New York, NY 10039

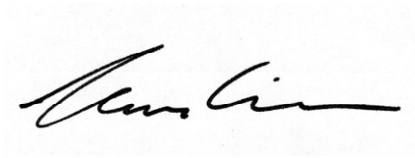
Re: Phase I Environmental Site Assessment
2803-2805 Frederick Douglas Boulevard, New York, New York 10039
AKRF Project Number: 12310

Dear Mr. Punter,

AKRF, Inc. is pleased to submit this Phase I Environmental Site Assessment Report for the above-referenced Property. This report includes the findings of a reconnaissance of the Property, an evaluation of readily available historical information and selected environmental databases and electronic records. AKRF, Inc. met the requirements of American Society for Testing and Materials (ASTM) as established by ASTM Standard E1527-13 unless noted otherwise in Section 9.0: "Limitations and Data Gaps".

We appreciate the opportunity to provide you with our services. If you should have any questions, please do not hesitate to contact us.

Sincerely,
AKRF, Inc.



Marcus Simons
Senior Vice President

EXECUTIVE SUMMARY

AKRF, Inc. (AKRF) was retained by Harlem Congregations for Community Improvement (HCCI) to perform a Phase I Environmental Site Assessment (ESA) of 2803-2805 Frederick Douglas Boulevard in New York, NY (Manhattan Tax Block 2045, Lots 89 & 90) (the "Property"), an approximately 3,990-square foot vacant Property in the Bradhurst section of Manhattan, as shown on Figures 1 and 2. The surrounding area consisted of mixed residential and commercial uses, with some parkland, medical facilities, and religious centers.

Between 1893 and 1909, the Property was developed with two five-story residential and commercial buildings with basements. By 1991, the southern (2803) building was vacant and demolished in 1992 or 1993. In 1996, the northern (2805) building was demolished. The Property has since remained vacant.

This Phase I Environmental Site Assessment was performed in conformance with ASTM Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice*. Any exceptions to, or deletions from, the Standard are described in Section 8.0. The term "Recognized Environmental Condition" (REC) means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The Standard also includes definitions of Historic REC, Controlled REC and *De Minimis* Condition.

A Tier 1 Vapor Encroachment Screen was also conducted in accordance with ASTM Standard E2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. The term "Vapor Encroachment Condition (VEC)" means the presence or likely presence of vapors from chemicals of concern (COC) in the subsurface of a property caused by the release of vapors on or near the property.

This assessment revealed the following:

Recognized Environmental Conditions (RECs)

- Historical Sanborn maps showed a laundry (which may have included dry cleaning) at 2803 Frederick Douglass Boulevard throughout the building's history. City Directory listings also identified a rubbish removal business at this address in 1947, and a laundry at 2805 Frederick Douglass Boulevard in 1993. No regulatory database listings potentially associated with dry cleaning were identified for the Property.
- Computerized NYC Buildings Department (DOB) records included a 1958 oil burner application for 2805 Frederick Douglass Boulevard, likely associated with a fuel oil tank used for heating. No tanks were registered at the Property with the New York State Department of Environmental Conservation (NYSDEC). No evidence of petroleum storage tanks was noted during the reconnaissance, but it is likely the tank would have been located in the basement rather than buried underground. The tank was likely removed but may remain beneath the Property.
- Nearby historical off-site uses with some potential to affect the Property included: boiler repair at the west-adjacent building; dry cleaners and laundries (potential dry cleaners); and a cutlery sharpening business, which may have utilized solvents.

Non-REC on-site environmental concerns (items outside the scope of E1527-13 like ACM, LBP and/or PCBs in building materials or fill/debris)

- If demolition debris from historical structures is present beneath the Property, it may contain ACM, PCB-containing equipment, mercury-containing lighting fixtures, and/or lead-based paint.

Potential for Vapor Encroachment

This Phase I assessment identified a potential for subsurface vapors (associated with potential on-site dry cleaning and/or petroleum storage) and thus a potential for vapor encroachment into future buildings at the Property, based on the RECs noted above.

RECOMMENDATIONS

- Subsurface conditions beneath the Property may have been affected by past or present, on- or off-site uses. AKRF recommends a subsurface investigation involving the collection and laboratory analysis of subsurface samples prior to Property redevelopment. It is possible that this investigation may uncover evidence of a petroleum spill or other situation reportable to NYSDEC and/or other regulatory agencies.
- If redevelopment activities requiring soil disturbance are conducted, all excavated soil should be managed in accordance with applicable regulatory requirements. All soil and any other materials intended for off-site disposal should be tested in accordance with the requirements of the intended receiving facility. Transportation of material leaving the Property for off-site disposal should be in accordance with federal, state and local requirements covering licensing of haulers and trucks, placarding, truck routes, manifesting, etc. If contaminated soil or underground storage tanks are discovered at the Property, they should be removed and disposed of in accordance with applicable regulatory requirements, including those relating to tank registration and spill reporting, if necessary. Any evidence of a petroleum spill should be reported to NYSDEC and addressed in accordance with applicable requirements.
- If dewatering is required during future construction activities, water must be discharged in accordance with New York City Department of Environmental Protection (NYCDEP) requirements.
- If demolition debris containing any suspect ACM, PCB-containing electrical equipment, or fluorescent lighting fixtures is encountered beneath the Property, such materials must be properly handled and disposed of in accordance with the applicable regulations.
- Any activities with the potential to disturb lead-based paint must be performed in accordance with applicable requirements (including federal Occupational Safety and Health Administration regulation 29 CFR 1926.62 - *Lead Exposure in Construction*).

1.0 INTRODUCTION

AKRF, Inc. (AKRF) was retained by Harlem Congregations for Community Improvement (HCCI) to perform a Phase I Environmental Site Assessment (ESA) of 2803-2805 Frederick Douglas Boulevard in New York, NY (Manhattan Tax Block 2045, Lots 89 & 90) (the "Property"). At the time of the reconnaissance, the approximately 3,990-square foot Property was a vacant lot in the Bradhurst section of Manhattan as shown on Figures 1 and 2. The surrounding area consisted of mixed residential and commercial uses, with some parkland, medical facilities, and religious centers.

The scope of services for this assessment was in conformance with ASTM Standard E1527-13 (*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice).* Any exceptions to, or deletions from, this practice are described in Section 8.0. The scope included the following:

- Observations of the Property (reconnaissance) to identify potential sources or indications of hazardous substances, including: aboveground storage tanks (ASTs); underground storage tanks (USTs); tank vents and fill ports; transformers and other items that could contain polychlorinated biphenyls (PCBs), drums or areas where hazardous materials were used, stored, or disposed; stained surfaces and soils; stressed vegetation, leaks, odors. In addition, neighboring properties were viewed, but only from public rights-of-way, to identify similar concerns.
- Readily available geological and groundwater (hydrogeological) information was evaluated to assist in determining the potential for contamination migration (including in soil, soil vapor, and/or groundwater) within, from, and onto the Property.
- The reconnaissance of the Property included observation of any readily visible suspect asbestos-containing materials (ACMs) and potential lead-based paint. However, no samples were collected or analyzed, and this reconnaissance provides neither definitive nor exhaustive information.
- A state database of county-level radon concentrations was used to determine typical indoor radon levels and compare them to United States Environmental Protection Agency (USEPA) guidelines.
- Historical fire insurance maps, topographic maps, and aerial photographs for the Property and nearby properties were reviewed to evaluate historical land uses.
- The following federal regulatory databases were reviewed to determine the regulatory status of the Site and properties within the ASTM-specified radii: National Priority List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); Emergency Response Notification System (ERNS); Toxic Chemical Release Inventory System (TRIS); the Permit Compliance System of Toxic Wastewater Discharges (WWD); the Air Discharge Facilities Index (ADF) the USEPA Civil Enforcement Docket. The federal listing of facilities which are subject to corrective action under the Resource Conservation and Recovery Act (CORRACTS) is discussed with the State databases of RCRA listings.
- The following state regulatory databases were reviewed to determine the regulatory status of the Property, adjacent properties, and properties within a predetermined study area; the listings of hazardous material spills (SPILLS); Resource Conservation and Recovery Act Notifiers (RCRA); Chemical Bulk Storage (CBS); Solid Waste Facilities (SWF); Petroleum Bulk Storage (PBS); State Inactive Hazardous Waste Disposal Sites (SHWS); Major Oil Storage Facilities (MOSF); Brownfield Sites; and Historic Utility Sites.

- Local agency reviews including NYC Fire Department records (obtained as part of the database search), online Buildings and Finance Departments records, and Environmental Quality Review (CEQR) E Designation Sites were conducted for the Property only.

2.0 PHYSICAL SITE DESCRIPTION

Visual assessment of the Property and adjacent areas was performed on January 28, 2020 by Mr. Evan Venice of AKRF. Site access was not granted and observations were only through the chain link fence surrounding the Property. The weather was overcast and approximately 40° F, and the visibility generally good. The Property was inspected from the surrounding sidewalk for the presence of stained surfaces, storage tanks, drums, leaking pipes, transformers, suspect asbestos-containing materials (ACMs), suspect lead-containing paint, distressed vegetation, and any other evidence of hazardous material usage and storage on-site. Photographs documenting the Property inspection are included in Appendix A.

2.1 General Site Conditions

The Property comprised an approximately 3,990-square foot vacant lot with sparsely vegetated dirt areas. A potential groundwater monitoring well point was observed within the 2803 portion. Debris included bricks and concrete, as well as household garbage. The Property was surrounded by a chain link fence with a locked gate. A fence also divided the two lots.

No staining or evidence of a spill/release was noted.

2.2 Topography and Hydrogeology

Topography at the Property was observed to be generally level. Based on the 2013 U.S. Geological Survey (USGS) Central Park, NY - NJ Quadrangle map, the Property is approximately 20 feet above the National Geodetic Vertical Datum of 1988 (an approximation of mean sea level). The Property block was located immediately east of Jackie Robinson Park, which sloped steeply downward to the southeast and included bedrock outcrops. Based on USGS mapping, bedrock elevation in the vicinity of the Property is highly variable, but bedrock beneath the Property is anticipated to be approximately 20 to 40 feet below grade.

Groundwater is anticipated to be approximately 20 feet below grade (potentially at the surface of bedrock), and is assumed to flow in a southeasterly direction, based on local topography. However, actual groundwater flow can be affected by many factors including subway tunnels, underground utilities, and other factors beyond the scope of this study. Groundwater in Manhattan is not used as a source of drinking water.

2.3 Storage Tanks

2.3.1 Underground Storage Tanks (USTs)

During the Property inspection, no evidence, such as manways, vent pipes, or dispenser equipment, was observed that would indicate past or present USTs at the Property. Regulatory records did not indicate any USTs on the Property. However, computerized NYC Buildings Department (DOB) records included a 1958 oil burner application for 2805 Eighth Avenue/Frederick Douglass Boulevard, likely associated with a fuel oil tank. The records did not indicate whether the associated tank was aboveground or underground, but if underground, it may have been removed, or may remain beneath the Property.

Off-site USTs are discussed in Section 5.2.2.

2.3.2 Aboveground Storage Tanks (ASTs)

No evidence, such as tanks or vaults likely to contain tanks, vent pipes or fill caps was observed during the reconnaissance to indicate that ASTs are or were present. No records pertaining to ASTs were identified in the regulatory database.

However, as noted above, computerized DOB records included a 1958 oil burner application for 2805 Eighth Avenue/Frederick Douglass Boulevard, likely associated with a fuel oil tank. The records did not indicate whether the associated tank was aboveground or underground. If aboveground in the basement (as is more likely), it was likely removed during building demolition.

Off-site ASTs are discussed in Section 5.2.2.

2.4 Polychlorinated Biphenyls (PCBs) and Mercury

Until 1979, polychlorinated biphenyls (PCBs), which provided beneficial insulating properties, were used in a variety of products, in particular electrical equipment such as transformers, capacitors, fluorescent light fixtures, and voltage regulators, but also in hydraulic fluids and some other products such as caulking.

Based on the age of the former buildings (constructed by 1909, according to historical land use maps), any electrical equipment, caulk, hydraulic equipment, and lighting fixtures, switches and thermostats within any subsurface debris at the Property may include PCB- or mercury-containing components.

2.5 Lead-Based Paint

Lead-based paint was generally not used inside residential buildings after 1960 in NYC. Based on the age of the former buildings, lead-based paint may be present in any subsurface debris at the Property. Any activities with the potential to disturb lead-based paint must be performed in accordance with the applicable Occupational Safety and Health Administration regulation (OSHA 29 CFR 1926.62—Lead Exposure in Construction).

2.6 Utilities

No utility connections were observed on the Property. The surrounding area was supplied with electricity and natural gas by Consolidated Edison (Con Ed), and was connected to the New York City municipal water and sanitary/storm sewer systems.

2.7 Waste Management and Chemical Handling

The Property is vacant; however, debris and apparent dumping was observed on the Property. Debris included bricks and household garbage.

2.8 Radon

Radon is a colorless, odorless radioactive gas that results from the natural breakdown of uranium minerals in soil, rock, and water, which subsequently enters the atmosphere. It can concentrate in buildings, entering through cracks and other penetrations of a building foundation. Some areas are more likely to have elevated concentrations of radon than others, reflecting subsurface lithologic conditions.

The New York State Department of Health (NYSDOH) maintains a database of radon test results on a local and county level. According to NYSDOH, 124 radon tests were conducted in Manhattan in October 2019. The average basement radon level was found to be 2.07 picoCuries per liter (pCi/L), below the USEPA recommended action level of 4.0 pCi/L.

3.0 ASBESTOS-CONTAINING MATERIALS (ACM)

Asbestos refers to a group of natural minerals that provide good fire resistance and insulation. Asbestos is also commonly found in vinyl flooring, plaster, sheetrock, joint compound, ceiling tiles, roofing materials, gaskets, mastics, caulks and other products. Materials containing more than one percent asbestos are considered asbestos-containing materials (ACM). ACM are classified as either friable (i.e., more readily release fibers, such as most spray-applied fireproofing) or non-friable (such as floor tiles).

ACM may be present in any subsurface debris associated with the former Property buildings.

4.0 ADJACENT LAND USE

The Property was abutted to the north and west by mixed-use commercial/residential buildings; to the east by Frederick Douglass Boulevard followed by additional commercial/residential structures; and to the south by West 149th Street followed by commercial/residential buildings. The surrounding area was primarily residential and commercial, with public schools and parks.

5.0 PROPERTY HISTORY AND RECORDS REVIEW

5.1 Prior Ownership and Usage

5.1.1 Historical Land Use maps

Historical insurance maps were reviewed for indications of uses (or other evidence) suggesting hazardous materials generation, usage, or disposal on or near the Property. Specifically, Sanborn Fire Insurance Maps from 1893, 1909, 1928, 1939, 1950, 1968, 1976-1981, 1983-1989, 1991-1996, and 2001-2005 were reviewed.

1893

The Property was a vacant portion of a city block.

The remainder of the Property block was also vacant. The surrounding blocks consisted of sparse dwellings and vacant land.

1909

The Property was developed with two five-story commercial and residential buildings with basements. The southern building (2803 Frederick Douglass Boulevard) contained a laundry. The northern building (2805 Frederick Douglass Boulevard) contained a pharmacy.

The Property block contained additional five-story residential buildings with storefronts to the north and northwest. A laundry and a paint shop were identified on the south-adjacent block. A tinsmith and a paint shop were identified on the southeast-adjacent block. A laundry was shown two blocks north of the Property. The construction department of the Metropolitan Street Railway Company was shown two blocks to the northeast. The surrounding area was more densely developed compared to the 1893 map. Colonial Park was shown one block to the west.

1928

The Property and surrounding area were indiscernible due to lack of detail in this map.

1939

The Property remained similar to the 1909 map.

The Property block contained additional five-story residential buildings with storefronts to the north and northwest, with the remainder of the block to west now occupied by additional residential buildings. The Manhattan Railway overhead rail line was shown to the east of the Property, along Frederick Douglass Boulevard. The laundry, paint shops, and tinsmith shown to the south and southeast of the Property on the 1909 map were no longer present. The former construction department of the Metropolitan Street Railway Company, shown northeast of the Property on the 1909 map, was labeled as an ice-making plant. A garage with a 1,000-gallon gasoline UST was shown two blocks to the southeast. The surrounding area was more densely developed compared to the 1909 map.

1950

The Property remained similar to the 1939 map. No significant changes from the 1939 map were noted in the surrounding area.

1968

The Property remained similar to the 1950 map.

A dry cleaner was shown approximately 260 feet south of the Property, at the intersection of West 148th Street and Eighth Avenue. The former ice-making plant two blocks to the northeast was replaced with a multistory residential building and a church. No further significant changes from the 1939 map were noted in the surrounding area.

1976

The Property remained similar to the 1968 map. No significant changes from the 1968 map were noted in the surrounding area.

1977

The Property remained similar to the 1976 map.

The dry cleaner shown south of the Property on the 1968-1976 maps had been demolished. No further significant changes from the 1968 map were noted in the surrounding area.

1979-1980

The Property remained similar to the 1979 map. No significant changes from the 1979 map were noted in the surrounding area.

1981

The Property remained similar to the 1979-1980 maps.

Several buildings in the surrounding area had been demolished. No further significant changes from the 1979-1980 maps were noted in the surrounding area.

1983

The Property remained similar to the 1981 map.

Two blocks northeast of the Property were not shown on the 1983 map. No significant changes from the 1981 map were noted on the depicted blocks in the surrounding area.

1986-1992

The Property remained similar to the 1983 map.

Several buildings in the surrounding area had been demolished. No further significant changes from the 1983 map were noted in the surrounding area.

1993

The southern Property building (2803 Frederick Douglass Boulevard) had been demolished. The northern Property building remained similar to the 1986-1992 maps.

No significant changes from the 1986-1992 maps were noted in the surrounding area.

1994-1996

The Property remained similar to the 1993 map. No significant changes from the 1993 map were noted in the surrounding area.

2001

The northern Property building (2805 Frederick Douglass Boulevard) had been demolished, so that the entire Property was vacant.

Several buildings on the east-adjacent block were labeled as vacant. A police station was shown two blocks to the southeast. No further significant changes from the 1994-1996 maps were noted in the surrounding area.

2002-2005

The Property appeared similar to the 2001 map. No significant changes from the 2001 map were noted in the surrounding area.

In summary, historical Sanborn maps indicated that between 1893 and 1909, the Property was developed with two five-story residential and commercial buildings with basements. The southern building was noted to contain a laundry (which may have included dry cleaning), and the northern building was noted to contain a pharmacy, throughout their history. In 1993, the southern Property building was demolished and between 1996 and 2001, the northern Property building was demolished. The Property has since been vacant.

The surrounding neighborhood was mixed-use throughout its history, with commercial and residential buildings, churches, and parkland. Between 1909 and 1996, several dry cleaners, laundries (potential dry cleaners), paint shops, a tinsmith, and a facility with a gasoline UST were shown on nearby blocks, but in anticipated cross-gradient or downgradient groundwater flow directions relative to the Property. The nearest dry cleaner was approximately 260 feet to the south.

5.1.2 Aerial Photographs

Since historical fire insurance maps were available for the Property (and surrounding area) and these maps included information relating to land use, aerial photographs would, most likely, not provide additional useful information relevant to the potential for recognized environmental conditions or other environmental concerns. As such, aerial photographs were not reviewed.

5.1.3 Property Tax Files and Zoning Records

Based on NYC Department of City Planning's Zoning and Land Use Map (ZoLa), the Property is zoned as R7-2 (Residential) and C1-4 (Commercial Overlays).

5.1.4 Local Street Directories

A City Directory prepared by Environmental Data Resource, Inc. was reviewed as part of this Phase I ESA. The City Directory consisted of the names of businesses located on-site and in adjacent properties, compiled from city and reverse telephone directories at approximately five-year intervals starting in 1920. No records prior to 1920 were found. The following alternate addresses were associated with the Property: 2803-2805 Eighth Avenue, 2803-2805 Frederick Douglass Boulevard, and 301 West 149th Street.

The following records were identified for the Property:

- Residential uses at 2803 Eighth Avenue/2803 Frederick Douglass Boulevard/301 West 149th Street in 1920-1973;
- Commercial uses (stores and eateries) at 2803 Eighth Avenue/2803 Frederick Douglass Boulevard/301 West 149th Street in 1927-1988.

A "Montgomery D&T Rubbish Removal" was listed at this building in 1947. Although a laundry was shown at this building on the historical Sanborn maps, no laundry was identified in City Directory listings;

- Residential uses at 2805 Eighth Avenue/Frederick Douglass Boulevard in 1920-1988; and
- Commercial uses (Our First Laundromat, stores, and a pharmacy) at 2805 Eighth Avenue/ Frederick Douglass Boulevard in 1923-1993. The pharmacy was listed in 1923-1968. The laundromat was listed in 1993.

The City Directory search identified nearby off-site listings with some potential to have affected subsurface conditions beneath the Property, including: Montgomery D&T Rubbish Removal (1950-1958) and Carlton Boiler Repair (2010) at 303 West 149th Street (the west-adjacent building); Eighth Avenue Laundromat (a potential dry cleaner) at 2809 Eighth Avenue, approximately 60 feet north of the Property, in 1973-1978; De Witt Cleaners & Dyers (1934) and Moy G.S. Laundry, a potential dry cleaner (1956-1968), at 2810 Eighth Avenue, approximately 90 feet east of the Property; DeWitt Cleaners & Dyers/Belma Cleaners & Dyers at 2812 Eighth Avenue, approximately 90 feet east of the Property, in 1938-1963; Flash Cleaners at 2813 Eighth Avenue, approximately 100 feet north of the Property, in 1963-1968; Argust Cleaners (1950-1958), paint shops (1934-1958), and a rubbish and ash removal service (1938) at 2793 Eighth Avenue, approximately 140 feet to the southwest; and Brooklyn Cutlery & Sharpening (1988-1998).

Copies of the City Directory listings are provided in Appendix C.

5.1.5 Recorded Land Title Records

Copies of title records were not provided to AKRF for review. A review of computerized New York City Automated City Register Information System (ACRIS) records, which included records of financial transactions involving the Property, identified no environmental liens for the Property.

5.2 Regulatory Review

Regulatory database information, as shown in Appendix D, was obtained from EDR, Inc. of Shelton, CT. The Introduction of Appendix D includes summaries of the databases searched, their radii around the Property and limitations of the data. The databases searched and associated radii were consistent with ASTM E1527-13.

5.2.1 Federal

The federal databases searched included the National Priority List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); Superfund Enterprise Management System Archive (SEMS-ARCHIVE); Emergency Response Notification System (ERNS); Toxic Chemical Release Inventory System (TRIS); and Federal Institutional Control/Engineering Control Registries. The federal listing of facilities which are subject to corrective action under the Resource Conservation and Recovery Act (CORRACTS) is discussed with the State databases of RCRA listings.

National Priority List (NPL)

The NPL is the USEPA's compilation of some sites that probably remedial action under the Superfund Program. NPL sites can pose a significant risk of stigmatizing surrounding properties and thus impacting property values.

The Property was not identified in the NPL database.

One NPL site was identified within a one-mile radius of the Property. The Hudson River PCBs site, located approximately 4,140 feet west of the Property. The Property was also identified in the SEMS database. Based on the distance from the Property, the NPL site would not be expected to have affected subsurface conditions at the Property.

Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)

CERCLIS is a compilation of sites which the USEPA has investigated, or plans to investigate, pursuant to the Superfund Act of 1980 (CERCLA). As such, some of these sites may ultimately present concerns and others may not (but could still pose a perceived threat, thus affecting property values).

No CERCLIS sites were identified within a ½-mile radius of the Property.

SEMS-ARCHIVE (Superfund Enterprise Management System Archive)

This database tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time.

No SEMS-Archive sites were identified within a ½-mile radius of the Property.

Emergency Response Notification System (ERNS)

This federal database, compiled by the Emergency Response Notification System, records and stores information on certain reported releases of petroleum and other potentially hazardous substances.

No ERNS listings were identified as potentially located on the Property in the database information.

Toxic Chemical Release Inventory System (TRIS)

The TRIS contains information reported by a variety of industries on their annual estimated releases of certain chemicals.

No TRIS sites were identified within a ⅛-mile radius of the Property.

Federal Institutional Control/Engineering Control Registries

These registries are listings of sites with engineering and institutional controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site.

The Property was not listed in the Federal Institutional Control/Engineering Control Registries database.

5.2.2 State

The state records reviewed included listings of hazardous material spills; Resource Conservation and Recovery Act (RCRA) Notifiers; Chemical Bulk Storage (CBS); Solid Waste Facilities (SWF); Petroleum Bulk Storage (PBS); State Inactive Hazardous Waste Disposal Sites (SHWS); State Hazardous Substance Waste Disposal Sites (SHSWDS); Major Oil Storage Facilities (MOSF); Brownfield Sites; Environmental Restoration Program (ERP) sites; Voluntary Cleanup Program (VCP) sites, and Brownfield Cleanup Program (BCP) sites.

New York SPILLS Database

This database includes releases reported to the NYSDEC, including tank test failures (for USTs only) and tank failures.

The Property was not listed on the Spills database. A total of 381 spills were reported within a ½-mile radius of the Property, including 80 LTANKS and 301 NY Spills sites.

Most listings were for small quantities of recovered material identified in manholes, vaults, and service boxes on the surrounding intersections, or materials abandoned on vacant properties or along the road. Recovered materials included petroleum, dielectric fluid, and lead waste. Based on listing details, including nature of the spills, distance from the Property, and/or inferred groundwater flow direction, the identified spill listings would not be expected to have significantly affected subsurface conditions at the Property. Details from all spills are included in Appendix D.

Resource Conservation and Recovery Act (RCRA) Notifiers Listings

This database lists sites that have filed notification forms regarding hazardous waste activity, including: treatment, storage and disposal facilities (TSDs); small-quantity (SQG) and large-quantity generators (LQG); and transporters regulated under RCRA. The discussion below includes any CORRACTS listings of facilities that are subject to corrective action under RCRA.

No CORRACTS sites were listed within a one-mile radius of the Property. No TSD facilities were listed within a one-half mile radius of the Property, and no RCRA Generators/Transporters were reported within a ⅛-mile radius of the Property. Thirty-three RCRA non-generators were reported within a ⅛-mile radius of the Property. The Property was not listed as a RCRA generator (or non-generator) of hazardous wastes. One facilities with some potential to have affected the Property, based on listing details and its nearby location was:

- Norfolk Cleaners, located at 2818 Eighth Avenue, approximately 200 feet northeast of the Property, was listed as a non-generator in 1999 and 2006, but was an SQG of chlorinated solvents in 1990.

Based on their locations or listing details (i.e., waste type), the remaining listed RCRA facilities, which were generally Con Edison listings associated with utility structures near the Property, are not anticipated to affect the Property (releases within utility vaults tend to be contained within the vaulted structures).

Chemical Bulk Storage (CBS) Database

The New York CBS is a list of facilities that store regulated non-petroleum substances in aboveground tanks with capacities greater than 185 gallons and/or in underground tanks of any size.

No CBS facilities were listed within a ⅛-mile radius of the Property.

Solid Waste Facilities (SWF)

This database includes certain landfills, incinerators, transfer stations, recycling centers, and other sites which manage solid waste.

No Solid Waste Facilities were identified within a ½-mile radius of the Property.

Petroleum Bulk Storage (PBS) Database

This database lists facilities that registered having either aboveground or underground petroleum tanks with total storage exceeding 1,100 gallons. Facilities with more than 400,000 gallons appear on the Major Oil Storage Facilities (MOSF) database (see below).

The Property was not identified in the PBS database. A total of 46 PBS facilities were identified within a ⅛-mile radius of the Property. Details of nearby facilities with some potential to affect the Property, based on listing details and/or location, are given in Table 1.

Table 1
Area Petroleum Bulk Storage Facility Data

Location	Capacity (gallons)	Product Stored	Status	Distance/Direction from Property
305-7 West 149th Street	3,500 AST 2,000 AST	No. 2 Fuel Oil No. 2 Fuel Oil	Closed-Removed In Service	40 feet northwest
2799 Eighth Avenue	2,000 UST	No. 2 Fuel Oil	In Service	65 feet south
300 West 149th Street	2,000 UST	No. 2 Fuel Oil	In Service	70 feet south
302 West 149th Street	3,000 AST	No. 2 Fuel Oil	Closed-In-Place	95 feet west-southwest

Notes: AST - aboveground storage tank
UST - underground storage tank

Although no spills with significant potential to affect the Property were reported for these facilities, potential undocumented releases may have affected subsurface conditions beneath the Property. Based on listing details, distance from the Property, and/or inferred groundwater flow direction, other listed PBS facilities would not be expected to have affected the Property subsurface. Details of the additional PBS facilities located within ¼ mile of the Property are included in Appendix D.

State Inactive Hazardous Waste Disposal Site Registry (SHWS)

This program (also known as State Superfund) lists information regarding a variety of sites likely requiring cleanup.

Two State Inactive Hazardous Waste Disposal Sites were reported within a one-mile radius of the Property. Based on listing details and distance from the Property (over 1,000 feet away), these facilities are not anticipated to have affected environmental conditions at the Property.

State Hazardous Substance Waste Disposal Site Study (SHSWDS)

This database tracks certain sites that were not listed on SHWS, but may still require investigation and/or cleanup.

No SHSWDS facilities were identified within a ½-mile radius of the Property.

Major Oil Storage Facilities (MOSF) Database

These facilities have petroleum storage of 400,000 gallons or more.

No Major Oil Storage Facilities were reported within a ½-mile radius of the Property.

Environmental Restoration Program

These sites (which are generally municipally-owned) are receiving New York State funding for site investigation and remediation. Some sites in this program have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present.

No ERP sites were identified within a ½-mile radius of the Property.

Voluntary Cleanup Program/Brownfield Cleanup Program

The Voluntary Cleanup Program (VCP) is a NYSDEC program for investigation and remediation of (generally) privately-owned sites. Some sites in this program have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present. The Brownfield Cleanup Program (BCP) program is the successor to the Voluntary Cleanup Program. Again, some sites have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present.

No BCP sites were listed within ½-mile of the Property. Two VCP sites were identified within ½-mile of the Property. Based on listing details and distance from the Property (over 1,000 feet away), these facilities are not anticipated to have affected environmental conditions at the Property.

New York City (E) Designation Site Listing

A New York City (E) designation for a property requires that the owner conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the New York City Office of Environmental Remediation (NYCOER) before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements).

The Property was not assigned an E-designation according to the database information.

Registered Dry Cleaners/EDR US Historic Cleaners

The registered dry cleaners database was researched to identify listings within one-quarter mile of the Site. As a supplement to the registered dry cleaners database, EDR's proprietary listing of potential drycleaner sites (listings based on the opinion of EDR) was also reviewed.

The Property was not listed in the EDR US Historic Cleaners database. Four Registered Dry Cleaners sites were listed within a one-half mile radius of the Property, and 7 Historic Cleaners were listed within a ⅛-mile radius of the Property.

Details of the closest Registered Dry Cleaners/EDR US Historic Cleaners facility, with some potential to have affected the Property subsurface are:

- Norfolk/Champion Cleaners/Dawn's Cleaners, located at 2818 Eighth Avenue, approximately 200 feet northeast of the Property, was listed as a drop shop (i.e., a dry cleaner which does not conduct cleaning on-site) and a "cleaner's agent" in 1990-2003. However, this facility was identified in the RCRA database as a generator of chlorinated solvents in 1990.

Based on the listing details, distance, and/or assumed groundwater flow direction, the remaining listings are not likely to have affected subsurface conditions at the Property.

5.2.3 Local Agency File Review

Records available online from the New York City Fire, Buildings, and Finance Departments were viewed for the Property. Since the records typically address a multitude of issues, the review focused on items likely to relate to the potential presence of hazardous materials, e.g., petroleum tank installation applications and permits, and records indicating prior uses. Copies of other pertinent local records and Freedom of Information Law (FOIL) requests are included in Appendix E.

Fire Department of New York City (FDNY)

The FDNY is responsible for the enforcement of local fire codes pertaining to the use and storage of flammable and hazardous materials. FDNY maintains public records with regard to tanks in six separate databases: (1) Total amount and size of existing fuel oil/heating oil; (2) Total amount and size of removed or sealed fuel oil/heating oil; (3) Total amount and size of existing buried motor vehicle tanks; (4) Total amount and size of removed or sealed motor vehicle tanks; (5) Most recent tank/piping test; and (6) History of buried tank leaks. Searches of the "total amount and size of existing fuel oil/heating tanks" and "the total amount and size of removed or sealed fuel oil/heating tanks" databases were requested in a record search form dated December 27, 2019. As of the date of this report, the FDNY has not issued a response. If issues of potential concern are identified upon receipt of a response, an addendum to this report will be prepared to discuss relevant findings.

Buildings Department (DOB)

Electronic DOB records for the Property were reviewed to determine whether there were any references to buildings, tanks or other structures, property usage or inspection reports that may have indicated the presence, past use, or release of hazardous substances, wastes or petroleum products within the Property.

Computerized Buildings Department records for the Property identified the following:

2803 Frederick Douglass Boulevard (Block 2045, Lot 89)

- Two complaints dated 1991 and 1992, associated with fires in a vacant building at this address, and a 1992 complaint noting that the building partially collapsed due to fire damage, and was subsequently demolished.

2805 Frederick Douglass Boulevard (Block 2045, Lot 90)

- A 1958 oil burner application;

- A 1958 Certificate of Occupancy (C of O) for a five-story building with a basement, with a boiler room and storage in the basement, a store on the ground floor, and apartments on the ground through fifth floors. FDNY approval of a fuel oil installation in 1958 was noted;
- A 1996 complaint regarding a building in unsafe condition at this address; and
- A 1996 application for building demolition.

No details were provided for the oil burner application.

Department of City Planning (NYCDCP)

Online NYCDCP records identified no E-Designations or Restrictive Declarations (RDs) for the Property.

Department of Finance

Electronic property transaction records for the Property Block and Lot were reviewed from the New York City Department of Finance Office Automated City Register Information System (ACRIS). Deed information obtained from the ACRIS files is summarized as follows:

2803 Frederick Douglas Boulevard (Block 2045, Lot 89):

Year	Grantor/Grantee
1968	Grantor is: George Schwack; Grantee is: 301 West 149th Street Realty, Corp.
1977	Grantor is: Finance Administrator of The City of New York; Grantee is: The City of New York
2002	Grantor is: New York City Housing Preservation & Development; Grantee is: Neighborhood Partnership Housing Development Fund

2805 Frederick Douglas Boulevard (Block 2045, Lot 90):

Year	Grantor/Grantee
1966	Grantor is: Herman C. Kagan; Grantee is: S.R.P. Realty Corp.
1975	Grantor is: S.R.P. Realty Corp.; Grantee is: Bennett Connors
1986	Grantor is: Elizabeth Connors; Grantee is: Ewart Goodin
1988	Grantor is: Commissioner of Finance of The City of New York (Foreclosure)
1993	Grantor is: Milton L. Slaughter, Esq. (def. Ewin Goodin); Grantee is: American Commercial Capital Corp.
2005	Grantor is: Andrew Bluestone, Esq. (def. American Commercial Capital Corp.); Grantee is: Premier NY Equities, Inc.
2006	Grantor is: Premier NY Equities, Inc.; Grantee is: Ariston Property Group, LLC
2009	Grantor is: William E. Mannion (Auctioneer); Grantee is: G.P. 2805 8th Avenue, LLC
2010	Grantor is: G.P. 2805 8th Avenue, LLC; Grantee is: 8 Avenue Holdings LLC
2013	Grantor is: 8 Avenue Holdings LLC; Grantee is: MICA FDB LLC
2014	Grantor is: MICA FDB LLC; Grantee is: FDB Group LLC

New York City Department of Environmental Protection (NYCDEP)

AKRF sent a FOIL request pertaining to environmental records to the NYCDEP on December 27, 2019. On January 8, 2019, NYCDEP issued a response e-mail indicating that no records associated with the Property were found in NYCDEP files.

New York City Department of Health and Mental Hygiene (NYCDOHMH)

AKRF sent a FOIL request pertaining to environmental records to the NYCDOHMH on December 27, 2019. To date, no response has been provided. If issues of potential concern are noted upon receipt of the information, an addendum to this report will be created to discuss relevant findings.

New York State Department of Health (NYSDOH)

AKRF sent a FOIL request pertaining to environmental records to the NYSDOH on December 27, 2019. To date, no response has been provided. If issues of potential concern are noted upon receipt of the information, an addendum to this report will be created to discuss relevant findings.

5.2.4 Additional Environmental Record Sources

To enhance the search, ASTM requires that additional local records be reviewed (i.e., beyond those included as part of the standard database search or checked online) when, in judgment of the environmental professional, such records for the Property or any adjoining property would be reasonably ascertainable; and useful, accurate and complete in light of the objective of the records review. These records include:

- Local brownfields lists
- Local lists of landfill/solid waste disposal sites
- Local lists of hazardous waste/contaminated Sites
- Local lists of registered tanks
- Local land records (for activity use limitations)
- Records of emergency release reports
- Records of contaminated public wells

Sources for these records include:

- Fire Department
- Local/Regional Water Quality Agency
- Local Electric Utility (for PCB records)

In addition to the Local Agency File Review, AKRF sent Freedom of Information Law (FOIL) requests to the NYSDEC to determine whether pertinent environmental records for the Property could be obtained for further review. On January 13, 2020, NYSDEC issued a response e-mail indicating that no records associated with the Property were found in NYSDEC files.

Copies of the FOIL requests and responses are included in Appendix E.

If issues of potential concern are noted upon receipt of this information, an addendum to this report will be created to discuss relevant findings. In AKRF's judgment, no such additional local records meeting the ASTM criteria are pertinent for the Property.

6.0 USER-PROVIDED INFORMATION

In preparing this Phase I ESA, AKRF requested that the client provide any pertinent information regarding the Property, specifically:

- The reason for performing the Phase I ESA;
- Whether they were aware of any pertinent current or historic activities at or near the Property, including but not limited to: hazardous substances or petroleum, waste management practices, filling or disposal drains, septic/sewer systems, and potable and non-potable wells;
- Owner and occupant information and whether they were aware of any previous Phase I ESAs or other potentially pertinent reports, plans or information;
- Whether any *environmental liens* or *activity and land use limitations* are in place or filed or recorded against the Property or whether there was pending, threatened, ongoing or past violations, litigation or enforcement action relevant to hazardous substances or petroleum products;
- Whether they had any specialized knowledge or experience related to the Property or nearby properties (e.g., specialized knowledge of the chemicals used by this type of business);
- Whether the (anticipated) purchase price reflects that the Property is or could be contaminated; and
- Whether they were aware of commonly known or reasonably ascertainable information about environmental conditions of the Property including current/past uses of the Property and adjacent properties.

The Phase I ESA was conducted to provide preliminary environmental information as part of due diligence for the potential renovation/redevelopment of the Property. To the extent that pertinent additional information was provided, it has been summarized elsewhere in this report.

7.0 PREVIOUS STUDIES

No previous studies for the Property were provided to AKRF for review.

8.0 VAPOR ENCROACHMENT SCREENING

A Tier 1 Vapor Encroachment Screening was conducted in accordance with ASTM Standard E2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. The term "Vapor Encroachment Condition" means the presence or likely presence of vapors from chemicals of concern (COC) in the subsurface of a Property caused by the release of vapors on or near the Property. The object of the Tier 1 screening is to conduct a screen for vapor encroachment based on findings from the Phase I ESA to determine if a possible VEC exists at the Property.

Based on AKRF's review of historical and regulatory database records, potential VECs were identified based on the Tier 1 Vapor Encroachment Screening, associated with the property's former fuel oil storage and a laundry (which may have included dry cleaning). Historical off-site uses with some potential to represent VECs for the Property included: boiler repair at the west-adjacent building; dry cleaners and laundries (potential dry cleaners); and a cutlery sharpening business, which may have utilized solvents for cleaning.

9.0 LIMITATIONS AND DATA GAPS

This assessment met the requirements of the American Society for Testing and Materials (ASTM) as established by ASTM Standard E1527-13 at the time it was performed, with the following limitations:

- Results of this investigation are valid as of the dates on which the investigation was performed.
- There was no Property access. The inspection of the Property was limited to viewing from outside of the chain link fence.
- Interviews and user provided information were limited to those discussed in Section 6.0. To the extent that interviews were not conducted with the list of interviewees cited in the ASTM Standard (past and present owners, operators, and occupants of the Property and local government officials), AKRF does not believe that this represents a significant data gap likely to result in additional or significantly changed recognized environmental conditions or conclusions.
- The Property area history was not conducted in five-year intervals. However, sufficient information about the history of the Property and surrounding area could be obtained from the available historical Sanborn and topographic maps, Buildings Department records, and interviews, and this data gap is not likely to alter the conclusions of this report.
- Agency file reviews for the Property and adjacent properties consisted of a review of standard databases and electronic records maintained by pertinent departments and agencies (summarized in Section 5.2). AKRF believes that this file review was sufficient in determining the potential for recognized environmental conditions or other environmental concerns at the Property and additional reviews beyond this are not warranted and would not likely change the conclusions of this assessment.

10.0 FINDINGS

This Phase I Environmental Site Assessment was performed in conformance with ASTM Standard E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice. Any exceptions to, or deletions from, the Standard are described in Section 8.0. The term "Recognized Environmental Condition" (REC) means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The Standard also includes definitions of Historic REC, Controlled REC and De Minimis Condition.

A Tier 1 Vapor Encroachment Screen was also conducted in accordance with ASTM Standard E2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. The term "Vapor Encroachment Condition (VEC)" means the presence or likely presence of vapors from chemicals of concern (COC) in the subsurface of a property caused by the release of vapors on or near the property.

This assessment revealed the following:

Recognized Environmental Conditions (RECs)

- Historical Sanborn maps showed a laundry (which may have included dry cleaning) at 2803 Frederick Douglass Boulevard throughout the building's history. City Directory listings also identified a rubbish removal business at this address in 1947, and a laundry at 2805 Frederick Douglass Boulevard in 1993. No regulatory database listings potentially associated with dry cleaning were identified for the Property.
- Computerized NYC Buildings Department (DOB) records included a 1958 oil burner application for 2805 Frederick Douglass Boulevard, likely associated with a fuel oil tank used for heating. No tanks were registered at the Property with the New York State Department of Environmental Conservation (NYSDEC). No evidence of petroleum storage tanks was noted during the reconnaissance, but it is likely the tank would have been located in the basement rather than buried underground. The tank was likely removed but may remain beneath the Property.
- Nearby historical off-site uses with some potential to affect the Property included: boiler repair at the west-adjacent building; dry cleaners and laundries (potential dry cleaners); and a cutlery sharpening business, which may have utilized solvents.

Non-REC on-site environmental concerns (items outside the scope of E1527-13 like ACM, LBP and/or PCBs in building materials or fill/debris)

- If demolition debris from historical structures is present beneath the Property, it may contain ACM, PCB-containing equipment, mercury-containing lighting fixtures, and/or lead-based paint.

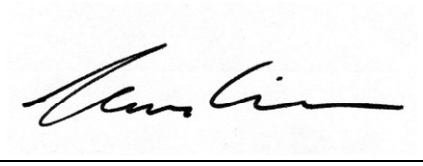
11.0 RECOMMENDATIONS

- Subsurface conditions beneath the Property may have been affected by past or present, on- or off-site uses. AKRF recommends a subsurface investigation involving the collection and laboratory analysis of subsurface samples prior to Property redevelopment. It is possible that this investigation may uncover evidence of a petroleum spill or other situation reportable to NYSDEC and/or other regulatory agencies.
- If redevelopment activities requiring soil disturbance are conducted, all excavated soil should be managed in accordance with applicable regulatory requirements. All soil and any other materials intended for off-site disposal should be tested in accordance with the requirements of the intended receiving facility. Transportation of material leaving the Property for off-site disposal should be in accordance with federal, state and local requirements covering licensing of haulers and trucks, placarding, truck routes, manifesting, etc. If contaminated soil or underground storage tanks are discovered at the Property, they should be removed and disposed of in accordance with applicable regulatory requirements, including those relating to tank registration and spill reporting, if necessary. Any evidence of a petroleum spill should be reported to NYSDEC and addressed in accordance with applicable requirements.
- If dewatering is required during future construction activities, water must be discharged in accordance with New York City Department of Environmental Protection (NYCDEP) requirements.
- If demolition debris containing any suspect ACM, PCB-containing electrical equipment, or fluorescent lighting fixtures is encountered beneath the Property, such materials must be properly handled and disposed of in accordance with the applicable regulations.
- Any activities with the potential to disturb lead-based paint must be performed in accordance with applicable requirements (including federal Occupational Safety and Health Administration regulation 29 CFR 1926.62 - *Lead Exposure in Construction*).

12.0 SIGNATURE PAGE

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property for which the assessment was performed. We have performed all the appropriate inquiries in conformance with standards and practices set forth in 40 CFR Part 312.



Marcus Simons
Senior Vice President

13.0 QUALIFICATIONS

The purpose of this assessment was to convey a professional opinion about the potential presence or absence of contamination, or possible sources of contamination on the property, and to identify existing and/or potential environmental problems associated with the property including *Recognized Environmental Conditions* as defined in ASTM Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice.*

The assessment was performed in accordance with customary principles and practices in the environmental consulting industry, and in accordance with the above-referenced ASTM Standard, except as noted otherwise in Section 8.0. It should only be used as a guide in determining the possible presence or absence of hazardous materials on the property at the time of the reconnaissance, as it is based upon the review of readily available records relating to both the property and the surrounding area, as well as a visual reconnaissance of current conditions.

This Phase I Assessment is not, and should not be construed as, a guarantee, warranty, or certification of the presence or absence of hazardous substances, which can be made only with testing, and contains no formal plans or recommendations to rectify or remediate the presence of any hazardous substances which may be subject to regulatory approval. This report is not a regulatory compliance audit.

This report is based on services performed by AKRF, Inc. professional staff and observation of the property and its surroundings. We represent that observations made in this assessment are accurate to the best of our knowledge, and that no findings or observations concerning the potential presence of hazardous substances have been withheld or amended. The research and reconnaissance have been carried to a level that meets accepted industry and professional standards. Nevertheless, AKRF and the undersigned shall have no liability or obligation to any party other than Harlem Congregations for Community Improvement and their successors or assignees, and AKRF's obligations and liabilities to the above, their successors or assignees is limited to fraudulent statements made, or grossly negligent or willful acts or omissions.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/25/2019 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 08/12/2019 has revealed that there are 2 NY SHWS sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 11/11/2019 has revealed that there are 80 NY LTANKS sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 6 NY UST sites within approximately 0.125 miles of the target property.

State and tribal voluntary cleanup sites

NY VCP: Voluntary Cleanup Agreements. The voluntary remedial program uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination.

A review of the NY VCP list, as provided by EDR, has revealed that there are 2 NY VCP sites within

approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 11/11/2019 has revealed that there are 301 NY Spills sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/24/2019 has revealed that there are 33 RCRA NonGen / NLR sites within approximately 0.125 miles of the target property.

NY VAPOR REOPENED: "Vapor intrusion" refers to the process by which volatile chemicals move from a subsurface source into the indoor air of overlying or adjacent buildings. The subsurface source can either be contaminated groundwater or contaminated soil which releases vapors into the pore spaces in the soil. Improvements in analytical techniques and knowledge gained from site investigations in New York and other states has led to an increased awareness of soil vapor as a medium of concern and of the potential for exposures from the soil vapor intrusion pathway. Based on this additional information, New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

A review of the NY VAPOR REOPENED list, as provided by EDR, and dated 12/01/2018 has revealed that there is 1 NY VAPOR REOPENED site within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 7 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Hazardous Waste Summary:

. Waste code: B002
. Waste name: Petroleum oil or other liquid containing 50 ppm or greater of PCBs, but less than 500 ppm PCBs. This includes oil from electrical equipment whose PCB concentration is unknown, except for circuit breakers, reclosers and cable.

. Waste code: B007
. Waste name: Other PCB wastes, including contaminated soil, solids, sludges,

HUDSON RIVER PCBS (Continued) **1000384273**

clothing, rags and dredge material.

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

Violation Status: No violations found

Tank Info:

Tank Number:	2-601067
Tank Id:	44765
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
B00 - Tank External Protection - None
F00 - Pipe External Protection - None
L09 - Piping Leak Detection - Exempt Suction Piping
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
K00 - Spill Prevention - None
C03 - Pipe Location - Aboveground/Underground Combination
J02 - Dispenser - Suction Dispenser
G02 - Tank Secondary Containment - Vault (w/access)
I05 - Overfill - Vent Whistle

Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	Not reported
Capacity Gallons:	3500
Tightness Test Method:	NN

DEC Memo:	"5/18/2016: Rashad Responded to site where I was met by general contactor and property owner Alexis. The property is under construction in a narrow area as part of redevelopment between 2 existing buildings, further excavation will be difficult as structural piles have been placed in excavation as they have reached proposed building depth. The excavation is exposing groundwater, no visual or olfactory evidence was observed at time of inspection, only a slight sheen was observed. They have excavated down about 12-15 feet. The property owner mentioned she had a phase 1 investigation done and the consultant recommended no further work as no significant evidence of contamination or threat of contamination was found. Alexis has provided the Phase 1 investigation. In addition engineering controls are in place for the existing redevelopment, there will be a vapor barrier installed. Neighboring property 304 West 148th Street was also inspected, they have a 2000 gallon AST wrapped in concrete, no spill or odor was present. PBS registrations in area are 302 West 148th 2-470147, 304 West 148th Street 2-609734, 104 Bradhurst Ave 2-606738. I let Alexis know that she should bring in an environmental contractor to pump out oil water mix and to see if it returns, and have contractor advise them as to what options they have. According to Alexis the proposed property will already have vapor barrier installed. Photos need to be uploaded to D2. 5/19/2016: Rashad Review of Phase 1 is as follows: The subject property building consisted of a residential building from at least 1909-2004, which was then demolished between 2004-2005, the property has been vacant since 2005 until construction began. Groundwater flow is inferred to be to the southeast direction, and present at a depth of 6-10 ftbgs. The report concluded that no further action is needed and no Phase 2 needs to be done. 306 West 148th Street does not have an alternate address. No additional spills of PBS registrations found for site. No spills found for 304 West 148th Street or 302 West 148th Street. Called Alexis, she has been in touch with contractors and will let me know when she picks one. I also asked Alexis to send me a document or a note indicating that a vapor barrier will be installed as part of building plans. Phase 1 and photos have been uploaded to D2. Received email from Alexis with drainage plan that indicates a 6 mil vapor barrier will be installed, drawing was uploaded to D2. 5/25/2016: Rashad Spoke to Alexis yesterday she indicated Riteway just left site and recovered approximately 2000 gallons of liquid. She indicated she was dealing with Rob Hill and that they will be coming up with plan, she also indicated they took samples for

VACANT LOT/FORMER APT BUILDING (Continued) **S118704719**

Remarks:	analysis. Spoke to Rob, he indicated they did pump out 2000 gallons of water with some oil mixed in. Rob said his guys indicated that the oil was a heavy oil, maybe #4 or #6 oil. Rob said they may return to possibly excavate some soil however it will be difficult because of the depth of the excavation being near groundwater as well as the structural piles already in place. I let him know that he should sent the samples out for analysis and to reassess after receiving the results. Sent email to Alexis letting her know I spoke to Rob and that we will see what samples look like before any further requirements are made by the Department. 6/3/2016: Rashad Received email from Rob Hill: Please see the following attachment for samples results 306 w 148 st, NYC. If you have any questions or concerns feel free to contact me at 718-855-7272. Email had two attachments, they have been uploaded to D2. Sample results only show slight exceedances in SVOCs they are as follows: Dibenzo(a,h)Anthracene-436ppb, 392ppb benzo(k)fluoranthene-1050ppb, benzo(a)pyrene-1300ppb, 1020ppb, and indeno(1,2,3-cd)pyrene-1300ppb, 1130ppb. Sent email to Alexis: I apologize for missing your call yesterday. After reviewing the soil data I will require no further action. I will be closing spill#1601635 for 306 West 148th Street today. Please let me know if you have any questions. Thank you. Spill will be closed due to minor SVOC exceedances and installation of vapor barrier in new building. " "found contamination during excavation/site has gone thru phase one study"

Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 2015-09-28 00:00:00.0
Site name: CON EDISON
Classification: Small Quantity Generator

Violation Status: No violations found

FINDS:

Registry ID: 110069665044

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110063827097

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"157858. 30-MAR-2005 15:40 Found @ 15:40 Called E/V desk @ 15:55 hrs V5678 - W 151 ST & 8 AVE SWC Stephen J Asfour, 49908 Operating Supervisor I&A Dept reports that in process of doing an inspection in V5678, that was due for removal found approx. one half pint of unknown oil on top of approx. 300 gallons of water, sump pump was found un plugged. No smoke or fire involved in this incident. No sewer or waterway affected by this spill. No injuries involved in this incident. Weather had no affect. Account #F3246 is being used for this incident. No measuring device was used to determine the amount of the spill. Source and cause of spill are unknown. Oil filled equipment in the structure V5678. Water is standing. No substantial cracks. No dielectric filled feeders in the structure. 2 liquid samples were taken from the spill, 1 for id and 1 for pcb. Sample priority E . Chain of custody #DD13308. Logger F.Curtis 38078. 3/30/05 10:47 Received lab results. Analysis indicates the presence of a transformer oil. Aroclor 1242 < 1.0 ppm EPA 608/8082 Aroclor 1254 < 1.0 ppm EPA 608/8082 Aroclor 1248 < 1.0 ppm EPA 608/8082 Aroclor 1260 33.7 ppm EPA 608/8082 E Hulzer # 39723 reported to me that the cleanup was completed at 14:15 on 3/31/2005. No solid waste

VAULT #5678 (Continued) **S106867604**

was removed. All other waste liquid and solid was removed by the Vactor truck. The structure was double-washed with Simple green . Environmantal tag # 42036 was removed. The remediation of the spill was to install a new Transformer unit in the Vault: Logger R Pagano # 48703 Update: 5/17/05 @ 12:30. For clarification the remediation of the spill included installation of a new transformer. A. Drummings # 84163. Closed on 6-29-05. George Breen "

Remarks: "PRODUCT IS 1/2 PINT OF UNKNOWN OIL ON 300 GALLONS OF WATER. NO SMOKE, FIRE, SEWERS, WATERWAYS, SAMPLES WERE TKANE AND CLEAN UP IS PENDING THE RESULTS OF SAMPLES. 157858."

Tank Info:

Tank Number:	001
Tank Id:	61830
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

	F00 - Pipe External Protection - None
	K00 - Spill Prevention - None
	A00 - Tank Internal Protection - None
	B01 - Tank External Protection - Painted/Asphalt Coating
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	H00 - Tank Leak Detection - None
	J02 - Dispenser - Suction Dispenser
	C03 - Pipe Location - Aboveground/Underground Combination
	G00 - Tank Secondary Containment - None
	I05 - Overfill - Vent Whistle
Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	Not reported
Capacity Gallons:	2500
Tightness Test Method:	NN
Date Test:	Not reported

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Site name: CON EDISON
Classification: Not a generator, verified

Violation Status: No violations found

FINDS:

Registry ID: 110063779237

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"02/23/10 - See eDocs for Con Ed report detailing cleanup and closure. Issue seems to deal with a green dye city DEP used to trace a water leak from a ConEd street box to a building basement. Green liquid was NOT antifreeze. Spill Closed."
Remarks:	"Con Ed crew opened service box and discovered green fluid in service box on water; tests indicate ethylene glycol (antifreeze). Contained in service box. Cleanup pending further tests for concentration. EMIS #219789."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"11/22/05: This spill transferred from J.Kolleeny to S.Kraszewski. 01/03/06: Site Assessment said to be complete by Sept. 2000, by Yellowstone Industries. No record of report on file. Need site assessment report. - SK 07/10/06: NYCHA update summary states that one 32K UST installed in 1977 and stored #4 and #6 oil was replaced by a 25K UST that currently stores #2 oil. Contaminated soil was encountered during the tank replacement, no product recovery system and no MWs. A site assessment is available and NYCHA recommends DEC review it. - SK 02/08/07 : DEC lead changed from S. Kraszewski to J. Kann. J.Kann 3/10/11: J.Kann - Investigative work plan submitted on 3/3/11. 2/11/15: J.Kann - IWP indicates the yellowstone report was incomplete and stated that 50 cy of soil were removed and that petroleum contamination was encountered. Given the limited site history, the work plan only includes soil sampling (with option to install wells only if visible contamination is encountered.). Will approve the IWP provided that at a minimum temp gw wells are installed an sampled. If visisble/olfactory contamination is encountered, permanent wells will be needed. 1/26/16: J.Kann - Four borings were advanced and 2 wells installed. Based on soil analyticals, minor SVOCs were detected in two locations CP-51 SB-2 (15-17 ft) SB-4 (15-17 ft) Benzo(k)fluoranthene 0.8 0.9 0.87 Chrysene 1.0 1.3 1.0 Groundwater was also sampled and benzo(a)anthracene and chrysene were estimated at 0.051ppb (TOGS 0.002ppb). All other constituents were below TOGS. Tank was removed in 2000. Given the staining and oil odor in MW-2, I emailed NYCHA to gauge the wells one

HARLEM RIVER II HOUSES (HARLEM RIVER I) (Continued) **U001840722**

more time before I close the spill. 3/22/16: J.Kann - wells were gauged on 1/28/16 as requested. No product or odor noted. Based on the site file and IWP, the spill has been closed. Spill closure email sent to NYCHA and file DecDoced."

Remarks: "SOIL CONTAMINATION DISCOVERED AT ABOVE LOCATION DURING TANK REPLACEMENT. SOIL EXCAVATED FURTHER TESTING TO BE DONE. NO CALL BACK REQUESTED."

DEC Memo:	"12/28/2015: Rashad Spill transferred from Alex to Rashad as per Jeff, 2 other spills exist for site spill#1100352 and spill#0600573. Emailed Gabriel: Attached is a tank test failure letter for spills#0600573, 1100352, and 1203515 for 89 Bradhurst Avenue, New York NY 10039. There are three open spill cases for this site and I would appreciate any update or documentation on the current status of the 10,000 gallon tank. The original letter is being mailed to the address provided on the PBS registration (#2-604973). Letter was uploaded to D2. 1/4/2016: Rashad On 12/31/15 Gabe responded: Department of Design and Construction has a contractor finalizing the

JACKY ROBINSON (PARK?) TTF (Continued) **S112148829**

scope of work needed to properly close and remove the oil tank in compliance to DEC guidelines and convert the site to natural gas. 4/14/2016: Rashad This spill will be administratively closed and cross referenced to spill#0600573 as it is for same tank. Refer to spill#0600573 for future reference. "

JACKIE ROBINSON REC. CENT (Continued) **S106869028**

DER Facility ID:	289093
DEC Memo:	"Sangesland spoke to Ellis Mercer Dep Mgr of Recreation Ctr. (212-234-9607) He says Rapid Fuel Oil delivered fuel today and over filled the tank. During the oil delivery the driver went back into his truck to read the paper and Mr. Mercer had to yell at him that the tank was overflowing onto the sidewalk/street. Mr. Mercer got some peat moss and soil used to maintain the rec center, but the truck driver drove off.Sangesland spoke to Bobby at Rapid Fuel Oil (917-807-8720) He says it was not his drivers fault and there was no big spill at the site. 3/31/2005 - Rapid hired Petroleum Tank Cleaners to clean up the site. 11/18/05- DEC Piper contacted KC Reilly at rec center. Left Message. Spoke w/ Mark at PTC. Only did surface cleanup. 11/28/05- DEC Piper spoke w/ Ellis Mercer of Parks Dept. All cleaned up by PTC inside and outside. Very pleased, no complaints, no odors."
Remarks:	"Location is between west 146th and west 147th street. Product went into a near by storm drain, a person on the scene soaked up the remainder of material that was outside drain cleaned up with speedy dry."

DEC Memo:	"04/18/06-Hiralkumar Patel. Left message for Gabe Ramos. 04/19/06-Hiralkumar Patel. Left message for Gabe Ramos. Received call from Mr. Ramos. SEnd out letter with Reference address as: Jackie Robinson 89 Bradhurst Ave / 146th Street PBS#: 2-604973 TTF letter sent out to following address: Gabe Ramos City of NY Parks & Recreation 5 Boro Operations Randalls Island, NY 10035 Ph. (212) 410-8916 FAX (212) 410-8319 email: Gabriel.Ramos@parks.nyc.gov Letter faxed to Mr. Ramos at City Parks and to Ms. Sepe at Fenley & Nicol (FAX: 631-586-4920). 09/02/09-Hiralkumar Patel. 1:18 PM:- received email from Mr. Ramos. he mentioned that NYC DDC will replace the tank at this facility and currently out for Bid. he asked to contact Ruben Olmedo at 718-391-1062. 05/24/12-Hiralkumar Patel. 2:02 PM:- sent email to Mr. Ramos inquiring updates. 10/06/14-Hiralkumar Patel. as per DEC Austin, case assigned to DEC Vadim. 12/28/2015: Rashad Spill transferred from Vadim to Rashad as per discussion with Vadim and Jeff. Emailed Gabriel: Attached is a tank test failure letter for spills#0600573, 1100352, and 1203515 for 89 Bradhurst Avenue, New York NY 10039. There are three open spill cases for this site and I would appreciate any update or documentation on the current status of the 10,000 gallon tank. The original letter is being mailed to the address provided on the PBS registration (#2-604973). Letter uploaded to D2. 12/31/2015: Rashad Received email from Gabe: Department of Design and Construction has a contractor finalizing the scope of work needed to properly close and remove the oil tank in compliance to DEC guidelines and convert the site to natural gas. 10/19/2016 After consultation with Rashad this spill is transferred to Alex Zhitomirsky. AZ 1-3-2019 Reviewed a report for this site dated November 2, 2018, and issued by URS. The report stated that the tank was removed by The Franklin Company. Franklin performed the tank closure work between April and May 2018. The remote fill port was excavated and removed. The remaining piping abandoned in place. Franklin completed tank closure sampling. One water sample and 13 soil samples were collected for lab analyses. The water sample was collected of water that accumulated inside the tank vault. Four soil borings were advanced to 15' bgs. The borings were terminated due to refusal. There were no VOCs or SVOCs detected above Unrestricted Use SCOs in any of the soil samples. Groundwater at the site wasn't encountered during the UST closure investigation. URS requested a closure of this spill. Based on the presented information this spill was closed on 2/3/2019. AZ The following e-mail was sent to K. Shanahan and V. Brevdo: Dear Mr. Shanahan, Based on the documentation provided to date, the New York State Department of Environmental Conservation (the Department) has closed the above-referenced spill case. All monitoring wells associated with this spill case should be properly closed in accordance with the Department's guidance document, Groundwater Monitoring Well Decommissioning Procedures . The Department hereby reserves all of its rights concerning, and such forbearance shall not extend to, any further investigation or

NYC PARKS (Continued) **S107789171**

remedial action the Department deems necessary due to: I. The off-site migration of petroleum contaminants that was unknown at the time of this closure. II. Environmental conditions related to this spill case which were unknown to the Department at the time of this closure. III. Information received, in whole or part, after the Department's spill case closure, which indicates that corrective action was not sufficiently protective of human health and/or the environment. IV. Fraud in obtaining this spill case closure determination. As a precaution, we must bring your attention to our concerns for the future use of this site. If subsurface contamination is encountered while excavating for any construction activity, appropriate remedial and vapor mitigation efforts may need to be taken to fully prevent vapor intrusion into any site development and to ensure human health and safety. This spill closure does not exempt the Responsible Parties from compliance with any applicable laws and regulations. Please be advised that you should maintain a permanent file of all documentation and correspondence regarding this case for future use as the Department's files may not be maintained indefinitely. Sincerely, Alex Zhitomirsky - Engineering Geologist 2 NYS Department of Environmental Conservation 47-40 21st Street, Long Island City, NY 11101 Phone: 718.482.6387 - Fax: 718.482.6390 Email: alexander.zhitomirsky@dec.ny.gov "

DEC Memo:	"nyc parks & recreation Parks Dept Building with tank in vault Contact: Franklin Company or Gabe Ramos Parks Dept - 212-410-8916 8/15/2012 TTF Spill Case transferred to DEC Tim DeMeo. 10/22/15 TJD File review. Address is incorrect on spill report - changed today from #79 to #89 Bradhurst. Additionally street location corrected from Broadhurst to Bradhurst. PBS #is 2-604973. Following proper identification of spill location the facility was contacted to obtain a status of the open spill - the facility manager Valerie Edwards was unaware of the condition and requested an email outlining specific requirements. An email was sent to Valerie with request for specific documentation in support of spill closure. Email uploaded to DECDOCS. 12/23/2015: Rashad Spill reassigned from DeMeo to Omar as per DeMeo. 89 Bradhurst Avenue has alternate addresses of 75-95 Bradhurst avenue and 319-341 West 145 street. There are multiple spills at Jackie Robinson Park, spill#9302297 was a discharge into the sewer and has no DEC remarks it was closed in 1993, spill#0102259 was closed in 2008 because of a TTF on a 10,000 gallon tank which was retested, passed, and no evidence of release to environment. Spill#0603232 was cross referenced to other spill#0600573, spill#0603738 was closed

VAULT BENEATH SIDEWALK - TTF (Continued) **S111011047**

because of a duplicate spill it was referred to spill#0600573. Spill#1203515 is open at 89 Bradhurst Ave & 146 st and only info is 10,000 gal UST in caller remarks. There is another spill# 0600573 is managed by Vadim and a comment on 9/9/09 says DDC will replace tank, case is still open. PBS#2-604973 has a 10,000 gallon UST containing biodiesel. TTF letter and email correspondence found in D2. 12/28/2015: Rashad Emailed Gabriel: Attached is a tank test failure letter for spills#0600573, 1100352, and 1203515 for 89 Bradhurst Avenue, New York NY 10039. There are three open spill cases for this site and I would appreciate any update or documentation on the current status of the 10,000 gallon tank. The original letter is being mailed to the address provided on the PBS registration (#2-604973). Letter uploaded to D2. 1/4/2016: Rashad On 12/31/15 Gabe responded: Department of Design and Construction has a contractor finalizing the scope of work needed to properly close and remove the oil tank in compliance to DEC guidelines and convert the site to natural gas. 4/14/2016: Rashad This spill will be administratively closed and cross referenced to spill#0600573 as it is tank test failure on same 10,000 gallon tank. Please refer to spill#0600573 for future information. "

DEC Memo:	"06/01/17-Hiralkumar Patel. 3:45 PM:- left message for Mike at AARCO. 3:46 PM:- spoke with Gabe Ramos (212-410-8916) at NYC Parks. informed him that caller's remarks suggests leak in tank's bottom and there may be active discharge. asked Mr. Ramos to contact AARCO and pump out tank immediately, if actively leaking. 06/02/17-Hiralkumar Patel. PBS #: 2-604973. as per PBS record, the site has one (1) 10,000 gal #2 oil UST, in-service, installed in June 1982. another spill case (# 0600573) was reported on 04/14/2006 due to tightness test failure of 10,000 gal tank. case still open. 9:55 AM:- left message for Mike. 9:57 AM:- left message for Mr. Ramos. discuss with DEC Alex, project manager for spill #: 0600573. Alex will discuss with NYCDDC consultant who is handling this project. case assigned to Alex. 6-2-2017 Contacted K. Shanahan (URS). Asked him to dispatch staff to the spill site immediately, take the tank out of service, notify NYC Parks and NYC DDC. Explore if the leaking tank could be excavated. AZ 6/6/2017 Received the following e-mail from K. Shanahan: Hi Alex, In accordance with your request, I have prepared this e-mail to provide NYSDEC information regarding new Spill No. 1702073 reported at Jackie Robinson Pool. The spill was called in at 3 PM on June 1, 2017 after a failed tank tightness test was performed on the 10,000-gallon No. 2 fuel oil UST located between the building and Bradhurst Avenue (see attached photo P1010104). You indicated to me that Michael Sepe of Aarco Environmental Services performed the tightness testing. I called Michael Sepe on June 2 and 5 and left him messages. I called him again today and he told me that there was a major issue with the wet portion of the tank in either a pipe or the tank itself. He also indicated to me that the fuel was removed from the tank and that the tank was taken out of service. I asked Michael Sepe if he inspected the concrete tank vault for evidence of product. Michael said a visual inspection was not performed since access was limited and he had no reason to enter the vault (he implied a possible confined space issue see remaining photos). URS is managing the removal of this UST and installation of a natural gas service to fuel the boilers. The tank will be removed but the vault will remain to due it s proximity to the building and Bradhurst Avenue (see attached photo P1010104). URS has retained The Franklin Company to perform the work. The work is scheduled to be completed in 2017. Franklin will perform

JACKIE ROB REC CENTER (Continued) **S121102034**

a tank closure investigation in accordance with NYSDEC protocols. URS will evaluate the data collected and determine whether additional investigation or remediation is required. Let me know if you need any additional information. Thanks - Kevin J. Shanahan Project Manager, Environment Business Unit, Metro New York Direct 716-923-1215 Cell 716-480-7352 kevin.shanahan@aecom.com "

DEC Memo:	"8/15/18-Zhune spoke to Maya Shani homeowner of APT 3F 646-483-4075. Maya said that she lives across the street of the gas station. Her windows are closed and cover with plastic film and she got gasoline smell coming from the gas station across the street. the smell comes and goes and it depends on the weather and how busy the gas station is. Right now she have it in her apartment. 08/15/18 - Lakhani DEC Lakhani visited the site and met with Maya. No olfactory odor was observed. Maya informed that she often smells the gasoline odors for 20 mins to 2 hours at a time throughout the last year. DEC Lakhani inspected the BP gas station and found that work was being done on one of the fuel sump pumps. DEC Lakhani will speak to DEC Zielinski for the BP gas station to be PBS inspected. 08/20/18 - Lakhani DEC Lakhani spoke to DEC Zielinski regarding the BP gas station across from the site. DEC Ali will perform an inspection of the gas station. Spill is closed."
Remarks:	"homeowner lives across the street from the gas station and there is an ongoing gas smell for years! I advised her to report it the local fire department."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"5/23 Sangesland called Gilmore at DEP. Limited info, only name of Mr. Okoli (unknown how Mr. Okoli is related to the building) Sangesland left a voice mail for Mr. Okoli (got no response) 5/27 Sangesland tracked down PBS (2-331058 expired) after several forwarding calls, finally spoke to property manager Limbert 646-773-2619. He said he was just at the building (6/1) and did not see any spill. He said the oil company may know. 6/1 Sangesland spoke to Richard at Approved Oil 718-238-1050. He asked for all the spill number & info and said he would investigate and call back. ***Richard called back a few minutes later: Approved Acct #FR18ST01 - Last delivery was May 1, 2011 - He has no record of spill or problems*** Unknown if this is a real spill - Who is Mr Okoli???? Sangesland forwarded a copy of the PBS form with new contact number to Nick Lombardo to update & process PBS info. 06/06/11 Spoke with Limbert (646)773-2619.He confirmed that there was no spill either by the fill line or in the building.He also indicated that he would send the PBS renewal application to DEC ASAP.Case closed.(sr)"

FINDS:

Registry ID: 110064254319

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DER Facility ID:	391246
DEC Memo:	"Sangesland spoke to property owner and got a copy of an invoice for work done by New York City Tank Testing Inc. (718-731-7011) Invoice is dated 7/22/2010 and lists the following work done: 1) Tested tank (original June failure). 2) Owner replaced manhole gasket with new nuts and/or bolts 3) Tested tank (July 14 second test failure) 4) Replaced/refitted all necessary fittings. Isolated tank (passed) 5) Isolated and tested vent line, found vent line defective. 6) Repaired vent line, retested tank system (passed) 7) Installed a new vent cap. Based on this information, this case is closed out."
Remarks:	"retest pending - no spill or resources"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 2/28/2004 Sangesland spoke with property manager Mr. Helman. He said the spill was all cleaned up by Summit Transport. Sangesland spoke to super Leo (212-926-2021). He said the basement and outside looked very clean. He also said Summit hired AL Eastmond for the cleanup. Leo lives at 28 St Nicholas - Apt #1A Issac at AL Eastmond says the liquid in the basement was cleaned by Summit (973) 777-0404, but the long term oil problem in a pit outside the vent line was powerwashed by PTC (718) 624-4842. Issac does not know how the oil came into the basement, He will check it out and get back to the DEC with the information. 4/27/06 - Austin - Spill inadvertantly assigned to CO staff (Keating) - reassigned to Ketani 7/13/06 - Raphael Ketani. I spoke to Issac of Eastmond (718) 378-3000 regarding the site. He said that he didn't remember the site, but would look it up and get back to me. 8/7/06 - Raphael Ketani. I tried calling Summit to find out what involvement and documentation they have regarding the spill. However, I could only leave a voice mail for Mark Rosen. I tried getting ahold of Isaac of Eastmond, but he wasn't in. I will try tomorrow. 8/9/06 - Raphael Ketani. I called up Diana Parker at

APARTMNET BUILDING (Continued) **S106468509**

PTC and asked her for documentation for this site's cleanup. She said there was nothing in PTC's records for this site address and that PTC hasn't done a cleanup for Summit in a very long time. Next, I called up Isaac of Eastmond and he said that he found an invoice and paid bill for the site. He FAXed it to me. The documents show that a cleanup was done at the site. There was power washing of the sidewalk, walls, and a pit outside the vent line. Also, 2 bags of debris were removed and soap was used to clean up the site. Based upon these documents, I am closing the spill case. "

Remarks: "BROKEN GAUGE ON BUILDING: ALL CLEANED UP: "

DEC Memo:	"11/15/16 - Lakhani No PBS and no spills were recorded for the addresses at: 2600 - 2614 Adam Clayton Powell Jr. Blvd, New York, NY and; 201 - 203 West 150th Street, New York, NY and; 200 - 204 West 151st Street, New York, NY. 3:50 PM - Vought and Lakhani called and spoke to Frank Galdun (Merritt Environmental - 6316176200), the location was excavated as it was an old gas station and now a vacant site that is being redeveloped for residential purposes. The location was not listed as an NYC OER site. Upon excavation, twelve (12) unregistered 550 gallon USTs encased in concrete were unearthed. They continued and demolished the concrete casings. Minor soil discoloration was discovered and there was a slight gasoline odor. No vapor complaints were received to date. Currently there is no observed groundwater on site. Soil samples are required and will be attempted to be taken from the bottom bedrock surface and will also be collected from the soil side walls. All soil was excavated to the bedrock. 2 USTs were removed to date and there was no sign of corrosion - there is no indication of a leak. The remaining USTs are yet to be removed. All soil was stock piled and covered in poly (plastic) at the end of the day of excavation. Proposed development includes a parking garage the is the size of the entire footprint of the building. Once the development plans are confirmed that the parking garage will occupy the entire basement, a sub slab depressurization system will not be needed as per prior guidance from NYSDOH, as per Vought. Each UST excavation site is 25' x 10'. Upon excavation of the USTs, piping was taken out. Pipes were followed to the dispensers and removed. Soil samples along the pipe lines will be collected. The USTs were found filled with gas and water. Their contents were pumped out by Action Environmental. Fill ports were not found on the sidewalk, but were found in between the two excavations. Lakhani and Vought intend to send a letter to Galdun regarding the case. Galdun said that he will circle back with progress on the site and with samples. Lakhani gave Galdun his contact along with Manilar's contact for more info for PBS registration. Vought gave Galdun his email. As per Vought, Lakhani is to be the lead for the spill. 11/16/15 - Lakhani On 11/15/16, Frank Galdun wrote: Jeff, As discussed below is the contact name of the property owner. Peter Chen Truss Development 43-73 Union Street, Suite 1A Flushing NY 11355 516-209-8404 peterchen33@yahoo.com Have all emails related to the job site emailed to: peterchen@trussdevelopmentgroup.com and; info@trussdevelopmentgroup.com. Address the property owner to 2600 7th Ave Realty LLC. 11/16/15 - Lakhani Spill temporarily assigned to Vought until Lakhani is put into UIS database. Letter sent including the following: 1) delineation of soil and groundwater (if applicable) contamination 2) submission of development plans for the site 3) collection of confirmation (endpoint samples 4) Collection of soil samples from along the piping line 5) approval of RAP prior to redevelopment 6) CC to Galdun, Vought, Peter Chen (Truss Development - 5162098404, peterchen@trussdevelopmentgroup.com) 7) PBS Registration. There is a one month (12/16/16) due date on the report.

VACANT COMMERCIAL (Continued) **S119027997**

Letter added to D2 and sent to Chen via email and US Mail. 11/16/16 - 1:46 pm - Lakhani Frank emailed Vought regarding time for site visit. Site visit scheduled for 1 PM on 11/18/16. Frank claimed that all USTs will be removed by the morning of 11/18/16. 11/17/16 - Lakhani Galdun CCed Vought in email to Peter Chen stating that he has completed the NYSDEC storage tank registration documents. Peter has yet to send fees ($500) and registration documents to Central Office (Albany). 11/18/16 - Lakhani Vought and Lakhani visited the location and met with Frank Galdun, Peter Chen, and owner's representatives. There was a pile of piping that was removed but not characterized. Unearthed USTs and contaminated soils were covered by poly. Frank is awaiting results after sending waste classification on the contaminated soil. There were no olfactory odors present. There was an underground transformer on the southern sidewalk of 151st St. A gasoline remote fill for a UST exists on the northern sidewalk of 150th St. Possible down gradient of the site is a NYC park with no basement. Upon entering the location, there was a pit that was filled with some rainwater. Rainwater had no sheen. The sidewalls of the pit contained dark spots which indicated that the soil was contaminated with gasoline. Dark spots soils were confirmed to be contaminated after observing gasoline/diesel VOC odors. USTs were removed, but two (2) more 550 gallon USTs full of water with fill lines and encased in concrete were found after PBS registration for the prior twelve (12) was submitted. Frank must update the registration submittal for the total fourteen (14) USTs found at the location. Frank took soil samples from three (3) sidewalls. PID readings were low (highest reading recorded was 0.2). No complaints regarding odors have been received from the surrounding area. Endpoint samples will be collected. Frank will be returning to the location on Monday to evaluate, remove, and drain new found tanks. For the development of the site, developer only needs to go down 6'bg. Bedrock is at a maximum of 8'bg. If contamination is below 8'bg then soil samples will have to be collected to delineate. Since a parking garage is intended to be built below the footprint of the building, a vapor intrusion barrier will be required but piping will not be necessary because garage will be above the contaminated soils. Therefore garage will vent any vapors. As per Vought, the above described pit requires a soil boring and further sampling due to the found soil contamination. The said pit should have the rainwater pumped out and then a soil boring should be placed. Frank notified Vought and Lakhani that prior due diligence sampling was done for the location but nothing was found. He said he would share those analyticals with Vought and Lakhani. Frank will share the UST closure report, sampling from holes, and scaled site plans with Vought and Lakhani. 11/21/16 - Lakhani Emailed Galdun and CCed Peter Chen regarding the gasoline remote fill port found on the northern sidewalk of 150th St. Notified him that as per PBS regulation, the fill port must be closed. Also since there was no tank tightness data to show that the fill had no leaks, a limited investigation must be performed with either installation of a soil boring or endpoint sample collection. Galdun responded that he will have the excavation contractor expose the line for excavation. 12/5/16 - Lakhani Emailed Galdun and CCed Peter Chen regard the due diligence reports and proposed investigation around the fill port on the northern sidewalk of 150th Street. Galdun responded informing DEC Lakhani of the discovery of one (1) 550 gallon waste oil UST and one (1) 550 gallon heating oil UST in a filled in basement. There was no evidence of a petroleum discharge

VACANT COMMERCIAL (Continued) **S119027997**

discovered at that location and soil samples were collected. He also completed an investigation of the fill line by creating a 30' long trench to bedrock. From here, soil samples were collected along the excavation. No evidence of discharge was discovered. 3:54 AM: Called Frank about the site, but he was busy out in the field. Left name and number with Merritt Environmental and will follow up tomorrow. 12/6/16 - Lakhani 9:28 AM: Frank called back and notified DEC Lakhani of an old basement found in the northeast section of the property, fairly close to the gasoline area. They found it while scraping asphalt off the surface and uncovered a fill port. The basement was set into bedrock. The basement floor was 8'bg. The basement was filled in with soil and within the basement they had found one (1) 550 gallon waste oil UST and one (1) 550 gallon heating oil UST. The waste oil UST was full with waste motor oil and the heating oil UST was about 10% full with #2 heating oil. Both tanks were drained, cleaned, and removed from the site by Action Environmental. They took samples below each tank and sidewalls. Analyticals can be expected in 5-6 days. The fill port found on the northern sidewalk of 150th St has been concreted over. No vapor complaints have been made to date. 12/20/16 - Lakhani Called Frank Galdun. A draft of the closure report was sent to the client, Peter Chen. Frank said that analyticals from samples taken from the basement with the two (2) tanks showed indication of some contamination in the samples, but it was below CP-51 standards. Four (4) samples were taken: two (2) from the bottom and at least two (2) from the sidewalls because the sidewalls were mostly rock and stone. Some SVOCs were found in the basement samples as well, but nothing was above standards. The anaylticals from the 30' trench were returned with no evidence of discharge occurring. The could not find the pipe during digging. All tanks have been registered and forms included in closure report. Past Phase II reports have been included in the closure report. One of the past Phase II reports indicate a bedrock well drilled 20' down detected MTBE. Closure report should be received by early next week (12/27/16 - 12/30/16). They also did more digging along the east wall of the property where the gasoline stained soil was in the pit. They did not encounter further significant contamination. 12/27/16 - Lakhani Called Merritt to obtain the closure report. Maryann Wegh, project manager from Merritt Consulting, sent the Closure Report to DEC Lakhani. Uploaded to D2. 12/28/16 - Lakhani UST Closure Report (Merritt Environmental - Frank Galdun, 12/15/16) - Removal of twelve (12) 550 gallon gasoline USTs and associated dispenser/fill piping formerly located beneath the east side of the 2600 to 2614 Adam Clayton Powell Jr. Boulevard property. In addition one (1) 550 gallon waste motor oil UST and one (1) 550 gallon waste motor oil UST and one (1) 550 gallon heating oil UST was removed from the site. The size of the site is 19,910 sq. ft. and is currently unimproved in preparation for redevelopment to contain a residential apt. building with a partial underground vehicle parking garage. Historically the site contained one (1) single-story 1800 sq. ft. permanent structure that was used as a car wash. The remainder of the site contained exterior paved surfacing used as a commercial parking lot. Site appears to have been connected to municipal potable water supply and combined sewer/stormwater systems. According to a Limited II Subsurface Investigation Report from 8/13/15 by AEI Consultants, three (3) soil borings were installed at the site. Soil samples were collected from two of the three borings show that no VOCs were detected at concentrations that exceed applicable regulatory limits

VACANT COMMERCIAL (Continued) **S119027997**

in either sample. Refusal of the drilling equipment occurred on shallow bedrock at all three borings. Two additional borings were subsequently installed into bedrock to intersect the water table to collect groundwater samples. Groundwater sample collected from this boring indicates MTBE was detected at 55 ppb. No MTBE was detected in any of the post-UST removal soil samples collected by Merritt. Upon UST removal activities, gasoline USTs were found approx. 10' of the temp. bedrock having Merritt believe that only residual impact to the groundwater quality occurred. Merritt completed a Focused Subsurface Site Investigation Report on 2/18/16 and installed a total of 11 soil borings. The max. depth of the soil borings was 8.5'bgs and no evidence of petroleum contamination at actionable or reportable concentrations was discovered. First Excavation Group of NY, Inc. was retained to remove twelve (12) 550 gallon gasoline USTs and associated piping, one (1) 550 gallon waste motor oil UST and one (1) 550 gallon heating oil UST. Twelve (12) USTs were encased in concrete. Three (3) abandoned gasoline fill ports and on e (1) remote fill was observed at the site. A trench was excavated to bedrock where the fill line may have extended. Trench was approx. 35' to the gasoline UST excavation and 3' in depth. No piping or evidence of gasoline contamination was identified. Isolated zones of discolored soil exhibiting strong gasoline odors was uncovered near the base of the east gasoline UST excavation wall. The material was removed and stockpiled to the extent feasible since Adam Clayton Powell Jr. Boulevard was directly adjacent to the east excavation wall. No free-phase product or staining was observed on the bedrock surface. NO physical evidence of a petroleum release was encountered in fill material excavated from the waste motor oil and heating oil UST excavation. Grab soil samples collected from waste motor oil and heating oil UST excavation were taken for which the sidewall samples taken at 7'bgs contain several SVOCs the exceed SCLs. No SVOCs were detected at levels in the bottom samples. Elevated SVOC concentrations are caused by the composition of the fill material in the sidewalls rather than representing a petroleum release to the environment. A vapor barrier shall be installed under the basement of the site building as a precautionary measure against possible future sources of vapor intrusion into the structure. Closure report is not sufficient. Groundwater sidewalk sampling down gradient of EXC A SIDE 1 and EXC A SIDE 4 is required to delineate possible groundwater contamination. Or if Frank claims that EXC A SIDE 1 & 4 were clean, then require a groundwater and soil samples at the bottom of the eastern pit. 12/29/16 - Lakhani 3:06 PM: Called Maryann Wegh, Project Manager, and explained to her the need for monitoring wells down-gradient of Exc A Side 1 and Side 4. She said she would relay the message to Frank Galdun. Will be speaking to Frank tomorrow (12/30/16). 3:56 PM: Called Frank to tell him that a sidewalk groundwater samples down-gradient of EXC A Side 1 is required since no vertical delineation was done. Sent a requirement letter to Peter Chen via U.S. Mail and sent the letter to Peter and Frank via email. 01/03/17 - Lakhani Frank called and informed that since there is a chance that installing a boring for a groundwater sample adjacent to EXC A Side 1 and Side 4 may not yield a sample, he asked whether two (2) borings can be done: one (1) adjacent to EXC A Side 1 and 4 and another adjacent to the southern portion of EXC B. 01/04/17 - Lakhani Frank has yet to receive a PBS number for the registration. Email Frank, as per DEC Vought, that two (2) sidewalk borings adjacent to EXC A and B will be sufficient. If the EXC A boring does not yield

VACANT COMMERCIAL (Continued) **S119027997**

any water, a bedrock well is not necessary. 01/26/17 - Lakhani Contaminant Delineation Report (Merritt, 01/2017) - Installation of three (3) soil borings into the Adam Clayton Powell, Jr. Blvd sidewalk that abuts the east site perimeter. The two (2) southerly borings encountered bedrock at 4.5'bgs and the northerly boring extended to 12'bgs on bedrock refusal. A water bearing deposit was encountered at 9.2'bgs in the northerly boring (B2). Since a slight gasoline odor was detected in the water extracted from B2, a permanent well was installed as a precautionary measure designated (MW1). Soil samples were collected from the three (3) borings reported no VOCs at concentrations that exceed applicable regulatory limits. Some SVOCs were detected above limits. Lab analysis of the groundwater sample reported: benzene 0.83 ug/L(MW1, 9.2'bgs). As per Vought, spill is closed. DEC Requires: 1) delineation of soil and groundwater (if applicable) contamination 2) submission of development plans for the site 3) collection of confirmation (endpoint samples) 4) Collection of soil samples from along the piping line 5) approval of RAP prior to redevelopment 6) CC to Galdun, Vought, Peter Chen (Truss Development - 5162098404, peterchen@trussdevelopmentgroup.com) 7) PBS Registration 8) Submission of due diligence reports by Galdun as per meeting on 11/18/16"

Remarks: "found 12 usts during excavation"

(212) 942-5550 Fax (212) 942-0366 summary of available information: - the subject spill was reported due to gasoline seepage into subway tube located west of the subject site - monitoring wells were installed on southern portion of the site - proposed to install remediation system including free phase product recovery, dissolved hydrocarbon recover and soil/vapor hydrocarbon recovery - record indicates operation of recovery systems, but no records available indicating when these recovery systems were initiated and terminated - as per available reports/documents, total of fourteen (14) monitoring wells were installed at the site: MW-1 through MW-6, MW-8 through MW-15 - site maps are available showing location of MW-1 through MW-6 and MW-8 through MW-12; but no maps indicate location of wells MW-13, MW-14 or MW-15 - groundwater samples were analyzed from multiple monitoring wells at the site - last available groundwater sample result indicate collection of groundwater samples on

STATION 800, LLC (Continued) **U000414037**

12/14/2001 - last available invoice from Winston Contracting dated 05/01/2002 includes wells gauging and purging 12/31/15-Hiralkumar Patel. 1:00 PM:- visited site to confirm location of previously installed monitoring wells. total of fourteen (14) well covers noted at the site. available records show installation of fourteen (14) monitoring wells (MW-1 through MW-6, MW-8 through MW-15) at the site. Jose Pimentel **on-site tenant** PH. (917) 893-2253 01/04/16-Hiralkumar Patel. 9:48 AM:- sent email to OAG Jennifer Dentinger inquiring updates. 01/06/16-Hiralkumar Patel. discussed with OAG Jennifer. 01/27/16-Hiralkumar Patel. 3:25 PM:- left message for OAG Jennifer. 02/04/16-Hiralkumar Patel. 9:39 AM:- left message for OAG Jennifer. 02/17/16-Hiralkumar Patel. 2:44 PM:- left message for OAG Jennifer. 04/26/16-Hiralkumar Patel. 9:01 AM:- sent email to OAG Jennifer inquiring about if formal report needed for possibly a last round of groundwater sampling. 9:38 AM:- received email from OAG Jennifer stating that a formal report is not needed. 05/23/16-Hiralkumar Patel. 1:48 PM:- sent email to Dave including copy of standby contractor authorization form. asked Dave to schedule well sampling asap. 05/26/16-Hiralkumar Patel. 10:40 AM:- spoke with Mayra Rojas, property manager and informed her about required groundwater sampling. Steady Realty LLC. **property owner** c/o New City Management LLC. 2753 Broadway, Suite 377 New York, NY, 10025 Attn.: Mayra Rojas PH. (646) 376-9952 (C) (212) 913-0823 email: mayra@newcity.nyc 10:56 AM:- sent email to Dave including contact number for Ms. Rojas. asked Dave to contact her to schedule sampling. email copied to Ms. Rojas. 06/20/16-Hiralkumar Patel. 11:41 AM:- received email from Melissa from TestAmerica requesting call-out for lab. 11:55 AM:- sent email to Melissa including copy of standby contractor authorization form. 12:02 PM:- received email from Dave. he has collected samples from three wells and composited into one sample for disposal classification. he mentioned that based on site condition and use, it may take two days to complete the sampling. 06/24/16-Hiralkumar Patel. approved EnviroTrac's invoice (# DC2069.00-1) for project coordinate, file review and calls to property owner/lab. 07/05/16-Hiralkumar Patel. 8:36 AM:- received email from Shalini Williams (shalini.williams@testamericainc.com) from Test America including results of waste classification sample. 07/22/16-Hiralkumar Patel. 9:21 AM:- received email from Dave requesting signature on waste characterization report as generator for disposal of purge water from site. 07/27/16-Hiralkumar Patel. 10:22 AM:- sent email to Dave including signed copy of waste characterization report. approved EnviroTrac's invoice (# DC2069.00-2) for project management, sample collection for disposal parameters and coordination with lab. 8/23/16-Vought-Received email from EnviroTrac (Lorthior) on 8/17 requesting a contract increase on this spill as Albany recently rejected an invoice as amount was over the callout. Vought sent email reply on 8/18 to Dave with cc to RSE and DEC Patel that Dave, If you can provide the spill number, brief scope of the ongoing and upcoming work (in three or four sentences), and an approximate estimate, we will have someone take care of it and get back to you, most likely me. On 8/22/16, Vought received email from Lorthior with cc to RSE and DEC Patel that Attached is the original call out. Job was for a few days of sampling at the site. Problem was we were handed the job, but knew nothing about it. We spent quite a bit of time gaining access to the site and making sure the wells were A) accessible (small site, lots of parked cars) and B) the wells were actually usable. Sampling was the easy part. We had a

STATION 800, LLC (Continued) **U000414037**

budget of $5,000.00. Between the initial site visits to figure out what we needed to do, the sampling and the waste disposal, we are up to $6,325.00. Vought increased Work Authorization and submitted to RSE for signature. 8/29/16 TJD Test America C008010 Petroleum CAP #56 was approved. Document already in DECDOCS. 08/31/16-Hiralkumar Patel. DEC Vought sent revised standby contractor authorization form to EnviroTract on 08/23/16. 9:57 AM:- sent email to Dave and asked him to submit sample results for review. 10:22 AM:- received email from Dave including sample results. groundwater analyticals:

---6-------53--------26 out of fourteen (14) wells installed
previously, only thirteen wells were sampled. well MW-4 was not
sampled. based on review of recent groundwater sampling, the
department requires further groundwater monitoring and possibly
remediation. 12:16 PM:- left message for OAG Jennifer. 1:28 PM:- sent
email to OAG Jennifer requesting copy of correspondences
sent/received by AG's office in this matter after Mar. 8, 1999. email
copied to OAG Riggie and DEC Austin. 12/14/16-Hiralkumar Patel.
approved Test America's invoice (# 46265898) for analysis of
groundwater samples collected in Oct. 2016. 01/12/17-Hiralkumar
Patel. approved EnviroTrac's invoice (# DC2069.00-5) for project
management, well gauging and groundwater sampling.
01/29/19-Hiralkumar Patel. reviewed initial documents from 1993/1994.
as per subsurface investigation report dated 04/06/1994, highest
level of free phase petroleum product (in MW-8) and dissolved VOC
contamination (in MW-9) were noted in middle of property near the
tank mat. also as per the report, the reduced levels of dissolved
BTEX in the perimeter wells indicate that the center of the plume is
defined on the subject property. as per PBS record, seven (7) 550 gal
gasoline USTs were closed-in-place in June 2000. DEC Vought and DEC
Krimgold reviewed PBS record on 05/14/09 and noted that closed USTs
were never tightness tested. as per ISR issued on 09/30/1996, the
subject site was listed as spiller and the Department took over the
spill investigation/remediation due to owner's lack of concern
(financial inability). as per NYC ACRIS records, Bejamin Hadar
purchased the subject site on 06/07/1985 and transferred deed to
Steady Realty LLC. as per the NYS Department of State Division of
Corporations, Bejamin Hadar is listed in mailing address for Steady
Realty LLC. 1:19 PM:- sent text message to Ms. Rojas requesting a
call back. 2:05 PM:- spoke with Mike Alvin at Alvin Petroleum who
provides tank system maintenance service to the site. Mike remembers
spill investigation in 1993, but doesn't know who paid (property
owner or Amoco) for initial investigation conducted at the site. Mike
stated that Jose Pimentel is dealer for the site and generally calls
for any required maintenance. 2:11 PM:- spoke with Mr. Pimentel. he
manages maintenance/inventory of existing tank systems since 2012.
Mr. Pimentel conducted a subsurface investigation in 2012 prior to
start managing tank systems. he stated that property owner owns tank
systems and BP provides fuel. asked Mr. Pimentel to submit copy of
Phase II report from 2012. Jose Pimentel **on-site tenant** Station
800 LLC. PH. (917) 893-2253 email: republic052@yahoo.com 2:42 PM:-
sent email to Mr. Pimentel and Ms. Rojas. asked Mr. Pimentel to
submit copy of subsurface investigation conducted in 2012. asked Mr.
Rojas to call back to discuss requirements for further
investigation/remediation at the site. 3:09 PM:- sent email to OAG
Jennifer requesting information as per email dated 11/03/16. email
copied to OAG Riggie. **need Phase I for historical tank system
locations.** **two PBS #s for the site. one PBS registration (for
waste oil tank) expired in 2014.** **site map with sample analyticals

Tank Info:

Tank Number:	001
Tank Id:	15017
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

E00 - Piping Secondary Containment - None
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None
B00 - Tank External Protection - None
F00 - Pipe External Protection - None
J01 - Dispenser - Pressurized Dispenser
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
K00 - Spill Prevention - None
C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	01/15/1920
Capacity Gallons:	3500
Tightness Test Method:	NN

FINDS:

Registry ID: 110004564329

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Spiller Company:	RESIDENCE
Spiller Address:	400 WEST 149TH ST.
Spiller Company:	001
Contact Name:	ANDREW KELLY
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 07/21/2005: Owner of property: Alice M. Dear 400 West 149th Street New York, NY 10031 212-283-5231 Spoke with Ms. Dear. Tank was closed in 2005. She will send documentation. - M. Brand NYSDEC DER Albany. 08/01/2005: Received fax from owner with certification and documentation of tank closure and abandonment. Documentation includes: Invoice/job ticket dated 07/12/2004 from Tanksalot (A.B.C. Tank Repair, Brooklyn) for the pump-out of 1,080-gallon tank. Notarized certification letter dated 05/27/2005 to NYC Fire Department from Henry Traktman of Metropolitan Heat & Power Co. (Oil Burning Equipment Installer License #2689A and Install/Test/Repair Buried Tanks License # 61830378)regarding the cleanup and abandonment of tank on April 1, 2005. Tank contents were pumped out and tank/lines purged. Tank was filled with sand and all connecting and fill lines plugged and/or disconnected. Letter certified that tank was legally abandoned in compliance with Administrative Code of NYC and section 21-02 of the NYC FD rules. Spill closed 08/09/2005 based on documentation. M. Brand NYSDEC DER Albany."
Remarks:	"PROBABLY A FEW OUNCES WAS SPILLED, OIL COMING UP FROM AN UNDERGROUND

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"11/16/2016: Rashad Called Isabel and left message. 11/17/16 - Obligado - This spill has been assigned to me as per Vought as it is a NYCT subway facility. According to Francine, NYCT observed an intrusion at 148th Street Station/Lennox Yard in Manhattan. With the water there is a sheen, and it is suspected the school, which has a boiler room on the other side of this wall has had a release. OSS has been told, no one from the school has been able to be contacted. The intrusion is intermittent, but was first identified sometime on Tuesday 11/15/2016. We are seeking the assistance of NYSDEC, please advise if an investigation will be conducted to see if the school is the RP of this most recent Intrusion. I believe Omar also called Isabel to follow up, and may be assigned to the case. I called Francine Maebauer. The product is seeping into the under ground station. The seep is in a non public area. The hydraulics division believes that there is a tank adjacent to the station in the Frederick Douglas Academy. They will arrange for access for me to observe the seep. I called DOE Fuel Division and spoke to Munendra at 718-349-5752 regarding PBS #2-354007 Public School 10 at 2581 Adam Clayton Powell Jr Blvd, which is the adjacent school. He said they have 2 15,000 double wall ASTs. I will meet Tilac Ramautar 347 764 3949 at the site. 11/18/16 - Obligado - I met Tilac at the site and we inspected the basement. There was approximately 2 inches of water in the basement and floating oil on the water leaking from an oil transfer pump. We walked outside to the NYCT subway yard and there was oil on top of water in a small alcove area adjacen to the building. Tilac hired Riteway who arrived and began pumping oil and water from the basement. They then proceeded to remove oil stained debris and pump out oil and water from the NYCT yard alcove area. When I left the site at 1600 hrs Riteway was still working in the yard area. 11/19/16- Obligado - I inspected the site first thing in the AM and observed that the NYCT yard alcove area still had water with floating oil on top, about a 20 square foot area, slightly smaller then the day before. After returning to the office I called Riteway and Anthony Lara said his guys finished pumping oil from the alcove area yesterday and today they were working in the tank room to pump oil and water from the tank room. He said that the oil I saw in the alcove had come back in over night after he pumped the area dry. He said the remediation work in the NYCT will be more complicated as the oil appears to be coming from the subsurface. He said there is about 3 ft of soil in that area that is likely contaminated and he does not have authorization from NYCT to do excavation in that area. I called BOE Munandra and reiterated to him the situation in the NYCT yard and he agreed that additional work will need to be done but they will do what they have to do. He said they will do a full system test on the system to make sure there are no continuing leaks. 11/21/16 - Obligado - I spoke to Francine and told her the status of the clean up and that the remediation was more complicated due to subsurface impacts in the yard. We agreed to potentially have a site meeting to discuss further. I called Rob Hill of Riteway. They are cleaning tank

FREDERICK DOUGLASS ACADEMY (Continued) **S119028056**

1 today and they will test the system after. Tomorrow they will empty and clean and test Tank 2. 11/23/16 - Obligado - Representatives from NYCT (Francine Ocampo and others), DOE, and DEC (Obligado) and Riteway (Anthony Lara) met at the site to discuss the spill and remedial options. The subway yard alcove was still impacted by petroleum. Floating oil was still present on top of standing water. The following is a summary: DOE will submit a Remedial Work Plan for to remediate the alcove. NYCT will provide subway yard as builts of the Area of Concern to DEC, to provide to DOE. The Area of Concern is the alcove north of the walkway. We discussed remediation via a guzzler to remove contaminated soils, water, and product. The RAWP will need to be approved by NYCTransit. The RAWP will need to be P.E. Stamped. 11/30/16 - Obligado - I sent an email summary to all parties with the following points: -According to the DOE, the tank system at the School passed a complete system test. -At the time of the meeting, the sump pump in the school basement was still inoperable. DOE needs to replace the pump which may address high water table conditions. -The DEC requires additional clean-up work in school tank vault which still had residual oil and contaminated material on the vault floor. -The Area of Concern (AOC) for remediation in the subway yard is limited to the square alcove area west (school side) of the elevated walkway. There may be has much as 3 feet of residual fuel oil contaminated soil on top of bedrock in the alcove from historic oil spill(s) from the school basement. The high water table appears to have brought residual oil to the surface. -The current conceptual remedial plan is to use a guzzler to remove oil and contaminated soil from the alcove. If feasible, the guzzler hose will snake through the gap between the school and subway station walls. Riteway may need to find an alternate type of hose which will fit through that gap. -NYCT will provide the DEC with as-built drawings of the AOC. DEC will provide drawings to DOE to develop a Remedial Action Work Plan (RAWP) -DOE will submit a RAWP for the remediation of the subway yard to the DEC. After DEC review, DEC will provide the RAWP to NYCT for approval. -NYCT requires the RAWP to be signed by a P.E. 1/6/17 - Obligado - I sent Francine an email inquiring if they had located design drawings of the area in question yet. 1/10/17 - Obligado - I emailed Munendra to inquire about the status of the clean up in the School. According to Mununendra the status is as follows: Thus far both oil pumps and sump pumps were replaced. All debris and contaminated materials were removed and properly disposed. The entire tank room including the tanks were power washed clean. Both tanks are getting painted. When this is done we will we will epoxy paint the tank room floor. 1/12/17 - Obligado - I spoke with Francine Ocampo at NYCT system safety. They have no additional design drawings of the area in question. She said based on her discussion with NYCT MOW generally speaking the conceptual guzzler plan for soil removal was ok. I sent an email to Munendra informing him there are no additional design drawings and that he should submit a Work Plan to the DEC which will be forwarded to NYCT for review. 2/2/17 - Obligado - I inspected the boiler pump room and tank room with Anthony of Riteway and Tilak from DOE. The clean up in the building is complete. The entire tank vault has been cleaned and apoxy painted. He still plans to paint the boiler pump room. The sump pump has been repaired and was operational. In the NYCT yard, the ponded water and floating product has subsided below the surface. A small 1 x 1 pit was evident in the alcove, it is unknown who dug the pit. Free product was observed in the pit at about 1 ft depth, which is the presumed new

FREDERICK DOUGLASS ACADEMY (Continued) **S119028056**

depth to water when the sump pump is operational. It appears that the water level in the alcove yard and the sump room are hydraulicly connected. Riteway will develop a remedial plan. 4/25/17 - Obligado - I sent a letter to the NYC Dept of Education Mr. Sharma notifying him that the RAWP is overdue. I required submission of the overdue RAWP within 30 days or this case will be referred to the office of General Counsel. 5/2/17 - Obligado - I received the work plan submitted by Riteway. I disapproved the work plan based on the below comments and required resubmission within 30 days. 1) results of Engineering Assessment included in the plan 2) Utility Markout prior to excavation 3) 8260//8270 analysis 4) Scaled site plan showing excavation area 5) submission of Remedial Action Completion Report after remediation 6) Remove cost and contract language from submission 7) Implementation Schedule 5/22/17 - Obligado - I received the revised Work Plan. 6/7/17 - Obligado - I completed review of the Work PLan. Items 2 and 4 were not addressed in this second submittal. Due to failure to submit an acceptable and approvable workplan I sent Munendra Sharma of DOE a Stipulation AGreement to clean up the spill in accordance with a corrective action plan. 6/13/17 - Obligado - I spoke to Munendra over the phone. He said that Riteway did not have the resources to provide the RAWP the DEC required. He will have the School Construction Authority take over the clean-up as they have an engineering firm who is capable of preparing an appropriate work plan. I told him that I agreed with the proposed course of action. 7/14/17 - Obligado - I received a phone call from Melisa Demmet at SCA. SCA is taking over the clean up. A tentative site meeting is scheduled for 7/14/17 with AKRF and SCA. 7/19/17 - Obligado - I met SCA, AKRF, and NYCT personnel at the site. We inspected the school pump room and tank vault. We observed oil seeping up through the tank vault floor with the groundwater. Photos in edocs. There was a slight sheen on the water in the sump. We discussed the remediation plan. In light of the product seepage into the tank vault room, AKRF is considering doing some remedial investigation to determine the extent of the product plume beneath the building. Preliminary discussions for some hand borings in the basement and in the alcove. They will submit a Remedial Investigiation Plan to the DEC for review. 8/9/17 - Obligado - I reviewed and approved an investigation workplan to do 5 soil borings in the school basement. The borings will be 3 ft deep or to bedrock, which ever is shallower. The purpose of the boring is to observe for the presence of LNAPL beneath the school basement floor. Prior to advancing soil borings they will perform a geophysical markout both in the school basement and in the alcove area in the NYCT transit property. I forwarded the workplan to Michael Mandac of NYCT for access approval. 11/1/17 - Obligado - I reviewed the Spill Delineation Report. 5 soil borings were advanced in the basement. The borings were advanced 3 ft until bedrock refusal. No Groundwater or LNAPL was detected in the borings. Elevated PID readings were detected between 47.8 ppm and 403 ppm in SB5. No LNAPL was detected in the soil borings. The report recommends excavation in accessible area, and to the amount practically feasible, collection of post excavation soil endpoint samples, and backfilling with clean backfill. I sent an email to Melissa Demerrit concurring with the recommendations and requesting submission of a Remedial Action Work Plan. 11/6/17 - Obligado - RAWP received. 11/9/17 - Obligado - I reviewed the RAWP. The plan proposes to excavate the contaminated soil in the alcove area to extent feasible and collection of endpoint samples. I provided comments on the RAWP. 11/15/17 - Obligado - I

FREDERICK DOUGLASS ACADEMY (Continued) **S119028056**

reviewed a response from Melissa Demmett on my comments. She adequately addressed my comments. I sent an approval letter to NYCSA with 2 modifications, 1) remediation work during off-school days, 2) stockpiled soil will be covered with plastic sheeting. RAWP implementation upon approval from NYCT Office of System Safety. 3/27/18 - Obligado - I received an email from Melisa Demmet at the NYCSCA. We would like to touch base with regard to the on-going coordination and delays of the project. In a February field meeting was set-up to discuss the scope of work between IEH, AKRF and Lyudmila Bord and Miron Kuchuk from the Capital Program Management (CPM) group of NYCTA. At that time SCA was still awaiting feedback regarding RAWP approval and/or comments. Last week AKRF received a call from Norman Lindo of the NYCTA, and he has requested the submission of a full-sized stamped drawing set with cross-section views showing the existing Transit structures and the extent of our excavation. He is particularly concerned about our proposed excavation shifting the footings for the control house. Since we currently do not have access to this information, AKRF will need to try to obtain this information from the NYCTA microfilm records. In addition to the stamped drawing set, Track Safety Training is required and will be arranged by NYCTA. 4/12/18 - Obligado - I received and approved a revised RAWP Figure 2. The figure adds a 3 foot buffer around NYCT transit structures due to concerns of undermining the footings for the control house. 9/26/18 - Obligado - Remediation Work was Completed the 1ast week of August.. Report to be submitted by the end of next week. 10/9/18 - Obligado - I reviewed a Remediation Completion Report. 25 yards of contaminated soil was removed from the alcove down to the bedrock at 3 ft below grade. Additionally the oily water mixture was vacuumed out of the vaults. Manifests were included. A three foot buffer around NYCT structures and building footings prevented removal of all contamination. Several endpoint samples were above soil clean up levels for petroleum. While residual petroleum impacts remain, the spill has been remediated to the extent feasible based on constraints in the NYCT yard. Additionally, significant tank system repairs and oil clean up activities was undertaken in public school 10. This spill no longer appears to be a threat to human health or the environment. Spill closed. "

Remarks: "School next to building is leaking clean up is pending School has not been notified at this time"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 153424: R. Mahoney # 97417 Field operator called to report that he found a spill of transformer oil. He states that in Vault 6090 He found 1 pt. of oil that is leaking from a bushing. The oil landed on the floor & is mixed with 8 of dirt & leaves. There is a sewer connection as per plate 59-G. The I&A will be sent down to

VS 6090 (Continued) **S106469138**

the location to check the trap. Samples will also need to be taken. Update: 05-17-04 @ 19:00hrs Leardi #13625 inspected the unit and found less than 1 gallon of oil. Transformer is leaking out two spots. Sewer & waterways were not affected. Supv. took to samples, 1-oil id and 1-pcb. Lab Sequence Number: 04-03799-001: TOTAL PCB 12 ppm 07/09/04 17:04 E.Hulser#39723, cable supervisor, notified the control center on 07/09/04 at 16:05 hrs. that the cleanup was complete in V6090 on 07/09/04 at 5:45hrs. This was a final cleanup. V6090 was double washed with slix and a yellow environmental tag was removed. The source of the spill was a leaking transformer, which has been removed and replaced. The cleanup was completed on 07/09/04 at 11:00 hrs."

Remarks: "about 1 pint of dielecric oil was spilled from the bushing on a faulty transformer. clean up is pending removal of the transformer"

HW Code:	231009
Record Add:	02/06/2003
Record Upd:	06/14/2006
Updated By:	DMMOLOUG
Site Description:	The former Film Storage Warehouse is approximately 0.25 acres and is located at 203-209 West 146th St. in Manhattan. The property is located on the north site of West 146th St. between Adam Clayton Powell Jr. Boulevard and Fredrick Douglass Boulevard. The site is bounded on the north and west by residential buildings, and on the east by commercial buildings with residences on the upper floors. The former warehouse site has been unoccupied for over 50 years and is currently vacant. A site investigation was funded by EPA as a targeted site assessment. A Site Investigation Report was approved in November 2004. The site did not qualify for addition to the Registry of Inactive Hazardous Waste Disposal sites.
Env Problem:	Several contaminants were detected in soils including semivolatile compounds, (primarily polyaromatic hydrocarbons)and several metals. Most of the soil contamination appears to be related to historic fill material. The building interior also has debris piles containing asbestos and lead (from insulation and lead paint, respectively). Soil vapor beneath the building contains volatile organic compounds above expected background concentrations.

Contact Name:	DYLAN MARCHESCHI
DEC Memo:	"2/21/14-Zhune spoke to Dylan Marcheschi 347-927-7871 (tenant at appartment 66 top floor). He said there is oil odor in his apartment that the odor sicked him. He also said that he spoke to the super and the super told him that there was oil spill in the boiler room. Spuer 212- 564-2111 2/21/14-Zhune spoke to Rasin Poskic (Manager of the building) 917-509-5133. He said they had a delivery three days ago and oil was coming by the fill line but the plumber fixed the problem. Two days ago the tenant called the Fire Department they inspected the site and found nothing. Con-Ed also inspected the site and found nothing. As per Rasin today morning they had a delivery in the morning and probably the vapors that came by the vent pipe went up and entered in Mr. Dylan apartment. 2/21/14-Zhune called Dylan and let him know that the DEC will investigate the oil odors but if he wants his lawyer to speak to the DEC lawyer he has to bring his lawyer to the office. He said that is ok that all he wants is a writting document of the findings. 02/21/14-Hiralkumar Patel. alternate address: 402-410 West 148th Street PBS #: 2-267228. as per PBS record, the site has one 7,500 gal #4 oil AST in contact with soil. the tank was installed in Jan. 1950. other spill # 0913598 was reported on 03/24/10 as #6 oil tank failed a tightness test. as per caller, testing was done for potential buyer at that time. as per Protest, the tank testing company, stains were noted on the wall where remote fill line comes to the building and also on top of the tank where supply/return lines are connected to the tank. DEC Brevdo spoke with Bob at Protest who stated that no further work was done after tank test on 03/24/10. case still open. 402-412 West 148 LLC. **property owner** c/o Pinnacle Management Group **property management** 1 Penn Plaza, Suite 4000 New York, NY 10119 Attn.: Rasim Toskic **property manager** PH. (212) 564-2111 Ext. 3001 (O) (917) 509-6133 (C) 11:58 AM:- spoke with Mr. Toskic. inquired him about tank test failure report in 2010 and recent fill line leak. he mentioned that after noticing leak in remote fill line, located under the sidewalk, they abandoned the leaking fill line and installed a new fill line. couple of days ago, they noted couple of drips from the existing fill line which was fixed immediately. 02/21/14-Hiralkumar Patel. 2:45 PM:- visited site. met Ragip, building super. site has six story building with a basement. site has

BOILER ROOM (Continued) **S116552921**

one 7,500 gal AST, sitting on the floor, in secondary vault. as per tank label, tank contains #6 oil. the tank is located along the building's northern foundation wall, in northwest portion of the building. the existing fill port and vent pipes are located along the building wall. all lines are aboveground. noted some oil on tank room floor. Ragip mentioned that there was some oil spilled from an elbow on existing fill line. oil spilled onto tank room's concrete surface. observed oil on north side of the tank and some oil spots at west end of the tank. asked Ragip to clean remaining spill in tank room. found old, previously abandone, fill line in tank room. noted signs of oil seepage from building's foundation wall in area underneath the previously closed fill line. Ragip mentioned that they found leak in former fill line in 2010 (spill #: 0913598) and installed a new aboveground line. noted petroleum odors inside the elevator only. no odors noted outside the elevator. due to odors in elevator, inspected elevator pit. no signs of petroleum product noted in elevator pit. Mr. Marcheschi lives in apartment 66, located on 6th floor, in northeast corner of the building. no odors noted in 6th floor lobby. following actions requires, based on observations during the site visit: - subsurface investigation along the formerly abandoned remote (and leaking) fill line - tightness test of the tank 3:12 PM:- spoke with Mr. Toskic. asked him to test the tank, by the end of 02/25/14. Ragip **building super** PH. (646) 261-0797 3:34 PM:- received call from Isak from building management. informed him about required subsurface investigation along abandoned remote fill line and tank test by the end of 02/25/14. Isak Radoncic Pinnacle Management Group PH. (212) 564-2111 Ext. 3110 (O) (646) 739-1461 (C) email: isakr@pinnacleny.com 02/24/14-Hiralkumar Patel. discussed with DEC Austin and DEC Vought. due to petroleum odors in elevator, the Department requires immediate sealing of the elevator pit. 12:26 PM:- left message for Isak and informed him that the department requires immediate sealing of elevator pit. 12:30 PM:- spoke with Ms. Toskic. he mentioned that Isaac handles building maintenance issues and he will call back. Mr. Toskic also mentioned that boiler company will do tank test today. 02/25/14-Hiralkumar Patel. 11:50 AM:- spoke with Isak. he mentioned that during inspection, they noted broken gasket on tank manhole and crack in vent pipe. they fixed manhole gasket and vent line and will test tank either today afternoon or tomorrow morning. Isak confirmed no more odors in elevator after fixing manhole and vent pipe. 11:58 AM:- spoke with Mr. Marcheschi. he confirmed no odors in building right now, but suspects that odors will come back next week. 02/26/14-Hiralkumar Patel. 9:33 AM:- received call from Abraham Wachsler from NYC Tank Testing. he went to site for tank test, but due to some issues with welding on tank top, testing could not be done today. 10:12 AM:- left message for Isak. 10:13 AM:- received call from Isak. he has discussed tank issues with NYC Tank Testing. he has also informed him oil company not to deliver anymore oil until tank is repaired and tested. suggested him to seal the fill port to prevent misdelivery from other companies. he mentioned that currently tank has around 4500 gal of oil in it. as no active leak noted from the tank, they choose to burn oil down to 1500 gal. at that point, contractor will pump out remaining oil/sludge, clean the tank, repair it and test it. Isak mentioned that based on daily consumption, tank cleaning will happen by middle of next week. based on available information, asked him to provide tank test result by the end of 03/10/14. also asked thim to monitor air quality in elevator. due to no indication of oil in elevator pit and no more

BOILER ROOM (Continued) **S116552921**

odors in elevator (also confirmed by Mr. Marcheschi), agreed with Isak not to seal the elevator pit, at this time. but it may required based upon information/observation after tank repair/testing done next week. 10:35 AM:- sent email to Isak and asked to submit tank system test result by 03/10/14 and monitor elevator daily, until tank repair and test done. 03/04/14-Hiralkumar Patel. 2:30 PM:- visited site. met Ragip. no petroleum odors noted in elevator. minor odors in tank room. Ragip mentioned that tank will be cleaned on 03/06/14. 03/10/14-Hiralkumar Patel. 9:40 AM:- spoke with Isak. he mentioned that the tank passed tightness test on 03/07/14. he will submit copy of test result. 03/13/14-Hiralkumar Patel. 11:19 AM:- received email from Isak including tank system test result. the tank system was tested tight on 03/06/14. based on available information, case closed. **also refer to spill #: 0913598.**"

Remarks: "apartment complex boiler had a leak. tenant still smells fuel oil and would like an inspection with the basement with dec and his lawyer"

DEC Memo:	"03/24/10. Zhune spoke to Bob urban from Protest 631-3214670. he said they test the AST 7005 gallons in a vault. The test fail with a gross dry leak. There is stain at the wall with the remote fill comes to the building. There is stain on top of the tank where suply-return line connected to the tank. they are doing this work to the byer of the building not to the owner. PBS 2-267228. 07/16/13 - Spill Case is transferred from Brian Falvey (PBS Unit) to V. Brevdo (Section B) as per DER Region 2 decision - Tank Test Failure Spill Case. VB 11/05/2013 - V. Brevdo Called and spoke with Bob Urban of Protest (631) 321-4670 and asked if he has any information indicating that spill can be closed or whether action is needed. Mr. Urban stated he will look in to this case and will call me back. V.B. Bob Urban called back and said he can not be of much help. They did this testing for potential buyer who seems to have walked away. They did not do any followup work which would help to assertain status of this spill. VB. 03/13/2014 - V. Brevdo e-mail from Kumar Patel of Spill Prevention and Response: On 02/21/14, we received another spill report for the above referenced site (spill #: 1310983) due to petroleum odors in the building. After further investigation, the spill # 1310983 is closed. I did informed property manager about other open spill case due to leaking fill line. Please note that during my site visits, I did observed petroleum stain on building's foundation wall, under the location of former leaking fill line. Below are some numbers related to the site: 402-412 West 148 LLC. **property owner** c/o Pinnacle Management Group **property management** 1 Penn Plaza, Suite 4000 New York, NY 10119 Attn.: Rasim Toskic **property manager** PH. (212) 564-2111 Ext. 3110 (O) (646) 739-1461 (C) email: isakr@pinnacleny.com 03/13/2014 - V. Brevdo e-mail to property manager Mr. Isak Radoncic: March 13, 2014 Dear Mr. Radoncic: On 02/21/14, the New York State Department of Environmental Conservation (the Department) received second spill report for the above referenced site (Spill No. 1310983) due to petroleum odors in the building. After further investigation, the Spill Case No. 1310983 is closed via administrative consolidation with the earlier Spill Case No. 0913598 opened on March 24, 2010. The Department's Spill Prevention and Response staff (Mr. Kumar Patel) informed property manager about the other open spill case No 0913598 due to leaking fill line. Please note that during the site visit Mr. Kumar Patel observed petroleum stain on building's foundation wall, under the

APT BUILDING (Continued) **S110243968**

location of former leaking fill line. Please be advised that according to the Environmental Conservation Law and New York State Navigation Law, the site owner is under the obligation to conduct environmental investigation and remediation of the property and to rectify leakage of oil from the tank and/or tank equipment. Please contact me at your earliest convenience at 718-482-4928 or via e-mail so the we can discuss the appropriate course of action by the property owner to address aforementioned environmental site condition. Sincerely, Vadim Brevdo V. Brevdo also called Mr. Isak Radoncic on 212-564-2111 Ext. 3110 (Office) and left voice mail explaining the nature of my call (see e-mail above). VB 06/26/2014 - V. Brevdo e-mail from NYC Tank Testing to Kumar Patel: Dear Inspector HiralKumar Patel, Attached please find our closure report for spill # 1310983 at 402 West 148th Street. Please review the case at your earliest convenience. If any additional information is required, please feel free to call Abe at 646-321-2876 or our office at 718-731-7011. Thank you, Goldie New York City Tank Testing Inc. 1624 Webster Ave. Bronx, NY 10457 Phone:718-731-7011 Fax: 718-228-4238 06/27/2014 - V. Brevdo June 27, 2014 Dear Goldie: My name is Vadim Brevdo and I was assigned to review information pertinent to spill cases 1310983 and 0913598 for the subject property. Please note that spill case 1310983 had been administratively closed and consolidated with spill case 0913598 which remains open at this time. I have a question on your submission to Mr. Patel (your e-mail of 6/26/2014, 2:50 p.m.): June 12, 2014 letter from New York City Tank Testing, Inc. states in first paragraph on the second page that enclosed are copies of analytical report and the chain of custody . Attachments to your e-mail did not appear to contain aforementioned analytical report, which the Department needs to review. Could you please send a copy of analytical report to my attention? Contact me if you have questions. Thank you. Vadim Brevdo 07/02/2014 - V. Brevdo Spill Case Closure Decision July 2, 2014 402 West 148th Street, Manhattan Spill Cases 1310983 and 0913598 The samples were taken at three locations in the area of old fill box and old fill route pipe between the building wall and the curb at 5 7 below surface grade. Two out of three soil samples showed non detect (ND) for both VOCs and SVOCs. One sample showed ND for VOCs but presence of SVOCs. Some of the SVOCs (pyrene, phenanthrene, fluoranthene) were below CP-51 cleanup values in this one sample. Some of the SVOCs (Benzo(a)anthracene, Benzo(a)pyrene, Benz(b)fluoranthene, Benz(k)fluoranthene, Crysene) were above CP-51 values but within the same order of magnitude as CP-51 values for these compounds. Taking aforementioned analytical data into consideration, the Department concurs with the spill case closure request by NYC Tank Testing in their June 12, 2014 letter report. This is very limited impact, no threat to human health of the environment as long as there is no long term contact with the soils beneath the sidewalk at one location. Spill case is closed effective July 2, 2014. V. Brevdo "

DEC Memo:	"10/21/08-Vought-Spoke with off-hours responder DEC Piper who was on-scene with DEC Ahmed. Petro hired Milro to respond to spill last night and Piper/Ahmed performing site inspection to determine DEC requirements (if any). DEC Piper responded to site with DEC Ahmed. Milro on scene last night and pumped 2 manifolded 275s. Upon arrival no odors were present in ground floor of brownstone. 0.0 on pid. I entered basement through closed door and slight odors were present, 0.0 on pid. The tanks were behind another door and when I opened it there were high amounts of vapors. Oil soaked speedy dry was present. I spke with Petro, which stated that there was a delivery yesterday though has been on a stop order since march bc of a bad line. The line was replaced and tanks were filled. It is now assumed that the tank was bad the entire time though it needs to be investigated. Milro was hired to complete work. 12/11/08- DECPiper- I recieved call from Toy, homeowner requesting I perform and inspection. 12/15/08- DECPiper- I inspected site. PID readings on ground level were 0.0. As I entered basement PID readings increased to 2 on stairs and 4 on basement level. The floors were pulled up and a solid concrete floor existed. There wasa small area of wood that needed to be removed that had readings of 50ppm. No otherareas exhibited PID readings above 4 ppm. The floor can be epoxied and once docmentation is recieved, the spill can be closed. 1/7/08- DECPiper recieved and reviewed closure report. Based on work to date, this spill is closed. See e-docs if warranted."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND "
Remarks:	"There is a car wash next door to caller. Over the years from washing the underside of cars, a continuous buildup of oil has actually permeated the concrete sidewalks and saturated the ground around them. Numerous complaints have been made to New York City 3-1-1 with no satisfaction. There is concern over an adjacent water line."

DEC Memo:	"03/14/07-Hiralkumar Patel. received during off hours duty. spoke with Erik, property manager. asked him to hire contractor for initial cleanup to prevent any vapors inside building. received call from Anthony from PTC. they did little cleanup. found oil seeping into basement through wall where fill line enters into building. fill line

RESIDENCE (Continued) **S108466713**

runs underground under sidewalk for about 8 ft. cleaned out oil on surface in basement. visited site. met Jose (646-228-6255), building super. site has 3000 gal # 4 oil tank enclosed in concrete box. found oil leak from wall where fill line enters into building. no odors inside building. Jose noticed little oil from same location about month ago after oil delivery and after last delivery, which was yesterday morning, he noticed more oil coming into building. 41 residential units in building. found fill box sealed with cement. fill line leaked. PBS #: 2-000442 Arik Lifshitz 341 E 10th Street New York, NY 10009 Ph. (212) 673-2300 Fax (212) 673-2999 spoke with Mr. Lifshitz. asked him to renew tank registration as it expires on 04/17/2007. sent letter to Mr. Lifshitz requiring tank test, soil/groundwater delineation and endpoint sample. letter faxed to Mr. Lifshitz. 04/05/07-Hiralkumar Patel. left message for Arik for updates. 04/12/07-Hiralkumar Patel. received message from Arik. spoke with Arik and Ralph. Ralph told that they hired PTC for required work. he will call PTC and ask them to submit report. asked Ralph to renew thier PBS registration. 06/04/07-Hiralkumar Patel. left message for Arik. 07/24/07-Hiralkumar Patel. spoke with Arik. he will check with property manager, Ralph for any reports. left message for Ralph. 08/27/07-Hiralkumar Patel. spoke with Ralph at management. asked him to submit report by Aug. 31st, 2007. 08/31/07-Hiralkumar Patel. received call from Mark from PTC. he will send report next week. 10/11/07-Hiralkumar Patel. left message for Mark at PTC. spoke with Ralph. he will talk to Mark and will send report. 10/31/07-Hiralkumar Patel. spoke with Ralph. asked him to submit report by Nov. 9, 2007. 11/02/07-Hiralkumar Patel. received report from Mark. they found fill line leaking. replaced fill line and found tank system tight. PTC took eight soil samples from borings and found no contamination. no indication of any excavation done at site. report missing following: - sampling depth - boring logs spoke with Jose, building super. as per him, they installed new fill box on foundation wall and never opened sidewalk. 11/26/07-Hiralkumar Patel. visited site. found patches on sidewalk and bore holes inside basement near tank location. borings on sidewalk are done about foot away from original loation of old fill line. left message for Ralph. 11/28/07-Hiralkumar Patel. received message from Ralph. spoke with Ralph. asked him to submit sampling depth. also asked him to open area where old fill line enters into building. asked Ralph to call once then open area. 11/30/07-Hiralkumar Patel. received call from Mark from PTC. he will open wall area where old fill line enters into building. he will also fax updated report with missing sampling depth. received fax from Mark with updates that samples inside building were taken at about 1 inch depth from bottom surface of concrete layer. spoke with Mark again. explained him that oil inside building was on surface but leak started from fill line and the department requires depth of samples taken on sidewalk alongwith depth of old fill line.
01/31/08-Hiralkumar Patel. spoke with Ralph. he doesn't know where new fill box is and whether any excavation done along old fill line. Ralph will ask Mark to call back. spoke with Mark. asked him to provide scaled site map with sampling location and depth. also asked to open area of wall from where old fill line enters into the building. 02/21/08-Hiralkumar Patel. spoke with Ralph about expired PBS registration. he mentioned that they already submitted form but due to missing information, it got delayed. spoke with Mark. they will open old fill line area probably on 02/26/08.
03/03/08-Hiralkumar Patel. visited site. PTC opened area where old

RESIDENCE (Continued) **S108466713**

fill line enters into building. no contamination found under sidewalk. old fill line located about 8 inches below grade. based on observations during site visit, case closed."

Remarks: "THOUGHT TO BE AROUND 30 GALLONS; FUEL LINE MALFUNTURE; SOMEONE ON SCEEN TO CONTAIN MATERIAL; HOME OWNER INFORMED TO CONTACT USA TANKS, PETROLEUM TANK AND PROVIDED NUMBERS FOR THEM; ONLY IN BASEMENT; LINE GOES UNDER GROUND SO MORE SPILLED MATERIAL IS POSSIBLE;"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY TRANSFERRED FROM Y.KRIMGOLD TO KOLLEENY TO I. ISLAM. 6/20/06- The site's soil and GW are under remediation by LiRo Enginers by installing SVE system and implementing monitoring program to document natural attenuation of dissolved phase contaminats respectively since 2004. Reviewed the Jan-Mar/05 quarterly report. The system performance data show effectiveness of soil remediation. The GW monitoring data also show substantial improvement. Soil sampling will be scheduled when influent air sampling results suggest the SVE system no longer effectively recovering VOCs and routine system monitoring to continue.- II 8/30/05- Reviewed the Apr.-Jun/05 monitoring report. The SVE system collected approx. 12.1 pounds of VOCs during the monitoring period. April 2005 groundwater sampling results showed a northward shift in dissolved phase contamination from MW-3 to the area of MW-4. However, overall dissolved phase contaminant concentrations were observed to decrease substantially in compared to previous site-wide levels. Routine monitoring (monthly) of SVE system and GW sampling(quarterly) will continue. Copied the report in the eDoc folder.- II 12/2/05- Reviewed the Jul-Sept/05 monitoring report dt. Oct. 18/05 submitted by LiRo Enginers. July 2005 GW sampling results indicate that dissolved phase contaminant concentrations continue to decrease at the site under natural attenuation. The only contamination identified at the site during the July 2005 GW sampling were minor exceedances of NYSDEC quality criteria for benzene (4 ppb) and ethylbenzene (14 ppb) in one well only out of the four wells sampled. The SVE system collected only 0.1 lbs of VOCs during the monitoring period and produced substantial induced vacuum levels at the site. LiRo recommends continued operation and monitoring of the SVE system. LiRo also recommends advancing four soil borings (location included in the report) in support of soil closeout once two consecutive rounds of influent system air sampling indicate a low volume of VOC capture. LiRo's recommendation is hereby approved. Filed the report in the eDoc folder.- II 04/05/06: This spill transferred from I. Islam to Q. Abidi. Reviewed the Quarterly Monitoring Report for Oct - Dec. 2005, dated January 20, 2006 submitted by LiRo Engineers. LiRo advanced four soil borings in Feb 2006 and they will send the report with sample results in a week. LiRo recommends discontinuation of groundwater monitoring at the site, as the latest groundwater results came out clean. Sent email to DDC on April 5, 2006 approving LiRo s request to discontinue groundwater monitoring. - QA 08/25/06: This spill transferred from Q. Abidi to J. Kolleeny. - JK 09/06/06: Reviewed LiRo's Quarterly Report for Jan.-March 2006. System monitoring data indicate SVE system has reached limit of effectiveness. Groundwater sampling in March '06 showed ND in all three on-site wells. Confirmation soil sampling in Feb. '06 showed no contamination in 3 of 4 boring locations; however, boring LBR-2, near south end of closed-in-place 4K motor fuel UST, showed highly contaminated soil from 10 to 13 feet below grade, with total VOCs of 1,404 ppm in 11-12 foot interval. Nevertheless, downgradient well MW-3, which in past has showed worst GW contamination of 3 on-site wells, has been ND for 2 consecutive sampling events, suggesting

CONVENT GARDENS DPR -DDC (Continued) **S102663768**

residual soil contamination is not impacting GW quality. Options for addressing residual soil contamination are limited; SVE system appears to have done as much good as it can, excavation would be difficult due to depth of contamination and presence of adjacent closed UST, and would likely damage nearby gazebo in the park. After discussion with Koon Tang, it was agreed that problems with attempting to excavate soil outweigh potential benefits, and that since contamination is localized and no longer impacting groundwater, no further remedial action is warranted. However, if usage of this property were to change, presence of residual soil contamination should be taken into consideration, especially if site is ever developed with a building, in which case there may be a vapor intrusion hazard. Closed spill and issued NFA letter (in eDocs folder). - J. Kolleeny "

Remarks: "OLD GAS STATION FOUND CONTAMINATED SOIL WILL EXCAVATE SOIL AND STOCKPILE AND MOVE TO DISPOSE"

DEC Memo:	"08/13/11-Hiralkumar Patel. 3:00 PM:- spoke with ERT. its not the gasoline spill, but while fixing a leak in natural gas main, they found water around the area which might be contaminated with natural gas components. ConEd contractor will remove contaminated water. 9/27/11 - Austin - Con Ed went to repair a broken gas main, and found that it had been corroded by an active leaking water main - Water from the main comingled with the gas/gas line condensate, contaminating the adjoining soils - Con Ed contained and cleaned up the spill - See eDocs files for further information - spill closed - end"
Remarks:	"1453 THE CALLER ADVISED DISPATCH THE SPILL WAS DUE TO A FAULTY LINE DURING EXCAVATION. SOIL HAS BEEN IMPACTED. CLEAN UP IS IN PROGRESS."

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"Buried fill line appears to be leaking into soil and up through the sidewalk. Temp fill line has been installed. Contractor is getting sidewalk permits and will then dig out the old line and any contaminated soil. Preferred Environmental has been hired to do the cleanup, testing and close out report. - 12/22/11 02/03/12-Hiralkumar Patel. alternate addresses: 345-385 W 145th Street, 251-265 Edgecombe Ave, 696-708 St. Nicholas Ave PBS #: 2-201111. as per PBS record, the site has one 20,000 gal #6 oil AST in subterranean vault. tank was installed in Oct. 1956. no other spills found. 2:30 PM:- spoke with Jill at Preferred. she mentioned that they sent proposal but never heard back. 2:53 PM:- spoke with Ms. Rodriguez, property manager. she mentioned that J&R Mechanical is in process of hiring contractor for cleanup. Hillview Owners Corp. c/o Midboro Management, Inc. 148 West 37th Street, 8th Floor **main office** New York, NY 10018 Ph. (212) 877-8500 Hillview Owners Corp. **property owner** c/o Midboro Management, Inc. 345 West 145th Street **on-site management office** New York, NY 10031 Attn.: Felicia Rodriguez **property manager** PH. (212) 281-3300 email: frodriguez@midboro.com Mr. Smiley Building Engineer Ph. (646) 773-3138 2:56 PM:- spoke with Mr. Grand at J&R Mechanical. he mentioned that #6 oil was coming out from sidewalk during a delivery. its about 20 ft long sidewalk between the curb (where fill port is) and the building foundation wall. he also mentioned that the tank and all associated lines run aboveground expcet the part of fill line that runs under the sidewalk. they have installed a temporary fill line. he has sent proposal from Preferred to property manager who has forwarded it to co-op board. they are waiting for response from board. J & R Mechanical Services Inc. Lenny Grand Ph. (718) 328-9935 email: leggett2@verizon.net 3:36 PM:- sent letter to Ms. Rodriguez requiring soil delineation and endpoint

SIDEWALK (Continued) **S111457056**

samples. asked her to submit report by 03/23/12. letter emailed to Ms. Rodriguez and Mr. Grand. 03/01/12-Hiralkumar Patel. 4:13 PM:- received email from David from Riteway. he inquired if borings needed prior to excavation. 03/07/12-Hiralkumar Patel. 4:11 PM:- spoke with Joe at Riteway. they will replace the fill line and will remove any contaminated soil. as they are planning for excavation, no need for soil boring at this time. 03/20/12-Hiralkumar Patel. 2:56 PM:- received email from Bill from Preferred. Preferred has been authorized to do work and they will install soil boring on 03/26/12. 3:36 PM:- spoke with Bill at Preferred. he mentioned that due to oil seepage through basement wall and oil coming up through sidewalk, owner decided to perform soil delineation prior to any excavation. Preferred will do some borings to define area of contamination, then Riteway will perform excavation. Bill is hoping to get NYC DOT permit tomorrow and will do soil delineation next week. 06/08/12-Hiralkumar Patel. 2:10 PM:- spoke with Bill. they finished investigation and submitted report to property manager. Bill will send copy of investigation report for review. Bill mentioned that property manager was going to hire Riteway for cleanup of contaminated soil. 2:13 PM:- spoke with Joe at Riteway. he confirmed that Riteway did not do the job. 2:18 PM:- spoke with Mr. Grand. he does not have much information and asked to contact Ms. Rodriguez or Mr. Smiley (buiding engineer). tried Ms. Rodriguez's phone number, but no response. 2:25 PM:- spoke with Ms. Rodriguez on Mr. Smiley's phone. she mentioned that Preferred drilled on sidewalk and collected samples. she mentioned that work has been completed. informed her that the spill cleanup report was due on 03/23/12 and must be submitted to the Department by the end of 06/15/12, or else case will be referred for enforcement. 3:01 PM:- sent email to Ms. Rodriguez and informed her that the cleanup report must be submitted to the department by the end of 06/15/12 or else case will be referred for enforcement. email copied to Bill. 3:35 PM:- received email from Bill including investigation report. abstract: - an existing 20,000 gal AST, installed circa 1956, is present within a subterranean vault in the sub-basement of the building - the AST is set on top of concrete piers within the subterranean vault, which has a pourcd concrete floor - standing water was noted within the vault <---------- - observed fuel oil on the interior wall of the AST vault, immediately beneath the location of the entry point of the remote fill piping, a depth of approx. 4 ft below outside grade <-------- - fuel oil staining was also noted on the concrete sidewalk immediately above fill piping, exterior, to the south of the building - J&R Mechanical installed a new remote fill line within the sidewalk of 145th street - during site inspection, Preferred confirmed that two former remote fill lines were abandoned and filled with concrete and one new remote fill line was present along 145th st - four soil borings (SB-1 through SB-4) were installed to refusal, ranging from 7 to 10 ft bg - soil borings were pre-cleared to a depth of six ft bg - as the subject property is situated on a steep topographic slope toward the southeast, boring SB-1 was installed just northwest (inferred upgradient) of the former remote fill lines and borings SB-2 through SB-4 were installed southeast of the former remote fill lines, in a linear pattern, along W 145th street - soils within the borings consisted of silty sands with various fill material and cobble - field screening did not identify any evidence (staining, odors, discoloration or elevated PID) of contamination within any of the four soil borings - no groundwater found before refusal - collected

SIDEWALK (Continued) **S111457056**

three soil samples at 4-5 ft bg from boring SB-1, SB-2 and SB-3 - no contamination found in soil samples - proposed to excavated soils directly below and within the trench of the former remote fill lines report includes pics showing oil seepage into the tank room. 06/13/12-Hiralkumar Patel. 3:29 PM:- left message for Ms. Rodriguez. informed her that the department requires cleanup of contaminated soil. asked her to call back to discuss. 3:32 PM:- spoke with Bill. he received call from management office and requested a cost estimate for the work. Bill is planning to remove the former fill lines and any associated contamination. Bill will submit cost estimate by 06/15/12. he will call back with update. 06/26/12-Hiralkumar Patel. 10:57 AM:- spoke with Bill. he hasn't received work authorization yet. 11:00 AM:- left message for Ms. Rodriguez. informed her that case will be referred to legal if no response, about cleanup status, by the end of today. 11:02 AM:- spoke with lady at management's main office and informed her about possible enforcement, if no response by the end of today. 12:38 PM:- received call from Ms. Rodriguez. she mentioned that they were waiting for response from Preferred. asked Ms. Rodriguez to submit a work schedule by the end of tomorrow. informed her that the work must begin within two weeks (by 07/10/12) to avoid enforcement. 06/27/12-Hiralkumar Patel. 11:33 AM:- received call from Bill. he received verbal approval from property manager. once he receive signed approval, he will apply for sidewalk permit. informed him that the work must begin by 07/10/12. 07/05/12-Hiralkumar Patel. 9:14 AM:- received email from Bill. he mentioned that Preferred has been authorized to conduct the required cleanup and will apply for DOT permit. based upon anticipated receipt of sidewalk permit next week, work may begin in week of 07/16/12. 07/06/12-Hiralkumar Patel. 12:14 PM:- received message from Bill. he mentioned that sidewalk permit application will be submitted, as soon as they get payment from owner (which is expected today). 07/17/12-Hiralkumar Patel. 2:30 PM:- spoke with Bill. he mentioned that due to on-going DOT work in area, they have to wait to get permit for required sidewalk work. asked Bill to call back by 07/23/12 with updates. 07/30/12-Hiralkumar Patel. 6:47 AM:- received email from Bill. they received DOT permit late last week and have scheduled work for 08/01/12. 08/17/12-Hiralkumar Patel. 1:02 PM:- spoke with Bill. they finished work and endpoint samples came back clean. he will submit report soon. 09/10/12-Hiralkumar Patel. 3:07 PM:- spoke with Bill. he will submit report tomorrow. 10/02/12-Hiralkumar Patel. 1:58 PM:- sent email to Ms. Rodriguez inquiring updates regarding the spill cleanup report. email copied to Bill. 11/06/12-Hiralkumar Patel. 10:45 AM:- received email from Bill including report. abstract: - excavated soil along former remote fill line - excavation was approx. 16 ft long by 3 ft wide with varying depths of 2-3 ft bg - two endpoint samples collected - no contamination found in endpoint samples 11/29/12-Hiralkumar Patel. based on available information, case closed. 4:23 PM:- sent spill closure letter to Ms. Rodriguez. letter emailed to Ms. Rodriguez and Bill."

Remarks: "1-10 gallons spilled from a line undergrounded. True amount won't be known until the sidewalk is removed."

DEC Memo:	"10/12/11-Vought-Primary off hours responder. Called and spoke to Petro (Ken Ph:718-628-3319) who noted that tank was leaking and there was one drip here and one drip there and that there was a quarter size stain on a pad that was placed underneath the tank. Ken noted that the site was placed on a stop delivery order and that there were two 275-gallon manifolded ASTs in basement and back AST could not be observed due to accessibility issues. No impact to soil or groundwater and no significant impact to concrete and as such spill

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD 5/6/2004 Sangesland spoke to Mark Salamack at PTC. He said there was a fuel delivery on 5/5 and today the super saw oil coming out onto the basement floor. The existing tank is wrapped in concrete and oil is coming out from under this wrap. PTC will set up temp tanks on 5/7. Then they will drain the existing tank, pull it out (along with all the lines) and reinstall a new tank/lines system. During this process PTC will determine if any spill occured below the

APARTMENT (Continued) **S106471583**

basement floor. If there is a contamination problem, they will clean it up and submit manifests and endpoint samples as required. 04/13/06- Case was transferred from Jake Krimgold to Koon Tang. 11/03/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. Called Mr. Mark Salamack (PTC Company) at (718)624-4842 and talk to Ms. Dianna she said PTC Company only did Tank Cleaning for J & M Reality survices (212)721-0424. -QA 11/17/06: Called J & M Realty at (212)721-0424 and left message to call me back regarding information of the spill. -QA Called Mr. Mark Salamack (Petroleum Tank Cleaner) at (718)624-4842 and talked about the spill. He said that he did only Tank Test. He said tank test was failure. He will try to send me Tank Test failure report. Rest other work who did that PTC do not know. -QA 11/30/06: Called J & M Realty at (212)721-0424 and talked to Mr. Jerry he said. This spill is cleaned up. He is going to fax me closing confirmation letter to close the spill. -QA 12/13/06: Mr. Jerry Edelman, Agent (J & M Realty Services Corp.) sent a closing confirmation letter in which he has mentioned that cause of the spill is a small amount of oil was released in to the concrete alley when the driver of the truck flushed out the delivery line with air. According to Mr. Jerry spill was promptly cleaned up using and oil absorbing compound. According to Mr. Jerry spill is cleaned. -QA 01/02/07: Called Mr. Mark Salamack and talk about the spill. According to Mr. Mark Salamack (PTC), when he went to see the spill oil was out of the tank in the basement. It could be the cause of overfilling, could be leaking of tank. Tank should be removed and soil should be checked soil underneath the tank. Called J & M Realty (212)721-0424 and talked to Mr. Jerry Edelman he said that he will send a letter mentioning the actual reason of the spill 02/05/07: Called Mr. Jerry Edelman at (212)721-0424 extension 13 and left message to call me back to discuss the spill. -QA 06/21/07: Called Mr. Jerry Edelman at (212)721-0424 extension 13 to discuss regarding spill. He was not there talked to Mr. Victor he said he will talk to Mr. Jerry about it. He will find out about the Tank Test Report (tank must be tested every five years). After getting that he will call me back. -QA 09/13/07: Called Mr. Jerry Edelman to discuss regarding present status of the spill and to send the tank test report. He was not there, left message to call me back. -QA

---------- 6/25/08: Reassigned from Vadim Brevdo to Kartik Chanda. (Chanda) 8/5/08:Chanda has reviewed this spill related documents and sent a certified letter to RP (Jerry Edelman, J&M Reality Corp), requiring that a letter or report must be submitted to DEC by 9/20/08 for review and approval. (see eDocs) 02/06/2012 - Brevdo - Review of the project information available demonstrated that there is no documented subsurface contamination that resulted from the alleged spill. According to project records of 12/13/2006, the cause of the spill was a small amount of oil release into the concrete alley when the driver of the truck flushed out the delivery line with air. According to J&M Realty Services Corp. the spill was promptly cleanup up using an oil absorbing compound. With the lack of documented subsurface contamination I do not feel there is sufficient rationale to pursue further investigation of this spill event, let alone conduct enforcement action. Spill closure is appropriate. Spills is closed effective February 6, 2012. "

Remarks: "tank is wrapped in concrete,doesnt know if it has holes in it,it is leaking out onto the ground"

FINDS:

Registry ID: 110004559406

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"6/3/04 tipple closed this spill number and referred it back to spill # 0407205 8/12/05 Sharif reopened the case since this is the source of the spill to the adjacent property at 210 146th Street. Spill# 0407205 & 9904971 represent the same location and source of spillage (both are closed). 09.15.05 SR// I spoke with Mr. Ray Kahn of ESPO today. He informed me they are taking away the ply wood floor, cleaning the dirt and repaired the leak to prevent any water seeeping through the next door wall. I advised him to provide DEC the work plan including soil boring works to be performed. 11.10.05 Sharif- Rec'd investigation report done by ESPL.Couple of spill no.s were called in before at this address. Those are-spill no. 0407205,9905161, 9904971. 12/19/05: Case reassigned to Andersen. Reviewed subsuface investigation report prepared by ESPL. VOCs and sVOCs found in soil borings. Proposed excavation. Sent approval letter. 4/19/06: Spoke with Ray Kahn of ESPL. The RP is being uncooperative. Sent letter with stipulation agreement requiring implementation of the approved RAP. Stipulation due back by May 31, 2006. Sion Rohayegh phone number: 516-848-0550 5/23/06: Spoke with Rosario Reyes (212-923-4840). Scheduled site visit for 6/5/06 to discuss possible off-site source from adjacent building, and required future work. 5/26/06: Spoke to Ray Kahn. Rescheduled site visit for 6/6/06. Oil was found in the neighbors basement. The tank was fixed and retested, but the contamination has not been remediated. The building is in shody condition, there was a raw sewage spill in the basement and an old boiler was recently removed. 5/30/06: Left a message with Rasario Reyes secretary to confirm site visit. 6/6/06: Site inspection by NYSDEC Andersen. When the spill was called in a water leak from the building to the south flooded the basement and caused the fuel oil to infiltrate that building to the west. The neighbors wall and the adjacent floor has since been cleaned. The basement of the building to the west is four feet lower than the site. Temporary walls and plywood floor that was on top of the concrete slab in the basement were removed. Endpoint samples will be taken after excavation. 7/14/06: Received phone call from Ray Kahn. Floor needs to be removed and then excavation will be scheduled. 8/21/06: Spoke with Ray Kahn (212-330-7501). The basement was

RESIDENTIAL (Continued) **S106971964**

prepared for excavation. Excavation will be scheduled soon. He will contact me when a date is scheduled. 9/18/06: Spoke to Ray Kahn. Excavation has not been scheduled yet. The owner was out of town. He will followup with the owner and call me back. 10/6/06: Spoke to Ray Kahn. Excavation has not been scheduled yet. He will call the owner and get back to me. 10/16/06: Left voice message with Rosario Reyes to followup on overdue stipulation agreement and excavation. 10/24/06: Sent stipulation agreement overdue letter. May need to refer to legal. 1/25/07: Excavation scheduled for 1/30/07. 2/6/07: Spoke to Arash at ESPL (office 212-330-7501, cell 516-315-3231). Excavation postponed due to weather. 2/23/07: Site visit. Excavation of three rooms in the basement. Product (sheen) in all excavations. Groundwater at 1-2 feet bgs. Liquid will be pumped out. Downgradient wells installed on the sidewalk. 3/6/07: Spoke to Ray Kahn. Recovery wells will be installed in the excavations, and then the excavations backfilled. Monitoring wells will be installed on the sidewalk. This will occur early next week. 3/28/07: Arash is no longer employed by ESPL. Emailed Ray Kahn (rkahn@espl.com) to followup on well installation. 4/4/07: Left message with secretary for Ray Kahn. He will be in the office tomorrow. 4/5/07: Spoke to Ray Kahn. Four wells installed in the building. Will send email with site plan. 5/2/07: Emailed Ray Kahn. Requested an update report with well sampling data and site plan. 5/29/07: Left message with Ray Kahn's secretary to return call. 5/31/07: Left phone message with Ray Kahn's secretary to followup. 6/14/07: Spoke to Ray Kahn. The four on-site wells will be gauged and sampled for sVOCs. A well may be installed in the sidewalk. 7/26/07: Emailed Ray Kahn to followup on the status of groundwater gauging and sampling. 8/15/07: Spoke to Ray Kahn. The owner has not paid him for work completed. He will contact the owner and call me back. 8/31/07: Referred to legal. 9/12/07: Received phone message from Ray Kahn. Wells will be sampled and report submitted (phone: 212-363-3775, cell phone: 917-939-7366). 10/18/07: Received groundwater sampling report. MW-2 was dry. Monitoring wells MW 1, 3, 4 were sampled. Napthalene present in MW1 at 45 ppb. 10/19/07: NFA issued."

Contact Name:	DONALD MACK
DEC Memo:	"This site had the same problem several years ago. Case has been assigned to Sawyer for investigation. 12/9/04 - Sawyer - Talked Donald Mack today there seems to still be a problem. I have sent by mail and fax a modified Contaminated Soil letter to: Maurice McKenzie Royal Management LLC 507 West 186th Street New York, New York 10033 I also talked to a Jeanette with Royal Management 212 923 4840 and tried to get them to get a clean up crew out to the site. They have fail to repsond. 12/10/04 - Sawyer - ECO Lochner responded to the site and gained access into the basement and confirmed a leak with a sheen from next door. 12/22/04 - Sawyer - Called Royal Management and let them know that they were going to have some ticketing problems for not trying to rectify this problem. 1/11/05 - Sawyer - Called Royal Management many times to try to gain access to the basement of building 200 W 146th Street with ECO Lochner. ECO suggested we go to the management office up on 186th Street. Once there he explained that no work was to be performed before we gained access to the boiler and tank rooms of that building. They were to schedule meeting with Maurice Mckenzie asap. 1/14/05 - Sawyer - Finally met Maurice McKenzie at 1100 hrs to gain access. There were numerous violations from the start not to mention they were to have already performed a subsurface investigation, as in the letter dated 12/9/04, that had not been done. There was no PBS registration posted and none could be produced. There was a running sump pump with an oil sheen on top in the far left hand room(reported to DEP #994306). The floors in both of the rooms that butt up against the 210 wall were of newer painted wooden sheet board. There was a newer tank 3000 gallon #2 fuel oil tank in a vaulted tank room on the right. The basement also contained a newly cemented door to a large room on left side which was the old tank room/boiler room but there was so much garbage in the room I could only see connection pipes at the top near the ceiling. I told Maurice to clean the room out and to get borings in that area and the full length of the wall leading to 210 W 146th Street. There was new paint everywhere in this basement. 03/04/05 - Sawyer - Mr. Mack of 210 W 146th Street notified me today that they have had a another oil release on 3/2/05. Mrs. Ruiz of Royal Mangement was to have hired Tri Stae Environemtal, but I have not heard anythig form them confirming this. 6/3/05 MT// A tank test failure was called in by Ray Kahn for

APARTMENT BUILDING (Continued) **S106736042**

this address on 6/2/05//new spill # is 05-02555 has been closed out and referred to this spill #.// Spill Transferred from Sawyer to Tipple \\\\ 6/13/05 Tipple spoke with Ray Kahn//leaking tank to be taken out of service ASAP after which an investigation/remediation is to proceed//// 8/12/05 Sharif visited the site yesterday.Sewer pipeline at 200 W 146th Street basement broke,liquid dirt flooded allover the place and seeped through the wall impacting adjacent building's basement. There is evidence of old oil spill underneath the wooden besement floor. It looked like black, oily contaminated stuff along the oil line that runs underneath the wood floor.Building owner Mr. Sion Sohayegh Hired ESPO (Ray Kahn, 212-330-7501, cell: 917-939-7366) to fix the tank and pipeline. Mr. Sion will do the initial clean up this week end followed by extensive remedial work soon. 10.07.05 SR// I called both Ray Kahn (consultant)and Sion Sohayegh, left message for both of them to follow up about the remedial work that need to be done. 11.10.05 Sharif- This spill no. merged with Spill # 0505300 and hence closed."

Hazardous Waste Summary:

. Waste code: D000
. Waste name: Not Defined

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE

BLOCKERS CLEANERS (Continued) **1004756540**

USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: NONE
. Waste name: None

Violation Status: No violations found

FINDS:

Registry ID: 110004383079

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

She said no information indicated regarding this spill and the contact person is Jon Robertson (212)491-8486. -QA Called to building contact number (914)944-9200 and talked to Ms. Karolina (Titano Development) She said that She will talk to her boss and then She will call me back. -QA 06/26/2008: This spill case was transferred to A. Doronova. AD 09/2008: Tried to locate the contact person - Jon Robertson, phone 212-491-8486 and Titan Development without success. All phone numbers are no longer in service. AD 12/04/2008: Called and spoke with Paul of Phoenix, he promised to look through their files for some information on this site. Found on the Internet information regarding Titan Development, Inc. phone: (716)772-5510 (possible RP).

THE COMMUNITY PRESERVATION CORP. (Continued) **S106469060**

Left a message. Found on ACRIS information regarding The Community Preservation Corp. (CPC), which listed in its files as an owner of the site. Address: 28 East 28th Street 9th floor New York, NY 10016 phone: (212)869-5300 fax: (212)659-0102 Called and spoke with Human Resources department of CPC. Explained the situation and left my contact information. Later received a call from Ms. Kristy Seyfert of CPC, she confirmed that CPC owns the property, she asked me to send them DEC spill report and an official request. Will send an Outstanding Violation letter. AD 12/05/2008: Issued and sent the Outstanding Violation Letter. Also sent a copy of the letter and DEC Spill Report via fax to CPC. DL PDF copy to eDocs. A response to the letter should be received till January 5, 2009. AD 02/19/2009: Received a phone call from K. Seyfert. She said that she did not received the letters. Sent these letters again via fax and e-mail: From: Ainura Doronova [mailto:axdorono@gw.dec.state.ny.us] Sent: Thursday, February 19, 2009 3:26 PM To: Kristy Seyfert <kseyfert@communityp.com Subject: 2515 Seventh Ave., New York NYSDEC Spill No. 0401623 and 262Alexander Ave., Bronx NYSDEC Spill No. 0301707 Dear Ms. Seyfert: Attached please find copies of the letters, regarding above-referenced sites, which were sent to you previously, but were not received by your company according to your statement. Please be advised that response is time sensitive. To receive a deadline postponement you should submit an official request. Sincerely, Ainura Doronova Environmental Engineer later received an e-mail from her saying: Thank you I am in receipt of the attachment and will address the situation ASAP. Kristy Seyfert Loan Analyst The Community Preservation Corporation 28 E. 28th Street, 9th Fl. New York, NY 10016 T: (212) 869-5300 x560 F: (212) 659-0102 kseyfert@communityp.com 05/18/2009: Did not receive any response yet. called and left a message to Ms. Seyfert. AD 06/01/2009: received an e-mail from N. Recchia of EEA saying: Ainura, Hello Ainura, We need your help to try and close this spill case. I would like to know exactly what DEC needs to close this spill but we have little info. I was contacted by the current owner of this property and The Community Preservation Corporation to work on closing this spill case file. Apparently this building underwent a complete renovation in 2004. The property owner only knows that the contractor who was working on the project removed a tank in the basement of the building. He has no information regarding the cause of the spill and neither does CPC who retained the contractor to do the work. Apparently this contractor has no left no records or information and nobody can contact them anymore. The only info they gave me was your letter date December 2008 (attached). I went online to the DEC Spill Incidents Database Search (attached) and found limited info. According to your letter DEC requires a summary of cleanup activities, manifests, post excavation samples etc. If I can't get this information would DEC accept us performing soil test borings in the vicinity of the former tank to check existing soil quality conditions? I could develop a work plan that DEC could review before the work is done. Thanks for your help with this spill file. Our client would like to close out this spill case as soon as possible but we understand DEC need the data and info to do that. Sincerely Yours, Nicholas J. Recchia, C.P.G. Vice President, Senior Hydrogeologist EEA, Inc. 55 Hilton Avenue Garden City, NY 11530 phone (516) 746-4400 ext. 12 fax (516) 746-4432 cell:(516) 395-8763 nrecchia@eeaconsultants.com www.eeaconsultants.com AD 06/03/2009: called and left a message to Mr. Recchia of EEA. Lated spoke with Mr. Recchia, sent him NYSDEC

THE COMMUNITY PRESERVATION CORP. (Continued) **S106469060**

FOIL Spill Report. AD 06/10/2009: Received an e-mail from Mr. Recchia of EEA saying: Ainura, Hope all is well. I have another piece of this puzzle and it now makes more sense. I have recieved a Phase I summary report from 2000 performed by ATC Environmental which is attached to this message. The report indicates that the Tank in question was an Above Ground 2,000-Gallon Heating Oil Tank. The site inspection at the time indicated that there was no leakage, spills or staining observed around the tank. The report also indicated that the tank was to be removed by the building renovation contractor. I was told there were problems with the contractor hired to do the renovation one of which resulted in this spill file being opened due to poor construction managment. Apparently Pheonix was hired to cleanup the 3-gallons of oil that spilled (according to the online spill description). I'm trying to locate and get a copy of the Phoenix report. If I cannot get this report what would be your requirements be to close out this spill file? Sincerely Yours, Nicholas J. Recchia, C.P.G. Vice President, Senior Hydrogeologist EEA, Inc. Called to DEP to speak with Azellia Maddox (caller) regadring the cause of the spill. She is currently on a sick leave. Will review the submitted report. DL pdf copy to eDocs. Called and spoke with Paul of Phoenix and asked him to look through their records for any info regarding cleanup Phoenix performed at the site. Later received a call from Paul, he said that an invoice for the cleanup was found. Paul participated in cleanup at the site. The drum in the building's basement was leaking. Phoenix responded to call and transfered product from leaking drum to a new one and secured the drums on site. They could not remove the drum because it was located in the basement. Received copy of the invoice via fax. DL to eDocs. Called and left a message to Mr. Recchia of EEA. AD 06/11/2009: Called and spoke with Mr. Recchia. Since the cause of the spill is known (leaking drum), I asked him to prepare a letter report summarizing all info, and to attach recently taken pictures of the basement. AD 08/2009: Called and left a message to Mr. Recchia regarding a letter report submission. AD 09/01/2009: Called and spoke with A. Recchia of EEA. He said that report will be submitted till September 15, 2009. AD 09/30/2009: Received an e-mail from Mr. Recchia of EEA saying: Ainura, I wanted to let you know that I have prepared the report earlier this month for this project however we are having trouble getting paid from our client. As soon as we get paid I will have the report sent to you. Sincerely Yours, Nicholas J. Recchia, C.P.G. Vice President, Senior Hydrogeologist EEA, Inc. 55 Hilton Avenue Garden City, NY 11530 phone (516) 746-4400 ext. 12 fax (516) 746-4432 cell:(516) 395-8763 nrecchia@eeaconsultants.com www.eeaconsultants.com 10/02/2009: Called and spoke with K. Seyfert of CPC regarding the submission of the report. She referred me to Ms. Jill Belli - contact person for this case 9ext. 626). Called her and left a message. AD 10/12/2009: Received an e-mail from N. Recchia of EEA saying: Ainura, Attached please find our report for this spill. Sorry it took so long but we had to wait for our client to pay for it before it went out. Thank You. Nicholas J. Recchia, C.P.G. Vice President, Senior Hydrogeologist EEA, Inc. 55 Hilton Avenue Garden City, NY 11530 phone (516) 746-4400 ext. 12 fax (516) 746-4432 cell:(516) 395-8763 nrecchia@eeaconsultants.com www.eeaconsultants.com DL it to eDocs. Will review. AD 11/23/2009: Reviewed the letter report. The spill originally was reported because of leaking hydraulic oil drum. the spill was cleaned by Phoenix Env. in June of 2004. Empty drum was removed from the basement. basement

THE COMMUNITY PRESERVATION CORP. (Continued) **S106469060**

floor is concrete and there are no drains. Recent pictures of the basement were submitted. There is not any oil staining on the floor. AD 12/01/2009: Discussed the site with J. Kolleeny of DEC. The decision was to close the case. Will send a letter. AD 12/02/2009: Issued and sent a letter with spill closure approval to K. Seyfert of CPC. Dl to eDocs. Case closed. AD "

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 11/20/02 - R. Austin, subbing as DDO - Spill referred to Jeff Vought, for removal - DEP (Diaz) contacted for further info - w.c.b. to Duty Desk with info on whether or not drums are on private property, whether or not they have been haz catted as waste oil, and whether or not they are leaking. Reply will dictate course of action needed from DEC 11/21/2002: WASTE OIL. SOME ABSORBANT, TIVEX SUITS, BAGS OF GARBAGE ON THE DRUMS. SUPER OF 409 EDGECOMB AVE COMPLAINED ABOUT 405 EDGECOMB AVE. SUPER. 9 DRUMS ON THE SIDEWALK. DO NOT SEND A TANKER TRUCK TO THE SITE. DRUMS HAVE MINIMUM OIL. 11/21/2002: called roberto diaz. busy signal. 11/29/2002: DEC SIGONA CALLED RP 401 Edgecomb Partners, LLC on 11/29/02, 10:10 A.M. and spoke to Mr. Hector Alers. According to Hector the drums are scheduled to be removed on 12/2/02, The facility has been transferred from prior PBS owner HSG Realty and 401 Edgecomb was faxed an application and instructions to file transfer of ownership as required by Part 612. AJS. 1/23/2004-Vought-Spill transferred from Vought to Austin. 1/27/04 - Sawyer - Spill transferred from Austin to Sawyer. 1/18/05 - Sawyer - Spoke with Jerry Edleman of J&M Realty 917 952 5676 and he will try to find a manifest or trip ticket for the drums removed. 1/24/05 - Sawyer - Received documentation in the form of an invoice from Petroleum Tank Cleaners. The drums were removed on 12/3/2002 as listed on bill. This concludes course of action for this spill report. Closed. "

Remarks: "9 abandoned 55 gal drums - none have spilled"

Contact Name:	ILKAY CAN-SPANOS
DEC Memo:	"6/11/15-Vought-Received call from and spoke to Ilkay Cam Spanos Langan (212-479-5410) who noted that Vought worked on adjacent spill 1110699 which was probable source to this spill. Spanos noted there were onsite tanks (UST) removed in 2003. Langan is working for owners rep and owner is Madison Square Boys and Girls club. Site redeveloped with a community center (Boys and Girls Club). Ilkay will send conceptual development plans. Geotechnical drilling is ongoing as they want to put a swimming pool in basement and there is shallow bedrock. They have done borings to 100' and they have not hit bedrock. Development may begin within a year and they will submit a plan for moisture/vapor mitigation prior to development. 9/14/15-Vought-Spill transferred from Vought to Omar. Vought sent email to DEC Omar with cc to Ilkay that Rashad, Please review the Phase II Environmental Site Investigation that I just received and placed in D2 under the above referenced spill number and discuss with me so we can prepare a response to Langan (copied above). As you have been seeking more complicated sites as part of your training here in the Spills Unit, I believe this one is quite appropriate. Thanks, 9/14/2015: Rashad As per NYC building records 250 Bradhurst Avenue has alternate addresses of 250-256 Bradhurst Avenue and 310-350 West 155 Street. According to PBS# 2-608783 there are 5, 550 gallon underground gasoline tanks, the status of all the tanks are closed-removed on 3/1/2003, no other spill cases were found for this site. 9/15/2015: Rashad According to the introduction of Langan's submitted phase 2 report there were three other reports on this property which are contained in the appendix. The three additional reports are a Phase 1 Environmental Site Assessment on 8/19/2004, Geophysical Survey to locate UST completed on 11/30/2011, and a Memorandum dated 12/9/2011. The phase 1 investigation will be summarized first (this report included 250 Bradhurst Ave and adjacent property 304-10 West 155th Street): The property is identified as two parking garages including one commercial unit located at 250 Bradhurst Avenue and 304-10 West 155th Street. During the investigation by LCS there was evidence observed that would indicate the presence or likely presence of a release or threatened release of hazardous, toxic, or other substances of concern which that constitute a recognized environmental condition. During inspection LCS noted the presence of five suspect vent pipes protruding from the roof of the parking garage addressed at 250 Bradhurst Avenue. One

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

additional suspect vent pipe was noted on the north side of this structure and two inactive 275-gallon fuel oil aboveground storage tanks (ASTS) were noted within the basement portion of the structure. No staining and/or evidence of release was noted in the vicinity of these ASTs. Two suspect fill/vent ports were noted on the north side of the structure addressed at 303-10 West 155th Street. Cut/crimped copper line were observed within the basement of this structure. No tank closure documentation was provided for USTs on this portion of the subject property. According to historic Sanborn Maps, three 550-gallon underground gasoline tanks were identified as being buried beneath the parking garage at 250 Bradhurst Avenue and two 550-gallon underground gasoline tanks are identified as being buried beneath the parking garage at 304-10 West 155th street from at least 1939 through at least 1996. The Harlem River is located approximately 0.3 miles east of the subject property. This assessment has revealed no evidence of historical recognized environmental conditions in connection with the subject property. Geophysical Survey Summary (prepared on 11/30/2011): 155th Street Sidewalk (above long term parking ramp), a 4ft by 8ft rectangular anomaly was located outside the lower level concrete driveway ramp. The located target is a possible underground storage tank. A UST fill port and vent pipe are located in the sidewalk near the ramp overhead door. Lower level (long term parking garage) the concrete garage was surveyed on the north end of the garage. Two (2) possible USTs were imaged under the floor. Memorandum Summary (prepared on 12/9/2011): Cody Ehlers Group performed an on site inspection and these are the potential areas on concern: Historical use of underground storage tanks (USTs) for the storage of petroleum products. Documentation of removal of certain USTs from 250 Bradhurst Avenue is available, but no record of environmental sampling from the time of removal was identified. In ground hydraulic lifts. Historical use and management of automotive fluids. Nine soil boring were installed in the 250 Bradhurst Avenue garage using push drill rig. Groundwater samples were collected for laboratory analysis from three of the borings. According to the findings and conclusions section The soil and groundwater sampling and GPR program at 250 Bradhurst Avenue garage did not identify any areas of siginificat environmental concern. These activities confirmed that the former USTs in the Bradhurst Avenue garage have been removed. No further soil or groundwater investigation is warranted and no remediation is necessary. According to soil analytics client ID B-3 (the depth and location of soil boring and samples is not clear) has 81,000ppb 1,2,4 Trimethylbenzene, 37,000ppb 1,3,5 Trimethylbenzene, 6,300ppb Ethylbenzene, 7,600ppb Isopropylbenzene, 1,300ppb Xylene, 19,000ppb Napthalene, 13,000ppb n-Butylbenzene, 19,000ppb n-Propylbenzene. Client ID MW-2 (Depth to groundwater is around 18ft, location is unclear) has 1,500ug/L 1,2,4-Trimethylbenzene, 540ug/L 1,3,5 Trimethylbenzene, 260ug/L Benzene, 650ug/L Ethylbenzene, 140ug/L Isopropylbenzene, 222ug/L Xylene, 430ug/L Napthalene, 32ug/L n-Butylbenzene, 240ug/L n-propylbenzene, 0.21ug/L Benz(a)anthracene, 0.2ug/L Benzo(a)pyrene, 0.38ug/L benzo(b)flouranthene, 0.23ug/L Chrysene. Client ID MW-5 has concentrations of 0.2ug/L benz(a)anthracene, 0.2ug/L benzo(a)pyrene, 0.26ug/L benzo(b)fluoranthene, 0.12ug/L benzo(k)fluoranthene, 0.18ug/L Chrysene. Phase 2 Environmental Site Investigation Summary (ES): Phase 2 ESI was conducted June 1-3, 2015 and included a geophysical survey; the advancement of six soil borings; the installation of three temporary groundwater monitoring wells and five

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

soil vapor probes; and the collection of soil, groundwater and soil vapor samples for lab analysis. The proposed redevelopment project is still in the early planning stages and is subject to change, but is expected to include the demolition of the existing building and construction of a community center with a basement and a swimming pool. It is anticipated that an excavation depth of up to 15 feet may be required to accommodate the development. Based on Langans environmental and geotechnical investigation historic fill material typically consisting of silty, gravelly, medium to fine sand with trace to some clay and brick was encountered beneath the surface cover. The fill layer extends to depths ranging from about 13.5-18.t ftbgs. Bedrock was not encountered during the environmental investigation; however, fractured rock was encountered at about 78 ftbgs during a geotechnical investigation near the southwest corner of the site. The depth to groundwater measured during this Phase 2 ranged from 15.5-17.1 ftbgs, groundwater is inferred to flow east towards the Harlem River. In total 13 grab soil samples, 4 groundwater samples, 6 subsurface soil vapor samples, and 1 indoor air sample were taken. Soil boring SB01 at 15-16 ft recorded 0.38ppm Mercury. SB02 14-15 ft recorded 340ppm Lead, 0.95ppm Mercury, at 19-20 ft 17ppm n-Propylbenzene. SB03 17-18 ft recorded 1.5ppm Mercury, at 21-22 ft recorded 74ppm Ethylbenzene, 21ppm n-butylbenzene, 42ppm n-propylbenzene, 59ppm Napthalene, 17ppm sec-butylbenzene, 14ppm total Xylenes. SB04 15-16ft recorded 220ppm Lead, 0.36ppm Mercury. SB06 14-15ft recorded 430ppm Lead, 1.6ppm Mercury. In TMW02 there were high levels of Manganese and Sodium. In TMW03 there were elevated levels found at 9.1ug/L 1,2,4,5 Tetramethylbenzene, 12ug/L 1,2,4 Trimethylbenzene, 9.2ug/L 1,3,5 Trimethylbenzene, 9.9ug/L Benzene, 74ug/L Ethylbenzene, 19ug/L Isopropylbenzene, 6.4ug/L n-butylbenzene, 23ug/L n-Propylbenzene, 37ug/L Napthalene, 9.8ug/L p0Isopropyltoulene, 30ug/L Benzene, 6ug/L sec-butylbenzene, 8.8ug/L Toluene. In TMW06 there were elevated levels of Iron, Magnesium, Manganese, and Sodium. Soil vapor reading were all ND, indoor air sample only recorded one elevated reading of 1.42ug/m3 of Tetrachloroethene. Langan conclusions include several potential sources of petroleum contamination including, but not limited to, previously removed 550gallon USTs, two suspect fill ports/vent pipes, two ASTs in the basements, the geophysical survey identified three hydraulic lifts associated with historical hydraulic tanks. Recommendations include excess soil generated during development of the site should be managed and disposed of as regulated solid waste in accordance with applicable local, state and federal regulations. Petroleum-impacted material cannot be reused on-site. The petroleum-impacted material should be transported and disposed of off site at a facility that is permitted to accept the material. Additional sampling may be necessary for material disposal based on the disposal facility selected. If dewatering is required during construction, groundwater should be sampled and analyzed for NYCDEP sewer discharge parameters, and a sewer discharge permit should be obtained prior to dewatering. Treatment of dewatered groundwater prior to discharge will likely be required. Depending on the extent of soil removed during the propsed development and whether or not residual petroleum-impacted soil and groundwater remain, incorporation of a continuous vapor barrier may be recommended into the proposed building design. As per Jeff: The Department approves plan depending on inclusion of; soil sidewall samples, bottom groundwater samples after excavation, and development plans. Prepared

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

Report Receipt letter and sent it to Zubatkin Owner Representation with CC to Langan, document has been uploaded to D2. Email: I have reviewed the submitted Phase 2 Environmental Site Investigation with Jeff and have attached a letter approving the recommendations pending inclusion of additional requirements listed in the letter. We look forward to the submission of the Remedial Action Plan. The original letter was mailed to Zubatkin Owner Representation, LLC. 11/19/2015: Rashad Received email from Ilkay: We are preparing the RAP for the site and I would like to briefly discuss the RAP and the attached proposed development plan with you. I will be out of the office after tomorrow for 10 days; are you available tomorrow morning around 9 or 10AM for few minutes to discuss? Two structural drawing documents were attached detailing floor plans and section plans, they have been uploaded to D2. The plan drawing which depicts the cellar floor plan has a slab as deep as 13 ftbgs. The section drawings which show the difference in design between having no pool, a 4 foot pool, and an 8 foot pool are also provided. In all cases the pool will not be on ground level it will be on the 4th floor. Jeff and I called Ilkay, she said they are looking to install a slab 3 foot thick throughout the site with a vapor barrier and that only a small portion of the site will be 13 ftbgs. Ilkay will be sending RAP and we discussed that DOH must first approve the RAP and Phase 2 documents before moving forward. 4/22/2016: Rashad Received email from Ilkay: Hope all is well. Please see the link below for the remedial action plan for your review and approval. If you have any questions ,please let me know. Report uploaded to D2. 4/25/2016: Rashad Review of submitted RAP is as follows: The current site is occupied by a vacant, two-story garage with a partial basement. According to historical records the site was operated as an auto repair shop and garage between 1939-1996. Fractured bedrock was encountered about 78 ftbsg. Groundwater ranged from 15.5 to 17.1 ftbsg. Groundwater flow is inferred to travel east towards the Harlem River. Proposed redevelopment includes demolition of the existing structure and construction of a four story community center with partial cellar. It is anticipated the excavation across the majority of the site will extend to about 5 ftbsg, with excavation of a partial cellar extending to about 15 ftbsg. The partial cellar will have utility rooms, a fire pump room, a stormwater detention tank, and an elevator machine room. The proposed structure will be supported by a 3 foot thick mat slab. Remedial Action Objectives are as follows: (1) Removal and closure of two out of service ASTs and any USTs encountered during construction; (2) Excavation and removal of historic fill material and native soil, as required for proposed foundation construction; (3) Collection and laboratory analysis of documentation soil samples; (4) Excavation dewatering during construction, if required; (5) Construction of an engineered composite cover and installation of a seamless waterproofing/vapor barrier system; (6) Preparation and submission of a Spill Closure Report. During excavation the out of service tanks and any other tanks found will be removed and post excavation samples will be taken. Six documentation soil samples will be collected from the bottom of the excavation prior to installation of the waterproofing/vapor barrier system. Sample locations will be biased towards any areas of residual petroleum contamination identified during prior sampling. The composite cover system will be comprised of an approximately 3-foot thick concrete building slab that will span the proposed buildings footprint. As a protective measure to

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

mitigate potential soil vapor intrusion, a waterproofing/vapor barrier will be installed beneath the concrete slab and along the sub grade foundation walls. The waterproofing/vapor battier will have a minimum thickness of 20 mils. The only area without this cover system will be a 745 square foot area on the southeast corner of site which is a courtyard. Foundation construction will start in 2016 and take about 5 months to complete. As per building plans basketball court will be on third floor and pool will be on 4th floor. First floor will have offices/classrooms/general conference rooms. RAP sent to DOH for review. 5/6/2016: Rashad Ilkay send email asking if DOH has reviewed the RAP, I let her know I would follow up with Nate and get back to her. 5/11/2016: Rashad Nate responded on 5/10 after reviewing RAP and Phase 2: I have reviewed the Remedial Action Plan and the Phase II Environmental Site Investigation Report for the above referenced Spill site. Based on review of the data, it appears that there is residual contamination that is present beneath the site in soil vapor at elevated concentrations that have the potential to impact indoor air within the proposed building. It is recommended that during the redevelopment process piping for an Sub-Slab Depressurization System (SSDS) be installed and either be the system be made active or conduct soil vapor intrusion sampling during the heating season (November March) to determine whether the SSDS will need be made active based on concentrations in soil vapor and/or indoor air. Prepared report receipt review letter with Jeff's assistance, letter was sent to Nate/Mike for review. Nate indicated letter looked good and that he has no changes. Email sent to Ilkay with review letter (with cc to DOH): Please see the attached Review Letter in response to the submitted Remedial Action Plan. Please let me know if you have any questions. Thank you. Letter uploaded to D2. 6/3/2016: Rashad Teleconference will be scheduled for next week by Langan with DEC and DOH to discuss review letter requiring SSDS. 6/6/2016: Rashad Conducted teleconference with Langan and NYSDOH to discuss SSDS addition to RAP. Langan will be discussing options with client and getting back to us. Nate sent email and has indicated that any mitigation technique selected needs to be proven effective. Nate also indicated that Langan's suggestion of 3 foot slab, vapor barrier and HVAC modifications may be adequate, if proven effective. 6/17/2016: Rashad Sent email to Ilkay: What is the status on the design of the positive pressure mitigation system, as it may be the most feasible option that we discussed? Thank you, have a nice weekend. Ilkay responded: We will be working on the design starting next week, and should be able to share the design with you by mid-July. 8/15/2016: Rashad Received email from Michele Rogers with link for SMD system design, it has been uploaded to D2. 8/18/2016: Rashad Design was approved by NYSDOH and SVI investigation is required as per DOH. Report review letter was prepared with requirement for air sampling. Letter will be reviewed by DOH prior to submission to Langan. DOH Nathan edited letter and it was emailed to all parties and uploaded to D2. Letter outlines Soil Vapor Investigation requirements. DEC Possibly Requires: 1. Site map with all boring and groundwater sampling locations - Memorandum Report. 2. Review of RAP including possible SSDS requirement by DOH? 3. Development Plan (details including depth of excavation) 1/17/2017 Austin This spill report is being transferred from Rashad Omar to Jeffrey Vought end. 1/24/17-Vought-Received email from Langan (Michelle Rogers-mroger@langan.com Ph:212-479-5429) on 1/23/17 that Hi Jeff, To keep you in the loop, the foundations contractor (Moore)

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

is planning to mobilize to the site within the next two weeks. We anticipate that implementation of the RAP will begin shortly thereafter. Please let us know if you have any questions. Thanks Vought replied with cc to NYSDOH Walz that Michele, Thanks for the update and we look forward to the documentation of the installation of the positive pressure mitigation system as well as the SVI results as per the approved RAP. 4/26/17-Vought-Received call from and spoke to Langan (Ilkay Cam Spanos) and she noted that construction ongoing and while they were excavating in southwest corner they found groundwater with sheen and they will stockpile soil separately. Groundwater samples were collected in same area during the Phase II. Vought noted that DEC looked forward to the installation of the positive pressure mitigation system as well as the SVI results as per the approved RAP. 5/1/17-Vought-Received email from Langan (Rogers) on 5/1/17 that Hi Jeff, To keep you in the loop, earlier today the contractor encountered what appears to be a 550-gallon tank while excavating in the southwest portion of the 250 Bradhurst Avenue construction site. Removal of the tank will be handled in accordance with the approved RAP and applicable state regulations. Please give us a call if you have any questions. Vought sent reply that Michelle, Thanks for the heads up and I recorded the tank discovery you noted below in my spill notes as well. We look forward to the report that will include the endpoint samples from this tank location, and installation of the positive pressure mitigation system and the SVI results as per the approved RAP. Note that I have copied NYSDOH above as well so that they may be informed. Thanks, 4/12/17-Vought-Received email from Langan(Rogers) on 5/10/17 that Hi Jeff, Attached for your review are the analytical results of the endpoint samples collected from yesterday s tank excavation. The tank was removed and found to be intact. Endpoint samples were collected from the base of excavation and the eastern, western, and northern sidewalls. The southern sidewall had been excavated as part of development when the tank was discovered and as such, a fourth sidewall sample could not be collected. The analytical results were below the CP-51 criteria with the exception of slight PAH exceedances identified in the sample collected from the eastern sidewall. No PID readings above background or odors were noted, and the contractor plans to backfill the excavation as soon as possible. This information will be included in our spill closure report. Please let us know if you have any objections. Thanks, Vought added endpoint samples to D2 and sent reply email to Rogers, with cc to NYSDOH Walz, that Michelle, Thanks for the endpoint samples and description below. The Department has no objections to including the information regarding this tank in the Spill Closure Report. As I noted below, we look forward to the report that will include the endpoint samples from this tank location, and installation of the positive pressure mitigation system and the SVI results as per the approved RAP. Thanks, Rogers replied, with cc to all, Thanks Jeff . DEC Requires: 1)Installation of SSDS and performance of SVI once development completed as per NYSDOH 2)cc to Langan (Rogers/Spanos) and NYSDOH Walz. 12/18/17 - Austin - Project reassigned from Vought to Patel - end 04/20/18-Hiralkumar Patel. 2:00 PM:- went to site for inspection. Site is being redeveloped. 2:23 PM:- left message for Ilkay. 05/01/18-Hiralkumar Patel. 1:25 PM:- received call from Ilkay. she mentioned that the building construction will be completed by Aug. 2018 and SVI study will be conducted in Dec. 2019, after actively running SSDS system for a year. suggested Ilkay to submit report including summary/result of

MADISON SQUARE BOYS AND GIRLS CLUB (Continued) **S117974285**

activities completed to date. 01/24/19-Hiralkumar Patel. 2:09 PM:- received call from Ilkay inquiring about need for SVI study if site has an active SSDS. asked Ilkay to contact NYSDOH in this matter. 03/21/19-Hiralkumar Patel. received email from Albert Tashji (ATashji@Langan.com) from Langan including sir sampling results. 11:33 AM:- received email from DOH Nathan. he reviewed the results and mentioned that it does not appear that the indoor air is impacted and the soil vapor concentrations are not indicating a concern at this point in time. 03/22/19-Hiralkumar Patel. 1:00 PM:- spoke with DOH Nathan, Albert and Ilkay. Albert mentioned that the SSD system was not in operation at the time of SVI sampling due to some adjustments being made to the system, and sub-slab vapor sample was collected by lowering a tube through SSDS riser pipe to perforated area. he also mentioned that the building's HVAC system was in operation at the time of SVI sampling. based on result of SVI sampling, NYSDOH agreed that no further investigation is required at the site and SSDS can be passive. informed Albert/Ilkay that the spill will be closed upon receipt of a SVI report (including summary of sampling methodology). 09/17/19-Hiralkumar Patel. 12:50 PM:- received email from Albert including copy of PBS registration form to include a 550 gal UST discovered during construction. 1:12 PM:- sent email to Albert and reminded him that SVI report is not submitted yet. email copied to Ilkay. 10/07/19-Hiralkumar Patel. 2:09 PM:- received email from Albert including link to spill closure report. 10/09/19-Hiralkumar Patel. case closed based on review of available information. MSBGC-NYC Support Corporation **property owner** c/o Jeffrey M. Dold Chief Financial Officer 250 Bradhurst Avenue New York, NY 10039 Ph. (212) 760-9600 Ext. 0366 email: jdold@madisonsquare.org 10:30 AM:- sent spill closure letter to Mr. Dold. letter emailed to Mr. Dold, Albert and DOH Nathan."

Remarks: "Caller advised received lab results back showing unk petroleum in ground water. CLean up is pending."

DEC Memo:	"Probably 2-1,000 gal tanks - Found product in borings around tanks. Proposal to either pull the tanks now while the building is in place vs waiting for the building to be knocked down first. Building/Lot is being sold and purchaser is deciding which option would be best. Either way Emteque is planning to prepare/submit a Remedial Action Plan. They are planning on pulling the tanks, removing the impacted soil and installing monitoring wells in the area. Then a series of groundwater samples taken over time to prove the area is clean. 5/2/12-Vought-Received call from Eric Telemaque (Ph:212-631-900 email:eric@emteque.com) and you are working for owner. Suspected three tanks (three anomolies), one below ramp and two below basement slab. One or both tanks below slab possible leaked in northeast corner of property. RAP will be submitted. Another site immediately adjacent within same block and lot will be developed along with property. Groundwater at 17-18'bg. Property has not been sold yet and will not be developed for a few months away from foundation placement. RAP will sumbmit will include tank removal and endpoint samples. Basement excavation will be left open and product will be vacuumed and remnants treated with Regenox. Telemaque will submit RAP by 3/15 which will also include provisions for IRM if significant free product and surrounding area site plan. 6/18/12-Vought-Reviewed Hazardous Materials Remedial Action Plan dated May 2012 and prepared by Emteque. Plan prepared for: Mr. Michael Price Icon Parking 211 East 38th Street Ground Floor New York, NY 10016 Ph:(212)686-8663 email:mprice@iconparking.com Site is a commercial parking garage with one level on grade and one level below grade. Proposed use includes demolition of existing structures with redevelopment of the site .

COMMERCIAL PROPERTY/PARKING GARAGE (Continued) **S111456729**

GPR survey performed as well as preparation of a Phase II report in November 2011. Vought called Telemaque and left message to send Phase II Report. One anomaly was discovered outside the lower level concrete driveway and two possible USTs were also noted on the north end of the parking garage. Fifteen Geoprobe borings installed with six converted to temporary monitoring wells. Select soil samples revealed the presence of VOCs and SVOCs but except boring B-3, all were below unrestricted SCO. MW2 also noted groundwater exceeences of VOCs. Lab data suggests that the contamination to groundwater and soils in the north east corner of the basement may have come from GPR anomolies which they believe to be USTs. Proposal for registration of tanks with PBS, removal of liquid and sludge for tanks, tank cutting and removal of steel and contaminated soil and free product and collection of endpoint samples. For lower level tanks, proposal for no bottom soil endpoint as bottom in groundwater. Proposal for collection of baseline groundwater sample and RegenOx application if no free product is noted. Proposal for monitoring groundwater in the excavation for dissolved oxygen, pH and redox every 30 days for a ninety day period. Construction Health and Safety Plan also included in RAP. Plan notes that a Remedial Closure Report will be submitted following implementation of the RAP. Vought drafted DEC requirement letter and will finalize upon receiving and reviewing Phase II from Emteque. 6/19/12-Vought-Received email from Emteque (Lynelle Cardone) with soil analyticals and a site plan from November 2011 but no soil boring logs or sampling depths of the soil samples are provided and as such DEC cannot determine if RAP is sufficient to cover the entire area as per the investigation results. Vought called Emteque (Cardone) and asked her to send in boring logs and complete report or at a minimum depths of soil samples collected. Soil analyticals show: 5300ppb ethylbenzene(B3 unknown depth), 1300ppb xylene(B3 unknown depth), 19000ppb napthalene(B3 unknown depth). Groundwater analyticals show: 260ppb benzene(MW2), 100ppb toluene(MW2), 650ppb ethylbenzene(MW2), 222ppb xylene(MW2), 430ppb napthalene(MW2). 6/21/12-Vought-Received email from Telemaque on 6/20 that This is what I have in my files from the Driller. Please let me know if you need additional information and please let me know once you have had a chance to review the RAP so that we can implement. We are prepared to file dwgs with DOB on Monday to pull permits and get the work scheduled. The borings with the deeper depths came from the property to the west which is slab on grade. The shallow borings came from the basement of the property at 155th Street, where we noted contamination. Vought sent letter to Price for review of Phase II and RAP and letter did not approve of Summary of Remedial Actions #11, #12 and 15 (for Regenox application) but letter did approve all other Summary of Remedial Actions. Letter also required submission of development plans for site, collection of bottom endpoint groundwater sample, determination of flow direction and installation of a downgradient well, submission of a surrounding area site plan and quarterly groundwater sampling and no development of site until RAP is approved by DEC. Emteque cc'd on letter. 7/16/12-Vought-Received email from Telemaque on 7/2 that the site is not scheduled for development at this time , collection of one bottom sample will be incorporated into revised RAP, inquiry if attached receptor report from EDR will suffice, quarterly groundwater sampling will be incorporated into revised RAP and delineation via installation of downgradient wells and flow determination will also be incorporated into revised RAP. Received email on 7/11 from Telemaque that I sent

COMMERCIAL PROPERTY/PARKING GARAGE (Continued) **S111456729**

you a couple of emails on 7/2 regarding the above referenced site. We would like to move forward with the work pending DOB permits which are in process. Can you please give me a call at your convenience to discuss? Ownership is anxious to remove the tanks and associated contaminated soils. Vought called Telemaque and left message to return call to Vought. Vought also sent email to Telemaque and cc to Price that Thanks for your patience and I have reviewed the below response to the Department's letter dated 6/21. A couple of questions: 1)Item 1- You noted on 5/12 during a phone conversation that the site will be sold. Will be it be redeveloped upon that time and to what use? Do we have a purchaser already? I 2)Item 3- I would like surrounding area site plan with labeled property uses and I am not sure EDR can do that. I am essentially looking for a block and lot map with uses such as school or residential building, stores etc to document the presence and/or absence of sensitive receptors. I just left a message on your cell phone as well and the Department looks forward to reception of the revised RAP .
7/17/12-Vought-Received email from Telemaque that no development or sale plan at this time. I will get you the sensitive receptor labelled map today . Vought replied that Department will consider ORC application once the delineation results and receptor maps are in.
2/22/13-Vought-File review by Vought due to inquiry by Emteqe (Jim Blaney): Email from Blaney-11/12/12. Email that We are waiting on a response from NYS DEC with regard to our remedial investigation strategy at the 304-310 West 155th Street Site. I have copied our NYDEC Case Manager, Jeffrey Vought, to this email. In the interim we are applying for a sidewalk opening permit from the City so that we may begin the work once we receive Jeffrey s input. Email from Emteque-2/20/13. Email from Telemaque that With regards to the above referenced spill number, we have been trying to reach you to schedule a discussion or a meeting at your offices to discuss the above referenced spill and possible closure of the spill. This is a follow up email to voicemail messages I have left at your office and on cell, today, regarding this spill and prior message from Jim Blaney. Our client has a potential buyer for the property and we are anxious to move the spill closure along. Please feel free to contact either myself or Jim Blaney to discuss. Jim is more familiar with the technical details and can be reached on cell at 609.613.2004. My contact information is detailed below. In the event that you are no longer managing this spill can you forward this email to the new case manager. 2/22/13-Vought-Received call from and spoke to Emteque (Jim Blaney) and unknown development plans to date and they did collect groundwater samples and they installed well points inside basement of garage and additional soils excavated due to VOCs and lead till clean and well also installed outside of building and temporary water samples came back as non-detect. They submitted proposal to DEC and due to lack of response, work plan was initiated. No data has been submitted to date. Five temporary well points total installed. Additional excavation was performed to encompass soil and groundwater contamination at MW2 as such DEC will not require ORC injection. Closure report will be submitted and will include discusssion of vapor mitigation (eg vapor barrier). Data to be submitted to DEC within one month. 4/19/13-Vought-Received call from and spoke to Emteque (Lindemuth) who noted that site address was actually 302-304 West 155th Street and not 304-310 West 155th Street as previously reported. Vought changed spill address to same. 4/23/13-Vought-File review by Vought due to recent phone request by Emteque (Lindemuth)

COMMERCIAL PROPERTY/PARKING GARAGE (Continued) **S111456729**

to review closure report. Email from Lindemuth to Vought-4/16/13. Email that am following up on a phone conversation we had last week (4/11) regarding the Remedial Action Report (RAR) submitted by Emteque for Spill Case No. 11-10699 assigned to the property located at 304-315 West 115th Street, NY, NY. During our conversation you indicated you would be able to review the report this week. The client has two potential purchasers and would like to be able to move the property transaction forward. Please contact Jim Blaney (cell 609-613-2004) or me for clarification during your review of the RAR. Thank you for your attention to this case. Email from Lindemuth to Vought-4/18/13. Email that Jeff,Per our conversation please use the link provided below to download a revised Spill Closure Report which corrects the address and Tax Map Block and Lot of the property. The correct address of the Site is 302-304 West 155th Street, New York, NY 10039, Tax Map Block 2047, Lot 37. Click here to view.Please contact Jim Blaney or me with any questions or comments.Thank you for you attention to this case. 4/23/13-Vought-Reviewed Remedial Action Report dated 3/25/13 received from Emteque and added report to E-docs. Future development plans of property are unknown . No UST was identified in GPR anomaly by driveway/ramp via test pit installation to 4'bg. Five USTs found in anomaly in basement where two USTs previously thought (Two 100-gallon steel USTs (which were most likely the USTs noted in the GRP survey) underlain by three concrete encased steel 500 gallon USTs. Groundwater at 4'bg. Contaminated soils removed as well and six endpoint samples collected from sidewalls and approximately 40 tons of impacted soil were removed. Elevated VOCs noted in three of six endpoint samples and another excavation was performed in two subsequent events and a total of 80 tons of impacted soil was removed. One groundwater grab sample also collected for the excavation. A total of 1300 gallons of liquid also removed from excavation. Additoinal delineation performed via installation of two monitoring wells (GW7 and GW8) onsite and three wells off-site (B18 thru B20). Report recommends closure. Vought called and spoke to Emteque (Lindemuth) and he will send in site plan with endpoint sample locations and delineation wells and noted that a DEC RAP review letter was not needed for this requirement. Groundwater analyticals show: 23ppb toluene(GW11), 7.2ppb napthalene(GW11). Note elevated PAH's found in soils most likely associated with fill material. Report also notes that It is also noted that NYSDEC recommended the incorporation of a vapor / moisture barrier into any future development plans for the property as part of the pending real estate transaction. 4/25/13-Vought-Received email from Lindemuth that Per our conversation please find the attached figure which shows the locations of the delineation borings and end-point samples. This Figure is included in the Remedial Action Report as Attachment E.Please let me know if you need any thing else. Vought added figure to E-docs. Spill closed by Vought due to minor groundwater contamination at GW11 within natural attenuation parameters as well as excavation of contaminated soil at site at confirmation samples with VOCs below CP51 Unrestricted SCOs. Note also that as per 4/23/13 email from Emteque It is also noted that NYSDEC recommended the incorporation of a vapor / moisture barrier into any future development plans for the property as part of the pending real estate transaction. Vought sent Spill Closure Letter with residual soil contamination clause to: Mr. Michael Price Icon Parking 211 East 38th Street Ground Floor New York, NY 10016 Ph:(212)686-8663 email:mprice@iconparking.com Vought also added

COMMERCIAL PROPERTY/PARKING GARAGE (Continued) **S111456729**

Closure Letter to e-docs as well. 4/25/13-Vought-Received email from CA Rich Cooper that Jeff, I am working on Phase I for a property at 302 West 155th Street in Manhattan. The property had an open spill number 11-10699 and it has since been closed out. I have a client who wants to buy the property, but I just want to make sure they do not need to do any follow up work such as sub slab soil vapor sampling. The person selling the property told me it was good, but he hasn t sent over the whole report. He mentioned that a vapor barrier may be needed if the building is redeveloped, but he has not provided it to me. Can you e-mail me or call me to discuss this project? Vought called and spoke to Jason Cooper and he noted that site will still be a parking garage with ventilation and Vought noted that if future use of the site was to change than sub slab vapor sampling may be warranted. Spill to remain closed. 8/11/17-Vought-Received message from Langan (Chris McMahon Ph:973-560-4861) that he was looking for information as he was going to file a FOIL request as part of a property transaction. Vought returned call and left message with summary of remedial action and closure based on fact that site was to remain a parking garage with ventilation."

Remarks: "lab results show contamination"

DEC Memo:	"7/22/15: Mahat DEC Mahat left a voice message to Adam Stryker @ 212.736.6888 inquiring about the repair and retest. Mailing Address: 695 NICHOLAS REALTY CORP 225 WEST 34TH STREET ROOM 2010NEW YORK, NY 10001 ATTN : KENNETH FRIEDMAN PBS : 2-100390 [It has been crossed referenced] 7/30/15: Mahat DEC Mahat received a call back from Hector (@ 646-773-2033 - Property Director) inquiring more about the progress on the spill case on Department end. He will provide pasting TTF, failed TTF results and brief repair description. DEC is waiting for a closure report. 8/19/15: Mahat DEC Mahat received passing TT report. It has been uploaded on D2 for reference. However, the TT is performed before another TT failure was reported on 7/22/15. Tank passed the pressure test on 6/3/15 and failed again on 7/22/15. Further investigation is warranted by the Department. Tank system will be out of commission until further notice. DEC Mahat has left a voice message to Hector to call back for a hot wash. A TTF letter has been sent to above address and failing TT result has been uploaded on D2. 8/31/15: Mahat DEC Mahat received another Passing TT result with expired calibration date on the TT equipment. Updated TT

ABOVE GROUND TANK (Continued) **S118142065**

Result with proper calibration date has been uploaded on D2 for reference. The tank did not passed the pressure test because of the loose threat in manhole cover and there was a leak on return and sucksen line. Repair has been performed and the tank has passed the pressure test. Based on the provided information to the Department : No further investigation is warranted by the Department. Spill case will be closed on NYSDEC Spill database. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 05/16/01 SCHOOL CONSTRUCTION ATHORITY PRESSURE SEALING BASEMENT AREAS WHERE THERE IS A WATER PROBLEM. THIS HAPPENDS TO INCLUDE THE BOILER PIT. WHILE PRESSURE GROUTING, WHAT APPEARS TO BE A #6 FO WAS PUSHED THROUGH THE GROUT HOLES. THE GROUT APPEARS TO HAVE A SPECIFIC GRAVITY BETWEEN WATER AND # 6 OIL. THE SCHOOL MUST CLEAN AND PROPERLY DISPOSE OF THE OIL, AND I RECOMMENDED THAT THE GROUT HOLES BE SEALED AND THE SURFACE OF THE FLOOR BE EPOXY SEALED ESENTIALLY ENTOMBING ANY RESIDUAL OIL. 12/8/2005: James Merlo, coordinator for NYC School Spill Sites indicates that oil continues to be collected and disposed of from a sump in the building. He thinks that it has been going on for quite a long time and may not be entirely related

NYCSCA - PUBLIC SCHOOL # 194 (Continued) **S105057411**

to the spill they had at the school but may be from an outside source other than the school. 02/01/07: Reassigned from Mandy to Chanda. 4/16/07: Kartik Chanda of DEC has reviewed documents regarding this spill case. On 4/16/07, Chanda sent a letter to James Merlo, Manager fuel division, NYC Department of Education, requiring that the following information be submitted to the DEC for review by 5/31/07. 1. An explanation of the cause of the tank system failure; 2. Either a description of the work performed to restore the integrity of the tank system (including retesting results), or a description of the work performed to close (decommission) the tank; 3. Information regarding petroleum contamination found at the site and cleanup activities (if any) associated with a release from this tank system; 4. Any available documentation (i.e., invoices, bills, sampling analysis reports, etc.) pertaining to the work performed at this site associated with this violation 5/10/07: Chanda received a letter from James Marlo, NYC Department of Education regarding this spill. He stated that there is no oil being collected from PS 194. There is no ongoing problem at this location. 5/17/07: Chanda has reviewed the spill report form, the spill report indicated that the NYCSCA was involved cleanup activity associated with this spill dated 5/14/01. On 5/17/07, Kartik Chanda of DEC sent a letter to Ms. Lee Guterman, NYCSCA, requiring that an Investigation Report associated with this violation be submitted to DEC for review by 7/02/07. 6/29/07: Chnada received a Remedial Action Letter dated 7/31/01 and Emergency Response to Oil Spill Letter dated 5/15/01, from NYCSCA on 6/27/07. 7/16/07: Chanda has reviewed the Remedial Action Letter and Emergency Response to Oil Spill Letter regarding this spill at the site. ATC Associates Inc., prepared the remedial action letter dated July 31, 2001. This letter did not indicate the site plan regarding this spill. This report did not include soil and GW investigation data regarding this spill. Chanda discussed with Joe Sun (Unit Supervisor)on 7/16/07 and decided a site visit is required to get the decision regarding this spill case. 7/18/07: Chanda spoke with NYCSCA (Mr. Drew Pardus)regarding a site visit schedule with NYCSCA representative. He agrees with NYSDEC requirements regarding this spill case. He will call to NYSDEC to select a date and time to make a site visit. 8/01/07: Chanda visited the site, met with Mr.Drew Pardus (NYCSCA) and consultant Peter Burger of STV Incorporated (Consultant). It is concluded that an investigation work plan regarding investigation of # 6 fuel oil storage tanks area and boilers floor area is required for approval. 10/22/07: Chanda received a Phase II Environmental Site Investigation Proposal/Scope of Work plan prepared by STV Incorporated (Consultant) dated Auguest 31, 2007. 10/26/07: Chanda reviewed and approved the Phase II Environmental Site Investigation Proposal/Scope of Work Plan. The work plan proposes the installation of ten(10)soil boring at the site. 0n 10/24/07, Chanda sent an approval letter to Ms. Lee Guterman and her consultant, requiring that a final investigation report must be submitted to the DEC by 01/15/08 for review and approval. 11/6/07: Chanda received a phone call from NYCSCA(Mr. Drew Pardus) regarding the drilling schedule for side subsurface investigation. He stated that the installation work for the ten(10) soil borings at the property has been scheduled. Work will commence on November 11& 12 (Sunday & Monday), 2007.These two days are weekend and holidy. 3/13/08: Chanda received a Subsurface Investigation Report from NYCSCA prepared by STV Inc., dated January 8, 2008. 5/12/08: Chanda reviewed the Subsurface Investigation Report and had the following

NYCSCA - PUBLIC SCHOOL # 194 (Continued) **S105057411**

comments: * One 10,000-gallon UST (active) and one 15,000-gallon AST (inactive) No.6 fuel oil located at the site; *Groundwater was not encountered within 20 ft bgs during the investigation. Bedrock was encountered at depths that ranged from 12.5 ft to 20ft bgs; *Fourteen (14) soil borings were advanced around UST area and along the run of the remote pipe line; * No VOCs were detected above the TAGM RSCOs; * Several SVOCs were detected at concentrations grater than the TAGM RSCOs; * The extent of No. 6 fuel oil impact in soil is conservatively estimated to be approximately 58 ft by 32 ft with a 7 ft thick zone between the bottom of the UST (13 ft bgs) and the deepest bedrock surface 920 ft bgs); Based on the findings of this SIR, STV recommended the followings: " excavation and removal of the UST; " excavation and disposal of impacted soil;. " sampling and analysis of post-excavation samples;. " site restoration; and " Preparation of a UST Closure Report. 5/14/08: Chanda sent a letter to Ms. Guterman, NYCSCA requiring that a UST closure report be submitted to DEC by 7/15/08 for review and approval. 9/18/08: Chanda received a letter from NYCSCA (Lee Guterman)dated 8/8/08, regarding the UST out of service status. The letter stated that the NYCSCA has a schedule to remove the UST and petroleum impacted soil at the site. It is anticipated that the boiler upgrade would commence in the summer of 2009 and continue through the summer of 2010. The UST closure report would be submitted to DEC in the summer of 2010. (see eDocs) 10/30/08: A meeting was held on 10/21/08 among DER staff, the NYCSCA representative to discuss the site status, UST out of service status letter and time extension request for this site. The meeting s consensus was that the UST Closure Report would be submitted to DEC in the summer of 2010. Chanda sent an approval letter to NYCSCA requiring that UST Closure Report be submitted to DEC by 7/15/2010 for Review and approval.(see eDocs) 05/13/2009: This spill case was transferred to A. Doronova. - AD Reviewed the file. RAP was approved by K. Chanda of DEC, UST Closure Report to be submitted to DEC by 7/15/2010 for review and approval. AD 01/05/2010: Received a phone call from Mr. Pardus of NYCSCA. He asked for a meeting to discuss boundaries of the proposed area of excavation. Met with D. Pardus and Bob Kanaparthi of NYCSCA. It was agreed that 11 post-excavation end-point soil samples will be collected after UST removal for lab. analysis. Excavation on the north-western part of the property will coinside with the property line. Five day notice before start of field work will be given to DEC. AD 07/29/2010: Called and left a message to D. Pardus of Pardus Env. Consulting regarding site status update info. AD 05/11/2011: Received an e-mail from D. Pardus saying: Hi Ainura, Attached are attachments to the UST Closure Report for PS 194M (DEC Spill Case 0101789). A hard copy of the report will follow. Please feel free to contact me at 646-577-8280 if you have any questions. Sincerely, Drew Pardus Will review. AD 06/28/2011: Reviewed the report. It was prepared by STV Incorporated. The report states that on March 9, 2010 a total of 500-gallons of oil and water mixture were removed from the two tanks and were disposed off-site. Following cleaning, the tanks were cut up and transported off-site to scrap metal facilities. Excavation activities were conducted intermittently from April to September 2010. The Site was excavated within the boundaries of the shoring lines using conventional hydraulic excavation equipment to remove petroleum-impacted soil/fill. Shoring was required to support the excavation walls along the perimeter of the excavation footprint not abutting the walls of the school building. The shoring was installed at locations where

NYCSCA - PUBLIC SCHOOL # 194 (Continued) **S105057411**

soil borings conducted during the Phase II ESI confirmed that there were no petroleum impacts. The excavation dimensions were approximately 57 ft (north-south) by 27 ft (east-west) by approximately 16 ft bgs. The excavation was completed down to the exposed bedrock surface throughout the entire tank pit cavity area. Excavated material was directly loaded for transport and off-Site disposal. LIAL provided oversight, field screened soil, and signed soil disposal manifests during excavation and soil load-out. Soil transportation was performed by licensed haulers in accordance with all applicable regulations, including New York State Department of Transportation (NYSDOT) road permit requirements. In total, 1205.45 tons (37 truckloads) of petroleum-contaminated soil was transported from the Site and disposed of at either, Clean Earth of Carteret, Carteret, New Jersey or Clean Earth of New Castle, New Castle, Delaware. After reaching the final remediation depth/bedrock (approximately 16-ft bgs) within the shored excavation area, three sidewall endpoint soil samples (sample IDs: ES@15, SS@15, and WS@15) were collected on August 15, 2010. Samples were analyzed for VOCs and SVOCs. Laboratory results indicated that no VOCs or SVOCs were detected. STV made the following conclusions and recommendations based on the remedial activities conducted at the Site: " All the tank closure and remediation activities were conducted in accordance with the NYSDEC approved recommendations provided in STV s Subsurface Investigation Report dated January 8, 2008; " All accessible petroleum-impacted material was removed to the final excavation depth of 16 ft bgs (i.e., depth to bedrock) and disposed of at appropriate permitted facilities; " The results of post-excavation endpoint soil sampling state that no STARS VOCs or SVOCs were detected in any of the three sidewall samples. STV recommends no further action with respect to the subsurface conditions at the Site and recommends NYSDEC issue a No Further Action determination for Spill Case #0101789. Will discuss the recommendation for the spill case closure with J. Kolleeny of DEC. AD 07/05/2011: Discussed closure of the case with J. Kolleeny of DEC. Based on the data provided in the Closure Report, it was decided to approve the spill case closure. Issued and sent Spill Closure Letter to Lee Guterman. DL pdf copy to eDocs. Case closed. AD "

Remarks: "spill was observed while waterproofing the basement. spill contractor has been called for clean up of basement...there are 2 tanks underground that will need a case manager to work w/ caller to get them taken care of. "
