Tank Info:

Tank Number:	001
Tank Id:	55651
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F00 - Pipe External Protection - None
E00 - Piping Secondary Containment - None
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping
I05 - Overfill - Vent Whistle
C03 - Pipe Location - Aboveground/Underground Combination
G00 - Tank Secondary Containment - None
J02 - Dispenser - Suction Dispenser

Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	05/21/1993
Capacity Gallons:	2000
Tightness Test Method:	NN

Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Tank Info:

Tank Number:	1
Tank Id:	44713
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

	A00 - Tank Internal Protection - None
	B01 - Tank External Protection - Painted/Asphalt Coating
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	G03 - Tank Secondary Containment - Vault (w/o access)
	H00 - Tank Leak Detection - None
	L09 - Piping Leak Detection - Exempt Suction Piping
	F00 - Pipe External Protection - None
	I05 - Overfill - Vent Whistle
	C03 - Pipe Location - Aboveground/Underground Combination
	J02 - Dispenser - Suction Dispenser
Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	Not reported
Capacity Gallons:	2000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	09/17/2002
Register:	True

DEC Memo:	"11/22/05: This spill transferred from J.Kolleeny to S.Kraszewski. 01/03/06: Site Assessment said to be complete by Sept. 2000, by Yellowstone Industries. No record of report on file. Need site assessment report. - SK 07/10/06: NYCHA update summary states that one 32K UST installed in 1977 and stored #4 and #6 oil was replaced by a 25K UST that currently stores #2 oil. Contaminated soil was encountered during the tank replacement, no product recovery system and no MWs. A site assessment is available and NYCHA recommends DEC review it. - SK 02/08/07 : DEC lead changed from S. Kraszewski to J. Kann. J.Kann 3/10/11: J.Kann - Investigative work plan submitted on 3/3/11. 2/11/15: J.Kann - IWP indicates the yellowstone report was incomplete and stated that 50 cy of soil were removed and that petroleum contamination was encountered. Given the limited site history, the work plan only includes soil sampling (with option to install wells only if visible contamination is encountered.). Will approve the IWP provided that at a minimum temp gw wells are installed an sampled. If visisble/olfactory contamination is encountered, permanent wells will be needed. 1/26/16: J.Kann - Four borings were advanced and 2 wells installed. Based on soil analyticals, minor SVOCs were detected in two locations CP-51 SB-2 (15-17 ft) SB-4 (15-17 ft) Benzo(k)fluoranthene 0.8 0.9 0.87 Chrysene 1.0 1.3 1.0 Groundwater was also sampled and benzo(a)anthracene and chrysene were estimated at 0.051ppb (TOGS 0.002ppb). All other constituents were below TOGS. Tank was removed in 2000. Given the staining and oil odor in MW-2, I emailed NYCHA to gauge the wells one more time before I close the spill. 3/22/16: J.Kann - wells were gauged on 1/28/16 as requested. No product or odor noted. Based on the site file and IWP, the spill has been closed. Spill closure email sent to NYCHA and file DecDoced."
Remarks:	"SOIL CONTAMINATION DISCOVERED AT ABOVE LOCATION DURING TANK REPLACEMENT. SOIL EXCAVATED FURTHER TESTING TO BE DONE. NO CALL BACK

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD 5/6/2004 Sangesland spoke to Mark Salamack at PTC. He said there was a fuel delivery on 5/5 and today the super saw oil coming out onto the basement floor. The existing tank is wrapped in concrete and oil is coming out from under this wrap. PTC will set up temp tanks on 5/7. Then they will drain the existing tank, pull it out (along with all the lines) and reinstall a new tank/lines system. During this process PTC will determine if any spill occured below the basement floor. If there is a contamination problem, they will clean it up and submit manifests and endpoint samples as required. 04/13/06- Case was transferred from Jake Krimgold to Koon Tang. 11/03/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. Called Mr. Mark Salamack (PTC Company) at (718)624-4842 and talk to Ms. Dianna she said PTC Company only did Tank Cleaning for J & M Reality services (212)721-0424. -QA 11/17/06: Called J & M Realty at (212)721-0424 and left message to call me back regarding information of the spill. -QA Called Mr. Mark Salamack (Petroleum Tank Cleaner) at (718)624-4842 and talked about the spill. He said that he did only Tank Test. He said tank test was failure. He will try to send me Tank Test failure report. Rest other work who did that PTC do not know. -QA 11/30/06: Called J & M Realty at (212)721-0424 and talked to Mr. Jerry he said. This spill is cleaned up. He is going to fax me closing confirmation letter to close the spill. -QA 12/13/06: Mr. Jerry Edelman, Agent (J & M Realty Services Corp.) sent a closing confirmation letter in which he has mentioned that cause of the spill is a small amount of oil was released in to the concrete alley when the driver of the truck flushed out the delivery line with air. According to Mr. Jerry spill was promptly cleaned up using and oil absorbing compound. According to Mr. Jerry spill is cleaned. -QA 01/02/07: Called Mr. Mark Salamack and talk about the spill. According to Mr. Mark Salamack (PTC), when he went to see the spill oil was out of the tank in the basement. It could be the cause of overfilling, could be leaking of tank. Tank should be removed and soil should be checked soil underneath the tank. Called J & M Realty (212)721-0424 and talked to Mr. Jerry Edelman he said that he will send a letter mentioning the actual reason of the spill 02/05/07: Called Mr. Jerry Edelman at (212)721-0424 extension 13 and left message to call me back to discuss the spill. -QA 06/21/07: Called Mr. Jerry Edelman at (212)721-0424 extension 13 to discuss regarding spill. He was not there talked to Mr. Victor he said he will talk to Mr. Jerry about it. He will find out about the Tank Test Report (tank must be tested every five years). After getting that he will call me back. -QA 09/13/07: Called Mr. Jerry Edelman to discuss regarding present status of the spill and to send the tank test report. He was not there, left message to call me back. -QA

---------- 6/25/08: Reassigned from Vadim Brevdo to Kartik Chanda. (Chanda) 8/5/08:Chanda has reviewed this spill related documents and sent a certified letter to RP (Jerry Edelman, J&M Reality Corp), requiring that a letter or report must be submitted to DEC by 9/20/08 for review and approval. (see eDocs) 02/06/2012 - Brevdo - Review of the project information available demonstrated that there is no documented subsurface contamination that resulted from the alleged spill. According to project records of 12/13/2006, the cause of the spill was a small amount of oil release into the concrete alley when the driver of the truck flushed out the delivery

APARTMENT (Continued) **S106471583**

line with air. According to J&M Realty Services Corp. the spill was promptly cleanup up using an oil absorbing compound. With the lack of documented subsurface contamination I do not feel there is sufficient rationale to pursue further investigation of this spill event, let alone conduct enforcement action. Spill closure is appropriate. Spills is closed effective February 6, 2012. "

Remarks: "tank is wrapped in concrete,doesnt know if it has holes in it,it is leaking out onto the ground"

FINDS:

Registry ID: 110004564329

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"157858. 30-MAR-2005 15:40 Found @ 15:40 Called E/V desk @ 15:55 hrs V5678 - W 151 ST & 8 AVE SWC Stephen J Asfour, 49908 Operating Supervisor I&A Dept reports that in process of doing an inspection in V5678, that was due for removal found approx. one half pint of unknown oil on top of approx. 300 gallons of water, sump pump was found un plugged. No smoke or fire involved in this incident. No sewer or waterway affected by this spill. No injuries involved in this incident. Weather had no affect. Account #F3246 is being used

VAULT #5678 (Continued) **S106867604**

for this incident. No measuring device was used to determine the amount of the spill. Source and cause of spill are unknown. Oil filled equipment in the structure V5678. Water is standing. No substantial cracks. No dielectric filled feeders in the structure. 2 liquid samples were taken from the spill, 1 for id and 1 for pcb. Sample priority E . Chain of custody #DD13308. Logger F.Curtis 38078. 3/30/05 10:47 Received lab results. Analysis indicates the presence of a transformer oil. Aroclor 1242 < 1.0 ppm EPA 608/8082 Aroclor 1254 < 1.0 ppm EPA 608/8082 Aroclor 1248 < 1.0 ppm EPA 608/8082 Aroclor 1260 33.7 ppm EPA 608/8082 E Hulzer # 39723 reported to me that the cleanup was completed at 14:15 on 3/31/2005. No solid waste was removed. All other waste liquid and solid was removed by the Vactor truck. The structure was double-washed with Simple green . Environmantal tag # 42036 was removed. The remediation of the spill was to install a new Transformer unit in the Vault: Logger R Pagano # 48703 Update: 5/17/05 @ 12:30. For clarification the remediation of the spill included installation of a new transformer. A. Drummings # 84163. Closed on 6-29-05. George Breen "

Remarks: "PRODUCT IS 1/2 PINT OF UNKNOWN OIL ON 300 GALLONS OF WATER. NO SMOKE, FIRE, SEWERS, WATERWAYS, SAMPLES WERE TKANE AND CLEAN UP IS PENDING THE RESULTS OF SAMPLES. 157858."

Tank Info:

Tank Number:	001
Tank Id:	32959
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)

Equipment Records:

E00 - Piping Secondary Containment - None
H00 - Tank Leak Detection - None
L09 - Piping Leak Detection - Exempt Suction Piping
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
K00 - Spill Prevention - None
I05 - Overfill - Vent Whistle
C01 - Pipe Location - Aboveground
G00 - Tank Secondary Containment - None
J02 - Dispenser - Suction Dispenser

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	02/18/1948
Capacity Gallons:	5000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True

FINDS:

Registry ID: 110004517498

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"9/22/15 - Obligado - Desk Duty - I called ERT to follow up on this after hours spill and spoke to Tony Delgado. They were putting a permanent repair on the feeder from a previous spill. In the excavation, they saw signs of oil coming from further south, so they looked at their leak detection readings and they noticed that there was still an active leak. They continued excavating to locate the leak. They are estimating that it is 30 to 35 feet south of manhole 62580, which is on the Harlem River Drive near 155th street. Crew is on location looking for the leak. 80 gallons per hour, estimated total is 500 gallons. No impacts to surface water. Emis # 242720. Obligado - Update - Leak has been clamped at 1100 hrs. Total loss of 820 gallons. As per Demeo, spill has been assigned to Santosh Mahat, who responded. 9/22/15: Mahat Response: DEC Mahat responded to the reported 500 gallon (later corrected to be 820) of dialectical fluid due to a feeder line leak. Spill was on M52 Feeder line that runs between 14 Street Station and Spring Brook Station. Leak on the feeder line has been stopped. A clamped has been placed for the temporary repair of the line. A barrel will be placed for the permanent repair for the spill. 700+ gallons of dialectical fluid has been recovered from the excavation. Leaving approximately 120 gallon on the soil. All contaminated soil will be excavated from the site and end point samples will be collected. A complete spill closure report will be provided for the closure of the spill case. DEC is waiting for a result. 10/12/15: Mahat Spill # 1507324 : Duplicate Spill. It has been crossed referenced on DEC Spill Database. Spill # 1507324 is closed. DEC Mahat will be working on Spill # 1506599. 12/11/15: Mahat DEC Mahat received an email update on the spill case via email: Email: Hi Santosh Following up on our conversation, at spill 1506599 we removed all impacted soils but dielectric fluid kept pooling at the bottom of the excavation apparently trapped in sand seams around the excavation. As a result an 8 -diameter recovery well was installed at this location. We plan on gauging this well shortly and then will set up a schedule to recover fluids. Rolando Arco, P.G. Senior Specialist EH&S Operations (S&TO) 31-01 20th Avenue Astoria, NY 11105 718-204-4494 917-558-0077 DEC is waiting for a report. 8/10/16: Mahat e/c: DEC Mahat sent an email to ERT requesting an updated EMIS report on the spill case. 8/12/16: Mahat Spill case has been assigned to DEC Patel as discussed on Con Ed meeting on 7/28/16. 07/05/17-Hiralkumar Patel. received email from Camissa (at 2:58 PM on 06/30/17) from ConEd including closure report. leak was found on the

FEEDER LINE M52 (Continued) **S118261783**

bottom of the 10 inch feeder pipe due to disbanded coating. total of 1,082 gal of dielectric fluid were lost to the environment. endpoint samples were not collected as remediation was planned during pipe refurbishment project planned at a later date. impacted soils were removed from the excavation as part of the repair and refurbishment activities. due to the observation of LNAPL in excavation, a temporary 8-in dia. recovery well was installed. on 04/03/17, ConEd went to gauge and sample the recovery well. specific well construction information was not available so the screened interval could not be determined. the 8-inch well was gauged at 11.5 ft bg and water was found at approx. 5 ft bg, with 0.01 ft of product. the 8-in well was purged prior to groundwater sampling. 3.1 ppm of TPH noted in groundwater samples. based on limited information regarding construction of the 8-in well, the well was replaced with 4-in dia. recovery well, with 10 ft of screen. the 4-in well was installed to a depth of 11.55 ft bg. the 4-in dia well was gauged on 06/01/17 and 06/14/17 when no measurable LNAPL or sheen noted. groundwater was found at 7.52 ft bg on 06/01 and at 6.91 ft bg on 06/14. the LNAPL noted in 8-in well may have been stagnant LNAPL trapped in the well and had accumulated over a roughly two year period. endpoint samples collected from excavation on north and south side of the area show TPH below limit. case closed based on review of available information."

Remarks: "on going leak rate 80 gals. per hour UPDATE leak has been clamped at 1100 hrs...total loss at 820 gals"

DEC Memo:	"6/17/2016: Rashad Leak has been clamped and is estimated to be 100 gallons. This was found while searching for larger leak occurring on M52 (spill#1602673, EMIS 246486). Initial observation from EMIS: During leak search efforts for the Leak Declared on M52 on 6/16/16, reported under EMIS 246486, crews discovered 100 gals of dielectric fluid in the excavation along the Harlem River Drive. The leak was clamped at 01:26. A large quantity of oil was later discovered in a tunnel beneath the West 49th Street Substation. During the 07:00 Dielectric Fluid Leak Committee Conference Call it was decided to generate a separate EMIS and report for the oil discovered along the Harlem River Drive. Spill assigned to DEC Patel for follow up. EMIS 246487. 06/29/16-Hiralkumar Patel. 12:10 PM:- spoke with Tom Enrigh at ERT inquiring updates. he mentioned that leak is found in area of Harlem River Drive near exit for 155th Street where ConEd is upgrading M52 line. a permanent barrel has been installed and soil remediation will occur as part of upgrade project. 3:01 PM:- spoke with Tom and asked to submit updated emis report. 06/30/16-Hiralkumar Patel. received email from ERT (at 5:20 PM on 06/29/16) including updated emis report. 09/01/16-Hiralkumar Patel. 12:45 PM:- received email from Masood Hasmi from ConEd including cleanup summary, site map and sample results. endpoint samples were collected from east and west sidewalls. no samples were collected from excavation bottom as bedrock encountered in bottom. no endpoint samples from north and south sidewalls as it constitute of open space as part of the pipe enhancement program. case closed based on available information."
Remarks:	"Clamped the line. Spill to the soil. Clean up in progress."

DEC Memo:	"emis_258826 07/20/17 - Lakhani Dielectric Feeder Leak Committee Conference Call, July 20, 2017 at 1400 " The estimated leak rate is 6 gallons per hour and the estimated loss is 898 gallons of dielectric fluid. " The contractor installed 21 bar holes in the area of the Exit 23rd sign on the Harlem River Dr . ChemLab sampled Bar Holes and are running samples. " The Sprain Brook Substation has been marked

FEEDER LINE M52 (Continued) **S121100548**

out and will be surveyed with the PFT van. " EMIS 258826 has been created for this incident. 7/21/17-At 0050 hours, the Leak Declared was terminated when a clamp was installed in the excavation on the Harlem River Drive 500 feet north of the exit for 155th Street in Manhattan. The total estimated loss of dielectric fluid is 955 gallons with a leak rate of 7 gallons per hours. EMIS 258826 is associated with this incident. Spill transferred to T. Demeo (Secondary Off-Hours). 7/21/17 TJD A leak watch for feeder M52 was declared on 7/16/17 with a reported leak rate of 7 gallons per hour. Following a trackdown investigation, Con Edison field crews located the leak along the southbound lanes of the Harlem River Drive approximately 800 feet north of 155th exit. The feeder was exposed and a temporary clamp installed on the morning of 7/21/17. An inspection of the excavation was performed by Spills staff, crews were preparing the excavation and involved feeder for the installation of a permanent repair barrel. This section of the Feeder M52 has recently undergone a refurbishment of the line due to multiple historic leaks in the area. Excavation of remaining contaminated soils is pending issuance of a required DOT permit. Permanent repairs are complete. 9/7/17 TJD File review. Con Edison has submitted a closure report for the M52 feeder line leak. As per report: Summary of the cleanup efforts for DEC Spill # 1703674 (Con Edison EMIS # 258826) The Dielectric Fluid Leak Committee declared a Dielectric Fluid Leak Watch on Feeder M52 at 10:16 hours on July 16, 2017 due to an alarm on the USi Leak Detection System (LDS). Patrols of the feeder were completed. The Chemlab detected airborne Perfluorocarbon Tracer (PFT) on the Harlem River Drive north of the 155th Street exit ramp. Bar holes were installed and high subsurface PFT levels were detected in the bar holes. An excavation was started at the location. The Dielectric Fluid Watch was changed to a Declared Leak at 16:55 hours on July 20 when a leak was found on the ten inch feeder pipe. The Leak was clamped at 00:50 hours on July 21, terminating the Declared Leak. Permanent repairs were completed at 15:00 hours on July 21. A total of 965 gallons of dielectric fluid was lost to the environment due to this leak. Additional coating removal revealed several spots with what appeared to be electrolysis on the steel pipe. This appears to be the cause of the leak. The GPS coordinates for this location is N40:50:19.15 W73:56:01.00 Excavation 1 Impacted soils were removed from the area surrounding the leak location. Four (4) post - excavation soil samples (one floor and three sidewalls) were collected from the excavation (EX-1), and analyzed for total petroleum hydrocarbon (TPH) using EPA 8015 method. The west wall was not sampled due to excavation to bedrock. Date Sampling Location Results 07/23/2017 Ex - 1 North Wall 40.7 PPM 07/23/2017 Ex - 1 South Wall 28.9 PPM 08/23/2017 Ex - 1 Floor 1,210 PPM 08/23/2017 Ex - 1 East Wall 2,040 PPM All four post-excavation samples exhibited analytical results below the 13,000 PPM remediation guideline for dielectric fluid and no further remediation was required. Based upon the documentation provided no further action is required. Spill closed. All documentation has been uploaded to DECDOCS."

Remarks: "Caller advised there is a leak in the feeder line and unknown exact location and have lost aprx 410 gal. Line is Leaking at 5 gal per hour."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 3/13/03 REASSIGNED FROM ROMMEL TO VOUGHT. 4/30/04-Vought-Changed spill address from 87 St. Nicholas to 89 St. Nicholas due to correct address and address on all Tyree correspondence. Site may also be known as 89-91 St. Nicholas Ave due to use previously on Tyree reports. Also changed name of spiller to Getty. File review by Vought: Closure Report (Tyree Org Dan Ruffini 631-249-3150)-January 1996. Tanks removed as part of station rebuild. Removal of twelve (550-gallon) gasoline USTs and one (4000-gallon) tank. Tanks removed in June 1995. Tank upgrade included the installation of four (4000-gallon) gasoline USTs. New tanks placed in existing tank excavation. Visual evidence and petroleum odors detected during excavation. Depth of excavation was ten feet and 1040 tons of soil removed. Soil analyticals show 1460ppb benzene (North), 12000ppb toluene(North), 6720ppb toluene(South), 3240ppb xylene(South), 5230ppb toluene(West), 3040ppb xylene(west), 4010ppb toluene(west), 3330ppb xylene(west), 11500ppb toluene(bottom), and 2560ppb xylene(bottom). Subsurface Investigation Report (Tyree Org Paul Hatcher)-Dec 2000. Investigation result of DEC requirements. Five Geoprobe borings performed resulting in collection of six soil samples and two groundwater samples. Groundwater at depth of 26-27'.

LOT 20,TAXBLOCK 2069 (Continued) **S107657287**

Soil analyticals show up to 104000ppb 1,2,4-trimethylbenzene(SB3 10-15'), 18500ppb xylene(SB3 10-15'), 13200ppb napthalene(SB3 10-15'), 819ppb benzene(SB4 10-15'), 5260ppb toluene(SB4 10-15'), 10900ppb 1,2,4-trimethylbenzene(SB4 10-15'), 323ppb benzene(SB4 20-25'), 1960ppb toluene(SB4 10-15'). Groundwater analyticals show up to 184ppb benzene(SB4), 4470ppb MTBE(SB-4), 5ppb benzene(SB5) and 33ppb MTBE(SB5). Tank Removal Report (Tyree Org Phillip De Blasi)-December 2001. Reason for tank removal was tanks were identified while attempting to install monitoring wells in March 2001. Apartment building to the south, commercial buildings to the east and a garage to the west. Tanks removed were two (550-gallon) gasoline tanks. External corrosion and small hole in tank #2 . Five endpoint soil samples taken show no TAGM 4046 Required Soil Cleanup Objective exceedences. Quarterly Monitoring Reports (Tyree Org) August 2002 thru March 2003. Three monitoring wells onsite. Quarterly sampling and gauging. Free product in well W1 (.08'). Groundwater flow to the east at a depth of 14-16'. Soil analyticals show up to 9700ppb benzene(W1 10-15'), 122000ppb toluene(W1 10-15'), 41100ppb napthalene(W1 10-15') and 291pp benzene(W3 15-20'). Groundwater analyticals show up to 7490ppb benzene(W1), 3680ppb toluene(W1), 590ppb napthalene(W1), 92100ppb MTBE(W1), 200ppb benzene(W2), 318ppb MTBE(W2), 875ppb benzene(W3), 124ppb napthalene(W3) and 867ppb MTBE(W3). Letter from DEC(Vought)-4/29/03. Letter requesting expediting of sidewalk wells for wells in side walk on St. Nicholas Avenue. Well Proposal from Tyree-6/12/0. Letter proposing installation of two wells (in the northeast corner of the property and the other in the sidewalk along St. Nicholas Avenue). Letter from DEC(Vought)-6/25/03. Letter sent approving 6/12/03 proposal. Quarterly Monitoring Reports (Tyree Org) April 2003 thru Dec 2003. Three monitoring wells onsite. Quarterly sampling and weekly gauging. Free product in well W1 (.28'), W3 (.03'). Weekly bailing of wells recovering 1.25 gallons of free product. Groundwater flow to the east at a depth of 14-16'. Groundwater analyticals show up to 17400ppb benzene(W1), 14300ppb toluene(W1), 8580ppb MTBE(W1), 9ppb xylene(W2) and free product in W3. Subsurface Investigation Report (Tyree Org Gabriela Dory)-December 2003. Reason for investigation is DEC requirement. Two Geoprobe borings performed. Groundwater at 15'. Soil analyticals show 36700ppb benzene(TB-1 12-16'), 325000ppb toluene(TB1 12-16'), 66500ppb napthalene(TB1 12-16'), 60ppb benzene(TB2 12-16'), and 1752ppb xylene(TB2 12-16'). Groundwater analyticals show 14500ppb benzene(TB1), 1340ppb napthalene(TB1), 142ppb benzene(TB2), 1221ppb xylene(TB2) and 344ppb napthalene(TB2). 5/4/04-Vought-After file review DEC requires STIPULATION AGREEMENT WITH: 1)delineation of soil and groundwater north of former tank pad, east of W1, east of W3 and at former boring location TB-2. Vought handed over Stipulation during 5/5/04 Getty meeting with DEC with a due date to DEC by 6/4/04. 6/2/04-Vought-Received signed Stipulation from Shea and submitted to DEC Kunkel for implementation. Stipulation implemented by DEC Kunkel on 6/2/04. 10/7/04-Vought-New file review by Vought: Email from Tyree (Lapeitra) to DEC Vought dated 6/23/04. on June 24 and 25 four (4) monitoring wells will be installed as per the Stipulation Agreement . A subsurface investigation will follow shortly afterward . Subsuface Investigation Report (Tyree) received on 7/20/04. Commercial properties to the east, south, and west, park to the north. Installation of two onsite wells and two offsite wells. Groundwater 14-22' below grade and flow to the north. Soil analyticals show 494ppb benzene(B6 15-17') and minor PAH exceedences(B4 10-12').

LOT 20,TAXBLOCK 2069 (Continued) **S107657287**

Groundwater analyticals show 1220ppb benzene(MW4), 1340ppb toluene(MW4), 1700ppb ethylbenzene(MW4), 4490ppb xylene(MW4), 11ppb MTBE(MW4), 1ppb benzene(MW5), 8ppb xylene(MW5), 14ppb benzene(MW6), 13ppb xylene(MW6) and 670ppb MTBE(MW6). Groundwater Monitoring Report (Tyree)- July thru Sept 2004. Seven monitoring wells onsite. Groundwater analyticals show 20600ppb benzene(W1), 42100ppb toluene(W1), 2820ppb ethylbenzene(W1), 15400ppb xylene(W1), 7190ppb MTBE(W1), 1ppb benzene(W2), 4720ppb benzene(W3), 41ppb toluene(W3), 429ppb ethylbenzene(W3), 403ppb xylene(W3), 5190ppb MTBE(W3), 633ppb benzene(W4), 16ppb toluene(W4), 4410ppb ethylbenzene(W4), 12700ppb xylene(W4), 982ppb benzene(W6), 21ppb toluene(W6), 78ppb ethylbenzene(W6), 84ppb xylene(W6) and 962ppb MTBE(W6). 10/7/04-Vought-Sent letter approving of Subsurface Investigation and requiring remedial Action Plan as per CAP. 5/12/05-Vought-New file review by Vought: Groundwater Monitoring Report (Tyree)-October 2004 thru March 2005. Seven monitoring wells onsite. Groundwater flow to the east and at depths of 13-24' below grade. Groundwater analyticals show 16700ppb benzene(W1), 13100ppb toluene(W1), 2710ppb ethylbenzene(W1), 14100ppb xylene(W1), 8070ppn MTBE(W1), 5ppb toluene(W2), 30ppb xylene(W2), 3450ppb benzene)W3), 22ppb toluene(W3), 128ppb ethylbenzene(W3), 176ppb xylene(W3), 4330ppb MTBE(W3), 217pppb benzene(W4), 93ppb toluene(W4), 2320ppb ethylbenzene(W4), 6600ppb xylene(W4), 28ppb xylene(W5), 224ppb benzene(W6), 9ppb ethylbenzene(W6), 32ppb xylene(W6), 1290ppb MTBE(W6), 8ppb xylene(W7). Site Status and Proposed Remedial Action Plan(Tyree Brothers)-February 2005. TBES is proposing the use of in-situ passive bailers to collect product from wells W-1 and W-3 . Bailers will be utilized until a permanent remedial alternative is in place . Proposal for a dual phase pilot extraction test. Extraction well will be located between wells with highest contamination(W1 and W3). Results of pilot test will be provided in a Pilot Test Report. Vought sent letter approving of Pilot Test. 08/31/2005 - Feng - Project transferred from Vought to Feng. 10/5/2005 - Feng - Quarterly Monitoring Report from Tyree (4/2005 - 6/2005). 7 monitoring wells onsite and offsite. NO LNAPL detected. Groundwater flow easterly (perched above bedrock) at a depth of 13.44' to 24.91' below grade. Analyticals for W-1: 46,280ppb BTEX, 6,130ppb MTBE. W-2: 3ppb BTEX, non-detected MTBE. W-3: 4,554ppb BTEX, 4,640ppb MTBE. W-4: 14,058ppb BTEX, non-detected MTBE. W-5: 11ppb BTEX, non-detected MTBE. W-6: 475ppb BTEX, 1,140ppb MTBE. W-7: non-detected for both BTEX and MTBE. Noted that the DPE Pilot Test will commence during the next quarter. 10/5/2005 - Feng - Subsurface Investigation Report, dated 6/27/2005. On 6/8/2005 to 6/10/2005, two (2) saturated zone piezometer wells (P1 and P2), three (3) vadose zone piezometer wells (A1, A2, A3), and one (1) extration well were installed on the southeast side of the site. VOCs test shows that P1(9'-11') has 271ppb Acetone, P2 (7'-9') has 364ppb Acetone, EW1(11'-13') has 200ppb acetone. The other concentrations are blow Guidance value. 10/7/2005 - Feng - Sent letter of approving Dual Phase Extraction system design, dated July 2005 (letter reviewed by Sun) to Getty, Tyree and Delta. In the system design, four (4) extraction wells onsite will be installed to cover the area of concern. Namely, there are four (4) extraction wells for vadose zone with Radius of Influence (ROI) of 28 feet. Among these four (4) wells, there is one (1) extraction well (EW-2) serves for both vadose and saturated zone purposes with ROI of 50 feet. DEC approved with some notes below: 1) Adjust the Location of Saturated Zone Extraction Well (EW-2) to cover the W-3 area and

LOT 20,TAXBLOCK 2069 (Continued) **S107657287**

further W-4 area. 2) Revise the Proposed DPE System Flow Diagram. 3) Submit the System Design Specification. 4) tabulate and describe OMMP. 5) measurement and analysis of groundwater. 11/2/2005 - Feng - Quarterly Monitoring Report from Tyree (4/2005 - 6/2005). 7 monitoring wells onsite and offsite. NO LNAPL detected. Groundwater flow easterly (perched above bedrock) at a depth of 15.30' to 24.53' below grade. Analyticals for W-1: 41,690ppb BTEX, 6,300ppb MTBE. W-2: low, dry this quarter. W-3: 2,053ppb BTEX, 1,990ppb MTBE. W-4: 7,938ppb BTEX, non-detected MTBE. W-5: 48ppb BTEX, non-detected MTBE. W-6: 74ppb BTEX, 1,360ppb MTBE. W-7: 38 BTEX and 1 MTBE. 1/17/2006 - Feng - Quarterly Monitoring Report, 10/2005 - 12/2005. That is an active gasoline /service station. Groundwater flows to east (perched above bedrock) at depth of 13.47' to 25.03' bg. 7 monitoring wells on and off site. W-1, 48,010 ppb BTEX, 3,860 ppb MTBE. W-2, 4 ppb BTEX, MTBE MDL. W-3, 2,956 ppb BTEX, 2,480 ppb MTBE. W-4, 13,485 ppb BTEX, MTBE MDL. W-5, 1 ppb BTEX, MTBE MDL. W-6, 415 ppb BTEX, 909 ppb MTBE. W-7, 10 ppb BTEX, MTBE MDL. (RJF) 1/18/2006 - Feng - Emailed Nick Marrone inquired the status of DPES installation. (RJF) 1/19/2006 - Feng - Reply from Nick Marrone Things were moving slowly in the beginning of the month because of the holidays, but we are scheduling field crew to start installing the system piping in the next few weeks. Our vendor who we purchase our systems from is reviewing our data and will be assembling it soon. 4/10/2006 - Feng - Emailed Nick Marrone and requesting the status of the system installation and asking for a approximate date of completing installation and start running the system. (RJF) 4/10/2006 - Feng - Reply from Paul Hatcher, The system is being designed right now. There are space considerations to be considered given the small site. Also, there was some problems connecting the wells (i.e. subsurface conditions) that delayed the trenching operations a bit, but that's all done now. We've started getting the electrician to make the connections and It's probably going to be a month or two until we get the system delivered and hooked up. (RJF) 5/3/2006 - Feng - Quarterly Monitoring Report, 1/2006 - 3/2006. Active gasoline/service station. Groundwater flows to east (perched above bedrock) at depth of 13.54' to 25.22' bg. There are 7 monitoring wells on and off site and 4 Dual Phase Extraction. Sampling as of 3/21/2006. W-1, decreased and 39,920 ppb BTEX (12,900 ppb Benzene, 10,900 ppb Toluene, 2,520 ppb Ethylbenzene, 13,600 ppb Total Xylenes), 3,710 ppb MTBE. W-2, MDL. W-3, 3,044 ppb BTEX (2,300 ppb Benzene, 29 ppb Toluene, 222 ppb Ethylbenzene, 493 ppb Total Xylenes), 3,760 ppb MTBE. W-4, 11,441 ppb BTEX (224 ppb B, 87 ppb T, 2,680 ppb E, 8,450 ppb X), MTBE MDL. W-5, MDL. W-6, 281 ppb BTEX (225 ppb B), 1,120 ppb MTBE. W-7, MDL. Noted that 3 more dual phase extraction wells were installed during this last quarter. Also trenching and system piping were installed (map attached). The Dual Phase System is/will be assembled and sent this next quarter. Electrical service will be obtained shortly. (RJF) 11/9/2006 - Feng - Quarterly Monitoring Report, 7/2006 - 9/2006, 9/28/2006, by Tyree. The site is active gasoline/service station. Sampled and gauged on 9/28/2006. DTW 12.88 to 23.50' bg. Flows easterly (perched above bedrock). No LNAPL. BTEX range ND to 78,880 ppb. MTBE range ND to 2,430 ppb. Noted that the Dual Phase System was delivered in 9/2006. Electrical service will be obtained shortly. (RJF) 1/18/2007 - Feng - Getty Properties portfolio meeting with Tyree and Delta. Passive skimmer in W-1 and W-3. DPES installed onsite, all DPE wells trenched. System electric to be hooked up in 2/2007. DPES will start 4/1/2007. (RJF) 2/20/2007 - Feng - Quarterly Monitoring Report,

LOT 20,TAXBLOCK 2069 (Continued) **S107657287**

10/2006 - 12/2006, 1/8/2007, by Tyree. Active gasoline/service station. Groundwater sampled and gauged 12/27/2006. 7 monitoring and 4 Dual Phase Extraction wells. DTW 12.91' to 24.66' bg. Flows easterly (perched above bedrock). No LNAPL. W-1, 60,170 ppb BTEX, 2,080 ppb MTBE. W-2, NA. W-3, 2,272 ppb BTEX, 3,270 ppb MTBE. W-4, 69 ppb BTEX, MTBE MDL. W-5, MDL. W-5, 787 ppb BTEX, 720 ppb MTBE. W-7, MDL. (RJF) 3/30/2007 - Feng - Email updates from R.S. (Tyree). Con Ed is in the process of running the electric from the street to the sidewalk. (RJF) 6/27/2007 - Feng - Quarterly Monitoring Report, 1/2007 - 3/2007, 4/2007. Groundwater smapled 4/2/2007. 7 monitoring wells and 4 dual phase extraction wells. DTW 12.34' to 24.42' bg. No LNAPL. Flows to east. W-1, 60,260 ppb BTEX, 1,050 ppb MTBE. W-2, MDL. W-3, 274 ppb BTEX, 243 ppb MTBE. W-4, 148 ppb BTEX, MTBE MDL. W-5, MDL. W-6, 601 ppb BTEX, 786 ppb MTBE. W-7, MDL. Spoke to Rob S. (Tyree), the dual phase system has been delivered and all the piping are set last year. The problem now Tyree has is the eletrical power supply from Con Edison. Rob will follow with Con Edison for the electrical power and may need DEC's assistance. (RJF) 9/28/2007 - Feng - Quarterly Monitoring Report, 4/2007 - 7/2007, 8/2007. Groundwater sampled 7/9/2007. 7 monitoring wells were sampled. DTW 12.32' to 22.89' bg. No LNAPL. Flows to east. W-1, 65,800 ppb BTEX, 456 ppb MTBE. W-2, 1 ppb BTEX, 13 ppb MTBE. W-3, 1,613 ppb BTEX, 2,010 ppb MTBE. W-4, 93 ppb BTEX, MTBE MDL. W-5, MDL. W-6, 681 ppb BTEX, 538 ppb MTBE. W-7, MDL. (RJF) 11/8/2007 - Feng - Portfolio meeting with Delta and Tyree. The system has been installed, and finally got the approval from Con Ed. The system will be started by the end of 11/2007. (RJF) 11/26/2007 - Feng - Email Paul Lindell (Delta) and Paul Hatcher (Tyree) reminding the startup of DPES due by the end of 11/2007. (RJF) 12/20/2007 - Feng - Email from R. Szcespanski (Tyree). He spoke with Con Edison and Con Edison will install the meter next week. The system shall be started within next 2 weeks. (RJF) 1/8/2008 - Feng - Email from R. Szcespanski (Tyree). The meter will be installed tomorrow. The scheduled startup of the remedial system will be on Monday, 1/14/2008. (RJF) 1/14/2008 - Feng - Site Visit and met with R. Szcespanski (Tyree). Problems encountered in startup. Tyree will troubleshoot the problems and will re-startup by this week. (RJF) 1/17/2008 - Feng - Email from R. Szcespanski (Tyree). DPES is running and samples were collected. (RJF) 1/28/2008 - Feng - Quarterly Monitoring Report, 8/2007 - 10/2007, 10/2007. Active gasline/service station. Groundwater gauged and sampled 9/24/2007. 7 monitoring wells and 4 dual phase extraction wells. DTW 12.87' to 23.52' bg. Flows to east. No LNAPL. BTEX range ND to 52,070 ppb (W-1). MTBE range ND to 543 ppb (W-6). (RJF) 3/19/2008 - Feng - eDoc Quarterly Monitoring Report 4Q2007. (RJF) 3/24/2008 - Feng - Quarterly Monitoring Report, 10/2007 - 12/2007, 1/2008. Active gasoline service station. Groundwater was gauged and sampled 12/18/2007. 7 monitoring wells. DTW 13.43' to 22.66' bg. Flows to east. No LNAPL. BTEX range ND to 37,450 ppb (W-1). MTBE range ND to 302 ppb (W-6). (RJF) 5/28/2008 - Email Tyree for dual phase system information. 7/7/2008 - 1Q2008, 1/2008 - 3/2008, 4/2008. Active gasoline service station. Groundwater was gauged and sampled 3/26/2008. 7 monitoring wells and 4 dual phase extraction wells. DTW 12.74' to 21.05' bg. Flows to east. No LNAPL. BTEX range ND to 22,300 ppb (W-1). MTBE range ND to 366 ppb (W-6). Dual phase system is on. Air phase, total BTEX before carbon 88.1 ppmv, MTBE before carbon 1.2 ppmv, total BTEX after carbon 6.31 ppmv, MTBE after carbon ND. Groundwater, total BTEX before carbon 1,010 ppb to 4,365 ppb, MTBE

LOT 20,TAXBLOCK 2069 (Continued) **S107657287**

before carbon 93.7 ppb to 1,090 ppb, total BTEX and MTBE after carbon ND. (RJF) 9/4/2008 - Getty Proeprties portfolio meeting. 2 more wells upgradient of W-3 which has been has product will be installed. 12/2008 for work plan, installation will be in 1/2009. 10/6/2008 - Reviewed Investigation Work Plan dated 10/3/2008. Tyree proposed to install 2 addtional wells. DEC provided comments via email to Tyree: 1) soil sampling and screening past groundwwater interface; 2) increase screen interval due to the depth of water. Need revision of the work plan. (RJF) 10/7/2008 - Received the revision of Investigation Work Plan dated 10/7/2008. Approved the IWP. Letter to Getty Properties. Work will be implemented by 3/20009. (RJF) 1/6/2009 - Getty Properties portfolio meeting with Delta and Tyree. 2 wells will be installed next week. (RJF) 4/13/2009 - Reviewed Subsurface Investigation Report, dated March 2009, by Tyree. On January 22, 2009, Associated Environmental Service installed 2 new monitoring wells. PID show some low level reading in both locations 0-5 feet through 15-20 feet. 4 soil samples were collected. MW-8 (5-10 feet), MW-8 (13-16 feet), MW-9 (5-8 feet) and MW-9 (10-15 feet), all ND or low level VOCs. MW-8 was installed at depth of 20 feet, with 15 feet 0.02 inch screen and 5 feet riser. MW-9 was installed at depth of 23 feet with 15 feet 0.02 inch screen and 8 feet riser. Groundwater was encountered at 13-16 feet. 2 groundwater samples were collected. MW-8, 0.69 ug/L benzene, no else exceedances of VOCs. (RJF) 4/30/2009 - Quarterly Monitoring Report, 7/2008 - 9/2008, 11/2008, by Tyree. Active gasoline service station. Groundwater was gauged and sampled 9/4/2008. 7 monitoring wells, 4 dual phase extraction wells. DTW 14.05’ to 25.51’ bg. Flows to east. NO LNAPL. BTEX range ND to 18,070 ppb (W-1). MTBE range ND to 284 ppb (W-6). Dual phase extraction system is on line. Air phase, 56.50 ppmv to 115.20 ppmv BTEX before carbon, ND to 3.05 ppmv after carbon, MTBE ND. Liquid phase, 107.10 ppb to 1,193.20 ppb total BTEX before carbon, 8.90 ppb to 63.10 ppb MTBE before carbon, ND to 2.03 ppb BTEX after carbon, MTBE ND after carbon. Quarterly Monitoring Report, 10/2008 - 12/2008, 12/2008, by Tyree. Active gasoline service station. Groundwater was gauged and sampled 11/21/2008. 7 monitoring wells, 4 dual phase extraction wells. DTW 13.22’ to 25.26’ bg. Flows to east. NO LNAPL. BTEX range ND to 15,492 ppb (W-1). MTBE range ND to 177 ppb (W-6). Dual phase extraction system is offline. The system was shut down due to carbon break through on the liquid and water. Carbon will be changed in Jan 2008. Air phase, 1.41 ppmv BTEX before carbon, 45.90 ppmv BTEX after carbon? NO MTBE. Liquid phase, 1,176.20 ppb BTEX before carbon, 43.70 ppb MTBE before carbon, 1.41 ppb BTEX after carbon, MTBE ND after carbon. email Jen Kotch (Tyree) for clarification on influent and effluent sampling data and the replacement of carbon. (RJF) 11/6/2009 - 2Q2009, 4/2009-6/2009, 9/2009, pdf, by Tyree. Active gasoline service station. 7 monitoring wells. Groundwater was gauged 4/24/2009, 5/27/2009, 6/29/2009 and 7/8/2009. NO LNAPL. DTW 13.84’ to 25.06’ bg. Flows to east (perched above bedrock). Groundwater was sampled 7/8/2009. BTEX range ND to 5,106 ppb (W-1). MTBE range ND to 66.3 ppb (W-1). The site was surveyed on May 28, 2009. (RJF) 2/2011 February 2011 Tyree submitted a request to the NYSDEC for approval to permanently shut down and decommission the DPHVES. Based on current concentrations it is anticipated that the current groundwater trends will continue to attenuate naturally until contaminant concentrations reach asymptotic levels. As such, Tyree, on behalf of Getty, respectfully requests closure of NYSDEC spill number 95-03535 and a status of No Further Action be granted. 2/1/2012 Getty portfolio

LOT 20,TAXBLOCK 2069 (Continued) **S107657287**

transferred to KGH. 3/14/2013 KGH meets with Tyree/Getty to discuss remedial progress on various sites. Tyree PM Gerard Colling makes the case for closure on five of the Getty spill projects under his management. KGH agrees to review files and consider closure of select cases. 3/21/2013 KGH reviews case-file for Getty #340. 5/21/2013 - The Department has reviewed the remedial actions taken to remedy NYSDEC spill number 95-03535 and accepts Getty's Petition for Closure. No Further Action is Required by the Department. NFA. KGH "

DEC Memo:	"03/14/07-Hiralkumar Patel. received during off hours duty. spoke with Erik, property manager. asked him to hire contractor for initial cleanup to prevent any vapors inside building. received call from Anthony from PTC. they did little cleanup. found oil seeping into basement through wall where fill line enters into building. fill line runs underground under sidewalk for about 8 ft. cleaned out oil on surface in basement. visited site. met Jose (646-228-6255), building super. site has 3000 gal # 4 oil tank enclosed in concrete box. found oil leak from wall where fill line enters into building. no odors inside building. Jose noticed little oil from same location about month ago after oil delivery and after last delivery, which was yesterday morning, he noticed more oil coming into building. 41 residential units in building. found fill box sealed with cement. fill line leaked. PBS #: 2-000442 Arik Lifshitz 341 E 10th Street New York, NY 10009 Ph. (212) 673-2300 Fax (212) 673-2999 spoke with Mr. Lifshitz. asked him to renew tank registration as it expires on 04/17/2007. sent letter to Mr. Lifshitz requiring tank test, soil/groundwater delineation and endpoint sample. letter faxed to Mr. Lifshitz. 04/05/07-Hiralkumar Patel. left message for Arik for updates. 04/12/07-Hiralkumar Patel. received message from Arik. spoke with Arik and Ralph. Ralph told that they hired PTC for required work. he will call PTC and ask them to submit report. asked Ralph to renew thier PBS registration. 06/04/07-Hiralkumar Patel. left message for Arik. 07/24/07-Hiralkumar Patel. spoke with Arik. he will check with property manager, Ralph for any reports. left message for Ralph. 08/27/07-Hiralkumar Patel. spoke with Ralph at management. asked him to submit report by Aug. 31st, 2007. 08/31/07-Hiralkumar Patel. received call from Mark from PTC. he will send report next week.

RESIDENCE (Continued) **S108466713**

10/11/07-Hiralkumar Patel. left message for Mark at PTC. spoke with Ralph. he will talk to Mark and will send report. 10/31/07-Hiralkumar Patel. spoke with Ralph. asked him to submit report by Nov. 9, 2007. 11/02/07-Hiralkumar Patel. received report from Mark. they found fill line leaking. replaced fill line and found tank system tight. PTC took eight soil samples from borings and found no contamination. no indication of any excavation done at site. report missing following: - sampling depth - boring logs spoke with Jose, building super. as per him, they installed new fill box on foundation wall and never opened sidewalk. 11/26/07-Hiralkumar Patel. visited site. found patches on sidewalk and bore holes inside basement near tank location. borings on sidewalk are done about foot away from original loation of old fill line. left message for Ralph. 11/28/07-Hiralkumar Patel. received message from Ralph. spoke with Ralph. asked him to submit sampling depth. also asked him to open area where old fill line enters into building. asked Ralph to call once then open area. 11/30/07-Hiralkumar Patel. received call from Mark from PTC. he will open wall area where old fill line enters into building. he will also fax updated report with missing sampling depth. received fax from Mark with updates that samples inside building were taken at about 1 inch depth from bottom surface of concrete layer. spoke with Mark again. explained him that oil inside building was on surface but leak started from fill line and the department requires depth of samples taken on sidewalk alongwith depth of old fill line. 01/31/08-Hiralkumar Patel. spoke with Ralph. he doesn't know where new fill box is and whether any excavation done along old fill line. Ralph will ask Mark to call back. spoke with Mark. asked him to provide scaled site map with sampling location and depth. also asked to open area of wall from where old fill line enters into the building. 02/21/08-Hiralkumar Patel. spoke with Ralph about expired PBS registration. he mentioned that they already submitted form but due to missing information, it got delayed. spoke with Mark. they will open old fill line area probably on 02/26/08. 03/03/08-Hiralkumar Patel. visited site. PTC opened area where old fill line enters into building. no contamination found under sidewalk. old fill line located about 8 inches below grade. based on observations during site visit, case closed."

Remarks: "THOUGHT TO BE AROUND 30 GALLONS; FUEL LINE MALFUNTURE; SOMEONE ON SCEEN TO CONTAIN MATERIAL; HOME OWNER INFORMED TO CONTACT USA TANKS, PETROLEUM TANK AND PROVIDED NUMBERS FOR THEM; ONLY IN BASEMENT; LINE GOES UNDER GROUND SO MORE SPILLED MATERIAL IS POSSIBLE;"

DEC Memo:	"11/15/16 - Lakhani No PBS and no spills were recorded for the addresses at: 2600 - 2614 Adam Clayton Powell Jr. Blvd, New York, NY and; 201 - 203 West 150th Street, New York, NY and; 200 - 204 West 151st Street, New York, NY. 3:50 PM - Vought and Lakhani called and spoke to Frank Galdun (Merritt Environmental - 6316176200), the location was excavated as it was an old gas station and now a vacant site that is being redeveloped for residential purposes. The location was not listed as an NYC OER site. Upon excavation, twelve (12) unregistered 550 gallon USTs encased in concrete were unearthed. They continued and demolished the concrete casings. Minor soil discoloration was discovered and there was a slight gasoline odor. No vapor complaints were received to date. Currently there is no observed groundwater on site. Soil samples are required and will be attempted to be taken from the bottom bedrock surface and will also be collected from the soil side walls. All soil was excavated to the bedrock. 2 USTs were removed to date and there was no sign of corrosion - there is no indication of a leak. The remaining USTs are yet to be removed. All soil was stock piled and covered in poly (plastic) at the end of the day of excavation. Proposed development

VACANT COMMERCIAL (Continued) **S119027997**

includes a parking garage the is the size of the entire footprint of the building. Once the development plans are confirmed that the parking garage will occupy the entire basement, a sub slab depressurization system will not be needed as per prior guidance from NYSDOH, as per Vought. Each UST excavation site is 25' x 10'. Upon excavation of the USTs, piping was taken out. Pipes were followed to the dispensers and removed. Soil samples along the pipe lines will be collected. The USTs were found filled with gas and water. Their contents were pumped out by Action Environmental. Fill ports were not found on the sidewalk, but were found in between the two excavations. Lakhani and Vought intend to send a letter to Galdun regarding the case. Galdun said that he will circle back with progress on the site and with samples. Lakhani gave Galdun his contact along with Manilar's contact for more info for PBS registration. Vought gave Galdun his email. As per Vought, Lakhani is to be the lead for the spill. 11/16/15 - Lakhani On 11/15/16, Frank Galdun wrote: Jeff, As discussed below is the contact name of the property owner. Peter Chen Truss Development 43-73 Union Street, Suite 1A Flushing NY 11355 516-209-8404 peterchen33@yahoo.com Have all emails related to the job site emailed to: peterchen@trussdevelopmentgroup.com and; info@trussdevelopmentgroup.com. Address the property owner to 2600 7th Ave Realty LLC. 11/16/15 - Lakhani Spill temporarily assigned to Vought until Lakhani is put into UIS database. Letter sent including the following: 1) delineation of soil and groundwater (if applicable) contamination 2) submission of development plans for the site 3) collection of confirmation (endpoint samples 4) Collection of soil samples from along the piping line 5) approval of RAP prior to redevelopment 6) CC to Galdun, Vought, Peter Chen (Truss Development - 5162098404, peterchen@trussdevelopmentgroup.com) 7) PBS Registration. There is a one month (12/16/16) due date on the report. Letter added to D2 and sent to Chen via email and US Mail. 11/16/16 - 1:46 pm - Lakhani Frank emailed Vought regarding time for site visit. Site visit scheduled for 1 PM on 11/18/16. Frank claimed that all USTs will be removed by the morning of 11/18/16. 11/17/16 - Lakhani Galdun CCed Vought in email to Peter Chen stating that he has completed the NYSDEC storage tank registration documents. Peter has yet to send fees ($500) and registration documents to Central Office (Albany). 11/18/16 - Lakhani Vought and Lakhani visited the location and met with Frank Galdun, Peter Chen, and owner's representatives. There was a pile of piping that was removed but not characterized. Unearthed USTs and contaminated soils were covered by poly. Frank is awaiting results after sending waste classification on the contaminated soil. There were no olfactory odors present. There was an underground transformer on the southern sidewalk of 151st St. A gasoline remote fill for a UST exists on the northern sidewalk of 150th St. Possible down gradient of the site is a NYC park with no basement. Upon entering the location, there was a pit that was filled with some rainwater. Rainwater had no sheen. The sidewalls of the pit contained dark spots which indicated that the soil was contaminated with gasoline. Dark spots soils were confirmed to be contaminated after observing gasoline/diesel VOC odors. USTs were removed, but two (2) more 550 gallon USTs full of water with fill lines and encased in concrete were found after PBS registration for the prior twelve (12) was submitted. Frank must update the registration submittal for the total fourteen (14) USTs found at the location. Frank took soil samples from three (3) sidewalls. PID readings were low (highest reading recorded was 0.2). No complaints regarding odors have been

VACANT COMMERCIAL (Continued) **S119027997**

received from the surrounding area. Endpoint samples will be collected. Frank will be returning to the location on Monday to evaluate, remove, and drain new found tanks. For the development of the site, developer only needs to go down 6'bg. Bedrock is at a maximum of 8'bg. If contamination is below 8'bg then soil samples will have to be collected to delineate. Since a parking garage is intended to be built below the footprint of the building, a vapor intrusion barrier will be required but piping will not be necessary because garage will be above the contaminated soils. Therefore garage will vent any vapors. As per Vought, the above described pit requires a soil boring and further sampling due to the found soil contamination. The said pit should have the rainwater pumped out and then a soil boring should be placed. Frank notified Vought and Lakhani that prior due diligence sampling was done for the location but nothing was found. He said he would share those analyticals with Vought and Lakhani. Frank will share the UST closure report, sampling from holes, and scaled site plans with Vought and Lakhani. 11/21/16 - Lakhani Emailed Galdun and CCed Peter Chen regarding the gasoline remote fill port found on the northern sidewalk of 150th St. Notified him that as per PBS regulation, the fill port must be closed. Also since there was no tank tightness data to show that the fill had no leaks, a limited investigation must be performed with either installation of a soil boring or endpoint sample collection. Galdun responded that he will have the excavation contractor expose the line for excavation. 12/5/16 - Lakhani Emailed Galdun and CCed Peter Chen regard the due diligence reports and proposed investigation around the fill port on the northern sidewalk of 150th Street. Galdun responded informing DEC Lakhani of the discovery of one (1) 550 gallon waste oil UST and one (1) 550 gallon heating oil UST in a filled in basement. There was no evidence of a petroleum discharge discovered at that location and soil samples were collected. He also completed an investigation of the fill line by creating a 30' long trench to bedrock. From here, soil samples were collected along the excavation. No evidence of discharge was discovered. 3:54 AM: Called Frank about the site, but he was busy out in the field. Left name and number with Merritt Environmental and will follow up tomorrow. 12/6/16 - Lakhani 9:28 AM: Frank called back and notified DEC Lakhani of an old basement found in the northeast section of the property, fairly close to the gasoline area. They found it while scraping asphalt off the surface and uncovered a fill port. The basement was set into bedrock. The basement floor was 8'bg. The basement was filled in with soil and within the basement they had found one (1) 550 gallon waste oil UST and one (1) 550 gallon heating oil UST. The waste oil UST was full with waste motor oil and the heating oil UST was about 10% full with #2 heating oil. Both tanks were drained, cleaned, and removed from the site by Action Environmental. They took samples below each tank and sidewalls. Analyticals can be expected in 5-6 days. The fill port found on the northern sidewalk of 150th St has been concreted over. No vapor complaints have been made to date. 12/20/16 - Lakhani Called Frank Galdun. A draft of the closure report was sent to the client, Peter Chen. Frank said that analyticals from samples taken from the basement with the two (2) tanks showed indication of some contamination in the samples, but it was below CP-51 standards. Four (4) samples were taken: two (2) from the bottom and at least two (2) from the sidewalls because the sidewalls were mostly rock and stone. Some SVOCs were found in the basement samples as well, but nothing was above standards. The anaylticals from the

VACANT COMMERCIAL (Continued) **S119027997**

30’ trench were returned with no evidence of discharge occurring. The could not find the pipe during digging. All tanks have been registered and forms included in closure report. Past Phase II reports have been included in the closure report. One of the past Phase II reports indicate a bedrock well drilled 20’ down detected MTBE. Closure report should be received by early next week (12/27/16 - 12/30/16). They also did more digging along the east wall of the property where the gasoline stained soil was in the pit. They did not encounter further significant contamination. 12/27/16 - Lakhani Called Merritt to obtain the closure report. Maryann Wegh, project manager from Merritt Consulting, sent the Closure Report to DEC Lakhani. Uploaded to D2. 12/28/16 - Lakhani UST Closure Report (Merritt Environmental - Frank Galdun, 12/15/16) - Removal of twelve (12) 550 gallon gasoline USTs and associated dispenser/fill piping formerly located beneath the east side of the 2600 to 2614 Adam Clayton Powell Jr. Boulevard property. In addition one (1) 550 gallon waste motor oil UST and one (1) 550 gallon waste motor oil UST and one (1) 550 gallon heating oil UST was removed from the site. The size of the site is 19,910 sq. ft. and is currently unimproved in preparation for redevelopment to contain a residential apt. building with a partial underground vehicle parking garage. Historically the site contained one (1) single-story 1800 sq. ft. permanent structure that was used as a car wash. The remainder of the site contained exterior paved surfacing used as a commercial parking lot. Site appears to have been connected to municipal potable water supply and combined sewer/stormwater systems. According to a Limited II Subsurface Investigation Report from 8/13/15 by AEI Consultants, three (3) soil borings were installed at the site. Soil samples were collected from two of the three borings show that no VOCs were detected at concentrations that exceed applicable regulatory limits in either sample. Refusal of the drilling equipment occurred on shallow bedrock at all three borings. Two additional borings were subsequently installed into bedrock to intersect the water table to collect groundwater samples. Groundwater sample collected from this boring indicates MTBE was detected at 55 ppb. No MTBE was detected in any of the post-UST removal soil samples collected by Merritt. Upon UST removal activities, gasoline USTs were found approx. 10’ of the temp. bedrock having Merritt believe that only residual impact to the groundwater quality occurred. Merritt completed a Focused Subsurface Site Investigation Report on 2/18/16 and installed a total of 11 soil borings. The max. depth of the soil borings was 8.5’bgs and no evidence of petroleum contamination at actionable or reportable concentrations was discovered. First Excavation Group of NY, Inc. was retained to remove twelve (12) 550 gallon gasoline USTs and associated piping, one (1) 550 gallon waste motor oil UST and one (1) 550 gallon heating oil UST. Twelve (12) USTs were encased in concrete. Three (3) abandoned gasoline fill ports and on e (1) remote fill was observed at the site. A trench was excavated to bedrock where the fill line may have extended. Trench was approx. 35’ to the gasoline UST excavation and 3’ in depth. No piping or evidence of gasoline contamination was identified. Isolated zones of discolored soil exhibiting strong gasoline odors was uncovered near the base of the east gasoline UST excavation wall. The material was removed and stockpiled to the extent feasible since Adam Clayton Powell Jr. Boulevard was directly adjacent to the east excavation wall. No free-phase product or staining was observed on the bedrock surface. NO physical evidence of a petroleum release was encountered in fill

VACANT COMMERCIAL (Continued) **S119027997**

material excavated from the waste motor oil and heating oil UST excavation. Grab soil samples collected from waste motor oil and heating oil UST excavation were taken for which the sidewall samples taken at 7'bgs contain several SVOCs the exceed SCLs. No SVOCs were detected at levels in the bottom samples. Elevated SVOC concentrations are caused by the composition of the fill material in the sidewalls rather than representing a petroleum release to the environment. A vapor barrier shall be installed under the basement of the site building as a precautionary measure against possible future sources of vapor intrusion into the structure. Closure report is not sufficient. Groundwater sidewalk sampling down gradient of EXC A SIDE 1 and EXC A SIDE 4 is required to delineate possible groundwater contamination. Or if Frank claims that EXC A SIDE 1 & 4 were clean, then require a groundwater and soil samples at the bottom of the eastern pit. 12/29/16 - Lakhani 3:06 PM: Called Maryann Wegh, Project Manager, and explained to her the need for monitoring wells down-gradient of Exc A Side 1 and Side 4. She said she would relay the message to Frank Galdun. Will be speaking to Frank tomorrow (12/30/16). 3:56 PM: Called Frank to tell him that a sidewalk groundwater samples down-gradient of EXC A Side 1 is required since no vertical delineation was done. Sent a requirement letter to Peter Chen via U.S. Mail and sent the letter to Peter and Frank via email. 01/03/17 - Lakhani Frank called and informed that since there is a chance that installing a boring for a groundwater sample adjacent to EXC A Side 1 and Side 4 may not yield a sample, he asked whether two (2) borings can be done: one (1) adjacent to EXC A Side 1 and 4 and another adjacent to the southern portion of EXC B. 01/04/17 - Lakhani Frank has yet to receive a PBS number for the registration. Email Frank, as per DEC Vought, that two (2) sidewalk borings adjacent to EXC A and B will be sufficient. If the EXC A boring does not yield any water, a bedrock well is not necessary. 01/26/17 - Lakhani Contaminant Delineation Report (Merritt, 01/2017) - Installation of three (3) soil borings into the Adam Clayton Powell, Jr. Blvd sidewalk that abuts the east site perimeter. The two (2) southerly borings encountered bedrock at 4.5'bgs and the northerly boring extended to 12'bgs on bedrock refusal. A water bearing deposit was encountered at 9.2'bgs in the northerly boring (B2). Since a slight gasoline odor was detected in the water extracted from B2, a permanent well was installed as a precautionary measure designated (MW1). Soil samples were collected from the three (3) borings reported no VOCs at concentrations that exceed applicable regulatory limits. Some SVOCs were detected above limits. Lab analysis of the groundwater sample reported: benzene 0.83 ug/L(MW1, 9.2'bgs). As per Vought, spill is closed. DEC Requires: 1) delineation of soil and groundwater (if applicable) contamination 2) submission of development plans for the site 3) collection of confirmation (endpoint samples) 4) Collection of soil samples from along the piping line 5) approval of RAP prior to redevelopment 6) CC to Galdun, Vought, Peter Chen (Truss Development - 5162098404, peterchen@trussdevelopmentgroup.com) 7) PBS Registration 8) Submission of due diligence reports by Galdun as per meeting on 11/18/16"

DEC Memo:	"11/28/05: This spill transferred from J.Kolleeny to S.Kraszewski. 07/17/06: NYCHA Update summary states three 35K USTs that stored #4 and #6 oil and installed in 1968 were closed in 1968 (???) and replaced by a 25K UST in July 2000 and currently stores #2 oil. NYCHA will have a Site Assessment completed and forwarded to the Department. - SK 02/08/07 : DEC lead changed from S. Kraszewski to J. Kann. J.Kann 03/1/12: J.Kann - iwp received 2/28/12 and edoced today. 01/07/14: J.Kann - IWP reviewed and approved today. Site included in the Multi-Site stip sent to NYCHA today 7/30/14: J.Kann - visited site on 7/29 to observe field work. Groundwater is very shallow (approx 5 ft bgs). No visible contamination in borings. Two wells were installed and a groundwater sample taken from a temporary well point. 10/30/14: J.Kann - File indicates that an ISRP was conducted in 1996. Three wells were installed. Subsequent monitoring showed no product in wells or dissolved phase in samples. Tanks were removed/replaced in 1999/2000. The SAR and/or tank closure report for the site could not be located. SIR prepared by Ecosystems Strategies in 2014 was submitted on September 9, 2014. Report reviewed. 7 borings and 3 permanent wells installed. Groundwater was also collected at 2 temporary well points. Poor quality fill was encountered in all borings (containing brick, asphalt and concrete). SVOCs were detected in all borings with the exception of SB-1. Minor exceedences of CP-51 SVOCs were detected in some soil boring locations. Given the quality of the urban fill present, the slightly elevated levels are believed attributable to the fill. Permanent groundwater monitoring wells did not have any TOGS 1.1.1. exceedences. Based on information presented, spill closed. NFA."

Tank Info:

Tank Number:	1
Tank ID:	58784
Tank Status:	In Service
Material Name:	In Service
Capacity Gallons:	25000
Install Date:	07/01/2000
Date Tank Closed:	Not reported
Registered:	True
Tank Location:	Underground
Tank Type:	Fiberglass coated steel
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Pipe Model:	E
Modified By:	JSMACRI
Last Modified:	12/28/2018

Equipment Records:

A00 - Tank Internal Protection - None
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
I03 - Overfill - Automatic Shut-Off
K00 - Spill Prevention - None
E04 - Piping Secondary Containment - Double walled UG
B04 - Tank External Protection - Fiberglass
I02 - Overfill - High Level Alarm
L09 - Piping Leak Detection - Exempt Suction Piping
F05 - Pipe External Protection - Jacketed
C02 - Pipe Location - Underground/On-ground
J02 - Dispenser - Suction Dispenser
H05 - Tank Leak Detection - In-Tank System (ATG)
L02 - Piping Leak Detection - Interstitial - Manual Monitoring
D11 - Pipe Type - Flexible Piping
G04 - Tank Secondary Containment - Double-Walled (Underground)

Tank Number:	2
Tank ID:	58785
Tank Status:	In Service
Material Name:	In Service
Capacity Gallons:	25000
Install Date:	07/01/2000
Date Tank Closed:	Not reported

DEC Memo:	"2/4/2014 - Feng - Talked to Rob Hill of RiteWay (718-855-7272). It was an oil delievery of #6 oil. 10-15 gallons of oil came out of the vent line and went to the snow and onto the wall where the vent line located. Their crews were onsite to clean the stain on the wall and shovel all the impacted snow and put into the drum. No other leaks from the tank or the lines. No oil in the tank room. No vapor complaint. Spill is closed. "
Remarks:	"spill to out side fill area/clean up underway"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 2/28/2004 Sangesland spoke with property manager Mr. Helman. He said the spill was all cleaned up by Summit Transport. Sangesland spoke to super Leo (212-926-2021). He said the basement and outside looked very clean. He also said Summit hired AL Eastmond for the cleanup. Leo lives at 28 St Nicholas - Apt #1A Issac at AL Eastmond says the liquid in the basement was cleaned by Summit (973) 777-0404, but the long term oil problem in a pit outside the vent line was powerwashed by PTC (718) 624-4842. Issac does not know how the oil came into the basement, He will check it out and get back to the DEC with the information. 4/27/06 - Austin - Spill inadvertantly assigned to CO staff (Keating) - reassigned to Ketani 7/13/06 - Raphael Ketani. I spoke to Issac of Eastmond (718) 378-3000 regarding the site. He said that he didn't remember the site, but would look it up and get back to me. 8/7/06 - Raphael Ketani. I tried calling Summit to find out what involvement and documentation they have regarding the spill. However, I could only leave a voice mail for Mark Rosen. I tried getting ahold of Isaac of Eastmond, but he wasn't in. I will try tomorrow. 8/9/06 - Raphael Ketani. I called up Diana Parker at PTC and asked her for documentation for this site's cleanup. She said there was nothing in PTC's records for this site address and that PTC hasn't done a cleanup for Summit in a very long time. Next, I called up Isaac of Eastmond and he said that he found an invoice and paid bill for the site. He FAXed it to me. The documents show that a cleanup was done at the site. There was power washing of the sidewalk, walls, and a pit outside the vent line. Also, 2 bags of debris were removed and soap was used to clean up the site. Based upon these documents, I am closing the spill case. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY TANK WAS ABANDONED IN PLACE, NOT REMOVED. CLOSURE BORING SOIL SAMPLES SHOWED SEMI-VOCS. TCLP ANALYSIS OF SOIL SAMPLES TAKEN IN ADDITIONAL INVESTIGATION INDICATED THAT RESIDUAL CONTAMINATION IS NOT LIKELY TO IMPACT GROUNDWATER. SOIL CONTAMINATION IS IN AN ENCLOSED AREA, SURROUNDED ON 3 SIDES BY CONCRETE WALLS, UNDERLAIN BY CONCRETE OVER BEDROCK, AND COVERED BY CONCRETE PATIO. SITE IS AT 110 FEET ABOVE SEA LEVEL, SO LOCAL WATER TABLE IS LIKELY TO BE WELL BELOW CONCRETE/BEDROCK INTERFACE. HOWEVER, SOIL DOES CONTAIN LEVELS OF CARCINOGENIC SVOCS THAT COULD POSE A THREAT TO HUMAN HEALTH IF INGESTED OR INHALED. IN EVENT OF ANY CONSTRUCTION OR DEMOLITION WORK THAT WOULD INVOLVE CONTACT WITH THIS SOIL, APPROPRIATE PRECAUTIONS SHOULD BE TAKEN TO PREVENT INGESTION/INHALATION OF SOIL PARTICLES BY WORKERS."
Remarks:	"RESULTS FROM SOIL SAMPLES SHOW CONTAMINATION AT A TANK REMOVAL SITE"

DEC Memo:	"6/7/07-Matthew Klaas (Albany DER) -Attemted to speak with Alexander Kostic of Hill International at 212-292-3562, this number is no longer in service, and has no message on how to reach Hill International. -Attempted to contact NYC Hazmat Unit (Potential Spiller) at 212-422-4782 this number is incorrect for the Hazmat Unit and there was no way to obtain a current listing for the unit. -I was able to locate a current telephone number for Hill International, 212-244-3700, where I was put in contact with Sylvie Chan. After speaking with her at length on the telephone, she requested I forward her some basic information about the file so she would be able to check anything on file concerning this and get back to me. She told me she would find what she could and then return any findings. 6/11/07-Matthew Klaas (Albany DER) -Drafted a letter to Hill International requesting additional information regarding this spill form. 3/31/09 - Austin - Transferred from Needs Reassignment to Rahman for further work to remeidate and close - end 07/22/10 Site is a DEP facility. Letter was sent asking documentation regarding the spill to NYC DEP 886 St Nicholas Avenue New York, NY 10032 Attn: John Sloane(sr) 08/26/10 Spoke with Shay Mcatamny@(718)595-4618.She said the tank closure was performed by DDC and she is trying to retrieve the files.(sr) ** No old documentation available regarding the tank,but DEP personnel told me that there is no tank at the site at present.** "
Remarks:	"CALLER FOUND TANK ON ABANDONED LOT - ALEXANDER KOSTIC TANK COVERED W/SOIL - OWNER THINKS THEIR TANK IS THERE. PLAN TO EXCAVATE IN A FEW MONTHS - WILL CALL BACK PRIOR TO REMOVAL & TO REGISTER TANK."

DEC Memo:	"162040. At 1553 hours the Leak Committee declared an oil leak on 345kV transmission feeder M51. The leak rate is approx. 600 Gallons per hour, it is estimated that 1200 gallons has leaked from the feeder so far with approximately 25 gallons reported leaking into the environment. No oil has been reported in any sewers or waterways. An incident command post has been set up in an upgraded level at West 155th Street between St. Nicolas and Edgecombe Avenue's. The incident Commander is Larry Crilley, the communicator is Brian McGeever who can be reach at 347-386-4069. The spill is currently contained and a tanker, a vactor truck and New York City Sanitation are in route to the location. The OEM, DEP and Con Edison Environmental response team are on location. There were no injuries or media reported. 16:39 Allstate cleanup contractors on site. Logged by: D. Gaynair 20079 AT 14:25 CSD notified TO of feeder fault and large oil leak on M51. At 14:35 TO was notified by Manhattan #9 of a large oil leak at a manhole on 155th St and St.Nicholas Ave in Manhattan. NYFD on site pumping oil from manhole into 55 gallon drums. Sand was placed around manhole to prevent further loss to street. TO crews sent to location. Allstate power vac notified to respond. Additional crews sent to close valves in stop joint MH 63639. Additional crews sent to deliver oil from E16th St to W49th St. Chem lab notified to take samples. At 16:30 Allstate tanker on site and setting up to pump manholes. At 17:20 manhole was pumped down and TO crews attempting to install clamp. Leak reported as 8 long and 2 wide on top of 10 feeder pipe. At 17:30 the 10 stop joint valves were closed. At 18:10 5 valves in stop joint were closed. At 18:18 TO crews reported that temp clamp was installed. clamp continues to drip but is contained in half drum

FEEDER BREAK (Continued) **S107488664**

under pipe. As of 19:15 ERT PAul Walsh will be making notifications that 25 gallons of dielectric fluid was lost to the environment and 4650 gallons was contained and captured with a tanker. VS 78367 11/26/05 17:35. Nov. 26, 2005. 20:38. Lab Sequence Number: 05-12533-001 < 1.0 ppm E 608/8082 UPDATE: Leon C. Paretsky, Transmission Operations, NOV 27-2005 1230 hrs. (a) The following is the Incident Command System chronology prepared by Brian McGeever: Con Edison, Emergency Response Group, Substation Operations, Incident Briefing M51 Feeder Leak: Date / Time: 11/26/05 14:01 Incident Type: M51 OA with dielectric oil leak.. Location: F/O 404 W 155th St between Edgecombe Ave and ST Nicholas Ave in Manhattan Injuries / Evacuations: None Environmental Impact: ~ 25 gallons of dielectric oil on the sidewalk, Street, and private car from M62579, which is located on an incline. Property Damage: Private car White Mini Van, NYS Plate# CUV-8584 Customer Outage: None Media: NoOutside Agencies: FDNY Chief O'Kelly, FDNY HAZMAT 1, NYPD Capt Wishnia 33rd PCT, DEP Hazmat Mahendra Rawnarine, & Nick Loaknanth, DEP Sewers Andrew Kelly. Vendor All State Power Vac Equipment Overview: Hole in the 10 dielectric pipe on feeder M51 in M62579 Narrative: At 14:01 Transmission Feeder M51 opened auto with a loss of oil pressure. A CNS message was sent out for a conference call for the leak committee. Shortly after the FDNY reported to MECC that oil was coming from a Manhole in front of 404 W 155th st. MECC notified TO, and requested tankers from Astoria. ERT Paul Walsh responded. ERG McGeever was notified via text message, and Vern Shaffer notified Lawrence Crilley. ERG Natale called ahead to find out status and have FDNY request sand trucks. At TOA FDNY Hazmat laid sand down grade from M62579 to stop free flowing oil. In addition FDNY HAZMAT started pumping oil from M62579 to keep the oil level from over flowing onto the street. W 155th St was closed between ST Nicholas Ave & Edgecombe Ave. Building 404 (parking garage) had oil on the facade, along with a private vehicle mentioned above. 15:31 Command Post established. At this time ~25 gallons of oil are on the street, and 1 gallon in the catch basin on the S/W/C of Edgecombe Ave & W 155th St, but did not appear to enter the waterway. On site at this time are FDNY Chief Donnelly & Chief O'Kelly, NYPD Capt Wishnia from the 33rd Pct along with ME #9 OS T. Carey & ERT Paul Walsh. I (Brian McGeever) assumed the White Hat. 15:40 Conference call leak committee updated on status. FDNY is in progress on maintaining the oil level and preventing in from overflowing into the street by pumping out the oil in M62579 into 55-gallon drums. Tankers have been ordered, #9 OS Carey requested Vac Truck, McGeever called OEM for additional sanders. Natale will call for police escort for tanker. 15:42 TO OS L. Crilley on site being briefed. Chem Lab on site to take sample. 15:45 TO OS L. Crilley will be the IC, ERG McGeever will be the Communicator, and ERT Paul Walsh will be the EH&S Officer. 16:00 OEM requested Police escort for tanker from Astoria. ME will send a small dump truck, barricades, and drums. OEM reports DSNY is in the middle of a shift change and will provide sand spreaders as soon as they can. 16:14 DEP on site being briefed. OEM responder A. Timlin on site being briefed. FDNY is running out of drums and have removed 500 gallons at this time. TO has crews in route with drums. 16:18 TO Crew #1 Jason Hypolite, M. Cintron, and Morgan Donald are on site with additional drum FDNY continuing to pump and maintain oil level. ME Environmental OS Tracy Taylor is on site. TO OS A. Nardis on site and is the OC. 16:32 All State Power Vac Tanker (5000 gallon capacity) on site. 16:43 All State Power Vac Tanker in progress. 16:55 ME Vactor

FEEDER BREAK (Continued) **S107488664**

#1 Kevin Hyde & Mike Godfrey on site in staging area. CFS Manager Bob Anderson on site. FDNY is requesting the MSDS sheet be emailed to FH. 17:15 ERT P. Walsh reports the e2mis # is 162040. Safeway Contractor is on site. 17:19 CE tanker on site and is in staging area. IC request 2nd tanker to structure. Tanker being positioned. ERG Natale on site. Safeway Contractor Backhoe and Dump Truck full of sand on site and staged. DSNY Sand spreaders on site being staged. 17:31 IC requests sample to be taken from the source. The hole in the pipe is visible. OS Tracy reports additional Vactor and small dump truck are on site in staging area. Vactor #2 Mr. Raeford, and Small Dumper is Mr. Leverock. 17:56 Sample being taken from feeder M51. Fitting on pipe near break is being grinded off in order to make previsions for clamp. All State Tanker has 4,600 gallons and is pulling off site. IC requesting Vactor out of staging area to keep two trucks at the site. CE Tanker 80411 is in progress. Manager R. Foster called for update and reports he will have additional pressure reduction on the feeder. 18:13 BX/West Spill Van on site in staging area D. Walker and S. Spann. 18:10 Clamp in place leak slowed and is now at 30 gallons per hour. Bob Anderson reports CE Tanker is at TB Bridge toll plaza and in route. DEP Kelly issued a Commissioners order # E22715 to repair pipe, and clean all affected area. 18:30 Vac #1 off site. 18:45 Tanker on site Vac #2 moved out, and Tanker moved in place. 18:46 CP meeting with the following people: IC L. Crilley. EH&S P. Walsh & L. Paretsky. Environmental OS T. Taylor. Logistics Bob Anderson. ERG A. Natale. OC A. Nardes. Comm B. McGeever. OEM A. Timlin. DSNY J. Torres Temp clamp is in place, oil is at 30 gallons per hour, All State will clean building (404 W 155th St, sidewalk, street, private car, and driveway to Getty Gas Station. OEM will have PD keep street closed. Garage will re-open in the morning. A larger clamp is being sent from Astoria. FD wants replacement clamps for the ones the supplied (6 & 12) One light tower is on site, and the 2nd is in route. FDNY is off site. Police will maintain a secure area. ERG Natale gave MSDS to FDNY. ERT P. Walsh will provide all agencies with the sample results from Chem Lab. IC reports the break is at 75' elevations according to diagram. OEM updated. All trucks from ME are being released at this time along with the Spill Van from BWE. DSNY Sanders are being released also. Safeway Dumper with Backhoe will remain in staging. 19:05 Meeting ended. 20:30 Photo on site. 20:45 DEP HAZMAT is discussing sample return time with EH&S. Senior System Operator Brian Horton called for update. At this time two tankers one CE and the other All State Tanker have taken 4,600 gallons of oil each, FDNY pumped out 715 gallons of oil into 13 drums, and 25 gallons of oil were released onto the street with one gallon in the catch basin. 20:55 CE tanker reports they have taken 4,600 gallons. Total gallons captured at this time are 9,915. 21:45 2nd clamp is on the pipe is at a slow drip. The incident is being down graded to Routine. Clean up and oil recovery are still in progress. 22:10 Tanker driver reports from Astoria that the load on level ground read at 3,500 gallons, not 4,600. Total changed to 8,815 gallons. 23:36 Senior System Operator Brian Horton updated with site contact supervisor Robert Tremberger phone # (646) 235-2474. Command Post has been disassembled. (B) The following are the PCB sampling results. (1) Lab Sequence Number: 05-12533-001. < 1.0 ppm. (C) Cleanup activities. The folllowing cleanup plan was developed and implemented: Transmision Operatsions EH&S L. Paretsky on site till 0430 hrs, Sunday, Nov 27th,; M. Albani from 0400 hrs til 1200 hrs Sunday Nov 27th, at which time the cleanup activities described below were completed. * The affected areas of

FEEDER BREAK (Continued) **S107488664**

the garage building were cleaned by Allstate. The cleanup proceeding west to east (along the direction of the incline of the street). The concrete/brick facade was power washed; the roll-up door was hand washed. * The sidewalk and street was cleaned, again proceeding west to east. Speedy dry/aabosrbent was placed on the street/sidewalk, removed, and then the surfaces were cleaned with a detergent, scrubbing in, and then power washed. A bood was placed downstream of the cleaning area to contain and help collect any runoff. * The car in the area was cleand and then removed by the owner * There were tracks into the gas station at the southwest corner of 155th St & St Nicholas Place. The gas station area was cleaned. *The catchbasin on the southwest corner of W155th St &7 St Nicholas Place was cleaned. The debris in the basin was removed and the basin was then washed. * There was some staining inside the garage (404 W155th St). When the garage opened on Sunday, Nov 27th, it was cleaned. * A service box southwest of the feeder manhjole was opened and inspected for the presence of any oil from the incident. The service box was found to be dry. (D) Permanent Repairs A permanent repair barrel is being installed by Transmission Operations. Per Don Schaaf, project manager, Transmission Operations anticpate completing repairs at about 1300 hrs. (E) A NYCDEP Commisssioner's order was issued. The following email summarizes the order: From: Duke, David Sent: Sunday, November 27, 2005 3:23 AM To: dl - Environmental Response Team Cc: Paretsky, Leon Subject: Commissioner's Order for the cleanup of TO Manhole 62579... Commissioner's order E22715 for W.155th Street & Saint Nicholas Avenue in Manhattan (e2MIS 162040) DEP Inspector Andrew T. Kelly (Badge #67) issued a Commissioner's Order on November 26, 2005 for the 10,000 gallon spill of Transmission Feeder Dielectric fluid in ConEd Manhole # 62579, located at W.155th Street & Saint Nicholas Avenue, Manhattan, NY. The order states the following: Pursuant to the authority of Commissioner of the Department of Environmental Protection, as set forth in the New York City Chapter and Administrative Code, including, without limitation, Sections 24-523 and 24-524 of the Administrative Code and Rules of the City of New York relating to the Use of the Public Sewers, 15 RCNY, Chapter 19, the above named party is herby ORDERED to take the following actions at the premises located at W.155th Street & Saint Nicholas Avenue in Manhattan immediately after receiving this ORDER. Administrative Code Section 24-524(a): Specific details of corrective actions: 1) Must repair the damaged feeder line so that it does not leak oil. 2) Must remove via certified environmental agent, the oil that spilled. 3) Clean-up must include the catch basin at W.155 Street & St. Nicholas Place, the sidewalk, street, and the 55 gallon drums. Based upon the above cleanup activities, the Commissioners' order was satisfied. (F) Per the attached Email from Mike Daughtrey ERT, the start time of the incident was revised 1553 to 1449 hrs. Mike Based upon the above, the first reported time and the report to env services will also be changed to 1449 hrs. This is distinct from the feeder leak times, which were 17:05 and 18:03, respectively. Discussed latter revisions with Paul Walsh, ERt. L Paretsky, Transmission Operations. Closed. 12-28-05. see eDocs. GB "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT 10/20/98, 10:43 hrs - Gerry Matterazzo, UT: manhole cleaned, drainage into drum - no clamp. Will break out manhole wall to make repairs. Pumped down and washed by Clean Harbors. Sampled 3 ppm PCB. (CAE) On location at 12:28 hrs. John Molahan, Trans Ops, on scene. Leak from feeder near wall of manhole. Feeder still under full pressure. Excavating outside manhole to break out wall. Not exposed yet. No visible contaminated soil - excavation is about 4 - 5 feet deep. Feeders look as if they are just below this level judging by their position in manhole. Clean Harbors removed 3000 gallons oil/water last night (4 - 5 inches of oil in manhole). (CAE) ~~~~~~~~~~~~~~~~~~~~ E2MIS 120636 10/20/98 00:24 CARRILLO #03309 REPORTS: IN M-61738 W155 ST 120' W/O ST. NICHOLAS ST. FOUND APPROX. 50 GLS. OF DIELECTRIC FLUID ON APPROX. 1000 GLS OF WATER.. OIL WAS CONTAINED TO M/H. TOOK SAMPLE 3PPM PCB LAB SEQ. 98-11259 OIL & WATER HAVE BEEN REMOVED AND M/H CLEANED UP COMPLETE BY CLEAN HARBORS OIL NEVER ENTERED ANY WATERWAYS OR SEWER SYSTEMS. OIL WAS FROM 10 345KV PIPE TYPE CABLE. NYSDEC #98-09008. This leak was originally entered on 120616 as part of the leak search on Fdr M52 and was reported earlier. At the request of CIG this incident was entered to seperate this incident from the one at 79th St and West End Ave. At 17:00 fluid was found in manhole 61738 by Con Ed crews looking for leak on M52. Samples were delivered to Chem Lab Clean Harbors was called and manhole was pumped out. At 19:55 manhole was pumped down and slight weep seen between reducer and wall @ E wall. Temp EPA ID # NYP004019683 for CTW removal from manhole. ATC notified at 21:35 for air monitoring at manhole. Chem Lab reports 98-11259 3ppm PCB's. Manhole cleaning was completed at approx 12 midnite. ATC on location for CTW removal. CTW removal completed between reducer and wall. Leak found inside manhole sleeve. Packing removed and fluid allowed to run into manhole into containment vessel. Manhole wall to be broken out for repairs. Excavation started on 10/20/98 at 08:00. Excavtion completed and temp clamp installed at 18:30 10/19/98. No fluid visible outside of manhole. Chem Lab reports 98-11260 70 ppb benzene. Clean Harbors removed 1 cubic yard of debris and 3000 gallons of oil/water from manhole. Permanent repairs started at 07:00 10/23/98. 48 long barrel through wall installed and tested. Repair completed 20:10 10/23/98. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT e2mis no. 123858: spilled 3 gals of transformer oil on to the concrete sidewalk. was performing a retro fill in v-5400,fdr.1m06. he was moving the old oil in a 55 gal drum from the vault to his vehicle when incident took place.the spill was contained

158TH ST/RIVERSIDE DR (Continued) **S103829427**

and did not enter the waterway or sewer system. the spill was cleaned up complete by mr.russell at 19:30.material history indicates pcb count of 151 ppm. the spill was caused by damaging the drum with a hand cart. The side walk was double washed with Bio-Gen 760. The oil in damaged drum was transfered to new drum. the damaged drum plus 1 drum of generated waste was loaded on and taken by corporate Transportation Rack Truck to Astoria."

Remarks: "MATERIAL IS 151 PPM PCB. TRANSFORMER WAS DRAINED OF OLD OIL AND REPLACED W/NEW. BARREL CONTAINING DRAINED OIL WAS BEING MOVED TO TRUCK WHEN MATERIAL WAS SPILLED. ALL RECOVERED. "

DEC Memo:	"8/15/18-Zhune spoke to Maya Shani homeowner of APT 3F 646-483-4075. Maya said that she lives across the street of the gas station. Her windows are closed and cover with plastic film and she got gasoline smell coming from the gas station across the street. the smell comes and goes and it depends on the weather and how busy the gas station is. Right now she have it in her apartment. 08/15/18 - Lakhani DEC Lakhani visited the site and met with Maya. No olfactory odor was observed. Maya informed that she often smells the gasoline odors for 20 mins to 2 hours at a time throughout the last year. DEC Lakhani inspected the BP gas station and found that work was being done on one of the fuel sump pumps. DEC Lakhani will speak to DEC Zielinski for the BP gas station to be PBS inspected. 08/20/18 - Lakhani DEC Lakhani spoke to DEC Zielinski regarding the BP gas station across from the site. DEC Ali will perform an inspection of the gas station. Spill is closed."
Remarks:	"homeowner lives across the street from the gas station and there is an ongoing gas smell for years! I advised her to report it the local fire department."

DEC Memo:	"12/20/05: This spill transferred from J.Kolleeny to S.Kraszewski. 9/22/06: Spill transferred from Kraszewski to Kann. -JK 9/21/10: J.Kann - Quarterly Report recieved on 9/1/10. 3/4/11: J.Kann - Quarterly Report recieved on 1/6/11 5/10/12: J.Kann - Quarterly Report rcvd 5/9/12. 9/6/12: J.Kann - Quarterly Report recieved on 8/21/12 5/15/17: J.kann - visited site on 5/12/17. Limited oil still present in MW-1. However, based on the following the spill will be closed: -continued VEFR and monitoring performed monthly for the last seven years. Minimal product remains in one well and one recovery well. Oil recovery system installed in 1998 and operated for 15+ years -tanks, which were the source, were closed in place in 1989 -Measured product thickness has been less than an inch in MW-1 with product for 5+ years -no dissolved phase contaminants detected in groundwater at the site. -investigative work performed in the mid 1990s delineated the impacts on site and no off-site impacts found. In addition, work at the Polo Grounds located immediately south of the tank area showed no contamination. As per Randy in a discussion of January 20, 2017 if less than 0.25 inches of No. 6 oil has been in on-site wells for 2+ years and contamination has been delineated all around the impacted area and there is nothing off-site and no dissolved phase in wells, and source has been removed/closed spills can be closed. The Closure Letter should contain the contaminated soil clause. Closure email sent to NYCHA today."

Contact Name:	RALPH TROCCHIO
DEC Memo:	"11/1/04 - Sawyer - Responded to #2 fuel oil spill at NYCHA property Rangel Houses 159-38 Harlem River Drive. When I arrived Raplh Trocchio of the NYCHA services division was onsite, with numerous other NYCHA employees, and a NYCHA vac truck that Ralph said contained about 856 gallons was leaving the site. He also informed me that Clean Venture was on there way to perform final clean up. The spill was in the vaulted tank room that houses four 15,000 gallon

RALPH RANGEL HOUSES -NYCHA (Continued) **S102662631**

tanks. Tank 3, the most used tank was miscalculated for total volume and overfilled during an interior transfer. About 870 gallons were spilled in to the Above ground tank room. All of the tanks in the room are on concrete slabs and there were no drains and sewers affected. A very small amount escaped under some concrete calking at the edge of the room. I instructed Ralph to re-calk and waterproof/epoxy paint to close those small leaks in the vault. He was also instructed to forward all documentation associated with this clean up to the Department. Clean Venture arrived about 1630 and was well on there way to power washing the vault and containing residual in a vactor truck when left at 18:15. 12/7/04 - Sawyer - Called Ralph Trocchio with NYC Housing Authority and he will send appropriate documentation asap. 12/10/04 - Sawyer - Received the documentation from Ralph Trocchio NYCHA. He included solid waste manifest, tank truck ticket for 329 gallon of oil/water clean up mixture and the invoice. The rest of the oil and clean up debris was also contained in drums that are to be transported by Clean Venture also. Ralph will send over supporting information asap. No further action required. Closed. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY TRANSFERRED FROM Y.KRIMGOLD TO KOLLEENY TO I. ISLAM. 6/20/06- The site's soil and GW are under remediation by LiRo Enginers by installing SVE system and implementing monitoring program to document natural attenuation of dissolved phase contaminats respectively since 2004. Reviewed the Jan-Mar/05 quarterly report. The system performance data show effectiveness of soil remediation. The GW monitoring data also show substantial improvement. Soil sampling will be scheduled when influent air sampling results suggest the SVE system no longer effectively recovering VOCs and routine system monitoring to continue.- II 8/30/05- Reviewed the Apr.-Jun/05 monitoring report. The SVE system collected approx. 12.1 pounds of VOCs during the monitoring period. April 2005 groundwater sampling results showed a northward shift in dissolved phase contamination from MW-3 to the area of MW-4. However, overall dissolved phase contaminant concentrations were observed to decrease substantially in compared to previous site-wide levels. Routine monitoring (monthly) of SVE system and GW sampling(quarterly) will continue. Copied the report in the eDoc folder.- II 12/2/05- Reviewed the Jul-Sept/05 monitoring report dt. Oct. 18/05 submitted by LiRo Enginers. July 2005 GW sampling results indicate that dissolved phase contaminant concentrations continue to decrease at the site under natural attenuation. The only contamination identified at the site during the July 2005 GW sampling were minor exceedances of NYSDEC quality criteria for benzene (4 ppb) and ethylbenzene (14 ppb) in one well only out of the four wells sampled. The SVE system collected only 0.1 lbs of VOCs during the monitoring period and produced substantial induced vacuum levels at the site. LiRo recommends continued operation and monitoring of the SVE system. LiRo also recommends advancing four soil borings (location included in the report) in support of soil closeout once two consecutive rounds of influent system air sampling indicate a low volume of VOC capture. LiRo's recommendation is hereby approved. Filed the report in the eDoc folder.- II 04/05/06: This spill transferred from I. Islam to Q. Abidi. Reviewed the Quarterly Monitoring Report for Oct - Dec. 2005, dated January 20, 2006 submitted by LiRo Engineers. LiRo advanced four soil borings in Feb 2006 and they will send the report with sample results in a week. LiRo recommends discontinuation of

CONVENT GARDENS DPR -DDC (Continued) **S102663768**

groundwater monitoring at the site, as the latest groundwater results came out clean. Sent email to DDC on April 5, 2006 approving LiRo s request to discontinue groundwater monitoring. - QA 08/25/06: This spill transferred from Q. Abidi to J. Kolleeny. - JK 09/06/06: Reviewed LiRo's Quarterly Report for Jan.-March 2006. System monitoring data indicate SVE system has reached limit of effectiveness. Groundwater sampling in March '06 showed ND in all three on-site wells. Confirmation soil sampling in Feb. '06 showed no contamination in 3 of 4 boring locations; however, boring LBR-2, near south end of closed-in-place 4K motor fuel UST, showed highly contaminated soil from 10 to 13 feet below grade, with total VOCs of 1,404 ppm in 11-12 foot interval. Nevertheless, downgradient well MW-3, which in past has showed worst GW contamination of 3 on-site wells, has been ND for 2 consecutive sampling events, suggesting residual soil contamination is not impacting GW quality. Options for addressing residual soil contamination are limited; SVE system appears to have done as much good as it can, excavation would be difficult due to depth of contamination and presence of adjacent closed UST, and would likely damage nearby gazebo in the park. After discussion with Koon Tang, it was agreed that problems with attempting to excavate soil outweigh potential benefits, and that since contamination is localized and no longer impacting groundwater, no further remedial action is warranted. However, if usage of this property were to change, presence of residual soil contamination should be taken into consideration, especially if site is ever developed with a building, in which case there may be a vapor intrusion hazard. Closed spill and issued NFA letter (in eDocs folder). - J. Kolleeny "

DEC Memo:	"11/16/2016: Rashad Called Isabel and left message. 11/17/16 - Obligado - This spill has been assigned to me as per Vought as it is a NYCT subway facility. According to Francine, NYCT observed an intrusion at 148th Street Station/Lennox Yard in Manhattan. With the water there is a sheen, and it is suspected the school, which has a boiler room on the other side of this wall has had a release. OSS has been told, no one from the school has been able to be contacted. The intrusion is intermittent, but was first identified sometime on Tuesday 11/15/2016. We are seeking the assistance of NYSDEC, please advise if an investigation will be conducted to see if the school is the RP of this most recent Intrusion. I believe Omar also called Isabel to follow up, and may be assigned to the case. I called Francine Maebauer. The product is seeping into the under ground station. The seep is in a non public area. The hydraulics division believes that there is a tank adjacent to the station in the Frederick Douglas Academy. They will arrange for access for me to observe the seep. I called DOE Fuel Division and spoke to Munendra at 718-349-5752 regarding PBS #2-354007 Public School 10 at 2581 Adam Clayton Powell Jr Blvd, which is the adjacent school. He said they

FREDERICK DOUGLASS ACADEMY (Continued) **S119028056**

have 2 15,000 double wall ASTs. I will meet Tilac Ramautar 347 764 3949 at the site. 11/18/16 - Obligado - I met Tilac at the site and we inspected the basement. There was approximately 2 inches of water in the basement and floating oil on the water leaking from an oil transfer pump. We walked outside to the NYCT subway yard and there was oil on top of water in a small alcove area adjacen to the building. Tilac hired Riteway who arrived and began pumping oil and water from the basement. They then proceeded to remove oil stained debris and pump out oil and water from the NYCT yard alcove area. When I left the site at 1600 hrs Riteway was still working in the yard area. 11/19/16- Obligado - I inspected the site first thing in the AM and observed that the NYCT yard alcove area still had water with floating oil on top, about a 20 square foot area, slightly smaller then the day before. After returning to the office I called Riteway and Anthony Lara said his guys finished pumping oil from the alcove area yesterday and today they were working in the tank room to pump oil and water from the tank room. He said that the oil I saw in the alcove had come back in over night after he pumped the area dry. He said the remediation work in the NYCT will be more complicated as the oil appears to be coming from the subsurface. He said there is about 3 ft of soil in that area that is likely contaminated and he does not have authorization from NYCT to do excavation in that area. I called BOE Munandra and reiterated to him the situation in the NYCT yard and he agreed that additional work will need to be done but they will do what they have to do. He said they will do a full system test on the system to make sure there are no continuing leaks. 11/21/16 - Obligado - I spoke to Francine and told her the status of the clean up and that the remediation was more complicated due to subsurface impacts in the yard. We agreed to potentially have a site meeting to discuss further. I called Rob Hill of Riteway. They are cleaning tank 1 today and they will test the system after. Tomorrow they will empty and clean and test Tank 2. 11/23/16 - Obligado - Representatives from NYCT (Francine Ocampo and others), DOE, and DEC (Obligado) and Riteway (Anthony Lara) met at the site to discuss the spill and remedial options. The subway yard alcove was still impacted by petroleum. Floating oil was still present on top of standing water. The following is a summary: DOE will submit a Remedial Work Plan for to remediate the alcove. NYCT will provide subway yard as builts of the Area of Concern to DEC, to provide to DOE. The Area of Concern is the alcove north of the walkway. We discussed remediation via a guzzler to remove contaminated soils, water, and product. The RAWP will need to be approved by NYCTransit. The RAWP will need to be P.E. Stamped. 11/30/16 - Obligado - I sent an email summary to all parties with the following points: -According to the DOE, the tank system at the School passed a complete system test. -At the time of the meeting, the sump pump in the school basement was still inoperable. DOE needs to replace the pump which may address high water table conditions. -The DEC requires additional clean-up work in school tank vault which still had residual oil and contaminated material on the vault floor. -The Area of Concern (AOC) for remediation in the subway yard is limited to the square alcove area west (school side) of the elevated walkway. There may be has much as 3 feet of residual fuel oil contaminated soil on top of bedrock in the alcove from historic oil spill(s) from the school basement. The high water table appears to have brought residual oil to the surface. -The current conceptual remedial plan is to use a guzzler to remove oil and contaminated soil from the alcove. If feasible, the guzzler hose will snake through the

FREDERICK DOUGLASS ACADEMY (Continued) **S119028056**

gap between the school and subway station walls. Riteway may need to find an alternate type of hose which will fit through that gap. -NYCT will provide the DEC with as-built drawings of the AOC. DEC will provide drawings to DOE to develop a Remedial Action Work Plan (RAWP) -DOE will submit a RAWP for the remediation of the subway yard to the DEC. After DEC review, DEC will provide the RAWP to NYCT for approval. -NYCT requires the RAWP to be signed by a P.E. 1/6/17 - Obligado - I sent Francine an email inquiring if they had located design drawings of the area in question yet. 1/10/17 - Obligado - I emailed Munendra to inquire about the status of the clean up in the School. According to Mununendra the status is as follows: Thus far both oil pumps and sump pumps were replaced. All debris and contaminated materials were removed and properly disposed. The entire tank room including the tanks were power washed clean. Both tanks are getting painted. When this is done we will we will epoxy paint the tank room floor. 1/12/17 - Obligado - I spoke with Francine Ocampo at NYCT system safety. They have no additional design drawings of the area in question. She said based on her discussion with NYCT MOW generally speaking the conceptual guzzler plan for soil removal was ok. I sent an email to Munendra informing him there are no additional design drawings and that he should submit a Work Plan to the DEC which will be forwarded to NYCT for review. 2/2/17 - Obligado - I inspected the boiler pump room and tank room with Anthony of Riteway and Tilak from DOE. The clean up in the building is complete. The entire tank vault has been cleaned and apoxy painted. He still plans to paint the boiler pump room. The sump pump has been repaired and was operational. In the NYCT yard, the ponded water and floating product has subsided below the surface. A small 1 x 1 pit was evident in the alcove, it is unknown who dug the pit. Free product was observed in the pit at about 1 ft depth, which is the presumed new depth to water when the sump pump is operational. It appears that the water level in the alcove yard and the sump room are hydraulicly connected. Riteway will develop a remedial plan. 4/25/17 - Obligado - I sent a letter to the NYC Dept of Education Mr. Sharma notifying him that the RAWP is overdue. I required submission of the overdue RAWP within 30 days or this case will be referred to the office of General Counsel. 5/2/17 - Obligado - I received the work plan submitted by Riteway. I disapproved the work plan based on the below comments and required resubmission within 30 days. 1) results of Engineering Assessment included in the plan 2) Utility Markout prior to excavation 3) 8260//8270 analysis 4) Scaled site plan showing excavation area 5) submission of Remedial Action Completion Report after remediation 6) Remove cost and contract language from submission 7) Implementation Schedule 5/22/17 - Obligado - I received the revised Work Plan. 6/7/17 - Obligado - I completed review of the Work PLan. Items 2 and 4 were not addressed in this second submittal. Due to failure to submit an acceptable and approvable workplan I sent Munendra Sharma of DOE a Stipulation AGreement to clean up the spill in accordance with a corrective action plan. 6/13/17 - Obligado - I spoke to Munendra over the phone. He said that Riteway did not have the resources to provide the RAWP the DEC required. He will have the School Construction Authority take over the clean-up as they have an engineering firm who is capable of preparing an appropriate work plan. I told him that I agreed with the proposed course of action. 7/14/17 - Obligado - I received a phone call from Melisa Demmet at SCA. SCA is taking over the clean up. A tentative site meeting is scheduled for 7/14/17 with AKRF and SCA. 7/19/17 - Obligado - I met

FREDERICK DOUGLASS ACADEMY (Continued) **S119028056**

SCA, AKRF, and NYCT personnel at the site. We inspected the school pump room and tank vault. We observed oil seeping up through the tank vault floor with the groundwater. Photos in edocs. There was a slight sheen on the water in the sump. We discussed the remediation plan. In light of the product seepage into the tank vault room, AKRF is considering doing some remedial investigation to determine the extent of the product plume beneath the building. Preliminary discussions for some hand borings in the basement and in the alcove. They will submit a Remedial Investigiation Plan to the DEC for review. 8/9/17 - Obligado - I reviewed and approved an investigation workplan to do 5 soil borings in the school basement. The borings will be 3 ft deep or to bedrock, which ever is shallower. The purpose of the boring is to observe for the presence of LNAPL beneath the school basement floor. Prior to advancing soil borings they will perform a geophysical markout both in the school basement and in the alcove area in the NYCT transit property. I forwarded the workplan to Michael Mandac of NYCT for access approval. 11/1/17 - Obligado - I reviewed the Spill Delineation Report. 5 soil borings were advanced in the basement. The borings were advanced 3 ft until bedrock refusal. No Groundwater or LNAPL was detected in the borings. Elevated PID readings were detected between 47.8 ppm and 403 ppm in SB5. No LNAPL was detected in the soil borings. The report recommends excavation in accessible area, and to the amount practically feasible, collection of post excavation soil endpoint samples, and backfilling with clean backfill. I sent an email to Melissa Demerrit concurring with the recommendations and requesting submission of a Remedial Action Work Plan. 11/6/17 - Obligado - RAWP received. 11/9/17 - Obligado - I reviewed the RAWP. The plan proposes to excavate the contaminated soil in the alcove area to extent feasible and collection of endpoint samples. I provided comments on the RAWP. 11/15/17 - Obligado - I reviewed a response from Melissa Demmett on my comments. She adequately addressed my comments. I sent an approval letter to NYCSA with 2 modifications, 1) remediation work during off-school days, 2) stockpiled soil will be covered with plastic sheeting. RAWP implementation upon approval from NYCT Office of System Safety. 3/27/18 - Obligado - I received an email from Melisa Demmet at the NYCSCA. We would like to touch base with regard to the on-going coordination and delays of the project. In a February field meeting was set-up to discuss the scope of work between IEH, AKRF and Lyudmila Bord and Miron Kuchuk from the Capital Program Management (CPM) group of NYCTA. At that time SCA was still awaiting feedback regarding RAWP approval and/or comments. Last week AKRF received a call from Norman Lindo of the NYCTA, and he has requested the submission of a full-sized stamped drawing set with cross-section views showing the existing Transit structures and the extent of our excavation. He is particularly concerned about our proposed excavation shifting the footings for the control house. Since we currently do not have access to this information, AKRF will need to try to obtain this information from the NYCTA microfilm records. In addition to the stamped drawing set, Track Safety Training is required and will be arranged by NYCTA. 4/12/18 - Obligado - I received and approved a revised RAWP Figure 2. The figure adds a 3 foot buffer around NYCT transit structures due to concerns of undermining the footings for the control house. 9/26/18 - Obligado - Remediation Work was Completed the 1ast week of August.. Report to be submitted by the end of next week. 10/9/18 - Obligado - I reviewed a Remediation Completion Report. 25 yards of contaminated soil was

FREDERICK DOUGLASS ACADEMY (Continued) **S119028056**

removed from the alcove down to the bedrock at 3 ft below grade. Additionally the oily water mixture was vacuumed out of the vaults. Manifests were included. A three foot buffer around NYCT structures and building footings prevented removal of all contamination. Several endpoint samples were above soil clean up levels for petroleum. While residual petroleum impacts remain, the spill has been remediated to the extent feasible based on constraints in the NYCT yard. Additionally, significant tank system repairs and oil clean up activities was undertaken in public school 10. This spill no longer appears to be a threat to human health or the environment. Spill closed. "

Remarks: "School next to building is leaking clean up is pending School has not been notified at this time"

(212) 749-7851 49 W 94TH ST #1 10025-7129, NEW YORK (NY) **possible address for Mr. Hadar** Oz Levy **info from DOB permit in Jan. 2011** Sugar Hill Gas Station Inc. 2753 Broadway Ave, Suite 377 New York, NY 10025 Ph. (212) 942-5550 Fax (212) 942-0366 summary of available information: - the subject spill was reported due to gasoline seepage into subway tube located west of the subject site - monitoring wells were installed on southern portion of the site - proposed to install remediation system including free phase product recovery, dissolved hydrocarbon recover and soil/vapor hydrocarbon recovery - record indicates operation of recovery systems, but no records available indicating when these recovery systems were initiated and terminated - as per available reports/documents, total of fourteen (14) monitoring wells were installed at the site: MW-1 through MW-6, MW-8 through MW-15 - site maps are available showing location of MW-1 through MW-6 and MW-8 through MW-12; but no maps indicate location of wells MW-13, MW-14 or MW-15 - groundwater samples were analyzed from multiple monitoring wells at the site - last available groundwater sample result indicate collection of groundwater samples on 12/14/2001 - last available invoice from Winston Contracting dated 05/01/2002 includes wells gauging and purging 12/31/15-Hiralkumar Patel. 1:00 PM:- visited site to confirm location of previously installed monitoring wells. total of fourteen (14) well covers noted at the site. available records show installation of fourteen (14) monitoring wells (MW-1 through MW-6, MW-8 through MW-15) at the site. Jose Pimentel **on-site tenant** PH. (917) 893-2253 01/04/16-Hiralkumar Patel. 9:48 AM:- sent email to OAG Jennifer Dentinger inquiring updates. 01/06/16-Hiralkumar Patel. discussed with OAG Jennifer. 01/27/16-Hiralkumar Patel. 3:25 PM:- left message for OAG Jennifer. 02/04/16-Hiralkumar Patel. 9:39 AM:- left message for OAG Jennifer. 02/17/16-Hiralkumar Patel. 2:44 PM:- left message for OAG Jennifer. 04/26/16-Hiralkumar Patel. 9:01 AM:- sent email to OAG Jennifer inquiring about if formal report needed for possibly a last round of groundwater sampling. 9:38 AM:- received email from OAG Jennifer stating that a formal report is not needed. 05/23/16-Hiralkumar Patel. 1:48 PM:- sent email to Dave including copy of standby contractor authorization form. asked Dave to schedule well sampling asap. 05/26/16-Hiralkumar Patel. 10:40 AM:- spoke with Mayra Rojas, property manager and informed her about required groundwater sampling. Steady Realty LLC. **property owner** c/o New City Management LLC. 2753 Broadway, Suite 377 New York, NY, 10025 Attn.: Mayra Rojas PH. (646) 376-9952 (C) (212) 913-0823 email: mayra@newcity.nyc 10:56 AM:- sent email to Dave including contact number for Ms. Rojas. asked Dave to contact her to schedule sampling. email copied to Ms. Rojas. 06/20/16-Hiralkumar Patel. 11:41 AM:- received email from Melissa from TestAmerica requesting call-out for lab. 11:55 AM:- sent email to Melissa including copy of standby contractor authorization form. 12:02 PM:- received email from Dave. he has collected samples from three wells and composited into one sample for disposal classification. he mentioned that based on site condition and use, it may take two days to complete the sampling. 06/24/16-Hiralkumar Patel. approved EnviroTrac's invoice (# DC2069.00-1) for project coordinate, file review and calls to property owner/lab. 07/05/16-Hiralkumar Patel. 8:36 AM:- received email from Shalini Williams (shalini.williams@testamericainc.com) from Test America including results of waste classification sample.

STATION 800, LLC (Continued) **U000414037**

07/22/16-Hiralkumar Patel. 9:21 AM:- received email from Dave requesting signature on waste characterization report as generator for disposal of purge water from site. 07/27/16-Hiralkumar Patel. 10:22 AM:- sent email to Dave including signed copy of waste characterization report. approved EnviroTrac's invoice (# DC2069.00-2) for project management, sample collection for disposal parameters and coordination with lab. 8/23/16-Vought-Received email from EnviroTrac (Lorthior) on 8/17 requesting a contract increase on this spill as Albany recently rejected an invoice as amount was over the callout. Vought sent email reply on 8/18 to Dave with cc to RSE and DEC Patel that Dave, If you can provide the spill number, brief scope of the ongoing and upcoming work (in three or four sentences), and an approximate estimate, we will have someone take care of it and get back to you, most likely me. On 8/22/16, Vought received email from Lorthior with cc to RSE and DEC Patel that Attached is the original call out. Job was for a few days of sampling at the site. Problem was we were handed the job, but knew nothing about it. We spent quite a bit of time gaining access to the site and making sure the wells were A) accessible (small site, lots of parked cars) and B) the wells were actually usable. Sampling was the easy part. We had a budget of $5,000.00. Between the initial site visits to figure out what we needed to do, the sampling and the waste disposal, we are up to $6,325.00. Vought increased Work Authorization and submitted to RSE for signature. 8/29/16 TJD Test America C008010 Petroleum CAP #56 was approved. Document already in DECDOCS. 08/31/16-Hiralkumar Patel. DEC Vought sent revised standby contractor authorization form to EnviroTract on 08/23/16. 9:57 AM:- sent email to Dave and asked him to submit sample results for review. 10:22 AM:- received email from Dave including sample results. groundwater analyticals:

09/12/16-Hiralkumar Patel. 10:52 AM:- left message for OAG Jennifer.
09/20/16-Hiralkumar Patel. 9:31 AM:- left message for OAG Jennifer.
09/22/16-Hiralkumar Patel. 8:54 AM:- spoke with OAG Jennifer. informed her about detection of contamination in groundwater samples and need for resampling. 9:09 AM:- spoke with Dave and asked him to

STATION 800, LLC (Continued) **U000414037**

resample existing wells at the site. 9:48 AM:- sent email to Dave including copy of revised standby contractor authorization form. asked Dave to resample existing wells at the site. 09/27/16-Hiralkumar Patel. approved EnviroTrac's invoice (# DC2069.00-4) for coordination with lab and result submission. 10/18/16-Hiralkumar Patel. approved Test America's invoice (# 46262444) for analysis of groundwater samples collected in July 2016. 11/03/16-Hiralkumar Patel. 9:56 AM:- received email from Shalini from TestAmerica including results of groundwater samples collected on 10/17/16 and 10/18/16. groundwater analyticals:
----------MW-1-----MW-2-----MW-3-----MW-5-----MW-6-----MW-8-----MW-9-----MW-12
Benzene----------2,200------170------770------390----1,600-------52------380-------230
Toluene----------56--------6-------49-------12-------51---------4-------14---------6
Ethylbenzene----------1,900------480----1,300------820------360------120------250--------43
Xylene----------5,300------260------340-------24------780------110-------26---------7
1,2,4-Trimethylbenzene--1,400----1,300------140--------8------390------400--------1---------1
1,3,5-Trimethylbenzene----460------310------240-------19------170------120-------15---------3
Naphthalene----------810------390------610------410------200----------50-------78---------3
MTBE----------7--------5-------64--------5--------8----------6-------53--------26 out of fourteen (14) wells installed previously, only thirteen wells were sampled. well MW-4 was not sampled. based on review of recent groundwater sampling, the department requires further groundwater monitoring and possibly remediation. 12:16 PM:- left message for OAG Jennifer. 1:28 PM:- sent email to OAG Jennifer requesting copy of correspondences sent/received by AG's office in this matter after Mar. 8, 1999. email copied to OAG Riggie and DEC Austin. 12/14/16-Hiralkumar Patel. approved Test America's invoice (# 46265898) for analysis of groundwater samples collected in Oct. 2016. 01/12/17-Hiralkumar Patel. approved EnviroTrac's invoice (# DC2069.00-5) for project management, well gauging and groundwater sampling. 01/29/19-Hiralkumar Patel. reviewed initial documents from 1993/1994. as per subsurface investigation report dated 04/06/1994, highest level of free phase petroleum product (in MW-8) and dissolved VOC contamination (in MW-9) were noted in middle of property near the tank mat. also as per the report, the reduced levels of dissolved BTEX in the perimeter wells indicate that the center of the plume is defined on the subject property. as per PBS record, seven (7) 550 gal gasoline USTs were closed-in-place in June 2000. DEC Vought and DEC Krimgold reviewed PBS record on 05/14/09 and noted that closed USTs were never tightness tested. as per ISR issued on 09/30/1996, the subject site was listed as spiller and the Department took over the spill investigation/remediation due to owner's lack of concern (financial inability). as per NYC ACRIS records, Bejamin Hadar purchased the subject site on 06/07/1985 and transferred deed to Steady Realty LLC. as per the NYS Department of State Division of Corporations, Bejamin Hadar is listed in mailing address for Steady Realty LLC. 1:19 PM:- sent text message to Ms. Rojas requesting a

STATION 800, LLC (Continued) **U000414037**

call back. 2:05 PM:- spoke with Mike Alvin at Alvin Petroleum who provides tank system maintenance service to the site. Mike remembers spill investigation in 1993, but doesn't know who paid (property owner or Amoco) for initial investigation conducted at the site. Mike stated that Jose Pimentel is dealer for the site and generally calls for any required maintenance. 2:11 PM:- spoke with Mr. Pimentel. he manages maintenance/inventory of existing tank systems since 2012. Mr. Pimentel conducted a subsurface investigation in 2012 prior to start managing tank systems. he stated that property owner owns tank systems and BP provides fuel. asked Mr. Pimentel to submit copy of Phase II report from 2012. Jose Pimentel **on-site tenant** Station 800 LLC. PH. (917) 893-2253 email: republic052@yahoo.com 2:42 PM:- sent email to Mr. Pimentel and Ms. Rojas. asked Mr. Pimentel to submit copy of subsurface investigation conducted in 2012. asked Mr. Rojas to call back to discuss requirements for further investigation/remediation at the site. 3:09 PM:- sent email to OAG Jennifer requesting information as per email dated 11/03/16. email copied to OAG Riggie. **need Phase I for historical tank system locations.** **two PBS #s for the site. one PBS registration (for waste oil tank) expired in 2014.** **site map with sample analyticals on H drive.**"

Letter included invoices of work done by Petroleum Tank Cleaners (PTC). Fuel burner was running more frequently than usual using a large amount of oil. Faulty vent and fill lines prevented the tank from passing tightness test. No oil was lost. He will have PTC send me a letter within the next two weeks. No mention of petroleum contamination. bf 4/16/07 Received letter from J. Edelman on 3/14/07. Letter states tank was tested and is tight. Test results included in letter. Tank passed on 1/25/07. bf 6/14/07 Called Jerry Edelman and left message requesting letter regarding petroleum contamination. Also, called Mark Salamack of PTC and lerft message to call me back. bf 6/15/07 received fax from PTC stating that no contamination was found. NFA. bf "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 6/8/04 Tipple responded////cleanup not completed, informed cleanup person of the deficiencies, he unloaded his cleaning supplies and continued with the cleanup. 6/8/2004 Sangesland visited the site later in the day. Spill had been adequately cleaned up. DEC tried to look at the tank in the building basemnt. There was no door to the tank room. It was clear where the tank was, but there was no access. Sangesland spoke to the Super and the property manager and asked them to install a door so an inspection could be made. 6/22/2004 Sangesland followed up with a telephone call to the property manager to ask if the doorway was installed yet. Answer was NO, but they are working on it. Contact: Clara Mendoza 914-997-2435 x 117 8/2/2004 Sangesland left a message on Clara's voice mail asking if the door has been installed and if the tank is ready for an inspection. ********** *****HOLD THIS SPILL OPEN UNTIL THE TANK CAN BE INSPECTED**** ********** 8/3/2004 Sangesland called Clara again, after a pause the secretery said she couldn't make it to the phone right now. 1/13/06- DEC Piper left message w/ clara requesting call back. 3/13/06- DEC Piper left message w/ clara requesting call back. Beach Lane Management 280 No. Central Park Avenue, Suite 210 Hartsdale, NY 10530 NEED to set up inspection w/ PBS and DLE. Piper left message for Clara requesting call back to set up environmental compliance inspection of facility. 9/19/07- DECP iper left message for CLara requesting callback and info. 9/20/07- DEC Piper mailed Notice of Violation to Beach Lane Mgmt. 9/24/07- DEC Piper recieved call from Jessica Castro of Beach Lane Mgmt. She will get work done and notify me of when work is scheduled. 914-517-8818 10/25/07- DEC Piper inspected site. In the boiler room there was an inactive 5K fuel tank located on saddles. This tank had piping and manways removed and contained no liquids. In an adjacent rooom, a larger tank, unkown size, was present. Oil was observed dripping down the wall where the fill line enterend the

APARTMENT (Continued) **S106469794**

basement. and oily debris was observed on the floor. Violations exist. 3/31/08- DEC Piper mailed csl tank reg to Beach Lane Mgmt. 9/22/08- Piper- I recieved documetation of cleanup. replaced fill line, power washed and endpoints were non detect. Based on work finally completed, this spill is closed. "

Contact Name:	JOANNE BOYD
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD Fuel oil coming up in the basement. Perimeter of the drain. Fumes and oil all over. 12/02/03. J.Krimgold @ site. Fresh (pink color) #2 oil smeared around two storm drains of the basement. Dye test of the storm drain revealed that it connected to a buildings sanitary sewer which is almost blocked. Raised water brought oil up the drain. About 2-3 gal of oil observed in the storm drain. Spoke to Joanne Boyd (212)690-1553 - building owner. Building converted to a natural gas heat about 2 years ago and currently does not have oil tank or pipes. Ms. Boyd suggested that oil is coming from adjacent building 468 W. 153rd Street which has oil heat system. J.Krimgold inspected adjacent building and found that it has 2x275 gal ASTs and underground fill line. Ordered to test the fill line for tightness. In any case, it is not clear how the oil gets into the storm drain. 12/03/03. J.Krimgold @ site. Pitro Oil is performing a hydrostatic line test. The fill line passed the test. Ms. Boyd hired a contractor to unclog sewer and clean up the storm drain system from oil remains. Advised Ms. Boyd to contact the Department immediately if oil or petrol. odor reoccurred in her basement. NFA"

VACANT LOT/FORMER APT BUILDING (Continued) **S118704719**

contactor and property owner Alexis. The property is under construction in a narrow area as part of redevelopment between 2 existing buildings, further excavation will be difficult as structural piles have been placed in excavation as they have reached proposed building depth. The excavation is exposing groundwater, no visual or olfactory evidence was observed at time of inspection, only a slight sheen was observed. They have excavated down about 12-15 feet. The property owner mentioned she had a phase 1 investigation done and the consultant recommended no further work as no significant evidence of contamination or threat of contamination was found. Alexis has provided the Phase 1 investigation. In addition engineering controls are in place for the existing redevelopment, there will be a vapor barrier installed. Neighboring property 304 West 148th Street was also inspected, they have a 2000 gallon AST wrapped in concrete, no spill or odor was present. PBS registrations in area are 302 West 148th 2-470147, 304 West 148th Street 2-609734, 104 Bradhurst Ave 2-606738. I let Alexis know that she should bring in an environmental contractor to pump out oil water mix and to see if it returns, and have contractor advise them as to what options they have. According to Alexis the proposed property will already have vapor barrier installed. Photos need to be uploaded to D2. 5/19/2016: Rashad Review of Phase 1 is as follows: The subject property building consisted of a residential building from at least 1909-2004, which was then demolished between 2004-2005, the property has been vacant since 2005 until construction began. Groundwater flow is inferred to be to the southeast direction, and present at a depth of 6-10 ftbgs. The report concluded that no further action is needed and no Phase 2 needs to be done. 306 West 148th Street does not have an alternate address. No additional spills of PBS registrations found for site. No spills found for 304 West 148th Street or 302 West 148th Street. Called Alexis, she has been in touch with contractors and will let me know when she picks one. I also asked Alexis to send me a document or a note indicating that a vapor barrier will be installed as part of building plans. Phase 1 and photos have been uploaded to D2. Received email from Alexis with drainage plan that indicates a 6 mil vapor barrier will be installed, drawing was uploaded to D2. 5/25/2016: Rashad Spoke to Alexis yesterday she indicated Riteway just left site and recovered approximately 2000 gallons of liquid. She indicated she was dealing with Rob Hill and that they will be coming up with plan, she also indicated they took samples for analysis. Spoke to Rob, he indicated they did pump out 2000 gallons of water with some oil mixed in. Rob said his guys indicated that the oil was a heavy oil, maybe #4 or #6 oil. Rob said they may return to possibly excavate some soil however it will be difficult because of the depth of the excavation being near groundwater as well as the structural piles already in place. I let him know that he should sent the samples out for analysis and to reassess after receiving the results. Sent email to Alexis letting her know I spoke to Rob and that we will see what samples look like before any further requirements are made by the Department. 6/3/2016: Rashad Received email from Rob Hill: Please see the following attachment for samples results 306 w 148 st, NYC. If you have any questions or concerns feel free to contact me at 718-855-7272. Email had two attachments, they have been uploaded to D2. Sample results only show slight exceedances in SVOCs they are as follows: Dibenzo(a,h)Anthracene-436ppb, 392ppb benzo(k)fluoranthene-1050ppb, benzo(a)pyrene-1300ppb, 1020ppb, and indeno(1,2,3-cd)pyrene-1300ppb, 1130ppb. Sent email to Alexis: I

VACANT LOT/FORMER APT BUILDING (Continued) **S118704719**

Remarks:	apologize for missing your call yesterday. After reviewing the soil data I will require no further action. I will be closing spill#1601635 for 306 West 148th Street today. Please let me know if you have any questions. Thank you. Spill will be closed due to minor SVOC exceedances and installation of vapor barrier in new building. Contact Name: FDNY HAZ MAT
DEC Memo: "4/14/2015 - Feng - Duty Desk. Talked to Joe Kearney of FDNY HAZMAT (347-203-6886). They received a report/complaint from the neighbor concerning a pipe was leaking. When they arrived, they found an old pipe was dripping. The pipe might be connected to some tanks. Only a small amount of ground soil was contaminated. No water or sewer has been impacted. The pipe was then cut even and cap with internal flush. The leak has been stopped. The property is for sale. Agent: Marcus & Millichap 212-430-5100. Called Marcus & Millichap and left a message for a call back. 3/30/2016 Feng This spill is transferred from J. Feng to V. Brevdo as per J. Vought. 03/31/2016: This spill case was transferred to A. Doronova. - AD 06/17/2016: Called and spoke with Marcus & Millichap company (212-430-5100). I was told that they no longer involved with this property. Looked on ACRIS database: The property has Block #02108 and LOT #0071. According to ACRIS this property was sold in 2005 to 467 West 157 Holdings LLC . The address of this company in Acris is: c/o OMNI Development 26 Journal Square, 16th Floor Jersey City, NJ 07306 According to Internet data search the company address is: 467 West 157 Holding, LlC 35 Journal Square Ste 1103 Jersey City, New Jersey, 07306 No phone numbers or name of the contact person listed. Will send a letter. AD 12/20/2016: Searched Internet for the contact info of the RP. Found the name of the attorney for this company on the deed papers. His name is Steven Rubel, phone: (516)678-1800. Wiil contact him. AD 02/07/2017: Contacted a law firm which represented 467 West 157 Holding, LLC during the deed signing. Spoke with a secretary. She referred me to Nandy Navarro. She was not available. Left a message for Ms. Navarro regarding the spill violations. Received a phone call from the law office. I was told that their office no longer represents the RP and they do not know how to contact RP. Issued and sent a certified letter to: 467 West 157 Holding, LlC 26 Journal Square 16th Floor Jersey City, New Jersey, 07306 Response is due March 7, 2017. AD 02/17/2017: Received signed receipt from the certified letter. It was delivered on 02/13/2017. AD 03/29/2017: Received a letter back as undeliverable. After I received the signed receipt. AD 04/04/2017: Discussed the site with J. Kolleeny. Will consult with J. Urda. Searched on the Internet. Found the following info on RealDirect: - Corporate Owner: 84 White Street Llc, 872 Madison Avenue #2A, New York, NY 10021 - Managing Agent: Rialto Management Corp, Scott Lerman, 872 Madison Avenue #2A, New York, NY 10021. Called and spoke with Mr. Lerman of Rialto management. He confirmed that his company is not managing the property. AD Later in the day called and spoke with John Urda of DEC Legal Department. He checked RP' address on the corporate directory and told me this address: 467 West 157 Holding, LlC 35 Journal Square Ste 1103 Jersey City, New Jersey, 07306 I saved this address previously, so will try it for the new violation letter. AD 04/17/2017: issued and sent a new letter on the following address: 467 West 157 Holding, LlC 35 Journal Square Ste 1103 Jersey City, New Jersey, 07306 Response is due May 17, 2017. AD 04/28/2017: Received a message from Maritza Sweeny of 467 West 157 Holding, LlC, contact phone number: (201)216-9500 EXT.212. Called and spoke with Ms. Sweeny. Explained her why the spill was called in, and what should be done in order to close the spill case. She will sent someone to check

EMPTY LOT (Continued) **S117852137**

on the lot and get the FDNY report on the call. Gave her my e-mail address to keep DEC updated on the progress. AD 05/02/2017: Received a phone call from Pete of RightWay Tank. He requested info on the spill and further actions. Explained that his company should visit the site to check for piping and tanks. If the tank will be found it should be checked and if needed properly abandoned or removed based on its conditions. Soil samples should be collected. AD 07/24/2017: Called and spoke with Ms. Sweeny. Requested to submit to DEC update info for the site status. She will send some summary shortly. AD 08/03/2017: Received the following e-mail from : Good Afternoon Ainura, I am emailing you in regards to NYSDEC Spill Case no 1500461. Please view attached the proposal in regards to the work that will be performed at the above referenced address. The company contracted RiteWay Tank Maintenance on May 16, 2017. RiteWay has been going through a transition and was not able to begin the requested work. The management company has reached out to us and has stressed the importance of resolving this matter. RiteWay will be onsite on Monday, August 7th, 2017. We request an extension is granted and thank you in advance for your gratitude. Feel free to contact us with any questions or concerns you may have. Best regards, Sylvia Colon 700 Hicks Street Brooklyn, New York 11231 718.855.7272 Fax: 718.855.7244 Email: sylvia@petroleumtek.com AD 09/27/2017: called and spoke with Ms. Colon of RiteWay Tank regarding the site status. I was informed that the site inspections was performed and that the report was submitted to the site owner. Called Ms. Sweeny but was unable to leave a message due to the full box. AD 11/21/2017: Received the following e-mail from ABC Tank: Ainura I am writing to you on behalf of the owner/management company of 467 West 157th Street, NYC. I understand they have an existing spill case assigned to this property and would like to assist them in getting it closed. We have proposed to excavate & remove the 1,080 gallon UST located on this property. Once the tank is removed, soil samples will be obtained and submitted to a certified laboratory for analysis. Upon completion of the job and receipt of payment, ABC Tank will submit a spill closure report for your review. Please let me know if there is any additional information you may need at this time. Thank you & Happy Thanksgiving!! Donna (Please confirm receipt of this email) ABC Tank Repair & Lining, Inc 280 East 88th Street Brooklyn NY 11236 (718) 272-2800 Fax# (718) 272-3147 Called and spoke with Donna of ABC Tank. Explained what actions should be done during the UST removal. Requested to remove all associated piping and collect confirmatory soil samples from UST excavations area and along the piping line and fill port. AD 01/25/2018: called and spoke with Donna of ABC Tank. She will check her files to see if their UST removal proposal was signed by the RP and call back. Called and spoke with Ms. Sweeny of 467 West 157 Holding, LlC and requested submission of the UST closure report. Response is due February 2, 2018. - Later in the day received a phone call from Donna of ABC Tank. She informed me that their company removed the UST and collected soil samples. The UST closure report will be submitted in a few weeks. AD 05/25/2018: called and left a message. AD 09/05/2018: called and left a message for Ms. Sweeny. Called and spoke with Donna of ABC Tank. She informed me that they had removed the UST and piping in January 2018, but there is a payments issues from the RP which resulted in the postponement of the report submission to DEC. AD 09/11/2018: called and left a message for Ms. Sweeny. AD 09/19/2018: called and left a message for Ms. Sweeny. AD"

Tank Info:

Tank Number:	002
Tank Id:	217694
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)

Equipment Records:

	E04 - Piping Secondary Containment - Double walled UG
	K00 - Spill Prevention - None
	G10 - Tank Secondary Containment - Impervious Underlayment
	B01 - Tank External Protection - Painted/Asphalt Coating
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	F01 - Pipe External Protection - Painted/Asphalt Coating
	A00 - Tank Internal Protection - None
	H99 - Tank Leak Detection - Other
	L00 - Piping Leak Detection - None
	G01 - Tank Secondary Containment - Diking (Aboveground)
	H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
	I04 - Overfill - Product Level Gauge (A/G)
	J02 - Dispenser - Suction Dispenser
	F04 - Pipe External Protection - Fiberglass
	C03 - Pipe Location - Aboveground/Underground Combination
	I05 - Overfill - Vent Whistle
	B05 - Tank External Protection - Jacketed
Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	05/30/2007
Capacity Gallons:	10000
Tightness Test Method:	-
Date Test:	Not reported
Next Test Date:	Not reported

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD 02/09/01 Three monitoring wells being installed. Tightness test will be performed by Eastmond after the well installation. Ambient labs will test soil around fixed pipe. 01/26/04 Transferred from Rommel to Austin 02/17/04: Reassigned from AUSTIN to KRIMGOLD. 10/27/05 - Cozzy - Mike Haggerty spoke with Rene Lewis of A.L. Eastmond, will send info (718-378-7000). On 9/1, Cozzy left message for Rene. On 9/9, sent letter to Noonan Towers-owner. On 10/5, letter was returned unclaimed, unable to forward. 11/15/05 - Left message for Nestor Cevallos (prop. manager) who left me a message and said to call him on 10/31. 11/15, sent letter to Nestor. 12/28/05 - No response to 11/15 letter to Nestor Cevallos. Spill to remain open. 9/18/06 - Austin - transferred from Cozzy (Albany) to Piper (R-2). Received correspondence dated 9/14/06 providing info for spill - to be reviewed for response back to Goldfarb Prperties, who submitted the information - end 9/22/06- DEC Piper revieewed package of invoices though no report. Piper spoke w. Trevor and he will fax report on Mon. for review. 10/3/06- DEC Piper reviewed subsurface ivestigation report. As per report, documentation provided to date , this spill is closed. There are slight exceedances of VOCs in GW. No further Action granted. See E-docs if warranted. "
Remarks:	"caller reporting a spill of material from unk source possibly 100 al in the basement unk how the oil came in, unk if a line broke. no callback necessary"

MANHOLE 3330 (Continued) **S106867533**

gallon of unknown oil and approx. 100 gallons of water. There was no fire, but there was smoke and no sewers or waterways were affected. The weather conditions did contribute to this spill, due to the heavy rain fall. The source and the cause of the spill is unknown at this time. There is oil filled equipment in this structure. A yellow environmental tag numbered #38845 was hung in TM3330. The water is standing, with no visible movement. There are no substantial cracks in TM3330. There were two samples taken from TM3330, one for PCB'S and one for oil ID. The samples were marked priority E. The chain of custody form number is #CC13064. There was no intial cleanup action taken, the clean is pending feeder denergization, lab results, crews and a tanker. Update: 03/29/05 @ 09:20 hrs. Norman L Downes, 16687 Mechanic A, of I&A Dept. reports that at this time due to the location of this clean up, it will have to done on the off hours. He explains that TM 3330 is in center of street and his hampering the traffic flow in the area. Update 3-29-05 @ 11:30. R Biliski # 04919 reports that there is no visible oil in the structure and the transformer is holding pressure. Cleanup will be pending lab results. NOTE: From the onset of this incident the courier was not available until 11:20. J Moran # 01182 3/29 @ 20:41. Lab Sequence Number: 05-02850-001 Results of Analysis: The presence of oil was not detected in the sample. R. Bruns # 21106 3/31/05 19:09 F. Joseph # 05658 of the IA& called to report that the cleanup was completed at 18:30. The tanker removed 360 gallons of liquid, The structure was double washed with slix. He does not believe oil came from the structure although he states that he will turn in the transformer in for replacment due to not holding pressure & rust. His partner in the cleanup was T. orouke # 92460. The forman was R. Biliski # 04919. The spill tag # 38845 was removed. R. Bruns # 21106 Closed 6-28-05. George Breen "

Remarks: "smoke and transformer involved. Unknown oil. 1 gallon on 100 gallons of water. 157819."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY TRANSFERRED FROM Y.KRIMGOLD TO KOLLEENY TO I. ISLAM. 6/6/05- Site's only GW contamination is being treated by injecting Permeox Plus and monitoring the GW sampling results for VOCs, Napthalene and DO by URS Corp. since 2003.The VOCs in GW has reduced substantially but still persits in two wells exceeding GW quality guidance values. Routine monitoring to continue. - II 8/29/05- Reviewed Apr.-June/05 monitoring report. Wells MW-04 and MW-10 still show exceedances of VOCs. Well MW-03 had a s history of minor exceedances of VOCs and couldn't be sampled in the sampling event(Apr/05) due to inaccessibility. But MW-03 is excluded from the contamination plume as per Fig. 2D of this report. It is indicated in the report that some of the injection wells have plugged resulting in decrease in in-take of the injected Permeox Plus, and URS plans to install two new injection wells in the vicinity of wells MW-04 & MW-10 which exhibit elevated contaminant levels. The Dept. concurs with URS's plan but advises to include MW-03 for GW sampling and monitoring as well.- II 3/09/06: This spill transferred from I. Islam to Q. Abidi. 5/04/06: Contacted to Ms. Jane Staten (URS) on phone. For this site drillers are on board, they plan to over drill some of the ORC injection well to help delineate the dissolve phase. MW-4 and MW-10 had high concentration when last sampled in August 2005, but they decreased from previous round. The drilling work probably start in June 2006 by Envirotrac, when they get the lab contract approved. -QA 8/18/06 DEC lead transferred from Q. Abidi to J.A. Maisonave. - JAM 9/26/06 Received Request of Spill Closure dated Sept. 15, 2006. GW

30 PRECINCT NYPD -DDC (Continued) **S102239268**

samples were taken on June 6 and July 31, 2006. Although the latest GW analytical data showed that three compounds exceeded criteria in wells MW-4 and MW-10, the contamination is very minor and will naturally attenuate over time. No exceedances of criteria were detected in the previous GW samples collected at these wells. GW is not a source of potable water, and there are no apparent exposure pathways since its an asphalt covered parking lot. This spill case will be closed and a NFA letter will be issued. - JAM"

Remarks: "caller is removing tanks from site and found contaminated soil. Also see spill # 9515344."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was AUSTIN 10/25/2002 - Sangesland on Desk Duty - Tony Peretta at Mystic Transport (718-932-9075) reported a spill of 30 gallons of #4 fuel. Tank was already filled and 30 gallons shot out of the vent line onto the sidewalk in front of the building. Some oil poured down the sidewalk into a drywell. Mystic has their own people on site doing the sidewalk clean up. Tony says he will hire Eastmond to finish the sidewalk cleanup and to deal with the drywell contamination. Mystic was hired to deliver oil for Styvesent Fuel (718-665-5700) Building super is Phyllis 718-367-1761 (she lives in a building a few blocks away) When Sangesland called her she knew nothing about the spill and was going over the the building immediately. Building manager is: JTF Management 718-584-5760 At 2:10 PM, Tony Peretta contacted the hotline again with an update that Eastmond had been hired to finish the cleanup work. Sangesland confirmed with Rene that Eastmond was on their way. 6/30/03 - AUSTIN - DUE TO THE MINOR WORK LEFT TO BE DONE, SPILL CLOSED OUT CONDITIONAL UPON THAT WORK. TIPPLE ORIG. ASSIGNED THIS SPIL - END"
Remarks: "CALLER CONTACTED FOR FILL. TANK WAS ALREADY FULL. CLEANUP CREW ENROUTE."

DEC Memo:	"PBS # 2-608843 Sangesland left a message for Mr Allwine at consultant asking for mailing address. Will sent a Contaminated Soil Letter when he calls back with this address. 9/30 CSL sent to: Marion Scott Real Estate 107-109 East 126th St NY, NY 10035 10/6/2005 - jz: The current owner is called 2013 Amsterdam Avenue Housing Association. Zhao spoke to Mr. David Allwine from Jacques Whitford, the current owner's environmental consultant. Phase 1 & 2 had been conducted. Elevated PAHs exist from the soil/GW samples. Report will be forwarded. 10/24/2005 - jz: Preliminary phase 2 was reviewed. There were relatively small exceedences based on the report submitted which no delineation is necessary. Spill is closed."
Remarks:	"REPORTS WERE SENT INTO DEC A WHILE AGO. ALL FOUND IN GRTOUNDWATER. OLD SPILL DUE TO TANK ON SITE OR OLD GAS STATION. CLEAN UP IS NOT IN PROCESS."

Contact Name:	HOWARD GLICK
DEC Memo:	"05/15/10- Zhune spoke to Howard Click property manager 347-882-4537. he said Riteway is doing the clean up. The vacuum truck is pumping the oil. There is no vapor at this building. He said that he will call back when cleanup is completed. 05/17/10- Zhune spoke to Howard. He said they eliminated the possibility of overflow. The tank was empty and approximately 4000 galons of #2 oil was pumped to a temporary tank. Tank and line are going to be investigated. The spill was completed contained in the tank room. They cleaned the tank room. Eric Stuphen from Hess, Howard Click property manager and Anthony Lara from Riteway will have a meeting at the site this afternoon. They will discuss additional work that have to be done at this site. CSL sent to: Vantage Mangement Service 31-10 37th Ave. 3rd floor Long Island City NY 11101 05/17/10- Zhune received e-mail from Riteway-David Chan. He said the tank is partially buried(about 12). The leak is at the bottom of the tank at ground level. At the moment, there is too much debris in the tank room to be able to determine if there is any subsurface contamination. We set up temporary tanks, cleaned and washed the area outside of the tank room and clean and washed the boiler room floor also, Anthony has a meeting at the site with the building owners today, to determine what the course of action will be. 08/27/10- Zhune. Riteway sent the closure report dated August 24, 2010 On May 14,2010 Riteway Tank Maintenance Corp.pumped out the existing 5000 gallons #4 fuel oil storage tank and the tank room. Due to the large amount of debris in the room. it was necessary to drum up some of the debris to allow us to enter the room. We completed the superficial cleanup that evening. We drummed up the remaining solids and disposed of the drums. Riteway proceed to scrape and water wash the tank room using bio-degradable degreaser we scrubbed and chemically washed the floor and some of the walk. As procedure we tested the tank. The tank tested tight. We installed a new 2 fill line at the building wall. We excavated at the foundation wall and using a PID detemined that there was no subsurface contanimation at this point. We completed the installation of 2 fill line and 2 vent line. The tank was filled and put back into service. Following procedure we continue with a delineation of the tank room and boiler room. A total of 9 soil samples were taken. The analytical result indicat no VOC’a in any of the samples and only slight levels of SVOCs below the RSCO. AS per Anthony Lara (Riteway) when they dug out outside to check the fill line and install new fill line there was absolutly no contamination in the ground. Spill Closed "

DEC Memo:	"Sangesland spoke to Sue Bianchetti (working for Parsons Brinkerholf) She says they found oil down in the aquaduct shaft (shaft 29) paralell to a sewer line. During preping for grouting they found oil. No known source 10/21/2005 Followup report from NYC DEP (dated Oct 12, 2005) states the following: 1) Contractor drilled 11 packer borings into the sides of Shaft 29. The purpose of these drilled holes was to allow the contractor to pump grout around the tunnel liner to control water inflow into the tunnel. 2) The next morning (June 22nd) the Contractor, AFC, reportated that a petroleum like product was seeping out of one (out of 11) of the holes with groundwater and that the smell of petroleum product was noted. 3) The petroleum was fingerprinted & identified as #2 fuel/diesel. 4) Once the packers were sealed, the groundwater level around the aqueduct was allowed to rise above the elevation of the aqueduct thereby allowing the oil floating on the water to reach a higher elevation than the Aqueduct. 5) Several inspections of the area (and adjoining areas) have been made and no further petroleum has been noted."

BLDG CONVERTED TO NAT GAS - TTF (Continued) **S110541010**

DEC Memo: "7/6/2012 - Traced the owner and building status as follows: Owner/Mgt David Drumheller, New Castle Realty 646-472-7995 Newcastle Realty, 72 Madison Ave - 6th Flr, NY, NY 10016 Property Shark Permits shows a new natural gas line & boiler were installed 12/2011 No PBS records for this address. Sangesland left a voice message for Mr. Drumheller. If no response in a couple of days, send a letter for old TTF. 8/05/2015: Rashad Spill transferred from Sangesland to Rashad as per RSE. 8/13/2015: Rashad As per NYC building records 974 Saint Nicholas Ave has no alternate addresses (974 St Nicholas Avenue). According to PBS#2-610028 there is a 5,000 gallon #2fuel oil tank aboveground in vault with aboveground piping. No last test date or next test date, reg. expires on 12/3/2019. No other spill report found. No document found in D2. As per NYC building records: Osprey Westside NY LLC C/O City Skyline Realty INC 507 West 139th Street New York, NY 10031 8/19/2015: Rashad Email sent to Pro Test: After reviewing the spill reports for 974 Saint Nicholas Ave, New York NY spill#1006576 dated 9/17/2010 and 63 Flushing Ave 12-41A, Brooklyn NY (Brooklyn Navy Yard) spill#1003000 dated 6/16/2010. I would like to request the following information for each site: Failed system test reports. Test results for supply/return and vent/fill lines. Property owners information. Email received: I have attached the failed system test from 09/17/10 showing a gross dry leak. There were no line tests performed. The test was requested by Hagia Barlev of Taranis Capital LLC 212-419-9499 or 917-686-2664. Document uploaded to D2. Document contains tightness test report where ullage (dry) portion leak for tank & system. Report also has a note gross dry leak - manway is not seal properly. 9/11/2015: Rashad As per DOB job fillings on 12/2/2011 there was a report to REPLACE OIL BURNER WITH GAS/OIL BURNER ON NYC BOILER NO. MD437587-01 AND INSTALL NEW GAS SERVICE, GAS METER AND GAS PIPING. 9/14/2015: Rashad New owner email: doug@cityskylinerealty.nyc, old owner: david@newcastlenyc.com 9/16/2015: Rashad Email sent to David: I am currently reviewing an old spill case for 974 Saint Nicholas Avenue, New York NY 10032 dated 9/17/2010 spill#1006576 where a tank test failure was reported. I am trying to locate any information in regards to this tank test failure including reports or any repairs made. Any information would be appreciated. Email also sent to Doug: I am currently reviewing an old spill case for 974 Saint Nicholas Avenue, New York NY 10032 dated 9/17/2010 spill#1006576 where a tank test failure was reported. I am trying to locate any information in regards to this tank test failure including reports or any repairs made. Any information would be appreciated. 9/18/2015: Rashad Sent Email to Doug, previous email was sent to wrong email address. Received email from Doug See below. A state agency (DEC) is asking about an oil spill from the previous owner at 974 St Nick. Rashad (copied here) is looking for any info we have or can dig up. Rashad can you give Eric (the property manager) your phone number (or call Eric directly on his cell - 347 466-3622) so he can give you a call and find out what kind of info you re looking for and what problem you re trying to solve. Then Eric can formulate the best way to help you achieve your objective. It may prove easier for us to get new documents rather than dig up old ones??? Eric responded I'll see what we have on our end. I responded to both I have in my records that the tank failed to a gross dry leak from a manway not being sealed properly. According to our PBS records (PBS#2-610028) the tank is an aboveground tank and is still active so I will need a passing tank test to ensure the system is tight. My number is 718-482-6752 if you have any questions. DEC potentially

BLDG CONVERTED TO NAT GAS - TTF (Continued) **S110541010**

requires: 1. Tank test failure report 2. Test results for supply/return and vent/fill lines 3. Property owner and contact information 1/17/2017 Austin This spill report is being transferred from Rashad Omar to Kumar Patel end. 03/28/17-Hiralkumar Patel. 2:21 PM:- received call from Eric Reeves, property manager. he mentioned that since spill reported in 2010, the property has been sold twice (in 2011 and 2015) and current landlord does not have any documents from 2010. Eric has a tank system test result from last year confirming tight tank system. he stated that the tank is aboveground, wrapped in concrete with small access. he also confirmed that piping are aboveground inside cellar, but doesn't know if any section run underground. asked Eric to send tank test result and some site pics. Eric Reeves 507 West 139th Street, Suite A New York, NY 10031 PH. (646) 546-5025 email: eric@cityskylinerealty.com 05/05/17-Hiralkumar Patel. 3:44 PM:- spoke with Eric and reminded him to submit tank system test result and some site pics. 05/17/17-Hiralkumar Patel. 9:00 AM:- visited site. met with Jake Wanamaker (property manager) and Lukas (building super). site has one (1) 5,000 gal #2 oil AST in contact with surface, located in a secondary vault with access. no signs of oil spill noted on tank room floor. all piping are aboveground, except approx. 5-7 ft of fill line that runs under the sidewalk. fill port is in middle of the sidewalk. found oil stained concrete around the fill port. no signs of oil seepage noted in building's western foundation wall at fill line penetration. Mr. Wanamaker mentioned that building has a dual-phase burner and they have not received any oil deliveries recently. based on field observations, asked Mr. Wanamaker to immediately seal the fill port to prevent anymore oil deliveries through possibly leaking fill line, investigation along the underground fill line section and tank system tightness test. 05/18/17-Hiralkumar Patel. as per NYC DOB record, a permit application was approved on 09/26/2003 for change of fuel grade from #4 to #2. another permit application was approved on 12/02/2011 for replacement of oil burner with oil/gas burner. Peterson Capital LLC./SPA Creek Properties LLC./Osprey Westside NY LLC. *property owners* c/o City Skyline Realty Inc. 507 West 139th Street, Suite A New York, NY 10031 Attn.: Jake Wamamaker **property manager** PH. (646) 546-5025 email: jake@cityskyline.nyc Douglas Peterson email: doug@cityskyline.nyc Lukas **building super** Ph. (347) 984-9605 1:22 PM:- sent letter to Mr. Wanamaker requiring tank system tightness test and investigation/remediation along underground section of remote fill line. asked him to submit report by the end of 06/30/17. letter emailed to Mr. Wanamaker and Mr. Peterson. 06/09/17-Hiralkumar Patel. received email from Mr. Wanamaker (at 6:34 PM on 06/08/17) including result of tightness test conducted on 11/11/15. as per the test result, the tank was found tight, but there is no information about piping. 9:28 AM:- sent email to Mr. Wanamaker including copy of letter dated 05/18/17. informed him that the tightness test result dated 11/11/15 confirms tight tank, but does not include any information about piping. asked him to investigate along underground section of fill line, remove any contaminated material (if found) and conduct tightness test of the tank system including piping. reminded him to submit report by the end of 06/30/17. 06/20/17-Hiralkumar Patel. 9:43 AM:- received call from Zaida from RWD Industries. she mentioned that crew will be on-site on 06/26/17 to conduct tank system test and investigation at the remote fill port. Zaida Marti RWD Industries, Inc. Ph. (800) 385-2650 Fax (516) 796-3093 email: rwdindustriesinc@gmail.com 06/28/17-Hiralkumar

BLDG CONVERTED TO NAT GAS - TTF (Continued) **S110541010**

Patel. 1:24 PM:- received email from Zaida including tank system test result and letter. summary: - the tank system was tested tight on 06/26/17 - removed contaminated concrete from around the fill cap and augured to a depth of 5 ft - in addition, three soil borings were taken along the fill line: one near the building, one near the overflow and one near the fill cap - no signs of contamination noted sample results will be submitted once available. 2:03 PM:- sent email to Zaida and asked her to resubmit tightness test result including complete date (as submitted result includes only month and year) and confirming that it is a system test (as the test result states 'tight tank'). 07/07/17-Hiralkumar Patel. 11:30 AM:- received email from Zaida including revised tank system test result. 07/24/17-Hiralkumar Patel. 2:07 PM:- sent email to Zaida and Mr. Wamamaker inquiring about sample results. 07/26/17-Hiralkumar Patel. received email from Zaida (at 5:59 PM on 07/25/17) including sample result. one soil sample was analyzed for VOCs/SVOCs. no contamination found in soil sample. 10:00 AM:- sent email to Zaida. informed her that as per the letter, three soil borings were installed, but lab report includes result of only one soil sample. inquired her about location of this one sample and status of other two soil samples. also asked her to submit detailed logs for all three borings. email copied to Mr. Wamamaker. 08/01/17-Hiralkumar Patel. 12:57 PM:- sent email to Zaida inquiring update. email copied to Mr. Wanamaker. 2:13 PM:- received email from Zaida. she mentioned that the samples were to be taken for the highest reading on the PID. as there weren't any reading so one soil sample was taken near the fill box. 08/03/17-Hiralkumar Patel. 2:25 PM:- spoke with Zaida regarding sampling location. she mentioned that no soil samples were collected from three borings along fill line as no PID readings were noted. Zaida confirmed that one soil sample was collected at 5 ft bg near the fill cap. case closed based on review of all available information. 3:19 PM:- sent spill closure letter to Mr. Wanamaker. letter emailed to Mr. Wanamaker and Zaida."

Spiller Name:	DOUGLAS REED
Spiller Company:	TUCK IT AWAY STORAGE
Spiller Address:	950-986 UNIVERSITY AVE
Spiller Company:	999
Contact Name:	DOUGLAS REED
DEC Memo:	"7/15/15 TJD Left message for Douglas Reed (716.845.6145) requesting further information regarding the reported spill and a copy of the analytical data which the spill report is based upon. 7/23/15-Douglas Reid emailed the following email. In summary, LCS performed our study at the request of a lending institution considering the site of the property as collateral to secure a commercial mortgage. It is LS understanding that no transfer of the property is planned. The property is utilized as a commercial storage facility. The only petroleum bulk storage on-site is within an above-ground storage tank (AST). No discharge from the AST was observed. LCS investigation was intended to investigate the property as a result of the historical property uses including printing/publishing from approximately 1913 through 2013 and the presence of an auto repair facility on-site in at least 1951. LCS study was completed in readily accessible interior locations as there is virtually no accessible exterior space. Exposed bedrock is visible in locations not occupied by the structure. It is LCS understanding that bedrock was removed to facilitate construction of the building. Based on the results of the investigation, four analytes were detected above CP-51 and Part 375 Commercial Use Criteria (Benzo(a)anthracene, Benzo(b)fluoranthene,Benzo(a)pyrene,Dibenzo(a,h)anthracene) and two metals were detected above Part 375 Unrestricted Soil Cleanup Objectives(chromium and lead) within one soil/rock sample collected beneath the concrete slab of the on-site structure. None of the metals detected were detected at concentrations above Part 375 (Residential) Soil Cleanup Objectives and only one SVOC analyte was detected above Part 375 (Industrial) Cleanup Objective. The impact was identified beneath he concrete floor of the structure. We propose that no further work be required at this time with the understanding that if the area of the identified impact is uncovered or excavated in the future that the soils be reassessed at that time and any impacted soils properly handled at that time. PHASE I.- Identified the following recognized environmental condition. 1. One current AST 2. The historic use of the subject property as a printing/publishing

TUCK IT AWAY STORAGE (Continued) **S117975486**

facility and a repair garage. 3. According to EDR Report the subject property was identified as a Resources Conservation and Recovery Act (RCRA). 7/23/15-Douglas Reid emailed the Phase II report dated 7/14/15. Two borings were completed on June 26, 2015 within the loading dock areas. Two soil samples were collected within each boring until depth of 8.5 and 12.5 feet bgs. The soil analytical results indicated no VOCs detected. Seven SVOCs were detected above the CP-51 Soil Cleanup levels in sample (BH1). Based on the information that no evidence of petroleum discharge was observed in the weep holes in the base of the concrete vault encasing the heating oil AST, and no VOCs detected in the two soil samples collected this spill is closed."

Remarks: "Soil samples showing petroleum. Cleanup is pending DEC requirements."

RECHECK IN FALL 1999 2/8/2000 CALL FROM DORSON ENVIR SYSTEM TESTED ON 1/20/1999 #2 TANK SYSTEM FAILED SECOND TEST (2/1/99) SEPARATED TANK AND LINES TANK #2 PAST, RETURN LINE ON #2 LINE FAILED TANK #2 (SOUTHERN TANK) 3/1/2000 WILL EXPOSE TOP OF TANK, PULLING OUT ALL PIPING AND INSTALL ALL NEW PIPING TANK #1 TANK IS OK BUT CONTRACTOR IS GOING TO RIP OUT ALL PIPING AND UPGRADE ALL PIPES ON THIS TANK ALSO 8/22/05 - spoke with Tom Gallinger from Dorson Environmental (914-592-3117). Tank was retested and soil cleaned up. He is sending me info. Left follow message for Tom on 9/6-Tom to fax me something on 9/9. On 9/15, called Tom again since I received nothing. On 9/26, left a message w/secretary. 11/15/05 - sent letter to Tom G, asking for response in 30 days. 12/28/05 - since no response to 11/15/05 letter, spill to remain open. 9/16/06 - called Gorson Environmental. T. Gallinger no longer with company. Someone to get back to me regarding this. Records for case are located off-site. bf 11/8/06 bf: sent ttf letter to: Gabe Ramos NYC Dept. of Parks and Recreation 5-Boro Operation Randalls Island, NY 10035 11/13/06 Spoke to Michael Byrne of LiRo Engineers (718)321-3136 ext. 246. He referred me to Steve Asquith of LiRo Engineers(917)217-4765. He has an office at Yankee Stadium and will be working on the dismantling of the stadium. I told him that the tanks are overdue for tightness testing and in order to close the spill, the tanks need to be tested and pass. He referred me to Ben Kramer of NYC Parks (212)410-8353. I explained the Mr. Kramer about the requirement to have the tanks tested. He was not aware that that was a requirement and did not know how to have test done. I told him a contractor can do it and one can be found in the yellow pages and if he has a problem finding a contractor, to call me back. He said that he would get testing done in order to close out the spill. bf 11/14/06 Spoke to Mr. Kramer from NYC Parks. He told me one tank was closed. He referred me to Steve Asquith who referred me to Martin Wesolowski of LiRo. Phone: (718)321-3136 Fax: (718)321-3422. PBS

YANKEE STADIUM (Continued) **U001833147**

closure application was not submitted for the closed tank. Faxed application to him. He will reply within next few days. bf 11/17/06 spoke to Mr. Kramer from Parks. Apparently, NY Yankees had had a tank tightness test done in 2006. He will fax the test reults to me. bf. 12/1/06 received tank test for tank T-01. Tank passed. Still need to submit tank closure application for tank 002. Called Ben Kramer about this and he said he will check with Steve Asquith to submit the closure application. bf 6/21/07 received message from Martin Lozowlowski, consultant, (718)321-3136 ext. 242. Called him back and told him DEC needs clarification regarding the tank numbers, closurte of tank 2, explain the 300 gallon loss noted above, and an application to reline tank 1. bf 3/12/10 Received message from Becky Kinal AKRF(914)922-2362 of AK. Tanks to be pulled at Tuesday. Samples taken on all sides and bottom of tanks every 20 feet. She will check that contractor sent PBS Notification Form. I told her that closure application muyst indicte both tanks removed since one is already closed in place. bf 2/4/11 Yesterday went to site to confirm Tank 002 is closed. Issued NOV by mail. See PBS file in database. bf 5/11/11 Received request for closure from AKRF. bf 7/8/11 Reviewed report. tanks were removed. Contaminated soil was taken away. All copntaminant levels are below clean-up standards. Two samples show exceedance of TAGM 4046: benzo(a)antracene [224 ppb vs. 330ppb] and benzo(a)pyrene [61 ppb vs. 85 ppb, 61 ppb vs.290 ppb, 61 ppb vs. 140 ppb, and 61 ppb vs. 97 ppb] Report attributes the exceedances to the site underlain by fill material 17 to 35 feet deep which consists of cinders, brick, concrete, gravel, and asphalt in a matrix of fine coarse sand. 07/16/13 - Spill Case is transferred from Brian Falvey (PBS Unit) to V. Brevdo (Section B) as per DER Region 2 decision - Tank Test Failure Spill Case. VB 07/18/13 - V. Brevdo Reviewed May 11, 2011 Underground Storage Tank (UST) and Spill Closure Report prepared by AKRF. Report review demonstrated that site was properly investigated, tanks removed and contaminated soil associated with the USTs has been successfully remediated. AKRF recommended no further action and requsted closure of spill case. Department agrees with conclusions of the report and recommendation of no further action with regard to spill case. Spill is closed effective July 18, 2013. V. Brevdo 07/18/2013 V. Brevdo Sent e-mail to Rebecca Kinal of AKRF with attached copy of spill case closure letter: July 18, 2013 Dear Ms. Kinal: Spill Closure Letter for the subject spill case is attached to this e-mail. Spill is closed effective 7/18/2013. Contact me if you have questions. Sincerely, Vadim Brevdo "

Remarks: "WILL EXCAVATE TOP OF TANK AND RE-TEST ***APRIL 8, 1999 LETTER FROM DORSON ENVIRONMENTAL SAYS REPAIRS TO RETURN LINE WILL NOT BE MADE UNTIL FALL 1999. TANK #2 WILL REMAIN OUT OF SERVICE UNTIL THEN.***** "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND IN BASEMENT CONCRETE FLOOR. 5,000 GLS. TANK IS NOT REGISTERED AT ABOVE REFERENCED ADDRESS. New PBS registration was submitted on the new tank in summer 1999 Address is actually 425 W 160th St NOT 426 W 160th St. 1/13/99 Sangesland spoke with Mr. Ken Friedman (Friedman Management) requesting a tank test to trace the leak. He said he would have the tank tested. 1/23/2002 Sangesland was reviewing open cases and found this site. According to PBS records, the owner removed the old tank at this site and installed a new 5,000 gal aboveground tank on a rack in the building basement. There is no information in the files concerning the removal of the old tank. Was the old tank buried? above ground? removed or abandoned in place? Was a proper Tank Closure Report prepared? Were there any conamination issues noted when the tank was removed/closed? Sangesland left a message with Ken Friedman requesting info to close this site out."

DEC Memo:	"10/21/08-Vought-Spoke with off-hours responder DEC Piper who was on-scene with DEC Ahmed. Petro hired Milro to respond to spill last night and Piper/Ahmed performing site inspection to determine DEC requirements (if any). DEC Piper responded to site with DEC Ahmed. Milro on scene last night and pumped 2 manifolded 275s. Upon arrival no odors were present in ground floor of brownstone. 0.0 on pid. I entered basement through closed door and slight odors were present, 0.0 on pid. The tanks were behind another door and when I opened it there were high amounts of vapors. Oil soaked speedy dry was present. I spke with Petro, which stated that there was a delivery yesterday though has been on a stop order since march bc of a bad line. The line was replaced and tanks were filled. It is now assumed that the tank was bad the entire time though it needs to be investigated. Milro was hired to complete work. 12/11/08- DECPiper- I recieved call from Toy, homeowner requesting I perform and inspection. 12/15/08- DECPiper- I inspected site. PID readings on ground level were 0.0. As I entered basement PID readings increased to 2 on stairs and 4 on basement level. The floors were pulled up and a solid concrete floor existed. There wasa small area of wood that needed to be removed that

RESIDENCE (Continued) **S109372708**

had readings of 50ppm. No otherareas exhibited PID readings above 4 ppm. The floor can be epoxied and once docmentation is recieved, the spill can be closed. 1/7/08- DECPiper recieved and reviewed closure report. Based on work to date, this spill is closed. See e-docs if warranted."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE Sangesland spoke with Ken McHale of Metro North Environmental. At mile marker 5.88 post on the Hudson line they have evidence of a deliberate leak (Pipe drain) pouring oil out of the back of a building up on the cliff. This has been a long term problem and continues to be a new source. Source building is GAL Manufacterers at 50 East 153rd St. There is a pipe which seems to come from the back of their building, under a rear parking lot and then down the slope to the tracks. Contact person at Metro North should be Tom Water (Walter?) Asst. Supervisor for Track Operations. 718-742-6651. The pipe may be visible from the rear parking lot of the source building. If you want to see the pipe from the tracks, an appointment will need to be made with Mr. Water to have an escort on the tracks. 05/23/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. Called to Herbert w. Glazer at(718)292-9000 left message. -QA 05/25/06: Contacted to owner Mr. Herbert w. Glazer on phone at (718)292-9000. This spill is not in his knowledge. Mr. Herbert will find out about spill and he will call me back. -QA 07/18/06: Contacted to Mr. Fredrick Weaver at (212)499-4535 he said that spill is not in his knowledge. He said to talk to Karen Timko (Director of Environmental Compliance) at (212)340-3322. Called Karen Timko and left message to call me back. -QA 04/10/07: Called Mr. Glazer he was not available. He will be there tomorrow. -QA 08/31/07: I visited Behind Gal Manufacturers and inspected the site today with Mr. W. Glaser (Executive Vice President of Gal Manufacturing Corporation. Due to the storage of big container of metal, There was oil film on metal in the container. Due to heavy rain oil washed out and gone to railway track. Gal Manufacturer dug out that place. They put the new stones at the place. There is no stain at the place of railway track which Mr. Glazer shown to me. I checked the area of railway track was visible from the boundary wall fence of Gal Manufactures, there was no stain. It is also confirmed from Mr. Glazer that there was no such pipe lines in the parking lot going to railway track. On the basis of site inspection and information provided by Mr. Glazer this spill should be closed. Entered Photo 1 in e-doc -QA 09/06/07: Called Mr. Ken Mchale to ask that he is satisfied by the cleaning of Railway track by Gal Manufactures or not? He was not there, Left message to call me back to discuss regarding cleaning of spill. -QA 09/10/07: Called Mr. Ken Mcale (914)686-8681 to discuss regarding spill. He was not there. Left message to call me back. -QA 09/20/07: Called Mr. Ken Mchale and discussed regarding spill. He said that he will go to site with his supervisor Mr. Angello then he will write a letter to regarding spill. -QA 09/21/07: Mr. Ken Mchale and Mr. Angello they said to me verbally on phone that they are satisfied with this cleaning. So on the basis of information provided and my field inspection of August 31, I closed this spill. -QA "

DEC Memo:	"10/07/10 - Raphael Ketani. A report came in yesterday that free product was found coming from an abandoned building at 100 West 163rd Street in the Bronx. I spoke to Battalion Chief Ginley and Chief Brezon (Division #6; (718) 430-0206) and they said that the oil had entered an apartment building at 95 West 162nd Street. They said that they entered the abandoned building and found 3 to 4 inches of oil in the sump. They also closed the valve on the oil tank. They added that it was unknown how much oil had been released, but that it was definitely in the ground. I visited the site yesterday and met Joel Breton (718) 992-9424/cell (718) 744-7595. Mr. Breton was the super. of the apartment building at 95 West 162nd Street. Mr. Breton said that the abandoned apartment building at 100 West 163rd Street was leaking oil onto the property he manages. He showed me a tall retaining wall behind his building (see E-docs). The wall was about 12 feet tall and was constructed using field stones and cement. It protected a back courtyard with a concrete floor. At the west corner of the wall, I could see some dark stains. One place where there was staining looked fresher than the rest (the lower right area in the picture). I could see where a little oil may have pooled below the staining. However, it had rained heavily during the week and so there was no oil on the ground. None of the stains looked wet. There was a slight oily odor. Contrary to the initial report by the battalion chiefs, the oil hadn't entered the building at 95 West 162nd Street. The abandoned building was bordered on the east by a local citizen garden. The back of the building appeared to abut the tall retaining wall at only the west end. A backyard to a private home appeared to abupt the rest of the abandoned building, but I could not get into the garden in order to make a more certain determination. Mr. Breton and I then entered the basement of the abandoned building. We saw that someone had cut the copper fuel line leading to the boiler (see E-docs). A little congealed oil was hanging out of the end of the fuel line. This suggested to me that the release had actually taken

ABANDONED APARTMENT BUILDING (Continued) **S110539497**

place many months ago. The floor looked stained and the odor of oil was apparent. The floor staining extended a little into the neighboring tank room. Once there, I saw that there were two 275 gal. ASTs. The petrometers on both tanks showed that they were empty. After this, we left the building. According to ACRIS, ownership of the abandoned building is the NYC HPD, 100 Gold Street, room 5W3, NY, 10038. The building was taken over by a foreclosure. I spoke to A.J. Patel at the HPD (646) 235-9387. I explained to him that HPD had an abandoned building that was leaking oil into the ground and was affecting the surrounding neighbors. Mr. Patel took the information down and said that he will contact the appropriate person at HPD and have them call me back. 10/8/10 - Raphael Ketani. Mr. Patel called me back. He asked whether anyone had contacted me regarding the building and the spill. I told him that no one had. He said that the ownership of the building is supposed to be transfered to a non-profit organization which will rehabilitate it. I told him to contact this organization again and have them call me by wednesday, 10/13/10. I told him that this is a big mess as the oil at the cut end of the fuel line was congealed and so this spill actually happened a long time ago. I told Mr. Patel that the oil is probably deep underground and under a neighbor's backyard - and possibly under 95 West 162nd Street. I added that it may be running along the bedrock and into the water table. He said that he will definitely call the organization again. 10/13/10 - Raphael Ketani. Mr. Patel called me today. He said that he talked to some people in his office and there haven't been any oil deliveries since 2008. Mr. Patel added that this is an old spill. He asked what should happen now. I told him that a subsurface investigation needs to take place to see where the oil is in the ground. I added that someone needs to hire an environmental company to do an investigation. He asked who should do this. I told him that it's either going to be HPD, the present owners, or the non-profit organization which will take title to the building very soon. Mr. Patel said that he will get back to me. 10/19/10 - Raphael Ketani. I spoke to John Gearrity (212) 863-6539 of HPD about the oil spill. He said that he hadn't heard that there was a spill at this site. I told him that I had been speaking to Mr. Patel in HPD about it. He said that Mr. Patel was probably in the Emergency Unit. Mr. Garrity said that he will get back to me regarding this spill. 12/7/10 - Raphael Ketani. I tried to contact Mr. Gearrity, but I could only leave a message. 12/8/10 - Raphael Ketani. I tried to contact Mr. Gearrity, but I could only leave a message. 12/9/10 - Raphael Ketani. I spoke to Mr. Gearrity today. I asked him which was the non-profit organization that now owned the building. He said that the City still owned the building. I asked him whether anything was going to happen regarding the site investigation and the cleanup. He said that he had heard by third hand sources that an inspector had been to the site, but this person saw nothing. He said that he believed me when I said that there had been a spill and that it had started to come through the retaining wall of the building that abuts the back of the site. Mr. Garrity said that he will contact the DDC and HPD legal to find out what can be done. He added that there was a heating oil Consent Order in place to address all City owned building oil issues. He said that he will find out what will happen next and get back to me next week. 12/15/10 - Raphael Ketani. Chacko Mathew of HPD (718) 623-9911 (Mr. Thomas, supervisor - (718) 623-6924) called me today. He said that he was going to go out with an environmental crew either today or tomorrow and do some borings through the floor of the site's

ABANDONED APARTMENT BUILDING (Continued) **S110539497**

boiler room. He asked me for information regarding the site and I told him what Mr. Breton, the super. from 95 W. 162nd Street, had shown me. Mr. Mathew said that he will get back to me. 12/20/10 - Raphael Ketani. Mr. Gearrity (212) 863-6539 called me today. He said that he had been in touch with the not for profit organization that will take ownership of the building. They want to get started on arranging the soil investigation. I told him that would be fine. He said that they will start calling up contractors with the idea that they will have a contractor on board by January 2011. Then they will start the work during March 2011. I told Mr. Garrity that would be good. He asked how many borings would be needed. I told him that borings would be needed around the boiler and in the backyard of the site. I added that at least one boring would be needed in the back courtyard of 95 West 162nd Street (where the oil seeped through the retaining wall) and in the backyard of the building to the west of this address. I told him that the spill needs to be delineated. He said that he understood. I added that the dirtiest sample from each boring should be sent to the analytical lab and the samples should be tested via methods 8260 and 8270. If there is any groundwater, then a sample of the groundwater should be taken. After this, the conversation ended. 12/21/10 - Raphael Ketani. Mr. Mathew (718) 623-5823/cell (917) 578-4679 called me today. He stated that he was there last thursday (12/16/10) and last friday (12/17/10). He had also spoken to Mr. Breton, the super. at 95 West 162nd Street. Mr. Mathew said that they plan to remove the boiler and the fuel tanks and dig up the soil under the boiler room and the tank room. They will also dig some soil in the community garden area next to the building and then do borings through the backyard of the building. Mr. Mathew said that the backyard is paved over and he doesn't know how thick the concrete is. He added that the backyard is above the boiler room. I told him to drill as deep as he needs to find any soil contamination. I told him to do one or two borings. He said that he will try. I added that he needed to do a boring in the back courtyard of 95 West 162nd Street where the oil seeped through the retaining wall, and one boring in the backyard of the building to the west of 95 West 162nd Street. Mr. Mathew said that he will try to get permission to do these additional borings, but first he wanted to do the excavations. I told him that this would be fine to start the remediation. He said that the building last received oil in 2003. I told him that I understood and that he should send off end point samples for testing via methods 8260 and 8270. Mr. Mathew said that he will. Later, Mr. Mathew sent me a memo describing his findings and his recommendations, and a sketch of the affected areas of the building (see E-docs). I e-mailed him back that, while we did not completely agree with his findings, we did agree with his recommendations. I asked him to proceed as soon as possible. 2/11/11 - Raphael Ketani. Today James Cressy of Impact Environmental (631) 269-8800 x324 e-mailed regarding the site. I called him and he said that Impact will conduct borings at the site. 3/25/11 - Raphael Ketani. Mr. Cressy called today. He said that they did the initial investigation of the site. They did 4 borings in the boiler room and 4 borings in the backyard. They kept hitting refusal consistently at 12 feet in the backyard. So they suspect that bedrock is there. The borings in the boiler room came up with some odor, but no free product. The soil samples showed VOC exceedences, but no SVOC hits at all. Mr. Cressy believes that the best thing to do is to dig out as much of the soil under the boiler as is possible and install a vapor.

ABANDONED APARTMENT BUILDING (Continued) **S110539497**

He wasn't sure how much soil could be removed in the small boiler room. Mr. Cressy also wanted to install a bedrock well in order to see whether there is product in the fractures. I told him that the digging and the well sounded like the right idea. Mr. Cressy said that the investigation report had been written and is presently under review. I told Mr. Cressy to keep me updated regarding progress on the project. 4/20/11 - Raphael Ketani. I reviewed the 4/14/11 RAP from Impact Environmental. The four soil borings that were performed around the boiler had soil samples with significant exceedences. The samples from the backyard were non-detect. The soil under the boiler room floor will be excavated to bedrock, or the deepest safe depth, as part of the refurbishment of the building. A vapor barrier will be installed. Two groundwater monitoring wells will be installed in the backyard and samples collected. I wrote to Mr. Cressy that the plan was acceptable and to proceed. John Gearrity (212) 863-6539 of HPD had left a message asking whether the work plan was acceptable. I responded with a phone message that the plan was indeed acceptable and to proceed with the work. John Gearrity, P.G., Executive Director, Environmental Policy and Implementation, Office of Development, NYC HPD, 100 Gold Street, Rm. 9I-7, New York, NY, 10038. James Cressy, Assessment Supervisor, Impact Environmental, 170 Keyland Court, Bohemia, NY, 11716. Promesa Systems, Inc., 300 East 175 Street, Bronx, NY, 10457. 4/21/11 - Raphael Ketani. Mr. Gearrity requested by e-mail that an official letter from the DEC be sent approving the work plan. I drafted a letter approving the plan and submitted it to Randall Austin, Chief of the Spills Unit, for his review. 4/28/11 - Raphael Ketani. The letter was approved by Mr. Austin and sent to Mr. Gearrity and Mr. Cressy. 6/10/11 - Raphael Ketani. I tried to contact Mr. Cressy (631) 269-8800 x324 regarding progress at the site, but I could only leave a message. 6/14/11 - Raphael Ketani. I tried to contact Mr. Cressy (631) 269-8800 x324 regarding progress at the site, but I could only leave a message. I spoke to Mr. Gearrity (212) 863-6539. He said that the HPD and Promesa were in the midst of working out the transfer of ownership and funding for the rehabilitation and cleanup of the site. Thomas Brown at Promesa will be the project manager. Impact Environmnetal will still be the consultant. Mr. Gearrity said that I can still contact the HPD if anything is a problem or an issue as Promesa has a committment to the HPD to clean site. He will send me the particulars by e-mail. The cleanup work is expected to start in about a month. 8/3/11 - Raphael Ketani. I spoke to Mr. Gearrity (212) 863-6539. He said that the closing on the property is now scheduled for 8/11/11. He believes that it will happen this time. The new contact person is Thomas Brown at Promesa (347) 213-0714 (tbrown@promesa.org). Promesa is the client of Impact Environmental. So he also believes that the work will continue after the closing. Mr. Gearrity said that there is money in the HPD budget for finishing the remediation work at the site. Mr. Gearrity said that he will not be out of the picture and that the DEC can contact him to resolve any matters that are not getting resolved with Promesa. 9/15/11 - Raphael Ketani. I spoke to Mr. Cressy (631) 269-8800 x324 (James). He said that Promesa is doing building work right now. They removed the concrete slab in the basement and have to set up pilings to support the floor. He added that it's too crowded there right now for Impact Environmental to do its work. As soon as the building work is completed, then Impact will start their work. The contaminated soil in the boiler room will be removed and wells will be installed through the backyard. The owner

ABANDONED APARTMENT BUILDING (Continued) **S110539497**

of the neighboring property (the vacant lot with the community garden) is the NYC Department of Parks and Recreation. They don't want the property to be disturbed. However, Impact needs to get its drilling machine behind the site so that the wells can be installed. Mr. Brown is working on getting permission to cross the site with the drilling equipment. 10/20/11 - Raphael Ketani. I tried to contact Mr. Cressy (631) 269-8800 x324 (James), but I could only leave a voice message regarding progress at the site. 10/21/11 - Raphael Ketani. Mr. Cressy (631) 269-8800 x324 sent me an e-mail. He wrote that the contractors for the rehabilitation of the building have removed the concrete floor. However, Promesa, the owner, hasn't signed the contract yet for Impact to do the remedial work. Impact was supposed to have received the contract today. Mr. Cressy will find out what is going on with Promesa. 1/10/12 - Raphael Ketani. Mr. Cressy sent me the following e-mail today: We are scheduled to conduct the interior remedial activities this coming Monday through Wednesday. The vapor barrier will be installed just before the concrete is placed (unsure of this date at this time). This leaves the rock wells which will be installed once the construction activities permit (hoping in a month or so). 1/26/12 - Raphael Ketani. Mr. Cressy (631) 269-8800 x324 sent me an e-mail today. In the e-mail he stated that 12 cu. yds. of soil had been removed from the basement (the boiler room). The east side wall end point sample had some PAH (benzo series) exceedences. Mr. Cressy included these exceedences in his e-mail. However, I determined that they were not of concern in light of the fact that they were the only exceedences from this sample and because they were only a little above the standards. I wrote back that the DEC wasn't concerned about these results and that he should proceed with the rest of his work. 6/20/12 - Raphael Ketani. Mr. Cressy called me today. He said that he was having a very hard time finding the person who was responsible for the small park to the left of the building. He said that the Park Department definitely owns the little park. However, no one at this department could tell him who to talk to about getting a permit to access the park. There is also the problem that the community has now planted tomatos right in the path that he would have to use to get his drilling rig behind the building. This being the situation, Mr. Cressy asked that the DEC forego the idea of installing bedrock wells. Mr. Cressy added that he was at the retaining wall behind the neighboring building during a rain storm and no oil flowed out. There wasn't even any odors. I told him that since the soil samples from the borings behind the building were non-detect, and since no oil was seen flowing out through the retaining wall, and since access had not been granted for the park, and since the community is actively gardening right now, the DEC will not require that the wells be installed. Mr. Cressy said that the Investigation Summary Report from March 2011 had all of the information for the soil results. I told Mr. Cressy that the DEC had never received this report. He then stated that he will forward it to me as an e-mail attachment. A little while later, I received the March 2011 ISR. 7/5/12 - Raphael Ketani. I reviewed the March 25, 2011 Investigation Summary Report. It contained the soil data for samples from borings 1 to 8. Boring SP-1 to SP-4 were taken at 7', 3', 3', and 8', respectively below the boiler room floor. These samples had high exceedences for 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, naphthalene and total xylenes. The samples from borings SP-5 to SP-8 in the backyard were either non-detect or below the standards. As this ISR came before the 4/14/11 RAP, there

ABANDONED APARTMENT BUILDING (Continued) **S110539497**

was no additional soil data. Previously, on 1/26/12, Mr. Cressy (631) 269-8800 x324 had sent me a quick note in an e-mail that the contaminated soil had been dug out and that the only post excavation endpoint sample with any exceedences was the east side wall. It had a few benzo series exceedences that I didn't consider to be an issue. However, this was not a soil data report. So I sent him an e-mail requesting the full endpoint sample analytical report from earlier in 2012. I also drafted a letter to Mr. Cressy approving the March 25, 2011 ISR. The draft letter was submitted to Hassan Hussein, EE III of Unit C, for his approval. The contact for the present owners of the building is: Thomas Brown at Promesa Systems Inc.(347) 213-0714 (tbrown@promesa.org), 300 East 175th Street, Bronx, 10457. 7/6/12 - Raphael Ketani. The letter was approved by Mr. Hussein and was sent out today. Later, Mr. Cressy sent me the Impact Environmental 6/23/11 (consultant confirmed correct date as 6/23/12) letter report to Mr. Brown which contained the remediation information and soil endpoint data. I reviewed the report. On 1/16/12, the boiler room and some of the adjacent area to the north were excavated to bedrock in most areas. Twelve (12) cubic yards of soil were removed. Manifests were included in the report for the disposed of soil. Eight (8) soil endpoint samples were taken on 1/16/12. On 2/8/12, the vapor barrier was installed. There were pictures showing the installed barrier. The only exceedences for the analytical data were for the sample from location SW-E(2). There were two very low level benzo exceedences and a very low chrysene exceedence. I found the report to be acceptable. 7/9/12 - Raphael Ketani. I tried to contact Mr. Cressy (631) 269-8800 x324 regarding taking pictures of the staining on the retaining wall below the site. However, I could only leave a message. 7/18/12 - Raphael Ketani. Mr. Cressy sent me the 7/13/12 Spill Closure Letter Report. It contained the 3/25/11 Investigation Summary Report. I reviewed the pictures in the report which were taken on July 12, 2012. The first two showed that some type of liquid was draining from the base of the retaining wall at this location. I called up Mr. Cressy and asked him what he had found when he went there. He said that he put his nose right up to the wall, but didn't sense any oil odors. He believes that the wetness evident in the pictures is simply groundwater seeping through. I continued to review the report. There wasn't more new information. I found the report to be acceptable and the spill to have been remediated. 7/19/12 - Raphael Ketani. In response to my e-mail regarding the lack of staining on the retaining wall behind the site (as depicted in the Spill Closure Letter Report), Mr. Cressy sent me an e-mail today stating that the wall had never be washed. So the disappearance of the staining was due to natural weathering. 7/23/12 - Raphael Ketani. A spill closure letter (NFA letter) was sent to Mr. Hussein for his approval. 7/27/12 - Raphael Ketani. The letter was approved and was sent out today. The spill case was closed effective today. "

Remarks: "oil found in abadoned building, further investigation shows the oil also lost to adjacent building through wall.Clean up on original complete, other bld unknown c/up"

DEC Memo:	"09-15-05: JK contacted by Drew Lent of NYC School Construction Authority, who said this is a school construction site. Lent said some free product was observed on the water table, he requested a meeting with DEC, SCA and their consultant, the Louis Berger Group, to discuss situation. JK set up meeting for 9/20/05 at 2 p.m. - J. Kolleeny 09/20/05: Met with NYCSCA and consultant, LBG. SCA plans to build a school on the site. During construction activities, an unusual ceramic container that may have held petroleum was discovered, in addition to petroleum-contaminated soil and indications of a minor groundwater impact. I requested additional

CONSTRUCTION SITE -NYCSCA (Continued) **S107408900**

soil and groundwater sampling, as well as soil gas sampling (if feasible) to characterize and delineate contamination. - J. Kolleeny 02/28/06: Spoke with Drew Lent and Lee Guterman of NYCSCA. Their consultant, Louis Berger Group, has performed additional investigation at the site and prepared a report. Lee is doing final review of report and should send it to me next week (week of 3/6/06). - J. Kolleeny 06/09/06: Received hard copy of Remedial Investigation Report from SCA, prepared by Louis Berger Group and dated February 9, 2006; will review. - JK 09/28/06: Completed my review of Remedial Investigation Report (electronic version in eDocs); report states that 2,700 cubic yards of petroleum-contaminated soil were excavated and removed from source areas (ceramic container and UST) on western portion of site, which was excavated to a depth of 11 feet bgs. Excavation didn't extend beneath former building on eastern portion of site, where soil did not exhibit impacts. 34 post-excavation samples were collected from bottom and sidewalls; results showed no VOC exceedances of TAGM, but some SVOC exceedances, which could be attributable to fill materials. Eastern portion of site was excavated to 6 feet bgs during investigation, and to 10 feet prior to construction of new school. GW samples were collected from 2 temporary wells on western portion of site; results showed exceedances for only MTBE, with 21 ppb in TW-1 and 390 ppb in TW-2. Two soil gas samples were collected from eastern portion of site, where school was later built, as I had requested. Results showed detections of toluene, ethylbenzene and xylene above NYSDOH background levels, with toluene at 2,400 ug/m3 in SG-02. Report recommended NFA for soil and groundwater, and recommended installing a gas vapor barrier beneath foundation of proposed school. An SCA cover letter dated June 8, 2006 which accompanied the report stated that the vapor barrier had been installed and the school has been built (it is not yet in use). I discussed report with Koon Tang, who was concerned about soil gas results and suggested forwarding report to Geoffrey Laccetti of NYSDOH for review. I forwarded electronic copy of report to Koon, who forwarded it to GL. - J. Kolleeny 11/14/06: Having received no response from NYSDOH, Koon Tang contacted Geoff Laccetti, who said he had never received the report. I tried to email it to him, but got message saying it exceeded maximum message size set by administrator. I created an abridged version of report, without lab data sheets, chain of custody forms, etc., and emailed it again to GL. - JK 11/17/06: Sent email to Geoff Laccetti of DOH asking him to confirm receipt of abridged report I sent on 11/14/06; he sent reply saying he had received it and forwarded it to Charlotte Bethoney, who will be project manager for the site. - J. Kolleeny 01/24/07: Received email from Drew Lent of SCA with attached e-copy of Indoor Air Sampling Work Plan report dated 1/24/07 prepared by Louis Berger & Assoc., P.C.(in eDocs), sent to me and Charlotte Bethoney, apparently at Charlotte's request. Drew's email requested review within 2 weeks. - J. Kolleeny 1/26/07: Received hard copy of Berger's Indoor Air Sampling Workplan, will review. - JK 2/12/07: Received letter from Charlotte Bethoney of NYSDOH reviewing Indoor Air Sampling Workplan (in eDocs), with 3 main comments: report erroneously states that CB of DOH requested air sampling to fulfill requirements for spill closure ; air samples should be analyzed for tetrachloroethene in addition to benzene, toluene, ethylbenzene and m- and p-xylenes, as report states; building heating system should be operated for minimum of 24 hours prior to sampling event, all petroleum-fueled space heaters should be

CONSTRUCTION SITE -NYCSCA (Continued) **S107408900**

removed. Forwarded letter as pdf to Drew Lent of SCA. - J. Kolleeny 02/15/07: Prepared letter approving Indoor Air Sampling Workplan prepared by Berger & Assoc., dated Jan. 24, 2007, incorporating comments by Charlotte Bethoney of NYSDOH. Had Vadim Brevdo and Amar Nagi of Region 2 DER review letter, and sent draft to Ms. Bethoney; all gave OK to issue letter. Sent letter (in eDocs) by email to Lee Guterman of NYCSCA, copying Drew Lent of SCA, Geoff Lacetti and Ms. Bethoney of DOH, and mailed letter to Ms. Guterman. - J. Kolleeny 05/25/07: Received Indoor Air Quality Survey report by Louis Berger Group, dated 5/8/07 (in eDocs); samples found no detections of tetrachloroethene, and low detections of petroleum-related VOCs within background levels listed in NYSDOH Soil Vapor Guidance Memo, except for marginal exceedances for m,p-xylene at two locations and ethylbenzene at background ambient air sampling location; xylene detections may be attributed to recent painting activities in area of samples. Report concludes that soil vapor intrusion is not a concern for site building, and recommends closure of petroleum spill case. Report was also sent to Charlotte Bethoney of NYSDOH. I will await her review. - JK 06/27/07: Received review letter dated 6/20/07 from Charlotte Bethoney of DOH on 6/25/07. Letter makes two comments: (1) Lab data sheets in report indicate data is preliminary, not final - please provide final validated data; (2) Lab analyzed samples for total xylenes, but report text refers to m,p-xylenes, so comparisons of data to m,p-xylene background levels is in error, comparisons and conclusions should be based on total xylene background levels. I forwarded letter by email to Drew Lent of NYCSCA on 6/27/07, he called and said report would be revised and re-issued. - J. Kolleeny 06/28/07: Received electronic version of revised Indoor Air Quality Survey Report dated 6/28/07 by Louis Berger Group, from Drew Lent of SCA (in eDocs). Report has finalized lab data, with no changes from preliminary data. Also, report references total xylene concentrations as requested by Charlotte Bethoney. Report concludes (again) that soil vapor intrusion into the school building is not a concern. Will await response from DOH. - JK 08/08/07: On 8/7/07, received letter from Charlotte Bethoney of NYSDOH commenting on Final Indoor Air Quality Survey Report (in eDocs). Letter states that, based on removal of contaminant source area, installation of vapor barrier beneath new school building, and results of indoor air quality investigation, exposures via soil vapor intrusion are not expected. Discussed with my supervisor, Vadim Brevdo, and agreed that based on remedial actions performed and indoor air survey results, spill closure is appropriate. On 8/8/07 I sent NFA letter (in eDocs) to Lee Guterman of NYCSCA, cc's to Drew Lent of SCA, Charlotte Bethoney of NYSDOH. - J. Kolleeny "

Remarks: "2200 yards of contaminated material have been removed since April. Old oil lines found in the ground during an excavation. Believe groundwater was affected. Clean up is still ongoing."

DEC Memo:	"12/20/06-Hiralkumar Patel. received call from Kristin from USA environment. she told that site has two 15000 gal USTs. tank #2 was failed test last year and out of service since then. tank #1 was passed last year but failed this time. tank #1 is also out of service

YANKEE STADIUM (Continued) **S108299150**

now. USA environmental has installed temporary tank at site. Kristin asked to contact Ben Kramer (PH. 646-879-6630) at NYC Parks dept. told Kristin that DEC Brian will handle this case and Brian will call Ben for further required work. 12/20/06 Spoke to Ben Kramer of NYC Parks. Tank #1 was leaking. This was discovered on 12/15/06. Tank was pumped out and isolated for testing. The tank failed the test. An estimated 300 gallons was spilled. A temporary tank was installed. They want to reline Tank #2 and close tank #1. A PBS application for closure was faxed to Mr. Kramer (212)410-8997. bf 1/12/07 received letter on 1/8/07 from Martin Wesolowski, P.E. of Liro Engineers. Phone #:(718)321-3136 Liro is the contractor retained by NYC to handle this case. Letter states that all product has been removed from the tank and the system was taken out of service. They prepared a request for quotation and soliciting bids for contractors to test the tank and determine system integrity. After testing, the tank will be cleaned and leaks will be located. An investigation plan based on the results of the testing and internal inspection to determine any and to what extent soil and/or gw was impacted. bf 2/13/07 I left a message for Martin Wosolowski of LiRo to get an update on work done at the site. bf 6/21/07 received message from M. Wosolowski (718)321-3136 ext. 242. Wants to know what needs to be done to close the spill. I reviewed the spill and found some open issues: closure of one tank, tank modification (relining) of the open tank, loss of 300 gallons noted in Spill Report, and clarification of the tank numbers (confusion over tank numbers depending on sopurce of information). 6/26/07 Call from m. WosolowskiTold him of the items that need to be addressed above. he said that he would send a letter in response. They would like to not remove tank until 2008 when stadium is demolished. I told him DEC would not accept that timeframe and they should consider filling with foam, sand, etc. until -008. The NYC Parks Dept. has application to reline tank, but never submitted it. bf 4/30/08 DEC receiced letter from Liro Engineers stating that tank was closed in place. It was filled with slurry. Sampling results included with site plan. bf 10/31/08 On 10/29/08, received message from Francis Shultz of GZA GeoEnvironmental (973) 774-3302. She wants to know what is needed to close spills. bf 11/3/08 Received call from F. Schultz. I told her I need to review the sampling results. They need to submit closure application for Tank 001. Faxed application to her. Fax: (973)774-3350. bf 2/4/11 Yesterday wenty to site to confirm tanks are closed. Today issued NOV. bf 07/16/13 - Spill Case is transferred from Brian Falvey (PBS Unit) to V. Brevdo (Section B) as per DER Region 2 decision - Tank Test Failure Spill Case. VB 02-07-2017 - V. Brevdo 07/18/13 - V. Brevdo Reviewed May 11, 2011 Underground Storage Tank (UST) and Spill Closure Report prepared by AKRF. Report review demonstrated that site was properly investigated, tanks removed and contaminated soil associated with the USTs has been successfully remediated. This investigation and remediation covers both 15,000 gallon UST No. 2 with which Spill Case No. 9813424 was associated and UST No. 1 with which Spill Case No. 0610670 is associated. AKRF recommended no further action and requested closure of spill case Spill Case No. 9813424 which was closed on 07/18/2013. Upon further review in February 2017, the Department determined that UST No. 1 was also addressed appropriately - see AKRF May 11, 2011 UST and Spill Closure Report for Spill 9813424. Therefore, the Department determined that Spill Case No. 0610670 was addressed appropriately and meets closure requirements similar to the Spill 9813424. Conclusions of the May 11,

YANKEE STADIUM (Continued) **S108299150**

2011 report and recommendation of no further action with regard to spill case 9813424 also apply to Spill Case 0610670. Spill is closed effective February 7, 2017. V. Brevdo "

DEC Memo:	"Sangesland spoke to Ellis Mercer Dep Mgr of Recreation Ctr. (212-234-9607) He says Rapid Fuel Oil delivered fuel today and over filled the tank. During the oil delivery the driver went back into his truck to read the paper and Mr. Mercer had to yell at him that the tank was overflowing onto the sidewalk/street. Mr. Mercer got some peat moss and soil used to maintain the rec center, but the truck driver drove off.Sangesland spoke to Bobby at Rapid Fuel Oil (917-807-8720) He says it was not his drivers fault and there was no big spill at the site. 3/31/2005 - Rapid hired Petroleum Tank Cleaners to clean up the site. 11/18/05- DEC Piper contacted KC Reilly at rec center. Left Message. Spoke w/ Mark at PTC. Only did surface cleanup. 11/28/05- DEC Piper spoke w/ Ellis Mercer of Parks Dept. All cleaned up by PTC inside and outside. Very pleased, no complaints, no odors."
Remarks:	"Location is between west 146th and west 147th street. Product went into a near by storm drain, a person on the scene soaked up the remainder of material that was outside drain cleaned up with speedy dry."

Updated By:	DMMOLOUG
Site Description:	The former Film Storage Warehouse is approximately 0.25 acres and is located at 203-209 West 146th St. in Manhattan. The property is located on the north site of West 146th St. between Adam Clayton Powell Jr. Boulevard and Fredrick Douglass Boulevard. The site is bounded on the north and west by residential buildings, and on the east by commercial buildings with residences on the upper floors. The former warehouse site has been unoccupied for over 50 years and is currently vacant. A site investigation was funded by EPA as a targeted site assessment. A Site Investigation Report was approved in November 2004. The site did not qualify for addition to the Registry of Inactive Hazardous Waste Disposal sites.
Env Problem:	Several contaminants were detected in soils including semivolatile compounds, (primarily polyaromatic hydrocarbons)and several metals. Most of the soil contamination appears to be related to historic fill material. The building interior also has debris piles containing asbestos and lead (from insulation and lead paint, respectively). Soil vapor beneath the building contains volatile organic compounds above expected background concentrations.

DEC Memo:	"nyc parks & recreation Parks Dept Building with tank in vault Contact: Franklin Company or Gabe Ramos Parks Dept - 212-410-8916 8/15/2012 TTF Spill Case transferred to DEC Tim DeMeo. 10/22/15 TJD File review. Address is incorrect on spill report - changed today from #79 to #89 Bradhurst. Additionally street location corrected from Broadhurst to Bradhurst. PBS #is 2-604973. Following proper identification of spill location the facility was contacted to obtain a status of the open spill - the facility manager Valerie Edwards was unaware of the condition and requested an email outlining specific requirements. An email was sent to Valerie with request for specific documentation in support of spill closure. Email uploaded to DECDOCS. 12/23/2015: Rashad Spill reassigned from DeMeo to Omar as per DeMeo. 89 Bradhurst Avenue has alternate addresses of 75-95 Bradhurst avenue and 319-341 West 145 street. There are multiple spills at Jackie Robinson Park, spill#9302297 was a discharge into the sewer and has no DEC remarks it was closed in 1993, spill#0102259 was closed in 2008 because of a TTF on a 10,000 gallon tank which was retested, passed, and no evidence of release to environment. Spill#0603232 was cross referenced to other spill#0600573, spill#0603738 was closed

VAULT BENEATH SIDEWALK - TTF (Continued) **S111011047**

because of a duplicate spill it was referred to spill#0600573. Spill#1203515 is open at 89 Bradhurst Ave & 146 st and only info is 10,000 gal UST in caller remarks. There is another spill# 0600573 is managed by Vadim and a comment on 9/9/09 says DDC will replace tank, case is still open. PBS#2-604973 has a 10,000 gallon UST containing biodiesel. TTF letter and email correspondence found in D2. 12/28/2015: Rashad Emailed Gabriel: Attached is a tank test failure letter for spills#0600573, 1100352, and 1203515 for 89 Bradhurst Avenue, New York NY 10039. There are three open spill cases for this site and I would appreciate any update or documentation on the current status of the 10,000 gallon tank. The original letter is being mailed to the address provided on the PBS registration (#2-604973). Letter uploaded to D2. 1/4/2016: Rashad On 12/31/15 Gabe responded: Department of Design and Construction has a contractor finalizing the scope of work needed to properly close and remove the oil tank in compliance to DEC guidelines and convert the site to natural gas. 4/14/2016: Rashad This spill will be administratively closed and cross referenced to spill#0600573 as it is tank test failure on same 10,000 gallon tank. Please refer to spill#0600573 for future information. "

Remarks: "TANK TEST FAILURE FOR VAULT, NO ENVIRONMENTAL IMPACT."

DEC Memo:	"06/01/17-Hiralkumar Patel. 3:45 PM:- left message for Mike at AARCO. 3:46 PM:- spoke with Gabe Ramos (212-410-8916) at NYC Parks. informed him that caller's remarks suggests leak in tank's bottom and there may be active discharge. asked Mr. Ramos to contact AARCO and pump out tank immediately, if actively leaking. 06/02/17-Hiralkumar Patel. PBS #: 2-604973. as per PBS record, the site has one (1) 10,000 gal #2 oil UST, in-service, installed in June 1982. another spill case (# 0600573) was reported on 04/14/2006 due to tightness test failure of 10,000 gal tank. case still open. 9:55 AM:- left message for Mike. 9:57 AM:- left message for Mr. Ramos. discuss with DEC Alex, project manager for spill #: 0600573. Alex will discuss with NYCDDC consultant who is handling this project. case assigned to Alex. 6-2-2017 Contacted K. Shanahan (URS). Asked him to dispatch staff to the spill site immediately, take the tank out of service, notify NYC Parks and NYC DDC. Explore if the leaking tank could be excavated. AZ 6/6/2017 Received the following e-mail from K. Shanahan: Hi Alex, In accordance with your request, I have prepared this e-mail to provide NYSDEC information regarding new Spill No. 1702073 reported at Jackie Robinson Pool. The spill was called in at 3 PM on June 1, 2017 after a failed tank tightness test was performed on the 10,000-gallon No. 2 fuel oil UST located between the building and Bradhurst Avenue (see attached photo P1010104). You indicated to me that Michael Sepe of Aarco Environmental Services performed the tightness testing. I called Michael Sepe on June 2 and 5 and left him messages. I called him again today and he told me that there was a major issue with the wet portion of the tank in either a pipe or the tank itself. He also indicated to me that the fuel was removed from the tank and that the tank was taken out of service. I asked Michael Sepe if he inspected the concrete tank vault for evidence of product. Michael said a visual inspection was not performed since access was limited and he had no reason to enter the vault (he implied a possible confined space issue see remaining photos). URS is managing the removal of this UST and installation of a natural gas service to fuel the boilers. The tank will be removed but the vault will remain to due it s proximity to the building and Bradhurst Avenue (see attached photo P1010104). URS has retained The Franklin Company to perform the work. The work is scheduled to be completed in 2017. Franklin will perform

JACKIE ROB REC CENTER (Continued) **S121102034**

a tank closure investigation in accordance with NYSDEC protocols. URS will evaluate the data collected and determine whether additional investigation or remediation is required. Let me know if you need any additional information. Thanks - Kevin J. Shanahan Project Manager, Environment Business Unit, Metro New York Direct 716-923-1215 Cell 716-480-7352 kevin.shanahan@aecom.com "

(212) 410-8916 FAX (212) 410-8319 email: Gabriel.Ramos@parks.nyc.gov Letter faxed to Mr. Ramos at City Parks and to Ms. Sepe at Fenley & Nicol (FAX: 631-586-4920). 09/02/09-Hiralkumar Patel. 1:18 PM:- received email from Mr. Ramos. he mentioned that NYC DDC will replace the tank at this facility and currently out for Bid. he asked to contact Ruben Olmedo at 718-391-1062. 05/24/12-Hiralkumar Patel. 2:02 PM:- sent email to Mr. Ramos inquiring updates. 10/06/14-Hiralkumar Patel. as per DEC Austin, case assigned to DEC Vadim. 12/28/2015: Rashad Spill transferred from Vadim to Rashad as per discussion with Vadim and Jeff. Emailed Gabriel: Attached is a tank test failure letter for spills#0600573, 1100352, and 1203515 for 89 Bradhurst Avenue, New York NY 10039. There are three open spill cases for this site and I would appreciate any update or documentation on the current status of the 10,000 gallon tank. The original letter is being mailed to the address provided on the PBS registration (#2-604973). Letter uploaded to D2. 12/31/2015: Rashad Received email from Gabe: Department of Design and Construction has a contractor finalizing the scope of work needed to properly close and remove the oil tank in compliance to DEC guidelines and convert the site to natural gas. 10/19/2016 After consultation with Rashad this spill is transferred to Alex Zhitomirsky. AZ 1-3-2019 Reviewed a report for this site dated November 2, 2018, and issued by URS. The report stated that the tank was removed by The Franklin Company. Franklin performed the tank closure work between April and May 2018. The remote fill port was excavated and removed. The remaining piping abandoned in place. Franklin completed tank closure sampling. One water sample and 13 soil samples were collected for lab analyses. The water sample was collected of water that accumulated inside the tank vault. Four soil borings were advanced to 15’ bgs. The borings were terminated due to refusal. There were no VOCs or SVOCs detected above Unrestricted Use SCOs in any of the soil samples. Groundwater at the site wasn’t encountered during the UST closure investigation. URS requested a closure of this spill. Based on the presented information this spill was closed on 2/3/2019. AZ The following e-mail was sent to K. Shanahan and V. Brevdo: Dear Mr. Shanahan, Based on the documentation provided to date, the New York State Department of Environmental Conservation (the Department) has closed the above-referenced spill case. All monitoring wells associated with this spill case should be properly closed in accordance with the Department’s guidance document, Groundwater Monitoring Well Decommissioning Procedures . The Department hereby reserves all of its rights concerning, and such forbearance shall not extend to, any further investigation or remedial action the Department deems necessary due to: I. The off-site migration of petroleum contaminants that was unknown at the time of this closure. II. Environmental conditions related to this

NYC PARKS (Continued) **S107789171**

spill case which were unknown to the Department at the time of this closure. III. Information received, in whole or part, after the Department's spill case closure, which indicates that corrective action was not sufficiently protective of human health and/or the environment. IV. Fraud in obtaining this spill case closure determination. As a precaution, we must bring your attention to our concerns for the future use of this site. If subsurface contamination is encountered while excavating for any construction activity, appropriate remedial and vapor mitigation efforts may need to be taken to fully prevent vapor intrusion into any site development and to ensure human health and safety. This spill closure does not exempt the Responsible Parties from compliance with any applicable laws and regulations. Please be advised that you should maintain a permanent file of all documentation and correspondence regarding this case for future use as the Department's files may not be maintained indefinitely. Sincerely, Alex Zhitomirsky - Engineering Geologist 2 NYS Department of Environmental Conservation 47-40 21st Street, Long Island City, NY 11101 Phone: 718.482.6387 - Fax: 718.482.6390 Email: alexander.zhitomirsky@dec.ny.gov "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 5/17/2002 Sangesland responded to the scene of a tank failure. Property manager Mr. Ram hired a welding company to make welded patch repairs to a 5,000 gal tank in a tankroom of an apartment building. After the welding was finished, the property manager ordered 3,000 gallons of #6 (?) fuel oil. Within 1 hour the tank let go and started pouring the oil into the tank vault room floor. Eventually it overflowed into the boiler room floor and filled up several inches thick. Petroleum Tank Cleaners was called to the scene with a vac truck and clean up crew. 5/28/2002 Ray Lara at PTC stated that his crew was back cleaning up on Saturday May 18th and then several times during the week of May 20 to 24th. Apparently the Boilerroom was cleaned by PTC 3 times, but oil keeps coming up through the cracks in the floor. 6/3/2002 Sangesland left a message with Mr. Ram (Property Manager) that the DEC needs to do a site inspection. Major question is how much (if any) oil is under the slab floor. 6/20/2002 Sangesland spoke with Mr. Ram and requested an appointment to do an inspection of the basement floor. As part of

SPILL NUMBER 0201769 (Continued) **S105995893**

this inspection, several 1 diameter drill holes will be required to investigate the condition of the soil under the slab floor. DEC has reason to believe there continues to be oil rising up out of floor cracks in the boiler room. 7/2/2002 - Sangesland left a message for Mr. Ram 7/16/2002 - Sangesland left a message for Mr. Ram requesting Mr. Ram to provide someone to drill the floor on Friday 7/19 at 9AM Sangesland will be at the site. 7/17/2002 - Sangesland left another message to find out if Mr. Ram received the message from 7/16. 7/17/2002 - Mr. Ram returned the call. The super is on vacation, Mr. Ram does not know if he can have someone on site for Friday morning. 7/17/2002 - Mr. Bernie Bauer (718-731-7011) - contractor for Mr. Ram made an appointment to do borings on site Thurs Aug 1 -3PM 8/2/2002 - Sangesland met on site with Abraham Wachsler- employee of Mr. Bernie Bauer of New York City Tank Testing Inc. (1624 Webster Ave, Bronx) 718-731-7011. Upon arrival, Mr. Wachsler had already made several borings and a few open trenches around the basement (boiler room, tank room and connecting hallways). In each room there were locations with significant soil contamination under the cement slab floor. Sangesland prepared a letter to Mr. Ram outlining the need for contamination delineation, the preparation of a Site Remediation Plan and the review/approval process with the NYSDEC before work is done. The letter gives the following deadlines: 1)Owner must select an environmental contractor by Sept 5, 2002. 2)Submittal of a Delineation/Remediation Work Plan by Oct 20,2002 This letter was mailed registered to Mr. Gupta on 8/2/02. 8/7/2002 - Sangesland received the return receipt for the registered letter. 8/29/2002 - Sangesland spoke with Todd Sarett of Key Environmental (973-347-9430). Mr. Sarett is bidding on doing the environmental work on the site and asked for a description of what the DEC was looking for. Sangesland said a 2 phase project: Phase 1 - Delineation - several soil borings around the basement to determine the vertical and horizontal extent of the contamination. Phase 2 - Excavation with possible biological applications at the end. 3/17/2003 - Sangesland spoke with Dwayne Monaco of Northeast Environmental (914-777-1930). He said his company conducted a soil boring survey of the basement and determined that bedrock is very shallow and most of the contaminated soil is near the surface. He has a report ready for submittal as soon as Mr. Bernie Bauer pays for it. 5/12/2003 - Sangesland reviewed a Sub-Surface Investigation Report . This report confirmed that there is contamination throughout the basement. The report also points out that bedrock is within 1 to 3 feet depth and excavation is probably the best way to address the contamination problem. Sangesland sent an e-mail response to Dwayne Monaco at: DM@northeastenvironmental.com confirming their results and requesting a Remediation Plan . Now that the contamination is defined, a remediation plan is needed. 5/29/2003 - Sangesland forwarded a letter to Mr. Gupta stating that a Remediation Plan needs to be submitted to the DEC by July 15, 2003 7/29/2003 John Savatino from AB Environmental faxed a short work plan for the site. Sangesland reviewed it and said it looked OK. Work Plans says: 1) Remove standing product and water from floor drain and hole in boiler room via vacuum truck. 2) Break up all concrete that is located all over the contaminated areas and dispose the material. 3) Remove all contaminated sand ans soil from the impacted areas, down to the bedrock and dispose the material. This will require removal of approximately 54 yards of impacted concrete, soils and sand. 4) The locations of where the impacted material will be removed from are in

SPILL NUMBER 0201769 (Continued) **S105995893**

the tank room, the boiler room, and the hallways adjacent to the boiler room and the tank room. 5) Transport and dispose all impacted materials. 6/23/2004 Sangesland made a site visit and found that all of the rooms on that side of the basement had been dug down to bedrock outcropping. Eastmond submitted copies of the disposal manifests. Sangesland asked for 10-15 photos of all of these rooms for the file. 7/29/2004 Sangesland received the photographs requested of the site. All work required by the NYSDEC for this site has been completed. As much contaminated soil as possible has been removed and the site is not impacting any off site neighbor. Once the excavations are properly backfilled and a new cement floor is poured, the environmental impacts of the remaining contamination will be minimal. Spill Closed"

Remarks: "TANK FAILURE AT ABOVE LOCATION. TANK TO BE DRAINED AND REMOVED AND REPLACED."

DEC Memo:	"05/09/08-Hiralkumar Patel. visited site. found leak from 7500 gal #4 oil tank, located in corner inside boiler room. tank covered in concrete vault with no access. found oil inside boiler room. found oil seeping out from tank vault. boiler room is located along eastern

APT. BUILDING (Continued) **S107781661**

foundation wall and little north of West 162nd street. its seven story building with retail stores on ground floor and top six floor are residential. retail stores located along W 162nd Street, along southern side of building. and boiler/tank room is located on ground floor, north of retail stores. during site visit, found oil under boiler room floor as well as under retail store floors along W 162nd Street. fill port is located on sidewalk along W 162nd Street and fill line possibly passing through store at 79 W 162nd Street (which is part of 950 Woodycrest Ave). found oil under retail store floor at 77, 73 and 71 W 162nd Street (all are part of 950 Woodycrest ave). building foundation wall runs between stores located at 73 and 71 W 162nd street. so apartment building located above stores at 81, 79, 77 and 73 W 162nd street and area above store 71 W 162 street is open and vent pipe is located in this open area above 71 W 162nd street location. found oil pouring out from eastern wall of store 71 W 162nd street, into alleyway for building at 953 Anderson Ave. its about 20 ft distance between tank at 950 Woodycrest ave and eastern wall between 950 Woodycrest ave and 953 Anderson ave. FDNY was working to recover oil pouring out from eastern store wall. alleyway at 953 Anderson ave is about 30 ft below tank room floor at 950 Woodycrest ave. and found two drains in alleyway. met Marc from Summit Transportation who delivered about 4500 gal oil around 8:30 AM on 05/09/08 and noticed some spill at vent pipe, which is located along eastern foundation wall (which coincide with wall between store 73 and 71) of subject site. as per Mark, super measured about 1200 gal oil before delivery in 7500 gal tank (means gauge might not be working). Mark delivered oil for Hess oil. met Rasim from management office. they are managing property for about four years and don t know when this tank was installed. visited site at 953 Anderson ave. they don t have basement. found oil in sewer trap located eastern end of building and about more than 200 ft away from tank at source site. asked Mark and Rasim for following: - insurance company information - testing fill line (to confirm any leak that might cause oil under store floor) - recovering oil from boiler room floor and under boiler room and store floors - washing foundation wall in next door alleyway - recovery of product from next door sewer trap met Keith Williams from NYC DEP, who will check thier sewer system and treatment plant for any product. Mark has hired Eastmond and they were pumping oil from tank. Battalion Chief Mannion FDNY Bronx Ph. (718) 430-0217 Serife Ljecaj **building super** Ph. Eastmond cleaned out tank and boiler room floor. no sign of spill found in boiler room after cleanup. they opened tank vault from side and found contamination. as per Isaac, they found holes in tank. found slow flow of oil seeping out from eastern store wall to next door alleyway. Eastmond were recovering oil from there also. they break floor in store at 73 W 162nd street. found heavily contaminated soil under floor. 05/12/08-Hiralkumar Patel. visited site with DEC Hasan. met Eric Stuphen, Marc Rosen, Michael Radoncic, Isaac Mungra and Dave Lothior. oil company/building owner has hired Envirotrac for further work. Dave will submit proposal for required work. Eastmond has opened pit inside boiler room and found free product on bedrock about 2 ft deep under boiler room floor. Eastmond removed part of tank vault and removed some material around tank and found that tank is covered with sand and it found contaminated. as per Isaac, they found multiple holes in tank durint tank inspection. found some oil still seeping out from eastern store wall. Eastmond has opened pit in north end inside store at 81 W 162nd street and this pit is about two ft south from location where oil was pouring out from wall into next door alleway. found oil inside this pit and almost no flow towards next door through store wall. Isaac mentioned that they recovered 2200 gal from tank, 3861 gal of oil from alleyway next door and floor under stores and about 800 gal of sludge from tank. so total they recovered 6800 gal. asked Isaac to submit product recovery data sheet, fill line test result and tank inspection report. as per Mr. Radoncic, Enviortrac will work from here. Eastmond will remove tank and then Envirotrac will do remediation. mentioend to Mr. Radoncic that during their discussion of price, the department requires following immediately: - test pits inside each store (at least two or three along store length) - larger test pit inside boiler room - recovery of product on everyday basis - dye test of two drains found in alleway next door to confirm any connection to sewer trap inside 953 Anderson ave site as found oil in sewer trap David Lothior Envirotrac Ph. (631) 924-3001 (631) 872-0231 (C) email: davidl@envirotrac.com Dave will submit work plan once get approval for proposal. 05/13/08-Hiralkumar Patel. discussed with DEC Austin. informed him that as per Eastmond there were multiple holes noted inside tank during inspection. Austin mentioned that as tank was leaking before, property owner/management is responsible for required cleanup alongwith oil delivery company who overfilled the tank. spoke with Dave. he has submitted proposal and will start test pit work by

APT. BUILDING (Continued) **S107781661**

05/15/08. asked Dave about test pits on sidewalk. Dave mentioned that instead of doing test pits on sidewalk, they are planning to open entire sidewalk along fill line and will continue excavation until hit clean area or is not feasible. will apply for DOT permit. received call from Dave. he got approval for proposed work. they will start test pits on 05/15/08. 05/15/08-Hiralkumar Patel. spoke with Dave. they did dye test for drains in alleyway at impacted site and found drains connected to sewer trap inside building. during dye test, more oil found flowing inside sewer trap so they discontinue test and are removing oil. Eastmond is working removing tank. will apply for sidewalk permit to excavate along fill line. 05/16/08-Hiralkumar Patel. received message from Mike Radoncic. spoke with Mike. he mentioned that he has different insurance company for oil tank and before removing tank, insurance compnay wants to look at tank. and then only they can remove tank. as per Mike, they can start tank removal some time next week. mentioned to Mike that as long as they recovering product through test pits (inside boiler room as well as inside stores), the department can wait till next week for tank removal. asked Mike to provide all insurance company's information which are related in terms of oil spill. 05/19/08-Hiralkumar Patel. spoke with Mike. they have scheduled site visit with insurance company at 10:00 AM on 05/21/08. left message for Isaac to submit fill line test result and tank inspection report. 05/22/08-Hiralkumar Patel. spoke with Dave. he and home owner's insurance company inspected tank yesterday (05/21/08). during inspection they found holes in tank. Dave mentioned that they found large amount of sludge in tank and believes that due to high pressure during delivery, sludge pushed out from these holes and then oil spilled in subsurface. they are doing powerwash inside tank today and has vacuum hose with powerwash to prevent any water goes into subsurface. will inspect tank again after powerwash. Dave is still waiting for approval from home owner regarding remediation inside stores. spoke with Mike. he is working with his insurance company regarding cost of cleanup. Mike mentioned that AIG is their insurance company. asked Mike to provide complete details about insurance company (claim no., claim handler, phone, fax/email etc.) left message for Valeria at Chibboro brother, oil company's insurance broker. received property owner's insurance company information (listed above). 05/23/08-Hiralkumar Patel. spoke with Isaac at Eastmond. he will submit fill line test result and tank inspection report. discussed with DEC Urda, DEC Austin and DEC Vought. Austin asked to send STIP to both responsible parties. Urda mentioned that letter should be addressed to responsible parties and not to their insurance company. he asked to copy letter to insurance companies. sent CSL with STIP to Mr. Radoncic and Mr. Rosen requiring interim remediation, soil/groundwater delineation, endpoint samples and sealing of impacted areas. letter emailed to Michael Radoncic, Marc Rosen, Eric Stuphen, Dave Lothior, Brian Finnegan (owner's insurance), Jose Luna (owner's insurance agent), Wayne Moore (oil company's insurance) and Valerie Demarco (oil company's insurance agent). copy of letter sent to owners of 953 Anderson Avenue. 05/28/08-Hiralkumar Patel. visited site. met super. no cleanup work was in progress. super mentioned that they finished tank cutting yesterday (05/27/08) and will do boiler room excavation tomorrow (05/29/08). inspected tank room. found some contaminated sand in tank room. inspected stores along W 162nd Street. found oil in test pits inside each stores. no seepage found into alleyway next door. spoke with Mike. their lawyers

APT. BUILDING (Continued) **S107781661**

reviewing STIP and will sign and submit it. 5/29/08 - Raphael Ketani. At the request of Kumar Patel, case manager, I made an unannounced site visit. I met Dave Lorthioir of Envirotrac Environmental Services (631) 924-3001, the person in charge of the cleanup at the site, and Serife Ljecaj (l-jest), the super. for the building. They showed me the tank room, boiler room, the back alley between the buildings, and the unoccupied stores. I took many pictures of the conditions and the oil (see E-docs). The tank room was empty and Mr. Lorthioir told me the tank had been cut into 100 pieces and carted away last week. There was still contaminated soil in the northend of the tank room. Mr. Lorthioir said that he is holding off jack hammering the floor as the ceiling is a wood hanging ceiling with cement on the upper side. He said it's fragile and unsafe. He will wait until it's taken down. He showed me several test pits that were dug through the boiler room's concrete floor. Each had oil in the bottom. The ambient air was 11.3 ppm in the boiler room. I told Mr. Lorthioir that he has to do more than keep the two windows open. I told him to get a couple of industrial fans and blow the vapors out so that they don't travel upwards to the apartments above. He said he will do this. The vapor level in the basement hallway from the street was about 230 ppb, and I didn't smell any oil odors in the main entrance and hallway to the building. We went to the alley and I saw a big pile of absorbent sand that had been spread out at the site of a seep through the bedrock wall. The oil was still slowly seeping out. Further north along the alley wall, one could see two large, dark, oil stained areas and a narrower vertically stained area in the corner at the end. However, nothing was seeping here. Mr. Lorthioir pointed out the vent pipe, which was above the boiler room. I could see staining on the wall next to the vent pipe where the oil had flowed out. He said his crew is also involved in cleaning up the wall and the roof of the boiler room. Lastly, we went to the unoccupied stores at 71 and 73 W. 162 Street. Here, Mr. Lorthioir showed me the stockpiles of heavily contaminated soil from the earlier tank room soil removal that was performed by the emergency response cleanup crew. The stores smelled strongly of oil and there were pits in the floors with oil in them. Mr. Lorthioir told me that his crew will eventually make the pits larger in order to collect lots of oil - they will serve as sumps. He said that he thinks the oil is migrating through the cracks in the bedrock. From what I saw of the bedrock wall in the alley, this seems like a reasonable assumption. However, I told Mr. Lorthioir that the contaminated soil has to be removed immediately as it is making lots of vapors which could be going to the apartments above. I told him this is very unhealthful. He said he will get on it. I told him that DEC considers it a priority and I suggested he get another crew of 4 to deal with this issue alone. He said he will consider getting more people and a couple of roll off containers. He added that there are sealed drums of oil at 71 W. 162 Street, and that the store at 77 W. 162 Street also has oil in its pits. Mr. Ljecaj told me that he hasn't had any complaints from the residents above the stores. I told him to visit them when they are home and to ask them whether they smell any oil vapors. He said he will do this. He added that many neighbors complained about the odors from the cutting torch when the old tank was being dismantled, but not the odors from the soil in the stores. I told him that, nevertheless, he should check on the residents above the stores and to let Mr. Patel know if there is a problem. He said he will do this. I told Mr. Lorthioir to see whether there is oil under the sidewalk in front of the stores. He said he

APT. BUILDING (Continued) **S107781661**

will get the necessary permits and do some digging. After this, I left the site. 05/30/08-Hiralkumar Patel. received email from MIke including signed STIP. sent email to Mike and asked him to submit original of STIP. 06/03/08-Hiralkumar Patel. received message from Mark Pillinger, attorney representing oil company. Mark Pillinger Ph. (914) 703-6300 email: mpillinger@pmtlawfirm.com spoke with Mr. Pillinger. he mentioned that oil company is ready to sign STIP, but wants to add clause into STIP CAP regarding site access by landlord for required work. asked Mr. Pillinger to wait for answer from the legal division of the department. 06/05/08-Hiralkumar Patel. left message for Mr. Pillinger. informed him that whatever change they proposed has to be mentioned in CAP and there should be not change in STIP itself. spoke with Dave. they are currently excavating inside boiler room. excavation depth ranges from 6 inches to three ft, depending on bedrock depth. Dave mentioned that for excavation inside stores and investigation under sidewalk, they need permit from DOB. he hasnt' applied for permit yet as he is waiting for letter from site owner. spoke with Mike Radoncic. asked him about sidewalk permit letter. he will send letter to Dave to apply for permit. he has mailed signed STIP. 06/06/08-Hiralkumar Patel. received message from Mr. Pillinger. spoke with Mr. Pillinger. asked him to include any comment in CAP, but not in STIP. told him that if changes in CAP is acceptable to the Department, then Department will execute STIP and will send copy of CAP and STIP. 06/11/08-Hiralkumar Patel. spoke with Dave. they excavated about 2/3 of boiler/tank room floor. dug two test pits around active boiler and no oil found, so no excavation performed around active boiler. during excavation they found abandoned brick structure in boiler room, looks like for old boiler. found chute leading out from this abandoned structure, towards active boiler. chute is filled with debris and no excavation possible along chute as running under active boiler. they couldn't excavate in area around brick support walls for old water tank in boiler room. removed all dirt and some bedrock from excavation. still some fine dirt in excavation and some stone. will remove fine material via power washing excavation with help of guzzler truck. Dave traced out fill line and found fill line running under floor inside store at 79 W 162nd Street. fill line runs along eastern wall of store. Dave dug two test pits across this wall, where fill line runs, inside store at 77 W 162nd street and test pits filled with oil. Dave mentioned that electric lines for entire building is running along fill line so excavation has to be done by hand. they have applied for sidewalk permit yesterday. asked Dave to open test pit inside alleyway next door for observation/monitoring. 06/16/08-Hiralkumar Patel. regional director signed STIP. STIP signed by property owner (R2-20080612-310) and also by oil company (R2-20080612-309). sent copy of STIP to property owner and oil company with copy of CAP. 06/17/08-Hiralkumar Patel. spoke with Dave. he is expecting DOT permit today or tomorrow. asked Dave to call once gets permit. 06/20/08-Hiralkumar Patel. spoke with Dave. still waiting for DOT permit. asked Dave to provide person's name in DOT who is handling permit for this case. 06/23/08-Hiralkumar Patel. received message from Tim Snay (978-465-1822)) from Ransom environmental. left message for Tim. received call from Tim. he works for one of the property investor. he asked about cause of release, amount spilled etc. asked Tim to contact property owner for any information or to submit FOIL request. 06/24/08-Hiralkumar Patel. received email from Dave. will start floor and wall removal from tomorrow, inside store where fill line runs.

APT. BUILDING (Continued) **S107781661**

they will excavate by hand to see point of release in fill line. they got DOT permits which are set to begin on monday 06/30/08. so will powerwash bedrock (to remove fine particles), with use of guzzler to remove washed liquid and mud, from 06/30/08 (as needed sidewalk permit to park their equipments). after soil excavation done inside stores, will install test pits in the sidewalk. 07/03/08-Hiralkumar Patel. received message from Dave. they powerwashed boiler room and working into stores. 07/07/08-Hiralkumar Patel. left message for Dave. received call from Dave. will meet at site at 9:30 AM on 07/09/08. received email from Dave confirming site visit with this information: ...Today, for the first time, I was able to speak to someone who was on-site at the very beginning of the Spill. FDNY Captain Mack, of Engine 68, Battalion 17.... According to Capt. Mack, oil was pouring out of an unknown point in the stone wall in the back of 73 and 77. The oil then entered the ground beneath the stores in the areas where the wood floor was present. The stores had a combination concrete floor (in the back and front of the stores) and a wood floor. So much oil was present the the oil was also coming out of the front of #73 and onto the sidewalk. This new information changes my view of how the oil came to be beneath the stores. We know that the fill line failed a pressure test and it was assumed that all oil from beneath the stores was the result of a leaky fill line. This assumption was supported by the fact that the area closest to the boiler room (along the back wall) did not exhibit any oil on top of the bedrock while the middle of the stores were heavily stained and exhibited free product. However, now it is apparent that while a leaky fill line could be part of the problem, much of the oil observed beneath the stores resulted from the tank failure. As the concrete floors were present in the back of the building, the oil passed over them and entered the ground in the areas of the wood floor. These areas beneath the former wood floors are the most impacted. 07/09/08-Hiralkumar Patel. visited site. met Dave, Mike Radoncic and Elisa Buckley (from Langan). updates: - alleyway next door: no more oil seepage fround into alleyway next door. asked Dave to powerwash this wall and to seal it. - tank room: found bedrock in entire tank vault area at varying depths (max. 2 ft). envirotrac washed bedrock to remove fine soil and any stain from bedrock. found some water between bedrock and little oil on top of water. no odors noticed inside tank room. found oil stain on tank vault wall that could be result of overfill over the period of time. - boiler room: excavated to bedrock in area where oil was found initially. no oil found in bedrocks. two test pits inside boiler room: one close to sump pit and found clean and second test pit on west side of boiler and that also found clean. Dave mentioned that walls that supporting old water tank is not deep enough and as owner has no plan to remove that old water tank, to prevent any damage, they haven't removed walls supporting it. so area between two supporting wall, next to tank vault wall, has not been excavated. asked Dave to open test pit in this unexcavated area to see any oil pool on bedrock between tank room and excavated area in boiler room. also asked for borings on east and south side of boiler to see for any contamination in that area as boiler location is in area between tank room and store locations. - fill line excavation: excavated area along fill line and found electric lines parallel to fill line. fill line still in ground. Dave mentioned that when they excavated fill line area and excavation was filled with water, but only few oil droplets found. no odors noticed along fill line excavation. minor stained soil along

APT. BUILDING (Continued) **S107781661**

fill line. could not remove wall between stores # 79 & 77 as electric lines running along wall and only minor contamination found yet. Dave will remove fill line lateron. asked to collect endpoint samples from fill line excavation - passage behind stores: found passage floor behind stores is about 6-8 ft below than boiler room floor (which was initially assumed at same level). found water in passage, but no oil. open test pits in passage, but no oil found. Dave believes that whatever oil was found under store floors could be result of oil spill from tank based on following assumptions: 1. store floors are about 6-8 ft below tank/boiler room floor 2. no free product or heavy soil contamiantion found along fill line 3. oil spilled in tank room might have travelled under boiler room floor, seep through wall into passage behind stores, ran over concrete floors inside passage and inside store nearby passage and then went into ground under wood floor in middle part of store where no concrete floor under it. - passage behind stores: no excavation done. test pits done earlier, but no oil found. water was found in passage, but no oil on it. passage floor and store floors are about 6-8 ft below tank/boiler room floor. - store 79 W 162nd Street: see fill line excavation above. found one small area towards back of store and that area is little upgradient (based on topography) from fill line. asked Dave to dug test pit for any contamination in that area. - store 77 W 162nd Street: excavated store floor. found bedrock at bottom. some oil found on water on bedrock. some supporting column in northwestern corner inside store # 77, along wall between stores # 79 & 77. didn't excavated some area around this support column and this area could be old bathroom area. asked Dave to collect sidewall composite samples from this leftover area. water main line runs along wall between stores # 77 & 73 so can't remove wall between stores # 77 & 73. - store 73 W 162nd Street: excavated store floor. found bedrock at bottom. some oil found on water on bedrock. found some heavy oil on water on bedrock. Dave mentioned that oil was accumulated over period of 24 hours. could not remove wall between stores # 77 & 73 as water line running along wall inside store # 77 and could not remove wall between stores # 73 & 71 as it is building foundation wall - store 71 W 162nd Street: opened some test pits earlier along foundation wall (between stores # 73 & 71), but no contamination found. also dug test pit in northeastern corner of store where heavy oil found on water during work after spill incident. northeastern test pit is closest location from point from where oil was pouring out into neighbour's alleyway. found minor oil in this northeastern pit. asked Dave to extend this northeastern pit, horizontally behind store's north wall towards oil pouring point. also asked to dug test pits in middle of store, as no excavation done in this store (as previous test pits along wall between stores # 73 & 71 didn't showed any contamination) - test pits on sidewalk: dug test pits in front of stores # 79 & 73. found some contamination in soil under sidewalk. found bedrock at about 2 ft depth. discussed with DEC Austin. Austin approved to backfill tank room and boiler room excavations and installation of new tank as no further excavation possible inside tank room or boiler room and as minor oil found on water. Austin asked to dug test pit along curb side on sidewalk to see any contaminated soil under sidewalk near street and if any contamination found then need for larger excavation under sidewalk (instead of test pits). spoke with Dave at the end of the day. he mentioned that they opened test pit in front of store # 71 and found bedrock about 6 inches below sidewalk. asked Dave to dug test pit along street curb side and if

APT. BUILDING (Continued) **S107781661**

contamination found then asked to dug larger excavation under sidewalk (instead of test pits). also mentioned that based on observations during site visit, they can backfill excavation inside tank and boiler rooms only to install new tank. other excavation should not be backfilled. Elisa Buckley Langan Engineering Ph. (201) 794-6900 (O) (973) 650-3715 (C) Fax (201) 794-0366 email: ebuckley@langan.com received email from Dave summarizing site visit. 07/14/08-Hiralkumar Patel. received email from Dave. he installed five test pits in the sidewalk and found contaminated soil under sidewalk along fill line and oily water observed in test pit closest to fill port. will start removing fill line from 08/21/08. he also installed borings inside boiler room and found clean. they excavate test pit, horizontally, inside store at 71 W 162nd street. no groundwater or oil found in this expanded test pit. 07/23/08-Hiralkumar Patel. received call from James Wilson from RND services. they are hired by WCD consulting. James doesn't know who hired WCD consulting (owner/manager or oil company), but James mentioned that he got letter from attorney and they will work on site. James asked about status of spill. told him that contractor is currently working on-site and to get further information and copy of previously sent STIP, he has to contact attorney who sent him a letter (as don't know how WCD consulting is involved). James Wilson RND Ph. (845) 348-6355 email: jwilson@rndservicesinc.com WCD Consulting Chip D'Angelo Ph. (609) 730-0007 07/25/08-Hiralkumar Patel. received email from DAve. abstract: - removed fill line from within store and installed test pit in the back of 79 W 162nd street - fill line was coated with soil and sludge, making the identification of any holes impossible - the fill line consisted of three inch diameter pipe that in some places was sleeved with a four inch pipe, which suggests that the line had been cut and then repaired using the sleeve - soil in the area above and alongside of the sleeve was not grossly contaminated, but did emit a strong petroleum odor - when a portion of the sleeved area was removed, oily sludge was present beneath the pipe - groundwater was encountered in the soil approximately three inches below the fill line in this area. this area of soil was stained and emitted a strong odor - on tuesday excavated the sidewalk in the area of the fill port - instead of encountering bedrock at about three feet like expected, it turns out they were excavating in a pit that had been blasted into the bedrock. the material removed consisted of boulders with diameters up to three feet - at a depth of approximately six feet below grade the excavation was halted due to fears of undermining the roadway. at this point it was discovered that the fill material extended approximately to 12 feet below grade (this discovery was made by inserting a measuring tape through a void space in the boulders) - many of the rocks/boulders removed from this pit were stained with oil, indicating that the oil used the pit as a preferential pathway - endpoint samples were collected from two of the sidewall, with the other sidewalls and bottom consisting of rock - concrete debris and some of the rocks were pushed back into the pit to stabilize the excavation and the excavation was then abandoned - the sidewalk is being repaired - the rockwall in neighbour's alleyway will be powerwashed on Monday (07/28/08), sealed on Tuesday (07/29/08) Dave also mentioned that: Regarding the pit encountered in the sidewalk, I had been told that an old subway once existed in the area. We performed a quick on-line research of this and discovered that there is an abandoned subway tunnel beneath 162nd Street. The tunnel still

APT. BUILDING (Continued) **S107781661**

exists. This would indicate that the pit we encountered is probably associated with this tunnel. A link to a website discussing the history of this tunnel is - http://www.columbia.edu/~brennan/abandoned/sedgwick.html Dave asked to explore old tunnel for any oil in it. 07/30/08-Hiralkumar Patel. DEC Vought sent email to Dave requiring tunnel inspection and copied email to Liz DeLuca at MTA. 08/01/08-Hiralkumar Patel. left message for Liz DeLuca at MTA. Elizabeth DeLuca MTA Ph. (718) 694-4271 email: Elizabeth.DeLuca@nyct.com 08/04/08-Hiralkumar Patel. received call from Ms. DeLuca from MTA. asked her to confirm existence of an abandoned tunnel under W 162nd Street. sent web link, that was sent by Dave, to Ms. DeLuca. 08/05/08-Hiralkumar Patel. received email from Ms. DeLuca. she is not sure if there is an abandoned tunnel not under the West 162nd street. she will investigate it. spoke with Dave. they are recovering oil from test pit, but not much. will continue monitoring these pits. 08/08/08-Hiralkumar Patel. received email from Ms. DeLuca from MTA. she found that the subway that ran under 162nd street was the old shuttle for the Polo Grounds. she was advised that NYCT turned over those abandoned tunnels to the City when the service was shutdown. she asked to contact city to obtain access. discussed with DEC Vought. he mentioned that as hole in bedrock found nearby fill port and as no major contamination was found along fill line and as tunnel is abandoned, no further investigation is required in tunnel. he suggest to get update/tank closure report. left message for Dave. informed him that no investigation needed inside underground tunnel. asked him to submit report for work done till date. 10/01/08-Hiralkumar Patel. spoke with Dave. he inspected test pits and remaining area in middle of Sept. and found little water in test pits, but no oil. they also have sealed up rock wall in neighbour's alleyway. Dave mentioned that they are currently preparing report and will send to client for review. spoke with Mike. asked him to submit report by end of 10/15/08. 12/02/08-Hiralkumar Patel. spoke with Dave. he mentioned that report is ready, but waiting for payment before releasing report. Dave mentioned that excavations inside stores, along W 162nd street, are still open with some leftover soil contamination in sidewalls. Dave also mentioned that there could be some odor issue from leftover contamination and open excavations. asked Dave to submit site map and sample analyticals for review. received site map and sample analyticals from Dave. spoke wit Dave. he mentioned that samples from TP-1 and TP-2 were dirt samples right above bedrock and they removed all dirt after collecting sample. so at the end, no soil/dirt left in any test pits under sidewalk. test pits TP-1, TP-2, TP-3 and TP-8 were about 3 ft * 3 ft and about 2 ft deep. test pit TP-7 was at previous fill port area and was about 8 ft * 8 ft and about 6 ft deep. they found hollow space under TP-7 which they believe goes to underground subway structure. samples from TP-7 (sample # L & M) were collected from sidewalls. found contamination in dirt samples from test pit TP-4 where bedrock was found about 1 ft below surface. found high VOC contamination along previous fill line area, but could not excavate due to other utility lines. Dave mentioned that bedrock was found about 1 ft deep along front end of fill line towards W 162nd stret and about 3 ft deep at rear end of fill line inside store # 79. found few SVOC compounds above limit in sidewall samples, but could not excavated due to foundation. 12/08/08-Hiralkumar Patel. spoke with Mike regarding report. Mike mentioned that due to conflicts regarding payment between insurance copmanies, report was delayed.

APT. BUILDING (Continued) **S107781661**

Mike will contact insurance company and will call back with updates. 12/12/08-Hiralkumar Patel. received email from Dave. he will submit report by end of next week (12/19/08). 12/19/08-Hiralkumar Patel. received report from Envirotrac. Envirotrac recommended mitigation plan to address left over contamination where no further excavation is possible. left message for Dave regarding backfilling of excavations inside stores. spoke with Dave. he mentioned that excavations inside stores are still open pending approval for report from the department. told Dave that as no more excavation possible, the Department requires backfilling of those excacvations with installation of passive SSDS and moisture barrier. spoke with MIke, building engineer regarding incharge under new ownership. Mike mentioned that he still handles this matter and any correspondence should be sent to him. sent email to Mike and Mark Rosen (at Summit) requiring installation of passive SSDS and moisture barrier and epoxy sealing of impacted areas. asked them to submit work schedule by end of 12/25/08. email copied to Mr. Finnegan (at AIG), Mr. Luna, Ms. Moore, Ms. Demarco, Mr. Sutphen, Mr. Pillinger and Dave. 12/24/08-Hiralkumar Patel. received email from Dave. will seal boiler room floor with epoxy paint. will submit workplan for additional work by end of 01/30/09. 01/22/09-Hiralkumar Patel. received email from Dave inquiring about requirement of air monitoring from SSDS. sent email to Dave requiring air monitoring at the exhaust of SSDS monthly for six consecutive months (to cover summer time). also mentioned that the department may require additional work after reviewing air monitoring data. 02/27/09-Hiralkumar Patel. spoke with Dave. he will submit work plan by end of 03/06/09. 03/19/09-Hiralkumar Patel. received email from Dave with the plan for the passive vapor mitigation system and vapor barrier. Dave asked for approval for such plan. 03/20/09-Hiralkumar Patel. sent email to Dave. asked him to submit plan singed off by licensed engineer. 04/03/09-Hiralkumar Patel. received vapor mitigation design plan singed off by licensed engineer. received email from Dave inquiring approval or denial of submitted plan. sent email to Dave mentioning that the department doesn’t approve or disapprove such plan and its licensed engineer’s responsibility to design according to respective regulations. asked him to submit work schedule for installation. 05/26/09-Hiralkumar Patel. received letter from Dave with report from Envirotrac regarding installation of a passive SSDS and vapor barrier. Envirotrac installed SSDS and vapor barrier in Apr./May 2009. discussed with DEC Austin regarding possible closure. he asked to find out about history of the tunnel that running under W 162nd street nearby previous fill port. spoke with Hanesworth at NYC OEM regarding abandoned tunnel. he will find out which city department is handling this tunnel and will call back. Hanesworth NYC OEM Ph. (718) 422-8700 received call from Mary Merced. she spoke with MTA and found that tunnel was abandoned and turned over to NYC Dept. of General Services in early 1950s. discussed with DEC Austin with tunnel information. based on submitted information to date, he asked to close the case. case closed. NFA sent to Saad Radoncic and Marc Rosen. letter emailed to Mike Radoncic and Mr. Rosen. 06/02/09-Hiralkumar Patel. 9:57 AM:- left message for Dave to submit soft copy of vapor mitigation system so it can be stored on e-docs (as paper copy is too big to scan)."

DEC Memo:	"03/24/10. Zhune spoke to Bob urban from Protest 631-3214670. he said they test the AST 7005 gallons in a vault. The test fail with a gross dry leak. There is stain at the wall with the remote fill comes to the building. There is stain on top of the tank where suply-return line connected to the tank. they are doing this work to the byer of the building not to the owner. PBS 2-267228. 07/16/13 - Spill Case is transferred from Brian Falvey (PBS Unit) to V. Brevdo (Section B) as per DER Region 2 decision - Tank Test Failure Spill Case. VB 11/05/2013 - V. Brevdo Called and spoke with Bob Urban of Protest (631) 321-4670 and asked if he has any information indicating that spill can be closed or whether action is needed. Mr. Urban stated he will look in to this case and will call me back. V.B. Bob Urban called back and said he can not be of much help. They did this testing for potential buyer who seems to have walked away. They did not do any followup work which would help to assertain status of this spill. VB. 03/13/2014 - V. Brevdo e-mail from Kumar Patel of Spill Prevention and Response: On 02/21/14, we received another spill report for the above referenced site (spill #: 1310983) due to

APT BUILDING (Continued) **S110243968**

petroleum odors in the building. After further investigation, the spill # 1310983 is closed. I did informed property manager about other open spill case due to leaking fill line. Please note that during my site visits, I did observed petroleum stain on building's foundation wall, under the location of former leaking fill line. Below are some numbers related to the site: 402-412 West 148 LLC. **property owner** c/o Pinnacle Management Group **property management** 1 Penn Plaza, Suite 4000 New York, NY 10119 Attn.: Rasim Toskic **property manager** PH. (212) 564-2111 Ext. 3110 (O) (646) 739-1461 (C) email: isakr@pinnacleny.com 03/13/2014 - V. Brevdo e-mail to property manager Mr. Isak Radoncic: March 13, 2014 Dear Mr. Radoncic: On 02/21/14, the New York State Department of Environmental Conservation (the Department) received second spill report for the above referenced site (Spill No. 1310983) due to petroleum odors in the building. After further investigation, the Spill Case No. 1310983 is closed via administrative consolidation with the earlier Spill Case No. 0913598 opened on March 24, 2010. The Department's Spill Prevention and Response staff (Mr. Kumar Patel) informed property manager about the other open spill case No 0913598 due to leaking fill line. Please note that during the site visit Mr. Kumar Patel observed petroleum stain on building's foundation wall, under the location of former leaking fill line. Please be advised that according to the Environmental Conservation Law and New York State Navigation Law, the site owner is under the obligation to conduct environmental investigation and remediation of the property and to rectify leakage of oil from the tank and/or tank equipment. Please contact me at your earliest convenience at 718-482-4928 or via e-mail so the we can discuss the appropriate course of action by the property owner to address aforementioned environmental site condition. Sincerely, Vadim Brevdo V. Brevdo also called Mr. Isak Radoncic on 212-564-2111 Ext. 3110 (Office) and left voice mail explaining the nature of my call (see e-mail above). VB 06/26/2014 - V. Brevdo e-mail from NYC Tank Testing to Kumar Patel: Dear Inspector HiralKumar Patel, Attached please find our closure report for spill # 1310983 at 402 West 148th Street. Please review the case at your earliest convenience. If any additional information is required, please feel free to call Abe at 646-321-2876 or our office at 718-731-7011. Thank you, Goldie New York City Tank Testing Inc. 1624 Webster Ave. Bronx, NY 10457 Phone:718-731-7011 Fax: 718-228-4238 06/27/2014 - V. Brevdo June 27, 2014 Dear Goldie: My name is Vadim Brevdo and I was assigned to review information pertinent to spill cases 1310983 and 0913598 for the subject property. Please note that spill case 1310983 had been administratively closed and consolidated with spill case 0913598 which remains open at this time. I have a question on your submission to Mr. Patel (your e-mail of 6/26/2014, 2:50 p.m.): June 12, 2014 letter from New York City Tank Testing, Inc. states in first paragraph on the second page that enclosed are copies of analytical report and the chain of custody . Attachments to your e-mail did not appear to contain aforementioned analytical report, which the Department needs to review. Could you please send a copy of analytical report to my attention? Contact me if you have questions. Thank you. Vadim Brevdo 07/02/2014 - V. Brevdo Spill Case Closure Decision July 2, 2014 402 West 148th Street, Manhattan Spill Cases 1310983 and 0913598 The samples were taken at three locations in the area of old fill box and old fill route pipe between the

APT BUILDING (Continued) **S110243968**

building wall and the curb at 5 7 below surface grade. Two out of three soil samples showed non detect (ND) for both VOCs and SVOCs. One sample showed ND for VOCs but presence of SVOCs. Some of the SVOCs (pyrene, phenanthrene, fluoranthene) were below CP-51 cleanup values in this one sample. Some of the SVOCs (Benzo(a)anthracene, Benzo(a)pyrene, Benz(b)fluoranthene, Benz(k)fluoranthene, Crysene) were above CP-51 values but within the same order of magnitude as CP-51 values for these compounds. Taking aforementioned analytical data into consideration, the Department concurs with the spill case closure request by NYC Tank Testing in their June 12, 2014 letter report. This is very limited impact, no threat to human health of the environment as long as there is no long term contact with the soils beneath the sidewalk at one location. Spill case is closed effective July 2, 2014. V. Brevdo "

Contact Name:	DYLAN MARCHESCHI
DEC Memo:	"2/21/14-Zhune spoke to Dylan Marcheschi 347-927-7871 (tenant at appartment 66 top floor). He said there is oil odor in his apartment that the odor sicked him. He also said that he spoke to the super and the super told him that there was oil spill in the boiler room. Spuer 212- 564-2111 2/21/14-Zhune spoke to Rasin Poskic (Manager of the building) 917-509-5133. He said they had a delivery three days ago and oil was coming by the fill line but the plumber fixed the problem. Two days ago the tenant called the Fire Department they inspected the site and found nothing. Con-Ed also inspected the site and found nothing. As per Rasin today morning they had a delivery in the morning and probably the vapors that came by the vent pipe went up and entered in Mr. Dylan apartment. 2/21/14-Zhune called Dylan and let him know that the DEC will investigate the oil odors but if he wants his lawyer to speak to the DEC lawyer he has to bring his lawyer to the office. He said that is ok that all he wants is a writting document of the findings. 02/21/14-Hiralkumar Patel. alternate address: 402-410 West 148th Street PBS #: 2-267228. as per PBS record, the site has one 7,500 gal #4 oil AST in contact with soil. the tank was installed in Jan. 1950. other spill # 0913598 was reported on 03/24/10 as #6 oil tank failed a tightness test. as per caller, testing was done for potential buyer at that time. as per Protest, the tank testing company, stains were noted on the wall where remote fill line comes to the building and also on top of the tank where supply/return lines are connected to the tank. DEC Brevdo spoke with Bob at Protest who stated that no further work was done after tank test on 03/24/10. case still open. 402-412 West 148 LLC. **property owner** c/o Pinnacle Management Group **property management** 1 Penn Plaza, Suite 4000 New York, NY 10119 Attn.: Rasim Toskic **property manager** PH. (212) 564-2111 Ext. 3001 (O) (917) 509-6133 (C) 11:58 AM:- spoke with Mr. Toskic. inquired him about tank test failure report in 2010 and recent fill line leak. he mentioned that after noticing leak in remote fill line, located under the sidewalk, they abandoned the leaking fill line and installed a new fill line. couple of days ago, they noted couple of drips from the existing fill line which was fixed immediately. 02/21/14-Hiralkumar Patel. 2:45 PM:- visited site. met Ragip, building super. site has six story building with a basement. site has one 7,500 gal AST, sitting on the floor, in secondary vault. as per tank label, tank contains #6 oil. the tank is located along the building's northern foundation wall, in northwest portion of the building. the existing fill port and vent pipes are located along the building wall. all lines are aboveground. noted some oil on tank room floor. Ragip mentioned that there was some oil spilled from an elbow on existing fill line. oil spilled onto tank room's concrete surface.

BOILER ROOM (Continued) **S116552921**

observed oil on north side of the tank and some oil spots at west end of the tank. asked Ragip to clean remaining spill in tank room. found old, previously abandone, fill line in tank room. noted signs of oil seepage from building's foundation wall in area underneath the previously closed fill line. Ragip mentioned that they found leak in former fill line in 2010 (spill #: 0913598) and installed a new aboveground line. noted petroleum odors inside the elevator only. no odors noted outside the elevator. due to odors in elevator, inspected elevator pit. no signs of petroleum product noted in elevator pit. Mr. Marcheschi lives in apartment 66, located on 6th floor, in northeast corner of the building. no odors noted in 6th floor lobby. following actions requires, based on observations during the site visit: - subsurface investigation along the formerly abandoned remote (and leaking) fill line - tightness test of the tank 3:12 PM:- spoke with Mr. Toskic. asked him to test the tank, by the end of 02/25/14. Ragip **building super** PH. (646) 261-0797 3:34 PM:- received call from Isak from building management. informed him about required subsurface investigation along abandoned remote fill line and tank test by the end of 02/25/14. Isak Radoncic Pinnacle Management Group PH. (212) 564-2111 Ext. 3110 (O) (646) 739-1461 (C) email: isakr@pinnacleny.com 02/24/14-Hiralkumar Patel. discussed with DEC Austin and DEC Vought. due to petroleum odors in elevator, the Department requires immediate sealing of the elevator pit. 12:26 PM:- left message for Isak and informed him that the department requires immediate sealing of elevator pit. 12:30 PM:- spoke with Ms. Toskic. he mentioned that Isaac handles building maintenance issues and he will call back. Mr. Toskic also mentioned that boiler company will do tank test today. 02/25/14-Hiralkumar Patel. 11:50 AM:- spoke with Isak. he mentioned that during inspection, they noted broken gasket on tank manhole and crack in vent pipe. they fixed manhole gasket and vent line and will test tank either today afternoon or tomorrow morning. Isak confirmed no more odors in elevator after fixing manhole and vent pipe. 11:58 AM:- spoke with Mr. Marcheschi. he confirmed no odors in building right now, but suspects that odors will come back next week. 02/26/14-Hiralkumar Patel. 9:33 AM:- received call from Abraham Wachsler from NYC Tank Testing. he went to site for tank test, but due to some issues with welding on tank top, testing could not be done today. 10:12 AM:- left message for Isak. 10:13 AM:- received call from Isak. he has discussed tank issues with NYC Tank Testing. he has also informed him oil company not to deliver anymore oil until tank is repaired and tested. suggested him to seal the fill port to prevent misdelivery from other companies. he mentioned that currently tank has around 4500 gal of oil in it. as no active leak noted from the tank, they choose to burn oil down to 1500 gal. at that point, contractor will pump out remaining oil/sludge, clean the tank, repair it and test it. Isak mentioned that based on daily consumption, tank cleaning will happen by middle of next week. based on available information, asked him to provide tank test result by the end of 03/10/14. also asked thim to monitor air quality in elevator. due to no indication of oil in elevator pit and no more odors in elevator (also confirmed by Mr. Marcheschi), agreed with Isak not to seal the elevator pit, at this time. but it may required based upon information/observation after tank repair/testing done next week. 10:35 AM:- sent email to Isak and asked to submit tank system test result by 03/10/14 and monitor elevator daily, until tank repair and test done. 03/04/14-Hiralkumar Patel. 2:30 PM:- visited site. met Ragip. no petroleum odors noted in elevator. minor odors in

BOILER ROOM (Continued) **S116552921**

tank room. Ragip mentioned that tank will be cleaned on 03/06/14. 03/10/14-Hiralkumar Patel. 9:40 AM:- spoke with Isak. he mentioned that the tank passed tightness test on 03/07/14. he will submit copy of test result. 03/13/14-Hiralkumar Patel. 11:19 AM:- received email from Isak including tank system test result. the tank system was tested tight on 03/06/14. based on available information, case closed. **also refer to spill #: 0913598.**"

Remarks: "apartment complex boiler had a leak. tenant still smells fuel oil and would like an inspection with the basement with dec and his lawyer"

DEC Memo:	"Tipple responded to scene, oil impacting 162nd street from WoodCrest to Anderson and down Anderson a bit. Eastmond responded to first stop the leak and repair the broken fuel line on the mule boiler. Their environmental group responded and removed two truck loads of pink snow, and were to sand and sweep the impacted surfaces. The drains were frozen over and little to no impact to the drains was noticed, FDNY bermed them with speedy dry prior to reporting the spill. 08/09/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. Called Issac Mungra regarding information of spill and left message to call me back. -QA 08/10/06: Contacted to Mr. Issac Mungra (Easmond Co.) at (718)378-3000 he said he doesn't have this spill in his log book. He will find out about the spill from accounts department and he will call me back. -QA 03/15/07: Called Issac Mungra to discuss regarding this spill, he was not there. left message to call me back. -QA 04/10/07: Called Issac Mungra at (718)378-3000 to discuss regarding spill. He was not there left message to call me back. -QA 06/27/07: Called Hazmat to discuss regarding spill, nobody was there left message to call me back. -QA 07/03/08 Spill case transferred from Q. Abidi to J.A. Maisonave. - JAM 12/14/11: This spill case transferred from J. Maisonave to J. Kolleeny. - JK 03/25/15: Discussed this spill case with my supervisor, Vadim Brevdo. We agreed that based on age of spill (10 yrs), fact that Affected Resource is listed as sewer (i.e., not soil or GW), Caller Remarks state that most of spill was cleaned up with absorbent and that some ran into sewer, and absence of reports of petroleum odors at this location, it is likely that this spill did not cause a significant impact to environment and does not pose a significant risk to public health. Therefore, this spill case is closed. - J. Kolleeny"
Remarks:	"used absorb all and cleaned up as much as possible, but some ran into sewer - unknown amount There was a fuel spill - shut down boiler - pipe at the back of boiler that appeared loose. Temporary boiler (tractor trailer) outside of multifamily dwelling. Company will be sending out a cleanup crew."

ESPLANADE GARDENS (Continued) **1001752340**

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 11/13/2001 - Sangesland received a report from Emteque Environmental Corporation detailing the failure of all 3 - 40,000 gal buried tanks. 2/27/2002 - Sangesland received another report from Emteque stating that the plan is to remove the three tanks, remove all associated piping & system equipment, Remove all visually contaminated soil, Install 2 new 40,000 gal tanks along with associated piping, Install a natural gas line, Install monitoring wells around the new fuel tanks. Sangesland left a message with Dave Keil (consultant) saying the proposal looks good. Requested a meeting for around April 2, 2002 to discuss the details. 4/2/2002 - Sangesland met Dave Keil of CDM on site to review the work plan. 3 - 40,000 gal. #6 fuel oil tanks will be dug out. Boring work done on site indicates the spill has not spread far. It is beleived that there is a clean zone between the tanks and the building. Sangesland said, since the excavation will be so large, the DEC will require 8 side wall samples (2 per side) and 4 bottom samples. PLUS groundwater sampling. Consultant will prepare a work plan and submit it to the property owner/ project developer, but he may not be associated with work in the future (depends if he's hired to continue the effort) 2/5/2003 - Sangesland visited site and spoke with John Raguso of Emteque (631-271-6622). Tank excavation work was done (3 - 40,000 gal tanks pulled). Excavation hole was open and held back on 4 sides by steel pilings. Standing water at approx 10' depth showed partial floating product (30% of water surface). Vac truck is expected later today. After vac out, photos will be taken of cement slab base to confirm no below slab contamination. Some residual contamination is expected, but after the source is removed and most of the standing contamination is removed, the spill can be closed out. 3/24/2003-Vought-Fowarded message from Sigona to Duty Desk: Sigona received call from Michelle Grant (212-491-7025) regarding spill and presence of oil/water in excavation. Vought called Grant back and explained remedial actions. 6/26/2003 Sangesland reviewed a report from Emteque dated 6/16/03 Report outlines the removal of 498.85 tons of contaminated soil from the area outside around the tanks. Some excavation was also done in the basement where a spill existed. Both the basement and the outside excavation came back with clean end points. Report in file. Spill Closed"

Remarks: "CALLER STATES LAB RESULTS FROM ABOVE PROPERTY SHOW SOIL CONTAMINATION WITH # 6 FUEL-WILL CHECK GROUND WATER-REMOVE TANKS AND CONTAMINATED SOILS."

DEC Memo:	"This site had the same problem several years ago. Case has been assigned to Sawyer for investigation. 12/9/04 - Sawyer - Talked Donald Mack today there seems to still be a problem. I have sent by mail and fax a modified Contaminated Soil letter to: Maurice McKenzie Royal Management LLC 507 West 186th Street New York, New York 10033 I also talked to a Jeanette with Royal Management 212 923 4840 and tried to get them to get a clean up crew out to the site. They have fail to repsond. 12/10/04 - Sawyer - ECO Lochner responded to the site and gained access into the basement and confirmed a leak with a sheen from next door. 12/22/04 - Sawyer - Called Royal Management and let them know that they were going to have some ticketing problems for not trying to rectify this problem. 1/11/05 - Sawyer - Called Royal Management many times to try to gain access to the basement of building 200 W 146th Street with ECO Lochner. ECO suggested we go to the management office up on 186th Street. Once there he explained that no work was to be performed before we gained access to the boiler and tank rooms of that building. They were to schedule meeting with Maurice Mckenzie asap. 1/14/05 - Sawyer - Finally met Maurice McKenzie at 1100 hrs to gain access. There were numerous violations from the start not to mention they were to have already performed a subsurface investigation, as in the letter dated 12/9/04, that had not been done. There was no PBS registration posted and none could be produced. There was a running sump pump with an oil sheen on top in the far left hand room(reported to DEP #994306). The floors in both of the rooms that butt up against the 210 wall were of newer painted wooden sheet board. There was a newer tank 3000 gallon #2 fuel oil tank in a vaulted tank room on the right. The basement also contained a newly cemented door to a large room on left side which was the old tank room/boiler room but there was so much garbage in the room I could only see connection pipes at the top near the ceiling. I told Maurice to clean the room out and to get borings in that area and the full length of the wall leading to 210 W 146th Street. There was new paint everywhere in this basement. 03/04/05 - Sawyer - Mr. Mack of 210 W 146th Street notified me today that they have had a another oil release on 3/2/05. Mrs. Ruiz of Royal Mangement was to have hired Tri Stae Environemtal, but I have not heard anythig form them confirming this. 6/3/05 MT// A tank test failure was called in by Ray Kahn for this address on 6/2/05//new spill # is 05-02555 has been closed out and referred to this spill #.// Spill Transferred from Sawyer to Tipple \\\\ 6/13/05 Tipple spoke with Ray Kahn//leaking tank to be taken out of service ASAP after which an investigation/remediation is to proceed//// 8/12/05 Sharif visited the site yesterday.Sewer pipeline at 200 W 146th Street basement broke,liquid dirt flooded

APARTMENT BUILDING (Continued) **S106736042**

allover the place and seeped through the wall impacting adjacent building's basement. There is evidence of old oil spill underneath the wooden besement floor. It looked like black, oily contaminated stuff along the oil line that runs underneath the wood floor.Building owner Mr. Sion Sohayegh Hired ESPO (Ray Kahn, 212-330-7501, cell: 917-939-7366) to fix the tank and pipeline. Mr. Sion will do the initial clean up this week end followed by extensive remedial work soon. 10.07.05 SR// I called both Ray Kahn (consultant)and Sion Sohayegh, left message for both of them to follow up about the remedial work that need to be done. 11.10.05 Sharif- This spill no. merged with Spill # 0505300 and hence closed."

DER Facility ID: 293220
DEC Memo: "6/3/04 tipple closed this spill number and referred it back to spill # 0407205 8/12/05 Sharif reopened the case since this is the source of the spill to the adjacent property at 210 146th Street. Spill# 0407205 & 9904971 represent the same location and source of spillage (both are closed). 09.15.05 SR// I spoke with Mr. Ray Kahn of ESPO today. He informed me they are taking away the ply wood floor, cleaning the dirt and repaired the leak to prevent any water seeeping through the next door wall. I advised him to provide DEC the work plan including soil boring works to be performed. 11.10.05 Sharif- Rec'd investigation report done by ESPL.Couple of spill no.s were called in before at this address. Those are-spill no. 0407205,9905161, 9904971. 12/19/05: Case reassigned to Andersen. Reviewed subsuface investigation report prepared by ESPL. VOCs and sVOCs found in soil borings. Proposed excavation. Sent approval letter. 4/19/06: Spoke with Ray Kahn of ESPL. The RP is being uncooperative. Sent letter with stipulation agreement requiring implementation of the approved RAP. Stipulation due back by May 31, 2006. Sion Rohayegh phone number: 516-848-0550 5/23/06: Spoke with Rosario Reyes (212-923-4840). Scheduled site visit for 6/5/06 to discuss possible off-site source from adjacent building, and required future work. 5/26/06: Spoke to Ray Kahn. Rescheduled site visit for 6/6/06. Oil was found in the neighbors basement. The tank was fixed and retested, but the contamination has not been remediated. The building is in shody condition, there was a raw sewage spill in the basement and an old boiler was recently removed. 5/30/06: Left a message with Rasario Reyes secretary to confirm site visit. 6/6/06: Site inspection by NYSDEC Andersen. When the spill was called in a water leak from the building to the south flooded the basement and caused the fuel oil to infiltrate that building to the west. The neighbors wall and the adjacent floor has since been cleaned. The basement of the building to the west is four feet lower than the site. Temporary walls and plywood floor that was on top of the concrete slab in the basement were removed. Endpoint samples will be taken after excavation. 7/14/06: Received phone call from Ray Kahn. Floor needs to be removed and then excavation will be scheduled. 8/21/06: Spoke with Ray Kahn (212-330-7501). The basement was prepared for excavation. Excavation will be scheduled soon. He will contact me when a date is scheduled. 9/18/06: Spoke to Ray Kahn. Excavation has not been scheduled yet. The owner was out of town. He will followup with the owner and call me back. 10/6/06: Spoke to Ray Kahn. Excavation has not been scheduled yet. He will call the owner and get back to me. 10/16/06: Left voice message with Rosario Reyes to followup on overdue stipulation agreement and excavation. 10/24/06: Sent stipulation agreement overdue letter. May need to refer to legal. 1/25/07: Excavation scheduled for 1/30/07. 2/6/07: Spoke to Arash at ESPL (office 212-330-7501, cell 516-315-3231). Excavation postponed due to weather. 2/23/07: Site visit. Excavation of three rooms in the basement. Product (sheen) in all excavations. Groundwater at 1-2 feet bgs. Liquid will be pumped out. Downgradient wells installed on the sidewalk. 3/6/07: Spoke to Ray Kahn. Recovery

RESIDENTIAL (Continued) **S106971964**

wells will be installed in the excavations, and then the excavations backfilled. Monitoring wells will be installed on the sidewalk. This will occur early next week. 3/28/07: Arash is no longer employed by ESPL. Emailed Ray Kahn (rkahn@espl.com) to followup on well installation. 4/4/07: Left message with secretary for Ray Kahn. He will be in the office tomorrow. 4/5/07: Spoke to Ray Kahn. Four wells installed in the building. Will send email with site plan. 5/2/07: Emailed Ray Kahn. Requested an update report with well sampling data and site plan. 5/29/07: Left message with Ray Kahn's secretary to return call. 5/31/07: Left phone message with Ray Kahn's secretary to followup. 6/14/07: Spoke to Ray Kahn. The four on-site wells will be gauged and sampled for sVOCs. A well may be installed in the sidewalk. 7/26/07: Emailed Ray Kahn to followup on the status of groundwater gauging and sampling. 8/15/07: Spoke to Ray Kahn. The owner has not paid him for work completed. He will contact the owner and call me back. 8/31/07: Referred to legal. 9/12/07: Received phone message from Ray Kahn. Wells will be sampled and report submitted (phone: 212-363-3775, cell phone: 917-939-7366). 10/18/07: Received groundwater sampling report. MW-2 was dry. Monitoring wells MW 1, 3, 4 were sampled. Napthalene present in MW1 at 45 ppb. 10/19/07: NFA issued."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 5/17/04// Tipple conducted site visit Friday eve.5/10/// All Borough retained and did an emergency initial cleanup on Friday' Phoenix brought in to finish up final cleanup on Monday awaiting manifests 6/7/04 Tipple updating//// Phoenix-631-864-4200 All Borough 1-800-426-0899 Board of Health Gave Ticket/// Rob Edwards 914-944-9200 bld. contact 06/22/06: Called Azellia Maddox at (212)689-1520 and talked to Ms. Gillmore (Supervisor), DEP Manhattan. She said no information indicated regarding this spill and the contact person is Jon Robertson (212)491-8486. -QA Called to building contact number (914)944-9200 and talked to Ms. Karolina (Titano Development) She said that She will talk to her boss and then She will call me back. -QA 06/26/2008: This spill case was transferred to A. Doronova. AD 09/2008: Tried to locate the contact person - Jon Robertson, phone 212-491-8486 and Titan Development without success. All phone numbers are no longer in service. AD 12/04/2008: Called and spoke with Paul of Phoenix, he promised to look through their files for some information on this site. Found on the Internet information regarding Titan Development, Inc. phone: (716)772-5510 (possible RP). Left a message. Found on ACRIS information regarding The Community Preservation Corp. (CPC), which listed in its files as an owner of the site. Address: 28 East 28th Street 9th floor New York, NY 10016 phone: (212)869-5300 fax: (212)659-0102 Called and spoke with Human Resources department of CPC. Explained the situation and left my contact information. Later received a call from Ms. Kristy Seyfert of CPC, she confirmed that CPC owns the property, she asked me to send them DEC spill report and an official request. Will send an Outstanding Violation letter. AD 12/05/2008: Issued and sent the Outstanding Violation Letter. Also sent a copy of the letter and DEC Spill Report via fax to CPC. DL PDF copy to eDocs. A response to the letter should be received till January 5, 2009. AD 02/19/2009: Received a phone call from K. Seyfert. She said that she did not received the letters. Sent these letters again via fax and e-mail: From: Ainura Doronova [mailto:axdorono@gw.dec.state.ny.us] Sent: Thursday, February 19, 2009 3:26 PM To: Kristy Seyfert <kseyfert@communityp.com Subject: 2515 Seventh Ave., New York NYSDEC Spill No. 0401623 and 262Alexander Ave., Bronx NYSDEC Spill No. 0301707 Dear Ms. Seyfert: Attached please find copies of the letters, regarding above-referenced sites, which were sent to you previously, but were not received by your company according to your statement. Please be advised that response is time sensitive. To receive a deadline postponement you should submit an official request. Sincerely, Ainura Doronova Environmental Engineer later received an e-mail from her saying: Thank you I am in receipt of the attachment and will address the situation ASAP. Kristy Seyfert Loan Analyst The Community Preservation Corporation 28 E. 28th Street, 9th Fl. New York, NY 10016 T: (212) 869-5300 x560 F: (212) 659-0102 kseyfert@communityp.com 05/18/2009: Did not receive any response yet. called and left a message to Ms. Seyfert. AD 06/01/2009: received an e-mail from N. Recchia of EEA saying: Ainura, Hello Ainura, We need your help to try and close this spill case. I would like to know exactly what DEC needs to close this spill but we have little info. I was contacted by the current owner of this property and The Community Preservation Corporation to work on closing this spill case file. Apparently this building underwent a complete renovation in 2004. The

THE COMMUNITY PRESERVATION CORP. (Continued) **S106469060**

property owner only knows that the contractor who was working on the project removed a tank in the basement of the building. He has no information regarding the cause of the spill and neither does CPC who retained the contractor to do the work. Apparently this contractor has no left no records or information and nobody can contact them anymore. The only info they gave me was your letter date December 2008 (attached). I went online to the DEC Spill Incidents Database Search (attached) and found limited info. According to your letter DEC requires a summary of cleanup activities, manifests, post excavation samples etc. If I can't get this information would DEC accept us performing soil test borings in the vicinity of the former tank to check existing soil quality conditions? I could develop a work plan that DEC could review before the work is done. Thanks for your help with this spill file. Our client would like to close out this spill case as soon as possible but we understand DEC need the data and info to do that. Sincerely Yours, Nicholas J. Recchia, C.P.G. Vice President, Senior Hydrogeologist EEA, Inc. 55 Hilton Avenue Garden City, NY 11530 phone (516) 746-4400 ext. 12 fax (516) 746-4432 cell:(516) 395-8763 nrecchia@eeaconsultants.com www.eeaconsultants.com AD 06/03/2009: called and left a message to Mr. Recchia of EEA. Lated spoke with Mr. Recchia, sent him NYSDEC FOIL Spill Report. AD 06/10/2009: Received an e-mail from Mr. Recchia of EEA saying: Ainura, Hope all is well. I have another piece of this puzzle and it now makes more sense. I have recieved a Phase I summary report from 2000 performed by ATC Environmental which is attached to this message. The report indicates that the Tank in question was an Above Ground 2,000-Gallon Heating Oil Tank. The site inspection at the time indicated that there was no leakage, spills or staining observed around the tank. The report also indicated that the tank was to be removed by the building renovation contractor. I was told there were problems with the contractor hired to do the renovation one of which resulted in this spill file being opened due to poor construction managment. Apparently Pheonix was hired to cleanup the 3-gallons of oil that spilled (according to the online spill description). I'm trying to locate and get a copy of the Phoenix report. If I cannot get this report what would be your requirements be to close out this spill file? Sincerely Yours, Nicholas J. Recchia, C.P.G. Vice President, Senior Hydrogeologist EEA, Inc. Called to DEP to speak with Azellia Maddox (caller) regadring the cause of the spill. She is currently on a sick leave. Will review the submitted report. DL pdf copy to eDocs. Called and spoke with Paul of Phoenix and asked him to look through their records for any info regarding cleanup Phoenix performed at the site. Later received a call from Paul, he said that an invoice for the cleanup was found. Paul participated in cleanup at the site. The drum in the building's basement was leaking. Phoenix responded to call and transfered product from leaking drum to a new one and secured the drums on site. They could not remove the drum because it was located in the basement. Received copy of the invoice via fax. DL to eDocs. Called and left a message to Mr. Recchia of EEA. AD 06/11/2009: Called and spoke with Mr. Recchia. Since the cause of the spill is known (leaking drum), I asked him to prepare a letter report summarizing all info, and to attach recently taken pictures of the basement. AD 08/2009: Called and left a message to Mr. Recchia regarding a letter report submission. AD 09/01/2009: Called and spoke with A. Recchia of EEA. He said that report will be submitted till September 15, 2009. AD 09/30/2009: Received an e-mail from Mr. Recchia of EEA saying:

THE COMMUNITY PRESERVATION CORP. (Continued) **S106469060**

Ainura, I wanted to let you know that I have prepared the report earlier this month for this project however we are having trouble getting paid from our client. As soon as we get paid I will have the report sent to you. Sincerely Yours, Nicholas J. Recchia, C.P.G. Vice President, Senior Hydrogeologist EEA, Inc. 55 Hilton Avenue Garden City, NY 11530 phone (516) 746-4400 ext. 12 fax (516) 746-4432 cell:(516) 395-8763 nrecchia@eeaconsultants.com www.eeaconsultants.com 10/02/2009: Called and spoke with K. Seyfert of CPC regarding the submission of the report. She referred me to Ms. Jill Belli - contact person for this case 9ext. 626). Called her and left a message. AD 10/12/2009: Received an e-mail from N. Recchia of EEA saying: Ainura, Attached please find our report for this spill. Sorry it took so long but we had to wait for our client to pay for it before it went out. Thank You. Nicholas J. Recchia, C.P.G. Vice President, Senior Hydrogeologist EEA, Inc. 55 Hilton Avenue Garden City, NY 11530 phone (516) 746-4400 ext. 12 fax (516) 746-4432 cell:(516) 395-8763 nrecchia@eeaconsultants.com www.eeaconsultants.com DL it to eDocs. Will review. AD 11/23/2009: Reviewed the letter report. The spill originally was reported because of leaking hydraulic oil drum. the spill was cleaned by Phoenix Env. in June of 2004. Empty drum was removed from the basement. basement floor is concrete and there are no drains. Recent pictures of the basement were submitted. There is not any oil staining on the floor. AD 12/01/2009: Discussed the site with J. Kolleeny of DEC. The decision was to close the case. Will send a letter. AD 12/02/2009: Issued and sent a letter with spill closure approval to K. Seyfert of CPC. Dl to eDocs. Case closed. AD "

DEC Memo:	"Sangesland spoke to Jim Coretti at Atlas Oil. He said there was a break in the fill line in the basement. Spill to the basement floor. Sangesland asked for an inspection of the fill line from the fill box out in the sidewalk. Concern about possible leaking pipe in soil under sidewalk in front of building. 3/18/08. 04/28/08-Hiralkumar Patel. spoke with James at Atlas fuel. he mentioned that fill line might be leaking under sidewalk and then oil came into building thorugh area where fill line enters into building. left message at site (212-926-4636). alternate addresses: 471-479 W 149 St, 1801-1807 Amsterdam Ave PBS #: 2-606623. site as one 3000 gal #2 aboveground tank in contact with soil. as per PBS record, site owner: New Covenant Temple of the United Holy Church of America 1801 Amsterdam Avenue New York, NY 10031 Ph. (212) 926-4636 emergency contact in PBS: Warren Scott, Ph. (718) 659-4395. 04/29/08-Hiralkumar Patel. visited site. met Bob Rodman, trustee of church. site has 550 gal tank enclosed in concrete. no sign of overflow from tank. no sign of leak around tank. after spill incident, they abandoned old fill port and installed new aboveground fill line. old fill port was at middle of sidewalk and old fill line runs about 2.5 ft under sidewalk before enters into part of building, under sidewalk (for remaining 3 ft) and runs aboveground. found water leaks from street into basement from this wall where old fill line enters into building. no sheen or fresh product observed with rain water. no odors inside building. based on observation during site visit, case closed."

DEC Memo:	"1/29/09 - Raphael Ketani. Joel Landis and Joe Good of Langan Engineering called me to discuss the case. They said that the spill was called in because test pits were being performed in part of the old Bronx Terminal Market area and contaminated soil was found. They said that two other contaminated areas were discovered previously. At least some of this contamination was from a spill that happened several years ago. The old Bronx Terminal Market grounds were mostly along the Major Deegan Expressway (the present site of the new mall for Target and Home Depot), but a small part was next to the new Yankee Stadium. It is this small area that has the contamination and concerns this case. Right now, there is a project to replace and rebuild the tennis courts at this small part of the old Bronx Terminal. They want to drive piles for some small buildings that will be next to the new tennis courts. They will send a plan to DEC for

CONSTRUCTION SITE (Continued) **S103570832**

the digging, stockpiling, and removal of the contaminated soil. They told me that they want to get rid of the soil fast. Excavation and stockpiling will take place next week. I told them that I will look at the plan when they send it. Mr. Good sent me the work plan by e-mail. 2/4/09 - Raphael Ketani. I spoke to Mr. Good and Jason Hayes (both of Langan) regarding why they wanted to dig just in this small area and not the whole area of piers 2 and 3. They said that the great majority of the areas had already been excavated and cleaned up. They said that Sharif Rahman of Region 2 Spills had been the case manager and had overseen the project (see spill cases #0609955 and #0712507). They added that the contaminated area was discovered during a trenching operation and appeared to be an isolated location. I reviewed the work plan. It appeared to be a standard or routine set of proposed remediation operations and soil sampling. Based on these methods and the fact that the future use of the site is as a set of tennis courts, I approved the plan. I sent Mr. Good the approval by e-mail. 2/23/09 - Raphael Ketani. Mr. Good (212) 479-5427 left me a voice mail today. He said that he will visit the site today to observe the excavating and soil sampling. 2/25/09 - Raphael Ketani. Mr. Hayes called me this morning. He said that they did an excavation of 30' by 90'. Then they did additional test pitting at the site. This made them realize that there was more contaminated soil to remove. So they extended the excavation until it was 90' by 80'. One corner was found to be deeply contaminated. So they started digging. They dug down 3' below the water table during low tide. Mr. Hayes said that they were into the organic silt that was originally at the bottom of a small former inlet which is under the site. He said that they are 12' below the surface and the oil appears to be thick and old, and like #6 oil. He said that they are below the capillary fringe for the water table. Mr. Hayes said that he would like to stop digging. I told him that since he has dug below the capillary fringe and will remove the oil that was found, then he can stop digging. 3/18/09 - Raphael Ketani. I tried to contact Mr. Hayes, but could only leave a message. Mr. Hayes called me back shortly afterwards. He said that they excavated 5,000 square feet of area. They took 22 end point samples. Two samples came back too high. So they will over excavated these areas. The contaminated soil is being removed right now. The excavation work will take place next week. 4/16/09 - Raphael Ketani. Mr. Hayes e-mailed me and wrote that they had finished the excavating and sampling. The closure report will be sent out soon. 7/9/09 - Raphael Ketani. Mr. Hayes called requesting the status of the case. I told him that the case was still open. He asked why. I told him that I hadn't received the closure report. He sounded embarassed and said that he will send it to DEC very shortly. I received the Spill Closure Report dated 5/27/09 by express delivery service. 7/10/09 - Raphael Ketani. I reviewed the closure report and found it to be acceptable. Based upon the information in the 5/27/09 Closure Report, I have determined that the oil spill has been remediated and there is no threat to human health or the environment at this time from conditions at this site. Therefore, I am closing the spill case. "

Remarks: "CALLER STATES THAT THERE IS PETROLEUM CONTAMINATED SOIL. THIS IS A HISTORIC SPILL. CLEAN UP IS PENDING."

DEC Memo:	"Yankee Stadium site 03/19/08 I spoke with Jason Hayes, Langan Engineering today.He indicated that contamination found in a 10X10' pit near Pier 4.Hiring contractor to remediate this site is on process.(sr) 08/11/08 Langan Engineering performed remediation between pier 4 and Harlem river(pier 5). Activities included:Excavation of all petroleum contaminated soils between Pier 4 and 5 for disposal,separation of concrete surface cover and petroleum-impacted soils into separate disposal stockpiles, collection of end point samples and backfilling the site.The site is approx 1200 sq ft in former Bronx Terminal Market area.The site has a long history of commercial and industrial use.Pictures in report.Prior to removal, waste characterization samples was collected by ECI to obtain approval from waste disposal faclities. Excavation

CONSTRUCTION SITE (Continued) **S103570832**

was completed to approx 1 ft below the ground water table.Petroleum contaminated soil removed from the remediation area consisted of brown to dark gray and black,stained fill material, and was observed in a layer located approx. 3 to7.5 ft below grade surface throughout most of the excavationarea. AB Environmental of Bohemia, NY removed 883 gallons of water and oil from the hole.A pipe about 8' long,four inch diameter was located and removed within the excavation area. Observations of Harlem river shoreline between Pier 4 and 5 showed no petroleum impacts, as per LANGAN. Approx. 319.31 tons of petroleum impacted soil were removed and disposed.End point samples result show VOCs/SVOCs within acceptable limit.Final remediation was extended or contracted based on field observations and analytical results, as per LANGAN.NFA required.(sr)"

Remarks: "unknown amount spilled; happened during excavation; went down about 8 feet and found a pool of oil starting to surface; are not excavating at this time; is contained; not yet cleaned up"

Spiller Address:	721 LENOX AVE
Spiller Company:	999
Contact Name:	GEORGE CUNNINGHAM
DEC Memo:	"They say the spill was cleaned, but this must be confirmed. Need to get contact phone number from Mark Tibbe 7/18/07 - Raphael Ketani. One hundred and fifty gallons of hydraulic oil spilled from a broken line at lift #9 at the bus depot. I tried to call Sherry Bulkley at (646) 252-5774 to find out whether the oil had been cleaned up, but could only leave a message. I talked to George Cunningham (646) 252-3607 at NYC Transit. He said that the oil was contained and the floor of the shaft is solid concrete. He said they will power wash the elevator shaft and collect the wash fluid. He will get back in touch with me. 7/19/07 - Raphael Ketani. Mr. Cunningham called me back. He said that 800 gals. of total liquids were removed from the shaft. Groundwater had been seeping in. After they pumped out the shaft, more water entered. The lift is not going to be used ever again and has been shut down for good. The walls of the lift will be powerwashed. The entire depot will be demolished in one year due to the other oil leaks/releases and tank problems at the site. It will be a giant cleanup of the grounds of the site. Mr. Cunningham added that he will send me a manifest for the removed liquids and a letter describing the events. 08-02-07: Reassigned to tibbe from Ketani. Spill is within the area of excavation of a larger remediation/construction project. Any residual contamination will be addressed at that time. 08/16/07: The investigation and remediation (if warranted) will be performed during a large remedial and construction project at this depot. The depot is slated to be demolished and rebuilt in 2008. An SSRP/RD is being prepared to address all of the known contamination and to investigate any areas where contamination is suspected, namely the lifts and associated pits. Refer to 98-13017. 06-17-08: Closed and consolidated under 8902374."
Remarks:	"BROKEN HYDRALIC COUPLING- LIFT #9; HAS BEEN CLEANED;"

DEC Memo:	"3/18/15: Mahat DEC Mahat contacted Ms. Maibauer (MTA System Safety @ 646.252.5768) inquring about the spill and its nature. A lifting equipment failed resulting great oil spill on the floor. Spill is contained within the concrete and spill clean up crew are en route. A clean up reprot will be provided to the Department once it is done. DEC is waiting for a cleanup report. 3/23/15: Mahat e/c : DEC Mahat has received a clean up report from Ms. Maibour. It has been uploaded on D2 for reference. Based on the provided report, no further investigation is warrented by the Department. Spill case will be closed in the database. "
Remarks:	"Line blew and spilled onto concrete floor. Contained currently qand cleanup is underway."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE transfered from Hale to Tibbe on 12/27/00. see also 89-02952,89-04241, 91-06264, 93-04003, 96-06076, 01-02743. tanks repaired/replaced/upgraded. remediation ongoing. See also 98-13017 for waste oil plume. 12/19/07: Since the depot is slated to be demolished, NYCT has decided to remove as much of the contaminated soil and LNAPL as physically possible. They submitted an SSRP/RD for excavation, which was approved. At the time of the remediation, Spill #s 05-13028, 07-03983 & 06-10604 will be investigated and if necessary remediated. 06-17-08: Spill #s 9813017, 0513028, 0610604 & 0703983 have been closed and consolidated under this number because all of the spills will be remediated at the same time. 11/12/10 - spill re-assigned from Tibbe to Joe O'Connell 5/19/2011 The spill was reassigned from Joe O'Connell to Linda Ross 2/27/12 - Raphael Ketani. Site was transferred to me during February 2012. 4/26/12 - Raphael Ketani. The DEC was informed during the monthly meeting that depot construction is still taking place. 5/28/13 - Raphael Ketani. I reviewed the March 2013 Monthly Status Report for all of the subject NYCT bus depot sites. More wells were destroyed as a result of the ongoing construction. Only two wells are left. These are at the east end of the property. 5/29/13 - Raphael Ketani. Gregory Mathelier (212) 252-3470/cell (646) 765-0336, Construction Administrator for the NYCT bus depot sites, sent me the May 2013 Engineering Report for Site Remediation Through In-situ Solidification/Stabilization of the oil contaminated soil (prepared by URS). Mr. Mathelier stated in the text of his e-mail that: The subject Final Engineering Report (FER) prepared by our consultant (URS) for the In-situ Solidification/Stabilization (ISS) performed at the Mother Clara Hale Bus Depot is attached. This report presents a background of remedial investigations performed at the site, the bench scale study conducted prior to the ISS and documents the pilot tests and full scale open-pit mixing for ISS performed within the footprint of the site. The goal of the ISS Program was to solidify contaminated petroleum-impacted soil within the footprint of the site as a means of remediation; this method was approved by the NYSDEC. The ISS program was implemented by Hayward Baker, a subcontractor to NYCT s Remediation Contractor, Franklin, through a bench scale study, a pilot study and a full-scale treatment (ISS) that covered delineated areas of petroleum-impact within the footprint of the site. The results of the bench scale study confirmed the effectiveness of the ISS for the established criteria for unconfined compressive strength, permeability and reduced leaching potential. I reviewed the report. 5/31/13 - Raphael Ketani. I finished reviewing the ISS report. The Site Specific Remedial Plan was approved during July 2009. The remedial method specified is in-situ solidification/stabilization (ISS). Franklin Company Contractors substantially completed the work

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

by October 4, 2010. The report was prepared in compliance with Subparagraph III.E.4.i of the Consent Order. From 1993 to 2010, numerous investigations were performed. Various product recycling methods were used with limited success. The old building was demolished, but long sections of the 9 foot high retaining walls were left in place. Subsurface structures were also present within the old footprint. DEC agreed to using solidification/stabilization if it could be demonstrated that unconfined compressive strength equal to or greater than 50 psi, permeability of equal to or less than 1 X 10-6 cm/sec and reduced leaching potential towards achieveing groundwater standards could be achieved. First, bench scale tests were done. Two design mixes were successful - one for diesel oil areas, and one for waste oil and hydraulic fluid areas. They used a 3:1 ratio dry mix of slag and Portland cement. A 6% mix with soil was used for the waste oil and hydraulic lift areas. An 8.5% mix with soil was used for the diesel oil areas. Hayward Baker Inc. performed the solidification/stabilization work. The work started on 2/3/10 and finished on 10/7/10. The work took place with maximum volume 100 cu. yd. cells and each cell had to be completed the same day. The treatments were in 6' x 20' cells aligned perpendicular to the walls. Interior cells were 10' x 25'. A minimum period of 7 days was required between treatment in a given cell and treatment of an adjacent cell. The work was done by removing the surficial structures, removing the overburden and structures on a cell by cell basis, pre-clearing the treatment zone on a cell by cell basis via excavation and structure removal, and finally the application and mixing of the ISS mix. The soil was mixed in an open pit with a mixing head. The soil was mixed with grout consisting of type I/II Portland cement, granular blast furnace slag and water. The pit was mixed from bottom to top of each cell. There were 19 subareas of mixing. The DEC required sampling of the grout to insure that the results were unifiorm and compliant. Tests were done regarding permeability and 56 day breaks for data regarding the curing. Four wet samples were obtained from each cell - 2 from the bottom and 2 from the top. The samples were formed into 3 in. by 6 in. cylinders for strength testing via ASTM D2166. Cylinders were formed 3 in. by 3 in. for permeability testing via ASTM D5084. Other cylinders were formed 2 in. by 4 in. for leachability testing via method ANS/NSI 16.1. Slump tests were performed by Franklin staff for bottom samples only. Pilot tests were done by Hayward Baker on 11 cells in diesel oil area H on 3/18/10, but it rained heavily during the tests and the cells ended up with 2 feet of water at the top. New pilot tests were performed on 3/19/10 in waste oil area A and a second test and a third test were performed in diesel oil area D on 3/19/10 and 3/22/10, respectively. The fourth pilot test was performed in hydraulic lift area P. Full scale work started with a rich mix as a contingency against excessive water. The full scale mixing started on 3/22/10. A retaining wall was found in front of the west wall. This required a change from the open pit mixing method. The new method involved the installation of 2 rows of grout columns (secant piles). Each column was 36 inches in diameter and 16 feet deep. There were 33 columns per row. Also, holes were drilled through the toe of the retaining wall and grout was injected beneath the wall and between the columns and foundation wall. Seventy six 6 inch diameter holes were drilled. The grout columns were installed from 8/11/10 to 8/17/10. Later, from 8/19/10 to 9/7/10, another 66 columns were installed - most of which were 26 inches in diameter as the larger

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

diameter cutting head had broken. The open pit mixing east of the columns was completed on 9/13/10 and grouting in the toe holes was completed on 9/28/10. Only 2 of the 1,000 grout samples did not meet the 50 psi compressive strength criteria. However, the 28 day break samples were satifactory. So no action was required. Thirteen of the 1,000 grout samples did not meet the permeability criteria. URS staff expected that they would meet the criteria as they would cure. So no action was warranted. The leachability results were given to the DEC, but not included in the report. All of the samples were deemed to have met the reduced leaching potential such that the goal of meeting the groundwater standards was achieved, if practicable. About 26,500 cu. yds. of soil was treated through ISS. An additional 100 cu. yds. was treated using low pressure grouting. Areas were backfilled with treated soil and 6,100 tons of recycled concrete aggregate to the level of the pre-remediation grades. Scope variance: due to the groundwater rise as a result of the heavy rain, clean soil layers nearer to the surface were contaminated. An agreement was reached between the DEC and the NYCT to raise the vertical limit for soil treatment. Due to staining along the southern wall of the excavation, a 21' x 23' x 12' area south of areas O and P was treated. About 7,300 tons of unimpacted structures and debris were disposed of off site. Additionally, 6,100 tons of fill were imported to bring the site up to grade. A larger than anticipated quantity of overburden soil was treated - 4,575 cu. yds. In order to address the variances, the contract was extended to 10/18/10. I found the report to be acceptable and approved it without comment. 1/28/15 - Raphael Ketani. I reviewed the January 5, 2015 Site Specific Investigation Work Plan for the Confirmatory Soil and Groundwater Investigation. The investigation is being implemented in order to verify current contamination conditions beneath the sidewalks on the north and east sides of the building and in order to gather information to develope alternative recommendations, if warranted, to address any residual contamination. Fifteen (15)borings will be installed using the direct push method. Up to 4 will be groundwater probes. These will be performed where there is no soil contamination in order to be able to sample just dissolved analytes in the groundwater. Up to 3 borings will become wells. Groundwater is 8 to 10 feet bgs. Soil and groundwater samples will be collected and will be processed via methods 8260 and 8270. The soil samples will be taken with 4 foot macrocores. The borings will end at 20 feet bgs. If contamination is found, then the borings will continue until clean material is encountered. The wells will be screened from 5 to 17 feet below grade. The wells will be sampled one week after development. Purging and sampling will use a low flow method. One composite soil sample from the waste material drums will be collected and sent off to the lab for waste characterization. I found the SSIWP to be acceptable with one comment. The waiting time between well development and sampling of one week was too short. By general environmental practice, well sampling should not take place any sooner than one month after development. Preferably, sampling should take place at least 3 months after development. I drafted a letter stating that the DEC was approving the SSIWP, but that well sampling must not take place any sooner than one month after well development. The letter was submitted to Hassan Hussein, EE III and head of Unit C, for his review and approval. 2/5/14 - Raphael Ketani. Mr. Hussein approved the letter and it was sent out today. 9/29/15 - Raphael Ketani. There have been repeated attempts by the NYCT to gain access to well MW-30R

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

in order to conduct groundwater monitoring. However, these attempts had all failed as the superintendent of the building had continuously refused to grant access to the well which is behind a locked fence. Yesterday, Ms. Cadecia Josephs, assistant to Gregory Mathelier, sent me an email with the names of two people in the NYCHA who may be able to provide access to this locked location. These people were Brian Honan (brian.honan@nycha.nyc.gov) and Keith Mitchell (keith.mitchell@nycha.nyc.gov). Today, I sent an email to Mr. Honan and Mr. Mitchell requesting their help with the situation. 11/16/15 - Raphael Ketani. As I had not received an email from Mr. Honan or Mr. Mitchell regarding providing access to well MW-30R, I sent another email to them requesting their assistance. I included Mr. Mathelier [(212) 252-3470/cell (646) 765-0336, Construction Administrator] as a c-c. Soon afterwards, Mr. Honan sent me an email asking when the NYCT would need to gain access to MW-30R. I responded that he should coordinate access with Mr. Mathelier of the MTA-NYCT. Mr. Honan is the Director of the Office of Intergovernmental Relations (212) 306-8108. Mr. Honan added Luis Ponce and Brian Clarke to the email he had sent when responding to me. Later, Mr. Ponce sent me an email stating that he will contact Mr. Mathelier in order to resolve the matter. 4/20/16 - Raphael Ketani. Ms. Cadecia Josephs, assistant to Mr. Mathelier, sent me an email containing the following work schedule: Below is our proposed initial schedule for the Mother Clara Hale Supplemental Investigation: Monday, May 2, 2016 Geophysical survey. Initiate sidewalk saw-cutting and guzzler pre-clearing activities. Tuesday, May 3, 2016 and Wednesday, May 4, 2016 Continue sidewalk saw-cutting and guzzler pre-clearing activities. Thursday, May 5, 2016 through Tuesday, May 10, 2016 Soil boring and groundwater probe installation activities. Wednesday, May 11, 2016 through Monday, May 16, 2016 Soil boring and groundwater monitoring well installation activities. Tuesday, May 17, 2016 through Tuesday, May 24, 2016 Sidewalk flag repair Tuesday, May 31, 2016 Well development and survey of sample locations. Thursday, June 30, 2016 Groundwater sampling of newly-installed monitoring wells. Please note that these dates may change based on the findings of the investigation and/or any input from the Depot AGM during our site meeting next week. AARCO is currently coordinating for NYCDOT permits, which will take some time and is driving the start date 2 weeks from now. 9/28/17 - Raphael Ketani. Today, at a general remedial progress meeting for NYCT bus depots and related properties, Mr. Mathelier gave me the NYCT September 2017 Confirmatory Soil and Groundwater Investigation/Petition for Spill Closure Report for the site that was written by staff from Dvirka & Bartilucci Engineers and Architects. I gave the report today’s date as the date of publication as none was indicated. 10/2/17 - Raphael Ketani. I began my review of the Confirmatory Soil and Groundwater Investigation/Petition for Spill Closure Report. 10/3/17 - Raphael Ketani. I finished my review of the Confirmatory Soil and Groundwater Investigation/Petition for Spill Closure Report. The Mother Clara Hale depot had 3 known types of subsurface petroleum impacts: diesel fuel, waste oil and hydraulic oil. An estimated 44,354 gallons of total liquid was released from leaking USTs, their associated piping and the oil/water separator system. A total of 7016 gallons of product was recovered, but only during the early years of the remediation process. Only wells MW-13R and MW-30R remained after the new depot building had been constructed. Petroleum impacts were identified at 3 to 16 feet below grade. The majority of the impacts were within the zone of

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

groundwater fluctuation which was at 8 to 10 feet below grade. Up to 3.6 feet of product had been measured in one well (MW-12) in the southeast corner of the site. No free product was found in the hydraulic lift areas. On site impacts were addressed through In Situ Soil Stabilization (ISS). The intent of ISS was to immobilize the residual soil contamination. Before ISS could be performed, all subsurface structures were removed (i.e. foundations) and clean soil. Contaminated soil was mixed with water, cement and ground furnace slag. ISS was initiated during February 2010. Off site impacts found at MW-10R, MW-11R and MW-12 were addressed as a separate remedial activity. URS (previous consulting company) did an off site delineation investigation during February 2010. It consisted of conducting 15 soil borings within the sidewalk and street to the north and east of the depot. Free product was found at borings B-84, B-85 and B-86. These locations were identified as the former area of the remote diesel fills. Samples from B-77, B-78, B-84 and M-86 had soil VOC exceedances above the clean up criteria. Samples from B-87 and B-90 exceeded the SVOC cleanup criteria. Though the draft Shallow Excavation and Surfactant Flushing SSRP/RD dated September 2010 was written by URS, it could not be implemented as the new depot construction was taking place. Dvirka & Bartilucci (D&B; the current consulting company) wrote an SSIWP for conducting confirmatory borings and a groundwater investigation in order to verify the current conditions in these areas. The SSIWP was approved by the NYS DEC on 2/5/15. The program was implemented by D&B from May 9th to the 26th of 2016. A total of 24 borings, 4 groundwater probes (MCSB-04, 09, 13 and 18 and later renamed MWGP-01 to MWGP-04), 4 wells and soil and groundwater sampling were conducted along the northeast sidewalk and around the southeast corner. The total depths of the borings varied from 20 to 25 feet below grade. Both the soil samples and the groundwater samples were analyzed for VOCs and SVOCs. The screens for the groundwater probes and wells were installed from 5 to 20 feet below grade. The wells were sampled on 7/13/16. The free product program took place based on the results of this investigation. The enhanced petroleum monitoring and recovery program took place from May 2016 to June 2017 and consisted mostly of VEFRing from May 2016 to May 2017. It was implemented due to the appearance of free product at MCMW-02 and MCMW-03. Forty seven soil samples and 9 groundwater samples were collected from 5/6/16 to 7/13/16 as part of the confirmatory soil and groundwater investigation. The soil under the site was determined to be tan to brown with fine to medium subangular sand with varying amounts of fine to medium gravel, silt, cobbles. A thin layer of anthropogeneic fill covered the natural soil. Groundwater was encountered at 9 to 13.75 feet below grade. Oil staining and odors were found in 22 of the 24 soil samples at depths from 6 to 22 feet below grade. The borings with the most significant contamination were at MCSB-16 to 22 and 24 at depths of 10 to 15 feet bgs. Hydrocarbon odors were present in the purge water from MCMW-01 to MCMW-04. Nine groundwater samples were taken from groundwater probe locations MCGP-01 to 04, MCMW-01, 02 and 04 and MW-13R and MW-30R. MCMW-03 consistently had product from 0.13' to 2.29' (1/11/16 sample) thick and MCMW-02 had 0.01' of product on 9/9/17. Product was recovered using manual methods during the last month of monitoring. The product in MCMW-03 was reduced to 0.01 feet thick or less since the 4/20/17 monitoring event. No product was observed in any well on 5/26/17. An additional 15 gallons of product was recovered at MCMW-02 and MCMW-03, which brought the total amount of product recovered for

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

the site to 7044 gallons. I reviewed Appendix B - Boring Logs and Appendix C - Monitoring Well Construction Logs and had no comments. Next, I reviewed Appendix D - Investigation Analytical Data Tables. Here were listed the soil and groundwater analytical results from sampling which had taken place during May 2016. Specifically, the soil sampling took place on 5/6/16, 5/9/16, 5/10/16, 5/13/16 and 5/23/16 to 5/25/16. The VOC concentrations for the soil samples from locations MCSB-01 to MCSB-25 were either entirely non-detect, mostly non-detect or had mostly very low results which did not exceed the CP-51 unrestricted residential standards. Exceptions to this were MCSB-01 (10-11.5 foot interval) with 4 exceedences to 20 ppm, MCSB-04 (10'-12') with 1 exceedence to 2.5 ppm and MCSB-09 (10'-12'), MCSB-10 (6'-8'), MCSB-11 (6.5'-8.5'), MCSB-12 (7'-9'), MCSB-16 (10'-12'), MCSB-17 (10.5'-12.5') and MCSB-18 (10.5'-12.5') each with 4 low to moderate (0.13 ppm to 76 ppm) VOC exceedences consisting of isopropylbenzene, n-butylbenzene, n-propylbenzene and sec-butylbenzene. MCSB-09 had 4 VOC exceedences which were in addition to those previously mentioned. The SVOC soil results for all of the samples were almost entirely non-detect, except for MCSB-07 (10'-12') and MCSB-15 (6'-7.5'). Groundwater was sampled from MCGP-01 to MCGP-04 on 5/13/16 and from MCMW-01 and MCMW-02 on 6/13/16. The VOC analytical results were mostly non-detect or below the TOGS 1.1.1 standards, except for the VOC results for benzene (2.8 ppb to 15 ppb), isopropylbenzene (12 ppb to 40 ppb), n-butylbenzene (7.2 ppb to 16 ppb), n-propylbenzene (8.5 ppb to 72 ppb) and sec-butylbenzene (6.5 ppb to 25 ppb). Also, MCGP-02 had 130 ppb of naphthalene and MCMW-02 had 24 ppb of naphthalene. The SVOC results were almost entirely non-detect for all of the samples mentioned above, except for 3 low exceedences in the sample from MW-13R. Samples were analyzed for soil DRO (diesel range organics) on 5/9/16 and 5/25/16. The results were 180 ppm to 20,000 ppm. [Reviewers note: the results indicate the presence of low to moderate contamination under the northeast and southeast sidewalks, but removing it would be difficult due to the utilities just under these areas]. Appendix E - Data Validation Checklist was reviewed. The Organic Analyses were determined to be mostly acceptable in performance with only a small number of unacceptable performances. The exceptions to the acceptable determination were internal standard areas below or above the QC limits for various analytes for a number of soil sample VOCs and SVOCs. Appendix F - Waste Disposal Documents. I found the documents to be fully signed and, thus, acceptable. In the Conclusions and Recommendations section, D&B found that the soil contamination had been either immobilized or stabilized. They recommended no further investigating or remediation of the soil and the groundwater. They also stated that the spill is not migrating from the site. As per the above information, staff from D&B asked that the spill case be closed. 10/4/17 - Raphael Ketani. Based upon my review of the case file and the information in the Confirmatory Soil and Groundwater Investigation/Petition for Spill Closure Report, I determined that as much free product had been collected as was feasible, that the great majority of the soil contamination was permanently contained by the solidification and stabilization process, the groundwater contamination was very low and that there was little or no risk of the residual contamination affecting the public or the environment. I wrote a Spill Closure Letter and sent it to Mr. Mathelier for closing spill #8902374, Mother Clara Hale bus depot. I closed the spill case effective 10/4/17. 12/20/17 - Raphael Ketani. Today Mr. DeVinney

MOTHER CLARA HALE (146TH ST) DEPOT -NYCT (Continued) **S104502486**

[MDeVinney@db-eng.com/(516) 364-9890 X 3054] sent me the following email: As you are aware, D&B is currently in the process of properly decommissioning the monitoring wells at Mother Clara Hale Depot following closure of the open spill number at the site. During the decommissioning process, we identified approximately 1.4 of free-phase petroleum in MCMW-03. All other monitoring wells did not contain any measureable free-phase petroleum. As a result, we halted decommissioning activities at MCMW-03 and would like to setup a conference call with NYSDEC to discuss this issue. Please let us know your availability for a call today and what time would be good for you, and I will distribute call-in information. I responded by email and asked what the reason could be for the sudden appearance of so much oil in the well. I suggested illegal dumping of waste oil or a spill from a neighboring building. Next, I suggested a conference call anytime up to 4 PM today and up to 2:30 PM tomorrow. I noted that I would be out all day Friday. Later, a conference call was held at 2 PM. In attendance were Gregory Mathelier, Construction Administrator at the NYCT, Cadecia Josephs, Geologist at the NYCT and assistant to Mr. Mathelier, Matt DeVinney and Stephen Tauss from Dvirka & Bartilucci, Vadim Brevdo and myself. Mr. DeVinney led the discussion. He proposed fingerprinting the oil. Mr. Mathelier asked whether the oil looked like the same product that had been seen earlier in the year. Mr. DeVinney stated that they had opened up well MCMW-03 during the summer and had seen the same product. However, he wasn't sure whether this was hydraulic oil from the pocket on the other side of the depot. Mr. DeVinney added that large concrete structures were installed below the depot and that the oil may have traveled across the top of them. The oil sample was already sent to the lab for a 48 hour turnaround analysis. Mr. DeVinney also said that for a long time, the well didn't have product as the recharge was very slow. Mr. Mathelier stated that he wondered whether the spill would need to be opened up again. I responded that Dvirka & Bartilucci should go back to the well in several days and see whether the oil has returned. Mr. DeVinney stated that they could monitor the well every 2 weeks for a couple of months, see whether the oil has returned and collect it by hand pump if it appears. Both Mr. Brevdo and myself stated that this plan of action was acceptable to the Department. With that, the conversation ended."

Remarks: "FOUR 5K TANKS LEAKING INTO VAULT. GROUNDWATER DISCOVERED IN VAULT."

His email is danielyu@nyct.com (send TTL to Francine and cc Daniel). 6/17/2016: Rashad Emailed TTF letter to Francine and uploaded it to D2. 721 Lenox Ave has alternate addresses of 721-735 Esplande Gardens Plaza, 101-165 West 46th Street, and 100-162 West 47th Street. Numerous previous spills exist for depot. 6/27/2016: Rashad Received email from Francine with closure letter. As per the report A petroleum release did not occur from the primary piping of the underground storage tank UST. The cause of the failure was a faulty diaphragm valve. The UST was temporarily taken out of service on June 16, 2016. The line leak detector and diaphragm were replaced on June 20, 2016 and retested on the same date. The test passed and the system was put back into service. Report uploaded to D2. Spill closed as no release occurred and repairs made. "

Spiller Company: MOTHER CLARA HILL BUS
Spiller Address: 721 LENOX AVE
Spiller Company: 001
Contact Name: JAIKISAN
DEC Memo: "02/10/06. Feroze. Talked with Mr. Jakisan Achaibar 646-252-5772. All fuel is in secondary cointainment. They will submit DEC all documents regarding cleaning the site. 02/10/06-Hiralkumar Patel. Left message for Jaikisan at 3:20 PM. Spoke with Jaikisan. as per him, whatever spill happened its contained in secondary container. both hydrolic lifts are lock out/tag out. on monday, private contractor will come and suck the mixture of water and oil. Jaikisan will call me once they clean site on monday 13th Feb. 02/14/06-Hiralkumar Patel. Left message for Jaikisan. 02/16/06-Hiralkumar Patel. Left message for Jaikisan. Spoke with Jay at System Safety. as they suck out oil and water mixture from pits, they did water level test. among the four pits (pit# 4, 5, 8 & 9) they found three pits (pit# 5, 8 & 9) were leaking. and pit # 8 & 9 had accumulated oil (inch or so). Jay told me that they had spill previously and had plume underground and the site is under remediation. now because two pits accumulate some oil, CPM Remediation group is handling site and investigating. URS consultants is the company who is doing remediation work on site. Jay call back with more information and results of remediation group's investigation. as per him, DEC Mark Tibbe is handling all the site under remediation for NYC transit. Discussed with Mark and Koon in remediation. Mark is working with two different plumes on the same site. as Mark talked with guy at site, the lifts are away from the site where the plume was previously. so it is probably not related to previous plumes.(Refer Spill# 8902374) Spoke with Jay. they have taken some samples for fingerprint and as they get results, Jay will call back. 02/23/06-Hiralkumar Patel. Left message for Jaikisan. 02/24/06-Hiralkumar Patel. Left message for Jaikisan. Spoke with Jay. they haven't got results yet. once he will get result, he will call back. and depends on results this project will go to remediation department in transit. 03/03/06-Hiralkumar Patel. Received call from Jay from Transit. he got sample results and all three samples came back with confirmation that it is lubricating oil. now remediation department at Transit is handling this case. he will update me on this case as he gets information. Received copy of lab results. if we need any information, call Jay at system Safety. 04/04/06-Hiralkumar Patel. Spoke with Jay and he still don't know whether this site will be remediated under remediation section or not. he will call back. Received fax from Jay. abstract of letter: - Source of spill/leak identified: over a period of time, product (hydraulic fluid) and sludge accumulated in all four pits (# 4, 5, 8, 9) due to broken line, and poor seal in piston - Source of Spill/leak was stopped: brokken hydraulic fluid line, poor seal were replaced and lift load test was performed as part of MP2 preventive maintenance. - Spill cleaned: AB Oil removed 1029 gals of oily water and 1 cy of sludge and pressure washed all 4 pits. refer to AB Oil Work orders (3 18739, 18738) and manifests (# 18738, 18739) - Samples taken: samples were collected from two of the lift pits and hydraulic fluid reservoir, and analyzed by URS subcontractor laboratory. the finger print analysis identified the product as hydraulic fluid - Disposal of contaminated waste: AB Oil transported and disposed the oily water, and the sludge as non-hazardous industrial waste. - Investigation required/Refer to CPM: lost water in pit # 5 and gained water in pits # 8 & 9 during standing water test. CPM needs to investigate for any

NYC-TA MOTHER CLARA HALE BUS DEPOT (Continued) **S103559730**

potential product plume in the bus lift area. 06/06/06-Hiralkumar Patel. Left message for Jay. Received call from Jay. he hasn't heard from CPM section and doesn't know whether this will be investigated under existing remediation or will be addressed separately. 07/10/06-Hiralkumar Patel. spoke with Jay. they are still working to determine who will handle this case. 08/31/06-Hiralkumar Patel. left message for Jay. 12/01/06-Hiralkumar Patel. left message for Jay. 12/11/06-Hiralkumar Patel. received message from Racheal from NYC transit. Jay is no longer handling spills. as per Racheal this spill has been transferred to their remedial investigation unit in NYC Transit. Racheal will be call back with more information. **Once MTA Remediation department takes over this case, ask Randy who will handle this case: me or Remediation section of DEC.** 08/16/07: The investigation and remediation (if warranted) will be performed during a large remedial and construction project at this depot. The depot is slated to be demolished and rebuilt in 2008. An SSRP/RD is being prepared to address all of the known contamination and to investigate any areas where contamination is suspected, namely the lifts and associated pits. Refer to 98-13017. 06-17-08: Closed and consolidated under 8902374."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE Sangesland DDO - spill cleaned 5 gallon of motor oil spilled to depot apron. Some sort of excavation was occuring at the time of the

NYC-TA MOTHER CLARA HALE BUS DEPOT (Continued) **S103559730**

spill and some of the oil impacted bare soil. The soil was removed until visually clean, an endpoint sample was taken and the hole was closed. The endpoint showed residual soil contamination above TAGM. Unfortunately NYCT can not ascertain where the excavation was at the time of the spill so no further excavation can be performed. Since the spill was motor oil from a bus, it could not be more than 10 gallons. This facility is already being remediated for soil and groundwater contamination under spill #s 8904241 & 9813017. "

Remarks: "spill from oil pan on a bus spilled on to ground they will make recovery "

NY 11368 12/24/08 - Carlson: Spoke to Becky Kinal, requested documents were sent to Patricia Clark at Parks. Left voice message with Patricia Clark to followup on status of requested documents. 1/7/09 - Obligado - This case was transferred from Carlson to Obligado as per Tibbe. 1/8/09 - Obligado - Spoke to Patricia Clark. No iminent plans to start construction. They are planning to first further investigate spill and then submit remedial strategy. 1/12/09 - Obligado - Sent Stipulation Agreement to Patricia Clark. Require signature within 30 days. RIWP required within 15 days of execution of Agreement. 1/23/09 - Obligado - STIP executed by Department. 1/27/09 - Obligado - Met Kevin McCarty of HDR on-site to recon site and discuss workplan. UPon arrival, contractors were performing GPR survey to locate potential utilities and former UST and piping locations. 2/17/09 - Obligado - RIWP received by Deparmtent 2/25/09 - Obligado - Completed review of RIWP and called Kevin McCarty of HDR. Provided some minor DEC required changes to workplan. He will resubmit the plan with the changes. 3/16/09 - Obligado - Completed review of modified RIWP. Sent approval letter to Patricia Clark at Parks and Rec with ec to Emil Martow (EDC). 6/2/09 - Obligado - Meeting between DEC (Obligado, Tibbe, Mattei, Brevdo, Harrington, Morenzi)HDR (Stowe, McCarty), NYCDPR (McCue), and NYCDPR Capital (Rowland). HDR presented the initial findings of the remedial investigations and proposed a conceptual RAWP for Air Sparge SVE for lot 6 and enhanced Bioremediation for Lot 5. They will submit a formal RI/RAWP. DEC asked for the RAWP to include a remedial alternatives analysis. DEC requests a pilot test to confirm AS/SVE is viable. 7/13/09 - Obligado - Email from McCarty. They will submit Draft RAWP via pdf for comments. 8/3/09 - Obligado - Conference call with HDR Kevin Mccarty and DEC Obligado and Tibbe to discuss RAWP. DEC provided comments/revisions. 9/9/09 - Obligado RI/RAWP submitted. 9/25/09 - Obligado - Called McCarty to discuss a fiew comments on the RAWP 10/06/09 - Obligado - McCarty submists Addendum letter with some modifications. DEC Sends RI/RAWP approval letter. 11/6/09 - Obligado - I spoke with Kevin McCARty. When they were installing wells at Lot 5 they encountered a void at 11 ft. Possibly a tank They installed a shallow well and found product in it. They installed deeper well next to in down to the water and found product as well. They will install 6 more wells around the wells with the product, 5 feet away. they will start recovering product weekly. 11/16/10 - Obligado - Email from Kevin - they identified the product to be fuel oil. 1/5/10- Obligado - I met Kevin McCarty at the site with Frank McCue from Parks and Helen from DER. I inspected the area where the wells were. I asked Kevin to do test pits in that area to see what is down there, to confirm there are no tanks. They will schedule the work. 2/5/10 - Obligado - Email from Kevin, the test pit is scheduled for 2/8. 2/10/10 - Obligado - I received an email from Kevin. They did the test pits and there were indeed tanks. They found at least 3. I emailed Kevin back and requested a tank removal work plan to take the tanks out. 3/10/10 - Obligado - Kevin submits a tank removal work plan memo, describing the work that will be done. 3/11/10 - Obligado - Mark and I provided some comments on the work plan. 3/12/10 - Obligado - The work plan memo was resubmitted and addressed all my comments. They will begin on Monday. 4/20/10 - Obligado - HDR submits UST Removal Report. 5/12/10 - Obligado - DEC approves of UST Removal Report. 8/13/10 - Obligado - According to HDR the system installation is substantially complete. He request performing a 30 day start up test. 8/17/10 - Obligado - I approved the startup test. 9/6/10 -

YANKEE STADIUM PARKING LOT (Continued) **S106970704**

Obligado - I spoke with Kevin McCarty over the phone. Apparently, during the start-up test for the SVE/AS the carbon drum overheated. Smoke started to eminate from the stack. The fire department respondeded. Kevin is trying to determine what caused the incident. He suspects excess of methane. They have sampled the effluent and the carbon in the drum to try to determine what the casue is and if there was some sort of chemical reaction that caused the heat generation. They will investigate and report back what the cause and and how to move forward. 10/20/10 - Obligado - I received an email from Kevin. ConEd confirmed that it found a substantial gas leak in a old gasline adjacent to the site. They have fixed the leak. They want to start the biotreatments on the Lot 5. 10/25/10 - I commented that I didn't have a problem with starting the biotreatments. I only wanted him to confirm that they will perform the biotreatments during park off-hours. I also commented that monthly gw sampling seemed like overkill and that I didn't expect to see significant changes in gw quality month to month. 12/2/10 - This spill has been reassigned to Brevdo 12/10/11 - This spill is reassigned back to Obligado 2/15/11 - Obligado - HDR submits a reviewd OMM plan. As requested the revised plan has a Methane Migitation plan to deal with potential elevated methane levels: Three additional thermal sensors were installed in the extraction enclosure. One LEL monitor has been installed on system exhaust to monitor adjacent to the temperature sensor to monitor methane levels. All monitors and sensors can be accessed remotely. The system monitor continues to be connected remotely to HDR for real-time readings. The temperature sensors mounted within the GAC beds have been set to automatically shut down the all system power if the temperature within reaches 150 degrees F. The LEL onitor has been set to automatically shut down all system power if readings are greater than 1% of the LEL (500 parts per million) above background (to be established during startup. LEL shutdown levels will be monitored and adjusted to the lowest possible level while maintaining system operation. Con Edison will be notified at least 2 weeks prior to starting the system. At that time they will be able to perform additional testing and monitoring in the area for evidence of additional gas leaks. 2/18/11 - Obligado - I Called Kevin MacCarty to discuss the plan. I told him the plan looked acceptable. The only comment I had was that I didn't think the AS system should be started first. I think they should run it on SVE only first, with outside air dilution in order to better monitor and control methane without the additional complexities of adding air sparge. Once the system stabilizes and is running properly without incident then they should start the air sparge. Kevin concurred and he emailed a confirmation with the recommended changes. 3/8/11 - Obligado - In response to my request, Angela STowe of HDR provided an updated Health and safety plan. 3/24/11 - Obligado - I spoke with Kevin McCarty. ConEd has located and repaired more than one gas leak location. Coned did a gas survey and the results are good for start-up. They will do another survey tomorrow and HDR plans to start the system if the survey shows no methane. 3/25/11 - Obligado - I visited the site for the 2nd attempt to restart the system. System was operating upon arrival. HDR is onsite and running the system on SVE only, with 40% fresh air dilution to make sure methane levels are low. No odors in the vicinity of the system were noticeable. System has automated shut off for LEL and temperature. According to HDR, these were tested and are functioning properly. Also, according to HDR, the system can be monitored remotely and shut off remotely if necessary. Angela Stowe

YANKEE STADIUM PARKING LOT (Continued) **S106970704**

of HDR shaid she would be dialing in to the system over the weekend to ensure it is running properly. As of 4:15 pm, when I left the site the system was operating properly. 3/28/11 - Obligado - I emailed Angela Stowe and she confirmed that the system operated properly all weekend. She will provide a more detailed summary shortly. 4/20/11 - System shut down due to methane vapors 5/2/11 - Con edison reapirs leaks in the 157th street gas main. 9/29/11 - System restarted. 12/6/11 - According to HDR the system is down again. Con edison disconnected the power to the station. Need to drop a new service line for the station. 9/27/12- Obligado - Email from HDR - We still do not have power to the Lot 6 (skate park) AVE/AS system. The Con Ed lockout in the summer seemed to back things up with their schedules. I spoke with Paul DeBoccia of DeBoccia Electric this morning to get an update. Two weeks ago the electrician met with Con Ed at the site and Con Ed inspected the electrical conduit that runs from the manhole in the street to the electrical pull box in the parking lot where the electrical service is to be installed. It was determined the electrical conduit is in good shape and Con Ed will be able to run the wiring to the pull box (the wiring from the manhole to the pull box was removed when the original service was disconnected). Con Ed indicated they would provide an estimate to run the wiring to DeBoccia. DeBoccia will contact Con Ed tomorrow to determine the status of the estimate and schedule to make this hookup so DeBoccia can then make the connection to the SVE/AS system. We will let you know as soon as I get an update from DeBoccia. 8/28/13 - Obligado - I emailed HDR again to inquire about the system electrical issues. 12/19/13 - Obligado - I emailed Kay Zias to inquire about the system status. She replied DPR and HDR recently signed a contract for continuing the monitoring. Con Ed was on site with HDR this afternoon and a reconnection of the power is anticipated for next week. Monitoring should resume immediately thereafter. 12/31/13 - Obligado - I spoke with Sean Quarry, who is the new project manager for HDR. According to Sean, the electricity has been restored. The HDR contract still has not been finalized. Once they finalize the contract they will probably conduct a baseline sampling event and both sites. They will probably need to do some maintanence on the AS/SVE system due to the extended downtime. He will keep me advised. Both parks, quarterly sampling. 3/19/14 - Obligado - I emailed Sean Quarry to get an update on the site. 6/26/14 - Obligado - I met Mike Pantliano and Kay Zias at the site to discuss the restart of the remedial activities at the site. 7/14/14 - Obligado - According to Michael, the AS/SVE system has been restarted. 9/30/14 - Obligado - Reviewed an Update Report. The report documents baseline groundwater and vapor quality conditions prior to re-activation of the remedial system. The system on the skate park was started on July 14, and then restarted on July 22, aftersome troubleshooting. Groundwater samples were collected on July 8th. 23 gorundwater samples were collected. No free phase product was detected in any site wells. On the skate park, the maximum impacts were at MW8 with 6857 ug/L total VOCs. (Of note, in 2011, concentrations in this well were as high as 25,000 u/gl total VOCs) On the plyground the mazimum impacts were at B16 with 1814 ug/L total VOCs. this is a significant reduction since the well had over 6223 ug/L total VOCs in 2010. A bioremedial treatment occurred on August 12, 2014. The report recommends continued bioremedial treatment events on the playground and continued system O&M on the skate park. 7/6/15 - Obligado - Review quarterly report. System air effluent in compliance with standrads. With the excpetion

YANKEE STADIUM PARKING LOT (Continued) **S106970704**

of MW8, diminsithing concentrations of VOCs are shown over the short a long term. Concentrations of individual analytes above standards are per location are decreasing. According to the report, AS/SVE is operating normally during this reporting period. According to the trends graph, total VOCs in MW8 have decreased from 20,000 ppb in 2011 to 3500 ppb. 3/28/17 - Obligado - I reviewed the 9th Quarterly Progress Report-Closure request. The report recommends shutting down the system and discontinuing bioremedial treatments due to asymptotic groundwater concentration trends. I concurred with the recommendation. I did not approve of spill closure however, because as per DER-10, they need to do post remedial rebound monitoring to ensure contaminant levels do not rebound following cessation of active remediation. I sent a letter requiring 2 rounds of post remedial groundwater quality monitoring. 8/11/17 - Obligado - I have reviewed a Spill Closure Letter dated August 11, 2017. The letter documents the 2 remediation shutdown sampling events on May 30 and July 26, 2017. According to the report, the total VOC concentrations at the Site did not rebound following remedial system shutdown and have remained at asymptotic levels. Concentrations at MW-08, the most impacted well, continue to decrease. During the final sampling round, the maximum concentration of total VOCs at the site was 1,537 ug/L in MW8. Based on the documentation provided, the remedial actions at the site have significantly reduced contaminant levels. This spill has been remediated to the extent feasible and the site no longer poses a threat to human health or the environment. Spill closure based on: 1) All sources of contamination removed (5 USTs removed in 2010) 2) AS/SVE system operated until asymptotic recovery achieved 3) Free product removed to the extent feasible 4) Vapor barrier and cap installed on both parks 5) Post remediation monitoring demonstrate plume is continuing to attenuate naturally following system shut down. 6) Groundwater contamination not encountered north or west of the site indicating the plume is not migrating off site. 7) Spill no longer appears to pose a threat to human health or the environment. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 9/2/2004 Super- Thurman Burch 212-795-3258 Owner: Eugene Zacerous 410-459-7206 P.O. Box 518 New York, NY 10031 ********** ******No PBS Record on file******* ********** 9/3/2004 Sangesland spoke to Mr. Burch. He said the subject tank has been taken out of service and a temp tank has been set up in the courtyard. The tank is being cleaned out and will be repaired/retested. 9/23/2004 Fire Dept called in a new spill number 0406940 from the site. Tank is being removed and FD wants someone from DEC on site. 9/23/04 - Sawyer - Responded to the site to find the FDNY and contract workers for Atlas outside the building. The FDNY chief onsite showed me to a tank grave in the basement. The tank grave was concrete but was covered with #2 Fuel Oil. The work was immediately stopped and the building manger was ordered to get an environmental clean up crew to the asap. PTC was called at 12:15 they arrived about 13:45. Big Anthony at PTC will send clean end-point samples, a diagram and disposal information. 10/18/04 - Sawyer - Received a closure report from Petroleum Tank

596 EDGECOMBE AVE (Continued) **S106702669**

Remarks:	Cleaners that includes clean end-point samples analysis, a diagram and disposal information. No further action is required. Closed. " "tank test failed. strong feeling that the owner is going to try and use this tank.tank is no good "

Site Code:	467866
Acres:	0.46
HW Code:	C203066
SWIS:	301
Town:	New York City
Record Added Date:	08/16/2012
Record Updated Date:	12/28/2016
Update By:	BXANDERS
Site Description:	Location: The 810 River site is a 0.46 acre property located in an urban area of Bronx County at the southeast corner of River Avenue and East 158th Street near Yankee Stadium. Site Features: The entire site has been redeveloped with a seventeen-story apartment building. The site is bordered to the east by an apartment building; by a park to the south; by River Avenue and the elevated No. 4 subway to the west; Heritage Field / Macombs Park is across River Avenue; and by a parking garage to the north across East 158th Street. Current Zoning and Land Use: The property is within an Inclusionary Housing Designated Area and is zoned C6-3D for commercial/mixed use that includes residential. Past Use of the Site: Business operations ceased at the site in 2011. The former building last housed a bowling alley since circa 1960, a sports bar and grill, and a screen printing business. From 1927 through 1956, an auto repair garage was located in the building. Site Geology and Hydrogeology: According to the USGS topographic map for the area (Harlem Quadrangle), the elevation of the property is approximately 25 feet above mean sea level. The area topography gradually slopes to the west. The site building is built with a mat-slab foundation to about 16 feet below grade. The slab lays on a coarse sand and gravel layer to a depth of approximately 20 to 30 feet at which point bedrock is encountered. Bedrock geology at the site and immediate vicinity consists of Inwood Marble of Lower Ordovician to Lower Cambrian age with steep westerly dip of its upper surface. Groundwater occurs beneath the site at approximately 18-20 feet below grade. Based on measurements made at the site, groundwater flows to the west-northwest toward the Harlem River.
Env Problem:	Nature and Extent of Contamination: Soil The remedial action completed in 2016 achieved unrestricted use soil cleanup objectives. Groundwater Prior to completion of the remediation groundwater samples collected during the remedial investigation contained VOC detections exceeding New York State 6NYCRR Part 703.5 for Class GA Groundwater Quality Standards (GQS) in four out of the five

810 RIVER (Continued) **S110092249**

monitoring wells sampled. These VOCs included cis-1,2-DCE, TCE and PCE at the respective maximum concentrations of 265 parts per billion (ppb), 135 ppb and 292 ppb. In an upgradient sampling point along Gerard Avenue, PCE, TCE and cis-1,2-DCE were observed at concentrations similar to those found on-site; thus strongly indicating an upgradient source groundwater contaminants. SVOCs and PCB/pesticides were not detected in any of the groundwater samples collected. The remedy removed all soil contamination above unrestricted use soil cleanup objectives and protection of groundwater soil cleanup objectives. Therefore, after remediation no sources of groundwater contamination remain at the site. Soil Vapor The chlorinated VOCs; PCE (750 g/m3) and TCE (29 g/m3) were detected at elevated levels in all of the soil vapor samples prior to site remediation. The soil vapor impacts appeared to have been associated with the contamination found in groundwater and are therefore due to an upgradient source. Based on the data, it is not anticipated that site-related contamination had migrated off-site in any environmental media.

Health Problem: Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that is not affected by this contamination. Remedial actions completed at the site have eliminated all potential exposures to site-related soil contamination.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD 2/17/2004 Sangesland spoke to both Mary Middleton and her mother, both residents of Apt A directly over the fuel oil tank and fill port. This is a long term problem, she also called in a spill on the same site in 1997. New property manager as of last year is: Vorillas Properties 3608 30th Ave. Long Island City, NY 11103 Fuel Oil Company: Empire State Fuel (Anthony)718-627-5100 Anthony said he would talk to the management company and go back to the building and inspect the fill line and the fuel lines in the basement. He will get back in touch with the DEC with the results. 2/19/2004 Sangesland spoke with Mary Middleton problem is worse today. 2/20/2004 Sangesland spoke with Anthony at Empire State Fuel. His serviceman made an inspection of the site and found the gasket on the top of the tank manway was broken allowing fuel and vapor to come out. The tank had liquid oil running down the side of the tank. Empire cleaned off the tank and put in a proposal to fix the gasket. Empire will not

APARTMENT BUILDING (Continued) **S106382862**

deliver oil to the building until repairs are made. 5/20/04.
J.Krimgold spoke to Anthony (Empire State Fuel). He informed that PTC cleaned up the spill in the basement and replaced the gasket on the manhole of AST. NFA."

Spiller Address:	531 WEST 152ND STREET
Spiller Company:	001
Contact Name:	SUSAN WOLDENBURG
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 9/16/03, ROSSAN; DDO- Called Susan Woldenberg, who confirmed that oil is coming into her cellar from the adjacent building. The adjacent building is owned by the City HPD. The address is: 531 West 152 Street New York, NY The Building Manager is Brenda Washington # 212-694-2507 Chris, who was acting for Tim, decided to visit the site. Ed. 9/19/03 1558 Hrs - Sawyer went by the residence no one was home. Called Mrs. Woldenberg and left a message on her answering machine. She has called me and left a message and I will make an appointment to go see her basement. JUNE, 2005 As part of Spill Reduction Backlog Initiative, Spill #0306374 was assigned to Jason Pelton. JULY 22, 2005 Jason Pelton called current property owner Susan Woldenberg. Susan was the person who reported the spill. Susan indicated that when it rains, an oil or a gas-like substance comes through the basement walls. Jason asked Susan to take a few digital images and email them to the Division. Jason emailed Susan and she responded, but never sent digital images. AUGUST 10, 2005 Jason spoke with Brenda Washington at the NYC HPD Office of Property Management. Brenda indicated that she is not the project manager for the

APARTMENT BUILDING (Continued) **S106018159**

property. Instead, Dan Taveras is the property manager. Jason left a message with Dan Taveras and is currently waiting for return information. SEPTEMBER 20-21, 2005 Jason left a voicemail message with Dan Taveras. Dan Taveras returned a phone call and left a voicemail message with Jason Pelton. Jason returned phone call and left a voicemail message with Dan Taveras. OCTOBER 12, 2005 Jason left additional message with Dan Taveras and is currently waiting for return information. DECEMBER 21, 2005 Spoke with Dan Taveras. In response to a violation, they responded by having the tank inspected by their boilermakers. The inspection showed that nothing was wrong with their tank. Dan suggested that I contact James Edgeworth with his office at (212) 694-3977 . James keeps the administrative records on properties and any information on this tank should be in those files. Dan mentioned that the City sold property to George Barbee, Limited Partnership approximately 6 months ago. George Barbee's contact information is: 507 West 145 Street (212) 234-1660 Dan also mentioned that I can contact Carl Worrell at (212)863-7426. Carl is with the Housing Preservation and Development Agency. They sell the property under a contract and monitor the rehabilitation of the property. DECEMBER 21, 2005 Left message with James Edgeworth. Spoke with his secretary. She said property was sold, but they may still have some records on it. She will have James call me back. DECEMBER 30, 2005 I called and spoke with James Edgeworth. He indicated that he tried to get back in contact with me, but must have been given the wrong phone number. James confirmed that the boiler had a small oil leak. The NYC HPD issued Work Order Number K403437 to make the necessary repairs to the heating oil tank. James indicated that the repairs were completed in-house, using Housing Preservation Development staff. The tank repairs were completed on 9/16/03. James also mentioned that the property was sold 6/15/2005. James indicated that he will locate the tank repair documentation and forward that to me. DECEMBER 30, 2005 Left a voicemail message with Susan Woldenberg. She was the person who reported the spill in 2003. Based on documented repair work of the heating oil tank, no actual documented spillage of oil, overall age of the reported spill, and lack of a reponse from the spill reporter, Petroleum Spill 0306374 was closed by Jason Pelton on December 30, 2005. Jason will continue to communicate with James Edgeworth and will obtain the tank repair documentation."

Remarks: "caller states that for months oil has been coming through the walls of the building. She was originally told that the spill would stop naturally and it has continued causing a strong odor. caller states that she has been pumping the materials out of her basement"

DEC Memo:	"06/12/06-Vought-Duty desk officer. Spill assigned to DEC Piper (daytime runner). Vought called Renee Lewis and tank is a partially buried (as per PBS#02267481 it is Aboveground-contact with soil) 4000-gallon #6 fuel oil AST. Tank has two patches on top of tank (possibly from former servicing events), one patch being epoxy and the second being welded). Stains present outside of patches and on sides of tank. No spill to floor and small spill out of vent on concrete. No sewers or drains affected by spill. Eastmond will replace patches with manway so tank can be entered in future, apply deodorizer and wait until approval received from management company as far as tank repair, power washing and tightness testing are

APARTMENT BUILDING (Continued) **S108057366**

concerned. Odor in building. Vought sent letter requiring : 1)tightness testing of AST due to spill out of patches 2)cleaning of tanks (including powerwashing) 3)renewal of PBS registration (registration expired on 3/22/06). Vought called Charlie for contact information and he stated that letter should be sent to address on PBS registration and that DEC should contact phone number on PBS. PBS info lists owner as: MP Management 528-538 West 159th Street LLC 1274 49th Street Brooklyn, NY 11219 Attn: Susan Ph: 718-972-7660. Fax: 718-841-8434 Vought spoke to Susan at MP Management regarding above requirements and she agreed and Vought informed her of letter. 4/7/08- DEC Piper - I recieved documentation that spill was cleaned up. It was due to a patch on the tank. It was cleaned, repaired and tested tight. See e-docs if warranted. Closed. "

Remarks: "cleanup is not progress"

DEC Memo:	"Old number at the site was Spill #9208762 Remediation did NOT want to reopen the old spill so a new spill number was created. 12/9/2005 Contaminated Soil Letter sent to: Chris Calhoun West Realty 611 West 148th St New York, NY 10031 12/12/05 - Raphael Ketani. I reviewed the November 2005 Site Investigation Workplan. They need to remove soil, and properly register the 2 275 gal. tanks and the 1 5,000 gal. tank. They have a PBS case#2-218235. I will send a letter regarding these issues to Ken Brooks of Galli Engineering (631) 271-9292 and to Chris Calhoun of West Realty. 12/19/05 - Raphael Ketani. I will send a letter to Chris Calhoun stating that they have to close out the 5,000 gal. tank and register the 2 275 gal. tanks. 12/20/05 - Raphael Ketani. I reviewed the 12/20 letter from Galli discussing the planned use of a soil injected oxygenate (ORC) to remediate the #2 fuel contamination. I will send a letter stating that they can try the ORC, but DEC wont approve this means of removing the contamination. If the contamination is still above TAGM 4046, then they may possibly have to remove more soil. They also have to try and remove free product and test the fill and vent lines, and check to see if the petrometer and return line are alright. 1/5/06 - Raphael Ketani. Mr. Brooks called me up to say that, at this time, he had no plans to remove soil. He said they will install wells first to check the groundwater. Then they will remove some of the contaminaed soil and take end point samples. He expects work to start 1/16/06, tentatively. Lastly, he said that the owners of the property intend to use the 5,000 gal. tank. 07/18/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. Contacted to Mr. Scott Davidale, Gallon Engineering at (631)271-9292 he said that work is still going on at the site. He will fax me the groundwater sampling report. -QA 07/28/06: Contacted to Mr. Scott Davidale he said they are still doing work at the site. Project Manager is coming on July 31st. As

COMMERCIAL BUILDING (Continued) **S103517643**

soon as everything will be done Mr. Scott said he will send report to me for closing the spill. -QA 08/18/06: Contacted to Mr. Ken Brook (Project Manager) he said that as soon as report will be ready he will send it to me. -QA 09/06/06: Called Mr. Ken Brook he said that he has not removed any soil and also he has not taken any soil sample. -QA 09/25/06: This spill will be reassigned. -QA 9/25/06: This spill case was transferred from Q. Abidi to J.A. Maisonave. - JAM 10/6/06: Bioremediation Work Plan was reviewed by the Department on 9/18/06. Kevin Carpenter in Albany provided me with some of his comments. I will write a letter to the Respondent requesting addition information. - JAM 10/19/06: Sent a letter to Mr. Nick DeAcetis MDG Design & Construction, Inc. 1328 New York Avenue Huntington Station, NY 11746 Letter requests additional information on proposed Bioremediation Work Plan. Letter states that the proposed Work Plan lacks adequate supporting data and the site investigation is incomplete. The letter will be in edocs. - JAM 11/1/06 Spoke to Ken Brooks at Galli Engineers (631-271-9292). Galli will perform bench tests to determine if non-native bacteria is needed, determine groundwater flow direction, and verify if the existing wells are properly installed and straddle the water table. - JAM 02/09/07 Reviewed Bioremediation Work Plan from Galli, dated January 4, 2007 and received January 23, 2007. I sent an email response only approving Galli's proposals to: 1) perform a Bioremediation Pilot Test for the above referenced site to determine proper dosage amounts of the Biosolve NT and ORC products; 2) prepare the site by removing surface debris for the basement floor; 3) use a rototiller to break up surface soils and to level out the surface area; 4) evacuate the wells of floating product; 5) survey, gauge and sample the monitoring wells to determine groundwater flow direction and current groundwater quality. A comprehensive report should be submitted after the completion of the above tasks. The report should present a detailed remedial action plan, and should include groundwater gauging and sampling data (depth to water/ depth to product), a site location map showing surrounding properties, a site plan showing groundwater flow direction based on groundwater gauging data, and a site plan showing the contamination plume. The report should also include all chemical dosages. - JAM 03/14/07 Received a call from Ken Brooks from Galli. He said they went to the site to survey and sample the wells but found that all the wells in the basement were destroyed due to construction activities. There are three remaining wells outside the basement that are still intact but he wanted to hold off on surveying them until the wells in the basement are replaced. He said they will gather samples today for the bench/pilot tests and he should have results in about 2 weeks. The wells will be replaced at that time as well. - JAM 4/16/07 Spoke to Ken Brooks. The bioremediation bench test was completed by Regenesis and the results were good using a combination of two products. Ken said he will put together a package with the results and include a description about the injection process. - JAM 5/9/07 Reviewed the letter submitted by Galli dated April 16, 2007 which includes results from the pilot study performed by Micro-Bac (not Regenesis as stated above). The letter also includes remedial tasks for injecting a bacterica-nutrient mixture to address contamination. Tasks inlcude: - Attempt to locate remaining wells - Evacuate any remaining wells - Mix bacteria and nutrients as per the manufacturer's directions - inject the resulting solution using steel tubing and a positive dispplacement pump at 0.7gpm. Repeat throughout the affected area every 1 to 1.5 feet, and as deep

COMMERCIAL BUILDING (Continued) **S103517643**

as possible. I sent a letter today approving these tasks. Subsequent to the injections, monitoring wells must be installed in the basement to evaluate the remedial strategy effectiveness. During installation, soil should be screened with a PID and sampled at the deepest dry soil sample and at the interval with the highest PID reading. Samples should be analyzed for VOCs and SVOCs. After the wells installed, groundwater samples should be collected and continue on a quarterly schedule. The letter I sent and the letter from Galli are uploaded to edocs. - JAM 07/13/07 I visited the site today to witness the bacteria/nutrient injection for the enhanced bioremediation. Ken Brooks from Galli injected approximately 250 gallons of the mixture through a 6 foot length of stainless steel tubing. Only three wells were located, MW-02, MW-04 and MW-06. Mr. Brooks said that a second injection will occur in a few weeks. I requested that before the second injection, the remaining wells be gauged and sampled and if product is present it should be evacuated. The tank area and the tank itself have staining and show signs of petroleum contamination. I requested that they be cleaned. - JAM 7/23/07 Sent a Site Visit Follow-up Letter, based on observations from the July 13 site visit, to Mr. Nick DeAcetis at the address above. The letter states that the fuel oil tank and the surrounding area have visible petroleum impacts. The DEC requests the following: 1) The tank should undergo tightness testing; 2) The tank and surrounding area should be cleaned; 3) Contaminated soil should be excavated and end-point samples should be collected. The DEC also recommends that a concrete floor be poured around the tank; 4) Groundwater monitoring wells should be installed in the basement. A work plan with proposed well locations should be submitted for DEC approval. Also, corrections should be made to PBS registration. Tank location and product info are inaccurate. I sent PBS Application Form along with this letter, which in edocs. - JAM 4/28/08 Visited the site today to witness the second application of the bactreia/nutrient slurry injection. The concrete casing around the tank has been removed, however no soil was excavated from around the tank and alot of oil staining on the walls around the tank and on the tank remains. Pictures loaded to edocs. - JAM 8/5/08 Reviewed an Additional Site Investigation Work Plan letter dated July 28, 2008, submitted by Galli Engineering, P.C. The work plan proposes installing five (5) replacement monitoring wells in the basement of the above referenced site adjacent to the existing 5,000-gallon storage tank. Work plan uploaded to eDocs. I issued a letter today approving the work plan with the following adjustments: 1)Soil should be continuously screened using a PID meter and two soil samples should be collected, for laboratory analysis from each boring, one from the soil interval with the highest PID reading and another from the interval directly above the water table. If PID readings are non-detect then one sample from directly above the water should be collected and analyzed for the full TAGM 4046 list of petroleum related VOCs. 2)As stated in the NYSDEC letter dated July 23, 2007, The ceiling and walls of the tank area should be cleaned and contaminated soil around the tank should be excavated and end-point samples should be collected for laboratory analysis prior to backfilling. The NYSDEC recommends that a new concrete floor be poured around the tank when remediation is complete to prevent future releases of oil into the subsurface. A summary report should be submitted with recommendations. Letter uploaded to eDocs. - JAM 9/5/08 Visited the site to witness groundwater sampling. Scott Davidow from Galli sampled the five new wells. One well had free

COMMERCIAL BUILDING (Continued) **S103517643**

product, and another well was dry. Each well yield very little water so sampling for SVOCs may not be possible. A summary report including soil and groundwater samples and well installation logs will be submitted in 2 weeks. - JAM 11/19/08 Reviewed the Monitoring Well Installation and Groundwater and Soil Sampling Report submitted by Galli Engineering dated October 8, 2008. The report summarizes the installation of 5 new groundwater monitoring wells in the basement and results of soil samples collected during installation. Subsequent groundwater sampling results are also included. On August 22, 2008, five monitoring wells were intalled at the site. Groundwater was encountered at 8 feet below grade. Soil samples were collected from each boring and results showed no exceedences for VOCs, however some exceedences for SVOCs were reported and visibly stained soil and product was obersved in every boring. Groundwater monitoring samples were collected on September 10, 2008 from all wells and analyzed for VOCs except for well MW-1 because of the presence of free product. Free product was also observed in MW-8 initially but was gone after the well was purged. SVOCs were only analyzed from wells MW-2 and MW-8. The other wells did not yield enough water. Minor VOC contamination was detected in wells MW-2 MW-8 and MW-10. Minor SVOC contamination was deteced in MW-8. The report is uploaded to eDocs. Spoke with Scott Davidow from Galli and scheduled a meeting for tomrrow between DEC and Galli to discuss future remedial measures. - JAM 11/20/08 Meeting at DEC Region 2 office. Attendence: Joseph Maisonave, NYSDEC Jon Kolleeny, NYSDEC Ken Brooks, Galli Gary Blackler, Metro Environmental Gary Hughes, Metro Environmental Discussed alternative remedialy measures to address free product present in two monitoring wells and free product observed in the vadose zone of all of the other wells during installation. Galli will evaluate whether 2 inch wells could be installed in place of the 1 inch wells already installed and if the borings can go deeper. This would allow enhanced fluid recovery with a vac truck to remove the product. They will also look into cleaning the tank room with a solvent and painting the tank and the walls. A remedail proposal will be submitted by Galli for NYSDEC review and approval. - JAM 1/21/09 Reviewed the Site Remedial Action Workplan submitted by Galli dated January 16, 2009. The work plan proposes the following remedial activities: 1. Removal of part or all of the block wall forming the tank room. 2. Removal of soil from the basement floor. 3. Further cleaning of the exterior of the tank, and the tank room. 4. Removal of debris from around the tank. 5. One-time application of bacterial bioremediation nutrients. 6. Stockpiling soils and debris in a roll-off container. 7. Sample soils for disposal purposes. 8. Backfilling the excavation with clean fill. 9. Install three new 2-inch groudnwater recovery wells to a depth of 10 feet. 10. Vacuuming out floating product from the wells and dispose of waste water. There will aos be 4 new groundwater monitoring wells installed in the room adjacent to the tank (shown on Figure 1 of this workplan. Scott Davidow at Galli called me on Friday, Jaunary 16. He informed me that the wall has been removed and the basment floor is being excavated. I informed him that end-point soil samples should be collected and I should be notified prior to the collection of those samples and prior to backfilling the excavation. He will notify me when Galli goes to collect the samples. I aslo suggested that the excavation remain open until the results are returned. I also suggested that Galli contact the vendor providing the bonutrients and inquire about the effectiveness of their product based on the

COMMERCIAL BUILDING (Continued) **S103517643**

conditions at this site. The workplan is uploaded to eDocs.- JAM 1/26/09 Visited the site today to witness the excavation around the tank. Chris Calhoun from West Realty (property owner, email: westrealtygroup@hotmail.com) and Scott Davidow from Galli Engineering attended. Soil around the tank, and from the two adjacent rooms had been excavated to depths ranging from 1 to 3 feet. Soil directly under the tank could not be removed and was stained with oil. Galli collected 2 soil samples, one from directly under the tank and another from the adjacent room, approx. 7 to 10 feet from the tank. I advised Galli that the soil under the tank should be removed by any means possible. I suggested either supporting the tank so the soil could be removed or temporarily relocating the tank so the soil could be accessed. He will get back to me with Galli's proposal. - JAM 3/9/09 Received soil analytical results on March 5, 2009 via email. Two soil samples were collected from the basement floor on January 26, 2009. Some VOCs and SVOCs were detected however the concentrations were below TAGM. I sent an email today stating that the excavation could be backfilled and the tank stabilized. The Remedial Action Workplan should proceed as planned with the installation of 2-inch groundwater monitoring wells. I requested a report be submitted after the wells installed which summarizes all analytical results. - JAM 4/22/09 Received a call from Scott Davidow at Galli Engineering. He said that the tank was suspended and contaminated soil beneath it was removed. I met with Scott Davidow at the site today to witness the open excavation. Three rolloff containers have been filled with oil contaminated soil and the forth container is half full. The bottom of the excavation showed a little product floating on water which entered the excavation. I requested that the excavation extend in all directions as much as possible and end-point samples should be collected for VOC and SVOC analysis. I also requested the groundwater monitoring wells be gauged for product and sampled as well. I expect a report within a few weeks. - JAM 7/28/09 Received a Summary Report of Spill Closure Activities however, it did not include a table summarizing gauging data and product recovery. I called Ken Brooks and requested the report be revised to include that table. - JAM 9/2/09 Visited the site today. Met with Frank Gehrling from Galli and Allan Heussinger from West River Assciates, LLC (RP). Frank gauged the product in wells MW-1, RW-1, RW-2 and RW-3. Petroleum absorbent socks are installed in wells RW-1, RW-2 and RW-3. wells RW-1, RW-2 and MW-1 had the most measurable product. Well RW-3 only had some slight staining from a sheen. I suggested that vacuum enhanced fluid recovery be implemented to expedite free product recovery. Frank said he will look into it and get pricing and try to schedule it for next week. I also requested a table summarizing the product gauging and recovery data. Ken Brooks from Galli called. I explained to him that spill closure is not possible while free product continues to enter those three wells. Vacuum recovery is one way to move this spill towards closure sooner. - JAM 9/9/09 VEFR performed today. Vac-truck was on-site and recovering by 8:30am. I visited the site and met with Frank Gehrling and Allan Heussinger. A summary report will follow. - JAM 9/25/09 Received the Revised Summary Report dated September 17, 2009 (original Summary Report was dated July 28 but did not include product gauging and recovery data). The Summary Report includes all remedial work performed to date including excavation of contaminated soil, groundwater sampling results since February 2006 and soil sampling results from well installation and the excavation

COMMERCIAL BUILDING (Continued) **S103517643**

end-points. Approx. 45 tons of contaminated soil were excavated and disposed of. Minimal dissolved phase contamination has been detected in any GW samples. Soil samples also show minimal contamination. Section 5.1 shows Free Product Recovery data since February 2006. Well MW-1, which is a 1-inch well installed adjacent to the tank, has yielded the most free product (measuring approx. 0.76ft. on Sept 2, 2009. Five wells, MW-1, MW-8, Rw-1, RW-2, and RW-3, continue to show either measurable floating product or product sheens. Reviewed the Letter Report for Product Recovery dated 9/10/09. On 9/9/09, vacuum enhanced fluid recovery was performed on wells MW-1, MW-8, RW-1, RW-2, and RW-3. 200 gallons of oil/water mixture was removed from the site and an estimated 1 to 2 gallons of that was oil. MW-1 had the most measurable oil with a thickness of 0.49ft. After VEFR was performed, the thicknesses in all the wells were either trace product or a product sheen. Petroleum absorbent socks were installed in the wells. Reviewed the Letter Report for Product Recovery dated 9/17/09. On 9/16/09, wells MW-1, MW-8, RW-1, RW-2, and RW-3 were gauged for product and the product was removed with a hand bailer and petroleum absorbent socks. MW-1 had only a trace of oil and wells RW-1 and RW-3 had strong sewage odors. Well RW-2 was dry. Galli states that the sewage which appeares to be in the two wells is negatively affecting the hydrophobic properties of the petroleum absorbent socks. In the original Summary Report cover letter dated July 28, 2009, Galli says the walls and ceiling of the tank room will be grit blasted to clean the petroleum stains. This being a dry process will keep any liquid from recontaminating beneath the tank. Galli requests spill closure. I spoke with Ken Brooks from Galli on Sept. 22, 2009 and said that the spill cannot be closed at this time since there is still product in a number of wells. Monitoring should continue until the product is removed. All reports were uploaded to eDocs. - JAM 6/1/10 Spoke to Brandon Fuld from Galli Engineering today. He said that there are several wells on-site that have been used for product recovery and the product levels in those wells has decreased to a sheen. The product recovery was done with a vacuum truck and the last event was in April 2010. I asked for a summary report for all of the work that has been performed. Brandon will submit the report by the end of this week or early next week. - JAM 10/20/10 Email correspondence from Ken Brooks at Galli on October 4, 2010: Joe- When we spoke on 9/22, you mentioned a couple changes you wanted to see in the letter and report. I jotted a few of those down, but was expecting comments in writing. If you won t be sending a letter, please email me with the requested changes. I know you wanted cleaner copies of the well logs, with units; well designations; anything else? Ken Brooks, PE Senior Vice President Galli Engineering, PC 734 Walt Whitman Rd., Suite 402A Melville, NY 11747

Reply sent to K. Brooks on October 7, 2010 Ken, Please also submit a Site Figure with clear designations for the wells. Please do not submit a site figure that has hand-written items. Thanks, Joseph Maisonave Environmental Engineer 1 NYSDEC Region 2 Division of Environmental Remediation 12/02/10: This spill case transferred from J. Maisonave to J. Kolleeny. On 11/30/10, received hard copy of Rpt of Remedial Actions by Galli Engineering, P.C., dated 11/24/10. Rpt summarizes remedial actions performed at site, and provides data fof vac truck events from Oct. 2009 thru July 2010, showing generally decreasing product thicknesses. Rpt requests spill closure. On 12/2/10, I contacted Ken Brooks of Galli, requested pdf file of rpt

COMMERCIAL BUILDING (Continued) **S103517643**

for eDocs, and asked if well gauging measurements for vac truck events were taken before or after vacuuming wells. He was unsure about this, said he would send pdf file of rpt and get back to me about well gauging data. - J. Kolleeny 01/03/11: Received email from Ken Brooks of Galli Engrg: Do you have everything you need to review our closure request on spill? I sent email reply: Hi Ken, According to my notes, I spoke with you on Dec. 2, 2010 and asked that you send a pdf file of Galli's Nov. 24, 2010 Rpt of Remedial Actions for our database, and I also asked if you would find out if well gauging data in rpt represented measurements taken before or after vacuuming of wells. I have not yet received pdf file of rpt, or an answer to my question about well gauging data. Also, as I said when we spoke, it is contrary to DEC policy to close spills when there is measurable free product present in wells. Last monitoring data, from July 2010, showed 0.10 feet of product (more than an inch) in well MW-1 (1 diameter well), and 0.07 ft of product (little less than an inch) in recovery well RW-4 (4 diameter well). Tolerable levels Galli rpt cited from DEC's Spill Guidance Manual all refer to levels of dissolved-phase GW contamination; I see no reference there to tolerable levels of free product. On other hand, DEC's Guidelines for Petroleum Spill Inactivation state that free product should be removed to maximum extent feasible. Gauging data in rpt show more or less steady progress in reducing product thicknesses from Dec. 2009 thru July 2010, as result of vacuum truck events; they do not, in my opinion, represent a dead-end situation. I recognize that a lot of work has been done at this site, and I too would like to see this spill case closed. If you could do following, it would help me greatly in achieving this end: 1. Please send pdf file of rpt. 2. Please confirm whether well gauging data was collected before or after vacuuming. 3. Please gauge wells again to determine current product thicknesses; if there is significant measurable product in any well (0.08 ft or more in 1 diameter well, or 0.05 ft or more in 4 diameter well), conduct another vacuum truck event and then re-gauge well(s) after allowing water and product to fully recharge into well(s) and reach equilibrium, and send me data. - J. Kolleeny 02/16/11: On 2/11/11, received email from Ken Brooks of Galli Engrg: Do you have everything you need to review our closure request on spill? I sent email reply stating that I had sent email regarding site on 1/3/11, and attached said email. On 2/14/11, received response from Ken: That s last email I have, and one that I expect should have been responded to by now. I m assuming you did not and will look into this. On 2/16/11, received email from Ken: I ve attached pdf of final rpt as you requested [in eDocs]. In answer to your question, wells were always gauged before vaccing them out. I will contact client about setting up another round of gauging and product removal and will contact you with updates. - J. Kolleeny 04/08/11: Reviewed letter rpt presenting results of gauging of 4 wells and liquid removal at site, prepared by Galli Engineering and dated 4/5/11 (in eDocs). Data show product in wells has decreased to trace or non-measurable levels; following gauging, approx. 63 gallons of liquid were removed from wells. Based on data, I closed spill and sent spill closure letter (in eDocs) to Allan Heussinger of West Realty Group, 875 St. Nicholas Ave., #1, NY, NY 10032, cc to Ken Brooks of Galli Engineering. - J. Kolleeny "

Remarks: "PHSE TESTS WERE TAKEN AND THEY FOUND PETROLEUM CONTAMINATION UNDERNEATH THE TANK, OUTSIDE FILL PIPE, AND THE GROUND IS STAINED. GROUNDWATER WAS ALSO TESTED AND PROVED THAT THE WATER IS

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY DEC'S KOLLEENY VISITED SITE 12/19/01. SPILL OCCURRED IN BASEMENT OF 465 W. 147TH ST., OIL DELIVERY IN MORNING, OVERFILLED TANK, APPROX. 10-15 GALLONS OF OIL CAME OUT TOP OF TANK AT LOOSE GAUGE, SPILLED ON FLOOR AND WALLS, FLOWED INTO NEXT ROOM WHERE FURNACE IS LOCATED. FIRE DEPT. RESPONDED AND PUT DOWN SPEEDY DRY. KOLLEENY CONTACTED OIL COMPANY, SOUTH CAROLINA FUEL OIL (212-234-5900), GLORIA AND MARION CAME TO SITE, TOLD THEM THEY MUST COMPLETE CLEANUP BY COLLECTING/DISPOSING OF SPEEDY DRY, POWER WASH AFFECTED FLOOR AND WALLS, AND TOLD THEM THEY ARE RESPONSIBLE TO CHECK IF TANK CAN RECEIVE DELIVERY PRIOR TO FILLING TANK. KOLLEENY ALSO SPOKE TO BUILDING OWNER, ELTON BUTCH GILKES JR., TOLD HIM TO MAKE SURE OIL COMPANY DOES THOROUGH CLEANUP AND TO MAKE ANY NEEDED REPAIRS TO TANK (275-GAL AST) TO PREVENT REPEAT OCCURRENCE, SUCH AS REPAIRING OR REPLACING GAUGE, WHICH IS NOT WORKING, AND POSSIBLY VENT WHISTLE. OK to close. - J. Kolleeny 3/8/05"
Remarks:	"Caller states that there is a strong odor coming from location; previous leaks there before. Request a call back."

DEC Memo:	"12/28/2015 - Feng - Duty Desk. Talked to Eric Greppo of NYS Dept of Corrections (518-473-3582, Eric.Greppo@doccs.ny.gov). He is with the central office in Albany and today he received a spill reported by his employee. There is a sump within the correctional facility in Edgecombe Ave. They usually pump out groundwater from the sump to the sanitation discharge. Today they smell odor and could see product on the groundwater. They could smell the odor in the basement wall before it reach to the sump. The basement wall with the odor is located in the street side of the building. The basement is used for boiler room, mechanical operation and maintenance staff. The building is on gas now. He sent employees to do more investigation tomorrow at 9:00am. PBS 2-400254: (1) 1,000-gallon diesel in service (1) 4,000-gallon #2 fuel oil in service They have inspected these two ASTs and found no signs of spills. These two ASTs are for generators use and they are located in another side of the building. (1) 275-gallon closed-and-removed diesel (1) 10,000-gallon closed-in-place #2 fuel oil, this one is near the sump location. They had emptied and cleaned the tank and closed in place. He will send the report in. Spill 86-05796. Closed. No information. Briefed to

EDGECOMB CORR FACILTY (Continued) **S118460785**

Santosh Mahat, the runner, and he will do a site inspection tomorrow morning. He will call Eric and let him know. Spill is assigned to S. Mahat. 12/29/2015 - Feng - Email from Eric Greppo I will notify the facility of Mr. Santosh s arrival. We are in the process requested formal documentation on the tank closure& We are certain that the tank was formally closed-in-place in 2009 under an formal Office of General Services project at the facility (OGS Project #M2811). Mr. Mahat can observe the condition of the tank during his visit, and we will provide any followup information that is required. 12/30/15: Mahat On 12/29/15, DEC Spill Staff responded to an underground seepage of #2 heating oil into the basement of the correctional facility located at above address. There is an ongoing underground water intrusion for unknown amount of time. On 12/28/15, around 9am, facility engineers smelled/observed oil and water seepage on the basement. During the site visit, minor vapor/odor around the vicinity of the impacted area were noticed. Engineering approach has been applied in order to mitigate the vapor such as fans for faster air circulation. Absorbent boom has been applied at the source before it reach to the sump area. NYCDEP has been notified for the possible impact to the sewer system. NYCDOH and NYSDOH also has been notified because of possible vapor issue. The source of the oil is still unknown. The facility has a 4K # 2 fuel oil AST without any compromise to its integrity. The facility also has a 10k AST that was abandoned properly in place in 2009. The source of the seepage could be an offsite migration. DEC Spill Staff has conducted a site inspection on the up gradient neighboring buildings in order to find the source. Tank System test will be perform on the three possible up gradient tanks that could be the source of the seepage. Updated information will be followed by the further investigation. 9/1/16: Mahat e/c : On 8/26/16, DEC Mahat sent an email to Eric Greppo inquiring about the current status of the seepage. On 9/1/16, Mr. Greppo confirmed that the seepage has been reduced significantly/ almost to no oil. Based on the discussion with Mr. Greppo, the spill case will be closed on NYSDEC Spill Database as no further investigation is warranted on the site. Spill Closed. "

Remarks: "unknown source caused loss to sump, no tanks at facility."

SWIS:	3101
Town:	New York City
Record Added Date:	08/07/2008
Record Updated Date:	02/20/2009
Update By:	MOBARRIE
Site Description:	The site is a 0.341 acre commercial property on the south-east corner of 145th Street and 7th Avenue (a.k.a. Adam Clayton Powell Jr. Blvd.) in a commercial / residential area in the north-west area of Harlem, NYC. The property was recently reclassified as residential. The original documented structure on the property was a movie theater that operated from 1939 to 1979. From circa 1979 until recently, a supermarket operated on the property in the same structure. Except for a loading dock driveway, the structure encompasses the entire lot. There is significant petroleum-related VOC and SVOC contamination in on-site groundwater from a gasoline spill originating at the adjacent ExxonMobil station (Spill # 0751061, PBS# 2-157929). A Phase I investigation found that no history of detrimental environmental impacts and no history of industrial or commercial activity that could have resulted in environmental impacts. A Phase II investigation found no evidence of an on-site source. Of ten soil samples from five on-site locations, six PAHs were found in three samples above Part 375 restricted residential soil cleanup objectives. The contamination found on-site is due to the off-site source at the adjacent gas station. The BCP Application was denied in a letter dated 2/18/09.
Env Problem:	Information submitted with the BCP application regarding the environmental conditions at the site are currently under review and will be revised as additional information becomes available.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO Oil tank rupture on a generator truck involved in a collision with a subway track pillar. 9/30/03 TJD Spill #0306814 was reported to hotline 9/28/03 at 10:20 PM by FDNY. A tractor trailer struck a structural support for the elevated subway at intersection of River Avenue & 161st Street in the Bronx. This location is immediately adjacent to Yankee Stadium. Spill volume originally reported as 125 gallons. Actual release is estimated to be approximately 1000 gallons. The truck driver was delivering a trailer generator set for use by ESPN during the upcoming Baseball Playoffs. The cause of spill is human error as the truck was too high for this roadway. The impact of trailer against the overhead subway support crushed the trailer top edge causing the internal 1200 gallon diesel tank to be damaged releasing its contents onto the roadway. The product pooled in street impacting the roadway and sidewalk along River Ave between 161 Street & 157 Street. Several catch basins were also impacted by the petroleum release. FDNY, NYPD, OEM, DEP, MTA and DOS all responded to scene. River Ave was closed to all traffic pending cleanup. FDNY dyked roadway and recovered approximately 500 gallons into various size drums. Sanatation responded and sanded roadway. Upon arrival to site DeMeo contacted owner of generator set (Catapillar) and required owner to retain contractor for cleanup. Within a few hours PTC was retained for cleanup. Contractor arrived on site @ approximately 3AM. Recovered product was transferred from drums to vac truck and the contractor crews swept up impacted sand and drummed for disposal. As heavy staining and significant odors were still present after initial clean, the contractor was directed to pressure wash impacted areas with chemical degreaser and collect all wash water. NYPD is maintaining street closure until all residual impacts are remediated.

ELEVATED TRAIN (Continued) **S106018514**

Estimated time of completion is 2PM on 9/29. Michelle Tipple will be conducting a follow-up inspection to verify contractor completed job as directed. Additional information: NYPD issued driver (3) summonses for VTL violations. Placard attached to inside wall of trailer states Do not transport with more than 200 gallons in Tank Driver info: Richard Donelson 8840 Depot Drive Indianapolus, Indiana 46217 Truck owner: Trailer Transit Inc. 1120 E US Hwy 20 Prter, Indiana 46304 Apportioned Licence Plate # 164256 Insurance Company: Greatwest Casualty (800)228 8040 File #A539802 Adjuster: Mark Adjustment Service Robert Guida (516)510 7997 Generator Owner: CAT Power Systems Contact person: Ian Degruchi 416 667 5511 9/30/03 TJD Follow-up inspection peformed by Tipple. Spill remediation is complete. No further action required."

Remarks: "truck hit one of the el train pillars causing tank to rupure -spill is dyked at this time - nyfd on scene & hazmat enroute "

DEC Memo:	"Buried fill line appears to be leaking into soil and up through the sidewalk. Temp fill line has been installed. Contractor is getting sidewalk permits and will then dig out the old line and any contaminated soil. Preferred Environmental has been hired to do the cleanup, testing and close out report. - 12/22/11 02/03/12-Hiralkumar Patel. alternate addresses: 345-385 W 145th Street, 251-265 Edgecombe Ave, 696-708 St. Nicholas Ave PBS #: 2-201111. as per PBS record, the site has one 20,000 gal #6 oil AST in subterranean vault. tank was installed in Oct. 1956. no other spills found. 2:30 PM:- spoke with Jill at Preferred. she mentioned that they sent proposal but never heard back. 2:53 PM:- spoke with Ms. Rodriguez, property manager. she mentioned that J&R Mechanical is in process of hiring contractor for cleanup. Hillview Owners Corp. c/o Midboro Management, Inc. 148 West 37th Street, 8th Floor **main office** New York, NY 10018 Ph. (212) 877-8500 Hillview Owners Corp. **property owner** c/o Midboro Management, Inc. 345 West 145th Street **on-site management office** New York, NY 10031 Attn.: Felicia Rodriguez **property manager** PH. (212) 281-3300 email: frodriguez@midboro.com Mr. Smiley Building Engineer Ph. (646) 773-3138 2:56 PM:- spoke with Mr. Grand at J&R Mechanical. he mentioned that #6 oil was coming out from sidewalk during a delivery. its about 20 ft long sidewalk between the curb (where fill port is) and the building foundation wall. he also mentioned that the tank and all associated lines run aboveground expcet the part of fill line that runs under the sidewalk. they have installed a temporary fill line. he has sent proposal from Preferred to property manager who has forwarded it to co-op board. they are waiting for response from board. J & R Mechanical Services Inc. Lenny Grand Ph. (718) 328-9935 email: leggett2@verizon.net 3:36 PM:- sent letter to Ms. Rodriguez requiring soil delineation and endpoint samples. asked her to submit report by 03/23/12. letter emailed to Ms. Rodriguez and Mr. Grand. 03/01/12-Hiralkumar Patel. 4:13 PM:- received email from David from Riteway. he inquired if borings needed prior to excavation. 03/07/12-Hiralkumar Patel. 4:11 PM:- spoke with Joe at Riteway. they will replace the fill line and will remove any contaminated soil. as they are planning for excavation, no need for soil boring at this time. 03/20/12-Hiralkumar Patel. 2:56 PM:- received email from Bill from Preferred. Preferred has been authorized to do work and they will install soil boring on 03/26/12. 3:36 PM:- spoke with Bill at Preferred. he mentioned that due to oil seepage through basement wall and oil coming up through sidewalk, owner decided to perform soil delineation prior to any excavation. Preferred will do some borings to define area of contamination, then Riteway will perform excavation. Bill is hoping to get NYC DOT permit tomorrow and will do soil delineation next week. 06/08/12-Hiralkumar

SIDEWALK (Continued) **S111457056**

Patel. 2:10 PM:- spoke with Bill. they finished investigation and submitted report to property manager. Bill will send copy of investigation report for review. Bill mentioned that property manager was going to hire Riteway for cleanup of contaminated soil. 2:13 PM:- spoke with Joe at Riteway. he confirmed that Riteway did not do the job. 2:18 PM:- spoke with Mr. Grand. he does not have much information and asked to contact Ms. Rodriguez or Mr. Smiley (buiding engineer). tried Ms. Rodriguez's phone number, but no response. 2:25 PM:- spoke with Ms. Rodriguez on Mr. Smiley's phone. she mentioned that Preferred drilled on sidewalk and collected samples. she mentioned that work has been completed. informed her that the spill cleanup report was due on 03/23/12 and must be submitted to the Department by the end of 06/15/12, or else case will be referred for enforcement. 3:01 PM:- sent email to Ms. Rodriguez and informed her that the cleanup report must be submitted to the department by the end of 06/15/12 or else case will be referred for enforcement. email copied to Bill. 3:35 PM:- received email from Bill including investigation report. abstract: - an existing 20,000 gal AST, installed circa 1956, is present within a subterranean vault in the sub-basement of the building - the AST is set on top of concrete piers within the subterranean vault, which has a pourcd concrete floor - standing water was noted within the vault <---------- - observed fuel oil on the interior wall of the AST vault, immediately beneath the location of the entry point of the remote fill piping, a depth of approx. 4 ft below outside grade <-------- - fuel oil staining was also noted on the concrete sidewalk immediately above fill piping, exterior, to the south of the building - J&R Mechanical installed a new remote fill line within the sidewalk of 145th street - during site inspection, Preferred confirmed that two former remote fill lines were abandoned and filled with concrete and one new remote fill line was present along 145th st - four soil borings (SB-1 through SB-4) were installed to refusal, ranging from 7 to 10 ft bg - soil borings were pre-cleared to a depth of six ft bg - as the subject property is situated on a steep topographic slope toward the southeast, boring SB-1 was installed just northwest (inferred upgradient) of the former remote fill lines and borings SB-2 through SB-4 were installed southeast of the former remote fill lines, in a linear pattern, along W 145th street - soils within the borings consisted of silty sands with various fill material and cobble - field screening did not identify any evidence (staining, odors, discoloration or elevated PID) of contamination within any of the four soil borings - no groundwater found before refusal - collected three soil samples at 4-5 ft bg from boring SB-1, SB-2 and SB-3 - no contamination found in soil samples - proposed to excavated soils directly below and within the trench of the former remote fill lines report includes pics showing oil seepage into the tank room. 06/13/12-Hiralkumar Patel. 3:29 PM:- left message for Ms. Rodriguez. informed her that the department requires cleanup of contaminated soil. asked her to call back to discuss. 3:32 PM:- spoke with Bill. he received call from management office and requested a cost estimate for the work. Bill is planning to remove the former fill lines and any associated contamination. Bill will submit cost estimate by 06/15/12. he will call back with update. 06/26/12-Hiralkumar Patel. 10:57 AM:- spoke with Bill. he hasn't received work authorization yet. 11:00 AM:- left message for Ms. Rodriguez. informed her that case will be referred to legal if no response, about cleanup status, by the end of today. 11:02 AM:- spoke with lady at management's main

SIDEWALK (Continued) **S111457056**

office and informed her about possible enforcement, if no response by the end of today. 12:38 PM:- received call from Ms. Rodriguez. she mentioned that they were waiting for response from Preferred. asked Ms. Rodriguez to submit a work schedule by the end of tomorrow. informed her that the work must begin within two weeks (by 07/10/12) to avoid enforcement. 06/27/12-Hiralkumar Patel. 11:33 AM:- received call from Bill. he received verbal approval from property manager. once he receive signed approval, he will apply for sidewalk permit. informed him that the work must begin by 07/10/12. 07/05/12-Hiralkumar Patel. 9:14 AM:- received email from Bill. he mentioned that Preferred has been authorized to conduct the required cleanup and will apply for DOT permit. based upon anticipated receipt of sidewalk permit next week, work may begin in week of 07/16/12. 07/06/12-Hiralkumar Patel. 12:14 PM:- received message from Bill. he mentioned that sidewalk permit application will be submitted, as soon as they get payment from owner (which is expected today). 07/17/12-Hiralkumar Patel. 2:30 PM:- spoke with Bill. he mentioned that due to on-going DOT work in area, they have to wait to get permit for required sidewalk work. asked Bill to call back by 07/23/12 with updates. 07/30/12-Hiralkumar Patel. 6:47 AM:- received email from Bill. they received DOT permit late last week and have scheduled work for 08/01/12. 08/17/12-Hiralkumar Patel. 1:02 PM:- spoke with Bill. they finished work and endpoint samples came back clean. he will submit report soon. 09/10/12-Hiralkumar Patel. 3:07 PM:- spoke with Bill. he will submit report tomorrow. 10/02/12-Hiralkumar Patel. 1:58 PM:- sent email to Ms. Rodriguez inquiring updates regarding the spill cleanup report. email copied to Bill. 11/06/12-Hiralkumar Patel. 10:45 AM:- received email from Bill including report. abstract: - excavated soil along former remote fill line - excavation was approx. 16 ft long by 3 ft wide with varying depths of 2-3 ft bg - two endpoint samples collected - no contamination found in endpoint samples 11/29/12-Hiralkumar Patel. based on available information, case closed. 4:23 PM:- sent spill closure letter to Ms. Rodriguez. letter emailed to Ms. Rodriguez and Bill."

Remarks: "1-10 gallons spilled from a line undergrounded. True amount won't be known until the sidewalk is removed."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 3/14/03 REASSIGNED FROM ROMMEL TO VOUGHT. 6/27/2003-Vought-File review by Vought: Tank Upgrade Report-Dec 1998-Tyree Brothers Environmental Services (Paul Hatcher 631-249-3150)- Adjoining six-story building to the west, adjoining two story buiildings to the east and north. Merit service station across W145th Street. Four (4000-gallon) gasoline USTs upgraded. Soil excavated to approximate depth of 3' below grade. Six soil endpoint soil samples taken (analyticals provided). Soil analyticals show concentrations up to 47000ppb toluene (S5), 1603000ppb xylene, 88800 ppb napthalene and 19300ppb MTBE. 84.24 tons of soil excavated and removed (disposal manifest provided). Subsurface Investigation Report-Dec 2000-Tyree-Eleven soil borings performed using Geoprobe. Perched groundwater was encountered at approximate depths of 10-15bls . Soil analyticals show concentrations up to 8060ppb benzene (SB7), 288000ppb toluene, 16200ppb MTBE (SB8), 70300ppb napthalene. Groundwater analyticals show up to 6470ppb benzene, 29600ppb toluene, and 172000ppb MTBE. Quarterly Monitoring Reports-March 2001 thru Sept 2001. Four monitoring wells on-site. Remedial activities are EVR/Remediation Assessment. Two additional wells installed in 7/1. Groundwater concentrations up to 3820ppb benzene (W1), 1770ppb toluene(W1), 26940ppb xylene (W5) and 445000ppb MTBE (W4). Pilot Test Report and SVE and DPE-Nov 2002-Tyree-See RAP comments (June 2003) for pilot test results. Tyree proposes DPE due to higher radius of influence than SVE. 3/29/2003-Vought-Received email from Paul Hatcher that 2 of product was found in W5. Product was bailed. Monitoring and bailing began weekly. Quarterly Monitoring Reports-Oct 2002 thru Dec 2001. Six monitoring wells on-site. Remedial activities are EVR/Remediation Assessment. Free product (.02') in W2. Groundwater concentrations up to 2100ppb benzene (W1), 6180ppb xylene (W5) and 348000ppb MTBE (W4). Letter to NYSDEC-Feb 18, 2003-Letter sent to NYSDEC by Tyree requesting Stipulation Agreement so that Tyree could proceed with proposed system design and installation. In letter Tyree states that they previously submitted a Soil Vapor Extraction and Dual Phase Extraction Pilot Test in Nov 2002. 4/17/2003-Vought sent Stipulation, CAP, Guidance Document and cover letter to Kevin Shea (Getty Properties). 6/3/2003-Vought-Received signed stipulation agreement from Getty. Quarterly Monitoring Reports-Jan 2003 thru March 2003-Tyree-Six monitoring wells on-site. Groundwater concentrations up to 3550ppb benzene(W1), 2330ppb toluene(W1), 12700ppb xylene(W4) and 59800ppb MTBE. No free product in wells. Four dual phase extraction wells (DPE) wells were installed for future remediation system. Borings logs and soil analyticals provided. Soil concentrations up to 2180ppb benzene(E4), 3740ppb toluene(E4) and 4140ppb MTBE(E4). Proposed Remedial Action Plan-June 2003-Tyree-Depth to perched groundwater is ten to twelve feet. Groundwater flows to the east. During installation of wells W5 and W6 two ghost tanks found and could not be removed due to their location underlying operational pump island (both tanks were filled with water with no measurable product). Review of historical maps by Tyree suggested that there are possibly eight additional tanks on-site. Free product found in wells W4 and W5. A radius of influence of 16 was estimated by pilot tests, therefore conventional SVE would not accomplish treatment goals. A following pilot test of DPE indicated groundwater pumping in the DPE created a zone of influence exceeding 25'. Soil heterogeneities cause vapor flow rates to be less than 40cfm. Tyree proposes installation of DPE system of five extraction wells with

GETTY#58409 (Continued) **S108637243**

liquid ring vacuum pumps. Estimated fluid extraction rate is 10gpm. Extraction wells installed in Apr with radius of influence of 20'. Fluids will be processed through a oil/water separator, air stripper and liquid phase carbon unit. Treated groundwater will be discharged into storm sewer. Vapors will be scrubbed using activated carbon asdorbtion. Monthly air samples will be collected and analyzed for NIOSH 1501. Discharge of wastewater will be monitored weekly for 30 days then monthly thereafter. Tyree requests written approval of RAP. 6/27/2003-Vought-NYSDEC requires 1)off site delineation 2)surrounding area site plan, sensitive receptor monitoring schedule and data 3)Additional copies of Site status report and Remediation Report of Aug 2002 (Vought-never received these documents) 4)Investigation of eight additional tanks referred to in RAP. These requests must be satisfied before RAP approval. Vought sent email to Tyree (Hatcher) on 7/2/03 with above requirements. Quarterly Monitoring Reports (Tyree) July 2003 thru Dec 2003. Five monitoring wells onsite, one monitoring well/dual phase extraction well and four DPE wells for future remediation system. DPE wells were installed 4/10/03-4/11/03. Groundwater flow to the northeast. .15' of LNAPL in MW15. Trenching to connect all DPE wells completed in 7/03. Awaiting purchase of DPE system and permits for system . Groundwater concentrations up to 1020ppb benzene(W1), 865ppb benzene(W2), 1420ppb benzene(W3), 1560ppb benzene(W4), free product(W5), and 14ppb MTBE(W6). Monthly monitoring and bailing to recover free product. 2/19/04-Vought-Sent letter as per CAP rejecting RAP until the following requirements are met: 1)delineation to the west of W3, east of W-1, northwest of W2, downgradient from W4 2)inclusion of W5 in DPE system due to free product 3)surrounding area site plan. Vought sent letter with above requirements on 2/19/04. 5/1305-Vought-New file review by Vought: Quarterly Monitoring Reports (Tyree Org)-July 2004 thru Dec 2004. Wells onsite include: five monitoring wells, one monitoring well/dual phase extraction well, and four DPE wells for future remediation system. Groundwater flow to the east-northeast at depths of 10-12' below grade. Groundwater analyticals show: 2600ppb benzene(W1), 1370ppb toluene(W1), 1200ppb ethylbenzene(W1), 5640ppb xylene(W1), 3690ppb MTBE(W1), 1490ppb benzene(W3), 699ppb toluene(W3), 242ppb ethylbenzene(W3), 652ppb xylene(W3), 3750ppb MTBE(W3), no sample(W4), no sample(W5), 11ppb MTBE(W6). 5/13/05-Vought-DEC no longer requires delineation upgradient of source but however still requires: 1)addition of MW5 to DPE or affirmation of inclusion in ROI of DPHVE system. Vought sent email with requirements. Vought received email from J Rennie that MW 5 was tied into DPHVE. 08/31/2005 - Feng - Project transferred from Vought to Feng. 11/15/2005 - Feng - Dual Phase Extraction System is installed and ready to run. However, it is still awaiting electric approval from NYC Electrical Control Board/Cod Edison. 12/19/2005 - Feng - Quarterly Monitoring Report, 7/2005 - 9/2005. The site is currently an active gasoline station & convienience store with car wash. Groundwater flows to east at the depth of 10.81' to 11.99' bg. There are 5 monitoring well, 1 monitoring/extraction well and 5 extraction wells. W-1, rapid increased and 49,390 ppb BTEX, rapid decreased and 804 ppb MTBE. W-2, rapid increased and 12,163 ppb BTEX, decreased and 8,500 ppb MTBE. W-3, decreased and 7,187 ppb BTEX, decreased and 3,540 ppb MTBE. W-4, increased and 3,638 ppb BTEX, decreased and 2,180 ppb MTBE. W-5, increased and 6,135 ppb BTEX, increased and 120 ppb MTBE. W-6, increased and 32 ppb MTBE, 10 ppb MTBE. Absorbent sock in W-5. Still waiting for electrical approval. (RJF) 1/17/2006 - Feng - Quarterly

GETTY#58409 (Continued) **S108637243**

Monitoring Report, 10/2006 - 12/2005. The site is an acitve gasoline station & convienience store with car wash. Groundwater flows to east at the depth of 10.14' to 11.43' bg. 5 monitoring wells, 1 monitoring/extraction well and 5 extraction wells onsite. W-1, 48,920 ppb BTEX, 1,470 ppb MTBE. W-3, decreased and 4,467 ppb BTEX, 3,150 ppb MTBE. W-4, increased and 6,912 ppb BTEX, 2,410 ppb MTBE. W-6, low and 1 ppb BTEX, 13 ppb MTBE. Absorbent socks in W-5. Still waiting for electrical approval for the system installed onsite. (RJF) 1/17/2006 - Feng - Emailed to Joe Rennie asked about the status of the site, and the reason why couldn't get the electrical approval. (RJF) 2/13/2006 - Feng - Emailed to Joe Rennie requested the status of the pending electrical approval from ConEd. (RJF) 2/13/2006 - Feng - Reply from Joe Rennie Please be advised that Tyree has tried making contact numerous times via phone and faxes with the electrical sub-contractor requesting the status in this matter. When Tyree was able to make contact with the sub-contractor, it was told to us that they did not hear back from the ECB and that they will make a follow-up phone call to check on the status. At this point, the only thing that Tyree can do is to keep contacting the sub-contractor. If NYSDEC has any suggestions, we are surely open to them. (RJF) 2/14/2006 - Feng - Emailed to ConEd requesting status of the project and reason why electric service hasn't granted yet. and asked for the contact information of the project manager. (RJF) 2/14/2006 - Feng - Joe Rennie emailed the contact information of ConEdison. (RJF) 2/15/2006 - Feng - Letter requesting assistance in gaining electrical approval from ConEdison to Kevin Gallagher via fax: 212-673-1729 and certified mail. (RJF) 2/15/2006 - Feng - Called from Antonio Alaimo (ConEdison) and follow up by email. He called Mr. Godsil (Tyree's sub-contractor) on 1/26/2006 and Godsil is still waiting for the certificate from the city before ConEd could install a new meter. He said once the certificate is on hand, ConEdison will take care of this case right away. (RJF) 2/15/2006 - Feng - Called Harry Godsil (516-827-5324). He said that they re-filed for certificate and done the re-wiring. He willl follow up with the Electric Board and ConEdison. It will be all set in a couples weeks. (RJF) 3/8/2006 - Feng - Called Harry Godsil and left message if he got the certificate from the city yet. (RJF) 3/17/2006 - Feng - Faxed Harry Godsil a message and inquired the status of the power supply for the remediation system for this site. Requested the contact information if he haven't received the certificate from the city yet, such as contact name, address, phone# and fax#. (RJF) 3/29/2006 - Feng - 3/28/2006 Letter faxed to NYC Department of Buildings - Electrical Division and requested assistance in obtaining the electrical certificate. Called from Inspector Diamond (212)566-3812 saying that they never received any application for that. Emailed Joe Rennie and asked him to look into this problem. (RJF) 4/4/2006 - Feng - Email from DOB Bonnie Gerard. She stated that their inspector visited the site and found some violation. And DOB will be expedite Getty's sub-contractor's application. Feng Forward the violations list to Joe Rennie and strong recommend him to hire another electrican to remove the violation and then to run the system. (RJF) 4/6/2006 - Feng - Email Joe Rennie requested about the status of electrical work for the site. 4/7/2006 - Feng - Email from Joe Rennie I have another electrical contractor working on it. The contractor was in our office on Wednesday and Paul Hatcher and myself spoke to him. He assured us that he will follow up with the NYC DOB. As far as Con Ed goes the paperwork was filed and a case number has been assigned, it's the NYC

GETTY#58409 (Continued) **S108637243**

DOB that doesn't have the necessary paperwork to proceed. (RJF) 5/4/2006 - Feng - Quarterly Monitoring Report, 1/2006 - 3/2006. Active gasoline station and convenience store with car wash. Groundwater at 10.59' to 11.56' bg and flows to east. Sampling and gauging as of 3/21/2006. There are 5 monitoring, 1 monitoring/extraction, 5 extraction wells. W-1, 0.04' FP. W-3, increased and 13,227 ppb BTEX (1,870 ppb B, 6,010 ppb T, 647 ppb E, 4,700 ppb X), 3,180 ppb MTBE. W-4, decreased and 4,651 ppb BTEX (1,750 ppb B, 31 ppb T, 1,050 ppb E, 1,820 ppb X), 1,230 ppb MTBE. W-6, 5 ppb BTEX, 16 ppb MTBE. Noted that absorbent sock in monitoring well (W-1). Electrical contractor waiting on Co Edison and NYC Electrical Control Board for installation approval and final inspection. (RJF) 6/27/2006 - Feng - Dual Phase Extraction System startup. DEC staff Sun, Feng, Andersen, and Krasweski were onsite to witness this event. (RJF) 11/9/2006 - Feng - Quarterly Monitoring Report, 7/2006 - 9/2006, 10/9/2006, by Tyree. Active gasoline station and convienience store with car wash. Sampled and gauged on 9/28/2006. 5 monitoring wells, 1 monitoring/extraction well, and 5 extraction wells. DTW 10.35' to 11.29' bg. Flows to easterly. LNAPL in MW-1, 0.30 feet. BTEX range ND to 17,637 ppb. MTBE range 1 ppb to 2,740 ppb. (RJF) 2/7/2007 - Feng - Quarterly Monitoring Report, 10/2006 - 12/2006, 1/2/2007, by Tyree. Groundwater sampled and gauged 12/27/2006. 5 monitoring, 1 monitoring/extraction and 5 extraction wells. DTW 9.92' to 11.98' bg. Flows east. LNAPL in W-1 (0.12'). W-3, 4,249 ppb BTEX, 700 ppb MTBE. W-4, Not accessible. W-6, BTEX ND, 4 ppb MTBE. (RJF) 5/17/2007 - Feng - New Spill 07-01951 called in. The caller stated that there is product in the monitoring well. Contacted Tyree to see what happened. (RJF) 5/17/2007 - Feng - Rob. S (Tyree) called back and he will send a field technician to the site and gauge those monitoring well. Product will be sampled if any were found in the wells. Will call back tomorrow with the gauging results. (RJF) 5/18/2007 - Feng - Email from Joe Gavin (C2G Environmental Consultants) to DEC Jacob Krimgold. During the Third Party Audit Inspection conducted 5/17/2007, some PBS violation were found and the station has been closed. (RJF) 5/23/2007 - Feng - Email updates from Rob. S (Tyree). A field tech was there yesterday and this morning. One monitoring well with 0.01' of product, the others including the dual phase ones has no product. (RJF) 6/26/2007 - Feng - Quarterly Monitoring Report, 1/2007 - 3/2007, 4/2007. Groundwater sampled 4/2/2007. 5 monitoring wells, 1 monitoring/extraction well, 5 extraction wells. DTW 10.40' to 11.69' bg. Flows to east. LNAPL in MW-1 (0.05'). W-3, 1,618 ppb BTEX, 949 ppb MTBE. W-4, not accessible. W-6, ND. Dual Phase Extraction system running. As of 4/18/2007, Influent 11.6 ppb BTEX and 13.90 ppb MTBE, effluent MDL. (RJF) 9/28/2007 - Feng - Quarterly Monitoring Report, 5/2007 - 7/2007, 8/2007. Groundwater sampled 7/9/2007. 5 monitoring wells, 1 monitoring/extraction well, 5 extraction wells. DTW 10.32' to 11.25' bg. Flows to east. No LNAPL. W-1, 40,412 ppb BTEX, 161 ppb MTBE. W-3, 6,555 ppb BTEX, 2,010 ppb MTBE. W-4, NA. W-6, BTEX ND, 4 ppb MTBE. (RJF) 3/21/2008 - Feng - Quarterly Monitoring Report, 8/2007 - 11/2007, 12/2007. Active gasoline station and convinience store iwth car wash. Groundwater was gauged and sampled 11/8/2007. 5 monitoring wells, 1 monitoring/extraction well and 5 extraction wells. DTW 10.78' to 11.97' bg. Flows to east. LNAPL in MW-1 (0.33'). BTEX range ND to 14,373 ppb (MW-3). MTBE range 3.3 ppb to 1,910 ppb (MW-3). Dual Phase Extraction system has been off line since November due to a pump failure and will be restarted in 12/2007. (RJF) 3/24/2008 - Feng

GETTY#58409 (Continued) **S108637243**

- Email from R. Szcespanski (Tyree). The system is back to service in mid February 2008. (RJF) 7/11/2008 - 1Q2008, 12/2007 - 4/2008, 5/2008. Active gasoline station and convenience store with car wash. Groundwater was gauged and sampled 4/22/2008. 4 monitoring wells, 1 monitoring/extraction, 5 extraction wells. DTW 10.51' to 11.60' bg. Flows to east. LNAPL in W-1 (0.04'). BTEX range ND to 13,950 ppb (W-3). MTBE range ND to 1,760 ppb (W-3). The dual phase extraction system is on. Total BTEX influent ND to 0.93 ppb, MTBE ND to 7.8 ppb. Effluent ND. Email to Tyree for check/evaluate the remedial system and to optimize the recovery. (RJF) 9/4/2008 - Getty Properties portfolio meeting with Delta and Tyree. Some vapor points might be installed in the area where the extraction wels located. Historical data for W-5. Correct the W-2 which is connected to the system. Need well within the property line near the extraction well which is downgradient of W-1. Check why extraction wells were put this way. work plan by 12/2008. (RJF) 1/6/2009 - Getty Properties portfolio meeting with Delta and Tyree. In 2005, there were 5 vapor points along the apartment building and came out clean. DEC received the delineation work plan, and under review. (RJF) 1/23/2009 - Reviewed Investigation Work Plan, dated 12/29/2008, by Tyree. One well is proposed near the vacuum area. DEC provided comments and requires a well to be installed at the extraction wells area as we agreed upon the meeting of 9/2008. (RJF) 1/28/2009 - Received and reviewed the Investigation Work Plan, dated January 27, 2009, by Tyree, pdf copy, sent via email. Tyree proposed to have 2 wells installed. email from Tyree on 1/27/2008, they will measure the water depth and will have proper amount of screen installed, at least 5 feet above water table. Work plan is approved. Field work to be scheduled for 1Q2009. Investigation report due 3/2009. (RJF) 3/17/2009 - Quarterly Monitoring Report, 5/2008 - 7/2008, 8/2008, by Tyree. Active gasoline station and convenience store with car wash. Groundwater was gauged and sampled 7/17/2008. 4 monitoring wells. NO LNAPL. DTW 10.42' to 11.90' bg. Flows to east. BTEX range 1.7 ppb to 41,264 ppb (W-1). MTBE range ND to 1,890 ppb (W-3). Dual phase extraction system is on line. BTEX influent ND. MTBE influent range 1.1 to 3.2 ppb. BTEX and MTBE effleuent ND. Quarterly Monitoring Report, 8/2008 - 10/2008, 11/2008, by Tyree. Active gasoline station. Groundwater was gauged and sampled 10/29/2008. 4 monitoring wells. NO LNAPL. DTW 9.98' to 11.89' bg. Flows to east. BTEX range ND ppb to 24,172 ppb (W-1). MTBE range ND to 1,220 ppb (W-3). Dual phase extraction system on line. No BTEX influent or effluent. MTBE influent 2 to 3 ppm, effleuent ND. ((RJF) 6/9/2009 - Reviewed Subsurface Investigation Report, dated 5/13/2009, pdf via email on 5/13/2009, by Tyree. On March 31, 2009, Tyree oversaw Associated Environmenal Services during the installation of 2 monitoring wells. MW-7 and MW-8 were installed to depth of 25 feet bg. PID reading, MW-7 at 10-15 feet, 35 ppm; MW-8 at 10-15 feet 105 ppm. 4 soil samples were collected, MW-7 at 5-10 feet, MW-7 at 10-15 feet, MW-8 at 5-10 feet, MW-8 at 10-15 feet, no exceedances. 2 groundwater samples were collected. MW-7, 36 ug/L benzene, 47 ug/L MTBE. MW-8, 46 ug/L benzene, 340 ug/L MTBE. (RJF) 1/11/2012 - 4Q2011, 1/11/2012, by Tyree. LNAPL in MW-1, 0.01'. High BTEX in one well. MW-3, 9,459 ug/L BTEX, 197 ug/L MTBE. STARS list sampling for E-1, MW-2, E-2, MW-5/E-5. E-1, 58.3 ug/L benzene, 34.7 ug/L MTBE. MW-2, 27.4 ug/L MTBE. E-2, 18.1 ug/L MTBE. 12/13/2011, Dual phase extraction system was on. Liquid phase Influent/effluent are MDL. No vapor phase samples were collected. 07/28/2017 - In January 2017 during the removal of an underground storage tank (UST)

GETTY#58409 (Continued) **S108637243**

system, MES Getty's contractor, excavated soil from the former tank field, former product piping runs and dispensers to remove petroleum impacted soil. During removal activities thirteen previously unknown ghost tanks in the southern area of the site were identified, and subsequently removed in May 2017. From January 9 to July 5, 2017, 43 excavation endpoint soil samples were collected from the sidewalls and bottom of the excavation extents. A review of the laboratory analytical data shows seven excavation soil sample locations at depth exhibiting VOC concentrations in excess of NYSDEC CP-51 soil cleanup guidance, and eight excavation soil sample locations exhibiting SVOC concentrations in excess of applicable NYSDEC CP-51 Soil Cleanup Guidance. All of the excavation soil samples were reported below NYSDEC Brownfield Cleanup Program Commercial Soil Cleanup Objectives, with the exception of SW-8A (7 -7.5), SW-8B (7 -7.5) and SW-8B (14). Approximately 2,268.84 tons of excavated soil was transported off-site for disposal at Soil Safe s facility located in Logan, New Jersey. Based on the above presented information in the July 26th UST Closure and Remedial Excavation Summary Report the spill has been closed."

Remarks: "TANK UNGRADE, FOUND CONTAMINATION. ORIGINAL SPILL ASSIGNED TO O'DOWD."

DEC Memo:	"6-12-14 - Obligado - I spoke to Mark Salamack. He said it was a dry

APT BUILDING - TTF (Continued) **S117269608**

leak from a 5000 gallon AST. He thinks there may be more than one leak location. He said the tank was painted over and had a lot of rust. he gave me a contact number of Raphael 718-208-7978. 6-13-14 - Obligado - I spoke with RAphael he referred me to the property manager: Mr. Alex Bonnet SDG Management Corp 888 Seventh Avenue, 24th Floor NY, NY 10019 abonnet@sbgmanagement.com Spill assigned to Demeo. TTF letter was sent to MR. Bonnet via email cc to Demeo. 6/23/14 TJD Teleconference with Donna @ABC tank - they have a crew onsite and are beginning work as follows: lifting and rolling tank for inspection repair tank bottom as necessary inspect floor below tank for evidence of discharge - remediate as necessary install saddles so tank is no longer in direct contact with floor perform system test DeMeo has directed contractor to contact DEC if contamination is identified, so that an inspection can be performed prior to backfill. Awaiting update and submission of required closure documents. 7/14/14 TJD Teleconference with Donna from ABC tank, tank has been temporarily lifted and concrete surfaces below tank have been cleaned and washed. 5K AST is repairable and a new bottom will be welded onto tank. Purpose of call is to determine what sampling is required below tank, based upon the information provided DeMeo has directed a minimum of (3) subsurface soil samples through concrete pad along the centerline of former tank location. DeMeo has requested photographs of concrete pad condition pre and post sampling. A system test is required prior to placing tank back in service. Awaiting requested documentation. 10/2/14 TJD Email sent to contractor - uploaded to DECDOCS. 4/8/15 TJD Email sent to contractor, requesting outstanding closure documentation - uploaded to DECDOCS. 4/16/15 TJD Closure review - ABC Tank has submitted required documentation. A total of (22) drums of petroleum contaminated soils were excavated, drummed and transported offsite for proper disposal. Endpoint sample results reveal all target analytes are within acceptable concentrations. A system tightness test was performed on 10/29/14 following the completion of repairs and remedial activities which passed. All required documentation has been received with the exception of photographs. No DEC site visit was performed. No further action is required. All documentation has been uploaded to DECDOCS. Spill closed."

DEC Memo:	"09/21/13-Hiralkumar Patel. 5:05 PM:- spoke with Dee at DEP. she noticed spill onto sidewalk, near vent pipe. she confirmed cleanup completed by by FDNY. she could not inspect inside the building. 09/23/13-Hiralkumar Patel. 9:00 AM:- visited site. neighbour provided access, as super was not at site. front part of basement was flooded. very light petroleum sheen noted on flood water. no petroleum odors noted in basement. 9:23 spoke with Carlos, building super. he mentioned that there is sewer line leak in basement. plumber was working to fix the leaking sewer line. plumber pumped liquid onto sidewalk. Carlos mentioned that Casanova Oil (917-440-8460) delivered oil on 09/21/13. due to a loose plug on a 275 gal AST in basement, some oil spilled in basement and mixed with pooled water. without knowing proper cleanup method for oil spill, plumber started pumping oily water onto sidewalk. FDNY responded for initial cleanup. cleanup was resumed and completed by oil company over the weekend. during site visit, no signs of spill noted from vent pipe. Carlos. - super Ph. (646) 276-0252 based on available information and observations during the site visit, case closed."
Remarks:	"Furnace backed up into the street. FD took care of spill with absorbant"

DEC Memo:	"Spoke with John Engdahl @ Hess.His number is (732)750-6934. As per his request, recent data from 150-54 West 145th Street was sent to him for his review.(sr) 5/30/14 - Austin - Spill transferred from Rahman to Mahat for followup with Hess - end 4/29/16: Mahat e/c: DEC Mahat sent an email to DEC Haggerty inquiring his involvement on the spill case. DEC Haggerty sent an email update on the case. Email: Santosh, I recently closed Spill #0751061, the long-term ExxonMobil remediation spill number, at this property. In 2010, I asked Kleinfelder (ExxonMobil s consultant) to call in the above-referenced spill number because elevated MTBE was encountered during quarterly monitoring which was up gradient of ExxonMobil distribution system and the immediately down gradient of the adjacent Hess station located next-door. At 12,000ppb, I thought it was worth investigating. I ve attached the last quarterly report from Kleinfelder which demonstrates the well in question (MW-5) has since cleaned up. Let me know if you need additional information. Thanks, Mike Spill case has been crossed referenced with old spill case #0751061. A quarterly report has been uploaded on D2 for reference. Based on the report, the spill case is closed. "
Remarks:	"possibly from Hess Gas Station next store - lab results showed 12000 ppb of mpbe - Mike Haggerty aware of this situation"

DEC Memo:	"11/2/07-Vought-See spill #0706608 at adjacent site located at 2495 Adam Clayton and also previous closed spill #0751601. DEC requires: 1)Tightness testing of fill line as per DEC Krimgold 2)collection of groundwater sample immediately west of tanks. Spoke with DEC Krimgold and as per PBS records, PBS inspection performed by DEC Falvey in 2/07 and numerous violations including product in sump/catch basin. DEC Krimgold also confirmed that spill number should have been reported by ExxonMobil upon discovery of product in the sump. Vought called ExxonMobil (Kenneth Drake Cell 908-451-0956 Fax 609-698-8761 (kenneth.j.drake@exxonmobil.com). Left message with Drake to return call with contact info. Vought sent out letter with above requirements and a one month deadline with cc to DEC Urda and Galli (Gehrling). Vought called station operator (Theodoros Zorbas 718-762-4632 and ask for Chris). Vought called Chris (fax:718-762-4711) and informed him of situation and faxed and mailed copy of letter. Vought received mail from Acosta that DEP project manager is Maurice Winter (718-595-4514). 11/05/07-Vought-Received call from and spoke to Lina Hitchcock (713-460-4006) from Exxon Mobil. Vought provided her with information of closed spill 0611117.

EXXONMOBIL (Continued) **S108957494**

Hitchcock will contact Galli and Kenneth Drake regarding splitting samples and coordinating activities with consultant from other site. Fill line was tested as per Lina but tanks were not on 4/13/07. Vought spoke to DEC Urda and he discussed pursuing consent order upon confirmation that ExxonMobil was source. 11/14/07-Vought-Received call from Brendan Mooney (ExxonMobil 631-218-0612). Mooney received letter and tank testing will be performed by 12/3. Workplan will be submitted to DEC by 12/17 for groundwater. Frank Messina will be ExxonMobil project manager (732-850-4009) and Kleinfelder contact is Brendan Mooney. 1/10/08-Vought-Current file review by Vought: Letter from Kleinfelder (Mooney) to DEC Vought-11/19/07. Crompco Corporation of Plymouth Meeting, Pennsylavania conducted tank and line testing at the Site on November 8, 2007. The results of the test indicate that all tanks and lines are tight. A copy of the tank test results are provided in Attachment A . Investigation workplan for groundwater sample will be submitted to DEC by 12/17/07. Letter from Kleinfelder (Mooney) to DEC Vought-12/14/97. Scope of work includes installation of five soil borings/monitoring wells. Two wells will be installed on both the eastern and western portions of the Site and one well will be installed on the northern portion of the site. Scope of work includes collection of two soil samples from each boring and installation of five monitoring wells. Subsurface investigation will proceed within 90 days of receiving approval and DEC will receive report within 90 days. 1/10/08-Vought-After review DEC requires: 1)faster turnaround than 180 days total for report. Vought called and spoke to Mooney and both parties agreed that work could be performed in 45 days with 60 days of report preparation. Vought sent letter approving of Plan pending inclusion of shorter timeframes for report submittal of 105 day total. 01/11/08-Vought-Received email from MobilExxon Drake that his correct mailing address is: Kenneth Drake ExxonMobil-US Retail Remediation Project Manager 297 Route 72W Suite 35, #285 Manahawkin, NJ 08050-2890 Cell: (809)451-0956 Fax; (609) 698-8761 06/11/08-Vought-Reviewed Subsurface Investigation Report dated 4/18/08 and received on 4/23 from Kleinfelder (Brendan Mooney Ph:631-218-0612 Fax:631-218-0787). Installation of five monitoring wells and proposal for investigation of subsuface geophysical anamolies found and submission of quarterly status reports. Site currrently has five (4000-gallon) gasoline USTs, one 1000-gallon waste oil UST, one 1000-gallon fuel oil UST, four dispenser islands and single story building. Depth to groundwater if 15-19'bg. Wells installed via air rotary to a maximum depth of 32'bg. ....four subsurface anamolies were detected beneath the Site . Highest PID reading was in MW2(16-18'bg) that was 1400ppm. Groundwater flow to the east-southeast. Report recommends: 1)further investigation of the subsurface anamolies via excavation 2)quarterly groundwater sampling. Soil analyticals show: 20800ppb toluene(MW2 18-20'bg), 74700ppb ethylbenzene(MW2 18-20'bg), 533,000ppb xylene(MW2 18-20'bg), 418,000ppb-1,2,4-trimethylbenzene(MW2 18-20'bg), 130,000ppb 1,3,5-trimethylbenzene(MW2 18-20'bg), 3570ppb MTBE(MW3 25-27'bg). Groundwater analyticals show:'74ppb benzene(MW1), 284ppb toluene(MW1), 71ppb ethylbenzene(MW1), 595ppb xylene(MW1), 15ppb MTBE(MW1), 452ppb benzene(MW2), 241ppb napthalene(MW2), 6580ppb toluene(MW2), 3290ppb ethylbenzene(MW2), 18100ppb xylene(MW2), 111ppb MTBE(MW2), 36ppb benzene(MW3), 7ppb toluene(MW3), 323ppb ethylbenzene(MW3), 86ppb xylene(MW3), 2400ppb MTBE(MW3), 108ppb napthalene(MW3), 2ppb benzene(MW4), 3ppb benzene(MW5). DEC approves report pending inclusion of requirements: 1)complete delineation of

EXXONMOBIL (Continued) **S108957494**

soil and groundwater contamination including well installation of wells northeast of MW2 and southeast of MW2 2)cc to AC Development 3)submission of RAP Vought sent letter with above requirements to above address. 07/14/08-Vought-Received call from Mike Meyerhoefer (Kleinfelder 631-218-0612). Meyerhoefer considering consolidation of spill number from adjacent property to that of Exxon Mobil. Requested review of RAP. Vought called and left message for DEC Haggerty to return call to DEC with possibility of transferring spill to him as Exxon portfolio manager. 07/15/08-Vought-Spoke with DEC Haggerty who requested that spill be transferred to him as Exxon Mobil portfolio manager. Spill transferred from DEC Vought to DEC Haggerty and spill file sent to Albany. 7/21/08 - Haggerty: Reviewed file including the Supplemental Remedial Investigation Workplan dated 7/8/08. The workplan included the installation of 3 MW's and digging 2 test pits in the area of metallic anomalies detected with GPR. I approved this workplan contingent on Kleinfelder installing 3 additional MW's to determine the extent of the LPH discovered at .72ft in MW-2. Kleinfelder states they will install absorbent LPH socks in MW-2 but without estimating how much LPH exists on the watertable, it could be insufficient. 7/23/08 - Haggerty: spoke with Michael Meyerhoefer from Kleinfelder concerning the work plan. We discussed installing only 2 of the additional MW's I requested and moving their proposed SB/MW-8 closer to the tank field where I wanted a well. PM approved. 8/25/08 - Haggerty: met with Ben Conlon and Bob Cozzy to discuss this site. The property adjacent to the ExxonMobil station is to be re-developed. This spill # was issued when the adjacent property performed a subsurface investigation and product was discovered in a MW along the ExxonMobil station side. Ownership of the product was identified as ExxonMobil's. The developer of the adjacent property applied for the Brownfield Program using ExxonMobil's contamination as their way into the program. Brownfields require an on-site source and they are claiming Exxon's product as their on-site source. The meeting with Ben and Bob was to clarify that if the developer refuses Exxon/Kleinfelder access, the DEC will clean up the contamination on the developers property. A consent order will be prepared by DEE for the investigation and remediation of the ExxonMobil station. Also issued a letter to Exxon requiring the following: 1. Conduct Enhanced Fluid Recovery (EFR) events on MW-2. EFR events must be performed on a monthly basis until directed otherwise. 2. Perform tightness testing on all tanks and lines. ExxonMobil must evaluate why .72ft of product was encountered in May 2008 but not 3 months earlier. What happened since the tanks and lines were tested in November 2007 to cause this release? 3. Sample groundwater in MW-2 to determine what Oxygenate concentrations are present. Analyze for 8260B and all oxygenates. 4. Prepare a Corrective Action Plan (CAP) for the investigation, Interim Remedial Measures (IRM), and future remediation of the site. 9/5/08 - Haggerty: Sent letter to Exxon requiring an SI be conducted on the neighboring (A&C) property to delineate the extent of LPH 9/8/08 - Haggerty: received call from Michael Meyerhoeffer from Kleinfelder. While excavating test pits in the area of a metallic anomaly, old tanks were discovered. Test pits were part of the approved SIWP dated 7/8/08. 9/9/08 - Haggerty: on-site for day 2 of test pit excavation. A total of 8 550gal UST's discovered, but more are likely to exist. Tanks are located 4ft below grade and are encased in concrete and appear to be filled with sand. All Kleinfelder was able to accomplish was excavating an ~10ft by 20ft area down to the concrete slab on top of the tanks removing some

EXXONMOBIL (Continued) **S108957494**

of the associated piping. Kleinfelder was not able to dig any further down or in any direction because the current fuel oil tank is to the south and the current gasoline UST's (5 4,000gal tanks) lie to the north and they were afraid of undermining any current tanks. New spill # called in because a layer of petroleum contaminated soil lie on top of the concrete slab over the tanks. 9/16/08 - Haggerty: Crompco tested tanks and lines. All tight 9/23/08 - 9/24/08 - Haggerty: on-site for 2 days of SI. Intent of this investigation was to delineate LPH on-site. 6 new wells installed. 2 adjacent to the recently discovered 550gal tank bed. Heavy soil and groundwater contamination, LPH encountered surrounding 550gal tanks (LPH black). PM believes these tanks to be the source. In all but 1 well, PM observed a sheen in the sample at water interface. 10/1/08 - Haggerty: Spoke with Exxon PM, Ken Drake, concerning the level of contamination I saw the the previous week. Followed up our conversation with an email to make DEC requirements clear. 1. ExxonMobil must move as fast as possible. Mr. Conlon wants the source removed ASAP. 2. If the old 550's aren't the source, then there was a large loss of inventory involving the current tank system which was never reported. 3. The IRM work plan for source/tanks removal must be submitted by the end of next week and the design for sheeting/shoring should be underway. 4. Off-site investigations across West 145th Street and on A&C property must be implemented in parallel with the IRM. 5. Since removal of all contamination is not feasible (product under station building and the limitations of excavating to 25ft in Manhattan) a remedial system will be required to deal with the remaining product as well as any remaining soil and groundwater impacts. 10/10/08 - Haggerty: approved Off-site Investigation Work Plan dated 10/2/08. Work plan submitted in response to my 9/5/08 letter requiring delineation/investigation of neighboring A&C property. A specialty rig will advance borings inside the old Supermarket building. Also on 10/10/08, an Underground Storage tank Removal work plan was submitted. Work plan does not address DEC requirement of removing tanks and contaminated soil (source). Since the current 4000gal tanks are pushing up against the old 550gal tanks, Exxon states that they will only be able to remove at the most 10 of the 12 550gal tanks and none of the contaminated soil beneath it. They state that to remove the tanks/source, they would have to install sheeting and shoring and remove the current tank system as well. 10/27/08 - Haggerty: submitted letter to Exxon stating the UST removal work plan did not address DEC comments and again required tanks/source removal as an IRM. 10/29/08 - 10/30/08 - Haggerty: 8 EFR/vapor extraction events conducted. Removed ~273gal of product, ~814lbs of vapor, and ~20,000gal of petroleum contaminated groundwater. An ICE (Internal Combustion Engine) was hooked up to burn the vapors being collected. Vapors were being vented at concentration over 120,000ppm (12%) 10/31/08 - Haggerty: Spill Busters (temporary product recovery system) installed at MW-6, MW-10, and MW-11 11/6/08 - Haggerty: had conference call with Ben Conlon and Exxon's legal team. I told them that the tanks/source must be removed. Ben informed them that the faster the source is removed the less penalty he will pursue from Exxon 11/10/08 - Haggerty: Exxon submitted an IRM source removal work plan. Removal of 18 tanks and overexcavate to 22ft with the installation of sheeting and shoring. Groundwater ~18fbg 11/4/08 - Haggerty: Spill Buster (LPH only recovery system) initiated in 3 wells exhibiting product. 11/24/08 - Haggerty: approved IRM tanks/source removal work plan. 11/24/08 -

EXXONMOBIL (Continued) **S108957494**

1/15/09: Began outreach to the community by contacting the Community Board 10 District Manager, Geneva Bain. Also, began preparing fact sheets in both English and Spanish. We identified 5 buildings directly behind the station on West 144th which are our target area for the distribution of fact sheets. Geneva Bain brought in Charles Callway from WeAct, an environmental justice group in Harlem, to assist her with these issues. Decision made to have a public meeting on January 15, 2009 to give the community a chance to discuss any concerns. Our environmental justice coordinator, Lisa Garcia, was also brought in. Document Repository at the National Action Network at 109 West 145th Street, Harlem 12/12/08: SVE/AS test conducted 12/18/08 - Haggerty: Exxon submits an IRM work plan addendum. Due to the contraints of the site (canopy, station building, poor condition of adjacent buildings) the sheeting/shoring plan was modified. The excavation will be to 18ft. 12/23/08 - Haggerty: IRM Addendum approved 12/29/08 - Haggerty: Supplemental Subsurface Investigation Report sumbitted. Exxon had previously been warned that if field observations such as odor, staining, sheen, or visible product were not included in the boring logs and the report, we would refer the matter to our legal department. I was present for the investigation and sheen and visible product were apparent especially in MW-6 (right next to the source, the tanks). The report did not include this information and the report was rejected. 1/14/09 - Haggerty: ExxonMobil and Kleinfelder came to Albany for a meeting to discuss the public meeting in Harlem the following day and the reporting of field observations. Don Englert, Ken Drake, Charles Kolb from ExxonMobil Dennis Shin, Michael Michael Meyerhoeffer from Kleinfelder We informed them that the situation in unexceptable and any future report submitted without field observations will be rejected. We do not trust them. 1/15/09: Public meeting held in Harlem. Bob Cozzy and myself, ExxonMobil, Kleinfelder, CB10, WeAct, DEC Department Environmental Justice Coordinator, and the regional EJ coordinator present. Meeting was well received by all in attendance. 1/21/09: CAMP approved 1/26/09: IRM begins, LPH recovery system shut down. Over 800gal of product removed thru Mobile Remediation Events and the recovery system. 2/12/09 Previously unknown 4000gal tank installed in 1971 discovered. Filled with concrete and water. 2/18/09 - 2/19/09: PM on-site. Orphaned 4000gal tank removed previous day with soil contamination under the tank. All contaminated soil could not be removed due to the proximity of the station building. Tank located between the station building and the dispensers With met Engineers to discuss the retaining wall on the south side of the property which separates the Station of the adjacent apartment buildings and the Lenox Family shelter on West 144th St. Condition of the wall is very poor. Engineers state that the wall would have to be removed or braced before the sheeting/ shoring can be installed 2/24/09 - 2/26/09: PM on-site. PM witnessed all the 5 4000gal tanks removed. Double-walled steel buffide tanks in excellent condition. They were not the source or even a contributing factor. The 12 550gal tanks (in poured concrete vault) were visible from the 4000gal tanks excavation. Contamination noted around the 550’s and underneath the tank mat for the 4000gal tanks. Appears that Exxon knew about the contamination back in 1988 when the 4000gal were installed. PM notifying legal (Scott Owens) and forwarded photographic evidence. 3/4/09 - Haggerty: approved off-site SI workplan to install 10 MWs in the sidewalks on both sides of West 145th, the east side of Adam Clayton Powell Jr. Blvd, and the north side of West 144th St 3/25/09

EXXONMOBIL (Continued) **S108957494**

- Haggerty: approved off-site SIR for the A&C Property. Also approved a change in the UST/Source removal workplan. Due to the poor condition of the back retaining wall, PM made the decision to remove the installation of sheeting and shoring and use sloping to excavate the of the on-site contaminated soils. Approximately 300 tons of contaminated soil will be left in-place due to its close proximity to the station building. The upcoming SVE/AS system will be used to remediate the remaining soil contamination. 4/17/09 - Haggerty: RAP submitted which doesn't remediate the A&C property actively. PM planning a site visit to the A&C property with technical staff only to discuss how the contamination will be delineated and where to install SVE/AS system on their property. System must be operating on the A&C property before they re-open 4/29/09 - Haggerty: met with Ken Drake and Charles Kolb from ExxonMobil as well as Sandra Acosta from A&C and the current owners of the property. The owners are losing money becuase they're paying taxes and rent on a property that isn't bringing in any money because as it is vacant. Original plan was to redevelop but once the contamination was found and the recession hit, investors pulled out. We worked out a plan to delineate the groundwater contaminaiton and install SVE/AS points as needed. It will be difficult to install the points and piping inside the building, but ExxonMobil agreed. They will send an amendment to the RAP. 6/2/09 - Haggerty: SI workplan and RAP Addendum submitted. My comments were: 1. Section 4.2 (Site Geology and Hydrogeology) of the Remedial Action Plan Addendum must be revised to reflect the actual LPH thickness in the monitoring wells gauged on February 5, 2009. The infonnation is incorrect. 2. LPH recovery through the use of Spill Buster(s) must be re-initiated to accelerate the remedial process and prevent LPH from migrating off-site. 3. Install temporary sub-slab pressure monitoring points in the basement of the A&C property to ensure vapor control once the SVE system is operational on the A&C property (see attached map). 4. The decision to proceed with Phase IT and Phase mof the Remedial Action Plan Addendum will be made by the Department. 5. Remove items 1 and 2 from the March 2009 Corrective Action Plan and re-submit. 6/19/09 - Haggerty: had conference call with Ken Drake from ExxonMobil and Kleinfelder. The last issue holding up my RAP and RAP addendum approval was LPH recovery in addition to SVE/AS. Ken Drake agreed and sent an email stating LPH recovery will be incorporated into the remedial system and an additional RAP Addendum will be submitted. A figure showing the location of the proposed additional points will be provided for approval by the end of July 2009. A RAP Addendum presenting the revised SVE/AS and product recovery remediation system, as well as the supporting field observations, boring logs, etc., will be submitted within 60 days of completion of on-site drilling. RAP approved April 2010 - Currently, all system wells have been installed and the system, itself, is to be installed soon. Con Ed to install= electricity for the remedial (System requires 400amp service) in April. A&C property is still not open for business. Vapor Abatement System for the adjacent property is operating on the station s power. May 2010 - Con Ed informed Kleinfelder the system power won't be installed until Sept. 30. If he can't get it re-scheduled earlier, PM will make a call on their behalf July 2010 - Con Ed has installed power now waiting on delivery of the system. August 2010 - SVE/AS/Product Recovery system being constructed in Canada and is on schedule to be delivered in the first week of Sept. High concentrations of MTBE appear to be coming from the Hess Station

EXXONMOBIL (Continued) **S108957494**

immediately adjacent to the property to the east. EM requested FOIL of neighboring Hess Station records which PM provided. EM will be calling in a new Spill Oct.2010 - A SSUR was recieved. (SD) November 2010 - EM has handed the project over to Liberty Petroleum Realty LLC. See 11/18/10 letter from Liberty. (sd) February 2011 - SSUR due by the end of the month. PM and R2 Spills(Sharif) will discuss the recent on-site MTBE spike adjacent to the neighboring Hess station and determine whether Hess must proceed with an investigation. March 2011 - Sharif reviewed SSUR and asked Hess to perform SI to determine whether MTBE is coming from their station. System should be running in April April 2011: SVE/AS system start-up on April 20 July 2011 - System start-up report due in August August 2011: reviewed and approved the Start-up Report. Aracdis called to inform PM that the system shut itself down due to overheating of the CatOx unit when they turned on the AS legs. They should have consulted w/ PM before turning on the AS. Product remains on-site. November 2011: SVE/AS system running well. An ethanol detection in 3 wells beneath the adjacent building (no wells surrounding the current tanks or lines contained ethanol) prompted a discussion with ACradis PM. She re-sampled immediately and the results were negative for ethanol. Site needs Consnet Order with Liberty, currently have CO with EM February 2012 - site under global order between Liberty and ExxonMobil. System running well, Still can't turn on the whole system April 2012 - expanding the system with 1 additional AS well may be necessary. System running well June 2012 - expanding the system to cover an additional area on hold. SVE and product removal appears to be improving the area around MW-18 December 2012 - semi-monthly gauging of MW-18 was discontinued. System operating well. I approved the discontinuation of several wells. The were consistantly clean for years February 2013 - system good. some metals desorption around AS wells May 2013- system continues to operate well. Groundwater contamination is substantially reduced October 2013 - approved shutting down the system for the subsurface to reach static conditions to access whether additional mass can be removed May 22, 2014 - Haggerty: received call from Art Clark from First Environmental to discuss the possible closure of the Spill. Their client is the adjacent grocery store where product was first encountered during the property's Phase II investigation leading to the remediation of the former ExxonMobil gas station. He requested a conference call to talk about their client's concerns May 29, 2014 - had conference call with First Environmental, adjacent property owner (Jonathan Abed), Jim Moras, Scott Caruso and PM. They proposed Arcadis (RP's consultant) install 1-2 wells inside their client's grocery store where high dissolved BTEX concentrations (up to 80,000ppb) were encountered in 2009 because Arcadis is proposing Spill closure. Those monitoring wells were destroyed by the grocery store owner before the SVE/AS system came on-line because the concrete slab inside the grocery store was extended over the wells making them inaccessable. We inform them that a structural evaluation of that area would be required if a GeoProbe or drill rig was to install a monitoring well there. Based on our information, a large subsurface void remained below this area. June 5, 2014 - Haggerty: Jim Moras and PM had conference call with Arcadis (Sahithi Rondla, Andy Korik, and Neil Frasca) because they heard from the adjacent property's consultant, First Environmental. We informed them that we believe their request for additional data at the adjacent property is reasonable. October 20, 2015 - Haggerty: Issued NFA letter stating

EXXONMOBIL (Continued) **S108957494**

the Spill does not meet standards including the caveat that the Spill can be re-opened if contamination is encountered which requires additional remediation. The Spill was remediated to the extent feasible. Remedy consisted of on-site source removal and a SVE/AS system operated on and off-site until asymptotic levels of mass were recovered. Post-system shutdown, groundwater monitoring revealed no rebound in dissolved-phase contamination and the Spill would have been closed earlier if the adjacent property owners had not requested additional performance data. The Department determined the Spill needed to be closed to be consistent with the program. We entertained additional data being collected on the adjacent property but the logistical problems made it collection difficult and the various parties (ExxonMobil, Liberty Petroleum, the adjacent property owners and their consultant) involved created delay. The area in question in approximately 1500sq ft and the down-gradient groundwater is clean."

Remarks: "As per PBS inpsection on 2/9/07 by DEC Falvey, product found in sump and spill found but not reported. Note also heavy gasoline contamination at site immeidately adjacent to tank pad (Spill #0706608)"

DEC Memo:	"09/14/07-Hiralkumar Patel. spoke with Frank at Galli engineering. they have been hired by property owner A&C development. as per Frank, Phase II was done as part of rezoning of the site and DEP required for such investigation. they did five borings on site and took five soil samples and one groundwater sample from boring (no well installed). soil borings were terminated at 12 ft depth, at depth of proposed building foundation. and groundwater sample was taken at 23 ft bg and found free product on top of water. currently there is a vacant building and as part of redevelopment, existing building will be demolished. Frank has sent samples to lab, today. he will send analytical results once he has it. there was no PID readings observed from soil samples. asked Frank to send site plan with sampling locations and location of suspected gas station on W 145th st. property owner: 2495 Realty Corp. C/O A&C Development Attn.: Sandra Acosta 300 Northern Blvd, Suite # 200 Grate Neck, NY 11021 PH. (516) 466-2122 (O) (646) 752-0576 (C) Fax (516) 466-2855 email: sacosta@ac-dev.com Frank Gehrling Galli Engineering Ph. (631) 271-9292 Fax (631) 271-9345 email: fgehrling@gallieng.com left message at A&C development. from area map, Mobil gas station (PBS #: 2-157929, station manager: 212-926-5643) is next to subject site along W 145th Street. found two old closed cases at gas station (spill #s: 9008914 & 0507314). Mobil station is on east of subject site, towards Harlem river. (in general, mobil station is on down gradient from site) alternate addresses for the subject site: 160-164 W 145th Street, 2495-2499 7 Ave, 2495-2499 Adam C Powell Blvd received email from Frank with sampling location plan. there were nine geotechnical borings (B-1 to B-9; no environmental data) and five soil borings (SB-1 to SB-5; for Phase II) done. soil borings went to 12 ft, except SB-3 which had refusal at 8 ft. groundwater sample was collected adjacent to geotechnical boring B-3, at the northeastern corner of the building. The Mobil gas station is adjacent to the subject property. The USTs are about 30' from B-3. The groundwater sample had a very strong odor of gasoline and there was a layer of free product in the sample jar. 09/17/07-Hiralkumar Patel. received message from Sandra Acosta. left message for Sandra. received call from Ms. Acosta. she mentioned that currently site has two story vacant building, which was a super market. building was running on gas heating sustem. as per Ms. Acosta there are no tanks on-site. asked Ms. Acosta to submit copy of Phase I report and scaled site map with sampling locations. as part of redevelopment, they will

EMPTY COMMERCIAL BLDG. (Continued) **S108764509**

demolish existing building and will construct residential complex with parking in basement. as per Ms. Acosta, basement floor will be 14 ft bg. told Ms. Acosta that RAP must be approved prior to any development at site. received Phase I from Ms. Acosta. abstract: - entire site is covered by a two-story building - property is approx. 30 ft above mean sea level - regional groundwater flows in east direction towards the Harlem river - as per site owner, supermarket was operational for more than 20 years - current building first appear on the 1939 Sanborn Map 09/26/07-Hiralkumar Patel. sent letter to Ms. Acosta requiring soil/groundwater delineation, site specific groundwater flow direction, interim remediation and vapor barrier installation. letter emailed to Ms. Acosta and Frank. re-sent letter with DEC Vought's name as project manager. 10/03/07-Hiralkumar Patel. received email from Ms. Acosta with sample analyticals and site map. found some SVOC contamination in soil samples, but heavy contamination in groundwater sample. few values of groundwater contamination: ----------GW-1
2-Methylnaphthalene----------51,000
Naphthalene----------55,000
1,2,4-Trimethylbenzene------540,000
1,3,5-Trimethylbenzene------550,000
Benzene----------28,000
Toulene----------290,000
Ethylbenzene----------360,000
Xylene----------1290,000
MTBE----------4,300 sent email to Ms. Acosta requiring further investigation, as mentioned in letter. 10/31/07-Vought-File review by Vought: Letter from DEC Patel to Sandra Acosta (A&C Development)-9/26/07. CSL sent to Acosta requiring delineation of soil and groundwater via installation of monitoring wells 2)delineation of soil contamination 3)implementation of interim remedial measures including weekly recovery and monitoring of free product 4)installationof vapor barrier and possibly SSDS(note possible reference to vapor phase contamination in Galli Final Phase II Report) 5)collection of endpoint soil samples if soil contamination is noted during excavation for foundation. Final Phase II Investigation Report (A&C Development Partners amd Galli Engineering)-10/4/07. Site is E designated. Galli recommends installation of three monitoring wells. No source of petroleum contamination was identified in soils at the site in ten soil samples and as such Galli feels that endpoint sampling is not necessary. Request to table IRM issues until groundwater delineation is complete as RP may be determined to be RP next door and they will be responsible. Pending additional groundwater delineation, we believe NYSDEC should help us get the monetary equivalent to pay for the membrane from the adjacent property owner . Vapor mitigation system not necessary due to basement parking garage in building. Phase II ESA-Galli Engineering-10/4/07. Site will be developed as eleven (11) story mixed use apartment building with a one story open air ventilated garage . Five geoprobe borings to a depth of 12' and collection of ten soil samples and one groundwater sample. Depth of proposed excavation is twelve feet. South of property is retail, east is an active gas station. Groundwater at depth of 23' below grade. There was a very strong odor of petroleum, thought to be gasoline, during the groundwater sampling event . The minor VOC contamination found in the soil may be the result of spreading of vapor phase gasoline originating in groundwater since no evidence of a source

EMPTY COMMERCIAL BLDG. (Continued) **S108764509**

area form a spill of gasoline was found on the site in the soil samples . Report recommends further investigation to determine if adjacent site is the source. Soil analyticals show minor PAH exceedences attributable to fill material and no VOC detections. Groundwater analytical shows: 28000ppb benzene (GW1), 290000ppb toluene(GW1), 490000ppb xylene(GW1), 360000ppb ethylbenzene(GW1), 11000ppb napthalene(GW1), 4300ppb MTBE(GW1). DEC requires: 1)cc to DEP as site is E designated 2)collection of endpoint samples from final excavation 3)IRM including product recovery if applicable 4)SSDS and vapor barrier 5)confirm that groundwater delineation is needed 6)spills, TTF on adjacent gasoline site 7)opening of spill on ExxonMobil property and cc to ExxonMobil 7)Depth of proposed foundation 8)cc to DEC Urda 11/2/07-Vought- See also spills #0751061 (open) and closed spill 0611117. Spoke with DEC Krimgold and as per PBS records, PBS inspection performed by DEC Falvey in 2/07 at 150-154 West 145th St and numerous violations including product in sump/catch basin. DEC Krimgold also confirmed that spill number should have been reported by ExxonMobil upon discovery of product in the sump. Vought called ExxonMobil (Kenneth Drake Cell 908-451-0956 Fax 609-698-8761 (kenneth.j.drake@exxonmobil.com). Left message with Drake to return call with contact info. Vought called Acosta (516-466-2122 fax:516-466-2855) for DEP contact and depth of foundation and to explain requirements and fact spill opened on adjacent site and left message to return call to DEC. Vought called Galli Engineering -Frank Gehrling(631-271-9292 fax:631-271-9345). As per Gerling, free product was noted in MW1 and proposed foundation depth is approximately 13’ below grade. Vought also suggested fingerprint on product. As per Gherling, building was originally movie house with possible heating oil tank converted to grocery store. Old building still in place. Gehrling will return call to DEC Vought with DEP contact information for cc list. Vought received email from Acosta that DEP project manager is Maurice Winter. 01/11/08-Vought-Current File Review by Vought: Letter from DEP Wuthenow to Gehrling-12/4/07. DEP reviewed October 2007 Phase II. Site would be an 11-story residential building with ground floor retail use and underground parking garage. Site currently occupied by 2-story commercial building that will be demolished. Five soil borings performed by Gali in September 2007. Groundwater present at 23’ below grade during drilling. NYCDEP requires: 1)submission of RAP and disposal as per NYSDEC regulations, site specific Construction Health and safety plan, an active SSD system, covering of soils with plastic sheeting, removal of impacted soil in accordance with DEC regulations, maintaining dust supression, closure of all tanks in accordance with DEC, DEP discharge permit if dewatering is to take place, and note that DEC may have further requirements with respect to groundwater. Email from Gehrling to DEC Vought-12/6/07. Monitoring wells have been installed and are being developed. Brandon Mooney of Kleinfelder, consultant for ExxonMobil has been in contact with us and we have supplied him with a copy of the Phase II ESA . Remedial Action Plan (Galli Engineering)-1/5/08. Final Remedial Investigation Report included that shows no soil contamination found onsite in 5 soil borings. No historical or current use of gasoline onsite. No active groundwater remediation work planned as this site not source. Presence of high bedrock formation in the west side of the property. Three monitoring wells were installed into bedrock however one well remains dry. Galli agrees to soil excavation and installation of an SSDS system and vapor barrier. Bedrock rises quickly from east to

EMPTY COMMERCIAL BLDG. (Continued) **S108764509**

west and When uncorrected depths of the depth to bedrock were plotted, the map shows a generally easterly dip to the slope of the bedrock surface . There is also a bedrock high to the south. All soils will be excavated to a depth of approximately 12'and removed from the Site... . Also installed will be watertight sheeting and waterproofing and a vapor proof membrane barrier. Galli is of opinion that a passive system would be sufficient since the subsurface garage level of this building would be ventilated. However the NYCDEP and NYSDEC have requested that the system be active . After review of letters sent by DEP and DEC, Vought noted that active SSDS was only required by NYCDEP, not DEC. Endpoint samples will also be collected. Soils will be direct loaded onto trucks to prevent odors in neighborhooed and a spill Closure Report will be submitted to the DEC and NYCDEP. Vought sent letter approving of RAP with cc to Exxon Mobil (Drake), NYCDEP Wuthenow, DEC Urda and Gehrling. 06/10/08-Vought-Received call from and spoke to Sandra who works for owner of property. Property will not be developed for at least one year due to delay in not receiving approval from DEP and due to poor economy. Exxon Mobil would like to enter in cleanup agreement with owners of adjacent site (AC Development). DEC expressed no concern of holding activity on site for year as responsible party is ExxonMobil. 09/05/08-Vought-Spill transferred to DEC Haggerty as RP for site is ExxonMobil at 150-154 145th St (Spill #0751061). 3/4/09 - Haggerty: Spill consolidated into ExxonMobil spill 0751061. The Mobil Station 17-QDM at 150-54 West 145th Street, Harlem NY is directly adjacent to this property and is the proven source of this contamination. The Mobil station is currently in active remediation removing tanks and contaminated soil as an IRM. ExxonMobil requested the consolidation of this spill into their spill. spill closed "

Remarks: "During a phase 2 site assesment found gasoline in the groundwater. There is a Mobil gas station next door @ 150 W. 145th st. ... unknown if there is a connection. Small amount of free product found in the water sample. Frank Gehrling 516-723-1785"

SHWS:
Name: 2350 FIFTH AVE., NEW YORK (AKA, PS 141)
Address: 2340 & 2350 FIFTH AVENUE
City,State,Zip: NEW YORK, NY 10037
Program: HW
Site Code: 57691
Classification: 4
Region: 2
Acres: 1.543
HW Code: 231004
Record Add: 11/18/1999
Record Upd: 05/23/2018
Updated By: JHOCONNE
Site Description: Location: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in the borough of Manhattan, City and State of New York. Site Features: The site is approximately 1.54 acres, and is entirely occupied by a building. The building is comprised of three connected sections: a two-story section along Fifth Avenue, a three-story section in the center, and a one-story section to the west. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200 to 300 feet east of the site. Following completion of remediation, the site is currently occupied by a self-storage facility and a charter school. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing

2350 FIFTH AVENUE CORP (Continued) **1000108749**

building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or perc) as a cleaning solvent. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building. Currently the site is use for self storage facility and for art studio space. Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.

Env Problem: Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were tetrachloroethene (PCE) and its breakdown products [trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), vinyl chloride (VC)] in soil, groundwater and soil vapor and sub-slab insulation material. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil, groundwater, soil vapor and sub-slab insulation material is being managed under the Site Management Plan.

Health Problem: People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement and the on-site building. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion.

2350 FIFTH AVENUE CORP (Continued) **1000108749**

Site-related contaminants were historically found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air guidelines. To minimize the potential for the inhalation of site-related contaminants, a sub-slab depressurization system was installed beneath the building. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Site Description: Location: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in the borough of Manhattan, City and State of New York. Site Features: The site is approximately 1.54 acres, and is entirely occupied by a building. The building is comprised of three connected sections: a two-story section along Fifth Avenue, a three-story section in the center, and a one-story section to the west. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200 to 300 feet east of the site. Following completion of remediation, the site is currently occupied by a self-storage facility and a charter school. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or perc) as a cleaning solvent. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building. Currently the site is use for self storage facility and for art studio space. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or perc) as a cleaning solvent. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building. Currently the site is use for self storage facility and for art studio space. Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.

Env Problem: Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were tetrachloroethene (PCE) and its breakdown products [trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), vinyl chloride (VC)] in soil, groundwater and soil vapor and sub-slab insulation material. Remedial actions have

2350 FIFTH AVENUE CORP (Continued) **1000108749**

	successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil, groundwater, soil vapor and sub-slab insulation material is being managed under the Site Management Plan.
Health Problem:	People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement and the on-site building. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Site-related contaminants were historically found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air guidelines. To minimize the potential for the inhalation of site-related contaminants, a sub-slab depressurization system was installed beneath the building. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Site Code: 57691
Site Description: Location: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in the borough of Manhattan, City and State of New York. Site Features: The site is approximately 1.54 acres, and is entirely occupied by a building. The building is comprised of three connected sections: a two-story section along Fifth Avenue, a three-story section in the center, and a one-story section to the west. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200 to 300 feet east of the site. Following completion of remediation, the site is currently occupied by a self-storage facility and a charter school. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. The building is comprised of three connected sections: a two-story section along Fifth Avenue, a three-story section in the center, and a one-story section to the west. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200 to 300 feet east of the site. Following completion of remediation, the site is currently occupied by a self-storage facility and a charter school. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or perc) as a cleaning solvent. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of

2350 FIFTH AVENUE CORP (Continued) **1000108749**

the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building. Currently the site is use for self storage facility and for art studio space. Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.

Env Problem: Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were tetrachloroethene (PCE) and its breakdown products [trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), vinyl chloride (VC)] in soil, groundwater and soil vapor and sub-slab insulation material. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil, groundwater, soil vapor and sub-slab insulation material is being managed under the Site Management Plan.

Health Problem: People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement and the on-site building. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Site-related contaminants were historically found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air guidelines. To minimize the potential for the inhalation of site-related contaminants, a sub-slab depressurization system was installed beneath the building. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Site Code: 57691
Site Description: Location: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in the borough of Manhattan, City and State of New York. Site Features: The site is approximately 1.54 acres, and is entirely occupied by a building. The building is comprised of three connected sections: a two-story section along Fifth Avenue, a three-story section in the center, and a one-story section to the west. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200 to 300 feet east of the site. Following completion of remediation, the site is currently occupied by a self-storage facility and a charter school. Past Use of the Site: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of

2350 FIFTH AVENUE CORP (Continued) **1000108749**

the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or perc) as a cleaning solvent. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA), ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building. Currently the site is use for self storage facility and for art studio space. Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.

Env Problem: Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were tetrachloroethene (PCE) and its breakdown products [trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), vinyl chloride (VC)] in soil, groundwater and soil vapor and sub-slab insulation material. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in soil, groundwater, soil vapor and sub-slab insulation material is being managed under the Site Management Plan.

Health Problem: People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement and the on-site building. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Site-related contaminants were historically found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air guidelines. To minimize the potential for the inhalation of site-related contaminants, a sub-slab depressurization system was installed beneath the building. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

FINDS:

Registry ID: 110000808074

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State and tribal institutional control / engineering control registries

RES DECL: Restrictive Declarations Listing
A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements
New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing
In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Date of Government Version: 01/01/2002
Date Data Arrived at EDR: 07/08/2005

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/14/2019

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Longitude (West):	73.936114 - 73° 56' 10.01''
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	589709.3
UTM Y (Meters):	4520036.0
Elevation:	19 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5940599 CENTRAL PARK, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

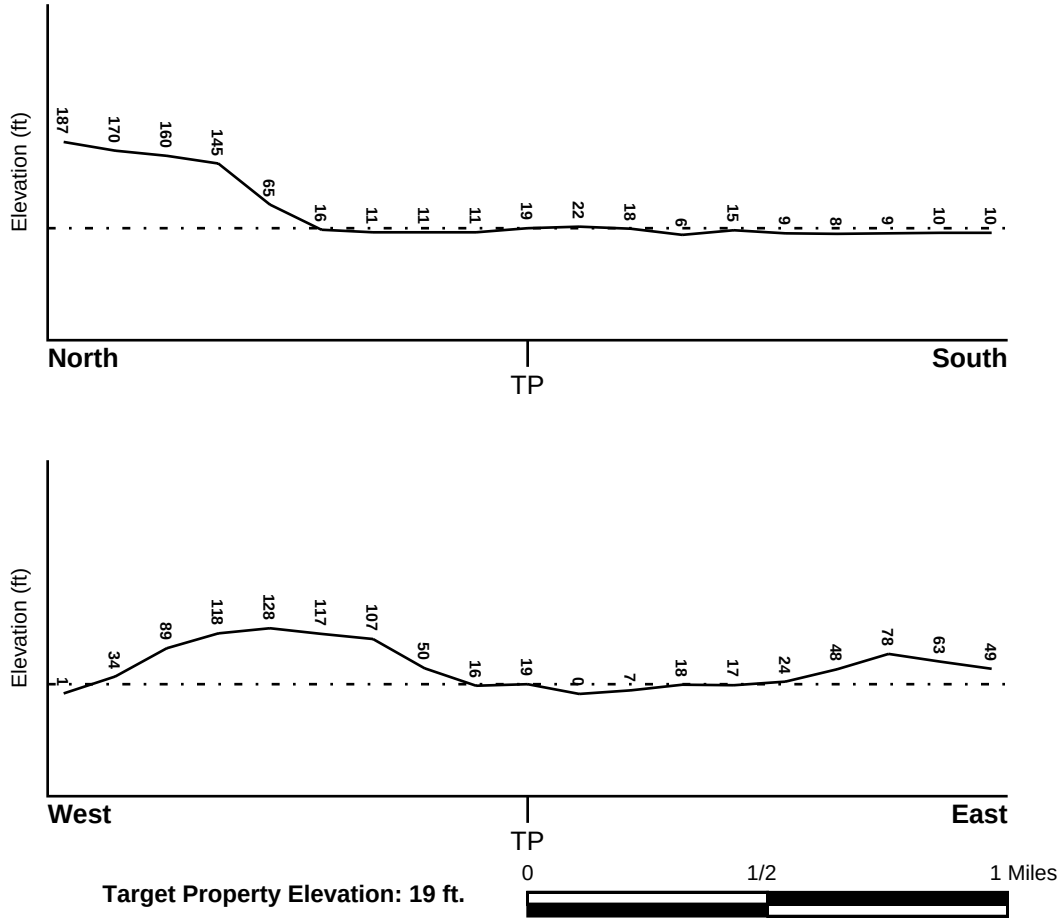
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 19 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3604970083F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
3604970079F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CENTRAL PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT **GEOLOGIC AGE IDENTIFICATION**

Era:	Paleozoic	Category:	Stratified Sequence
System:	Ordovicias		
Series:	Lower Ordovician and Cambrian carbonate rocks		
Code:	OC *(decoded above as Era, System & Series)*		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	URBAN LAND
Soil Surface Texture:	variable
Hydrologic Group:	Not reported
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 10 inches
Depth to Bedrock Max:	> 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Site Description

Location The approximate 37,500-square-foot (0.86-acre) proposed brownfield site is located at 280 West 155th Street in the Harlem neighborhood of Manhattan, New York, and is identified as Block

2040 and Lot 48 (Former Lots 48, 61, and 62) on the New York City Tax Map. The site is bound to the north by West 155th Street and the elevated 155th Street Viaduct associated with the Macomb¿s Dam Bridge followed by Holcombe Rucker Park; an asphalt-paved parking lot to the east; two single-story commercial/industrial buildings, two four-story mixed-use residential/commercial buildings, and two four- to six-story residential buildings to the south; and by Frederick Douglass Boulevard to the west with a two-story mixed-use residential/commercial building across the street. Based on a 25 March 1999 survey, existing site grade generally ranges from about el 14 to about el 17 North American Vertical Datum of 1988 (NAVD88). Site Features The site is located in an urban area with an at-grade asphalt paved parking lot The site has been used as a parking lot since 1996. Current Zoning and Land Use The site is located within a commercial zoning district (C8-3) and is currently designated for garage/gas station use (G6). The site is not located within a special zoning district and no environmental restrictions are currently associated with the property. The adjoining parcels and surrounding area are of mixed use including residential, commercial, public parks and parking lots. Historical Site Use Sanborn Fire Insurance Maps provided by Environmental Data Resources, LLC (EDR) reveal that the site was generally vacant in 1893 with the exception of a one-story building of undesignated use on the westernmost portion of the site. Since at least 1909 the site has been developed. A large dance hall building and associated sheds occupied the central portion of the site, commercial buildings occupy the western portion of the site, and the eastern portion of the site is occupied by a portion of the adjacent amusement park. Between 1939 and 1977, the two-story dance hall building occupied the central portion of the site, a three-story commercial building with a basement and a vacant lot occupy the westernmost portion of the site, and a one- to two-story steam laundry building with a boiler room occupies the easternmost portion of the site. In 1979, the dance hall building and commercial building are no longer shown and these portions of the site appear to be vacant; the vacant area is labeled for parking starting in 1986. In 1983, the steam laundry building is labeled for unspecified commercial use and the building is no longer shown in 2001. The site has been generally vacant and used for parking since 1996. Records maintained online by the NYC Department of Buildings (NYCDOB) confirmed that the easternmost portion of the subject property, formerly identified as Lot 48, was historically operated as a laundry facility between at least 1925 and 1941. NYCDOB records also documented that fuel oil use was historically approved for former Lot 48 and former Lot 61 between at least 1937 and 1968. The review of Sanborn Maps revealed that the adjacent property to the south located at 235 West 154th Street was historically operated as an automotive repair garage between at least 1939 and 2005. NYCDOB records confirmed these operations between 1925 through at least 1951, and also that the property was approved for fuel oil and gasoline storage and automotive repair. Notably, this 1951 certificate of occupancy includes former Lot 48. According to the EDR Radius Map Report, the subject property at the address 216 West 155th Street is listed in the US Brownfields database and the Facility Index System (FINDS) database. The US Brownfields database record is reportedly associated with former Lots 48 and 61 and notes that 0.57 acres of the site was historically operated for commercial purposes and 0.29 acres of the site was historically operated for industrial purposes. Additional research performed on USEPA¿s online MyProperty database revealed that the site is listed in the FRS Facility Detail Report

Database under Facility ID No. 110044214490 for participation within the Assessment, Cleanup and Redevelopment Exchange System (ACRES) as a Brownfields Property as of 20 October 2011 under Brownfield ID No. 135530. The site is listed as ¿assessed¿ with a cleanup required and an EPA grant of $9,731.00. The site is also listed in the Enforcement and Compliance History Online (ECHO) database, although no violations were reported. Site Geology and Hydrogeology According to environmental and geotechnical investigations completed in 2019, the subsurface strata beneath the site consists of historic fill generally consisting of fine to coarse sand with varying proportions of silt and gravel and miscellaneous debris, including brick, wood, asphalt, plastic, and metal to depths that ranged from 12- to 25-feet below grade. These observations were generally confirmed during a 2019 Phase II Investigation at depths that ranged from 12- to 15-feet below grade, corresponding to the completion depth of the borings. According to the 2019 geotechnical investigation, the fill material is underlain by very soft to soft upper clay, medium dense silty sand, medium stiff to stiff lower clay, dense to very dense sand and gravel, and weathered / decomposed rock. The site is underlain by Inwood Marble, consisting mainly of white to blueish-gray calcitic and dolomitic marble, and Fordham Gneiss, consisting mainly of black and white layered gneiss. The top of bedrock was observed to range between approximately 33- to 105-feet below grade. Competent bedrock was not encountered in soil borings installed as part of the 2019 RI. The site is located in an area historically inundated by water associated with the Harlem River. As the area is no longer inundated with water, it is likely that the area was subject to historical filling using material of an unknown origin to fill the area and raise grades. Based on environmental and geotechnical investigations, groundwater was encountered at depths ranging from about 6 to 10 feet below ground surface (bgs). Based on area topography, observed water level measurements, and the proximity of the Site to the Harlem River, groundwater is inferred to flow to the southwest towards the Harlem River.

Site Environmental Assessment

Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available.

Site Health Assessment

Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

FOIL Request :: W063026-122719

1 message

New York DEC Support <newyorkdec@mycusthelp.net> Fri, Dec 27, 2019 at 3:52 PM
To: "emenos@akrf.com" <emenos@akrf.com>

Dear Emmanuelle :

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 12/27/2019 and given the reference number FOIL #W063026-122719 for tracking purposes. You may expect the Department's response to your request no later than **1/28/2020**.

Record Requested: **Records pertaining to: underground storage tanks (USTs), spill records, remediation sites, dump sites, soil and groundwater remediation, storage of hazardous materials, and/or hazardous materials activities for 2926 Frederick Douglass Boulevard and 204 West 155th Street (Block 2040/Lots 40, 43, and 48) New York, NY**

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

RE: PUBLIC RECORDS REQUEST of 12/27/2019, Reference # W063026-122719

Date: 01/13/2020

Dear Administrator Emmanuelle Menos,

I write in response to your Freedom of Information Law (FOIL) request seeking:

> *Records pertaining to: underground storage tanks (USTs), spill records, remediation sites, dump sites, soil and groundwater remediation, storage of hazardous materials, and/or hazardous materials activities for 2926 Frederick Douglass Boulevard and 204 West 155th Street (Block 2040/Lots 40, 43, and 48) New York, NY*

Please be advised that a diligent search of the files maintained by DEC produced no responsive records.

If you believe you have been unlawfully denied access to responsive records, you have the right to appeal. Any such appeal must be submitted in writing and within thirty (30) days of the date of this email. Appeals must be directed to:

> FOIL Appeals Officer
> Office of General Counsel
> New York State Department of Environmental Conservation
> 625 Broadway, 14th Floor
> Albany, NY 12233-1500

Your FOIL request is now closed. If I can be of further assistance, please contact me at (718) 482-3103 and reference FOIL #W063026-122719, or simply reply to this email. Thank you.

Sincerely,

Region 2 FOIL Coordinator

Emmanuelle Menos <emenos@akrf.com>

[OpenRecords] Request FOIL-2019-826-06023 Submitted to Department of Environmental Protection (DEP)

1 message

The Department of Environmental Protection (DEP) has **closed** your FOIL request FOIL-2019-826-06023 for the following reasons:

- A diligent search for records responsive to your request did not locate any such records. Accordingly, your request is denied.

You may appeal the decision to deny access to material that was redacted in part or withheld in entirety by contacting the agency's FOIL Appeals Officer: foilappeals@dep.nyc.gov within 30 days.

Date 12 / 27 / 19

Dear Record Access Officer:

I, Emmanuelle Menos request copies of any inspection reports and/or records located in the Bureau of _____, of the New York City Department of Health and Mental Hygiene.

The records pertain to:

- ☒ Lead Poisoning
- ☐ Animal bite
- ☐ Employment/Human Resources
- ☐ Contracts/RFPs
- ☐ Pest Control
- ☐ Correctional Health
- ☐ Early Intervention
- ☐ Food Safety
- ☐ Mental Health
- ☐ Communicable Diseases
- ☐ School Health
- ☐ Day Care
- ☒ Other: _____

Please specify/describe the records you are requesting from the above program(s):

Records pertaining to: underground storage tanks (USTs), spill records, remediation sites, dump sites, soil and groundwater remediation, storage of hazardous materials, and/or hazardous materials activities for 2926 Frederick Douglass Boulevard and 204 West 155th Street (Block 2040/Lots 40, 43, and 48) New York, NY

There is a charge of 25¢ per page or actual costs of reproduction, payable in advance.

Re: **FOIL Request**
2926 Frederick Douglass Boulevard and 204 West 155th Street (Block 2040/Lots 40, 43, and 48) New York, NY

Dear Sir or Madam:

Pursuant to the Freedom of Information Law, we are requesting information regarding underground storage tanks (USTs), spill records, remediation sites, dumpsites, soil and groundwater remediation, storage of hazardous materials and/or hazardous materials activities for the above referenced site. Your response can either be faxed to (212) 726-0942 or mailed to the address identified above. If you have any questions, please feel free to call me at (646) 388-9513.

Thank you in advance for your assistance and cooperation.

Sincerely,
AKRF

January 30, 2020

Mr. Malcom A. Punter
Harlem Congregations for Community Improvement
256 West 153rd Street
New York, NY 10039

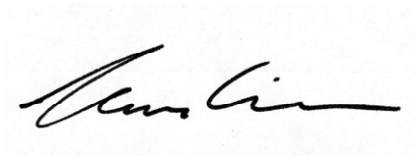
Re: Phase I Environmental Site Assessment
"Post Office Site" 83 & 93 Macombs Place, New York, New York 10039
AKRF Project Number: 12310

Dear Mr. Punter,

AKRF, Inc. is pleased to submit this Phase I Environmental Site Assessment Report for the above-referenced Property. This report includes the findings of a reconnaissance of the Property, an evaluation of readily available historical information and selected environmental databases and electronic records. AKRF, Inc. met the requirements of American Society for Testing and Materials (ASTM) as established by ASTM Standard E1527-13 unless noted otherwise in Section 9.0: "Limitations and Data Gaps".

We appreciate the opportunity to provide you with our services. If you should have any questions, please do not hesitate to contact us.

Sincerely,
AKRF, Inc.



Marcus Simons
Senior Vice President

EXECUTIVE SUMMARY

AKRF, Inc. (AKRF) was retained by Harlem Congregations for Community Improvement (HCCI) to perform a Phase I Environmental Site Assessment (ESA) of 83 & 93 Macombs Place in New York, NY (Manhattan Tax Block 2039, Lots 15 & 45) (the "Property"). At the time of the reconnaissance, the approximately 28,000 square foot Property included an approximately 16,740-square foot, single-story United States Postal Service (USPS) building (Lot 45) with a cellar, and an adjacent, approximately 11,240-square foot Post Office parking lot (Lot 15). The Property was located in the Bradhurst section of Manhattan, as shown on Figure 2. The surrounding area was mixed use with residential, parkland, automotive, commercial/retail uses, and medical facilities.

This Phase I Environmental Site Assessment was performed in conformance with ASTM Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice*. Any exceptions to, or deletions from, the Standard are described in Section 8.0. The term "Recognized Environmental Condition" (REC) means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The Standard also includes definitions of Historic REC, Controlled REC and *De Minimis* Condition.

A Tier 1 Vapor Encroachment Screen was also conducted in accordance with ASTM Standard E2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. The term "Vapor Encroachment Condition (VEC)" means the presence or likely presence of vapors from chemicals of concern (COC) in the subsurface of a property caused by the release of vapors on or near the property.

The assessment revealed evidence of the following RECs/VECs:

- The Property was listed as being a gasoline service station as early as 1939 with ten 550- gallon gasoline underground storage tank (USTs), two auto shops and "pits". According to the NYSDEC Petroleum Bulk Storage (PBS) database, one 2,000-gallon underground storage tanks (UST) and five 550-gallon USTs containing gasoline were closed and removed in 1988. One 550-gallon UST containing gasoline is listed as in service; however, the site visit access was limited to the publicly accessible areas and any active fueling or maintenance/repair facilities were not observed. There must also have been fuel oil tanks as Spill No. 8903078/8907091 was reported in June 1989 at the Property relating to a 1,500-gallon No. 2 fuel oil tank with a 0.5 gal/hour leak. The spill was closed in October 1992. No further information was provided.
- Additional automotive/industrial facilities were located nearby including garages with gasoline tanks and repair facilities on adjacent blocks, and petroleum USTs at an adjacent property.
- Sanborn maps, City Directories, and regulatory database report listings indicated that the Property was developed as early as 1909 with the uses store, gasoline station, auto shops with pits, filling station, and it's current use as a post office and associated parking. Potential undocumented and/or documented releases associated with the aforementioned uses may have affected subsurface conditions (i.e., from potential former chemical and/or petroleum usage).

Other Environmental Concerns and De Minimis Conditions

- Buried foundation elements and demolition debris from the former Property buildings could include polychlorinated biphenyls (PCBs), asbestos containing materials (ACM), lead-based paint (LBP).

- Based on the age of the current building (constructed by 1968, according to historical land use maps), building materials contain polychlorinated biphenyls (PCBs), asbestos containing materials (ACM), lead-based paint (LBP).

Recommendations

- Prior to redevelopment of the Property, AKRF recommends conducting a subsurface investigation, including a geophysical survey; and the collection and laboratory analysis of soil, soil vapor, and groundwater samples (if encountered above bedrock).
- If any petroleum USTs or buried ASTs are encountered during the redevelopment, they should be closed and removed, along with any contaminated material, in accordance with applicable requirements. Any evidence of a petroleum spill should be reported to New York State Department of Conservation (NYSDEC) and addressed in accordance with applicable regulatory requirements, including those relating to tank registration.
- During soil disturbance, all excavated soil should be managed in accordance with applicable regulatory requirements. All soil and any other materials intended for off-site disposal should be tested in accordance with the requirements of the intended receiving facility. Transportation of material leaving the site for off-site disposal should be in accordance with federal, state and local requirements covering licensing of haulers and trucks, placarding, truck routes, manifesting, etc. If contaminated soil is discovered during soil excavation, it should be removed and disposed of in accordance with applicable regulatory requirements, including those relating to spill reporting, if necessary.
- If dewatering is required during construction, water must be discharged in accordance with New York City Department of Environmental Protection (NYCDEP) requirements.
- Prior to any renovation or demolition activities with the potential to disturb suspect ACM, an asbestos survey should be conducted. If these materials prove to contain asbestos, they should be properly removed and disposed of in accordance with all state and federal regulations prior to any renovation or demolition that would disturb those materials.
- Unless there is labeling or test data that indicates that fluorescent lights, caulking, and electrical equipment, are not mercury- and/or PCB-containing, if disposal is required, it should be performed in accordance with applicable federal, state and local regulations and guidelines.
- Any renovation or demolition activities with the potential to disturb lead-based paint must be performed in accordance with the applicable Occupational Safety and Health Administration regulation (OSHA 29 CFR 1926.62—Lead Exposure in Construction). If the Property is visited regularly by children under 6 years of age, the building may be considered a Child Occupied Facility by the US EPA. Additional lead-based paint requirements should lead-based paint remain during/after renovation may include occupant notification, contractor licensing, and lead-safe work practices.

1.0 INTRODUCTION

AKRF, Inc. (AKRF) was retained by Harlem Congregations for Community Improvement (HCCI) to perform a Phase I Environmental Site Assessment (ESA) of 83 & 93 Macombs Place in New York, NY (Manhattan Tax Block 2039, Lots 15 & 45) (the "Property"). At the time of the reconnaissance, the Property included an included an approximately 16,737 square-foot, single-story plus cellar United States Postal Service (USPS) building (Lot 45) and an adjacent approximately 11,241 square-foot parking lot (Lot 15) in the Bradhurst section of Manhattan as shown on Figure 2. The surrounding area was mixed use with residential, parkland, automotive, commercial/retail uses and medical facilities.

The scope of services for this assessment was in conformance with ASTM Standard E1527-13 (*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice).* Any exceptions to, or deletions from, this practice are described in Section 8.0. The scope included the following:

- Observations of the Property (reconnaissance) to identify potential sources or indications of hazardous substances, including: aboveground storage tanks (ASTs); underground storage tanks (USTs); tank vents and fill ports; transformers and other items that could contain polychlorinated biphenyls (PCBs), drums or areas where hazardous materials were used, stored, or disposed; stained surfaces and soils; stressed vegetation, leaks, odors. In addition, neighboring properties were viewed, but only from public rights-of-way, to identify similar concerns.
- Readily available geological and groundwater (hydrogeological) information was evaluated to assist in determining the potential for contamination migration (including in soil, soil vapor, and/or groundwater) within, from, and onto the Property.
- The reconnaissance of the Property included observation of any readily visible suspect asbestos-containing materials (ACMs) and potential lead-based paint. However, no samples were collected or analyzed, and this reconnaissance provides neither definitive nor exhaustive information.
- A state database of county-level radon concentrations was used to determine typical indoor radon levels and compare them to United States Environmental Protection Agency (USEPA) guidelines.
- Historical fire insurance maps, topographic maps, and aerial photographs for the Property and nearby properties were reviewed to evaluate historical land uses.
- The following federal regulatory databases were reviewed to determine the regulatory status of the Site and properties within the ASTM-specified radii: National Priority List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); Emergency Response Notification System (ERNS); Toxic Chemical Release Inventory System (TRIS); the Permit Compliance System of Toxic Wastewater Discharges (WWD); the Air Discharge Facilities Index (ADF) the USEPA Civil Enforcement Docket. The federal listing of facilities which are subject to corrective action under the Resource Conservation and Recovery Act (CORRACTS) is discussed with the State databases of RCRA listings.
- The following state regulatory databases were reviewed to determine the regulatory status of the Property, adjacent properties, and properties within a predetermined study area; the listings of hazardous material spills (SPILLS); Resource Conservation and Recovery Act Notifiers (RCRA); Chemical Bulk Storage (CBS); Solid Waste Facilities (SWF); Petroleum Bulk Storage (PBS); State Inactive Hazardous Waste Disposal Sites (SHWS); Major Oil Storage Facilities (MOSF); Brownfield Sites; and Historic Utility Sites.

- Local agency reviews including NYC Fire Department records (obtained as part of the database search), online Buildings and Finance Departments records, and Environmental Quality Review (CEQR) E Designation Sites were conducted for the Property only.

2.0 PHYSICAL SITE DESCRIPTION

Visual assessment of the Property and adjacent areas was performed on January 28, 2020 by Mr. Evan Venice of AKRF. Site access was not granted so observations were limited to publicly accessible portions of the Property. The weather was overcast and approximately 40° F, and the visibility generally good. The publicly-accessible portions of the Property was inspected for the presence of stained surfaces, storage tanks, drums, leaking pipes, transformers, suspect asbestos-containing materials (ACMs), suspect lead-containing paint, distressed vegetation, and any other evidence of hazardous material usage and storage. Photographs documenting the inspection are included in Appendix A.

2.1 General Site Conditions

The Property building comprised an approximately 16,737-square foot, one-story, concrete and brick United States Postal Service (USPS) building (Lot 45) with a cellar (not viewed) and an adjacent approximately 11,241 square-foot parking lot (Lot 15). Observed building materials included: concrete and ceramic tiled floors; plaster, brick, and concrete walls; plaster and sheetrock ceilings. The building appeared to be supplied with natural gas provided by Consolidated Edison, (pipes seen entering the building on the northern sidewalk along West 154th Street) and this is presumably used for heating the building. The main entrance to the building was located along its eastern side fronting Macombs Place. The only interior accessible area was the USPS Service Area, which included mailing supplies and teller windows.

The paved parking/loading lot to the south of the building (Lot 15) included employee parking and USPS vehicles. A concrete loading dock could not be observed closely but no hydraulic lifts were apparent. Three dumpsters were observed on the southwestern portion of this lot. No staining or evidence of a spill/release was noted in observed areas.

2.2 Topography and Hydrogeology

Topography at the Property was generally level. Based on the U.S. Geological Survey, Central Park, NY Quadrangle (2013) map, the Property is approximately 23 feet above the National Geodetic Vertical Datum of 1988 (an approximation of mean sea level).

Groundwater may be perched above bedrock (presumed to 20 to 25 feet below grade based on USGS mapping) and is assumed to flow in an easterly direction (based on local topography). However, actual groundwater flow can be affected by bedrock geology, underground utilities and other factors beyond the scope of this study. Groundwater in Manhattan is not used as a source of drinking water.

2.3 Storage Tanks

2.3.1 Underground Storage Tanks (USTs)

According to the NYSDEC Petroleum Bulk Storage (PBS) database, one 2,000-gallon underground storage tanks (UST) and five 550-gallon USTs containing gasoline were closed and removed in 1988. One 550-gallon UST containing gasoline is listed as in service. During the limited inspection, no evidence, such as manways, vent pipes, or dispenser equipment, was observed that would indicate USTs at the Property.

Off-site storage tanks are discussed in Section 5.2.2.

2.3.2 Aboveground Storage Tanks (ASTs)

No evidence, such as tanks or vaults likely to contain tanks, vent pipes or fill caps was observed during the limited inspection to indicate that ASTs are or were present.

No records pertaining to ASTs were identified in the regulatory database or computerized NYCDOB records. However, it is possible that the former Property building contained ASTs that might still be present in the Property subsurface.

2.4 Polychlorinated Biphenyls (PCBs) and Mercury

Until 1979, polychlorinated biphenyls (PCBs), which provided beneficial insulating properties, were used in a variety of products, in particular electrical equipment such as transformers, capacitors, fluorescent light fixtures, and voltage regulators, but also in hydraulic fluids and some other products such as caulking.

Based on the age of the building (constructed by 1968, according to historical land use maps), electrical equipment, caulk, hydraulic equipment, and lighting fixtures, switches and thermostats may include PCB- or mercury-containing components. No obvious leaks or odors were noted in connection with observed equipment or the lighting fixtures.

2.5 Lead-Based Paint

Lead-based paint was generally not used inside commercial buildings after 1977. Based on the age of the building (constructed by 1968, according to historical land use maps), lead-based paint may be present on and within the Property structure. Painted surfaces in the publicly accessible area were observed to be in generally good to fair condition. Any renovation or demolition activities with the potential to disturb lead-based paint must be performed in accordance with the applicable Occupational Safety and Health Administration regulation (OSHA 29 CFR 1926.62—Lead Exposure in Construction).

2.6 Utilities

Consolidated Edison (ConEd) provided electricity and natural gas to the Property and surrounding area. The Property is likely connected to the New York City municipal water and sanitary/storm sewer systems.

2.7 Waste Management and Chemical Handling

Three waste dumpsters were observed on the southwestern portion of the rear parking/loading area. New York City Department of Sanitation is responsible for refuse collection and disposal for the Property. No bulk chemical handling activities were observed at the Property and no evidence of current or former bulk chemical storage was noted.

2.8 Radon

Radon is a colorless, odorless radioactive gas that results from the natural breakdown of uranium minerals in soil, rock, and water, which subsequently enters the atmosphere. It can concentrate in buildings, entering through cracks and other penetrations of a building foundation. Some areas are more likely to have elevated concentrations of radon than others, reflecting subsurface lithologic conditions.

The New York State Department of Health (NYSDOH) maintains a database of radon test results on a local and county level. According to NYSDOH, 124 radon tests were conducted in Manhattan in October 2019. The average basement radon level was found to be 2.07 picoCuries per liter (pCi/L), below the USEPA recommended action level of 4.0 pCi/L.

3.0 ASBESTOS-CONTAINING MATERIALS (ACM)

Asbestos refers to a group of natural minerals that provide good fire resistance and insulation. Asbestos is also commonly found in vinyl flooring, plaster, sheetrock, joint compound, ceiling tiles, roofing materials, gaskets, mastics, caulks and other products. Materials containing more than one percent asbestos are considered asbestos-containing materials (ACM). ACM are classified as either friable (i.e., more readily release fibers, such as most spray-applied fireproofing) or non-friable (such as floor tiles).

Suspect asbestos-containing materials (ACM) were observed in the publicly accessible portions of the building (based on the age of the building, ACM would be anticipated) during the limited reconnaissance and included: ceramic floor tiles and associated mastics, joint compound, tile grout and adhesive, plaster, sheetrock, brick and block mortar. Observed suspect ACM were noted to be in generally good condition. ACM may also be present in other locations not readily accessible during the inspection.

Regulatory requirements for ACM (or suspect ACM until proven not to be ACM) include maintenance requirements and, prior to any renovation or demolition, inspection/sampling by a NYS-certified asbestos inspector to determine if the project will disturb ACM. Any such ACM (and any other ACM subsequently identified) must be removed prior to the renovation or demolition.

4.0 ADJACENT LAND USE

The Property was abutted to the north by West 154th Street followed by Fordham Toyota – Harlem; to the south by West 153rd Street and Macombs Place; to the west by residential buildings; and to the east by Macombs Place followed by a park (Colonel Charles Young Triangle). The surrounding area was mixed use with residential, automotive, parkland, commercial/retail, religious, institutional, and transit uses.

5.0 PROPERTY HISTORY AND RECORDS REVIEW

5.1 Prior Ownership and Usage

5.1.1 Historical Land Use maps

Historical insurance maps were reviewed for indications of uses (or other evidence) suggesting hazardous materials generation, usage, or disposal on or near the Property. Specifically, Sanborn Fire Insurance Maps from 1893, 1909, 1922, 1928, 1939, 1950, 1968-1969, 1976-1981, 1983-1989, 1991-1996, and 2001-2005 were reviewed.

1893

The Property is identified as undeveloped and vacant.

The Property block is undeveloped. The surrounding area is sparsely developed city blocks.

Elevated railroad tracks and a train station were noted along (current) Frederick Douglass Boulevard to the west. A hotel was noted on the north adjacent block, across West 154th Street, followed by a wood products building further north. The surrounding blocks comprised sparse dwellings and vacant land.

1909

The otherwise vacant Property contained a store on the northeast portion.

The Property block contained dwellings and storefronts. An amusement park with a casino, hotel and several sheds is identified on the adjacent north block, across West 154th Street. A foundry was noted where the wood products building was formerly located further north. Asphalt paving was identified further north of the foundry. A coal yard was identified to the northeast of the Property. Elevated railroad tracks and a train station were noted along Frederick Douglass Boulevard to the west. A park is now identified to the east, across Macombs Place. An additional casino is identified on the south adjacent block, across West 153rd Street. The Metropolitan Street Railway Co. construction department building is identified to the southwest of the Property. A boat club is identified further southeast of the Property. The surrounding blocks comprised dwellings and vacant land.

1922

The Property, Property block, and surrounding area details are mostly indiscernible due to lack of detail in this map.

A coal yard was identified to the northeast of the Property. A boat club is identified to the southeast of the Property.

1928

The Property, Property block, and surrounding area details are indiscernible due to lack of detail in this map.

The 8th Avenue Rail Yard was identified to the north of the Property.

1939

The Property contained a gas station with ten 550- gallon gasoline USTs, as well as two auto shops and an area identified as "pits

The Property block contained dwellings and store fronts. The north adjacent block across West 154th Street contained a dance hall, steam laundry, two auto repair shops, and two garages. The garages contained seven buried 550-gallon underground storage tanks. The 8th Avenue Rail yard appeared to be vacated to the north. The asphalt paving to the north of the former foundry is no longer identified. A coal yard was identified to the northeast of the Property. Elevated railroad tracks were noted along Frederick Douglass Boulevard to the west. A lodging house, mission, and garage were identified further northwest of the Property. The garage to the northwest contained two 550-gallon gasoline USTs. Harlem Lane Park is identified to the west of the Property, across Macombs Place. Several auto repair shops and apartment buildings were also noted to the south of the Property. An ice storage building is identified further south. The surrounding blocks comprised dwellings and commercial storefronts.

1950

The Property remained similar to the 1939 map.

One of the former garages noted on the adjacent north block is now identified as a plumbing supply company, while the other garage is now identified as a garage and repair. A metal workshop was identified northwest of the Property. The former vacant rail yard to the north across West 155th Street now contained auto parking with a garage and auto repair shops. The apartments to the south are now identified as Harlem River Houses. No further significant changes were noted from the 1939 map.

1968

A post office is now identified on the northern portion of the Property and a filling station is identified on the southern portion of the Property.

The former metal workshop identified northwest of the Property is identified as a dwelling. The former auto parking with a garage and auto repair shops to the north contained a public park. The elevated railroad tracks and station to the west along Frederick Douglass Boulevard are no longer identified. A motel was noted southwest of the Property. No further significant changes were noted from the 1950 map.

1976-1980

The Property remained similar to the 1968 map. The dance hall on the north adjacent block is no longer identified. The steam laundry, plumbing supply company, garage and auto repair shops remain.

1981

The Property remained similar to the 1976-1980 maps. The adjacent north block is now identified as mainly vacant, with only one building identified as a steam laundry with a boiler room on the north-central portion of the block.

No further significant changes were noted from the 1976-1980 maps.

1983-1988

The Property remained similar to the 1981 map.

The north adjacent block now contained a commercial store in the location of the former steam laundry building by 1983. The boiler room is still identified with the commercial building. Parking is identified to the northwest on the north adjacent block by 1986.

Some residential lots to the south that were formerly occupied are now vacant. Col. Charles Young Triangle is now identified west of the Property, the former location of Harlem Lane Park. No further significant changes were noted from the 1979-1980 maps.

1989

The Property, Property block, and surrounding area details are indiscernible due to lack of detail in this map.

1991-1995

The former filling station is now identified as parking for the post office.

The former garage and repair shop on the adjacent north block (adjacent east of the plumbing supply company) is now identified as a warehouse. A community center and community garden are identified further southwest of the Property by 1994 and 1995, respectively.

No further significant changes were noted from the 1983-1988 maps.

1996

The Property remained similar to the 1991-1995 maps. The northern portion of the adjacent north block is now identified entirely as parking.

No further significant changes were noted from the 1991-1995 maps.

2001-2005

The Property appeared similar to the 1996 map.

The auto brake services building on the adjacent north block is now identified as a car wash. No further significant changes were noted from the 1996 map.

In summary, historical Sanborn maps indicated that the Property was developed by 1939 with a gasoline station, auto shops with pits. The post office was built by 1968, but the gas station was not demolished until approximately 1980 after which that was used by the post office for parking (but other evidence suggests fueling of post office vehicles was also conducted.

The surrounding neighborhood was mixed-use, with automotive/industrial facilities including garages (with gasoline tanks on the adjacent north block; and transportation uses to the west.

The surrounding area was sparsely developed with residential uses in the early 20th century, and was subsequently densely developed with residential, commercial, institutional, automotive, and transportation uses.

5.1.2 Aerial Photographs

Since historical fire insurance maps were available for the Property (and surrounding area) and these maps included information relating to land use, aerial photographs would, most likely, not provide additional useful information relevant to the potential for recognized environmental conditions or other environmental concerns. As such, aerial photographs were not reviewed.

5.1.3 Property Tax Files and Zoning Records

Based on NYC Department of City Planning's Zoning and Land Use Map (ZoLa), the Property is zoned as R7-2 (Residential).

5.1.4 Local Street Directories

A review of historical city directories was conducted. Table 1 presents descriptions and interpretations from the historical city directory review:

Table 1
Historical City Directories

Year	Comments
1920	**Property:** Not Listed **Surrounding Properties:** Residential
1923	**Property:** Not Listed **Surrounding Properties:** Residential
1927	**Property:** Commercial **Surrounding Properties:** Residential, Commercial, Drayman Operating Co. Inc. Garage (251 W 154th Street)
1931	**Property:** Residential **Surrounding Properties:** Residential, Commercial
1934	**Property:** Not Listed **Surrounding Properties:** Residential, Commercial, Drayman Operating Co. Inc. Garage (251 W 154th Street)
1938	**Property:** Not Listed **Surrounding Properties:** Residential, Commercial, Drayman Operating Co. Inc. Garage (251 W 154th Street)
1942	**Property:** Not Listed **Surrounding Properties:** Residential, Commercial, New Day Garage (251 W 154th Street)
1947	**Property:** Not Listed **Surrounding Properties:** Residential, Commercial, Peace Mission Garage (267 W 154th Street)

1993	**Property:** Not Listed **Surrounding Properties:** Commercial
1998	**Property:** Not Listed **Surrounding Properties:** Commercial
2000	**Property:** Commercial **Surrounding Properties:** Residential, Commercial
2006	**Property:** Commercial **Surrounding Properties:** Residential, Commercial
2010	**Property:** Not Listed **Surrounding Properties:** Residential, Commercial
2014	**Property:** Not Listed **Surrounding Properties:** Residential, Commercial

The Property was listed with residential and commercial uses, including alternative addresses of 246 W 154th Street, 253 W 153rd Street, 91 Macombs Place, 87 Macombs Place, 257 W 153rd Street, 246 W 154th Street and 232 W 154th Street.

The following were notable nearby historical city directory listings:

- Drayman Operating Co. Inc. Garage & New Day Garage (251 W 154th Street), approximately 60 feet north of the Property between 1927 and 1942.
- Peace Mission Garage (267 W 154th Street), approximately 190 feet northwest of the Property in 1947.
- Bridges EDW E Window Washing and B & G Service (262 W 154th Street), approximately 160 feet west of the Property, between 1956 and 1958.

Copies of the City Directory listings are provided in Appendix E.

5.1.5 Recorded Land Title Records

Copies of title records were not provided to AKRF for review. Copies of title records were not provided to AKRF for review. A review of computerized New York City Automated City Register Information System (ACRIS) records, which included records of financial transactions involving the Property, identified no environmental liens for the Property.

5.2 Regulatory Review

Regulatory database information, as shown in Appendix C, was obtained from EDR, Inc. of Shelton, CT. The Introduction of Appendix C includes summaries of the databases searched, their radii around the Property and limitations of the data. The databases searched and associated radii were consistent with ASTM E1527-13.

5.2.1 Federal

The federal databases searched included the National Priority List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); Emergency Response Notification System (ERNS); Toxic Chemical Release Inventory System (TRIS); the Permit Compliance System of Toxic Wastewater Discharges (WWD); the USEPA Civil Enforcement Docket; and the Air Discharge Facilities (ADF). The federal listing of facilities which are subject to corrective action under the Resource Conservation and Recovery Act (CORRACTS) is discussed with the State databases of RCRA listings.

The federal databases searched included the National Priority List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); Superfund Enterprise Management System Archive (SEMS-ARCHIVE), Emergency Response Notification System (ERNS); Toxic Chemical Release Inventory System (TRIS); and Federal Institutional Control/Engineering Control Registries. The federal listing of facilities which are subject to corrective action under the Resource Conservation and Recovery Act (CORRACTS) is discussed with the State databases of RCRA listings.

National Priority List (NPL)

The NPL is the USEPA's compilation of some sites that probably remedial action under the Superfund Program. NPL sites can pose a significant risk of stigmatizing surrounding properties and thus impacting property values.

The Property was not identified in the NPL database.

One NPL site was identified within a one-mile radius of the Property. The Hudson River PCBs site, located approximately 4,551 feet northwest of the Property. The site is also identified I the SEMS database. Based on the distance from the Property, the NPL site would not be expected to have significantly affected subsurface conditions at the Property.

Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)

CERCLIS is a compilation of sites which the USEPA has investigated, or plans to investigate, pursuant to the Superfund Act of 1980 (CERCLA). As such, some of these sites may ultimately present concerns and others may not (but could still pose a perceived threat, thus affecting property values).

No CERCLIS sites were identified within a ½-mile radius of the Property.

SEMS-ARCHIVE (Superfund Enterprise Management System Archive)

This database tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time.

No SEMS-Archive sites were identified within a ½-mile radius of the Property.

Emergency Response Notification System (ERNS)

This federal database, compiled by the Emergency Response Notification System, records and stores information on certain reported releases of petroleum and other potentially hazardous substances.

No ERNS listings were identified as potentially located on the Property in the database information.

Toxic Chemical Release Inventory System (TRIS)

The TRIS contains information reported by a variety of industries on their annual estimated releases of certain chemicals.

No TRIS sites were identified within a ⅛-mile radius of the Property.

Federal Institutional Control/Engineering Control Registries

These registries are listings of sites with engineering and institutional controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site.

The Property was not listed in the Federal Institutional Control/Engineering Control Registries database.

5.2.2 State

The state records reviewed included listings of hazardous material spills; Resource Conservation and Recovery Act (RCRA) Notifiers; Chemical Bulk Storage (CBS); Solid Waste Facilities (SWF); Petroleum Bulk Storage (PBS); State Inactive Hazardous Waste Disposal Sites (SHWS); State Hazardous Substance Waste Disposal Sites (SHSWDS); Major Oil Storage Facilities (MOSF); Brownfield Sites; Environmental Restoration Program (ERP) sites; Voluntary Cleanup Program (VCP) sites, and Brownfield Cleanup Program (BCP) sites.

New York SPILLS Database

This database includes releases reported to the NYSDEC, including tank test failures (for USTs only) and tank failures. A total of 244 spills were reported within a ½-mile radius of the Property, including 65 LTANKS and 244 NY Spills sites.

The Property was listed on the Spills database:

- Spill No. 8903078/8907091 was reported in June 1989 at the Property relating to a 1,500-gallon No. 2 fuel oil tank with a 0.5 gal/hour leak. The spill was closed in October 1992. No further information was provided.

Most other listings were for small quantities of recovered material identified in manholes, vaults, and service boxes on the surrounding intersections or abandoned materials in vacant properties or along the road. Recovered materials include petroleum, dielectric fluid, and lead, and due to regulatory status are not anticipated to have affected the subsurface conditions at the Property.

Based on listing details, including nature of the spills, distance from the Property, and/or inferred groundwater flow direction, the other reported spills would not be expected to have affected subsurface conditions at the Property. Details from all spills are included in Appendix D.

Resource Conservation and Recovery Act (RCRA) Notifiers Listings

This database lists sites that have filed notification forms regarding hazardous waste activity, including: treatment, storage and disposal facilities (TSDs); small-quantity (SQG) and large-quantity generators (LQG); and transporters regulated under RCRA. The discussion below includes any CORRACTS listings of facilities that are subject to corrective action under RCRA.

No CORRACTS sites were listed within a one-mile radius of the Property. No TSD facilities were listed within a one-half mile radius of the Property and 2 Generators/Transporters and 50 non-generators were reported within a ⅛-mile radius of the Property. The Property was not listed as a RCRA generator (or non-generator) of hazardous wastes.

Based on their locations or listing details (i.e., waste type), the listed RCRA facilities, including Con Ed listings associated with utility vaults near the Property, are not anticipated to affect the Property (releases within utility vaults tend to be contained within the vaulted structures).

Chemical Bulk Storage (CBS) Database

The New York CBS is a list of facilities that store regulated non-petroleum substances in aboveground tanks with capacities greater than 185 gallons and/or in underground tanks of any size.

No CBS facilities were listed within a ⅛-mile radius of the Property.

Solid Waste Facilities (SWF)

This database includes certain landfills, incinerators, transfer stations, recycling centers, and other sites which manage solid waste.

No Solid Waste Facilities were identified within a ½-mile radius of the Property.

Petroleum Bulk Storage (PBS) Database

This database lists facilities that registered having either aboveground or underground petroleum tanks with total storage exceeding 1,100 gallons. Facilities with more than 400,000 gallons appear on the Major Oil Storage Facilities (MOSF) database (see below).

A total of 24 PBS facilities, including the Property, were identified within a ⅛-mile radius of the Property.

Table 1
Area Petroleum Bulk Storage Facility Data

Location	Capacity (gallons)	Product Stored	Status	Distance/Direction from the Property
Power Test/Getty #00281 83 Macombs Place	1 x 2,000 UST 5 x 550 USTs 1 x 550 UST	Gasoline Gasoline Gasoline	Removed Removed In Service	Property

Table 1
Area Petroleum Bulk Storage Facility Data

Location	Capacity (gallons)	Product Stored	Status	Distance/Direction from the Property
J.J.A Holding Corp. 75 Macombs Place	1 x 5,000 UST	No. 2 Fuel Oil	In Service	Adjacent south
Colonial Park Station 99 Macombs Place	1 x 1,500 UST	No. 2 Fuel Oil	Closed-In Place	41 feet east-northeast
Fordham Toyota 235 W. 154th Street	9 x 550 USTs 1 x 550 UST 2 x 5,000 USTs 1 x 500 AST 1 x 500 AST	Gasoline Waste Oil No. Fuel Oil Waste Oil Motor Oil	Removed Removed Removed In-Use In-Use	96 feet northeast
262 West 154th Street	1 x 2,500 AST	No. 2 Fuel Oil	Closed-Removed	184 feet northwest
270 West 153rd Street	1 x 3,000 AST	No. 2 Fuel Oil	In Service	224 feet west
2918 8th Avenue Association 2918 8th Avenue	1 x 1,500 AST	No. 2 Fuel Oil	Closed-Removed	386 north-northwest
Samantha MGT, LLC 301 West 154th Street	1 x 2,000 AST	No. 2 Fuel Oil	In Service	427 feet northwest
Madam C J Walker Houses 2919 8th Avenue	1 x 4,000 AST	No. 2 Fuel Oil	Closed-Removed	434 north-northwest
2915 8th Avenue	1 x 3,000 AST	No. 2 Fuel Oil	In Service	453 feet northwest

Notes: AST - aboveground storage tank
UST - underground storage tank

Based on listing details, distance from the Property, and/or inferred groundwater flow direction, the tanks at the Property and those within 100 feet might have affected the property Subsurface but the remaining listed facilities would not be expected to have done so. Details of all PBS facilities located within ¼ mile of the Property are included in Appendix D.

State Inactive Hazardous Waste Disposal Site Registry (SHWS)

This program (also known as State Superfund) lists information regarding a variety of sites likely requiring cleanup.

Two State Inactive Hazardous Waste Disposal Sites were reported within a one-mile radius of the Property. The following SHWS listing has the potential to affect the environmental integrity of the Site and is considered REC/VEC:

Based on listing details and distance from the Property (over 1,700 feet away), these facilities are not anticipated to have affected the subsurface at the Property.

State Hazardous Substance Waste Disposal Site Study (SHSWDS)

This database tracks certain sites that were not listed on SHWS, but may still require investigation and/or cleanup.

No SHSWDS facilities were identified within a ½-mile radius of the Property.

Major Oil Storage Facilities (MOSF) Database

These facilities have petroleum storage of 400,000 gallons or more.

No Major Oil Storage Facilities were reported within a ½-mile radius of the Property.

Environmental Restoration Program

These sites (which are generally municipally-owned) are receiving New York State funding for site investigation and remediation. Some sites in this program have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present.

No ERP sites were identified within a ½-mile radius of the Property.

Voluntary Cleanup Program/Brownfield Cleanup Program

The Voluntary Cleanup Program (VCP) is a NYSDEC program for investigation and remediation of (generally) privately-owned sites. Some sites in this program have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present. The Brownfield Cleanup Program (BCP) program is the successor to the Voluntary Cleanup Program. Again, some sites have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present.

Two BCP sites were listed within ½-mile of the Property. No VCP sites were identified within ½-mile of the Property. The following BCP listing has the potential to affect the environmental integrity of the Property and is considered REC/VEC:

Based on listing details and distance from the Property (more than 1,700 feet), these facilities are not anticipated to have affected subsurface conditions at the Property.

New York City (E) Designation Site Listing

A New York City (E) designation for a property requires that the owner conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the New York City Office of Environmental Remediation (NYCOER) before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements).

The Property was not assigned an E-designation according to the database information.

Registered Dry Cleaners/EDR US Hist Cleaners

The registered dry cleaners database was researched to identify listings within one-quarter mile of the Site. As a supplement to the registered dry cleaners database, EDR's proprietary listing of potential drycleaner sites (listings based on the opinion of EDR) was also reviewed.

The Property was not listed in the EDR US Hist Cleaners database. Two Hist Cleaners and three Registered Dry Cleaners sites were listed within a one-half mile radius of the Site. but both were more than 450 feet from the Property and are therefore not anticipated to have affected the Property.

5.2.3 Local Agency File Review

Records available online from the New York City Fire, Buildings, and Finance Departments were viewed for the Property. Since the records typically address a multitude of issues, the review focused on items likely to relate to the potential presence of hazardous materials, e.g., petroleum tank installation applications and permits, and records indicating prior uses. Copies of other pertinent local records and Freedom of Information Law (FOIL) requests are included in Appendix D.

Fire Department of New York City (FDNY)

The FDNY is responsible for the enforcement of local fire codes pertaining to the use and storage of flammable and hazardous materials. FDNY maintains public records with regard to tanks in six separate databases: (1) Total amount and size of existing fuel oil/heating oil; (2) Total amount and size of removed or sealed fuel oil/heating oil; (3) Total amount and size of existing buried motor vehicle tanks; (4) Total amount and size of removed or sealed motor vehicle tanks; (5) Most recent tank/piping test; and (6) History of buried tank leaks. Searches of the "total amount and size of existing fuel oil/heating tanks" and "the total amount and size of removed or sealed fuel oil/heating tanks" databases were requested in a record search form dated December 27, 2019. As of the date of this report, the FDNY has not issued a response. If issues of potential concern are identified upon receipt of a response, an addendum to this report will be prepared to discuss relevant findings.

Buildings Department (DOB)

Electronic NYCDOB records for the Property were reviewed to determine whether there were any references to buildings, tanks or other structures, property usage or inspection reports that may have indicated the presence, past use, or release of hazardous substances, wastes or petroleum products within the Property.

Computerized Buildings Department records for the Property tax lot identified the following:

- A permit issued in 1950 for a gas tank;
- A permit issued in 1951 and 1969 for an oil burner application;

No additional pertinent environmental records were identified in the NYCDOB electronic files.

Department of City Planning (NYCDCP)

Online NYCDCP records identified no E-Designations or Restrictive Declarations (RDs) for the Property.

Department of Finance

Electronic property transaction records for the Property Block and Lot were reviewed from the New York City Department of Finance Office Automated City Register Information System (ACRIS). Deed information obtained from the ACRIS files is summarized as follows:

83 Macombs Place (Block 2039; Lot 15):

Year	Grantor/Grantee
1976	Grantor is: Charles J. Bensley; Grantee is: Leemilts Petroleum Inc.
1988	Grantor is: Leemilts Petroleum Inc.; Grantee is: 83 Macombs Place Inc.

1989	Grantor is: 83 Macombs Place Inc.; Grantee is: United States Postal Service

93 Macombs Place (Block 2039; Lot 45):

Year	Grantor/Grantee
1971	Grantor is: Colonial Park P.O. Inc.; Grantee is: Charles J. Bensley
2001	Grantor is: Charles J. Bensley; Grantee is: Colonial Park Management LLC
2012	Grantor is: Estate of Charles J. Bensley; Grantee is: Colonial Park Management LLC
2012	Grantor is: Colonial Park Management LLC; Grantee is: Harlem River Management Corp.

New York City Department of Environmental Protection (NYCDEP)

AKRF sent a FOIL request pertaining to environmental records to the NYCDEP on December 27, 2019. On December 27, 2019, NYSDEC issued a response e-mail acknowledging the request. In an email dated January 8, 2020, NYCDEP indicated that no records associated with the Property were identified.

New York City Department of Health and Mental Hygiene (NYCDOHMH)

AKRF sent a FOIL request pertaining to environmental records to the NYCDOHMH on December 27, 2019. To date, no response has been provided. If issues of potential concern are noted upon receipt of the information, an addendum to this report will be created to discuss relevant findings.

New York State Department of Health (NYSDOH)

AKRF sent a FOIL request pertaining to environmental records to the NYSDOH on December 27, 2019. To date, no response has been provided. If issues of potential concern are noted upon receipt of the information, an addendum to this report will be created to discuss relevant findings.

5.2.4 Additional Environmental Record Sources

To enhance the search, ASTM requires that additional local records be reviewed (i.e., beyond those included as part of the standard database search or checked online) when, in judgment of the environmental professional, such records for the Property or any adjoining property would be reasonably ascertainable; and useful, accurate and complete in light of the objective of the records review. These records include:

- Local brownfields lists
- Local lists of landfill/solid waste disposal sites
- Local lists of hazardous waste/contaminated Sites
- Local lists of registered tanks
- Local land records (for activity use limitations)
- Records of emergency release reports
- Records of contaminated public wells

Sources for these records include:

- Fire Department

- Local/Regional Water Quality Agency
- Local Electric Utility (for PCB records)

In addition to the Local Agency File Review, AKRF sent Freedom of Information Law (FOIL) requests on December 27, 2019 to the NYSDEC to determine whether pertinent environmental records for the Property could be obtained for further review. In an email dated January 13, 2020, NYSDEC indicated that no records associated with the Property were identified.

Copies of the FOIL requests and responses are included in Appendix D.

If issues of potential concern are noted upon receipt of this information, an addendum to this report will be created to discuss relevant findings. In AKRF's judgment, no such additional local records meeting the ASTM criteria are pertinent for the Property.

6.0 USER-PROVIDED INFORMATION

In preparing this Phase I ESA, AKRF requested that the client provide any pertinent information regarding the Property, specifically:

- The reason for performing the Phase I ESA;
- Whether they were aware of any pertinent current or historic activities at or near the Property, including but not limited to: hazardous substances or petroleum, waste management practices, filling or disposal drains, septic/sewer systems, and potable and non-potable wells;
- Owner and occupant information and whether they were aware of any previous Phase I ESAs or other potentially pertinent reports, plans or information;
- Whether any *environmental liens* or *activity and land use limitations* are in place or filed or recorded against the Property or whether there was pending, threatened, ongoing or past violations, litigation or enforcement action relevant to hazardous substances or petroleum products;
- Whether they had any specialized knowledge or experience related to the Property or nearby properties (e.g., specialized knowledge of the chemicals used by this type of business);
- Whether the (anticipated) purchase price reflects that the Property is or could be contaminated; and
- Whether they were aware of commonly known or reasonably ascertainable information about environmental conditions of the Property including current/past uses of the Property and adjacent properties.

The Phase I ESA was conducted to provide preliminary environmental information as part of due diligence for the potential renovation/redevelopment of the Property. To the extent that pertinent additional information was provided, it has been summarized elsewhere in this report.

7.0 PREVIOUS STUDIES

No previous studies were provided.

8.0 VAPOR ENCROACHMENT SCREENING

A Tier 1 Vapor Encroachment Screening was conducted in accordance with ASTM Standard E2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. The term "Vapor Encroachment Condition" means the presence or likely presence of vapors from chemicals of concern (COC) in the subsurface of a Property caused by the release of vapors on or near the Property. The object of the Tier 1 screening is to conduct a screen for vapor encroachment based on findings from the Phase I ESA to determine if a possible VEC exists at the Property.

Based on AKRF's review of historical and regulatory database records, VECs were identified based on the Tier 1 Vapor Encroachment Screening, due to historical and ongoing gasoline storage/fueling, historical releases auto repair and historical fuel oil storage.

9.0 LIMITATIONS AND DATA GAPS

This assessment met the requirements of the American Society for Testing and Materials (ASTM) as established by ASTM Standard E1527-13 at the time it was performed, with the following limitations:

- Results of this investigation are valid as of the dates on which the investigation was performed.
- There was no Property access. The inspection of the Property was limited to viewing from outside of the chain link fence.
- Interviews and user provided information were limited to those discussed in Section 6.0. To the extent that interviews were not conducted with the list of interviewees cited in the ASTM Standard (past and present owners, operators, and occupants of the Property and local government officials), AKRF does not believe that this represents a significant data gap likely to result in additional or significantly changed recognized environmental conditions or conclusions.
- The Property area history was not conducted in five-year intervals. However, sufficient information about the history of the Property and surrounding area could be obtained from the available historical Sanborn and topographic maps, Buildings Department records, and interviews, and this data gap is not likely to alter the conclusions of this report.
- Agency file reviews for the Property and adjacent properties consisted of a review of standard databases and electronic records maintained by pertinent departments and agencies (summarized in Section 5.2). AKRF believes that this file review was sufficient in determining the potential for recognized environmental conditions or other environmental concerns at the Property and additional reviews beyond this are not warranted and would not likely change the conclusions of this assessment.

10.0 CONCLUSIONS AND RECOMMENDATIONS

This Phase I Environmental Site Assessment was performed in conformance with ASTM Standard E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice. Any exceptions to, or deletions from, the Standard are described in Section 8.0. The term "Recognized Environmental Condition" (REC) means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The Standard also includes definitions of Historic REC, Controlled REC and De Minimis Condition.

A Tier 1 Vapor Encroachment Screen was also conducted in accordance with ASTM Standard E2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. The term "Vapor Encroachment Condition (VEC)" means the presence or likely presence of vapors from chemicals of concern (COC) in the subsurface of a property caused by the release of vapors on or near the property.

This assessment revealed the following RECs/VECs:

- The Property was listed as being a gasoline service station as early as 1939 with ten 550- gallon gasoline underground storage tank (USTs), two auto shops and "pits". According to the NYSDEC Petroleum Bulk Storage (PBS) database, one 2,000-gallon underground storage tanks (UST) and five 550-gallon USTs containing gasoline were closed and removed in 1988. One 550-gallon UST containing gasoline is listed as in service; however, the site visit access was limited to the publicly accessible areas and any active fueling or maintenance/repair facilities were not observed. There must also have been fuel oil tanks as Spill No. 8903078/8907091 was reported in June 1989 at the Property relating to a 1,500-gallon No. 2 fuel oil tank with a 0.5 gal/hour leak. The spill was closed in October 1992. No further information was provided.
- Additional automotive/industrial facilities were located nearby including garages with gasoline tanks and repair facilities on adjacent blocks, and petroleum USTs at an adjacent property.
- Sanborn maps, City Directories, and regulatory database report listings indicated that the Property was developed as early as 1909 with the uses store, gasoline station, auto shops with pits, filling station, and its current use as a post office and associated parking. Potential undocumented and/or documented releases associated with the aforementioned uses may have affected subsurface conditions (i.e., from potential former chemical and/or petroleum usage).

Other Environmental Concerns and De Minimis Conditions

- Buried foundation elements and demolition debris from the former Property buildings could include polychlorinated biphenyls (PCBs), asbestos containing materials (ACM), lead-based paint (LBP).
- Based on the age of the current building (constructed by 1968, according to historical land use maps), building materials contain polychlorinated biphenyls (PCBs), asbestos containing materials (ACM), lead-based paint (LBP).

Recommendations

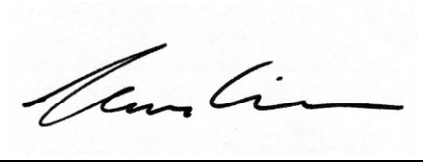
- Prior to redevelopment of the Property, AKRF recommends conducting a subsurface investigation, including a geophysical survey; and the collection and laboratory analysis of soil, soil vapor, and groundwater samples (if encountered above bedrock).

- Any suspect ACM, PCB-containing material, and/or LBP encountered in the subsurface should be properly characterized, managed, and disposed of in accordance with all applicable regulations prior to disturbance during future construction activities.
- If any petroleum USTs or buried ASTs are encountered during the redevelopment, they should be closed and removed, along with any contaminated material, in accordance with applicable requirements. Any evidence of a petroleum spill should be reported to New York State Department of Conservation (NYSDEC) and addressed in accordance with applicable regulatory requirements, including those relating to tank registration.
- During soil disturbance, all excavated soil should be managed in accordance with applicable regulatory requirements. All soil and any other materials intended for off-site disposal should be tested in accordance with the requirements of the intended receiving facility. Transportation of material leaving the site for off-site disposal should be in accordance with federal, state and local requirements covering licensing of haulers and trucks, placarding, truck routes, manifesting, etc. If contaminated soil is discovered during soil excavation, it should be removed and disposed of in accordance with applicable regulatory requirements, including those relating to spill reporting, if necessary.
- If dewatering is required during construction, water must be discharged in accordance with New York City Department of Environmental Protection (NYCDEP) requirements.
- Prior to any renovation or demolition activities with the potential to disturb suspect ACM, an asbestos survey should be conducted. If these materials prove to contain asbestos, they should be properly removed and disposed of in accordance with all state and federal regulations prior to any renovation or demolition that would disturb those materials.
- Unless there is labeling or test data that indicates that fluorescent lights, caulking, and electrical equipment, are not mercury- and/or PCB-containing, if disposal is required, it should be performed in accordance with applicable federal, state and local regulations and guidelines.
- Any renovation or demolition activities with the potential to disturb lead-based paint must be performed in accordance with the applicable Occupational Safety and Health Administration regulation (OSHA 29 CFR 1926.62—Lead Exposure in Construction). If the Property is visited regularly by children under 6 years of age, the building may be considered a Child Occupied Facility by the US EPA. Additional lead-based paint requirements should lead-based paint remain during/after renovation may include occupant notification, contractor licensing, and lead-safe work practices.

11.0 SIGNATURE PAGE

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property for which the assessment was performed. We have performed all the appropriate inquiries in conformance with standards and practices set forth in 40 CFR Part 312.



Marcus Simons
Senior Vice President

12.0 QUALIFICATIONS

The purpose of this assessment was to convey a professional opinion about the potential presence or absence of contamination, or possible sources of contamination on the property, and to identify existing and/or potential environmental problems associated with the property including *Recognized Environmental Conditions* as defined in ASTM Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice.*

The assessment was performed in accordance with customary principles and practices in the environmental consulting industry, and in accordance with the above-referenced ASTM Standard, except as noted otherwise in Section 8.0. It should only be used as a guide in determining the possible presence or absence of hazardous materials on the property at the time of the reconnaissance, as it is based upon the review of readily available records relating to both the property and the surrounding area, as well as a visual reconnaissance of current conditions.

This Phase I Assessment is not, and should not be construed as, a guarantee, warranty, or certification of the presence or absence of hazardous substances, which can be made only with testing, and contains no formal plans or recommendations to rectify or remediate the presence of any hazardous substances which may be subject to regulatory approval. This report is not a regulatory compliance audit.

This report is based on services performed by AKRF, Inc. professional staff and observation of the property and its surroundings. We represent that observations made in this assessment are accurate to the best of our knowledge, and that no findings or observations concerning the potential presence of hazardous substances have been withheld or amended. The research and reconnaissance have been carried to a level that meets accepted industry and professional standards. Nevertheless, AKRF and the undersigned shall have no liability or obligation to any party other than Harlem Congregations for Community Improvement and their successors or assignees, and AKRF's obligations and liabilities to the above, their successors or assignees is limited to fraudulent statements made, or grossly negligent or willful acts or omissions.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AKRF, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/25/2019 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/24/2019 has revealed that there is 1 RCRA-LQG site within approximately 0.125 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
NYCHA HARLEM RIVER H	***2641 ADAM CLAYTON PO***	***SSE 0 - 1/8 (0.111 mi.)***	***K98***	***214***
EPA ID:: NYR000081885				

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/24/2019 has revealed that there is 1 RCRA-VSQG site within approximately 0.125 miles of the target property.

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 08/12/2019 has revealed that there are 2 NY SHWS sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 11/11/2019 has revealed that there are 65 NY LTANKS sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 6 NY UST sites within approximately 0.125 miles of the target property.

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 11/11/2019 has revealed that there are 244 NY Spills sites within approximately 0.5 miles of the target property.
