase 2 needs to be done. 306 West 148th Street does not have an alternate address. No additional spills of PBS registrations found for site. No spills found for 304 West 148th Street or 302 West 148th Street. Called Alexis, she has been in touch with contractors and will let me know when she picks one. I also asked Alexis to send me a document or a note indicating that a vapor barrier will be installed as part of building plans. Phase 1 and photos have been uploaded to D2. Received email from Alexis with drainage plan that indicates a 6 mil vapor barrier will be installed, drawing was uploaded to D2. 5/25/2016: Rashad Spoke to Alexis yesterday she indicated Riteway just left site and recovered approximately 2000 gallons of liquid. She indicated she was dealing with Rob Hill and that they will be coming up with plan, she also indicated they took samples for analysis. Spoke to Rob, he indicated they did pump out 2000 gallons of water with some oil mixed in. Rob said his guys indicated that the oil was a heavy oil, maybe #4 or #6 oil. Rob said they may return to possibly excavate some soil however it will be difficult because of the depth of the excavation being near groundwater as well as the structural piles already in place. I let him know that he should sent the samples out for analysis and to reassess after receiving the results. Sent email to Alexis letting her know I spoke to Rob and that we will see what samples look like before any further requirements are made by the Department. 6/3/2016: Rashad Received email from Rob Hill: Please see the following attachment for samples results 306 w 148 st, NYC. If you have any questions or concerns feel free to contact me at 718-855-7272. Email had two attachments, they have been uploaded to D2. Sample results only show slight exceedances in SVOCs they are as follows: Dibenzo(a,h)Anthracene-436ppb, 392ppb benzo(k)fluoranthene-1050ppb, benzo(a)pyrene-1300ppb, 1020ppb, and indeno(1,2,3-cd)pyrene-1300ppb, 1130ppb. Sent email to Alexis: I apologize for missing your call yesterday. After reviewing the soil data I will require no further action. I will be closing spill#1601635 for 306 West 148th Street today. Please let me know if you have any questions. Thank you. Spill will be closed due to minor SVOC exceedances and installation of vapor barrier in new building. "

Remarks: "found contamination during excavation/site has gone thru phase one study"

FINDS:

Registry ID: 110063835097

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001
Tank Id:	4624
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
K00 - Spill Prevention - None
E00 - Piping Secondary Containment - None
I04 - Overfill - Product Level Gauge (A/G)
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
D02 - Pipe Type - Galvanized Steel
F00 - Pipe External Protection - None
G04 - Tank Secondary Containment - Double-Walled (Underground)
J02 - Dispenser - Suction Dispenser

Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	Not reported
Capacity Gallons:	1500

308 WEST 148 STREET (Continued) **U003384869**

Tightness Test Method:	NN
Date Test:	Not reported

FINDS:

Registry ID: 110069672090

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

RO-BESS CLEANERS (Continued) **1000137427**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"Buried fill line appears to be leaking into soil and up through the sidewalk. Temp fill line has been installed. Contractor is getting sidewalk permits and will then dig out the old line and any contaminated soil. Preferred Environmental has been hired to do the cleanup, testing and close out report. - 12/22/11 02/03/12-Hiralkumar Patel. alternate addresses: 345-385 W 145th Street, 251-265 Edgecombe Ave, 696-708 St. Nicholas Ave PBS #: 2-201111. as per PBS record, the site has one 20,000 gal #6 oil AST in subterranean vault. tank was installed in Oct. 1956. no other spills found. 2:30 PM:- spoke with Jill at Preferred. she mentioned that they sent proposal but never heard back. 2:53 PM:- spoke with Ms. Rodriguez, property manager. she mentioned that J&R Mechanical is in process of hiring contractor for cleanup. Hillview Owners Corp. c/o Midboro Management, Inc. 148 West 37th Street, 8th Floor **main office** New York, NY 10018 Ph. (212) 877-8500 Hillview Owners Corp. **property owner** c/o Midboro Management, Inc. 345 West 145th Street **on-site management office** New York, NY 10031 Attn.: Felicia Rodriguez **property manager** PH. (212) 281-3300 email: frodriguez@midboro.com Mr. Smiley Building Engineer Ph. (646) 773-3138 2:56 PM:- spoke with Mr. Grand at J&R Mechanical. he mentioned that #6 oil was coming out from sidewalk during a delivery. its about 20 ft long sidewalk between the curb (where fill port is) and the building foundation wall. he also mentioned that the tank and all associated lines run aboveground expcet the part of fill line that runs under the sidewalk. they have installed a temporary fill line. he has sent proposal from Preferred to property manager who has forwarded it to co-op board. they are waiting for response from board. J & R Mechanical Services Inc. Lenny Grand Ph. (718) 328-9935 email: leggett2@verizon.net 3:36 PM:- sent letter to Ms. Rodriguez requiring soil delineation and endpoint samples. asked her to submit report by 03/23/12. letter emailed to Ms. Rodriguez and Mr. Grand. 03/01/12-Hiralkumar Patel. 4:13 PM:- received email from David from Riteway. he inquired if borings needed prior to excavation. 03/07/12-Hiralkumar Patel. 4:11 PM:- spoke with Joe at Riteway. they will replace the fill line and will remove any contaminated soil. as they are planning for excavation, no need for soil boring at this time. 03/20/12-Hiralkumar Patel. 2:56 PM:- received email from Bill from Preferred. Preferred has been authorized to do work and they will install soil boring on 03/26/12. 3:36 PM:- spoke with Bill at Preferred. he mentioned that due to oil seepage through basement wall and oil coming up through sidewalk, owner decided to perform soil delineation prior to any excavation. Preferred will do some borings to define area of contamination, then Riteway will perform excavation. Bill is hoping to get NYC DOT permit tomorrow and will do soil delineation next week. 06/08/12-Hiralkumar Patel. 2:10 PM:- spoke with Bill. they finished investigation and submitted report to property manager. Bill will send copy of investigation report for review. Bill mentioned that property manager was going to hire Riteway for cleanup of contaminated soil. 2:13 PM:- spoke with Joe at Riteway. he confirmed that Riteway did not do the

SIDEWALK (Continued) **S111457056**

job. 2:18 PM:- spoke with Mr. Grand. he does not have much information and asked to contact Ms. Rodriguez or Mr. Smiley (buiding engineer). tried Ms. Rodriguez's phone number, but no response. 2:25 PM:- spoke with Ms. Rodriguez on Mr. Smiley's phone. she mentioned that Preferred drilled on sidewalk and collected samples. she mentioned that work has been completed. informed her that the spill cleanup report was due on 03/23/12 and must be submitted to the Department by the end of 06/15/12, or else case will be referred for enforcement. 3:01 PM:- sent email to Ms. Rodriguez and informed her that the cleanup report must be submitted to the department by the end of 06/15/12 or else case will be referred for enforcement. email copied to Bill. 3:35 PM:- received email from Bill including investigation report. abstract: - an existing 20,000 gal AST, installed circa 1956, is present within a subterranean vault in the sub-basement of the building - the AST is set on top of concrete piers within the subterranean vault, which has a pourcd concrete floor - standing water was noted within the vault <---------- - observed fuel oil on the interior wall of the AST vault, immediately beneath the location of the entry point of the remote fill piping, a depth of approx. 4 ft below outside grade <-------- - fuel oil staining was also noted on the concrete sidewalk immediately above fill piping, exterior, to the south of the building - J&R Mechanical installed a new remote fill line within the sidewalk of 145th street - during site inspection, Preferred confirmed that two former remote fill lines were abandoned and filled with concrete and one new remote fill line was present along 145th st - four soil borings (SB-1 through SB-4) were installed to refusal, ranging from 7 to 10 ft bg - soil borings were pre-cleared to a depth of six ft bg - as the subject property is situated on a steep topographic slope toward the southeast, boring SB-1 was installed just northwest (inferred upgradient) of the former remote fill lines and borings SB-2 through SB-4 were installed southeast of the former remote fill lines, in a linear pattern, along W 145th street - soils within the borings consisted of silty sands with various fill material and cobble - field screening did not identify any evidence (staining, odors, discoloration or elevated PID) of contamination within any of the four soil borings - no groundwater found before refusal - collected three soil samples at 4-5 ft bg from boring SB-1, SB-2 and SB-3 - no contamination found in soil samples - proposed to excavated soils directly below and within the trench of the former remote fill lines report includes pics showing oil seepage into the tank room. 06/13/12-Hiralkumar Patel. 3:29 PM:- left message for Ms. Rodriguez. informed her that the department requires cleanup of contaminated soil. asked her to call back to discuss. 3:32 PM:- spoke with Bill. he received call from management office and requested a cost estimate for the work. Bill is planning to remove the former fill lines and any associated contamination. Bill will submit cost estimate by 06/15/12. he will call back with update. 06/26/12-Hiralkumar Patel. 10:57 AM:- spoke with Bill. he hasn't received work authorization yet. 11:00 AM:- left message for Ms. Rodriguez. informed her that case will be referred to legal if no response, about cleanup status, by the end of today. 11:02 AM:- spoke with lady at management's main office and informed her about possible enforcement, if no response by the end of today. 12:38 PM:- received call from Ms. Rodriguez. she mentioned that they were waiting for response from Preferred. asked Ms. Rodriguez to submit a work schedule by the end of tomorrow. informed her that the work must begin within two weeks (by 07/10/12)

SIDEWALK (Continued) **S111457056**

to avoid enforcement. 06/27/12-Hiralkumar Patel. 11:33 AM:- received call from Bill. he received verbal approval from property manager. once he receive signed approval, he will apply for sidewalk permit. informed him that the work must begin by 07/10/12. 07/05/12-Hiralkumar Patel. 9:14 AM:- received email from Bill. he mentioned that Preferred has been authorized to conduct the required cleanup and will apply for DOT permit. based upon anticipated receipt of sidewalk permit next week, work may begin in week of 07/16/12. 07/06/12-Hiralkumar Patel. 12:14 PM:- received message from Bill. he mentioned that sidewalk permit application will be submitted, as soon as they get payment from owner (which is expected today). 07/17/12-Hiralkumar Patel. 2:30 PM:- spoke with Bill. he mentioned that due to on-going DOT work in area, they have to wait to get permit for required sidewalk work. asked Bill to call back by 07/23/12 with updates. 07/30/12-Hiralkumar Patel. 6:47 AM:- received email from Bill. they received DOT permit late last week and have scheduled work for 08/01/12. 08/17/12-Hiralkumar Patel. 1:02 PM:- spoke with Bill. they finished work and endpoint samples came back clean. he will submit report soon. 09/10/12-Hiralkumar Patel. 3:07 PM:- spoke with Bill. he will submit report tomorrow. 10/02/12-Hiralkumar Patel. 1:58 PM:- sent email to Ms. Rodriguez inquiring updates regarding the spill cleanup report. email copied to Bill. 11/06/12-Hiralkumar Patel. 10:45 AM:- received email from Bill including report. abstract: - excavated soil along former remote fill line - excavation was approx. 16 ft long by 3 ft wide with varying depths of 2-3 ft bg - two endpoint samples collected - no contamination found in endpoint samples 11/29/12-Hiralkumar Patel. based on available information, case closed. 4:23 PM:- sent spill closure letter to Ms. Rodriguez. letter emailed to Ms. Rodriguez and Bill."

Remarks: "1-10 gallons spilled from a line undergrounded. True amount won't be known until the sidewalk is removed."

FINDS:

Registry ID: 110063835079

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	100
Tank Id:	64059
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

L09 - Piping Leak Detection - Exempt Suction Piping
H00 - Tank Leak Detection - None
E00 - Piping Secondary Containment - None
F01 - Pipe External Protection - Painted/Asphalt Coating
K00 - Spill Prevention - None
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
G00 - Tank Secondary Containment - None
J02 - Dispenser - Suction Dispenser
C01 - Pipe Location - Aboveground
I05 - Overfill - Vent Whistle

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number: 100
Tank Id: 14220
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

L09 - Piping Leak Detection - Exempt Suction Piping
E00 - Piping Secondary Containment - None
H00 - Tank Leak Detection - None
K00 - Spill Prevention - None
D01 - Pipe Type - Steel/Carbon Steel/Iron

EDGECOMBE AVENUE 291 REALTY LLC (Continued) **A100292030**

F01 - Pipe External Protection - Painted/Asphalt Coating
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
C01 - Pipe Location - Aboveground
I05 - Overfill - Vent Whistle
J02 - Dispenser - Suction Dispenser
G00 - Tank Secondary Containment - None

Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service

Tank Info:

Tank Number:	001
Tank Id:	37038
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
B00 - Tank External Protection - None
F00 - Pipe External Protection - None
H00 - Tank Leak Detection - None
K01 - Spill Prevention - Catch Basin
L09 - Piping Leak Detection - Exempt Suction Piping
E06 - Piping Secondary Containment - Remote Impounding Area
J02 - Dispenser - Suction Dispenser
C02 - Pipe Location - Underground/On-ground
I04 - Overfill - Product Level Gauge (A/G)
G04 - Tank Secondary Containment - Double-Walled (Underground)

Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	01/01/1990
Capacity Gallons:	2500
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 05/16/01 SCHOOL CONSTRUCTION ATHORITY PRESSURE SEALING BASEMENT AREAS WHERE THERE IS A WATER PROBLEM. THIS HAPPENDS TO INCLUDE THE BOILER PIT. WHILE PRESSURE GROUTING, WHAT APPEARS TO BE A #6 FO WAS PUSHED THROUGH THE GROUT HOLES. THE GROUT APPEARS TO HAVE A SPECIFIC GRAVITY BETWEEN WATER AND # 6 OIL. THE SCHOOL MUST CLEAN AND PROPERLY DISPOSE OF THE OIL, AND I RECOMMENDED THAT THE GROUT HOLES BE SEALED AND THE SURFACE OF THE FLOOR BE EPOXY SEALED ESENTIALLY ENTOMBING ANY RESIDUAL OIL. 12/8/2005: James Merlo, coordinator for NYC School Spill Sites indicates that oil continues to be collected and disposed of from a sump in the building. He thinks that it has been going on for quite a long time and may not be entirely related

NYCSCA - PUBLIC SCHOOL # 194 (Continued) **S105057411**

to the spill they had at the school but may be from an outside source other than the school. 02/01/07: Reassigned from Mandy to Chanda. 4/16/07: Kartik Chanda of DEC has reviewed documents regarding this spill case. On 4/16/07, Chanda sent a letter to James Merlo, Manager fuel division, NYC Department of Education, requiring that the following information be submitted to the DEC for review by 5/31/07. 1. An explanation of the cause of the tank system failure; 2. Either a description of the work performed to restore the integrity of the tank system (including retesting results), or a description of the work performed to close (decommission) the tank; 3. Information regarding petroleum contamination found at the site and cleanup activities (if any) associated with a release from this tank system; 4. Any available documentation (i.e., invoices, bills, sampling analysis reports, etc.) pertaining to the work performed at this site associated with this violation 5/10/07: Chanda received a letter from James Marlo, NYC Department of Education regarding this spill. He stated that there is no oil being collected from PS 194. There is no ongoing problem at this location. 5/17/07: Chanda has reviewed the spill report form, the spill report indicated that the NYCSCA was involved cleanup activity associated with this spill dated 5/14/01. On 5/17/07, Kartik Chanda of DEC sent a letter to Ms. Lee Guterman, NYCSCA, requiring that an Investigation Report associated with this violation be submitted to DEC for review by 7/02/07. 6/29/07: Chnada received a Remedial Action Letter dated 7/31/01 and Emergency Response to Oil Spill Letter dated 5/15/01, from NYCSCA on 6/27/07. 7/16/07: Chanda has reviewed the Remedial Action Letter and Emergency Response to Oil Spill Letter regarding this spill at the site. ATC Associates Inc., prepared the remedial action letter dated July 31, 2001. This letter did not indicate the site plan regarding this spill. This report did not include soil and GW investigation data regarding this spill. Chanda discussed with Joe Sun (Unit Supervisor)on 7/16/07 and decided a site visit is required to get the decision regarding this spill case. 7/18/07: Chanda spoke with NYCSCA (Mr. Drew Pardus)regarding a site visit schedule with NYCSCA representative. He agrees with NYSDEC requirements regarding this spill case. He will call to NYSDEC to select a date and time to make a site visit. 8/01/07: Chanda visited the site, met with Mr.Drew Pardus (NYCSCA) and consultant Peter Burger of STV Incorporated (Consultant). It is concluded that an investigation work plan regarding investigation of # 6 fuel oil storage tanks area and boilers floor area is required for approval. 10/22/07: Chanda received a Phase II Environmental Site Investigation Proposal/Scope of Work plan prepared by STV Incorporated (Consultant) dated Auguest 31, 2007. 10/26/07: Chanda reviewed and approved the Phase II Environmental Site Investigation Proposal/Scope of Work Plan. The work plan proposes the installation of ten(10)soil boring at the site. 0n 10/24/07, Chanda sent an approval letter to Ms. Lee Guterman and her consultant, requiring that a final investigation report must be submitted to the DEC by 01/15/08 for review and approval. 11/6/07: Chanda received a phone call from NYCSCA(Mr. Drew Pardus) regarding the drilling schedule for side subsurface investigation. He stated that the installation work for the ten(10) soil borings at the property has been scheduled. Work will commence on November 11& 12 (Sunday & Monday), 2007.These two days are weekend and holidy. 3/13/08: Chanda received a Subsurface Investigation Report from NYCSCA prepared by STV Inc., dated January 8, 2008. 5/12/08: Chanda reviewed the Subsurface Investigation Report and had the following

NYCSCA - PUBLIC SCHOOL # 194 (Continued) **S105057411**

comments: * One 10,000-gallon UST (active) and one 15,000-gallon AST (inactive) No.6 fuel oil located at the site; *Groundwater was not encountered within 20 ft bgs during the investigation. Bedrock was encountered at depths that ranged from 12.5 ft to 20ft bgs; *Fourteen (14) soil borings were advanced around UST area and along the run of the remote pipe line; * No VOCs were detected above the TAGM RSCOs; * Several SVOCs were detected at concentrations grater than the TAGM RSCOs; * The extent of No. 6 fuel oil impact in soil is conservatively estimated to be approximately 58 ft by 32 ft with a 7 ft thick zone between the bottom of the UST (13 ft bgs) and the deepest bedrock surface 920 ft bgs); Based on the findings of this SIR, STV recommended the followings: " excavation and removal of the UST; " excavation and disposal of impacted soil;. " sampling and analysis of post-excavation samples;. " site restoration; and " Preparation of a UST Closure Report. 5/14/08: Chanda sent a letter to Ms. Guterman, NYCSCA requiring that a UST closure report be submitted to DEC by 7/15/08 for review and approval. 9/18/08: Chanda received a letter from NYCSCA (Lee Guterman)dated 8/8/08, regarding the UST out of service status. The letter stated that the NYCSCA has a schedule to remove the UST and petroleum impacted soil at the site. It is anticipated that the boiler upgrade would commence in the summer of 2009 and continue through the summer of 2010. The UST closure report would be submitted to DEC in the summer of 2010. (see eDocs) 10/30/08: A meeting was held on 10/21/08 among DER staff, the NYCSCA representative to discuss the site status, UST out of service status letter and time extension request for this site. The meeting s consensus was that the UST Closure Report would be submitted to DEC in the summer of 2010. Chanda sent an approval letter to NYCSCA requiring that UST Closure Report be submitted to DEC by 7/15/2010 for Review and approval.(see eDocs) 05/13/2009: This spill case was transferred to A. Doronova. - AD Reviewed the file. RAP was approved by K. Chanda of DEC, UST Closure Report to be submitted to DEC by 7/15/2010 for review and approval. AD 01/05/2010: Received a phone call from Mr. Pardus of NYCSCA. He asked for a meeting to discuss boundaries of the proposed area of excavation. Met with D. Pardus and Bob Kanaparthi of NYCSCA. It was agreed that 11 post-excavation end-point soil samples will be collected after UST removal for lab. analysis. Excavation on the north-western part of the property will coinside with the property line. Five day notice before start of field work will be given to DEC. AD 07/29/2010: Called and left a message to D. Pardus of Pardus Env. Consulting regarding site status update info. AD 05/11/2011: Received an e-mail from D. Pardus saying: Hi Ainura, Attached are attachments to the UST Closure Report for PS 194M (DEC Spill Case 0101789). A hard copy of the report will follow. Please feel free to contact me at 646-577-8280 if you have any questions. Sincerely, Drew Pardus Will review. AD 06/28/2011: Reviewed the report. It was prepared by STV Incorporated. The report states that on March 9, 2010 a total of 500-gallons of oil and water mixture were removed from the two tanks and were disposed off-site. Following cleaning, the tanks were cut up and transported off-site to scrap metal facilities. Excavation activities were conducted intermittently from April to September 2010. The Site was excavated within the boundaries of the shoring lines using conventional hydraulic excavation equipment to remove petroleum-impacted soil/fill. Shoring was required to support the excavation walls along the perimeter of the excavation footprint not abutting the walls of the school building. The shoring was installed at locations where

NYCSCA - PUBLIC SCHOOL # 194 (Continued) **S105057411**

soil borings conducted during the Phase II ESI confirmed that there were no petroleum impacts. The excavation dimensions were approximately 57 ft (north-south) by 27 ft (east-west) by approximately 16 ft bgs. The excavation was completed down to the exposed bedrock surface throughout the entire tank pit cavity area. Excavated material was directly loaded for transport and off-Site disposal. LIAL provided oversight, field screened soil, and signed soil disposal manifests during excavation and soil load-out. Soil transportation was performed by licensed haulers in accordance with all applicable regulations, including New York State Department of Transportation (NYSDOT) road permit requirements. In total, 1205.45 tons (37 truckloads) of petroleum-contaminated soil was transported from the Site and disposed of at either, Clean Earth of Carteret, Carteret, New Jersey or Clean Earth of New Castle, New Castle, Delaware. After reaching the final remediation depth/bedrock (approximately 16-ft bgs) within the shored excavation area, three sidewall endpoint soil samples (sample IDs: ES@15, SS@15, and WS@15) were collected on August 15, 2010. Samples were analyzed for VOCs and SVOCs. Laboratory results indicated that no VOCs or SVOCs were detected. STV made the following conclusions and recommendations based on the remedial activities conducted at the Site: " All the tank closure and remediation activities were conducted in accordance with the NYSDEC approved recommendations provided in STV s Subsurface Investigation Report dated January 8, 2008; " All accessible petroleum-impacted material was removed to the final excavation depth of 16 ft bgs (i.e., depth to bedrock) and disposed of at appropriate permitted facilities; " The results of post-excavation endpoint soil sampling state that no STARS VOCs or SVOCs were detected in any of the three sidewall samples. STV recommends no further action with respect to the subsurface conditions at the Site and recommends NYSDEC issue a No Further Action determination for Spill Case #0101789. Will discuss the recommendation for the spill case closure with J. Kolleeny of DEC. AD 07/05/2011: Discussed closure of the case with J. Kolleeny of DEC. Based on the data provided in the Closure Report, it was decided to approve the spill case closure. Issued and sent Spill Closure Letter to Lee Guterman. DL pdf copy to eDocs. Case closed. AD "

Remarks: "spill was observed while waterproofing the basement. spill contractor has been called for clean up of basement...there are 2 tanks underground that will need a case manager to work w/ caller to get them taken care of. "

FINDS:

Registry ID: 110012265976

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Classification:	N
Region:	2
Acres:	Not reported
HW Code:	231009
Record Add:	02/06/2003
Record Upd:	06/14/2006
Updated By:	DMMOLOUG
Site Description:	The former Film Storage Warehouse is approximately 0.25 acres and is located at 203-209 West 146th St. in Manhattan. The property is located on the north site of West 146th St. between Adam Clayton Powell Jr. Boulevard and Fredrick Douglass Boulevard. The site is bounded on the north and west by residential buildings, and on the east by commercial buildings with residences on the upper floors. The former warehouse site has been unoccupied for over 50 years and is currently vacant. A site investigation was funded by EPA as a targeted site assessment. A Site Investigation Report was approved in November 2004. The site did not qualify for addition to the Registry of Inactive Hazardous Waste Disposal sites.
Env Problem:	Several contaminants were detected in soils including semivolatile compounds, (primarily polyaromatic hydrocarbons)and several metals. Most of the soil contamination appears to be related to historic fill material. The building interior also has debris piles containing asbestos and lead (from insulation and lead paint, respectively). Soil vapor beneath the building contains volatile organic compounds above expected background concentrations.

DEC Memo:	"01/11/08 - Zielinski Today and yesterday I left two messages for Mr. Celeste, phone (347)672-6059, requesting update on the spill. At other phone number, (212)689-1520, which is the caller, staff has no knowledge about the spill. Mr. Celeste called and said that a NYCDEP HazMat unit picked up a leaking drum, containing unknown substance, from the street and a residue on the sidewalk was cleaned by NYC Dept. of Sanitation. The case is closed."
Remarks:	"Unknown amount of nitrogen was released from an unknown tank and is impacting the sewer. Unknown clean up also."

DEC Memo:	"08/13/11-Hiralkumar Patel. 3:00 PM:- spoke with ERT. its not the gasoline spill, but while fixing a leak in natural gas main, they found water around the area which might be contaminated with natural gas components. ConEd contractor will remove contaminated water. 9/27/11 - Austin - Con Ed went to repair a broken gas main, and found that it had been corroded by an active leaking water main - Water from the main comingled with the gas/gas line condensate, contaminating the adjoining soils - Con Ed contained and cleaned up the spill - See eDocs files for further information - spill closed - end"
Remarks:	"1453 THE CALLER ADVISED DISPATCH THE SPILL WAS DUE TO A FAULTY LINE DURING EXCAVATION. SOIL HAS BEEN IMPACTED. CLEAN UP IS IN PROGRESS."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was AUSTIN 7/6/04 - AUSTIN - TRANSFERRED FROM JOHN FINGER FOR REASSIGNMENT - END 6/8/05 - Transferred to TLGibbons in Central Office 8/15/05 - Spoke with Nancy DiSimone, Washfield Management (also Marrano Development Affiliates, L.P.), 718-991-3030. They own/manage this building. She has worked for this company for ~30 years and is somewhat familiar with history of spill, which was called in on 7/16/91. She faxed a 2/19/97 FDNY, Bureau of Fire Prevention, notarized affidavit which states that the 20,000 gal oil tank was emptied, filled with slurry and fill line capped. A new 12,000 gal oil tank replaced this tank. Close spill "
Remarks: "20K TANK, EXCAVATING TANK, PIPING LEAKING. PLACED CONTAMINATED SOIL ON PLASTIC. CALLED PLUMBING CONTRACTOR."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE transfered from Hale to Tibbe on 3/18/03. 11/12/10 - spill re-assigned from Tibbe to Joe O'Connell 11/28/11 - spill re-assigned from O'Connell to Obligado. 2/7/14 - Obligado - I reviewd the edocs case file. According to a May 29,2008 letter in edocs, Mark Tibbe the prior case manager states, the spill has been closed . I am not sure why the case is still open in the database. Spill closed."
Remarks:	"spill leaking through subway wall cleanup is underway and investigation also underway to find cause and source "

DEC Memo:	"7/22/15: Mahat DEC Mahat left a voice message to Adam Stryker @ 212.736.6888 inquiring about the repair and retest. Mailing Address: 695 NICHOLAS REALTY CORP 225 WEST 34TH STREET ROOM 2010NEW YORK, NY 10001 ATTN : KENNETH FRIEDMAN PBS : 2-100390 [It has been crossed referenced] 7/30/15: Mahat DEC Mahat received a call back from Hector (@ 646-773-2033 - Property Director) inquiring more about the progress on the spill case on Department end. He will provide pasting TTF, failed TTF results and brief repair description. DEC is waiting for a closure report. 8/19/15: Mahat DEC Mahat received passing TT report. It has been uploaded on D2 for reference. However, the TT is performed before another TT failure was reported on 7/22/15. Tank passed the pressure test on 6/3/15 and failed again on 7/22/15. Further investigation is warranted by the Department. Tank system will be out of commission until further notice. DEC Mahat has left a voice message to Hector to call back for a hot wash. A TTF letter has been sent to above address and failing TT result has been uploaded on D2. 8/31/15: Mahat DEC Mahat received another Passing TT result with expired calibration date on the TT equipment. Updated TT Result with proper calibration date has been uploaded on D2 for reference. The tank did not passed the pressure test because of the loose threat in manhole cover and there was a leak on return and sucksen line. Repair has been performed and the tank has passed the pressure test. Based on the provided information to the Department : No further investigation is warranted by the Department. Spill case will be closed on NYSDEC Spill database. "

DEC Memo:	"This site had the same problem several years ago. Case has been assigned to Sawyer for investigation. 12/9/04 - Sawyer - Talked

APARTMENT BUILDING (Continued) **S106736042**

Donald Mack today there seems to still be a problem. I have sent by mail and fax a modified Contaminated Soil letter to: Maurice McKenzie Royal Management LLC 507 West 186th Street New York, New York 10033 I also talked to a Jeanette with Royal Management 212 923 4840 and tried to get them to get a clean up crew out to the site. They have fail to repsond. 12/10/04 - Sawyer - ECO Lochner responded to the site and gained access into the basement and confirmed a leak with a sheen from next door. 12/22/04 - Sawyer - Called Royal Management and let them know that they were going to have some ticketing problems for not trying to rectify this problem. 1/11/05 - Sawyer - Called Royal Management many times to try to gain access to the basement of building 200 W 146th Street with ECO Lochner. ECO suggested we go to the management office up on 186th Street. Once there he explained that no work was to be performed before we gained access to the boiler and tank rooms of that building. They were to schedule meeting with Maurice Mckenzie asap. 1/14/05 - Sawyer - Finally met Maurice McKenzie at 1100 hrs to gain access. There were numerous violations from the start not to mention they were to have already performed a subsurface investigation, as in the letter dated 12/9/04, that had not been done. There was no PBS registration posted and none could be produced. There was a running sump pump with an oil sheen on top in the far left hand room(reported to DEP #994306). The floors in both of the rooms that butt up against the 210 wall were of newer painted wooden sheet board. There was a newer tank 3000 gallon #2 fuel oil tank in a vaulted tank room on the right. The basement also contained a newly cemented door to a large room on left side which was the old tank room/boiler room but there was so much garbage in the room I could only see connection pipes at the top near the ceiling. I told Maurice to clean the room out and to get borings in that area and the full length of the wall leading to 210 W 146th Street. There was new paint everywhere in this basement. 03/04/05 - Sawyer - Mr. Mack of 210 W 146th Street notified me today that they have had a another oil release on 3/2/05. Mrs. Ruiz of Royal Mangement was to have hired Tri Stae Environemtal, but I have not heard anythig form them confirming this. 6/3/05 MT// A tank test failure was called in by Ray Kahn for this address on 6/2/05//new spill # is 05-02555 has been closed out and referred to this spill #.// Spill Transferred from Sawyer to Tipple \\\\ 6/13/05 Tipple spoke with Ray Kahn//leaking tank to be taken out of service ASAP after which an investigation/remediation is to proceed//// 8/12/05 Sharif visited the site yesterday.Sewer pipeline at 200 W 146th Street basement broke,liquid dirt flooded allover the place and seeped through the wall impacting adjacent building's basement. There is evidence of old oil spill underneath the wooden besement floor. It looked like black, oily contaminated stuff along the oil line that runs underneath the wood floor.Building owner Mr. Sion Sohayegh Hired ESPO (Ray Kahn, 212-330-7501, cell: 917-939-7366) to fix the tank and pipeline. Mr. Sion will do the initial clean up this week end followed by extensive remedial work soon. 10.07.05 SR// I called both Ray Kahn (consultant)and Sion Sohayegh, left message for both of them to follow up about the remedial work that need to be done. 11.10.05 Sharif- This spill no. merged with Spill # 0505300 and hence closed."

DEC Region: 2
DER Facility ID: 293220
DEC Memo: "6/3/04 tipple closed this spill number and referred it back to spill # 0407205 8/12/05 Sharif reopened the case since this is the source of the spill to the adjacent property at 210 146th Street. Spill# 0407205 & 9904971 represent the same location and source of spillage (both are closed). 09.15.05 SR// I spoke with Mr. Ray Kahn of ESPO today. He informed me they are taking away the ply wood floor, cleaning the dirt and repaired the leak to prevent any water seeeping through the next door wall. I advised him to provide DEC the work plan including soil boring works to be performed. 11.10.05 Sharif-Rec'd investigation report done by ESPL.Couple of spill no.s were called in before at this address. Those are-spill no. 0407205,9905161, 9904971. 12/19/05: Case reassigned to Andersen. Reviewed subsuface investigation report prepared by ESPL. VOCs and sVOCs found in soil borings. Proposed excavation. Sent approval letter. 4/19/06: Spoke with Ray Kahn of ESPL. The RP is being uncooperative. Sent letter with stipulation agreement requiring implementation of the approved RAP. Stipulation due back by May 31, 2006. Sion Rohayegh phone number: 516-848-0550 5/23/06: Spoke with Rosario Reyes (212-923-4840). Scheduled site visit for 6/5/06 to discuss possible off-site source from adjacent building, and required future work. 5/26/06: Spoke to Ray Kahn. Rescheduled site visit for 6/6/06. Oil was found in the neighbors basement. The tank was fixed and retested, but the contamination has not been remediated. The building is in shody condition, there was a raw sewage spill in the basement and an old boiler was recently removed. 5/30/06: Left a message with Rasario Reyes secretary to confirm site visit. 6/6/06: Site inspection by NYSDEC Andersen. When the spill was called in a water leak from the building to the south flooded the basement and caused the fuel oil to infiltrate that building to the west. The neighbors wall and the adjacent floor has since been cleaned. The basement of the building to the west is four feet lower than the site. Temporary walls and plywood floor that was on top of the concrete slab in the basement were removed. Endpoint samples will be taken after excavation. 7/14/06: Received phone call from Ray Kahn. Floor needs to be removed and then excavation will be scheduled. 8/21/06: Spoke with Ray Kahn (212-330-7501). The basement was prepared for excavation. Excavation will be scheduled soon. He will contact me when a date is scheduled. 9/18/06: Spoke to Ray Kahn. Excavation has not been scheduled yet. The owner was out of town. He will followup with the owner and call me back. 10/6/06: Spoke to Ray Kahn. Excavation has not been scheduled yet. He will call the owner and get back to me. 10/16/06: Left voice message with Rosario Reyes to followup on overdue stipulation agreement and excavation. 10/24/06: Sent stipulation agreement overdue letter. May need to refer to legal. 1/25/07: Excavation scheduled for 1/30/07. 2/6/07: Spoke to Arash at ESPL (office 212-330-7501, cell 516-315-3231). Excavation postponed due to weather. 2/23/07: Site visit. Excavation of three rooms in the basement. Product (sheen) in all excavations. Groundwater at 1-2 feet bgs. Liquid will be pumped out. Downgradient wells installed on the sidewalk. 3/6/07: Spoke to Ray Kahn. Recovery wells will be installed in the excavations, and then the excavations backfilled. Monitoring wells will be installed on the sidewalk. This will occur early next week. 3/28/07: Arash is no longer employed by ESPL. Emailed Ray Kahn (rkahn@espl.com) to followup on well

RESIDENTIAL (Continued) **S106971964**

installation. 4/4/07: Left message with secretary for Ray Kahn. He will be in the office tomorrow. 4/5/07: Spoke to Ray Kahn. Four wells installed in the building. Will send email with site plan. 5/2/07: Emailed Ray Kahn. Requested an update report with well sampling data and site plan. 5/29/07: Left message with Ray Kahn's secretary to return call. 5/31/07: Left phone message with Ray Kahn's secretary to followup. 6/14/07: Spoke to Ray Kahn. The four on-site wells will be gauged and sampled for sVOCs. A well may be installed in the sidewalk. 7/26/07: Emailed Ray Kahn to followup on the status of groundwater gauging and sampling. 8/15/07: Spoke to Ray Kahn. The owner has not paid him for work completed. He will contact the owner and call me back. 8/31/07: Referred to legal. 9/12/07: Received phone message from Ray Kahn. Wells will be sampled and report submitted (phone: 212-363-3775, cell phone: 917-939-7366). 10/18/07: Received groundwater sampling report. MW-2 was dry. Monitoring wells MW 1, 3, 4 were sampled. Napthalene present in MW1 at 45 ppb. 10/19/07: NFA issued."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND This was a HPD site 12/4/2004 Spill Closure Report was sent to Steve Miller just before he left DEC(why?) 5/10/2005 HPD will be delivering another copy of the closure report 5/12/2005 Sangesland reviewed a copy of the spill closure report submitted by TDX Contrction Corp (718-472-0577). Report shows TTF in June 2001. Repair work was done on the manway and the tank (and lines) were retested (and Passed in Oct 2001). The statement says no contamination was found during this period. Now in 2005, much of the piping has been pulled out and the basement/boiler are in the process of being rebuilt/replaced. The existing tank will remain, but all the lines are being replaced. Color photos of the basemnet (and cut oil lines) were submitted May 2005. System will be repermitted and retested after construction on this site is completed. Spill Closed"

PBS : 2-401935 A TTF letter will be sent momentarily. A failing TT Result has been uploaded on D2 for reference. 11/5/15: Mahat DEC Mahat received a call from retained Contractor [ABC -

MULTI DWELLING (Continued) **S117853803**

Donna] informing that she has proposed to remove the tank. Once the tank is removes from the place, end point sample will be taken if necessary. A complete tank closure report will be submitted to DEC DeMeo for closure of the spill. DEC is waiting for closure report. 12/18/15 TJD Closure report has been submitted by ABC Tank. 2500 gallon AST failed tightness test with a reported dry leak on 7/28/15 by another contractor (All Boro). Cause of leak as described on TTF report was a Pre-cut leak on tank top and leaking copper fitting at gauge. Tank was removed from service and (2)temp tanks were installed (Riteway) ABC removed concrete containment and discovered old clean coal with no petroleum impacts. The tank has been removed by ABC and a tank replacement is pending spill closure. Photos and statements made by ABC in closure report indicate no product discharge. All Boro was contacted for an explanation of pre-cut leak - Chris Quintana describes the reported condition as an old cut access (tank cleaning) that was not welded closed but sealed with epoxy that failed. Based upon the documentation provided no further action is required. All documentation has been uploaded to DECDOCS. Spill closed."

TIPPLE 5/17/04// Tipple conducted site visit Friday eve.5/10/// All Borough retained and did an emergency initial cleanup on Friday' Phoenix brought in to finish up final cleanup on Monday awaiting manifests 6/7/04 Tipple updating//// Phoenix-631-864-4200 All Borough 1-800-426-0899 Board of Health Gave Ticket/// Rob Edwards 914-944-9200 bld. contact 06/22/06: Called Azellia Maddox at (212)689-1520 and talked to Ms. Gillmore (Supervisor), DEP Manhattan. She said no information indicated regarding this spill and the contact person is Jon Robertson (212)491-8486. -QA Called to building contact number (914)944-9200 and talked to Ms. Karolina (Titano Development) She said that She will talk to her boss and then She will call me back. -QA 06/26/2008: This spill case was transferred to A. Doronova. AD 09/2008: Tried to locate the contact person - Jon Robertson, phone 212-491-8486 and Titan Development without success. All phone numbers are no longer in service. AD 12/04/2008: Called and spoke with Paul of Phoenix, he promised to look through their files for some information on this site. Found on the Internet information regarding Titan Development, Inc. phone: (716)772-5510 (possible RP). Left a message. Found on ACRIS information regarding The Community Preservation Corp. (CPC), which listed in its files as an owner of the site. Address: 28 East 28th Street 9th floor New York, NY 10016 phone: (212)869-5300 fax: (212)659-0102 Called and spoke with Human Resources department of CPC. Explained the situation and left my contact information. Later received a call from Ms. Kristy Seyfert of CPC, she confirmed that CPC owns the property, she asked me to send them DEC spill report and an official request. Will send an Outstanding Violation letter. AD 12/05/2008: Issued and sent the Outstanding Violation Letter. Also sent a copy of the letter and DEC Spill Report via fax to CPC. DL PDF copy to eDocs. A response to the letter should be received till January 5, 2009. AD 02/19/2009: Received a phone call from K. Seyfert. She said that she did not received the letters. Sent these letters again via fax and e-mail: From: Ainura Doronova [mailto:axdorono@gw.dec.state.ny.us] Sent: Thursday, February 19, 2009 3:26 PM To: Kristy Seyfert <kseyfert@communityp.com Subject: 2515 Seventh Ave., New York NYSDEC Spill No. 0401623 and 262Alexander Ave., Bronx NYSDEC Spill No. 0301707 Dear Ms. Seyfert: Attached please find copies of the letters, regarding above-referenced sites, which were sent to you previously, but were not received by your company according to your statement. Please be advised that response is time sensitive. To receive a deadline postponement you should submit an official request. Sincerely, Ainura Doronova Environmental Engineer later received an e-mail from her saying: Thank you I am in receipt of the attachment and will address the situation ASAP. Kristy Seyfert Loan Analyst The Community Preservation Corporation 28 E. 28th Street, 9th Fl. New York, NY 10016 T: (212) 869-5300 x560 F: (212) 659-0102 kseyfert@communityp.com 05/18/2009: Did not receive any response yet. called and left a message to Ms. Seyfert. AD 06/01/2009: received an e-mail from N. Recchia of EEA saying: Ainura, Hello Ainura, We need your help to try and close this spill case. I would like to know exactly what DEC needs to close this spill but we have little info. I was contacted by the current owner of this property and The Community Preservation Corporation to work on closing this spill case file. Apparently this building underwent a complete renovation in 2004. The property owner only knows that the contractor who was working on the project removed a tank in the basement of the building. He has no information regarding the cause of the spill and neither does CPC who

THE COMMUNITY PRESERVATION CORP. (Continued) **S106469060**

retained the contractor to do the work. Apparently this contractor has no left no records or information and nobody can contact them anymore. The only info they gave me was your letter date December 2008 (attached). I went online to the DEC Spill Incidents Database Search (attached) and found limited info. According to your letter DEC requires a summary of cleanup activities, manifests, post excavation samples etc. If I can't get this information would DEC accept us performing soil test borings in the vicinity of the former tank to check existing soil quality conditions? I could develop a work plan that DEC could review before the work is done. Thanks for your help with this spill file. Our client would like to close out this spill case as soon as possible but we understand DEC need the data and info to do that. Sincerely Yours, Nicholas J. Recchia, C.P.G. Vice President, Senior Hydrogeologist EEA, Inc. 55 Hilton Avenue Garden City, NY 11530 phone (516) 746-4400 ext. 12 fax (516) 746-4432 cell:(516) 395-8763 nrecchia@eeaconsultants.com www.eeaconsultants.com AD 06/03/2009: called and left a message to Mr. Recchia of EEA. Lated spoke with Mr. Recchia, sent him NYSDEC FOIL Spill Report. AD 06/10/2009: Received an e-mail from Mr. Recchia of EEA saying: Ainura, Hope all is well. I have another piece of this puzzle and it now makes more sense. I have recieved a Phase I summary report from 2000 performed by ATC Environmental which is attached to this message. The report indicates that the Tank in question was an Above Ground 2,000-Gallon Heating Oil Tank. The site inspection at the time indicated that there was no leakage, spills or staining observed around the tank. The report also indicated that the tank was to be removed by the building renovation contractor. I was told there were problems with the contractor hired to do the renovation one of which resulted in this spill file being opened due to poor construction managment. Apparently Pheonix was hired to cleanup the 3-gallons of oil that spilled (according to the online spill description). I'm trying to locate and get a copy of the Phoenix report. If I cannot get this report what would be your requirements be to close out this spill file? Sincerely Yours, Nicholas J. Recchia, C.P.G. Vice President, Senior Hydrogeologist EEA, Inc. Called to DEP to speak with Azellia Maddox (caller) regadring the cause of the spill. She is currently on a sick leave. Will review the submitted report. DL pdf copy to eDocs. Called and spoke with Paul of Phoenix and asked him to look through their records for any info regarding cleanup Phoenix performed at the site. Later received a call from Paul, he said that an invoice for the cleanup was found. Paul participated in cleanup at the site. The drum in the building's basement was leaking. Phoenix responded to call and transfered product from leaking drum to a new one and secured the drums on site. They could not remove the drum because it was located in the basement. Received copy of the invoice via fax. DL to eDocs. Called and left a message to Mr. Recchia of EEA. AD 06/11/2009: Called and spoke with Mr. Recchia. Since the cause of the spill is known (leaking drum), I asked him to prepare a letter report summarizing all info, and to attach recently taken pictures of the basement. AD 08/2009: Called and left a message to Mr. Recchia regarding a letter report submission. AD 09/01/2009: Called and spoke with A. Recchia of EEA. He said that report will be submitted till September 15, 2009. AD 09/30/2009: Received an e-mail from Mr. Recchia of EEA saying: Ainura, I wanted to let you know that I have prepared the report earlier this month for this project however we are having trouble getting paid from our client. As soon as we get paid I will have the

THE COMMUNITY PRESERVATION CORP. (Continued) **S106469060**

report sent to you. Sincerely Yours, Nicholas J. Recchia, C.P.G. Vice President, Senior Hydrogeologist EEA, Inc. 55 Hilton Avenue Garden City, NY 11530 phone (516) 746-4400 ext. 12 fax (516) 746-4432 cell:(516) 395-8763 nrecchia@eeaconsultants.com www.eeaconsultants.com 10/02/2009: Called and spoke with K. Seyfert of CPC regarding the submission of the report. She referred me to Ms. Jill Belli - contact person for this case 9ext. 626). Called her and left a message. AD 10/12/2009: Received an e-mail from N. Recchia of EEA saying: Ainura, Attached please find our report for this spill. Sorry it took so long but we had to wait for our client to pay for it before it went out. Thank You. Nicholas J. Recchia, C.P.G. Vice President, Senior Hydrogeologist EEA, Inc. 55 Hilton Avenue Garden City, NY 11530 phone (516) 746-4400 ext. 12 fax (516) 746-4432 cell:(516) 395-8763 nrecchia@eeaconsultants.com www.eeaconsultants.com DL it to eDocs. Will review. AD 11/23/2009: Reviewed the letter report. The spill originally was reported because of leaking hydraulic oil drum. the spill was cleaned by Phoenix Env. in June of 2004. Empty drum was removed from the basement. basement floor is concrete and there are no drains. Recent pictures of the basement were submitted. There is not any oil staining on the floor. AD 12/01/2009: Discussed the site with J. Kolleeny of DEC. The decision was to close the case. Will send a letter. AD 12/02/2009: Issued and sent a letter with spill closure approval to K. Seyfert of CPC. Dl to eDocs. Case closed. AD "

MANHOLE # #40867 (Continued) **S106968828**

hrs M40867 - ST NICHOLAS AVE 656. Edward P Cox 18594, Operating Supervisor, District 3 Underground Reports that at this location in process of working on an outage, found approx. 1 pint of what he thinks may be cable oil on top of apprx. 5 gallons of water. Note: Due to heat contingency this will not be able to be cleaned as a 24 Hour-DeMinimus spill. Due to availability of tankers. There was no fire or smoke involved and no sewer or waterway was affected. There were no injuries related to the spill and no weather conditions contributed to the hazards of the spill. No private property was affected. The source of the spill is unknown but may be cable oil. There is oil filled equipment in the structure - primary cables. There is standing water, but no movement, and no substantial cracks. Environmental spill tag #18740 was installed. Chain of Custody DD13038. Logger F.Curtis 38078 CIG called @ 12:28 spoke to P.McGuire 61959. Logger F.Curtis 38078 See eDocs "

DEC Memo:	"12/09/05: This spill transferred from J.Kolleeny to S.Kraszewski. 09/01/06: DEC Lead for this spill changed from unassigned to S. Kraszewski. Also, see open spill 9615011 for this site. - J. Kolleeny 02/09/07 - J.Kann - Spill reassigned from S.Kraszewski to J.Kann. 11/19/07 - J.Kann - spill 9615011 closed and consolidated with this spill. 10/14/10: J.Kann - investigative work plan received on 10/5/10. 8/15/14: J.Kann- Based on review of the site file, the spill has been closed based on the following: -An ISRP from 1996 was reviewed. 5 borings and 3 wells were installed. Minor SVOCs were detetected in one soil sample. No elevated SVOCs or VOCs were detected in groundwater. At that time the Department agreed that no remedial action needed to be taken at the site (other than periodic visual fluid level monitoring and the removal of contaminated soils encountered during subsurface investigation) -One of the two on site tanks were subsequently removed in 2001. No spills were called in at that time of replacement activities. Endpoint samples collected during tank excavation yielded only minor exceedences of 6 SVOCs, and no exceedences of VOCs. All historic information is included as attachments to the Work Plan which is edoced. Based on the review of the file additional work is not necessary and the spill has been closed."
Remarks:	"TANK TEST FAILURE-TANK #2. COULD NOT MAINTAIN LEVEL."

A&C DEVELOPMENT SITE (Continued) **S113916500**

Record Added Date:	08/07/2008
Record Updated Date:	02/20/2009
Update By:	MOBARRIE
Site Description:	The site is a 0.341 acre commercial property on the south-east corner of 145th Street and 7th Avenue (a.k.a. Adam Clayton Powell Jr. Blvd.) in a commercial / residential area in the north-west area of Harlem, NYC. The property was recently reclassified as residential. The original documented structure on the property was a movie theater that operated from 1939 to 1979. From circa 1979 until recently, a supermarket operated on the property in the same structure. Except for a loading dock driveway, the structure encompasses the entire lot. There is significant petroleum-related VOC and SVOC contamination in on-site groundwater from a gasoline spill originating at the adjacent ExxonMobil station (Spill # 0751061, PBS# 2-157929). A Phase I investigation found that no history of detrimental environmental impacts and no history of industrial or commercial activity that could have resulted in environmental impacts. A Phase II investigation found no evidence of an on-site source. Of ten soil samples from five on-site locations, six PAHs were found in three samples above Part 375 restricted residential soil cleanup objectives. The contamination found on-site is due to the off-site source at the adjacent gas station. The BCP Application was denied in a letter dated 2/18/09.
Env Problem:	Information submitted with the BCP application regarding the environmental conditions at the site are currently under review and will be revised as additional information becomes available.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"10/28/13-Zhune called Mattew Carol from Pennnen Environmental 646-606-2332. could not get him. Left message to call back. 10/31/13-

FORMER GAS STATION (Continued) **S114561120**

Mattew Carrol called. he said due to deligence they did soil borings and soil vapor. They terminated most of the borings at 2' due to shallow bedrock. They found no indication of groundwater or perched water. They found what they belive is perched water at 11' in borings located northeast (PID 1000 ppm, gasoline odor). They are waiting for the analytical results. They are working for potential purchaser. 11/20/2013-Pete Lakatos from TERMS Emvironmental Services Inc. sent the following email\\ I am representing Mr. Abe Caller the owner of the site.. I provided our contact information below (we have worked together in the past on another project) We are in the process of scheduling and performing an environmental remediation for Spill No. 1307746 at 655 Saint Nicholas Avenue NY Block 2050, Lot 149. Evidence of a petroleum release was observed in the northeast corner of the property. The impact has been delineated to the south, west and north; Benzene was detected at a concentration of 0.19 ppm, above the Unrestricted Use SCO of 0.06 ppm. Total xylenes were detected at a concentration of 2.22 ppm, above the Unrestricted Use SCO of 0.26 ppm. No groundwater was encountered Although several compounds were detected in the soil vapor samples collected at the Site. No compounds were detected above the NYSDOH AGVs. No compounds were detected that are also associated with an NYSDOH matrix. TERMS proposed services for addressing this localized impact include performing an at peril remediation. We assume that an excavation of approximately 15 x 15 x 4 in depth will be required and generate approximately 50 tons. All the contaminated soil encountered during these activities will require offsite disposal. End point post excavation samples will be collected and analyzed to verify the success of the remediation. A RAR report will be prepared and submitted to the NYDEC for NFA approval. Pete Lakatos TERMS Environmental Services, Inc Office 908-464-0028 Fax 800-459-8488 E mail plakatos@termsconsulting.com 2/10/14- The Remedial Action Report was received and reviewed. The RAR was sent by Terms Environmental dated 2/10/14. 3/7/14- In a DEC letter dated 3/7/14, the Department required the following requirements: 1. Submission of surounding areasite map and former/current location of any USTs, piping, remote fill ports and the dispensers islands 2. Installation of soil boring at all remote fill port. 3. Submission of vapor and moisture mitigation techniques to be used in site development. 4. Collection of soil samples along piping run 5. Submission of development plan for the site. As per Jeff we will wait for submission of develpoment plan for the site, if excavation extent to bedrock or to a determine depth then we will require endpoint soil samples. Based on the endpoint results we may require the installation of a bedrock well for groundwater investigation. About confirmatory air samples we will wait untill they send the imformation for active or passive SSDS. 4/24/14-Vought-Zhune of out office on extended vacation. Received call and email from Pete Lakatos (Terms). Email contained followiing string: Email from Lakatos to DEC Zhune-4/1/14. Email that Hi Veronica, Mr. Caller (the owner of the property) forwarded the attached March 7 letter you had sent to (TERMS) and the prospective purchaser (Harlem School of Arts) and their environmental consultant (Tennen). Based on the location of the fill port and piping run located by GPR in the sidewalk and depicted in attached photo, the proposed 4 sample locations were agreed upon by all parties and based on the sampling requirements contained within your letter. These are well within the 20ft distance and biased toward pipe joints/elbows and at fill port. We are proposing 1 additional sample where the GPR

FORMER GAS STATION (Continued) **S114561120**

could not locate any piping located on site and where piping may have existed. Previous samples S1, S2, SB,5 S3, S4, SB7 and S5 and analysis collected by both TERMS and Tenen did not detect any petroleum contamination in the area which may have contained former piping and would satisfy the 20ft pipe sample requirements contained within the March 7 letter. An attached figure has been proved for your review and approval. We have called in a mark out and should be onsite in about a week to perform the investigation based on your requirements, approval or suggestions. Therefore we are asking for an extension on the April 7 report submission. Upon receiving results (2weeks) we are requesting a May 7 2013 submittal report date. I addition, If the results reveal no impacts, Mr. Caller has asked me to inquire if letter could be issued stating no further action/ investigation for SPILL 1307746. The remaining requirements contained within the letter (Vapor mitigation plans and site plans) will be submitted at a later date. Please note that the development of a school is only a proposed plan at this time, and future use is subject to change. Again thank you for your time and assistance. Please feel free to contact me if you require any additional information before we proceed. Email from Lakatos to Vought-4/3/14. Email that Hi Jeff, Veronica's email stated that she would be out of the office And she let your email for a contact. If you remember we had discussed this case a couple of weeks ago and I am requesting an extension date for the report and a review/approval of the plan so that we are in compliance. Please let me know if there are any concerns. Thank you for your time and assistance. Pete Email from Lakatos to Vought-4/8/14. Email that Hi Jeff, Just to inform you that we are planning to be onsite later this week. To perform the investigation as previously described. 4/24/14-Vought-Sent email to Terms (Lakatos) that My apologies on the delay of response to your below emails. The Department has no objection to extending the due date of the report. When do you think we can expect it? With respect to your note below that In addition If the results reveal no impacts, Mr. Caller has asked me to inquire if letter could be issued stating no further action/ investigation for SPILL 1307746. The remaining requirements contained within the letter (Vapor mitigation plans and site plans) will be submitted at a later date. Please note that the development of a school is only a proposed plan at this time, and future use is subject to change. The Department when notified of a possible development of a site with a potential sensitive receptor must err on the side of caution. As such if the development plans are known at the time when the Report is submitted, submission of documentation of vapor mitigation efforts will be required. If the development plans are not known at the time of submittal than closure may be granted and a clause included in the closure letter that vapor mitigation efforts must be installed, if the property is developed. Please stress to the owner, however, that if the site is going to be developed a school, then it is in their best interest to follow up on vapor mitigation. If vapors were to arise after the school is constructed, not only would it be a media issue but also possibly an evacuation issue as well as involving local politicians. DEC would then hold both the spiller (current property owner) AND the school responsible for the cleanup, which could be that much more costly after the site is occupied and developed. Unfortunately as you know just because the property owner sells the property with a closed case, their potential liability if an issue (including vapors) was to arise, remains. Thanks. Abe Caller 917-578-7434"

Contact Name:	DYLAN MARCHESCHI
DEC Memo:	"2/21/14-Zhune spoke to Dylan Marcheschi 347-927-7871 (tenant at appartment 66 top floor). He said there is oil odor in his apartment that the odor sicked him. He also said that he spoke to the super and the super told him that there was oil spill in the boiler room. Spuer 212- 564-2111 2/21/14-Zhune spoke to Rasin Poskic (Manager of the building) 917-509-5133. He said they had a delivery three days ago and oil was coming by the fill line but the plumber fixed the problem. Two days ago the tenant called the Fire Department they inspected the site and found nothing. Con-Ed also inspected the site and found nothing. As per Rasin today morning they had a delivery in the morning and probably the vapors that came by the vent pipe went up and entered in Mr. Dylan apartment. 2/21/14-Zhune called Dylan and let him know that the DEC will investigate the oil odors but if he wants his lawyer to speak to the DEC lawyer he has to bring his lawyer to the office. He said that is ok that all he wants is a writting document of the findings. 02/21/14-Hiralkumar Patel. alternate address: 402-410 West 148th Street PBS #: 2-267228. as per PBS record, the site has one 7,500 gal #4 oil AST in contact with soil. the tank was installed in Jan. 1950. other spill # 0913598 was reported on 03/24/10 as #6 oil tank failed a tightness test. as per caller, testing was done for potential buyer at that time. as per Protest, the tank testing company, stains were noted on the wall where remote fill line comes to the building and also on top of the tank where supply/return lines are connected to the tank. DEC Brevdo spoke with Bob at Protest who stated that no further work was done after tank test on 03/24/10. case still open. 402-412 West 148 LLC. **property owner** c/o Pinnacle Management Group **property management** 1 Penn Plaza, Suite 4000 New York, NY 10119 Attn.: Rasim Toskic **property manager** PH. (212) 564-2111 Ext. 3001 (O) (917) 509-6133 (C) 11:58 AM:- spoke with Mr. Toskic. inquired him about tank test failure report in 2010 and recent fill line leak. he mentioned that after noticing leak in remote fill line, located under the sidewalk, they abandoned the leaking fill line and installed a new fill line. couple of days ago, they noted couple of drips from the existing fill line which was fixed immediately. 02/21/14-Hiralkumar Patel. 2:45 PM:- visited site. met Ragip, building super. site has six story building with a basement. site has one 7,500 gal AST, sitting on the floor, in secondary vault. as per tank label, tank contains #6 oil. the tank is located along the building's northern foundation wall, in northwest portion of the building. the existing fill port and vent pipes are located along the building wall. all lines are aboveground. noted some oil on tank room floor. Ragip mentioned that there was some oil spilled from an elbow on existing fill line. oil spilled onto tank room's concrete surface. observed oil on north side of the tank and some oil spots at west end of the tank. asked Ragip to clean remaining spill in tank room. found old, previously abandone, fill line in tank room. noted signs of oil

BOILER ROOM (Continued) **S116552921**

seepage from building's foundation wall in area underneath the previously closed fill line. Ragip mentioned that they found leak in former fill line in 2010 (spill #: 0913598) and installed a new aboveground line. noted petroleum odors inside the elevator only. no odors noted outside the elevator. due to odors in elevator, inspected elevator pit. no signs of petroleum product noted in elevator pit. Mr. Marcheschi lives in apartment 66, located on 6th floor, in northeast corner of the building. no odors noted in 6th floor lobby. following actions requires, based on observations during the site visit: - subsurface investigation along the formerly abandoned remote (and leaking) fill line - tightness test of the tank 3:12 PM:- spoke with Mr. Toskic. asked him to test the tank, by the end of 02/25/14. Ragip **building super** PH. (646) 261-0797 3:34 PM:- received call from Isak from building management. informed him about required subsurface investigation along abandoned remote fill line and tank test by the end of 02/25/14. Isak Radoncic Pinnacle Management Group PH. (212) 564-2111 Ext. 3110 (O) (646) 739-1461 (C) email: isakr@pinnacleny.com 02/24/14-Hiralkumar Patel. discussed with DEC Austin and DEC Vought. due to petroleum odors in elevator, the Department requires immediate sealing of the elevator pit. 12:26 PM:- left message for Isak and informed him that the department requires immediate sealing of elevator pit. 12:30 PM:- spoke with Ms. Toskic. he mentioned that Isaac handles building maintenance issues and he will call back. Mr. Toskic also mentioned that boiler company will do tank test today. 02/25/14-Hiralkumar Patel. 11:50 AM:- spoke with Isak. he mentioned that during inspection, they noted broken gasket on tank manhole and crack in vent pipe. they fixed manhole gasket and vent line and will test tank either today afternoon or tomorrow morning. Isak confirmed no more odors in elevator after fixing manhole and vent pipe. 11:58 AM:- spoke with Mr. Marcheschi. he confirmed no odors in building right now, but suspects that odors will come back next week. 02/26/14-Hiralkumar Patel. 9:33 AM:- received call from Abraham Wachsler from NYC Tank Testing. he went to site for tank test, but due to some issues with welding on tank top, testing could not be done today. 10:12 AM:- left message for Isak. 10:13 AM:- received call from Isak. he has discussed tank issues with NYC Tank Testing. he has also informed him oil company not to deliver anymore oil until tank is repaired and tested. suggested him to seal the fill port to prevent misdelivery from other companies. he mentioned that currently tank has around 4500 gal of oil in it. as no active leak noted from the tank, they choose to burn oil down to 1500 gal. at that point, contractor will pump out remaining oil/sludge, clean the tank, repair it and test it. Isak mentioned that based on daily consumption, tank cleaning will happen by middle of next week. based on available information, asked him to provide tank test result by the end of 03/10/14. also asked thim to monitor air quality in elevator. due to no indication of oil in elevator pit and no more odors in elevator (also confirmed by Mr. Marcheschi), agreed with Isak not to seal the elevator pit, at this time. but it may required based upon information/observation after tank repair/testing done next week. 10:35 AM:- sent email to Isak and asked to submit tank system test result by 03/10/14 and monitor elevator daily, until tank repair and test done. 03/04/14-Hiralkumar Patel. 2:30 PM:- visited site. met Ragip. no petroleum odors noted in elevator. minor odors in tank room. Ragip mentioned that tank will be cleaned on 03/06/14. 03/10/14-Hiralkumar Patel. 9:40 AM:- spoke with Isak. he mentioned that the tank passed tightness test on 03/07/14. he will submit copy

BOILER ROOM (Continued) **S116552921**

of test result. 03/13/14-Hiralkumar Patel. 11:19 AM:- received email from Isak including tank system test result. the tank system was tested tight on 03/06/14. based on available information, case closed. **also refer to spill #: 0913598.**"

DEC Memo: "03/24/10. Zhune spoke to Bob urban from Protest 631-3214670. he said they test the AST 7005 gallons in a vault. The test fail with a gross dry leak. There is stain at the wall with the remote fill comes to the building. There is stain on top of the tank where suply-return line connected to the tank. they are doing this work to the byer of the building not to the owner. PBS 2-267228. 07/16/13 - Spill Case is transferred from Brian Falvey (PBS Unit) to V. Brevdo (Section B) as per DER Region 2 decision - Tank Test Failure Spill Case. VB 11/05/2013 - V. Brevdo Called and spoke with Bob Urban of Protest (631) 321-4670 and asked if he has any information indicating that spill can be closed or whether action is needed. Mr. Urban stated he will look in to this case and will call me back. V.B. Bob Urban called back and said he can not be of much help. They did this testing for potential buyer who seems to have walked away. They did not do any followup work which would help to assertain status of this spill. VB. 03/13/2014 - V. Brevdo e-mail from Kumar Patel of Spill Prevention and Response: On 02/21/14, we received another spill report for the above referenced site (spill #: 1310983) due to petroleum odors in the building. After further investigation, the spill # 1310983 is closed. I did informed property manager about other open spill case due to leaking fill line. Please note that during my site visits, I did observed petroleum stain on building's foundation wall, under the location of former leaking fill line. Below are some numbers related to the site: 402-412 West 148 LLC. **property owner** c/o Pinnacle Management Group **property management** 1 Penn Plaza, Suite 4000 New York, NY 10119 Attn.: Rasim Toskic **property manager** PH. (212) 564-2111 Ext. 3110 (O) (646) 739-1461 (C) email: isakr@pinnacleny.com 03/13/2014 - V. Brevdo e-mail to property manager Mr. Isak Radoncic: March 13, 2014 Dear Mr. Radoncic: On 02/21/14, the New York State Department of Environmental Conservation (the Department) received second spill report for the above referenced site (Spill No. 1310983) due to petroleum odors in the building. After further investigation, the Spill Case No. 1310983 is closed via administrative consolidation with the earlier Spill Case No. 0913598 opened on March 24, 2010. The Department's Spill Prevention and Response staff (Mr. Kumar Patel) informed property manager about the other open spill case No 0913598 due to leaking fill line. Please note that during the site visit Mr. Kumar Patel observed petroleum stain on building's foundation wall, under the location of former leaking fill line. Please be advised that according to the Environmental Conservation Law and New York State Navigation Law, the site owner is under the obligation to conduct environmental investigation and remediation of the property and to rectify leakage of oil from the tank and/or tank equipment. Please contact me at your earliest convenience at 718-482-4928 or via e-mail so the we can discuss the appropriate course of action by the property owner to address aforementioned environmental site condition. Sincerely, Vadim Brevdo V. Brevdo also called Mr. Isak Radoncic on 212-564-2111 Ext. 3110 (Office) and left voice mail

APT BUILDING (Continued) **S110243968**

explaining the nature of my call (see e-mail above). VB 06/26/2014 - V. Brevdo e-mail from NYC Tank Testing to Kumar Patel: Dear Inspector HiralKumar Patel, Attached please find our closure report for spill # 1310983 at 402 West 148th Street. Please review the case at your earliest convenience. If any additional information is required, please feel free to call Abe at 646-321-2876 or our office at 718-731-7011. Thank you, Goldie New York City Tank Testing Inc. 1624 Webster Ave. Bronx, NY 10457 Phone:718-731-7011 Fax: 718-228-4238 06/27/2014 - V. Brevdo June 27, 2014 Dear Goldie: My name is Vadim Brevdo and I was assigned to review information pertinent to spill cases 1310983 and 0913598 for the subject property. Please note that spill case 1310983 had been administratively closed and consolidated with spill case 0913598 which remains open at this time. I have a question on your submission to Mr. Patel (your e-mail of 6/26/2014, 2:50 p.m.): June 12, 2014 letter from New York City Tank Testing, Inc. states in first paragraph on the second page that enclosed are copies of analytical report and the chain of custody . Attachments to your e-mail did not appear to contain aforementioned analytical report, which the Department needs to review. Could you please send a copy of analytical report to my attention? Contact me if you have questions. Thank you. Vadim Brevdo 07/02/2014 - V. Brevdo Spill Case Closure Decision July 2, 2014 402 West 148th Street, Manhattan Spill Cases 1310983 and 0913598 The samples were taken at three locations in the area of old fill box and old fill route pipe between the building wall and the curb at 5 7 below surface grade. Two out of three soil samples showed non detect (ND) for both VOCs and SVOCs. One sample showed ND for VOCs but presence of SVOCs. Some of the SVOCs (pyrene, phenanthrene, fluoranthene) were below CP-51 cleanup values in this one sample. Some of the SVOCs (Benzo(a)anthracene, Benzo(a)pyrene, Benz(b)fluoranthene, Benz(k)fluoranthene, Crysene) were above CP-51 values but within the same order of magnitude as CP-51 values for these compounds. Taking aforementioned analytical data into consideration, the Department concurs with the spill case closure request by NYC Tank Testing in their June 12, 2014 letter report. This is very limited impact, no threat to human health of the environment as long as there is no long term contact with the soils beneath the sidewalk at one location. Spill case is closed effective July 2, 2014. V. Brevdo "

Remarks: "in basement - doing test for buyer - cleanup pending"

DEC Memo:	"See Caller Remarks above. IMPORTANT PHONE NUMBERS: Lindos Lindsay (nephew of one of the pastors/owners) says he is the one who really handles the financial matters and legal aspects, not Kira: (347) 228-8039 Patrick Peters: lives across the street from the church, son of an Archbishop Carlyle Clark - (212) 690-0630 Carlyle Clark: second archbishop at the church - no phone Archbishop (a.k.a. Reverend) Maxton France: 3519 DeReimer Ave., Bronx, 10466; phone (718) 519-7344 Kira Leid-King: sort of a treasurer-secretary , home (914) 632-0665; cell (914) 879-8126; work FAX (212) 455-2502; work phone (212) 455-2501 Cistine Grit (a.k.a. Ingrid; associated in some way with the church): (212) 234-0484/0485 Marlene Martin (exec. dir. Childrens Art Carnival): (212) 234-4093; cell (917) Northeast Environmental (company that did the partial cleanup on 1/14): Dwayne Monaco (914) 777-1930; cell (914) 403-5525 Community Board 9: (212) 864-6200 Cristine Brooks (lawyer; also involved with Board 9 and neighborhood organztn.): (212) 883-7600 Martin Smith (rep. for Councilman Robert Jackson): (212) 928-1322 Robani Oil (Robert Pearson): (212) 687-8699 On 1/14/06, Northeast Environmental sucked up about 120 gals. of #2 oil from the church basement and did 2 borings 18 down to bedrock. The borings were clean. Further work needs to be done in the corner of the courtyard where the wrought iron fence turns next to the Childrens Art Carnival (spill #0511700). The Carnival has oil in their front sump. A second vent pipe and a remote fill port (inside the church fence) were discovered by a technician from Northeast. There is the possibility of a third tank under the courtyard. Northeast had sucked up some oil from the front sump at the Carnival, but refused to go back there for free as they said that they were hired by the church. When I tried to call Rev. France on 1/17, Ingrid picked up the phone. She said that the church has done the cleanup

CHURCH OF NAZARETH (Continued) **S107523027**

and that's all they are doing. On 1/17/06, Jeff Vought, spill case manager, called up the church and left a message that they have to cleanup the entire oil spill and do an investigation. The church didn't return the phone call. I visited the Carnival on this date and found 10.1ppm total vapors (via PID) in the basement and high vapor concentrations throughout the building. This is a day care center and is presently closed due to the high vapors. 1/18/06 - Raphael Ketani. I tried calling the Church of Nazareth at (212) 234-0485, but no one answered and there was no answering machine. So I called (917) 642-8913, the cell for Archbishop Maxton France, and left a message for him to call me. I will send a contaminated soil letter. Another number was found for Archbishop France and an address: (718) 519-7344; 3519 DeReimer Ave., Bronx, 10466. I called the number and a man got on. I asked for Archbishop France and he put me on hold. A woman answered the phone and I spoke to her. She said Archbishop France was out for a week and to call Cistine Grit for any information I needed. I mentioned the oil spill and I asked for the person who owns or manages the church, but she again referred me to Ms. Grit. I made contact with Cistine Grit from the church at the (212) 234-0485 number. I asked to speak to someone responsible. She said that there was no one present to talk to. I told her that the state was going to hire its own consultants and open up the church and do an investigation on the grounds. Later I got a call from Kira Leid-King. She told me that she had paid Northeast to come and do the oil removal at the church. I told her there was oil on the basement floor and that Northeast had pumped out 120 gals. on 1/14/06 from the 2 275 gal. tanks in the basement. She said that there wasn't any oil on the floor and that the tanks had been pumped dry after the fire by order of the Fire Dept. I told her that there was a second vent pipe, a remote fill port, and a gauge for a 550 gal. tank mounted on the wall inside the basement. She said that she knew nothing about this. I told her that there may be a third tank under the courtyard. She said that she had no idea if there was. I told her that oil was coming out of the front basement sump of the Childrens Art Carnival and getting onto their basement floor. She said that was the Carnival's own fault and that the church has no oil so it is not responsible. I told her that the state is hiring its own contractors and will do an investigation of the church. She had no comment. MILRO Assocs. Inc. ((516) 379-1500) has been called and I spoke to Paul. I asked him to come to the Carnival to do ventilation and water removal work. We will meet at 10:30AM tomorrow. 1/19/06 - Raphael Ketani. A site visit was made by Randall Austin, Chief Spills Engineer Region 2, and myself. We were there to see the Childrens Art Carnival, but Patrick Peters came by and gave us access to the church basement. We saw the 2 275 gals. tanks, the fill line connected to the first tank, a vent line connected to a second tank, the filter apparatus in the floor and a suction line that was partially buried in the floor. No drains were observed in the room, but we didn't spend much time looking at the floor with our flashlights. We also saw a gauge that was mounted on the basement wall above the first tank. There was a light smell of oil in the room, but no oil on the floor. From best that can be determined, there is probably a third tank under the courtyard. We went to the Carnival and saw red oil in the top of the front sump. There was water seeping through the wall opposite the Carnival's oil tank, but it didn't feel or smell of oil. 1/25/06 - Raphael Ketani. I spoke to Lindsay Lindoss, nephew of one of the pastors, regarding what needs to be done concerning a possible third

CHURCH OF NAZARETH (Continued) **S107523027**

tank. He said he was unaware of a third tank there. I told him that there is a second vent pipe and a second fill port present that are not connected to the tanks in the basement. So the DEC believes that a third tank is present. I told him that he has to hire an environmental company and have them do an investigation immediately. He said he will do this. 1/30/06 - Raphael Ketani. I tried to contact Mr. Lindoss, but could only leave a voice mail message. 2/6/06 - Raphael Ketani. I tried to contact Mr. Lindoss again, but could only leave a voice mail message. Ms. Leid-King tried to call me and I tried to return her call, but could only leave a voice mail message. 2/8/06 - Raphael Ketani. I received a call from Ms. Leid-King. She said that she has hired Commonwealth Land Title Insurance Co. to do a records (and title) search for the number of tanks on the church property. She said that they will look at Fire Department tank registration records, among others. I told her I was waiting to hear from Lindsay Lindoss regarding the hiring of an environmental investigation company. She said she had never heard of him, but she will find out who he is and try to talk to him. I told her he claimed to be a pastor at the church. She said there was only one pastor. Our conversation changed and she said that the present owners bought the church in 1965 and didn't install a tank under the courtyard. She said the only oil spill on church grounds she knew of was the one that was cleaned up on 1/14 in the church basement. She said the church is using over $1,000,000 in grants to get ready to rebuild the building and doesn't have any money for doing an environmental investigation. She said she would send me the results of the document search. 2/9/06 - Raphael Ketani. Ms. Leid-King called to say that Commonwealth finished their document search and came up with information from the NYFD that states there are only 2 tanks. I asked her to send a copy of the document to me. She said she would. 2/10/06 - Raphael Ketani. On 2/9/06, I tried to contact officials at the Housing Preservation & Development office, and the Landmarks Preservation Commission in order to find out whether the DEC can have its own contractor, MILRO, go to the courtyard, dig it up, and remediate the situation (whatever they find). I had left a number of voice mails as none of the appropriate officials were reachable. Today, Amanda Sutphin, Director of Archeology ((212) 669-7823), called me back. I explained the oil spill situation, the church's potential involvement, and the impact of the oil on the Childrens Art Carnival. I described the courtyard conditions. She said it sounded fine to go ahead and have our contractor dig up the courtyard and do whatever remediation work is deemed necessary. She said that I didn't need any special permits or paperwork, only her word over the phone. She said she will inform the other people in her office and elsewhere who need to know about the impending work in the courtyard. A little while later, John Weiss, Deputy Council of LPC ((212) 669-7921), called and asked what the situation was. I told him what I told Ms. Sutphin. He said that, normally, a paper permit signed by the representative from the church would be necessary to do the work in the courtyard. I told him the church either refuses or has not been reachable. He said that in emergencies, verbal permission is all that is necessary. He said he would get back to me. Mr. Weiss called me back and said that I would have to send him an e-mail describing the history of the oil spill, the impacts to the Childrens Art Carnival, what needs to be done to fix the situation, and that the impact is a danger to life, health, or property. He said that once I do this, then he can give me an emergency authorization. I sent him the e-mail

CHURCH OF NAZARETH (Continued) **S107523027**

letter listed below: NYSDEC Spill #0551505 Dear Mr. Weiss: My name is Raphael Ketani. I am an oil spill case manager, engineering geologist 2, with the Spills Unit of the Division of Environmental Remediation within the NYS Dept. of Environmental Conservation. Presently, I am conducting an investigation to find the source of #2 fuel oil which is leaking into the Childrens Art Carnival at 62 Hamilton Terrace, Manhattan. This problem has been taking place since January 3, 2006. The CAC provides daycare to children ages 4 to 6. The oil is entering the CAC through a sump in the front of the basement of the building. When it rains heavily, the water flows out of the sump and carries the oil with it. The oil flows onto the basement floor, in the process. Once on the floor, the oil vaporizes and the vapors travel throughout the building. The vapor concentrations have been as high as 5,000 ppb in the basement and as high as 700 ppb where the children's activity areas are. The NYCDOH visited the site on January 12, 2006, declared the vapors unsafe, stated that children were not to enter the building, and ordered the building closed. An indoor air pollution closure order was written up by the NYCDOH and signed by staff from the CAC. After this date, the NYSDEC has been having our own contractor, MILRO Environmental, come and pump out the oil from the sump and clean the floor in order to control the vapors. This took place many times, but still the oil keeps coming and keeps pouring out of the sump when it rains heavily. The CAC has remained closed to children. The NYSDEC has noted that there is an extra fill port and an extra vent pipe behind the Church of Nazareth which is next door at 72 Hamilton Terrace, NY. This has led us to believe that there is an undiscovered old oil tank under the courtyard behind the church. It is this tank which may be releasing the oil. However, there are no records with the NYFD, or with title companies, or on Sanborn Maps, or with any agency city or state that indicates there is a tank or that there isn't a tank. Therefore, the NYSDEC, through its contractor, needs to break up the concrete surface of the courtyard and see whether a tank exists and conduct a remediation project. As the church is a historic structure (previously a large end of row townhouse), representatives of the church are unwilling or unreachable to obtain permission from the Landmarks Preservation Commission for work to take place, and the children's health is at risk, the NYSDEC is asking the Landmarks Preservation Commission for permission to conduct our oil spill investigation. If we receive permission from the LPC, we expect to start work shortly after February 18, 2006. Thank you for your help and attention to our letter and have a pleasant day. Sincerely, Raphael Ketani Engineering Geologist 2 At 4:00PM today, I sent a letter to Ms. Leid-King stating that the Department will have its contractor conduct an investigation for a third fuel tank under the church courtyard since the church hasn't notified DEC that they are going to hire an environmental company to do so. I told her that this will happen sometime after Feb. 18 (the one month deadline in the DEC January 19, 2006 letter). 2/14/06 - Raphael Ketani. I tried informing the church officials that the DEC's contractor will be on site next week to begin digging up the church courtyard to investigate the possiblity of a third tank. I tried calling Mr. Lindoss, but could only leave a voice mail. Next, I tried calling Mr. Peters, but he wasn't home and a woman answered the phone. She wouldn't identify herself, but she took my name and message. I called Ms. Leid-King to tell her that the DEC contractor would be starting work in the courtyard next week. Ms. Leid-King said that DEC can't do that without permission from the Landmarks

CHURCH OF NAZARETH (Continued) **S107523027**

Preservation Commission. I told her that I had spoken to their lawyer, explained the situation, and he gave me verbal permission as an emergency situation due to the impact to the day care center (CAC). She said that this was no good and that everyone knows you have to get written permission. She demanded a letter from the LPC lawyer. I told her we didn't need one. She said that if anyone tries to set foot on the property, she will call the police and have them arrested. I told her its her right to inform the police, but the DEC has been dealing with this situation for a month, has given the church also a month to fix the problem, that we have to act, and that we are just giving her a courtesy call. Ms. Leid-King flew into a rage over the phone and stated she would call together a mass of people from the community to block anyone setting foot on church grounds. I ended the conversation by reminding her that this was just a courtesy call. Later, the woman I spoke to when I tried to call Mr. Peters called me back and said that she had talked to Mr. Lindoss and he told her that he is going to contract with an environmental company very soon and that the work will start next week. I told her to have Mr. Lindoss give me a call when the work will start. She said she would. 2/15/06 - Raphael Ketani. I tried to find out who the church's lawyer is by calling Mr. Peters again, but the same woman answered the phone. She said she would call some people, try to find out who it is, and let me know. I still haven't heard back from Mr. Lindoss and the woman didn't tell me when the environmental investigation will take place at the church. Next, I tried calling Cristine Brooks (the lawyer involved with Community Board 9) and left a message asking whether she knew who the church's lawyer was and if she could give me her name and number. 2/16/06 - Raphael Ketani. I called Mr. Weiss, Deputy Council of LPC, and told him that the contractor may have to take down a portion of the wrought iron fence when it comes to removing the third tank. He said this may require a written permit. He said he has to contact his General Council and get back to me. Cristine Brooks-Lee called me back at about 12:25PM. She said she didn't know who the lawyer for the church was, but she will find out. I told her that once we know, then our legal staff will contact the church's and send a warrant. She said she will keep looking for their lawyer. She added that she can get affidavits if we need them. 2/21/06 - Raphael Ketani. I received a call from Cristin Ciaburri of USA Environmental (718) 981-5710. She said she met with Mr. Lindsay and she believes her company will do the work of investigating whether there is a third tank on the property. She just has to get together a few more cost estimates for Mr. Lindsay and submit them to him. The proposal will go out soon. 2/24/06 - Raphael Ketani. I sent an e-mail to Mr. Weiss of the Landmarks Preservation Commission informing him that USA Environmental may be getting ready to do work on the site without realizing that they need to contact the Commission. 2/28/06 - Raphael Ketani. I talked to Cristin Ciaburri of USA Environmental regarding the beginning of the investigation for the third tank. She said that the work should start either this week or next week. However, she is waiting for the owner of the property, Mr. Lindsay's boss (as she referred to him), to sign the proposal so they can get started. She said she has contacted the Landmarks Preservation Commission and they will send her a letter by e-mail approving the work. Kristin said she is sure there is a third tank for the church. I asked her who Mr. Lindsay's boss is. She said the name was garbled on her voice mail and so she didn't know, but that if there is an investigation, the DEC will get a copy of the

CHURCH OF NAZARETH (Continued) **S107523027**

report with the owner's name on it. I told her to inform me when the work is going to start so I can be there. She said she would. 3/6/06 - Raphael Ketani. I spoke with Ms. Ciaburri today. She said that Mr. Lindsay had told her that he would get back to her by 3/3/06, but he never did. She also hasn't heard from the LPC regarding the letter allowing USA Environmental to dig up the courtyard. I told her to call Mr. Lindsay and the LPC and try and get things going. She said she would. 3/9/06 - Raphael Ketani. I received a call today from Marlene Martin of the Childrens Art Carnival. She said that a bunch of people pulled up to the church in plain cars last teusday, 3/7, and went to work on the courtyard. She said that they uncovered and opened up a tank today. 3/10/06 - Raphael Ketani. I made a site visit to the church. I saw an uncovered and opened tank. Soil had been dug away from the top of the tank. I took pictures of the tank and the environment around the tank. The dug up soil didn't have any odors, but looked wet. There was a sheen on the water in the tank and a little bit of red color to one side of the sheen. I called up Ms. Ciaburri and asked her why she didn't notify me when the work was going to start. She said that Mr. Lindsay still hasn't signed the papers to contract USA Environmental to do any work. She added that she knew nothing about the digging and the tank opening that took place. I will write letters to Mr. Lindsay and Ms. Leid-King telling them what the next step should be, to close the tank so that no one or any rain enters the tank, and to let DEC know when more work will take place. 3/20/06 - Raphael Ketani. I asked Marvin Edwards, Program Manager at the Childrens Art Carninval next door, to take a look at the exposed tank in the courtyard and tell me if any work appears to have been done. He looked and said that nothing has changed. Therefore, I wrote a letter to Mr. Lindos and Ms. Leid-King telling them that the church has until April 5 to resume work, or else the DEC will bring in its own contractor and do the investigative work. I also left an update for Ms. Cristine Brooks-Lee of Community Board #9. 3/27/06 - Ms. Ciaburri ((718) 981-5710) called to say that she received a call from Cistine Grit (a.k.a. Ingrid) on 3/24, friday. Ms. Grit asked that Ms. Ciaburri put together an investigation plan, send it to her and she would pass it along to Archbishop Maxton France and then send it to USA Environmental. Ms. Ciaburri asked what the DEC wanted as a plan. I told her two wells, soil samples sent to the lab for analysis, an oil sample from the tank for analysis, and possible abandonment in place or removal of the 550 gal. oil tank and removal of soil. She said she would forward this plan to Ms. Grit and keep me informed. Later, Randall Austin, Program Manager for DEC Region 2 Spills, received a call from Kira Leid-King. Mr. Austin told her that the tank had been dug up and opened. She said she didn't know that this had happened. He asked her whether she knew Lindoss Lindsay or Cistine Grit. She said she didn't. When he asked her whether she was the lawyer for the church, she said she wasn't. Mr. Austin asked her where she worked and she said Ury Leid and Associates at (718) 547-7200 - her dad's firm. She said to ask for Sherrell at the law firm. I tried calling Sherrell, but could only leave a message. I tried reaching Cistine Grit at the numbers in the record, but no one picked up the phone. I later made contact with Sherrell Distant, a paralegal at the Ury Leid law firm, and she directed me to Mr. Leid. I spoke with Mr. Leid and he said he is the lawyer for the church, but only regarding the roof situation. He said that he doesn't know who the lawyer for the church is, but he is in contact with Archbishop France. He said he will call Archbishop

CHURCH OF NAZARETH (Continued) **S107523027**

France and tell him to call me. 3/28/06 - Raphael Ketani. I received a call from Kira Leid-King today at about 9:45AM. She was very angry that DEC had sent the letter stating that we would take action if the church did not investigate the tank by April 5. She made some threats and told me to be very careful regarding what I say. She said she was going to take people to court for saying the wrong things. She even threatened my job and the jobs of others. After this, she calmed down and asked why DEC sent a $10,000 environmental fine. I told her we hadn't issued any fines to date. I told her it must be the NYC Building Department (I had been told by someone at the Building Department or by Cristine Brooks-Lee that there was a $10,000 fine pending). She asked who told me about the tank. I told her someone from the community informed me that, several weeks ago on a teusday, a group of people in plain cars had dug up the tank. She asked who. I told her the party wanted to remain confidential. After this Ms. Leid-King said that Sister Ingrid (Cistine Grit) gave her the $10,000 bill. I told her that Ingrid had been in contact with USA Environmental and had asked about a plan for investigating the tank. I added that this plan was supposed to go to Lindos Lindsay and that this group was moving forward with addressing the tank issue. I said there appears to be that group of people in the congregation and her group. She said there is only one group. She asked why I didn't get in contact with Sister Ingrid to find out what is going on with the tank investigation by the congregation itself. I told her I had been trying many times, but Sister Ingrid doesn't answer the phone. She asked Did you try every day? I told her that I have many cases to deal with here at the DEC and I can't call her every day. [In fact, I tried calling her on several occasions, including 3/27/06 and 3/28/06] Ms. Leid-King said that she speaks to Lindos Lindsay. After this, she said that the people who opened up the tank already took soil and water samples. I asked who was the environmental contractor and Ms. Leid-King wouldn't say. Next, she asked me what type of work would be necessary for the investigation. I told her about soil sampling between the church and the tank and the tank and the CAC, about the installation of 2 groundwater wells, about the possibility of either abandoning the tank in place or removing it, about updating the PBS record, and about sediment removal. She ended the conversation after that. 4/4/06 - Raphael Ketani. I finally got ahold of someone who represents the church. This person was Lindos Lindsay, nephew of one of the pastors. He said that progress is being made as the church is in negotiations with an environmental company for the work. He said that they didn't use Northeast Environmental as they wanted $40,000 or so dollars and this was too expensive. He said that they need several more days to set the plan and the costs. I told him this would be alright. I asked whether the church has a lawyer. He said No and asked whether the church needs one. I told him that if oil is discovered in the soil around the tank, then the DEC will hold the church responsible for the contamination at the Childrens Art Carnival and may bring legal charges against the church. He said he will try to find someone. I contacted Cristine Brooks and gave her an update on the CAC and church situation. She told me that the owner of 60 Hamilton Terrace is Lisa Silversmith at lisasilversmith@yahoo.com. I will send Ms. Silversmith a reminder through e-mail that the DEC would like access to her basement. Ms. Silversmith has real estate offices at 38 Hamilton Terrace and West 145 Street, NY. 4/5/06 - Raphael Ketani. Mr. Lindoss called to say that the church contracted with Petroleum Tank Cleaners (PTC; (718) 624-4842) to do the tank

CHURCH OF NAZARETH (Continued) **S107523027**

investigation and possible remediation. He said they will be on site on thursday, 4/6. I told him I will meet PTC there. Mr. Lindoss added that PTC told him they could start work this friday. I spoke to Joe of PTC and he said that PTC has not been contracted yet by the church. He said the only thing that is going to happen is that one of his guys will show up at the church, look over what the situation is, talk to Mr. Lindos about the job, and give him a price. Joe said his guy has 4 or 5 other jobs to take care of first and so he doesn't know when he will be there. 4/6/06 - Raphael Ketani. Cristin Ciaburri of USA Environmental (fax 718-981-7537) called. She said that no one from the church has been in contact with her since the last time she spoke to them. She has mailed a proposal to Cistine Grit (Sister Ingrid). Later this morning, John Weiss of the Landmarks Preservation Commission called to say that there is an open oil tank at the property and an open basement door. He wanted to know who to call regarding the open tank. I gave him the phone number of the NYC Fire Department. 4/11/06 - Raphael Ketani. I received a call from Ms. Ciaburri of USA Environmental. She said that Bishop France signed the contract to have an investigation done. She said the first step will be to empty out the tank and tank 4 soil samples from borings around the tank. I told her I also wanted sampling of the oil floating on top of the water in the tank and fingerprinting of the oil. She said that her company is willing to do all the investigation steps that the DEC wants, but first she wants to do the tank and the soil borings. 4/17/06 - Raphael Ketani. I received a call today from Ms. Ciaburri. She said that she will be at the church on 4/19/06 between 9:30AM and 10:00AM to pump out the tank. I told her I will meet her there. 4/19/06 - Raphael Ketani. The tank investigation crew from USA Environmental arrived on site. Ms. Ciaburri wasn't there, but the foreman for the crew was, Keith Bartley. The crew made up to six attmepts at three different locations to do geoprobing around the east, north, and south sides of the tank. They even tried to punch the probe withing the tank pit, about 2 feet away from the tank. All attempts failed due to hitting hard rock. Mr. Bartley said that they will come back another day and punch two holes through the bottom of the empty tank. I spoke to Ms. Ciaburri later and told her what happened and what Mr. Bartley proposed. I told her that emptying the tank, taking an oil sample for fingerprinting, punching 2 holes through the bottom of the tank, and taking soil samples sounded fine. She agreed. 4/26/06 - Raphael Ketani. I spoke to Ms. Ciaburri regarding progress on the site investigation. She said the vac truck broke down so they didn't pump this week. She said they will pump next monday or teusday. I told her to call Mr. Vought if they do. She said she would. She added that Cistine Grit got a fine from the NYFD for not having abandoned the 550 gal. and 2 275 gal. tanks. She said James Kendal of the NYFD issued the fines and the church has 30 days to pay the fines. Also, Cristine Brooks-Lee called to find out the progress on the site investigation. I gave her a briefing regarding the attempted soil sampling and future plans. 5/16/06 - Raphael Ketani. I spoke to Ms. Ciaburri regarding the soil sampling. She said they emptied the tank and did 1 soil boring and sampling through the bottom of the tank. She said that they also took soil samples from under the end of the fill line where it still exists and under the return line where it still exists. A total of three (3) samples. She said that they will get the soil sample analytical results either at the end of this week or next week. Also, the case is being transfered to Jeff Vought today in order to consolidate all of the PINS cases

CHURCH OF NAZARETH (Continued) **S107523027**

(and associated cases) under one Spills case manager. 06/06/06-Vought-Complete File Review by Vought: See also spill numbers: 0209311(60 Hamilton Terrace-closed 12/22/05), 0511505(72 Hamilton Terrace). Sale of 72 Hamilton Terrace by City of New York to Nazareth Spiritual Church and resulting Deed transfer-4/20/72. Site visit on 1/11/05 by DEC Vought-DEC required: 1)tank testing results 2)notification to NYCDOH 3)installation of ventilation system in basement 4)sealing of sump and washing of basement floor. Vought left message with NYCDOH Nieves, spoke to Mike Hughes(NYSDOH) and decision to close is the call of Marlene Martin. Oil was first noted on 1/3/06 and basement filled with water during times of heavy rains. Three sumps present in basement of Childrens Art Carnival(CAC). Sump closed to Hamilton Terrace contained fresh #2 fuel oil. As per Marlene Martin, she contacted 60 Hamilton Terrace to see if they had spill and no spill was found in the basement and she contacted the Church who noted an oil spill next door at 72 Hamilton Terrace. Email from NYSDOH Hughes to NYCDOH Peter Stallbohm with cc to NYCDOH Nieves- How did you inspectors make out at the 64 Hamilton Terrace spill? . Email from NYSDOH Hughes to NYCDOH Stallbohlm and DEC Vought-1/18/06. ...any updates about the Childrens Center in Manhattan? Have they re-opened, cleanup status? . Response from Stalbohlm At 64 Hamilton Terrace, readings of 4-5ppm of VOC was detected. A contractor was contracted to conduct a cleanup yesterday. The center voluntarily closed until so. After cleanup, another visit will be made to check effectiveness of cleanup (possibly today). Email from NYSDOH Hughes to DEC Vought-1/19/06. Peter Stallbohlm, NYCity Health, sent an inspector back to the Children's Center on Tuesday, 1/17. The inspector reported odors are still present... Fuel product still present in basement. The center is still closed and NYCity Health recommends staying closed until the additional clean-up is performed. Would you be able to also make a site visit and recommend some specific actions as well? . Letter from DEC Ketani to Kira-Leid King (Nazareth Deliverance Church NDC)-1/19/06. The New York State Department of Environmental Conservation (the Department) was notified on January 10, 2006 that a petroleum release took place at the above referenced site. Odors were noticed coming from the basement of the church during an inspection of the area on January 11, 2006. Staff from the Department were at the site on January 14, 2006 to observe the removal of No. 2 fuel oil by Northeast Environmental from Nazareth Deliverance Church . (6/6/06-Note that I, jeff Vought was onsite and liquid was recovered from basement when I arrived on-site, I did not observe oil in the basement as the liquid was already recovered). The Department has identified the Nazareth Deliverance Church as a potential responsible party for this release . Letter required submission of an investigative summary report including the investigation of a possible third tank under the church courtyard. The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness . If no reply regarding the investigation is received from the Nazareth Deliverance Church within (5) days of receipt of this letter the Department may proceed with the required work... . Letter from DEC Ketani to CAC Martin-1/19/06. The Department has identified the Childrens Art Carnival as a potentially responsible party for this release . Notification that the Departrment has contracted Milro and will invesigate the source of oil. Upon one of the inspections of the Childrens Art Carnival, staff from the Department noticed a three foot long piece of suction line at the foot of the stairs of the

CHURCH OF NAZARETH (Continued) **S107523027**

basement. The Department requires that the Childrens Art Carnival immediately conduct a site investigation to determine why the line was replaced, whether there was a release of product and how large the release was, when the suction line was replaced and which company did the replacement work. The Childrens Art Carnival must also hire a contractor to have the suction line and return line (the two 3/4 inch copper lines) pressure tested . Letter from DEC Ketani to CAC Martin-1/23/06. ...the Department was notified on January 20, 2006 that a tank system test was conducted by AL Eastmond & Son, Inc. on this date and that a leak was detected in the tank and vent line. At this time, the Department is ordering the Childrens Art Carnival to repair or replace the tank and the vent pipe, and to hire a contractor to investigate the oil spill and remove all contaminated concrete flooring, soil and rock and all product and contaminated water . Letter from Marlene Martin (CAC) to DEC Ketani-1/27/06. To date we have cooperated with the Department of Environmental Conservation on all requests, recommendations and mandates. Enclosed, please find the job tickets for work performed by Eastmond and Sons, Inc. as per your Department's madates and directives. It is our hope that a resolve can be reached as soon as possible and or that the Carnival can be eliminated as the potential source of this release... Enclosed as Eastmonds & Sons job tickets: 1)1/11/06- Removed 50 bags of contamianted soil washed floor, 1 bucket of oil wash, removed 102 gallons of water, pressure washed floor 2)1/18/06- pump out oil and water from floor also wash down used 1x5 gallon can oil wash 3)1/20/06- Test tank, tank failed, wet leak 4)1/23/06- transfer oil to 275. Remove jacket and remove 30 bags of contaminated soil. Job completed 5)1/24/06- Install 275-gallon temporary . Contractor Work Authorization Form for Milro-2/2/06. Email from Landmarks Preservation Comission(LPC 212-669-7921)-John Weiss to DEC Ketani-02/10/06. Under the circumstances you described to me, no permit from the Landmarks Preservation Comission is needed for the NYSDEC contractor to break up the concrete paving in the courtyard next to 72 Hamilton Terrace in order to undertake and emergency remediation project . Because this work is being undertaken to remedy a dangerous condition, pursuant to section 25-312 of the NYC Administrative Code, no LPC permit is needed. No work is to be performed on 72 Hamilton Terrace . Fax from Kira-Leid King(NDC) to DEC Ketani-2/11/06. As discussed, attaached please find a serach from the fire department indicating that there are only two tanks located at the above-referenced premises. Therefore, there isn't another tank located in the court yard . The Church had a fire four years ago causing the building to be inhabitable . Letter from DEC Ketani to Leid-King (NDC)-2/10/06. ...the Department has not been notified by Lindsay Loss or other representatives from the Nazareth Deliverance Spiritual Church, that the church will hire a company to conduct a site investigation to determine whether a fuel oil tank is present under the church courtyard. Deadline of 2/18/06 given to investigate the court yard. Email from LPC Weiss to DEC Ketani-2/22/06. I am writing in response to our recent telephone conversation regarding the possibility that the historic wrought iron fence in front of the side yard at 72 Hamilton Terrace may have to be removed in an oil tank has to be removed. Suggestion to take the tank out in pieces to save the fence. If fence has to be removed it also has to be replaced. Letter from DEC Ketani to Lindos Lindsay(NDC) and Kira Leid-King(NDC)-3/10/06. Site visit made by Department on 2/10/06. ...a third fuel tank was observed to be present beneath the courtyard

CHURCH OF NAZARETH (Continued) **S107523027**

behind the Nazareth Deliverance Church. Department required NDC to perform a soil boring between the foundation wall of the Childrens Art Carnival at 62 Hamilton Terrace and the tank, and taking soil and groundwater samples. Another boring must be installed between the tank and the church. Deadline given for nine days within date of letter (2/19/06) to respond to DEC and resume investigation of tank and soil. STL Analyticals-2/10/06. Sample from CAC sump pit ran for fuel id analysis and showed 920000ppb #2 fuel oil. Fuel oil sampled by Milro. STL Analyticals-2/17/06. Sample from CAC outside by fill #5 @1'. Sample analysis performed for TPH310.3 shows oil parameters below method detection limits. STL Analyticals-2/17/05. Four sample from CAC front basement area near sump. . Sample analysis performed for TPH310.3. Soil analyticals show all below method detection limit except for 7400ppm #2 fuel oil(SB#2 @ 1'), 110ppm #2 fuel oil(SB#3 @1'). Letter from DEC Ketani to NDC Lindsay and NDC Leid-King-3/20/06. On March 20, 2006 the New York State Department of Environmental Conservation (the Department) made a site visit to the above listed property. No work appeared to have taken place to investigate the tank or the surrounding soil since the last site visit that took place on March 10, 2006 . Letter requiring investigation. Due date of 4/5/06 for the work to resume. Letter from DEC Ketani to Lisa Silversmith-03/20/06. We would like to install two(2) wells in the groundwater beneath the basement of your home. These wells will be constructed and sampled by out contractor. Contractor Work Authorization for STL-3/21/06. Fax from Milro to DEC Ketani-3/24/06. Milro proposes the following scope of work to address the oil spill cleanup: 1)Saw cutting of concrete slab in the basement and excavation of contaminated soil 2)disposal at a licensed disposal facility 3)recover of product using a vaccum truck if contaminated groundwater is encountered 4)collection of endpoint samples from excavation 5)restoration of the concrete slab 6)pressure washing of basement and epoxy application. Letter from DEC Ketani to CAC Martin-3/28/06. ...(the Department) is presently looking into other methods of controlling and preventing the petroleum vapors from entering Childrens Art Carnival . Milo remediation plan has been enclosed for Martin's review. Cost Estimate (Milro-Moriano)-4/4/02. Cost estimate for basement excavation and replacement. Site visit by DEC Vought during endpoint sampling of tank in couryard-5/11/06. Sampling performed by USA Environmental (Cristin Ciaburri 718-981-5710). Onsite was Keith Bartley(USA). Pumped out water from 550-gallon UST in courtyard. No product in UST, just sheen and water. Three soil samples were collected (one through bottom of tank, one below fill line and one below supply/return line). No odors or staining observed in all of the soil samples. Site visit performed to CAC and no odors in basement and no free product in sump. Some oil staining showing up on floor from underlying groundwater. One sample also collected for analyiss from NDC basement floor. Vought spoke to USA Ciaburri and DEC will receive report by 6/12/06. DEC tentative requirements: 1)60 Hamilton Terrace-followup to see if any recent spills 2)72 Hamilton-results of basement borings by 275-gallon ASTs 2)72 Hamilton-submittal of documentation of 1/14/06 clean up by Northeast 3)72 Hamilton-notification to Bishop France of requirements 4)72 Hamilton-backfilling of UST excavation in courtyard 5)62 Hamilton-continued monitoring of sump 6)62 Hamilton-call back to Martin regarding possibility of use of Spill funds for AST replacement and likelihood of NYSOAG cost recovery against Art Carnival 7)cc to Northeast, Marlene Martin (Art Carnival), Cristine

CHURCH OF NAZARETH (Continued) **S107523027**

Brooks(Comm Bd 9), Martin Smith(Councilman Robert Jackson), LPC and USA, Eastmond 8)62 Hamilton Terrace-copy of tank testing results of old AST 9)72 Hamilton Terrace- The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness as per 1/19/06 letter 10)62 Hamilton-submission of tank test results from Eastmond and Sons of AST in CAC as per requirement on 1/19/06 letter 11)62 Hamilton-borings at tank location for 8260/8270 12)62 Hamilton-Milro boring logs and site plan from 2/17/06 analyticals 13)62 Hamilton-implemenation of Randy's workplan(installation of monitoring wells at CAC and basement excavation) from Milro 14)62 Hamilton-sealing of basement floor 15)72 Hamilton-backfilling of NDC excavation to prevent continued groundwater infiltration into CAC 06/19/06-Vought-See spill #0511700 at 62 Hamilton Terrace for further information. 7/25/08 - Raphael Ketani. This spill case which is associated with the spill case #0511700/ pin #3832 has been transfered to me. 8/22/08 - Raphael Ketani. I tried to visit the site, but couldn't get in. The building is boarded up and the area of the 550 tank has been filled in. The door to the basement was closed, but not set well in the frame, thereby allowing air circulation.
There was also an open basement vent. No odors were sensed coming from the basement. I put my meter as close as possible to the vent, but didn't detect anything. I put the nose of the meter inside the front doors to the church, but, again, didn't detect any vapors. I visited the basement of the Childrens Art Carnival and found the premises to be odor free, stain free, and without oil in the sumps.
As: the oil that had spilled on the basement floor of the church had been cleaned up; the soil samples taken in the basement of the church didn't have contamination; the oil in the two 275 gallon tanks was sucked up; the 550 gal. tank didn't have oil; there are no apparent signs of the presence of oil inside the church or under the property; the Childrens Art Carnival is free of oil contamination; I am closing the spill case. I sent Jacob Krimgold, EE II of the PBS Unit, an e-mail stating that the church has 3 unregistered tanks. 8/25/08 - Raphael Ketani. Mr. Krimgold e-mailed me back that the tanks do not need to be registered. "

Remarks: "Spill is in the basement of the church that had a fire 2 years ago and now stands mostly gutted. Northeastern Environmental was called to the site on 1/14/06 by someone from the church and vacuumed 120 gals. There are 2 275 gal. tanks (ASTs) in the basement which are connected to a filter device in the floor. There may be a third tank (UST) under the courtyard. Two soil borings were done down to bedrock (18) in the basement. Oil is impacting the front sump in the basement of the Childrens Art Carnival (day care center) next door at 62 Hamilton Terrace - spill #0511700. Raphael Ketani spoke to Ingrid at the church telephone number on 1/17/06 and she said that they had cleaned up the spill and were not going to do anything more. Vapor concentrations in the basement of the Childrens Art Carnival were measured at 10.1ppm today by Mr. Ketani. No activities can take place due to the high vapor concentrations in the building. DEC will try to contact church officials tomorrow, 1/18, in order to have them proceed with investigating and further cleanup of the site."

Spiller Address:	2495 ADAM CLAYTON POWELL
Spiller Company:	001
Contact Name:	FRANK GEHRLING
DEC Memo:	"09/14/07-Hiralkumar Patel. spoke with Frank at Galli engineering. they have been hired by property owner A&C development. as per Frank, Phase II was done as part of rezoning of the site and DEP required for such investigation. they did five borings on site and took five soil samples and one groundwater sample from boring (no well installed). soil borings were terminated at 12 ft depth, at depth of proposed building foundation. and groundwater sample was taken at 23 ft bg and found free product on top of water. currently there is a vacant building and as part of redevelopment, existing building will be demolished. Frank has sent samples to lab, today. he will send analytical results once he has it. there was no PID readings observed from soil samples. asked Frank to send site plan with sampling locations and location of suspected gas station on W 145th st. property owner: 2495 Realty Corp. C/O A&C Development Attn.: Sandra Acosta 300 Northern Blvd, Suite # 200 Grate Neck, NY 11021 PH. (516) 466-2122 (O) (646) 752-0576 (C) Fax (516) 466-2855 email: sacosta@ac-dev.com Frank Gehrling Galli Engineering Ph. (631) 271-9292 Fax (631) 271-9345 email: fgehrling@gallieng.com left message at A&C development. from area map, Mobil gas station (PBS #:

EMPTY COMMERCIAL BLDG. (Continued) **S108764509**

2-157929, station manager: 212-926-5643) is next to subject site along W 145th Street. found two old closed cases at gas station (spill #s: 9008914 & 0507314). Mobil station is on east of subject site, towards Harlem river. (in general, mobil station is on down gradient from site) alternate addresses for the subject site: 160-164 W 145th Street, 2495-2499 7 Ave, 2495-2499 Adam C Powell Blvd received email from Frank with sampling location plan. there were nine geotechnical borings (B-1 to B-9; no environmental data) and five soil borings (SB-1 to SB-5; for Phase II) done. soil borings went to 12 ft, except SB-3 which had refusal at 8 ft. groundwater sample was collected adjacent to geotechnical boring B-3, at the northeastern corner of the building. The Mobil gas station is adjacent to the subject property. The USTs are about 30' from B-3. The groundwater sample had a very strong odor of gasoline and there was a layer of free product in the sample jar. 09/17/07-Hiralkumar Patel. received message from Sandra Acosta. left message for Sandra. received call from Ms. Acosta. she mentioned that currently site has two story vacant building, which was a super market. building was running on gas heating sustem. as per Ms. Acosta there are no tanks on-site. asked Ms. Acosta to submit copy of Phase I report and scaled site map with sampling locations. as part of redevelopment, they will demolish existing building and will construct residential complex with parking in basement. as per Ms. Acosta, basement floor will be 14 ft bg. told Ms. Acosta that RAP must be approved prior to any development at site. received Phase I from Ms. Acosta. abstract: - entire site is covered by a two-story building - property is approx. 30 ft above mean sea level - regional groundwater flows in east direction towards the Harlem river - as per site owner, supermarket was operational for more than 20 years - current building first appear on the 1939 Sanborn Map 09/26/07-Hiralkumar Patel. sent letter to Ms. Acosta requiring soil/groundwater delineation, site specific groundwater flow direction, interim remediation and vapor barrier installation. letter emailed to Ms. Acosta and Frank. re-sent letter with DEC Vought's name as project manager. 10/03/07-Hiralkumar Patel. received email from Ms. Acosta with sample analyticals and site map. found some SVOC contamination in soil samples, but heavy contamination in groundwater sample. few values of groundwater contamination: ----------GW-1
2-Methylnaphthalene----------51,000
Naphthalene----------55,000
1,2,4-Trimethylbenzene------540,000
1,3,5-Trimethylbenzene------550,000
Benzene----------28,000
Toulene----------290,000
Ethylbenzene----------360,000
Xylene----------1290,000
MTBE----------4,300 sent email to Ms. Acosta requiring further investigation, as mentioned in letter. 10/31/07-Vought-File review by Vought: Letter from DEC Patel to Sandra Acosta (A&C Development)-9/26/07. CSL sent to Acosta requiring delineation of soil and groundwater via installation of monitoring wells 2)delineation of soil contamination 3)implementation of interim remedial measures including weekly recovery and monitoring of free product 4)installationof vapor barrier and possibly SSDS(note possible reference to vapor phase contamination in Galli Final Phase II Report) 5)collection of endpoint soil samples if soil contamination is noted during excavation for foundation. Final Phase

EMPTY COMMERCIAL BLDG. (Continued) **S108764509**

II Investigation Report (A&C Development Partners amd Galli Engineering)-10/4/07. Site is E designated. Galli recommends installation of three monitoring wells. No source of petroleum contamination was identified in soils at the site in ten soil samples and as such Galli feels that endpoint sampling is not necessary. Request to table IRM issues until groundwater delineation is complete as RP may be determined to be RP next door and they will be responsible. Pending additional groundwater delineation, we believe NYSDEC should help us get the monetary equivalent to pay for the membrane from the adjacent property owner . Vapor mitigation system not necessary due to basement parking garage in building. Phase II ESA-Galli Engineering-10/4/07. Site will be developed as eleven (11) story mixed use apartment building with a one story open air ventilated garage . Five geoprobe borings to a depth of 12' and collection of ten soil samples and one groundwater sample. Depth of proposed excavation is twelve feet. South of property is retail, east is an active gas station. Groundwater at depth of 23' below grade. There was a very strong odor of petroleum, thought to be gasoline, during the groundwater sampling event . The minor VOC contamination found in the soil may be the result of spreading of vapor phase gasoline originating in groundwater since no evidence of a source area form a spill of gasoline was found on the site in the soil samples . Report recommends further investigation to determine if adjacent site is the source. Soil analyticals show minor PAH exceedences attributable to fill material and no VOC detections. Groundwater analytical shows: 28000ppb benzene (GW1), 290000ppb toluene(GW1), 490000ppb xylene(GW1), 360000ppb ethylbenzene(GW1), 11000ppb napthalene(GW1), 4300ppb MTBE(GW1). DEC requires: 1)cc to DEP as site is E designated 2)collection of endpoint samples from final excavation 3)IRM including product recovery if applicable 4)SSDS and vapor barrier 5)confirm that groundwater delineation is needed 6)spills, TTF on adjacent gasoline site 7)opening of spill on ExxonMobil property and cc to ExxonMobil 7)Depth of proposed foundation 8)cc to DEC Urda 11/2/07-Vought- See also spills #0751061 (open) and closed spill 0611117. Spoke with DEC Krimgold and as per PBS records, PBS inspection performed by DEC Falvey in 2/07 at 150-154 West 145th St and numerous violations including product in sump/catch basin. DEC Krimgold also confirmed that spill number should have been reported by ExxonMobil upon discovery of product in the sump. Vought called ExxonMobil (Kenneth Drake Cell 908-451-0956 Fax 609-698-8761 (kenneth.j.drake@exxonmobil.com). Left message with Drake to return call with contact info. Vought called Acosta (516-466-2122 fax:516-466-2855) for DEP contact and depth of foundation and to explain requirements and fact spill opened on adjacent site and left message to return call to DEC. Vought called Galli Engineering -Frank Gehrling(631-271-9292 fax:631-271-9345). As per Gerling, free product was noted in MW1 and proposed foundation depth is approximately 13' below grade. Vought also suggested fingerprint on product. As per Gherling, building was originally movie house with possible heating oil tank converted to grocery store. Old building still in place. Gehrling will return call to DEC Vought with DEP contact information for cc list. Vought received email from Acosta that DEP project manager is Maurice Winter. 01/11/08-Vought-Current File Review by Vought: Letter from DEP Wuthenow to Gehrling-12/4/07. DEP reviewed October 2007 Phase II. Site would be an 11-story residential building with ground floor retail use and underground parking garage. Site currently occupied by

EMPTY COMMERCIAL BLDG. (Continued) **S108764509**

2-story commercial building that will be demolished. Five soil borings performed by Gali in September 2007. Groundwater present at 23' below grade during drilling. NYCDEP requires: 1)submission of RAP and disposal as per NYSDEC regulations, site specific Construction Health and safety plan, an active SSD system, covering of soils with plastic sheeting, removal of impacted soil in accordance with DEC regulations, maintaining dust supression, closure of all tanks in accordance with DEC, DEP discharge permit if dewatering is to take place, and note that DEC may have further requirements with respect to groundwater. Email from Gehrling to DEC Vought-12/6/07. Monitoring wells have been installed and are being developed. Brandon Mooney of Kleinfelder, consultant for ExxonMobil has been in contact with us and we have supplied him with a copy of the Phase II ESA . Remedial Action Plan (Galli Engineering)-1/5/08. Final Remedial Investigation Report included that shows no soil contamination found onsite in 5 soil borings. No historical or current use of gasoline onsite. No active groundwater remediation work planned as this site not source. Presence of high bedrock formation in the west side of the property. Three monitoring wells were installed into bedrock however one well remains dry. Galli agrees to soil excavation and installation of an SSDS system and vapor barrier. Bedrock rises quickly from east to west and When uncorrected depths of the depth to bedrock were plotted, the map shows a generally easterly dip to the slope of the bedrock surface . There is also a bedrock high to the south. All soils will be excavated to a depth of approximately 12'and removed from the Site... . Also installed will be watertight sheeting and waterproofing and a vapor proof membrane barrier. Galli is of opinion that a passive system would be sufficient since the subsurface garage level of this building would be ventilated. However the NYCDEP and NYSDEC have requested that the system be active . After review of letters sent by DEP and DEC, Vought noted that active SSDS was only required by NYCDEP, not DEC. Endpoint samples will also be collected. Soils will be direct loaded onto trucks to prevent odors in neighborhooed and a spill Closure Report will be submitted to the DEC and NYCDEP. Vought sent letter approving of RAP with cc to Exxon Mobil (Drake), NYCDEP Wuthenow, DEC Urda and Gehrling. 06/10/08-Vought-Received call from and spoke to Sandra who works for owner of property. Property will not be developed for at least one year due to delay in not receiving approval from DEP and due to poor economy. Exxon Mobil would like to enter in cleanup agreement with owners of adjacent site (AC Development). DEC expressed no concern of holding activity on site for year as responsible party is ExxonMobil. 09/05/08-Vought-Spill transferred to DEC Haggerty as RP for site is ExxonMobil at 150-154 145th St (Spill #0751061). 3/4/09 - Haggerty: Spill consolidated into ExxonMobil spill 0751061. The Mobil Station 17-QDM at 150-54 West 145th Street, Harlem NY is directly adjacent to this property and is the proven source of this contamination. The Mobil station is currently in active remediation removing tanks and contaminated soil as an IRM. ExxonMobil requested the consolidation of this spill into their spill. spill closed "

Remarks: "During a phase 2 site assesment found gasoline in the groundwater. There is a Mobil gas station next door @ 150 W. 145th st. ... unknown if there is a connection. Small amount of free product found in the water sample. Frank Gehrling 516-723-1785"

DEC Memo:	"10/21/08-Vought-Spoke with off-hours responder DEC Piper who was on-scene with DEC Ahmed. Petro hired Milro to respond to spill last night and Piper/Ahmed performing site inspection to determine DEC requirements (if any). DEC Piper responded to site with DEC Ahmed. Milro on scene last night and pumped 2 manifolded 275s. Upon arrival no odors were present in ground floor of brownstone. 0.0 on pid. I

RESIDENCE (Continued) **S109372708**

entered basement through closed door and slight odors were present, 0.0 on pid. The tanks were behind another door and when I opened it there were high amounts of vapors. Oil soaked speedy dry was present. I spke with Petro, which stated that there was a delivery yesterday though has been on a stop order since march bc of a bad line. The line was replaced and tanks were filled. It is now assumed that the tank was bad the entire time though it needs to be investigated. Milro was hired to complete work. 12/11/08- DECPiper- I recieved call from Toy, homeowner requesting I perform and inspection. 12/15/08- DECPiper- I inspected site. PID readings on ground level were 0.0. As I entered basement PID readings increased to 2 on stairs and 4 on basement level. The floors were pulled up and a solid concrete floor existed. There wasa small area of wood that needed to be removed that had readings of 50ppm. No otherareas exhibited PID readings above 4 ppm. The floor can be epoxied and once docmentation is recieved, the spill can be closed. 1/7/08- DECPiper recieved and reviewed closure report. Based on work to date, this spill is closed. See e-docs if warranted."

Remarks: "Waiting for Hazmat at this time."

Contact Name:	DIONIS ORTIZ
DEC Memo:	"1/10/06 -Austin - Also received complaint from: Cristina Lee, Chairman of Health Committee of Community Board #9 212-883-7600; 212-864-6200 contact her for further background info, as well as Ortiz - end Carnival e-mails: mamudd1@aol.com or mamartin@childrensartcarnival.org FAX: (212) 234-4011 1/11/06 - Raphael Ketani. I tried contacting Mr. Ortiz ((212) 234-4093), but a man answering the phone said he would not be in until 10:30AM. The man said that the church had a fire 2 years ago and hasn't rebuilt or reopened. He passed the phone to a woman who said that they have been trying to find out more information about the oil leaking from the church and she gave me the phone number of Cistine Grit (212) 234-0484. I called the number, but no one picked up. I then called (212) 883-7600 - the law office of Cristina Brooks Lee - but could only leave a message. I called (212) 864-6200 - the Community Board #9 phone 10AM to 5PM - and got a man on the line. He said that I should call Martin Smith (not available until 11AM) at (212) 928-1322, who is the representative of Councilman Robert Jackson. I

CHILDRENS ART CARNIVAL (Continued) **S107521874**

will make a site visit at 10:45AM today. I made a site visit at 11:15AM. I met Dionis Ortiz, Program Manager, Jose Ortiz, his assistant, and Marlene Martin, executive director of the Children's Art Carnival. I went to the basement and looked at the oil tank, the fill and vent lines, and the boiler. There were no signs of spillage. However, I did see many cracks in the basement floor that looked wet. Mr. Ortiz said that there is a spring below the building and that the water seeps into the floor. The basement has 3 sumps. The front one is next to the front basement wall, the middle one is 16 feet away, and the third one is about 25 feet behind the second one. The second and third sumps had only clear water at the level of the floor. The front one had red oil floating on top. There were signs of oil spillage on the basement floor next to the sump. Mr. Ortiz said that when it rained heavily a little while ago, the water level rose and pushed out the oil onto the floor. He said that an oil odor was noticed to be coming from the basement on 1/3/06. He said that Robani Oil was called and they put down some oil absorbent material. I spoke to Robert Pearson of Robani Oil (212) 687-8699, Colonial Park Station, P.O. Box 188, NY, 10039, and he said he didn't think the oil was coming from the property, but he didn't do any system tightness testing. He said that the customer would have to order it and pay for the testing. The PID readings were as follows: over the sump: 11.8ppm breathing area front basement: 4.4ppm breathing area at second sump: 1.4ppm first floor hallway: 1.3ppm children's work room first floor: 570ppb main floor (second floor): 600ppb (light odor) third floor art work room: 650ppb third floor copier room: 750ppb fourth floor front and back: 750ppb Mr. Ortiz told me that the church next door burned two years ago and has never been repaired. He said there is a man (David - later called Patrick) living across the street who is affiliated with the church. Mr. Ortiz knocked on the window, but no one seemed to be home. He said that David told him that the church uses gas and that Con Ed had shut off the gas. Mr. Ortiz said that, after the fire, someone entered the church basement and saw an oil spill. I spoke to Ms. Martin and she said that she didn't have any other church contacts other than Cistine Grit (a.k.a. Ingrid). She called Ms. Grit's number, but didn't get an answer. I looked at the outside of the church. The schedule display panel has Nazareth Deliverance Spiritual Church, Inc., Archbishop C. Clark. The name over the 72 Hamilton Terrace entrance is Church of Nazareth. The church is boarded up and the roof looks to be in bad shape. There were oily odors emanating from a small basement window near the basement door of the church. It is unclear if there is an oil spill in the basement of the church. I called Randall Austin, Chief Spills Engineer Region 2, with the information. He sent Jeff Vought, E.G. 1, over to look at the situation. Mr. Vought arrived at 1:30PM and looked over the situation. He noted 3 suction lines at the foot of the basement stairs. One line was only 3 feet long as it had been cut. No one at the Carnival knew when this happened or if a previous oil spill took place. Though Mr. Ortiz told me that the Carnival has been in the building for 36 years. I saw a short stream of red oil between one of the fuel lines and the wall next to the stairs. A conference call took place between Ms. Martin, Mr. Vought, and Michael Hughes of NYS DOH. Mr. Hughes said that the building should be ventilated and the basement door sealed. Ms. Martin said that she told all the parents about the odors and that all of the parents decided to have their children stay in class. Later, at between 3PM and 4PM, Martin Smith of Councilman Robert Jackson's office and

CHILDRENS ART CARNIVAL (Continued) **S107521874**

Claudius Wickham of NYCDOH showed up. We went with them and Bruce Tilley of the Neighborhood Organization to the home of Diana Laird and David Zapol at 418 W.144 Street. This is the home which shares a common wall with the church. PID readings in the kitchen were 940ppb. Readings in the corner of the basement where paint and wall finishing material were reached 1300 to 1600ppb. A dirt hole in the basement floor had 2500ppb readings. The front part of the home's basement had 500ppb. Next, Mr. Smith and Mr. Wickham went with us to the Carnival's basement. They both looked at the situation with the oil in the front sump and noted the odors. Then Mr. Wickham measured the air in the art work room on the first floor. He noted about 650ppb readings. He said that the odors weren't dangerous, but just a nusiance. He said to ventilate the building. 1/12/06 - Raphael Ketani. I made a followup visit at 3:10PM. Eastmond had finished their cleanup work. The front sump had been vacuumed and the floor had been cleaned. Fans were blowing the air around in the basement. Ms. Martin said that Eastmond didn't arrive until this morning as, otherwise, there would have been high overtime charges to do the work yesterday at night. Eastmond told her that the oil tank will be picked up off of the floor or else the dampness will corrode the bottom and the tank will leak. The odors were not as bad as yesterday. The tank room had about 3ppm, the director's office about 750ppb, and the children's work area on the main floor was about 300ppb - there were no odors on the main floor. However, the oil reappeared in the front sump. Ms. Martin told me that she had made contact with someone from the Church of Nazareth and that this person will let people in saturday morning (1/14). Ms. Martin said that she will let me know what time the church will be opened up. She also said that her company is not going to spend any more money on removing the oil in the sump until DEC finds out whether the oil is coming from somewhere else or from the Carnival. I informed Randall Austin, Chief Spills Engineer Region 2, and Jeff Vought, E.G. 1 Spills, about this and about the return of the oil in the sump and about the levels of the odors today. 1/13/06 - Raphael Ketani. I spoke to Ms. Martin. She said that there are no odors on the main floor. I asked whether she made contact with anyone from the church. She said no one called her and she couldn't get ahold of anyone. I asked whether the front sump was covered. She said it wasn't. I told her to have someone cover it with plastic bags and then use tape to seal the bags to the sump clay pipe. She said she would have someone do it. 1/17/06 - Raphael Ketani. Ms. Martin called me today. She said that the basement had flooded over the weekend because the sump pump didn't work. She said she had water and oil all over the floor. Also, she said that the oil guage on the oil tank is in the red zone. I asked her when was the last time she had a delivery. She said that it was some time ago and no one really keeps track of the level of oil in the tank. She said she called Robani Oil to get a delivery. However, the odors are bad again in the building. I told her to set up the fans. She said there are problems with the electricity in the basement and the fans aren't running. I also told her that Northeast Environmental ((914) 777-1930) showed up at the church on saturday, 1/14/06, and found oil all over the basement. I told her to call them and get them to clean up the oil in her basement. I told her that if they wont do it, then to call Eastmond again and have them clean up the oil as the odors are bad. Jeff Vought, the off hours spill responder for the weekend, came in and gave me the following notes. He said that Northeast Environmental arrived on site at 11:30AM on

CHILDRENS ART CARNIVAL (Continued) **S107521874**

saturday 1/14. Oil was all over the floor of the Childrens Art Carnival. Northeast collected the oil and water on the basement floor and pumped out the front sump. Northeast then went to the Church of Nazareth and recovered 120 gals. of #2 fuel from the two 275 gallon tanks in their basement. They did 2 borings, one next to the two 275 gal. tanks (ASTs) and one some feet to the west. They end at bedrock and are only 18 deep. Mr. Vought had them leave the borings open. There is a fuel filter in a concrete casing in the floor. From there, a line runs to the boiler. Mr. Vought suggested to me that they either do 2 wells in the corner of the wrought iron fence next to the Carnival or an oil recovery pit. The contact at Northeast is Dwayne Monaco (914) 777-1930 or (914) 403-5525 cell. I spoke to Mr. Monaco and he said that he was hired by the church and has no plans to pump out more oil from the Carnival. His techinician noticed a second vent line and a remote fill at the back of the church. He believes that there may be a third tank under the courtyard. I contacted Ingrid at (212) 234-0485, the Church of Nazareth - Archbishop Maxton France (cell (917) 642-8913). She said this was the Archbishop's number and that I can send a letter to 72 Hamilton Terrace, NY 10031. She said they didn't have plans to do anything more regarding the cleanup. I visited the site at 2:50PM. Oil vapors were still noticeable from the church. I entered the Carnival and sensed strong odors on the main floor. There were no activities or children at the day care center. I went to the basement and there was 3 of water there. However, I could not see a sheen. Ms. Martin said that Eastmond could not come and pump out the water as they didn't have a truck available. She said that they will come at 9AM on 1/18. The vapors in the buidling are as follows: basement=10.1ppm first floor art room=2250ppb executive director's office=3400ppb hallway at first floor=6600ppb main floor=2300ppb third floor art room=3000ppb third floor front room=4600 third floor landing=7100ppb fourth floor art room=5600ppb fourth floor front room=4600ppb fourth floor landing=7100ppb I met Mr. Pearson of Robani Oil at the site. He said he wasn't going to deliver oil until the oil spill at the church was cleaned up and not until it was determined that the Carnival's system wasn't leaking. Ms. Martin said that someone from the NYCDOH was supposed to show up to test the air, but I stayed until 3:35PM and he arrived. Ms. Martin said that they were out of oil and so the heat was off. 1/18/06 - Raphael Ketani. I tried to call the Carnival to find out how the water/oil removal in the basement went at 9AM (contractor was Eastmond), but no one answered the phone. Later, I got ahold of Ms. Martin via her cell phone (917) 805-3154. She told me that Eastmond had been at the Carnival at 9AM and had pumped out the basement. She said that the school is still closed. I called up MILRO (516) 379-1500 (FAX (516) 379-4596) and spoke to Paul Basso. I told him that we needed Milro to set up ventilation for the school and pump out the basement. We decided to meet at 10:30AM tomorrow. Kira Leid-King (home(914) 632-0665; cell (914) 879-8126; work FAX (212) 455-2502) called me to explain that the oil wasn't spilled on the floor of the church's basement. However, I told her that Northeast Environmental had been to the church on 1/14/06 and had pumped out 120 gals. from the two 275 gallon tanks. She said that the church hadn't had a delivery in 3 years and that the Fire Dept. had ordered the church to pump out the oil after the fire. She said the tanks never had oil in them. I told her that there was a second vent pipe and a second fill port. I added that there is a gauge for a 550 gal. tank on the wall of the church's basement. I told her that DEC

CHILDRENS ART CARNIVAL (Continued) **S107521874**

suspects there is a third tank under the courtyard. She said that she had no idea. Finally, I told her that the state would be hiring a contractor to investigate the church's oil spill and tank situation. She said that it's the Carnival's fault, not the church. I asked her what her relationship was to the church. She said that she is sort of the secretary-treasurer and paid for Northeast to do the oil vacuuming. 1/19/06 - Raphael Ketani. A site visit was made by Randall Austin, Chief Spills Engineer Region 2, and myself to monitor the work of MILRO Assocs. Inc. We met Gordon Sandtorv, Operations Supervisor from MILRO, on site. MILRO was already cleaning the floor in the basement of the Carnival. Vapors in the basement were about 3000ppb. However, the floor looked very clean. Red oil was again on top of the water in the front sump. Water was seeping through the north wall (opposite the oil tank) of the basement. It didn't have any odor or feel oily. I found out that Robani Oil had delivered 100 gals. and the heat was back on. Patrick Peters (phone (212) 690-0630; son of Archbishop Carlyle Clark) showed up at the Carnival. We asked him to let us into the church basement and he did. We saw the two 275 gals. tanks and one vent line that extended from the second tank. A filter apparatus was in the floor for the oil. The suction line ran through the floor and came up 8 feet away at the furnace. There was a light smell of oil, but no oil was visible on the floor. A gauge was mounted onto the wall above the first tank. Gordon said that it was a petrometer for a third tank. vapor concentrations for 1/19: basement: about 3000ppb directors office: 425ppb first floor art room: initially 1000ppb, then 400ppb main floor: 350ppb third floor: 700ppb back room/ 600ppb front room fourth floor: 400ppb back room/ 1000ppb front room Mr. Austin talked to Mr. Sandtorv and told him that if the Carnival doesn't test the suction line and the return line, then MILRO will have to do it. He added that he wanted MILRO to construct some kind of low flow sump and collection system with an oil/water separator to collect the water and pump it to the city sewer. Then we left. 1/20/06 - Raphael Ketani. I called up Paul Basso and asked him what MILRO was doing to install a sump and oil/water separator. He said that he thought this idea was tentative and that DEC wasn't so sure this is what they wanted. So he hadn't looked into investigating a possible system. I told him DEC DOES want a slow pump system to hold down the water level and collect the oil. I told him that it needs to be installed immediately. He said that such a system that will work with the sump that exists is tricky to find, but he will investigate a possible one now. Paul added that oil samples were sent to Severn Trent today. He said there is a 2 week turnaround. I also told him to put down lots of absorbent pads on the floor around the front sump because rain is expected over the weekend. He said he will have someone do this. I called up Ms. Martin and asked her how things were. She said that the odors were low due to the fans that were going all night and that the basement was free of oil. She said that she will get someone to the Carnival soon to do an entire tank system tightness test. Ms. Martin called me at about 3:15PM today and said that Eastmond had done a system test. They found that the tank leaked pressure and the vent pipe had a wet failure. Otherwise, Eastmond said, the suction, return and fill lines were alright. I told Ms. Martin that the next step was to have the tank cleaned out, removed, and a temporary tank installed. She said she would do that. I told her to have Eastmond put absorbent pads around the front sump to absorb oil when the water level rises again and to hire a company to either dig up the contaminated soil below the basement or to start

CHILDRENS ART CARNIVAL (Continued) **S107521874**

with soil borings to find the extent of the oil pool. I gave her a list of digging and investigative companies with no recommendation. She said she would pick a company to start work. 1/23/06 - Raphael Ketani. I spoke to Paul of MILRO today and told him to hold off doing more work at the site. He said that his crew had been there this morning and pumped out more oil. I told him that was fine, but to stop work for now. He said he would. I then spoke to Ms. Martin. She said that Eastmond was on site and they were cutting up the tank. She said that MILRO had been on site and had pumped out more oil. Ms. Martin asked for a letter ordering the Carnival to do the tank removal and break up the floor of the basement to remove the contaminated soil and water. I told her I would send it. 1/25/06 - Raphael Ketani. I spoke with Marlene by cell phone. She said that this was the best way to reach her now because of the tank removal yesterday. She said that when Eastmond removed the oil, cut up the old tank, and welded the new tank, the vapors were so strong that they chased everyone out of the building. She said that everyone is now working from their respective homes. She said that she thinks the Carnival has found a temporary place to hold their saturday workshops. Ms. Martin said that a temporary tank has been set up in the backyard and Robani is supposed to get things running to provide heat. I told her to open all of the windows again to get more vapors out. She said she will do this and that she will call Eastmond to see what they plan to do and when. I called Eastmond and spoke to Isaac Mungra. He said that his crew removed the tank and saw holes on the opposite side which were 15 inches above the floor. He said that it did not appear that oil leaked onto the floor from the tank or anywhere (according to Rene from his crew who was there). Mr. Mungra said that he didn't feel it was necessary to break up the floor to see whether oil was underneath. I asked him whether Eastmond was going to wash the floor and pump the sump. He said no because he didn't want to take on the large cost. I asked whether Eastmond tested the suction, return, and fill lines. He said no because it was his understanding that Robani was going to replace the lines anyway. He said he was only responsible for cutting up the tank. I called Robani and asked Mr. Pearson whether Robani Oil was going to test the 3 lines. He said no and that he had no plans to. He said that he was just going to supply 2 temporary 275 gal. tanks and get the furnace running again. I asked whether Robani Oil was going to clean the basement floor and suck out the sump. He said no because he didn't want to take on the large cost as the Carnival doesn't have a lot of money. He told me to have Eastmond do it. I called Ms. Martin back and told her the situation with Eastmond and Robani and told her that I would call MILRO, with her permission, and have them come and do the 3 line tests, clean the floor, suck the sump and ventilate the buidling. She said that was alright and to call them. I tried calling Paul Basso, but could only leave a message. Mr. Marvin Edwards (cell (404) 790-2592) called to ask what he should put in the response letter to DEC. I told him to give me a chronology of who performed what service, what events happened, and how the tank failure was discovered and what actions were taken to resolve the matter. He said he would. He added that he is taking over some of the cleanup coordination responsibility from Ms. Martin as she has other work to do. He asked that I coordinate with him. I told him that I was trying to get MILRO to take over the cleanup. He said that would be fine. I made contact with Mr. Basso and told him what the DEC wanted MILRO to do: 3 line tests, ventilate building, clean floor, pump sump daily.

CHILDRENS ART CARNIVAL (Continued) **S107521874**

He said that MILRO can do all of the work. I asked him when his crew could come out. Mr. Basso said at 1 PM tomorrow. I said that would be alright. I called up Ms. Martin and asked her whether 1PM tomorrow would be alright. She said yes. I then called up Mr. Edwards to let him know when MILRO will be there. He said that 1PM would be good. 1/26/06 - Raphael Ketani. I visited the site today at 12:30PM and met Ms. Martin and Mr. Ortiz. They said that MILRO had already been here at 11:30PM and pumped out the sump. Ms. Martin said that MILRO told her they would be over tomorrow to clean the floor. I looked at the front sump and saw only clear water. There still were odors in the building as the floor in the front basement needed washing, though it didn't look oily and smelled only very slightly when I got very close to it. The floor where the tank used to be didn't have cracks or oil stains. There were fans in the basement blowing the vapors out the back entrance. Fans were present on all floors and were blowing the air out the windows. The building was cool inside due to the open windows. Vapor concentrations were as follows: basement front/back: 3500ppb/520ppb first floor director's office/art room: 89/210 main floor: 162 third floor front/back: 200/290 fourth floor front/back: 218/194 1/27/06 - Raphael Ketani. I received a call from Ms. Martin. She said that MILRO tested the 3 lines and the return line failed. She said that they cleaned the floor today, too. Ms. Martin added that the odors are light today. 1/30/06 - Raphael Ketani. I spoke to Paul Basso today. He said that the fill line wasn't tested. I asked him to test this line, also. He said they vacuumed out oil from the front and middle sumps on friday and cleaned the floor. He said that they will be over tomorrow, 1/31, and test the fill line, vacuum again and clean the floor, if necessary. I told him this would be fine. I made a site visit 10:45AM. I met Jose Ortiz who let me check on the odors at each floor and the presence of oil in the sump. The vapor concentrations were: 2,000ppb in the front basement; 750ppb in the back basement; about 250ppb at each floor above the basement. Odors were light on the main floor, but the building is still cool due to a problem with the furnace and the windows are partially open. I met Mr. Pearson on site. He told me that he will replace the suction line and that the return line was not in service even before Robani was the Carnival's oil supplier. I told Mr. Ortiz and Ms. Martin that MILRO will come tomorrow to suck out the sump and do 4 soil borings in the front basement. I told them that there will be 2 borings where the tank used to be, 1 between the tank position and the sump, and 1 on the other side of the sump. They said they understood. I will try to be at the site to watch the soil sampling. Mr. Lindos Lindsay called and left a message that he is scheduled to meet with an environmental company tomorrow at 11AM to discuss what needs to be done and how to go about it. 1/31/06 - Raphael Ketani. I met Gordon of MILRO at the site just as he finished doing the fourth boring - about 11AM. All four borings had been done where I wanted them. Gordon told me that he had soil at each location and that the soil at boring #1 (between the sump and the wall) was the most contaminated. He said that boring #4 at the west end of the former tank area was the cleanest. He said that he will submit the samples for analysis. Oil was still floating and accumulating in the sump. I asked Gordon to call Paul Basso and have a vacuum truck come over and suck out the sump. Gordon said that one will be here today and tomorrow. The crew from Robani Oil began their work right after Gordon was done. They will install 2 275 gal. tanks and replace all of the lines. The vapors in the building were slightly worse than

CHILDRENS ART CARNIVAL (Continued) **S107521874**

yesterday. I talked to Jose Ortiz and Marvin regarding why the borings were taken and what will happen next. I told them to set up the fans again and to ventilate the building. At 3:30PM I spoke to Gordon of MILRO to find out the details of how the return line was tested. Gordon said that he capped off the line, pumped with a manual push-pull pump until he had 5 lbs. of vacuum and waited half an hour. He said he used soap solution to check all the valves and they were fine. He said the vacuum truck had been there about 1 hour after he left and pumped out a lot of oil. I told him to test the fill line. Gordon said that he believed the line was already removed. I told him that if this is true, then I wanted him to do a couple of borings outside the building next to the fill line tomorrow morning. He said he will do it. 2/1/06 - Raphael Ketani. I met Gordon at the Carnival. He did one boring (#5) next to the fill pipe. However, Robani had replaced the old fill pipe with a new one yesterday and had been sloppy by spilling a little oil onto the area when they pulled the pipe. The sample was sandy fill soil and had a slight odor. The PID reading was 500ppb, but Gordon had collected the sample in a plastic bag. This was sand that was used to backfill the upper end of the abandoned coal shute that is infront of the building. I went into the basement and checked the portion of the sand that had spilled into the coal shute. It didn't have an odor. Gordon said that they just sent off the oil samples that were collected. I told him to order the lab to do a fingerprint of the oil. In the basement, Robani had installed two 275 gal. tanks, a new fill line, a new vent pipe, and a plastic coated suction line. The suction line was cemented to the floor and covered with concrete where it met the landing of the stairs to the basement. All of the old lines were removed. The heat was back on and a hot water pipe almost over the back and another one against the opposite wall of the basement were leaking hot water. Part of the floor of the front basement was wet. Some of the wetness extended under the new tanks, but they are on feet above the floor. Red oil is in the front sump, but is transparent enough so that the bottom of the sump can easily be seen. I told Gordon to call Paul Basso and have him send a vac. truck over to pump out the sump. Vapors in the building were: basement: front 1000ppb/ middle 500ppb first floor: front 350ppb/ back 225ppb second (main) floor: 230ppb third floor: front 250ppb/ back 350ppb fourth floor: front and back 300ppb Paul from MILRO called at 3PM and said that he will send the samples to a DEC contract lab for fingerprinting and he will resample soil sample #5 and put it in a jar. 2/2/06 - Raphael Ketani. I received a call from Rick Bayer of Severn Trent Labs regarding the soil samples. He said he will send a copy of the report to MILRO and to DEC. 2/3/06 - Raphael Ketani. I FAXed a copy of the Standby Contractor Authorization Form to Paul Basso of MILRO. 2/6/06 - Raphael Ketani. I visited the site today. Vapors in the building were 3600ppb in the basement, 200ppb in the first floor art room, and 170 ppb in the main floor art work area. However, the heat was off as the plumbers were replacing a couple of hot water pipes. Oil was still in the front sump, but it had turned thinner and brownish in color. Aside from this, Marvin Edwards of the Carnival pointed out black spots from 2 to 14 that had suddenly started to appear on the basement floor. Mr. Edwards said that he first noticed them today. There were about 12 spots and all except for a couple were in the front basement area. I touched some and oil came off onto my hand. The PID detected 6200ppb of vapors. I called MILRO to come over tomorrow to suck out the front sump and try to reduce the amount of

CHILDRENS ART CARNIVAL (Continued) **S107521874**

oil seeping through the floor. Paul of MILRO said they would do it. 2/7/06 - Raphael Ketani. I tried to find out whether MILRO had pumped out the front sump, but could only leave a voice mail for Marlene Martin. I called up Paul at MILRO and he said his worker was there with the vacuum truck and pumped out 120 gals. of water. 2/8/06 - Raphael Ketani. I called up Mr. Wickham of NYCDOH ((212) 442-3372), but he wasn't in. I reached the receptionist and she said that all inspectors get their work assignments a week in advance and that Mr. Wickham already had a full schedule and could not make it to the CAC. She connected me with Mr. Wickham's supervisor, Inspector Stallbohm. Mr. Stallbohm said that someone was out at the CAC on 1/17 and still found unacceptable vapors. He would see what he can do to get someone to the CAC quickly. Mr. Stallbohm called back to say that an inspector went out to the CAC on 2/3 and determined that the vapors had decreased to safe levels for children. He said that Marvin Edwards of the CAC had signed the DOH report to this effect. He added that Mr. Edwards was told the children could come back and that an inspector will make a followup visit on about 2/17. I called up Marvin, but got Jose Ortiz. I told him that the NYCDOH had told me that the children could come back to the CAC. He said that everyone was aware of this, but the boiler broke again and so the children will be staying off-site for a while longer. 2/9/06 - Raphael Ketani. I made a site visit today. The heat was off again as they had many hot water pipe leaks. They are in the process of replacing much of their hot water piping. Oil was still in the top of the front sump, but you could easily see to the bottom of the sump and the oil appeared to be just a sheen. Vapor concentrations were: basement: 1400 to 1500 ppb first floor art room: 200 ppb main floor: 325 ppb third floor: back/front, 325/290 fourth floor: back/front, 380/400 Kira Leid-King, lawyer for the Church of Nazareth, called me yesteday to say that she had hired a title company to do a records search for the third tank. No physical investigations were taking place at the church. 2/14/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that the odors were very slight in the building. I told him I would like to send over a vacuum truck to suck out the oil in the front sump. He said that would be alright. He said that someone will be at the CAC today and tomorrow. I called MILRO and they said they will be over at the CAC on thursday morning. I let Mr. Edwards know and he said someone will be there. 2/16/06 - Raphael Ketani. I spoke to Ms. Martin. She said she knew that MILRO wasn't coming today, but would come tomorrow. I asked her about Robani Oil and how service has been over the years - whether they clean up whatever they release. She said they had no problem with them and that nothing has ever happened. I then asked her whether she had heat today. She said yes and that there was plenty of it since they repaired all of the water pipes. I asked her how the history of the boiler has been. She said that except for now and the pipes, she hasn't had a problem - though it's tempermental. I asked her whether in the past it ever leaked. She said not to her knowledge. I ended the conversation after this. At 3:45PM I received a call from Bill Hunter, insurance adjuster for Utica Insurance ((516) 479-5089). He represents the insurance company for Robani Oil. He said he was trying to go over the information that Robani had given him regarding the oil release to see who had liability. He said the insurance claim number was 1016566. He said that the CAC first called Robani to complain of a loss on 1/6/06. He said Robani came to investigate and found oil 5 feet from the tank, but he said he wasn't sure whether that meant in

CHILDRENS ART CARNIVAL (Continued) **S107521874**

the sump or on the floor. He asked whether the church was the source. I told him we didn't know yet, but we intend to do an investigation. 2/23/06 - Raphael Ketani. I spoke to Jose Ortiz regarding the conditions at the CAC. He said he did notice a slight odor on the main floor. I asked him to look at the front sump. He called me a little while later and said there was lots of oil in the sump. Then I called MILRO and told Paul of MILRO to send the vacuum truck. He said he would send it tomorrow, friday. Paul told me that DEC should be receiving the first bill soon for the work they have done so far. I let Mr. Ortiz know that MILRO will be over tomorrow. 2/27/06 - Raphael Ketani. I visited the CAC today. I met Mr. Edwards. He showed me the front basement area. The door is being kept closed now to confine the odors as much as possible. The room had 1500 ppb of vapors. A thin film of oil was present on the surface of the water in the sump with widely scattered small orange droplets of oil. The floor had lots of Speedi-Dri on it to absorb oil seeping up through the floor as oval stains. Mr. Edwards said that MILRO had been over last friday and had pumped out the sump. The air about the second sump had about 560 ppb vapors. There was a sheen on top of the water, but it did not smell like oil. In the art room on the first floor the vapors were about 500 ppb. The main floor and the third floor both had vapor concentrations of about 450 ppb. Mr. Edwards said that they just had a cleaning crew mop the floors. The air smelled of some kind of vapors of a cleaner. I told Mr. Edwards that I will have MILRO come over sometime this week to pump out the sump again. He said anytime is alright. I received the analytical reports for the 5 soil samples taken at the CAC some weeks ago. Four (4) samples were collected on 1/31/06 in the front basement near the front sump. One (1) sample was taken on 2/2/06 at the fill pipe where it passes below ground. Three (3) of the front basement samples and the fill pipe sample indicate the presence of only #2 oil. One (1) basement sample indicated the presence of #1 oil. However, this oil was also in the blank. 3/1/06 - Raphael Ketani. I spoke to Paul of MILRO today and asked him to vacuum out the front sump this week. He said his truck will be over tomorrow. 3/6/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that MILRO was over on friday and pumped out the sump. He said that odors were definitely noticeable in the front basement, but the door is kept closed. He added that the odors in the rest of the building are slight and that they had classes on saturday with no problems. 3/9/06 - Raphael Ketani. I received a call from Ms. Martin today. She said that some men in plain cars showed up at the church on teusday, 3/7, and began working in the courtyard. She said that they uncovered and opened a tank today. 3/10/06 - Raphael Ketani. I visited the CAC and the church courtyard today. I took pictures of the exposed tank and the sheen floating at the top of the water in the tank. The soil from above the tank didn't have an odor. Next, I visited the CAC. They had fans blowing in the basement. They were blowing from the front sump area to the open back door of the basement. Vapors in the front sump area were about 560 ppb, vapors in the basement sink room where new oil stains showed up were 1100 ppb, the first floor was about 190 ppb, the main floor was 140 ppb, and the third floor was about 200 ppb. I will call MILRO to have the front sump pumped out again. 3/15/06 - Raphael Ketani. I talked to Jose Ortiz of the CAC. He said that MILRO was there on monday to pump out the front sump, but they had to wait for 10 or 15 minutes before they could get into the basement. Mr. Ortiz said that everything was pumped out and the odors are slight throughout the

CHILDRENS ART CARNIVAL (Continued) **S107521874**

CAC. However, where the oil has been seeping through the floor in the basement sink room, the odors and the staining are getting worse. He said that no work is taking place at the church courtyard next door to investigate the tank and the oil. Kristina Lee (212) 883-7600, Chairman of the Health Committee of Community Board #9, called for an update. She said that she saw the exposed open tank in the church courtyard. I told her that the church brought a bunch of people to the site and they dug up and exposed the tank and then opened the tank. I told her DEC sent a letter ordering the church to continue the remediation by friday, 3/17, or the DEC will send in its own contractors. I told her the DEC will send a letter stating that we are taking over the investigation and cleanup if DEC hears or sees nothing happening. I added that we will get a court order to enter the property and then start the work. Ms. Lee said that the congregation meets every sunday at St. James Presbyterian Church. She added that on March 2, the NYC Dept. of Buildings fined the church $10,000 for not repairing the landmark building. SHE ASKED THAT A WELL BE PUT IN BETWEEN THE TANK AND THE NEIGHBOR'S GARDEN WALL AND ASKED THAT SHE BE KEPT INFORMED BY NEXT WEEK. I told her I would. 03/17/06-Thomas-Contract Payment Package-(Severn)- took samples-02/01/06-02/28/06 took sample of sump pit 01/01/06-01/31/06 03/17/06-Thomas_ Contract Payment Package-(Milro)- washed basement floor, took samples, removed pads, washed tank room, took borings, purge sumps (01/19/06-02/24/06). 3/20/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that the odors in the rest of the building are slight. However, the odors in the basement sink room are increasing and more oil staining is showing up in the floor. He said that the fans are ventilating the basement. I told him that I will call MILRO to have them suck up the water and oil from the middle and front sumps. I contacted MIRLO and they said they will be over at 9:30AM to pump out both sumps. 3/22/06 - Raphael Ketani. I FAXed the Standby Contractor Authorization Form to Severn Trent Labs (phone: (845) 562-0890; FAX: (845) 562-0841). 3/23/06 - Raphael Ketani. I received the bills from MILRO today for work done on 3/1 and 3/13/06. 03/24/06 Thomas- Contract Payment Package-(Milro)- vacuumed oil from sump pits, disposed of oil and water (03/03/06-03/13/06). 3/28/06 - Raphael Ketani. I sent a letter to Ms. Martin with the 3/24/06 remediation plan that MILRO had FAXed to me. I received a call from Bill Hunter of Utica Insurance, the insurance company for Robani Oil. This is the second time he called me for information. He wanted to know what the status was with the spill case. I explained to him what was going on at the church courtyard and what DEC wanted to do to eliminate the vapors and contaminated water under the CAC. 4/4/06 - Raphael Ketani. I received a call from Marlene Martin of the CAC on 4/3/06. She wanted to know what the total cost of the cleanup has been so far for the CAC. I told her a close estimate is $8710. She asked what the cost would be for the future/proposed work plan that I had sent her from MILRO. I told her I would find out. I called up Anthony at MILRO and he said he will try to get back to me with an approximate price. 2:30 Anthony Mariano of MILRO FAXed me the rough estimate of what it may cost for all of the construction work that would take place to: break open the concrete floor and suck out the contaminated soil, water and oil, repair the floor, install 2 access wells in the floor, power wash the floor, and paint with two part expoxy paint. The total came to $36,642.95. I informed Ms. Martin about the estimated amount. 3:50PM I sent an e-mailed letter to Lisa Silversmith, the owner of the property on the other side of the CAC.

CHILDRENS ART CARNIVAL (Continued) **S107521874**

I hadn't heard anything from her in response to the Department's 3/20/06 letter. So I sent her an e-mail to lisasilversmith@yahoo.com. The letter appears below: CONFIDENTIAL New York State Department of Environmental Conservation Division of Environmental Remediation, Region 2 Bureau of Spill Prevention and Response 47-40 21ST Street, Long Island City, NY 11101-5407 Phone: (718) 482-4933 " FAX: (718) 482-4098 Website: www.dec.state.ny.us April 4, 2006 Lisa Silversmith 60 Hamilton Terrace New York, NY 10031 RE: Spill #0511700 Childrens Art Carnival 62 Hamilton Terrace New York, NY Dear Ms. Silversmith: As of April 4, 2006, the New York State Department of Environmental Conservation (the Department) has not received a response to its March 20, 2006 letter regarding the property at 60 Hamilton Terrace (see attached below). It is important that the Department make an inspection to the basement of your property. We are aware that a spill had previously taken place at 60 Hamilton Terrace and was subsequently cleaned up and the case closed. The Department would like to determine that there are no impacts from the oil that is presently seeping into the Childrens Art Carnival next door. Temporary groundwater monitoring wells installed in the floor of your basement would help to collect any oil under your property. Please call me at (718) 482-4634 to make arrangements for the site inspection. Sincerely, Raphael Ketani Enigneering Geologist II 4/10/06 - Raphael Ketani. I spoke to Marvin Edwards of the CAC. He said that due to the rain last thursday, the odors in the sink room have gotten worse. However, he said, the odors in the rest of the basement are fine due to the ventilation and the odors in the building are slight. I told him that I would send over the vacuum truck to suck out more oil and water tomorrow. I told him to have someone at the CAC at 9AM so that MILRO can get in. He said he would do so. I asked him whether Ms. Martin was in. He said no. I called up Paul at MILRO and told him we would need his vac. truck at the CAC tomorrow. He said he would be there. 4/17/06 - Raphael Ketani. I spoke to Mr. Edwards. He said that the situation at the CAC is the same as last week with only slight odors in the occupied parts of the building and stronger odors in the basement. He said there was no flooding. I tried to contact Ms. Martin regarding MILRO's proposal, but could only leave a voice mail message. 4/24/06 - Raphael Ketani. I spoke to Mr. Edwards. He said that there are no changes at the CAC. He said the odors are the same - even in the basement. He said that there was no flooding from the 3 of rain over the weekend. However, the oil staining is slightly more in the basement. 5/15/06 - Raphael Ketani. I received the bills from MILRO for the work done on 3/21/06 and 4/11/06. I signed them and forewarded them for processing. 5/17/06 - Raphael Ketani. I spoke to Mr. Edwards today. He said the odors in the building were still only slight. He said the rains over the past weekend and week haven't caused any recurrence of oil seepage. He said the basement was fine. This case is being transfered today from myself to Jeff Vought in order to consolidate all of the PINS cases under one Spills case manager. 06/06/06-Vought-Received call from Marlene Martin requesting information on possibility of state funding for tank replacement. Marlene also said that basement flooded during past weekends with heavy rains and no free product was noted. 06/06/06-Vought-Complete File Review by Vought: See also spill numbers: 0209311(60 Hamilton Terrace-closed 12/22/05), 0551505(72 Hamilton Terrace-open). Sale of 72 Hamilton Terrace by City of New York to Nazareth Spiritual Church and resulting Deed transfer-4/20/72. Site visit on 1/11/05 by DEC Vought-DEC required:

1)tank testing results 2)notification to NYCDOH 3)installation of ventilation system in basement 4)sealing of sump and washing of basement floor. Vought left message with NYCDOH Nieves, spoke to Mike Hughes(NYSDOH) and decision to close is the call of Marlene Martin. Oil was first noted on 1/3/06 and basement filled with water during times of heavy rains. Three sumps present in basement of Childrens Art Carnival(CAC). Sump closed to Hamilton Terrace contained fresh #2 fuel oil. As per Marlene Martin, she contacted 60 Hamilton Terrace to see if they had spill and no spill was found in the basement and she contacted the Church who noted an oil spill next door at 72 Hamilton Terrace. Email from NYSDOH Hughes to NYCDOH Peter Stallbohm with cc to NYCDOH Nieves- How did you inspectors make out at the 64 Hamilton Terrace spill? . Email from NYSDOH Hughes to NYCDOH Stallbohlm and DEC Vought-1/18/06. ...any updates about the Childrens Center in Manhattan? Have they re-opened, cleanup status? . Response from Stalbohlm At 64 Hamilton Terrace, readings of 4-5ppm of VOC was detected. A contractor was contracted to conduct a cleanup yesterday. The center voluntarily closed until so. After cleanup, another visit will be made to check effectiveness of cleanup (possibly today). Email from NYSDOH Hughes to DEC Vought-1/19/06. Peter Stallbohlm, NYCity Health, sent an inspector back to the Children's Center on Tuesday, 1/17. The inspector reported odors are still present... Fuel product still present in basement. The center is still closed and NYCity Health recommends staying closed until the additional clean-up is performed. Would you be able to also make a site visit and recommend some specific actions as well? . Letter from DEC Ketani to Kira-Leid King (Nazareth Deliverance Church NDC)-1/19/06. The New York State Department of Environmental Conservation (the Department) was notified on January 10, 2006 that a petroleum release took place at the above referenced site. Odors were noticed coming from the basement of the church during an inspection of the area on January 11, 2006. Staff from the Department were at the site on January 14, 2006 to observe the removal of No. 2 fuel oil by Northeast Environmental from Nazareth Deliverance Church . (6/6/06-Note that I, jeff Vought was onsite and liquid was recovered from basement when I arrived on-site, I did not observe oil in the basement as the liquid was already recovered). The Department has identified the Nazareth Deliverance Church as a potential responsible party for this release . Letter required submission of an investigative summary report including the investigation of a possible third tank under the church courtyard. The piping associated with the two 275-gallon tanks in the basement must also be evaluated for tightness . If no reply regarding the investigation is received from the Nazareth Deliverance Church within (5) days of receipt of this letter the Department may proceed with the required work... . Letter from DEC Ketani to CAC Martin-1/19/06. The Department has identified the Childrens Art Carnival as a potentially responsible party for this release . Notification that the Departrment has contracted Milro and will invesigate the source of oil. Upon one of the inspections of the Childrens Art Carnival, staff from the Department noticed a three foot long piece of suction line at the foot of the stairs of the basement. The Department requires that the Childrens Art Carnival immediately conduct a site investigation to determine why the line was replaced, whether there was a release of product and how large the release was, when the suction line was replaced and which company did the replacement work. The Childrens Art Carnival must also hire a contractor to have the suction line and return line (the two 3/4 inch

copper lines) pressure tested . Letter from DEC Ketani to CAC Martin-1/23/06. ...the Department was notified on January 20, 2006 that a tank system test was conducted by AL Eastmond & Son, Inc. on this date and that a leak was detected in the tank and vent line. At this time, the Department is ordering the Childrens Art Carnival to repair or replace the tank and the vent pipe, and to hire a contractor to investigate the oil spill and remove all contaminated concrete flooring, soil and rock and all product and contaminated water . Letter from Marlene Martin (CAC) to DEC Ketani-1/27/06. To date we have cooperated with the Department of Environmental Conservation on all requests, recommendations and mandates. Enclosed, please find the job tickets for work performed by Eastmond and Sons, Inc. as per your Department's madates and directives. It is our hope that a resolve can be reached as soon as possible and or that the Carnival can be eliminated as the potential source of this release... Enclosed as Eastmonds & Sons job tickets: 1)1/11/06- Removed 50 bags of contamianted soil washed floor, 1 bucket of oil wash, removed 102 gallons of water, pressure washed floor 2)1/18/06- pump out oil and water from floor also wash down used 1x5 gallon can oil wash 3)1/20/06- Test tank, tank failed, wet leak 4)1/23/06- transfer oil to 275. Remove jacket and remove 30 bags of contaminated soil. Job completed 5)1/24/06- Install 275-gallon temporary . Contractor Work Authorization Form for Milro-2/2/06. Email from Landmarks Preservation Comission(LPC 212-669-7921)-John Weiss to DEC Ketani-02/10/06. Under the circumstances you described to me, no permit from the Landmarks Preservation Comission is needed for the NYSDEC contractor to break up the concrete paving in the courtyard next to 72 Hamilton Terrace in order to undertake and emergency remediation project . Because this work is being undertaken to remedy a dangerous condition, pursuant to section 25-312 of the NYC Administrative Code, no LPC permit is needed. No work is to be performed on 72 Hamilton Terrace . Fax from Kira-Leid King(NDC) to DEC Ketani-2/11/06. As discussed, attached please find a search from the fire department indicating that there are only two tanks located at the above-referenced premises. Therefore, there isn't another tank located in the court yard . The Church had a fire four years ago causing the building to be inhabitable . Letter from DEC Ketani to Leid-King (NDC)-2/10/06. ...the Department has not been notified by Lindsay Lindos or other representatives from the Nazareth Deliverance Spiritual Church, that the church will hire a company to conduct a site investigation to determine whether a fuel oil tank is present under the church courtyard. Deadline of 2/18/06 given to investigate the court yard. Email from LPC Weiss to DEC Ketani-2/22/06. I am writing in response to our recent telephone conversation regarding the possibility that the historic wrought iron fence in front of the side yard at 72 Hamilton Terrace may have to be removed in an oil tank has to be removed. Suggestion to take the tank out in pieces to save the fence. If fence has to be removed it also has to be replaced. Letter from DEC Ketani to Lindos Lindsay(NDC) and Kira Leid-King(NDC)-3/10/06. Site visit made by Department on 2/10/06. ...a third fuel tank was observed to be present beneath the courtyard behind the Nazareth Deliverance Church. Department required NDC to perform a soil boring between the foundation wall of the Childrens Art Carnival at 62 Hamilton Terrace and the tank, and taking soil and groundwater samples. Another boring must be installed between the tank and the church. Deadline given for nine days within date of letter (2/19/06) to respond to DEC and resume investigation of tank
